A liberal discount for contract advertisements.

Advertisements sent without written instructions will be inserted until forbidden and charged full time.

All advertisements measured by a scale of solid nonpareil—12 lines to the inch.

PROF. WILLIAM CROOKES

The Inventor of the Tubes Used by Prof. Roentgen.

The recent remarkable discoveries of mental work with a Crookes tube have brought prominently before the world the name of William Crookes.

He was born in London in 1832, and at an early age turned his attention to photography. After a course at the Royal College of Chemistry under Dr. Hoffman, during which, at the age of 17 years, he gained the Ashburton scholarship, he became in due time professor of chemistry at the University of Cambridge.

AN AFRICAN BROTHER

STRANGE SPECIMEN OF HUMANITY OF THE DARK CONTINENT.

Found by Prof. R. L. Garner, the Celebrated African Explorer and Investigator of Monkey Language, Habits and Characteristics—The Gorilla-Man.

One of the chief objects of my recent voyage to Africa was to determine with more precision the exact limits of the habitat of the gorilla and the distribution of the chimpanzee, especially that variety known as the "kulu kamba."

This river is traveled by white men from time to time, and many accounts are given of the wonders that are found along it, but the "Gorilla-Man" has been explored so little that no one could tell what it may yet produce.

Something more than a hundred miles from the capital of the Congo Free State, it is called Matadi, and to this centre gravitate members of all the tribes of the Congo basin.

There is no place in all the world, perhaps, where such a mass of humanity can be found. Almost every tribe known from Sierra Leone to the Cape, and nearly all the tribes of the Congo basin, are to be seen here.

The most singular specimen of the human race that I have ever seen I saw at this place. His resemblance to a gorilla was so striking that the most casual observer could not fail to see it.

He was not a freak of nature, but a typical man of his tribe. His body was long in proportion to his limbs, his legs comparatively short, and his arms comparatively long.

He was black as jet, and his face was glossy and shined like a black mirror. He was not caused by age, as the man was in the prime of his life.

His forehead was low and receding, the frontal boss being prominent in the centre and much depressed at the sides. His eyes were deep-set, and his nose was straight and of moderate width.

His ears were quite small and set close to the side of the head. They were much elongated and slightly angular. There was no feature of the man more like those of the gorilla than his ears.

His nose was flat and extremely broad, the nostrils wide apart and the skin deep red. That part of the nose was marked by a slight depression, suggesting two lobes at that part.

His jaws were massive and the chin receding. The angles of the jaw were pronounced and the muzzle projected to an unusual degree.

His teeth were extremely large and slightly discolored. The canines were observable whenever he opened his mouth.

His mouth was extremely large and the lips unusually thick. The lower lip was massive, that it almost drooped by reason of its own weight.

The whole visage was one of the most striking and grotesque that I have ever seen. It was a face that did not resemble the gorilla, but it was much more like it.

"BILL" NYE IS DEAD

A HUMOROUS WRITER WELL KNOWN IN CANADA.

How He Came to be Famous as a Writer—His Sketches and Personal Characteristics—Editor of the Laramie Boomerang—Whitcomb's Testimonial.

About fifteen years ago there began to appear in different newspapers extracts which were said to have been copied from a paper published at Laramie, Wyo., the name of which was said to be the Boomerang.

This was a humorous and amusing, but for a long time many of those who enjoyed the humor of them were very doubtful about the existence of a paper with such a seemingly absurd name.

However, it began to be understood that this newspaper, the Boomerang, as well as his humor, was written by a certain person, who this genius of humor of the Wyoming uplands was, and the papers began to mention a rumor that his name was Bill Nye.

It was not many months before the public knew that Bill Nye was a nom de plume, and that this genius of humor was baptize Edw. Edw. Wilson Nye.

He was born in Shelby, Piscataquis County, Maine, August 25, 1850, but at the age of 17 years, according to the legend, he took his parents to the west.

He had plenty of leisure time on his hands, which he used in writing a story for the Cheyenne Sun, at the rate of \$1 a column.

HE HELPED HIM OUT

HE VERY SENSIBLY HELPED HIS WIFE'S ADVERSITY.

A man on Capitol Hill has been out-judged by his wife. He thought he felt compelled to call his enemy to the aid of honor, but was restrained by the thought of his wife and children.

All day the affront rankled in his bosom. As he neared home, thinking every second of what he would, could or must do, he happened to think of his wife, and it dawned upon him like a sunburst that she was a woman of spirit and judgment.

He had this thought during his ride, he hastened into her presence, as if he were a boy of ten, and kissed her. He did this thinking that possibly by this time to-morrow evening he would be beyond the power of occupation.

Naturally, this unusual demonstration surprised the good woman. They had been married fifteen years. "Why, Henry," she exclaimed, "what is the matter with you? You seem strangely excited."

It was a minute before he could control his voice sufficiently to use it for talking purposes. "I am," he fairly roared, "I have been insulted."

"How? Who did it?" and his wife's spirit rose. "Henry, who?" she asked. "A scoundrel who came into my office this morning, snatched my pen, and wrung it out of my hand."

"What scoundrel?" she asked. "The man who stole my pen," he replied. "He was a scoundrel, and he stole my pen."

"What scoundrel?" she asked. "The man who stole my pen," he replied. "He was a scoundrel, and he stole my pen."

"What scoundrel?" she asked. "The man who stole my pen," he replied. "He was a scoundrel, and he stole my pen."

"What scoundrel?" she asked. "The man who stole my pen," he replied. "He was a scoundrel, and he stole my pen."
