and see us. We can save you money.

McPHERSON & CLARKE

PLANING MILL LUMBER YARD CEMENT & COAL

McCLARY AND DOHERTY STOVES AND RANGES

This season we have added to
our stock of Stoves and Ranges
the Doherty High Oven Range.

Although this range is some-
what the same in appearance as
other makes of high oven ranges
the construction is entirely dif-
ferent. Instead of being built of
ordinary sheet steel, it is con-
structed of heavy cast iron,
which holds the heat and makes
a better baker. The firebox is
deep and roomy and fitted for
both wood and coal.

OIL HEATERS

JAMES WRIGHT & SON

District and General.

The Bothwell Times has moved into
new quarters on Elm street.

Howard Davis of North Ekfrid died
on Friday, October 19th, aged 55 years.

James Cushman of Longwood died
on Sunday, October 21st, aged 90 years.

A Dover township man was fined \$5
and costs for shooting ducks on Sun-
day.

Several cases of black quarter are re-
ported among young cattle in the vicin-
ity of Melbourne.

W. J. Robinson of Kamloops, B. C.,
and Miss Mamie Beamish of Bothwell
were married at Toronto last week.

The Dominion Cannery will build a
\$100,000 cannery at Strathroy to
replace the one destroyed by fire
early in the year.

While George Stevenson was driving a
bunch of steers to Melbourne a few
days ago one of the animals became
frightened and went mad. It had to
be shot.

A rumor got out that the season for
quail shooting would be opened this
year. The game and fisheries depart-
ment in Toronto says there is absolute-
ly nothing in the report.

A number of children in Toronto dis-
trict, whose fathers are engaged in
war, have been sent to the Industrial
School, because of the inability of their
mothers to control them.

According to the recently passed
Election Act, the mothers, wives,
widows, sisters and daughters, twenty-
one years of age, of the soldiers who
have gone overseas are entitled to vote
in the coming election.

Dr. J. W. Robertson, chief adviser to
the Food Controller, predicts the pro-
hibition of consumption of beef by the
spring. He promises to use his influ-
ence to secure the prohibition of the
manufacture of ice cream.

Coal scarcity will be a permanent
condition of the future in Ontario.
This condition calls for the proper use
of everything that can be utilized as
fuel, the conservation of existing wood
lots and the planting of more.

Germany is said to be manufacturing
2,000 airplanes in one month. This
shows that the allies have a big job
ahead of them in this regard. Events
strengthen the opinion that the final
fighting in the present war will be in
the air.

The marriage took place at the
Methodist parsonage, Wardsville, on
Wednesday, October 17th, of Earl
Tunks and Miss Beatrice Irene Sittler,
both of Cashmere.

A message was received by relatives
in Dunwich of the death of Auld Wil-
ley at Athabaska Landing, caused, it
is surmised, by an auto accident. The
deceased was 25 years of age and a son
of Lot Willey, a prominent resident of
Dunwich.

Alleged government inspectors are
said to be operating in the farming
communities of this district and some
cases of losses sustained have been re-
ported. The country people are
warned to be on the lookout for these
sleazy visitors.

The United States will use vast
quantities of German-owned supplies
stored in the United States, to aid her
troops and the Allies in carrying on the
war against the Kaiser's Empire. The
value of the property is expected to
mount into the hundreds of millions.

Approximately 95 per cent. of men
in the country districts of the West
are seeking exemption on the ground
that they are of more use to Canada as
agriculturists than fighters, according
to exemption board members. Forty
per cent. of the farmers claiming ex-
emption can be spared for service, ac-
cording to the board which is investi-
gating claims.

In order to eliminate the waste in
packages and the increase in cost to
the consumer involved by the trade in
small packages of breakfast foods, cere-
als and cereal products, an order-in-
council has been passed, upon the re-
commendation of the food controller,
prohibiting the sale, after a specified
date, unless licensed, of such foods in
original packages of less weight than
20 pounds.

Dr. O. L. Berdan of Strathroy, for-
merly of the Middlesex Battalion, who
is serving as physician with an ammu-
nition column in France, recently was
called upon to attend a French child,
who had lost a hand as a result of Ger-
man Kultur. The child had picked up
an innocent-looking crayon pencil,
which Hun aeroplanes had dropped
back of the Allies' lines. It was
stamped "Made in England." While
the child was examining it, the pencil
exploded, blowing off his right hand.

Fresh oysters always on hand from
now on at McLachlan's.

Farm Buildings Burned.

Wm. Munroe, lot 3, concession 5,
Mosa, suffered a severe loss on Thurs-
day at noon when his barn and shed
with most of the contents were de-
stroyed by fire. The fire is supposed to
have caught from a traction engine
drawing an oil drilling outfit through
the premises. With the assistance of
the neighbors and others the house
was saved from being destroyed also,
and a few things were saved from the
buildings that were burned, but the
whole season's crop of hay and grain
and some implements and machinery
are a total loss. The buildings and
contents destroyed were valued at up-
wards of \$4,000, with a small insurance
in the Ekfrid Mutual.

Meeting of the W. M. S.

The annual meeting of the W. M. S.
of the Ridgetown district was held last
Thursday in the Methodist church
here. Mrs. Douglas of Wardsville,
the district organizer, was in the chair.
Mrs. J. A. McLachlan, in her own
facetious manner, in well worded and
eloquent style, gave the address of
welcome, which was replied to by
Mrs. Milton Moorehouse of Shetland.

Reports from the various circuits
were presented. A program replete
with good things was presented. Of
chief interest was a splendid address
given by Miss Govenlock, returned
missionary on furlough from Japan.
Her address showed that the money
and lives poured out for that country
were bringing rich dividends for the
Kingdom of God.

The elections resulted in the re-
appointment of Mrs. Douglas as or-
ganizer, and Mrs. (Rev.) Irwin as se-
cretary-treasurer.
The ladies of the church entertained
the visiting delegates, serving a splen-
did dinner and supper in the basement
of the church, one hundred sitting
down to dinner and one hundred and
fifteen for supper. The next meeting
is to be held in Highgate, as it is ex-
pected that by then the new Metho-
dist church will be ready.

Anniversary services will be held in
Knox Presbyterian Church, Newbury,
on Sunday next at 11 o'clock a. m. and
7:30 o'clock p. m., conducted by Rev.
G. S. Lloyd of Glencoe. At the even-
ing service the male quartette of Glen-
coe church will sing.

License for Coal Dealers.

Drastic regulations in regard to fuel
are announced in an order-in-council
just passed at Ottawa.

All importers and dealers in coal
must be licensed, and application must
be made for such license before Nov.
21. Heavy penalties are provided for
persons doing business without this
permit. In regard to profits, brokers
must not get more than 30 cents per
ton for their services, wholesalers not
more than 35 cents and retailers not
more than 50 cents.

Regarding hoarding of coal, it is pro-
vided that except between the months
of April and September, inclusive, no
consumer shall obtain any quantity of
coal in excess of an estimated supply
for the winter with the minimum al-
lowance of their towns. The fuel con-
troller will have full power to requi-
sition any quantity of coal over-supply
from any consumer in case of emer-
gency.

Breaking the Law.

A correspondent writes:—Investiga-
tion has been going on for the last few
days in our village owing to minors
being supplied with cigarettes, and
some of the parties concerned may be
brought to justice. It is bad enough
to sell cigarettes to anybody, but to
sell them to minors must be callous
hearted indeed.

It is a violation of the law to sell,
give, or furnish any youth under 18
years of age with tobacco in any form.
Penalty therefor from \$10 to \$50. It
is a crime to allow any youth under 18
years of age to loiter in any pool
room. It is a crime for any one under
18 years of age to smoke or chew
tobacco in any street or public place,
or to purchase or have in his posses-
sion whether for his own use or not
cigarettes, or to purchase or have in
his possession other forms of tobacco
if for his own use or not.

It is the duty of any constable to
seize or confiscate cigarettes or to-
bacco found in the possession of any
one under 18 years of age, if he has
reason to believe it is for the youth's
own use.

We understand there is a by-law on
the municipal records of this village
forbidding any one to sell cigarettes
without first obtaining a license. Is it
being enforced? If not, why not?

Why does Canada Raise Money by Selling Bonds?

BONDS are issued payable in ten or twenty years, as the case may be.
It means that repayment of the money will be spread over ten or twenty
years instead of being raised by taxation to meet current expenditures.

To raise by taxation all the money as fast as it is needed to carry on
Canada's share in winning the war, would be an unbearable burden upon
the people.

It would mean that more than a million dollars a day would have to be
raised right now.

But to raise money by selling Canada's
Victory Bonds means that those of the
next generation who will benefit by the
sacrifices this generation is making;

—who will share in the freedom this
generation is fighting for and largely paying
for—will also pay their share.

And when you buy Canada's Victory
Bonds you make a first-class business in-
vestment in a security that is absolutely
safe, likely to enhance in value after the
war, and bearing a good rate of interest.

You help the country by keeping open
the British market for Canadian products
and this helps the general welfare in which
you share.

And again, every Canadian who buys
a Victory Bond becomes a financial partner
or backer of Canada in the war.

When you buy a Canada Victory Bond

you give a personal pledge that you are
going to help to win the war.

Every man and woman in Canada can
help to win the war by buying Canada's
Victory Bonds. And Canada wants the
personal, individual interest and co-opera-
tion of every man and woman in the
country.

The buying of Victory Bonds by the
whole people unites them in a determination
to win the war.

Every purchase of Canada's Victory
Bonds is a blow for freedom against the
tyranny of German Kultur.

Every bond sold is a new guarantee
that Canada is in the war to the finish,
until victory is with the Allies and the
world has been made safe to live in.

Every bond you buy is a new pledge
that Canada will remain true to herself, the
Empire, the Allies and to freedom's cause.

So it is both patriotic and good busi-
ness to

Buy Canada's Victory Bonds

Issued by Canada's Victory Loan Committee
in co-operation with the Minister of Finance
of the Dominion of Canada.

Of course, you can
buy cheaper teas, but

"SALADA"

is undoubtedly the most economical and what
appears to be 'cheap' in price will prove to be
extravagant in use. The fresh young leaves of
"Salada" will yield you generous value for
your money.

B115

GOOD HEALTH QUESTION BOX

By John B. Huber, M.A., M.D.

Dr. Huber will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Huber will not prescribe for individual cases or make diagnosis. Address: Dr. John B. Huber, care of Wilson Publishing Co., 78 West Adelaide St., Toronto.

Habit is as strong as death. CATCHING COLDS.

As our forebears, who first got the knack of building houses, found them comfortable, conducive to ease if not to dignity, they became enervated by constantly rebreathing their own poisonous exhalations mingled with those of their family, their boarders, and such of their animal friends which they could not bear to see suffer in the raging elements without. Then coughing and sneezing, by which particles of germ-laden material was disseminated, helped infection along considerably. In short, people "caught colds."

Next in order, in the race's evolution came the fetish about night air; so that sleeping rooms were kept hermetically sealed. Bedroom windows are even now, despite all the fresh air propaganda, nailed down come November, and kept so (when properly they should be nailed up) until March or even April. And yet, winter and summer, what air has the good Lord given us to breathe, at night, if not night air.

Then people came more and more to overburden themselves with clothes, in which they could collect germs, that would thus be added to the assortment already existing in the house. True, most germs cannot live for any length of time outside the living animal "host." And yet one cannot be sure that the germs in one's clothing are always dead ones. And let him who thinks his overcoat is germ-free because it is well brushed, turn a vacuum cleaner on it, and note the result.

SHORT-TERM AMBITION

"One of the reason why so many girls and women fail to attain real success in business," said a successful business woman the other day, "is short-term ambition. I have girls in my business who have worked splendidly for three, four or five years, making themselves steadily more valuable. Then upon reaching some particular position, they've stopped short. I have several who are not worth a bit more than they were five years ago. On the contrary they are worth less, for in business quite as markedly as anywhere else in life decay sets in when growth stops. Sooner or later those girls, although they are doing their work without blunders or noticeable failure, will be compelled to give way to girls who have life ambitions—girls who are eager and interested, alert to make both themselves and the

QUESTIONS AND ANSWERS.

Blow From a Cow.

About 6 weeks ago our cow struck me with her horn on the left side of the bridge of my nose, "knocking me out." I have suffered since with a pain that extended from the place struck up over the eye and brow and through the eye ball. Do you think there could be any damage; could an abscess be forming without some discharge from the nose or signs from the outside. I am taking—for the pain; am I taking too much.

Answer—Have a doctor skilled in the nose and throat examine you at once. Such an ailment lasting six weeks without recovery is like to mean an abscess in the frontal sinuses—not necessarily a grave condition, but one which may well become so if neglected. There may be pus pocketed in those sinuses and not yet appearing at the nostril. The drug you mention may relieve but never cure such a condition. I cannot judge if you are taking too much; but overdosage is like to depress seriously the vital processes.

Reducing Lips?

Can you tell me of a treatment that will reduce my lips and mouth? Would pinching the lips reduce them? Do tell me something and make me happy.

Answer—Sorry; but I know of no treatment I could guarantee. The remedy you mention would be likely to increase, to have the effect the opposite of that which you desire.

business in which they are engaged continually more valuable."

If girls would only understand that! We see it so clearly in all departments of life! The minister who is not constantly gaining new visions of truth and making new applications of truth to life soon wears his congregation. The physician who does not keep up with new discoveries and methods finds his patients turning to other and more progressive doctors. The business man who is not constantly on the alert to study every new suggestion soon finds himself outdistanced by competitors.

There is a sadder failure still. The mother who does not make it the great purpose of her life to keep in touch with her children as their interests broaden comes sooner or later to the heart-breaking hour when she discovers that she has lost their confidence—that she is left behind.

Failures all, pitiful, tragic failures, because they had short-term ambitions, because the goals to which they looked forward were so far short of eternity!

Daffodils in Pots.

Daffodils in pots should not be forced. Procure the best possible bulbs. The pots should be well washed and a few pieces of broken crocks placed in the bottom for drainage and over these place a few pieces of charcoal. For soil use composted soil with a good sprinkling of sand, say, about one-fifth. After the pots have been partially filled with soil, set the bulbs an inch apart and all but the extreme tips covered with the soil well firmed, so as to leave three-quarters of an inch of pot above the soil to hold water.

As soon as the bulbs are planted set the pots away in a cool dark place for about eight to ten weeks, in the meantime not permitting the soil to dry out. If the leaves are light in color shade for a day or two, giving full light gradually, finally moving into the full sunlight and heat of the ordinary living room. The cooler the temperature the better—about 65 degrees being best.

Print Name in Water.

It was a British poet who sang something about a name "writ in water," but it remained for a clever Japanese actually to print his name in the colorless liquid. Travelers from Osaka, Japan, tell of a merchant there who has a man write his advertisements in water on the roadway by means of sprinkling cart with a perforated revolving drum. The drum revolves with the wheels and as it does so traces oriental characters along the thoroughfare.

Soils and Crops

By Agronomist

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your question, a complete answer will be mailed to you. Address: Agronomist, care of Wilson Publishing Co., Ltd., 78 Adelaide St. W., Toronto.

Subscriber—I have about an acre inclosed for hog pasture. This has been well manured and plowed and I should like to know what to plant to get the best pasture for the coming year. Would you advise me to sow rye or rape in the spring, or is there something better?

No better crop can be sown for early hog pasture next spring than rye seeded as soon as it can be gotten in, if possible sowing this fall. Then the ground can be seeded to clover in the rye, and some late pasture provided, also good pasture for the following season. Rape could be sown on this ground early in the spring and would make good midsummer pasture. It could be turned into about six weeks after sowing if weather conditions were favorable, and would make good pasture for two or three months thereafter. There are many forage crops which can be satisfactorily used for this purpose, but in a case like this the rye would afford an opportunity to get the land seeded to clover, which would also provide pasture for the following season.

L.H.—I have ten acres of corn that was just in the milk when the frost came. Would you think it safe to feed this to cattle and sheep this winter, (from shock), or would it be better to let the hogs eat the corn, and cattle clean up the fodder? If not,

what would you advise? I have no silo.

There will be no danger in feeding frosted corn from the shock to either cattle or sheep at least, provided some other forage is given them in the ration, as clover or alfalfa hay. The frosted corn fodder fed from the shock will be in very much better condition to feed than where the fodder is subjected to repeated heavy freezes, as is the case with standing corn.

A.F.—I have 19 August pigs to get ready for market as soon as I can. What would you advise me to feed, barley, ground, or wheat and oats ground together, feeding in a self-feeder?

Barley is an excellent feed, but for best results should be fed in combination with other feeds such as middlings, where available for growing pigs. Barley would be a much cheaper ration when combined with middlings than would wheat and oats ground together. Sound wheat should not be fed to pigs under present conditions from either an economic or patriotic standpoint, since all the available supply will be needed for human consumption, and the pigs can be grown as well on coarser and cheaper feeds. Barley should always be ground for pigs, and would be better fed in combination with other feeds in a self-feeder, since it is not as palatable as a mixed ration.

Getting Winter Eggs

By A. Gallagher.

We are told that "eggs are going sky-high" before long. And while this may be somewhat exaggerated, yet we have to admit that prices are on the upward trend. Not only egg prices, but grain prices and, in fact, prices of nearly everything else.

A good many poultry keepers are asking themselves the question: "Will it pay to keep hens for winter eggs and feed high-priced grain?"

The above question must be answered by the individual himself, or by someone who understands local conditions. But so far as we are concerned, there is no question as to whether it will pay or not. We know by long experience that winter eggs are profitable and with ordinary success we still hope to come out "ahead of the game."

Plenty of Feed Essential

There is no magic in getting eggs in winter. But a good many things must be considered. To begin with, it is essential that the fowls kept be healthy and of suitable age, i.e., neither too old nor too young. Old hens, as a rule, put on flesh instead of laying eggs, while small, late hatched pullets or those that were stunted in the winter months, will lay no eggs during the winter months.

We have tried a good many different kinds of chickens, but have at last settled down with the good old Silver Laced Wyandottes and Leghorns. We have plenty of house-room and always keep the two varieties separate during the winter, when all of our poultry is kept housed much of the time. Now, we don't mean to say that our method of chicken raising is the best. We find that they suit our purpose best and believe this to be a step in the right direction. No one is likely to succeed with fowls he does not like.

Keep Pullets Separate

Don't let the young pullets roost in the same house where the hens are kept, until they get used to the rest of the flock. There are always some backward pullets that cannot "hold their own" with the older birds. For these, we have a house and yard where they are kept for a few weeks, separate from the others. Of course, they must have good care and plenty of feed.

Remember, these so-called back-

Gillette Safety Razor

He'll Appreciate Your Good Judgment As Well As Your Good Will

if for Christmas, 1917, you send him a Gillette Safety Razor! That's the gift that is valued Overseas for itself as well as for the sake of the sender. Few articles of personal equipment are so welcome, for the Gillette is known up and down the Allied lines, by Canadian, Briton and Anzac, Frenchman, Italian and American, as the one sure passport to a clean and enjoyable shave.

Even if he has already had one, the man in whom your hopes centre will be glad to get another Gillette Safety Razor. For under active service conditions, equipment so sought after as the Gillette strays easily and often, and he may now be trying to worry along again without one. So whatever else your box may contain, don't forget a GILLETTE SAFETY RAZOR—and a good supply of blades.

If you prefer, we will take your order, through your dealer or direct, and deliver the razor of your choice from our nearest depot Overseas. Ask your dealer about this when he shows you his Gillette assortment.

Standard Sets and "Bulldogs" cost \$5.00—Pocket Editions \$5.00 to \$6.00—Combination Sets \$6.50 up—At Drug, Jewelry and Hardware Stores.

Mails are congested—shipments slow. Send his Gillette early!

GILLETTE SAFETY RAZOR CO. OF CANADA, LIMITED,

Office and Factory: Gillette Building, Montreal

not see the difference between cob meal and corn meal.

A Wheatless Ration

While wheat is one of the best egg-producers known, when fed along with corn, we have cut it out of the ration entirely, on account of the cost as well as for patriotic reasons. Instead, we use bran and boiled oats. This, with a little corn meal added, makes an excellent morning mash. Sometimes we use boiled vegetables instead of oats. When the hens are kept-housed, as they must be when the weather is severe or snow is deep, it is essential to vary their ration. We sometimes add raw cabbage (chopped) to the mash. A little salt or a dash of cayenne pepper helps to give it a "tang," that is greatly relished. Green stuff, or a substitute for same, should be provided. Pure water, with the chill removed, should be kept within reach. Don't fail to provide some sort of place where the hens can get all the exercise they need. We have regular scratch-sheds attached to each house, but in former years the floor of the poultry house answered very well.

Every fall when dry leaves are plentiful, we store large quantities to be used as scratching material. Rye in the sheaf, or other unthreshed grains are used, also. Small grain, such as kaffir or even millet, will answer to make the hens work, but will not take the place of corn.

Fall Feeding Important

Sharp grit is an important factor. Again let us impress upon the minds of beginners the importance of a generous ration, right now, for both old and young. Don't wait until winter to begin feeding for eggs. The fact is, chickens are more often under-fed than over-fed, at this season of the year. If judgment is in the selection of feeds, it is next to impossible to over-feed a moulting hen or a growing pullet.

As to hopper feeding, don't do it unless the fowls have been accustomed to it, from the time they are hatched. Otherwise, they seldom know when to stop eating.

A warm mash in the morning, with scratch-feed and "grains" through the day and a full feed of warmed corn at night (never feed frozen corn) will give better results as a rule. We usually allow one quart of shelled corn for every ten fowls. A large handful for each hen is a safe rule, but may be varied.

Horse Sense

Many men insist on feeding silage to horses so as to reduce feed costs. Many men have fed silage to horses for years with success. Many men have poisoned horses by feeding them accidentally moldy silage.

Right there is the trouble. Horses are so valuable and so easily killed by damaged feed that caution has repeatedly been urged in the use of silage. On the average farm it is better not to feed it at all than to feed it and lose even one horse. Those who are determined to feed silage should follow a rigid system of close-by scrutinizing every forkful as it is taken from the silo. When a little moldy pocket of silage is discovered it must be rejected. Silage should be thrown down by daylight so that inspection is easy.

Of course the general quality of the silage must be as perfect as possible, and that is determined by care and thorough tramping as the silo is filled.

The Dairy

Feeding the Calves.

Remove the dairy calves from the cow at birth. Do not allow them to suck, unless weak or unable to drink, or unless the cow's udder is severely caked. Mother's milk for the first four days, at the rate of 8 to 10 pounds divided into three or four feeds, is essential. Feed whole milk for the first ten days, then start replacing part of the same with skim milk, so that when the calf is one month of age it may be receiving in two feeds daily twelve pounds of skim milk, plus a tablespoonful of finely-ground scalded flax-seed jelly.

At three weeks old feed a small quantity of whole oats in the manger. Fine clover hay and clean water might profitably be kept before them from this time on.

During the next fifteen weeks gradually increase the skim milk to 16 to 20 pounds daily. Add to the flax-seed jelly other constituents to make a cream substitute as follows:—Fine ground flax 1 part, fine ground oats 2 parts, ground corn 2 parts. Feed in the milk divided into two feeds daily at the rate of one-eighth pound at the start and increase to 1 pound.

Replace the whole oats at four weeks of age with a grain mixture of equal parts bran, rolled oats and ground corn. Start the calves on one-eighth pound per day and increase gradually to 1½ pounds daily at twenty weeks of age, when the skim-milk may be gradually cut off and this grain ration increased proportionately.

Do not expose your calves to heat and flies, but during extreme heat keep them in a dark, cool box until four months of age, after which they may have a night paddock. If fall-dropped calves keep in a clean, bright, comfortable, warm box stall. Feed a limited amount of roots or a mixture of roots and ensilage. Feed salt in limited quantities regularly, and water as required.

Health

Colds And How To Prevent Them.

The condition that we usually call a cold is really not a cold at all. It is a heat rather than a cold. One does not "catch" cold; instead, the cold catches the victim and gives him a fever.

One "catches" a cold because for some reason the skin lacks resistance. Apply a cold-water compress to a person's head for several hours and he will begin to complain that his forehead is sore and painful; he will have neuralgic pains in his forehead; the skin and the flesh become sore. Sometimes it is necessary to keep an ice bag over the heart. When the ice bag has been kept there half an hour two or three times a day for two or three weeks, the patient, in most cases, begins to complain of soreness in that particular region. That pain is called "rheumatism," for lack of a better term. It is not rheumatism at all, but simply a painful, sensitive condition due to the lowering of the blood temperature in that region, which permitted the waste matters to accumulate in these tissues, and as a result the nerves and other tissues have become abnormally sensitive.

Thus in a general way we may say that the cause for taking an ordinary cold is lowering of the temperature of the blood, either locally or generally. If a person has been perspiring from exercise and sits down and lets the wind blow on him he soon begins to feel chilly. While he was exercising, his muscles were generating heat. For a muscle generates heat just as a dynamo generates electricity. By its action heat is generated, just as by the revolution of the armature of the dynamo electricity is generated—and, in fact, in a very similar way; not in the way a stove generates heat, but in the way a dynamo generates electricity.

If a person perspires when exercising it is because he generates more heat than is needed to keep the body warm, so it is necessary that the body should be cooled, and perspiration is simply the effort of the body to cool itself. Bathing the skin with water and allowing the water to evaporate also has the effect of cooling the skin. Now when the perspiring individual ceases to exercise and sits down the effect is that of putting out a fire or blowing out a light. The extra generation of heat ceases, so the evaporation goes on without any extra heat being produced, because the skin is wet and the clothing contains moisture and the evaporation causes a chilling of the body.

It takes but a few minutes to produce this result; then in order to warm the body up, the muscles are set into spasmodic contraction. There is shivering and sneezing, which are signs of a general spasm.

When one sneezes he does not sneeze with his nose, but through it. It is the entire body that is exercising. Every muscle contracts. The feet are lifted up from the floor. There is a jump of the whole body. It would be quite impossible to hold anything steadily in your hand when you sneeze; but the motion, is particularly of the expiratory muscles. There is a sudden contraction of these muscles, with an explosive effort of nature to warm the body.

When you sneeze you say, "Oh! I am taking cold." That is a mistake. You have taken cold. Your temperature has been lowered and you already have the cold and the muscles spasm is the effort of nature to cure it.

Now if you want to help nature, the best way is to keep right on exercising. You feel a little shiver started here and there and you feel chilly. Now set your muscles to work as hard as you can. That is the quickest way to stop the shivering. Certainly one can prevent himself from taking cold. One sits in church and a draft blows on the back of his neck. He says, "I am going to get a cold. I shall have a stiff neck tomorrow."

You do not need to have a cold. Just make the muscles contract as hard as possible; keep them working so they will keep the skin warm and you will not take the cold.

And the best of it is that one does not have to take gymnastic exercises or walk in order to exercise. One can sit perfectly still and work so hard as to make himself perspire freely—by making every muscle of his body tense. The hands can be kept straight at the sides, with the muscles perfectly rigid. Make every muscle of the body rigid and you will see pretty soon that you are breathing hard. Pretty soon you are taking deep breaths. You may say that it is hard to do that, but nevertheless one can sit quietly in church or other gatherings and look the speaker in the face and at the same moment work as hard as though he were running to catch a train, or one may sit at his desk and dictate important letters or papers and at the same time be doing hard physical work.

Thus one does not need to take cold because he is sitting still, for one does not need to be idle and relaxed just because one is sitting still.

Many supplies for the family are received in friction-top tin cans. These, when the tops are carefully removed and the cans thoroughly cleaned, may be used again for the preservation of fruits and vegetables in the household.

MEN-ATTENTION!

FOR OUR SOLDIER BOYS IN THE TRENCHES.
USEFUL GIFTS TO HELP MAKE CHRISTMAS AS
CHEERFUL AS POSSIBLE.

First Most Important Article is Warm Socks

Only one place in Canada can we get the socks we have. Made from absolutely all pure, fine, home-spun yarn, specially scoured, soft and very warm. These socks are much warmer, more comfortable and more serviceable than worsted, which is cold and clammy. These special socks average about one-half pound pure wool to each pair. Special price, 85c.

Second Most Important Article is Warm Underwear

For the boys in the trenches, "Stanfield's R-d Label," made from Nova Scotia fine wool, will be the most satisfactory. Quality exactly up to standard. Price \$2.

Other Acceptable Articles, Easily Mailed

Warm Gloves, 85c to \$2
Pajamas, \$1.25 to \$2
Cloth Slippers, 90c to \$1.50
Khaki Heavy Suspenders, 50c.
Ties and Handkerchiefs, 25c to 50c.
Sweater Coats, \$3 to \$8.

Overcoat Week, \$12 to \$25

If we bought these coats today the prices would be \$2 to \$5 more. We bought heavily and looked well into "quality" and "workmanship." Our customers are delighted with the classy styles in such good qualities at such moderate prices, showing such little advance.

Gifts for Soldiers Should be Sent Now. Don't Overlook the Boys in the Trenches. Better to Overlook Others at Home

Boys' Warm Reefer Coats at exactly old prices, \$4.50 to \$5.50

Many clearing lines of Suits and Overcoats, where one of a kind only is left. Drop in and see the specially marked down lines for boys and men.

Splendid Value in Military Flannel, English Flannelette, Heavy Sheeting, Pillow Cotton, Grey and White Cotton. We welcome closest comparison.

Pure Fine Wool Yarns

We handle exactly same quality and from same mills as formerly sold by Mr. Vause. Notwithstanding war conditions the quality is exactly the same high standard, and there's nothing to equal it for warmth, service and comfort. Priced \$1.50 per lb. We cannot continue to sell at this price long so we advise our customers to get their supplies early. Special price for Red Cross use, \$1.40.

Rubbers and Heavy Waterproof Shoes, moderate prices.

THURSDAY, NOVEMBER 1, 1917

Good as the Wheat.

"Good as the wheat" is an old motto, about as much the last word in meaning as "Safe as the Bank of England." A bag of No. 1 Northern, clean as a whistle of cockle and loxtail, was a symbol of sure value long before gold was known in the world. Wheat has been found in the Pyramids. The Egyptians just about worshipped wheat. The Bible calls it corn; so do the English. But when we say "good as the wheat" we refer to the bushel of brown, hard kernels worth by Government fixture this year, \$2.20. In the memory of living man when did "good as the wheat" mean more than it does now? Never. A bag of wheat weighing two bushels and a peck toted up in 1917 to just about the value of a five-dollar gold piece. But of course no man wants gold for his wheat. All he gets is a cheque made out in his favor on some bank and signed by the manager of some elevator company or milling concern. The cheque is converted into bills or goes on deposit. Good wheat; good paper; nobody asks any questions. Because the company is O. K. and the bank is sound. If any wheat-seller had any doubt of either he would at once demand something else. "I sold good wheat," he would say. "I want something as good in exchange."

What made the wheat good? The good farmer behind it. A poor farmer can make good seed into poor wheat. What makes the paper money good? The security of the corporation whose name it bears. The sounder the corporation, the nearer the paper comes to being as good as the wheat. But even a big company may go "broke." Back of the corporation is a concern whose guarantee on a piece of paper is better than either. The pledge of the Dominion of Canada to pay any man money for value received is as good as the wheat and as safe as the Bank of England.

The best pledge of the Dominion of Canada to pay is a Canadian Victory Bond; better than cheques or bills—AS GOOD AS WHEAT! Suppose you change that twenty bags of wheat on your wagon, not into a cheque or notes or even gold; but into Canadian Victory Bonds of \$50 each, bearing interest at five and one-half per cent. per annum and as negotiable on the market as the best cheque or the best load of wheat you ever saw? It's worth considering.

Think.
Before you ask a merchant to make a delivery
Send goods on approbation
Or incur other expense.
Is it necessary?
Delivery service is expensive, and ultimately YOU must pay for it. If the service is not necessary you are not only wasting your own money, but the resources of Canada as well.
Canada is in urgent need of economy.
Carry your parcel home.
There is an old engraving hanging in many homes depicting a young and ragged urchin stepping up to a lady and asking if he may carry her parcel. Times have changed. To-day the same little chap might have difficulty finding a parcel to carry; and why? Because fashion has decreed that we may

carry almost anything but a parcel. The result has been heavy delivery expense, which must be paid by the consumer, together with the same percentage of profit as is carried by the goods themselves. Because it does not show separately in the bill, it is not recognized as an additional cost. To a large extent merchants are to blame for this. If they were to adopt the 'cash and carry' system, giving a price advantage to those who paid cash and carried their parcels, requests for delivery would soon show a decrease.

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Dr. J. C. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

Dr. J. C. Fletcher

In Use For Over 30 Years
The Kind You Have Always Bought

THE CENTAUR COMPANY, NEW YORK CITY.

No surgical operation is necessary in removing corns if Holloway's Corn Cure be used.

Will Class One Provide The One Hundred Thousand Men?

It will be greatly to the advantage of Canada if the entire quota of 100,000 men to be raised under the Military Service Act can be secured from the first class; that is, from the men between the ages of 20 and 34 who were unmarried or widowers without children on July 6th, 1917.

This is almost self-evident for the following reasons:
It is admitted that, between the ages of 20 and 34, the average man is at the height of his physical strength and is most adaptable to the change of conditions from civilian life; the military service of unmarried men and widowers without children would occasion less distress than that of most others, since they are largely without dependents. Also, it would entail less financial burden for Canada, through separation allowances, etc.

Authorities estimate that, after all proper exemptions have been allowed, Canada should be able to produce from the first class 100,000 men fit for service, so the drain upon the man power of the country will not be severe.

Members of Class One will be well advised to present themselves for examination immediately to the Medical Board in their district. Upon examination as to their physical fitness, they will be placed in one of the following categories:

Category A—if fit for service overseas fighting units.
Category B—if fit for service overseas in Army Medical Corps, Forestry Battalion, etc.
Category C—if fit for service in Canada only.
Category D—if unfit for military service of any nature.

If not placed in Category A, the applicant will know that he is not liable for immediate service, but will go to the Post Office and send in a claim for exemption with his Medical Certificate attached, when he will receive in due course a certificate of exemption until those in his medical category are summoned for service.

Where a man, who is placed in category A, feels that exemption should be allowed, an application form can be secured from the postmaster. This form, when filled in, will be forwarded by the postmaster to the registrar of the district, and the applicant will be informed by mail as to the time and place for the consideration of his application by the Exemption Board.

Issued by The Military Service Council.

BORN.
COAD.—On Friday, October 26, 1917, to Mr. and Mrs. Richard Coad, Ekfrid, a daughter.

LOCAL

Another lot Neilson's 50c chocolates 30c a pound on Saturday at Scott's.
The Red Cross Society of S. S. No. 9, Mossa, collected \$41.05 for Trafalgar Day.

The pupils of S. S. No. 12, Mossa, contributed \$5.40 to the British Red Cross fund.

A "Red Cross Assembly" is to be given in the town hall, Appin, on Tuesday evening next.

A patriotic party will be given in school section No. 9, Mossa, on the evening of November 15th.

The safest place to put your money is where it is owing—the next safest place is in a Government bond.

Please ask for remnants in wall paper. We want them sold quickly. Prices greatly reduced.—Scott's.

Rev. James Malcolm of Newbury conducted the service in Glencoe Presbyterian church on Sunday morning.

The treasurer of the Glencoe Red Cross acknowledges the receipt of a donation of \$5 from Mrs. James Gilbert.

The Glencoe Presbyterian Guild was reorganized for the winter months at a meeting held on Tuesday evening of last week.

One thing is certain, no matter how the Canadian elector votes, his vote will not in the least delay the winning of the war.

Mrs. John Newbigging of South Ekfrid is in very poor health, and her sons, David and James, are home on a visit to her bedside.

James Gilbert has returned from the West with three carloads of young cattle. He says the West has experienced a very dry summer this year.

A special meeting of the Ekfrid township council will be held at Appin on Friday afternoon at four o'clock to arrange for the Victory Loan campaign.

Letters received from Cecil and Chester Bechill in France on Tuesday say that they are in the pink of health and that they had letters recently from Harry Hicks and Neil McCallum, both of whom are in England and in good health.

Don Lauchlin, only son of John Lauchlin of Windsor, formerly of Glencoe, who enlisted with the Scotch Battalion and went overseas, has returned out of health and is now a patient in the military hospital at London.

The usual quarterly service and sacrament of the Lord's Supper will be observed next Sunday in the Methodist church. Special evangelistic service in the evening. Official Board meeting the following Monday night in Newbury at 7.30.

Sergt. Gilbert Fletcher, son of the late Duncan Fletcher of Mossa, is reported wounded in the shoulder while in action in France on October 24th. Sergt. Fletcher enlisted at the outbreak of the war and has been at the front for two years or more.

The annual thank offering meeting of the Gordon Mission Band will be held in the lecture room of the Presbyterian church Saturday afternoon at three o'clock. A musical programme is being prepared. Mr. Lloyd will address the children. A cordial invitation is extended to all.

Mrs. C. N. Annett has received word that private Thomas Thorne, who enlisted in the 155th Battalion at Glencoe, was gassed in the lines in France on September 20 and is now in hospital in England and at latest report was slightly improved. Private Thorne was employed by Joseph Gilbert for two years.

The Battle Hill Relief Society met at the home of Mrs. D. H. McRae on Thursday afternoon, October 25th, and packed a box of Christmas parcels valued at \$112 for the soldiers overseas. There will be a meeting of the society at the school house at four o'clock on Monday afternoon, November 12th.

Information was received by friends in Glencoe that James H. Pearsall, who spent a year as junior in the Merchant Bank here up to about two years ago, was killed by concussion when a shell exploded near him in the battle at Vimy on May 11th. His home was near Orillia, where he enlisted in the 157th Battalion.

District Agricultural Representative R. A. Finn reports that the acreage of fall wheat this season is one of the largest south in the district for years. Factors contributing to the increased acreage, according to Mr. Finn, were the favorable early harvest, the high price of wheat, and agitation for a large acreage throughout the country.

A meeting of the heads of the municipal councils throughout the county was held at London on Saturday to arrange details for conducting a campaign for the Victory War Loan. It was decided that each municipal council undertake the appointment of a local canvassing committee, who would be instructed later in their work by an official organizer from the department of finance.

A quiet wedding took place at the manse, Dutton, on Wednesday, Oct. 24th, when Elsie Robins, eldest daughter of James W. Lockwood, was married to William Harry Galbraith, all of George Malcolm Galbraith, all of the township of Ekfrid. The bride

was attended by Miss Christena Thornicroft of Appin, while the groom was supported by his brother, Percy Galbraith. The happy couple left on the evening train for a short pleasure trip to London and Niagara Falls. An interesting thing about the service was that the officiating minister, Rev. R. Stuart, had officiated at the marriage of the bride's parents more than twenty years ago when he was minister at Melbourne.

Flurries of snow on Tuesday caused many to shudder who had no coal on hand and no immediate prospect of getting any. Still the dealer assures us with a smile, as he did all summer, that there will be plenty of coal. Some people are beginning to think pretty deeply over the matter and are a little outspoken as to what might happen to the next car of hard coal that comes over the railway line.

Rev. Mr. Armstrong of Cairngorm conducted the services in the Glencoe Methodist church on Sunday. In the evening a union service was held at which Mr. Bowen, agent of the Bible Society, made an appeal for financial assistance for the society and afterwards gave an interesting address on matters pertaining to the war, he having recently returned from England, where he was in touch with many phases of the situation. A German medal struck in commemoration of the "victory" achieved in the sinking of the Lusitania and several pieces of a zeppelin brought down in England were exhibited.

The home of Mr. and Mrs. Elijah Watterworth, Main street, was the scene of a very pretty gathering on Wednesday evening, October 24th, when about forty ladies of the town tendered Mrs. R. E. Rice (nee Miss Edna Watterworth) a shower. Many beautiful and useful gifts testified the high esteem in which she is held. The evening was very pleasantly spent in social chat, when with singing "Auld Lang Syne" and "They are jolly good fellows," the good-byes were said and the company dispersed, wishing Mrs. Rice all happiness in her new home in the land of the Stars and Stripes. Mrs. Rice will be greatly missed in Glencoe where by her kind and genial manner she has made many warm friends. Mr. and Mrs. Rice left Friday noon for their home in Central City, Nebraska.

Referring to the recent induction of Rev. C. C. Strachan to the pastorate of the Presbyterian congregations at Burgoyne and Dunblane, the Port Elgin Times says:—Rev. Mr. Strachan is a very able preacher, and is making a deep impression in his new charge. Mrs. Strachan and family are quite comfortably settled in the manse, and are very pleased with the friendliness of the people. Rev. Mr. Strachan graduated in Arts in Manitoba College in 1902, took theological course in Queen's University graduating in 1905. He obtained the degree of B. D. from Queen's this spring. Before entering college he spent ten years in educational work in the west, part of the time among the foreigners in northern Saskatchewan. For the past four years he ministered at Stoneway, near Yorkton, Saskatchewan. Mr. Strachan's home was near Glencoe, Ont., where his mother and brothers still reside.

This is certainly a land of promise. If you doubt it get into business and give your customers credit.

SPECIAL NOTICES

See Mayhew's change of adv.

Choice raisins, 10c per pound, at George's.

We keep No. 1 table butter for sale.—J. A. McLachlan.

Patterson Jubilee Singers, Methodist church, Monday, Nov. 12.

Good ram lamb for sale.—John A. Leitch, lot 11, con. 6, Mossa.

A fine stock of fur coats, robes and horse blankets at Lamont's.

For sale—a pair of calves. Apply to J. A. Armstrong, Newbury.

For sale—a Pandora range and a small heater.—Alfred Marsh.

Special for Saturday—honey in 5- and 10-lb. pails at 15c at George's.

Chopping Tuesdays, Thursdays and Saturdays.—W. R. Stephenson, Appin.

Harvey's Model flour, \$6 per cwt., at George's.

Buy gloves and mitts at Lamont's and save from 25 to 50 per cent.

Sum of money found on Saturday, Oct. 29. Apply to T. G. Jones, Woodgreen.

Mr. Irving of the House of Hobbart will be at the Mayhew store Nov. 8th. See adv.

We have a new shipment of wall paper just arrived.—McIntyre & McDonald, Appin.

Special bargains in shoes, rubbers and men's socks. Repairing a specialty.—Sexsmith & Co.

Quantity of barn or shed timber for sale, \$8 to \$8.50, can cut to order.—W. R. Stevenson, Appin.

Buy your shoes and rubbers at George's and save money. Specials in men's and boys' shoes.

Orders taken for cut flowers, choice wedding bouquet and funeral designs, at Lumley's Drug Store.

Six shoats, about 90 lbs., for sale; also chopping done every Saturday as usual.—Frank I. Abbott.

Unheard of! Sugar by 100 lbs. at actual cost until end of year. Leave your orders.—W. T. Jelly.

A few raincoats to clear out at less than half price at Lamont's. \$10 raincoats for \$4.95, \$7 coats for \$2.95.

A book with words and music of about 75 old Scotch songs for sale, also a bass viol. Enquire at Colin Leitch's tailor shop.

Notice to farmers.—Chopping done at Woodgreen six days a week. Satisfaction guaranteed.—George Harvey, proprietor.

Owing to loss of feed by fire, will sell 15 choice two-year-old stockers and 5 two-year-old butchers' heifers.—Wm. Munroe, Mossa.

For sale—two grey Percheron mares, 4 and 9 years old. Will sell separately.—James McKee, lot 1, con. 4, Ekfrid; Route 2, Longwood.

Saws and skates sharpened, furniture and shoes repaired, upholstering done. Open-grate stove for sale.—Harry Vause, south of track.

Don't fail to hear the famous Patterson Jubilee Singers in the Methodist church on Monday evening, Nov. 12. Admission—adults, 35c; children, 20c.

Owing to fuel scarcity and difficulty in obtaining water we have decided to discontinue running our chopping mill until further notice.—Siddall & Grover.

Extra choice apples for sale—Baldwins. Will deliver in Glencoe, Appin and Melbourne, also country points nearby.—Walter Squire, lot 10, con. 1, Ekfrid.

See me Friday and Saturday for fresh beef, pork and sausage. Lowest prices in town. Cut prices on all goods. 18 bars laundry soap, \$1.—W. T. Jelly.

Special sale Friday and Saturday—manufacturers' samples of ladies' coats, Classy New York styles. Special prices for two days only.—J. N. Currie & Co.

To let—one hundred acres of good pasture land, with water supply the year around. About eight miles north of Glencoe. Apply to A. H. Copeland, Box 152, Glencoe.

Flour and feed for sale at North Glencoe warehouse. Bring us your wheat and get highest market price.—J. D. McKellar, North Glencoe; Chas. Mawhinney, Glencoe.

Those who are to take part in the presentation of the musical comedy, "The New Minister," are requested to meet at the town hall on Monday evening, November 5th, at 7.30 o'clock, when Mr. Francis, the director, will be present to assign the different parts.

Gerhard Heintzman and other leading makers of pianos for sale, ranging in price from \$175 up and sold on monthly and yearly instalments. Old instruments taken at their value as part payment on new ones. Apply to Daniel H. McKee, agent, Glencoe P. O.

The musical comedy, "The New Minister," which is to be played by over forty Glencoe people, is one laugh from start to finish. The Sewing Circle, the Ladies' Aid and the choir create ridiculous situations in trying to attract the notice and admiration of their new minister.

Miss Glenn of Glenn-Charles, Toronto, Canada's Hair Fashion Store, will be in Glencoe Friday, November 9th, McKellar House, with a full line of ladies' and gentlemen's hair goods. If you are not satisfied with the appearance of your hair, consult Miss Glenn, who is an authority on hair goods and individual hair styles. Free demonstration.

Mr. Francis of London begins on Monday next to train those taking part in the big Red Cross play, "The New Minister," to be given on Nov. 22 and 23 in the Glencoe Opera House. Mr. Francis has put on this play for patriotic purposes in London, Parkhill, St. Marys and other places. It has been a wonderful success, drawing great crowds and delighting every audience.

The people of Dunwich and Dutton have organized a horticultural society, with a membership of 60, and their initial work of floral ornamentation will be the planting of bulbs at the churches, schools and town hall and the cleaning up of the waste places in the village.

CLEAN STOMACH, CLEAR MIND.—The stomach is the workshop of the vital functions and when it gets out of order the whole system clogs in sympathy. The spirit flag, the mind droops, and work becomes impossible. The first care should be to restore healthful action of the stomach, and the best preparation for that purpose is Parlee's Vegetable Pills. General use for years has won them a leading place in medicine. A trial will attest their value.

The PURPLE MASK

By Grace Guard
Novelized from the Motion Picture Play of the Same Name by the Universal Film Mfg. Co.

FOURTEENTH EPISODE

The mounted patrol, guarding the outskirts of the city in its thinly populated sections, had begun their nightly vigil without prospect of unusual adventure.

It was a warm summer evening, with very little moonlight. Far to the south, the busy night life of New York, was moving in joyous streams under the bright lights of the theatrical district. Usually O'Donovan, the mounted policeman, who had patrolled the same sections for years, might as well have been riding through the open country for all the excitement that came his way.

But to-night the Irishman searched the sky, trying to discover the cause of the strange intrusion upon the customary stillness of the night. Suddenly there appeared a string of lights, high in the heavens, at first faintly discernible but growing rapidly brighter.

Then came a louder "hum," increasing in volume, until, as it approached high above the ground, the policeman at last concluded that some strange ship of the air was cruising south, in the quiet night, bound for the city still several miles away.

O'Donovan forgot the sweetness of his pipe, as he suddenly wheeled his horse and dashed away for the nearest patrol box. The airship was now directly overhead, humming along toward New York at an even speed that might send it to the heart of town within an hour.

"It's O'Donovan," said the patrolman over the police phone. "Look above you at the airship. It's a big one, going south."

The desk sergeant in O'Donovan's precinct sent an officer to watch for the dirigible, and passed the word along to the other station houses farther south. In this way the approach of the airship, manned by anarchists and bent on a mission of destruction, was made known to every police station in the city.

And as a precautionary measure the department headquarters had called up Governor's island and the forts down the bay, warning the officers in command that New York was having a visitor in the sky, who looked suspicious, but not, of necessity, dangerous to the welfare of the city.

With the speed that generally attends the spread of sensational news, the approaching dirigible was followed by means of the mouth-to-mouth telegraph. Citizens began thronging the public squares and thoroughfares long before the airship arrived at a point in the sky above the center of the city.

The cafes and restaurants were a-flame with excitement. Eagerly the crowds waited and watched, as thousands of eyes scanned the sky while necks grew distastefully stiff from the unaccustomed strain of bending backward. Wild rumors flashed through the streets, passing from man to man, growing in circumstantial detail with every repetition.

As the giant skyship passed over block after block of the northern district of New York, without creating anything more than intense excitement, the residents who felt that they had escaped some dire calamity, grew joyous in celebrating their good fortune.

The "Great White Way" had never experienced such thrills. Just as excitement in the heart of the city was at its most intense pitch, and thousands stood in terror of some unaccountable disaster, an unprecedented thing happened—every light in street or building was snuffed out. The "Tenderloin" for the first time in the history of New York, was in utter darkness.

Police headquarters, acting upon advice from the commandant at Governor's island, had ordered the power company to shut off every electric light from Columbus Circle to the Battery wall. In a twinkling the order had been obeyed.

The hours of terror that followed the blinking out of New York's "white lights" will be a topic of conversation and sensational comment as long as one soul shall live, who experienced

the unprecedented sensation and conditions.

While the panic-stricken crowds in the street watched the sky for the threatened peril that might come, Patricia Montez, in her biplane, was speeding toward New York from the aviation field on Long Island.

As the airship, freighted with destructive bombs sailed down toward the bay, piercing the sky above the center of Manhattan island, the watchers found relief in the fact that nothing any more serious than giving fright to the multitudes had marked the journey of the air-raiders thus far.

But the satisfaction that came to the crowds in the theatre district, was not shared by men who owned property further downtown.

When the crowds in Union square saw the great airship approaching from the north, there was a cry of alarm when someone discovered still another air monster heading toward New York from Long Island. One brilliant light flashed from Pat's biplane; the anarchists' airship was ablaze with rows of glaring shafts.

Pat directed the passage of her biplane, so that she kept far above the anarchists' craft as it moved down the island. Coming close to the financial district, Pat had maneuvered her plane so that she was directly above the airship—and then she decided to act.

Very deliberately she hoisted an explosive bomb over the side of her biplane, having guided her craft until it was directly above the airship. When she dropped the bomb she scored a hit, first off.

The airship lurched and swung from its course. Another bomb dropped from Pat's biplane, likewise registered, and with joy the girl observed the giant aircraft change its course and head for the Brooklyn side of East river.

Too busy in saving their own bacon, the anarchists had not even attempted to bomb the city below them. They were just arriving at the point in their flight where they expected to begin destructive work, but Pat's attack completely upset their plans.

With their own lives at stake, the anarchists centered all their efforts in the hope of making a safe landing. From its great height the airship began to descend in zig-zag fashion, sailing over Brooklyn, toward the open fields in the suburbs.

As Pat's was skimming above Williamsburg, on her way back to the hanger whence she had started, she had the satisfaction of watching the anarchists' airship as it slowly descended. When the helpless craft neared the ground, Pat observed the wreck, as it hung momentarily in flames, and then crumpled up—falling in a burning mass to the ground.

Satisfied in having accomplished her purpose in saving the city from an attack, Pat sped through the air to the aviation field and safely descended. Her adventure had taken her less than an hour, and her mission had been fulfilled with marvelous success.

In great "scare-heads" she read in the papers, next morning, of her exploits. The sensational events that followed the airship's passage down the length of Manhattan island, occupied the front pages of the papers—but it had been found impossible, by the newspaper men, to identify the pilot of the attacking aircraft.

Later issues of the afternoon papers carried stories of the biplane that had left the aviation field on Long Island at about the time to account for the attack, but the strictest investigation had not uncovered the name of the pilot. There was only one item that led to the slightest hope of identifying the aeronaut—a purple mask had been found tied to the framework of the biplane that had been used at the time.

To Phil Kelly the identity of the pilot was clear. She had "put one over" on him again, and the great detective felt keenly humiliated, even though he rejoiced in the success that had attended the daring girl's adventure.

"She's a wonder, for sure," Kelly said to his assistant, when he had finished reading the newspaper account of New York's evening of terror.

Very naturally the sensational affair attracted the attention of government officials and orders came from Washington that the matter must be thoroughly investigated. When Kelly heard that the subject of the air raid had been taken up through secret service agencies, he hastened to the headquarters and volunteered what little information he had on the subject.

He felt in duty bound to do so. His information amounted to nothing more than suspicion, but when his report had been transmitted to Washington the orders came back that the Purple Mask must be apprehended at all hazards. The authorities, of course, had not understood Pat's exploits in foiling the anarchists, and what Kelly had told them simply served to center their suspicions of wrongdoing around the Queen of the Underworld.

Several of the best secret service operatives directed by the Sphinx, began shadowing The House of Mystery, at once. Their presence on the ground

The Housewife's Corner
A COURSE IN HOUSEHOLD SCIENCE COMPLETE IN TWENTY-FIVE LESSONS.
Lesson XVI. Children's Food.

The baby who must depend upon the bottle to supply nutriment to maintain life needs good care and attention.

That this baby may thrive, the mother should have the physician prescribe a formula that will agree with the child. Cleanliness is a big factor. It is impossible to keep the bodies, clothing and the utensils in which food is made, too clean. Remember that surgical cleanliness is the price of freedom from much of baby illnesses.

Filthy, dirt, impure milk and insanitary conditions are the enemies of childhood.

The baby approaching one year old must begin to eat solid foods. It is this period that the mother must use care and fore-thought. The delicate digestive organs are easily disturbed. It must be realized that the child should be furnished with foods that will provide growth of bone, muscles and tissues, fish also furnish it with sufficient energy to exercise its body.

For growth protein is necessary. This is found in milk, eggs and cereals for the small child; and in meat, fish, peas, beans and lentils, in addition to the above mentioned foods, for older children. Baby receives his energy from cereals, bread and butter and milk. The fats in the milk, butter and yolk of egg also act as energy-giving foods. The juice of an orange may be given in small amounts to the child under one year of age, with beneficial results. The value of orange juice in the child's diet is of a laxative nature. The small child from one to three years may have the pulp of a baked apple and prunes in addition to the orange juice.

Children from three to six years of age may have cereals, milk, eggs, finely chopped meats, fish and poultry, fresh vegetables and fruits. Corn, beans, tomatoes, cabbage and cucumber.

Plenty of cool drinking water should be given to the children, even the smallest baby may be given a teaspoonful of water three or four times during the day. Do not give small children iced water; for safety's sake the water should be boiled and cooled.

Plenty of cool drinking water should be given to the children, even the smallest baby may be given a teaspoonful of water three or four times during the day. Do not give small children iced water; for safety's sake the water should be boiled and cooled.

Worth Protecting
A good article is worthy of a good package. A rich, strong, delicious tea like Red Rose is worth putting into a sealed package to keep it fresh and good.

A cheap, common tea is hardly worth taking care of and is usually sold in bulk.

Red Rose is always sold in the sealed package which keeps it good.

RED ROSE TEA is good tea

NEW USES FOR WOOD.
One of the Latest Products is Artificial Silk Stockings.

Silk stockings, phonograph records and sausage casings are all being made of one material to-day—wood.

Silk is largely composed of cellulose, and as wood is composed chiefly of cellulose it has been found possible to produce silk from wood, says the Illustrated World. The cellulose of the wood is first converted into a substance known as viscose, which greatly resembles celluloid and is often used as a substitute for it; also as casing for sausages.

In the production of silk the viscose is dissolved in water, forced through the capillary tubes of a spinning machine and the fine threads produced are hung up to dry and to be converted into cellulose by warm currents of air. The threads are then woven into "silk" cloth with a cotton warp.

This artificial silk is very difficult to distinguish from the original product and is offering keen competition in the market.

Send Them To PARKER
Anything in the nature of the cleaning and dyeing of fabrics can be entrusted to Parker's Dye Works with the full assurance of prompt, efficient, and economical service.

Make a parcel of goods you wish renovated, attach written instructions to each piece, and send to us by parcel post, or express. We pay carriage one way. Or, if you prefer, send for the booklet first. Be sure to address your parcel clearly to receiving dept.

FROM OLD SCOTLAND

NOTES OF INTEREST FROM HER BANKS AND BRAES.

What is Going On in the Highlands and Lowlands of Auld Scotia.

Sir John Stirling Maxwell, Bart., has been chosen Assistant Controller of Timber for Scotland.

The sum of £140 has been realized by the sale of war comfort tickets on the Glasgow tramways.

Lady Stirling Maxwell opened the autumn show of the West of Scotland Horticultural Society at Glasgow.

The Killwinning burgh assessments this year show a decrease of three-pence per £ as compared with last year.

James Graham has just completed fifty years of service on the staff of the Glasgow Corporation Lighting Department.

Information has been received of the death at Capetown, South Africa, of John Polson, M.D., formerly of Aberdeen.

The Dunfermline School Board has again had under consideration the question of providing a second school for Rosyth.

The wedding took place in Green-side Parish Church, of Captain T. M. S. Milne Henderson, R.E., and Miss Evelyn Haldane Blain, of Edinburgh.

George Jamieson and Son, timber merchants, Aberdeen, were fined £6 for having failed to give up an insurance card to one of their workmen.

At the annual meeting of the Scottish Traction Engine Owners held at Stirling, William Haggie, Dunfermline, was re-elected president.

Second-Lieutenant M. D. Mackenzie, R.F.A., who has been awarded the Military Medal, is a grandson of A. Mackenzie, 7 Ramsay Gardens, Edinburgh.

Furness, Withy & Co., of Liverpool, have purchased from James Gardiner of Glasgow, his fleet of fourteen cargo-carrying steamers.

The Venison Supply Committee for Scotland has asked those who have venison to dispose of it to do so by sale and not by gift.

Sir Robert and Lady Baden-Powell paid a week-end visit to Aberdeen in connection with the Boy Scouts' and Girl Guides' movements.

Mr. and Mrs. Matthew H. Stewart, both octogenarians, and citizens of Govanhill, Glasgow, celebrated their golden wedding recently.

The Lords Commissioners of His Majesty's Treasury have appointed Lord Salvesen a member of the Scottish War Savings Committee.

Elizabeth Paxton, of Park, was fined £5 for falsely representing that she grew fruit in order that she might get 21 pounds of sugar.

The Lands and Fishing Committee of the Aberdeen Harbor Board reported that the total weight of salmon, prisle and trout caught there this year was 75,242 pounds.

Harry Lauder announced in Edinburgh that a committee had been formed to raise £1,000,000 for the benefit of Scottish soldiers on their return to civil life.

THE BAMBOOS OF JAPAN.
Have Remarkable Power of Resistance Against Pressure.

To Canadian eyes the sight of an enormous trestle work of slender bamboo poles carrying a railroad track across a mountain chasm might not immediately inspire confidence. Such, however, is a common occurrence in Japan, where bamboo is used for a multitude of structural purposes.

Japan has more than sixty species of bamboo which have been named. The tree grows with amazing rapidity. For commercial purposes it is often used split but more commonly in the original round shape for the power of resistance in bamboo against pressure is remarkably great. Cutting occurs at from three to ten years, which illustrates the reproductive advantage of the bamboo as compared with the Canadian spruce, for example, which for saw timber purposes cannot be utilized usually until above 50 years. Japan's supply of bamboo forests is constantly increasing as artificial afforestation is easy.

In the form of hoops for barrels and pails, the split bamboo is manufactured with a view to prevent unsightly change of color or to prevent splitting and other damage by extracting the oil while the bamboos are still in their original round shape. The process gives the bamboo an attractive lustre.

In the whole of Japan are over 600 species of forest woods. Twelve hundred and eighty men are employed on the state-owned forests for protection and improvement.

This interesting mammal has powerful front claws for tearing open ant hills and decayed logs, a tongue that is a foot in length and a long, bushy tail which, according to native observers, is used "to sweep up the ants."

In reality the tail is not employed for any such purpose. It serves for something quite different, as one may see when the animal lies down. Then the hairs of the tail fall both ways over its body in such a manner as to form a sort of roof-thatch, shedding rain and keeping the owner dry in stormy weather.

BRITISH AND FRENCH ARMIES MAKE IMPORTANT GAINS IN YPRES SECTOR

Canadians Took Part in Engagement at Which About 800 Prisoners Were Captured and Progress Made on Large Front.

A despatch from London says: Operations with limited objectives were undertaken by the British and French armies in Flanders early Friday morning, and notwithstanding great difficulties caused by weather and bad ground, considerable progress was made and valuable positions taken on the greater part of the front attacked, says the British official communication issued Friday night. The communication says that more than 800 prisoners were captured during today's operations.

The main operation was carried out by English and Canadian regiments on

our front north of the Ypres-Roulers Railway. Canadian battalions moved forward along the main ridge in the direction of Passchendaele, and, passing beyond their objectives, established themselves on the rising ground immediately south of the village. Other Canadian battalions with troops of an English naval brigade and battalions of London territorials made further progress, in the face of strong opposition along the spur between the main ridge and our positions east of Poelcapelle, capturing a number of strong points and fortified farms.

WIRELESS TELEPHONY AROUND THE WORLD.

A despatch from Brantford says: Wireless telephony to all parts of the world, more than a possibility, is practically an achieved fact, declared Professor Alexander Graham Bell, speaking at a mass meeting held here, terminating the ceremonies of the unveiling of the Bell Memorial.

The eminent inventor told of recent experiments whereby scientists spoke from Washington, D.C., to Paris, France, by word of mouth, the conversation being overheard in Honolulu. The result was achieved by the attachment of telephones to wireless apparatus, and speech to all parts of the world with neither wires nor batteries, is looked forward to in the very near future by Professor Bell.

TURKS RETREAT BEFORE BRITISH

London, Oct. 28.—"On Tuesday Turkish columns, moving on both banks of the Tigris from Terkit, approached our positions at Samarra (on the Tigris above Baghdad)," says an official report from the Mesopotamian front. "The Turks retreated up the river during the night without fighting, on the advance of the British."

U. S. Coal For Canada.

A despatch from Washington says: Under a definite allotment of American coal for Canada, announced by the fuel administration, about 2,000,000 tons of bituminous and 700,000 tons of anthracite will be permitted to move across the Canadian border during the next two months.

AUSTRO-GERMANS SUCCEED IN PIERCING THE ITALIAN LINES ON ISONZO FRONT

Enemy Launch Successful Offensive on Bank of Isonzo but Are Checked on Bainsizza Plateau.

A despatch from London says: The Austro-German forces which yesterday began an offensive on the Isonzo front broke through the Italian lines and brought the battle on to the slopes of the right (west) bank of the Isonzo, says Thursday's official statement. Powerful Austro-German attacks also were made on the Bainsizza plateau, and on the west slopes of Monte San Gabriele, but

these were checked by the Italians, who took a few hundred prisoners. The enemy attacked on the southern slopes of Monte Rombo and on the northern edge of the Bainsizza plateau. In the former region he was resisted in the narrow of Sago, but further south he broke through the Italian advanced lines, being favored by a thick mist which rendered useless the Italian barrage.

DISASTER CONFRONTS ITALIAN TROOPS 100,000 HAVING BEEN CAPTURED

Austro-German Forces Occupy Gorizia and Town of Cividale, Five Miles Within Italian Territory.

London, Oct. 28.—The Austro-German armies under the command of Emperor Charles, who has as his chief assistant Field Marshal von Mackensen, are shaking the entire Italian line from the Julian Alps region to the Adriatic Sea. Having pressed back the Italians at several points upon Italian soil, the combined enemy forces have now pushed forward on the Italian left wing and captured Cividale, lying to the northeast of Udine, and are nearing the plains beyond. In addition the Austrian town of Gorizia, a point of great strategic value on the Isonzo River, has been retaken from the Italians.

According to the latest Berlin official communication, 100,000 Italians have been made prisoners and in excess of 700 guns have fallen into Austro-German hands. The second and third Italian armies are declared to be in retreat. Rome admits the falling back of the second army, asserting that cowardice was exhibited by units of the army in the face of the foe, the Italians surrendering or retreating without giving battle, permitting the breaking of the left wing, and thereby offering easy access to the town of Cividale. Prior to falling back, however, the Italians destroyed all their depots and stores and Cividale was on fire when the Austro-Germans entered it.

FRENCH AGAIN DEFEAT GERMANS AND ESTABLISH NEW LINES

Petain's Troops Occupy Additional Villages and Add Several Hundred Prisoners to Large Total.

A despatch from Paris says: With the important junction of Laon on their objective the French troops are continuing their press against the forces of the German Crown Prince north of the Aisne River. In another attack on the right the village of Filin has been captured, a footing has been gained on the plateau north of Epine Lechevigny, and the enemy has been forced to give ground north of La Chapelle Saint Berthe. These successes, while not as great in importance as those of previous days on the centre and west flank of the attacking line, serve materially to bring the right wing to alignment with the remainder of the front and place the entire line in a better position for another smash northward toward Laon. However great may be the praise bestowed on the French troops for the brilliance of their victory over the Germans north of the Aisne this week, it is too small an appreciation of their herculean efforts in the face of

one of the most difficult tasks of the war. This is the opinion of not only their immediate chief, but of all who have seen them at work. Fronting them were the finest divisions of the German Crown Prince's army, occupying positions that were strongly fortified and having the keenest appreciation of their value.

Notwithstanding this the French not only succeeded in attaining every objective set them, but exceeded the hopes of the most sanguine, and advanced beyond the appointed places. More than 12,000 prisoners already have been counted and sent to the rear. Others are coming in and the large group still are hiding in subterranean shelters and their fate can only be captured. The French line now runs along the southern side of the Aisne-Oise canal without a break from westward to the Auxillon to Pargny-Filain, while the town of Filain has been completely dominated.

Markets of the World

Winnipeg Grain
Winnipeg, Oct. 30.—Cash prices: Northern No. 2, 21.15; No. 3, 21.10; No. 4, 21.05; No. 5, 21.00; No. 6, 20.95; No. 7, 20.90; No. 8, 20.85; No. 9, 20.80; No. 10, 20.75; No. 11, 20.70; No. 12, 20.65; No. 13, 20.60; One Week Each Year We Ask For Boosters Instead of Profits

This Week is Boosters' Week in Our Store

The Event of the Season

Profits Are Sacrificed

For one week, commencing November 1st, this store will introduce an innovation by putting on what will be known in future as "Boosters' Week, and it will be a week long to be remembered. There are few people who have not heard of the E. Mayhew & Son store; we believe there are a few yet who have not bought from us owing to long associations with other stores. But when we tell you that this week we will give you some goods at ACTUAL COST, we are stating the pure truth. MOTHERS! We want you to apply the test and see us this week. FATHERS! This is your opportunity to buy a Suit or Overcoat for yourself or one for the boy. You ask us how can we do it? We reply that we are willing to sacrifice our profits for one week in order to get a "voluntary army" of new boosters.

Boys' Winter Overcoats and Suits

Boosters' Week special, \$3.78. Fit ages 5 to 12 years.

Youths' Overcoats

Fit ages 12 to 18 years. Specially priced for Boosters' Week, \$7.95.

Attractive Blouses That Have Just Been Unpacked

New Georgia Crepe Blouses with beaded and embroidered effects, with large and small collars, shades of flesh, mauve, peach and white. Also embroidered and stock collars, tailored very effectively. Blouses, \$1.19 up to \$6.75.

Guarantee!

Every purchase you make at our store carries our personal guarantee. If the article does not correspond in every way as represented or you are in any way not satisfied, we want you to bring it back and get your money.

Millinery at Half Price

No wonder there is such a hum of business in our Millinery parlors. All the newest creations. Now is your time to practise economy.

Coming to Glencoe November 8th

We want every man of this community, young and old, to visit our store on the 8th day of November, where they will meet Mr. Irving of the House of Hobblerlin, clothing expert. Whether you are thinking of purchasing a Suit or Overcoat or not, come and see what is the latest and most up-to-date clothing of the day.

PERSONAL AND SOCIAL

—Miss Alice Dalton is visiting in Detroit.

—Miss B. M. Weldon spent the week-end at Thameville.

—Miss Marjorie Boud spent the week-end at her home at Longwood.

—Miss Etta McIntosh of London spent the week-end at her home here.

—Mrs. J. Young has been called to Sarnia owing to the illness of her son Ernie.

—Misses Aliff and Violet Gould have returned from a visit to Evanston and Rockford, Ill.

—Mrs. John McRae of Minnesota is visiting her sister-in-law, Mrs. Alfred Aldred, Aldborough.

—Mrs. Davidson and daughter Clara of Woodstock are visiting Mrs. Davidson's parents, Mr. and Mrs. H. Lumley.

—Mrs. Naismith of Stratfordville, who has been visiting her daughter, Mrs. J. A. Scott, has returned to her home.

—Miss Gladys Hagan of Detroit has returned home after visiting Mrs. James Grover and other relatives in this vicinity.

—Mr. and Mrs. George Coulthard of Iowa have returned home after spending a few weeks visiting relatives in and around Glencoe.

—The Forest Free Press says:—Miss Adeline Trusler, nurse, went to Glencoe last Thursday, and will spend the winter there with her sister, Mrs. Twiss.

—Miss Susie Hull, who has been holidaying at her home here, left on Saturday to resume her position as nurse in one of the hospitals in Indiana.

—Mrs. Alex. McLellan, who has been quite ill for some time, is rapidly recovering. Her niece, Miss Clara Tunks, has been in attendance during her illness.

—Dugald M. Gillies left on Monday for Vancouver, B. C. Mr. Gillies has been laid up for some time with rheumatism and his many friends trust that the change of climate will benefit him.

The Late Mrs. Joseph R. Squire.

The funeral of the late Mrs. Joseph R. Squire took place from her residence, Glencoe, on Tuesday, Oct. 23rd.

Mrs. Squire was the daughter of the late Wm. and Eliza Cooper, and was born in Canada on November 20th, 1883. At eighteen years of age she was converted, and she maintained a consistent Christian character till the end of life. The fortitude, resignation and patience exhibited during her lengthy illness reflected her faith in a future life.

The funeral service was conducted by Rev. R. Fulton Irwin, Dr. Ford delivering the address. The subject, "My Beloved has gone down into her Garden to feed upon the spices and to gather the lilies," was taken from the Songs of Solomon, and was appropriate to the purity of life of the departed. During the service Mrs. Wilson and C. O. Smith of the Glencoe Methodist choir, sympathetically rendered the duet, "Face to Face."

She has left to mourn her loss, a husband, three daughters—Ethyle, Mrs. Edward Galbraith of Limerick, Sask., Mrs. Donald McCall of Ekfrid—and two sons, Roy and G. C. There are also two sisters—Mrs. (Mrs.) Bennett, Swift Current, Sask., and Mrs. J. W. Naftzger, Adrian, Mich., and two brothers—Fred G. Cooper, Twatnaw, Alta., and Dr. E. M. Cooper, Carleton, Mich.

Caradoc correspondence Strathroy Dispatch:—A gathering of the ladies of the Glencoe and Caradoc societies of about forty met last Thursday afternoon at the home of Mrs. Herbert Sutherland, 5th con. Mrs. J. A. Scott of Glencoe, was present and addressed the ladies on the subject of "Red Cross work, giving many practical ideas of what is needed in the care of the men at the front and in the hospitals. All present were much interested and gave promise of doing their work when they have done in the past. Mrs. Sutherland served a dainty lunch, and all present felt that they had a profitable day in spite of the rain and cold. Mrs. Scott was accompanied on her visit by Mrs. Stuart, President of the Glencoe Red Cross Society, Mrs. (Rev.) R. F. Irwin, and Mrs. A. E. Sutherland and Mrs. Archer.

Savin' Food With Hanner.

Maw's signed the conservation card, it's hung up in our window. Paw says he'd put it in the stove. An' burn it to a cinder; But maw says there it's goin' to stay. It's saved as our banner. An' all us kids must "do our bit" An' help save food with Hanner.

Our dog's so thin he's got to lean Agin the fence to bark. Our cat has joined the midnight crew An' hunts while it is dark. Our cow is on a skim rations put. Her skin would shock a tanner; The whole caboodle on our lot Are savin' food with Hanner.

Maw served us grub the other day—She called it squeak and bubble. The way paw flared and fussed about, It looked like there'd be trouble; But maw just pointed to the card, Then in her kindest manner Said: "It's up to each one of us To help save food with Hanner."

Maw's out to lick old Kaiser Bill, You bet your hat that's true; An' who she gets an idea, Well, maw will see it through. She's kind and good, but if she could She'd hit Bill with a hammer— She can't, an' so with all her brood She's savin' food with Hanner.

Rev. and Mrs. Hunt (nee Miss Bessie Waterworth) of Chatham spent the week-end at her home here.

The Circle girls of the Presbyterian church met at the home of Miss Bessie Hindson last Monday afternoon and presented her with a beautiful cut glass berry bowl.

Mrs. H. Dougherty of Allanburg is visiting her parents, Mr. and Mrs. John Lamont.

Mosa Council.

A meeting of Mosa council was held at Newbury on Oct. 20th. Members all present. The minutes of the last meeting were read and adopted.

Orders were issued for the following accounts:—John McKay, \$19.50, for repairing Government drain No. 4, e. c. James Douglas, \$4, E. F. Keycraft, \$4, and C. C. McNaughton, \$6, for selecting jurors; John C. Congdon, \$58, for work done on upper portion of Peter Mitchell drain; John Benson, \$2.50, for cutting weeds on lot 4, con. 7; Wm. Starks, \$400, for work done on Government drain No. 6; F. J. James, \$30, for commissioner's fees on No. 6 drain; Bessie McAlpine, \$25, grant to Ferguson's Crossing Needle Club; M. M. Edwards, \$6.50, for provisions furnished to George McDonald.

The council made a grant of \$200 to the British Red Cross appeal.

A by-law was passed to provide for imposing an additional per centage of one per cent. on all taxes of the township of Mosa not paid on or before the 15th day of January, 1917.

The council adjourned to meet at Glencoe on Nov. 17th at 10 a. m. C. C. McNAUGHTON, Clerk.

Coming to Glencoe.

Komoka, Oct. 30.—A pleasant evening was spent at the home of Mr. and Mrs. W. Martinson, prior to their departure for Glencoe, where they will reside in the future. Their many friends in Komoka took the opportunity to express their good-will, and during the evening an address was read by Mr. Foster, and J. H. Stuart presented to Mr. and Mrs. Martinson a large leather easy chair each, and also a smoking case for Mr. Martinson. They have been residents here for many years and will be missed by a host of friends, who hope that all success will follow them in their new home. The evening was spent in games and music.

Daniel Dobie is in very poor health and is confined to his bed continually.

Buy a bond and help win the war.

AUCTION SALES

On north half lot 16, concession 2, Ekfrid, (on 16 sideroad, north of Appin road), Tuesday, Nov. 6th, 1917, at 1:30 o'clock sharp:—1 mare, 9 years old, black; 1 colt, 2 years old; 1 driver, 9 years old; 1 bull; 4 young cows, supposed to be in calf; 1 cow, due to freshen 1st of December; 2 one-year-old steers, 1 sow and 1 piglet, 415 lbs. oats, quantity of hay, 1 binder; 1 manure spreader, nearly new; 1 mower, nearly new; 1 drill, 2 harrows, 1 spring-tooth cultivator, 1 corn sifter, 1 disc; 1 side-delivery rake, nearly new; 1 loader, fanning-mill with bagger attached; 1 cutter, nearly new; 1 set sleighs, 1 plow, 1 road cart, 1 broad-tire wagon, 1 dump hay rake, 1 top buggy, 1 open buggy; hay fork, rope and pulleys; 1 set slings; 1 set single harness, new; 1 set single harness, 2 sets double heavy harness; 1 Standard cream separator, nearly new; 1 churn, 1 hanging lamp, 1 wood stove, 1 lawn mower; 1 Ford automobile, in first-class repair; forks, hoes, whiffletrees, and other articles usually used on a farm. At the hour of 4 o'clock sharp the farm will be offered, subject to a reserve bid. Terms and conditions made known at time of offering. The homestead farm contains 100 acres, more or less, and is the north half lot 16, con. 2, Ekfrid, upon which is a good dwelling-house; barns and implement shed, lately remodelled; orchard; 7 acres tall wheat; a new failing supply of water for house and stock. This is one of the best grain producing farms in the township of Ekfrid; is well tile drained, and well located on good gravel road, being 2 miles from Appin and 34 miles from Glencoe, and is a very inviting home. Also 25 acres of good pasture land, with a good supply of water, and about 10 acres of standing timber, mostly beech and maple, and is the south half north half south lot 17, con. 3, Ekfrid. Mrs. Eva Covey, proprietress; L. L. McTaggart, auctioneer.

The Transcript.

THURSDAY, NOVEMBER 1, 1917

Newbury

The official meeting of the quarterly board will be held in the Methodist church on Monday night at 7.30.

The monthly meeting of the Newbury Women's Institute will be held November 7th at the home of Mrs. A. Holman. Roll call—"Things to be thankful for. Recently the institute packed parcels for our overseas soldiers. Among those remembered were Fletcher, Longley, Archer, Crim, Leeson, Collishaw, Dean, Shred, Westover, Harcourt and Armstrong.

Mrs. C. Gilbert Fletcher, who has been visiting here, received official word on Saturday that her husband, Sergt. Fletcher, had been wounded—contusion of the shoulder. It is hoped by his many friends he may have a speedy recovery.

E. J. Haghigh and wife returned from Windsor Saturday evening.

Miss Messer of Toronto visited Mrs. H. A. Fenby a few days last week.

Miss M. Gordon returned from London on Saturday.

Knox church will hold anniversary services on Sunday, Nov. 4th, at 11 a. m. and 7.30 p. m. Rev. Mr. Lloyd of Glencoe will preach. The male quartette of Glencoe will sing in the evening.

Service will be held in Christ church on Sunday, Nov. 4th, at 3 o'clock on account of the special services in Knox church.

Mrs. Owens is visiting her daughter in Hamilton.

Dr. Webster and wife of West Lorne spent Sunday at J. G. Bayne's.

Miss Mary Hammett has returned home from London.

Ekfrid Station

Miss M. A. McKenzie of Embro called on friends here last week.

Miss T. Switzer of Parkhill spent the week-end with friends here recently.

Mrs. Burton is spending a week with her brother in Chatham.

Mr. and Mrs. D. McCallum have returned from a visit to friends in Forest.

Mrs. D. H. Black passed quietly away on Tuesday evening, Oct. 16th. The funeral was held from her late home on Thursday afternoon, conducted by Elder J. B. Slauson of St. Thomas; interment at Longwood cemetery. The immediate cause of her death was due to her extreme age, she being in her ninety-third year.

FERGUSON'S CROSSING

The secretary-treasurer of the Red Cross Society forwarded the Hon. McGarry, Toronto, the following free contribution for British Red Cross: Needle Club, \$11.75; S. S. No. 12, Mosa, per Miss M. Little, \$5.40.

SHEPHERD.

Did the Hallowe'en witches 'witch you? Potato crop here only fair to middlin'.

The daily downpours are putting the clay in great shape for fall plowing.

Peter and Paul's outfit has resumed drilling operations near here.

Lorne Elliott of Huron college was home over Sunday.

Clayton Sharp and family motored to St. Thomas for a week-end visit.

Mrs. Johnson of Winnipeg has returned home after a month's visit with her mother, Mrs. Geo. George.

Mighty busy times at the Wellington flour mills these days.

Hollow trees are in big demand around here.

Jack Mitchell has disposed of his interests in the Ecot oil fields and is moving back to Oil Springs.

J. L. Munroe wears a proud countenance.—It's a boy.

Having been no church here for a couple of Sundays, a great harvest of nuts has been garnered.

Mr. and Mrs. Edward Moorehouse of Chatham are visiting around here.

The Navy, we hear, has purchased the Shetland picnic pleasure launch for a submarine.

Miss M. E. L. Dobbyn is a Chatham visitor.

Shetland store has a new clerk.

Ivy Stephens is visiting with friends in London.

Sam Turtle has decided to live retired in Bothwell. We regret losing this worthy, venerable citizen.

DELCO-LIGHT

ELECTRICITY FOR ANYONE-ANYWHERE

Here's a letter from a local user of DELCO-LIGHT

Glencoe, August 29, 1917.
Mr. Alex. Pollard,
London, Ont.

Dear Sir:—
We are much pleased with the Delco Light Plant which you installed in our buildings. We are using coal oil for fuel and find that it takes less than we used to use in our lamps and lanterns. The plant is easily managed and we have never seen a better light than that produced by your plant. We are well pleased with our investment.
Yours truly,
W. R. S. McCracken.
