cently a diamond weighing six carats and of exceptionally fine "water" came points be reached. From the great rarto light at Milford, near Cincinnati, ity of diamonds in nature, the hypoth-In this region diamonds have been This augmentation of the number of esis of a common home is the one more found at the rate of about one a year, localities, and the nearness of all to generally favored, and holders of this view point for its support to certain marks of "consanguinity" observed upon the stones already found.

its advance in the great ridge of morainic material known as the "kettle the ledges of rock over which it has ridden, in a simple language of its movement, after first having planed away the disintegrated portions of the rock to secure a smooth and lasting surface. As the same ledges have been overridden more than once, and at intervals widely separated, they are often found, palimpsest like, with recent characters superimposed upon earlier, ones. Many of the scattered leaves of this record have, however, been copied by geologists, and the autobiography of the ice is now read from maps which give the direction of its flow, and allow its motion as a whole, as well as that of each of its parts, to be satisfactorily studied. Recent studies by Canadian geologists have shown that one of the highest summits of the ice cap must have been located some distance west of Hudson Bay, and that another, the one which glaciated the lake region, was in Labrador, to the east of the same body of water. From these points the ice moved in spreading fans both northward toward the Arctic Ocean, and southward toward the States, and always approached the margins at the moraines in a direction at right angles to their extent. Thus the rock material transported by the ice was spread out in a great fan, which constantly extended its boundaries as it advanced.

The evidence from the diamonds discovered on the moraine of the Green Bay glacier is that their home, in case they had a common one, is between the northeastern corner of the State of the opinion of scientists, a first ap- home territory, since the lobes of the

rene festival which modern Granada is rene festival which modern Granada is celebrating. Apropos, I owe you an explanation. This morning a glance from you reproved me because I had not fallen to my knees as the procession passed. Do not deny it. Alas! It was not pride; it was not impiety that impelled me; for perhaps I, too, am a Christian. It was sorrow that was driving me mad, and—"

"Pardon me," I interrupted. "I do not understand." But I became all ears, seeing that he was about to unfold the longed-for biography. "I must give free rein to my feelings." he continued in a voice full of the saddest melancholy. "Yesterday, when we were nearing the holy city, you doubtless saw me tremble in silence; this morning also, during the procession, you surprised me in a state of unknowing preoccupation. So you are already my confidant, and therefore I bid you

"Here," he said, "above this fountain that is still darkened with the red stains of ancient blood, the valiant Ze-gries struck off the heads of their rivals, the Abencerrajes. In this court, and in this very hall, once lived 'hose famous houris, daughters of Yemen and Damascus, who worked their enand Damascus, who worked their enchantments over the Prophet's soldiers. Look up—view the galleries of filigree, thru which the moon's inconstant beams will flicker again to-night. Look at those roofs, bordered with gold and red, and you will see the mysterious legend of a thousand glorious reigns. Once they stood as praises to God and His warriors; from the days of Alhamar, who reared this castle in 40 years, to the time of Boabdil, who lost it in less time than it takes to heave a sign, all the heroes of Granada engraved their names on these fantastic galleries. O thou Yussef, ruler of the ancient Moors! O unfortunate Muley! O noble Mahomad! Where, oh where, are your ill-fated descendants? Here I am, the ill-fated descendants? Here I am, the last Zegri, who comes to call up your shades amid the Alhambra's ruins; but where, alas! are my unhappy broth-

Midsummer Fashions

pearance on her August vacation and not be at all out of date when the warm-weather season rolls around again.

Most surprising among the July reductions are the jaunty traveling and rain coats, and if a woman takes the pains to look carefully thru the bis look carefully thru the bis pains to look carefull play she is almost sure to find one garwith a new and unusual cut.

comes from England, the home of rain coats, that old-fashioned gloria is the popular material for this convenient wrap, which is more shapely than ever before, following the lines of the figure and held in by a well-fitted strap which comes to a point quite below the waistline in the front, or, disappearing at the side seams, buttons it side the coat and leaves the front to

hang in a princess line to the floo With a simple leg-of-mutton sleeve, these coats will be of service not only these coats will be of service not only for cool or dusty excursions during the remainder of the summer, but as a protection of almost imperceptible weight for heavy winter clothing.

In the matter of traveling suits, a little fashion bird has whispered that glossy Siciliarne clath in finely mixed

glossy Sicilienne cloth in finely mixed patterns is the material par excellence for lightweight tailored gowns, and is to enjoy a tremendous vogue next sea-sen. In choosing from the remnant of the ready-made suits a woman cannot go amiss in purchasing a bolero jacket and a circular skirt with a bias seam at back and front to prevent the sagging at the sides so common with the circular skirt of two years back.

According to a very up-to-date society journal, the most sought-after model this season in tailored frocks is

a veritable "double-decker," the upper flounce being finished in points and edged with braid in contrasting color. The bolero accompanying this skirt gives the effect of a shawl rather than a fitted garment, and the suit of voile worn by a mem ber of the smart set was a light shade of American beauty red, showing high

When selecting a late-season traveling hat from the endless array of bargains make sure it has a turned-up brim closely resembling a cake-tin with fluted edges, for these chic, Frenchyleoking hats have come to stay.

Bunches of roses, shaded or in delicately-blended colorings, fill in the erevices, and two or three folds of velvet extending up from the bandeau tend to soften the severe lines of the hat to the face. Heavily spotted veils are worn with these pert little chap-caux, and a short chiffon veil to match the face veil, thrown from the face and over the top of the hat, gives a fair traveler a particularly trim appear

It is said that her models that can be shown in motion on the screen, as well as apparatus for excharge for completely launching a newcomer in London society is \$100,000. specimens of plants, flowers and moths. Moreover the lady makes it an invari-ble condition that her clients shall By the use of lenses, diaphragms and patronize certain tradesmen indicated mirrors the object is illuminated and repatronize certain tradesmen indicated flected on to the screen. By use of an illuminating lens, a cone of light from by her, with whom, of course, she lias arranged for a "rake-off" on the profits. At present she enjoys a practical monopoly in her particular line, and thus has been in a position to dictate terms to the various silversmiths, stationers, caterers and others whom she ecommends her clients to patronize.

Heretofore the commission demanded by her has been 50 per cent. of the profits, and if she had remained satisfied with this uncommonly stiff rate all would have been well. Not long ago, nowever, 'the great introducer,' as she has been dubbed in social circles, served actice on all the purveyors with whom she has relations to the effect that thereafter her share of the profits must be 60 per cent. This ultimatum led to

ess his demands are met the matter will be brought into court and the whole business "aired," Generally speaking, of course, the bills of rich Americans who are being isted upon London society in this way onable go-between's commission paid o her when the account is settled. Juite often, however, when one of her ion the ""introducer" undertakes place all the necessary orders and pay fill the bills, with the understanding, if course, that the actual hostess shall elimburse her on being apprised of the net cost. The now recalcitrant florist was dealt with in this way, and herein ies the strength of his case, the Ameri-an "introducer" appearing in his books is the actual debtor, and not her guileess client. Probably the thing will not be allowed to come into court—one scandal would be too great. The florst's threat, however, has got noised bout in the inner circles of swelldom, they may be obliged to testify to that affect in the witness box. In case the suit actually should be brought there is likely to be a sudden epidemic of liness and of important foreign business. The sum of \$100,000 has been justed as this court favorite's charge for complete introduction of rich newor complete introduction of rich new omers into England's highest circles ion at court, which automatically prings invitations to all court affairs, invitations to the more privae social nctions and the attendance of at least tunctions and the attendance of a test-three members of royalty at Mrs. Moneybags' first grand effort. This fixed price covers the period of three months known as London's season. That is all that is necessary, and it That is all that is necessary, and it is really about the simplest way for the social aspirant to go about it. For when this three months is successfully sone thru with, Mrs. Moneybags is socially fixed for life. Her standing is secure for ever, and while more expensive than going into New York society it is more economical in the long run, as in New York one may cease to be a fad, and the second attempt to join the aristocracy would east more than the first. Then entering society thru the royal gates of Buckingham Palace practically conquers all the social marpractically conquers all the social mar-sets of the world at once. That \$100.-100 is invariably cash down. The American "introducer." however, is nothing if not adaptable, and she has what night be described as an "a le be described as an "a la carte" n, too. A WORD FROM A STUDENT

As a graduate of your school I desire to say that I am entirely satisfied with the instruction I received from you and the rapid progress I was able to make. The Magee method of teaching Illustrating has no equal. The personal interest you take in every student and the helpful criticism given on each lesson are alone sufficient to ensure success. I can vouch for the thorough practical nature of your instruction from the fact that I have filled good paying positions since my graduation. At present I am engaged with the J. L. Jones Engraving Co., of Toronto, at a good salary. I think this is sufficient endorsement of the efficiency of your instruction.

I take great pleasure in recommending your school to anyone interested in this popular profession, and wish you every success, and remain, J. MERLIN WALTERS Sincerely yours,

Whilst the "Hive" Inn sings:

CHIMALAPA LAND CO.

A PRINCIPALITY.

Over 200 square miles of virgin land and valuable timber.

Growing wild on this land are oranges, limes, demons, bananas, acao, vanilla and many wild fruits, while small tracts are planted by the natives in corn, coffee, sugar and tobacco of the finest quality.

It is the sportsman's paradise; there are a dozen species of wild mals, many choice game birds, and the rivers beautifully clear,

Owing to geographical situation, transportation facilities, healthful climate and the wonderful suitability of the land for all tropical products, it is generally predicted by government officials and experts who have made a study of tropical land, that a small strip between the Coatzacoalcos River and the railroad, which embraces the Chimalapa Lands, will soon be the highest priced land in the world. Planted in rubber in bearing, it is worth \$1000 per acre. The timber is of the finest quality, and of such variety that it can be apmahogany logs from this district have brought \$5000. We must have many of those amongst the great quantity of mahogany trees on our land. The average profit on this wood is \$50 per M.

Fortunes are being made from small mills cutting Spanish cedar into cigar box material. The Spanish cedar on the company's land would cun into millions worked up in this way. The most plentiful wood on the property is called Chico Zapote. There is in places worth of this wood to the acre. It closely resembles mahog any, and is taking its place. It is one of the most durable woods known. Rollers used in a sugar mill, which tradition states to be 175 years old, are sound and unworn. It is impervious to sait water and the destructive terede. Chicle, the basis of all chewing gums, is obtained from this tree The yearly revenue from this gum alone is estimated at \$25,000.

A Toronto contractor states that 2 other woods are worth \$100 per M. for interior finishing, and we already have several parties who wish to place orders in this city. Prima Vira or White Mahogany is now more highly prized than red for high-class furniture. There are several carriage woods much superior to anything grown here. In the Chamber of Commerce Building. Los Angeles, there is a Mexican cart known to be 200 years old. Although the wood has never seen oil or paint, it is still perfectly sound.

These are a few out of at least twenty-five varieties, every one of which is of great value for one or other of the many uses to which

25. Hemlock was worth \$5. It is now \$17 and scarce. If this is the case here is a comparatively new country with a small population, think of the United States cutting their forests at the rate of 30,000 acres per day, or Great Britain, France or Germany importing

A careful estimate made by a man of long experience places the net value of timber at \$31,000,000, and states that in ten years these figures will increase one-third. The land values are increasing very rapidly.

\$100 invested in these lands represents 13 acres with the timber thrown in. It is there to be seen. Samples cut by us from living trees are now to be seen at the company's offices.

Samples of woods, rubber, etc., at Company's offices, 88 to 90 Yonge Street, ******* Please send me book containing in-

our work, but he was doing it in our way. Presently, with one accord, all the elephants dropped work and moved in the direction of the sheds.

"That means it's 11 o'clock, said the foreman. Dinner hour. Not for King Edward himself could we get them to do a stroke of work from new until 3. It's their off time. At 3 they begin again, and work till dusk, and they start about 6 in the morning, but they don't understand overtime."

Elsphants As Workers.

A New Idea. "What are the suggestions for the

The greatest philanthropist of the age turned anxiously to his private secrewere dragging the logs to the mill to tary.

"The elephants around us." she writ'28, "were dragging the logs to the mill to be sawn. They were harnessed for this with a broad breastband and heavy chains. A native looped the chauss round the logs, and the elephant started off with them and deposited them on the trolley. Others were picking up the sawn planks with their trunks and carrying them across the yard to be pilled. A mahout sat on the neck of every-elephant, and if the animal picked up too small a plank the mahout would hint, with his iron spike, that two might go with that load. Then, grunting, the elephant would pick up a chair on casters them beside the pile, always returning for another load so long as there were none he would take his ease in the sun and wait. Or perhaps there were heavy logs to be pushed from one place to another; and if pushing would do, with his iron spike, that his trunk curled against the log, no elephant would give himself the trouble of picking it up, any more than a house maid will pick up a chair on casters. More fascinating it was than I can tell to see the jungle patrianch kneel down to a heavy log, twist his trunk arouni it, place it on the top of the pile, and the pile, and the pile, always returning for each of the pile, always returning for another load so long as there were heavy logs to be pushed from one place to another; and if pushing would do, with his trunk curled against the log, no elephant would give himself the trouble of picking it up, any more than a house maid will pick up a chair on casters. More fascinating it was than I can tell to see the jungle patrianch kneel down to a heavy log, twist his trunk arouni it, place it on the top of the pile, and the proper with the

English Art Sales

was a Bruges barber-surgeon's gift to a queen regent; there are the treasures of the palaces, works like Van Dyck's' portrait of Charles I. and Correggio's "Mercury Instructing Cupid in the Presence of Venus," which were sold by the Cromwellians for a song and bought back after many vicissitudes at high cost; there is the "Parish Clerk" which Gainsborough gave to an honest carrier; and there is the sumptuous "Family of Darius," which Veronese painted during his convalescence in an Italian villa and left behind in acknowledgment of the kind treatment received from his host—a mastertually paid. Christie's is also a fascinating realm of romance, where neglected pictures from the backstairs of country houses are auctioned off for thousands of guineas, or drinking cups for which sixteenth-century craftsmen were paid in shillings for their drudgery are sold for more than \$81,000 as ornaments for American dining-rooms. what grim sport there must be for ghosts, if that bustling salesroom in London, where a smooth-faced, dry-voiced auctioneer keeps the run of the guineas and occasionally taps the desk with a hammer, be a haunted place!

How eloquent would be the spirit rappings of George Morland, if these could be heard when his works are held up before a fashionable throng on Saturday afternoons and the rival dealers begin to compete for them! His stern father's prediction that he would either be hanged or would turn out a genius can be favorably interpreted when a little work like "The Dancing Dogs," for which he was glad to take 15 guineas, now commands a buzz of admiration at Christie's and 400 guineas as a record price. Genius seems to have won the day when a hastilypainted sketch of an itinerant showman making a monkey and some dogs dance in front of a cottage door has so high a valuation placed upon it; and the final victory is not surprising when Morland's father, mother and grand father were painters before him, and he came naturally by his vivacity of style, his bold craftsmanship and his habits of observation. Yet when that work was painted the artist was a spendthrift and a drunkard, working ever a dealer would advance him a few have ventured to forecast his ultimate triumph as an artist on that gloomy day when he was buried in an obscure day when he was buried in an obscure churchyard on Hempstead-road, a drunkard who had always been in debt? Yet it has come at last; and in consequence of the high prices at Christie's for "The Dancing Dogs" and "Higglers in the Morning," all the Morlands, with which town and country houses are well stocked have intry houses are well stocked, have inreased heavily in value. There is also a rising market for Raeburns. The Scottish Van Dyck married a lady of fortune when the

he lived; and a pair of his portraits are transferred to salesrooms, where was rattled off on Saturday for 9550 they will be exhibited at leisure, and guineas. Sir Joshua himself was at the top of the market while he lived, but top of the market while he lived, but his works are marching on whenever wise the competition between dealers the auctioneer introduces them to bidders. He received 150 guineas for the romances in the strange adventures of pictures. There is the famous Van Eyck, "Jan Arnoldfini and His Wife," which "Jan Ar

MEDALISTS OF DEWSON-STREET PUBLIC SCHOOL, 1905. Reading from left to right the names are as follows: M. Haviland, L. Haviland, M. Cameron, R. Cooper, H. Sheaser, A. Drynan, C. Liddell, T. Plummer, I. Woodward, B. Ross, T. Morgan, L. McLelland, A. Newlands, F. Caldwell, J. Avery, A. Likens, G. Scarlett, H. Davis, F. Smart, P. Michael, S. Hustwitt, W. Caldwell, A. Carter, H. Winning, G. Mackie.

this portrait and another of Sir Henry Raeburn himself, in dark coat, yellow waistcoat and white stock, 1460 guin eas was paid thirty years ago. There was a slight decline in values when the pair was resold in 1887 for 1320 guin-eas, but on Saturday, when a new standard was established, the two portraits between them brought 13.200 guineas, having advanced tenfold in eighteen years. The other Raeburns from Brook House were sold at high prices. The portrait of Sir Walter Scott, which was once in the possession of the poet Campbell, ran up from 200 guineas, the previous auctioi price, to 1000 guineas, and the portrait of Mrs. 1000 guineas, and the portrait of Mrs. Oswald of Auchincruive, a white-robed beauty, with a shapely neck and gold earrings, for which 200 guineas was paid in 1887, was fiercely competed for and finally sold for 3600 guineas. This was not the good lady of Auchincruive whose funeral pageantry drove Burns out of a comfortable inn on a frosty night and inspired the gloomy ode. night and inspired the gloomy ode, "Dweller in you dungeon dark;" but it was the fair Lucy Johnstone, whose beauty and graces dazzled the poet so completely that he at first resolved to say nothing at all about her "in despair of saying anything adequate." and finally wrote the charming poem "O wat ye wha's in yon toun" in praise or her loveliness. The sweet lady's portrait is now eighteen times as valuable as it was eighteen years ago, and has kept company as long as possible with Lady Raeburn, who headed the advance in prices and kept it. Lady Raeburn was the painter's good genius from the moment when, as the fascinating widow of Count Leslie, she set her dap for him agueves as she enabledshim with her money to take Sir Joshua's advice and to prepare himself for his carreer by two years' study in for his career by two years' study in Italy, so also by this portrait she lifts the values of all his works and places them close behind the Gainsboroughs and Reynoldses as priceless masters of the English school of portraiture.

Other pictures sold at Christie's disclosed the same upward tendency in values and the contrasts between the painters' earnings and the dealers' the painters' earnings and the dealers' the first Earl of Tylney and many of this relatives, was sold for £7550—a big his releatives, was sold for £7550—a big his releatives, was sold for £7550—a big self received £150 for it from his patron and considered himself lucky to get so much for it; and well he might, when had started in his career as a proofine he had started in his career as a proofine he had started in his career as a proofine his patron and considered himself provided to the term of the mode of the mod Other pictures sold at Christie's dis-

it was to struggle for a living, his suction of his portraits were kept together by his executors. This collection of forty-nine portraits was sold in 1877, half a century after his death, for an aggregate sum of £6000. On Saturday, which is suspected of heing repainted and restored, has advanced from 180 to 2000 guineas in the course of thirty years. Alexander Nasmith's portrait of Robert Burns, in like manner, has risen to 1600 guineas and country houses become remunerative investability portraits, that of Lady Raeburn, a charming combination of whites and browns, was sold for \$700 guineas. Even Sir Joshua's lands, Hoppners and Romneys reach record prices at auction, their own heirlooms in town and country houses are stiffening in value, and their art purchases become remunerative investable trip paid to Ireland by Queen Victoria, out of compliment to the people of Ireland in recognition of their enthusias—tic recognition of their enthusias—tic

Use headful an illumination like hat of an automobile—she hat a lived speed ago. The headful and a limbin she will be a like with the sea on the hing. The beat one of which would have swamped as ship explicit when the week of the water were half blief which would have swamped as ship explicit which would have swamped as ship in the swamped as nto the great creatures that roamed the world long ago, and then into the things we see all about us, and every lay he read new, marvelous tales that

e perfectly true, but as astonishing any of his old fairy stories, but he ever felt quite satisfied. Somehow it ever seemed the same when he knew that the story was really true! When you think you know how it happened it doesn't seem like a story; in fact, most children think it is a lesson. In the spring, when the moist woods were misty, and the distant spaces eemed blush and half veiled by a curain of vapor; when the violets and litcher mants and the arbutus whicher nts and the arbutus whisperabout the house, do no longer resist say that he was getting malarial fever, but it was merely the old yearning to witness something new and wonderful, and the most he could do was to watch the unfolding the ferns and the changing of the deep pond overshadowed by tall trees and banked with soft, green moss. It was fed by a brock, narrow and paved with shining, flashing pebbles; a stream that came gurgling down from the pills

Every dark snadow seemed to hold of cloth," said his mother, when she had carefully examined it. "But it isn't like anything appointed at finding nothing. The

out as he grew older he gradually longed to the Spanish explorers who carned that rats and mice, with per-"They used to wear just such things!" asserted Amanda Botts.

But, gee whist 'I'm only a boy, and shout the house making classes gives a proper of the control of the control

set of at this, for they had felt the very same sensations, they said. Finally same sensations, they said. Finally indeed that you are guilty, and I will not, trouble the jury to give a verding dence that you are guilty, and I will not, trouble the jury to give a verding the certainly indeed that you are certainly in the certainly of the certainly indeed that you are certainly in the certainly indeed that you are certainly said. You are certainly said to said the control of the said in the certainly said that since you came here my rheumatism has been worse, which causes me to blame you alone; therefore, I will sentence you to be burned at the stake, unless some one offers himself, in the ancient fashion, as your champion and combats with Sherin Kirby to its death!

Now, there sat Bill Botts, white and silicid have resen and challenged the sheriff, then and there; but he was a coward from head to foot, and utrembled at the thought of affight with the valiant shiriff. Had Sammy been present how you for his water-sprite's sake; but how would have been glad to fist any body for his water-sprite's sake; but how would have been glad to fist any body for his water-sprite's sake; but how we not allowed in the court room, and he never knew what is method been carried bows buttleff that had been carried been been to the said of the said of the had been carried bows buttleff that had been carried bows buttleff that had been carried been than had been carried been than had been carried been than the said that had been carried b

"Yes," she answered. Sam picked up a stone, struck the rusty lock a hard blow, and it fell clinking to the ground; then he pushed the door open and walked in. The water-sprite seized hand in the darkness and cried:

"Ah, I was sure that you would come and save me, you dear boy!" come and save me, you dear boy!" "Let's hurry away from here, right off," whispered the boy. "Somebody might wake and hear us. We won't be safe until we get far away!"

Away they slipped, hand in hand, and when they were in the dark woods near the pond both felt safer. Suddenly Lurline gasned: Lurline gasped:
"Look! Something glitters in the moonlight! There, in the grass by the water! Can it be the eyes of some wild beast?"

Sammy went to the spot, and there lay the water-queen's crown gleaming in the sunlight! He placed it on her "There! Now you are a queer

"But a queen without any subjects! No. I am not going back into that dark old hole any more. I will stay with "But where can we go, and what can we do for a living?" demanded Sam. "I have but seven dollars! That won't pay board for more than two

"Now, Sim, I want you to tell me the ty, bein' all pink and yellow and green where it lay over the coral bottom and shone bright in the sun. Me and Bob had been on the is and for nigh about a

He couldn't sound with that big timber in his mouth, which was keepin' his head up, so he went dashin' round and round the lagoon, spoutin' water thirty feet high from his blowholes and lashin' the sea into combin' waves with his flukes, while Bob Starbuck followed.

yellow curis, which he detested with all his childish heart.

"Hello, Jack!" called Simeon. "How does she head?" the same which was agreed between the two chams that the hated name of Reginald, and a spring of good water. So me and Bob got along so-so hould never be mentioned; it was Sim and Jack always with them. Having returned the nautical salutation of his shoes and stockings so as to be "more like other folk," as he expressed it and, seating himself beside the sailor, demanded:

"Now, Sim, I want you to tell me the "Now, Sim, I want you to tell me the "Now, Sim, I want you to tell me the "Now, Sim, I want you to tell me the "Now, Sim, I want you to tell me the "link of the detested with his serious and difference and the same which was a-rushin' thru the water with the big timber in his mouth, was a-rushin' thru the water with the big timber in his mouth, was a-rushin' thru the water with the big timber in his mouth, was a-rushin' thru the water with the big timber in his mouth, was a-rushin' thru the water with the big timber in his mouth, was a rushin' thru the water with the big timber in his mouth, was a rushin' thru the water with the big timber in his mouth that will mout to than and, climbin' aboard, passed a line under his stum aboard, passed a line under his stum aboard, passed a line under his stum aboard, passed. Then the water is swum out to thum and, climbin' aboard, passed a line under his stum aboard passed it for the delost to a tradin'ship and saw her I went up, and I had it was a line under his stum aboard, passed a or bust. We sighted the peaks o' the Ande' Mountains on the mornin' of the fourth day, with Old Barnacle two lengths ahead, which place he kept to the finish. A dago man-o'-war come along about noon and fired at us, bu vortin' into the harbor of Callyo, a day mad along the waterfront and the dage

Monte Carlo's Big Profits &

From T. P.'s Weekly.
EWS which concerns great
sums of money has a curious
way of leaking out into publicity, however tightly guardlicity, however tightly guarded; and altho Messieurs the Directors of the Casino Co. of Monte Carlo are discreetness itself in this matter, the world has already learned the fact that their wonderful cash-coining machine has, during the season of 1904-1905, earned for their shareholders the magnificent sum of £1,440,800, an increase of roughly £80,000 on the right side of the balance sheet—the right side for them, at least; if not for the Riviera tripper—over the takings of 1903-1904.

What this increase is due to, or supposed to be due to, we are not told; but its significance, to the student of economy not less than to the student of ed; and altho Messieurs the Directors

them, at least, if not for the Riviera tripper—over the takings of 1903-1904.

What this increase is due to, or supposed to be due to, we are not told; but its significance, to the student of economy not less than to the student of morals, is very considerable. It would appear that M. Blanc, the Napoleon of the roulet wheel, tho dead, "yet speaketh." and with a voice which is the sweetest of music in the Monegasque's ears; whose echoes, moreover, are heard not infrequently on the Parisian Bourse, when shares in his modestly styled "Societe Anonyme des Bains de Mer et Cercle des Etrangers" come into the market. It would appear, likewise, that the increase in his "salary" from £50,000 per annum to \$70,000, which the Prince of the Sunny Promontory recently extorted from the Promontory recently extorted from the Casino Co. when he renewed their lease for another fifty years, is not so ruinous a piece of blackmail as was then supposed; and that the £100.000 which was spent on the local theatre and or-chestra, tho seemingly extravagant, has proved a sound investment, not-withstanding the continued loss on these latter attractions.

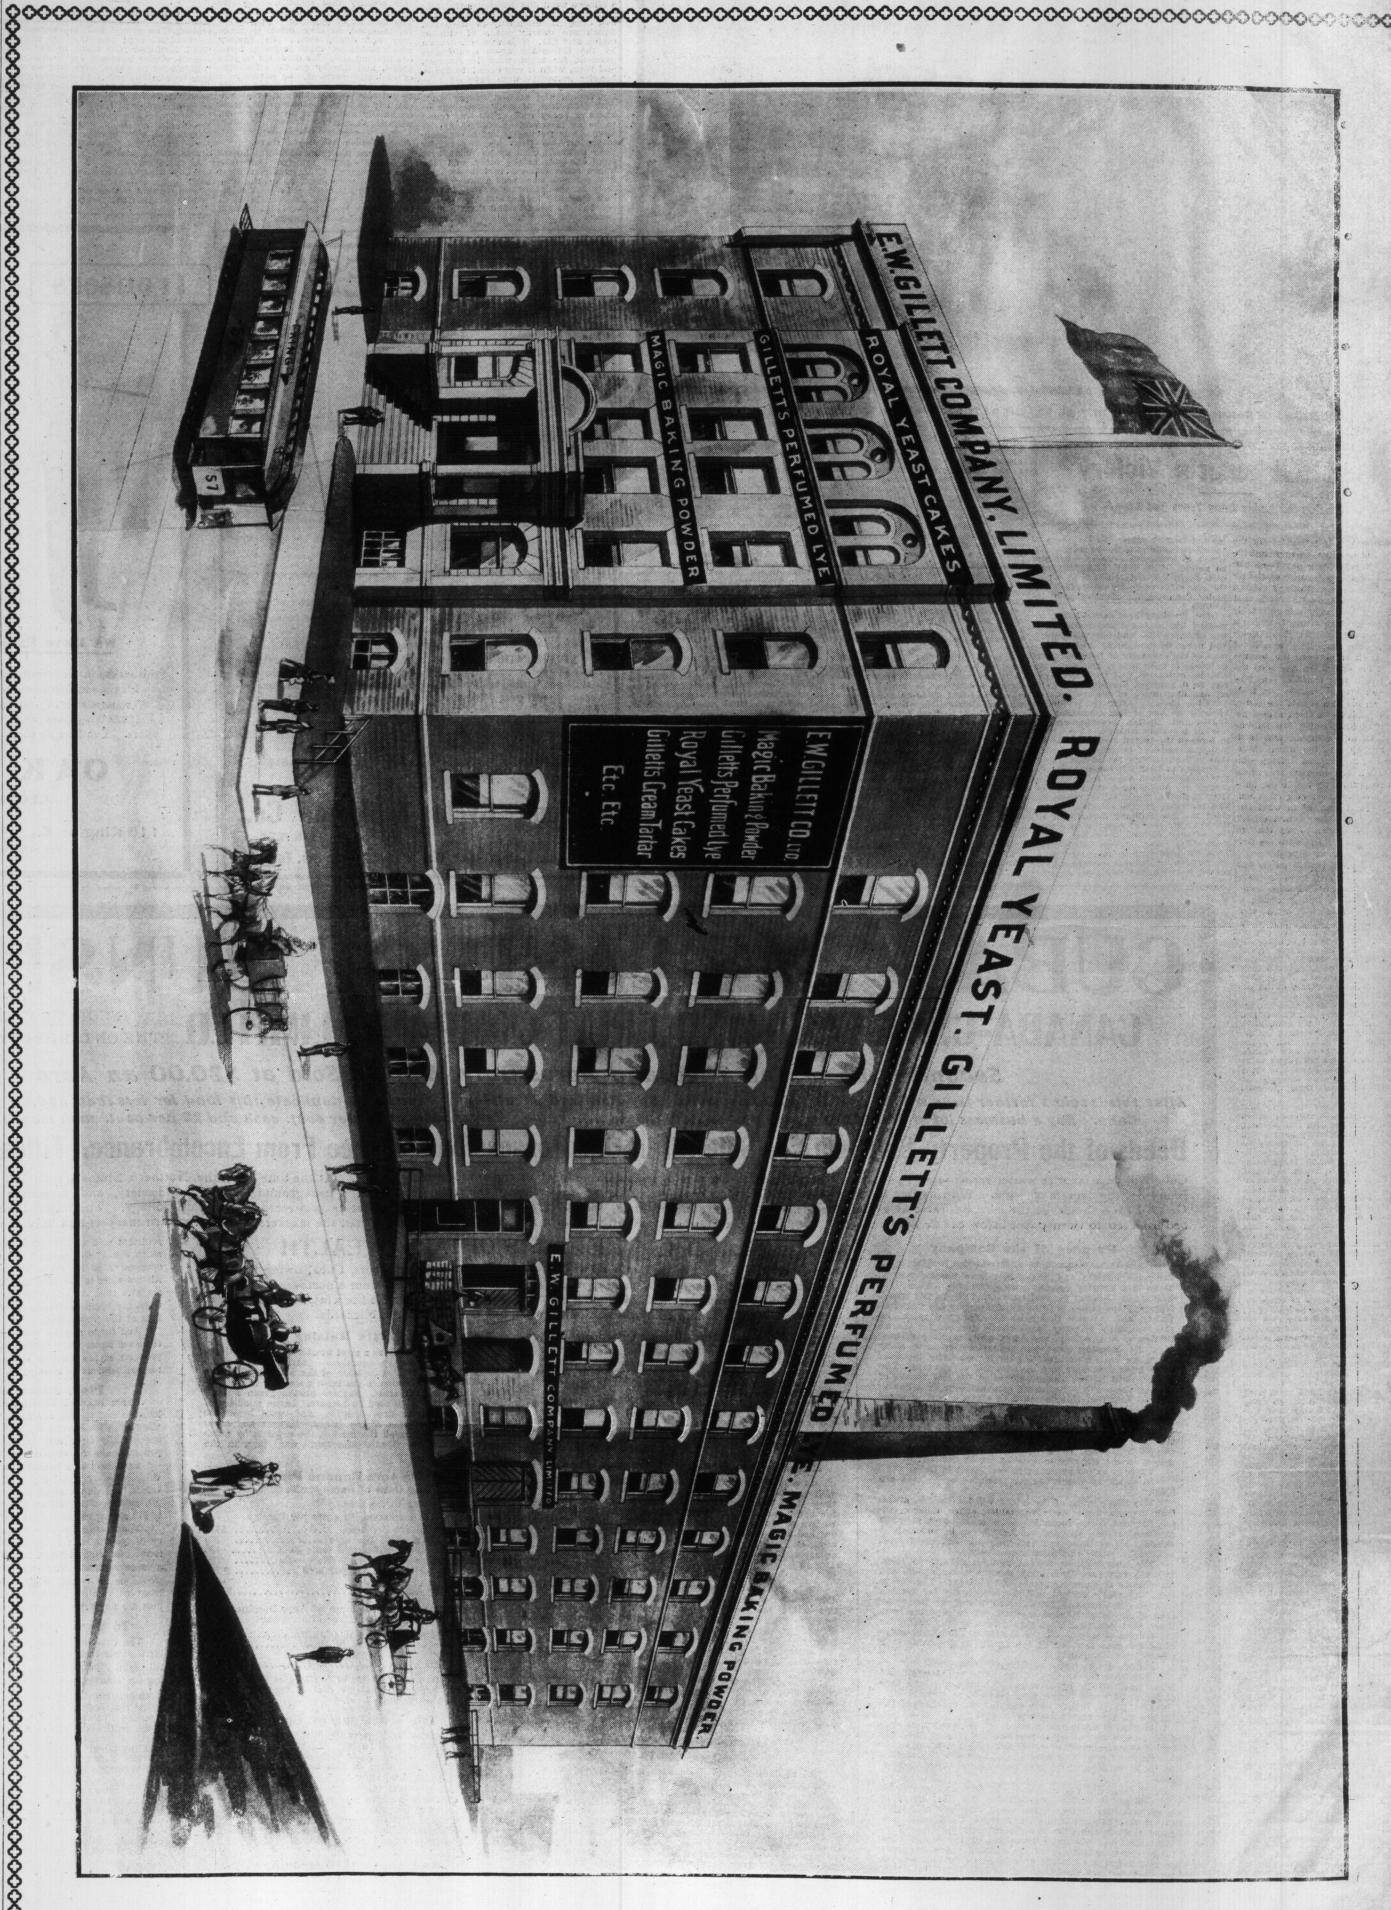

Does any fly who walks into M. Blanc's parlor, one is tempted to wonder, ever issue thence as fat as when he entered? One would fancy not—to judge by the figures of this paralyzing pidge by the figures of this paralyzing balance sheet. Nevertheless, the tories of fortunes made at Monte Carlo persistently outnumber those of fortunes lost. Whether this singular phenomenon is traceable to the "press subvention," which in 1901 (the last report in which it seems openly to be aljuded to) cost £20,000, it would be impossible to say, tho it is admissible to have suspicions. That versatile gossip, Lieutenant-Colonel Newnhum-Davis, vouches for the truth of an anecdote which credits a Chicago friend of his with scooping five hundred thousand francs in the Salles de Jeu in a single day, and (greater marvel still!) having the horse sense to "skedaddle" with the whole sum intact. There is no reason to doubt, too, that in the 1901-2 winter season one of the Russian grand dukes, playing in the Club Privee, made two hundred thousand francs.

Probably more money has been fost

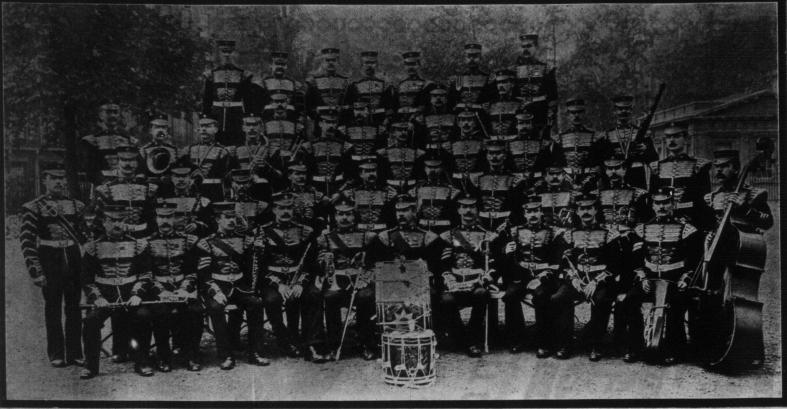

Probably more money has been fost by this Monte Carlo "Bank" thru fraud than thru what we must, for lack of 'a better name, call "honest" play. An institution such as the Cas-ino is a tempting bait for the professional swindler; and there are more such gentry harbored in Monaco's three miles of territory than in any other spot of similar size on the civilized globe. True, the majority of them prey not on the bank, but on its lupes.

Stake snatching and various ingenious variants of the condidence titlek form the condidence titlek form the self suffers from the Stitten bank itself suffers from the Stitten bank itself suffers from the Stitten weekly. Rouge et Noir—the 'Organe de Defense des Joueurs de Roulette et de Trente-t-Quarante'—lies before the writer, and contains a full, true and particular account of one of the most famous and most amusing of the many attacks on the bank which have been planned within recent years. The prime mever in the plot was the magnificent "swell-mobsman" Ardisson, who had successfully "worked" nearly every pleasure resort on the continent, and who now, for the first time, turned his attention to the seemingly unassailable fortress of wealth by the Tideless Sea. Ardisson, it seems, "spied out the land" at Monte Carlo a month or more before he attempted operations; and, clad in an unassuming disguise, made a particular study of the gaming tables and the methods of play. Like many wise folk before and since, he came to the conclusion that roulet was unworthy of his attentions. Its companion game, trenteet-quarante, gave him, however, some food for thought. It was played with cards; it was non-mechanical; the "personal equation" entered into its procedure; and, finally, the stakes were ligh. In trente-et-quarante, she had you may alway the cards prepared to the starting a fresh set of deals, the hedy ground the cards prepared to begin one of the lands and profession), and a couple of beautiful and well-dressed ladies. same in all the larger stores thruout the cities of the country. Pajama is a Hindoo word and designates the light garments worn by the Hindoos in the day time. It refers only to the pants, which are usually made of silk or cotton and silk. This was seized upon by the Europeans as a comfortable garment for night wear in summer, and then, when it was once introduced, and then, when it was once introduced, and thereby get the advantage of exclusive patterns. So extensive a

and then, when it was once introduced, heavier garments were used all the year round. The coat was a European innovation, and at first it was made with fastenings of loops and frogs or knots of heavy cord. This was found to be an inconvenient method, as the sleeper was frequently and unceremoniously aroused from his dreams by their awkward size as he rolled over from one side to the other, and the knobs were changed to buttons. At first pajamas were used almost exclusive patterns. So extensive a change in style in day clothing would be extremely noticeable and even radical, but as it is, the change has gone on quietly and, so far as I have seen, without remark."

THE TEST

The test of an Automobile is its power to withstand hard usage and make time over hard roads.

The "RUSSELL" has proved its worth under such conditions. It is a car built for Canadian roads. Has power to save for tough spots. Is most comfortable to ride in.

Don't buy an Automobile without testing the "RUSSELL." SPECIFICATIONS: 12 to 14 horse power, double cylinder posed engine situated under the bonnet in front, driving through a slide gear transmission with three speeds forward and one reverse. Bevel gear drive direct to rear axle. 90 inch wheel base. Wheels 30 x 31/2 inches. Gasoline capacity for two hundred miles. Body of handsome design with side entrance tonneau, which is also easily detachable so as to be used for runabout purposes. Color ultramarine blue body with light running gear.

EQUIPMENT: Two oil lamps, tail lamp horn. Price \$1500.

GUBA---THE LAND OF SUNSHINE

CANADA-CUBA LAND AND FRUIT COMPANY, LIMITED "THE ONTARIO COMPANIES ACT."

Second Issue of Ten Thousand Acres Only Will Be Sold at \$20.00 an Acre

After this is sold a further issue will be sold at \$40.00 per acre. Buy Now and Save Money. You can't duplicate this land for less than \$50.00 per acre to-day in Cuba. Buy a business lot at \$50 to \$75 which will rapidly increase in value. Terms cash; or 25 per cent. cash and 25 per cent. each month till paid for.

Deeds of the Property Sold and For Sale All in Our Possession and Free From Encumbrance. Titles Guaranteed.

Cuba will be a favorite winter resort for the people of North America, because of its favorable location and uniform temperature. At the time when the Northern States are clothed with snow and ice this island has the climate of June. With its fine sandy beach for bathing, its land-locked harbor for yachting, the rolling lands in the background for beautiful scenery, and Canadian people for neighbors Ocean Beach should be the most desirable as a winter resort. The scenery on Guadiana Bay is grand and inspiring. Our estate is covered with tropical foliage. The water is so clear that the gravelly bed from ten to twenty feet below can be seen distinctly, abounding in certain sections with Spanish mackerel, a species larger than the mackerel of our Northern markets and fully as palatable.

Purpose of the Company

Since Cuba obtained its independence, and since its favorable climate and fertile soil have become known, there is a growing demand among the people from "The States and Canada" for real estate holdings in this island. Naturally the desire is to be located among the Canadian people, and to know that titles are clear and valid. As the company's property is especially adapted for the establishing of a colony, and as it contains more acreage than the company could put under cultivation in many years, we have concluded to offer for sale fifty thousand acres of land divided into ten-acre lots or upwards. The balance will be put under cultivation for the benefit of the company. This suggested establishment of a colony is especially desirable in order to make a port of entry at Ocean Beach. The part of the tract facing the ocean near Guadiana Bay is set apart for a business and resi-dential site. The land which we are offering for sale is the best portion of the property, as regards location for shipping facilities, being nearest the water front. The of the soil also is all that can be desired. There is no tax on improved real estate in Cuba.

In Cuba the conditions for intensive agriculture are The staple crops of the Island will be oranges, grapefruit, lemons, limes, early vegetables, coffee, tobacco, cotton, bananas, cocoa, cocoanuts, mangoes and such products as olives, grapes, almonds, etc., which can be successfully

raised. All of these are very valuable and yield most bountifully when cultivated intensively. The labor required to plant, care for and harvest them is much less than farm labor usually is in Canada, and the climate is more temperate and pleasant. The soil is light and easily worked, and the opportunity for keeping bees and poultry and for dairying offered by the closeness of the large Havana markets, where products from these lines sell readily at high prices, greatly multiplies the sources of income for the planter and furnishes some thing for each member of the family to do-work both

Ballou, the historian, writing of Cuba, says: "Nowhere on the face of the globe would intelligent labor meet with a richer reward. Nowhere on the face of the globe would repose from labor be so sweet." And, finally, it may be added that the expenses of liv-

ing are far less once a start is obtained. Bearing these truths in mind, let us take up the conditions and purposes which make up the present undertaking of those engaged in developing this favored spot. Extract from "Commercial Cuba in 1903," published by the U. S. Department of Commerce and Labor, August,

* * "It will unquestionably be easy and natural for Cuba to export to the United States and other countries large quantities of vegetables, especially those of a tropical or semi-tropical habitat, and those which are in demand early in the year in northern communities "One great advantage possessed by the Cuban vege-table grower is that almost all kinds of vegetables enjoy

in that Island a perennial growth, one crop following its ssor immediately. "In this way the producer reaps the reward of two, and sometimes three, crops annually of all the different kinds of vegetables which he cultivates"

Extract from report of A. A. Quint of Quibra Hacha, "I planted a quarter acre with tomatoes; the yield was sixty crates of very large, fine tomatoes. The price in New York at time of picking was \$3.50 per crate."

LAND IS THE BASIS OF ALL WEALTH

As a permanent place of residence as well as a health and pleasure resort, Cuba, owing to its climatic and scenic charms, is attracting wide attention. Any person from a northern climate can live in Cuba in summer with as much comfort as in Canada, while the winter months are, of course, very much more comfortable than in a land of sn w, sleet and blizzards.

Soil and Products of Cuba

In no part of the United States or Canada is found a soil so rich, so fertile, so productive as in Cuba.

There is no garden like this favored spot.

Three crops a year can be grown.
Four hundred years of Spanish misrule prevented the development of more than a small portion of this beautiful Island, and thousands of acres of virgin soil now await the thrifty and energetic Canadian to make it the most productive spot in the world.

Remarkable Growth of Orange Trees In a letter recently received is the following item: I visited a fruit farm and photographed an orange tree three years ago from setting. It was six inches in diameter at the base and about eighbeen feet high, with branches five or six feet long and full of fruit. I also photographed a tree five years old which bore 5000 oranges last crop and another seven years old which bore 7000 crop, and another seven years old, which bore 7000 oranges. Grape-fruit attains perfection in Cuba.

It is claimed by the best authorities on citrus fruits that if all the available lands suited for the purpose in this part of the world were put into cultivation it would be more than twenty years before the market would be supplied to the same extent that it was previous to the freezes in Florida and California. It must be remembered that an orange grove will ma-

Governor-General Charles H. Allen says: "A ten-acre orange grove once in bearing, gives a comfortable income, sufficient to support a family in the best country style."

"When an orange tree is in full bearing it is valued at \$100."—Florida Fruits and How to Grow them. Profit on Oranges and Other

Citrus Fruits As an indication of the profits to be derived from raising oranges and other citrus fruits, I quote from an Official work on Cuba, recently published: "The person owning an orange grove in a country free from frosts is the most independent and happiest person on earth. A full-grown orange tree will yield from 1000 to 5000 oranges yearly, and, like the lemon tree, begins to bear the third year. Before Cuba got its setting back during the war orange lands were selling from \$150 to \$300 per acre, and a three-year-old grove was worth \$1000 per acre. The oldest trees in Cuba are some 100 years old, and each year the crop is greater than the previous year. No limit is placed upon the age of the orange tree; so in beginning an orange grove, remember, if four or five years are required to bring it into bearing, it will then continue to yield its golden harvest for generations to come, and when once in fruit you can sit beneath its shade almost in idleness

Cattle Raising

Grasses in Cuba have a most wonderful growth. Green all the year and very nutritious. Cattle-raising has always been the chief occupation of the natives, who have a natural disinclination to the labor necessary in cultivating the soil for market. Pasture always green and no winter storms or no feed to prepare. Large numbers of cattle and hogs in fine condition and good breed are found in all sections of the Island. Havana and other points in Cuba furnish the market, the price being much higher since the Spanish-American war than in the United States.

Cost of 20-Acre Banana Plantation, Including Care of Same for Each Year

300 banana plants to the acre. Selling price at plantation, 35 cents per bunch Total cost\$1000

Estimated Income for a 20-Acre Banana Plantation at End of Each Year. Fatimating 85 per cent. of plants bearing \$1785 Cost of care and marketing products 800

*Note: an owner of a ten or twenty-acre banana plantation can largely reduce this cost of "care" by doing much of the work himself.

Truck Growing in Cuba

Of all agricultural pursuits, that of growing vegetables, as a commercial venture, has hidden in the possibilities much to attract not only the tiller of the soil but many of those who have surplus money accumulated in other than agricultural pursuits.

It is easily within the bounds of probabilities to estimate a crop of vegetables that can be grown during the winter months at a thousand to two thousand dollars' profit per acre, and if one takes into consideration the small vegetable places worked by the Chinese around Havana it would be reasonable to say into thousands of dollars per

No Danger of Overdoing

Won't this fruit business be overdone? we are asked. It will, provided that the United States and Europe quit growing, and our wide-awake transportation companies all get flat wheels and hot boxes. The United States is now buying millions of boxes of lemons yearly from Mediterranean ports. Cuba can grow every one of them. In 1894 Florida exported 250,000 boxes of early oranges to Liver-

pool that sold at 20 to 30 shillings per box. This market alone could be worked up to 1,000,000 boxes of early oranges to go in before Mediterranean oranges are ripe All we need is the fruit to ship and we will have more markets than fruits. It will be at best ten years before Cuba can begin to cut any great amount of ice in the markets of the fruit world.

And to do this we must plant at once ten to twenty thousand acres yearly. We can pay the duty and land our products in the markets cheaper than Florida or California can, and as to quality, we are without a peer.

Fish, Game and Animals

Seven hundred varieties of fish, also crabs, oysters, lobsters and turtles, are found in the waters surrounding the Isle of Pines. The sea and rivers which empty into it are literally alive with them. Sea-bass, red-snapper and pompano are the choicest eating.

Parokeets and beautiful humming birds, brilliant as winged jewels, quail and wild pigeons are found in the woods, and ducks along the coast. Such game is plentiful, as very few natives own guns, owing to the license of \$10 a year required of those who keep them.

There are positively no poisonous snakes or insects or dangerous wild animals on the Island. The largest four-footed animal found is the "hutia," about the size of a large squirrel. You can sleep in the open air in the woods or in a tent without the slightest danger from beast or reptiles. Mosquitoes and even common house flies are never troublesome in summer.

To Merchant, Mechanic or Clerk The condition under which the average mechanic or

clerk exists to-day is one of ceaseless toil, from morning till night, year after year. If he has a family, after paying the landlord, grocer and doctor, and buying coal and clothing, there is little left to provide for an emergency or old age. Contrast this condition with that under which one can live in Cuba. The owner of ten acres of land under cultivation will have an income double that which is earned by most mechanics, with the expenditure of onehalf the labor.

For a small sum he can construct a suitable house. His vegetable garden and fruits will supply a large por-tion of his food. There will be no rent bills, no coal bills and no winter clothing to buy Under these conditions he can lead an independent, healthful, out-of-door life, having a sufficient margin between his expenses and income to enable him to put aside each year a portion for the future. His property, moreover, is constantly creasing in value.

Do you want a guarantee of independence in old age? Do you want insurance against poverty?

If you do, read every word of our Prospectus. It points the way to a comfortable income for life. It shows you how you can easily provide for the future.

Give it your earnest attent Read it carefully.

SWEDEN WANTS FINLAND ACCIDENT NEAR ST. MARY'S

Hour, Has Mishap - But No One is Hurt.

Stratford, July 8. - (Special.)-An accident happened this morning at o'clock on the London branch of the G.T.R., about a quarter of a mile south of the St. Mary's Town station, between Horseshoe Quarry and the Maxwell Works, whwen the whole of train 8 railed, and the baggage car and two coaches partly overturned and left leaning against a steep embankment. people who stuck to us, and we stuck The last car, a combination mail and smoker, altho derailed, was not overwere in this car, fortunately no person on the train was more seriously injured than to receive a bad shaking

jured than to receive a bad snaking up.

The accident occurred thru the trucks of the fender leaving the track, and as the train was traveling at about 50 miles an hour, the whole of the train was derailed also. The train traveled about a hundred yards before it was brought to a standstill, and the track for that distance was terribly torn up and bent and the ties cut to pieces.

The cars are not badly smashed, but the engine and tender are in bad shape. The track was not cleared till a late hour to-night.

TRUCKS GO TO WINNIPEG

That is the Reason Toronto Lack

The scarcity of new summer can this season and the continuance of the old ones in use has been explained by street railway officials to the effect that new cars are ready, but owing to the strike in the Canada Foundry Co. it is impossible to get the trucks for them, and consequently the citizens must forego the comfort they might have from up-to-date open cars, There is another side to the story, however. The Canada Foundry Co, has been making the trucks for the Toronto Railmaking the trucks for the Toronto Rall-way Co. right along as fast as they can, but the trucks don't stay in To-ronto. As soon as they are finished they are put on cars at Davenport and sent direct to Winnipeg for cars which have been sent there from To-onto. The Winnipeg orders for cars are evi-dently favored more than the Jemands of the Toronto service.

BATHERS HAVE A KICK.

Ferry Service Provided by City in

No special element in the city enjoyed more fully the ideal summer conditions which prevailed on Saturday than the young men and boys lutent on bathing privileges. Over at the sandbar at Hanlan's Point they could be numbered by the hundreds. But one cloud dimmed the horizon and that was the infrequent ferry service from the Queen's wharf to the sandbar. A one hour service is sent to the sandbar. one hour service is said to obtain be-tween Queen's wharf and Fisherman's Island, but the would be bathers main-tain that the ferry service furnished by the city is not only infrequent, but closes at 6 o'clock instead of at 7, as agreed upon, thereby depriving many workmen from enjoying the advantage.

AS PRESIDENT GEORGE ARGUES IT BEFORE BRITISH BUSINESS MEN

Sunday Morning

W. K. George, president of the Canadian Manufacturers!

dian Manufacturers' Association, dlan Manufacturers' Association, in re-sponding, after playfully inviting these present to visit the approaching Cana-dian National Exhibition at Toconto, said that many wrong reasons. ly to meet and learn to know the peo of population in that par ple of the homeland. While they noped demanded such provision. the visit would result in clearer knowledge of conditions and in an increasing exchange of trade, their aim was, above all, to establish a closer touch and better understanding with the people of the motherland. These alone were the motives of their visit. He most emphatically desired that they were making demands, asking concessions, or mapping out policies for the people of Great Britain or intruding on their political field. (Cheers.) Reiterating the statement he had made at Tilibury the day before as to the ambition of Canadians for their own country, he pointed out that most of their provinces were not only larger than many of the greatest European Powers, but at least equal to them in natural rewater power capable of developing tributes \$3.50 per week and upwards \$60.600-horse power; and the rest of Canada, except the prairie section, was equally well provided. Canadians would fall in their duty if they did not developing tributes \$1.50 per week and upwards for his support:

FLIM-FLAMMED OUT OF \$10. velop their country in every possible phase, fully utilizing her resources. If the did not provide remunerative and attractive employment for her people, the people would go elsewhere for it, as they had done in the past. The last United States census showed that there were in that country 1.250.000 natives of Canada, attracted by satisfactory employment at remunerative wages, which were due to the great industrial development of the republic. Under fair and equitable conditions Canada would have the same marvelous development. would have the same marveious de-yelopment. (Cheers.) As to the citicism that Canada granted a measure of protection, no answer was necessary for those who understood the conditions of the case. Canadian manufacturers did not ask a prohibitive turiff against Great Britain, but they would insist on a competitive turiff which would at least put them on an equal footing with the longer-established industries of this and other countries. dustries of this and other countries and would make up for the greater cost of labor in Canada. The tariff was not only necessary to Canadian industries; it had been in almost every asstance an essential of their birth. The Cana-dian tariff had compelled manufactur-ers from the United States, in order to secure a share of Canadian trade, to come and establish in Canada great factories representing a capital of dreds of millions of dollars. It was better for Canada, and, therefore for the empire, that these industries should employ thousands of people in the Bri tish dominion instead of in Pittsburg, Buffalo or Chicago (Cheers.) He re-gretted that, after careful investigation

Glimpses of the Political Field

fierce the criticism may be, and the general increase in judges' salaries. discussion that is given to the estimates is, for the most part, so many wasted words and so much wasted time. Members of the house are beginning to realize this fact, and it will probably not be long before the opposition members get together in caucus and raise the whole question of the wisdom of discussing each and every item in the earning divorces, even if it should make a genuine attempt to do so. Question of the make a genuine attempt to do so. Question of the power of granting divorces, even if it should make a genuine attempt to do so. Question of the power of granting divorces, even if it should make a genuine attempt to do so. Question of the power of granting divorces, even if it should make a genuine attempt to do so. Question of the power of granting divorces are particularly in the grant of the power of granting divorces. cussing each and every item in the estimates as if it was a national issue. There is no national value in such tactory in the such tactory in Canada. The church is opposed to a getter when it can be shown that the home a decided party loss. People, on the change which it believes would greatly surroundings are unfavorable and that me whole, like to have as much money increase the number of divorces, and improvement can be brought about by vôted for their own particular nacessia this feeling is reflected in the attitude ties as the government is willing to of the French-Canadian members. New tection Act there is a central office in the parliament buildings under the direction give them. Criticism of these appro- Brunswick and Nova Scotia. which priations not infrequently provokes have divorce courts, are living proof strong local hostility and makes ene of the fact that divorce courts do not mies of people who are naturally and increase divorces, but that rather they and towns of the province for the purpose and towns of the province for the purpose of looking after neglected or orphan childably the best way of treating the cs. The senate makes classes unequal letimates is to make three or four bg fore the law, inasmuch as it is only timates is to make three or four bg fore the law, inasmuch as it is only fights on a few appropriations. If the the rich who can afford to appeal to be improved and some 2800 orphan, deopposition were to pursue this policy the senate for relief. On grounds of seried or neglected children have been

inghts on a few appropriations. If the the rich who can afrow to appeal to opposition were to pursue this policy it could afford to let the remaining estimates pass in a bunch, and neither the country's nor the party's interests would suffer.

As usual, after a long session of parliament, there is a demand for an increased indemnity. The round robt this year seems to have been pretty generally welcomed. An increase of the mounter of a member of newspapers are expression, in addition to mileage. Ministers of the cown, as well as members, it is said, are mentioned in the round robtin as deserving of an increase, and the leader of the Opposition and the l

men who give their service to the country. Some men go into the government rich and die poor; others go into the cabinet poor and leave it with a fortune. The Laurier government has turned out several graduates of the latter class. The list of ministers and exministers would show at least one kndividual who, when he entered it wo millions. The members of a the government was deep in debt, and to day is rated at from half a million to the months. The members of a the Laurier government who have made fortunes since 1896 have done more than anything else to reveal the more than anything else to reveal the government who have made fortunes since 1896 have done more than anything else to injure the popular movement in favor of increasing judges salaries which attract the strongest men to the bench, but it is doubful if making the rewards more remunerative would improve the quality of the judiciary. Greater rewards would simply mean greator wire-pulling on the part of applicants who are not fitted for judicial duties, but who are more fitted for judicial duties, but who are more fitted for judicial duties, but who are more fitted for judicial suites, but who are more fitted for judicial mices, but who are more government is gagain to blame for the bench of the conditions which have made the public indifferent to the claims of judges for the appointments which has a many the proper class and there part of applicants who are not fitted for judicial duties, but who are more government is again to blame for the development is government is again to blame for the development is government is again to blame for the development is government is again to blame for the development is government is again to blame for the development is government is again to blame for the conditions which have made the public indifferent to the claims of judges for the appointments which he has made in the first party. The Laurier government is again to blame for the development is positioned to the judiciary. Greater rewards the conditions wh Death of Charles Smith.

Death of Charles Smith.

Charles Smith, an old resident of the east end, died Friday afternoon at his residence, 101 Parliament-street, aged for the appointments which he has made to the judiciary. He has been positively brutal in his disregard of merit, standing and dignity in his appointments to the bench. The judiciary has been used consistently as a repository of any kind of lawyers who could furnish the necessary party influence,

The proceedings at Ottawa are being and promotions have been made in the parliament to be fully capable of despatching business when it makes up its mind to do so. The platitude will good reason why the public should be be repeated that estimates amounting made to pay more liberally for judicial services than it does to-day. A time than the house often requires to wote a few thousands. There is not much force in this argument. It is a rare occurrence for an item in the estimates than they deserve than that a rare occurrence for an item in the es group of party healers with no claim timates to be struck out, no matter now to recognition should profit from a

CARE OF ORPHAN CHILDREN PROVINCE FINDS HOMES

Department Presided Over by Mr. Kelso is Performing Excellent Work.

Australia is a continent without an orphanage, a country without an orphan, Each waif is taken to a receiving house, where it is cared for until a country heme is found. The local volunteer so-Ceties canvass their neighborhoods and send to the children's committee of the destitute board the names of any families they have found where children may be placed. The children's committee seects the home which it judges is best adapted to the development of the child in question.

In the year 1893 the Ontario Legislature made a good beginning in the work of systematically caring for its neglected and debunal for taking evidence in divorce perdent children. Up to that time, althou could be taken away from vicious or immoral suasion. Under this Children's Proof J. J. Kelso, who has some 36 Children's

DRAW A MARRIED COUPLE IN A CAGE THRU STREETS

Brother of Bride Invents New Way of Torturing Newly Wedded Pair.

Pittsburg, July 8 .- Pittsburg has in vented a bright, fresh, new way of torturing bridal couples, and incidentally the city was last night furnished with a spectacle which threw the ef- place of safety. forts of Barnum out of joint. For over an hour a bride and bridegroom we e hauled thru the principal streets in a b rglar proof and its rates are menagerie cage. Their den was illu- moderate. minated with the glare of red fire. A band blared out notice of their approach and a whirlwind of cheers, cat calls and shricks of delight marked the interest of the people.

F. C. Zimmerman of Hackensack, N J., and Miss Louise Timmins of the east end were the unfortunates. They were married last evening at the resi dence of Rev. Mr. McAnnly, pastor of the Roman-avenue Christian Church. It had been arranged that after the ceremony there should be a reception at the residence of the bride's parents, and there were many carriages to convey the bridal party to and from the church.

Church.

There was also a brother of the bide, who had secured a menagerie wagon from a circus, and as soon as the ceremony was over and the bridal courle was departing, the brother and othe s of the guests bore down on the newly wedded pair and, despite their efforts to escape, carried them bodily to the menagerie cage, pushed them in the door and locked it.

A brass band had been engaged for the occasion, which headed the procession, and followed by the wedding guests in the carriages, the march thru the principal streets of the cast end began. The guests burned red fire and blew horns, while the angry occupants of the cage beat their hands against the bar's in futile efforts to escape.

Chairs had been placed in the cage for their comfort, and finding that all efforts to escape were useless, they sat down and tried their best to grin and bear it. The parade lasted for over an hour and was viewed by thousands of people.

BELL DARE NOT RESCIND.

Would Risk Entire Loss if Contract is Canceled.

Montreal, July 8.—(Special).—W. D. Canadian Municipalities, said to-day, in discussing the telephone decision Justice Kellam:

Justice Kellam:

"From the copy of the decision I have now received the decision appears practically to be this, that a connection is permitted on paying the Eell Company \$5 annually per each Bell phone there, which is a very small sum. The conditions with regard to the rail-way seem to be nominal, as the Bell Company dare not resend the conditions. Company dare not rescind the con-tract and so lose all by coming under the statute alone."

GRABBED LIVE WIRE; IS DEAD. In Spite of Warning Montreal Man

Was Foolhardy

Montreal, July 8 .- (Special.) - On the Upper Lachine-road this morning a Upper Lachine-road this morning a man was instantly killed thru taking hold of a live electric wire.

One of the electric wires belonging to the Montreal Light. Heat and Power Company broke and hung over the sidewalk.

The deceased and another man came along, and in spite of the warnings of nearby residents took hold of the wire. He was instantly killed.

MONTREAL EATS PURE FOOD.

Montreal, July 8.—(Special.)—Dr. J. J. McCarrey, chief food inspector for the city, says that of 20,000 gallons of milk delivered daily in city very little is diluted or impure. The use of preservatives is practically unknown. Dilution and skimming are seldom found. The traveling ice cream vendor has to be looked after carefully, for his cart is regarded as a certain means of contagion. There is a feeling that his The traveling ice cream vendor las to be looked after carefully, for his cart is regarded as a certain means of contagion. There is a feeling that his traffic should be put a stop to. Care is being exhibited by confectionary people in the use of aniline dyes.

Dr. McCarrey says that Montreal food is usually plain and invariably good.

Naturally.

Tokio, July 8.—The news of the successful flotation of the Japanese foreign loan of \$150,000.000 caused great satisfaction here.

street, is spending the summer at Aura Lee Villa, Fairy Lake, Muskoka.

The engagement is announced of Miss Evelyn M. Kent, youngest daughter of Mr. and Mrs. Benjamin Kent of St. George-street, to Albert A. Thompson, youngest son of the late Robert Thompson of Toronto.

The exodus to England seems greater from Toronto this year than ever. Among those who have left during the past-week have been Dr. Albert and Mrs. Ham, Mrs. Grace Denison (Lady Gay of Saturday Night) and Charles Matthews of The Globe.

Matthews of The Globe.

An interesting event took place on Wednesday, at the home of Mr. and Mrs. Guthrie, it being the occasion of the marriage of their youngest daughter, Sadie J., to Dr. James B. Johnstone of Whitby, by Rev. Dr. Abraham. Miss Louie Reynolds of Toronto. cousin of the bride, played the wedding march. The bride was attired in white silk eolienne, trimmed with chiffon, yer ivory taffeta silk, and carried a bouquet of bridal roses. The bridesmaid, Miss Edyth Guthrie, was gowned in white silk, carried a basket of lilies of the valley and ferns. The groom was supported by Dr. Arthur Rutherford of Hawkesbury. The gift of the groom to the bride was a beautiful silver tea service, to the bridesmaid a pearl ring, to the flower girl a gold bracelet and to the groomsman a fleur de lis pin. After the ceremony, all retired to the dining-room, which was artistically decorated for the occasion with smilax and Marguerites. The health of the bride und bridesmaid was proposed by Dr. Abraham, and responded to by Dr. Johnstone and Dr. Rutherford. Dr. and Mrs. Johnstone left on the evening train for Toronto. and from there by boat they will take a trip down the St. Lawrence.

Mr. and Mrs. J. B. Hutching St. EOP.

Mr. and Mrs. J. B. Hutchins, St. George-street, are spending the summer at Centre Island, the guests of Mrs. Mead.

The home of Mr. and Mrs. W. J. Foster, 86 Major-street, was the scele of a happy gathering of friends to celebrate the twentieth anniversary of their brate the twentieth anniversary of their wedding. The evening was delightfully spent in dancing, singing, music and cards, the prizes being won ty: First lady's, Mrs. Pearce; second, Mrs. Embree; gentleman's, first, Mr. Embree; second, Mr. McLiver; consolation, Mrs. Embree; gentleman's, first, Mr. Embree; second, Mr. McLiver; consolation. James Sproule. Among the guests were: Mr. and Mrs. J. A. Humphrey, Mrs. Farron, Dr. J. F. Ten Eyck, Mrs. C. Gardner, Mr. and Mrs. Frank Smith. Mr. and Mrs. H. E. Macdonald, Mr. and Mrs. W. Reinholt, Mr. and Mrs. R. Embree, Mr. and Mrs. James Sproule, Miss Maggie Sproule, Burton Sproule, Mrs. Alex. Ross, Mr. and Mrs. W. R. Pearce, Mr. and Mrs. F. W. Benson, Mr. and Mrs. McLeod. Miss Walker, Mr. and Mrs. Alex. McLiver, Mr. and Mrs. R. H. Robinson, Mrs. J. A. Smith, Miss Ruby Smith, Harold Smith.

Lady Elleen Eliot, says an English paper, is considered to be the most beautiful girl now in society, altho she is somewhat past the debutante age, she has been little seen in London. Lady Minto has brought up her two elder daughters very simply; they are to h keen sports women and were enthus iastic skaters while in Canada. Lady Elleen helped her parents to entertain the Prince and Princess of Wales on the occasion of their great colonial tour and the princess is much interested in all Lady Minto's children. A great part of Lady Minto's children. A great part of Lady Minto's life previous to her marriage was spent about the court of Queen Victoria.

A great many Toronto, people came

Sunday Morning

At "The Willows," Orangeville, home of Mr. and Mrs. Donald Macdonald, the marriage took place on Thursday of their eldest daughter, Miss Ella Margaret, well-known in musical circles, to Mr. Arthur E. Chapman, C. P. R. train despatcher. Rev. Mr. Burch of St. Andrew's Presbyterian Church, Orangeville, performed the ceremony in the presence of immediate friends of the bride and groom. Mrs. George Mc. Intyre (nee Strong) gave vocal selections. The bride was attired in a handsome navy blue traveling suit. Among the gifts was a silver tea service, presented by St. Andrew's Chrirof which the bride was a valued member. Mr. and Mrs. Chapman are spenting the honeymoon in Toronto, Detroit and other places west.

Mrs. J. B. Hallworth, Cottingham-street, and her son, Goldie, are staying obourg with Mrs. Wethey, Mrs. Hallworth's aunt.

Mrs. Kenly and her son, Mr. W. M. Kenly, of the Ontario Bank, have taken apartments at Formosa Cottage, Han-lan's Point, for the summer.

Miss Sandersen and sister, Bella, of 253 Sherbourne-street, are visiting at the home of the mayor of Okotoks, Alta, who came here last Christmas and carried off as his bride one of To rento's best teachers, Miss Smart, Duke-street school.

Mr. and Mrs. E. C. Boeckh are spending the summer at their cottage, "Fair Oaks," on Pigeon Lake, Bobcaygeon.

Mr. L. Waldemar Clemens, who has been on a sketching tour with Mr. Howatson, returned last week to attend the Orr-Edwards wedding He is the guest of his mother and father at "Blair Lodge."

Dr. Alpha C. Bennett, Melbourne-avenue, has been appointed to the re-sident staff of the Hospital for Sick

Mr. and Mrs. Arthur Jackson of Elgin-avenue left on Tuesday for a month's automobile tour of Michigan, Illinois and Ohio.

Mrs. Sarah A. Brown came to Toronto. Her home is in Meaford. She is 65 years of age. She had not been in Toronto for many years. Hereto fore, she has been an honorable woman respected in the town where she resides. She came to town, and Tke many others, she visited a department store. There, as all know, the goods

store. There, as all know, the goods are displayed, not only lavishly, but carelessiy. The temptation was too much for the old woman. She yielded, and the police took her in. In her possession were found a waist, some silk belts and other stuff.

She did not require the goods she stole. She had plenty of money, yet she stole. Who is to blame—the tempter or the tempted? This is not an isolated case. There are many of them which never reach the police court annals. These incidents did not happen years ago. Who is to blame?

STAGE COACH HELD UP.

Randit Compels Driver to Open Mail Bags and Take Loot

Meadows, Idaho, July 8.—The stage from Warren to Meadows has been held up by a lone highwayman near Resort Station. The bandit covered the driver with two automatic revolvers and compelled him to open the ma sacks and throw them down. He then removed all the registered letters, Two passengers and the driver were lined up and refleved of their valuables. The robber then coolly walked away with his plunder, amounting to \$1200 or \$1500. He was unmasked.

KILLED FOR HIS MONEY.

Woman and Paramour Drown Aged Man to Secure Property.

Pocahontas, Ark., July 8.-Edward Hubbard, at a coroner's inquest, has confessed that he and Willie Roberts a woman, whom he names as his accomplice, carried out a plot which resulted in the drowning of Pleas Burns, an old man, who lived alone on Spring River. The drowning was the culmination of a plan to secure the old man's property thru a will made in the woman's favor.

HIS SUMMER COTTAGE.

Don't you want to be the fellow
Who has boarded up his p'ace,
And moved his little family
To a spot,
Where cosy summer cottages
Are dotted o'er the space
A little while ago you might have
Got?

He can eat on the verandah,
With mosquitoes in his ple,
And separate the cobwebs
From his tea;
When he has finished feeding.
He can comfortably lie
Contented in a hammock 'neath A tree

Free from care and worry.

He can lay his carcase down.

And think, mid calm surroundings

Of the day:

And smoke a fragrant weed they would Not let him smoke in town, And watch his little sunburned

He can frolic with his offspring.
As they rock him to and fro.
And shake tobacco ashes
In his eye;
He can listen to their praitte
About things they shouldn't know,
But learn from other prodigies
Near by.

He can listen to the linner Singing softly, all alone, And blend the song with harmons, That floats From someone's damp plane
With sad rheumatic tone.
And chronic cold that's settled in its
Notes.

When wifey's washed the dishes
And brings her cheering smile
To make him glad he happened
To be born;
Both of 'em get chummy
With the sunset for awhile
And talk of canned tomatoes as
The morn.

He chases with two buckets
To another fellow's well
Nearly half a mile away
From his.
Because it's clear as crystal. And anyone could tell It's better than the other Water is.

His relatives and bosom friends
Know where he's hanging out;
They like to come to meals
And stay a day.
They know he might be lonesom
Unless they were about;
He'd love 'em if they'd only stay
Away.

He doesn't miss the icema...
But he'd like to have the ice
To keep the butter closer
When it's hot;
He likes to split the firewood.
And a bathroom would be vice,
So would other things he has nt

But his saucy summer cottage,
With its ragged edges name.
And cheerful coat of paint.
Is pretty trim;
Most of us would like a little place.
Somewhat the same,
And so it's up to us to envy
Him.—Rub.

ORILLIA'S POWER PLANT PAYS **BIG RETURNS ON INVESTMENT**

Notwithstanding Extraordinary
Expenditure and III-Luck Public Ownership is a Success.

A good example of the advantages of public ownership of public utilities is afforded in the electric power plant of the Town of Orillia, situated at Rasged Rapids on the Severn River, a distance by transmission line of 19 miles from the town. This plant has cost to date \$260,000, and a further outly of \$20,000 is to be expended for needed repairs, made necessary by the washing away of the flood dam in April, 1904. Altho scarcely in operation two years, this plant has returned to the town treasury \$31,000 of revenue, and its paying off the debentures at the rate of \$13,000 per annum. The capacity of the plant is 1800 horse power, of which 800 is in use for municipal and private of \$13,000 per annum. and organizations interested in decent by such offensive action on his pa of everything which meant honesty in public affairs and social life. He had government, for he had been the enemy made money corruptly by extending his favor, under the usual arrangements, to individuals who wanted franchises for gas, electric light and street railway operations; by affording his protection and influence to "policy men," to poolroom gamblers and disorderly-resort proprietors. His name had been signed hundreds of times on

ies, and the characteristics of his career had been long familiar to the newspaper-reading public. Yet, when he died, the largest church in the district was filled with a vast crowd of mourners. As the papers said, there was not a dry eye in the church. It was genuine sorrow. For the money which his more reputable gas and railway friends from the brown-stone diswhich his more reputable gas and railway friends from the brown-stone districts had given him had paid many an old woman's rent, had helped many a friend in trouble. The "protection" money had been freely given to the outings and games of the social organizations of the district. His "pull" had always been available for the man who wanted a job. The money of But apparatus is an impossible sub-

Dramatic Quality in Generosity. There is a certain dramatic quality in generosity which appeals to the heart. A mean rascal we all despise and hate; but a rascal with a big heart, who never forgets his friends, finds many apologists. It is of the utmost importance to a country organized, like ours, on a democratic basis, that as a people we should be highly sensitive to injustice. That sensitiveness is the most necessary protection for freedom. The greatest force for good government. Anything which tends to befog our ideals of justice, or ito make us underestimate its importance, is a danger to be guarded against. There is a certain dramatic quality in

Provincial Experts Send Back Reports of Fresh Discoveries in New Ontaric.

In a written report to Director Gibson, with L C. Kerr, chief geologist, was sent they n offi- into New Ontario by the bureau of mines, inces the discovery of a new clay belt feelarea. It is in the great bend of the Mattaiteragami River, some 200 miles north of Sudd tenbury, and lies south of the clay beit, as have mapped until now. Mr. Henderson writes in part : "Altho

tever the region traversed is, according to the present maps, south of the southern limit heart of the clay belt, yet my line ran thru excellent clay land, timbered mostly with uring some rich spruce. The soil is a clay loam. The country is very level, with no rock exgreater part of which is incuded in the Great Bend of the Mattagami, will make excellent agricultural land, and apparently this area should be included within the

limits of the clay belt." Mr. Kerr, who is in the same district, reports meeting a prospector returning from put the Porcupine River, with good-lookin gsamples of gold-bearing quartz, hematite, traces of copper, and another ore, which the prospector claimed was nickel but which Mr." Kerr did not see. The Mattagami River district bears good cedar, some jack pine, birch

Sunk in a Fog.

Portland, Maine, July 8.—The three-masted schooner Sarah C. Smith of Boston, stone-laden, was sunk in a fog off Portland harbor early to-day by the steamer Governor Dingley.

CIVIC FITS OF MORALITY.

Toronto has had its waves of morality, and we believe we are not overstating the case when we say that each wave has left the city less leprous or cleaner than it was before. Our waves have not perhaps been so strong tional disgrace. further proof of the astonishing change that has come over her was furnished when the police made a wholesale raid in the disorderly and gambling section, capturing nearly 600 habitues. It was one of the largest raids made in the history of the United States, and possibly the most effective of all, for the magistrates supported the police by holding the prisoners to strict account, without regard to social or financial in-

This raid must be considered as a ment. The laws against gambling and every possible advantage and technidisorderly houses have been on the calities are relied on for escape from ocean may be the storehouse of the statute books all the time; the police have had plenty of evidence upon which to make the raid; the jails have been big enough to hold all the prisoners who might have been gathered in. Public sentiment, however, was not aroused, and was perhaps even antagonistic to undue activity on the part of the police. But when Mayor Weaver summarily removed from the office of Director Potter, the new official found rule, a weak and obstinate czar and a offerings to the Lord, were told that had failed to do his duty and appointed despotic autocracy, centuries of unjust brews, instructed by Moses as to their blocking the efforts of the Law and Finland are alien in race, in tongue, in "a substance dear to the gods." The Order Society, suddenly found it to aspiration in tradition. Both are ripe importance and almost religious value their interest to co-operate, and the raid for revolt and both have the bitter of sait upon the tables goes back to resulted. In previous raids the disormemories of a thousand wrongs. Then the earliest times. In addition to all derly element was forewarned and had there are the Jews, oppressed beyond this, there is hardly any reason for no difficulty in escaping. On the last endurance and challenging the symoccasion, even as in the Toronto Junc- pathy of all their brethren of happier tion case, when a Conservative attor- lands. ney-general took the matter in hand, Charles I. and Louis XVI. were just and executed his orders.

"to watch another great nation of islanders on the other side of the world without realizing that they have some knowledge, some motive power which we do not understand power which we do not understand
some inspiration which is not at
our disposal. Could we keep a secret known to thousands of our
people? Could we control absolutely our press? Is it conceivable that there is any possible war, any pos-sible cause whatsoever, which would unite our people in one common purpose so well understood that the political opposition would voluntar-ily cease to exist until that purpose was achieved? When a whole nawas achieved? When a whole na-tion can act as one man, feel as one man, there is only one cause pos-sible, and that is a system of na-tional training which has cultivat-ed to a high degree the imaginative faculty, enabling men to see principles—a system of national training which keeps them from looking which at life piecemeal in a way which opens the door to endless differences and makes truly concerted action impossible

the rising generation. Experiments the rising generation. Experiments the rising generation. along this line have already been made in Britain on a considerable scale. The teachers in the elementary schools of Ayrshire have in a measure led the way, Not long ago forty-six thousand Ayr shire children were gathered together and sang old ballads and folksongs, as that opportunity to the British race and \$5,000,000. the more readily will the imagination I respond to the great ideas involved in the progress of the empire.

The Sunday Question. London Saturday Review.

There is a Sunday question; we have

standard of patriotism. the schools," Like prayer book is addressed, and prevent skin is thoroly cleaned, and this training thruout with the national not attempt to impose on the public tumn. Four weeks is coming to be reany castiron rules for Sunday observ- garded as a Dr. Arthur Somervell, inspector of arce, but simply point to the spirit are enjoyed, if possible, with music to the English Board of Educa- which they think should inform, it, the Nearly everyon the School Music Union and the Par- movement which an examination of ents' National Educational Union. He the names connects with no one church has been an enthusiastic student of party more than with another, and needlagoric problems, and holds were which is entirely some and holds were which is entirely some and holds were which is entirely some and holds.

has two sides, one much more serious in our view than the other. There is the frankly pagan Sunday, and there is the decent but wholly secular Sunday. The number of houses where Sunday is not only like any other day but at here number and where are sunday. but rather more rowdy, where even in-tentional violence is done to the pub-lic sense of respectability, is not really lic sense of respectability, is not really great. They may amount to a good many if counted up, but proportionately they are still few. They are mainly the houses of new rich people, who hope to get into society by their fastness. There should be no prejudice against a man because he is rich or because he is new, but in most countries. cause he is new, but in most countries it is a plain fact that new rich people it is a plain fact that new rich people it is a plain fact that new rich people are the most luxurious and the most rowdy. It is not unnatural; they are under no restraint of tradition, of status, of public responsibility, and not infrequently they have lacked the advantage of good education and bringing up. They have given up working; they have means to obtain every pleasure; and if they are not intellectual they do not know how to use their means except in enjoyments more or means except in enjoyments more or less crude. But if the upper class less crude. But if the upper class would make these people see that these Sunday performances were not to their sunday performances were not to their It is the faculty of imagination and taste, they would soon mend their taste, they would so the taste, the taste, they would so the taste, they would so the taste, they would so th vell maintains need to be awakened if a nation is to become united and patriotic. The matters in which the British the upper class ought to do. They owe it as a duty to common order and public feeling. Whether his free attitude to Sunday be the license of the libertriotic. The matters in which the British race peculiarly excel, such as capacity for government, the maintenance of social order and the like stand in the same position as good manners in the same position as good manners. in the same position as good manners and habits which are not learned so much thru the intellect or by direct teaching as by the impressions produced by the mental and moral atmosphere of early childhood. Of the subjects Justice. Even when convictions are obtained, afterthoughts and statements are brought forward and political and church and race influence is employed at the effort to secure perdens, which church and race influence is employed who lived away from the sea regarded in the effort to secure pardens, which too often succeed. The result is seen, gods, while the Germans believed that Eight thousand murders a year and the presence of salt in the soil investthe presence of sak in the soil investmic arts of dancing and gymnastic, or of all in the upper class, even amongst

the real extent of the evil? The thing has two sides, one much more serious in our view than the other. There is the frankly pagan Sunday, and there is the decent but wholly secular Sunday. The number of houses where Sunday is not only like any other day but rather more rowdy, where even intentional violence is done to the public sense of respectability, is not really great. They may amount to a good many if counted up, but proportionately they are still few. They are mainly the houses of new rich people, who hope to get into society by their fastness. There should be no prejudice against a man because he is rich or because he is new, but in most countries it is a plain fact that new rich people are the most luxurious and the most rowdy. It is not unnatural; they are under no restraint of tradition, of status, of public responsibility, and not infrequently they have lacked the advantage of good education and bringing up. They have given up working; they have means to obtain every pleasure; and if they are not intellectual they do not know how to use their means except in enjoyments more or less crude. But if the upper class would make these people see that these Sunday performances were not to their taste, they would soon mend their ways. And this the best elements in the upper class ought to do. They owe it as a duty to common order and public feeling. Whether his free attitude to Sunday be the license of the libertine 'or the liberty of the spiritually enfranchised, no man, least of all a local magnate, has a right to use his liberty to offend the common sense of his neighborhood. The lay movement we except of will be able to bring very used the real extent of the evil? The thing to offend the common sense of his neighborhood. The lay movement we

neighborhood. The lay movement we spoke of will be able to bring very useful influence to bear in this direction. On the whole we think this Sunday rowdiness will soon abate. But the other side of the Sunday question is much more difficult to deal with The numbers who ignore the religious aspect of Sunday certainly increase. They spend the day harmlessly and reasonpect of Sunday certainly increase. They spend the day harmlessly and reasonable ably, religion apart—but it is merely a secular day off work. Especially church-going has fallen off amazingly; it has fallen off in all classes, but most of all in the upper class. Even amongst those who do not at all mean to ignore those who do not at all mean to ignore religion going to church is no longer a matter of course. That being so, it is not strange that the mere men and women of the world should fail to rewomen of the world should fail to recognize any obligation to attend public worship. This we regard as a serious and a sad tendency; and the
church should bend all its energies to
check it. It is stultifying the increased energy of the clergy, and the renewed activity in every branch of religious
work which the last half century has
shown. In religion, as in other things shown. In religion, as in other things, up every man has become a law to himself, and when a man becomes a law to himself he becomes an anarchist. ents WAR HELPS HIDE MARKET.

Latest Order from Japs Is for 1,000, 000 Sides of Sole Leather.

way. Ayr

ther

S. 45

pular the of the

the

nday.

From The Milwaukee Sentinel.

"The Russo-Japanese war has com-The pletely cleaned out the California hide the market," said J. Philbrick. "Californd to ia has been the hide centre for the enmich tire west, shipping to all parts of the nt of country, but for the past three months hat of country, but for the past three months has been receiving its supply from the Texas market, where I have recently been dealing in hides. I learned from a California representative while in Texas that orders had been placed by the Japs for the shipment of 1,000,000 sides of sole leather, probably to be used for the soldiers and harnesses and accourtements for the horses, representing a total of between \$4,000,000 and e and \$5,000,000. e and \$5,000,000.

The ousiness system of the Japs is illustrated by the fact that the entire amount is paid in cash before the packing for shipment. Naturally, the and price of hides has advanced. For the past eighteen months this has been so, but recently the jump has been greatest. American factories are forced to cok to the foreign markets for their supply. It is a well-known fact that the French-tanned hides are the best n' the world and the most costly, but the high prices here allow of the pur-chase of these skins at about the same have te the figure as in this country. There is and good reason for the excellent hides sent

out from France.
"The calves are kept in better condition and the hides are correspondingly better nourished and the abattoirs of Paris are parlors in comparison with the foul places of this country. Every event skin is thoroly cleaned, and when it comes to the market it is in the best shape posisble."

Modern Restlessness.

ve no think is with that a world is perplexing. Why is it that a world is perplexing. Why is it that people need so much change nowadays? That they need it, and that they take it, there can be little question. Hard workers very seldom remain in the same house in London for three months at a time. They break up the days by getting away for one week-end at least. They need a good holiday in the autumn. Four weeks is coming to be regarded as a minimum. The usual holidays, Easter, Whitsuntide and the rest are enjoyed, if possible, with a margin, From The British Weekly. think spirit days, Easter, Whitsuntide and the rest are enjoyed, if possible, with a margin, it, the Nearly everyone who can afford it gets away for some little part of the winter.

Amazing Sympathy.

rt. It church New York American The sympathy of some Americans, on of mostly belonging to the distinctly commercial class, for Russia as against days as a gainst days. Baltimore.

One of the athletic events which occurred during the week was a team match between the Buffalo and Toronto lawn tennis teams. The Buffalo team, composed of Kirkover, McLaughlin, Richards, Morey, Hodge and Bisseli played against Martin, Nall Monroe, Carveth, Glasseo and Burns in single and doubles. Buffalo won three singles and tied for a fourth match and won one double; Toronto won two singles and two doubles.

The state of the property of t

Niagara-on-the-Lake.

The social and out-of-door life at the Queen's Royal during the week has been similar to a large house party. The younger guests have josned heartily in the amusements and sports while the older ones have enjoyed the comfort, the like of which only the Queen's Royal affords.

The most brilliant affair of the week was the independence Day ball, given in honor of the orificers and ladies of Fort Niagara. The music of the evening by a Chicago orchestra, was in keeping with the day and event. About the new nine-hole putting course, making possible a pleasant combination of sport and social life, has centred considerable interest. It takes no experienced player to eithoy the game; the novice, be she maid or matron, can become enthusiastic during the first game. In an 18-hole putting contest L. H. Beek of Buffalo won the gentleman's first prize and Mrs. Hinkley of Buffalo was spirited, Mr, Beck winning in the last three holes, two up. Atter the contest tea was served on the verandah and the presentation speeches made by the president of the club, Pyton Clark of Baltimore.

One of the athletic events which occurred during the week was a team match between the Buffalo team, composed of Kirkover, The Buffalo team, composed of Kirkover, McLaughlin, Richards, Morey, Hodge and Bissell played against Martin, Nall Mouroc, Chemical and the presentation speeches made doubles. In ten cities the charge is \$12 or less.

In Watertown, N.Y., it is \$10. In Cleveland, O., it is \$8.50, while in Detroit it is only \$6.30. In Toronto it is about \$4.80. Chicago has claimed to furnish water cheaper than any city in the United States. For houses of the above description a private company in Terra Haute, Ind., supplies water for \$16, which is 50 cents less than ter for \$16, which is 50 cents less than the Chicago rate. It also filters the water, while Chicago water is not filtered. Perhaps a city owning its water at the control of the control o tered. Perhaps a city owning its waterworks should supply water heaper than a private company, but this does not appear to be always the case. The question of water supply is highly important to any city. It involves life and health. Often it is not what it should the perhaps with a convict of perhaps with perhaps with perhaps with perhaps with a convict of perhaps with perhaps w

cal economists regard as the ideal rate. paramount importance and interest. New York, however, is ambitious to exceed this rate, and thinks it will be directors appear to have had a pretty soft thing. They were paid \$25 for each meeting of the executive, whether they attended or not, and as the committee ed the ideal rate of 30 in 1000, while at held three meetings a week, each memthe same time it has cut down its death rate. It claims that its death rate of children under 5 years of age is less than that of any other large duties or not, received pay amounting to more than the salary of many igh in the service of their country, and of one section of the city and the cent. less than in St. Louis, 29-3 per cent. less than in Philadelphia; 33-4 from ten to fifteen hours a day for months at a time. Hereafter only directors who attend the meetings will receive a fee, while directors who are good showing for Chicago. In most large cities the death rate among children, especially among infants, is terribly high. In 1893 the average age of those dying in Chicago was 22.8 years.
In 1904 it was 32.5 years, a remarkable difference. While there has been an increase of several hundred thousand or population since 1893 the number of deaths last year was 772 less than in 1895. In Chicago last year the death rate was 9.5 per cent. less than that of St. Louis, 19 per cent. less than that of New York. A large per cent. for the population of Chicago is foreignborn of the population of Chicago is foreignborn of the population. There are comparatively few births in the fashionable quarters, the even among these the birthrate seems to be increasing. As yet the United States does not appear in much danger from race suicide.

It is salary of \$50,000 a year.

T. B. S.—The lines are found in Themistocles. They run:

Where lines are found in Themisto dren, especially among infants, is ter- travagances that amount to more than

not be formed with the object of inducting their fellows to have some regard for the good looks of the city. As has previously been pointed out in these columns, in various cities of the States organizations have most successfully taken this matter up and wrought great good. Ladies, what say you?

Al recent tabulated statement comparing the water rates in 122 of the leading cities of America is not without interest. A six-roomed house, with bathroom, closet, washstand and bose for sprinkling the average charge for the water supply in the 122 cities is \$18,00 a year. In Chicago it is \$16.50. In ten cities the charge is \$12 or less. In Watertown, N.Y., it is \$10. In grown and sould get nothing but the reclaiming and reformation of wayward children is the rights of parents. As a rule, no matter how depraved the father, they naturally cling to their offspring, preferring apparently rather to see them. be. Most water should be filtered. All of it should be clean and wholesome and therefore free from contamination. guardians of Barnardo Homes and New York has a new reason for boasting. Its birthrate has increased until it is now 30 in 1000, which politi-

ties and refuse! Park Commissioner Chambers says that the care of the boulevards rests with the householder. He is right—it does "rest" there. But should the appearance of the streets be left to such haphazard chance? Park Commissioner Chambers has very pro-perly great regard for the trees, but if the houlevards are to be mere mounds the boulevards are to be mere moun of dirt. with stumps of decaying wood thrown in, surely the beauty of the streets is destroyed. It is a marvel to me that landlords do not see to it that the fronts of their places are kept clean and bright and orderly. But the seem larger all that they are affected in the seem larger all that they are affected. rent is seemingly all that they are af-ter, and, having got that, why the dem-nition bow-wows can seize upon both exterior and interior for all they heed.

Why doesn't some local John Pier-pont Morgan organize a syndicate, buy up York-street from King to Queenstreet, and clean out the evil-smelling rookeries, junk shops and the resorts called in mockery restaurants? Of all the pest holes in the city, of all the fever-breeding haunts, some parts of York-street are the worst, and yet it is very large to the pest holes of Toronto's main artificially one York-street are the worst, and yet it is practically one of Toronto's main arteries, forming the principal entrance to eries, forming the principal entrance to the approach to the provincial entrance to the approach to the a the city, the approach to the provincial courts of law and the main connection between two of the city's three great thorofares, King and Queen-streets. If ever anything was needed to purify this town, it is the cleaning out of Neels treat the porthern part of which is really the faster boat begins on July 22, and it is safe to say that

The pension of \$25,000 a year paid to Mrs. Hyde has been stopped. Thus town to me on Friday: "I note you are travagances that amount to more than his salary of \$50,000 a year.

T. B. S.—The lines are found in Themistocles. They run:

Said a gentleman from New York town to me on Friday: "I note you are going to pay your governors of the new provinces—Alberta and Saskatchewan— \$9000 a year! I suppose that means two more fat offices for your premier to fill." "You are correct in your sur-

sentiments of the alumni and faculty became one of the eading banks of the when he said, "Among the alumni of great city. It was a bank of issue unant, all will allow, but at the same feated in the semi-finals by Leander, Yale are men far richer than King der the old system a system that was time the patient should be taken into who won out on the last day against

The city council has declared war against the overhead sign, and the said sign has been given a year to quit. Why, if it is a nuisance, it should have been given any time at all, is one of those things the leisurely-moving board of control may be able to explain, but other people will find it hard to understand. We are told the two-feet law has not been enforced. Why hasn't it? Who is to blame? And why should its enforcement be placed a year off now that somebody has awakened to the necessities of the case? Perhaps in the course of a century the city engineer. Dr. Sheard, or somebody else, possibly the city solicitor, will enforce the bylaw against protruding produce and against the merchants and other citizens who litter the streets with empties and refuse! Park Commissioner Crambers says that the care of the boulevards rests with the householder. yachtsmen regard them in very nuch the same way as ladies would new cos-tumes from Worth. E. K. M. Wedd sails Temeraire—perhaps the best skip-per in the yacht club to-day, if we ex-cept Aemilius Jarvis, while Zoraya is captained by her owner, Mr. Worts, who has less experience than Mr. Wedd, but who has sailed her so far with skill and judgment: he is surely with skill and judgment; he is surely entitled to much credit for his enter-prise in building a challenger, and his courage in handling her himself. There have been some trials between the two boats and the Invader, sailed by N. Gooderham, and the Beaver, by Dr. Garrett, so that the races have been most interesting. The Invader was the winner at Chicago four years ago, and the Beaver was unsuccessful in To-onto six years ago, having been beaten by Genesee—good old eBaver, if the had only had a bit of breeze and a bit of sea, there would have been another story to tell! The races so far have been slightly in favor of Temeraire, on July 22, and it is safe to say tha whichever boat wins the Yankees wil have their work cut out to hold the And then having dined luxuriously

the even among these the birthrate seems to be increasing. As yet the United States does not appear in much danger from race suicide.

John D. Rockefeller has given Yale \$1,000,000, the largest single donation that institution has ever received in the score and ten years has done a legitimate banking business. Its profits and ten years has done a legitimate by graduates of the institution. This will increase Yale's productive fund to nearly \$10,000.000. The announcement of Mr. Rockefeller's gift was received by the thousand graduates with wild enthusiasm. There was no objection to Mr. Rockefeller's money. Connecticut's new senator, a man named Brandege—and a Yale alumnus, seemed to voice the sentiments of the alumni and faculty.

the Belgians in easy fashion. The Vesper eight, from time trials and subsequent racing results, were up against a most powerful crew, but Leander apparently did not have to extend themselves too much to land in front, as on the last day in the final heat they had no trouble in rowing the course five seconds faster than it required to beat Vespers, and that in an easy heat against the Dutchmen. The fact that Leander slowed down to 34 strokes to the minute for a great portion of the course in their race against the Vespers, shows conclusively that they were not extended to their utmost, as their average rate of stroke, when pressed at all, is around forty to the minute. And yet the Vespers represent to-day the best crew probably in North America. Selected from the best in the many clubs in Philadelphia, the main centre of rowing in the United 'Sates, and also including several champion varsity sweeps from different colleges, a better crew could hardly be gath:red together in the whole of the big country to the mount of the south of us.

This poetical view of the youthful fair will be peculiarly welcomed by all immediately acquainted with the healthy schoolsgirl at home for the holidays. "One subject of humor almost exclusively given to woman," says the same writer, "so far as she can she keeps strictly to herself. Of course, I mean that the wives of the more excruciatingly humorous husbands would keep those gentlemen to themselves more strictly than they do. "Many a man," she continues, "who is taken most seriously by the world, is regarded by his wife as supremely comic." That 'urely is just as it should be. What could be more flattering than to be regarded as supremely comic? The sad thing is that so many wives who believe their husbands to be supreme comedians are supremely mistaken. So the unhappy men are continually encouraged to try to be jocose. And the judicious weep.

A "sanitary bulletin" issued by the New Fampshire State Board of Health contains the results of analyses made of foodstuffs sold in that s

The Argonauts have been awaiting

the result of this year's race for the 'Grand,' and the fact that English oars are still impregnable makes them feel that another venture should be made. The Argos' experience, gathered from prior attempts and from comparifrom prior attempts and from comparison with the defeated oarsmen of this and prior years, has taught them about what to look for, and what they have to meet if they line up at Henley. Slowly but, it is to be hoped, surely, the Argonauts may get the cup, and unless the attempt is made next year, a large number of the best men the club ever turned out will be past the rowing stage and 'out of the game.' If the nucleus of the last 'Henley' eight can be brought back to the fold, including stage and 'out of the game.' If the nucleus of the last 'Henley' eight can be brought back to the fold, including Kent, Hamber, Hardisty, Parmenter and Jim McKenzie, and added to the best of the present eight, the fastest crew that ever rowed in Canada will make the trip next June, and will be coached by 'Joe' Wright, the most experienced sweep in Canada rowing to day. 'the grand old man' of rowing, and captain of the club. If the venture is made and does not succeed, all that can be said is that it is useless to try further, no matter what North American clubs or varsitys may 'hink, English oarsmen at Henley are those who have 'swung' a sweep at Eton or who have 'swung American clubs or varsitys may 'hink.

English carsmen at Henley are those who have 'swung' a sweep at Eton or some other good preparatory college, and afterwards at Oxford or Cambridge, before graduating into the Leander Club, and one style of 'going,' and only one, is taught from early beynhood till the candidate's rowing days are over. In America various styles are over. In America various styles prevail, and this makes the task harder, particularly as our season is shorter and a very long journey and a change of climate militate against the chances of Canadians or those from the United States. However, if the Argos take on the trip (and they will only take it on if certain men will sit only take it on if certain men will sit in the boat) their chances should be Park. of the very best, as every name is that of a powerful and experienced oarsman, and one who knows what he has to do to have a chance to win. If the race, Paul Sartori dashed thru a fence,

course of this present philosophical discussion. The practical joke. one lady claims, does not appeal to her sex. "It is rare, indeed," she says, "to find a girl, however young and light-hearted, who either plays a practical joke or enjoys this primitive form of humor."

A "sanitary bulletin" issued by the New Fampshire State Board of Health contains the results of analyses made of foodstuffs sold in that state. Of 363 of foodstuffs sold in that state. Of 363 articles purchased and analyzed, consisting of canned goods, meat products, baking powders, jellies, jams, spices, etc., more than 45 per cent. contained adulterations. Of 32 samples of canned fruits, jellies and jams examined, 29, or 91 per cent., were adulferated. Raspberry and strawberry jams were colored by coal-tar dye and preserved by benzoate and salicylate of soda. Much of the so-called strawberry jam offered for sale is made of apple stock prepared with flavoring chemicals and aniline dyes. Cheap jams, jellies and canned goods are almost invariably adulterated. The safest thing to do is not to eat them. not to eat them.

implements. "Remember you!" cx-claimed the diner, laying his genial hand upon his shoulder, "I shall nev-

A STORY OF DISASTER

Fatal and Other Accidents at Auto-

New York, July 8.-A succession of serious accidents attended the first

to do to have a chance to win. If the venture is made, T. P. Galt, hon.-pres, of the Argonauts, will accompany the crew. Joseph Wright will go over as ceach and captain, and Captain R. K. Barker will manage the trip. Active training will be indulged in during the latter part of this summer, and the crew will be got together very early in the spring. Other likely members of the crew would be Fellowes. Grubbe, Boyd and Rice of the present club senior eight.

The practical attempts which have been made of recent years to use the anti-toxin treatment for the prevention four laps. or 5.56 miles. There was a

Ignorance.

He chewed tobacco by the pound, Of booze he'd killed a lot;
In fact, for three-score years or more His status was half-shot; Of coffee too—that poisoned drug He'd had his full allot—He took it many times per day And always by the pot.

Twas surely sad to see a man To throw himself away And dwindle swiftly out of sight From premature decay.

He might have lived to ripe old age, And done a lot of good, Had he but cut the poisons out And lived on breakfast food.

BEST WAY TO SHUN COLDS THEIR CAUSE AND EFFECT

Care of Skin Needful and Improper Clothing and Wet Shoes Lead to Influenza.

"A-chew! There, I am catching old! Where in the world could I have taken it?"

These are expressions one may hear almost any day, says The Washington Star, and they indicate an idea lurking in the minds of many people that a cold is something which overtakes a person calendestinely, thru no fault of the victim, and often despite the best care to avoid it. The notion is very widespread that a cold is due to something without the body, accidental in character and insidious in its unexpected and sudden coming.

Colds are common enough, since hearly all have them, but their causes are imperfectly understood. Nine persons out of ten would say that an attack of influenza was due to some exposure whereby the body is chilled by damp ness or low temperature, yet under precisely similar circumstances, at another time, the same person does not contract a cold, indicating that this ailment is due in some measure to the physical condition of the victim.

The dictionary defines a cold as "A morbid condition produced by cold." Medically speaking, this condition is one of congestion, accompanied by fever, with inflammation in the nasal passages, throat, lungs or other part of the body. The definition also fits the popular idea that this is brought about by exposure or indiscretion, such as venturing out of doors without wraps, sitting in a draught of air or getting chilled in any of the numberless ways incident to modern life. It is probably true in most cases that the morbid conditions of the definition is an antecdent true in most cases that the morbid condition of the definition is an antecedent to the chill, and that the true cause of the cold lies quite as much within the system as without. A few scores or hundreds of the millions of capillaries, of the skin thru which the insensible perspiration of the body is carried off, are closed, and the effete and poisonous matters which should escape freely are retained, resulting in the inflammatory disease known as a cold.

disease known as a cold.

Felt in the Weakest Part.

When the pores of the skin are closed the ill-effects are likely to be felt in the weakest parts of the body. Some suffer from colds in the head, some in suffer from colds in the head, some in the lungs; in some the cold affects, the joints, causing rheumatism; in others the digestive organs are affected; in others the kidneys, and so on. The vital forces seek temporarily to expel from the system the poisons accumulating within thru other channels than the skin, and the weakest link in the chain bears the hardest strain. All the lurking impuritles in the body seem to lurking impurities in the body seem to concentrate there, and often much suf-

to rapid radiation of heat, as dangerous as it is uncomfortable. But in the habit of sitting in overheated rooms and donning heavy wraps many people vastly overdo the matter. Too much coddling is as serious a menace to health as too little clothing.

A familiar figure in the City of Rochester some years ago was a man whose proud boast was that he never wore an overcoat. In the coldest weather he could be seen about town dressed in medium-weight suits, and his broad expanse of shirt front, with diamond pin, was never confined beneath an overcoat. He lived past three score and ten, the picture of health and manly vigor, and was the victim at last of an accident on a hunting trip in the north woods.

This example is cited not for imita-

woods.

This example is cited, not for imitation, but to show that heavy clothing is largely a matter of habit, and that weighting the body down with it is unnecessary, either from the standpoint of health or comfort.

Heavy Clothes Breed Colds.

The London Lancet a few winters ago startled its readers with this caption. An explanation followed and the data of some experiments performed by an investigator in a British hospital. The fact was established that those who wore an especially thick and warm overcoat easily took cold. It was set forth that this garment prevented proper ventilation of the body. It was like a steel covering to keep inside all the

Keep Feet Warm.

To go dry shod and to keep the feet warm is an important precaution against colds. More influenza, sore throat hoarseness, are attributed to damp shoes than to any other cause. In winter the pavements, if not actually were with rain or covered with ice or damp shoes than to any other cause. In winter the pavements, if not actually wet with rain or covered with ice or snow, are generally damp. This is particularly true of the miles of brick sidewalks in many cities. Walking over them will chill the feet and generally saturate the soles of the shoes. If the wearer then sits for hours in an office or even at home without changing the footwear, the clandestine cold is easily accounted for. The habit of walking in the snow or in rain storms without rubbers is pernicious from the standpoint of health, and the secret of many a broken constitution lies in this act, of carelessness. Wet shoes mean cold feet, and cold feet mean many ills, besides the single one of influenza.

Another source of danger is found in the wearing of heavy shoes in hot rooms, causing the feet to perspire, and then going forth into the icy temperature outside where the extremities are quickly chilled. If any would avoid avoid.

Of course thick underwear, overcoats and cloaks must be worn in cold weather. One should be warmly clad, because scant covering subjects the body with the ills of life. Among them was

Among the recent discoveries of science it is pointed out that pneumonia, consumption and influenza are germ contagions which pass from one person to another by some sort of contact. No doubt colds are epidemic, yet it remains true that the influenza germ will pass by that person whose physical condition does not invite its lodgment. With bodily organs intact and each performing its full functions, there is little to fear. Such a person is proof against colds, whether they be the cidfashioned kind superinduced by exposuse, or the new-fangled variety produced by a bacillus with an unpronounceable name.

Care for a Cold.

While much may be done to prevent

forth that this garment prevented proper ventilation of the body. It was like a steel covering to keep inside all the moisture emanating from the skin press, and when removed the temperature of the body was so quickly reduced as to result in a cold.

The same authority suggests that colds frequently result from suddenting the body, namely, passing from overheated rooms into the cold air outside or the reverse. Much stress was placed oupon the danger incident to going into a heated room, throwing off the wraps and subjecting the body to a change of perhaps forty degrees from the air outside to that inside. This was explained as the reversal of the accepted theory that a cold results from going into cold air. The conclusion reached was that moderately thick overcoats or wraps should be worn in winter, and that they should not be removed too suddenly upon entering the house after a ride or walk.

The Lancet also called attention to wrapping up the face and throat as a fruitful source of taking cold. The lancet also called attention to wrapping up the face and throat as a fruitful source of taking cold. The lancet also called attention to wrapping up the face and throat as a fruitful source of taking cold. The lancet also called attention to wrapping up the face and throat as a fruitful source of taking cold. The lancet also called attention to wrapping up the face and throat as a fruitful source of taking cold. The least and the wearing of very heavy clothing. With the neck and face bare it was maintained that there was a reasonable amount of ventilation thruthe skin, and that the worst effects of coddling the body were thus neutralized.

Keep Feet Warm.

St. Kitts Post Office.

The vacant postmastership at St. Catharines is causing the office-seekers a lot of worry, as well as the powers that hold the benefice, remarks The Thorold Post. Alonzo Riggins has been in the office for 43 years, and has instructed every postmaster during that time in his duties. He has, in fact, been the business front of the postal business in the city nearly all that time. By all the rules that ought to govern, he should have the office, and has applied for it. In any well-ordered manufacturing or commercial establishment he would have been promoted long ago. But the rules that ought to govern do not govern. It all goes ly political preferment. The man who has done the most for the government gets the plums, which are usually dispensed by the sitting member or the last defeated government candidate, who, when the plum is a fat one, usually picks it for himself. In this way 16. J. Lovelace will probably be postmaster, tho Senator Gibson, who, also, is a mighty man of valor at Ottawa, is said to favor his old friend, Donald Robertson, and stands a good chance of winning out over Mr. Lovelace. But the oughtness of the situation points direct to Mr. Riggins.

ANGEL CHILDREN

to take Dr. Pierce's Favorite Prescription and Golden Medical Discovery.' I did so, and am happy to say my health began to improve and I did my work up to the last, and felt splendid.
"I got along finely during confinement, and have the healthiest baby I eyer saw. When he was three months old he weighed eighteen pounds: he is now seven months old and weighs twenty-four pounds. I can say I have had no return of my old troubles. I thank you very much for the good you have done me."

Any woman may write to D.

much for the good you have done me."

Any woman may write to Dr. R. V. Pierce, of Buffalo, N. Y., a statement of her case, which will be considered in absolute confidence by this physician who stands among the foremost specialists of the century in the treatment of women's diseases. He will send her (in a plain, sealed envelope) sound, sensible, valuable advice free of all charge.

Dr. Pierce's great thousand-page, ill-lustrated Common Sense Medical Adviser will be sent free, paper-bound, for 31 one-cent stamps, to pay the cost of mailing only, or cloth-bound for 50 stamps.

PREEN BEAT DISHABILLE INTERNATIONAL HANDIGAP

Saturday's Results at Kenilworth Park-Card for Monday's

Buffalo, July 8.—(Special)—Second choices won the first two races at Kenilworth to-day, Brush Up and Jack Dolan, the favorites, Wild Irishman and Halifax, finishing the money. Au Revoir, favorite, won the mile handicap, and in the inter national event Preen beat Dishabille, the first choice. Blenneworth was first everywhere in the fifth, Summary.

Third race, handicap, for 3-year-olds and up, 1 mile:

1 xAu Revoir, 116 (Oliphant) ... 1-1

2 Bragg, 104 (Helgerson) ... 5-2

3 War Whoop, 100 (Romanelli) ... 5-2

- Little Scout, 112 (E. Walsh) ... 1-1

xCoupled. Time 1.39 3-5, Start good. Winrer G. C. Bennett's ch.h., 5, by Debauvoir—Bon Voyage. Au Revoir was very much the best; was only galloping in front all the way. Bragg finished strong. War Whoop ran fair. Little Scout could never get up.

Fourth race, the International Handicap, for 5-year-olds and up, 6 furlongs:

1 Preen, 107 (Creamer) ... 5-1

2 Dishabille, 116 (Oliphant) ... 2-1

3 Rose Fint, 111 (Doherty) ... 8-1

- Toscan, 114 (Lec) ... 4-1

- Scotch Plume, 105 (J. Walsh) ... 5-1

- Bobbie Kean, 104 (Komanelli) ... 6-1

- Acelina, 90 (Perrine) ... 15-1

Time 1.12 4.5 Start good. Winner

opered up a big salve the weight; was best of the others.

Fifth race, selling, for 3-year-olds and up, 1 mile and 40 yards:

1 Flemenworth, 111 (Oliphant) ... 8-5

2 Fair Calypso, 80 (Klenck) ... 16-5

3 Wirchester, 96 (Romanelli) ... 30-1

- The Don, 111 (Travers) ... 7-1

- Solon Shingle, 108 (Buchanan) ... 10-1

- Gay Lizzette, 106 (Lee) ... 7-1

- Time 1.43 3-5. Start good, Winner, G.

C. Benpett's ch. h. a, by the Prince of Monaco-Middlemarch. The winner was very much the best, drew away in the stierch in a gallop, by six lengths; next two driving hard.

Sixth race, selling, for 2-year-olds, 5 furlongs:

Sixth race, selling, for 2-year-olds, longs:

1 Nil, 107 (E. Walsh)

2 Merry Belle, 107 (Romanell)

3 Orilene, 107 (J. Hennessy)

Lacene, 107 (Fisher)

Gamester, 103 (Jones)

Venus, 100 (Lee)

Cadillac, 100 (Hennessy)

Gold Girl, 100 (Helgesen)

Carrie Graham, 95 (Perrine)

St. Kitts Beat Torontos.

St. Catharines 5-

St. Catharines 5Torontos 2.

By a comfortable margin of 5 to 2
the Athletics of St. Catharines won
from the Torontos at Rosedale on Saturday, and thus took another and firmer grip on the championship shield. It
was a hard fought game from the first,
but only in the opening quarter 1 ad
the home team a lead.

The boys from across the lake had a
new system. That is, it was new to
them. The most tantalizing opportunities would not induce their defence to
leave their posts in front of their net;
hence when a well directed shot was

leave their posts in front of their het; hence when a well directed shot was sent in the direction of Cory Hess he was generally there, with Harris, Cameron and Elliott supporting him.

The Torontos defence hugged the active home-brewed home of the St. Kitts

aggregation so closely that few of them were given a chance to illuminthem were given a chance to illuminate the horizon. Few such stoutly contested games have been seen in Toronto, the visitors having their work cut out for them in every position in the field.

the field.

The work of Hanley in goal, of Rowntree, Lambe and Kirkwood in the field, and Henry and Powers close to the opposite nets was splendid. For St. Cathposite nets was splendid. For St. Catharines, Hess in goal, and Harris and Cameron, close to him, were the conspicuous players. Harris has been lame for a week and limped on the field like an inmate of an infirmary. But when he loosened his joints he exhibited skill. His work was spectacular.

Joe Lally of Cornwall gave entire satisfaction as referee. He was liberal with his rest passes and the following

Chippewas Outclassed.

Chippewas Outclassed.

Brantford, July 8.—The Chippewas were completely out-classed here today by Brantford, the score being 7 to 0 in favor of the home team. Excepting the last quarter, the game was not up to a great deal, being a sort of listless exhibition. It was characterized mostly by loose and amateur playing. In the last quarter, everything was Brantford's way, the ball hardly being near the Chippewas' goal. The Chips played a great defence game. During the first quarter, Brantford was unable to score at all. Robinson, in the flags, was the star of the entire bunch, while Graydon stayed by Tack Hendry, doing good work. The Chips' home could not break in. Their shots were mostly from away out, and proved easy picking. Brown Jackson was referee, and allowed many things to go unpunished, consequently the game was rough at times. In all ten men were ruled off for tripping and slashing, which was done on both sides. Brantford scored four goals in the iast quarter. The line-up was:

Chippewas (0): Goal, Robinson: point, Pitcher; cover, Graydon; defence, Hamburg, Ross. Mackenzie; centre, Bond; home, Donaldson. Taylor, Roach; outside, Yeaman: inside, O'Connor.

Brantford (7): Goal, Hutton; point, Dowling; cover, Davidson; defence, Brown, Adams, Degan; centre, Taylor; home, Doyle, Laderoute, Whiteheal; outside, Hendry; inside, Layden.

Guelph Beat Hespeler.

core of 6 to 1 and practically cinched the championship of this district in the Junior C.L.A. series. It was a great game of lacrosse, and tho a little ragged towards the last was always interesting from a spectators point of view. In the first quarter Guelph notched two—McWilliams and Armstrong do-

scored.

In the second quarter Guelph had the decided advantage and gained three more goals—the necessary being done by Oliveson, McWilliams and La-

The thrd quarter saw another score for Guelph by Curliss.

No further tallying was done, and the game ended 6 to 1 in the Shamrocks

Montreal 22 37 373
Games on Sunday: Providence at Montreal

Games on Sunday: Providence at Mont-real, Baltimore at Newark, Games on Monday: Newark at Toronto, Providence at Montreal, Baltimore at Buf-falo, Jersey City at Rochester.

Montreal 5, Toronto 1.

Montreal 5, Toronto 1.

Montreal tallied two runs in the second. Joyce first up, cracked a single into left; Bannon flied out, but F. Hartman singled into centre. Buss drive sent Joyce in. Magoon fell down on Barber's easy one, and the bases were fuil. Miller grounded out to Magoon and F. Hartman tallied, In the fifth good fielding prevented Montreal from getting runs. Sofiel dropped Barber's easy fly, and Miller was passed, Le Hartman attempted to sacrifice towards third and Sullivan fielded Barber out at third, Meaney chopped off what ordinarily would be good for a h.t, but Sofiel jumped in the air back of second and pulled down with his gloveless hand the ball, doubling up L. Hartman at second and retiring the Royals without a run.

In the sixth Montreal added three more. Magoon missed Lachance's grounder and Joyce beat out a bunt towards third, Currie making no attempt to throw the ball. Currie's wild pitch advanced Lachance to third, and Joyce to second. Bannon was passed and the bases were full. Harley got L. Hartman's hard-hit fly. Buss grounded out, Magoon to Toft, and Lachance scored. On Buss' out both Joyce and Bannon tallied. Toft evidently forgot things here, as but one run should have come in on the out.

Toronto's first run came in the seventh.

out.
Toronto's first run came in the seventh.
Carr was passed and stole second. Suilvan's well-placed single over second scored
him. The score:

Second Game.

Second Game.

The Torontos went at Felix at the start in the first innings. White singled nicely into left and Harley beat out a bunt, Murray attempted a sacrifice towards third and White was fielded out at third by Felix. Soffel's long fly to Meaney tallied Harley.

In the third Falkenburg fanned out Buss and Felix and was proceeding to strike out Miller, who objected unnecessarily to Umpire Moran's decisions. The umpire promptly find him \$5 and put him out of the game. Wiedensaul took his piace at second.

Toronto took another in the third White fanned, and Harley secured the first corner on F. Hartman's high throw of his bunt. Murray was given four wide ones. Soffel's single to right tallied the manager.

In the seventh White first up, hit for two sacks into the crowd back of first, and Murray's long home run over Bannon's head cleared the bases and gave the home team two more.

Montreal got a run in the eighth on feits's two-bagger to left and two outs. The score:

Galt in First Place.

Galt, July 8.—Preston, the leaders of the Canadian League, played the Galt team here to-day and were defeated by 7 to 2. The game was a very good exhibition, tho several errors were made by both teams. The game places Galt and Preston tie for first place in the league. The batteries were: Flaherty and Marshall; Heimbecker and Nairn, Umpire—Hugo.

Western Ontario League.

REGATTA AT CANOE CLUB ISLAND A. A. WAR CANOE WON

Large Gathering at Toronto Canoe Club and Splendid Contests in Fair Weather.

Choppy water and an energetic wind for the contestants, but fine sky and a cooling breeze for spectators, made the amual regatta of the Toronto Canoe Club a delightfully interesting affair on Saturday afternoon. The lady friends of the canoeists turned out in large numbers and made themselves at home in the pretty club-house. There were 400 spectators, were 400 spectators.

The events were run off in good or-der, without mishap, but it was seven o'clock before the program was com-pleted. During the afternoon and after comments an orchestra provided music for dancing. The feature of the races was the carrying off of the war canoe race by the I. A. A.

ROOT NOW NEXT FOR PRESIDENCY YIELDS TO ROOSEVELT'S COAXING

After an All-Night Argument, Corporation Counsel Drops Money-Making Pursuits in Favor of Republican Honors to Come.

New York, July 8.—The American says: Uncle Sam has wrested Eliha Root away from the corporations. Mr. Root will be secretary of state in the place of the late John Hay. The announcement will be made by to-night or to-morrow morning. This is authoritative information from Oyster Bay.

It took an all-night battle on the president's special on its way east to win Mr. Root. On the other hand, President Roosevelt was fighting for the United States government to secure the services of one of the ablest lawyers in America and one of its foremost statesmen. On the other hand were battling the great retaining fees of the vast interests which Mr. Root, as a lawyer, represents.

The call to duty was triumphant. Mr. Root has elected to serve his coun-Mr. Root has elected to serve his country and to give up for the next few years the immense practice which he had and the prospect of hundreds of thousands of dollars in easily acquired the hat the had been reached, if, indeed, a combousands of dollars in easily acquired the hat the had been reached, if, indeed, a combousands of dollars in easily acquired the hat the had been reached.

retainers from corporations, it would

bination has not been formed, between As a reward for the sacrifice Mr.

Root has in prospect in 1908 the Republican nomination for president. He publican nomination for president. He provided the president at the Republican nomination for president with port of the president at the Republican National Convention three years hence.

Mr. Root frankly avowed when he republican now joins the race on equal terms with

Fairbanks and Taft.

The president, it is understood, induced Mr. Root to accept the position with difficulty. Many conferences were held. The entire situation was rehearsed. It is said that Mr. Root's attention was called by friends to the secretaryship of state would cause general discussion and place the United States, internationally, in a ridiculous position. His friends, it is said, told him that if the news came forth that

An Imbecile Pounded by the Priest to Exorcise the Devil.

An Odessa correspondent says: The following occurrence in a city like Odessa would appear to be well-nigh

HORRORS IN A RUSSIAN CHURCH.

Some ten days ago there arrived here from Bender a man clad like an ordinary monk, and accompanied by a girl of about 13, whom he described as his niece and as being possessed by the

Father Joseph. of the St. Nicolai Church, near the foot of the flight of 300 steps leading from the Nicolai boulevard to the Primorskaya, is popularly accredited with miraculous power. To this sanctuary the monk took his devil-possessed niece.

The girl was pale and emaciated as she was led into the church, which was filled with a crowd of devotees of Father Joseph. When the latter commenced the prayers for exorcism the monk assisted the process by brutally pounding the poor girl with his fists. There were murmurs among the congregation

at this spectacle, but no interference. The exorcism was at last declared to be incomplete and was adjourned for a second ritual on the Sunday following the Wednesday when this scene took place. The brutally-treated vic-tim, mute and semi-conscious, was taken away by the monk.

On Sunday last the exorcist ritual was repeated before a crowded congrewas repeated before a crowded congregation. Whilst the prayers for devilexpulsion were being read the poor girl was shockingly used by the monk. He bruised her face into a pulp, Leat her with sledge-hammer blows all over body, turned her on her face and cruelly twisted her arms round her

At this horrid stage the congregation became greatly excited, and a number of women, led by the orthodox wife of a British subject here, threw themselves upon the monk, beat and trampled upon him, and tore into shreds his monkish attire. monkish attire.

It was then discovered by an ambulance doctor who was called that the girl had been for many days rendered.

We'd agree that is clear if I'd hear what you see And you'd see what I hear w absolutely mute by the shocking treat-ment to which she had been subjected. She was taken to the city hospital, but there is little hope of her recovery.

If she recovers from her bodily in-

juries, the doctors say, her reason will permanently affected. The monk was arrested.

It transpires that this brute is no relative of his victim. He was former-ly in deacon's orders, but was expelled for his fanatic and homicidal tenden He explained to the police that he had, some years ago, been possessed by the devil, and was exorcised by

Father John of Cronstadt.

He had first attracted his victim at Bender by his religious fervor, and then abducted her. The doctors sa that the girl must have received hor The doctors say rible ill-treatment for many weeks, judging by the bruises and partiallywounds with which she was covered

"STEALS" HIS OWN DOG.

Chicago Man Arrested Eight Times

St. Paul, Minn., July 8.-Arrested eight times by the police here b cause he was leading his pointer dog along the street, Robert L. Taylor of Chicago regards the St. Paul police force as over

gards the St. Paul police force as overzealous.

When Taylor arrived to join a par'y
of campers he turned the dog over to
a small boy to take to fhe home of his
friends. The dog, frightened by the
flreworks, ran away.

Taylor asked the police to find the
animal, which they did, and turned is
over to him. On the way to his friend's
house, leading the dog, Taylor was
"spotted" by no less than eight patrolmen as the abductor of the canineabout which the whole department was
agog, and every one of the eight immediately proceeded to "pinch" Taylor,
who escaped each time by showing the
order from the police sergeant for the
dog.

Part of our heritage as a part of the empire is a wonderful traditional respect for the bulldog tenacity of purpose of the English John Bull. Destroy that and there is not much left of the

One Reason Why He Isn't Popular When He Makes His Home Out West.

(Washington, D. C., Post). Regina, Assinibia, N. W. T., June 15 .-The Englishman as a class is not popular in Canada. He suffers for the quality of his defects and the defects of is qualities.

The fine class of young Englishman who come to Canada are often condemned beforehand on account of the prejudices created by those wastrels of their own nation-the horde of inc.'flcient. "remittance" men.

And the newly arrived Englishman s such a grumbler—"grouser" Western Canada calls him. The Western Canadian is intolerant of even legitimate criticism. The fact is his uneasy conscience tells him it is true, hence he winces, and inconsiderate, hence he is angry. Filled with a proud sense of the undoubted greatness of this western land, its possibilities and boundless opportunities to all who are wise to see them, he is impatient of any disparagement whatever. There is so much to do, so few to do it, and so little time to do it in. Winnipeg, for instance, is not a completely modern city. But

Just arrived that day told me ne had learned a lot about the west in a ve y interesting book. What think you it was? Capt. Butler's "Great Lone

Why did he not go forty years further back and read Mrs. Moodle's "Back-woods of Canada?" Her remarks on social conditions in pioneer communisocial conditions in pioneer communities would at least have been pertinent. The hardy laboring men of Canala, with whom this young man would come in contact, would chaff him unmercifully, and, further "stuff" him. They possess a rough facetiousness which is not too considerate of their victim's feeling.

victim's feeling. Many young Englishmen who come to

confessed in sorrow that his manners and his knowledge are not equal to his assurance. They are not all of this class, but this class naturally is

most conspicious.

Man to Man the World O'er. The very diffidence and reserve of well-bred Englishman may be, and are, mistaken for hauteur. Social conditions are wonderfully involved in this western land. All are engaged in the chase of the dollar, and those who make the most having often risen from very humble circumstances, the tural social results follow. Englishme and the English women especially, would do well to take any advances made to them as kindly meant, even the too much curiosity may be displayed. You have to get used to your barber treating you as a friend and equal.

Manual capability is what is in demand in the west. The young Englishman from the cities especially. mand in the west. The young Englishman from the cities especially, does not shine in this respect, and hence farmers will tell you at times that "no Englishman need apply." The craft that will enable a man to strike straight to his objective, hundreds of miles if needs be to cross the prairie, is in more demand than a knowledge, however profound, of music hall cele-

The plain, unvarnished truth is that The plain unvarnished truth is that England seems to the westerner to be able to produce and ship out here more incompetents than all the rest of 'he British Isles. Young fellow who never learned to do anything at home come out here to "take to farming." That is what they announce.

This class of men hang around the hotels until their moranic.

while.
That I may hear the fairies talk and see
the daisles smile:
I can't believe what Dicky says, that daisies aren't alive.
But then he's eight years old, you know, and I am only five.

The Cost

Our childish faith is swept away
As age spreads truth before our eyes;
We cease to dream of elf and fay
And fairy princes in disguise,
And O, the loss we suffer when
We yield the stork and Santa Claus!
The saintless world can ne'er again,
When they are gone, be as it was.

The cynics come to make us doubt.

They laugh our old beliefs to scorn;
The slips and flaws are pointed out.
And ere we know it, we have torn
The old faith from our breasts and turned
To build our own new theories,
Forgetfting the sweet prayers we learned
In childhood at our mothers' knees.

III.

Where is the profit, where the gain, What are we given to repay Us for the losses we sustain When simple faifh is swept away? Knowledge—aye, 'tis worth the cose We pay in fairy queens and clees. But what is left when we have lost Faith in our friends and in ourselves?

PRESIDENT ROOSEVELT ON SPORT. He Denounces System Which Permits Many to See and Few to Play

ercises at Harvard recently, President Roosevelt thus referred to matters of In contrast to such cases I will mention one single instance which will be sufficient. Being alone one day on a deserted railway platform. I accosted an English lad, a carpenter; from London, too. This was his day's performance: In the morning he got off the train, and tramped six miles into the country to seek work. He struck a bargain to build a farmer a stable at carpenter's wages, and to work at \$15 per month and all found for the summer.

Roosevelt thus referred to matters of sport: "The second point upon which I wish to speak is the matter of sport. Now I shall not be suspected of a tendency unduly to minimize the importance of sport. I believe heartily in sport. I believe in outdoor games, and I do not mind in the least that they are rough games, or that those who take part in them are occasionally injured. I have no sympathy whatever with the overwrought sentimentality which would keep a young man in cotton wool, and I have a hearty contempt for him if he counts a broken is what a business man said to me also: "Yes, we have some fine English lads here. They are a class of men who have a sense of honor." That was a high compliment on the plains. I hardihood, physical address and courwill venture to say that they had to live down the reputation of "remittance" predecessors before that tack was realized.

GRADE INSTRU-MENTS MADE IN

ARE THE HIGHEST CANADA . . .

Justin H. McCarthy's novel "The Dryad" possesses something of the flavor of an old Frnch romance combined with a classic sentiment that reverences the ancient gods of Greece. The scene is laid at Athens six centuries ago, when French adventurers overrant the land. Rainanart is an ideal knight who is set upon by ruffians in the forest and rescued by a dryad who tends his wounds and falls in love with him When one sees the account of her beauty and of the grace of her half-revealed form one is not surprised that he falls in love with her, but a wicked duchess steals him from her and induces him by love philtres to enter into a betrothal. Then follows the romantic story of the dryad's efforts to rescue her lover. She is a resourceful creature. duces him by love philtres to enter into a betrothal. Then follows the romanitic story of the dryad's efforts to recule her lover. She is a resourceful creature and having been gifted by the gods with great strength as well as immortality, she can appear as a knight in a tournament and win renown. She also finds means of outwitting the wicked duchess and by the aid of Simon, her truculent squire, her enterprise succeeds. The author's ingenuity is tested in bringing about a satisfactory union between a mortal and an immortal, but he does it very cleverly, and the book, as a whole, with all its poetry and chivalry will certainly be appreciated by such readers as like to have their fancy set jogging among picturesque and exciting scenes.

It is disappointing to find that the well-known ability of Agnes and Egerton Castle has not found due scope in "Rose of the World." Even these elever authors have been able to make no more than a lay figure of Rosamund, probably because she lacks the sympathetic qualities that one regards as the needful endowment of a heroine. She

thetic qualities that one regards as the needful endowment of a heroine. She was unresponsive to the love of the gallant young soldier, her first husband, but as the wife of a pompous lieutenant governor she is roused to passion for the heroic memorar three conservations.

TOPICS THAT ARE DISCUSSED IN THE CAPITALS OF EUROPE

Sir George White, who kept the flag Irish Nationalists never came to the Trying over Ladysmith and saved the top. empire from a great disaster, has re-tired from active service and will spend the autumn of his honorable career in York during his colonial tour of 1901 the autumn of his honorable career in the dignified position of governor of Chelsea Hospital, whose scarlet-coated veterans are so conspicuous in the London parks and streets. The field marshall can look back on fifty-two years' service, and his work will remain enshrined in the heart of the army and in the affectionate memories of the nation. For the first twenty-five years of his career he remained in the comparative obscurity of a regimental of facer, having reached his majority in the \$2nd Highlanders, but having an uncertain chance of rising to command the regiment. The Afghan war gave him his opportunity, and he came out of that campaign a V. C., a C. B, and a herevet. After holding office as milliof that campaign a V. C., a C. B. and a brevet. After holding office as military secretary to the viceroy he got his regiment and served on the staff in the Nile campaign of 1884-85, and in the Burma war of the following year, when his ability as a leader first obtained full recognition. In 1893, the only a major-general, he was selected to succeed Lord Roberts as commander-inchief in India, a post he filled for five years with marked success. After a short term as quartermaster-general of the war office he was despatched to South Africa, with which his name will always be inseparably associated.

On the reassembly of parliament erable curiosity was evinced reconsiderable curiosity was evinced regarding the personal appearance of the speaker-elect, Mr. Lowther, and in the crowd waiting in the central hall for crowd waiting in the central hall for his procession to the house of lords his procession to the house of lords the question asked on every hand was, the question asked on every hand was, the question asked on every hand was, the speakers, came at last, heralding Black ers, came at garding the personal appearance of the of the house of company of members. The jostling company of members. The speak-mystery was solved at last, the speak-mystery was solved at last. He is so broad and comprehensive in his revelations of human life. Think of Dick Swiveller and Micawber-think of the almost endless list of immortal characters. The great difficulty is what to choose when the area of selection is so vast. And do you know this—Dickens was never popular than he is now. More copies of his books are selling to-day than were selling ten years ago. Do you know I was talking to Hall Caine to:

Note that the property was solved at last, the speak-mystery was solved at last of immortal characters. The great was solved at last o

The late speaker's seat at Carlisle is to be contested, and Mr. Sanderson, the Unionist candidate, is making adroit use of the fact that he succeeded Mr. Gully in the recordership of Wigan, "Here I am at Carlisle," he says to his audiences "Yell sea the point. It lies "Here I am at Carlisle," he says to his audiences—"you see the point. It lies with you to see that the rest of the story is failed up. Claude Lowther, M.P. a kinsman of the new speaker, who has represented North Cumberland since the general election is seriously ill represented North Cumberland since the general election, is seriously ill and unable to attend parliament, but sent a message to the Carlisle Unionists saying, "Am laid up with painful illness. but more painful is the thought that I am not fighting with you all day and every day for the cause which we have at heart."

Another link, if a humble one, with the past has been broken by the death of Lord Beaconsfield's old coachman, who fell down in Holland Park, overe by the heat. He was very come by the heat. He was very groud of driving the great statesman, and his death recalls the story of Lady Beaconsfield's courage in concealing her pain lest she should disturb her husband just when he was about to make an important speech. Lord Beaconsfield had said good-by to his wife as he stepped out of his carriage at the house, when the footman inadvertently slammed the door on Lady Beaconsslammed the door on Lady Beacons-field's hand. She uttered not a cry, with a supreme effort concealing the with a supreme effort concealing the intense pain until her husband had passed into the house, entirely unaware of the acident. Then she fainted. When Lord Beaconsfield returned af-When Lord Beaconsfield returned al-ter a triumphant evening in parliament he learned for the first time of the heroic action of his wife. If he had known of the accident it would have certainly unnerved him for the speech which his wife knew he had to

Lady Beaconsfield's devotion to her husband was as noticeable as was that of Mrs. Gladstone to her great hus-band. The late Sir John Mowbray once asked Lady Beaconsfield how her husband managed to keep going with such an enormous strain upon his strength. "Ah." she said, "I dways have supper for him when he comes home, and lights, lights, plenty of lights Dizzy always likes lights; and he tells me everything that has pened in the house, and then I clap him off to bed." How characteristic it was of Disraell to like plenty of lights! Sir Charles Gavan Duffy heard Lord Beaconsfield give a clever defini-tion of party politics. "He spoke im-mediately of my intention to leave the house of commons," said Sir Charles, "I was too impatient, he said. Human life might be likened to a wheel; it was constantly turning round, and what was at the bottom to-day would be at the top some other day." Sir Charles made a good retort to this simile. "The wheel, I said, was worked by a strong pulley hauled by the party whips, and

ter I had written my three new chapters on the revolutionary movement, I quite unexpectedly received those documents. They contain more matter than you would think, as they are written

> British art is evidently appreciated by the French government, which has just purchased a picture of Frank Speniove-Speniove, the well-known R. B. A., and principal of the Yellow Door School of Painting at Beckenham. It is his "Too Late; Return of the Prodigal," which was hung at the Royal Academy last year, and is now at the Paris Salon. This is the second can vas by Mr. Speniove which has been bought by the Luxembourg an honor Mme. Sarah Bernhardt has been in-Adrienne Lecouvreur. Her stage ver-sion differs from that of the well-known piece by Scribe and Legouva in that it comprises six acts instead of five and introduces new scenes in the Bastille and the Luxembourg Gardens and new parts such as Voltaire, Count d'Argenthal, Du Marsay, la Balicourt and the hunchback Abbe Bourret, a Conder, than whom since the French very effective role, entrusted to M. de Max.

After the recent remodeling of the After the recent remodeling of the French cabinet the curious result follows that in the present government a financier, M. Rouvier, presides over foreign politics; a stockholder, M. Berteause, over the war office, and a medical gentleman, M. Merlou, over the financial department. The changes, however, do not imply any alteration in the policy of the cabinet. M. Merlou has been working under the premier's directon and will continue the policy of the treasury on the same policy of the treasury on the same lines. Apropos of M. Rouvier I hear from an excellent source that as soon as he leaves the cabinet—when he as he leaves the cabinet—when he does—he will accept the chairmanship of the Credit Lyonnais, the board of which, since the death of the former president, has not been working quite smoothly. The premier's own bank, La Banque Francaise pour le Commerce et l'Industrie, altho it has large capital and an industrie, altho it has large capital and an industrie, consecutive.

grams (220 pounds) if the vehicle weighs more then 125 kilograms (275 pounds), and 120 francs (323.16) if it weighs less than 125 kilograms. The customs receipts is good for s.x months and the amount will be repaid to the traveler on his leaving the country.

Italy.—For motor cycles with two or more wheels 42.60 lire (\$8.22) duty must be deposited. Automobiles with two Motor vehicles having more than two wheels and three springs attached directly to the vehicle pay 110 lire (\$21.23). wheels and three springs, which are attached directly to the vehicle or by means of auxiliary springs pay a duty of 330 lire (\$63.69). The receopt is valid for six months, but the period n:ay be extended to one year thru a written application made before expiration of the six months.ff The money will be refunded to the traveler on leaving the country.

Not Question of Speed or Absolute Distance, But of Milage Cost.

Now that the automobile has reached the point where it can be relied upon to go long distances, at high speed, and be cared for by the average citizen, attention is now directed to the matter of economy in operation, for with the price of gasoline increasing an dthe cost of rubber going in the same direction, this is a very serious matter.

same direction, this is a very serious matter.

There is probably no one better able to tal kon this subject than Albert L. Pope, whose company is one of the largest, if not the largest, makers of motor vehicles in America. In conversation recently, Mr. Pope said:

"The general public now appreciate the fact that the automobile can golong distances at a rate of speed from one to sixty miles an hour, while it can be kept in good condition by any average man who will give it a little study. Now comes the matter of economy, which will further develop the automobile to a point where it will carry four or five people over a stated distance, at a much cheaper rate her mile than is charged by the railroad.

"At the present time the rate permile, as might be expected, is, generally speaking, more than the railroad charges, but the time is coming when motors will be operated with such a small amount of gasoline, lubricaling oil and such light wear on the tres and machinery that great mileage vill be covered at a comparatively small figure.

"These results will be obtained by

be covered at a comparatively shall figure.

"These results will be obtained by lighter weight machines equipped with easy running motors, using carbuteators that reduce the quantity of gasoline to the minimum. Even now, a big touring car like the Pope-Toledo, will carry six passengers over 150 mics of good road in a day at a cost including gasoline, lubricating oil and wear an dtear on the tires and machinery which, all told, will amount to less than the charge of railroad to carry those six people the same distance, figuring the mileage at about two cents a mile. Automobile clubs are now beginning o promote contests of this kind, which will be welcomed by makers of highgrade cars."

A device for accurately registering the time taken by a motor car to tra-verse a given distance has just recently been patented. It is known as the Gibbs and Dumbell Time Recording Camera. The camera takes an actual photograph of the people on the car passing a given spot, and simultaneously it also takes a photograph of a chronometer. It is claimed by the in-ventor and patentees that this device would render inaccurate timing by powould render inaccurate timing by po-lice an impossibility, and that the evi-dence thus produced would be of the utmost value in legal cases arising from alleged furious driving or police

Racing Psychology.

At Fartford the other day a newspa-per man asked Eddie Bald what he thought as to the respective demands made upon a driver's nerve in time trials on circular tracks and in competition. "It is this way." said Bald. "Time trials are, of course, safer than races, but they lack that psychological quality which takes a man out of himself and renders him entirely oblivious to everything except the main object he has in view. I really think it requires more actual effort to attend strictly to business in rounding the corners at a mile-a-minute gait when you are alone on the track and out for you are alone on the track and out for time only, than it does when you are out in a scrimmage trying to do up the out in a scrimmage trying to do up the other fellows, with the air full of dust and a general whirl all around you. Under the latter condition some power outside of your own mentality seems to direct the wheel. Yes, I think that anything like judicious management makes it profitable for a manufacturer to put out a big racer. It certainly costs a lot of money, but if the machine does good work it must be an excellent advertisement for its maker. And it certainly pays to win races with fully-equipped stock cars, such as are sold regularly to purchasers."

GEMS OF LITERATURE

THE PICKWICKIANS.

THE B. B. DDJY CO., Lim the correction of the pickwicking of the pickw stead and agitated with Theory of Tittlight world with Theory of Tittlebats, as raim and unmoved as the deep waters of the one on a frosty day, or as a solitary specimen of the other in the immost recesses of an earthen jar. And how much more interesting did the spectacle become, when, starting into full life and animation as a simultaneous call for "Pickwick" burst from his followers, that illustrious man slowly mounted into the Windsor chair, on which he had been previously seated, and addressed the club himself had founded. What a study for an artist did that excit ng scene present! The eloquent Pickwick with one hand gracefully concealed behind his coat tails, and the other waving in air to assist his glowing declamating in the coat tails, and the other waving in air to assist his glowing declamating in the coat tails, and the other waving in air to assist his glowing declamating in the coat tails, and the other waving in air to assist his glowing declamating in the coat tails and the other waving in air to assist his glowing declamating in the coat tails, as the deep waters of the one on a tother waving in air to assist his glowing declamating in the coat tails and the other waving in air to assist his glowing declamating in the coat tails and the other waving in air to assist his glowing declamating in the coat tails are constant to the control of the coat tails and the other waving in air to assist his glowing declamating in the coat tails and the other waving in air to assist his glowing declamating in the coat tails and the other waving in air to assist his glowing declamating in the coat tails and the other waving in air to assist his glowing declamating in the coat tails and the other waving in air to assist his glowing declamating in the coat tails are the provided as to the debate did a'so, after archiving as when the base has always ranked the proving at the free the entry ter hind his coat tails, and the other waving in dir to assist his glowing declamation: his elevated position revealing

Medicine as Science of

on, together with the decides of the kins Hospital to become reglus poclub. Both bear a strong affinity to the fessor at Oxford University, came to come one of the great blessings of audiscussions of other celebrated bodies, ressor at Oxford University, came to come one of the great blessings of numanity, taking a place beside the obygen a resemblance between the proceedings respondent of The New York Herald, of great men, we transfer the entry to the sayings having been compiled by

ese pages.
"Mr. Pickwick observed (says the secretary) that fame was dear to the heart addresses and lectures delivered by of every man. Poetic fame was dear the physician during his stay at Johns. the heart of his friend Snodgrags sire of earning fame, in the sports of the field, the air and the water was uppermost in the breast of his friend Winkle. He (Mr. Pickwick) would not deny that he was influenced by human and an art of probability. Failure to passions and human feelings (cheers)— make diagnosis makes madicine interpassions and human feelings (cheers)—possibly by human weaknesses—(loud cries of "No")# but this he would say, that if ever the fire of self-importance broke out in his bosom the desire to benefit the human race in preference effectually quenched it. The praise of mankind was his swing; philanthropy was his insurance office. (Vehement cheering.) He had felt some pride—he acknowledged it freely; and let his one mies make the most of it—he had felt some pride when he presented his Tit-tlebatian Theory to the world; it might be celebrated or it might not. (A cry of "It is," and great cheering.) He would take the assertion of that honerable Pickwickian whose voice he had heard-it was celebrated: but if the fame of that treatise were to extend to the farthest confines of the known world, the pride with which he should reflect on the authorship of that production, would be as nothing compared with the pride with which he are with the pride with which he pared with the pride pared with the pride with which he looked around him, on this, the prouds set moment of his existence. Cheers.)

He was a humble individual. (No, no) Bill he could not but feel that they had selected him for a service of great honor, and off some danger. Traveling was in a troubled state, and the minds when the consequences.

"The past is always with us, never consequences, and await the consequences." with which he was in a troubled state, and the minds of coachmen were unsettled. Let them look abroad and contemplate the scenes which were enacting around them. Stage coaches were upsetting in all districtions, horses were bolting, boats were overturning and boilers were bursting. (Cheers—a voice "No.") No! (Cheers—b) Let that honorable Pickwickian who cried "No" so loudly come forward and can imagine in the future a social constitution of life. This patient had a ten-cent piece in his mouth several times to pay his ferriage. One foot was in Charon's boat half the time. Saline infusions saved half the time. What a disappointment it must have been to the old watchman! The only regret that he can have is that he will have to undergo it again."

For the Clergy.

Other sayings by Dr. Osler are:

"I suppose as a body, clergymen."

the sayings having been compiled by one who heard them at the clinical Hopkins Hospital.

As Dr. Osler is regarded as the greatest English speaking diagnostician living, the following is of interest:

"Medicine is a science of uncertainty esting. Of course one can make a certain diagnosis in every case, but it is done at the expense of one's conscience, and one goes deeper into the inferno with each diagnosis so made." This is his opinion of drugs:

"Physicians are apt to become affected with the drug habit from patients, Drugs are no good. Some doctors imagine that they can carry the magic button in their medicine bag. Press it ,and behold, the disease is cured in one day. If many drugs are used for a disease, all are inefficient."
The Ideal in Medicine.

Regarding seeking the ideal in medicine and life he said:
"In seeking absolute truth we aim at

the unattainable and must be content with finding broken portions.
"If the fight is for principle and jus-

dition in which heither divinity nor law shall have a place, when all shall be friends, and each one a priest, when the meek shall possess the earth, but we cannot picture a time when birth and life and death shall be separated from that 'grisly troop' which we dread so much, and which is ever associated in our minds with the physician and nurse.

when the chatter of the bander is severywhere about us, when, as someone has remarked, speech has taken the place of thought. To talk of disease is a sort of Arabian Nights' entertainment, to which no discreet nurse will lend her talents.

Praises Trained Nurses.

those tights and gaiters, which, had they clothed an ordinary man, might have passed without observation, but which, when Pickwick clothed them—
If we may use the expression—inspired involuntary awe and respect; surrounded by the men who had volunteered to share the perils of his travels, and who were destined to participate in the glories of his discoveries.

Mr. Pickwick's oration upon this occasion, together with the debate thereon, is entered on the transactions of the kins Hospital to become reg. us p.o.

Praises Trained Nurses.

"Marriage is the natural end of the trained nurse, who is a choice selection from the very best women of the trained nurse, who knows the laws of health, and whose sympathy has been broadened by contact with the best and the worst of men. She has not acquired immunity from that most ancient of all diseases, that malady of which the Rose of Sharon sang so plaintively, that sickness 'to be stayed not with flagons nor comforted with applies.'

o either in her mission.

"The religion of humanity is thin stuff for women whose souls ask for stuff for women whose souls ask something more substantial to fe something more substantial to feed. There is no higher mission in life than nursing God's poor. In doing so, a woman may not reach the ideals of her soul, she may fall far short of the ideals of her head but she will go far to satiate those longings of the heart from which no woman can escape. Both from which no woman can escape. Ro-mola, the student, helping her blind father, full of the pride of learning, we admire: Romola, the devotee, carrying make diagnosis makes medicine inter- in her withered heart woman's heavi est disappointment, we pity; Romola, the nurse, doing noble deeds amid the pestilence, rescuing those about to perish, we love."

In addressing a class of students,

In addressing a class of students, the doctor has said:
"In the first place, in the physician or surgeon, no quality takes rank with imperturbability. It is the quality which is appreciated by the laity, but often misunderstood by them, and the physician who has misfortune to be without it, who betrays indecision and worry, and who shows that he is flustered in ordinary emergencies, loses tered in ordinary emergencies, loses rapidly the confidence of his patients. Cultivate, then, gentlemen, such a judicious measure of obtuseness as will enable you to meet the exigencies of practice with firmness and courage, without, at the same time, hardening

without, at the same time, hardening the human heart by which we live."
Here is one of the great physician's references to death:
"Pneumonia is the captain of the men of death. It is the old man's friend. It enables him to escape those cold gradations of decay. It is a painless release from the troubles of life. This patient had a ten-cent piece in his mouth several times to nay his farries.

MUNICIPAL LIGHT IN NEW YORK.

Plans and Estimates Submitted for the Enterprise.

Are lights at a cost of \$64.07 a year appointed by the mayor to provide mento of Professor James upon educaplans and estimate the cost of a muni- tion and crime recently. cipal electric lighting plant, says The New York Herald. With the report the commission,

son P. Lewis and George F. Seaver, advocate. son P. Lewis and George F. Seaver, submitted plans and drawings for a building to be erected on the site purtion that he might be cleverer in carrychased recently by the city covering the block bounded by avenue A and the East River and Ninetieth and Ninety-first-streets. This plant is designed to supply pow- great universities.

er sufficient to maintain 15,000 are been thru Harvard and afterward be \$7,567,000, and the total annual operating and fixed charges are estimated at \$1,269,000. A plant of sufficient size has been provided to enable the city to light the streets, parks and parkways, as well as all of its public buildings, with electricity to the entire exclusion of gas if it should decide to do so. The report says:

[With total cent of supplying the continuous part of supplying t

do so. The report says.

"The total cost of supplying the service contemplated in this report at the rates charged the city by the Edison company, would be \$2,750,000; the operation of this plant would therefore effect an annual saving of \$1.481,000, the converging tally 20 per cent of

under the ruling rates, was \$1,708,000:
the operation of this plant would
therefore effect a saving of \$434,000
below the cost under existing c nditions—that is electric lighting can be
substituted for gas both in streets and
in public buildings, and an annual
saving of \$434,000 be made."

The estimator of the cost of this

The estimates of the cost of this plant include the cost of n'ne sub-stations in Manhattan and five in the Bronx, each occupying a city let. This plant applies only to Manhattan and the Bronx; the question of a similar plant for Brooklyn, Queens and R ch-mond is to be considered lat-r.

PUZZLED POLICE.

Stranger Deposits £648 and Disappears.

The Bradford police are uneasy about the whereabouts of a man named Michael Glenn, who introduced himself to them last Friday in a mysterious manner, says The London Mail.

He walked into the police station and handed a bag containing £335 behind the counter, asking the detective in charge to take care of it for him. Beyond saying that he was a foreman from Pittsburg, and that he could neither read nor write, he gave no account of himself.

He extracted a sovereign from the bag, and returned on Saturday for £10. which was handed to him. When he left the police station he went to the Craven Bank, and then disappeared.

Later in the day, the manager of the Craven Bank went to the police station and reported that Glenn had deposited with him a bag containing £324, asking that it should be taken

"Throw away all ambitions beyond that of doing the day's work well."

bags, each containing 1324—one at the bank and the other at the police station—waiting for him to take away.

DR. ELIOT DEFENDS COLLEGE MEN Harvard President Says College Education Never Induces Crime.

"As to college life being conducive instead of \$146 for the same period, and of crime, I need only say that such a incandescent lights at five and one-half statement is absurd. Any man has cents a kilowatt hour instead of 10 nobler ideals after a course in one of cents, in Manhattan and the Bronx, is our great universities," says President the final estimate of the commission Eliot of Harvard, on the pronuncia-

FOREIGN AUTOMOBILING

INTERNA. TIONAL GENERAL

GOOD DRIVER MAKES TRIP

After supper an automobile conven-tion was held in front of the hotel. A tion was held in front of the hotel. A number of villagers and farmers had gathered, and a colony of small boys. These inspected the three big cars with much curiosity. The learned talk about gears, transmission, clutches are spark-plugs they regarded as one might

"Bet that car cost as much as my farm," said one. The wager was not a foreign tongue.

"Bill, could you steer one o then juggernauts thru your front gate without strikin' the hubs?" asked another. "Druther drive a load o' hay blind-

folded," was the reply,
"Wall," observed a pipe-dreaming
old gentleman who sat on the step. old gentleman who sat on the step, when I got my first self-binder I had the biggest kind'v a picnic threadin' it and a hull half-day's variety shows putt'n it the first round on a field's wheat. I c'n run the blame thing now workin' by the sound'y the gear, too But if I was to be given one o' then handcars f'r a Christmas box I could n't start it out 'v its tracks, and if I t it started I'm blame sure I'd never it stopped till I begun to git home

"There's one consolation" said an other. "I'm willin' t' bet that there ain't one o' these clever gentlemen that knows an ioty about how 't run a hayfork."

Lights Lighted. It was now time to illuminate. The gas lamps were lighted one by one and the village got full of leery, big white eyes. The stoorekeeper barred his big brown shutters and came over to watch. The chores were done, and Cooksville was gliding into the night. "Say, boss, how many ile lamp would it take t' make as much light as all them 'luminations on that one proposed one of the neighbors. When told that the lights on that ar were equal to 16,400 candles all burning at once, he calculated that there was more light in Cooksville that night than there would be if Cooks-ville had a monopoly of all the stars

NERVE ON RUNAWAY CAR MOTOR TRUCKS ARE STRAWS

of the horse monopoly as a motive power.

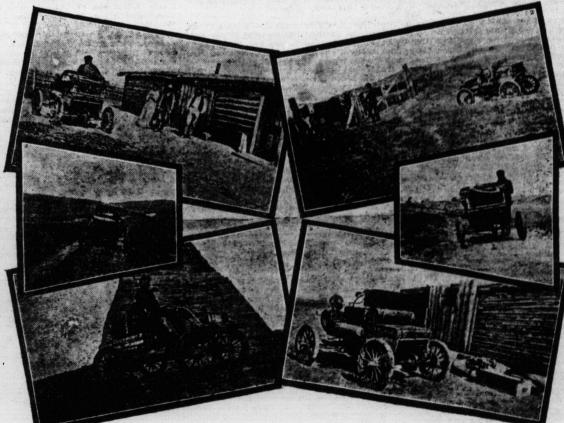

Electric railways are doing their share. But electric railways don't run to no side lines and concessions. If a motor truck is able to haul sodawater and pop from York Mills to Toronto, two and three tons at a load, a motor truck is able to haul a farmer's bales of hay, his potatoes, his wheat, his oats and his pigs. If an ordinary business man, used to an office, is able in a few months to put a 40-horsepower car just where he wants it, inch by inch, under perfect control, a farmer or a dray driver is able to do the same with a motor truck. It is not a question of speed. It is a problem of power, convenience and control. The horse has not increased his power. The draught team to-day hauls three tons on the best of roads. The most powerful motor truck run by gasoline is able to haul twice the weight with much more reliability, no fatigue and little or no care.

Therefore the farmer should recog-Therefore the farmer should recognize in the motor not an enemy, but one of his surest allies in progress. We don't believe that the farmer's motto is "Stick in the mud," The farmer is progressing. And the farmer of the twentieth century will progress by means of gasoline and electricity where those of the last century stuck to the horse and the ox. horse and the ox.

In a recent speed case in a Long Island town it was found almost impossible to get a jury together, all the "honest tillers of the soil" called in as jurymen declaring themselves prejudiced against automobiles. One man, when examined by counsel for defence, declared that he would like to see all autos swamped 10 miles off Fire Island, and another, "that he would like to and another, "that he would like to

A correspondent, who approves my suggestion that the adoption of the toolt talizer might be the proper solution of the question of legalized betting on racetracks, sends me an extract from letter written by Richard D. Green-Price, a well-known English ity. Mr. Price, who is advocating more generous treatment of the horse-breed-ing interests by the British government and is discussing ways means, writes: "The finding of means, writes: "The finding of this money is such a simple matter, and does not affect the taxation of the country in the least, that, while admiring the French for their modus operandi. I am at a loss to see why w might not, with great advantage to cur selves, act on the same principle. France, by means of a machine called the 'totalizer,' or pari mutuel, ex-tracts 10 per cent, of all moneys in-vested in betting, and applies it for the good of agriculture and for the benefit of the poor of Paris. Instead of allowing the public to be "pinched" in the odds they may have to accept when betting with bookmakers, or running the risk of being welshed, and never being paid at all, this system is absolutely fair. The persons who put their money into the machine on a certain horse, if it wins, share all the money thus pooled on the race, less 10 per cent. Not only does this revolutionize the system of betting, but sweeps away st.eet betting and starting-price bet ting, the greatest evils we are now la-boring under, and would thus provide ample funds for the board of agriculture and fisheries, to the untold benefit of horse and live stock breeders gened erally."

of the Earl of Essex concerning the horses

drug, but might be improved to a commodity, not only of greater use at home, but also fit for exportation into other countries. The cell is also fit of the countries of the countries of the countries.

home, but also fit for exportation into other countries. The soil is of a sweet and plentiful grass which will raise a large breed, and the hills, especially near the seacoasts, are hard and rough, and so fit to give them shape and breadth and sound feet. The present defects in them are breeding without choice of stallions either in shape or size, and trusting so far to the gentleness of the climate as to winter them abroad without ever handling colts till they are four years old." "Of sulky or jady animals I think I may say that Shotover and Farewell were the wrost two I ever had at Kings clere. The former was of a very pecu-liar temperament. She resembled the famous parrot in the story, for she was, or appeared to be, always thinking, and her thoughts must have been the reverse of agreeable to her, for after a spell of meditation she would sulk for hears. I recollect on one occasion I had to move her from one box to another while some repairs were going on. She stood perfectly still the whole day. When we entered the box at stable time to all appearances she had not time to all appearances she had not even casually moved her foot, neither had she attempted to eat any of ler food. It was, as I understood it, a protest at being disturbed and turned out of her own home. That was the only way she could think of to express her resentment; as soon as she got in a week's time for a fortnight's rest only way she could think of to express her resentment; as soon as she got back again to her box she was perfection a week's time for a fortnight's before he resumes his work with do not know that one ought to speak do not know that ought to speak do not know the speak do not kn do not know that one ought to speak of a mare as disappointing when she has won the Derby, but she was very exasperating in one way; when I had her just fit, and she was looking her best, inspiring us wth most confidence accordingly, she ran some of her worst races. Farewell was a rank jade. She

won the One Thousand in a canter and refused to race ever after.
"Orme and Flying Fox had the same I saw her one Sunday, she stood in the aisle,

TO MAKE TORONTO SIT UP.

New Ontario Newspaper Favors An-

Winnipeg. July 8.-There is a movement at Emo Town and other places in New Ontario to ask Ottawa to join the Emo district to Manitoba.

The Emo Journal says the Ontario government should be asked to refund ome \$25,000,000, the amount collected from timber sales in New Ontario. The paltry sums which have been voted for roadwork is the principal cause of the

annexation movement.

The Emo newspaper continues:
"While many do not relish the idea of separating from Ontario if it can possibly be helped, they realize that a strongly signed petition would enable agitators to make Toronto sit up."

Watchman Dies in Fire.

Fort Plain, N. Y.. July 8.—At the Pge in its history. When seen he said: of 162 years, David T. Timmerman, the oldest man in this section of the country should cut the largest crop in its history. When seen he said: "In my trip I was along the Soo line, at Halbrite, Vellow, Grass and other try, died here to-day.

Is the worst kind of poverty. However rich a woman may be, if her health is "poor" she is poor indeed. She has no appetite for food and the choicest dishes appetite for food and the choicest dishes cannot tempt her. She turns and tosses through a restless night on a couch which might woo an empress to slumber. She has no strength for household cares, no delight in social pleasure. She sits "perked up in a glistering grief wearing a golden sorrow." She is a wife and mother. But she has no happiness in either relation. She knows her husband's life is set in tune and time to the minor music of her own misery. If her child laughs or cries her nerves quiver with paix.

laughs or cries her nerves quiver with pais.

Ask such a woman if she would like to be well; to be her husband's comrade, her child's playmate. Could there be but one answer?

Such a woman can get well if she will. All her symptoms indicate a diseased condition of the delicate womanly organism. Cure that condition and the woman will be lifted up to the full enjoyment of health.

In ninety-eight cases out of every hundred Dr. Pierce's Favorite Prescription will cure womanly diseases, will restore the womanly health. It has cured tens of thousands of women many of whom had been given up by physicians and friends. It is essentially a medicine for woman's ills. It dries enfeebling drains. It heals inflammation and ulceration. It cures female weakness and bearing down pains. It a tranquilizes the nerves, restores the appetite and gives refreshing sleep.

"Favorite Prescription" differs from

"I had been a constant sufferer from uterine disease for five years, "writes J. A. Steorts, of Yankee Dam, Clay Co., West Virginia, "and for six months previous to taking your medicine I was not out of my room. Could not walk or stand, as there was such pain and drawing in left side and bearing down weight in region of uterus, accompanied with soreness. I suffered constantly with headache, pain in back, shoulders, arms and chest; had palpitation, nervous prostration, constipation, disziness, ringing in ears, could not sleep, and breathing was so difficult at times I could not lie down. Words fail to describe my sufferings when I wrote to you for advice. In a short time I received a kind letter from you telling me I would be greatly benefited, if not entirely cured, by the use of Dr. Pierce's Pavorite Prescription, together with Dr. Pierce's Pavorite Prescription, together with Dr. Pierce's Pleasant Pellets and the local treatment which you advised, I could walk (with the support of a cane), the drawing and pain in side and bearing down weight were not so bad, and when I had taken three bottles of the medicine the periods were regulated, I was not so nervous, could sleep well, and the pain in side and bearing down had vanished. I have taken six bottles of 'Favorite Prescription,' two of 'Golden Medical Discovery' and four visis of 'Pellets,' could steep weil, and the pain in suce and bearing down had vanished. I have taken six bottles of 'Favorite Prescription,' two of 'Golden Medical Discovery' and four vials of 'Pelleta,' and my health is better at this time than it has been in five years.
"With grateful thanks for your kind advice, and with best wishes."

Dr. Pierce's Pleas-ant Pellets are a

GROWING CROP PERFECT OPINION OF GRAIN BUYER

Prospects of Canadian West Neve Excelled - Weather Splendid -No Rust.

Winnipeg, July 8.-(Special.)-W. Matherson, grain buyer for the Lake of the Woods Milling Company, who returned Thursday night from a trip west and south, states that In his 25 years' experience he has never seen Boston, July 8.—The body of Augustus Bossert, watchman, was found to day in the ruins of the fire which destroyed last night extensive lumber yards and wharfage property in the south end... years' experience he has never been the present crop prospects of the Canadian West excelled. The growing crop, according to Mr. Matherson, is now about perfect, and if the remainder of the season should be favorable. der of the season should be favorable the country should cut the largest crop

at Halbrite, Yellow Grass and other

at Halbrite, Yellow Grass and other points. I never saw the wheat better there. Earlier they had a little more rain than was necessary, the not as much as we have had here, but the last week's splendid weather was just what they needed. Then from Alame Jato Melita the prospects are for the best crop the district has ever had.

"At Pipestone and Virden, on more northern branches, conditions are imiliar, and as far west on the main line as Broadview. The last district I examined was around Boissevain, Ninga and Killarney, and as to conditions there I cannot put it strong enough. I measured field after field near Ninga and Killarney, in which the wheat was over three feet long and was heading out.

over three feet long and was heading out.

"On the whole, I think the crop is about a week later than usual. I examined the wheat thoroly and could find no trace of rust. I do not like to prophesy what the yield will be, but with such weather as the country has had the last week continued, Manitooa and the Territories should cut the largest crop in their history. The only district where the crop promises to be light is on the low land of the Red River Valley. This year's acreage is tremendous, as compared with that of the year 1902, which produced our greatest crop up to date, hence the magnitude of our prospects if the balance of the season should be favorable."

WINNIPEG BOUNDING AHEAD.

Marvelous Increase in Building Operations in the Present Year.

the opening day, and every Saturday thereafter. The special leaves at III.36 by the G.T.R., returning after the last borses in my charge which it would be some risk properties of the control of the properties of the properties of the control of the properties o That the City of Winnipeg is destinwest for 1905 will approximate 100,000,000 bushels, with also large yields of other grains, so that with favorable weather for ripening and harvesting our western provinces will be basking in the sunshine of prosperity this year. The tide of immigration continues to flow into that land of promise and plenty, and the people of the west are beaming with hope and gladness as they stand on the threshold of prosperity and richness and welcome all newcomers.

POINTED PARAGRAPHS

Hope enables a man to accomplish wonders—in his maid.

A man seldom has to work overtime to make a fool of himself.

Where there is a man's will there is a woman's way to break it.

Honeysuckles and the sweet girl graduates bloom simultaneously.

A man seldom goes to a friend for a loan if he really needs the money.

A well-balanced man doesn't have to part his hair or name in the middle.

More women would go in for vocal culture if they could buy things for a

song.

After singing the baby to sleep a wo-man proceeds to talk her husband to sleep.

About the only fault the average wo-man has to find with her past is that it's too long.

During the courtship a young man is never out of danger till the girl says "No" three times.

Some cirls proceed to catch on and

"No" three times.
Some girls proceed to catch on and
marry—then implore the divorce judge
to help them let loose again.
People would have more faith in a
reformer if he would furnish proof of
his sincerity by beginning with himself.
When a man stands at the marriage

THE FINANCIAL BACKING STILL GOOD AT NEW YORK

been a matter of the most trivial nature, The forecast from Washington indicates a loss of from two to three million bales from that of last season, even allowing for favorable weather from this time forward. Wherein this is to be construed as beneficial, the market leaders have thus far not condescended to explain. The same character of treatment has been meted out to the other important crops, a clearer insight. The forecast from Washington indicates a the other important crops, a clearer insight into which can be obtained from next Tues-

ing to a weak speculative account. There is still a large amount of stock of this saue to be placed, and while it may fairly appeal to Investors at 150, after the recent experiences with the shares, it is doubtful whether a feeling of confidence can be established above this level.

Current Happenings Again Ignored as Market Factors—The Week in Local Securities.

World Office, Saturday Evening, July 8. The banking interests continue to supply the energy to the New York market, and these are to appearances unwilling to allow these are to appearances unwilling to allow these are to appearances unwilling to allow prices to wane, irrespective of whatever market factors may present themselves.

prices to wane, irrespective of whatever market factors may present themselves. The action of prices is, therefore, altogether at variance with a diagnosis of the situation, and utterly problematical as to the future movements. Gossip agencies and attempting to follow the line of fluctuations with plain reasoning, and are compelled to fall back on the assertion that the situation has improved without being abif to enter into details as to the matter of improvement. Traders have become so thoroly selzed of the inside manpinilations that it has become necessary to provide fewer profits on the long side during the week.

On Monday the government report of the cotton crop was published. The percentage condition shown was with one exception the worst in 15 years, yet the market simply ignored the official finding, as if it had been a matter of the most trivial nature, the forecast from Washington indicates.

EXAMINERS APPOINTED.

O.C.P.S. Council Concluded Annual Meeting on Saturday.

of Physicians and Surgeons closed their summer session on Saturday by hearing the report of the complaints committee. Various complaints were sent in by students, alleging that their ex-

mittee. Various complaints were sent in by students, alleging that their examination papers had not been fairly judged. The examiners were uph-ld in their decisions in every instance.

A bylaw was passed appointing Drs. McDonald, Moorehouse and Campbell the executive committee for the year.

Hon. Dr. Sullivan again brought up the matter of provincial health bureaus, and on his motion a committee was appointed to wait upon the government with a view to establishing a bureau and department of health. The government will also be asked to assist in the establishment of sanitaria for the treatment of consumptives. The council decided to continue its verbatim records of meetings and adjourned to meet in Toronto next year. The medical council selected the 15 subjects and appointed the official examiners, adopting the education committee's recommendations: Anatomy, descriptive—Dr. T. W. G. McKay of Oshawa. Theory and practice of medicine—Dr. George Hodge of London. Clinical medicine—Dr. H. R. Duff of Kingston. Midwifery, operative and other than operative, and respiral diseases—Dr. J. R. McCabe of Strathroy. Physiology and histology—Dr. R. D. Rudolf of Toronto. Surgery, operative, and other than operative—Dr. W. T. Parke of Woodstock. Clinical surgery—Dr. J. S. McCullough of Alliston. Medical and surgical anatomy—Dr. T. H. Middleboro of Owen Sound. Chemistry, theoretical and practical, and toxiocology—Dr. A. R. Pyne of Toronto. Materia medica and pharmacology — Dr. James S. Sprague of Stirling. Medical jurisprudence and sanitary science—Dr. D. J. Sinclair of Woodstock. Diseases of women—Dr. R. E. Webster of Ottawa. Diseases of children—Dr. James Newall of Watford. Pathology, therapeutics and bacteriology—Dr. Isaac Wood of Kingston. Homeopathic examiner—Dr. W. A. McFall of Peterboro.

Regarding the suggestion that an examiner may examine on the subject on which he lectures, the committee reported as follows: "No teacher shall

Remarkable Scenes at Close of Autonomy Debate-Foster in Sarcastic Mood.

You Can Be Cured FREE

A SCIENTIFIC DISCOVERY.

now possible to be enred of any form matism without having your stomach upside down or being half-choked to and every sufferer from rheumatism welcome this marvelous discovery en arms and give it an honest trial.

Are You All Bound Up With Rheumatism and Gout?

nying the holiday spirit that pervaded the chamber. For instance, when young Armand Lavergne of Mont magny, the disciple of Henri Bourassa, apostle of the third party, by dint of much endeavor, succeeds in hurling a paper dart across the floor of the house with such well-directed aim that it fell on the desk of Jean Baptiste Morin, one could understand the humor of the thing, and when Jean Baptiste gravely turned round, looking for the culprit, and, selecting Mr. Monk, returned the compliment of the taper dart, one can readily understand that the positive cleverness of the thing struck everyone.

Otawa, July &—(Special.)—It has been a stirriog week in the house of commons, and the way in which business has been rushed thru is a great tribute to the weather. Two weeks ago the end of the session appra.ed to be as far away as ever. Then Ottawa experienced a spell of real midsummer healt of the session appra.ed to be as far away as ever. Then Ottawa experienced a spell of real midsummer healt of the session appra.ed to be as far away as ever. Then Ottawa experienced a spell of real midsummer healt of the session and, and to think that there were other things in life besides clause is and C. P. R. exemptions. The end of the long-drawn out autonomy debate came at midnight on Thursday, when the Alberta bili passed under the wire after beling under discussion since Feb 21. Atherta was and the smile of pleasure that it up the pallid face of the premier, as he acknowledged the cheers of his enthurs plants followers, when the third read through to the relief fels at the disposal, for the time being, of these stormy petrels of this session.

The scenes that attended the final stage of the autonomy bills were mire of correct, and altho their party points and the smile of pleasure that it up the pallid face of the premier, as he acknowledged the cheers of his enthurs plattic followers, when the third read through to the relief fels at the disposal, for the time being, of these atornay petrels of this session.

The scenes that attended the final stage of the autonomy bills were mire to acknowledged the cheers of his enthurs and the smile of pleasure that it up the pallid face of the premier, as he acknowledged the cheers of his enthurs plattic followers, when the third read provided one of correct and the provided one of correct and the provided one of correct and the provided one of the session of the burdes of case, and altern the final stage of the autonomy bills were mire. The provided one of the session of the provided one of correct and the provided one of the provided one of the provided one of the provided one

laboriously. About half an hour later there was an earnest conversation going on in the corridor. Jean Baptiste was being paraded up and down with Monk on one arm and Bergeron on the other, and there was being drilled into his understanding the most voluble French, the meaning of the amendment for which he had unwittingly voted. The anxiety of Mr. Morin during the remainder of the divisions to vote

the French, the meaning of the divisions to vote with his eyes open, was so noticeable that on two occasions he was nearby passed over by the clerk when the names were being called, owing to his determination not to rise in his wast at the risk of voting the wrong way.

Following hard on the heels of the autonomy third readings came the budget, and Mr. Fielding got the hand from the Liberal benches, when attired in a fannel suit of a "ultra-sun mery" nature he rose to deliver his mery" nature he rose to deliver his as a sort of parochial summers. There we will stop to get Esquimaux as out of parochial summers there were the digrature of the summers. There we will stop to get Esquimaux as it were and he bandled millions across the floor of the house until the ordinary financial layman began to see the dollar mark verywhere. Poor Jerome Sykes, the late comedian, when the dollar mark wereywhere. Poor Jerome Sykes, the late comedian, when the dollar mark all over if. Great big dollar marks, too. As one looked at dollar mark all over if. Great big dollar marks, and the summers have a soft of content of the dollar mark all over if. Great big dollar marks, and the summers have a soft of the dollar mark all over if. Great big dollar marks, and the summers have a soft of parochial summers have been ready this year had it not be best of all Esquimaux. From this tribe to see the dollar mark all over if. Great big dollar marks, and the summers have a soft of parochial summers have a soft of paroc suit of "The Billionaire" would have fitted Mr. Fielding to a T.

Are You All Bound Up With Rheumatism and Gout?

The new remedy was discovered by John A. Smith, Milwankee, Wis, who is generous enough to send a package free to every sufferer who writes at once. It is a hong treatment, and will not keep you from your work and the sufference of the subject of the memory so-called rhenmatic remedy on the market day, except this genuine cure, will cause you violent stomach pains, and some of them are no diagnostic cure will easily to the skeep of the part of one day only, which establishes a resultation is so run down that he should be very careful what he puts into his stomach gives me picaure to process a reliable remedy. That remedy is "Gloria Tonic." It had it tried on hospital patients, also on old and rippled persons, with perfect success dut some people never will believe any to the best and quickest way is for you to write me that you want to be cured, and I will send you a package of 'Gloria Tonic,' The and and armories and public buildings, and come provided the perfect of cost. No matter what your form of cost. No matter what you want to be cured, and I will send you a package of 'Gloria Tonic,' Trot of cost. No matter what your form of the cost. No matter what your form of the cost of the cost. No matter what your form of the cost of the cost. No matter what your form of the cost. No matter what your form of the cost of the cost. No matter what your form of the cost. No matter what your form of the cost of the cost of the cost. No matter what your form of the cost of the

"Second—My experence n Arcte exploraton, and which on and off, has covered a perod of nneteen years.
"Thrd—Knowledge of esqumaux,their language, idiosyncrasies and habits, and which is valuable, in getting from them the best efforts of which they are capable.

are capable.

Right here I would like to say that it is to Mr. Morris K. Jesup. of your city, that the chief credit for fitting out this ship is due. Without his efforts she might not have been built at all, and she certainly would not have been ready this year had it not been for him.

Laying in Supplies.

Winter Quarters in September.

"From Cape Sabine we will drive the ship thru Kennedy and Robeson hannels to the northern shore of Grand Land, where the vessel will be put in winter quarters. We expect to reach there about the first of September.

"The Arctic night begins then and lasts until February. Then, as soon as the long Arctic day begins, we vill start in our sledges for the Pole. From where we will leave the ship to the Pole is roughly 490 miles."

"What do you expect to find when you reach the pole?" one of Mr. Peary's listeners asked.

"I expect nothing," he replied. "There is nothing abnormal there. I am stree of that—no open sea, no anything out of the ordinary. Without instruments of precision one might walk over the exact spot and never know it."

For the goal is feathed. It will as it always has been."

"Then—if you succeed?"

Animation flashed into the blue eyes.

Then," he said, "it will be to the glory of America of having first opened to the world the million square miles of unknown regions—of a vost expanse which has been separated from will be all new to science.

"Then," he said, "it will be to the glory of America of having first opened "to the world the million square miles of unknown regions—of a vost expanse which has been separated from will be all new to science.

"Tobacco smoke should be shunned and those who must use the weed

HOW TORONTO PERPETUATES A TOWN-TIME CUSTOM IN THE WARNING CLANGING OF OLD MARKET BELL

Few of the Thousands Whose Goings and Comings Ara Marked By It Are Aware That a Gentle Old Lady of 70 Has For 13 Years Fulfilled the Curious Duty.

Sunday Morning

There still exists in the St. Lawrence Market an old custom of the days when Toronto was an overgrown town, before it donned the long trousers of a real city's dignity. 'Way up in the tower of the old hall, which faces Kingstreet, there is a bell whose dolorous tenes can be heard sometimes in the brief lull of traffic as it chimes out different hours to be observed by the

Of the thousands who live in the neighborhood of the market or who have passed beneath its shadow there are few who know who the person is who so assiduously attends to the dutes of the old bell. For it must be said that in the many years that it has clanged out the workers' time of day at 6 a.m., noon and 6 p.m., there have been but few occasions that the bell has been a minute astray from the time that it was supposed to be

the time that it was supposed to be rung.

Like the bell, its ringer is one of the landmarks of that part of the city, and, strange as it may seem, it is a woman, Mrs. Elizabeth Riddle, who so carefully pulls the rope, day after day, to tell those who work in the vicinity that it is time to go to work or to cease their labor for another day.

Mrs. Riddle is a sweet-faced, motherly old lady, who has passed the allotted three score years and ten of her life and has rung the bell on the hours required during the past thirteen years. When she has been in ill-health or indisposed the duty has fallen upon her son or daughter-in-law, who reside with her in the caretaker's apartments in the old hall. Mrs. Riddle is still hale and hearty at even her advanced age, and still takes been circled. fully pulls the rope, day after day, to tell those who work in the vicinity that it is time to go to work or to cease their labor for another day.

Mrs. Riddle is a sweet-faced, motherly old lady, who has passed the allotted three score years and ten of her life and has rung the bell on the hours required during the past thirteen years. When she has been in ill-health or indisposed the duty has fallen upon her sold with her in the caretaker's apartments in the old hall. Mrs. Riddle is dwich his widow was appointed in a like capacity. She is assisted in her which his widow was appointed in a like capacity. She is assisted in her duties by her son and his wife.

To reach the bell rope it is necessary to climb several flights of stairs, and attended to, the old tower will come than the rope of the bell as to send it hurtling ever

Would not the erection of city wharves in this locality and in Ashbridge's Bay stimulate business in the harbor? To this question, the harbor master answers: "Undoubtedly it would do so. Enquiries are not infrequently made for wharf accommodation, and I.

ADVANCE IN STENOGRAPHY

Annual Meeting of the C. S. R. A. Brings to Attention the Rapid Development of Stenography.

Saturday saw the 14th annual gatherimportant associations in Canada. The roll of only fifty, yet it represents the cream of the reporters' profession, and of being the one to sound the charge

The Modern Way.

into the association. The second eximination consists of papers on shorthand, a speed of 150 words a minute is necessary; spelling, arithmetic, geography, correction of errors in gram-

to the excellence of the organization and work done by the Ontario Association. The next few years will probably see a great increase in the membership and influence of the C. S. R. Association of Ontario.

GIVEN A MILITARY FUNERAL.

But Less Than 100 of Garrison Paid

With military honors, the body of William Oldbury, armorer-sergeant of the ordnance store corps at Stanley Barracks, was yesterday committed to its last resting place in Mount Pleasing of one of the least known, yet most ant Cemetery. Sergeant Oldbury's whole life had been spent in a military Chartered Stenographic Reporters' As. sphere. Even more renowned was the sociation of Ontario has a membership death of his son, who, at the battle of Omdurman, bore the proud distinction

sociation of Ontario has a member ship roll of only fifty, yet it represents the cream of the reporters' profession, and the letters' "C.S.R." after a reporter's many after the common of the reporters' profession, and the letters' "C.S.R." after a reporter's a second and the letters' "C.S.R." after a reporter's a second and the letters' "C.S.R." after a reporter's a second and many and the letters' "C.S.R." after a reporter's a second and reporters' association of Ontario, with a view to promoting and increasing the knowledge, skill and-proficency of its members in all things relating to the business of a stenographer.

In those days court stenographers, and not reached anything like the pefection that it has to-day. The advent of the typewriter in the hands of an experienced operator has done much to revolutionize this branch of the pofession, as it has so completely revolutionized the business of ordinary office stenography.

T. W. Bengough, one of the charter members of the association and its first treasurer, told a World reporter a few things about the wonde full growth of the profession in Ontario in the last quarter century.

"Twenty-five years ago," said Mr. Bengough, "I was the first man in Toronto to employ a stenographer. Such a thing as a woman stenographer was then unknown. To-day there are over in the thought about the wonde full growth of the profession in Ontario in the last quarter century.

"Twenty-five years ago," said Mr. Bengough, "I was the first man in Toronto and the majority of 'him are wondered business man in the city to look at a typewriter shad they laughed at the idea. "It wouldn't be business like to send out a printed letter," said they what he thought about 3300 a year, and now look at the business colleges in the city which make attender and the city which make attender and the city which make stenography and the profit of a more sensible uniform for summer spondence is done by them.

The Medern Way.

E. Nield, the secretary-treasurer of the association, employs a very inagen. men think if they make a they might get some relief by the tion of a more sensible and co ble cover.

TO EVANGELIZE THE WORLD.

Epworth Leaguers Inaugurate at Important Movement.

ord thus made may be used at any time later. A reproducer is fitted to a graphophone and the original court proceedings are taken off on a type writer by a stenographer. By this means when a reporter is absent from his office and the records sent back in a very short time they are ready for use. There are very few of these machines in use in Canada.

The business of the association is managed by a council of nine members. This council also carries on all the examinations for entrance into the association and conducts the general work of an executive. The president is R.

Pienie at' Oshawa.

Oshawa, July 8.—(Special.)—The Dodge Manufacturing Co, employes of Toronto held their third annual picnio on Saturday, July 8, at Prospect Park here. An ideal day favored them and upwards of 500 of the employ-s and their friends took advantage of the pleasant sail, arriving at the park about 11.30 a.m., and immediately opened the proceedings with a baseball match between the woodworkers and ed the proceedings with a baseball match between the woodworkers and
