Kower Canada (Bas Canada) 3 (SEVENTH REPORT

OF THE

COMMITTEE

OF THE

2/HOUSE OF ASSEMBLY,

ON THAT PART OF THE SPEECH

OF

HIS EXCELLENCY THE GOVERNOR IN CHIEF WHICH RELATES

TO.THE

SETTLEMENT

OF THE

Crown Lands.

WITH THE

MINUTES OF EVIDENCE

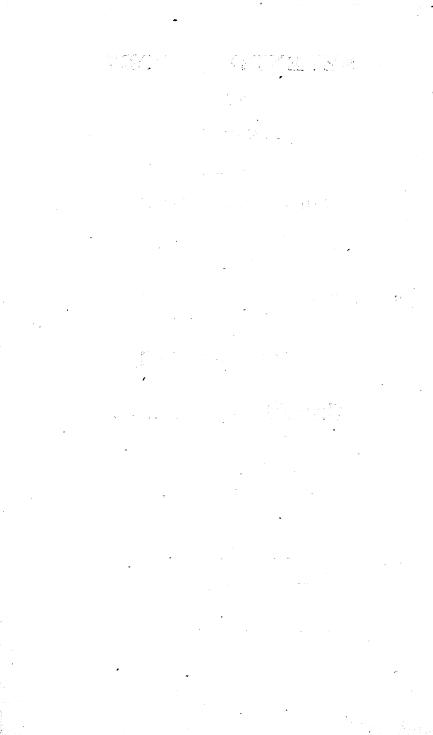

TAKEN BEFORE THE COMMITTEE.

FORDERED TO BE PRINTED THE TENTH FEBRUARY 1824.]

QUEBEC:

Printed by NEILSON & COWAN, No. 3, Mountain Street.

1824.

HOUSE OF ASSEMBLY, SATURDAY, 29th November, 1823.

Resolved, That a Committee of seven Members be appointed to take into consideration that part of His Excellency the Governor in Chief's Speech at the opening of the Session of the Legislature on the 16th December 1820, which relates to the settlement of the Crown Lands, with power to send for persons, papers and records, and that the Committee have power to report, from time to time, by Bill or Bills or otherwise.

Ordered, That Mr. Stuart, Mr. Saint Onge, Mr. Joseph Perrault, Mr. O'Sullivan, Mr. Viger, Mr. Heney and Mr. Bourdages do compose the said Committee.

Attest.

WM. LINDSAY, Clk. Assy.

HOUSE OF ASSEMBLY,

FRIDAY, 5th December 1823.

Ordered, That Mr. Bureau be added to the Committee.

Attest.

WM. LINDSAY, Clk. Assy.

HOUSE OF ASSEMBLY,

WEDNESDAY, 24th December 1823

Ordered, That the Petition of the Chiefs and other Indians of the Huron Nation, residing at Lorette, be referred to this Committee.

Attest.

WM. LINDSAY, Clk. Assy.

HOUSE OF ASSEMBLY,

WEDNESDAY, 7th January 1824.

Ordered, That the Message of His Excellency the Governor in Chief relating to the Escheat and Forfeiture of Lands to the Crown, delivered this day, with the document accompanying the same, be referred to the said Committee.

Attest.

WM. LINDSAY, Clk. Assy.

YOUR COMMITTEE HUMBLY REPORT,

T HAT early in the present Session they resumed the enquiry into the matter referred to them, and examined a number of Witnesses, whose examinations will be found in the Appendix to this Report under the Letter (A.)

To obtain more full information relative to the Country lying between the River Saguenay and the River Ottawa, your Committee have directed to several Country Gentlemen of this Province, who have had means of becoming acquainted with that Tract of Country, a Series of Questions, which, with their Answers to them, when received, will be communicated to the House.

That it became the duty of the Committee to inquire how far the great and manifold abuses which had crept into the administration of the waste Lands of the Crown, could be corrected by Legislative Interference.

One of the most prominent of these Evils was the exaction of illegal Fees, and particularly from the Militia who served during the last War, whereby the gracious and bountiful intentions of His Majesty towards the said Militia have been hitherto prevented from producing their full fruit.

To carry into effect these gracious intentions of His Majesty, there was passed an Act by the Provincial Legislature (59th Geo. III. Cap. 23), initialed, "An Act to appropriate a certain Sum of Money to "provide for the expense of laying out Lands for reduced Officers and "Men of the embodied Militia, and others, who served during the late "War:" by which Act there was appropriated for that purpose a Sum of Three thousand Pounds current money of this Province.

On referring to the Public Accounts, it will be found that of the said Sum, there has been laid out a Sum of Two thousand two hundred and ninety seven Pounds, four Shillings and ten Pence Currency, between November 1818 and October 1823, and there now remains a balance in favour of that Fund of Seven hundred and two Pounds, fifteen Shillings and two Pence Currency.

A Statement of the Sums expended, and the names of the Townships in the Survey, whereon they have been expended, will be found in the Appendix of this Report under the Letter (B.)

The description of the Grantees of the Land so surveyed distinguishing those who served in the Embodied Militia during the late War, with the quantities granted to the said Grantees, will be found in the Appendix to this Report under the Letter (C.)

To prevent the exaction of illegal Fees, your Committee reported a Bill, initiuled, "An Act for the relief of the Subject in more effec-" tually enforcing the Royal Instructions of His late Most Gracious " Majesty, relating to the Expense and Fees to be allowed upon Grants " of the Waste Lands of the Crown in this Province, and to punish " persons offending against the said Royal Instructions;" which has passed this House, and has been ordered to be taken up to the Legislative Council for their concurrence.

Your Committee next directed their attention to the old Seigneuries of the Country. These Seigneuries were originally granted in trust to regrant to actual Settlers upon certain moderate Rents, and with a right in the Seignior to certain mutation fines. The Tenant was bound to make an actual Settlement.

These respective obligations might be enforced by summary and efficacious proceedings—As far as the obligation of the Seignior to grant, and the prohibition to sell his Wild Land were concerned, the only Tribunal competent to enforce the penalties consequent upon a Breach of this obligation, was composed of the Governor, Lieutenant Governor, and Intendant for the time being.

By the Judicature Act no special provision is made for this Class of cases, and it became necessary therefore to vest in the Courts of King's Bench for the Districts of Quebec, Three Rivers, and Montreal respectively, Jurisdiction over this matter.

The Expenses incident to the bringing of numerous Suits against the Tenants who had failed to comply with the Conditions of actual Settlement and had abandoned the Lands, and not unfrequently the Seigniory itself, had long been a subject of well founded complaint on the part of the Seigniors.

To remedy these two Evils as far as possible, your Committee reported to this House a Bill, intituled, "An Act to enforce the Ancient Laws "of this Province, compelling Seigniors to concede their Lands sub-"ject only to Rents and Services, and to facilitate the reunion of Lands "en roture to the Domaine in cases where the same may be demanded."

The inconveniences, which in His Majesty's Instructions to James Murray, Esquire, Governor of the Province of Quebec; dated 7th December 1765, are stated "to have arisen in many of our Colonies in "America from the granting excessive quantities of Land to particular "persons who have never cultivated or settled the same, and have "thereby prevented others more industrious from improving the same;" have notwithstanding the various precautions taken by His Majesty's Government been realised in this Colony to an alarming extent.

This part of the subject was immediately brought under the consideration of the House by a Message of His Excellency the Governor in Chief, bearing date the 5th January instant, and which has been referred by the House to Your Committee.

The Message of His Excellency the Governor in Chief is to the following effect;

"The Governor in Chief having long felt the necessity of taking steps to effect the Escheat and forfeiture to the Crown of large tracts of Land held under Letters Patent in the Townships of this Province, on which

A 2

no improvements have been made according to the Conditions of the Patents granting the same, recommends to the Assembly to adopt measures for removing, by Legislative enactments, the various difficulties which, in the present state of the Law applicable to this subject, must attend and very much embarrass any proceeding for reuniting these Lands to the Crown."

"The extent and nature of those difficulties will best be shewn by the accompanying Copy of a Report of the Law Officers of the Crown, upon a reference made to them by the directions of the Governor in Chief in the month of March last."

The Report of the Law Officers of the Crown referred to in the foregoing Message, will be found in the Appendix to this Report under the Letter (D)

Your Committee have bestowed their most serious attention upon the foregoing Message of His Excellency the Governor in Chief. They are convinced that the most effectual Legislative aid ought to be afforded to the Provincial Government to enable it to carry into effect the wise and beneficial measures referred to in the Message of His Excellency. The particular Legislative enactments required in this behalf will however require much consideration.

Your Committee will with all diligence prepare and report to the House, a Bill containing such provisions as in the opinion of your Committee are best calculated to carry into effect the intentions of His Excellency the Governor in Chief, as expressed in the foregoing Message.

The extreme denseness of the population of Lower-Canada, which appears to your Committee to have encreased and to continue to increase, in a much higher ratio than that in which the clearings extend into the Forest, and the productive powers of the Earth are brought forth, rendered it a matter of auxious enquiry with your Committee what the population of Lower-Canada now is, and what has been and is the ratio of its encrease.

The close connexion of this subject with the measure of reducing excessive Grants of Land was felt by the Government of His Most Christian Majesty, and by a Decree of the 4th June 1675 (which is to be found in the Appendix to the Report under the Letter (E), intituled "Acte pour retrancher les Concessions de trop grande étendue et "pour faire un recensement," provisions were made embracing both these objects.

The importance of knowing the exact amount of the encrease of the Inhabitants was duly appreciated by His Majesty's Government, and accordingly by the Seventy third Article of His Majesty's Instructions to James Murray, Esquire, already referred to and dated 7th December 1763, which article there is reason to believe is one of the general articles of His Majesty's Instructions :--

It is provided as followeth ; "You are from time to time to send " unto Us, by Our Commissioners for Trade and Plantations as afore"said, an account of the Inerease and Decrease of the Inhabitants, Whites and Blacks, and also an account of all persons born, christened, and buried."

It was probably in pursuance of a General Order of the Governor in Council for the time being, made to carry into effect the foregoing Article of His Majesty's Instructions, that the Prothonotaries of the Courts of King's Bench for the Districts of Quebec, Three-Rivers and Montreal, have annually delivered to the Governor for the time being, Tables of Births, Marriages, and Deaths in the different Towns and Parishes of this Province, which Tables are made from the duplicate Registers of Baptisms, Marriages, and Deaths, which the Parsons of the different Parishes are by Law bound to transmit annually to the said Prothonotaries.

Your Committee have obtained from the Prothonotaries of the several Districts all the Copies of these Tables which remained in their respective Offices, viz: for the District of Quebec, from 1794 to the year 1821 both years inclusive, in which last year it having been intimated to the Prothonotaries from the Committee of Audit of the Executive Council, that the usual allowance of Ten Pounds for this Service would no longer be admitted, the Prothonotaries have ceased to make such Tables.

For the District of Three-Rivers, from the year 1791 to the year 1822 both inclusive: And for the District of Montreal, for the year 1803, 1810, 1811, 1812, 1813, 1814, 1815, 1816, 1820, 1821 and 1822.

From these anthentic documents, Your Committee have framed Synoptical Tables for the Three Districts respectively, which Tables will be found in the Appendix to this Report under the Letter (F.)

To obtain further information upon this matter, a motion was directed by your Committee to be made in the House, and it was accordingly moved and resolved therein.

"That an humble Address be presented to His Excellency the Gov-"ernor in Chief, praying he will be pleased to order to be laid before "this House, Copies of such Statements of Baptisms, Marriages and Burials as have been transmitted to the Governor, Lieutenant Gov-"ernor, or person having the Administration of the Government of this "Province for the time being, by the Prothonotaries of the Districts of "Montreal and Gaspé, from the date that the same have been so trans-"inted, and of the District of Quebec, for the years anterior to one thousand Seven hundred and ninety four, and of the District of Three "Rivers, for the years anterior to One thousand seven hundred and interty one."

The above Tables do not comprise the Townships nor the District of Gaspé.

As to the latter, the Commissioners appointed in virtue of an Act of

the Provincial Parliament of the 59th year of the Reign of His late Majesty George the Third, intituled, "An Act to secure the Inhabitants of the Inferior District of Gaspé, in the possession and enjoyment of their Lands," in obedience to the Orders of His Grace the late Duke of Richmond, Governor in Chief, directing the said Commissioners in addition to the provisions of the said Act, to give their attention to the state of the fisheries in the said District, and requiring their opinion as to the most proper mode of encouraging the same; to take a Census of the Population and to ascertain " the state of Agriculture in the said District, the nature of its Soil and its various productions, the general quality of the unsettled Lands, the places best suited for the location of Settlers, the state of the internal Communications and places most in want of highways and Roads, and in general all such information as might, in any wise tend to the Public utility," did on the twenty-seventh December one thousand eight hundred and twenty, make their Report o His Excellency the Earl of Dalhousie, Governor in Chief, which said Report was on the 28th day of February, one thousand eight hundred and twenty one, laid before the House.

A Table intituled, "Census and General State of the District and County of Gaspé in the Province of Lower-Canada," which was subjoined to the said Report by the said Commissioners, will be found in the Appendix to this Report under the Letter (G.)

Your Committee have no information relative to the Number of the Inhabitants of the Townships, nor of the Births, Marriages and Deaths, Registers not being generally kept there.

To obtain information upon this subject, there was on the fourteenth April, One thousand eight hundred and seven, ordered "That an humble Address be presented to His Honor the President of this Province, praying that he may be pleased to order a Census to be made of all the Inhabitants of the different Townships on the south side of the River St. Lawrence, stating the Countries of which they are Natives, the time they have resided in this Province, whether they have qualified themselves as British Subjects, the number of Males and Females, and also an Account of the Number of Acres of Land in a state of cultivaton in each Township respectively, as nearly as the same can be ascertained, and the number of Males within the age limited for serving as Militia-men, for the information of the Legislature at the next Session thereof, and to assure His Honor that this House will make good the Ezpense thereof."

To this Address His Honor the President was pleased to answer, "As I have every reason to believe that I shall be relieved in the Administration of this Government before the necessary steps can be taken for obtaining the information requested in your present Address, I can only say in answer thereto, that I shall not fail to lay it before the Governor or Lieutenant Governor on their arrival." On the twenty-fourth February One thousand eight hundred and seventeen, a Bill "to authorize a Census and Statistical Returns of the Province of Lower-Canada," passed the Assembly, and was sent to the Legislative Council, but did not pass that body.

A Bill for the same purpose passed the Assembly in One thousand eight hundred and nineteen, and was likewise lost in the Legislative Council; another in One thousand eight hundred and twenty; another in one thousand eight hundred and twenty two; and another in One thousand eight hundred and twenty three, met the same fate.

A Bill for the same purpose was sent up to the Legislative Council by the Assembly early in the present Session.

Your Committee regretting as they must, that a measure which would seem at all times useful, and at the present moment, when the House is occupied in regulating anew the representation, essentially necessary, should not have had the concurrence of that Honourable Body, do not feel themselves entitled to inquire into or to indulge even a conjecture of the reasons which could have led to the rejection of this Bill year after year.

Your Committee lastly carefully examined His Majesty's Instructions relating to the granting of Lands with a view of ascertaining whether the abuses in this branch of the Administration had arisen by reason of any error or insufficiency in the system of granting laid down by His Majesty's said Instructions, or whether these abuses were not rather due to circumstances extrinsic from and unconnected with the said Instructions.

The object of these Instructions appears to have been to organize z more effectual system of Checks than had been obtained in the old British Colonies, and thereby prevent the occurrence of those evils and abuses in the granting of Lands, whereof the Records of the Board of Trade and Plantations and of His Majesty's Privy Council, must have afforded so many proofs.

The Officers within the Colony whose powers and duties in relation to this matter were to be regulated, were :---

1st. The Governor, Lieutenant Governor or Person Administering the Government.

2nd. The Surveyor General.

3rd. The Registrar.

4th. The Auditor of Land Patents.

5th. And lastly there was to be established an ultimate controul over all the officers within the Colony, to be exercised by a Public Board in Great Britain.

And first as to the power of the Governor for the time being to grant Land.

To ascertain what this power is, and how it is to be exercised, we must look at the Commission of Captain General and Governor in Chief of the Province of Quebec, given to James Murray, Esquire, and dated at Westminster, the twenty-first day of November, in the fourth year of the Reign of His late Majesty,-which Commission has been compared with the Commission given to Sir Danvers Osborn, Baronet, Captain General and Governor in Chief in and over the Province of New-York, dated at Westminster the first day of August in the twenty seventh year of the Reign of His late Majesty, and which are to be found in a collection of several commissions and other public instruments proceeding from His M. jesty's Royal Authority, and other papers relating to the then Province of Quebec in North America, since the Conquest of it by the British Arms in one thousand seven hundred and sixty, collected by Francis Masères, Esquire, His Majesty's Attorney General in the said Province,-published at London in one thousand seven hundred and seventy two: And has also been compared with the Commission of His Excellency the present Governor in Chief, whereof your Committee has caused a copy duly authenticated to be laid before them.

The Clause in the Commission to James Murray, Esquire, is as followeth. "And we likewise give and grant unto you full power and au-"thority, by and with the advice and consent of our said Council, to set-"the and agree with the inhabitants of our said Province, for such Lands, "Tenements and hereditaments, as now are, or hereafter shall be, in "our power to dispose of, and them to grant to any person or persons "upon such terms and under such moderate quit Rents, services and ac-"knowledgments, to be thereupon reserved unto us, as you, with the advice aforesaid, shall think fit, which said Grants are to pass and be sealed by our Public Seal of our said Province, and being entered up-"on Record by such officer or officers as shall be appointed thereunto, "shall be good and effectual in the Law against us, our Heirs and Suc-"cessors."

** Provided, the same be conformable to the instructions herewith defivered to you, or to such other instructions as may hereafter be sent you under our Signet and Sign Manual, or by Our Order in Our Privy Council, which instructions or any articles contained therein, or any such Order made in our Privy Council, so far as the same shall relate to the granting of Lands as aforesaid, shall from time to time be published in the Province, and entered on Record in like manner as the said Grants are hereby directed to be entered."

The Clause in the Commission to Sir Danvers Osborn is in the same

words, down to the Proviso, which is not to be found therein.

The Clause in the Commission of His Excllency the present Governor in Chief, is as followeth :---

"And we do likewise give and grant thto you full power and authority with the advice of our Executive Council of our said Province of Upper-Canada and Lower-Canada to grant Lands within the said " Provinces respectively, which said grants are to pass and be sealed with our Seal of such Provinces, and being entered upon Record by such Officer or Officers as shall be appointed thereunto, shall be good and effectual against us, our Heirs and Successors. Provided, nevertheless, that no Grants or Leases of any of the Trading Posts in our said Provinces, shall, under colour of this authority be made to any person or persons whatsoever, until our pleasure thereon shall be signified to you."

It is to be observed, that the Proviso contained in the Commission given to James Murray, Esquire, limited the power contained in the said Commission to grant Lands; embodied virtually and substantially His Majesty's Instructions in the said Commission; and rendered inoperative any Grants of Lands made by the Governor in Council contrary to those Instructions.

Copies of the Commissions of the Registrar and of the Auditor of Land Patents are subjoined to this Report under the Letter (G.)

The wise and salutary jealousy which the before mentioned Proviso in the Commission to James Murray, Esquire, manifests, pervades the whole of the Instructions of One thousand seven hundred and sixty-three.

The Governor was not authorised to determine upon the claims of the old Inhabitants of the Province to Lands in virtue of Grants or Concessions made before the signing of the preliminary articles of Peace, on the third day of November, One thousand seven hundred and sixty two, when it appeared that those Inhabitants were in possession of more Lands than were contained within such Grants or Concessions—He was ordered "to represent such claims to His Majesty, by His Majesty's "Commissioners for Trade and Plantations, to the end that he might "receive such directions thereupon as the nature and circumstances of "the case shall appear to require."

The Governor was ordered to cause an accurate survey to be made of the Province "in order to the advantageous and effectual settlement "thereof, and that the true state thereof should be known" which survey when made, he was to report to His Majesty by His Majesty's Commissioners for Trade and Plantations.

Although it is said, " that as the making such Surveys will be a work " of great length, you are in the mean time to carry on Settlements " upon that Plan which appears to you to be most expedient, from the " best information you can collect." Yet the Instructions proceed to order that the Settlements shall be made in Townships, and give the most minute directions as to the form and dimensions of those Townships, as to the Towns to be erected therein, and the reservation to His Majesty of proper quantities of Land " For erecting Fortifications, Barracks " where necessary, or for other Military or Naval Services, and more " particularly for the growth and production of Naval Timber, if there " are any Wood Lands fit for that purpose ;" " and for Churches and " Glebes."

B

It was not competent for the Governor to cause surveys to be made by any others than sworn surveyors, who were bound to make Reports of their surveys to the Governor "as soon as possible, with a particular "description of each Township and the nature of the soil therein."

Before any warrant of survey could be obtained by any persons applying for Grants of Lands it was necessary that the Petitioners "should "make it appear before the Governor in Council, that they are in a "condition to cultivate and improve the same, by settling thereon in "proportion to the quantities of acres desired a sufficient number of "white persons and negroes."

The warrant of survey was directed to the Surveyor General or other proper Officer, and was required to be returned within six months from the date thereof, provided that the Governor was to take care "that "before such warrant is issued as aforesaid, a Docquet thereof be en-"tered into the Auditor's and Registrar's Office."

The Grant when issued was required to be in due form, and "that "the terms and conditions of the said Instructions should be expressly "mentioned therein."

In the exercise of the discretion of the Governor, as to the quantity of Land to be given to each applicant, the most particular directions are to be found in Art. 51, even as to the form of the Lots.

Over and above the above mentioned duty of the Surveyor General to make returns of his surveys, he was enjoined "once in every year or "oftener, as occasion shall require, to inspect the state of all Grants of "Land made by the Governor and make report thereof to the Governor "in writing, specifying whether the condition therein contained had or "had not been complied with, or what progress had been made towards "fulfilling the same, and he was annually to transmit copies of such re-"port to His Majesty's Commissioners for trade and Plantations.

The Duty of the Registrar was to enter a Docket of the Warrant of the Survey before the same issued to the Surveyor General, and to enregister the grants within six months from the date thereof.

The Duty of the Auditor of Land Patents was to enter into his Office, also a Docket of the Warrant of Survey, before the same issued to the Surveyor General—And a Docket of the Grant was to be entered in the Auditor's Office, "in case such establishment shall take place in "our said Province." In default of compliance with these Orders it was declared that the Grant should be void.

It was further ordered that Copies of all these Entries should be returned regularly by the proper Officer to His Majesty's Commissioners of the Treasury, and to the Commissioners for Trade, Plantations and within six months from the date thereof.

To give publicity to these Instructions, the Governor was directed as soon as possible to cause a Publication to be made, by Proclamation or otherwise, as he should deem most adviseable, "of all, each and every "the foregoing Terms, Conditions and Regulations, of every kind res" pecting the Grants of Land," and he was to take such steps as he should think proper " for the publishing of such Proclamations in all " the colonies of North America."

It is not easey to conceive a better combined system of checks than that which the Instructions, whereof an outline has been above submitted by your Committee, exhibits.

The only remaining source of abuse was the practice of purchasing colourable Titles to Lands from the native Indians, and a remedy to this Evil which had produced so much mischief in the old British Colonies, seemed to be provided by the Proclamation whereof a Copy is subjoined under the Letter (H.)

Under the above Proclamation doubts were entertained whether the whole Body of the English Law, and more particularly that part of it which relates to Lands, had not been introduced.

The proceedings had within the Province by the colonial authorities upon this subject, will be found in the Appendix to this Report, under the Letter (I.)

To quiet the minds of the people upon a matter of such vast importance to them, a measure was recommended by the Attorney General of that day, which will be found in the Appendix to this Report under the letter (K_{2})

The project of Changing the Tenure of the Country, came under the Consideration of His Majesty's Government in 1772, 1773, 1774.

The opinion of one of the principal Law Officers of the Crown upon "a Plan of a Code of Laws for the Province of Quebec, reported by the Advocate General in 1773" embracing the present matter, is in the possession of the public and so much of the said Report as relates to it, will be found in the Appendix to this Report, under the Letter (L.)

The apprehensions of the people of this Province upon the subject of the Tenure of their Lands were tranquilized by the Act of the I4th Geo. III. Cap. 83 commonly called the Quebec Act.

The above mentioned Instructions to General Murray were evidently founded upon the erroneous opinion that the Proclamation of 1763 had the effect of introducing the Law of England into this Province.

The statute of 1774 was dictated by more correct views of the subject.

By that Statute it was enacted:— " That all His Majesty's Canadian " Subjects within the Province of Quebec, the Religious Orders and " Communities only excepted, may also hold and enjoy their Property " and Possessions together with all customs, and Usages relative " thereto, and all other Civil Rights, in as large, ample, and beneficial " a manner, as if the said Proclamation, Commissions, Ordinances, " and other Acts and Instruments, had not been made and as may " consist with their Allegiance to His Majesty and subjection to the " Crown and Parliament of Great Britain.

B 2

3

"And that in all matters of Controversy, relative to Property and Civil Rights, resort shall be had to the Laws of Canada, as the Rule for the decision of the same; and all Causes that shall hereafter be instituted in any of the Courts of Justice, to be appointed within and for the said Province, by His Majesty, his Heirs, and Successors, shall, with respect to such Property and Rights, be determined agreeably to the said Laws and Customs of Canada, until they shall be varied or altered by any Ordinances that shall, from time to time, be passed in the said Province by the Governor, Lieutenant Governor, or Commander in Chief, for the time being, by and with the advice in manner herein after mentioned :—Accordingly in the Instructions next following the passing of that Statute maintaining the ancient Tenures of this Country, viz.

"The instructions to Guy Carleton, Esquire, Captain General and Governor, in and over the Province of Quebec, in America, and of the Territories dependant thereupon, dated St. James's, 3d January 1775, it was provided, as follows:

Art. 38. "By our Commission to you under our Great Seal of "Great Britain, you are authorized and empowered with the advice and "consent of our Council, to settle and agree with the inhabitants of our "said Province of Quebec for such Lands, Tenements and Heridita. "ments, as now are or shall hereafter be in our power to dispose of?". "It is therefore, our Will and Pleasure, that all Lands which now are or hereafter may be subject to our disposal, be granted in Fief or Seigniory in like manner as was practised antecedent to the Conquest of the said Province, omitting however in any grant that shall be passed of such Lands, the reservation of any judicial powers or privileges whatsoever : And it is our further Will and Pleasure, that all grants in Fief or Seigniory so to be passed by you as aforesaid, be made subject to our Royal ratification or disallowance, and a due Registry thereof within a limited time, in like manner as was practised in regard to grants and concessions held in Fief and Seigniory under the French Government.

The war which commenced soon after the passing of the Quebec Act, and which terminated in the Peace of 1783, affords a sufficient reason for an intermission of grants during that period.

Upon the conclusion of the Peace of 1783, the consideration of this subject was resumed by His Majesty's Government, and " in the articles " in the instructions to Lord Dorchester in 1786, as are not contained in " the instructions to Guy Carleton, Esquire, in 1775, also such articles " or parts thereof, in the same instructions in 1786, as are altered from " the instructions to Guy Carleton, Esquire, in 1775."

56 bec, and that His Majesty being desirous to encourage his said Loyal 56 Subjects in such their intentions, and to testify His Majesty's appro-

" bation by allotting Lands for them." Proceeds to direct :--- " that immediately after you shall receive these our " instructions, you do direct our Surveyor General of Lands for our " said Province of Quebec, to admeasure and lay out such a quantity of " Land as you, with the advice of our Council, shall deem necessary and « converient for the settlement of our said Loyal Subjects, and the non-" commissioned Officers and Private Men of our Forces which may " have been reduced in our said Province, who shall be desirous of be-" coming settlers therein; such Lands to be divided into distinct, " Seigniories or Fiefs, to extend from two to four leagues in front, and " from three to five leagues in depth, if situated upon a navigable River " otherwise to be run square, or in such shape, and in such quantities « as shall be convenient and practicable, and in each Seigniory a glebe " to be reserved and laid out in the most convenient spot, to contain not « less than three hundred acres, nor more than five hundred acres, the " property of which Seignieuries or Fiefs, shall be and remain vested in " us, our heirs and successors, and you shall allot such parts of the * same as shall be applied for by any of our said Loyal Subjects, non ." commissioned Officers, and Private Men of our Forces, reduced as "aforesaid, in the following proportions ; that is to say," &c.

On the 25th August: 1790, a reference was made by His Excellency the Right Honourable. Guy Lord Dorchester to the Honourable the Legislative Council of the Province, upon the expediency of changing the tenures of the country into the tenure by free and common soccage. The reference, as well as the proceedings had thereupon, will be found in the Appendix to this Report under the letter (M.)

In the same spirit as these Instructions, it is provided by the Constitutional Act, " that all Lands which shall be hereafter granted within the " said Province of Upper-Canada, shall be granted in free and common " soccage, in like manner as Lands are now holden in free and common " soccage in that part of England called Great Britain, and that in eve-" ry case where Lands shall be hereafter granted within the said Province of Lower-Canada, and where the Grantee thereof shall desire the " same to be granted in free and common soccage, the same shall be so " granted, but subject nevertheless to such alterations, with respect to " the nature and consequences of such tenure of free and common soc-" cage, as may be established by any Law or Laws which may be made " by His Majesty, his heirs or successors, by and with-the-advice and " consent of the Legislative Council and Assembly of the Province."

After the passing of this Statute, Proclamations were issued by the Governor for the time being, inviting Settlers to establish themselves in the Townships of this Province, which Proclamations will be found in the Appendix to a Report laid before the House, upon the subject of the present reference, on the 23d of February 1821. As to the proceedings had in pursuance of these Proclamations, your Committee beg leave to refer to a Report of the permanent Committee of the whole Council to His Excellency Sir Robert Shore Milnes, Baronet, Lieutenant Governor of the Province of Lower-Canada, &c. &c. bearing date "Council Chambers, Quebec, 26th May 1801," which will be found in the Appendix to a Report submitted to the House, on the subject of the present reference, upon the 17th March 1823, and whereof the following is an extract.

" Early in the year 1792, when the Land Granting business was en-"tered upon, in consequence of the Royal Instructions framed in con-"formity to the provisions of the Canada Act, the Committees of the whole Executive Council were presided by William Smith, Esquire, "His Majesty's Chief Justice of the Province, a Gentleman who had been long conversant in the practice of the Land Granting Department in the former Colonies of New-York and New-Hampshire; and a the outset of the business, the Chairman, after observing, that, 'an a bundant population of these Colonies was the main object of the Royal Instructions ' proposed a detailed plan of proceeding; and the Committee chose in the mode of proceeding suggested by the Chair." "In consequence of the mode thus adopted, and before many of "the most essential points connected with the business; such as the

" expenses of the Survey, the position of the Reserves, or the Appoint-" ment of Commissioners had been ascertained and adjusted, Warrants of Survey were in the course of a few months issued to divers persons, " for upwards of 150 Townships of ten miles square."

"The uncertainty respecting the particulars above mentioned and others causes, suspended the further progress till towards the close of "June 1794, when the business was resumed by order of His Excellency "Lord Dorchester, at this period the former Chairman, William Smith, "Esquire, had paid the debt of nature, and the duty of presiding in "Committees of the whole Council, devolved on his Successor in the Chief Justiceship, and soon after five additional Members were called to the Executive Council."

"The very important business of the Land Granting Department being a novelty, as well to the succeeding Chairman as to the new Members, it became their duty to acquaint themselves both with the Rules assigned for their conduct by His Majesty's Royal Instructions, and with the anterior proceedings of the Board from its first Institution, as they appeared upon the records of the Council."

"Upon perusing the very elaborate Report drawn up by the late "Chairman, introductory to the plan of proceedings by him suggested, and after observing the numerous orders that had been issued in consequence thereof, it appeared evident to the Committee, that both the theory laid down, and the practice adopted were in manifest violation of His Majesty's Instructions.— For whereas, the 35th Article of the said Instructions is of the tenor following :" ^c And in order to prevent any persons disaffected to us and our Go-^e vernment, from becoming Settlers in our said Province of Lower-Ca-^e nada, it is our will and pleasure, that no Warrants for Surveying ^e Lands be granted by you, or the Lieutenant Governor, or person ad-^e ministering the Government for the time being, unless the person or ^e persons applying for the same, do at the time of making such ap-^e plication, besides taking the usual Oaths directed by Law, also make ^e and subscribe the following declaration in your or his presence, or in ^e the presence of such person or persons as shall by you or him be ap-^e pointed for that purpose, viz: I, A. B., do promise and declare that ^e I will maintain and defend to the utmost of my power, the authority ^e of the King in his Parliament, as the supreme Legislature of this ^e Province.²

"Nevertheless in direct opposition to the Royal will and Pleasure, Warrants of survey for upwards of 150 Townships, have been issued at a time when no Commissions for the purpose in the said Instructions had been even appointed."

"To rectify this manifest mistake, to preserve the faith of Government as implied by the grant of the Warrant of survey, and to prevent the like evil in future, the most effectual remedy that occurred to the Committee, was to recommend the issuing of certain orders in Council as set forth in the Appendix (D), and since that time no Warrant of survey has been issued, but in conformity to the Royal Instructions,"

"The existence of the error as well as the detection of it, together "with the efforts of His Majesty's Council to obviate any prejudice that "might arise therefrom, were well known to the Memorialist, altho' it "might not suit his purpose to state them, and also to the parties inte-"rested, so that the repeated endeavours of the Council to restrain unau-"thorised settlement, by their repeated order issued during the course of several years, and the public notoriety of the fact, may well justify "the assertion of the Committee on which an inconsistency is attempted to be established." The evidence taken before your Committee as well as that before the Committee to whom in the Three last years successively this subject has been referred, sufficiently shews that His Majesty's Instructions have not been complied with.

But so long as the people of this Country could look to the ungranted Land in the old Seigniories for habitations, the abuses in the granting of Township Lands did not come immediately home to them, and whatever might be the misconduct or oppressive Exactions of certain of the Individuals holding these Seigniories, the abuses in relation to them were by no means universal, and their removal might be looked forward to by Legislative interposition within the Colony.

It was in this state of things that the Act commonly called the Canada Trade Act (3d. Geo. IV. Cap. 119) was passed by the Parliament of the United Kingdom of Great Britain and Ireland.

Þ

That Act purports to be, " An Act to regulate the Trade of the Pro-" vinces of Lower and Upper-Canada, and for other purposes relating " to the said Provinces," and amongst other things provides :---

"That whereas doubts have been entertained whether the Tenure of Lands within the said Provinces of Upper and Lower-Canada, holden in Fief and Seigniory, can legally be changed ;

"And whereas it may materially tend to the improvement of such Lands. " and to the general advantage of the said Provinces, that such tenures " may henceforth be changed in manner herein after mentioned ; Be it " therefore further enacted and declared, that if any person or persons " holding any Lands in the said Provinces of Lower and Upper Canada. " or either of them, in Fief and Seigniory, and having legal power and au-" thority to alienate the same, shall at any time from and after the com-" mencement of this Act, surrender the same into the hands of Majesty, " His Heirs or Successors, and shall by Petition to His Majesty, or to " the Governor, Lieutenant Governor or Person Administering the "Government of the Province, in which the Lands so holden shall be " situated, set forth that he, she, or they, is or are desirous of holding " the same in free and common soccage, such Governor, Lieutenant " Governor, or Person Administering the Government of such Pro-" vince as aforesaid, in pursuance of His Majesty's instructions trans-" mitted through His Principal Secretary of State for Colonial affairs, " and by and with the advice and consent of the Executive Council of " such Province, shall cause a fresh Grant to be made to such Person " or Persons of such Lands, to be holden in free and Common Soccage " in like manner as lands are now holden in free and Common Soccage, " in that part of Great Britain called England, subject nevertheless to " the payment to His Majesty, by such Grantee or Grantees, of such sum " or sums of money as and for a commutation for the fines and other " dues which would have been payable to His Majesty under the Ori-" ginal Tenures, and to such Conditions as to His Majesty, or to the " said Governor, Lieutenant Governor, or Person Administering the "Government as aforesaid, shall seem just and reasonable. Provided " always that on any such fresh grant being made as aforesaid no allot-" ment or appropriation of Lands for the support and maintenance of " a Protestant Clergy shall be necessary; but every such fresh Grant " shall be valid and effectual without any specification of Lands for " the purpose aforesaid; any Law or Statate to the contrary thereof " in any wise notwithstanding.

And "that it shall and may be lawful for His Majesty, his Heirs and "Succesors to commute with any person holding Lands at *Cens et Rentes* "in any *Censive* or *Fief* of His Majesty, within either of the said Pro-"vinces, and such person may obtain a release from His Majesty of all "feudal rights arising by reason of such tenure, and receive a grant "from his His Majesty, his Heirs or Successors, in free and common "soccage, upon payment to His Majesty of such sums of Money as "His Majesty, his Heirs or Successors may deem it to be just and reasonable, by reason of the release and grant aforesaid, and all such sums of Money as shall be paid upon any commutations made by virtue of this Act, shall be applied towards the administration of Justice and the support of the Civil Government of the said Province."

It does not fall within the province of your Committee to express any opinion upon the right of the Parliament of the United Kingdom of Great Britain and Ireland, to make Legislative enactments, generally, of the nature of those contained in the Act in question. They will not presume to anticipate the opinion of the House on this subject. Their attention has been confined to the above recited clauses and to their probable effects.

Your Committee can entertain no doubt that these clauses contravening, as they do, the articles of Capitulation and the definitive Treaty of Peace—Abrogating the Statute of the fourteenth of the late King, so far as it relates to Lands—and in contradiction to the just and liberal spirit which the whole of the public acts of His Majesty's Government in England, from the Cession of the Country down to the passing of the last mentioned Act, evince, could have received the support of His Majesty's Government, only in consequence of the misrepresentations of interested individuals, who have led His Majesty's Government to believe, that the change to be operated by that Act would be beneficial to His Majesty's Canadian Subjects in this Province, whereas on the contrary it would operate a great agrarian revolution in the Colony, vest absolutely and unconditionally large tracts of Lands in the hands of a few, and reduce the mass of the people within no very long period of time to mendicity.

These clauses tend also to annihilate the Casual and Territoral Revenue, which, as established prior to the Conquest, His Majesty has been most graciously pleased to order to be applied towards defraying the Civil Expenses of the Province, as appears by a Message of His Excellency the Right Honourable Guy Lord Dorchester, dated 19th April 1794.

In that mefsage it was faid by His Excellency " that this (the " Cafual and Territorial Revenue) arifes from various rights ap-" pertaining to the Crown, fome of which are not productive. " The Governor doubts not but the Houfe will bring forward " meafures to relieve the subject by other duties not objectiona-" ble, if raising the Lods et Ventes, Droit de Quint, &c. up to " the legal ftandard; fhould prove oppressive to the people."

Subsequently an Act was paffed, intituled "an Act for grant-"ing to His Majesty additional and new duties on certain "Goods, Wares and Merchandizes, and for appropriating the "fame towards further defraying the charges of the administra-"tion of Justice and the support of the Civil Government within

С

" this Province, and for other purposes therein mentioned;" by which Act permanent additional duties were established, and out of them a sum of Five thousand Pounds Sterling granted for the support of His Majesty's Government.

The last and most important fubject of Enquiry with your Committee, was into the measures proper to be purfued for the purpose of removing the evils and abuses which it had been their painful duty to investigate and disclose.

It appears to your Committee that these are fo inveterate and touch so many powerful interests within the Colony, that no hope of redress from the Provincial authorities can reasonably be indulged, and that it is from the mother Country alone that we can look for the extirpation of these evils and abuses.

Your Committee finds in all the Acts which can be traced to His Majefty's Government in Great Britain, a manifest desire to advance the well being of the people of this Province, and fully to maintain them in their just rights.

The remoteness of this Colony, and the little intercourse of its people with the Mother Country, has rendered it eafy for designing individuals to deceive His Majefty's Government, and the public events which have occurred since the cession of the Country, wherein Great Britain was immediately interested, necessarily divided the attention of her Minifters and relaxed the controul exercised over the Provincial authorities.

It will be barely necefsary to recall to the recollection of the Houfe, that after the cession of the Country to Great Britain the political agitations of the old British Colonies were no longer kept within Bounds by the fear of a powerful external Enemy, and the attention of His Majefty's Government, down to the declaration of American independence, was fully employed upon the many fubjects of violent controverfy between the two parties which then divided those Colonies. That the American revolutionary war followed, and then son after its close the French revolutionary war, wherein Great Britain contended for existence itself, foon followed, and that upon its termination many and most serious matters of public Policy, arising out of the new state of Peace, naturally abforbed the attention of His Majefty's Government.

Now that affairs are returning to their old order, your Committee is convinced that as His Majefty's Government is now able, fo it would be found willing, to liften to the humble Reprefentations of His Majefty's faithful Canadian Subjects. Your Committee therefore recommend, that an humble Addrefs be made to His Majesty, praying that he will be graciously pleafed to caufe to be remedied the various abufes which exist in this Province relative to the waste Lands of the Crown.

All which is nevertheless humbly fubmitted.

Quebec, 3d February 1824.

ANDREW STUART, Chairman.

APPENDIX (A.)

COMMITTEE ROOM,

THURSDAY, 4th DECEMBER 1823.

Vole and the line

Mr. Stuart, called to the Chair.

Jos. Frans. Perrault, Efquire, one of the Prothonotaries of the Court of King's Bench for the District of Quebec, appeared before your Committee and made Answer as follows to the Questions following :

Q. How long have you been Prothonotary ?

A. Since the Month of May 1795.

Q. Have you in your poffession as Prothonotary as aforesaid, Tables of the Baptisms, Marriages and Burials in the feveral Parisces in this District, and from what date ?

A. I have those Tables complete from the year 1794 to the year 1820 inclusive.

Q. By virtue of what Order were those Tables made, and why have they been discontinued fince 1821?

A. I found when I entered into Office that the ufage was to prefent to the Government every year, a Table of Baptisms, Marriages, and Burials, in the Diffrict of Quebec, for which we received annually Ten Pounds Currency, and as in 1821, it was intimated to us by letter from one of the Boards of the Executive Council, that in future we should not be paid for those Tables, we discontinued making them.

Q. Will you leave in the hands of the Committee the feveral Tables you have just mentioned that Copies of them may be made?

A. Certainly.

C 2

Ordered, That a Letter be written to the Prothonotaries of the feveral Districts requesting them to transmit to the Clerk of this House for the information of this House, with the least possible delay, such a Table of all the Baptisms, Marriages, and Burials, as they are in the habit of transmitting to the Governor, Lieutenant Governor, or Person Administering the Government of this Province, commencing with the earliest Registers which they have kept for that purpose, up to this time.

SATURDAY, 6th DECEMBER 1823.

Mr. Stuart in the Chair.

Joseph Trepanier, of the Parish of St. Stanislas, on the River Batifcan, in the Diftrict of Three-Rivers, Yeoman, appeared before your. Committee and deposed as follows :

This Parish is three leagues and a half from the River St. Lawrence on the north. The Settlements on the River Batiscan go two leagues higher up than the fpot we occupy. There are fettlements on the River "des Envies" which falls into the River Batifcan, and are about four leagues and a half from the River.— The fmall River "des Chutes" flows parallel to the River des Envies, and alfo falls into the River Batiscan a league below the River des Envies.

The fettlements both on the River des Envies and on that des Chutes front on those respective Rivers: there are about thirty young men, fons of the inhabitants, who took Lands last autumn on the River des Envies-I am not aware of their having taken Location Tickets, nor do I think they have done fo-The whole of thefe Lands are in the Seigniory of Batiscan, a part of the Property of the late Order of Jesuits. It may be 25 or 26 years fince these fettlements were commenced, most of them have Location Tickets, there are about ten of them who have none, and those laft mentioned have been fettled ten years or thereabout. Some of them have only been fettled five or fix years. I have myfelf had from Mr. Badeaux for the laft two years an authority to take poffefiion. There are few better Lands than the Wafte Lands in the Seigniory of Batifcan, they are perfectly level. 'I here may remain to concede in that Seigniory from 300 to 500 Lands and perhaps more, and the foil is very good.

Q. Why are not those Lands conceded ?

A. Every year for the last ten years Mr. Badeaux has been applied to for fome—He told us that he could not grant us any.— There is moreover a large number of young men who would have taken fome, and who have been difgusted by the high rate of the Rent required, and they have thereby been discouraged from taking them—The Rent demanded is four dollars for three arpents in front by thirty in depth.

Q. Would those Lands have been taken by the Sons of our Husbandmen if there had been a willingness to grant them at the usual rates?

A. There would have been about three hundred Lands and perhaps more taken.

Q. How do the young men in your parts proceed for obtaining fettlements ?

A. They wait.—Mr. Badeaux having conftantly led us to hope that grants would be made—the delay continued but the promised event has not occurred.—Befides many young persons remain at home with their father and mother, and do not venture to marry becaufe they have no Lands.—It is hard upon the young people to be turned adrift while there is so much good Land for conceffion in the immediate neighbourhood—I was to have come with feveral others to Quebec this Winter to prefent a Petition on that fubject—I have a Land myfelf, but I wish to have one for my children—I have four Boys, two of whom are full grown, and four daughters.

Q. Is there a Banal Mill in the Seigniory of Batiscan?

A. There was one in the time of the late Reverend Fathers at the River des Envies, but for the laft fifteen years we have not been able to make use of it, Mr. Badeaux has promifed us that the Mill should be repaired, but nothing has been done. I have been myself obliged to go to Ste. Anne La Chevrotière, and even to Jacques Cartier, to have my Corn ground. It was neceffary to go very far to have our Corn ground, but not one Sol of our Rent was abated in confequence of that. A Mill has been constructed by the Seigniors fince last Autumn, and I am told it is to begin to work this week. The Inhabitants have in the last five or fix years been obliged to build two small Grift Mills.

François Ayotte, of the fame Parish, Yeoman, then appeared before your Committee and depofes;

That he is a native of that Parish, and has always refided there. He is now fifty one years of age. The declaration of Joseph Trépanier having been read to him, he was asked whether it contained the truth, and whether he faw any thing therein to change or add, he made answer that he approved the fame, and had nothing to add thereto, except that in confequence of the difficulty of obtaining Grants of Land, Fathers of families are often under the neceffity of dividing their Lands, whereby they were reduced to poverty, as the whole extent of their Lands provided a bare fufficiency for their fubliftence.

Q. How many Lands have been so fubdivided ?

A. Three that I know of, but if there are no Conceffions to take it is not to be forefeen how many remain to be fubdivided.

Pierre Trepanier, Nephew of Joseph Trepanier, of the fame Parish, Yeoman, appeared before your Committee, and faid :

I am twenty nine years of age. I am a native of Batiscan as are also my Father and Grand Father. I have been a year married. I have a donation of my Father's Lands. There are many young people among us who have for many years wished for Grants of Land. The Seigniory of Batiscan contains a confiderable quantity of good Land not hitherto granted.

Q. Why do not the young People of Batiscan obtain Grants of Land?

A. Becaufe Grants are refused; they have been repeatedly promifed, but without effect.

Q. How do the young People in your parts proceed for obtaining Settlements?

A. The young People are always in expectation of obtaining fome of those Lands, it is painful to them to leave the place, the Lands are very good, and they are among their Relatives.

Q. Do the Lands begin to be Subdivided ?

A. Yes, as they cannot obtain any Grant of lands they are obliged to come to an agreement with their Father, that is to fay, to obtain a part of their Father's Land for Rent or otherwife.

Q. What is the effect of the Subdivision of these Lands?

A. Much mifery is thereby occafioned, because double Expenses, twice the quantity of Buildings, Enclofures and Ditching are required.—The Parish is thereby impoverished.—The People are very often unable to meet their engagements, live with less comfort and are often ruined.—The Father very often found it difficult to open, and fupport himfelf and his Children upon the whole of his Land—upon its being divided, wood becomes more fcarce, the Soil is ufually worn out, and charged with the fupport of two Families instead of one.

Q. In what ftate are the old Lands of the Seigniory of Batiscan with respect to Timber for Building and Fuel? A. There are Lands on which there is no Timber for building, and but little for Fuel. I have been myfelf obliged to go three quarters of a league off for my Fire-wood. My Land is three leagues and a half from the River Saint-Lawrence.

O. How far from you are the ungranted Lands ?

A. Thirty arpents.

The deposition of Joseph Trépanier having been read to him, he was asked whether it contained the Truth, and whether there were any thing to change or add, he made answer that he approved it, and faid he had nothing to add.

Jacques Lambert, of the Parish of Batiscan, Yeoman, appeared before your Committee and made answer as follows :

Q. Why do not the young People take Lands in the Seigniory of Batiscan?

A. Becaufe they do not find any one who will give them Grants. They go upon those Lands without any Titles, make no Buildings, and a small clearing where they raise Corn and Potatoes on a small scale, while they await the pleasure of the Agent to give them a Title.

Q. How do the young People of this Parish proceed in order to fettle ?

A. They remain with their Father and Mother until they obtain a decision that they may have Lands. But remaining all together in that way occasions want, for it is impossible to collect enough for all, the Land being too confined for the number of perfons on it.

Q. Do the old Lands begin to be fubdivided ?

A. They are divided into two portions in order to fettle two Children, which encreafes the labour required and encreafes want alfo, becaufe upon a Land on which one Child has been brought up, it becomes neceffary to bring up two. The Labour would be doubled, the number of mouths being doubled, inftead of ten perfons there would be twenty to fupport on the fame Land.

Q. In what ftate are the old Lands of the Seigniory of Batiscan, with refpect to building Timber and Firewood ?

A. They are obliged to go very far for Wood, there is no building Timber, and but little Firewood.

Romain Mongrain, of the Parish of Batiscan, Yeoman, then appeared before your Committee, and being interrogated, states that his Father, Grand Father, and himself are all natives of this Parish. Q. Why do not the young People of your Parish take Lands in the Seigniory of Batiscan?

A. None of them venture to do fo, becaufe they apprehend that too high a Rent will be imposed on the Lands, and they wait for a reduction of the Rents in order to obtain some.

Q. How do the young People of this Parish proceed in order to obtain Settlements?

A. They are retarded: they wait until the Lands shall be Conceded: some of them have even grown old while waiting for Lands, but they continue to wait, and according to what people say, if the unconceded Lands were granted many perions would take fome of them.

Q. Do the old Lands begin to be fubdivided ?

A. Some of them do.

Q. Why do they make those fubdivisions?

A. Because they do not find an opportunity of settling their children elsewhere.

O. What is the effect of those fubdivisions?

A. Some of them are much injured thereby, becaufe when the Land is old, and no more new Land remains for cultivation, the foil is not fufficiently productive to fupport two families, and they are both reduced to want, which is an ordinary event, for this reafon if new Conceffions were made the young People would be very happy to obtain fome, whereby an increafe in the Parifh of St. Staniflas very much to its benefit would be occafioned. It is intended to erect a Church there to the expense of which those Lands would Contribute: fometimes the division of the Lands does no harm, which happens when the Lands are of considerable extent, not less than four *Arpents* in front by thirty or forty in depth, of good quality, and when there remains a certain quantity of new Land to be brought into cultivation.

Joseph Badeaux, Efquire, one of the Members of this Houle, appeared before your Committee.

Q. Were you for fome time, and how long, Agent for the Property of the late Order of Jefuits ?

A. I was Agent for that Property in the Diffrict of Three Rivers from the month of July or August 1820, to the month of January 1823.

Q. In what does that Property confift, and what is its Extent ?

A. The Seigniory of Batiscan is two leagues and three quarters or thereabout, by twenty leagues in depth. The Seigniory Cap de la Magdelaine is about three leagues in front by twenty in depth. They hold befides thefe a Fief fituate in the Banlieue of Three Rivers of about twenty three arpents in front by twenty five in depth. Another parcel of about twenty five square arpents, called Pachivigny, fituate in the centre of the Town of Three Rivers, originally granted to an Indian Chief and conveyed to the Jefuits for a moderate Rent. There is another Parcel of about two hundred arpents fituated in the Town of Three Rivers, of which about thirty five arpents are divided into Building Lots and the reft in wafte.

Q. What is the depth of the Settlements in those Seigniories at prefent ?

A. The Seigniory of Batiscan is Conceded in a right Line as far two Leagues and a half, or two Leagues and three quarters from the River St. Lawrence, which makes about three Leagues, following the Curvature of the high road. In the Seigniory of Cap de la Magdelaine there are only two Ranges of Lots, reckoning from the River, fettled, in the fecond of which there are at the utmost T en Grantees. There are other Lands Conceded fronting on the River St. Maurice, but there is only one Range of Conceded Lots there. Some other Wood Lands have been granted along the Rivulet "La Chapelle" which falls into the River St. Maurice about Thirty Arpents from its Mouth.

Q. Does the line of the South West fide of the Seigniory of the Cap de la Magdelaine Cross the River St. Maurice?

A. It should Cross the River St. Maurice two or three Leagues from the River, but it has never been drawn.

Q. Is there to your knowledge any quantity of Lands fufcepti. L ble of Cultivation and not granted in the faid Seigniory, and what is that quantity ?

A. I can only speak from hearsay. I think there is hardly one Sixteenth part of the Seigniory granted, and that in the remaining part which is not granted, there remain many Lands fit for Cultivation. I have reason to believe that a great part of the Lands between the Mountains and the River St. Lawrence, which are five or fix Leagues from the River, are fit for Cultivation. I have also heard that beyond the Mountains, there are confiderable Vallies of good Land.

Q. Is there to your knowledge any quantity of Land fit for Cultivation, and not granted in the Seigniory of Batiscan, and what is that quantity?

A. I think from what information I have received, that there

is good Land at the extremity of the Lands already granted, which continues through an extent of five or fix Leagues.

Q. What is the number, to the best of your knowledge, of the Conceffions made in each of those two Seigniories during your Agency?

A. After many applications on the part of various perfons to obtain Grants in these two Seigniories, and of which 1 had solicited the Commissioners for Grants, I did not learn until about 1809, that I was empowered to concede at the rate of twentyfour *francs* annual Rent, for a Land of Three Arpents by thirty in depth, that rate having been found excefsive, I conceded but very few Lands, which authority to concede was withdrawn about 1817 or 1818.

MONDAY, 8th DECEMBER 1823.

Mr. Stuart in the Chair.

Joseph Badeaux, Equire, appeared again before your Committee and answered the following Questions.

Q. What was the usual Rate of Concession in the said Seigniories prior to the faid Order ?

A. According to the Rent Roll, the Conceded Lands previous to the Conquest paid about a half *Boisseau*, (which is one fixth of a Minot) of Wheat, and one Capon or fifteen Sols *Tournois*, for a Land of Two Arpents by Forty, others paid a half Sol, and others one Sol Tournois for every Square Arpent. They were in part Conceded at one Sol per Square Arpent, and one Capon for every twenty, and occaffionally every thirty Square Arpents.

Q. Who was the Prefident, and who were the Members and Officers of the Commiffion for the Administration of the Effates of the Jefuits, when the order was paffed for exacting a Rent of four dollars for every Land ?

A. I believe the Commission confisted of Mr. Dunn, Mr. Baby, Mr. Williams, and Mr. Berthelot, and Mr. Pyke-was Secretary.

Q. Who were the Prefident and Officers when the order to concede was withdrawn, and you were ordered to concede no more ?

A. Mr. Ryland was Prefident, Mr. Wm. Smith, Mr. Coltman, and Mr. John Stewart were Commiffioners, I think Mr. Foy was Secretary.

Q. Is it the same Mr. Ryland who is Clerk of the Executive Council, and at the same time Treasurer of the faid Commission?

A. Yes.

Q. Did Mr. Ryland as Prefident, Commissioner or Treasurer of the said Commission, receive any Fees on the granting of the Lands administered by the said Commission?

A. None to my knowledge.

Q. Upon the granting of the said Lands was there paid any Patent Fee or other Fee for obtaining the fame to Mr. Ryland or any Officer of Government ?

A. No.

Q. Do you know whether on the iffuing of the faid order, Mr. Ryland as Secretary to the Executive Council exacted and received 155.6d. on the name of each Petitioner for Wafte Lands of the Crown, other than the Wafte Lands within the faid Seigniories?

A. I know nothing of that.

Q. Are there many perfons in the Diffrict of Three-Rivers who are defirous of obtaining grants of Land, if they were granted at the ufual rate ?

A. There is a large number, in the Seigniory of Batiscan more especially.

Q. Are there any new fettlements forming in the Seigniories of the Diftrict of Three-Rivers, on the north side of the River St. Lawrence ?

A. Very few—And the rather as the Seigniories belonging to individuals are almost all conceded, the Seigniory of Lanaudière excepted, which belongs to Mr. Pothier, and in which the rate of Rents is fo exorbitant that very few perfons venture to take any Land there, whereby many of the young people of the Parifhes of Maskinongé, Machiche and the River du Loup, have been compelled to go over to the fouth fide, and many have fettled in the neighbourhood of the Seigniory of the River David, in the Townfhip of Upton—and there are one hundred families at leaft who have settled without any title.

Q. On the fouth fide of the River St. Lawrence, are there any old Seigniories which contain a quantity of Wafte Lands ?

A. I am only acquainted with the Seigniories of St Pierre les Bécquets and Gentilly, in which there may be two ranges which are not conceded.—In the Seigniory of Nicolet fome Lands remain, for which the Seignior exacts high Rents.—In the Fief Courval, of which I am Seignior, there remain about three hundred Lands of which the rate is ten shillings for every three arpents in front by twenty, and so in proportion.—When I purchafed that Seigniory the rate was two sols and one quart of wheat for every square arpent, which amounted to from fifteen to eighteen Francs.

Q Have not the Seigniors of the Country in general, confiderably raifed the Rate of Rents fince the Conquest, and of late years more especially?

A. Yes, in various ways, the higheft Rents I know of in our Diffrict were those exacted by the Seignior of the River David, they are of one Dollar and three or four Minots of Wheat for every Land of three arpents by thirty.

Q. Does the rife of Seigniorial Rents tend to retard the Settlement of the Seigniories of this Country?

A. Yes, for the Seigniories in which the Rents have not been raifed are almost all Settled.

Q. Have you a knowledge that the Seigniors fometimes fell Wood Lands in breach of the Arrêts ?

A. I have heard that fome Seigniors receive a finall fum for the preference.

Q. Is the fum fo exacted mentioned in the Deed of Grant, or are fuch Agreements carried into effect by means of intermediate persons, and in what manner?

A. I am not aware of the means, but I know that it is not fet forth in the Deeds.

Q. Is there any Emigration from the Diftrict of Three-Rivers, and from any others part of the Province, and towards what places?

A. I have no knowlage that the young People emigrate from the Diffrict of Three-Rivers.

Q. What was the Income of the Seigniories of Cap de la Magdelaine and Batiscan during your agency?

A. I believe the ground Rents and annual Rents of those two Seigniories hardly exceed one hundred Pounds. The cafual Income amounts to one hundred and fifty Pounds a year on an average.

Q. What is the number of Landholders in both those Seigniories to the best of your knowledge?

A. About five hundred I believe.

Robert Jones, Efquire, a member of this House, then appeared before your Committee.

Q. Were you during any, and what period of time, agent for any and what Seigniories in the Diffrict of Montreal?

A. I was Agent for His Majefty's Seigniory of Sorel from 1800

to 1810. I was also Agent for Mrs. Barrow's Seigniories on the River Yamaska from 1800 to 1806.

Q. What is the extent of the Seigniory of Sorel, and of Mrs. Barrow's Seigniories refpectively?

A. The Seigniory of Sorel is of an irregular figure, but equal to about three leagues in front on the St. Lawrence by three in depth.

The Seigniory of Mrs. Barrow consists in a number of Seigniories united, viz: Bourg-marie, Bourg-marie Est, Bourg-marie Ouest, St. Charles de Yamaska, Bonfecours and Bourchemin.

Q. At what rates were Lands granted in these refpective Seigniories, whilst you were agent fo as aforefaid, and what was the progrefs of the Settlements therein, and what in your effimation are the caufes which have ferved to advance or retard the Settlement thereof during the periods of your agency or since?

A. The rate of granting Land in His Majefty's Seigniory was los. for three acres in front by twenty in depth. During the time of my agency no concessions were allowed to be made in Mrs. Barrow's Seigniories;—In His Majefty's Seigniory concessions were made to any individual who applied for them, and during my agency about one hundred and fifty concessions have been made. Mrs. Barrow having refused to concede, has materially retarded the settlement of her Seigniories;—frequent applications have been made to me for concessions, and from the goodnels of the foil I have no doubt but the whole might have been conceded

Q. At what time was the rate of ten shillings for three arpents by twenty, established ?

A. This rate was established before I took the agency, and I do not know when.

Q. What was the old rate of granting Lands in His Majefty's Seigniory ?

A. The old Concessions were three acres by forty, at a rent of six livres one sol tournois.

Q. Do there remain any Lands ungranted in the Seigniory of Sorel, and what is their quality ?

A. There remain about sixty lots, of three arpents by twenty, unconceded; the whole is good Land.—All the ungranted Land in the Seigniory of Sorel, as well as in those of Mrs. Barrow, is the best Land in those Seigniories respectively as to quality.

Q. What has prevented the granting of the before mentioned Sixty Lots ?

A. The reason, I believe, is, that there is no regular map or

plan of the Seigniory in the poffession of Government, and I have also reason to believe that the existence of so large a tract of ungranted Land is unknown to Government.

Q. From what perfon or perfons could the Committee derive any information refpecting the caufes which have prevented the Settlement of Mrs. Barrow's Seigniories ?

A. The information required might, I think, be had from Mr. P. T. Chevrefils, a Notary Public, and from Mr. P. B. Pellissier, a Captain of Militia, her fub-agent.

Q. Who is now the principal Agent, and how long has he been fuch ?

A. Samuel Gale, Efquire, of Montreal, Advocate, who fucceeded his father about three years ago.

Q. Have you any, and what reason, to believe that certain Seigniors in the District of Montreal sell their unconceded Lands in their Seigniories at arbitrary prices, and for that reason refuse to concede at the ordinary rates as required by Law?

A. I know it from general Report; I have no perfonal knowledge of it.—I underftand the practise is to grant to one Individual in his own name, either for pecuniary considerations given by him to the Seignior, or he in fact acting as agent for the Seignior, fome eight, ten or more lots, which he fells feparately to as many Individuals, and fome of thefe Lots have been fold as high as six dollars an acre.

Q. Does this practise prejudice any and what class of His Majefty's Subjects, and in what manner ?

A. It affects the poorer portion of the agricultural clafs, who not having money to purchafe, are prevented from fettling themfelves and their ions upon the ungranted Lands of these Seigniories, as they might and would have done if thefe Lands had been granted at the ordinary rates.

Ordered, That a Letter be written to Mr. Pierre Jofeph Chevrefils, Notary Public, and to Mr. Bazile Pellissier, Captn. of Militia, of the Parish of Yamaska, to appear before this Committee with all convenient speed.

TUESDAY, 9th December, 1823.

Mr. Stuart in the Chair.

Michel Berthelot of the City of Quebec, Esquire, Notary Public, appeared before your Committee. Q. Have you been Agent for the Jefuits' Eftates in the District of Ouebec, and how long?

A. I was Agent for the Effates of the late Order of Jeluits during twenty years or thereabout.

Q. In what do those Estates confist?

A. The Effates of which I had the management, confifted of the Fiefs, Notre Dame des Anges, Saint Gabriel, and Sillery, part of the City of Quebec, forming Ground Rents and *Rentes* constituées, as also part of the Fief Lauzon, in the Parishes of Pointe Levi and Saint Nicolas, and the Fief Belair.

Q. What is the extent of those Fiels and Estates respectively? A. I cannot answer that Question, never having been in pos-

seffion either of original Plans or Titles. Q. Are there any ungranted Lands in the Seigniory of Sillery?

A. I believe it is all conceded.

Q. Are there any in the above mentioned Seigniories?

A. I believe there are many unconceded Lands in the Seigniory of SaintGabriel, but I cannot fay if any remain in the Seigniory of Notre Dame des Anges, I believe there still remain fome Lands to concede in the Fief Belair.

Q. What was the old rate of conceding Land in the said Seigniories?

A. Generally the rate was as follows: one Sol for every fquare arpent, one Sol as *Cens* for every arpent in front by whatever depth there might be, and one live Capon, or fifteen Sols, or twenty Sols at the option of the Seignior—fome Deeds mentioned fifteen Sols and others twenty Sols. In the Fief Belair feveral Deeds, inftead of a Capon, ftate a Turkey or thirty Sols.

Q. Were all the Concessions which were made during your time made at that rate ?

A. Yes, with the exception of the Lands granted to Mr. Jos. Planté and Mr. J. B. Panet by *Père Cazot*, the laft Jefuit in Canada.

Q. Were a great number of Grants made while you were Agent?

A. Extensive Lots of Land were granted to a few perfons, that is to fay, Mr. Neilfon, Mr. Blanchet, Mr. Pozer, Mr. A. Stuart, Mr. Foy, and Mr. Harvey.

Q. What was the annual Income of those Seigniories on an Average ?

A. I have received feven hundred Pounds a year on an Average.

Q. What is the Amount of the annual Income of the said Seigniories? A. It is impoffible for me to answer that, because the Books, Title Deeds, and Land Registers, by which I might have ascertained it are in bad order, and not understood. The Labour of a whole year would have been required for putting them into order.

Q. Why did you not put them, or caule them to be put in order?

A. I often urged the Commission to have them put in order, but nothing has ever been done: lately however, the Commission has begun to cause the preparation of a Land Register to be proceeded to, which has been given up because it is evident that it would have been of no use.

Q. Why would it have been of no ufe ?

A. Because it was not made in the form prefcribed by Law.

Q. To what use during your Agency has the College in the Upper Town of Quebec, and erected by the late Order of Jesuits for the education of the Youth of the Country, been applied ?

A. As Barracks for the Troops of the Garrison.

Q. What income might that edifice produce were it let to individuals, and reserving a portion of it fufficient for the purpole of its original deltination ?

A. Referving a part of that building for the purposes of its original defination, the reft divided and subdivided in order to be let to various perfons, might give an income of nearly fifteen hundred pounds a year.

Q. For how many years has that building been used as a Barrack?

A. I know that that Building has been in part occupied by the Troops of the Garrifon as a Barrack, and as a refidence for the furviving Jesuits up to 1800, and from that time to the prefent moment the whole has been occupied by the Troops as a Barrack.

Q. Do you not know that there was a Church on that ground ? when was it demolifhed and by what order ?

A. In the first years of my being in office, I had an Order from the Commiffion to demolish and rafe the Church adjacent to the Jefuits' College; the ground upon which that Church stod, as alfo a portion of the Jesuits' Garden, properly fo called, now forms a portion of the Upper-Town Market Place.

Q. Where was the faid Church fituated ; what were its dimensions ; and in what state was it when demolished ?

A. The Church was contiguous to the fouth east angle of the College—I do not recollect its dimensions—It was on the eve of ruin.

Q. Have there been fold, or exposed to fale, any Lands belonging to the Jesuits during your management or fince ?

A. None to my knowledge while I was in Office, but fince I have ceafed to be agent, I have been well informed that feveral pieces of ground and Building Lots, being part of the Jefuits' Garden, have been fold or otherwife disposed of in favour of feveral perfons, proprietors of ground in St. John Street, to ferve as a continuation and extension of their Lots in rear of their respective Houses.

Q. To what use have the several sums of money arising from such fale been applied ?

A. Having had occasion to infpect fome of those Title Deeds, I am enabled to fay, that the capital of the price of that fale remained as a mortgage upon the faid Lots, and that the several individuals pay interest for it to the King. I prefume that all the other Deeds are on the fame footing, without being able to say what are the terms of payment.

Q. At what time, and in what manner was the garden taken posseffion of ?

A. In the earlier time of my management, fuppoling that I had the fuperintendance of that part of the Garden which was occupied by the last of the Jefuits, and not choofing to be charged with the depredations which might be committed in the Garden, I requefted the Commiffioner to exonerate me in that behalf, and to be informed how to proceed for that purpose. It was then fuggefted to me to deliver up the Key of a Door of accels to that Garden to Major Rofs-Lewin, Town Major, who gave me a receipt fhewing his acceptance of the Key, and my discharge from refponfibility.

TUESDAY, 9th DECEMBER 1823.

Mr. Stuart in the Chair.

J. B. Proulx, Efquire, Member of this Houfe for the County of Buckinghamfhire, was examined before your Committee and made answer as follows:

Q. Have you had any, and what means of acquiring information refpecting the whole and the new Settlements in the County ⁴ of Buckinghamschire ?

A. Yes—being a native of that County, and profeffing agriculture, as also my family and ancestors.

E

Q. Are there any new Settlements in the faid County?

A. Yes, there are many.

Q. What number of Parishes, and what number of Seigniories are in your County ?

A. The number of Parifhes in the old Seigniories is twelve, that is to fay :-St. Michel d'Yamafka, St. François, St. Antoine de la Baie du Fevre, St. Jean de Nicolet, St. Grégoire, Becancour, Gentilly, St. Pierre les Becquets, St. Jean l'Eschaillon, Lothbinière, St. Croix, and St. Antoine.-The Seigniories and Fiefs in the faid County are the following, that is to fay :-Yamaska, St. François, Pierre-Ville, Courval, La Baie du Fevre, Nicolet, St. Grégoire, Becancour, Gentilly, St. Pierre, St. Jean, Lothbinère, St. Croix, and St. Antoine.-I cannot politively ftate the number of the Townfhips.

Q. Where are the new Settlements fituated, when and by whom were they made, and what is their extent ?

A. New Settlements are forming daily in the feveral Parifhes, and in the Townfhips in greater number than in the old Seigniories.—The most recent settlements have been made in the Fief Pierre-Ville and in the Seigniory Courval—They began to be settled about eighteen or twenty years ago—The others have been very long fettled—Conceffions are annually made of a certain number of Lots in the feveral Seigniories but not fufficiently numerous and confiderable to merit the name of a settlement.

Q. Is there any emigration from your County to other parts of the Province, and in what direction ?

A. There is none from my County, becaufe almost all the young people take lands in the County itfelf if they can obtain any.

Q. What is the usual extent of Grants to Freeholders in the old Seigniories of the faid County?

A. The general extent is three arpents by thirty in depth.

Q. Is any Subdivision of those Lands made for the Settlement of feveral Families, and are they frequent ?

A. Yes, a great many are made, but not fo many as will be made by reason of the increase of the Population and scarcity of Lands, which is more and more felt.

Q. What are the caufes of that Subdivision of the Lands?

A. The great increase of the population, the impediments and reftrictions fo difficult to furmount as to prevent obtaining new Grants?

Q. What effect do those fubdivisions produce ?

A. A great effect ; for instance a father who has opened a new Land, and has availed himself of its fertility, could then bring up and maintain, although with fome difficulty, five or fix children: ftill lefs can two of his sons, between whom the father divides that Land, reserving to himself a certain rent or allowance, bring up or fupport a number of children equal to two families. The fecond effect is the heavy expense in building and enclofures between the two fons. Infruments of Agriculture, Cattle, and enclosures must be doubled for bringing the Land into cultivation. A third effect produced by that subdivision, is the conveying of a portion of that Land to a ftranger—That change generally occafions an inability to meet the heavy charges above ftated.

THURSDAY, 11th DECEMBER 1823.

Mr. Stuart in the Chair.

Louis Gendron, of the Parish of St. Anne de la Pérade, in the Diftrict of Three Rivers, Yeoman, appeared before your Committee and ftated as follows:

I am married, and have ten children, of whom five are Boys. I am very defirous of obtaining for my children other Wafte Lands if I could obtain any at moderate rents.

I have made frequent application to Mr. Lanaudière our Seignior, but he never chose to concede at the same rate at which the old Lands along the River in his Seigniory were conceded.

He required a minot and a half of Wheat and feven Francs in money for a Land of three arpents by twenty—neverthelefs the neceffity I was under of obtaining a Land, induced me to take one about five years fince from Mr. Lanaudière, which I have been obliged to fell because of the high Rents which I found it difficult to pay.

About a year and a half since or thereabout, I took a new Land from the prefent Seignior, Mr. Hale, at the fame rate as that of Mr. Lanaudière, with the exception that Mr. Hale has allowed me a term of five years, during which no payment is to be made. I have always heard that our people would readily take new Lands, which they want, if the Kents were more moderate. I do not know what the old Rents were, but I had formerly a Land of five arpents in front by forty in depth which I had inherited of my Ancestors, and which paid only one minot or bufhel of Wheat and forty Sols in Money. The Lands are beginning to be divided.

There are many Families who poffeffed extensive Lands who have divided them. A Land of five Arpents by forty is divided into three portions, as has often happened. Were I to make any refearch I might find about forty Families who have partitioned their Lands, which occasions poverty and fuffering.

MONDAY, 15th December 1823.

Mr. Stuart in the Chair.

Mr. Wm. Marchant, of Cap de la Magdelaine, Miller, appeared before your Committee.

Q. How long have you refided in this Parish ?

A. Fifteen years as Miller of the Mill at Cap de La Magdelaine, belonging to the late Order of Jesuits.

Q. What has been the progress of the new Settlements in the faid Seigniory during the fifteen years of your refidence, and what are the causes which may have forwarded or retarded them?

A. There has not been any increase in the Settlements within that period. I ascribe this to the Lands in the first concession not being very good, and I have heard that the Attorney of the Commission for the Estates of the Jesuits did not choose to concede.

Q. What, to the beft of your knowledge, is the quality of the Ungranted Lands in the faid Seigniory, and what may be the quantity of the Lands to be granted ?

A. I have heard that the Lands in the first Ranges are hardly good. That Seigniory however is twenty leagues in depth and in that depth there may be much good land.

Q. Do the Lands in that Seigniory begin to be Subdivided along the water?

A. Some of them are divided.

Q. What is the Income of the Mill?

A. About four hundred Minots of Wheat a year, on an average. During the first years of my being there it gave more, it now gives less, for in the last twelve years feveral Mills have been established.

Q. Why do not the people Settled on the River des Envies, rather come to your Mill than go to a great diftance as far as the Cap Santé Mill?

A. The Road from the River des Envies to my Mill is bad, and it would take as much time to come to my Mill as to go to Cap Santé.—My Mill is befides often very flort of Water.

TUESDAY, 16th December 1823.

Mr. Stuart in the Chair.

Mr. John Cannon, of the City of Quebec, then appeared before your Committee.

Q. Have you had any, and what means of becoming acquainted with the state and condition of the various classes of persons resident in this Province, or coming thereto, who might be desirous of obtaining Lands new ungranted, and of settling themselves and their families thereupon, and of the obstacles which such persons have had, and have now to encounter to settle thereupon ?

A. I, and my Father's family have resided in Lower-Canada for the last twenty two years.—I had occasion to travel through many of the country parts of the Province, in the course of my business I have employed great numbers of Labourers and Mechanics or superintended them during my Father's life time, in the business of an Architect and Master Builder; these labourers were as well natives of the Province as Emigrants from Europe, the latter principally Emigrants from Ireland, with the situation and wants of both of which classes I became minutely acquainted.

Q. What was the average number of Labourers that you employed ?

A. The number of men employed varies according to circumstances and the work for which I required them,—I have some times employed for a whole summer two hundred men as Labourers, Mechanics, Carters, &cc. The number I employ at present is much less, as I am contracting my business, during the last season I have employed about twenty men on my own account: the previous seasons, for the last three or four years, I employed thirty or forty:—these consisted principally of Irish Emigrants, and I employed a great many of these people merely to give them an opportunity of obtaining a subsistence which was all that I allowed them, telling them to better themselves when they could.

My motive for employing them was principally to give them an opportunity to earn something, rather than depend upon Charity or suffer from absolute want.

Q. Did you find amongst them generally any desire of obtaining Lands to settle thereon ?

A. I did find a great desire.

Q. Had you any, and what means of ascertaining the obstacles which existed to their settling themselves advantageously and usefully upon the vast and interminable tracts of waste and ungranted Lands within the Colony, and if so, what were these obstacles?

A. The principal information, 1 derived from having had frequent occasion to visit the different new Settlements of Lower-Canada, and more particularly those of Val-Cartier and St. Patrick upon the River Jacques Cartier, and after having made myself perfectly acquainted with the mode of industry pursued by the poor Emigrants, I find that there is one great inconvenience which very much retards their pursuits and diminishes that activity in clearing their Farms, which no other circumstance could easily suppress: namely, that of being without a Pastor.

Those Settlers who are principally Roman Catholics consider no sacrifice equal to that of being secluded from their Clergy, to whom they submit with implicit obedience, and hence may be assigned the cause why they attach themselves so much to the Towns in preference to work out an independence for themselves and Families in the Country.

If His Majesty's Government would think proper to adopt the plan of building Churches in the different new settlements, and in the unconceded lands of the Crown it would be the most effectual mode of quickly establishing the Country, and of rendering independent a great number who are at present relying on absolute charity.

A Church and a suitable residence for a Catholic Priest might be erected for a sum not exceeding One thousand Pounds, and by allowing such Clergyman One Hundred Pounds a year for the term of five Years, the settlement would then be in a situation to give the necessary support, the said £1500 to be appropriated to every 60,000 Acres of land which would suffice for 300 Families, or sty 1500 Souls.

It would be adviseable to build each Church in the centre of each Settlement, and with respect to Roads, wherever Churches are placed Settlers will be always found to make them.

The Canadians, at present, from the same cause are prevented from establishing themselves on the unconceded Lands of the Crown and providing for their increasing Families, the idea of settling in a Wilderness remote from hearing the word of God, keeps them together, and accounts for that inactivity in extending their possessions for which they are remarkable where the cause is removed.

If Churches were built in the different new Settlements, Canadians would intermix with Settlers from the Old Country, and would, as being more intelligent with respect to clearing Lands, hold forth an example to the others, besides many wealthy Citizens, if such advantages were offered, would purchase Lands and give employment to the more destitute in the Settlement, then a vigour before unknown would pervade those People, and Agriculture and happiness would flourish in the Colony.

There is every reason to suppose that the money, thus expended in the adoption of such a wise and political measure might, be refunded in the course of a few years if Government should require it.

A most striking proof of this mode of settling may be seen by a glance at the population and wealth of Glengary in Upper-Canada.

It was first established by a Catholic Priest named M Donnell with a few Scotch Highlanders, by building a small Church, round which a number of others of the same class flocked, they have advanced so rapidly in their Agricultural pursuits as to be enabled to erect a Church which will cost (when finished) nearly £30,000—I went in the summer of last year as an Arbitrator to examine it, and had an opportunity of ascertaining how, in the late War, those brave Highlanders with their Reverend Pastor at their head, evinced their fidelity towards Government and manfully guarded their Homes and their Country.

A numerous unsettled People now present themselves, not less brave, and as Patriotic; granting to them Churches and Priests, would be granting to them a Government to fight for,—a Home to guard and a Country to defend, any pecuniary assistance offered them would be but momentary in comparison to the lowest bounty given to a Soldier in time of War, would if now granted to each individual, more than suffice to effect the object proposed.

MONDAY, 22nd December 1823.

Mr. Stuart in the Chair.

Olivier Arcand, Esquire, a Member of this House, appeared before your Committee.

Q. Have you had any, and what means of acquiring information respecting the old and the new Settlements in the County of Hampshire?

A. I have only had an opportunity of acquiring information respecting the old and the new Settlements in a part of the County of Hampshire, for which I have the honor to be one of the Representatives in Parliament, and in an equally small portion of the upper part of Buckinghamshire, in which I reside and where I usually practice Surveying.

Q. Are there any new Settlements in the said County ?

A. In the County of Hampshire I only know (and that imperfectly) one new Settlement which is called Val-Cartier. Although the Gentlemen who opened that Settlement have spared no expense, I am not aware that Agriculture flourishes there. Is this owing to the quality of the Soil or the system of Cultivation.—I know not. In the part of the County of Buckinghamshire which I know, I observe no new Settlements except at Drummondville, but the bad state of the internal Communications at that place, has caused a great part of the Settlement to be abandoned, with the exception of about twenty houses, which are in the Village, and about the same number of wretched hovels, situated along the bad bye-roads, which have been opened there, and which are now opening there. The other new Settlements which I know of there, are in some of the Ranges of Lots in the Seigniories, which are making very slow progress.

There is however another Settlement, which is rather a considerable one, and is called "Le Ruisseau des Chënes," which extends from the Seigniories of Deguire and Bourgmarie on the East, across the Township of Upton, and there are even some in that of Grantham. Q. What is the number of Parishes in your County, and what is the number of Seigniories?

A. I cannot exactly state the number of the Parishes and Seigniories which are in each of the Counties I now mentioned, but it may be easily ascertained from the information given by the Surveyor General.

Q. Where are the new Settlements situated, when, and by whom were they made, and what is their extent ?

A. The two new Settlements first above mentioned, were commenced not more than seven or eight years since. But that of the Ruisseau des Chênes, may have been begun about 1806. There are from sixty to eighty Inhabitants there, many of whom are rich Farmers : unfortunately all the Titles they have (and only a few of them have such Titles) are Deeds of Grants which they obtained from one Joseph Deguire Desrosiers, of whom the Fathers had formerly been Grantees and Proprietors of the Seigniory Deguire, or Riviere David, which, upwards of thirty years since, became the property of one Mr. Eckhart. Joseph Deguire about 1800, assumed the Title of Seignior of the River David, and pretended that all the Land through which the River David ran, which had not been sold by his Ancestors, should belong to him, and he forthwith proceeded to cause the Lands to be surveyed, and caused Proces Verbaux of them to be delivered with Deeds of Grant, to all persons who chose to have them. His Terms were more than reasonable, and I have two Lands there myself, one which pays four Sols Tournois for every ninety square Arpents, and the other twenty four Sols Tournois for the same quantity. The dearest were nine Livres. In that way he penetrated far into the Township of Upton, of which the lines were not known, and had not even been drawn, if my information be correct. Several persons seeing that he appeared to be in quiet possession of that Property, really believed him the true Seignior, and accordingly began to settle there. Nearly about that time, a great part of Upton was granted to ----- Grant Esquire, including that Settlement, but I have never heard that that Gentleman had disturbed or molested any of the Inhabitants, and I sincerely believe that he will act towards those poor persons with generosity. That Settlement has appeared to me very flourishing.

Q. Is there any emigration from your County to other parts of the Province, and whither is it directed ?

A. From the County of Hampshire there are Emigrations, though but few at a time—They prefer subdividing the Lands, in order to settle several families there, in the Parish of Deschambault especially—That frequently happens, because the Seigniories are almost all granted, and the Townships in rear of the Parish are not as yet surveyed, although it is said there are large tracts of excellent Land there.—In the upper parts of Buckinghamshire, we observe no emigration, on the contrary it occasionally proceeds thither from elsewhere, because there are many Lands to concede, especially in the Seigniories of Deguire, Barrow, and Ramsay, of which the two first are a dependency of Richelieu on the River Yamaska.

Q. What is the usual extent of the grants to Tenants in the old Seigniories of the said County ?

A. The usual extent of the concessions in those two Counties is 75, 80 and 90 square argents— 2×25 , 2×40 , and 3×30 .

Q. Is any subdivision of those Lands made to settle several families, and is that frequent, and what are the causes of that subdivision of the Lands ?

A. The subdivision of the Lands for the purpose of settling thereon several families, are as frequent as the emigrations in Hampshire, because as I have already stated, the Seigniories are almost all conceded, the northern Townships are not Surveyed, and are even hardly known, and that emigration to other places are little suited to the inclinations of the Canadians, who are peculiarly attached to the paternal home.

O. What effect do these subdivisions produce ?

A. The effect of those subdivisions, unless those who are settled upon them have a peculiar turn for agriculture, and exert their Industry, is extremely afflicting, because it is a source of poverty to those persons who cannot reap a sufficiency for their subsistence on such small lands.

Q. What is the extent and the quality of the ungranted Lands in the said County, and the said Seigniories ?

A. In Hampshire, the quantity of ungranted Lands in the Seigniories is very small, except in the Seigniory of Grondines, which being ten leagues in depth, must comprise eighteen or twenty ranges of ungranted lots of Land—I believe the Land there is tolerably good where there are no mountains.—In Fossambault, there must also remain some to concede, but I do not know of what quality they are—In Buckinghamshire there only remain considerable tracts in the Seigniories to grant in the Fiefs St. Croix, Lothbinière, D'eschaillons, Courval, and Déguire. The others are in small quantity, but every where tolerably good.

Q. Is there a road over those ungranted Lands, and have those Lands been surveyed ?

A. There are hardly any roads over those ungranted Lands and even for opening an access to them, and a very small portion of them has been surveyed, the Seigniors usually having them surveyed only as they are applied for, and as they determine to concede.

Q. Were there any Concessions of Lands in the said County before the year 1759, and if there have been any, what was the general mode of conceding, with respect both to the extent of the Land granted, and the terms on which it was granted ?

A: In Hampshire there were many Grants made before 1759, and I believe all those along the River St. Lawrence—So far as I know, they were generally from 75 to 90 square arpents, sometimes as much as 120, and the terms, from three *livres tournois*, to six *livres tournois*, and sometimes one capon for every arpent in front.—In Buckingham-

41

T.

shire, the Grants made before 1759, have varied as much in extent, and in the terms —I know some concessions of 75 square arpents made before that time, which pay as much as 8 *lb*. 6 sols tournois, and others of more than 200, and even 300 square arpents, have been granted, in consideration of prayers on the Rosary, and Psalms *de profondis*.

Q. Is there, in the said County, a considerable number of persons, who desire, and have means to form new Settlements in the Seigniories, provided they could obtain Lands near to, or at a short distance from, those of their Relatives or Friends, and are there any such Lands, and what are their quantity and quality ?

A. In Hampshire it is certain that there are many Persons who wish to settle in the neighbourhood of their relatives and friends, but they find that no easy matter, because there is a scarcity of grantable Land, and the Rents are raised in an extraordinary manner.—Add to that, the neighbouring Townships have not hitherto been surveyed, and that there are not even any Roads of access to those parts : besides much difficulty in obtaining those Lands is experienced, by the delays which occur, and the high Fees which are exacted.

In Buckinghamshire, and that part of Richelieu, which is in its vicinity, nearly the same thing has occurred, but from another cause— For twenty years there has been a constant refusal to concede Lands to our Husbandmen, although occasionally as much as two or three thousand arpents have by a single Grant been given to some friend or favored person. That conduct has rendered the means of obtaining Grants of Land so difficult, that some persons have been reduced to the extremity of paying six and seven dollars for every square *arpent*, to those who had thus obtained Grants of large Tracts.

Q. Are there any causes which have retarded, and continue to retard, the Settlement of the Lands in the old Seigniories of this Country, and what do you think those causes are ?

A. Those are precisely the causes which have retarded the Settlement of the ungranted Lands in the old Seigniories just mentioned :—At present, Lands may be obtained there upon recommendation, but not for less than twenty shilling, two Minots of wheat, and two days work (Corvées) by way of annual rent, not including the Cens, for every 90 square Arpents.—In some Seigniories, that Rent is paid for 75 arpents only—In some others, half a gallon of wheat, and six sols, are paid for every square arpent, exclusive of one or two dollars for every sixty arpents, for a right of Common, fortunate, if, previous to the Deed of Grant, and without other form, the payment of certain dues claimed for preference, which are sometimes considerable, be not exacted.

Q. Do any of our Husbandmen go into the Townships granted in Free and Common Soccage to settle, and if not, to what cause do you ascribe it ?

A. I do not see that any person in Hampshire has gone into the Townships of this County to settle, because none of them are granted or even surveyed—In Buckinghamshire, from Nicolet upwards, most of the Townships have been surveyed, but all those which are contiguous to the Seigniories, have been almost entirely granted to about ten persons, some of whom have individually more than fifty thousand acres, yet without making any settlement thereon; so that it would be necessary, that persons wishing to settle beyond that, should remove to a great distance from their Relatives, where they would be deprived of their assistance, in such cases always necessary, deprived of a road of access, and even of the means of having neighbours to share in the joint labour, by the interposition of the Lands of the Crown and Clergy with those to be granted.

Q. Have you any, and what means of knowing the nature and advantages of Seignioral Tenure in this Country, compared with that in Free and Common Soceage ?

A. With respect to Seigniorial Tenure compared with that in Free and Common Soccage, I have never considered the advantage of one over the other.

Q. What appear to you to be the relative advantages or disadvantages of those Tenures ?

A. I have indeed thought the Seigniorial Tenure, if moderated, and regulated with liberality towards the Landholder, preferable to the other, relatively to the means of obtaining the Grants, and the facility of communication, when there is a Seignior on the spot, having an interest in bringing his new lands into cultivation : But on the other hand, I think the dues of *Cens et Rentes, Lods et ventes, Rétrait, Banalité*, and Fisking and Hunting on the Seigniorial Lands depreciate them much, and must naturally restrain those who hold them in that way. The Seigniors moreover reserve to themselves the right of taking Building Timber, Stone, Sand and Lime for their Manor Houses, Mills, Churches, Parsonage Houses &c. of making water courses on the Lands, for leading to their Mills the water they require—all that savours of servitude and Slavery to those who are subject to this Tenure.

Q. What are the circumstances which prevent our Husbandmen from extending their Settlements into the Interior, on the ungranted Lands of the old Seigniories ?

A. The absence of many Seigniors, who hardly ever see their Seigniories, and who have Agents there, who take no immediate interest therein, occasions a neglect of the means of facilitating the interior settlements of their Fiefs, add to that, the delays by which the people are usually wearied, before the lands applied for are granted to them,—And as I have before stated, the enormous Rents which are exacted, and the still more repulsive measure, which of late years has been adopted in some Seigniories, of conceding to those who had recommendations or who pay for a preference.—The slow and expensive proceedings, for opening and ratifying water courses, so necessary in most of the lands in the interior, also deserve some attention in this respect, and would require Legislative interference. Q. What are the Chief Impediments to settling, experienced by the European Emigrants, who come into this Country, and are desirous of settling here?

A. Besides that the European Emigrants who wish to settle in this Country, are subject to all the Impediments which prevent our Canadians from settling here as they might choose, they have to encounter the rigour of a severe climate, and are naturally ignorant of the mode of settling in a Country, where the favorable Season is so short, that it is necessary, during four months, to provide almost every thing that is necessary for subsistence during the eight others. Nor do I think, that experience in Agriculture which they have in their own Country, and would introduce here, is adapted to our Soil, in the low Grounds especially : and they almost always avoid them : an obstacle, which it is probably more difficult, both to strangers and to ourselves to surmount, is that which arises; first, from the manner in which the Township Lands are divided : secondly, from the bad state of Internal Communications: thirdly, from the difficulties and delays encountered in the course of the proceedings necessary for obtaining Lands : and fourthly] the exorbitant Fees which have hitherto been exacted, from all Applicants to that intent. Unless measures be adopted for obviating these Inconveniences, or for at least diminishing them, it is really to be feared that for a long time to come, flourishing and extensive Settlements will not be seen in this Country.

Q. How do you think, that in the County which you represent, Settlements might be effected, both by the Inhabitants of the Country, and by European Emigrants who come hither, most speedily, and effectually, and where, in the said County, or the neighbouring Counties, might they be placed most advantageously ?

A. I think Settlements might be effected in several of the Northern Townships, in the rear of Hampshire, and more especially in Alton, both by the Inhabitants of the Country and by European Emigrants : but by the former rather than the latter, because the Canadians would have the assistance of their neighbouring Relatives and Friends within reach ; but in Buckinghamshire, (I mean from Nicolet upwards, for I have no knowledge of the parts lower down,) and even in Richelieu, all the Townships are so deteriorated by the extensive Grants which have been made there for twenty five years past to persons who have generally done nothing thereon, and the constant interposition of the Lands of the Crown and Clergy, among the granted Lands, insomuch that they are almost deprived of the hope of making advantageous Settlements there.

Pierre Joseph Chevrefils, Esquire, a Notary Public, refiding in the Parish of Yamaska, appeared before your Committee.

Q. Do you know the Seigniories which belong to Madame Barrow, situate in the District of Montreal, and what means of knowing them have you had? A. I do know them, and in my Capacity of Notary, I have had occasion to pass many Actes respecting those Seigniories.

Q What are the names of those Seigniories, and what are their dimensions respectively.

A. The Fief Bonfecours :— I do not remember the extent of its front by a like depth. The Fief Bourgmarie Ouest, is half a League in front, by two Leagues in depth The Fief Bourchemin, which includes all the West fide of the River Yamaska; I do not know its extent, but I know that it joins the Line of the Seigniory of St. Ours, on the fide of the Fief Bourgmarie-Est, which was lately fold by Mr. Gale, to Mr. Wurtele, I do not know its front, it is I believe, one League and a half in depth. The Fief St. Charles, of one League and a half in front, by a like depth.

Q. What is the number of Conceffions in those refpective Seigniories ?

A. I cannot fay:—In the Fief St. Charles, only the first Conceffion on the River Yamaska, is Conceded The other Fiefs are almost all Conceded.

Q. What is the quality of the Soil in the Fief St. Charles?

A. I do not know.

Q. What is the most usual rate at which the Old Grants in the Seigniories, or any of them, were made ?

 \overline{A} I cannot fay exactly; but I recollect that there have been made Conceffions of Three Arpents by thirty, for four Shillings and four pence and three Capons; others for eight Livres fix Sols former Currency; and others, for ten Shillings and one penny, and two Minots of Wheat.

Q. Were any Grants made at a lower rate than that you have just mentioned, what is that rate & what is the date of those grants ?

A. Some Grants were made for Six Livres and Seventeen Sols former Currency, from 1759 to 1780, fo far as I have been able to fee by the Old Titles.

Q. Has there been a rife in the rate fince 1780, and at what time did it occur?

A. Last year a great many Conceffions were made at Ten Shillings and one half penny, and four Minots of Wheat, for every Land of Ninety Arpents, and in fome Conceffions there was an addition of One day's work; this is the rate established for all the Seigniories belonging to Madame Barrow.

Q. What is the existing rate in the Fief Deguire, and that of Bourgmarie Est?

A. From the time when Mr. Wurtele became proprietor of those two Fiels until 1820, Seventy five arpents have been conceded for six Livres one Sol former currency, three minots of Wheat and two days' work; and since 1820 that rate has been raised to one minot of Wheat.

Q. What was the rate before Mr. Wurtele purchased those Seigniories ?

A. It was six Livres seventeen Sols former currency for the same quantity of Land—I have seen two Title Deeds of grant, by Mr. Grant, at that time Seignior of the Fief Deguire, perhaps about twenty years ago, of which the rate was six Livres and one Sol, and about two minots of Wheat.

Q. Have there ever been any concessions in the Seigniories of greater extent than 75 or 90 arpents?

A. No, unless some parcels of land remain at the angles of the concessions, but then, always in the same proportion.

O. What was the extent of those parcels of Land ?

A. I remember only two Deeds of Grant, whereof one was of five or six lands, granted to the same person, and the other of six or seven lands also granted to one person, but at the same rates in proportion as above mentioned.

Q. What is the number of grants of parcels of land, to the best of your knowledge, and at what time were those grants made ?

A. About four or five grants have been made in that way, in the two last years.

Q. What was the number of Lands included in each of the said Grants, and what is the total of the said Lands ?

A. Two concessions were made of 150 arpents each, another of about 500 arpents, and another of 400, as well as I can recollect, which at the rate of 75 arpents for each land, makes about seventeen lands.

O. Have any new settlements been formed in the said Seigniories ?

A. Yes, some very considerable ones have been made in the Seigniory of *Deguire* especially; with respect to Madame Barrow's Seigniories, I am not aware that any have been made, the grants having been made too late last year.

Q. What do you mean by the word parcel of Land ?

A. They are places at the Angles of Seigniories, of an irregular form, which are not of sufficient depth to form lands of the usual proportion.

Q. Are there any persons in those several Seigniories, who wish for new Grants?

A. Yes.

Q, What obftacles do they experience to fettling?

A. They find the rates too dear, befides, those Lands are very difficult to drain, and confiderable expense would be necessary for letting the water flow : and there is no road of access thereto.

Q Were there any people settled on the parcels of land so granted ?

A. Not to my knowledge, on the Lands for which I paffed Deeds.

Q. Do you know that Lands have been granted in the faid Seigniories, on which there were already settlements and to other perfons than those who had made those settlements.

A. I have only known one person to whom a Grant was made of a Land, which had been made to another; but there are many lands on which there are persons who have taken poffeifion of them, and have not as yet obtained those Deeds.

Q. What is the number of perfons, and what are the circumftances, under which those perfons have fettled themselves without a Title?

A. I do not know them, perhaps there may be fifteen of them so fituated: they have fettled of their own accord, in the hope of obtaining a Grant.

Q. At what time did those perfons so fettle ?

A. Some of them fettled fifteen years fince, others at a more, or at a lefs diftant period.

Q. Have they made any improvements on those lands?

A. Yes: fome of them have made clearings, and are fowing grain, others have raifed buildings: they have made and kept in repair the Roads and Bridges.

Q. What can have induced those perfons to fettle there without any Title ?

A. The advice of several perfons, who have told them that there was nothing to fear in taking the Lands, and that they were fure of a preference as to a Grant afterwards. The Proprietor of those Seigniories refides in England, his Agent at Montreal, and the under Agent on the spot; but the perfon laft mentioned had no authority to give Title Deeds.

Q. Has the under Agent authority to grant at prefent? A. No.

Q. By virtue of what Order were the Grants you have mentioned made?

A. By an Order given by the Heirs Barrow, refiding in England, to Mr. Gale, their Agent at Montreal.

Q. Who felected the Grantees?

A. Mr. Gale.

Q. Were the Lands so granted sold a fhort time afterwards? A. Many have been fold, and the Grantees expected a Deed

of Grant, merely in order thereupon to execute a Deed of Sale. Q. What was the number of Lands so granted and fold, and at what price ?

A. In the Seigniory Barrow, there have been about one hundred and twenty-five lands sold fince left year, at the rate I have before mentioned, of which, nearly one fourth have been fold from One Hundred to Three Hundred Livres, more or lefs, for each Land of Ninety Arpents. In the Seigniory Deguire, fince 1810, there have been granted about Three Hundred-Lands, at the rates above mentioned, of which about one half have been fold or exchanged at different prices, from Fifty to Three Hundred Livres and upwards.

Q. Has any Grant been made to Madame Barrow's Under Agent ?

A. There was a Grant of Six Lots, of Ninety Arpents each, by various Titles, at the fame rates as the others.

Q. Has he fold any of those Lands?

A. He has fold two or three of them.

Q. Fo whom was the Land granted on which improvements had already been made?

A. To a perfon named Pierre Arrel.

Q. Had the Lands which had been so fold, been granted to the Inhabitants of the place?

A. Yes: and a part of them was fold to strangers.

Q. What was the motive of giving that preference to the original Grantees, by permitting them to make an object of traffic of the Ungranted Lands?

A. It was pretended that Inhabitants would be chofen to open them, and bring them into cultivation, and those Inhabitants fold them.

Q. Do the young people of your parts go into the neighbouring Townships to settle?

A. No: they are too much habituated to performing journies in the Upper Countries.

Q. Are there any Canadian Settlements in the Townships in the neighbourhood of the faid Seigniories, and at what time, and by whom were they made?

A. It appears that one Louis Desrosiers, pretending to be Seignior of part of the Seigniory of River David, conceded a great quantity of Lands about the years 1804, 1805, and 1806: thofe Lands were even bounded at his defire by Pierre Lanvert and Jean Bte. Poulin de Courval, both Surveyors; according to report most of those Lands are within the Township of Upton, near the Seigniory Deguire, the Fiefs Bourgmarie Est, and St. Charles; and fince that time many perfons have fettled and taken Lands without any Title, in that Township. At prefent even, there are Roads opened there by the Grand Voyer for the District of Montreal, and there are Surveyors and Overseers established there, they are all Canadians, both on the north and the south fide of the River St. Lawrence, who have fo fettled without a Title.

What is the number of Fathers of Families so settled ?

A. I do not know their number, but I believe they amount to about one hundred.

Tuesday, 23rd December, 1823.

Mr. Stuart in the Chair.

Pierre Bazile Pelissier, Captain of Militia, refiding in the Parifh of Yamaska, then appeared before your Committee.

Q. Have you been Under Agent for the Seigniories belonging to Madame Barrow, and during what time?

A. Yes, fince 1813, and I am so ftill.

Q. What is the front of the Fief Bonfecours?

A. Almost two Leagnes and a half, I believe.

Q. What is the number of Conceffions in those respective Seigniories?

A. There are three Ranges of Conceffions in the Seigniory of Bonfecours containing about two Hundred Lands. There is only one Range conceded on the front of the Fief Bourgmarie Oueft, of eighteen or twenty Lands, and there are two Ranges conceded in the depth of the faid Fief, of seventeen Lands each. There are but few Lands granted in the Fief Bourchemin, in a fingle Range, but I do not know how many. There are about fixty or eighty Lands conceded in the Fief Bourgmarie Eft, which now belongs to Mr. Wurtele In the Fief St. Charles, there are about thirty or forty Lands granted on the front alone. All the Lands I have just mentioned, are not only granted, but in part cleared and fettled.

Q. What is the most usual rate at which the old Conceffions in those Seigniories or any of them were made?

A. There have been various rates; formerly, for a Land of Three Arpents in front by twenty-five or thirty in depth, four Livres ten Sols and three Capons. That rate exifted until 1780. Since that time the rate has been raifed to two Minots of Wheat and fix Livres two Sols, which continued until 1820, and then a third rise took place, and at prefent four Minots of Wheat, twelve Livres and one Sol are paid for each Land of 90 Arpents.

Q. Have there been at any time Grants in those Seigniories of greater extent than 75 or 90 Arpents?

A. Yes: about four years ago a parcel of Land, which was in-

G

cluded within the Conceffions in the Fief Bonfecours, was granted to a fingle person, but I do 'not know of what dimensions, that parcel never having been furveyed, and is not as yet furveyed. The Grantees make payments on account, to be finally settled when the piece of ground shall be furveyed.

Q Have not other quantities of Land, more extensive than 90 Arpents been granted to other perfons ?

A. Not to my knowledge.

Q. Have any new Settlements been made in the faid Seigniories?

A. Many Grants have been made of late, on which many perfons have built, and which are Cultivated. Others have merely cleared a little Land.

Q. Are there many perfons in those several Seigniories who wish to obtain new Grants?

A. There are about fifty Perfons who have applied for Land, and obtained promifes or Tickets of Grant, but many of them have not gone to fettle there, others have fold their Lands before taking out their Deed of Grant.

Q. Do the perfons who are defirous of fettling experience any obffacles, and what are those Obffacles?

A. I know of no other obstacles than the want of Roads. The draining of those Lands is rather difficult but at last they are well worth the trouble which the Grantees may give themselves, being very rich.

Q. Have you a knowledge that any Lands have been granted in the said Seigniories on which there were already Settlements, and to other perfons than those who had made the Settlements?

A. I only know of one cafe in which a perfon has taken a Land of which the clearing had already been commenced by another, but the perfon last mentioned had taken poffession of the Land without any Title. Some perfons however have taken possession of Lands without any permiffion or Title ; their number is not large ; there are perhaps Seven or eight, fo fituated.

O. Why did those persons so fettle without any Title ?

A. I do not know. I have even warned fome of those people but they have perfevered in going thither.

Q. Have any Lands been granted, and a fhort time afterwards fold by the Grantees?

A. About twenty four Lands were fold by the Grantees a fhort time after having obtained their Deeds: fome of them have even fold upon a mere promife to grant.

Q. At what price are those Lands usually fold ?

A. At various prices from one hundred livres to one hundred

dollars, and for the most part perfons not intending to clear are the perfons who make those speculations.

Q. Do the young People of your part of the Country go into the neighbouring Townships to settle?

A. I do not know any who do so.

Q. Are there any Canadian Settlements in the Townships in the neighbourhood of the faid Seigniories, and do you know when and by whom they were made?

A. There are perhaps about forty fettlements in the depth of Upton contiguous to the Seigniory of St. Charles.

A perfon named Deguire otherwife Defrofiers, ftyling himfelf Seignior of that part of the faid Township, made those Concessions about the year 1804. Some roads are open which have been ratified according to the proceedings of the *Grand Voyer*, and there are *Voyers*, Surveyors and Infpectors eftablished.

MONDAY, 29th December, 1823.

Mr. Stuart in the Chair.

N. F. Uniacke, Efquire, Attorney General of the Province, appeared before your Committee, and made answer to the following questions:

Q. What are the Fees received by you as Attorney General upon Grants of waste Lands, and how eftablished?

A. By the Table of Fees upon Patents for Lands as fettled in Council 4th December 1797, I receive Fees at the rate of ten fhillings per thousand acres.

Q. What are the Fees received by you when the Patents are for one hundred or for two hundred acres.

A. If I draw a Draft of Letters Patent for a half Lot of one hundred acres I receive one fhilling, if for a lot of two hundred acres, two fhillings.

Q. What are the quantities of Land ufually included in the Patents, and does it ever happen that a Patent iffues for fo fmall a quantity as one hundred acres or two hundred acres?

A. At prefent three fourths of the Patents are for three & four Lots. I do not think they ever iffue for fo fmall a quantity as one hundred acres, but frequently for fingle Lots of two hundred acres, I find the Patentees with to have feparate Patents for their Lots.

Thomas Frgu es Esquire, M. D. then appeared before your Committee.

Q. Were you at any time and during what period Auditor of Land Patents in this Province, and did you difcharge the duty of the faid Office in perfon or by deputy? And when did you ceafe to be fuch Auditor of Land Patents?

A. I was appointed Auditor about 1802, as far as I recollect, and difcharged its duties until August 1803, when I went home and left the late Mr. Dunn acting for me, I do not well recollect when I was fuperseded I think about 1806.

Q. What was the nature of the Duties of that Office and what the Emoluments, Salary, or other profits received by you therefrom whilit you were fuch Auditor of Land Patents?

A. I merely made an extract of the Patents (Land) for which I received 6s 8d. for every thousand acres. I had no Salary: as far as I remember the amount of the Fees when I performally acted did not amount to £70 per Annum: but it was scarcely any thing while Mr. Dunn acted and I do not remember the amount. Q. What was done with the Abstracts when made, and were

they trausfmitted to any Public Office in England? A. As well as I remember, I never transmitted them to any

A. As well as I remember, I never trainitted them to any Public Office in England; nor am I aware that they were fo tranfmitted by Mr. Dunn, but of this I am not positive.

James M Kenzie, Efgr. then appeared before your Committee.

Q. Have you had any, and what means of becoming acquainted with the River Saguenay?

A. I was there twice; the first time in 1808 I went as far as Assuapmousoin, fituated 120 leagues from Tadoussa and at the head of the waters which fall into the St. Maurice up the River Saguenay: and in 1814 I went only as far as Chicoutimy, which is fituated thirty leagues up the River Saguenay.

Q. What is the breadth of the River Saguenay?

A. At its entrance it is about a mile wide : a league higher up it widens to a mile and a half, it is navigable for large Veffels for ninety miles up to Chicoutimy.

Q. What is the distance from *Chicoutimy* to Lake St. John's and what is the nature of the navigation ?

A. The diffance is about 24 leagues : the navigation is fit only for fmall Canoes in fome parts.

Q. Are there any Falls or Rapids between Chicoutimy and Lake St. John's?

A. It is full of Ràpids; there are two Rivers joining each other at *Chicoutimy* the one called the Saguenay and the other the River *Chicoutimy* or *Kenogemish*, the junction of which Rivers forms the point on which the Poft of Chicoutimy ftands: I have been near enough to the Falls in the Saguenay, which are at the diffance of two or three miles from *Chicoutimy* to hear the found thereof, but I have never feen them myfelf not have I ever feen any one who has been near enough to examine them; the Clerk ftationed at that Poft told me he had never feen them: I have underftood the Saguenay River is here confined to a very narrow compass and precipitates itself over a lofty Rock. The Current of the River force certain diffance below the Falls (perhaps a quarter of a mile) is fo rapid, that I am told it is impoffible to afcend it with an Indian Canoe, and this is the reafon given to me for its being fo little or at all known. The Banks of the Saguenay at the point at which we ftopped, were lofty and fteep rocks covered with fir.

From Lake St. John to the head of this Fall is a continual fucceffion of Rapids, and the bed of the River is full of large ftones and rocks, which it requires all the dexterity of the Indian Hunter to avoid. This portion of the Saguenay lying between Lake St. John and *Ghicoutimy* is called "La Grande Décharge": I defcended it in 1808 with a Canadian and Indian in a Bark Canoe, we stopped to sleep on our way down, having left Lake St. John late, if we had left it in the morning we could have arrived within the day, or in less time, as the rapid is so strong.

Q. What is the fize and navigation of the Chicoutimy river ?

A. This river is very narrow, not more than a few yards wide, and full of rapids and carrying places; there is a fall in this river at *Chicoutimy*, between twenty five and thirty feet high. This river is I believe, the discharge of lake *Kenogemish*, which is a long narrow lake, I suppofe about two or three leagues long; from this lake is a short carrying place which leads to a small river called *La belle rivière* which falls into lake St. Johns : up this route the canoes travel when loaded, and they generally come down empty by the Saguenay.

Q. What is the diftance between the Chicoutimy and lake Kenogemish?

A. I do not recollect.

Q. What is the diftance between lake Kenogemish and La belle riviere?

A. I do not recollect.

Q. What diftance do the canoes run down the Belle Riviere, what is the breadth of this River, and the nature of its navigation?

A. I do not recollect the diftance, but I think they run down

five or fix leagues, there are no rapids, it is narrow like the *Chicoutimy*, but with a strong current.

Q. What is the appearance of the Country through which the Belle Riviere runs, what is the nature of the foil and climate, and how is it wooded and watered ?

A. The Country appears to be level, the soil is a ftrong clay, and fit for cultivation; the climate is the fame as that of Quebec, the woods are white and red pine, ash and black birch, generally pine trees: I had no opportunity to know any thing of this country except from hearfay; I heard that the fouth fide is for fifteen or twenty leagues a fine level country, diversified with hills and an abundance of lakes and small ftreams, I underftand that there are also good lands on the north fide of the Grande décharge altho' not fo good as on the fouth side.

Q. What is the quality of the land on lake Kenogemish?

A. It did appear to me as good as any of the reft.

Y. Is that lake navigable for Batteaux?

A. I think it is.

Q. What is the fize of lake St. John, and what is the nature of its navigation?

A. Its circumference is about thirty leagues and it is almost circular, it is a fhallow lake with a fandy bottom having a few iflands in it towards this end.—It is navigable for batteaux and canoes, I do not think it would be navigable for schooners having keels and of any burthen

Q. What is the number, fize, and courfe of the ftreams emptying themfelves into Lake St John's ?

A. I do not remember the number, there are two or three large Rivers of which I do not know the names which fall thereinto on the north fide.

Assuapmouscin River, of about 120 leagues in length, takes its rife to the northward in a fmall Lake near Lake Mistassiny (or "the large ftone" in the Cree Language) used by the Tribe of Montagnais, whofe Hunting Grounds lie through the whole of that Country, and empties itself in the Lake St. John on the South fide, about 8 leagues from the entrance of the Grande Décharge.

Q. What is the breadth of that River, the nature of its navigation, and are there any, and what Trading Pofts upon it, and where?

A. It is upon an average about 120 yards broad as I think, but I cannot be positive, it is full of Rapids and Falls, and only fit for fmall Canoes:—There is only one Trading Post on it, at Asfuapmousoin or (in the same Language "a place to watch the Moose Deer.")

Q. What is the breadth of the other Rivers falling into this Lake, what is the nature of their navigation, and are there any Trading Pofts upon them?

A. I do not know their breadth, but I know they are pretty large Rivers, their navigation is nearly the fame as that of Assuapmousoin River, there are no Trading Pofts upon them. There is a Trading Poft upon Lake St. John on the South fide near the Grande Décharge, in the fame place where the Jesuits had formerly their establishment.

Q. Have you ever been higher up the Country than Lake St. John ?

A. I was in 1808 as high up as the Poft of Assuapmousoin, about 60 Leagues above the Lake St. John.

Q. What is the appearance, foil, and climate around Lake St.

A. The Climate is much the fame as at Quebec; the North fide of this Lake is rather low and I was informed fwampy:— 'The South fide is more Hilly but the Soil is the fame as that at *Chicoutimy* :—I did not examine it, but I am told it is good, well wooded and watered with fmall ftreams.

Q. What is the extent of good Land about Lake St. John in the Interior ?

A. I cannot fay from perfonal knowledge, but I have been told that to a diftance of 15 or 20 leagues on the South fide of this Lake, the Land is hilly but good.

I have already faid that the Land on the North fide is low and marfhy, but I have been told that the Land is good altho' not fo good as on the south side.

Q. Have you any knowledge of the establishment that was heretofore made by the Jesuits, when was the same made, what veftiges remain of it, and what induced the Jesuits to abandon it ?

A. I have feen the place, and there is a Trading Poft there now; there are Apple and Plumb Trees fill in existence, which have fince grown wild; the furrows of their fields are fill vifible, on which there grows now Timothy Hay; there have been found ploughfhares and spades, as alfo Iron Pots, and I am told the Bell of their Church is fill there. I have been informed that the Jefuits were obliged to abandon it, in confequence of reprefentations made by the French *Compagnie des Indes*, complaining of their trading with the Indians; the Land about that place is very excellent. Q. What appears to have been the extent of their clearing?

A. I understand about 300 Acres,

Q. Are there any, and what Traditions amongst the Indians now living in that country, respecting the Jesuits?

A. I did not hear any Traditions; but the Indians of the King's Pofts are so flupid or so fuspicious, that although I refided there fifteen years, as Refident Partner and Superintendant of the Trade carried on there by the North Weft Company, I was never able to collect any information from them, refpecting their hiftory or their manners, though I often tried: the only information I could get was from the Canadian Hunters.

Q. What is the appearance of the country in afcending the Assuapmousoin River?

A. For about ten leagues from Lake St. John it feems to be pretty level, and the foil good as far as I can recollect, but from thence to the Poft there, the Land affumes a greater elevation on each fide of the River, it is very barren and covered only with dwarf Trees, of the fpruce kind I believe.

Q. What is the climate at this Poft?

A. There is fnow and ice 'till the month of June.

Q. What have you underftood to be the Climate and appearance of the Country between that Poft and Lake Mislassiny.

A. 'The Climate is ftill colder, and the Country is very fterile, covered with dwarf 'Trees and with Mofs, upon which the Rein Deer (*Caribou*) feed, of which there are great numbers all through that Country:—The Moofe Deer (*Orignal*) is found in the Country about Lake St. John's, and is more plentiful there than any where elfe; it likes low marfhy grounds, it feeds on branches of Willows or *Bois d'Orignal* which is abundant in marfhy grounds.

Q. What is the Import of the names of the Chicouiimy and Saguenay in the Indian Tongue?

A. I underftood from the Interpreter that the meaning of the word Chicoutimy is " there is bottom, or there is founding."

Q. What is the diftance of Ha Ha Bay from Chicoutimy, what are its dimensions, and is there any, and what extent of good Land around the faid Bay?

A. The diffance is feven leagues on the fouth fide of the Saguenay, the Bay runs into the Country about three leagues in depth; the point of the Bay near Chicoutimy is called, "*Cap* a L'Est." I do not know the name of the lower point. I fhould fuppofe, but I cannot at all be positive, that the breadth of the Bay is also about three leagues, but its termination on the lower fide is not diffinctly marked.—I understood that all round the Bay the Land is good to a great extent back, and I was told it would make a large Parifh if it was fettled.

Q. Is there any, and what quantity of good Land opposite or near Tadoussac at the *Embouchure* of the Saguenay?

A. On the West side of the Saguenay is a Point called *Pointe aux* Bouleaux, about a mile and a half broad as far as Duck River, and about half a mile deep to the foot of the Mountains, this is good clay and black mould, the mould is about a foot deep. On the east side, at a high Point called "Pointe aux Vaches," for the space of a league, as far as "Moulin à Baud" the Land is the same as at Pointe aux Bouleaux.

Q. Is there at any, and what distance up the Saguenay, counting from its junction with the St. Lawrence, any Cape or High Grounds projecting into the Saguenay?

A. From Tadoussac, as high up as the Bay Ha Ha, is a continual Chain of High Rocky Mountains on both sides of the River, with Capes occasionally projecting into the River, some of them are much higher than Cape Diamond.

On the north side there is a River about six leagues above Tadoussac, called the Ste. Marguerite, this is a small River abounding with Salmon: On the south side, about a league farther on, there is a small River called "Le Petit Saguenay," in which Salmon is also caught. Both these Rivers are navigable for Canoes for a small distance, and in the main River about seven leagues above Tadoussac are some Islands called "Les Isles de St. Louis." I do not know their dimensions, but they are small.

Q. What other Streams, of what dimensions, and how navigable, fall into the main Stream between its mouth and Chicoutimy ?

A. I know of no others, but very small ones, which it is not worth mentioning.

Q. Are there any, and what Streams which fall into the Grande Décharge between Chicoutimy and Lake St. Johns?

A. I do not remember any.

Q. Is the Port of Tadoussac open during the whole year ?

A. It is, but there is sometimes a great deal of floating Ice during the winter driven in by the easterly winds and spring tides; when the wind is from the land it is always clear.

Q. What is the nature of the Navigation of the Gulph from Tadoussac, and during what seasons and at what times can Vessels sail with safety into the Gulph from Tadoussac, and what are the comparative advantages and disadvantages of that Port, when compared with the Port of Quebec ?

A. The River St. Lawrence opposite Tadoussac is open during the whole winter, and the Saguenay is also open as far as the Islands of St. Louis: from thence the Saguenay freezes over as far as Chicoutimy towards the middle of December. Vessels can sail from Tadoussac

Ħ

from the beginning of June (some seasons earlier) until the latter end of November or beginning of December.

One of the advantages of the Port of Tadoussac over the Port of Quebec is, that all the dangers of the River Navigation for an interval of 36 leagues are saved, excepting the entrance of the Harbour itself, which is more dangerous than that of Quebec, from the circumstance of a reef of Rocks extending from each side of the Mouth of the Saguenay for a considerable distance, which at high water or on the rising tide are covered, but not at a sufficient depth to admit of Vessels passing over them, and over which the rising and falling tide runs with great velocity and in various Currents, so that without proper precautions a vessel is liable to be thrown upon these Reefs, and particularly upon that to the eastward : Pilots are not absolutely necessary until Vessels reach Green Island opposite Tadoussac, the Pilots often leave Vessels going down opposite Green Island, considering their services no longer necessary: the Rules of the Trinity House however are, I believe, that the Pilots are not to leave until they get to Pointe au Père or Bic.

Another advantage is that the water being salt, the floating ice is not formed so soon as at Quebec, there is of course a great saving of time.

Q. What species of Fish, and what quantities thereof are taken in the Saguenay or in Lake St. John?

A. In the Saguenay there are considerable quantities of Salmon and Salmon Trout taken; in the Lake St. John there are White Fish, Pike, Trout, and a species of Fish called *Winanish*, which, I believe, is peculiar to that Lake.

Q. Will you describe the last mentioned Fish ?

A. It is from twelve to eighteen inches in length, shaped like a small Salmon, its flesh resembles in colour that of the Salmon, though I think, as far as I recollect, of a deeper red, but of this I am not certain :----its flavor is much more delicate and finer than that of a Salmon. I have met with a fish in the Upper Countries, which I think is the same fish : great quantities of them are taken at the Lake *Athabaska*, and it is there called "La Petite Truite." It is to be observed, however, that Trout is caught in that Lake weighing thirty pounds. Those which I mentioned as having eaten at Lake *Athabaska* are the finest Fish I ever ate.

Q. What are the dimensions of Lake Mistassiny, and where does, it empty itself, and what is its distance from Lake St. John?

A. I do not know its dimensions, the Indians describe it as a very large Lake, so large that they never went round it; it empties itself into James's Bay, I think by Rupert's River; its distance from Lake St. John is about 130 leagues by the route which the cances take; in a straight line it is much shorter. James M^eKenzie, Esquiré, requested the following description might be added to the minutes of his Evidence taken before the Committee on the Crown Lands.

Les Bergeronnes, are situated North East of Tadoussac nine Miles; They produce abundance of very good Hay; The people of Tadoussac make their Hay there and at *Pointe aux Bouleaux*. L'Ance St. Etienne, on the South of the Saguenay about Two Leagues above Tadoussac, yields some Hay, which is sometimes overflowed by the Tide.

At L'Ance St. Jean, on the Saguenay half way to Chicoutimy, is a Salmon Fishery, and remarkable for the growth of much fine Maple. The Country about Chicoutimy and Lake St. John abounds in this Wood. The Servants of the Lessees used to make as much Sugar as they could consume. The natives are not in the habit of making any although very fond of it, when they can procure it, without more trouble than that of asking for it.

The North West Company, had a Saw Mill on a small River, a Mile below *Chicoutimy*, there is no scarcity of Mill Seats all over that Country, the falls of the River *Moulin à Baud*, a league below *Tadoussac*, would furnish all sorts of Mills with Water and so would those of the River *Chicoutimy*. The Jesuits had Mills at lake St. John, some of their Iron Materials have lately been found there.

Leaving Chicouting we crossed a carrying place a league in length. About three leagues farther is the Partridge Portage where the Chicouting tumbles itself over a perpendicular Rock about twenty feet high; the Portage is short.

We passed a few more short carrying places before we arrived at Lake Kenogemish; and a short one after we passed it, then the River of the Willows brought us to the Belle Rivière. This Willow River is nothing but a Rivulet taking its name from the profusion of Willows on its muddy Banks.

A considerable River runs into Lake St. John where the Jesuits had their Establishment, and about two leagues to the Westward is another River by which the Indians in their small Canoes go in a few days to *Batiscan*. It is I believe called the Loon River, the people of the Post generally catch their Winter Stock of Fish at its Mouth late in the Fall. Mr. Charles Jordan spoke to me of a River which falls into Lake St. John on its South side, which Communicates with the St. *Maurice*, and is free of Rapids and carrying places : as Interlopers came by this River to trade with the Lake St. John Indians we came to the determination of establishing a Post on it, in order to intercept them and to trade with the *Tôtes de Bonles*.

The Assuapmonsoin, is about the size of the Ottawa at Grenville ; a few leagues from its Mouth the paddles must be laid aside and the setting Poles used till we come to the *Chaudière* Falls, about half way to the Post of Assuapmonsoin. These Falls have a grand appearance and make a great noise, here the River contracts to a narrow compass and precipitates itself over three Rocks each about thirty feet high and rising above one another like the steps of a Stair. A short distance beyond them the Current becomes too strong for either the Paddles or Poles to stem, and the Banks too steep and slippy for the use of the tow line : we therefore struck off to the left into a shallow River, which after we carried our Canoes in many places and dragged them in many others brought us in a couple of days to Lake Shigobiche : this Lake is reckoned twelve leagues in length, it is interspersed with Islands, its bottom is rocky and water clear; after passing it, we crossed a short carrying place and entered a small River, lined with long wild Grass, and here and there a tuft of Spruce Fees, which brought us the distance of six leagues to the Post of Assuapmousoin, situated on a small Lake of that name, a great deal of wild Hay grows here, Potatoes have been planted and grown to a small size in a Garden near the House. There is a variety of Fish in the Lake but they are not numerous; there is a Water Communication for Canoes between this and the St. Maurice, it is as easy to go to Three-Rivers from it as to reach Tadoussac. I have been frequently told that this Lake is opposite to Maskinongé. The Assuapmousoin River runs close by the North end of it. We returned by it, and came in one day to the Chaudiere, and in another to Lake St. John.

The North West Company's house at Lake *Mistassing*, was built at the South West end, on a long elevated point projecting into the Lake and joining the main land by a narrow neck. The situation is beautiful. The soil not very bad, but the Climate is cold, there is Ice sometimes in July, the people of the Post raised enough of Potatoes for their own consumption, they manured the Ground with Fish of which the Lake / furnished them great abundance of different kinds, such as White Fish, *Poison doré*, Pike, Carp, and as large Trouts as those found in Lakes *Huron* and *Athabaska*, the Potatoes however grew but small.

The former Lessees had no fixed trading Establishment at Lake Mistassing, they sent Goods there to trade every Spring by a River as large as the Assuapmonsoin, which falls into Lake St. John on the North.

TUESDAY, 30th December 1823.

Mr. Stuart in the Chair.

Mr. James M'Douall, of Quebec, Merchant, appeared before your Committee.

Q. Have you had any, and what means of becoming acquainted with the River Saguenay, Lake St. John, and the Countries adjoining the same?

A. In October 1822, I became jointly interested in a Lease of the King's Posts, which comprises the Country in question, and I took every means in my power, by inquiring, from those persons who had an opportunity of knowing this Country, into the state and condition of it, and in the month of July 1823, I personally visited this Country, and ascended this River as far as the third Rapid of the Chicoutimy River. In the month of November last I was again at Tadoussac.

Q. What is the extent of the Navigable Waters of the Saguenay, and of the Streams that fall into it, and for what vessels are they respectively navigable, what are the Falls, Rapids, and other obstructions to navigation in the said Streams respectively, describing the same particularly; what is the Soil aud Climate of the Country bordering on the Saguenay, on its tributary Streams, as well as on Lake St. John, and what are the Streams which empty themselves into the said Lake, their size, length, course and susceptibility of Navigation : what is the nature and quality of the Timber produced upon the said Lands, and in your opinion could or could not Settlements be advantageously effected thereupon and to what extent, what is the face of the Country and what are the advantages or disadvantages thereof as to its means of defence in the event of a War with a foreign State : of what kind is the Port of Tadoussac, at the mouth of the Saguenay and what are its advantages and disadvantages when viewed in regard with the Port of Cuebec or Montreal: what are the Animal, Vegetable and mineral productions of this Country so far as they came under your observation?

A. The River Saguenay is navigable for Vesselsof any burthen as far as Chicoutimy, distant about 90 miles from its junction with the St. Lawrence.-The Mouth of the River Saguenay is the narrowest part of it within that distance, but the Channel appears to be about a mile wide at the mouth- five or six miles higher up it widens to about two miles on an average without any Shoals until you approach Chicoutimy :- There are many Harbours and Anchoring places in this River; a number of Rivers fall into it, the principal of which are the Ste. Marguerite, La Trinité, petit Saguenay and Chicoutimy,-there are besides a number of small tributary Streams, I do not know their names, but they proceed as I am told, from little Ponds or Lakes on the height of Land .- The Mouth of River La Trinité forms, for about two miles, a very fine Harbour, and where this River becomes narrower there are Salmon Fisheries established : sixty miles up the Saguenay is the Bay Ha Ha into which fall two small Streams with Salmon Fisheries in both, this Bay is a very fine Harbour of nine miles in circumference, it has no current, good anchorage throughout, and its bottom consists of sand with gravel and round stones as large as a man's fist,-this Harbour is the more valuable, as in many places of the Saguenay, no soundings are to be found. Ships may ride here in perfect safety from any winds.

The River Ste. Marguerite is rather larger than the St. Charles at Quebec, navigable for a considerable distance for Canoes; the Indians told me that they go up that River a hundred miles.

Of the Petit Saguenay I know nothing.

La Trinité is about the size of the St. Charles and not quite so large as the Ste. Marguerite.

The Chicouting is about the size of the Batiscan not quite so wide, but there is full as much water in it.

Above the Post of Chicoutimy there are in the River *Chicoutimy* three Falls or rather Eapids, which I have scen; they begin exactly at the Mouth of the River :- The upper one is about a mile and a half distant, and I have been told there are no further obstructions to the Navigation with Canoes or small Boats for thirty miles.

The first and second of these Falls are deadened by the rising of the spring tide, which rises there about fifteen feet; the further navigation of the Saguenay above the Post of Chicoutimy is rendered impracticable by a tremendous Fall about nine miles distant, which no body has ever approached, within the knowledge of any one there, whether Indian or Canadian.—We can hear the noise of the waters when the wind comes from that quarter at this Post : opposite and below *Chicoutimy* for some distance, the whole River is a good Harbour and Anchorage. The Harbour of Tadoussac is excellent, with no Current, and able to contain a number of Vessels.—It is true that there is a Reef on each side of the River Saguenay, running into the St. Lawrence, but the Channel still remains above a mile wide, and this Reef is covered at high water.

I have up personal knowledge of Lake St. John or of the Streams that fall into it, but from information derived from persons who have visited that part of the Country, there are numbers of Streams that fall into it from all quarters of the Compass navigable for Birch Canoes. The climate of the Saguenay I am told, is milder than that of Quebec, vegetation appears to come forward fully as rapid and more so than at Quebec ; such articles as have been planted or sown at the Post of Tadoussac did well; the Soil at Chicoutimy is still better than that of Tadoussac, and fit for any kind of Culture : the Country about Chicoutimy is level to a very great extent and fit for settling. The growth of the Timber is Birch, Ash, Elm, red and white Pine, Spruce, and Poplars. I am told that the Country about Lake St. John, to a considerable distance, and on the Rivers and Streams falling thereinto, is, generally speaking, good Land and fit for Cultivation, and there is a great quantity of hard Wood, such as Maple and Beech, and I have seen Sugar said to have been made there by the Indians. In fact it appears from the information I could collect that all the Country from Bay Ha Ha to Lake St. Johns is susceptible to be settled, as well as that upon the Streams falling into Lake St. John from the South and West, and to the head waters of some of the branches of the Grand or Ottawa River that heads nearest the St. Lawrence, and down the Ottawa River to the Lake of the Shaws, until it reaches the Richmond Settlement, an extent of four or five hundred miles varying in breadth from twenty to above one hundred miles: Above Quebec no doubt Settlements could extend into the old Settlements on the St. Lawrence in many places.

Produce of all kinds raised in Lower Canada, as Grain, Vegetables, Hemp, Flax, Hops, Fruit Trees, particularly the Apple, which I am told lives longer at Lake St. Johns than at Montreal, might be cultivated with the utmost success.

I am told the small Rivers falling into Lake St. Johns from the

North and North West are not fit for Settlements : A small distance up these Rivers the Country becomes cold and barren, covered with mall stinted Fir brush wood ; The Indians make use of that Country as Hunting Grounds.

I am not informed whether the High Lands from the Mouth of the Saguenay for sixty miles up are fit for Settlement or not; appearances are very much against it.

The Banks, or rather Mountains of the Saguenay are very high, consisting of hard Rock, and in most places are nearly perpendicular covered with a small growth of Fir Wood.

At the Mouth of some of the small Rivers and in some of the Bays there are desirable spots for good Farms, with a rich Soil, and for a small distance above and below the Mouth of the Saguenay on the St. Lawrence under the high Lands, there is good Land for Settlements for about one hundred and fifty Farms with the advantage of abundance of salt Marsh and wild Hay, Fish, wild Fowl, and other Game.

I have no knowledge of mineral productions :---

The settler has the advantage of getting as far as Chicoutimy with his stock and nccessaries at a very trifling expense in craft or Steam-Boats. I Chartered a Schooner of seventy five tons last September to carry a cargo from Quebec to Chicoutimy for twenty five pounds:—from that place to Lake St. John's it must be attended with some difficulty and expense for those who first settle that desirable part of the Country.

Cattle or stock of any kind might be driven across the Country from Quebec or above it to Lake St. John, Chicoutimy being situated at the head of the navigation of the Saguenay, if the Iuland Country was settled, it must become a town of considerable commerce: the first exports would be spars, square red and white Pine Timber, Deals and Lathwood, Fish, Oil, Furs and Peltries.

As the Inland Country becomes cleared, Pot and Pearl Ashes, Grain, Flour and Salted Provisions, Hemp &c. would be exported :-- I am of opinion when that Country is well settled, a part of the trade will find its way to Quebec, Three-Rivers and Montreal.

Nature appears to have done a great deal for the defence of the Saguenay; Batteries or Fortifications might easily be erected at Tadoussac and many places round the mouth of the Kiver to prevent an enemy from entering it : the Country is so situated that it appears to be the last part of Canada to be invaded by foreign enemies, if the Country was well settled to make it worthy their attention.

WEDNESDAY, 31st December 1823.

Mr. Stuart, in the Chair,

Captain Fenwick, Assistant Harbour Master appeared before your committee.

Q. What is the number of emigrants which arrived at the Port of Quebec during last season, and from what parts did they come ? A. The number was 10,258, the greater part came from Ireland, some from Scotland, and a few from England.

Q. What would you conjecture was the proportion of children?

A. Nearly a fourth I suppose of children of and under ten years of age.

Q. What would you conjecture was the proportion of single to married men?

A. The number was nearly equal, but their might perhaps have been more single men.

Q. What is the proportion of female to that of male adults ?

A. I suppose the number of female adults is not so great as that of the male adults, but nearly so, there was a great number of unmarried women.

John Neilson, Efquire, a Member of this Houfe for the County of Quebec, appeared before your Committee.

Q. Have you had any, and what means of acquiring information, refpecting the old and the new Settlements in the County of Quebec?

A. I have had a great many opportunities of obtaining the knowledge referred to in this question. I have refided upwards of thirty years in this Country, and have had almost daily intercourfe with its inhabitants, and have perforally visited every part of the County which I reprefent.

Q Are there any new Settlements in the said County?

A. Yes, the old Settlements have extended greatly in their rear, within the last thirty years; Land, of a quality, which at that time was confidered by the Canadian Farmers as not ufeful for Cultivation, has been settled by them. They are now got to the foot of the Mountains, which in the eastern part of the County are rocky and stony, and unfit for cultivation. Three new Settlements have lately been made, the first was commenced in 1816, by Americans from the St. Francis Townships, and the two last, by Emigrants from Europe in 1822.

Q. What is the number of Parishes in your County, and what is the number of Seigniories?

A. The number of Parifhes is feven; there are three principal Seigneuries; to the east, Beauport, to the west, Sillery and St. Gabriel; which may be considered as one, and Fief St. Ignace; the centre of the County is divided into fmall Fiefs, or Seigneuries.

Q. Where are the new Settlements fituated, when, and by whom were they made, and what is their extent ?

A. The new Settlement of Val-Cartier, begun in 1816, is in St. Gabriel, those commenced in I822 are adjoining in Fief St. Ignace, in Stoneham, and in Beauport; the first was made at the

expense, and by the personal superintendance of Andw. Stuart, Louis Moquin, Efquires, Advocates resident in Quebec, and myfelf. We obtained fifty adjacent Lots from the Commiffioners of the Jefuits Eftates, of three arpents in front by thirty in depth, en roture, at the ufual rents, and on the ufual conditions; I believe this was the first Grant made by the Commiffioners. Between a half and two thirds of the whole Tract was cultivable Land, but it lay at six to nine miles from any house, and there was no road, but a foot-path through a fwamp of three or four miles :--- on many parts of this fwamp, the water was knee deep We gave the choice of the Lots that we had obat all feasons. tained to those who were disposed to settle, and on the same terms as they were granted to us, and agreed to advance them, on the fecurity of their labour, and their Stock of Cattle, enough to enable them to provide for their wants for one year. They all repaid us, or secured the repayment of the advances. The Settlement was likely to thrive, not, however, in a way to reimburfe us for the expenses that we had been at, in furveys, expenses of Grant, making roads, bridges, building a Saw Mill, and clearing and fettling the lots remaining on our hands; its progrefs was however early checked, by the refusal or delay of the Commissioners of the Jesuit's Estates, to give Grants adjacent to our Lots, to the numerous applicants, a great many of whom being Citizens of Quebec, were posseffed at that moment of the . ready money which they had accumulated during the war. Within the last two or three years, grants have however been made adjacent to our Lands, all the good land in the Seigniory, in the immediate neighbourhood, is now taken ur, and the actual Settlers, chiefly Scotch and Irish Emigrants, nave fpread into the adjoining Seigneuries of Fossambault, and St. Ignace ; the road made by us, still forming their fole means of communication with a Market.

The other fettlements in Stoneham, and Beauport, have been chiefly effected by the capital of citizens in Quebec, the refident fettlers, if any, are emigrants:—There is not much Land cleared in either:—That at Beauport is near a market, but the Land is ftony, and no great extent of it is of a good quality. The quit rents too are high.

Q. Is there any Emigration from your County to other parts of the Province, and whither is it directed?

A. Yes, they proceed to different parts of the Country fettled by Canadians; chiefly to the Diffrict of Montreal.

I

Q. What is the usual extent of the grants to Tenants in the old Seigneuries of the faid County?

A. Three Arpents in front, by thirty in depth, has been the usual extent of the grants in the County of Quebec.

Q. Is any fubdivision of those Lands made to fettle feveral Famalies, and is that frequent, and what are the causes of the subdivision of the Lands?

A. Yes, very frequent, almost all the original grants are cut up into narrow strips of Land, fome not much broader than an ordinary Highway, and perhaps a Mile in length; on the fronts of many of the original grants, the Houses and out Houses are now so close to each other, that they form, as it were, a street for several miles.

The caufes of this fubdivision are :---

Ist. The Law, which divides the real eftate equally among the children.

2d. The difinclination of the members of the fame family and neighbourhood, to feparate from each other.

3d. The difficulty of making all new fettlements in this fevere climate; it being a received maxim among all the Farmers (eftablifhed on the experience of nearly two hundred years) that he that opens a new Farm never lives long enough to enjoy the fruit of his Laboars.

4th. The deficiency of the necessary capital for fo difficult an undertaking.

5th. The want of education among the Country people, which alone can qualify them for other employments, and give them a defire and enterprife to leave their relations and friends, and push their fortunes in diftant parts.

6th. The obftacles, delays, expenses, and difcouragement experienced in obtaining new grants, in the manner they have been accustomed to, and the high quit rents and burthensome conditions required by the Seigneurs.

Q. What effect do thefe subdivisions, produce ?

A. These subdivisions, when carried to the excess which I have mentioned, produce poverty and beggary, and their confequences are the degradation and immorality of the People.

Q. What is the extent, and the quality of the ungranted Lands, in the faid County, and the faid Seigneuries?

A. The extent of unconceded Land within the County of Quebec, is very great, because its limits to the north, and north west, may be confidered as extending to the Hudson's Bay boundary. There is now very little Land in this County fit for immediate fettlement unconceded. A great part of the Conceffions already

made, are only fit for woodlands; beyond the actual concessions, on the eaftern side of the County, the land is mountainous and rocky, interfpersed with lakes and fwamps, with fmall quantities of good land along the margins of the Lakes and Rivers, and here and there, on certain fides of the Hills, about half way to their fummits ; the Country is nearly of the fame defcription, to within a few miles of the western line of the County : here, however the mountains lye farther from the Saint Lawrence than on the other fide of the County, and as the fmaller rivers, falling into the St. Lawrence in this quarter of the Diffrict of Quebec, have generally a courfe from north east to south west, feveral of them pass through the County of Quebec, and along these rivers, where they pass through the Mountains, and up the sides of the latter, there is generally a large extent of good land : In this quarter some hundreds of good farms, chiefly in St. Gabriel, at a diftance of lefs than thirty miles from Quebec are still unconceded viz. on Pine River, on the side of Tsounonthuan (or Great Mountain,) and on the Rivers falling into the Lake of the feven Islands, and on the River St. Anne. I speak only from hearfay, when I fay there are in the same direction, good Lands on the St. Anne, the Batiscan, and the St. Maurice, all of which pais within sixty miles to the northward of Quebec. Beyond St. Gabriel, there is the Fief Hubert, the lands in the rear are waste lands of the Crown. In the rear of the Seigneuries, in the eastern portion of the County, there are the Townships of Stoneham and Tewkesbury, granted more than twenty years ago, but on which, excepting two or three in Stoneham, near Lake St. Charles, there are no Settlements.

Q. Is there a Road over those ungranted Lands and have those Lands been furveyed ?

A. There are no roads through any of the unconceded or ungranted Lands, excepting the winter roads, made in the rear of the Canadian fettlements, for drawing wood. A few unconceded Lands have lately been furveyed in St. Gabriel, the Town thips have undergone the usual furveys, of which no traces are now difcernible.

Q. Were there any Concessions of Lands in the faid County, before the year 1759, and if there have been any, what was the general mode of conceding, with respect both to the extent of the Land granted, and the terms on which it was granted?

A. The greatest part of the Concessions within the faid County, were made before 1759, I have faid that three arpents by thirty arpents have been the usual extent of a land; the quit Rents, every thing included, feem to have been rather under a penny per fuperficial arpent, without burthenfome referves or conditions—Previous to that time, both the Seigneur and his *Ténancier*, feem to have been regularly looked after, in as far as refpected their mutual obligations, of granting at the eftablished rates, and settling—I have feen in the extracts from the Registers of the Superior Council of Quebec, vol. 11. Edits et ordonnances, the fubftance of various Judgments confifcating Fiefs for non-settlement, on the part of the Seigneurs, and reuniting Lands granted by them to Individuals to the Domains, alfo for non-settlement ; and alfo a Judgment of 23d January 1738 ftating the Cens and Rents "Ordonné par Sa Majesté at un sol de "cens par chaque arpent de front, et un sol de rente par chaque " arpent en superficie, et un Chapon, ou vingt sols, au choix du " Seigneur, pour chaque arpent de front."

Q. Is there, in the faid County, a confiderable number of perfons, who defire, and have means, to form new fettlements in the Seigneuries, provided they could obtain Lands near to, or at a fhort diftance from those of their relatives or friends, and are there any fuch Lands, and what are their quantity and quality?

A. There are a great many perfons in the County, both able and willing to take up new Lands, particularly among the Canadians, but there are none, or very few Lands of quality fit for immediate cultivation in their vicinity. The Canadians (whom, from long experience, I confider as by far the most ufeful fettlers in this Country,) are now cut off from further fettlements on one fide by the Mountains, and on the other by the new fettlements in their rear.

Q. Are there any caufes which have retarded, and continue to retard, the fettlement of the Lands in the old Seigneuries of this Country, and what do you think those caufes are?

A. This queftion has been partly answered before, the caufes of the non fettlement of the Seigneuries, are, in the first inftance, the difinclination of the people to feperate from their families and neighbours; fecond, the want of capital; third, the high rents and burthensome conditions asked by the Seigneurs, and even their refusal to grant; fourth, the want of that superintendance on this subject to inforce the Laws which prevailed previous to the conquest.

Q. Do any of our Husbandmen go into the Townships granted in free and common foccage to settle, and if not, to what cause do you ascribe it ?

A. None of the old Inhabitants of this Country fettle in the Townships. In addition to the causes already mentioned, which produce the fubdivision of their Lands, and those which retard the settlement of the Seigneuries, I am of opinion, that they are deterred from settling on the free and common soccage Grants.

1°. From their ignorance of the nature of these Grants.

2°. The difficulty and expense of procuring them.

3°. 'I'he information which they receive, of the manner in which the Crown and Clergy Referves are interfperfed, between the only lots that actual fettlers can procure.

4°. The diflike of intermixing with ftrangers, and the apparent difficulties which in these Townships they must be subjected to, in respect to religious instruction and affistance.

Q. Have you had any, and what means of knowing the nature and advantages of the Seigneurial Tenure in this country, compared with that in Free and Common Soccage?

A. I am acquainted with the operation of both Tenures; but it is very difficult to pronounce on their compárative advantages.

Q. What appear to you to be the relative advantages, or disadvantages of those Tenures?

A. I understand by Tenure, the Terms and Conditions on which the Sovereign Authority of a State guarantees to Individuals and their Assigns, the exclusive occupation of a certain portion of the Territory of such State. The Tenures in modern Europe, owing to the Conquests to which almost every part of it has been subjected, have been chiefly military; the guarantee of the Sovereign Authority in favor of individual possession, seems to have been there, generally, granted with a view to military service. In America it has been given with a view of settling the country. A spirit of imitation, and the introduction of Laws established in Europe, originally gave something of the military character to the Tenures in Canada, and in some of the British Colonies. They have, however, been mainly characterised in both, by the object of the Granter : viz. the Settlement of the Country. Settlement, both in Canada and the United States, has accordingly been the chief condition imposed. The British Grants were generally immediate to the Settler ; the French Grants were, in fact, to Trustees for actual settlers, the principal Grantee being required himself to settle on his Grant, and regrant on a triffing consideration, and easy Conditions, which seem to have been fixed by Royal or Legislative Authority. The old feudal notions were brought from Europe, and are found in old Laws and Title Deeds. Even before the Conquest, the Tenure en fief in Canada, amounted to little more in favor of the Seigneur, than pre-eminence and superintendence, in conveying the Lands in small portions to actual Settlers ; for which, he was restricted to a remuneration, not more than sufficient for his employment of Capital, opening the Settlement, and the aforementioned services. This remuneration, particularly the Lods et Ventes, being of a nature growing with the means of the Settler, was at no time severely felt; it was particularly advantageous to the Settler at first, requiring no part of that Capital which is so hard to be procured, and so indispensable for effecting the Settlement which the Original Grantee of the Lands had in view. At no time was the Settler likely to be laid under any burthens, resulting from the Tenure, which he could not easily bear. Since the Conquest, the pre-eminence legally given to the Seigneurs has in a great measure ceased, some of their rights, which were rather burthensome to themselves than otherwise, (those of Justice) have also ceased.

The old Seigneurs seem generally to have performed their duties, with respect to the re-granting of the Lands, but the enforcement of these duties on the part of the Crown, seems to have fallen into disuse; the consequence has been, that purchasers of Seigneuries after the Conquest, seem to have almost considered the Lands therein as if they had been held under the Soccage Tenure, and thought themselves dispensed from many of the conditions upon which the Grant was made, nearly frustrating its object. The Tenure *en fief*, notwithstanding these abuses has, in effect, put great numbers of Settlers on the Waste Lands in the Province, with secure Titles, free and fixed as to the Conditions, and in no respect burthensome.

The Soccage Tenure in this Province, having the same object in view, has not been so successful in forming actual Settlements : it, in reality, differs very little from the Tenure *en fief*; if the Crown had granted a large Tract to one individual, for a "Pepper Corn" for instance, binding him to settle on the Land, and to regrant that portion not necessary for his own cultivation, to such individuals as might apply and become actual Settlers, upon certain moderate annual Quit Rents, and other easy conditions, this would, in fact, be nearly the Seigneurial Tenure, as it is now in operation in this Province. The Quit Rents, and other Obligations, would prevent speculation in, and monopoly of, Waste Lands, and encourage the object of the Crown, the Settlement of the Country.

The Tenure in free and Common Soccage, from the eluding or nonexecution of the King's Instructions, (there being no annual charge on the Grantee or holders of them) has encouraged this kind of speculation and monopoly, and in a great measure, frustrated the object of the Crown, which, particularly in the case of powerful individuals being concerned in this speculation and monopoly, has, and must ever, find it almost impracticable to compel the fulfilment of its object, and the condition of the Grant, namely actual Settlement. In as far as respects the actual Settler, abating the evils of speculation and monopoly, which affect him by the difficulty of obtaining Roads, and the performance of the Obligations of Neighbourhood, the condition of the Censitaire and the Settler holding in free and Common Soccage, is nearly the same; the expenses of obtaining the Grant, including the loss of time or Agency, is greater for the Lands in Soccage, and he is thus deprived of the Capital, which would have contributed to his support on a first Settlement, and enabled him to make greater Clearings; a loss, which will probably be found fully equal to the burthens usually imposed on the

Censitaires : If he purchases for Cash or Credit, he has the interest of the money to take into account; purchasing on credit, from the deficiency of Capital in new countries, is however the usual course, and then, being frequently unable to pay at the term, the Settler in free and Common Soccage, is in a more degraded condition than the *Censitaire*, and loses his Land, always at the most unfavorable time, with all his improvements; perhaps, foreseeing this result, he has impoverished the soil, and left it in a worse condition, than if it were in standing wood.

The one or the other Tenure is good, freed from abuses, which obtain in both, but rather more, I think, under the Soccage Tenure. I should however, prefer for any new Country, the Tenure which has long been in use, and with which those in a situation to become actual Settlers are best acquainted, as most likely to effect the main object in view on granting Lands in such Countries on any Tenure. The United States have of late years, materially deviated from the mode of granting Lands heretofore existing in these States when they were Colonies. This mode is more consistent with the true principles of political economy, than either the old mode in the British Colonies, or in the late French Colonies on this Continent. Lands in a state of nature, differ in value from the quality of the soil, the timber and the locality ; the object of Government is the Settlement of Waste Lands, but there is a preference arising from their difference of value; every subject qualified to settle or lay out Capital on Waste Land, has an equal right to a share of the unoccupied Waste Lands; they are therefore divided into suitable Lots, making moderate reserves for certain public uses, and the preference is given to the best bidder at public sale, paying ready money. This mode does not deprive the Settler of any Capital for clearing the Land, for he can always raise on the Land paid for by him, about the amount paid at a public Sale. He has, in fact, paid for nothing but the preference, which the superior value of the Land ensures to it.

The Title is according to the Tenure called Soccage, and this Tenure, under these regulations, is probably the most advantageous for settling a Country.

Q. What are the circumstances which prevent our husbandmen from extending their Settlements into the Interior on the ungranted Lands of the old Seigneuries ?

A. From 1793, but particularly from about 1800, to the close of the late war in Europe, the progress of the Settlements in the Seigneuries was very great; where the Lands were good, and were obtained at little expense, and on something approaching to the old terms, they were readily taken up, settled upon, and the Roads laid out, and made at the common expense, according to Law. The distant journeys, delays, and expenses, and difficulties in obtaining *Process Verbaux*, both before and after the homologation, were a general subject of complaint; the high price of agricultural produce, occasioned by the war in Europe, enabled however the Settlers to bear all, and overcome all obstacles in making the Roads. Since the close of the war, the progress of the Settlements has been yearly diminishing; the decline in the prices of agricultural produce, the obstacles of unusually high rents and new and onerous conditions of the Grant, and absolute refusal to concede on the part of many of the Seigneurs, with the expenses and difficulties of laying out Roads as before mentioned, are more than they can bear.

For further information on this subject, I refer to my answer to the seventh Question.

Q. What are the chief impediments to settling, experienced by the European Emigrants who come into this Country, and are desirous of settling there?

A. The principal obstacles to the settlement of European Emigrants in the Diffrict of Quebec, to which my knowledge mainly extends are :

1st. The severity of the winter, and shortness of the summer, the real difficulties resulting from which are magnified in their imaginations, by the extravagant stories related on the subject abroad and among the lower orders of Europeans in Canada.

2. Their utter ignorance of the mode of defending themfelves against the real feverities of the climate, and of the best means of making their labour productive, under circumftances very different from those in which they have been brought up. This ignorance is fo great, that their situation for the first years after their settlement is often diffrefsing.

3. A defire to proceed among their relations and friends, the majority of whom are fettled within the United States, fouth of the Great Lakes, and west of the Alleghanies, where they enjoy a milder climate, although the Markets are fomewhat less advantageous than on the St. Lawrence.

4. The formalities, difficulties, delays, and expenses, of procuring Grants of Crown Lande in Lower Canada; these Grants being only to be had at the Capital, where the expense of living is high, where they are utter Strangers, and unable to get any information that can be depended upon, with respect to the place where they might advantageously fettle :—Those who have means, generally proceed beyond Quebec; only the very poorest of them remain, and trust to daily Labour for a subsistence, which they can only find in the Towns, from a want of knowledge of the language of the Country, and also the general want of confidence in these strangers among the farmers, and the low value they fet on their service.

 \dot{Q} . How do you think, that in the County which you reprefent, fettlements might be effected, both by the Inhabitants of the Country and by European emigrants who come hither, most fpeedily, and effectually, and where, in the faid County, or the neighbouring Counties, might they be placed most advantageously ?

A. This question is one which would require more time and reflection, than I can beftow upon it, to answer it properly : generally, there is no effectual way of fettling a Country, otherwife than by fecuring to every one, the fruit of his own Labour, enabling the furplus Agricultural Population to take up new Lands, with the leaft pollible expense, excluding lofs of time, and without any burden whatfoever otherwife than those indispenfable for enabling him to do fo under a fecure title. The Canadian Population are by far the most advantageous settlers in this part of the Country, and with the foregoing facilities they require no looking after or fuperintendance, will fearch out good Lands where they are to be found, and where a fuitable fublistence can be derived from them-I understand that they must be facilitated in every thing connected with religion, in the way usual in the Country, and have every facility in laying out roads ---They have no diflike to ftrangers who mix among them and behave well, but few Canadians of good character will fettle among ftrangers .- With respect to European emigrants, they are very badly calculated for a first settlement in this Country; where it is once begun they may fucceed, but they want fome kind of fuperintendence, till they can be enabled to manage their own common concerns in their own way, for which they ought to have every legal facility. There can be no refident gentry in this Country, fince the Seigneurs have become null, and the fystem nearly abandoned ; the majority of the fettlers will then, inevitably, have to manage their own local concerns, which is indifpenfable in every fettlement of a mixed population, having nothing in common but the English language, and each individual, being by his own exertions without dependance on any others.

I drew up in 1819, a Plan for extending the fettlements in the County of Quebec to the St. Anne River, on the beft Land at the foot of the mountains, and the rear of the fwamps.—I give in a rough draft of it for the information of the Committee. Circumftances have difcouraged me from attending to this bufinefs fince, and I have not time at prefent to look over it, it having been in the hands of a friend, whom I thought might have more opportunities than I could to promote the execution of this Plan. PLAN by JOHN NEILSON, Efquire, for forming a new and extenfive fettlement on the North fide of the St. Lawrence in the vicinity of Quebec.

The tract of Country which it is necessary to confider, with a

view to the contemplated fettlement, extends from Cape Tourment to the River St. Anne, including the Ifland of Orleans.

The exifting settlements in this tract, are thickly inhabited, so much fo, that the farms have been fubdivided into fmall ftrips not fufficient to support their Proprietors, and emplacements of about a superficial arpent have been conceded on many of them for building lots.—The whole of this population has hitherto had no means of extending itself, excepting by emigration to diftant parts; the fettlements of the Ifland being confined by the River, those of Beaupré, Beauport, and Charlesbourg by mountains, and the remainder by tracts of poor Land and fwamps.

The Mountainous tracts present insuperable barriers for the present to the extension of the Settlements which they confine, but the tracts or inferior Land and Swamps, are obstacles, which may easily be, and in fact have already been, surmounted.

The Rivers within the tracts last referred to, commencing with the Jacques Cartier, at a distance of twenty miles from Quebec, have a Southwestern course. On ascending these Rivers, to five or ten Leagues from the St. Lawrence, a Mountainous tract commences beyond the Swamps and the existing Settlements, which seldom extend more than two or three Leagues from the River, where they have long remained Stationary, from the causes before mentioned.

At the foot of these Mountains, there are extensive tracts of good Land, in the most favorable exposition in the Province, and consequen tly less liable to injury by Frost than Land lying much farther to the South with a less favorable exposure. The fertility of these Lands when new, the proximity to Market, the means of uninterrupted Land Carriage, together with the facility of bringing them into a productive State, owing to the nature of the Timber and Soil, will almost invariably enable the Cultivator to pay the expenses of Clearing with the produce of the first or second Crop.

A good Carriage Road from Indian Lorette to the Jacques Cartier, at the Eastern extremity of the good Land above mentioned is already made; all that is necessary to lay open the whole tract, is the prolongation of this Road in the rear beyond the Swamps, to the Settlements on the River St. Anne or the River Batiscan. The distance from the Jacques Cartier, to the St. Anne River, does not exceed four or five leagues, or between eleven and twelve from Quebec by the Valcartier Road, the whole distance to St. Anne Church or the Settlements of the River Batiscan by this Route, would not be greater than the distance to the same places by the Road along the St. Lawrence following its windings. It is probable that the Road proposed to be opened, might be laid out through Cultivable Lands the whole way, with an extent of good Land on each side of it, sufficient for several Concessions, and affording room for a thriving population, as numerous as that which is now pent up on the front of the Seigneuries along the St. Lawrence.

From the bad success of the experiment which has recently been made of opening new Roads with the Public money, it is not probable, neither perhaps is it desirable, that any assistance should be obtained from the Legislature for that purpose. The Individuals, the value of whose Property would be enhanced by the opening of these Roads, ought to provide the means, and ought to take an active part in effecting it, as they are bound by the Conditions of the Ancient Grants en Seigneurie, and it is seldom that any other mode is attended with success.

The holders of the Land, through which the contemplated Road would pass, are :---

1 °. The Commissioners of the Jesuits' Estates.

2°. Mr. Duchesnay, Seigneur of Fossambault.

3°. Possibly His Majesty's Waste Lands.

4°. Mr. B. Panet, Seigneur of Bourg Louis.

5°. The Seigneur of D'Auteuil, and Mr. Allsopp, for Jacques Cartier.

6°. Mr. E. C. Deléry, for Perthuis.

7°. The Crown and Grantees for Alton.

8°. The Seigneurs of Deschambault, La Chevrotière, and Grondines.

It is presumed however, that the Road may be opened without any material advance of Capital, on the part of the present Holders of the Land. It would, it is supposed, be sufficient, that they all were heartily to embrace the plan, and offer no impediment. One of the greatest obstacles to extending new Roads and Settlements in any direction, is the indifferent or narrow minded conduct of some holders of large Tracts of Waste Lands. They will give themselves no trouble, give no facilities for these purposes, but the moment that their Lands become valuable, by the means of those Roads, or new Settlements made at the expenses or by the efforts of others, they exact more onerous Conditions for their Grants, which, with the difficulties and loss of time, frequently met with before the Grants can be obtained, discourage the persons intending to settle.

The Commissioners of the Jesuits' Estates have fixed the Rents and the Conditions of their Concessions according to the opinion of the Law Officers of the Crown, founded on the Law of the Country in that respect. Their Concessions are not onerous, nor alarming to the Settler, and when the frequent mutations in every new Settlement are considered they are exceedingly favorable to the Estates, seeing that they may soon derive an Income from Lands, which, in all probability, under more burthensome Conditions, would have remained for Centuries unproductive to them, and to all others, while the encreasing Population of the neighbourhood is driven to a distance, to other Lands, or compelled to seek a new, and frequently a miserable existence in the Towns and Villages.

It is conceived, that if the holders of the Land in the tracts mention-

ed would consent to the following terms, and give their hearty co-operation and countenance to the proposed Road and Settlement, that it might be speedily effected, without any material disbursement of Capital on their part.

Ist. To make conceffions within the faid tract, on the fame terms and conditions as the Commiffioners o the Jefuits' Eftates. have made their grants on the Jacques Cartier, in St. Gabriel.

2nd. Appoint three Gentlemen in Quebec to lay out the Road, procure a Plan, and make the grants in the name of the different Seigneurs—an Office to be established for the purpole at fome respectable Notary's.

The Land to be granted in Lots of three arpents in front by thirty in depth.,

3d. Only one *Feu et lieu* to be obligatory on those holding a conceffion not exceeding 180 arpents.

The expenses of furveying in the first instance would be confined to laying out the road, and marking three arpent lots on each fide of it with durable Posts, the road forming the basis of the conceffions of thirty arpents in depth on each fide of it. This would be fufficient to enable the fettlers to take possed field of their grants, and they would continue the lines at pleasure—parallel grants at the depth of thirty arpents could be laid out when required; a diagram of the road, and each lot, inferting the name of each perfon taking up a lot with the date of its being so taken, to lie for public inspection at the office.

The profperity of all new fettlements, however favourable may be the fituation and quality of the foil, depends on the judicious and economical employment of labour.—The labouring Proprietor is generally the most fucceffful, his capital being small, he can afford no wafte, he has the ftrongest of all fpurs for exertion.

When Land can be obtained on the easy terms of the Seigneurial Grants, every man that is able to work may readily become a Proprietor; he muft, however, have previously amaffed fome capital, at leaft equivalent to the coft of 1 ools, and the erection of a Log Hut, and Food and Cloathing for a few months. To be enabled to do this he muft have fome capital of his own, or have employment from fome perfons who have already a capital.

The increase in the value of Lands where settlements are made, it is prefumed is sufficient to induce Capitalists to vest some portion of their capital on Wasse Lands in favourable situations, in order to bring a portion of them into cultivation—Many of these Capitalists, cannot however perforally attend to the details; they cannot labour; they must employ labourers; in fact give an opportunity to the labourer to amass capital and become a labouring proprietor.

It would feem that a fund for the purpose of performing the obligation of *Feu et lieu*, or fettlement duties, might be readily raifed by the Gentlemen authorized to make the grants from perfons defirous of taking Lands who have a capital, but cannot perform these obligations themselves—Part of these funds might be employed under the authority of the Gentlemen having the management in opening the first roads of communication, in fact to enable the labourers employed in making the first clearing to get upon the ground with their cattle and tools; the remainder in effecting the clearing and putting up the first dwellings.

The Commiffioners of the Jesuits Estates require 41 arpents to be brought into cultivation, and a dwelling to be built within the year—the expenses to each holder of not more than 180 arpents would be as follows : to be deposited when the authority to occupy is given.

Clearing and Sowing, Stacking and

Pitting £5 per acre, - - £20 0 0 Log Houfe covered with Bark, - 10 0 0

The produce

Say 2 acres Potatoes at £6 per acre, £12.

2 do. Oats at $\pounds 4$ 10 " do. 9 21 0 0 would be fufficient for a Family with a Cow and Pig till a next crop. The fecond year there would be little difficulty of renting the Land to new comers for more than double the interest of the whole Capital expended—One Family more of labourers would be added to the fettlement increasing the value of the Lands; in fact, the constant influx of new settlers would so form a market on the spot, giving additional value to all the produce of the place.

Many perfons would take Lands who know nothing about the fteps for a first fettlement, who, in fact, if they were able, cannot attend to it. The economy of one trusty, intelligent, and accountable Agent for the whole, will be sensibly felt by every one, who has the smallest experience of the difficulties Gentlemen have of managing business which they do not well understand, with people apt to take advantage of their delicacy, want of information, and personal superintendance.

From the experience which has been had in the *Valcartier* Settlement, it is believed, that if a Plan, of the present description, as it respects the holders of the *Seigneuries*, and the management of the Settlement, could have been adopted, and cordially acted upon by all parties, that the Settlement would at present, instead of about a hundred Souls, have contained ten times that number.

By opening, or causing to be opened, four leagues of a Carriage Road, by raising provisions on the spot, sufficient to support a large number of Labourers, and of new Settlers, and thereby saving an expense of transportation, nearly equal to the host Cost of the Provisions ; in short, by placing Labourers and subsistence four leagues in advance into the Forestr, in the direction of the tract of Land now proposed to be opened, the most difficult part of the work has been done, and the strong, obstinate, and almost universal prejudice, that there was no extent of Land on the North side of the St. Lawrence, in the vicinity of Quebec, beyond the existing Settlements, fit for Cultivation, has been dissipated, it is hoped for ever, in three years, by the united exertions of a few Individuals.—October 1819.

THURSDAY, 29th January, 1824.

Mr. Stuart in the Chair.

Juhn Neilson, Esquire, again appeared before your Committee.

Q. At what amount do you estimate the Population of Lower-Canada, and what are the data whereupon you proceed in making your calculations?

A. I have no certain data upon which I can form an Estimate of the present Population of Lower-Canada. The last Census taken of which I have any knowledge was in 1784, by Commissioners appointed by General Haldimand in virtue of Royal Instructions. The following Abstract of it I have reason to think is correct :---

Total	District of Quebec.	City and District of Three-Riv.	City and District of Montreal.	DISTRICTS.		
20131	7911	2080	10140	Married Men.	_	
20131 18904 19354	7137	1973	9794	Houses.		
19354	7380	2247	9727	Married Women.		
9381	4112	912	4357	Above 15 years of age.	з	
24552	10041	2874	11637	Under 15.	Males.	
8892	4206	877	3809	Above 14.	Fen	
22513	8984	2726	10803	Under 14.	Cemales.	
6491	1795	676	4020	Servants.		
	93	104	304	Absent.		
1893	150	118	625	Infirm.		
304	88	_4	212	Slaves.		
501 893 304 1569818	628 2 40	214875	726703	Acres of Land.		
3833493 30096	126318	39349	217682	Bushels of grain sown yearly.		
30096	9116	31.55	17825	Horses.		
22094	8456	1602	12036	Oxen.		
44291	16544	5368	22579	Cows.		
32206	12439	5147	16620	Young Cattle.		
	41252	10206	53238	Sheep.		
84666 70466	22202	6458	41805	Hogs.		
10854	357.5	1291	5968	Fusils.		

NUMBER OF SOULS, &c. IN CANADA, IN 1784.

This Enumeration, like every other Enumeration, owing to omissions against which very strict precautions have not been taken, was probably less than the real Population.

The Population of Lower-Canada in 1764, has been stated at about 60,000 Souls; an increase in the same ratio would give at present about 480,000 Souls.

The ratio of increase has however, in all probability, been much greater, particularly in the period between 1792 and 1812, from the stimulus given to labour by the Exports of Grain during that period.

The Statements of the Curates given in to Government in 1823, and published in the Quebec Gazette, with Allowances for Parishes for which there were no Returns, made the Population 364,000. In this Statement there were few Protestants, and it was well known that the Population of many of the Parishes is stated at far less than the true number: The Protestant Population of Quebec is altogether omitted.

The Militia Returns of Lower-Canada as stated by the Adjutant General last year, was 70,443.

It is acknowledged to be very incorrect, and certainly below the true number. In the States of Maine, New-Hampshire, and Vermont, where, taking the whole population together, the ratio of increase probably differs very little from that of Lower-Canada, and where, it is believed, the Militia age is nearly the same, a Militia of 83,516 gives a Population of 778,280. I believe however, that their Militia age is from 18 to 45, ours is from 18 to 60, and perhaps the ratio of increase is something greater in New-York, although I think we fully surpass in that respect Vermont and New-Hampshire.

There are probably more omissions in our Militia Returns than in theirs: 1 should conceive that the population of Lower-Canada at the present time is 600,000 souls, in which case the population would have doubled every twenty years from the conquest.

Q. From what causes does your estimate differ so much from that of the Surveyor General of Lower Canada, and have you any and what observations to make upon the said estimate now shown to you ?

A. The Surveyor General's calculation is chiefly founded in the statements given by the Curates in which every person who has a knowledge of the Country admits there are a great many omissions—The Township and Protestant population in general, I apprehend has been estimated by the Surveyor General without any very certain data—His division of the population into Counties and Districts, I consider to give a sufficiently correct idea of the relative population of the different divisions, and it is possible that generally his estimation may be nearer the truth than mine.

3

THURSDAY 29th January 1824.

Mr. Stuart in the Chair.

Louis Sivrac, of the City of Quebec, appeared before your Committee and said :--

I have navigated the River St. Lawrence and the Gulph, along the Labrador Coast, and to Halifax, for Fifty four years past : for thirty eight years I navigated as a Ship Master. For the last twenty years I navigated the Saguenay as a Ship Master in the service of the North West Company. In that capacity I have had the command of four Schooners, the first of 112 Tons, the second of 54, the third of 36, and the fourth of 40 Tons. The number of Trips which I made to the Saguenay was usually three or four a year, I have however made as many as five.

Q. What is the nature of the Harbour of *Tadoussac*, what time is the navigation open, and when does it close, and what are the advantages and disadvantages of the said Harbour ?

A. In the Spring the Harbour may usually be entered from the 10th to the 20th of April, but that is as the years may be.—The navigation closes from the 10th to the 20th of November. There is a differrence as to the opening of the season of twenty days with respect to the Harbour of Quebec, and there is a difference of One Month as to the Autumn, in favour of the Harbour of Tadoussac.

On the 20th April 1780, I left the Labrador Coast and I arrived at St. Patrick's Hole; the Ice opposite Quebec was still fast; and I went to Quebec on foot over the Ice. The entrance of the Harbour of Tadoussac is half a league wide having along it two Shoals, one of them to the East, the other to the West. It is capable of containing, perhaps as many as twenty of the largest Vessels. With a good Pilot the Shoals are not dangerous. At the entrance of the Harbour, we sounded the Saguenay in the middle of the Stream, and found no bottom with 330 Fathoms of Line. I was present when that was done by Captain Martin. At the distance of one Hundred Fathoms from the Shore, Vessels Anchor in twelve or fourteen Fathoms : the bottom is good, it is of Clay and black Sand. In that Harbour Vessels are safe against every wind provided they be strongly moored to the Shore. There is no Current in the Harbour. The Current begins about a Mile off. The Harbour is still Water.

Q. What is the nature of the Navigation from Tadoussac to Chicoutimy; When does the Navigation there open, and when does it close; what are the most usual Currents, Shoals, Anchorages, and Harbours between those two places, and what are the dangers to which a Vessel is exposed during the said Navigation ?

A. The Navigation opens about the tenth of May, & closes about the

Į,

end of October. The Saguenay is frozen over from the Isles St. Louis, to a distance of Seven leagues from Tadoussac, as far as Chicoutimy, from the 10th of December to the 10th or 20th of May.

The most prevailing Winds are the North East and North West ; the first Harbour is the Isle St. Louis, there is Anchorage in Twenty Fathoms Water, with moorings to the Shore, and there is good Shelter. The Harbour consists of the whole breadth of the Saguenay, which is there half a league, where there is Anchorage under Shelter of the Isle St. Louis, which is a full a league in circumference ; it is a Rock about fifty feet high : it is quite as steep as Cape Diamond ; its summit is covered with Birch, Pine, White Fir, and other soft Wood, and there is Game thereabouts ; it is very difficult to walk round it. There are five other Islands a little higher than the Isle St. Louis, which are about half the size of Isle St. Louis Three leagues higher up is the Harbour of St. John, which is half a league long by the whole breadth of the Saguenay. There is Anchorage there in twenty Fathoms Water with Moorings to the Land. Two leagues upwards is the Ance de la Trinité which is half a league in depth and one Mile wide. There is Anchorage in twelve Fathoms Water with Moorings to the Shore.

Cape à L'Est, is then reached which is five leagues from the Post of Chicoutimy. There is Anchorage in eight Fathoms Water on the whole breadth of the River. On leaving the Harbour of Tadoussac to enter the Saguenay the most common course is N. N. W. Above the Isle St Louis a W. N. W. course is to be followed. From the Harbour of St. John, to reach Cap à L'Est, the course is N. W. 4 W. From Cap à L'Est, to the River Carbou the course is North : thence to the Rivière du Moulin, which is half a league from Chicoutimy, the course is W. S. W. 3 leaving this place for Chicoutimy, the course is North.

Q. What are the Tides at Tadoussac and at Chicoutimy ?

A. At Tadoussac the Tide is high at full Moon and at new Moon, at two hours and three quarters after noon, or after midnight. At Chicoutimy at four hours and a quarter after noon or after midnight. The Tide when high at Chicoutimy rises Eighteen feet perpendicularly. At Tadoussac the height of the Water is the same as at Quebec.

Mr. Edward Thereau, appeared before your Committee.

Q. Have you ever been at the Saguenay and at what parts thereof, at what time, and in what capacity ?

A. I lived at Chicoutimy about eight years. I worked there for the gentlemen of that Post. I have not been higher up. I left it last Fall.

Q. Have you feen or infpected any of the lands in the neighbourhood of Chicoutimy or of the Saguenay ?

A. I have gone over the neighbourhood of the Post of Chicoutimy, to the extent of two leagues, more or lefs.

Q. What is the quality of the lands in this neighbourhood ?

A. They are of every description; fome are very good, and fit for cultivation :- The only obstacle I have met, is a great number of rocks on fome of those lands, but where the land admits of cultivation it is very good.

Q. What is the number of Indians who were in the habit of coming to the Post of Chicoutimy during your residence ?

A. There might be a dozen of Families who came annually to that Post, while I remained there.

. Q. What was the nature of the Trade carried on there ?

A. The Indians brought Furs, and received in return every kind of Merchandize which they wanted, as Flour, Maize, Ammunition, Arms, Snares, and other Dry Goods.

Q. Of what nation were those Indians, and what was their character ?

A. They were *Montagnais*; they were a good and very mild People, a little addicted to fpiritous liquors as most of the Indians are.

Narcisse Amiot of Quebec, Esquire, appeared before your Committee.

Q. Have you been employed by any perfon of Three Rivers to obtain Lands for him ?

A. In the beginning of last December Mr. Edward Kimber of Three Rivers requested me to go to Mr. Ryland's office to ask for Location Tickets, which Mr. Ryland was to procure for him in a few days. I went several times to Mr. Ryland's office without meeting him there, but meeting him one day he told me that the Lots claimed by Mr Kimber had already been allotted to other perfons, and that Mr. Kimber would be obliged to prefent a new . petition to His Excellency if he wished to obtain Land : I thereupon remarked to Mr. Ryland that Mr. Kimber had obtained the Surveyor General's certificate that the Lots of Land by him Mr. Ryland answered that that had freclaimed were vacant. quently happened, but that in order to avoid the granting of the fame Lots to different perfons, he took the trouble, when new applications occurred, of afcertaining what Lots had theretofore been applied for, and that he had often remarked that the Surveyor General had granted similar certificates when the fame lots had previously been taken up by other perfons :-- Mr. Ryland further observed to me, that if Mr. Kimber should prefent a fresh Petition to His Excellency for other Lots, it was not his intention to be paid twice.

William Sax, Efquire, first Clerk in the Surveyor General's Office, and Land Surveyor, appeared, and ftated :--

That he has been a Land Surveyor since 1796, and has been in the Surveyor General's office since 1814, two years and three months of which he was acting Surveyor General during the abfence of Colonel Bouchette.

Q. Do you know the Town, ips on Craig's Road, and will you state their number and quality of foil?

A. The Townships are : Shipton, Tinwick, Chester, Halifax, Inverness, Wolfstown, Ireland, and Leeds : the foil in general is good so far as I have seen it, near the road it is very stony and hilly, the Country is broken and uneven, timbered with Beach, Maple, Elm, Birch, Spruce, Pine, Cedar, and Ash and Bass.

Q. When were the faid Townships respectively surveyed, who were the leaders of them, and of what description of persons consisted the associates ?

A. As near as I can recollect they were furveyed in or about 1800; the Leaders, fo far as I understood, were, of Shipton, Mefsrs. Barnard and Cushing, their affociates were people of their own choosing whom I do not know, and in general I think people of not very refpectable ftanding in Society : the north west half of the Township of Tinwick was granted I think mostly to Loyalists and Canadians, without any particular leader that I know of : the north east quarter of this Township I furveyed myfelf in 1813 for the late Honbie John Young and Family, and the fouth east quarter was furveyed by Mr. Ecuier, the year before, a part of which for the Honble. Chief Juffice Sewell, as I understood. The Township of Chester was furveyed or explored about that time by a Mr. Kilburn for, I think, the late Mr. Frobifher and Family, of the north west Company : one half of which Township was shortly after granted either to Mr. Frobifher and his Afsociates, or to fome other gentleman of the North West Company and his Affociates.

The Township of Halifax was furveyed or explored about the fame time by Mr. Kilburn, and a part of it shortly afterwards granted, either to Mr. Mc Tavish and Associates or fome other gentleman and Associates of the North West Company.

The Township of Inverness was also by the same Surveyor about the same time either explored or surveyed, and a part of it also granted to some one of the Partmers of the Nort West Company and their Affociates.

The Township of Wolfstown was also about that time explored or surveyed by the same Surveyor, and a quarter thereof granted to the late Nicholas Montour, formerly Partner of the North West Company and his Affociates.

The Township of Ireland was at that time explored or furveyed by the same Surveyor, and a part of it granted shortly after to the late Mr. Frobisher and Associates,

The Township of Leeds was also explored or furveyed about the fame time by the fame furveyor, and a part thereof granted either to Mr. Frobisher and Affociates or to fundry other perfons.

Q. Have you had any occasion, and when, latterly, to visit the faid Townships, or any of them, and what is their state and condition or of any of them, as far as the settlement of them is concerned ?

A. I have visited those Townships lately, viz; the Township of Shipton in 1821; the Settlements in that Township were then in a forward state, the clearings and improvements were flourishing fo far as I could observe them, the buildings were confiderable, many of which were erected with taste, and the Inhabitants generally appeared to be in easy circumstances.

In Tinwick there were a few houfes from the Shipton line along Craig's road, perhaps four or five, clearings were commenced, and in a ftate of progrefs.

In Chefter in 1819 I obferved but two houfes on Craig's road, the most confiderable of which is the property of Nathaniel Brooks who has made a large clearing well fenced in.

Neither in Halifax nor in Inverness did I observe at that time any clearings or houses along the road, excepting in Inverness, there were then two small houses occupied by Aldrich, father and ion

In Ireland were feveral houfes along the road, for inftance a Mr. McLean had a tolerable good houfe with a large improvement at his refidence upon Lot No. 2, in the fecond range in that Township—I observed another house on a road by a branch of the Bécancour River, near a Lake.

In Leeds I observed but two houses at that time along the road, one was occupied by one M⁴Lean, and the other appeared not to be occupied, it was called Palmer's house, there were however some clearings along the road.

Q. In what way did the actual fettlers whom you faw obtain their Titles ?

A. I did not inform myfelf of this.

Q. Have you any knowledge of applications having been made for portions of the faid Lands by any and what clafses of perfons, previous to the iffuing of the Patents in favour of the prefent Patentees of the faid Lands, and before any promife of grants had been made to the faid Patentees?

A. At that time I was in the Diffrict of Montreal and I had no occafion or opportunity to inform myfelf respecting the above query, therefore I do not know.

Q. Do you think that if Craig's road were fettled and kept in good repair that this would be beneficial not only to the fettlement of the adjoining Townships in general, but also to the City of Quebec, in particular by bringing along this road Provisions, Cattle and other produce, from the Townships and the United States to this market ?

A. Certainly, that has always been my opinion.

Q. What is the whole quantity of Land that has been granted to the Militia which ferved during the last war, and how much does there remain ftill due to them to the beft of your knowledge and belief?

A. I do not know, nor could I fate without reference to fatements and documents which have beeen regularly made out fince 1817, and are of record in the Surveyor General's Office, and of which the Surveyor General would be able to give a very fatiffactory and complete flatement.

Q. Does there not remain a large quantity due to the Militia ?

A. I think there does.

Q Is the quantity remaining due equal to, or does it exceed the quantity already granted ?

A. It far exceeds it in my opinion.

Q. To what causes do you attribute the non granting of these Lands ?

A. I have no means of stating them.

Q. Are you acquainted with any actual settlements formed by Militia Men who ferved during the late American war ?

A. I understand that fome are making or forming Settlements in fome of the Townships under agency; of myself I know of no actual Settlements of that description.

Q. Are the grants that have been made to the Militia, made principally to Privates, or to Officers of the Militia ?

A. There are many Locations made to the Militia, but I cannot fay what is the proportion between the Men and the Officers.

Q. What is the number of grants made fince the late War to Canadian Subjects of His Majefty not having served in the Militia?

A. I cannot tell, but I think fome estimate may be made of the quantity from documents in the Surveyor General's Office.

Q. Can you form any conjecture of the probable quantity fo granted ? A. The Townships of Sethrington and Blanford have been granted to that description of perions, and other Townships have been furveyed for that purpose, so that I suppose the quantity actually granted is under 40,000 acres; the Townships surveyed are those of Cape Chat, Matane, and St. Denis, none of which are yet under patent.

Q. What is the quantity of Land actually granted fince 1815 to European Emigrants, and in what quantities ?

A. The Lands granted to that defcription of perfons is in quantities of one hundred Acres and two hundred acres generally to the applicants, but as for the whole quantity granted, I beg to refer to the documents to be found in the Surveyor General's Office, however it does not exceed I think one hundred and fifty thoufand acres.

Q. Are the grants fo made principally in lots of one hundred or two hundred acres ?

A. I think they are about equal, if any thing the Locations of one hundred acres exceed.

Q. What was the loweft quantity ufually granted to actual fettlers before 1815?

A. Previous to 1815 I do not recollect of any Location grants, and when Townships or parts thereof had been previously granted, it was understood that every perfon named in a Patent, of the age of majority, was to have no less than two hundred acres.

Q. Is not the quantity of two hundred acres the smallest quantity which in this or the adjoining Provinces, or the old British Colonies, as far as has come to your knowledge, was expected by a settler to be received, going into a wilderness for effecting a new fettlement ?

A. I have always underftood that two hundred acres was about the quantity, previous to 1815.

Nicolas Vincent, an Indian Chief, (Isawanhonhi) appeared before your Committee.

Q. In what parts of the Country have you hunted, at what period of your Life, and at what distance from the River St. Lawrence, and from the actual Settlements ?

A. At the age of Fifteen, I hunted along the Branches of the River Batiscan, which I have descended as far as the River St. Lawrence. I have also hunted in the rear of the River Jacques Cartier as far as the Branches of the River Chicoutimy. I have also been in rear of the River Malbaie. On the South side, I have hunted as far as the River St. Jean, and in the upper parts as far as Bécancour, in several of those places as far as twenty five or thirty leagues from the Settlements. O. Give a description of the Country which lies between Valcartier and River Chicoutiny as to Soil, Mountains, Rivers, Timber, and capacity for Culture, and the Route which you pursued ?

A. About twenty years ago I departed in order to hunt in those parts. I went by way of Lake St. Charles, and crossed a carrying place (Portage,) about three leagues long from that Lake to the River Jacques Cartier. Thence having ascended the River three leagues, we crossed a carrying place (Portage) of seven or eight leagues where we again met the same River, which we followed for about ten leagues and then reached the River Chicoutimy. In this journey we met very little good Land, it is a Mass of Mountains and Rocks ; what little level surface there is, is Marsh and Lake of which there are a great many. The River Chicoutimy and the Jacques Cartier, have their source at the same place, at the distance of half a league or a quarter of a league. These two Rivers have their source in a great number of Lakes into which several Rivulets empty themselves. On my return, I made a Raft at the source of the River Jacques Cartier on which I descended three or four leagues, I then took my Canoe which had been left there and descended the River Jacques Cartier about Ten leagues, meeting in that distance two Falls, one of them nearly twenty feet high, the other ten or fifteen feet. I found two carrying places, one of Six Arpents and the other of four. The carrying place between the River Jacques Cartier and Lake St. Charles, is about four leagues from the Côte à Haroussin. I crossed the carrying place to Lake St. Charles, crossed the Lake, and descended the River St. Charles to within fifteen Arpents of our Village. Our Company consisted of three persons.

The River Jacques Cattier runs North West, at the distance of Ten leagues, it separates into Three Branches, the first runs between the South West, and the West; the second runs North; and the third North East. In descending I followed the South West branch. There are small Rivers which fall into the Jacques Cartier, but I do not know their names.

The Country is Mountainous from one end to the other of the route I have described, rocky, not producing any Hard Wood, but producing Birch, Fir, and Spruce, that Country can never be Cultivated.

Q. What Game do you take?

A. Beaver, Otter, Martin, some Musk Rats, and on the melting of the Ice, Ducks. Some *Caribous* are met.

Q. At what time does the Ice take in the Upper parts of the River Jacques Cartier, and when does it melt ?

A. The Ice begins to form in those parts in September and to melt in June?

Q. How long were you absent on that Hunt, and what did you do for Provisions ?

A. We were three : we took with us a Minot of Indian Corn per Man, about forty Pounds of Meal per Man, two Pounds of Hog's Lard per Man, and twelve Pounds of Pork. We carried that, on three Indian Sleighs, every Man his own. We had each to carry moreover Three Traps, one Fowling piece, one Hatcher, Fish Hooks, two Pounds of Tobacco, one Pound or one Pound and a half of Powder, six Pounds of Shot and Bali. We at twice a day, on setting off in the morning, and on closing our Journey in the Evening. We made Cakes with Lard in our Iron Pan; we made broth with Pork and Indian Corn or Beans : these Provisions were sufficient for twenty or twenty five days without the aid of Game. We afterwards lived on the produce of our Chace, sometimes poorly enough.

Q. What is the quality of the Soil in the Country in rear of Batifcan, and is that Country level or Mountainous?

A. There are places in which Parifhes confifting of good Land might be formed, and others where the Country is Mountainous and fomewhat Rocky. I do not think Settlements could be formed in the Mountains, there is too much Rock. I began my journey with four Iroquois; we proceeded between North and South Weft; we croffed the Jacques Cartier and River St. Anne; we paffed above the River Portneuf and Champlain, and we reached the River Batifcan at the diftance of twenty Leagues or thereabouts from the River St. Lawrence in a right line; I fpeak of the place at which we reached the River Batifcan. We occupied about ten days in performing our journey; we stopped in our way a quarter or half a day, as we thought proper for the purpose of Hunting. The Branch of the River Batiscan to which we had come was navigable for Canoes and even for Batteaux, and is nearly as broad as the River Jacques Cartier, oppofite Mr. Neilson's Land on the latter River. We descended in Canoes probably about thirty Leagues, as far as the mouth of the Batifcan :-- there are many carrying places, perhaps twenty or twenty five : there is a Fall two or three Leagues from the River :- there follows a feries of Falls :- the Lands improve towards the lower part of the River; and there is a great quantity, of Land along the River fit for Cultivation :- the Country lower down is not very. Mountainous.

Q. How far from the River St. Lawrence on the South fide have you hunted and at what time?

A. I went to the River Duchefne to hunt laft Fall. That River empties itfelf between Lothbinicre and St. Pierre :- It is not navigable :- there are five Conceffions there, and I have hunted to the diffance of four or five Leagues from the rear of the Settlements :- the Country is level, there are no Mountains; marfhy, but a good foil :- the Lands along Craig's Road are Mountainous with many Hills, but the foil is good; I have

M

been as far as the River Becancour I have also been along some of the branches which fall into the River St. John on the South Shore. I have been at *Temiscouata* and from thence to the Peninfula near Frederickton:—I went for Troops during the War; we fuffered much from want; we passed through a large track of good Land.

FRIDAY, 30th December, 1823.

Mr. Stuart, in the Chair.

Mr. Francois Verrault appeared before Your Committee.

Q. Have you had any, and what means of acquiring a knowledge of the Saguenay, and of the surrounding Country?

A. I am now 65 years old, and from the age of fifteen to last Fall, I have remained in the Saguenay Country, and made excursions into the surrounding Country.

Q. What are the Length, Breadth, Depth, and course of the Saguenay?

A. It is 25 leagues from its Mouth to Chicoutimy, as far as which place the tide extends: the general breadth of the River Saguenay is three quarters of a league : it is extremely deep until within three leagues of Chicoutimy.

Q. What Streams flow into the Saguenay or into Lake St. John, their length, breadth, depth and course respectively; how far are they navigable, and what kinds of Fish are found in the Saguenay or in Lake St. John, or in the Streams which empty themselves into either?

A. There are many. The River Ste. Marguerite, navigable for Birch Canoes through an extent of forty leagues, in which there are carrying places at intervals, a quarter of a league wide at its mouth, empties itself on the north side seven leagues from the Mouth of the Saguenay. The River L'Ance St. Jean, navigable in Canoes for fifteen leagues on the south side, empties itself into the Saguenay two leagues above the River Ste. Marguerite; it may be ten arpents wide at its Mouth. L'Ance de la Trinité, navigable for twelve leagues in Canoes, also empties itself on the south shore into the Saguenay, four leagues above the Ance St. Jean, it is about three arpenr broad at its Mouth.

The River of La Baie Ha, Ha, is four arpents wide at its Mouth, navigable in Birch Canoes for twenty-five leagues, falls into the Saguenay on the south side; into that Bay falls a small River which is not navigable for Canoes, but in which there is a good Salmon Fishery; it flows from the west.

The River à Valin, flowing from the north, is six arpents wide, navigable in Canoes for fifty leagues; it falls into the Saguenay five leagues above Ha Ha Bay.

The River Chicoutimy where the Post is situated is eight arpents

wide, and is navigable for thirty leagues in Canoes. It flows from the south.

Above the Post of Chicoutimy, the distance as far as Lake St. John, is thirty leagues by the Saguenay, which forms the outlet of that Lake. There are several carrying places, one of which is two leagues in length, the others are much less considerable.

The River Chicoutimy, (signifying, "further on it is still deep") which falls into the Saguenay at the Post of Chicoutimy is seven leagues long, flowing from the south ; there are five carrying places on that Ri-That River is formed by Lake Tsinogomi, (Long Lake) which ver. is seven leagues long. On the south side, three Rivers fall into that Lake, which are about one arpent and a half wide, and navigable in small Canoes for a distance of eighteen leagues. On the north side of that Lake, a River empties itself into the Saguenay, and on the same north side another River empties itself into the Lake. Those two Rivers are navigable for Canoes. At the extremity of Lake Tsinogomi, there is a carrying place of three quarters of a league; a Lake is then reached, which is called Tsinogomitsisch, which is two leagues long by eight arpents in width. The Lake last mentioned joins another Lake called Kasushikeomi, (the Lake of clear water) which is about half a league long by ten arpents in breadth, but which has no outlet. The outlet of Lake Tsinogomitsisch (the lesser long Lake) is a River which is two leagues long, called Pashikaouinanishdushihi (of Alder) about twenty five feet wide. After that River, the Belle Rivière is reached, one arpent and a half wide, and about three leagues long, having a carrying place, and emptying itself into Lake St. John at Koushpigan, (a place which is ascended.) Lake St. John is fourteen leagues long and fourteen wide. On the south side, two leagues from Koushpigan, a little River falls into that Lake, which is not navigable, and is called Kuoshpygish (where is a small ascent) two leagues from that small River, is a considerable River called *Metabishouan* (the place where the course of the water ends) at which is the Post. That River is navigable in Canoes for thirty leagues, it is six or seven arpents wide.

Four leagues from thence there is a River, (also on the south side) called Ouiguatshouan, (do you see the Fall there, a carrying place must be crossed) which is navigable in Cances for at least twenty-five leagues, and six arpents wide.—Three Leagues from thence there is a small River called Ouiguatshganish, (a small ascent) two arpents wide and navigable by Cances for twenty-five leagues.—Seven leagues from thence (also on the south side) is a River called Assuapmousoin (place where the Elk is laid wait for) a quarter of a league wide, navigable for eighty leagues where there is a Lake of the same name, on which there is a post.

On the north side of Lake St. John, is the River *Péribonea* (the curious River)—this name is probably given to that River because its water is clear, and Game and Fish abound there.—It is situate twelve leagues from the outlet of Lake St. John, it is half a league wide and is navigable for thirty leagues in Cances.—Two leagues higher up is the

River Mistassini (the large Rock) navigable for forty leagues at least, three quarters of a league wide at its mouth .- By this River (Mistassini) perhaps at least forty small Lakes and carrying places are passed, to reach Lake Mistassini which empties itself into Hudson's Bay .- Near the Post Assuapmousoin, on the Lake of the same name, there is a River called Nicouta (swampy places) three quarters of a league wide, navigable by Canocs for eight leagues-There is then found a lake of the same name which is four leagues long by one league and a half wide which leads towards the north, at the extremity of that Lake there is a River called Matawenanish (the crooked River) about eighteen leagues long by seven arpents in width-there is then a small Lake Chacanaka (the rocky Lake,) fifteen arpents in width by twenty-five in length-these are followed by five small lakes, where there are several carrying places ; the whole together may be one league-having attained the highest ground whence the waters begin to flow to the southward towards Lake Temiskaming (very deep Lake) which leads towards the parts in rear of Montreal, but where I have never travelled-I do not know the extent of Lake Mistassini, but I can state that it is ninety leagues long by at least sixty in breadth, and that it is full of Islands-The Islands are large : we paddled along one of the Islands for one day and a half without having seen the end of it-I crossed it at a strait where it was eight leagues broad-In crossing the lake at the shortest interval between Island and Island is eight leagues.

In crossing the Lake there are fifteen large Islands-there grow on those Islands low. Spruce and Juniper as on the sea coast-Timber is prevented from growing there by the frequency of high winds-There are Moose-Deer there-The water is extraordinarly clear as at sea-A stone may be distinguished in fifteen fathom water-Fish abound, that is to say, Pike, White Fish three feet long, Salmon Trout, I have taken some which weighed 42 pounds-Another kind of Trout which is not found here, and is only found in Lakes where the water is as clear as the Lake in question-the Indians call it Maingouche (which means the long Fish) it is extremely fat, of excellent flavor, sometimes two or three fect long and eight inches thick, there is a great deal of Poisson doré, Perchaudes, Carp of two kinds, white and red-I have seen red Carp two feet and a half long, the white ones are not quite so large-this Lake has three outlets-there are to the right two outlets twenty leagues distant from each other, that on left hand is four leagues from that in the middle-that on the left hand falls into Hudson's Bay-The two others unite again at the distance of forty leagues or thereabouts and flow into Hudson's Bay-the place where they reunite themselves is called Néwishqueska (Né comes from the Point, wishque from Birch Bark, and ska much) and it may be rendered into English (Birch Point) .- This Point is also known by the name of Fort aux Anglois (English fort.)

The middle outlet which we followed is about half a league wide.— In the harbour I have mentioned, I have seen four Barges capable of containing 80 packages of eighty pounds weight each—They were as large as Whale-Boats and made in the same manner, and in those barges the descent to the sea was performed being a distance of sixty leagues.

I have only been 70 leagues from Mistassini. The most common Timber along that outlet is Red Spruce. The Fort was built of that Timber and of a kind of Grey Pine, of which there is none hereabouts. I believe it is called Cypress. There is also Poplar, Birch, and a great deal of Swamp Spruce.

Q. Have you ever gone round to Three-Rivers by the Saguenay, and what was your Route?

A. I have made that Tour twice. The first time was, I believe. twenty five years ago; the second about eighteen. After reaching Lake Nicoula, a carrying place of about a quarter of a league is crossed; and there is a little River about a perch and a half wide-the River Micouashah (Red Carp River); that River is descended for about two leagues. There is then a small carrying place of about six arpents, when the edge of a Lake is reached which is full of Islands, and is called Ash Katsi, (the Rocky Lake.) After proceeding about four leagues on the Lake, a River is met, which is about four arpents broad and four leagues long; at the extremity of the River, is a Lake about six leagues long and two broad, which is valled Kapistetsouin ; (the Lake of Foam) at the end of the Lake, a Fall of about forty feet renders necessary a carrying for about fiftcen arpents. Embarking again on the same River and proceeding about six leagues, a Lake is reached which is about five leagues long and two leagues broad, which is called Lake Tsimouskoumino Shapaigan, (the Lake of the Old Man). At the end of the Lake the River is too small, and it is necessary to perform a carrying of three quarters of a league. The carrying place being crossed, there is a Lake four leagues long and about one league broad; there is then a carrying for three quarters of a league, which leads to a small Lake about three quarters of a league long and half an arpent wide : another carrying place of about twenty arpents is made, and the border of a take is reached which is four leagues long and one and a half broad ; it is called Kaouashikami (the Lake of clear Water.) At the end of this Lake is a short carrying for ten arpents along the outlet, and here that elevation is attained whence the waters flow into the River St. Maurice. The River last mentioned, is the first of the waters on that side, and that Lake is the limit of the King's Domain. The Outlet of that Lake is a small River about one perch wide, and navigable for Canoes for about a league and a half. At the termination of that small River is a Lake three leagues long and about one league wide, where there is a carrying place a league in length; after which is a Lake called Miscashi, (the Point of Rock) which is about two leagues long by one league and a half wide-this Lake is full of Islets; its outlet may be about ten arpents wide and twenty arpents long. There is a carrying place fifteen arpents long, which leads to Lake Quashoutaoucka, (Sand Banks) twelve leagues long and two leagues wide. The Lake last mentioned, is the source of the River Metabellottine, or (the River of Winds,) which is the River St. Maurice that flows into the River St. Lawrence at Three-Ri. vers. Lake Quashoutaoucka is seventy leagues north-east of Three. Rivers: at the termination of this Lake are two leagues of River near_ ly ten arpents wide : then a Lake called Kapemitsigama (Cross Lake) four leagues long by about two leagues wide; the end of this Lake towards the South is passed, and its Outlet forms a River four arpents. broad by four leagues long ; another Lake is then reached, called Ocoutsioushta, (the Lake in which we soon shall plunge-alluding to the Rapids which are near.) This Lake is probably six leagues long by three wide ; its Outlet is a River about six arpents wide : that River is bordered with Cypress, and there are very lofty Mountains on both sides. Six leagues from the Lake just mentioned, is a Post called Kikendac (the Grey Pines.) This word is a corruption of the true Indian word, Outcishhkata. Six leagues above that place the River becomes almost a Lake, in which there are several extremely flat Islands. After that is a carrying place, called Shikaque paushtiki, (the Polecat carrying place.) About six leagues above that carrying place is a large River on the north side about five arpents wide, navigable in large Canoes for twenty-five leagues, called Koushapashiganushipi, (the River of Juggling): that River empties itself at that place into the Saint Maurice. About four leagues lower down on the north side, there is a carrying place half a league long, called Lekaunigan, (the Sandy carrying place.) Three leagues lower down there is a carrying place on the same side called Kamatshi ashini, (carrying place of rugged Stones,) whence descending four leagues there is another carrying place on the same sidecalled a Shikueta, (carrying place of the Caldron); eight leagues lower down, on the north side, there is a Post established by the North West and Hudson's Bay Companies, called Uimutashé, (the Point which is seen.) On the south side, opposite that Post, are two Rivers, one of which is called the River Caribash, (of the Ribband) one arpent and a half wide, and which runs in rear of Montreal westwards, navigable in Canoes, I do not know how far. The other, six aspents long and quite round, called Turibi, (very bony white fish.) This is followed by a short carrying place of four arpents, which leads into a litte River three quarters of a league long; on the north side of that small River a carrying place occurs, six arpents long, ; then a River is entered upon, which is called Raman, (Vermillion) which is three leagues long by twenty arpents broad. Towards the south of the River last mentioned. there is a carrying place of three quarters of a league, called Pakan, (carrying place of the Nut.) There follow three leagues of Rapids, _ and on the north side, a carrying place called Nantové, (carrying place of the Iroquois) half a league long. Thence a River is passed by effecting a carrying of about twenty arpents, called Kaouibushka, (burnt) then the south side is descended three quarters of a league, when there is a carrying place, called Arushkakanounigami, (of the Raspberry) there the River is crossed on the north side, where there is another carrying place,

called Ashupickaigan, (of the crossing) at the end of this carrying place a rapid is entered, which is about three quarters of a league long, called Uakapah-ushtik, (the crooked Rapid). At that place the River Saint Maurice is entered, which was left at the Post of Kukukash. Three leagues to the south of that Rapid, there is a great Rapid, where a carrying is effected when the waters are very high, which is called Mishtniash, i(the large Point ;) two leagues lower down, on the north side, there is a Rapid called Kaniash, (Point :) four leagues lower down, there are great Shoals, called Pakouapaustik, (flat Rapid ;) about a league and a half more to the south, there is a little River, called Tutushepi or Nabot, (Milk.) This River is navigable in Spring when the waters are high, and by that River, at that time, when the waters are high, the Voyageurs ascend the River Raman, (Vermillion.) Three leagues lower down, to the north, is another River four arpents wide, called Kanashou, (the Name of an Indian who has Lands there,) and by that way Lake Saint John may be reached by the River Ouiguatshganish, (small ascent) which I have described above. Three leagues lower down, on the north, is a River three arpents wide at its mouth, and navigable by large Canoes for forty leagues; it is called Mishtaruéaushipi, (the great Tail of the Beaver ;) that River leads to the River Ouiguatshouan, which I have des-Three quarters of a league lower down, on the north, is cribed above. a carrying place, called Ushabatshuan, (the Curtent too strong to be passed;) the Voyageurs call it "La Tuque," because of its high Mountain, whose summit resembles a "Tuque" (conical cap); this carrying place is a league long, and has high hills which must be ascended. A league lower down, on the north, is a River called Ashtorogami, (place where Canoes are made,) which is six arpents wide, navigable for Canoes: this River runs forty leagues to the north, and joins the River Métabishouan, which I have described above. Eight leagues to the southward, a Post is established at a place called Utsasht ushipi, (River of Rats,); ten leagues from thence, going down the River Saint Maurice, on the north side, there is a portage six arpents long, called Tshitsega, (steep); three leagues lower down there is a carrying place on the south, eight arpents long, called Papapatibishka, (flat Rock); one league and a half farther, on the south side, is another, fifteen arpents long, called Shabonigan, (needles); three quarters of a league lower down, on the south side, there is another carrying place, a quarter of a league long, along which there is a Fall, called Kakumenash, (the Old Woman.) Two leagues lower down, on the south side, there is a carrying place called Pé-o-a-busk. (carrying place of Iron); the Voyageurs call it Portage de la Gabelle, (Portage of the Gabel); that carrying place is three quarters of a league long. Two leagues from thence the Forges of St. Maurice are reached, and the distance from the Forges to Three-Rivers is three leagues.

Q. What is the nature of the Soil on the Route you have just defcribed, and when do Spring and Winter begin in the various parts through which you have travelled ?

A. The Soil about Tadoussac is mere Sand and only fit for the culture of Potatoes. On afcending the Saguenay all the Bays and the Interior on both sides consist of good foil fit for cultiva-There is little difference between the climate of that place tion. and that of Ouebec. All forts of Pulse and Melons and Cucumbers ripen there. Towards Chicoutimy the gentlemen of that Post have Gardens which produce Cucumbers, Melons, Onions and in a word every thing that is produced at Quebec. Towards Lake St. John and all around it the lands are excellent. The Jefuits formerly had a Convent and a Farm there. Some Plum, Apple, and Cherry trees and fome Vines planted by them still exist and the furrows made by the Plough are to be difcerned. This Settlement is at the entrance of the River Metabitshuan. I have gone fifteen leagues up that river and found the foil fine and very fit for cultivation and a favorable climate. West of that river is that called Ouitgatshouan, the foil and climate of which are fimilar to those of the foregoing. Two leagues north of that river is another called Ouitgatshganish, which I have ascended eighteen leagues as far as its fource. The climate and foil in all that tract is like the foregoing. For twenty-five leagues in afcending the rivers Mistafsini and Afsuapmousoin which flow into Lake St. John, the foil and climate are equally good as far as the foot of the Rapids of the river Affuapmousoin. There, many rapids and mountains occur for fixty leagues. It freezes there almost every month of the year, and the lands being besides covered with stones a few Potatoes are all that could be cultivated.

From thence to the neighbourhood of Lake Miftafsini there is very little good land, all that part of the Country consisting of marfhes, fwamps and fand. The environs of Lake Miftafsini which I have feen do not appear to me to admit of cultivation. I have never feen more than two or three feet of fnow, except in one year, when it fell to the depth of five feet, but this is very rare. I do not think Lake St. John and Lake Miftaffinis more liable to ftorms than the parts of the Province along the river St. Lawrence. The north west wind is the most common. There is fufficient depth of water in Laké Miftafsini for Ships of War, but there being many large Islands in it, it would be difficult to navigate and a good Pilot would be neceffary. I think there is not more rain in Spring, Summer and Autumn than in the District of Quebec, and ftorms and thunder are lefs frequent.

Following the river Mistafini to the right of that of Assupmoufoin, for fixty miles in a N. N. E. direction, the foil is very fubstantial and fit for cultivation. In that whole tract there are no mountains and although that land is more to the north the climate is neverthelefs good in confequence of the fouthern afpect of the ground and the schelter afforded by the mountains in the rear, from the north wind. Beyond those mountains the Land is not fusceptible of cultivation.

North East of the river Miftafsinis on leaving Lake St. John is the River Peribaka which I have mentioned. It flows from the north eaft. I have gone about ten leagues up that river, and the foil along both Banks is a clay which admits of cultivation. The climate refembles that of Lake St. John.

North East of the River last mentioned, is another called Koucuatim (the Dog's Owl,) I ascended it feven or eight leagues—the foil and climate refemble that which I have just defcribed.

On leaving Lake Afsuapmoufoin for Lake Uashkué-ta-uka (fource of the river St. Maurice,) for a diftance of nearly fifty miles, the land is not fit for cultivation confifting only of fands, marfhes and fwamps—and on defcending that river for fifty-five leagues as far as the river Utchaskushipi, the land is only fit for cultivation in places, being interfected by mountains. The rest of the ground as far as Three Rivers is interfected; but there are considerable Tracts where the foil and climate are adapted to cultivation.

It is to be remarked that although very often the margin of rivers of a certain magnitude do not admit of cultivation, upon removing a little from the fhore or upon passing the mountains which skirt those rivers, there is always found a level Country, where the foil is fertile to a very great distance, and the foil along the small rivers which empty themselves into the larger ones is invariably good and fertile for a very great distance.

Q. What kinds of Timber did you observe in the Countries you have just described ?

A. From Tadouffac to the foot of the rapids *Pemonka* for a tract of 75 leagues or thereabouts, there is a great quantity of lofty trees, consisting of white pine, red pine, (Norway pine,) Ash, Spruce of every kind, Elm, Black-birch and Maple besides feveral other kinds of Timber as white Birch, Poplar, Afpen, grey and red Spruce &c. &c.

Q. Do you think the various building Timber you have mentioned could be brought by the feveral ftreams you have mentioned, to fome place where they might be fhipped for exportation by the River St. Lawrence?

A. Timber may be felled on the Borders of the feveral Rivers which flow into Lake St. John and Lake Tsinogomi, which if N drifted along the shores of each of those Rivers would of themfelves float to Chicoutimi where vessels may come and they might be shipped there as I have before faid.

Q. What Indian nation inhabits that Country ?

A. The Mountaineer nation. Their Indian name is " Papinashuah" which means "Laughers" or "Sneerers"—and in fact they are fuch. They are even accustomed to give Persons whom they see for the first time a nick-name, in order to banter and laugh at them without its being perceived by them—and they even amuse themselves in bantering each other, which they do so adroitly that the Person who is the But, feldom perceives that he is so. They are of a mild, charitable and hospitable character, but excession cowardiy.

Q. What is the number of the Families of that nation who inhabit that part of the King's Domain which you have designated ?

A. There are three Families at Tadoufsac, nine at Chicoutimy, twelve at Lake St. John, and nine at Affuapmoufoin making thirty-three families, consisting one with another of five persons and forming a total of one hundred and sixty-five fouls.

Q. Has that nation increased or diminished since you first vifited those Parts?

A. It has decreafed more than one third.

Q. To what caufe do you afcribe that?

A. To the failure of the animals on which they fubsist in Hunting. There is not a year in which fome of them do not die of want and hunger, when they go into the Forests to hunt. I know that in one winter eighteen perfons died in this way, and I think that in a few years that nation will be extinct.

Q. Have you a knowledge of any tradition among the Indians respecting the Jefuits who formerly inhabited Lake St John concerning their occupations, and the causes which have made them abandon that place ?

A. I have heard the Indians fay that the Jefuits only cultivated the ground on a very finall fcale, merely for the wants of their Settlement. That their principal occupations were to infruct the Indians in Religion—That they also traded with the Indians, and that for that reason, the Company of the Indies at the time, expelled them from that place.

Q. Do you think the Indians could be induced to cultivate the foil ?

A. No-I do not think fo, because they are too indolent and despife those who follow agriculture. I have often endeavoured to induce them to cultivate fields of Potatoes, I have furnished them inftruments, as Spades, Hoes, &c. for preparing the ground, I have moreover given them feed potatoes—I have even maintained them and given them Rum to induce them to till the ground, but as soon as the fun began to warm them, they threw away the inftruments and abandoned every thing to wander through the woods.

Q. What is the extent of the hunting ground of that nation ?

A. They hunt over the whole extent of the Country which I have just described, allotting to each family a certain tract of ground.

Q. In what manner is that division eftablished, and what is the space allowed to each family and when is that division made?

A. When a father has feveral fons it is he who affigns to each the portion of his domains which he choofes they should occupy, and that partition is fo fcrupulonfly obferved among them, that the whites cannot induce them to encroach upon the Lands of an other, even when compelled by hunger to kill an animal on the Domain of another they leave the fur or the hide of the animal to the proprietor. I have faid it is with the utmost repugnance that they enter the Lands of another when compelled by the whites, which is in my opinion, a proof that it is the latter who corrupt their morals. They equally respect the nuprial bed and when they violate it, this also is due to the examples of the whites.

Q. What might be the expense of fitting out a Canoe with a fufficient crew to travel from Tadouffac acrofs the country you have defcribed, and defcend by the River St. Maurice, and of what do the food and provifions which it is necessary to take on that journey confist, and what length of time is necessary for performing it.

A. There would be required—

1. A large Canoe of five seats capable of containing eight perfons, which would cost,

Four Voyageurs or hired perfons at £6 each, 24 0 0
 Their fubfiftence, confifting for

each in 100 lbs. of flour,		£ 0	15	0
60 lbs. of pork,		5d. 1	5	0
# bushel of peas,	÷	4d. 0	3	0
		1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 - 1997 -		

€2 3 0

£8 12 0

4. Wages of an experienced Guide, 30 0 0 5. Subfiftence as above. 2 3 0 6. Two Tents, 12 0 0 7. Pots, Kettles, Axes and other neceffary utenfils, 3 0 0 8. Rum for the five Men for the Journey, twelve Gallons at 4s. 2 8 0

£89 13 The above applies to a Canoe performing that journey without ftopping, and without hunting.

o

This journey might be performed in one month and a half, but allowance must be made for delays occasioned by the winds or bad weather on the Lakes.

Voyageurs who are allowed to hunt and fifh for their fupport. and who have time to do so, may make this journey for fomewhat lefs.

Voyageurs who are paddling their Canoes and croffing carrying places all day long, make three meals a day, which are not regular meals; they eat as much as they can. Their mornings meal confifts of pork and bifcuit; that made at noon, of pea or flour foup, (that made of flour is called "Sabane,") with pork and bifcuit; the evening's meal confifts of pork and bifcuit or flour.

Sabane is made with broth of pork or other meat, if there be any, with flour which is ftirred up in it.

Alexander Fraser, Efquire, Lieutenant Colonel of Militia, refiding at Temiscouata, made answer as followeth:

Q. Have you had any, and what means of becoming acquainted with the River Saguenay or Lake St. John, and the Streams and Rivers which fall into them refpectively?

A. 1 afcended the River Saguenay in 1802 and 1803, on account of the North West Company; 1 did not particularly notice the courfe of the many small Streams which difcharge their waters into the Saguenay. There are two Rivers equal in fize to the Saint Maurice, which difcharge themfelves into the Lake Saint John; one takes its fource at Lake Miftaffini, the other from a range of fmall Lakes at the height of land, navigable for fmall canoes or light boats; the Current is quick; many Rapids and Portages.

Q. What is the Length, Breadth, Depth, and Courfe of the Saguenay ?

A. The diftance from Tadouffac to Cap à l'Est is twenty leagues. The breadth about three miles; the depth at leaft fifty

fathoms. The beach on each fide is bounded by mountains and fteep rocks, from Cap à l'Est to Chicoutimy; diftance five leagues; the River lefs deep; the appearance of the Country better: fome good land. The Saguenay continues three leagues to the $\frac{1}{2}$ Decharge du Lac St. Jean:" its course tends, I believe, to northweft.

Q. What are the Streams which fall into that River or into Lake St. John; their length, breadth, depth, and courfe refpectively. How and for what diftance navigable, and what fpecies of fifth are found in the faid River Saguenay, or in Lake St. John, or in the Streams that empty themfelves into either of them?

A. The principal Stream is the Difcharge of Lake St. John, which is confiderable : the River Chicoutimy is small, so is the St. Marguerite and St. Jean, about ten or twelve leagues diftance from Tadouffac. The Fifh taken in the Saguenay is Salmon, at Tadouffac is Cod, alfo the other fpecies known in the St. Lawrence; in Lake St. John good " *Poisson Blanc*," Pike, Chub and *Doré*; to the north eaft fide of the Lake, (as Mr. Charles Taché, Senior, has informed me) quantities can be taken with nets in the Spring, and probably a great part of the year.

Q. What are the other Lakes in the Country commonly called King's Pofts, and what are their fizes, fhapes, pofitions, depth of water, and fusceptibility of navigation respectively, and what are the various species of fish produced therein, and in what quantities?

A. In general the country is well watered with Lakes of various depths and surfaces, and fifhy:

Q. What is the fize, fhape, and extent, and of what depth is Lake Miftaffini, fituated upon the height of Land between Hudfon Bay and Lake St. John, and what fpecies of fifh are produced therein?

A. I have seen but a fmall part of the Lake Miftaffini; by report it is of a great fize and depth; the fifth are Trout, {of 20 lbs. weight,} *Poison Blanc*, Doré, Carp and Pike; great numbers can be taken the whole year. The Country is rocky, with little foil; the climate cold, and only fit for its prefent poffeffors, the natives of the place.

Q. What is the diffance of the fources of the River St. Maurice or the Black River, as it is fometimes called, and the fources of the Gatineau River, from the fources of the Rivers that empty into Lake St. John: describe particularly the appearance of the country, and the fources of thefe and of any other Rivers which take their rife therein, as well from your own obfervation, as from information upon which you can depend ?

A. " Lac des Sables, par la route des canots," is about fifty or fixty leagues from Three-Rivers, a few leagues north " à la hauteur des terres," is, I believe, where the St. Maurice takes its fource; on its way to the St. Lawrence there are a few Streams which join the St. Maurice, fit for finall canoes only. The country from " Isle aux Loutres," three leagues above the St. Maurice Forges to three leagues above " le Portage de la Tuque," a distance of about thirty leagues, with little exception, the foil and climate promife to reward the labourer's industry. The Timber, the fame kinds as in the neighbourhood of Quebec, with the exception of Oak. The Fish are few, and confist of Chub, Carp and Poison Blanc.

From Cap à l'Est on the upper part of the Saguenay to the west side of Lake St. John the foil is good, and I believe stretches more than two leagues inland with a furface fit for cultivation, a carriage way can be opened from the entrance of the difcharge to the Lake St. John at a moderate expense, as that space (about three leagues) of ground is reputed to be of an excellent quality. The Rivers, Afsuapmous and Mistafsini, which difcharge into Lake St. John, take their rise at the height of land give about the same quantity of water as the St. Maurice; are impeded by many Falls, Portages and Rapids; the Country is rocky with little foil, fwampy, many lakes of moderate extent, fay from two to nine miles in length, generally oblong, two to four fathoms deep.

Q. Is it practicable to afcend the Saguenay in Indian Canoes pass through Lake St. John, afcend one of the streams which fall into it, and after any, and what portages defcend the St. Maurice at Three Rivers and has this route been practiced for any and what length of time, and by whom, and what are the difficulties obstructions or dangers to be encountered, upon the faid route, and are there any trading Posts upon the fame, and if so how long have they been established, what is their number and how situated ?

A. In the Autumn of 1802, Angus Shaw, Efqr. afcended the Saguenay to the height of land by the River Afsuapmoufoin thence west or nearly to the fource of the St. Maurice and descended to Three Rivers, it is probable this route was frequented foon after if not before the conquest of Canada, Mr. Chas. Tafché, Senr. has had frequent fpring meetings with the Indians for their Furs on the St. Maurice; the difficulties are answered by the 6th Queftion. There are four Posts on this Communication, of which three are within the King's Posts department, viz :--Chicoutimy, Lake St. John, Lake *Assuapmousoin*, the fourth at the Rat River, twenty leagues up the River St. Maurice : at times, for the advantage of the trade, small Posts are placed at certain distances.

Q. What are the advantages and difadvantages of the Port of Tadouffac: when does the Navigation of the Gulph at that Port commence and end; and at what period of time is the Saguenay frozen over, and when does the ice disappear therefrom.

A. James McKenzie, Efquire, or J. B Taché, Efquire, have wintered at Tadouffac, they can give a fatisfactory answer.

Q. What are the animal, vegetable and mineral productions of the Country commonly called the King's Pofts ?

A. My ftay at the King's Pofts did not permit me to make any enquiry on these fubjects, (and indeed I am not qualified,) as I feldom could remain more than two or three days each visit at the fame place. Mr. McKenzie, I prefume, will return an answer.

Q. What is the quality of the foil, timber, climate, extent of cultivable ground, as well of the country lying between the mouth of the Saguenay and Lake Miftaffini, as of the Country lying between the fources of the St. Maurice and the cultivated parts of the Diffrict of Three-Rivers near its mouth; and what is the course, depth and breadth of the faid River St. Maurice, and are there any and what obftructions to its navigation, and what is the nature and defcription of the interior country lying behind the exifting fettlements, bounded on the one fide by the Saguenay, Lake St. John, and the Streams which fall into the latter Lake, and on the other fide by the River Saint Maurice ?

A. From la Pointe aux Allouettes, welt fide of the Saguenay, there is a fpace of about nine miles in front, by two or three (and likely more) miles in depth, where a Settlement might be made; thence to Cap à l'Est and on to the Lake St. John, the climate, foil and timber are much the fame as at St. Paul's or Mal Bay; the weft fide of the Lake St. John fhews a gradual rife for two or three leagues : the foil is reported to be good, it is covered with fine large wood, fuch as Maple, Cedar, Elm, Birch, &c. Three leagues north weft and north, by the River Affuapmoufoin, the country is rocky, with little foil, the wood of fmall growth.

I believe the course of the St. Maurice to be nearly north; from July to September this River is shallow, and may be croffed about knee deep; the breadth about a mile; the obstructions confiss in many unavoidable portages. I have not been in the interior between the Saguenay and the St. Maurice. Q. Have you had any and what means of becoming acquainted with the Country which lies with the St. Maurice on one fide and the River Ottawa on the other, and if fo, are there any and what navigable ftreams therein, and how navigable and for what diftance and are there any, and what Lakes on the faid tract of Country, and what is their fize, depth and fituation, and do they produce any and what fpecies of Fish, and what is the climate and quality of the foil, what Trees grow in the faid Country, of what fize and what are the vegetable, animal and mineral productions of the fame.

A. I have no knowledge of the Country lying between the St. Maurice and Ottawa River.

Q. Are there now in the faid two tracts of Country any Tribes of Indians, and what are their numbers, manners and means of obtaining a livelyhood, and have their numbers increased or diministic fince you first became acquainted with them, and if they have fo increased or diministic to what cause or causes, do you attribute their increase or diminution.

A. There are three tribes of Indians, the *Montagnais* the *Tetes de Boule*, and Algonquins, within thefe two tracts of country, their manners are much the fame, their number is fmall for the extent of ground they occupy, their means of livelyhood are precarious depending mostly on the chace, in a poor Country. I believe they have diminished in confequence of the many hard-flips they are forced to bear.

Q. Are there any and what Traditions amongst the faid Indians relative to the late order of Jefuits and to their labours amongst them.

A. The Montagnais or Ichini tribe up to the Lake St. John, repeat their prayers, and read the Catechifm in their Language.

Joseph Bouchette, Efquire, Surveyor General of Lower Canada appeared, and made anfwer to the following Queftion's.

Q. Does it appear by the Records of your Office, that any measures were taken to carry into effect the 44th and 72d articles of His Majefty's inftructions directed for James Murray, Efqr. Governor of the Province of Quebec, and dated 7th December 1763, now read to you : and if fuch measures were taken, how, and in what manner, and by whom were the faid articles carried into effect ?

A. By reference to certain Records in my Office, together with the knowledge I possess of the nature and description of the instructions of the Honorable the Lords Commissioners for Trade and Plantations to my Predecessfor in Office, the late Hon Samuel Holland Efq. it appears that elaborate Reports and Maps were made and transmitted from time to time to their Lordships, and that every possible information was therein contained which seemed to embrace the requirements under the 44th and 72d articles of His Majesty's Instructions to His Excellency James Murray, Esq. Governor of the Province of Quebec, dated 7th December 1763, to whom reports were also made, therefore it might be inferred that His Majesty's Instructions were fatisfactorily carried into effect, by His Excellency the then Governor in Chief.

In answer to the fecond part of this query, it appears that the active part conducive to the ends proposed in the faid articles were concentrated in, and carried into effect by Major Holland, whose diftinguished and scientific talents promoted effentially the views of the Honble. The Lords Commissioners for Trade and Plantations in the attainment of as perfect a Topographical, Statiftical, and Historical account, as was then praticable, not only of the Province of Quebec, but also of His Majesty's Dominions in the northern Diffrict of North America, of which he was Surveyor General.

How and in what manner this general and important fervice was accomplified is furmarily as follows:—an effimate of the expenses attending a general furvey of His Majesty's dominions in North-America, was submitted to the Honble. The Lords Commissioners for Trade and Plantations, which was approved by His Majesty:—This Effimate embraced :—

Frst, an allowance for a Deputy at Quebec in the absence of the Surveyor General.

Secondly, a certain number of Affistant Surveyors and Drafts-

Thirdly.—Surveying parties, taken from the military, who received extra pay to affist in the various Surveys and to ferve as Camp Colours, Cham-men &c. and to make signals on the tops of Mountains:—

Fourthly :--An allowance for extraordinary expenses for Guides, Horles &c together with an allowance for several fetts of Aftronomical and Surveying Infiruments, Pocket Compasses, Chains &c. making an aggregate fum of £1117 12 0 sterling, for the expenses of the operations effected in the year 1764. Great facility was afforded to the Surveyor General and his Deputies in the profecution of the Service, by having at his dispolal a King's vessel, Boats and Boat's Crews, when and wherever he required them :- The enfuing year 1765 a proposed plan of ope-

0

rations was fubmitted, with projects of subdividing divers parts of His Majefty's Dominions, into Diftricts, Counties, Townfhips, and Parifhes, and the amount thereof is omitted, but may be eafily deduced from a comparative estimation of the expenses that were incurred the two following years :—In 1766 the expense was $\pounds 1784 \ 4 \ 0$ sterling, and in 1767 was $\pounds 1601 \ 14 \ 0$ sterling; fuch are the general outlines of the manner in which this fervice was carried on, and the expenses which attended it.

Q. What, in your effimation, would be the best mode of carrying into effect His Majeity's faid inftructions, in refpect to the Lands in the rear of the exifting Settlements, and lying between the Ottawa, the River St. Lawrence, and north west boundary of the Province. as well of the unsettled lands lying between the actual Settlements on the fouth side to the southern boundary of the Province, and what would be the expense of fuch Survey ?

A. The most effectual mode of carrying into execution, under the requirements flated in His Majesty's Inftructions of 1763, a furvey of the unexplored and extensive Territory in this Province, lying North West and South East of the River St. Lawrence and North Weft of the Ottawa to its extreme Boundaries, would be the adoption of that general fyftem purfued by my Predeceffor in Office, when acting under and in conformity to fuch inftructions in the execution of the surveys performed in the Province of Quebec, and in other parts of the northern Diffricts of North America, as flated in my previous aniwer.

I therefore conceive in order to effect fuch an important Service, that an annual effimate of the probable expenses to be incurred in its accomplifhment, fhould be fubmitted to His Majefty's Provincial Government, together with a Plan of operations for each fucceffive year; and I have reason to believe that were £1000 per Annum for two or three years appropriated for forwarding this important service, the numerous advantages and refources which would flow from fuch a measure to this Province, and to the State at large, by increasing both the Agricultural and Commercial Interests of the Colony, and obtain in the courfe of fuch a furvey new materials for improving the fcience of Philosophy in its various branches, natural History, Mineralogy &c. &c. which are objects not less important in their confequences, and would tenfold compensate for the expenses thus incurred.

In order to illustrate in some degree the advantages which fuch an undertaking would produce, it may not be uninteresting to offer the following brief exhibit of the general extent and outline features of the Country to be furveyed and explored. Lower Canada comprehends an extent of Territory of about 150,000 fuperficial miles :--of that great fuperficies, not more than about 25 to 30,000 may be faid to have been explored and tolerably known, and about one half thereof actually surveyed : Therefore it appears that about 4-5ths of Lower Canada remain unexplored and but little known, and even that is obtained from sketches and defcriptions through Travellers, Traders, and Aborigines of the Soil, the Indians.

On referring to the most recent Maps of Canada, it will be perceived however, that numerous large Rivers flowing towards the St. Lawrence and taking their rife in the Mountains which divide thefe waters from those which discharge themselves into Hudson's Bay, traverse an immense tract of Country; the most confiderable of which are the Saguenay, the St. Maurice, and the Grand or Ottawa River :- The Saguenay which is navigable for large veffels to Chicoutimy a distance of about eighty to ninety miles and thence for Boats to Lake St. John's, fertilizes in its course a wide expanse of Country, by innumerable tributary ftreams and branches on either fide, which should form a comparative view of the extent of Territory fit for Culture lying along the borders of the St. Lawrence and its branches, poffers equal advantages in a proportional degree :- The fame may be faid of the Ottawa whole principal fource rifes in Lake Temifkaming traverfing to its confluence into the St. Lawrence a fpace of Country of about three hundred miles :- The River St. Maurice, although not fo wide as either of the former, winds through as great a fpace of Country as the Saguenay :- Can it be doubted that poffelling fuch natural advantages, fuch exhauftless treasures, that any encouragement held out with a view of colonizing that valuable tract of Country would fail in its object ?

Were I therefore to offer a plan of furveying operations, I fhould for the first year direct my attention to a Trigonometrical furvey of the Ottawa and the Saguenay, and an exploring furvey of the St. Maurice; to the Southward of the St. Lawrence, I would confine myself to the exploring of the River Etchemin to its fource, and determine its exact distance and position with the River St. John's which are also objects very deferving of immediate notice.

Q. Are there any, and what returns of Grants of Land furveyed and Granted, made by you to the Lords of His Majefty's Treafury, or to any other Officers of His Majefty in Great Britain?

A. None.

Q. Does it appear that any fuch Returns were made by your **Predeceffor** or Predeceffors in Office ?

A. I know of none having been made by my predeceffor in Office to the Lords of His Majefty's Treafury but when he was more immediately employed on the general furvey of the Northern Diftrict of North America, he from time to time not only made Returns to the Board of the Honble. the Lords Commiffioners for Trade and Plantations, but kept up a regular correfpondence with its Secretary and feveral of the Honorable Members of that Board.

Q. 1. What is the total number of Grantees of Militia Lands fince the last Peace made between the United Kingdom of Great Britain and Ireland, and the United States of America?

A. I cannot exactly fay, but the quantity of Land granted under Patent to the Militia, does not much exceed eight or ten thoufand Acres.

Q. 2. What is the whole quantity of Lands which has been granted to them by Patents or Location Certificates?

A. I have already flated that the quantity granted was fmall, but the total quantity granted under Location Certificates; will appear by the accompanying flatement marked (A.) in which are diffinguished the Militia, the Military and Emigrant Locations.

Q. 3. What is the total number of Men entitled to receive Militia Lands, and who have not yet received them?

A. Not knowing the exact number of Men who have ferved in the Militia during the late American War, I cannot confequently fay how many are entitled to receive Lands:---nor can I fay who have not received them :- it is however evident that a quantity exceeding feven hundred thousand acres at least, is required for the Militia who have ferved during the War, according to the proportions ordered by His Majefty; and it will appear by the accompanying flatement (B.) that 411,300 Acres have been furveyed and fubdivided in the Field, exclusive of the Crown and Clergy refervations, and out of that quantum of Acres, although the Militia Locations amount to only 113,465 Acres, yet I have reason to believe that there are a number of orders of Council paffed in favor of Officers and Privates of the Militia who have not as yet taken up their Location Certificates, and it is moreover proper to remark that at least 125,000 Acres have been certified to the Militia as vacant and Grantable and whole applications are in progrefs.

Q. 5. What is the quantity of the last mentioned Lands?

A. This query is answered by my answer to No 3.

Q. What is the expense of the furvey of a Militia Township and have there been any, and what number of Townships surveyed for the Militia of Lower-Canada, and where are the same fituated ?

A. The average cofts of furvey of the outlines and fubdivisions of a Township are from $\pounds 230$ to $\pounds 250$.

The following Townships and parts of Townships have been furveyed for the Militia :--the half of Frampton, Cranbourne, Leeds, three quarters of Ireland, three quarters of Inverness, which Townships are fituate in the District of Quebec :--half of Halifax, half of Chester, three quarters of Wolfstown, half of Ham, parts of Dudswell and Weedon, part of Stanfold, Horton, half of Warwick, the augmentation of Aston, half of Wendover, and part of Brandon, which Townships are fituate in the district of Three-Rivers:---and the one half of Kilkenny, in the District of Montreal.

Q. What is the whole quantity of wafte Lands of the Crown in Lower-Canada granted to European Emigrants fince the laft general Pacification of Europe, and in what quantities have the faid Lands been ufually granted to the faid European Emigrants, and in what parts of the Country ?

A. The quantity of the wafte Lands of the Crown located to Emigrants and Military is ftated in the ftatement marked (A.) the proportion located to Emigrants may be about one Half, generally located to them in 100 and 200 Acre Lots; and the principal Townfhips in which they have been located are Chatham, Rawdon, Dudíwell, Godmanchefter, Hinchinbrook, Grenville, Hull, Afcot, Eaton, Newport, and fome in Leeds, Halifax, Invernefs, Ireland and Chefter.

Q. What in your estimation is the present Population of Lower-Canada?

A. The following Statement is my estimation of the Population of the Province of Lower-Canada, grounded principally upon the *Curés*² Letters and other sources of information, which I had reason to believe could be depended upon.

Names of	Seignioria	Population.	Township	Total Popula

Q. Have you any means of forming any reasonable conjecture of the quantity of cultivated ground, as well as that of uncultivated ground within the limits of the old Seigniories of the said Province ? And during the last twenty years, does it appear to you that the average encrease of ground under culture bore a due proportion to the augmentation of the Population, and can you form any approximation to that proportion ?

A. To obtain this approximation it is necessary to resort to some known fact, stating either the Population or the average quantity of Ground under Cultivation at some particular period, upon which a plausible inference may be drawn to answer this guery somewhat near the Assuming 3,744,858, the quantity of Arpents under cultivation truth. and improvement in the year 1814, in the three Districts collectively, as stated in my Topography, Pages 88, 286, and 375, and the present Population, say 428,000 souls as a basis : deduct therefrom the Population of the Towns, say 53,000, and admit now that one seventh of the remainder hold Farms of Ninety Superficial Arpents on an average, which tallies nearly with the Population of 300,000 Souls, exclusive of the Towns, in 1814, in proportion to that first stated quantity of Land then under cultivation and improvement; next it may be fairly allowed that the Population of Lower-Canada doubles itself in 24 or 25 years at most. therefore the Population exclusive of the Towns might average in the year 1800, about 188,000 Souls, and in the same proportion of one seventh thereof possessing Farms of Ninety Superficial Arpents, there must have been about 2,417,130 Arpents then under culture and improvement ; it will therefore be perceived, that in the space of fourteen years, the culture of the ground had encreased by 1,237,728; and from 1814 to the present time, its increase should be 1,076,532, which together would infer that the culture of the ground had about doubled itself, as the population since 1800. But on the other hand, while Population increases in a geometrical, the means of subsistence increase in an arithmetical ratio ; thus 3,744,858 Arpents in a state of culture and improvement, which is the average of one third of the Lands granted en Fief and Seigniory in 1814. 4,821,390 Arpents, which is the proportion of Land that should be at present in a state of culture, now forms, according to the population upon this mode of calculation, but the one half of that total quantity thus granted. I would therefore presume that an increase of 2,404,260 Superficial Arpents of Seigniorial Tenure, should be the due proportion of Land in a state of improvement and culture, according to the increase of Population since the year 1800. Although that increase of Land under culture should prevail, yet I am of opinion. that one half of the Seigniorial Lands collectively, are not in that advanced stage of improvement, and have not increased in a proportional ratio to the increase of population since twenty years, especially, as I conceive that the Population upon a regular Census, may be found to be somewhat greater than is shewn in my last Statement on that subject.

Q. What, in your estimation, would be the best mode of effecting Settlements, as well upon the Militia Lands by the Militia Men, to whom the said Lands have been or may hereafter be granted, as upon Lands granted or to be granted unto European Emigrants, and settled by them?

A. I have already had the honor of stating to this Committee my opinion on the subject, which will be seen in my answer Page 104, of the Sixth Report of your Committee :-- I will however add, that upon the event of a Township being appropriated in each District for the Militia, with the object of close settlement, that Militia-men who have obtained Locations in other Townships, should be permitted to exchange them for others in the Townships so selected.

With respect to Emigrant Settlements, the present system of Township Agents seems to answer the end proposed.

(A.) STATEMENT of LANDS located in the Surveyor General's Office, from the 1st January 1817 to the 31st January 1824.

Paschal Taché, Efquire, Seignior of Kamouraska answered to questions put by the Committee in the words following :--

I have wintered six times at the Post of Lake Saint John and have passed twelve years at the Post of Chicoutimi—I have, therefore, had an opportunity of knowing the River Saguenay and Lake St. John, as also the rivers and streams which respectively discharge themselves into it. The River Saguenay is navigable for twenty-five leagues from its mouth by the largest ships of the line, and for thirty leagues by vefsels of two hundred and fifty tons burthen, at high tide; at that place it is necefsary to pafs a carrying place to reach Lake Saint John; the River Saguenay is half a league wide at its mouth and farther upwards it is from a league to a league and a

half wide : its mouth is east and it runs W. N. W.

Of eighteen streamlets which empty themselves into the Saguenay and Lake St. John not one is navigable. The Rivers which run into the Saguenay are, first : the river Sainte Marguerite, it is feven leagues from the mouth of the Saguenay to the N. E. and is navigable only for bark canoes by making feveral carryings; I do not know its courfe-2ndly, the little river Sainte Jean, it is three leagues above the river Sainte Marguerite and runs into the Saguenay on the fouth west side; I do not know whether it be navigable.—3rdly. the river de la Baie des Ha-ha called by the indians Weshkuewasha, it empties itself into the Saguenay on the fouth west side, it is navigable in bark canoes, and communicates with the River Malbaie by means of feveral carrying places, I do not know its courfe-it is twenty-two leagues from the mouth of the Saguenay-4thly. La rivière à Valin, it empties itfelf into the Saguenay on the N. E. side, it is four leagues above the Baie des Ha-ha, is navigable in bark canoes and by means of a few carryings communicates with the river *Pessiamitsh*, it runs N. N. E.; I know its courfe for five leagues and in that fpace there are five short carrying places. 5thly. the river Chicoutimi, where the post of the fame name is established, is twenty eight leagues from the mouth of the Saguenay, it discharges itself on the south west side and has its fource from the lake Tsinougamitsh, on the fouth west side of this lake there are two navigable rivers; viz: the Rivière des Sables which communicates with the Montmorenci River by means of carrying places and the river Upikuba which communicates with the river Batifcan, it is navigable by performing some portages, I do not know its courfe. To reach Lake Tsinougamitsh there are feven carrying places to crofs within the fpace of eight leagues. The longest of these carrying places is three quarters of a league long beginning at the post, the other six are from eight to twenty arpents long; at the upper end of the said lake there is a carrying place of half a league which leads to the little lake Tsinougamilsish which latter empties itfelf by la rivière des aulnets into la Belle Rivière which falls into Lake St. John, there are two carrying places of five arpents each. 6thly. La rivière des terres rompues [river of broken Lands] falls into the Saguenay two leagues from Chicoutimi, this river is navigable for birch canoes and communicates by carrying places with the great lake *Minikouagan*, I know its courfe for five leagues it runs N. N. E. At the mouths of the rivers *Sainte Marguerite*, *Saint Jean*, and *Baie des Ha-ha*, falmon and falmon trout are caught in the months of June and July. No fish is caught in the Saguenay except fmall trout. A considerable number of porpoises ascend the river as far as *la pointe aux roches* three leagues below Chicoutimi. A few whales alfo go up as far as the river *Sainte Marguerite*. The Lake Saint John abounds with Pike, from three to five feet long, Cat Fish, and with *Awenanish* fish, resembling falmon, but much fmaller and of much finer flavour.

The Rivers which flow into Lake St. John are feven in number, all navigable for Birch Canoes, 1°. La Belle Rivière, it difcharges itfelf at the entrance of the Lake. 2°. The River Mitabitshuan, where there was formerly an eftablishment of Jesuits, it communicates with the River Batiscan, by a few carrying pla-It abounds with Pickerel. 3°. The River Wiatshuan, it ces. communicates with the River Saint Maurice, it abounds in white fish, which come there in October to fpawn at the foot of the fall-I do not know its courfe 4°. The River Wiatshuanitsh runs W. S. W. and alfo communicates with the River Saint Maurice. 5°. The Assuapmousoin, runs W. N. W. and communicates with the River Saint Maurice having about thirty carrying places. There is a confiderable rapid in this River, and it ufually takes four days to afcend it by using the poll, it is about fifteen leagues long, there is a post established fixty leagues from its mouth, which bears the name of the River, from that poft, fituated on a Lake which may be four leagues long by three quarters of a league broad, a South West course is pursued in order to regain the River Saint Maurice. From that Post to one of the fources of the St. Maurice, the diftance is thirty Leagues. 6° • The River Mista-ashinitsh does not take its fource from the Lake of the fame name, I only know its courfe for thirty leagues. After leaving this River and proceeding Weitwards the Lake of Father Albanel is reached-thirty carrying places between Lake and Lake being croffed-and from the Lake of Father Albanel, it is neceffary to perform a carrying of half a league to reach the great Lake Mista-ashinitsh, where I have never been. 7°. The River Peribuca, runs North and communicates with Lake Minikouagan, at the upper part of the feven Iflands and the islets de Jeremie; there are feveral carrying places.

The other Lakes of the Country commonly called the "King's Pofts" are 1°. The Lake Saint John which is at leaft thirty

leagues in circumference and nearly circular in form, is navigable for fchooners; in this Lake there are only two fmall Iflands on the South West fide-it empties itself by two different outlets which join each other at the diftance of two leagues from the Lake, there are four carrying places to pais from this Lake to the place where the tide rifes. 2°. The Lake Ushigubish, is five leagues by three quarters of a league broad, it difcharges itfelf into the River Assuapmousoin. It is navigable for Schoo-3°. Ten leagues South West of the Assuapmousoin on ners. croffing the River Saint Maurice is Lake Kapimitshigamitsh which is four leagues long by three quarters of a league wide and is also navigable for Schooners. 40. The Lake of Father Albanel, is twenty leagues long by four wide, lies N & S. and navigable for Schooners, there are befides feveral other fmall Lakes between the Lake of Father Albanel and the Lake Saint John, but they are of little importance.

I do not know the lake Mista-ashinitsh not having traded farther than the Lake of Father *Albanel*, but I have heard it said that its outlet forms the River Rupert which falls into Hudson's Bay.

I know of no River under the name of Gatineau.

The Saguenay may be ascended in birch Canoes, as far as lake St. John and farther by means of carrying places.

Very few streams run into Lake St. John, and those which do so are not navigable, only the Rivers'above mentioned are so-1 came down the River St. Maurice twenty leagues, and made three carryings from Lake to Lake, the first called *Mimishkashi*, is three leagues long, the second *Weshkuetauka* is seven, and third called *Le lac de Traverse* (cross lake) is a league and a half long-I have traded at *Ushkisketa* where the River St. Maurice begins to flow, it is five acres wide at this place, the North West Company have had a post established here since 1775.

The harbour at Tadoussac is sheltered from every wind by high mountains, and ships of war might anchor there in perfect safety. The navigation from Tadoussac to the gulf is open from the end of March to the beginning of December. The Saguenay does not freeze over from its mouth to the River St. Marguerite which is seven leagues higher up, from thence upwards it generally freezes about the end of November and the ice breaks up about the 15th May as far as Cap à L'est, fifteen leagues above the River Saint Marguerite, beyond that it does not freeze until the end of December and the ice breaks up about the end of April.

The animals of that part of the Country commonly called the King's Post are Beavers, Bears, Otters, Martins, Foxes, Lynxes, Hares and Caribou.—I saw no appearance of Minerals.

The soil, commencing near the Pointe aux Roches, three leagues below Chicoutini, as far up on the north-east side of the Saguenay as the River Mista-ashinitsh, a distance of thirty-three leagues, is very rich and fertile, forming a tract of thirty-three leagues in front by four in depth : the land widens at the Pointe aux Roches as much as fifteen leagues, near the River Mista-ashinitsh; there are a number of small Rivers, the banks of which are of Marl. The south-west side of the Saguenay, from the Ha Ha Bay six leagues below Chicoutimi, as far as Lake St. John, passing to the north east of Lake Tsinougami and Tsinougamitshish, contains a Tract of twenty leagues long by five or six in depth of good arable land; the climate there is generally good, owing to the number of large mountains which surround these lands; the wood which grows from the mouth of the Saguenay to the Ha Ha Bay on the south side, and as far as la Pointe aux Roches, on the north side, is small stinted Red Pine, which grows here and there, and of which no use can be made; in the Tract described in the tenth answer, there are several forests containing Pines, Cedars Poplars; Maple is not very common ; on the borders of Lake Saint John there are only Spruce, Aspen, Cedar and Poplar; the wood on the north side of the Lake having been burnt in 1775, is not yet full grown, but the land is From the year 1780 to 1785, I planted potatoes and cabexcellent. bages at the Post of Chicoutimi, which came to the highest perfection. and the cabbages now exhibited at Quebec, when compared with those I raised at Chicoutimy, would appear dwarf cabbages. I heard Mr. Peter Stuart, who had wintered at the Post of Chicoutimi, say that he had sown some barley, pease and wheat, and that they all came to full maturity; I have not the least doubt of the truth of this fact.

The Posts of Temistaming and Abitibi are on the River Ottawas : I left Assuapmousoin and proceeded for two leagues on a River which discharges itself into a Lake, in which there are three short carrying places, the last of which is at the highest elevation of the land : there the (Lac des Mille Isles,) Lake of the Thousand Islands, is reached ; it may be between fifteen and twenty leagues in circumference. I descended sixty leagues, keeping west south-west as far as the Lac du Nid de Goeland; there are only two carrying places. This Lake may be four leagues long by one broad; I have traded there twice; the waters of the Lac du Nid de Goeland flow into one of the Rivers west of Hudson's Bay; the Lac du Nid de Goeland is to the north-east of the Posts of Temiskaming and Abitibi. The Indians informed me that it was only a seven days walk, from the Lac du Nid de Goeland to the two Posts of Temiskaming and Abitibi. All the Rivers which discharge their waters into Hudson's Bay abound extremely in fish, and especially in Sturgeon and White Fish.

The soil in the Tract above mentioned, appeared to me bad and extremely rocky; the climate is not good; the only trees which grow there are small Birch, Pine and Spruce; the only animals to be met with are Beavers, Otters and Martins; I saw no Minerals.

The Indians who live on the Banks of the Saguenay and Lake Saint Jean are the *Montagnais*; they live entirely by hunting and fishing; they have no fixed habitation, and travel from place to place : most of them assemble at each Post, or at other places where the trade is carried on, only once in the year, and some of them never come to the Posts. There were, in 1778, in that part of the country, commonly called the "King's Posts" at Mingan and Muskwauro, as I was told by Mr. Peter Stuart, who had made the Census, 3,500 Souls. I have heard that their number has been much diminished since I was among them, which is attributed to the small pox and to the decrease of the means of supplying the necessaries for their existence.

I have learnt of the Indians, that they have a Tradition that the late Order of Jesuits had an Establishment at Metabitshuan, on the borders of Lake St. John; that they had erected a Chapel, a House and a Store, where they traded. I have myself seen the ruins of a Saw Mill, which they had built; and I have eaten White Plums, which grew in an Orchard made by them.

APPENDIX, (B.)

AMOUNT appropriated for laying out Lands for reduced Officers and Men of the Embodied Militia and others who ferved during the late war, by the Act of the 59th Geo. III. Cap. 23, Currency £3000 0 0

Disburfements made in virtue of the above Act between 1st November 1818 and 31st October 1823.

P. Smith, for furveys performed in the Townships of Dudswell and Inverness, Sterling.

£378 6 8

B. Ecuyer, for furveys performed in the Townships of Jersey, Tring and Frampton,

Frans. Fournier, for ditto ditto in the Townships of Ireland and Halifax,

Joel Ackley, for ditto ditto, in parts of the Townships of Chester and Halifax,

Patrick Smith, for exploring the Townships of Blandford and Maddington,

Joseph Bouchette, for Surveys performed in part of the augmentation of the Township of Aston,

Patrick Smith, for ditto, ditto, in the Township of Wolfstown, and exploring a part of Lake Saint

APPENDIX (D.)

Quebec, 6th March 1823.

SIR,

ĥ

In obedience to the commands of His Excellency the Governor in Chief, to us signified by order of reference of 12th February last, desiting us to report our opinion as to the course necessary to be pursued to annul the Grants of Land granted in free and Common Soccage, on which no improvements have been made conformably to the conditions of the Letters Patent, and to escheat the same to the Crown in order that they may be regranted. (a) And in making such Report, particularly to point out the mode to be adopted, for bringing a suit for the purpose before the Court; (b) in cases where the Original Grantees shall be absent (c) from the Province, or dead, (d) or are not to be found, (e) or where they were originally only Nominal Associates, (f) and may be supposed to have transferred their rights (g) to the Leaders of Townships and others, (h) or where the present owners of Lots, which it may be desireable to escheat, cannot be known; (i) and also to state the nature of the evidence, (k) which as the Law now stands, it would be necessary to give of the non-performance of the Conditions of the Patents, and in each branch of the reference to point out any legal difficulties, (1) that there may be in carrying through a proceeding of this nature with effect and expedition, as well as the probable expense it may entail ; (m) and further; to state particularly, in what manner such difficulties may be remedied (n) by Legislative Enactments or otherwise, and lastly, to submit such observations (o) on the whole matter of the reference, as may enable His Excellency to judge whether the Law as it now stands furnishes the means of annulling such Patents, in an easy, summary, and expeditious manner; (p) or whether it may be necessary to refer to the Legislature, to afford greater facilities to the attainment of this object. We have taken this important and most complicated subject into our serious consideration, and after various meetings and separate researches made by us, to attain the objects which His Excellency has in view, and for carrying into effect the proceedings in question, we have after mature

deliberation to submit the following observations for the information of His Excellency.

In submitting our opinion with the several observations we deem it necessary to offer, we have taken up the subject in the order taken in the reference, as follows.

What is the necessary course to be pursued to annul the Grants of Land made by the Crown in free and Common Soccage, in which the Conditions of the Grants have in no wise been complied with, and to escheat the same to the Crown ?

An Action of Law instituted in the Superior Term of the Court of King's Bench against the Grantee is the only course which could at present be adopted under the Law of the Land as it now stands. And for this purpose, the first thing required by the Provincial Ordinance 25th Geo. III. Chap. 2, is the suing the process of the Court on the Defendant personally, or at his domicile, without which no legal proceedings could be effected against him. The first thing therefore the Law Officers of the Crown would have to notice, would be to ascertain, previously to the fyling of an information against a Grantee, whether he was or was not in the Province, and if absent, to obtain the appointment of a Curator to such Absentee, and thereon to institute the Action against the Curator. In this latter case, the sole formalities required by law, for the appointment, is to lay a Petition before any one of the Judges of the District, wherein the Land to be escheated lies, praying for a meeting of the relatives, or in default thereof, of the friends of the Absentee, seven in number, to proceed to such appointment, either before the Judge or a person by him delegated out of town, if the parties concerned reside beyond five leagues, under the 9th Section of the 34th Geo. III. Chap. 5. And on the Appointment taking place, the proceedings had against the Curator, will have the same force and effect as if had against the Grantee personally. If the Grantee be dead, the Action must be brought against the Heir at Law if in the Province, if absent, then against the Curator as above stated ; but if the Heir at Law be still a Minor, and absent, a Tutor would be the legal character to represent him, and to obtain this appointment, the same formalities as for the nomination of a Curator are prescribed. In case any of the Original Grantees were only Nominal Grantees, this, in our opinion, would make no difference as to the rights of the Crown, and the Action would be well brought against them all. If such Nominal Grantees had transferred their rights to the Leaders of Townships, or to others, it will in such latter case become the duty of persons acting for the Crown, to procure the written Documents under which the Original Grantees had passed their interest to third persons, and in such case to institute proceedings against such third persons. In cases where it is certain that the Original Grantee is dead, but there is no apparent Heir, a Curator . can be appointed to the Vacant Estate under the 151st Article of the Custom of Paris, and proceedings effected against such Curator. If

the Grantees are not to be found, and it be quite uncertain whether they be dead or alive, or where it would not be possible to trace with any degree of certainty the true owners (the Original Grantee having transferred his interest) for these two latter sett of cases, which no doubt, would be very few in number, the Law as it now stands affords no remedy, in our opinion effective proceedings could not for the moment be instituted, and the Crown could not by the interference of the Court escheat such Lands, and as in some cases this might prove highly prejudicial to the actual settlement of such Lands, we think, that in cases of urgency the Crown might upon the force of the Letters Patent under which such Lands are held, re-enter and take possession thereof, in as much as there is a specific Covenant in the Grants, in case of non-fulfilment of the conditions therein contained, which is to the following effect, " And the Lands and Premises hereby granted, shall revert and escheat to us, our Heirs and Successors, and shall thereupon become the absolute and entire property of us or them, in the same manner as if this our present Grant had never been made, any thing contained therein to the contrary notwithstanding." In these cases, however, we would recommend that an advertisement should be inserted in the Quebec Gazette during the space of three months, and also in some one of the public papers of the District wherein such Lands lie, if in such District there be any public papers, notifying those concerned, that in case no valid claim be made known and lodged with the Clerk of the Executive Council, to such Lands, within three months from the date of such advertisement, the said land will be granted de novo, and that such claims do explicitly specify the Instrument whereupon they are founded, and that the said Instrument do accompany the claims; the said advertisement further stating the names of the Original Grantee, and that the conditions of the Original Grant have not been complied with :- It might also be well to affix a Copy of such advertisement in the Townships, if there be any actual settlement therein, and in case there be no actual settlement. therein, to affix a copy to the Church door of one of the nearest Parishes. And upon Granting such Lands de novo, to insert in the Patent a Clause revoking the former letters, and stating explicitly and at large the reasons for revoking the same.

The above observations in our opinion meet all the cases stated in the first branch of the reference.

The next point we have considered is "What is the nature of the Evidence, which as the Law Stands, it would be necessary to give of the nonperformance of the conditions of the Patent?

With respect to the nature of the Evidence we think that very slight evidence indeed would be sufficient to attain the object, as from the nature of the case the *onus probandi*, or burthen of proof, would lie in a great measure upon the Defendant, and he would of necessity be called upon to prove that he had complied with the conditions of the Grant. Two witnesses at least would be required for the purpose, not related to nor

Q.

in the service of the Defendant and not interested in the event of the suit. These witnesses ought to testify in substance as to their personal knowledge of the lands in question, and that from such their knowledge the obligations specified in the Grant have not been complied with. Here a difficulty offers itself in case the witness be resident in a part of the District remote from that wherein the suit is pending, or without the District in any other part of the Province : how in such cases is the evidence The apparent difficulty however is of little or no moto be procured ? ment as the Law provides the remedy. By the Provincial Ordinance 31 Geo. III. C. 2, Sec. 3, Courts in this Province are empowered to issue Commissions in the nature of Commissions Rogatoires, even into the Indian Territories and other remote places, and the Provincial Ordinance 32 Geo. III, Chap. 2, the same powers are granted to Courts to issue commissions within the several Districts of the Province, and even in the same District or County where the cause is pending, "if the witness to be examined be resident at thirty miles and upwards from the Court house where the cause is to be adjudged." This commission must be directed to one or more Commissioners, residing in or near the place were such witness may reside ; as to procuring the necessary evidence, thereof, that must be done in open Court if the witnesses are resident within thirty miles distance from the Court House, if not, under Commission as above ; it may however prove difficult in some parts of the Province, to fix upon persons properly qualified to execute the duty of Commissioners, but generally speaking we believe the service can be effected by Commissioners.

The next thing we are called upon for is, to point out any legal difficulties that there may be in carrying through a proceeding of this nature with effect and expedition, as well as the probable expence it may entail.

We have taken up and treated of many of these difficulties and the various points, above; one difficulty however worth noticing here is the delay attending the institution of a suit at law, which could in no degree of possibility be brought to close until the Term next succeeding that in which it was instituted ; and this only in exparte cases. Even then when such judgement is obtained ; it would still be in the power of the Defendant, if he sees fit to institute an Appeal within a year and a day from the date of the judgement and such judgement, being confirmed in appeal, to lodge an appeal before His Majesty in his Privy Council and thereby stay all proceedings as to the Execution of the Judgement for fifteen These Appeals however, could not be allowed until months longer. security was given by such Defendant for the payment of the Costs of the Inferior Court and those of Appeal, which would in many cases render it equal to an impossibility for the Defendant to obtain the delay by Appealing. As to the probable expence of such an action this would vary materially according to the circumstance of the case, first in the value of the thing, secondly from the nature of the pleadings, and thirdly from the Inquête whether taken in Court or under Special Commission issued for the purpose. If the action brought was to Escheat Lands of a less value than £20 Sterling and the Crown were allowed to proceed exparts, on Evidence being adduced in Court ; on an average the probable expance would be about £6.5 Currency, on a like proceeding upon a Commission $\int 9$. Currency. On a litigated case of the same Class where the Evidence is taken in Court about $\int 8$, and the like case on a Commission about £10 10 Currency.

In the cafes where the value of the Land to be elcheated fhould exceed $\pounds 20$ Sterling and be lefs than $\pounds 30$ Currency, an additional fum of one fourth of the above charges,

In cases above £30 and under £100 an additional fum of one third of the fame charges, and in cases of £100 and upwards, double the fums first above mentioned.

We are next called upon, to ftate particularly in what manner the difficulties we have above mentioned may best in our opinion be remedied by Legiflative enactments or otherwife ?

On this branch of the reference which we think of the highest importance we have bestowed every possible attention and we respectfully submit two courses that might be adopted by Legislative provision, either of which in our opinion would be equally beneficial and promote with advantage the interests of the Crown and bring to a fpeedy determination the object now contempla-The first would be to renew and put in force the regulated. tions enacted in the Colony before the conquest by His Most Christian Majesty in cases of a reunion au domaine, either of a fief to the Crown or Lands en censive to the fief of the Seigneur, in cafe the conditions of the grant had not been complied with and more particularly for non-Settlement (tenir feu et lieu.) The provisions we allude to are to be found in the Arrêt of His Most Christian Majesty of 6th July 1711 (1 vol. edits &c. p. 323) which are in substance as follow :

⁶⁶ Sa Majefté etant en fon Confeil a ordonné et ordonne, que ⁶⁷ dans un An du dit jour de la publication du prefent arrêt pour ⁶⁷ tout prefixion et delai les habitants de la nouvelle France ⁶⁷ n'habitant point furles terres que leur ont été concedées, feront ⁶⁷ tenus d'y *tenir feu et lleu* et de les mettre en valeur, faute de ⁶⁹ quoi, et ledit tems paffé, veut fa Majesté que fur les certificats ⁶⁰ des Curés et des Capitaines de la côte, comme lefdites habitants ⁶¹ auront été un An fans tenir feu et lieu fur lefdites terres, et ne ⁶² les auront point mifes en valeur, ils foient dechus de la propri-⁶⁴ été et icelles remifes au domaine des Seigneuries, fous les or-⁶⁴ donnances qui feront rendus par le Sieur Began Intendant au ⁶⁴ dit Pays de la nouvelle France."

There are feveral other arrets tending to the fame object, on the force of which a fummary proceeding was inflituted by feveral Seigneurs before the Intendant; and a reunion ordered (fecond volume edits pages 125, 272, 294, 295, 316 and 331.) Upon a reference to these pages it will be feen that those proceedings were in their nature summary, simple and highly beneficial to the settlement of the Colony.

If therefore this courfe were re-eftablished and the powers given by the faid arrêt to the intendant vessed in the Judges of the Court of King's Bench, to be exercised by them or any two of them, as well in Term as in Vacation, or so many days every two months, the many difficulties above mentioned would disappear, the expence be confiderably diminished and the delay be a mere nothing. We would however recommend the adding of one more to the provisions made before the Conquest which is, that in case the lands to be escheated be fituated in a remote and entirely unfettled part of the Province, publication at the Church door or any other public place in the adjoining Town-fhips or Parishes, and and an advertisement in the Quebec Gazette, would be a sufficient notice, and fervice of the proceedings infituted for the purpose provided the defendant was not a refident in the Province or domiciled therein.

The other courfe we respectfully submit as equally worthy the attention of the Legiflature of this Province are the provisions made by the Colonial Legiflature in Nova Scotia, to effect the efcheating of Lands in that Province. On reference to their ftatute Law, two acts will be found, the one paffed in the 34th year of the reign of His late Majefty Chap. 8, intituled, " an " Act for encouraging the improvement of Lands in the Pe-" ninfula of Halifax, &c. and the other in the 41st year of the fame reign Chap. 6, intituled " an Act for regulating the pro-" ceedings of the Court of Efcheats" by which Acts it will appear that in the province of Nova Scotia, there is a fpecial Court conftituted for the purpose authorized to try and determine in a fuminary manner, by the verdict of a jury, cafes of escheats brought before it, at the fuit of the Attorney General on behalf of the Crown, and on mature confideration of the feveral provisions contained in these two statutes, we think they would prove highly beneficial. Some flight alterations might however be required, such as extending the benefit of these statutes to Seigneurs generally against their Censitaires in all cafes of reunion au domaine, and fuch other provisions as the Legislature might deem it expedient to enact. This report is most refpectfully fubmitted to His Excellency by

Sir,

Your most obedient Servants

NORMAN FITZGERALD UNIACKE, Attorney General. G. VANFELSON, Advocate General.

APPENDIX (E)

This Arrêt is reported to the House in the Appendix (A) to the third Report upon the Crown and Seigniorial Lands.

EXTRACT from His Majefty's Proclamation bearing date at St. James' the 7th October 1763.

"And whereas great frauds & abufes have been committed in the purchafing Lands of the Indians, to the great prejudice of our interefts, and to the great diffatisfaction of the faid Indians; in order therefore to prevent fuch irregularities for the future, and to the end that the Indians may be convinced of our juftice and determined refolution to remove all reafonable caufe of difcontent; we do, with the advice of our Privy Council, frictly enjoin and require, that no private perfon do prefume to make any purchafe from the faid Indians, within those parts of our Colonies where we have thought proper to allow fettlement; but if at any time any of the faid Indians fhould be inclined to difpose of the faid Lands, the fame fhall be purchafed only for us, in our name at fome Public Meeting or Affembly of the faid Indians, to be

Dd 2

held for that purpose by the Governor or Commander in Chief of our Colony, refpectively, within which they shall lie: and in cafe they shall lie within the limits of any proprietaries, conformably to fuch directions and inftructions as we, or they, fhall think proper to give for that purpofe: and we do by the advice of our Privy Council, declare and enjoin, that the trade with the faid Indians shall be free and open to all our subjects whatever; provided that every perfon who may incline to trade with the faid Indians, do take out a License for carrying on such trade, from the Governor or Commander in Chief of any of our Colonies refpectively, where fuch perfon thall refide, and alfo give fecurity to obferve fuch regulations as we shall at any time think fit, by ourfelves or Commiffaries, to be appointed for this purpose, to direct and appoint for the benefit of the faid trade ; and we do hereby authorize, enjoin and require the Governors and Commanders in Chief of all our Colonies refpectively, as well those under our immediate Government, as those under the government and direction of proprietaries, to grant fuch Licenfes without fee or reward, taking efpecial care to infert therein a condition that fuch License shall be void, and the fecurity forfeited, in cafe the perfon to whom the fame is granted fhall refufe or neglect to obferve fuch regulations as we shall think proper to prefcribe as aforefaid."

(Signed,)

Thomas Dunn, President,

Province of Lower-Canada.

Thomas Amyot, Esquire, Secretary and Registrar of this Province:

I do hereby certify the foregoing to be a true Copy of the Entry as found on Record in the Office of Enrollments at Quebec, in Register of Commissions and Letters Patent, No. 5, folio 269.

> Ls. MONTIZAMBERT, Actg. Prov. Sec'y. & Regr.

Provincial Secretary's Office, Quebec, 4th February, 1824.

tice in that Province.

MAY IT PLEASE YOUR MAJESTY,

In humble obedience to Your Majefty's Order in Council, of the 28th day of August 1767, wherein Your Majefty is pleased to Order that we should Report to Your Majefty.

First—Whether any, and what, defects are now fublishing in the prefent state of Judicature in this Your Majesty's Province of Quebec.

And Secondly, Whether the Canadians are, or think themfelves, aggrieved according to the prefent Administration of Juftice; wherein, and in what respects; together with our opinions of any alterations or amendments that we can propole for the general benefit of the faid Province; and that fuch alterations and amendments, for the clearer apprehension thereof, be transmitted to Your Majefty in the form of Ordinances, but not passed as fuch, and that fuch report be returned, Signed by Your Majefty's Governor, or his *locum tenens*, the Chief Juftice and Attorney General of the faid Province; but that, if they should not concur, the perfon or perfons differing in opinion should be required to report the difference of his opinions, together with his reasons for fuch difference of opinion, fully and at large.

We lay before Your Majefty the following view of the Laws and Cuftoms which at prefent prevail in this Province, and of the rules of decifion obferved by Your Majefty's Courts of Judicature in the Administration of Juftice, together with such obfervations on these heads as the experience we have had in our respective Offices, fince we have had the honour to ferve Your Majefty in this Province, has enabled us to make.

In the first place, we beg leave to observe to Your Majesty, that the Laws of England are generally supposed to be in force in this Province. All Criminal Proceedings have been carried on according to these Laws: and in Civil matters no other Laws are cited or appealed to, or allowed to be of any weight in the Courts of Justice; though in one or two Causes certain Customs that prevailed here in the time of the French Government have been admitted as the grounds of the decisions, because the Causes of Action in those litigations had arisen either in the time of the

D d 3

French Government, or during Your Majesty's Government of this Province by your Military Commanders, during which period the ancient Laws and ufages of the Country were fuppoied to be in force : but fince the Eftablishment of Civil Government Your Majesty's Chief Justice of the Province has acted by virtue of a Commission that Commands him to decide all matters that come before him according to the Laws and Customs of that part of Your Majesty's Kingdom of Great Britain called England, and the Laws, Ordinances, Rules and Regulations of your Majesty's Province of Quebec hereafter in that behalf to be ordained and made; fo that he is not at liberty to allow of any other Laws or Cuftoms, but those of England, unless they are expressly introduced or revived by fome of the Ordinances of the Province made fince the Eftablishment of the Civil Government. And further, besides this Commission, there is an express Ordinance of the Province which obliges both your Majefty's Chief Juffice and the other Judges of the Province to follow the fame rule of Judgment. This is the Ordinance of the 17th of September 1764, paffed by the Governor and Council of the Province upon the introduction of the Civil Government, to crect and conftitute the Courts of Juffice by which the faid Civil Government was to be carried on. This Ordinance erects, in the first place, one Superior Court of Judicature, called the King's Bench, in which it directs that your Majefty's Chief Juffice of the Province shall prefide, with power and authority to hear and determine all Criminal and Civil Causes agreeable to the Laws of England and to the Ordinances of this Province; and, in the fecond place, an inferior Court of Judicature, called the Court of Common Pleas, with power and authority to determine all property above the value of ten pounds, with a liberty to either party to appeal to the Superior Court, or Court of King's Bench, when the matter in contest is of the value of twenty pounds, or upwards; and directs that the Judges in this Court fhall determine the matters before them agreeable to Equity, having regard nevertheless to the Laws of England as far as circumstances and situation of things will permit, until such time as proper Ordinances for the information of the people can be established by the Governor and Council agreeable to the Laws of England; and it further directs, that the French Laws and Customs shall be allowed and admitted in all Causes in this Court between the natives of this Pro vince, where the Cause of action arose before the 1st day of October 1764. It then, in the third place, gives powers to Juffices of the Peace to determine matters of property of small value in a fummary way, either fingly, if the matter in dispute does not exceed the value of five pounds, or in conjunction with each other in weekly and quarterly Seffion, where the matter in conteft is of a greater value. The words of this Ordinance, by which these things are ordained, are of the tenor following.

"Whereas it is highly expedient and neceffary for the well governing of His Majefty's good Subjects of the Province of Quebec, and for the fpeedy and impartial diffribution of Justice among the fame, that proper courts of Judicature, with proper powers and authorities, and under proper regulations, fhould be established and appointed, His Excellency the Governor, by and with the advice, confent and affistance of His Majefty's Council, and by virtue of the power and authority to him given by His Majefty's Letters Patent under the Great Seal of Great Britain, hath thought fit to ordain and declare, and his said Excellency, by and with the advice, confent and affistance aforefaid, doth hereby ordain and declare :

"That a fuperior Court of Judicature or Court of King's Bench be established in this Province, to fit and hold terms in the town of Quebec twice in every year, viz, one to begin on the 21st day of January, called Hilary Term, the other on the 21st day of June, called Trinity Term.

" In this Court His Majefty's Chief Juitice prefides, with power and authority to hear and determine all criminal and civil caufes, agreeable to the Laws of England and to the Ordinance of this Province, and from this Court an appeal lies to the Governor and Council when the matter in conteft is above the value of three hundred pounds fterling; and from the Governor and Council an appeal lies to the King and Council, where the matter in conteft is of the value of five hundred pounds fterling or upwards.

" In all trials in this Court all His Majefty's Subjects in this Colony are to be admitted on Juries without diffinction.

"And His Majesty's Chief Justice once in every year to hold "a Court of Affize and general Gaol Delivery, foon after Hila-"ry Term, at the Towns of Montreal and *Trois Rivières*, for the more eafy and convenient distribution of Justice to His "Majesty's Subjects in those distant parts of the Province.

"And whereas an Inferior Court of Judicature, or Court of Common Pleas, is also thought neceffary and convenient, it is further ordained and declared, by the authority aforefaid, that an inferior Court of Judicature, or Court of Common Pleas, is hereby established, with power and authority to determine all property above the value of ten pounds, with aliberty of appeal to either party to the fuperior Court, or Court " of King's Bench, where the matter in contest is of the value of " wenty pounds and upwards.

" All Trials in this Court to be by Juries if demanded by either party; and this Court to fit and hold two terms in every year at the Town of Quebec, at the fame time with the fuperior Court, or Court of King's Bench. Where the matter in conteft in this Court is above the value of three hundred pounds fterling, either party may (if they fhall think proper) appeal to the Governor and Council immediately, and from the Governor and Council an appeal lies to the King and Council, where the matter in conteft is above the value of five hundred pounds fterling, or upwards.

"The Judges in this Court are to determine agreeable to Equity, having regard neverthelefs to the Laws of England, as far as the circumftances and prefent fituation of things will admit, until fuch time as proper ordinances for the information of the people can be established by the Governor and Council, agreeable to the Laws of England.

" The French Laws and Cuftoms to be allowed and admitted in all caufes in this Court between the natives of the Province, where the caufes of action arofe before the first day of October one thousand feven hundred and fixty four.

"The first process in this Court to be an attachment against the body.

" An execution to go against the body, lands, or goods of the " Defendant.

" Canadian Advocates, proctors &c. may practife in this Court. 44 And whereas it is thought highly neceffary for the eafe, con-" venience and happiness of all His Majesty's loving Subjects, that " Juffices of the Peace fhould be appointed for the respective " districts of this Province, with power of determining proper-" ty of fmall value in a fummary way, it is therefore further or-" dained and declared, by the authority aforefaid, and full pow-" er is hereby given and granted to any one of His Majefty's " Juffices of the Peace, within their respective districts, to hear and finally determine in all causes or matters of property not exceeding " the fum of five pounds current money of Quebec; and to any " two Justices of the Peace, within their respective districts to " hear and finally determine in all caufes or matters of property " not exceeding the fum of ten pounds faid Currency; which " decisions being within, and not exceeding the aforefaid limita-"tion, shall not be liable to an appeal; and also full power is, " by the authority aforefaid, given and granted to any three of " faid Justices of the Peace to be a quorum with power of holding

" quarter Seffions in their respective districts every three months, " and also to hear and determine all caufes and matters of pro-" perty which shall be above the fum of ten pounds, and not ex-" ceeding thirty pounds current money of Quebec, with liberty of " appeal to either party to the Superior Court or Court of King's " Bench. And it is hereby ordered, that the aforesaid Justices " of the Peace do iffue their Warrants directed to the Captains " and other officers of the Militia in this Province, to be by " them executed, until the Provost-Marshall, legally authorized " by His Majesty, shall arrive and other inferior officers be ap-" pointed for that purpose; all officers, civil and military or " other His Majesty's loving fubjects, are hereby commanded " and required to be aiding and affifting to the faid Juffices and " Officers of Militia in the due execution of their duty. And " it is further ordered and directed by the authority aforefaid, " that two of the faid Juffices of the Peace do fit weekly in rota-" tion, for the better regulation of the Police and other matters " and things in the Towns of Quebec and Montreal, and that the " names of the Juffices who are to fit in each week be pofted up " on the door of the Seffion Houfe by the Clerk of the Peace, two " days before their respective days of fitting, that all perfons may " know to whom to apply for redrefs."

Further by another Ordinance of your Majesty's Governor and Council, dated the 6th day of November 1764, it is ordained, that until the 10th day of August next, that is, of August 1765, the tenures of lands, with respect to such grants as are prior to the Cession of Canada to the Crown of Great Britain by the definitive Treaty of Peace of February 1763, and the rights of inheritance, as practised before that period, in such lands, shall remain to all intents and purposes the same, unless they shall be altered by some declared and positive Law. The words of this Ordinance relating to this subject are of the tenor following.

"Whereas it appears right and necessary to quiet the minds of the people in regard to their possessions, and to remove every doubt respecting the same, which may any ways tend to excite and encourage vexatious Law Suits, and until a matter of so serious and complicated a nature, fraught with many and great difficulties, can be seriously considered, and such measures therein taken as may appear the most likely to promote the welfare and prosperity of the Province in general, His Excellency by and with the advice and consent of His Maiesty's Council doth hereby ordain and declare that, until the 10th day of August next, the tenures of lands, in respect to such grants signed at Paris the 10th day of February one thousand seven hundred and sixty three, and the rights of inheritance, as practised before that period, in such lands or effects, of any nature whatsoever, ac-

" cording to the custom of this Country, shall remain to all intents " and purposes the same, unless they shall be altered by some declared " and positive Law; for which purpose the present Ordinance shall " serve as a guide and direction in all such matters to every Court of " Record in this Province. Provided that nothing in this Ordinance " contained shall extend, or be construed to extend, to the prejudice of " the rights of the Crown, or to debar His Majesty, his Heirs or Suc-" cessors, from obtaining by due course of Law in any of his Courts of " Record in this Province, according to the Laws of Great Britain, " any lands or tenements, which at any time hereafter may be found to " be vested in His Majesty, his Heirs or Successors and in the posses-" sion of any Grantee or Grantees, his, her, or their Assigns, or such ' as claim under them by virtue of any such grants as aforesaid, or under " pretence thereof, or which hereafter may be found to have become " forfeited to His Majesty, by breach of all or any of the conditions in " such grants respectively mentioned and contained."

By this latter Ordinance we conceive that all the lands in this Province, whose owners have died since the 10th day of August 1765, are meant to be subjected to the English Law of inheritance and the English Custom of dower, and to the English Rules of forfeiture to Your Majesty for high Treason, or escheat to Your Majesty, or to such other Lord of whom they are holden, for felony or defect of heirs, and to all the other rules of the English Law relating to Land-property, even though the said lands had been originally granted before the Signing of the definitive Treaty of Peace ; and that all lands granted since the said Peace were already, at the time of making the said Ordinance, subject to the said English Rules and Customs, and were so to continue.

By these two Ordinances, which have been transmitted to Your Majesty and never disallowed, and are therefore supposed to have received the Sanction of Your Majesty's Royal Approbation, the Canadian Laws and Customs have been generally supposed to be abolished, and the English Laws and Customs to have been introduced in their stead, and the Judges of Your Majesty's Courts of Judicature in this Province have conceived themselves to be in conscience bound to administer justice according to the Laws of England.

Besides these two Ordinances there are several other public Instruments and Acts of Gouvernment, by which the Laws of England are supposed to have been introduced into this Province. Some of these instruments are Acts of Parliament which introduce those particular parts of the Laws of England, to which they relate, into this Province; and others of them are instruments of a high and important nature, that bear the Sanction of Your Majesty's royal Authority, by which it is generally understood to have been your Royal pleasure to abolish the former Laws and Customs of this Province, and for the sake of governing your new Canadian Subjects in a milder and more indulgent manner than they had heretofore been used to, and associating and connecting them with the greater part of your ancient and natural born Subjects of Great Britain by the strong tie of an Union and Communion of Laws, to introduce the Laws of England in their stead. These Acts of Parliament and other instruments of Government are as follows:

The Acts of Parliament that relate to this Province are of two kinds; some of them are prior to the Conquest of this Province by Your Majesty's Arms in the year 1760, but extend to Your Majesty's future American D minions, as well as those which belonged to the Crown of Great Britain at the times of passing them, either by express words for that purpose, or by some general words that have been deemed by Your Majesty's Ministers and Law Officers, by just construction in Law, to comprehend them ; and others of the said Acts have been passed by Your Majesty's self, by the advice and with the consent of your Parliament, since the Conquest and Cession of this Province by the last definitive Treaty of Peace.

The most ancient Act of Parliament of the first kind that we have met with is that of the first of Queen Elizabeth, Chap. 1, by which the pretended authority of the Bishop of Rome was abolished throughout all the Dominions of England. The 16th Section of this Statute is of the following tenor : " And to the intent that all usurped and fo-" reign power and authority, spiritual and temporal, may for ever be " clearly extinguished, and never to be used or obeyed within this " Realm, or any other Your Majesty's Dominions or Countries, may it " please Your Highness, that it may be further enacted by the authori-" ty aforesaid, that no foreign prince, person, prelate, state or poten-" tate, spiritual or temporal, shall at any time after the last day of this " Session of Parliament, use, enjoy, or exercise any manner of power, " jurisdiction, superiority, authority, pre-eminence or privilege, spiritu-" al or ecclesiastical, within this Realm, or within any other Your Ma-" jesty's Dominions and Countries that now be, or hereafter shall be : " but from thenceforth the same shall be clearly abolished out of this " Realm and all other Your Majesty's Dominions for ever; any Sta. " tute, Ordinance, Custom, Constitution, or any other matter or cause " whatspever to the contrary in any wise notwithstanding."

By this Section of that Statute, and the express words any other Your Majesty's Dominions and Countries that now be, or hereafter shall be, we humbly apprehend that all exercise of the Pope's authority, or of any ecclesiastical authority derived from him, is prohibited in this Province as much as it is in England itself.

The next Section of this Act of Parliament annexes all Ecclesiastical Jurisdiction to the Crown of England.

The 19th Section requires all Bishops and other ecclesiastical persons, and all ecclesiastical Officers and Ministers, and all temporal Judges, Justices, Mayors, and other lay or temporal Officers and Ministers, and every other person having the Queen's Fee or Wages within the Realm of England, or any other Her Highness' Dominions, to take the Oath of Supremacy. The 24th Section enacts, that every temporal person doing homage for his Lands to the Queen, her Heirs or Successors, or that shall be received into the service of the Queen, her Heirs or Successors, shall take the same Oath.

And the 27th Section enacts, that if any person of any degree whatsoever, dwelling within the Realm of England or in any other, the Queen's Realms or Dominions, shall by writing, teaching, or preaching, maintain or defend the authority, spiritual or ecclesiastical, of any foreign prince, prelate, person, state or potentate whatsoever, heretofore claimed, used or usurped within the Realm of England, or any Dominion or Country being within or under the power, dominion or obeisance of the Queen's Highness, he shall forfeit all his goods and chattels for the first offence.

We submit it to Your Majesty that this Statute seems, from the whole complexion of it, as well as from the positive words *Your Majesty's Dominions that hereafter shall be*, to have been considered by the Legislature that passed it as an indispensable part of the general Policy of the English Government, and to have been intended to take place in every Country, that either then made or should thereafter make a part of the Dominions of the Crown of England.

The next Statute that we have met with of this comprehensive nature is the Statute of the 15th of Charles the Second, Chap. 7, initiuled, "An Act for the encouragement of Trade." In the 7th Section of this Statute it is enacted, that after the 25th day of March 1664, no commodity of the growth or manufacture of Europe shall be imported into any land, island, plantation, colony, territory, or place to His Majesty belonging or which shall hereafter belong unto, or be in the possession of His Majesty, his Heirs and Successors, in Asia, Africa, or America (Tangier only excepted) but what shall be laden and shipped in England, Wales or the town of Berwick upon Tweed, and in English built Shipping."

Another Statute of the same kind is the Stat. 7 and 8 Will. III. Chap. 22, intituled, "An Act for preventing Frauds and regulating Abuses, in the Plantation Trade;" by which it is enacted and ordained, that after the 25th day of March, in the year 1698, no Goods or Merchandize whatsoever shall be imported into, or exported out of any Colony or Plantation to His Majesty in Asia, Africa, or America belonging; or in his possession or which may hereafter belong unto, or be in the possession of His Majesty, his Heirs or Successors, in any Ship or Bottom, but what is or shall be of the built of England, or of the built of Ireland, or of the built of the said Colonies or Plantations.

And the other Acts of Parliament relating to the Trade of Your Majesty's American Colonies, though they have not such strong positive words in them as the three Statutes above mentioned, yet are generally understood to extend to this Province as well as to Your Majesty's more ancient American Dominions; and, agreeably to this opinion, Your Majesty has caused a Clause to 'be inserted in your Commission to your Governor in this Province, directing him to take the Oath required to be taken by Governors of the Plantations to do their utmost that the several Laws rela or to Trade and Plantations, be duly observed; and this Oath he hath accordingly taken. And Your Majesty's Commissioners of the Customs have appointed a Collector and Comptroller of the Customs, and other Officers necessary for the collection of them for this Port of Quebec, in order to carry all these Acts of Parliament into execution.

Another Statute that we understand to be in force in this Province, though made before the Conquest of it and not extended by express words to the future dominions of the Crown of Great Britain is Stat. 2, 12th Ann, Chap. 18, intituled, "An Act for preferving all fuch Ships and Goods thereof which shall happen to be forced on fhore, or ftranded, upon the Coafts of this Kingdom, or any other of her Majesty's Dominions." This Statute, and another of the 4th of Geo. I Chap. 12, for enforcing and making the former perpetual, have been declared by Your Majefty's Attorney and Solicitor General, in the month of June 1767, in an opinion given by them to Your Majefty's Lords Commiffioners of Trade and Plantations, upon a cafe ftated to them by those Lords, to extend to Your Majesty's Plantations in America : and no exception is made in their opinion of those of Your Majefty's Dominions in America which have been acquired fince the paffing of those Statutes. And Your Majefty's Ministers have transmitted the faid cafe and opinion to Your Majefty's Governor of this Province, upon a supposition as we apprehend, that it extends to this Province as well as to all the others.

These are the Acts of Parliament passed before the Conquest and Cession of Canada, that we conceive to be in force in this Province by their own import and operation, and without needing any further Act of Government to introduce them.

Some of these Acts of Parliament passed by Your Majesty's felf fince the Conquest and Cession of Canada relating to this Province are these that follow:

The first of these Statutes is that of the 4th year of your Majesty's reign, Chap. 11, which amongst other things, enacts, that so much of an act made in the 8th year of King George the First, intituled, "an Act for giving further encouragement to the importation of Naval Stores, and for other purposes therein mentioned," as relates to the importation of wood and timber, and of the goods commonly called *Lumber*, therein particularly enumerated, from any of your Majesty's British plantations or Colonies in America, free from all customs and impositions whatsoever, fhall be continued, beyond the times appointed in former Acts, to the 29th September in the year 1771.

In this Statute the words *British plantations* are generally underftood to relate to this Province as well to your Majesty's other Colonies in America; and a copy of this Statute has accordingly been transmitted by the Commissioners of your Majefty's Customs in London to your Majesty's Collector of the Cuftoms in this Port.

The next Act of Parliament of this kind is of the fame 4th year of your Majefty's reign, chap. 19. This Statute expressly relates to this Province by name, being intituled, "An Act for importing Salt from Europe into the Province of Quebec, in America for a limited time". It enacts, "that it fhall be law-"ful for any of His Majefty's Subjects to carry and import "Salt from any part of Europe into the faid Province of Que-"bec, in America, in Britifh fhips and vessels manned and navigated according to the Act of navigation; any Law, Statute, "Usage, or Custom, to the contrary in any wise notwithstand-"ing."

By these laft words it feems to be fupposed that all the former Laws and Statutes of Great Britain relating to this fubject of the importation and exportation of goods and Merchandize, made before the conqueft of this Province, are of force in this Province as well as in the other British Provinces in America.

Another Act of Parliament paffed by your Majefty, and expressly relating to this Province, is the Statute of the fame 4th year of your Majefty's reign, chapter 15, intituled, "An Act for granting certain duties in the British Colonies and plantations in America, and for other purposes." By this Statute it is enacted, that certain rates and duties therein mentioned shall be paid upon several species of foreign goods therein enumerated, that shall after the 29th day of September 1764, be imported or brought into any colony or plantation in America, which now is, or hereafter may be under the dominion of your Majefty, your Heirs and Successfors; and these duties are accordingly levied and paid in this Province.

Thefe are the Acts of Parliament, or at leaft fome of them (for poffibly there may be others which have escaped our notice) which by their own import and operation extend, as we conceive, to this Province, without the help of any other inftrument or Act of Government to introduce them; and therefore fuch parts of the Laws of England as are contained in thefe Statutes are certainly in force in this Province, being introduced into it by the higheft authority, that of your Majefty, or your Royal Predecesfors, in conjunction with both Houses of Parliament. The remaining parts of the Laws of England have been introduced, or are generally understood to have been introduced, by a feries of public instruments or Acts of Government, founded on your Majesty's Royal Authority alone, without the concurrence of your Parliament. These public instruments and Acts of Government are as follows :

The first of these public instruments is the Capitulation granted by Your Majesty's General, Sir Jeffery Amherst, to the inhabitants of Canada at the general Surrender of the whole Country to Your Majesty's Arms in the year 1760. In the 42d Article of this Capitulation it is defired by the French Commander, on the behalf of the French and Canadian inhabitants of this Province, that they fhall continue to be governed according to the Cuftom of Paris and the Laws and Ufages established in this Country; to which it is answered by your Majesty's General, that they become fubjects to the King : by which it fhould feem, that thefe your Majesty's new Subjects in this Province were put upon the fame footing as your Majesty's other fubjects in other parts of your Majesty's British Dominions with respect to the Laws by which they were to be governed, and the power of legislation that was to be exercifed over them for the time to come, and that the continuance or abolition of their former Laws and cuftoms was to depend entirely upon the future counfels which your Majesty in your royal wisdom, should find it expedient to purfue,

The 27th article of this capitulation demands, that the free exercise of the Roman Catholic religion shall sublist entire, in such manner that all the people shall continue to affemble in the Churches and to frequent the facraments as heretofore, without being molested in any manner, directly or indirectly : and then it goes on and demands, in the fecond place, that the people fhall be obliged by the English government to pay the Priests the Tithes and all the Taxes they were used to pay under the Government of the French King. The General's answer to this article is as follows :-- " Granted as to the free exercise of their religion. The obligation of paying tithes to the Priests will depend upon the King's pleasure." By this answer it is evident that a bare toleration, or permiffion to exercise freely the Roman Catholic Religion, without being molefted for fo doing by the execution of the penal Laws of England upon that subject, is granted to the Canadians, together with a reafonable use of their Churches for that purpose, though not, as we conceive, to the entire exclution of your Majesty's Protestant fubjects from making ufe of the fame Churches likewife; but a legal eftablishment of that religion, with a right to exact their Tithes from the people as legal dues and not as voluntary contributions, is refused them, until your Majesty's pleafure shall otherwife direct, which your Majesty has not yet judged expedient to do. By this refusal all those parts of the Canadian Laws and Usages relating to the payment of Tithes and other Church dues are either abolished or fuspended.

The 31st article of the fame capitulation is as follows :---"The Bishop shall, in case of need, establish new Parishes, and provide for the re-building of his Cathedral and his Epifcopal Palace; and in the mean time, he shall have the liberty to dwell in the town or parishes as he shall judge proper. He fhall be at liberty to vifit his diocese with the ordinary ceremonies, and exercife all the jurisdiction which his predeceffors exercifed under the French Government, fave that an Oath of Fidelity, or a promife to do nothing contrary to his Britannic Majesty's Service may be required of him." To this article your Majesty's General made the following answer :--" This article is comprised under the foregoing." Now the foregoing or 30th article is directly refused; therefore this article must be deemed to be refufed likewife, and confequently by this refufal all those parts of the Canadian Laws and Cuftoms that give a right to the Bifhop of Quebec to establish new Parishes, and to provide for the re-building of his Cathedral and his Epifcopal Palace, and to vifit his diocefe with the ordinary ceremonies, and to exercife the jurifdiction which had been exercised by his predeceffors under the French Government, are abolifhed, and your Majefty's ecclefiastical fupremacy is vindicated and fupported in a manner agreeable to that important and univerfal Statute of the 1st of Queen Elizabeth, above cited.

The next public Inftrument relating to the condition of this Province is the definitive Treaty of Peace, concluded at Paris on the 10th day of February 1763. In the fourth Article of this Treaty it is declared, that Your Majefty will give the most effectual orders that your new Roman Catholic fubjects may profefs the worship of their religion according to the Rites of the Roman Church, as far as the Laws of Great Britain permit. By this reference to the Laws of Great Britain it should seem to have been Your Majesty's intention, that those Laws should be the fundamental rule of Government in this Province.

The next public Inftrument relating to this subject, and upon

which great strefs has been laid by all Your Majesty's British fubjects, that have resorted to this Province, is Your Majefty's Royal Proclamation of the 7th of October 1763, which feems to have had principally in view the profit and advantages that might accrue to Your Majefty's British fubjects by reforting to, or fettling in, the countries that had lately been ceded to Your Majefty by the definitive Treaty of Peace. By this very folemn and important Instrument, passed under Your Majesty's Great Seal of Great Britain, it is declared that, " Your Majesty being desirous " that all Your Majefty's loving fubjects, as well of your King-" doms as your Colonies in America, may avail themfelves, with " all convenient speed, of the great benefits and advantages that " must accrue from the great and valuable acquisitions lately ce-" ded to Your Majesty in America, to their commerce, manufac-" tures and navigation, has thought fit, with the advice of Your " Privy Council, to erect four new Governments, to be ftiled and " called by the names of Quebec, East Florida, West Florida. " and Grenada; and that, as it will greatly contribute to the " fpeedy fettling the faid new Governments, that Your Majefty's " loving fubjects fhould be informed of Your Majefty's paternal " care for the fecurity of the liberty and properties of those who " are or shall become inhabitants thereof; Your Majesty hath " thought fit to publish and declare, by that Your Majesty's Pro-" clamation, that Your Majesty has, in the Letters Patent under " the Great Seal of Great Britain by which the faid Govern-" ments are conftituted, given expreis power and directions to " your Governors in the faid new Colonies, that, so foon as the " ftate and circumftances of the faid Colonies will admit thereof, " they fhall, with the advice and confent of the members of Your " Majefty's Councils, fummon and call General Affemblies with-" in the faid Governments, in fuch manner and form as is used " and directed in those Colonies and Provinces in America which " are under Your Majefty's immediate Government; and that " Your Majefty has also given powers to the faid Governors, " with the confent of Your Majefty's faid Councils and Repre-" fentatives, so to be fummoned as aforefaid, to make, constitute, " and ordain Laws, Statutes, and Ordinances for the public peace, " welfare and good government of Your Majefty's faid Colonies, " and of the people and inhabitants thereof, as near as may be to " the Laws of England, and under such regulations and reftric-" tions as are used in other Colonies."

And then it is further declared in Your Majefty's faid Proclamation, "that in the mean time, and until fuch Affemblies can E e 2 " be called as aforefaid, all perfons inhabiting or reforting to "Your Majefty's faid Colonies may confide in Your Majesty's "Royal protection for the enjoyment of the benefit of the Laws of Your Realm of England; and that for that purpole Your "Majefty had given power under the Great Seal to the Gover-"nors of Your Majefty's faid new Colonies, to erect and confti-"tute, with the advice of Your Majefty's faid Councils refpectively, Courts of Judicature and Public Juftice within the faid Colonies for the hearing and determining all caufes, as well crimal as civil, according to law and equity, and, as near as may be, agreeably to the Laws of England, with liberty to all perfons who may think themfelves aggrieved by the fentence of fuch Courts, in all civil cafes, to appeal, under the ufual limitations and reflictions to Your Majefty in Your Privy "Council."

These are the words of Your Majefty's faid Proclamation, and by them Your Majefty's British subjects in this Province declare, that they have always underftood that the Laws of England have been introduced into this Province, and that it was Your Majesty's intention to affimilate the Laws and Civil Government of it to those of the other American Colonies and Provinces, which are under Your Majefty's immediate government, and not to continue the municipal Laws and Cuftoms by which the conquered people had heretofore been governed. And through a confidence in this Proclamation, understood in this fense, they fay, they have quitted their native country to come and fettle in this Province, expecting to change only their climate by fuch removal in purfuit of commercial advantages, and not to become fubject to the Laws of the conquered people, with which they are wholly unacquainted, and against which (though perhaps without reason) they entertain ftrong prejudices.

And in this fense was this Proclamation underftood also by Your Majefty's late Governor of this Province and his Council, who did not, in making the important Ordinance above mentioned, of the 17th of September 1764, conceive themfelves to be overturning all the ancient Laws and Customs of this Country, and introducing the Laws of England in their stead, but meant only to erect and conftitute Courts of Judicature to administer a system of Laws already in being, to wit, the Laws of England, which they conceive to have been already introduced there by the words of Your Majesty's Proclamation. And in this fense likewife, Your Majesty's Lords Commissioners for Trade and Plantations, in the month of September 1765, understood these words in Your Majesty's Proclamation; for in the 7th and last Article

of a Report made by the faid Lords Commissioners, upon certain Memorials and Petitions from Your Majesty's fubjects in this Province, complaining of the Ordinances and Proceedings of the Governor and Council of this Province, and of the then prefent establishment of the Courts of Judicature and other Civil Constitutions, of the Lords of the Committee of Your Maiesty's Privy Council for plantation affairs, dated on the 2nd day of September in the faid year, the faid Lords Commissioners of Trade propose, that in all cases where rights or claims are founded on events prior to the Conquest of Canada, the several Courts shall be governed in their proceedings by the French usages and customs which have heretofore prevailed in respect to such property : from which words it appears plainly that their Lordships understood that in all cafes, where rights and claims are founded on events posterior to the faid Conquest, the feveral Courts of Justice were to be governed by the English Laws, and that their Lordships were folicitous to make an express provision, that this general rule of deciding cafes according to the English Laws, fhould not be applied to fuch caufes as were founded on events that were prior to the faid Conquest, in which cafes it would be manifestly unjust.

We know at the fame time that Your Majesty's Attorney and Solicitor General, in the following month of April 1766, understood the words of Your Majesty's Royal Proclamation in a more confined fenfe, as being introductive of only fome felect parts of the Laws of England, that were more particularly beneficial to Your Majesty's English subjects, and not of the whole body of those Laws. This they took to be the true import of these words in Your Majefty's Proclamation above mentioned, the enjoyment of the benefit of the Laws of England; and they were of opinion that the Criminal Laws of England were almost the only Laws that came under that description; and that the Laws of England relating to defcent, alienation, fettlements and incumbrances of real estates, and to the distribution of perfonal property in cafe of intestacy, were certainly not comprehended under it. Whether this or the former way of interpreting this part of Your Majesty's Proclamation is the true one, belongs only to Your Majesty to determine, according to the ancient Rule of Law laid down by the celebrated Lawyer Bracton, that " cuius est condere, ejus est interpretari." All that we prefume to do on this occafion is to lay before Your Majefty a full and plain hiftorical account of the feveral Public Instruments and Acts of Government by which the Laws of England have either been introduced, or Ee 3

imagined to be introduced, into this Province in lieu of those Laws and customs which were observed in it heretofore.

The next Public Inftrument of this kind is Your Majefty's Commission to General Murray, in the year 1764, to be Vice-Admiral, Commiffary and Deputy in the Office of Vice-Admiralty in the Province of Quebec. This is a Judicial Commiffion. by which the faid General was empowered to enquire, by the Oaths of honeft and lawful men of the faid Province, of all and fingular matters and things which of right, and by the Statutes. Laws, Ordinances and Cuftoms, anciently observed, were wont and ought to be enquired after; and of wreck of the fea; and of goods of felons of themfelves; and likewife of goods waived, flotfon, jetfon, ligan, deodans, derelicts and other cafualties upon the fea, or fea coaft, or fresh water Rivers, as far as the tide flows ; and also of anchorage, lastage, ballast, and fish Royal, anciently by right or cuftom belonging to Your Majefty, and to arreft, or caufe to be arrefted, according to the Civil and Maritime Laws and ancient cuftoms of Your Majefty's Court of Admiralty, all fhips, perfons and merchandizes for caufes arifing within the Maritime Jurisdiction, and to hear and determine the faid caufes, with all the matters incident thereunto, according to the Laws and customs aforefaid; and to fine, chastile and imprifon within any of the Goals of the Province the parties that shall be found guilty. according to the rights, Statutes, Laws, Ordinances and Customs anciently obferved.

By this Commission it is evident your Majesty has introduced into this Province, all the Laws of your Majesty's English Court of Admiralty, in lieu of the French Laws and Customs by which Maritime Causes were decided in the time of the French Government.

The next Public Inftrument relating to this fubject is your Majefly's Commiffion to General Murray, in the year 1764, to be Captain General and Governor in Chief, in and over this your Majefty's Province of Quebec. This Commiffion, and the instructions, that accompanied it, feem every where to pre-suppofe that the Laws of England were in force in this Province, being full allufions and references to those Laws on a variety of different fubjects, and not containing the least intimation of a faving of any Part of the Laws and Customs that prevailed here in the time of the French Government.

It feems as if your Majefty had been of opinion, that by the refufal of General Amherst, to grant to Canadians the continuance of their Ancient Laws and ufages, and by the reference made in the fourth Article of the definitive Treaty of Peace to the Laws of Great-Britain, as the meafure of the indulgence intended to be fhewn them with refpect to the exercise of their religion, fufficient notice had been given to the conquered inhabitants of this Province, that it was your Majefty's Pleafure, that they fhould be governed for the future according to the Laws of England, and that they, after being thus apprized of your Majefty's intention, had confented to be fo governed, and had teftified their faid confent by continuing to refide in the Country and taking the Oath of allegiance to your Majefty, when they might have withdrawn themselves from the Province, with all their effects and the produce of the Sale of their Effates, within the eighteen months allowed by your Majefty for that purpofe.

. These are the Public instruments by which it is generally supposed, by those who have perused them, that the Laws of England have been introduced into this Province. But as your Majefty's Royal Proclamation above mentioned, and your Commission to General Murray to be Governor in Chief of this Province, have never been published here in the French language, and as the Provincial Ordinances above mentioned of the 17th of September and the 6th of November 1764, which have been published here in the French language, have mentioned this change in the Laws in very concife and general terms, without fpecifying or describing any of the Laws of England that were thereby introduced, the greatest part of your Majesty's new subjects remain ignorant of the extent of the change to this hour, and imagine that their ancient Laws and usages are in many points still in force. They still divide their lands upon an inheritance in the fame manner as before the Conquest; their widows are admitted to the fame shares of them as before, without any regard to the English rule of dower, which differs widely from that of the French Law ; and the perfonal Eftates of perfons who die inteltate are diftributed at their decease according to the rules of the French Law, which are fomewhat different (though not very greatly, as we are informed) from those of the English Statute of distributions; and the distributions of their perfonal Effates have likewife been made for the most part by perfons authorized thereunto in the manner that was ufual under the French Government, and not by receiving letters of administration from your Majesty's Governor of the Province in the manner directed by your Majesty's instructions. Fortunately for the Peace of the Province no litigations have yet arifen in any of your Majesty's Courts of Justice to give occasion to decifions that would make them acquainted with the change of the Laws in these particulars, which would probably create a great deal of uneafiness. Ee4

Yet upon the decease of your Majesty's British subjects in this Province, their relations have taken out letters of administration from the Governor of the Province, agreeably to your Majesty's instruction for that purpose, and, as we believe, have followed the English rule of distribution, and fome few, but very few, of your Majesty's new subjects have likewise taken out letters of administration in the fame manner, but have followed, as we believe, the rules of the French Law, with respect to the distribution of the effects. We humbly apprehend that this diversity in the practice of your Majesty's subjects in this Province, may hereaster be the occasion of fome confusion, though happily no bad confequences have hitherto followed from it.

There has likewife been a diverfity in the practice of your Majesty's old and new fubjects with refpect to the manner of conveying and mortgaging landed property. Your Majefty's British subjects have bought and fold lands and houfes by inftruments drawn up by English Lawyers, according to the English modes of conveyancing; and your Majefty's Canadian fubjects have employed Canadian Notaries or Scriveners, for the fame purpofes, who have followed the French forms of conveyancing made use of before the Conqueft. And it has often happened that the fame lands and houses have been fold and bought and mortgaged by both French and English conveyances, as they have passed into the hands of Canadian or British Proprietors. This also, we conceive, may hereafter be productive of fome confusion. Leafes have likewife been made of lands near Quebec for twenty-years by the Society of Jefuits in this Province, though by the French Law they can only be made for nine years. This has been done upon a fuppolition that the reftraints upon the power of leafing lands impofed upon the owners of them by the Cuftom of Paris, of which this is one, have no longer any legal existence. Upon the same principle many owners of Seigniories, Canadians as well as Englishmen, have made grants of uncleared land upon their Seigniories for higher Quit-Rents, than they were allowed to take in the time of the French Government, without regard to a rule or cuftom that was in force at the time of the Conquest, that restrains them in this particular. And as the Seigniors transgress the French Laws in this refpect, upon a fuppofition that they are abolifhed or fuperfeded by the Laws of England, fo the Freeholders, Peafants, of the Province trangress them in other inftances upon the fame fupposition. For example, there was a Law made by the French King concerning the Lands of this Province, ordaining, that no man should build a new dwelling House in the Country (that is, out of the Towns and Villages) without having

fixty French Arpents or about fifty English Acres, of land adjoining to it, and that, if upon the death of a Freeholder and the partition of his lands amongst his Sons, the share of each Son came to less than the faid fixty Arpents of land, the whole was to be fold, and the money produced by the fale divided amongst the Children. This was intended to prevent the Children from fettling themfelves in a fupine and indolent manner upon their little portions of land, which were not fufficient to maintain them, and to oblige them to fet about clearing new lands (of which they had a right to demand of the Seignors fufficient quantities at very eafy quit rents) by which means they would provide better for their own maintenance, and become more useful to the public. But now this Law is entirely difregarded, and the Children of the Freeholders all over the Province, fettle upon their little portions of their fathers' land, of thirty or twenty, and fometimes only ten Acres, and build little huts upon them, as if no fuch Law had ever been known here; and when they are reminded of it by their Seigniors, and exhorted to take and clear new tracts of land, they reply that they understand that by the English Law every man may build a Houfe upon his own land whenever he pleafes, let the fize of it be ever fo fmall. This is an unfortunate practice, and contributes very much to the great increase of idleness, drunkenness and beggary, which is too vifible in this Province.

Further, many perfons who have purchafed Seigniories in this Province, and amongft them fome Canadians, have hitherto declined paying to your Majefty's Receiver General the Mutation fine, or fifth part of the purchase money, due to your Majefty upon the admiffion of every new Seignior by the Cuftom of Paris. The Englifh purchasers fay that this, being part of the Cuftom of Paris, is now abolifhed by the introduction of the Laws of England; and the Canadian Seigniors fay that it is not due to your Majefty till they have been regularly invefted with, or put in possefion of, their Seigniories, with all the rights and jurisdictions thereunto belonging, by your Majefty's officers of Government, and have been admitted to take the Oath of Fealty and perform the Ceremony of homage to your Majefty, for the faid lands, which has not hitherto been done.

Thus it appears that in many refpects the Canadians apprehend the Laws of England to be in force in this Province, and that they endeavour to apply them and put them in practice whenever they take them to be for their advantage; though in other points, and particularly in those of inheritance and dower, and the distribution of the effects of perfons who die inteftate, they have univerfally adhered to their former Laws and ufages. In criminal proceedings the Canadians as well as English univerfally suppose these laws to be in force. No others are ever mentioned or thought of; and the Canadians seem to be very well fatissied with them.

And in all civil proceedings carried on in the fuperior Court, or Court of King's Bench, the forms of all actions, the file of the pleadings used in them, the method of trial, and the rules of Evidence are those which are prescribed by the English Law, and are univerfally known by the Canadians to be fo.

In the Court of Common Pleas the proceedings are drawn up in any form and ftile that the parties, or their Advocates, think proper, and fometimes in the French and sometimes in the Englifh language, as the Attornies who prepare them happen to be Canadians or Englifhmen; and for this reafon they are oftenest in the French language, most of the bufiness in this Court being managed by Canadian Attornies.

Arrefts of the body for debt are used in the first instance, both upon fuits in the Court of King's Bench and fuits in the Court of Common Pleas, and even upon fuits inftituted before Juffices of the Peace. This is part of the English Law, that a good deal furprized and alarmed the Canadians upon its first introduction, as it carried an appearance of much greater feverity than was practifed under their own Laws, which allowed of imprisonment only in Criminal proceedings and in fome few Civil Suits grounded on bills of Exchange, or other instruments of a Commercial nature, and then only in execution of a Judgement of the Court, and not in the beginning of the fuit; but now they are grown accustomed to this way of proceeding, and frequently put it in practice against each other : and many perions of good fense and character, of both nations, are of opinion that, confidering the great credit that has been given by Perfons in Trade in this Province, and the knavifh and trickifh difposition that has appeared in many of those to whom it has been given, there is no other method of proceeding by which the Creditors can hope to obtain payment of their debts. This is more especially the opinion of vour Majesty's British Subjects that are concerned in Trade in this Province, many of whom objected fome time fince to the execution of even a part of the English Law itself, to wit, that part of it which relates to Commissions of bankruptcy, upon a supposition of its being too indulgent to debtors to be useful in this Province ; yet other perfons are of a different opinion, and think arrefts of the body in the first instance an unnecessary piece of harfhness in Civil Suits, and with that it were reftrained ; and

to this opinion we humbly fubmit it to your Majesty that we are ourselves inclined.

This is, as we conceive, a faithful reprefentation of the prefent flate of the Laws in this Province, and of the Public Inftruments and Acts of Government upon which it is founded. We now beg leave to lay before your Majefty certain doubts that have arifen, and may arife, concerning the validity of those Inftruments, and the extent of their legal operation.

We thall fay nothing concerning the validity of your Majefty's Proclamation of the 7th of October 1763, and the high legislative authority which your Majefty has therein thought proper to exercife with respect to your Majefty's new Colonies, though there are perfons who think that this branch of your Majefty's Royal prerogative ought rather to have been exercifed in conjunction with both Houfes of Parliament : but we should suppose that what your Majefty has thought fit to do in this respect by the advice of your Majefty's Privy Council must be legal, and confequently that the operation of the words above cited from your Majesty's faid Proclamation is complete and incontestable fo far as the true meaning of them can be ascertained. But if your Majesty in your royal wisdom should interpret them in a different fense from that in which they have been generally underftood, and fhould declare that they were not meant to introduce the whole body of the Laws of England that were not in their nature local, but only to introduce fome particular parts of them that were more immediately beneficial to your Majefty's Subjects, agreeably to the fenfe in which they were underftood by your Majefty's Attorney and Solicitor General, in April 1766; or, if your Majefty should declare that they were not meant to introduce immediately any part of the Laws of England into those Provinces, but only to promise and affure your Majesty's British Subjects that your Majesty would, in due time and place, and by particular and express promulgations, introduce fome felect parts of the Laws of England, that were more immediately conducive to their welfare and fatisfaction; in either of these cases we beg leave to submit it to your Majesty's confideration, whether the Ordinances above mentioned, of the 17th of September and the 6th of November, can be deemed of fufficient validity to introduce any part of the Laws of England that were not already established by your Majesty's faid Proclamation. Our reafons for doubting this are as follows.

Your Majesty by your Commission to General Murray, dated the 21st day of November in the 4th year of your Majesty's reign, to be Governor in Chief of this Province, was pleafed to delegate unto him certain limited legislative authority, to be exercifed by him by and with the advice and confent of your Majefty's Council of the Province, and of the general Affembly of the Freeholders and Planters in the fame, therein directed by your Majesty to be fummoned; to wit: an authority to make, conftitute and ordain Laws, Statutes and Ordinances for the public peace, welfare, and good Government of the faid Province, not repugnant, but, as near as may be, agreeable to the Laws and Statutes of your Majesty's Kingdom of Great Britain. But your Majesty did not in any part of the faid Commission delegate either this or any other legislative power to your faid Governor to be exercised by him with the advice and confent of the Council only, without the concurrence of an Affembly. Now no Asfembly of the Freeholders and Planters has hitherto been fummoned; confequently all the Ordinances that have hitherto been made, fo far as they have a legislative tendency, have been made without any Warrant or authority from your Majefty's Commisfion to your Governor, and perhaps may, upon that account, be justly contended to be null and void.

If this be to, the words in the Ordinance of the 17th of September 1764, which direct the Court of King's Bench to determine all Civil and Criminal Caufes agreeably to the Laws of England, and the other words of that Ordinance, and of the Ordinance of the 6th of November following, which purport to introduce the Laws of England into this Province, can have no legal operation to change the Laws which were then fubfifting in the Country; and the Ordinance of the 17th of September must be confidered only as an Executive Act of Government, erecting and confficuting Courts of Judicature in the Province for the Adminiftration of the Laws in being, whatever those Laws might be; and in this view it is certainly a legal and valid Ordinance, becaufe your Majefty had, by an express Claufe in your Commiffion aforefaid, given your faid Governor full power to erect fuch Courts with the advice and confent of the Council only.

It is true indeed that your Majefty did give a private inftruction to your late Governor, purporting to communicate to him a certain degree of legiflative authority to be exercised by him, by and with the consent of the Council only, without any Affembly; to wit, an authority to make such rules and regulations as shall appear to be necessary for the peace, order and good Government of the said Province, taking care that nothing be passed or done that shall any ways tend to affect the life, limb or liberty of the subject, or to the imposing any duties or taxes. But we submit it to your Majesty's consideration, whether a power of this kind can be communicated by any other inftrument than Letters Patent under vour Majesty's Great Seal of Great Britain, publicly read and notified to the people, to the end that the Acts done by virtue of them may have a just claim to their obedience; for otherwife they may alledge that they are faithful and loyal fubjects to your Majefty, and ready to pay obedience to every thing that your Majefty's felf fhall ordain, and likewife to every thing that fhall be ordained by your Majefty's Governor by virtue of powers properly communicated to him by your Majefty, that confequently they will obey him in every thing he shall do by virtue of the powers conveyed to him in your Majesty's Commission, which has been publicly read to them; but that in the things not warranted by the faid Commission, but faid to be done in pursuance of certain private instructions that have not been made known to them, and which they are therefore uncertain whether he has received or not, they cannot prefume that he acts by your Majefty's authority, and therefore are not bound to obey him. For this reafon we humbly apprehend, that the private inftruction before mentioned cannot have legally conveyed to your Majefty's Go. vernor and Council the Legiflative authority mentioned in it. fmall and narrow as it is.

But fecondly, if a private inftruction fhould be deemed to be a legal method of communicating a Legiflative authority, yet the power conveyed to the Governor and Council of this Province, by the instructions above mentioned, is much too confined an authority to warrant the general introduction of the English Laws, particularly of the Criminal Laws, which all affect either life, or limb or liberty; and the Process of Arrefts of the body in Civil Suits for debt and tresspass; and the power of committing perfons to prifon for contempts of Court committed in the prefence of your Majefty's Judges; and that of granting attachments of the body for difobedience or refistance to the Orders of your Majefty's Superior Courts of Judicature, when fuch Acts of difobedience or refistance are committed out of Court; which all immediately affect the perfonal liberty of your Majefty's fubjects in this Province.

These are the reasons upon which, we conceive, the legality of the introduction of the Laws of England into this Province by the Provincial Ordinances above mentioned may be called in question.

But these reasons have no relation to the other high inftruments of Government by which these Laws may be supposed to have been introduced here, namely, the Articles of Capitulation in 1760, the 4th Article of the definitive Treaty of Peace, and your Majesty's Royal Proclamation of the 7th of October 1763. If thefe inftruments have introduced the Laws of England, they may have a legal existence in this Province, notwithstanding the want of legal authority in the two Provincial Ordinances above mentioned. But if your Majesty should determine that these inftruments have not introduced the Laws of England into this Province, then, as we conceive, it will follow, that the whole body of those Laws has not yet been legally introduced into it, but that those parts only of the Laws of England have a legal existence in this Province, which are contained in the Acts of Parliament above mentioned, which by their own import and operation, and without needing any new instrument of Government to introduce them, extend to all your Majesty's Dominions in America.

We will now proceed to lay before your Majefty the principal inconveniencies under which the Canadians labour from the prefent flate of the Laws and methods of administering Justice in this Province.

The first and greatest inconvenience arising from the present ftate of the Laws in this Province is the uncertainty of them, and the doubts that are entertained concerning the legal continuance of the ancient Laws and Cuftoms that were observed here in the time of the French Government. This is a cause of great uneafiness and anxiety to perfons of both nations in many of the ordinary transactions of life; in fo much that it would be a great improvement of the condition of the Province, if either the Englifh Laws, or the old Laws and Cuftoms of the Country, were eftablished by some new act of the Government, conceived in the most clear and positive words that can be made use of, with an express exclusion or abolition of the other Laws, which may be imagined to have hitherto been in force. For by this declaration in favor of either of the fystems, your Majesty's Subjects would know what they had to expect for themfelves and their families with respect to their inheritances, purchafes, mortgages, Contracts and other Civil rights and privileges from the operation of the Laws; and would in confequence thereof proceed to make fuch regulations of their affairs by particular agreements and fettlements and by their laft Wills and Teftaments, as would protect them against the inconveniences, which they might apprehend themfelves to be exposed to from fuch parts of the eftablished fyftem of Laws as they did not approve. We do not mean by this to infinuate, that fuch an immediate eftablishment of one of these systems of Law, to the entire and express abolition and exclusion of the other, would be the best remedy that could be applied to this evil; but only to reprefent to your Ma jeft y cu idea of the greatness of this inconvenience, fince even fuch a cure would be defirable. What is the beft remedy that can be applied to this evil is, as we conceive, a point of the greatest difficulty, and fit only to be determined by the wisdom of your Majefty's Councils, though in obedience to your Majefty's Commands, we fhall humbly fuggeft to your Majesty, in the fubfequent part of this report, fome of the different methods that, as we apprehend, may be taken for this purpofe, with the advortages and difadvantages with which they will be refpectively accended: But before we proceed to confider this arduous fubject, we beg leave to lay before your Majefty fome other and much fmaller inconveniencies arifing from the present flate of the Courts in this Province, together with a Plan for the adminification of Juftice for the time to come, which we humbly conceive to be likely in a great meafure to remove them.

These inconveniencies are the expensiveness of Law proceedings which is confiderably greater than in the time of the French Government, the tediousness of them, and the severity of the prefent method of proceeding in Civil Suits by arrefting and imprifoning the defendant's body.

The Expenses attending Law Suits arife evidently from two different fources, the fees of the officers of the Courts of Justice, and those of the Attornies and Advocates whom the parties employ in the management of their caufes. The former are capable of being properly regulated, as the perfons to whom they are due are all fervants to your Majefty, and under the immediate controul of your Majesty's Governor and Council; and measures have been already taken to eafe your Majefty's fubjects in this Province of fome part of these fees; your Majesty's Chief Justice and Clerk of the Crown have remitted those that used to be taken by them in the fupreme Court, and those of the Attorney General for the conduct of Criminal Profecutions have always been charged to your Majefty : and if those which are taken by the Clerk of the fupreme Court for the Civil bufinefs that is transacted there, and by the Provoft Marshal, or Sheriff, and his bailiffs, for their fummonfes, arrefts and other ministerial business done by them in the courfe of the proceedings, and those which are taken in the Court of Common Pieas, or the quarterly and weekly Courts of the Justices of Peace, by the feveral offiers of those Courts, are found to be unreasonable, it will be easy to reduce them to a more moderate standard by a provincial Ordinance for that purpofe, if your Majefty will condefcend to make fuch a reafonable addition to the falaries of these feveral officers as shall be a compensation for such diminution of their fees. The other expensiveness of Law Suits is the rate of the fees of the Attornies and Advocates. These fees, it is evident, are not capable of a like reduction with the former, but must always be such as the parties and their Lawyers shall agree upon; fince it is the natural right of every man to set what price he pleases upon his labour. All that can be done to keep those fees from growing exorbitant is to prevent a monolopy of law business in the hands of a few lawyers, who might thereby be enabled to exact unreasonable rewards from their clients, by the neceffity the people would be under of either employing them upon the terms they thought proper to demand, or letting their business remain undone : and this has been already done by your Majesty's wisdom and indulgence in permitting Canadian Notaries, Attornies and Advocates to practise their respective professions notwithstanding their continuance in the profession of the Romish religion.

Yet when every thing is done that can be done to diminish the Expense of Law proceedings, it is probable that they will fill be more expensive than in the time of the French Government; which ought not to be a matter of furprize, fince the prices of corn and provisions, and of all forts of labour, are almost double of what they were at that time.

The next inconvenience arising from the present establishment of the Courts of Judicature complained of by the Canadians is the tedious length of Law Suits : this is owing to the unfrequency of the terms or Sessions of the Supreme Court of Judicature, and of the Court of Common Pleas, which sit only three times a year at Quebec and twice at Montreal. In the time of the French Government there were three Royal Courts in the three several districts of Quebec, Three Rivers and Montreal, vested with full power to determine all matters both Criminal and Civil: in each of these Courts a Judge appointed by the French King administered Justice, and a King's Attorney prosecuted on behalf of the Crown: and they used for that purpose to hold two Courts in every week throughout the year, except about six weeks in the months of September and October, and a fortnight at Easter : and besides these Courts | eld regularly every week, they would sit on other days of the week, if the business before them made it necessary. From these Courts there lay an appeal to the highest Court of the Province, which was called the Superior Council; and this high Court also sat every week : so that the difference between the expeditious methods of obtaining Justice in the time of the French Government, and the slowness of the proceedings upon the present establishment, is very striking in the eyes of the Canadians, and is esteemed a very considerable inconvenience.

Besides the usual ill consequences arising from the want of dispatch in Law proceedings, this unfrequency of the Sessions of the Superior Courts of Judicature has been a principal cause of the increase of the fees of the Canadian Attornies and Advocates; for, as their opportunities of pleading causes happen so much seldomer than formerly, they endeavour to make up, by the value of the Fees they now receive in the three Sessions of the Court of Common Pleas, the advantages they formerly derived from the number of them, in the time that the French King's Courts sat every week.

There is indeed in the present establishment a Court of Justice in each District of the Province that sits every week for the dispatch of business. These are the Courts of the Justices of Peace. This was a very judicious institution, and well suited to the circumstances and dis-position of the people. Yet it is liable to some objections : For, in the first place, the Justices of the Peace, who are the Judges of these Courts, are not much skilled in judicial proceedings ; and, secondly, the same Justices not attending constantly at these Sessions, it is often necessary, where a matter cannot be decided at one Session, but is adjourned to the next, to repeat all the proofs and arguments before the Justices at the second Session, which had been produced at the former Session before the other Justices who happened not to be now upon the bench, which occasions an increase of expence and trouble; and, lastly, their Jurisdiction extends only to such disputes as relate to sums of money that do not exceed ten pounds. In all contests for greater sums the parties are obliged to have recourse either to the quarterly Courts of the Justices of the Peace, or to the Courts of King's Bench and Common Pleas, where the Sessions are held but three times a year.

The next inconvenience is the severity of the present method of proceeding in civil actions, by arresting and imprisoning the defendant's body. This, by filling the Gaols with unhappy debtors, increases the number of the poor and helpless, and makes the families of the debtors, as well as the debtors themselves, become oftentimes a burden to the public; and it is generally thought by the Canadians to be an unnecessary degree of harshness.

To remedy these several inconveniencies we beg leave to recommend to your Majesty the following plan for the administration of Justice in this Province for the time to come; which we have formed in imitation of that which was in use in the time of the French Government.

That this Province should be again divided into the three Districts of Quebec, Three Rivers and Montreal, as in the time of the French Government; which might be called the Shires of Quebec, Three Rivers and Montreal; and each of these three districts should have separate officers of Justice; that a Royal Court of Judicature should be established in each of the three towns of Quebec, Three Rivers and Montreal, which are the Capitals, or rather only towns of those several Shires or Districts; and that each of these Courts shall consist of one able English Judge, appointed by Your Majesty, and invested with full powers to hear and determine all matters, both Criminal and Civil, arising within his jurisdiction, just as Your Majesty's Chief Justice of

Ff

the Province is empowered to do upon the present establishment throughout the whole Province.

These English Judges should be Barristers at Law, of at least five years standing at the bar; and they should be such as, besides their skill and knowledge of the Law, had a competent knowledge of the French Language. And further, to enable these English Judges more readily to understand the testimonies of the French Witnesses, that would so often be examined before them, and likewise to comprehend the nature and extent of such of the ancient laws and customs of the Country as your Majesty shall think fit to be either continued or revived, we conceive, that it would be convenient to give each of them a Canadian lawyer for an assessor, or assistant to them in the decision of causes; but the Canadian Assessors should have no vote or authority to decide the causes in conjunction with the English Judges; but should only assist them with their opinion and advice, the whole power of finally deciding them being vested solely in the English Judges. This employment of the Canadian lawyers, even in this subordinate capacity of assistants and advisers, would be thought a very gracious indulgence in Your Majesty by all Your Majesty's new subjects; and many of them, to whom it has been mentioned, have expressed an entire approbation of it. If they had an equal degree of authority with the English Judges in the final decision of causes, they would be much more likely than the English Judges to abuse it, by reason of their connections in the country, and the enmities and partialities that these connections would give birth to. And, besides, there are other reasons, which would make it inexpedient to trust your new Roman Catholic subjects, so lately brought under Your Majesty's allegiance, with so great a degree of power. These Judges and their assistants should hold their courts every week throughout the year, excepting one month at Christmas, one week at Easter, and another at Whitsunday, which are the three great seasons for holidays observed by Christians. And they should sit on the Tuesday or Wednesday of every week, that the contending parties and their witness might not be under a necessity of travelling on Sundays to attend them. If the use of grand juries should be thought fir by your Majesty to be continued in criminal prosecutions, these judges should take cognizance of criminal matters (that is, of such parts of the criminal proceedings as required the attendance of grand juries) only once a month, that the inhabitants might not be too much diverted from the care of their private affairs by their attendance in the courts as grand jurymen. But the other steps of all criminal proceedings that do not require the presence of grand jurymen, and, if the use of grand juries was laid aside, the whole of those proceedings should be carried on in the weekly sessions, as well as all the civil business of the district.

The method of proceeding in these Courts in Civil Actions might be as follows. The Plaintiff might bring a declaration or plaint, in writing, into Court, which might be either in the French or English. Language, as he thought proper, praying the process of the Court to cause the defendant to be summoned to answer it ; but not to be arrested by his body. This plaint should be read to the Judge in open Court, in order that he should determine whether or not it contained a good cause of action; and, till he approved it, no summons should be issued upon it. If he approved it, he should order it to be filed amongst the records of the Court by the Clerk or Registrar of the Court, and should award a summons to be sent to the Defendant to come and answer the Plaintiff's demand, at such a time as he, the Judge, should therein appoint. If he neglected to come at the time appointed by the Summons, without any good reason for his neglect, he should be condemned to pay the Plaintiff a moderate sum of money, to be ascertained by the Judge, as a compensation to him for his expense and trouble in attending the Court, at the time appointed by the summons, to no purpose; and he should be summoned to come and answer the Plaintiff's demand on another day. If he then also refused to come, Judgment should go against him by default. When the defendant appeared, he should make his answer to the plaint of the plaintiff in writing, and either in the French or English language, as he thought proper: and this answer should be filed amongst the records of the Court. The Judge should then himself interrogate the parties concerning the facts, in their account of which the parties seemed to differ, and which appeared to him to be material to the decision of the Cause : and these interrogatories and the answers of the parties should be reduced to writing by the Judge, or by the Clerk of the Court from the words dictated to him by the Judge. When the Judge had thus found out in what facts material to the decision of the cause the parties differed, he should himself state these facts in writing and declare that it was necessary for him to be informed, by proper testimony, whether they were true or false; and should ask the parties whether both of either of them, desired that he should inquire into the truth of these facts by means of a Jury, or by examining Witnesses, or other proofs himself. If both, or either of the parties, desired to have a Jury, a Jury should be summoned to attend, at such following Session as the Judge should appoint. This Jury should be paid for their attendance by the party that desired to have a Jury; and if both desired it, then equally by both parties. They should receive Five Shillings sterling a man. For at present it is a subject of complaint among the Canadians that they are taken from their necessary occupations to attend upon Juries (which is by no means as agreeable employment to them) without any consideration for it : and this, if it happened every week without any compensation, would be thought, and perhaps justly, a very heavy burden. But for a reward of five shillings they will serve with great alacrity. These Juries should be appointed in nearly the same manner as Special Juries are in England ; that is, the ministerial officer, that executed the process of the Court, should return to the Court a list of four times as many persons qualified to be Jurymen as were necessary to constitute a Jury ; that is, if a Jury

F f 2

was to consist of twelve men, a list of forty-eight persons so qualified ;and then each party should strike out twelve of the names contained in this list : and then the names of the remaining Jurymen contained in it. should be set down in a new list of alternate order; that is, first one at the nomination of the Plaintiff; then one at the nomination of the Defendant; then another at the nomination of the Plaintiff; and then another at that of the Defendant; and so on; and these persons (whose names were thus set down in this new list, and who would be enough in number to constitute two Juries) should all be summoned to attend the Court on the day appointed for the trial of the cause, and should be called over in the Court in the order in which their names were set down in the new list ; and the first twelve, or other number sufficient to make a Jury, that appeared in the Court should be the Jury to try the cause. By this method of chosing a Jury the disagreeable and captious practice of challenging Jurymen would be avoided, which is apt to give rise to animosities between the persons challenged and the parties who object to them.

Of the Jury so chosen a majority should have a right to determine the verdict : the present rule, of requiring an absolute unanimity amongst all the Jurymen, being evidently absurd and unnatural, and amongst other inconveniencies, productive of one of a very important nature, which is the perjury of some of the Jurymen in every third or fourth cause, for it happens at least so often that there is a real difference of. opinion amongst the Jurymen, and that some of them go over to the opinion of the rest, in opposition to their own sentiments, and contrary. to the oath they have taken to give a true verdict according to the evidence ; which means, as we presume, according to their Judgment of it. And it has sometimes happened, that a great majority of the Jurymen has gone over to a small but resolute minority. This therefore calls loudly for a reformation and more especially in a Country where the natural and ordinary differences of opinion, that must frequently happen amongst Jurymen, are likely to be greatly heightened by national and religious prejudices. If the agreement of twelve men should be thought necessary to establish the truth of a fact, it would be necessary to impannel twenty-three Jurors. But perhaps a bare majority of twelve men may be sufficient to answer all the purposes of Justice in civil matters.

In criminal matters it might be proper to make the agreement of two thirds of the Jury necessary to the conviction of the accused person.

And as the issues, or points of fact, that were to be proposed to the consideration of the Jury, were to be drawn up in a minute and particular manner in words dictated by the Judges of the Courts, so the verdicts of the Juries should be always special verdicts, stating the facts, as the Jury find them to have happened, with great exactness and particularity. This would prevent Juries from encroaching upon the Province of the Judges, and determining points of Law by means of the short and general issues of "Guilty or Not Guilty, He did or did not undertake," He does or does not owe the Sum demanded," and the like, that oftentimes involve points of Law mixed with matters of fact, and thereby give Juries an opportunity of committing these irregularities. Whenever these things happen (whether it be from ignorance or want of discernment in the Jurymen, or from their wilfulness or partiality) it is certain that a real injury is done to the losing party, whose right it is, according to the Laws of England to have the points of Law, upon which his cause depends, determined by the learned and able Judges whom your Majesty has appointed to fill your Courts of Justice as much as it is to have the matters of fact in the cause determined by a Jury of honest freeholders in the neighbourhood.

The Witnesses examined in the trial of a cause should be examined viva voce in open Court, in the presence of both parties, or their Attornies and Advocates; and cross-examined, if the adverse party thought proper: and should not be allowed to deliver their testimony by written depositions or affidavits taken in private; not even in those trials which were carried on without a Jury; unless by the consent of both the parties, or by the particular direction of the Judge, upon very strong reasons for so doing, moved and debated in open Court.

When Judgment was given for the Plaintiff in a civil action, a Writ of Execution should go against the goods and lands of the Defendant, but not against his person; directing the ministerial officer that executed the process of the Court, to levy the sum of money awarded to the Plaintiff by the Judgment, upon the defendant's moveable goods and chattels; and, in case they are not sufficient for the purpose, then, but not otherwise, to sell part of his lands, to produce the remainder of the And if the Executive Officer could not find a sufficient quanticy sum. of either moveable or immoveable property belonging to the Defendant to raise the sum awarded, and the Judge was of opinion, upon affidavits made before him to that purpose, that there was reasonable grounds to suspect that the defendant had secreted or concealed some of his effects, he might require him to deliver in to the Court, upon Oath, an exact Schedule of all his Estates and effects of every kind; and if he refused so to do, might commit him to prison till he complied. And if he omitted any part of his effects to the amount of twenty pounds Sterling, in the Schedule so delivered in to the Court, he should be liable to the penalties of perjury.

The Judge should have a power of awarding reasonable costs to either party according to his discretion.

It would be convenient to have a separate Ministerial, or Executive Officer, to each of the three districts of Quebec, Three Rivers and Montreal, to be called a Sheriff, which is the common name for such an Officer in England, instead of one Provost-Marshall for the whole Province.

And it would be necessary for your Majesty to have an Attorney in each of these Courts, to prosecute for your Majesty in all criminal cases, and in suits concerning your Majesty's revenue, and in all other suits in

Ff 3

which your Majesty's interest is concerned. If your Majesty should not think proper to appoint an Officer expressly for this purpose, the power of carrying on these prosecutions for your Majesty might be vested in the Clerk, or Registrar; of the Court; just as in your Majesty's Court of King's Bench in England, the Clerk of the Crown (whose principal duty is, to register, or enter, the pleas of the Crown in the records of the Court) is likewise Attorney of your Majesty in that Court, and prosecutes in your Majesty's behalf. But we submit it to your Majesty, that it would be convenient, and more suitable to the honor of your Majesty and the dignity of the Court, to have a separate officer for this purpose, to be called Your Majesty's Attorney for that district, as there was in the time of the French Government.

From these Courts there should lie an appeal to the Governor and Council of the Province, and from thence to Your Majesty in Your Privy Council. One great use of the appeal to the Governor and Council would be to preserve an uniformity in the Law throughout the whole Province, which otherwise might gradually become different in the three different Shires or Districts of it, by the difference of the decisions that might be given in these several Courts of Justice, if they were entirely independent of each other and subject to no common Superior Council that might correct the errors of their proceedings.

And for the same reason the decisions of these Courts should not be deemed to form precedents of sufficient authority to determine any subsequent disputes; but this authority should be ascribed only to those cases which had been decided by the Governor and Council of the Province upon the appeals brought before them from these Shire Courts, or by your Majesty's self in your Privy Council.

And in order that your Majesty's Governor and Council might not be destitute of the advice of persons skilled in the Laws to assist them in the determination of the appeals that should be brought before them, it might be expedient that your Majesty's Judges of these three Courts, and perhaps also your Majesty's three Attornies in them, should be made Members of your Majesty's Council of the Province ; by which means all the best Law abilities in the Province would be employed in making these important decisions that were to carry with them the force of law : and with this view it might be proper to require your Majesty's Judges and Attornies of the Courts at Three Rivers and Montreal to attend the Governor at Quebec for one month about Christmas time, in order to assist at the decision of these appeals, which should therefore be reserved to this season of the year.

These appeals should be only, as they now are, of the nature of Writs of Error in England, to correct the errors in law committed in the Courts of these Shires or Districts, and not to re-consider the facts in the cause, unless they had been settled by the Judge alone without the assistance of a Jury. Where this was the case, the parties might if they thought fit, cause the evidence itself to be taken down in writing by the Clerk of the Court, and signed by the witnesses and Judge that it might make a part of the record, as it does upon a trial by a general Court Martial in England; and, upon the removal of this record before the Governor and Council, they might re-consider the whole matter, the facts as well as the law, and give such Judgment upon it as they thought just; but they should not admit any new evidence relating to it. Where the cause had been tried by a Jury, the losing party might, if he thought proper, have it tried over again by a second Jury, consisting of twice as many Jurymen as the first Jury, and the verdict of this second jury should be final with respect to the matters of fact determined by it.

When Gaspé shall be settled, a fourth Judge might be sent thither, whose Jurisdiction should extend over a district lying round about it, to be taken out of the district of Quebec, which is now immoderately large. Such an establishment would be of great convenience to the inhabitants of that part of the Province.

These are the outlines of the Plan which we humbly beg leave to recommend to your Majesty for the Administration of Justice, and which, we are confident, would be of great advantage, and give very great satisfaction to your Majesty's Canadian Subjects, and effectually remove many of the inconveniencies of which they now complain.

It remains that we consider the first and greatest inconvenience abovementioned, which arises from the uncertainty of the Law in the present condition of the Province, and that we set before your Majesty the different methods by which, as we conceive, this inconvenience may be removed, and the laws of the Province may be settled for the future upon a solid and permanent foundation.

Four methods of doing this have occurred to us. The first is, to compose a Code of Laws for this Province, that shall contain all the Laws by which it is to be governed for the time to come, to the entire exclusion or abolition of every part both of the Laws of England and the French Laws that shall not be set down in the Code itself.

The second is, to revive or re-establish the whole French Law at once, to the exclusion of all the English Laws, excepting those few which have been introduced by Act of Parliament, as above mentioned, and a few more of the Laws of England which are most eminently beneficial and favorable to the liberty of the Subject, and to introduce these beneficial Laws by a particular Ordinance or Proclamation, published in the Province, in order to make them fully known to the Ca-Such might be an Ordinance to take away the use of the nadians. question, or torture, in Criminal prosecutions, to change the cruel punishment of breaking on the wheel into hanging or beheading; and to introduce the substance of the English Law relating to the Writ of Habeas Corpus, by declaring that no person in the Province should be committed to prison, or detained in prison, by the Order of any Magistrate without a Warrant in writing under the hand of the Magistrate, expressing particularly the Cause of his commitment or detention; and Ff4

that every man so detained in prison should, if he desired it, be brought before one of your Majesty's Judges in the Province and either set at liberty, bailed or remanded to prison, as the Cause of his imprisonment, expressed in the Warrant by which he is detained in prison should require. Such an Ordinance might be thought to fulfil, in a great measure, the Promise given to your Majesty's British Subjects by those words in your Majesty's Proclamation above mentioned, of the enjoyment of the benefit of the Laws of England, supposing that your Majesty should think proper to determine that those words contain only a promise.

The third method of settling the Laws of this Country, so as to continue to the Canadians the use of several of their ancient Customs, is to make the Law of England the general Law of the Province, with an exception of those particular Subjects concerning which your Majesty shall please to permit the former Customs of the Country to subsist, and with respect to those subjects to let the Ancient Laws of the Country subsist in the manner they did at the time of the Conquest, and without attempting to reduce them to writing, and enact them anew by particular Ordinances, expressly setting them forth in all the extent in which your Majesty thought proper to let them continue.

And the fourth method of doing this would be to make { as in the third method) the Law of England become the general Law of the Province, with an exception of those particular subjects or heads of Law, concerning which your Majesty shall please to permit the former Customs of the Country to continue; and with respect to those subjects, to enumerate and set forth at length, in an Ordinance or Proclamation to be made for that purpose, the particular Customs which your Majesty should think fit to be continued, to the exclusion and abolition of all other Customs that should not be contained in the said Ordinance or Proclamation.

The first of these methods, of settling the Laws of this Province, namely, that of making a Code of all the Laws by which it shall be gorverned for the future, to the exclusion of all the Laws, both of England and France that are not contained in it, would certainly be the most troublesome in the execution to your Majesty's Ministers and Servants, both in England and in this Province. And further, we conceive, that it would be objected to by some of the Canadians, who are the most difficult to please, as a rash and dangerous experiment, to which the persons your Majesty should think proper to employ in the compiling this Code would be by no means equal. They would frame their objection to such a project in some such manner as this : " that to reduce " the whole Law anew into writing, with a rejection of a great part " of it as useless in the opinion of the Compilers; is a task of such ex-" traordinary difficulty, that not only no person in this Province is fit " to undertake it, but even the ablest Lawyers in the Parliament of " Paris, if they were to devote their whole time and attention to it, would hardly be able to execute it properly; that if any thing of this

* kind is attempted here, many important things will most certainly be " omitted, and others be too concisely, imperfectly, or obscurely ex-" pressed; that in such a Code no part of the Ancient Laws of this " Province ought to be omitted, notwithstanding some of them may " never have been put in execution here, for that those Laws are not " less a part of the Law of this Country, than those which have been " often put in practice; and that the only reason why they have not " yet been executed, is, because the objects of them, that is, the " cases to which they relate, have not yet arisen; and that when these " cases shall arise here is a wise Law already provided beforehand to " decide them; and that therefore no part of the Custom of Paris, " which was truly and properly the Law of this Province, ought to be " left out of any Code that shall be made for the Government of it; " and further, that there is a strong mutual connection between the " different parts of this system of Law, that makes it very difficult to " change or abrogate any part of it, under a notion of its being useless, " without weakening or rendering ineffectual other parts of it which the " Compilers may esteem useful; and that therefore the only safe way is " to let it stand as it is; and that, in this view of permitting the whole " of it to continue, there is no need of a Code to express it over again " in new words; that it is already expressed in writing in the best " manner possible in the text of the Custom of Paris itself and in the " learned treatises of Monsieur Ferriere and other writers upon it, and " in the decisions of the Parliament of Paris and of the Superior Council " of this Province, upon the cases that have been contested before " them; that indeed such a new Code might be of some convenience to " an English Judge to save him the trouble of studying or consulting ** the French Law Books, but that it would be a most dangerous and " pernicious attempt to the rights and liberties of your Majesty's Ca-" nadian Subjects."

These are the objections which will certainly be made by some of Your Majesty's Canadian subjects to the measure of compiling a new Code of Laws for this Province, which we have stated to Your Majesty at great length, that they may have all the weight with Your Majesty which they may deserve. At the same time we beg leave to inform Your Majesty, that we believe that these objections will be made only by a few persons in this Province, and that the bulk of Your Majesty's new Canadian subjects will be very well satisfied with such a Code, and this even though it should in a great measure be taken from the Laws of England, provided only that a few of the most important of their ancient Laws and customs, and that most nearly affect their property and the future situation of their wives and children, be contained in it.

On the other hand, the advantages that would arise from this measure of compiling such a Code of Laws for this Province would, as we conceive, be these that follow.

In the first place, the English Judges, who will, as we presume, always be employed to administer justice in this Province, would have a short, a plain rule to go by, which they would easily be able to make themselves masters of, and would not be liable to be puzzled and misled by artful French Lawyers, partially citing and misrepresenting, and misapplying the doctrines and cases contained in the French Law Books.

And in the second place, the English inhabitants in general would have the satisfaction of knowing easily and certainly what the Laws of the Province were, upon what conditions they purchased lands or houses, what rights of alienating or devising them they thereby acquired, what duties to Your Majesty, their lords or their tenants, they were bound to, and in what manner their wives and children would enjoy their possessions after their decease.

These would be no inconsiderable advantages, resulting from the composition of such a Code, even though done in a very imperfect manner. But there is another and greater advantage with which as we conceive. this measure would be attended, which is the removing from the minds of the Canadians all idea of the excellency of the French Laws and Government, and of the superior skill and ability of French Lawyers and Judges, bred in the Parliament of Paris, and consequently of the happiness of having ther Law suits decided by them. For we apprehend that, as long as the French laws and customs subsist at large without being reduced into a Code, so that the several French Law Books. Books of Reports, and Edicts of the French King are the Books of Authority upon the subject, to which recourse must be had continually in the decision of points of Law, so long will the people of this Province retain a reverence for those Edicts, reports and other Law Books, and for the authority of the French King who made the Edicts, and for the Parliament of Paris that has made the decisions reported in the Books of Reports, and the other learned French Authors who have composed the other treatises on this subject ; and this reverence will be accompanied with a continuance of their liking for that Government from which these good Laws and Edicts and Law Books proceeded, and under which they might be most ably administered, and consequently with a secret wish to return to that Government, that is to return to their subjection to the French King, whereas, if they continue to enjoy the most important of their ancient Laws and customs under a new name, and expressed in a stile and phrase somewhat different from the former, and carrying with it the stamp of Your Majesty's authority, the idea of their former sovereign, and of the Parliament of Paris, and of the wise Lawyers that compose it, would by degrees wear out of their minds, and they would think of nothing upon these occasions but the King of Great Britain and his Code, and the great favor he had shewn them in permitting their principal Laws and customs to continue, and giving them the express sanction of his royal authority. This we take to be a very capital advantage attending this measure of compiling a Code of Laws.

As to the inconvenience that might arise from the omissions or imperfections of this Code (for we readily admit that it would be very imperfect) it must be observed, that they might be continually lessened and remedied by fresh ordinances from time to time, re-enacting those parts of the former Laws and customs of this Province which appeared to have been forgotten in the Code, and which the Governor and Council thought worthy to be re-established : and in the mean time the Code itself (imperfect as we suppose it to be) would still be sufficiently exact to determine all the common cases that occur in the ordinary course of human affairs, such as the rules of inheritance in the direct line, the rules of dower, and of the husband's rights arising from the matrimonial contract, the usual rules about quit rents, alienation fines, and other profits due to lands by performing Fealty and Homage, and the like, which would be sufficient to prevent the Country from falling into general confusion.

This Code we suppose to contain the whole of the Law by which the Province is to be governed, criminal as well as civil, to the exclusion of the whole of the English Law, as well as the French, except what was contained in the Code itself, and the Acts of Parliament relating to the Custom House duties, and those few other statutes that expressly relate to this Colony by name, or sufficient words of description, since the Conquest of it, or which, though made before the Conquest of it, yet extend to it by virtue of the general description of ail His Majesty's dominions now belonging to the Crown of Great Britain, or that shall hereafter belong unto the same.

These are the advantages and disadvantages with which, as we conceive, this first method of settling the Laws of this Province, by composing a Code of Laws for that purpose, would be attended.

The second method of settling the Laws of this Province, by the reviving at once the French Law, and introducing by an ordinance only a few of the Laws of England that are most eminently beneficial to the subject, is evidently the shortest and easiest method that can be taken for this purpose : but it would be attended with the following inconveniences.

In the first place it would have a tendency to keep up in the minds of the Canadians that respect for the Laws of France, and the wisdom of the Parliament of Paris, and the excellence of the French Government, which has been above described, and which it would be one of the principal advantages resulting from the former measure of compiling a Code of Laws to extinguish.

In the second place it would give disgust to the English inhabitants of this Province who are fond of the Laws of England, and desirous of having the greatest part of them continued and thinking they have a right to the enjoyment of them upon two distinct grounds.

In the first place they think that every Country that becomes subject to the Crown of Great Britain (whether by Conquest, exchange or otherwise) becomes immediately subject to the Laws of England, and that the Laws by which it was formerly governed become immediately and *ipso facto* void and of no effect, being superseded by the laws of England without the aid of any Act of Parliament or Royal Proclamation for that purpose. In this we presume they are mistaken, since both the express declarations of the Law Books, and those of Your Majesty's Attorney and Solicitor General in their report concerning this Province, made in the Year 1766, and the dictates of natural reason inculcate a quite contrary doctrine, to wit, that the Laws of the conquered people subsist in their full vigour till the will of the conqueror shall expressly change them. However this opinion, though not well grounded, is pretty general among the English inhabitants of this Province.

In the second place, they say, that, supposing that the Laws of England were not of course introduced into this Province by the very conquest itself and the subjection of the country to the Crown of Great Britain, yet that they have been expressly introduced by Your Majesty's Proclamation of the 7th October 1763, in the words that have been mentioned in the former part of this report; in which Your Majesty assures them, that they may confide in Your Majesty's royal protection for the enjoyment of the benefit of the Laws of England.

The third method of settling the Laws of this Province, by making the Laws of England the general basis of them, and permitting the Canadian customs to continue with respect only to some particular excepted subjects, and this by a general reference to the French Laws Books in which those customs are contained, without attempting to enumerate and express them anew, would also be a very short and easy one to Your Majesty's Ministers and servants both in England and in this Province, and will be very agreeable and satisfactory to Your Majesty's British Subjects in this Province. Yet it will be attended with the following inconveniencies.

By preserving a considerable part of the French Law in the lump, or by a general reference to the French Law Books that contain it, it will in some degree keep up in the minds of the Canadians that reverence for the Laws and Lawyers of Paris, and that consequential opinion of the happiness of being subject to the French Government (as being that under which those Laws may be most ably administered) which all persons that are zealously attached to Your Majesty's Government would naturally wish to see extinguished. But this objection will take place in a much less degree against this method, than against the last mentioned, or second method, by which almost the whole body of the French Laws would be revived.

Further, if this third method of settling the Laws is pursued, some of the Canadians will probably make the two following objections to it. They will say, in the first place, that the whole body of their Laws ought to have been left entire, as there is a strong and well contrived connexion between all its parts, which makes it dangerous and detrimental to the welfare of the Province to alter any of it. And, secondly, they will say, that, if any of the Laws of England must be introduced here, they ought not to be introduced by general words, but by Special Ordinances, enumerating them and setting them forth at full length, and in the French language, so that the Canadians may know and observe them. But these are objections which we believe will be made only by a few persons, and not by the generality of your Majesty's Canadian Subjects.

The fourth method of settling the Laws of this Province, by making the Law of England become the general Law of it, with an exception of some particular subjects, or heads of Law; and concerning those subjects to revive the Ancient Customs of the Country by an Ordinance or Proclamation that should particularly set them forth and describe them in all the extent in which your Majesty should think fit to let them continue, without any reference to the Law Books in which they were formerly contained, would be preferable to the third method in this respect, that by enumerating, and describing, or reciting particularly, the several French Laws and Customs that were intended to be continued, it would cut off all connexion, in the minds of the Canadians with the French Laws, Lawyers, and Judges, and the Government under which they were maintained. The Parliament of Paris, and the Custom of Paris, and the French King's Edicts would be no longer heard of, as being no longer of any Authority; but the Laws that were permitted to subsist must be cited in the words made use of by your Majesty to express them in the Ordinance or Proclamation which permitted their continuance. This would be a considerable advantage which this fourth method of settling the Laws of this Province would have over the third method; but it would be certainly somewhat more troublesome to your Majesty's Ministers than that third method, and it would likewise be liable to many imperfections from the inaccurate manner in which the French Laws and Customs that were intended to be continued would probably be set forth ; and it would be further liable to the two latter objections which might be made to the third measure, to wit, that it would give but an imperfect degree of satisfaction to some of the Canadians. by leaving them only a part of their Ancient Laws and Customs, and that it would further cause them to complain of the general manner of introducing the Laws of England without informing them exactly and particularly what those Laws were, that they might know how to obey them, but these are objections which, as we before observed, would probably be made by a few persons only, and not by the generality of your Majesty's new Subjects.

Thus we have set forth to your Majesty at considerable length (but not greater, we hope, than the importance of the subject required) the different methods by which your Majesty's gracious intention of settling the Laws of this Province upon a solid and permanent foundation for the time to come, and of leaving to your. Majesty's new Canadian Subjects the enjoyment of some of their Ancient Laws and Customs that are most necessary to their tranquility and satisfaction, may be carried into execution, together with the several advantages and disadvantages with which we apprehend that each of them will be attended. To weigh these advantages and disadvantages against each other, and draw a fnal balance in favor of one of these methods in preference to the rest, or to find a new method preferable to them all, is a task to which we find ourselves unequal, and which we apprehend can be successfully performed only by the wisdom of your Majesty's Counsels. By residing in the Province we may have been able perhaps, by our observation of the state of things here, to furnish your Majesty with necessary information and materials for forming a decisive Judgment upon the subject, and that, in obedience to your Majesty's commands, we have endeavoured to do, faithfully and fully, and to the best of our abilities, in this report. That our endeavours may be acceptable to your Majesty, and may be esteemed rather according to the zeal and integrity by which they have been directed, than according to the degree in which they may be found to answer the high purposes to which they were intended to be subservient, is the earnest wish of

Your Majesty's

Most loyal and devoted Subjects and Servants.

N. B. The foregoing Draft of a Report, which was prepared by Francis Maseres, Esquire, his Majesty's Attorney General of the Province of Quebec, by order of Guy Carleton, Esquire, the Governor of the said Province, was delivered into the said Governor on the 27th day of February 1769, but had not the good fortune to be approved by his Excellency. Another Report was thereupon drawn up by other hands agreeable to the Governor's sentiments, in which his Excellency has omitted the consideration of all the public acts and instruments whereby the English Law has been introduced, or attempted to be introduced, into that Province, together with some other matters contained in the foregoing report, and instead of mentioning several different methods of settling the Laws of that Province for the future, with the several advantages and disadvantages that would probably attend each of the proposed methods, and leaving it wholly to his Majesty's wisdom to chuse one of the methods in preference to the others, as is done in the foregoing report, his Excellency has thought fit to mention only one method of settling the Laws of the Province, which he strongly recommends to his Majesty, as the only way of doing justice and giving satisfaction to the Canadians, which is, to continue the Laws of England with respect to Criminal matters, but to revive the whole body of the French Laws that were in use there before conquest with respect to civil matters. The Chief Justice, William Hey, Esquire, and Attorney general of the Province, not thinking it either necessary or expedient to revive the whole body of the French Laws in Civil matters, but only those parts of them (which indeed are very considerable) which related to the tenure, alienation, dower and inheritance of landed property, and the distribution of the effects of persons who die intestate, delivered in to the Governor two additional papers, or lesser reports, containing their reasons for not wholly agreeing to the Report made by his Excellency. And these three Reports were delivered to Maurice Morgan, Esquire, about the 12th of September 1769, to be by him carried to England, and delivered to his Majesty's Secretary of State for America. The additional paper, or lesser report of the Attorney General, was intitled his opinion concerning the Governor's Report, and was as follows.

THE OPINION of the Attorney General of the Province of Quebec, concerning the Report made by His Excellency Brigadier General Carleton, the Governor in Chief of the said Province, to His Majesty in Council, concerning the State of the Laws and the Administration of Justice in the said Province, with the reasons of his dissent from some of the matters contained in the said Report.

Your Majesty's Attorney General of this Province, approves that part of the foregoing Report which gives an account of the Constitution of the Government of this Province during its subjection to the French King, and believes the said account to be true in most particulars: but he cannot assent to that part of the said Report, which suggests to Your Majesty the expediency of reviving the whole of the French Laws in Civil matters, for the following reasons.

In the first place, he thinks it will be a deviation from that plan of conduct which Your Majesty has hitherto thought fit to pursue with respect to this Province, ever since the Conquest of it by Your Majesty's arms in 1760, which he conceives to have been to endeavour to introduce the English Laws and the English manner of Government into it, and thereby to assimilate and associate this Province to Your Majesty's other Colonies in North America, and not to keep it distinct & separate from them in religion, laws and manners, to all future generations. He conceives that if this latter system had been that which Your Majesty had adopted, Your Majesty would have given orders to your General Sir Jeffery Amherst, to whom this Province was surrendered, to keep up, from the first moment of the Conquest, all the Courts of Justice that were at that time in being in the Colony, and even the several Officers that composed them, upon the same footing on which they then subsisted. But as Your Majesty's said General did immediately suppress all the former Jurisdictions, and erect Military Councils in their stead, and in the Articles of Capitulation refuse to promise the inhabitants of this Province the continuance of the custom of Paris, and the other ancient Laws and usages by which they had been governed, though requested in that behalf by the French General; and as Your Majesty did afterwards, in the fourth article of the definitive treaty of Peace in 1763, engage to indulge your new Canadian subjects even in the delicate and important article of the free exercise of their religion, only so far as the Laws of England will permit ; and as Your Majesty, by Your Royal Proclamation of the 7th of November 1763, did encourage your British and other ancient subjects to go and settle in this and the other new erected Governments, and did promise them, as an excitement thereunto, the immediate enjoyment of the benefit of the Laws of England; and as Your Majesty did afterwards, by your commission of Vice-Admiral of this Province granted to General Murray, expressly introduce all the Laws of the English Courts of Admiralty into this Province; and by Your commission to the same gentleman to be Captain General and Governor in Chief of. this Province, did direct him to summon and assemble the Freeholders and Planters in this Province, and in conjunction with them to make Laws and Ordinances not repugnant to the Laws of England, by which it seems to be pre-supposed that the Laws of England were already introduced there; and did in other parts of the said commission allude to divers of the Laws of England as being already in force here, as particularly the Laws relating to the oaths of abjuration and the declaration against transubstantiation. From these several exertions of Your Majesty's royal authority in favor of the Laws of England, Your Majesty's Attorney General of this Province humbly collects it to have been Your Majesty's gracious intention to assimilate this Province in religion, Laws and Government, to the other dominions belonging to Your Majesty's Crown in North America; he therefore conceives that the immediate revival of all the French Laws relating to civil suits in this Province, in the manner suggested in the foregoing report, will have at least the appearance of a deviation from the plan of conduct which Your Majesty has hitherto adopted, and of a step towards preference of the contrary system of keeping this Province distinct from, and unconnected with, all Your Majesty's other Colonies in North America; and this appearance he humbly conceives to be itself, a considerable inconvenience, and very fit to be avoided, unless very strong reasons of justice or policy made such a measure necessary, which he does not conceive to be the case; for, on the contraty, be apprehends that the said total revival of the custom of Paris, and all the other French Laws relating to civil suits, wil' be attended with the following additional inconveniencies. In the first place, it will make it difficult for any of Your Majesty's English subjects to administer justice in this Province, as it will require much labour and study, and a more than ordinary acquaintance with the French language to attain a thorough knowledge of those Laws.

In the next place, it will keep up in the minds of Your Majesty's new Canadian subjects the remembrance of their former government, which will probably be accompanied with a desire to return to it. When they hear the custom of Paris, and its wise decisions continually appealed to as the measure of justice in this country, they will be inclined to think *that* government to be best under which those wise Laws could most ably be administered, which is that of the French King, which together with the continuance of their attachment to the popish religion will keep them ever in a state of disaffection to Your Majesty's government, and in a disposition to shake it off on the first opportunity that shall happen to be afforded them by any attempt of the French King to recover this country by force of arms.

And in the third place, it will discourage your Majesty's British Subjects from coming to settle here when they see the Country governed by a set of Laws of which they have no knowledge, and against which they entertain (though perhaps unjustly) strong prejudices.

Your Majesty's Attorney General of this Province is further of opinion, that the body of your Majesty's new Canadian Subjects are by no means either so distressed or so discontented by the introduction of the English Laws into this Province as they are represented in the foregoing Report: at least he has seen no proofs of either such great distress or high discontent. What he has principally observed to be the subject of their complaints has been either the expence or the dilatoriness of our Law Proceedings, which he therefore conceives stand in need of reformation; and he is of opinion, that to establish three Courts of General Jurisdiction in all matters Criminal as well as Civil in the Province, to sit every week in the year (with a very few exceptions) in the towns of Quebec, Three Rivers and Montreal, would be the most adequate remedy for these complaints.

And as to the substance of the Laws which are to be henceforwards admitted in this Province, be conceives that the best way of all to settle these would be to make a Code of them, that should contain all the Laws of every kind, Criminal as well as Civil, that were intended to be of force here, to the exclusion of all other Laws, both French and English, that were not inserted in the said Code; by which means all pretence would be taken away both from the French and British inhabitants of this Province for complaining that they are governed by unknown Laws. This he conceives to be a work of difficulty indeed, but by no means impracticable; and he apprehends that it would be a work of very great utility to the Province, even though it should be very imperfectly executed, and many important articles should happen to be omitted in it; provided only that those things that were inserted in it were useful and reasonable, and set forth in a clear and proper manner; because he apprehends that the rules so inserted would be sufficient to govern at least all the common cases that would happen in the ordinary course of human affairs, such as descents in the right line, the right of representation in grand-children whose parents are dead, the dower of widows, the rents and services due to Seignors, the obligations and duties due from them to their tenants, the Seigniors' right to the common mutation fines, his right of pre-emption of his tenant's land when the tenant is disposed to sell it, the rules of Evidence in Cours of Justice, the solemnities necessary to be observed to give validity to a deed or will, and the like obvious and important matters; which would be sufficient to prevent the Province from falling into confusion. And as to the nicer cases which might be omitted in such a Code, they might afterwards be supplied by particular ordinances passed from time to time for that purpose.

Gg

But if this measure of making such a Code of Laws should not be thought advisable, Your Majesty's Attorney General af this Province is humbly of opinion that it would be most expedient to let the English Law continue to subsist in this Province as the general Law of the Province, & pass an Ordinance to revive those of the former French Laws which relate to the tenure, inheritance, dower, alienation and incumbrance of landcd property, and to the distribution of the effects of persons who die intestate. His reasons for thinking that the French Laws upon these heads ought to be revived, are as follow :--

These heads of Law are three in number; first, those relating to the tenures of lands in this Province, or the mutual obligations subsisting between the landlords and tenants with respect to them. Secondly, the Laws relating to the power and manner of aliening, mortgaging and otherwise incumbering landed property. And thirdly, the Laws relating to dower, inheritance and the distribution of the effects of persons who die intestate. And these several heads of Law ought, as he humbly apprchends, to be revived in this Province upon separate and distinct grounds.

The Laws of tenure, he conceives, ought to be considered as having been already granted by Your Majesty to your new Canadian subjects, by that article in the capitulation of 1760, by which Your Majesty's Geneal granted them *the enjoyment of all their estates, both noble and ignoble*; and by the permission given them by Your Majesty in the definitive treaty of peace in 1763 to continue in the possession of them, these Laws being essentially necessary to such possession and enjoyment. Such are the Laws relating to the quit rents due by the Freeholders, who hold by rent service; to the seigniors, the mutation fines, the right of pre-emption and the rights of escheat in certain cases; all which constitute the principal part of the property of the Seigniors.

But the laws relating to the power and manner of aliening mortgaging, and otherwise incumbering landed property, are not, as he apprehends, abfolutely necessary to the enjoyment of the lands themfelves, and therefore ought not to be reckoned quite fo facred and unchangeable as the laws of tenure themfelves. Yet he conceives them to be very nearly connected with those laws, and almost dependant upon them, fo that they could not be changed in any considerable degree without diminifhing the value of the lands themselves, by means of the practical difficulties that would occur in making use of the new modes of conveying land that would be established in their stead; and therefore he thinks that they ought to be continued, and further, he conceives it will be the more necessary to revive or continue the French laws upon this fubject, in order to prevent the introduction of the English laws upon the same subject, namely, the doctrine of eftates-tail, the ftatute de donis, the method of defeating that ftatute by common recoveries, the doctrine of fines, the ftatute

of uses, and the doctrine of uses in general, and other nice doctrines relating to real effates, which are full of so much subtlety, intricacy, and variety, that, if they were to be introduced into this province, they would throw all the inhabitants of it, without excepting even the English lawyers, into an inextricable maze of confusion. For these reasons he apprehends that the English laws upon this subject ought never to be introduced here; and that the former laws of the province relating to it ought for the prefent to be revived.

Laftly, as to the French laws concerning dower and the inheritance of lands and the diftribution of the goods of inteffates. with refpect to fuch marriages as have been contracted, and such deaths as have happened, since the establishment of the civil government in this province, your Majefty's attorney general of this province is humbly of opinion, that those laws ought not to be confidered as neceffary appendages to the property of your Majesty's Canadian fubjects in this province, and as having therefore been granted to them by implication in the articles of capitulation and the definitive treaty of peace; becaufe they do not affect the property, or the rights, of the Canadians then in being, to whom alone those grants were made, but only guide and determine the course and devolution of that property after their deaths among perfons that were then unborn. This, therefore, he conceives to be a matter upon which the authority of a legiflator may properly be exercifed. And he further apprehends, that in some time hence a change of the laws relating to thefe fubjects, and efpecially of those relating to dower and the inheritance of land, would be highly beneficial to this province; the present exceffive tubdivision of the lands, by repeated partitions of them amongst numerous families, being productive of confiderable inconveniencies. But this, he apprehends, need not be done at prefent; and he conceives, that, if ever it fhould be thought adviseable to do it, it ought to be done by a full and express declaration beforehand, of the time at which the proposed changes fhould take place, with a power given to fuch perfons as difliked them to prevent their taking place in their refpective families by express provisions and agreements to the contrary, and should be accompanied with fuch temperaments and modifications as fhould make the adopting them be in a manner the voluntary act of the persons who were affected by them. But for the prefent he conceives it might be better to postpone those important changes, and to revive the ancient laws of this province concerning inheritance and dower, and the distribution of intestates' estates, as well G g 2

260

as those relating to the tenures of land and the power and manner of aliening and mortgaging and otherwife incumbering it. And this one ordinance, reviving the faid ancient laws relating to landed property and the diftribution of the effects of perfons who die inteftate, would, as he conceives, be fufficient to preferve the tranquillity of the province, and to give fatisfaction to the bulk of the Canadians: at least, he apprehends it would be enough to begin with : and if, upon trial, it fhould be found neceffary to revive fome other of the French laws that formerly fubfisted in this province, it might be done by another ordinance or two, that might be paffed for that purpofe, when the neceffity of them should become apparent. By such an ordinance as is abovementioned paffed at prefent, and by the eftablishment of an easy and cheap method of administering justice in this province with fufficient expedition, he conceives that the far greater part of your Majesty's Canadian subjects would be contented. This therefore is what he humbly prefumes to recommend to your Majefty as the best method which he can fuggeft for the fettlement of the laws of this province, after the fullest confideration of this difficult and important fubject.

FRANCIS MASERES,

Attorney General.

Quebec, September 11th, 1769.

N. B. In the foregoing short report, or opinion, of the attorney general of the province of Quebec, the particulars of the plan therein recommended for the administration of justice in the province of Quebec are not fet forth, but only the general fubftance of it is briefly mentioned in these words: "What he has " principally observed to be the subject of the complaints of the " Canadians has been either the expence or the dilatorinefs of " our law-proceedings, which he therefore conceives ftand in " need of reformation : and he is of opinion, that to eftablish " three courts of general juaisdiction, in all matters criminal as " civil, in the province, to sit every week in the year (with a " very few exceptions) in the towns of Quebec, Three Rivers, " and Montreal, would be the most adequate remedy for these " complaints." Now the particulars of this plan are as follow

In the fpring of the year 1767, His Excellency Guy Carleton, Equire, at that time Lieutenant-Governor, now Governor in Chief, of the province of Quebec, being justly apprehensive of

the ill confequences that might arife from a rigorous construction of the feveral inftruments of government by which it was fuppofed that the laws of England had been introduced into that province, and more efpecially of the ordinance of the 17th of September 1764, by which the chief justice of the province was directed to determine all matters, criminal and civil, that were brought before him, according to the laws of England and the ordinances of the province, directed Francis Maferes, Efquire, the attorney general, to prepare a draught of an ordinance for reviving or continuing the feveral ancient laws of the province that had fubfisted there immediately before the conquest of it, in the year 1759, with refpect to the landed property of the province that was holden under grants made by the French king; who accordingly prepared the following draught of fuch an ordinance, which his Excellency, on account of its great extent and importance, did not think it expedient to bring into the council in order to be passed without his Majetty's previous confent and approbation, and therefore he immediately transmitted it to the Earl of Shelburne, at that time one of his Majesty's principal fecretaries of state. This draught of an ordinance was as follows.

A DRAUGHT of an ORDINANCE for continuing and confirming the Laws and Customs relating to the Tenure, Inheritance, and Alienation of Lands, that were in Force in this Province in the Time of the French Government.

WHEREAS certain doubts have arifen and may arife. from the extensive words used in the great ordinance of this province, dated the feventeenth of September in the year of our Lord one thousand feven hundred and fixty-four, intitled, " An Ordinance for regulating and establishing the Courts of Judicature, Justices of the Peace, Quarter Sessions, Bai'iffs, and other matters relative to the distribution of Justice in this Province," by which the Courts of Justice established thereby in this Province are directed to proceed in their decisions according to the Laws of England and the Ordinances of this Province; that in confequence thereof the rules of inheritance of lands in this Province. and the terms and conditions of the tenures thereof, and the rights, privileges and emoluments thence arifing, either to the King or to divers of his Majefty's fubjects that were owners of land in the faid province, were in whole or in part abolished, and the laws and cuftoms of England relating to the faid points at once introduced in their ftead; which great and fudden alteration of the laws concerning thefe important fubjects would not only be in no wife uleful to the faid province, but, by unfettling mens' ancient and accustomed rights and natural expectations founded thereon, would be attended with innumerable hardships and inconveniencies to the inhabitants thereof, and produce a general confusion : In order, therefore, to prevent these evils, and to quiet the minds of the inhabitants with refpect to them ; It is ordained and declared by his Excellency the lieutenant-governor of this province, by and with the advice and confent of the fame, that all the laws and cuftoms that prevailed in this province in the time of the French government in the month of August in the year of our Lord one thousand feven hundred and fiftynine, relating to the tenures of lands held either of the King, or of other lords, and to the terms and conditions of fuch tenures, and to the rights, privileges, and pre-eminences annexed, or belonging, to any of the faid tenures, and to the inheritance and fucceffion to the fame; and to the forfeiture, confifcation, reannexation or re-uniting to the demeine of the lord, efcheat, reversion, or other devolution of the same whatloever, either to the King or any other lord; and to the power of devising, or bequeathing, any lands by last will and testament; and to the power of alienating the fame by the proprietors in their life-time; and to the manner of making fuch alienation ; and to the power and manner of limiting, mortgaging, hypothecating, charging, and incumbering, any lands in the faid province; fhall continue in force and vigour until they are changed in fome of these particulars by fpecial ordinances expressly mentioning fuch changes, and fetting forth in a full and diftinct manner the laws introduced in the ftead of those which shall be fo changed or abolished. And further, the faid French laws and cuftoms hereby continued and confirmed shall be deemed and taken to have continued without interruption from the time of the conquest of this country by the British arms to the prefent time; any laws, cuftoms, or ufages of England, or any ordinance of this province to the contrary hereof in any wife notwithstanding.

This ordinance fhail extend only to fuch lands as were granted away by the French king before the conqueft of this country by the Britifh arms, and to the grants made thereof by the faid French king to his feveral grantees, and the under-grants made of divers parts of the fame by the faid grantees of the French king, or their heirs or affigns, or other perfons claiming under them, to inferior tenants or vaffals either before or since the faid conqueft, but not to grants of land made by the king's Majefty fince the conqueft.

GIVEN by His Excellency the Honourable Guy Carleton, Esquire, lieutenant-governor and commander in chief of the province of Quebec, brigadier-general of His Majefty's forces, &c. in council at the Caftle of St. Lewis in the city of Quebec, on in the

feventh year of His Majefty's reign, and in the year of our Lord one thousand feven hundred and fixty-feven.

By the Lieutenant Governor's command.

N. B. This is fuch an ordinance as is meant by the attorney general above-mentioned in his paper above recited, intitled, *His* opinion concerning the report made by Governor Carleton, where he fays, page 50, that, if the measure he had before fuggefted of making a code of laws for the use of that province fhould not be thought adviseable, he is humbly of opinion that it would be most expedient to let the English law continue to be the general law of the province, and to pass an ordinance to revive those of the former French laws which relate to the tenure, alienation, and incumbrance, of landed property.

APPENDIX L.

The fecond head proposed is a Bill for declaring the common Law of the Province.

The Canadian lawyers are, it feems, not entirely agreed how much of the French lystem of the custom of Paris has actually enured in the Province of Canada. The capitulation for Montreal and the Province, article thirty-six, which engages to preferve to the inhabitants their property feems to me to ftipulate the manner in which that property is to be held; of confequence the Tenures are to be preferved, and all the Laws relative to that property. For it is not only the thing which we hold, but the manner in which we hold beneficially, that conftitutes our property ; therefore I conceive that all the Lands in Canada, the property of native Canadians or which have since paffed by defcent or by Will, are, in virtue of the capitulation still governed by the Law of France, as to the tenure or modes of holding; although by the forty-fecond article of the capitulation granted for Montreal and the reft of the Frovince of Canada, and by the ninth article of the treaty of Verfailles, the inhabitants become subjects of your Majesty. How far your Majefty's Proclamation and the commisfions and inftructions have or have not fuperfeded this idea, arising out of the terms of the capitulation and treaty, and how far the cafe of the new fettlers, emigrants from Great Britain and acquirers of lands by new titles, as by mortgage, grant or purchafe, is capable of a diffinction, has been already observed upon.

I think there is a great diffinction between the treaty and capitulation ; for the Treaty which makes the Inhabitants fubjects of your Majefty's crown, confirms to them their property in no other mode than in a permission to retire and to fell their estates and those restrained to be fold to British Subjects. So that if they ftay and claim under the Treaty only, they ftay under condition of becoming by their own free Act British Subjects; and as fuch fubject to British Laws But the treaty made with the fovereign power of France which, without taking notice of the Capitulation. transfers its fubjects pleno jure, does not fuperfede the capitulation made with the Inhabitants; becaufe I confider capitulations in the eye of the Law of nations, to be not only as national, but perfonal compacts, and made with the inhabitants themfelves, for the confideration of their ceafing their resistance. It is conliftent with the honour and interests of this kingdom, that they should be leigiously observed and that the condition of the grantees fhould be rendered fubftantially better, rather than worfe, fo far as any perfon or perfons are capable of taking benefit of the grant.

At the fame time I must observe that I do not conceive that your Majefty is fo bound in your legislative capacity, that you cannot in parliament change the Laws of fucceffion or heritage. or prevent the keeping up any corporate Body Ecclefiaftical, by preventing a perpetual renewal by new Members, or that your Majefty cannot regulate any other general matter of dividing property real or perfonal, after the death of the poffesior, in the fame manner as your Majefty in parliament, may change the Laws respecting your other British Subjects ; fo that the Law be not made to the prejudice of any particular private perfon while he lives. In as much as no man naturally hath property after death, the community to which it reverts has a right to fix the law of partition, after death, as it shall judge most for the benefit of all its members. 'The right to difpose by Will, or to make a private law for a Family, is a privilege granted by the community; and reftrainable, as the Law of France reftrains it more than that of England, by excepting the legitime and limiting devifes of land in certain degrees, except by deed by and among parties living.

It would probably answer every just and reasonable purpose, and would tend perfectly to quiet the minds of your Majelty's Canadian Subjects, if a Bill were to pass in parliament to the following effect :- That in all cafes of wills, tenures, ancient rents, quit-rents, fervices not being military, divisions of Lands and transfers, hypothecations, or charges and pledges, or incumbrances of property, moveable and immoveable, and of hereditary descent, or partition of dower, or distribution in cafe of intestacy, the legitime, or portion of Children and Widows, and of all deeds, leafes and contracts, the ancient laws, cuftoms, and ulages of Canada shall be valid ; unless the faid customs any ulages shall have been deviated from by any confent of parties by exprefs convention, or in which the modes of the English Law. as in cafes of transfer between a Canadian and English born subject, shall have been followed; that in all cafes where such custom and ufages of Canada are relied upon, either by the party complaining or the refpondent, fuch cuftom and ufage shall be fperially pleaded. And in order the better to erale from the minds of the Canadian Subjects their ideas of veneration for the edicts of their late Sovereign, and for the Arrets of the tribunals of France, and as much as possible to make them fentible of their union with, and dependence upon the British Government.

it should be enacted, that the French Law, known under the denomination of the Cuftom of the Vifcounty and Provoftship of Paris, and fo much thereof only as has actually been practifed in the Province, shall be pleaded under the title of "the common " Law, and the Cuftom of Canada, as by Act of Parliament es-" tablifhed" and under no other title whatfoever; and the abstract of the faid Custom, as hath been drawn up by a Committee of Canadian Gentlemen of the Law, shall be annexed to the Bill to be referred to, as the fole rule; obferving only the alteration in the articles 99 and 101, as in the adv tifement or preamble of the faid abstract is fet forth; that Lands already granted or to be granted by your Majesty, your Heirs or Successors, shall be holden in free and common soccage tenure, and shall pafs according to the Laws of England : power always referved to your Majeity to make gaants of Lands in, any other mode of Tenure, it to vour Majesty it shall feem meet.

EXTRACT of the PROCEEDINGS of a Committee of the whole Council under the following Order of Reference relative to a conversion of the present Tenures in the Province of Quebec into that of Free and Common Soccage; printed by Order of His Excellency the Governor in Council of the 20th October 1790, for the use of the Members of the Legislative Council.

> At the Council Chamber in the Bishop's Palace on Wednesday, the 25th of August 1790.

> > PRESENT:

His Excellency the Right Honorable Guy Lord Dorchester, Governor.

The Honorable WILLIAM SMITH, Efquire, Chief Justice, and

The Honbles. Hugh Finlay,
Thos. Dunn,
Ed. Harrifon,
John Collins
A. Mabane,
J. G. C. DeleryThe Hon. George Pownall,
Henry Caldwell,
William Grant,
Francis Baby,
C. Delaunadiere
Le Cte. Dupré,

Ordered by His Lordship, that a Committee of the whole Council investigate and report a statement of the comparative advantages and disadvantages of the tenure in free and Common Soccage and the prefent tenures of the Province of a different description, with a view to the public interest, as well as that of the individuals, holding under fuch tenures; that they deliberate, and in cafe a conversion of the prefent tenures in Fief or otherwise into Soccage tenure, shall appear to be advifable, that they report upon the most eligible mode of effecting the fame, without prejudice to the rights of individuals and the general interest of the country. In doing this the Committee are to attend to the nature and operation of the different claufes in the Statute of 12 Car. 2, Cap 24. by which Soccage holding was made general in England, giving Mr. Lanaudiere at the fame time an opportunity to be heard on his Petition for a conversion of the tenure of his eftates into that of free and Common Soccage, which was referred to a committee of the Council on the 14th. February 1788. And the Committee may call on Mr. Attorney and Solicitor-General for their opinion on the fubject matter of the reference. if they shall conceive the same to be necessary and take all such other means, as they may think proper, for acquiring the necesfary information; and further, if legislative interpolition shall appear to be neceffary, the committee are to report fuch draft of a Bill, as the cafe may require.

Letters of the Surveyor General and Deputy Surveyor-General, inclosing an enumeration of Grants to the amount of 7,985, 4701 Acres.

> " SURVEYOR GENERAL'S OFFICE," Quebec, 25th September 1790."

" SIR,

" 'The enclosed lift of Seigniories and their contents was formed in purfuance of the right Honorable Lord Dorchefter's command, fignified to us by letter from Mr. Secretary Motz of the 28th. August.

"We have had recourse to the Public Records for the purpole; and it is possible though we are not aware of it, that there may be a grant or two and perhaps more, that have escaped our refearches, and there may for want of accurate actual Survey's be some militake in the computation of their contents, and particularly of the Islands from their irregular figures.

"We have lately had occasion to thew the comparison, be-"tween the granted, and ungranted Territories on the South "side of the St. Lawrence, but the want of Surveys, and the "immense extent of the Province on the North, and in the "North-west, renders such a comparison on the North fide at "present impossible, nor can be expected for an age to come."

" All we know is, that these vast regions furnish abundant foope for settlement and Cultivation, and an innumerable po" pulation, especially to the Weft of the Meridian of this City, tho' the Countries North and North-Eaft, of that Meridian, are mountainous up to the limits of the Hudfon's Bay company."

" We are Sir your most Obedient Humble Servants,

(Signed) {SAMUEL HOLLAND, JOHN COLLINS, D. S. G.

Honorable WILLIAM SMITH, Efq;

REPORT OF THE SOLICITOR-GENERAL.

TO THE HONORABLE MEMBERS OF THE COUNCIL. May it please your honours.

Anxious to contribute all the Information in my power to the Honorable Board of Council upon the subject of the Letter I received from His Honor the President on the 31ft of August iast, inclosing feveral important questions relating to the tenures of Estates in this Country, and fuggesting the idea of conversing the fame into Free and common foccage; I submit the following anfwer to those Questions for the consideration of the Board. It is fit I should inform the Honorable Board that the prefent dangerous state of Health of the Attorney General has defeated our intentions of making a Joint Report, and I may urge with truth that the daily avocations of my other public department, have greatly impeded my delibirations on the prefent fubject, but as expedition may be wished and expected, I shall state my Answer concifely, but I hope with a degree of precision.

" Question 1.—Upon what tenure were the lands of this " Country granted by the French ?

The Civil Conftitution of Canada was established upon the Feudal System; large Tracts of Land were granted by the French Crown en Fief et Seigneurie, these estates are stiled Biens Nobles; finall parcels and Town Lots were granted by an Ignoble Tenure, called Roture.

There are fome, a very few, allodial grants, the Tenure is termed *Franc Aleu Noble* and *Franc Aleu Roturier*: a fewer ftill by that tenure which is of a fpiritual nature called *Pure Aumone*, or *Franckalmoigne*.

" Question 2.—What kind of Tenure was most prevalent and what may be stated in probable conjecture for the proportion between them?

In the country, the tenures en Fief et Seigncurie were almost

univerfal. In the Town of Quebec, feveral fmall parcels were granted upon the fame tenure; and there, as well as at Three-Rivers, and adjoining to the Forts of Crown Point, Decroit &c. fmall parcels or lots were granted *en Roture*.

The proportion in favor of Fiefs and Seigueuries (alluding to the Royal Grants) is beyond comparison greater than all the other *Tenures*.

" Question 3.—What fecurities had the French Crown by the Law of the Country, or the nature and tenor of the grants, to compel or promote the cultivation and improvement of the land granted ?

A power of reuniting the Estate, to the King's Domain, in default of Cultivation and Improvement by the Grantee, was the only, if it can be deemed any, fecurity of the Crown; and this

1ft. By the tenor of the grant, almost universally stipulated; and 2ly. By virtue of two arrets of the King of the 6th. of July, 1711. His Arret of the 15th. of March, 1732 and his declaration of the 17th. of July 1743. Several Seigneuries, and more particularly those near Lake Champlain, were, antecedent to the Conquess, at the instance of the King's Attorney General reunited to the King's Domain, by Ordonnances of the Governor and Intendant, for want of Cultivation and improvement made by the Grantees, and afterwards regranted to others, and in some instances to the fame Grantees.

" Question 4.—What were the legal Burdens upon the Grantee of the Crown in refervations, conditions, rents and fervices; or what were the benefits accruing to the French Crown from the nature of the Grant founded in the ufual refervations, or by the general laws of the country?

The Grantee and his Heirs and affigns, by the Tenor of his Grant and by the law of the Country (Art. 32 and 35 of the Custom) were bound to render Fealty and homage to the King (by his Reprefentative) at the Caftle of St. Lewis in this City; the vaffal, was bound at the fame time, or within forty days after, (Art. 8, 10 and 11,) to deliver to the King's Reprefentative, *un Aveu et Dénombrement*, that is to say, a particular ftatement of his Title, the extent of his Fief, its dependencies, appurtenances and prerogatives, whether he had a right to hold Courts of Justice, high, inferior or low Justice, any and which of them; the amount of rent of the Clerk's and Notary's Offices, Fines and other Rights; his Manor-Houfe, the lands of his Domain, the quantity and quality of his arable, Meadow, pasture and Wood Lands, what Ponds and Lakes; what Farm Houfes and other buildings he had on his Domain, the boundaries of the Farms, their revenue and to whom let, or whether he cultivated them himself, the annual amount of the Cens, Rents and other dues, with the number and names of his Censitaires or Tr-Tenants, or others fubject to pay rent to him; the Rights and fervices he owed on account of his Fief; whether he had Right of Mill; the Lands granted en Roture on his Eftate; and a particular defignation of the Arrière or Rere-Fiefs; How he became entitled to his Fief and Seigneurie, whether by Succeffion (and particularly whether in the Line Direct or Colletaral) by purchafe, gift, or how otherwise.

Upon the fale or other mutation of the Fief (except in the direct line) the Fine called *Droit de Quint*, or a fifth part of the amount of the purchale money was payable to the King, at the time of rendering fealty and homage, (Art. 25.) in refpect of Lands governed by the Custom of Paris, which is the General Law of the Country; and in refpect of Lands governed by the Custom of *Vexin Le François* (for there were fome few grants made fubject to that Custom) a Relief, i. e. one Year's Revenue the Fief fold (Art. 33.) and not the Quint was payable upon every mutation whatfoever.

The King might use his Right of *Retrait Féodal*, the Jus retracti, within forty days after notice given of the Sale of any Fief and Seigneurie made by his Grantee, reimbursing the Purchaser his purchase money, and the legal expences (loyaux could) Art. 20. but this Right ceased after an investiture of the New Vassal.

Thefe are legal Burdens.

A few old Grants made by the India Company stipulated that on every Mutation a Medal of half an ounce or an ounce of Gold (*une Maille d'Or*) should be paid the company in lieu of the Quint.

The usual Reservations and Conditions in the more ancient Grants were :

1. That the Grantee should, with in a year and a day, build an Habitation upon, and actually inhabit the Lands (*lenir feu et lieu*) and cultivate and improve the same (*déserter et mettre en valeur*) aud cause his Ter-Tenants (*Censitaires*) to do the same within the same period : (some Grants mention that the Lands are to be stocked with cattle in two years,) in default of which the King should of Right re-enter into the Possession of the land granted—but a formal Process for the Reunion, was however thought necessary, and always prosecuted by the Attorney General.

2. That the Gantee should preserve all Oak Trees growing on his Domain, and cause all Oak Trees fit for the construction of the King's Ships to be preserved by his Sub-feudatories (Censitaires).

3. That the Grantee should give immediate advice to the King or his Governor and Intendant, of the discovery of all Mines, Ores and Minerals (*Mines, Minières et Minéraux*) found in the Lands Granted; with exception only to two Grants, wherein they are expressly given to the Grantees.

4. That the Grantee should get the grant ratified by the King, generally within the period of one year.

5. That the Grantees should permit the necessary Roads to be laid out for public utility, and cause a clause to be inserted in their concessions to the Ter-tenants that they should do the same.

The more modern Grants contain the same reservations and conditions, but they also contain additionnal stipulations, namely;

6. That in case the King should have occasion for any part of the land granted for the purpose of building Forts, Batteries, places of arms, stores, or other public works, he should be at liberty to take the same, together with the trees and timoers that should be necessary, and also, Firewood for the supply of the Garrisons within the extent of the lands granted, without being held or bound to make any compensation to the Grantee.

7. That the Grantee should allow the free use of the Beaches to all Fishermen, except such part as he might stand in need for his own Fisheries.

8. That the Grantee should concede lands to his Sub-feudatories at the accustomed rents and dues (cens et Rentes et Redevances Accoutumé) for every acre in front by forty in depth; about a fourth part only of the Grants contain this clause.

9. In many of the latest Grants the King reserves the Right of taking Oak Timber, Masts, and Yards (*Mâtures*), and all other Timber proper for the Construction and Equipment of his Ships, without making any compensation for the same—and in one Grant the King reserves the Red and Pitch Pine for making Tar.

There were no tents reserved to the King by the grants made in Fief and Seigneurie; nor were the Grantee liable to any legal Services, except rendering Fealty and Homage to the King's Representative, and furnishing the Aveu et Dénombrement in the manner before described, but this they were bound to, on Pain of the saisie féodale of their Estates. (Art. 1.)

By one of the Arrets aforementioned of the 6th July, 1711, the Grantees were bound to concede Lands to their Sub-feudatories for the usual Cens et Rentes et Redevances, and by the arret of the 15th March, 1732, upon non-compliance on the part of the Royal Grantee, the Governor and Intendant were impowered and directed, to concede the same on the part of the Crown, to the Exclusion of the Grantee, and the rents to be payable to the Receiver-General. The Grantees are thereby also restricted from selling any Wood Lands (Bois de bout), upon Pain of Nullity of the contract of concession, a Reunion of the lands to the Royal Domain, and Restitution of the Purchase Money to the Sub-feudatory,

The benefits accruing to the French Crown from the nature of the

grants en Fief et Seigneurie, were casual, under the custom of Paris, the Revenue of Quint (a third of which was usually remitted) and under the custom of Vexin Le François, a Relief. I have mentionned the Droit de Retrait féodal.

By the Roture tenure, the Grantor, whether the King directly, or his Grantee en Fief mediately, stipulated a specific sum (one halfpenny for every Acre in front by forty Acres in debt) payable to him by the Roture Grantee annually on a fixed day, and at the Seigneur's Mansion-House, for what is termed Cens, evidencing thereby that he was the Seigneur Censier et Foncier, or immediate Seigneur of the Roture Grantee (marque de la directe Seigneurie.) A Specification indispensibly necessary to intitle the Seigneur to be paid the Lods et ventes, upon every subsequent alienation of the land granted, (Cens porte Lods et Ventes) and another Specific Sum (one halfpenny for every superficial acre contained in the Grant) for what is called Rente. In the Towns of Quebec and Three-Rivers, the reservation of the Cens et Rentes, for small Lots, are variable and very low, but specifically ascertained.

Upon every mutation of *Roture* Lands, the new proprietor was bound to produce his titles to the Seigneur, and in forty days after exhibiting the same, the Seigneur, in case of a mutation by sale, and even upon Donations *inter vivos*, from a collateral branch or stranger, was intitled to the alienation Fine called *Droits de Lods et Ventes*, (Art. 73) which is the twelfth penny or a twelfth part of the price or value of the land; a fourth of the Fine was usually remitted by the Seigneur, but without any obligation so to do.

The King by Virtue of an Edict of the 20th March, 1673, had the right of Lods et Ventes upon exchanges of one inheritance for another, on lands granted by the Crown en Roture. But this right was limited to the King alone, and did not extend to his Grantees en Fief et Seigneurie over their subfeudatories, except the Seigneurs of the Island of Montreal, to whom this Right was given, in heu of the Droit de Justice, which they relinquished.

These are legal burdens, but clearly ascertained.

The Benefits accruing to the French Crown from the nature of the Royal Grants en Roture, were merely the Cens et Rentes, and the Casual revenue of Lods et Ventes, with the right of Pre emption,* but this Right ceased after seisin given to the proprietor.

The Roture Tenants in Canada, in virtue of the King's Edict of the 4th June, 1686, and the provincial Judicial decisions given in consequence, were bound to the servitude of grinding all the Corn for the consumption of their Families at the Banal Mills of their Seigneurs. The Toll is a Fourteenth Bushel; and the penalty for a contravention, under the Autority of a Provincial Decision, is understood to be the Payment of Dauble Toll.

5th Question.—" What were the benefits which the Grantee of the " Crown might draw from the sub-feudatory; or what the burdens in " acknowledgements, Rents and Services, to which the occupants un-

Pre-emption is not a legal but a conventional right.

st der the Royal Grantee were liable from the nature of the concession " or by the Law of the Country ?

This is in g eat part answered upon the forth Question, in respect of the benefits which by the Law of the country (independant of conventionalstipulations) the grantee of the Crown might derive from his subfeudatory ; and which in fact are the burdens that the sub-feudatories are liable to. But the Grantees, of long usage imposed other stipulations in their contract of concession to the subfeubatories; such as the Retrait Conventionel (the Jus retractum the payment of one or more bushels of Wheat annually, one or more Capons, a certain number of days' labour (Corvées) &c. But these are Conventional Burdens.

6th Question .- " Was the estate of the Grantee of the Crown sub-" ject to partition by Marriage Contract, Testamentary Disposition, or " any other mode of alienation, voluntary or Judicial, and by inheritance " in the Lines direct or Collateral ; or was any estate held impartible " and unalienable, or in the nature of an English Intail ?

I conceive the common law of this Province, in relation to the powers to be exercised by Marriage Contract, testamentary disposition or any other mode of alienation, respecting the tenure en Fief et Seigneurie, and that en Roture, to be indiscriminately the same.

By Contract made before Marriage, the contracting parties might make such stipulations respecting both their Real and Personal Properties as they unitedly judged fit. They might stipulate that the real as well as the personnal property belonging to both, or either of them, or any designated Part thereof should, or should not, enter into the Conjugal partnership. But after Marriage, Inheritances descending to either of them by succession in the line direct, or Collateral, or given by Donation or otherwise in the line direct (unless the contrary were expressed in the deed of conveyance) to either of them, did not enter into the Communauté or Partnership. Estates given Collaterally, or by strangers to either of them, after marriage, became a part of their joint proprerty ; but by express stipulations in the conveyance, the liberality of the Donor might be prevented from becoming a part of the common stock.

Antecedently to the Quebec Act. 14th of His Majesty ch. 83. a fifth part only of Estates descended by Inheritance, which are termed Propres, could be devised or otherwise disposed of (expect in cases of actual sale) to the prejudice of the Heirs direct or collateral, who in that respect might be said to have the expectant Reversion of the other

Real as well as personnal property acquired or purchased pending the Communauté, which are termed Conquests, being the fruits of the joint industry of the husband aud wife, were a part of the joint stock and .partible as such.

In case of Marriages, without a previous Contract, no part of the real property of either husband or wife, before marriage, entered into

the Communauté, by the Mufficipal Law? their personals alone did so. Estate en Fief et Scigneurie, are partible in the manner following.

The eldest son in the nature of a jointure (par droit d'Ainesse et Préciput) succeeds to the Mansion House (Château où Manoir principal) the inner yard (Basse cour) and a superficial acre of land adjoining to the Mansion House supposed to be an inclosed Garden (un arpent de Terre de Penclos et Jardin) if there be such; and if there happens to be a Mill within that Inclosure and annexed to it the Right of Banalité, the body of the building belongs to him, but the profits of the Toll are not vested in him alone, they are divided in proportion to the inheriting Rights of each of the Heirs (Art. 13 and 14.) If it should happen that there were but a son and one other child to inherit, the eldest son succeeded to two thirds of the estate, his Brother or Sister to the other third (Art. 15.)

If there were more Children, the eldest Son succeeded to one moiety, the other Children to an equal proportion of the other moiety (Art. 16.)

The Droit d'Ainesse did not extend to females, but successions, in the direct and Collateral lines, were divisible in equal portions. (Art. 19)

In the Collateral Line, females did not succeed with Males in equal degree, (Art. 25.)

Upon marriages had without a previous Contract, the Widow had her customary Dower (*le Douaire cautumier*) which was a moiety for her life of her Revenue of her Husband's real estates, possessed at time of his marriage, and those descending to him in the line direct pending the marriage, (Art. 247, 248;) descendible to the issue of the marriage, (Art. 249;) upon renouncing to their Father's succession (Art. 250;) for they cannot claim to the estates by inheritance and to the right of dower. Nul n'est Douairier et héritier de son père, (Art. 251.)

Estates subject to the customary dower, stood pledged (Hypothéqués) from the day of the marriage for the security of the widow and issue of the marriage, and if aliened afterwards, they continued subject to her and their rights.

Marriage Contracts, donations inter vivos, and by testamentary dispositons, an Intail, which the Civilians term Substitution (Fidei commissaire) may be created (tho' I know no instance of it in this province, but there may be some) so far down as the second degree (L'Ordonnance d'Orléans) they must be published and enregistred in the proper Court of Justice within six months after the date, if inter vivos, and within the same period after the decease of the substitutor if it be a testamentary disposition, and in that case they cannot be purged or affected by any Judicial decree whatsoever, except respecting debts due by the Substitutor.

7th Question.—" Were the sub-feudatory Farms of the concessions " of the Tenantry held under the royal Grantees, devisable, descen" dible, alienable and partible in the like manner without limitation.

With exception to the partition of the *Roture* lands among the Heirs, which were partible among them in equal shares, without the *Droit d'Ainesse* or other preferable right, the answer to the sixth question applies.

There appears to be engrafted on the Royal Grants the fiction of feodal Tenure, drawing after it the servile appendages of Alienation Fines, &c. Quints and Reliefs upon the Tenure en Fief, and Lods et Ventes and the servitude of Bannalité upon that en Roture; and therefore a general answer to this question can give no embarassment; nor can I hesitate saying that a conversion of those Tenures into that of Free and common Soccage, which is not subject to those appendages, would be advantageous to the Roture Grantees of the Crown.

With regard to the Royal Grantee en Fief et Seigneurie, such a conversion, if unqualified, might and I think would operate a heavy loss to most of them, by being deprived of their certain Revenue of Bannalité, and their casual Revenue of Lods et Ventes.

The Droit de Justice, accorded to them by their Grants, which tho' exercised in many Seigneuries antecedent to the conquest, but tacitly relinquished, or at least not exercised, since that period, is an object frequently mentioned by the Seigneurs, to whom by their Grants that right was given.

The Haute Justice, on account of the Prisons which the Seigneur Haut Justicier was bound to erect and maintain, as well as of the necessary Officers of that Justice, might be considered onerous upon them, but on the other hand, they were entitled to the confiscated Estates and Effects of persons convicted of Felony within their Seigneuries, to Estates escheating for want of Heirs, to the possesion of vacant inheritances, and to Judicial fines.

By the statute of the 14th of His Majesty ch. 83, I conceive the criminal powers of the Seigueurs to be abrogated, and their pretensions limited to the civil part only.

A conversion of the Tenure en Fief, into Free and common Soccage, would exonerate those Estates from the Alienation fines payable to the King in the manner I have mentioned; but as they have in view to hand down their Estates to distant generations of their families, many of them consider the Exemption of payment of those fines to be but of little moment; and therefore, upon that ground, a conversion of the Tenure would be a certain disadven-

Hh2

tage but no certain benefit to them, respecting the parcels of their estates that are already conceded.

It may not have the same effect with respect to the unconceded part of their estates; it tis true, the conversion of the Tenure into free and common Soccage, would, by a fit law for that purpose, preclude them their new legal rights to alienation, fines and *Bannalite*, but they might dispose of that part of their Estates in fee simple, for such annual quit rents as may be agreed upon, or Leases, for lives, or a term of years, perhaps at a greater advantage than those at present granted upon the *Roture* Tenure; and there is great reason to apprehend, that that part of their Estates would be more rapidly settled and cultivated; I am therefore of opinion, that in respect of the ungranted parcels of their Estates, no material disadvantage, perhaps a much greater benefit would accrue to them, by a conversion of the Tenure into free and common Soccage.

91h Question.—" Would fuch conversion of the Tenure of " the Estates or the subfeudatories be beneficial or detrimental to " them; and in what respects, as you apprehend, and for what " reasons?"

The benefits that would refult to the *Roture* Grantees of the Crown, of which I have fpoken in the answer to the 8th question, would equally affect the subfeudatories of the Royal Grantees in F ef.

It is however right to obferve, that, by the French King's edicts and declaration before mentioned, the Royal Grantee en Fief was bound to concede Lands to all Applicants for the accustomed Rents and Ducs, and upon his non-compliance, the Governor and Intendant were directed to do fo, on the part of the Crown, and for the benefit of the Crown; this may be confidered a great facility for the fettlement of the Children (who are numerous) of the poor Peafantry of this Conutry, to whom alone, and in this refpect only, the conversion of the Tenure may prove detrimental, from their Inability to purchase Lands, though a wilderness, on account of the exorbitant demands of the Proprietor.

10th Question. " How may the interests of the Crown and " public be affected by fuch conversion; stating the points in " which it may operate to the loss or emolument of the Royal " Revenue?

The intereft of the Crown, in relation to the Grants made by the French Crown, and there have been very few, and of but small parcels or lots (except that given to Mr. Shoolbred in the Difltrict of Gafpé) fince the Conqueft, is but of fmall consideration in point of Revenue. Alienations of *Fiefs* and *Seigneuries* in the Country are not frequent, but the royal *Roture* Grants, in the town of Quebec, merit fome consideration, not in refpect to the *quantum* of the annual rents, but on account of the Fine of *Lods et Ventes*, proceeding from the frequency of alienation; they are a Cafualry, and cannot be precifely afcertained, any more than the revenue of *Quint*.

But if the extensive tracts of the ungranted lands of the crown were divided into diffinct Seigneuries, and Grants made of the lands therein to the Peafantry upon the *Roture* Tenure, the revenue deducible to the crown thereby, might, and would in the courfe of a feries of years, be very productive, and continue to increafe. At the fame time I am of opinion, that the Settlement of the wafte lands might, under that Tenure, be checked and greatly impeded, to the detriment of the Population, Agriculture and Commerce of the Province, a great part of the benefits of which would center in the Mother Country.

11th Question —" By what mode may fuch conversion of the "Tenure be created? If the Prerogative is competent for it, "what claufes may be necessary in the Royal Patents or Grants, and if a law is wanted to effect the design, what paragraphs ought it to contain for the intereft of the Proprietors, whether Seigneur or Cenfitaire, Lord or Tenant, or most eligible as "well for individuals as the crown and the public? Taking at "the fame time into consideration the fitaute of 12 Car 2. ch.24.

The exifting Tenures being a part of the municipal Laws of the Country, I think a Law will be necessary to declare their conversion.

I fhall, with all the expedition that my now prefsing avocations in the Council office department will admit, fet about preparing fuch claufes as, to me, may appear expedient for the intended law. I submit this report, as a work done with fome degree of precipitation, proceeding from the motive of accelerating the important object under the consideration of this Honorable Board; requefting your Indulgence till a future day, to fubmit the necefsary Paragraphs to be inserted in the Act.

I have the Honor to be with great Respect,

GENTLEMEN,

Your most obedient and most

Humble Servant,

(Signed) J. WILLIAMS, Solr, General.

QUEBEC, 5th October 1790.

Answers by Charles de Lanaudiere, esquire,

To some of the Questions proposed by the Honorable Committee of the whole Conucil.

Answer to the 1st Question.—In Fief and Seigneurie, fome in Fiefs of Dignity, with the Right of high, middle, and inferior Juftice and fome in Fiefs without the right of Juftice. Town Lots, and fome fmall Tracts in the Country en Censive or Roture, fo that, generally, there is no other Tenurein Canada than Fief and Roture, governed according to the Cuftom of Paris, and the Vexin Le Francois, furrounded bythat of Paris.

The Fiels granted by the Company of the associates 2d. of new France, that is to fay, before 1663, (at which Time that Company furrendered their Rights to the King) were principally granted according to the Cuftom of Vexin le Francois, Posterior to that Period, the King granted none but according to the Cuftom of Paris; all relevant from the Caftle of St. Lewis at Quebec, the place designated in the Title Deeds of Concession. for rendering Fealty and Hommage to His Majefty, and other Rights and Dues according to those Customs. With exception to the Houfe-Lots in the Towns of Quebec and Three-Rivers, there are only a few Royal Grants en Censive in Canada, except at Detroit, where all the Grants are issued by His Majesty in Roture, as well in the Town as in the Country. The Royal Grants of the French Government are therefore principally in Fief and Signory, high, middle, and inferior Juffice.

3dly. By the King's Order of the 20th of May, 1676, (the first Royal Regulation relating to Lands, found enregistered by the Superior Council or Parliament of Quebec) the King's Governor and Intendant ought not to grant Lands in *Fief* and *Roture*, to the Inhabitants of Canada, but upon Condition that the Grants in Fief should be represented to the King within a Year from their date, to be confirmed or ratified by His Majesty, upon Pain of Nullity; and upon condition, that the Grantees should cause the Lands to be cleared and improved within the subsequent six Years.

In 1711, the 1th of July, the King ordered by His Arret, (alfo enregistred in the Superior Council of Quebec) that the Seigniors of the Colony who had no Domain cleared, nor Inhabitants placed upon their Seigniories, fhould put them into Culture within one Year, on Pain of being reunited to the King's Domain, upon the Judgments which the Governor and Intendant fhould render, at the Profecution of the Attorney General. That the Seigniors fhould make Grants to the Inhabitants à titre de Redevance, that is to fay, in Roture or for Cens et Rentes, without exacting from them any Money in the Nature of a Sale, and in default of doing fo, the Inhabitants were permitted to make a Demand upon the Seignior by Sommation, and in cafe of Refufal, to addrefs themfelves to the Governor and Intendant, upon whom it was incumbent to make the Concefsions to the Inhabitants, fubject to the fame Rights with other Lands conceded in the Seigniory, payable to His Majefty, and not to the Seignior. Another Arret of His Majefty of the fame Day, ordering all Inhabitants or Censitaires of the Seigniors to put their Lands in Cultivation, and to inhabit them within a Year and a Day, upon pain of being reunited to the Seignior's Domain, by Judgment of the Intendant.

Another Arrêt of His Majefty of the 15th March, 1732, enregistered at Quebec, mentioning the foregoing Arrêts of the 6th of July 1711, and reftraining the Seigniors and other Proprietors from felling any Wood Lands (en bois de bout) upon Pain of Nullity, Reftitution of the Purchase Money, and reunion to the Domain of His Majefty, or of the Seigniors.

The 17th July, 1743, a Declaration of His Majefty (enregistered) authorising the Governor and Intendant to make Grants of Lands, to proceed to reunite to His Majefty's Domain the Lands granted, that fhould be found liable to be fo, for want of Culture, and prefcribing the mode of proceeding in that Refpect, attributing to them the Cognifance of all Matters relative to Grants, to the exclusion of all other Judges.

All the Titles or Brevets of Concession of Lands contain Claufes obligatory of Cultivation. It does not appear that either those Claufes, or the Arrets quoted, were ever rigorously executed, being considered comminatory, rather than penal.

4 & 5th. The legal and cuftomary Charges of Grants in Fief, are Fealty and Hommage, the Aveu et Denombrement or Land Roll, the Retrait feodal and lignager, the Quint, the Relief, the Right of Franc Fief, of Amortissement and of Nouveaux Acquêts; these Charges draw after them the Fidelity and Military Service of all Possessors of Fiefs and Rere-fiefs, under whatfoever Title, as well performally as by permiary Contribution. The feodal Seizure, Forfeiture, or Confifcation for Services and Rights not paid and rendered, or of Felony, Denial, Reproach or Scandal of the Seignior, or of an illegal Difmemberment of the Fief, and other usual Charges, Duties and feodal Restraints, as the Case might require, H h 4

The ordinary modern Refervations in Grants en Fief, are 1A. Fealty and Hommage.-2d. The accustomed Rights and Dues' according to the Cuftom .- 3d. The prefervation of Oak Timber. fit for the construction of His Majesty's Ships .- 4th. To give the King advice of Mines, Ores and Minerals found.-5th. That Appeals from the Seigniorial Courts fhould be made to the Provostship of Quebec.-6th. To build a Habitation, and to inhabit it (tenir feu et lieu) and to caufe their Sub-feudatories to do the same-7th To clear, and caufe to be cleared, without delay. -8th. To fuffer to be made all the Roads necessary for public Utility .-- 9th. To infert similar Claufes in the Conceffions to the Ter-Tenants, at the usual Cens. Rents and Dues per Acre of Land in Front, by forty in Depth.-10th To permit the Beaches to be free for all Fishermen, with Exception to fuch Part as the Seignior fhould have occasion to use for his own Fishery .- 11th. In cafe His Majefty fhould at any future Time have occasion for any Part of the Seignory, whereon to build Forts, Batteries, Places of Arms, Stores or Public Works, His Majefty might take the fame, as well as the Timber necessary for those Works, and the Firewood for the Garrifon therein, without being held to make any Recompence.

, The Charges of the High Justice (Haute Justice) are lst. By the ordinance of Rouffilon in 1563, Art. 27, it is enacted, that the Jurifdiction thereof shall be simply under that of the Parliament, and the Segniors Hauts Justiciers, condemnable in sixty Livres (Parisis) for the erroneous Judgments of their Judges .--2d. Children found exposed within the extent of their Jurifdiction, are at the Seignior's Charge, according to different Arrêts, particularly the Regulation of the 30th June, 1664 .- 3d. The Seignior, having the Right of holding Courts of Justice, is obliged to have a Hall (Auditoire) on the out-side of his Chateau to hold his Court at, together with Prifons on a Ground Floor. that the Prifoners may be kept in a dry Place -4th. The Officers fhould execute, and rigidly exact the Execution of the Police, which is a heavy Charge, more efpecially refpecting the Profecution of Criminals and Delinquents, for all Species of Crimes .-5th. The Seigniors having right of Justice, are obliged to exercife and render Juffice to their Vafsals and Subjects at their own Expence, that is to fay, to pay Salaries or Wages to their Officers according to the Ordinance, upon Pain of losing their Right of Justice. Fiefs of all Sorts owe Fealty and Homage, or Oath of Fidelity to the dominant Seignior, and Military Service to the King, when His Majefty shall be pleafed to assemble the Ban and Arriere-ban, and fub-arriere Vafsals. All Eftates being originally ifsued from the Royal Domain, have been charged with Military Service, as an inherent and infeparable Condition of the Fief and Oath of Fidelity made to the King by his direct Vassal; a Reafon why all Proprietors of Fiefs, and Rere-Fiefs in whatfoever Degree of Partition they are found, are obliged to attend at the *Ban* which the King caufes to be proclaimed whenever he chufes to assemble the Nobles and Vassals of his Eftates. They fhould assemble when the King directs, in Arms, in Men, and in the Equipage of Military Service.

The Ordinance of François the First, of the 19th May, 1740, diffinguishes the Service of the Vascel by the Value of his Fief, viz. A Fief producing an annual Revenue of 5 or 600 liv. a Horse-man armed and mounted; a Fief of 3 or 400 liv. a Horseman with a an attendant, Arquébusier; a Fief of 2 or 300 lv. a. Man on foot, armed; the smallest Fief, a Man on foot.

Thut encreased or diminished according to the order and the will of the Prince. Louis the 13th, the 30th July, 1635, made a Regulation containing twenty Articles for the Ban, and Arriere-Ban.—Louis the 14th, made a Convention by Letters Patent of the 11th August, 1674, commanding "all Nobles, Barons, " Chevaliers, Esquires, Vassa and others holding Fiefs and " Rere-Fiefs, that all Excuses fet apart, upon Pain of Seizure " and Confiscation of their Fiefs, they put themselves in Arms, " mounted and equipped, according to what they shall be held " bound, and to be prefent on the Days and at the Place to be " fixed."

Ecclefiaftics and others exempted from perforal Service ought to contribute one Year's Revenue of the Fiefs they poffefs, or fuch other Contribution as His Majefty fhall regulate.

The Roture Perfons, who are unworthy to carry Arms with the Nobles, are compellable to contribute to the Tax of the Ban and Arriere-Ban according to the Value and Revenue of their Fiefs; and the Roture Proprietors who ferve perfonally do not enjoy all the Grace or Favor which Nobles do, and ought to contribute more than they do.

The *Roture* Posseffors follow the fame Principle and Order towards their dominant Seignior as the Fiefs do, because the Vaffals and Subfeudatories have the fame Obligations for the Estates and Inheritances which those Seigniors have given them, and for which they owe Acknowledgements or Declarations on the Event of each Mutation.

Grants en Roture are made by a Title called Leafe for *Cens*, or *Cens et Rentes*, annual, perpetual and portable. This Leafe by its Nature obliges Fidelity and Acknowledgement to the Seignior who grants it; Alfo the Right of Bannality, Pre-emption conventionally and lineally, the alienation Fine of Lods et Ventes, Seizin, Confifcation, and others; as Cafes may happen.

Expressions of Refentment, Contradiction, Ingratitude, and Scandal, be it by the Vassal or Subfeudatory, are feverely punished by the Laws. Besides a Confiscation of their Lands, there are Examples of being obliged to appear in Court during its sitting, bare headed, kneeling, fettered, asking Pardon of their offended Seigniors; Even Imprisonment, put to the Gallies, and other unheard of Punishments, at the Mercy of the Judge.

Vaffals, and direct roture Tenants of the Crown, render their Duties and pay their Rights to His Majefty or His Reprefentatives; the Rere-Vaffals and Roture Tenants to their particular or dominant Seigniors.

6 & 7. Fiefs, as well as Roture Effates are fubject to fuccesfive Partition, ad infinitum, either in nature, or a proportionate Recompenfe in other Effates or in Money, as well in the direct as collateral line, and each divided Part, by Operation of Law, becomes a diffinct and feparate Fief. It is the fame with Roture Lands. The honorary, as well as pecuniary Duties and Dues are evidently complex, arbitrary, injurious. Can any thing further be neceflary to induce a benevolent Monarch and Nation to destroy them, and to grant in their Stead that certain and determinate Tenure of King Charles the Second, free and common Soccage, which the other Subjects of His Majefty King George the Third enjoy, and with fo much Reafon boaft of.

(Signed) DE LANAUDIERE.

Quebec, 18th October, 1790.

RESOLVES OF THE COUNCIL.

"That the progress of population and settlement in this Pro-"vince under the Government of France, whatever the cause "or causes of it, was flow, the cultivated parts even in the cen-"tral Districts of Quebec, Three Rivers and Montreal, being to "this day confined to the banks of the St. Lawrence, and the "mouth of the navigable streams that fall into it.

"That the royal patents, grants or conceffions of the lands, "were either in Seigniory or in Roture; the latter confifting of town lots, farms or fmall tracts, and the Seigniories larger tracts of various dimensions, many of which are in the rear, or at a " few leagues from the convenience of water carriage, still in fo-" rest.

"That the French King's territorial revenue arole from quints or alieniation fines of one fifth of the confideration money payable by the purchafer of the lands held in Seigniory; and of lods et ventes of one twelfth on the fale of lands held en roture, the lands in roture ordinarily paying alfo Cens et rentes, the Cens being one fol, or an English half-pence for a front of one acre or 180 French feet, and the rent, another fol for every acre of the conceffion, with a bushel of wheat for every forty acres, or two fat Capons, of the value of twenty fols.

" That the French Crown did not exact its whole dues, but remitted a third both of the quint and lods et ventes.

"That the Seigniories were parcelled out into farms, and thefe conveyed by the Seigniors under like charges of Cens et rentes, and fubject to lods et ventes, except where a large parcel was granted in arriere fief; on the fubfequent transfers whereof a quint became due to the Seignior without Cens et rentes.

" That all the grantees as well of the crown as of the Seigni-" ors, had permanent estates, under an habendum to them, their " Heirs and Assigns.

"That, according to the Receiver General's accounts, the territorial Revenue for the *thirteen* years from 1st May 1775 to 1st May 1788, (comprehending arrears) in actual receipt at the Treafury was not equal to ten thoufand pounds fterling.

" The lods et ventes being but	£1351	9ິ	5
" The quints	3148	1	41
" The balance of Royal rents from all the King's own Seigniories, Sorel excepted	} 4554	7	53
			

" From Sorel

"Which together with certain duties of cuftoms fixed by acts of parliament, is by the royal grace given to the Province to-"wards the fupport of its Government.

"That in exploring the caufes of the tardy progreffion of the po-"pulation of the colony under the Government of France, there feems to be little or no ground for afcribing it to the non compliance of the Seigniors with the conditions for cultivation expreffed in their patents or grants; the inftances of profecutions for taking an advantage of those conditions, and reuniting their "Seigniories to the royal domain, being rarc, and the Seig-"nioral cenfitaires fo much more numerous than the King's, that "the former or the inhabitants of the Seigniories, at all times did, and do now, conftitute the main body of the landholders "of the country.

"That the feudal System, if that was amongst the causes of the "non fettlement and proportionable debility of the French colo-"ny, operating to a discouragement of the royal grants, as well as the grants of the subject, there can be no just ground for "holding the grantees to a rigorous performance of the conditions of their grants.

"That it was among the main caufes of that low condition, in "which Canada was found at the Britifh conqueft, is deducible from the probability, that many thousands of families had found their account in emigrating from the exuberant population of the Kingdom of France, if the government had given their lands *here* upon eafy terms, and especially in the fertile regions and moderate climates, on the banks of the rivers and lakes in the South and South Weft.

"That the difcouragement of that System to the fettlement of the old French grants, must in future greatly increase, the population of the Province depending now upon the introduction of British fubjects, who are known to be all averse to any but English tenures; and the Canadian Seigniors of course be left without a hope of multiplying their censitaires, except from the predilection of the descendants of the French planter, to usages no longer prompted by the motives of interest, nor recommended by example.

" That the grant of the wafte lands of the Crown in free and common Soccage, is effential to the growth, ftrength, defence and safety of the Province-

" 'That unlefs the old French Seigniories can be fettled upon terms as advantageous to the husbandman as the lands of the Crown, *their* land market muft be at a ftand, to the detriment of the proprietors, until the cultivation of the wafte lands of the Crown, is damped by their remotenefs from all water carriage and the conveniences and benefits of commerce.

"That with the advantage of a vicinity to the navigable wa-"ters and a conversion of the tenures, the Seigniories will probably be the first to be fully cultivated, and with an increase of profit to the proprietors, under that ample dominion, which they will then enjoy over their lands, for fettling them upon fuch terms as themfelves may concert, to form a populous tenantry, and lay a foundation *in property*, for that perpetuity " of their names and families, which a wife and well balanced government will be inclined to encourage and fupport.

"That the King's *Rotûrier* tenants, cannot fail to wifh for a "conversion and discharge from the Cens, rentes, and Lods et "Ventes, and all the other feudal burdens connected with the "tenure under which they now hold.

"That the motives of intereft will naturally make it the defire alfo of every Seigniorial cenfitaire, to ftand upon the fame free foundation of exemption with the other landholders of the colony; but as this commutation for a difcharge of the rents and dues to the landlords, must neceffarily depend upon private conventions between them and their tenants, and involving confiderations out of the contemplation of any but the parties reciprocally interested, their cafes cannot be the objects of special and particular legislative provision; perhaps the fureft means of fecuring to the tenant a fair compact, will be to hold the Lord to his dues to the Crown, until he has difcharged his tenants, from all the feudal incumbrances in his own favour.

"That the prerogative is competent to put the *waste* lands of the Crown, under a Soccage tenure. But the legiflative interpolition is neceffary, to make that tenure *universal*.

"That if this is to be the work, not of Parliament, but of the colony legiflature, the royal inftructions given for the greater fecurity of the property of the fubject, will require an act with a probationary or fufpending claufe, until his Majefty's approbation can be obtained.

"That an abfolute and univerfal commutation of the ancient "tenures, tho' for a better, would be a measure of doubtful policy; but that no fubstantial objection occurs, against giving fuch individuals that benefit as defire it; and efpecially to fuch of the Seigniors whose tenants or censitaires, shall conceive it to be for their own, as well as for the interest and befit of their landlords, and may therefore fignify their consent to the change.

" That there ends may be accomplifhed by a law with claufes of the following tenor or import.

" BE IT, ENACTED &C.

"That if any perfon or perfons holding lands in the Province of Quebec in Fief and Seigniory, immediately of the crown, and having authority to alienate the fime, fhall at any time after the commencement of this act, furrender the same into the hands of his Majefty, his Heirs, or Succeifors, by petition to the Governor or Commander in Chief of the faid Province " for the time being, fetting forth that he, fhe, or they is or are defirous of holding the fame in free and common Soccage, fuch Governor or Commander in Chief for the time being, fhall caufe a frefh grant to be made to fuch perfon or perfons of fuch lands to be holden in free and common Soccage : " And every fuch change of tenure fhall work the abfolute extinguifhment of all mutation fines, burthens and incumbrances within the tract fo furrendered and regranted, to which the fame or any part thereof would or might have been liable under the laws and cuftoms concerning lands held in Fief and Seigniory, or in any other manner than in free and common Soccage.

" Provided neverthelefs, and be it alfo enacted by the fame authority, that fuch furrender and regrant fhall not avoid or bar any right to any fuch lands fo furrendered, or any interest in the fame, to which any other than the perfon or perfons furrendering the fame, fhall have been intitled either in poffeffion, remainder, or reversion, or otherwife; but that every fuch right and title fhall be as valid as if such furrender and regrant had never been made.

" And provided alfo, and be it enacted by the authority aforefaid, as to all fuch lands as are held of the crown *in Roture* in the faid Province, the fame fhall be deemed and adjudged to be held in free and common Soccage, from the time it fhall pleafe his Majefty by any inftrument to be iffued under the Great Seal of the faid Province, to declare the difcharge of all *Cens et rentes* and mutation fines due to the crown thereon.

" And provided alfo, and be it further enacted, that nothing in this Act contained shall be of force until his Majefty shall thave fignified his royal affent to or allowance of the fame.

" And to provide for the cafe when it may happen, that the " Seignior may be defirous of the conversion of the Tenure of " the Seigniory, and fome of the vaffals or cenfitaires of it dif-" incline to the change :--

"Be it also enacted by the fame authority, that in every fuch cafe, the Petition for a furrender, as well as the Patent for the regrant thereof, thall express and defcribe with competent certainty, the fituation and real contents of the lands and eftates of all that are fo disinclined to a change of tenure; And those parcels, fhall be excepted out of the faid regrant, and remain in all respects as if fuch regrant had never been made. But that from and after fuch regrant, one fifth part of all *Lods et Ventes* or mutation fines, to accrue on the alienation of fuch excepted parcels, fhall be paid by the proprietor or proprietors " of the Seigniory, for the use of his Majefty, his Heirs or Suc-" ceffors; and fhall and may be fecured by proper claufes and " provifos, to be expressed in fuch Patent of regrant."

DISSENT.

"Mabane's Reasons of Dissent from the Resolutions and mo-"tion of the Chief Justice adopted by the Committee.

" Becaufe the Refolutions moved for do not appear to apply to the object of the Reference.

"Becaufe it appears that the flow progrefs of population and fettlement under the Government of France, cannot be afcribed to any inherent vice in the feveral tenures under which lands are held in the Colony; that it arofe from the Difficulties which the first fettlers found in contending with the fierce and favage nations which furrounded them, from their frequent wars with the British Colonies, and above all, from their repeated Expeditions into the Upper Countries and towards the Ohio in which the ambitious Policy of France had forced them to engage.

"Becaufe it appears evident from the rapid and almost unexampled Progrefs of Population in the Province (from its own own Refources,) being from 65,000 fouls in the year 1766 to about 120,000 in the year 1784, and who are now Chiefly employed in agriculture, that the prefent tenures are not inimical to Population and fettlement of the Colony.

"Becaule the Ring's Rights in the ancient tenures of the Country being expressly referved in the Act of the 14th of the King, and by His Majefty's gracious bounty appropriated to defray the expences of Civil Government, ought not to be relinquifhed or facrificed without an equivalent compensation.

"Becaufe however unproductive the Territorial Revenue may have hitherto been from the indulgence or supinenefs of Government, no Judgment can be formed from the fums actually collected, of the Revenue that may hereafter arife therefrom, which muft increase in Proportion to the Population and commerce of the Province.

"Becaufe the Predilection of the native Inhabitants of the Province to their antient tenures and laws ought not to be interfered with unlefs by their own confent, and on the ftrongeft and cleareft Grounds of Public Utility.

" Becaufe the alterations proposed by the Resolutions or any

" other Conversion of Tenure tending to give the Seigneur a " more abfolute and unconditional Poffeffion of the Fief, would " not ony be a facrifice of the King's Rights, but would defeat " the wife intentions and beneficent Effects of the Arrets of " 1711 and 1732, and the Declaration of 1743; by which the " Seigneur is obliged to grant to fuch Perfons as will apply for " them for the Purpofe of Improving Lands in Concession " fubject only to the accustomed and stipulated Rents and Dues, " and upon his non Compliance, the Governor is authorifed on " the Part of the Crown, and for the benefit thereof, to the Ex-" clusion of the Seigneur for ever, to concede or grant the " Lands fo applied for. By the fame Law the Seigneurs are for-" bid under pain of Nullity and a Reunion to the Crown of " the Land attempted to be fold to fell any part of their unim-" proved Lands or en Bois de Bout; Dispositions of Law highly " favorable to the Improvement of the Colony, and which fecure " to the Children of the Cenfitaires or others, the means of fet-" tlement and of employing their Industry in Cultivation on fix-" ed and moderate Terms, whereas if the Conversion of the " Seigniories into free and common Soccage fhould take place, " the Children of the prefent Inhabitants of the Country and all " others defirous to fettle thereon, would be left entirely fubject " to the arbitrary Exactions of the Seigniors, to their infinite Pre-" judice and the manifest detriment of the Country's Improve-« ment.

" Becaufe it appears that the fervices or Burthens to which the Cenfitaires under Conceffions from Seigneurs are fubject, are few, clearly underftood and afcertained, and are by no means onerous or oppreffive."

J. WILLIAMS, C. C.

AN ACT to enforce the ancient Laws of this Province, compelling Seigniors to concede their Lands fubject only to rents and fervices, and to facilitate the reunion of Lands *en roture* to the Domain in cafes where by Law the fame may be demanded.

WHEREAS by the Laws, ulages and cultoms of this Province. the proprietors of Seigniories therein, are bound to grant Lands to the inhabitants of the faid Province, for fettlement, fubject only to certain rents and fervices à titre de redevance, and whereas divers of the faid proprietors of Seigniories have, under various pretexts, and contrary to the faid Laws, usages and customs, and in breach of the conditions of the original grants under which the faid Seigniories are held, refufed to grant unto inhabitants of the faid Province, lots of Land in the faid Seigniories, for fettlement, and have retained large tracts of wafte and unfettled Lands in their own hands with the intention of felling the fame, and receiving for the faid lots of Land large fums of money, as the prices of the fame. over and above the faid rents and fervices; whereby the fettlement of this Province is greatly retarded. And whereas previous to the year one thousand seven hundred and fifty nine, it was provided in and by a certain decree or Arrêt of His Moft Chriftian Majefty, the King of France, relating to Lands in New France, or Canada, granted in Seigniories, and remaining wafte and unconceded by the Seigniors owning the fame, bearing date at Marly, the fixth day of July, one thousand feven hundred and eleven, that whenfoever any Seigniors refused or made default to grant to inhabitants of the faid Province, the lots of Land within the faid Seigniories by them demanded for fettlement, fubject to the faid rents and fervices and without any other pecuniary demand whatfoever, on the part of them the faid proprietors of Seigniories from them the faid inhabitants, it was lawful for the faid inhabitants to require Lands of them, the faid Seigniors, by fummons, and in cafe of refufal, to refort to the Governor and Lieutenant General, and the Intendant of this Province, who were authorized and required to grant to the faid inhabitants the Lands by them fo demanded in the faid Seigniories, fubject to the fame Rents and fervices as the other Lands in the faid Seigniories were fubject to and charged with; which rents and fervices fhould be paid and rendered to the Receiver General of His Majefty's Domain in the Town of Quebec, the proprietors of the taid Seigniories not having at any time thereafter any right, claim, or preten-

Ιi

fion thereto, in any manner however : and whereas it is expedient and juft, that the powers heretofore exercifed as above mentioned by the Governor and Lieutenant General, and Intendan t of New France or Canada, should now be vested in His Majesty's Courts of King's Bench for the feveral Diffricts in this Province : Be it therefore enacted by the King's Most Excellent Majefty, by and with the advice and confent of the Legiflative Council and Affembly of the Province of Lower-Canada, conftituted and affembled by virtue of and under the authority of an Act palfed in the Parliament of Great Britain, intituled, " An Act to repeal certain parts of an Act paffed in the fourteenth year of His Majefty's Reign, intituled, " An Act for making more effectual provision for the Government of the Province of Quebec in North America," " and to make further provision for the Government of the faid Province"; and it is hereby enacted by the authority of the fame; that from and after the paffing of this Act, all and fingular the Jurifdiction, powers and authorities given and granted to the Governor and Lieutenant General, and the Intendant of New France or Canada, by the aforefaid decree or Arrêt of His Moft Chriftian Majefty, the King of France, relating to Lands in New France or Canada, aforefaid, granted in Seigniory and remaining waite and unconceded by the Seigniors owning the fame, bearing date at Marly, the fixth day of July one thousand feven hundred and eleven, shall and may be held and exercised by the feveral Courts of King's Bench in this Province, within the feveral and refpective Diffricts in which the faid Courts feverally hold pleas and Jurifdiction, any Law, ulage, or Cuftom, to the contrary in any wife notwithftanding.

And whereas according to the old forms of proceeding followed in the Courts of Justice of this Country before the Conquest, it was lawful for every Seignior, being proprietor of a Fief and Seigniory to demand in and by the fame declaration, and to obtain the reunion to the Domain of fuch Fief and Seigniory, of fuch Lands or lots conceded en roture, whereof the reunion to the Domain might be demanded according to Law, and of which fuch feignior thought proper to demand the reunion to the faid Domain, in and by the fame declaration, although fuch Lands or lots fhould have been granted to feveral perfons, or fhould have been held by feveral Landholders; and whereas doubts exift whether under the Laws at prefent in force in this Province, this be ftill permitted; and in order to facilitate the re-union of fuch Lands or lots to the Domain, and to render fuch re-union lefs expensive to the Seigniors and Tenants or Landholders :- Be it therefore / further enacted by the authority aforefaid, that it shall and may

be lawful to and for each and every Seignior being a proprietor of any Fief or Seigniory in this Province, to fummon and fue in one and the fame fuit, before any Court or Courts within this Province of competent Jurifdiction, any number which he may/ think fit, of the perfons holding Lands within the faid frief or Seigniory, upon the condition of fettling the fame, and who have failed to comply with the faid condition, and to demand in and by ' fuch fuit, the re-union to the Domain of fuch Firf and Seigniory within fuch reafonable delay as shall be fixed by the Court, of each and every of the lots of Land, with respect to which such condition or conditions shall not have been performed :- And it shall be lawful for the faid Court or Courts to proceed and give fuch judgment in the fuit, as to right and justice it shall appertain, upon and in refpect to the re-union of each and every of fuch lots of Land to the Domain of the *Fief* or Seigniory in which the fame may be fituate and comprehended.

And be it further enacted by the authority aforefaid, that fuch Writ of fummons and the declaration thereunto annexed, fhall be ferved upon each of the Grantees or Tenants of Lands or lots, of which the re-union to the Domain, fhall in and by fuch declaration be demanded, by leaving a copy duly certified, of fuch Writ of Summons and of the declaration thereunto annexed, to each of them feverally, or at the domicile of each of them, within the limits of the Parish and *Fief* and Seigniory in which fuch Lands or lots fhall be fituated, or in cafe fuch Grantees or Tenants, fhall not have or fhall not have had any known domicile within the limits of fuch Parish and *Fief* and Seigniory, by affixing fuch copy, duly certified at the principal outer door, or near the principal outer door of the Church of fuch Parish, and if there be no Church, then at the most confpicuous fpot of fuch Lands or lots.

Provided always, and be it further enacted by the authority aforefaid, that nothing in this Act contained, fhall extend or be confirmed to extend to any perfon or perfons refiding within the faid Seigniory, and occupying and living upon any other Land, lot, or building lot within the fame Seigniory, or at a diffance not fhorter than five leagues from the Land, lot, or building lot, or from the Lands, lots, or building lots, whereof the re-union is fo demanded as aforefaid.

And be it further enacted by the authority aforefaid, that nothing in this Act contained, fhall in any wife affect or prejudice the rights of His Majesty His Heirs and Successfors, or of any perfon or perfons, body or bodies, politic or corporate, except such as are herein mentioned and intended to be affected. And be it further enacted by the authority aforefaid, that this Act fhall be and remain in force until the first day of May, one thousand eight hundred and twenty feven, and no longer.

7

AN ACT for the relief of the Subject in more effectually enforcing the Royal Instructions of His late Most Gracious Majesty, relating to the expence and fees to be allowed upon Grants of the waste Lands of the Crown in this Province, and to punish Persons offending against the faid Royal Instructions.

Moft Gracious Sovereign,

Whereas your Majefty's Royal Father, our late Sovereign Lord King George the Third of blefsed and Glorious Memory, by his Royal Inftructions to His Excellency Robert Prescott, Efquire, Lieutenant General of His Majefty's Forces, Captain General and Governor in Chief of Lower-Canada, bearing date at Saint James, the fifteenth day of August one thousand feven hundred and ninety feven, did declare it to be His Majefty's Royal will and pleafure, that the l'ownfhips therein mentioned, and the refpective allotments within the fame, together with the lands to be referved as therein-aforefaid, fhould be run and laid out by His Majefty's Surveyor-General of Lands for this Province, or fome skilful perfon authorized by him for that purpofe; which Surveys, together with the Warrants and Grants for the refpective. allotments, fhould be made out for and delivered to the feveral Grantees, on payment of fuch Fees as should from time to time, be eftablished by His Majesty under his Signet and Sign Manual, or by His Majefty's Order in that behalf, signified by one of His Majesty's principal Secretaries of State. And whereas divers Officers and Ministers of His Majesty's Government of this Province, have prefumed and ftill do prefume, to exact and receive of and from all applicants for, and Grantees, of Parts and parcels of the Wafte Lands of the Crown, divers large Sums of money, under the name of fees and under colour and pretext of the application for a Grant made of fuch Wafte Lands of the Crown, although the faid pretended Fees were not established either by our faid late Sovereign Lord the King, or by your Majefty, nor in the manner expressed in the faid Royal Instructions, whereby divers faithful Subjects and meritorious Servants of your Majefty, who served as Officers and Privates in the Embodied Militia of this Province during the late War between the United Kingdom of Great Britain and Ireland and the United States of America, and by reason of fuch Service are entitled to grants of certain quantities of the Wafte Lands of the Crown, pursuant to your Majefty's bountiful and Royal Commands in that behalf, as well-

as many Emigrants from your Majesty,s United Kingdom of Great Britain and Ireland, and others the faithful Subjects of your Majesty have been, are, and in time to come may be, deterred and prevented from applying for and obtaining Grants of the Wafte Lands of Your Majesty in this Province, and deprived of your Majesty's Royal bounty in this behalf; and whereby alfo the fettlement and improvement of this Province has been, is, and hereafter may be, materially retarded to the common grievance of all your Majesty's liege Subjects inhabiting the fame; for remedy whereof, may it therefore pleafe your Majesty, that it may be enacted, and be it enacted by the Kings Moft Excellent Majefty by and with the advice and confent of the Legislative Council & Affembly of the Province of Lower-Canada, conftituted and asfembled by virtue of and under the authority of an Act pafsed in the Parliament of Great Britain, intitled " An Act to repeal certain parts of an A& passed in the fourteenth year of His Majesty's Reign, intitled, " An Act for making more effectual provision for the Government of the Province of Quebec in North America; and to make further provision for the Government of the faid Province," and it is hereby enacted by the authority of the fame, that and from and after the paffing of this Act, no public officers whole duty doth in any way concern the granting of fuch Crown Lands, shall directly or indirectly demand, receive or take any fee, profit or advantage, whatfoever, upon or in respect of any petition or petitions for a grant or grants of a part or of parts of the faid Wafte Lands, or upon or in respect of any proceeding or proceedings had upon fuch petition or petitions, or upon or in respect of any Survey or Surveys, Warrant or Warrants of Survey, of the faid Wafte Lands, or upon or in respect of the Patent or Patents to be issued for the granting of the fame, fave and except fuch fees as have been or shall be from time to time eftablifhed by His Majefty under His Signet and Sign Manual, or by His Majesty's Instructions, fignified by one of the Principal Secretaries of State, or by an Act or Acts of the Legislature of this Province.

And be it further enacted by the authority aforefaid, that if any Perfons or Perfons whatfoever, in any manner or way concerned in the granting of fuch lands as aforefaid, fhall unlawfully demand, receive or take any fuch fee, or advantage as aforefaid, contrary to the true intent and meaning of this Act, every fuch perfon fhall forfeit the fum of one hundred pounds Current money of this Province, for the first offence; two hundred pounds Current money aforefaid for the fecond; and five hundred pounds Current money aforefaid and three months impriforment for ev ry fublequent offence, which faid penalties shall be recovered and applied in the manner hereinafter mentioned.

And be it further enacted by the authority aforefaid, that all pecuniary penalties which shall be incurred under this Act, shall be recovered, together with Cofts of Suit, in any of His Majesty's Courts of Record in this Province, by action of debt, bill, plaint or information.

And be it further enacted by the Authority aforefaid, that a moiety of fuch pecuniary penalties shall be paid to the Receiver General of the Province, and applied to the use of His Majesty's Government therein, to be accounted for by him to His Majesty, his Heirs and Successfors, through the Lords Commissioners of His Majesty's Treasury for the time being, in such manner and form as His Majesty, his Heirs, and Successfors shall direct, and the other moiety to the person or persons who shall such for the fame.

Provided always and be it further enacted by the Authority aforefaid, that no Suit or Action shall be brought or commenced against any perfon or perfons, for any penalty by this Act imposed, unless the fame be brought or commenced within three years after the offence or offences respectively committed.

ł
