

AN INVITATION

TO those contemplating a visit to Ottawa Fair, we extend a cordial invitation to make our big new Departmental Store, your headquarters while in town.

We will gladly take care of your wraps and luggage and thus free you of burdensome worries while enjoying the visit.

P.S.—Remember our policy: "More for the same money or the same for less money"

**A. A. FOURNIER
LIMITED.**

159-161-163 Bank St. Cor. Laurier Ave.
OTTAWA, ONT.

Pianos

We sell both Bell and Dominion Pianos

Organs

For those who prefer an Organ we recommend a Bell or Dominion.

Phonographs

If you haven't heard the Brunswick, do so before you buy---It's O.K.

Farms We have several good farms in the vicinity of Athens for sale and we consider the price is very reasonable—If you want a farm we can save you time and money.

Boys School Suit Sale

Our School Suits have unusual merit. They are made by reliable makers. Every fabric is chosen for appearance and durability.

Boys' clothes are high and very scarce this year but we have quite a few odd sizes left over from last year, and we put them on sale at less than to-day's wholesale prices.

We have a good line of Boys' Odd Trousers, Shirts, Sweaters, Stockings, Caps, etc., and now is the time to get the boy ready for school while our Special School Suit Sale is on.

FARMERS—Do you want to sell a horse or buy one? Do you want to buy or sell a cow? Use the bulletin service in the office of the Merchants Bank of Canada in Athens. We will help you make your purchases and sales.—Ask for the manager.

ICE CREAM, Fresh Fruits and Confectionary at Maud Addison's

Hear the New Victor Records while you are enjoying a dish of Ice Cream at E. C. Tribute's

WANTED—Some clean cotton rags for cleaning machinery. Apply at Reporter Office.

LOST—Lady's raincoat, light color, on Thursday, Aug. 26, in Athens or on road to Elaida. Notify Mrs. John Mackie, Elaida.

Mrs. S. Frederick Newton will receive on Wednesday afternoon, Sept. 15th from four to six o'clock at "The Parsonage" Afterwards on fourth Thursday.

Mrs. B. H. Brown, Mrs. C. C. Slack, and Mrs. S. F. Newton were attending the County Convention of W.T.C.U. of Leeds and Frontenac at Gananoque on Tuesday and Wednesday of this week. Rev. W. T. G. Brown of Kingston was the special convention speaker. The Athens delegation were proud to bring home with them the County President, Mrs. B. H. Brown having been appointed to that office. Mrs. Newton was also appointed as delegate from the Counties to the Provincial Convention.

Mr. Alex Thomson, Ottawa spent the week-end with his parents here

We are glad to know that Mr. J. P. Lamb is improving from his recent illness.

Miss S. Dunham has returned to her home in Phillipville after spending a week with her cousins Mr and Mrs Ransom Brown and other relatives in Athens and vicinity.

Mrs. C. B. Wiltse has returned from Montreal and is spending a short at the home of her brother Mr. Ransom Brown and visiting other relatives and acquaintances before leaving to meet her son Ford and family in St. Thomas.

Miss Mary Howarth attended the W. C. T. U. Convention at Gananoque, as delegate from the L T L of Elaida this week

Mr and Mrs Fred Latham have been visiting at the home of Mr M Brown

Mrs Ettie Eaton of Brockville spent the week-end at her home here

Mrs John Dack spent Labor Day with her sister Mrs Alf Scott.

Miss Violet Robeson has accepted the principalship of Lyn Public School.

Mrs V. O. Boyle, A. C. A. M., Voice Specialist and Teacher of Pianoforte, and Elocution, formerly of the Conservatory of Music, Montreal, will open her studio at the Rectory, Athens, on Tuesday, Sept 14. Particulars by mail or phone. Prospectus on application

The July number of the Canadian Medical Monthly contains an article by Beaumont S. Cornell, M.B. (Tor.) on "A Chemical Study of Chronic Nephritis."

Miss Vera Armstrong and Miss Georgia Brown, of Lyn, were recent visitors at the home of Mr. and Mrs. Walt on Sheffield.

Mrs. J. W. Grier, of Wellington, is visiting the Rev. and Mrs. V. O. Boyle.

Miss Dorothy Boyle, Port Colborne, sister of Rev. V. O. Boyle, is spending a few weeks vacation at the rectory.

Miss Ethel Clark, Montreal, and Mr. and Mrs. Thomas Reekie, Chalk River, are guests of Mrs. V. O. Boyle at the rectory.

Mr. and Mrs. Walton Sheffield and Mr. and Mrs. Leslie Latimer returned on Sunday after spending part of last week at Ogdensburg Fair and with friends in Watertown.

Mr. and Mrs. Wm. Ball, Brockville, spent a few days last week as guests of Mr. and Mrs. W. C. Town, Henry street.

Mrs. P. P. Slack, Hamilton, Ont., is renewing old acquaintances in town and is a guest at the home of Mr. C. C. Slack.

Mrs. Fred. Cobey and four daughters from Alexandria Bay were recent visitors at the home of Mrs. John Cobey, Elgin street.

Miss Clio Leeder and friend from Mallorytown were recent visitors at the home of her grandmother, Mrs. John Cobey.

Mrs. John Cobey has returned from a visit with her daughter, Mrs. Jos. Leeder, Mallorytown.

Mr. and Mrs. H. Redford are spending this week in Toronto as guests of his brothers there.

Mr. Hilliard Brown, of the Merchants Bank staff, Brampton, was a visitor at the home of his parents over the holiday.

Mr. Wallace Hollingsworth, Smiths Falls, was a guest at the home of his parents over the week-end.

Mr. Eldon Wiltse, St. Thomas, was a visitor with friends over the holiday. Mr. Wiltse motored down on his motorcycle.

FOR SALE OR RENT—Mrs. J. A. Johnston, Main St., will rent her residence either furnished or unfurnished. Possession Oct. 1st.

Mr. and Mrs. Wm. Fairman, of Gananoque, are visitors of Mr. and Mrs. Wm. Towriss at their Charleston Lake home.

Miss Thelma Olds, of Forfar, a former student of our high school, has returned home after a two weeks' visit with her friends, Miss Edith Mackie and Miss Myrtle Cross.

Mrs. Harry Stevens and sons, Irwin and Howard, were recent visitors with relatives in Smiths Falls.

Mrs. Frank Foley was a recent visitor at Deseronto, the eldest of her sons, George and Maurice Foley.

At the morning service of the Methodist church Miss Vere Topping took the solo part very creditably in one of the choir numbers.

Rev. Dr. Giles occupied the pulpit in the Methodist church on Sunday evening and delivered a very able sermon to a well filled church.

The council of the Rear of Yonge and Escott met on Saturday evening last and transacted current business.

Athens School Fair and concert at night on Saturday, Sept. 18, 1920.

Card of Thanks

Mr. A. Donaldson,
District Manager Imperial Life Assurance Co.

Dear Sir,—I desire to thank you for your Company's cheque covering settlement on my 20-year policy, which amounts to the return of all the return of all the money I paid in and in addition the dividends which were beyond my expectation. The settlement was very satisfactory indeed.

Yours truly,

B. DILLON.

Brockville, Sept. 1, 1920.

MANY MIRACLES AT TEMPLEMORE

Bleeding Statures Make Town Rival Lourdes.

Pilgrims Flock There in Thousands.

Templemore, County Tipperary, Ireland, Aug. 17.—Tens of thousands of the faithful are still flocking to this small Tipperary town to gain religious and physical balm from the wonder-working statues belonging to James Walsh, the former Cistercian novice, who has conferred upon Templemore a fame that is exceeded only by Lourdes.

The statues have been placed in a flower-bedded yard on the premises of Timothy Dwan, Walsh's uncle. The yard overlooks the market place and Battery Park. Here thousands of the afflicted gather, bearing crucifixes and rosaries.

While waiting for admission to the yard by twos and threes, the whole congregation, as though moved by a single devout impulse, periodically stalks silently to its knees, with twitching lips, offers prayer to the Virgin Mary, imploring her vouchsafe a continuance of the miraculous healing.

Moving through the throng are men and women who claim to have been mysteriously cured by the saint's intervention. Dan Egan, the local harnessmaker, is striding about like a fit, sound man, after being crippled for five years with sciatic rheumatism.

A milliner, almost crazed by nervous disorders, was cured after a magic crucifix was laid on her brow. The most wonderful case is that of Martin Monahan. His story has gone throughout Ireland, and is bringing people here in every conceivable kind of conveyances from Fords to the backs of asses. Monahan was discharged from the army two years ago, suffering from a broken left knee.

"When I heard of the miracles," he tells the story, "I limped across the square to the house. Walsh took me up the stairs and lifted me up to the crucifix. It was bleeding. He rubbed my bare knee against it. I was in great pain. He prayed over me and ordered me to pray. We left the room together. Then before I left the house I felt a sudden shock. All pain left me. I ran quickly back to my home. I was not lame. I have not been lame since."

Edward Gleeson, a young soldier who was blinded, was admitted Thursday. He was seated at a table. A woman held a crucifix over his eyes. The others in the room sank to their knees and prayed. After a few moments of prayer Gleeson began to see dimly. He did not recover the normal use of his eyes.

A peasant woman walked fifty miles with an imbecile son 13 years old. She touched his head to the statue of the Virgin. Mrs. Dwan offered a prayer. The couple went away. On their way home they met other pilgrims coming in. To these the mother related that her son's mind was clearing.

Walsh, whose visits started the pilgrimages, is a frail youth. He has convincing sincerity and seems one manifestly destined to a religious vocation.

"As I lay in bed one night," he tells his story, "I saw a desizing object in the darkness. It was hatched like a communion particle. The letters I.H.S. stood out distinctly in the centre."

Thereafter, he related, the Virgin frequently appeared to him, sometimes at his house and sometimes beside the road.

CONSTIPATED CHILDREN

Children who suffer from constipation, indigestion or any of the other ailments due to a clogged condition of the bowels will find prompt relief through the use of Baby's Own Tablets. The Tablets are a mild but thorough laxative which can always be depended upon to regulate the bowels and sweeten the stomach. They are absolutely safe and are sold under a guarantee to be entirely free from opiates or other injurious drugs. Concerning them Mrs. Thomas A. Boutot, Lake Baker, N.B., writes: "I am pleased to state that Baby's Own Tablets were of great help to me when my baby was suffering from constipation." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

100,000 FROM U. S.

Coming to Canada Next Year, Say U. S. Experts.

Winnipeg, Man., Aug. 17.—One hundred thousand immigrants to Canada will come from the United States next year.

That was the view expressed generally by members of a party of 40 American bankers, business men and farmers who, Friday night, completed a 3,000-mile trip through the Prairie Provinces of Western Canada. The party, which left Winnipeg on Aug. 18, took the first of a series of immigration prospecting trips to be conducted by the Industrial and Resources Department of the Canadian National Railways. Heavy purchases of prairie lands were made by several of the visitors.

Mother Graves' worm exterminator will drive worms from the system without injury to the child, because its action, while fully effective, is mild.

ECZEMA IN RASH CUTICURA HEALS

Very Itchy and Burned. Troubled Six Weeks.

"Our daughter's face came out in a rash that we were told was eczema. Her cheeks got sore and she rubbed causing loss of sleep. The itching was very itchy and burned so that I had to tie gloves on her hands to keep her from scratching."

"This trouble lasted about six weeks before I used Cuticura. I used one large box of Cuticura Ointment with two cakes of Cuticura Soap when she was healed." (Signed) Mrs. H. Stares, Elizabeth Rd., Galt, Ont. Cuticura Soap, Ointment and Talcum are ideal for daily toilet uses.

Soap 25c, Ointment 25c and 50c. Sold throughout the Dominion, Canadian Depot: Lyons, Limited, 55, Post St. W. Cuticura Soap shaves without tugging.

14.3 BUSHELS TO THE ACRE

Official Estimate of Saskatchewan Crops.

Threshing Starts in Several Districts.

Regina, Sask., Aug. 17.—Cutting is practically completed in Saskatchewan, according to reports received by the Bureau of Statistics of the Provincial Department of Agriculture. Threshing has commenced in several districts. Frost does not appear to have damaged reports indicate that the grain is of the crops to any material extent. All reports indicate that the grain is of good grade. Rain has been general over the province during the week, and has somewhat retarded harvesting operations, but with warm weather and wind will do no damage except in fields which have not been stocked. From reports received from three hundred correspondents, the bureau makes a preliminary estimate of 14.3 bushels to the acre.

LITTLE OR NO FROST
Edmonton, Aug. 17.—Little or no frost has occurred in the Edmonton district. The lowest temperature recorded at the local meteorological office was 37°.

HARVESTING DELAYED
Moose Jaw, Sask., Aug. 17.—Rain has fallen almost continuously over the week-end and greatly delayed harvesting operations. There has been no frost in the district.

STEADY DRIZZLING RAIN
Saskatoon, Aug. 17.—The lowest temperature during the past twenty-four hours has been 55°. A steady drizzling rain has completely stopped harvesting operations.

BATHER UNUSUALLY WARM
Prince Albert, Aug. 17.—The weather here is unusually warm for this season with no sign of frost. Almost an inch of rain fell here since Saturday at noon.

GARDEN TRUCK NIPPED
Calgary, Aug. 17.—Frost nipped some of the tender garden truck in Calgary on Saturday night, but so far as is known grain was not damaged.

PASTOR HAZED

By Bathers Angry Over Criticisms.

Trenton, N.J., Aug. 17.—Rev. Frederick Koptman, pastor of the Methodist Church at Titusville, N.H., who has been endeavoring to "drive the devil from the hearts of the immodest bathers at Washington Crossing," was greeted yesterday with a shower of over-ripe tomatoes when he appeared at the resort to lecture them on the immodesty of their attire.

The pastor's automobile was wrecked and he was punched and mauled, and an attempt was made to duck him in the Delaware River. He finally escaped when a constable held the mob back with a drawn revolver. Later the pastor was found nursing a bruise on his face. His clothing was covered with tomato seeds and juice, and his face streamed with perspiration. He was still full of fight, however, and determined, he said, to appear at the hearing before the township board next Tuesday to present his evidence of immorality among the summer colonists.

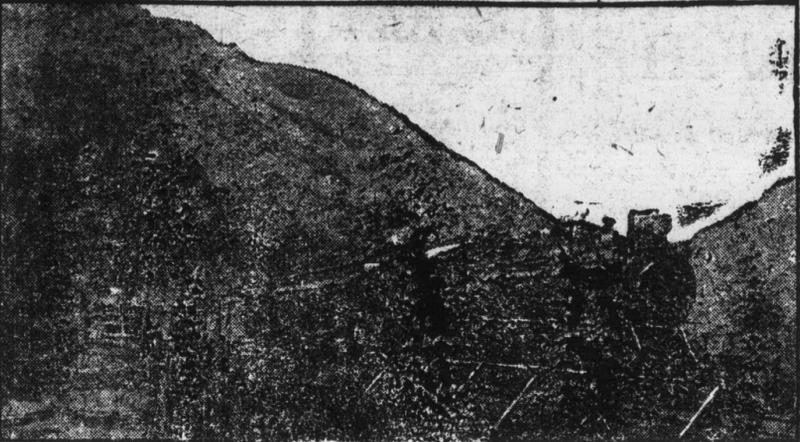

Like a Grip of the Throat. For a disease that is not classed as fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in unceasing dread of its return. Dr. J. D. Kellogg's Asthma Remedy is a wonderful curative agent. It immediately relieves the restricted air passages as thousands can testify. It is sold by dealers everywhere.

HOUSE FOR FOCH.

Paris, Aug. 17.—The French Government has decided to allot Marshal Foch an official home worthy of his position. The magnificent building of grey stone at 133 Rue de Grenelle, formerly part of the French War Office, is being made ready for France's greatest soldier, and he will take up his residence, rent free, some time in September.

The decision has saved the Marshal from an uncomfortable predicament, caused by his lease on his present flat running out and his difficulty in finding one elsewhere.

Kootenay and Its Mines

C. P. R. Train at Kootenay Landing Connecting With the Steamer Macoskin, From Nelson.

The trade travel and exploration of the Kootenay are a romance of progress. The day of the fur trader gave way to that of the placer-miner. In passing, the placer-miner left behind his trail of rocks, and sluice, shaft and drill, a still deeper mark on the country and its future. He stayed long enough to make history. The Todd Mines, near Nelson, discovered in 1882, saw a great stampede. The discovery of the Silver King Mine, about 1887 by Hall Brothers, and its development, was the beginning of Nelson, and following the arrival of the miners, a townsite was laid out. The Granite Peer Mine, developed as a gold mine, was first worked by Lincoln Development in 1889. He built the first stamp mill and the whole was in operation about 25 years and produced an immense amount of gold. The "Molly Gibson," twelve miles north of Nelson, a silver lead mine was developed on a large scale and is owned and operated by a Trust enterprise. The "Ainsworth," on the main Kootenay Lake, 28 miles north of Nelson, is one of the first developed mines on the country and its future. He stayed long enough to make history. The Todd Mines, near Nelson, discovered in 1882, saw a great stampede. The discovery of the Silver King Mine, about 1887 by Hall Brothers, and its development, was the beginning of Nelson, and following the arrival of the miners, a townsite was laid out. The Granite Peer Mine, developed as a gold mine, was first worked by Lincoln Development in 1889. He built the first stamp mill and the whole was in operation about 25 years and produced an immense amount of gold. The "Molly Gibson," twelve miles north of Nelson, a silver lead mine was developed on a large scale and is owned and operated by a Trust enterprise. The "Ainsworth," on the main Kootenay Lake, 28 miles north of Nelson, is one of the first developed mines on the country and its future.

GOOD TYPES

THE LOVABLE HUSBAND.

Shaves regularly every day. Does not have a grouch regularly at the breakfast table and another when he comes home at the dinner table.

Keeps his newspaper to read in the train or trolley, not at breakfast.

Never contracts the "peck" habit, but gives his wife a real kiss, now and then!

Pulls her chair out for her before sitting down to a meal, picks up her handkerchief when she drops it, and preserves at least a few others of the courtesies of sweetheart days.

Remembers the wedding day anniversary. Plans a trip or a frolic for her, now and then.

Notifies a new hat or a becoming dress, and occasionally hands out a superlative compliment!

THE LOVABLE WIFE.

Is never seen in hair curlers. Never wears a kimono downstairs.

Is not only neatly, but becomingly dressed, within the home as well as abroad, at work as well as play. And becomingly neat does not mean expensive, either!

Does not tell tales on the children. Does not make the dinner hour a servant troubles of the day, but rather a time for chatting of outside interests.

The woman who talks home, which is really her "shop," is tiresome.

Never appears in the same dress for the evening meal that she wore in the morning.

Always rests awhile, just before hubby's home-coming, so as not to be too tired and nervous to be pleasant.

Always sees that the children are fresh and clean to greet their father, bouquet of flowers in the home.

Shows such pleasure when hubby brings her candy or any other little greeting, that he is very likely to repeat the action, and so form a good hubby habit!

Does not ask suspicious questions about the stenographer, or other who hen that hubby must necessarily come in contact with, but simply takes it for granted that she, wife, reigns supreme.

THE WELL BRED CHILD.

To rise if an older person comes into the room.

Not to interrupt when others are talking.

When addressing anyone, or answering a question, always use the name of the person being spoken to—for instance, "Yes, Mrs. Brown," or "No, thank you, Mary."

APPLE AND PEAR BLIGHT

Blight of apple and pear is a specific and contagious disease. Some varieties of pears are more susceptible to this disease than are others. There are three places on the trees where blight commonly occurs, the blossoms, twigs and larger limbs or trunk. The names blossom-blight, twig-blight and body-blight and canker are commonly used, but it should be remembered that these are different manifestations of the same disease. The bacteria which cause blight grow as parasites in the inner bark tissue and kill it. The individual bacteria are too small to be seen by the unaided eye. Nevertheless they are present by millions. They live over the winter at the edge of the cankers on the limbs and trunk. When warm weather comes in the spring they multiply to the extent that they ooze out in small drops near the edge of the canker. It is at this point that the new season's destruction begins.

Bees and other insects are attracted by the ooze, and after their bodies have become smeared with it they carry the bacteria from place to place. In this way bees deposit bacteria in the blossoms that they visit, and a few days later the blossoms wilt and turn black. In a similar manner other insects in their roaming, inoculate a few bacteria into the bark here and there and twig blight results. All this could be avoided by the grower of apples and pears if the cankers from which the ooze comes were eradicated during the winter. The cankers are irregular and slightly sunken areas of bark usually separated from healthy bark by a definite crack. By cutting into the canker it will be found that the bark is dry and brown. To remove the canker make a spindle-shaped cut with a sharp pointed knife, always keeping the outline of the cut at least a half-inch outside the edge of the canker. After this outline cut has been made just deep enough to cut through to the wood, the bark is peeled off. Adhering to the wood scraped. It is advisable to wash the wound with corrosive sublimate solution (one tablet to a pint of water), which should be carried in a glass bottle and applied with a sponge. Although canker eradication is very important there are other sources of infection in the spring which need attention. Badly infected trees should be cut down and burned. Wild crab apple trees and hawthorns are often blighted and they should be removed from the vicinity of the orchard. Care should be taken also that any twigs which were blighted the past season should be removed. They are evident during the winter by the fact that the dead leaves cling to them. All suckers or water sprouts should be removed several times during the season. The operations outlined above must be carried out thoroughly if benefit is to be gained from them. They all serve to reduce the chances of infection the next spring if they are finished before any warm weather occurs. During the spring and early summer the grower should make careful inspections two or three times a week, walking down each row. All blighted blossoms should be removed by breaking off the spur. Blighted twigs should be broken or cut off several inches below the evident blackening. If cut with a tool the end of the twig should be swabbed with corrosive sublimate. All these control measures minimum.—W. H. Rankin, Plant Pathologist.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately perforate the wall, because these worms are of the hook variety that cling to and feed upon interior surfaces. Miller's Worm Powders will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

"YOU"

(By William Telford Duncan, New York.)

You, who wrote the Hymn of Hate, Laughed at Lullabies' fate, Left a world disconsolate, Now come whining at our gate.

You, who stripped those bodies nude, Maiden, mother with her brood; Spent your piglike passion lewd, Say your children cry for food.

You, who on our grief intrude, Praising Christlike attitude; He who died on Calvary road, Never conceived of beasts so crude.

You, whose hearts are black as soot, You, who sent your women loot, Girded orchard, vine and root, Think you we forget you, brute?

You, who wrecked each vane and shrine, Flushed with frenzy, drunk with wine, Ask us now to cherish thine— Never by the gods, you swine.

You, who poisoned spring and well, Robbed each beltry chime and bell; Damn you, we remember well, How you made fair France a hell.

You, whose crimes on every sea, Blackened seaman chivalry; May the sailor paleled be, Who will heed your drowning plea.

You, who boasted of "the day" When in battles fierce away, You would British sailors slay, Then at Jutland slunk away.

You, we know you, one and all, Prince and peasant, cot and hall; You, who would the world intrail, Hold us oxen in your stall?

You with Emperor omniscient, You that were supreme efficient, Then in bungling proved proficient, Claim your store of foods deficient.

You, when e'er you sob and sigh, Plead your children's hungry cry; Think of those whose bodies lie, Neath the ocean and the sky.

You, whose propaganda lied, You, who peasant crucified; Though you never broke their tie, Think you that in vain they died?

Now you come with specious lies, Urging, say your babies cry; While your crooked mind asks why, We with loathing thus reply:

You never shall forget While the sun shall rise and set; How you Huns are even yet Hoping to make good your threat.

No, by all the hopes and fears That were crowded in those years; By our blasted youths' careers, Shall we heed your reptile tears.

The Foe of Indigestion.—Indigestion is a common ailment and few are free from it. It is a most distressing complaint and often the suffering attendant it is most severe. The very best remedy is Parmelee's Vegetable Pills taken according to directions. They rectify the irregular action of the stomach and restore health action. For many years they have been a standard remedy for dyspepsia and indigestion and are highly esteemed for their qualities.

"Is your husband having any luck with his garden?" "Oh, yes. He got a cucumber and collected \$200 health insurance."—Boston Transcript.

HIT A WHALE.

Liner Captain Puzzled Over the Accident.

New York, Aug. 17.—You could generally tell when you sunk a submarine by the quantities of oil that rose to the surface immediately after, but skipper Herbert of the St. Paul, didn't see any whale oil on the Atlantic last Tuesday, so he doesn't know, and maybe never will, whether or not he sank the whale.

Last Tuesday the St. Paul, of the American Line, was 800 miles out from Ireland, headed for New York. Suddenly there was a bump. Captain Candy, the crew and 800 passengers slid forward three feet simultaneously. The skipper sent word below to find out about the bump. Word came from below that there was nothing down there that could cause any bumps. The propeller was going around as per schedule.

Then Captain Candy saw a large black object about the vessel. "It can't be the Azores," said the skipper. "We're on the northern route." Then the whale—for such it was—jumped clean out of the water, much to the consternation of all the passengers. It flopped into the water again, heaved a huge sigh, spouted two large streams of water and dived. Captain Candy doesn't know whether the critter was in its death throes or just wanted to play.

The Oil for the Athlete.—In rubbing down, the athlete can find nothing finer than Dr. Thomas' Electric Oil. It renders the muscles and sinews pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years have been using it can testify to its value as a lubricant.

Despatches from Constantinople to Paris report the massacre of four hundred Armenians by Kurds in Anatolia. The Kurds shot the men, but the women and children were locked in a church and burned to death, the despatch says.

Martial law has been declared in Canton in a move of the southwestern military Government for the overthrow of the Pekin Government according to the Asiatic News Agency.

A JEWEL IN THE ROUGH

As the afternoon closed in, her cough seemed to grow more and more troublesome; the pain in her chest, too, had never been so bad; she had to keep her hand there all the time as she labored round the room, putting everything to rights, making sure that the cabin was neat and tidy against Will's return. At last she sat down in the circle of hot light round the fire, and little Tim crawled into her lap. She put her arms around him and held him absently. She was thinking over Katrina's words. "The spring? were they really near it?" "So near," she had said, "it was almost here." Her eyes looking upward to the darkening windows caught the old and smoke-bred almanac pinned up to the wall beside it. She set the child down, and getting up, walked slowly over to it and ran one trembling finger down the dates. Each one for December, when they had first hung it up, had a heavy black line against it, where she had scratched it out with eager fingers; only the last days had no mark against them any longer. What did it matter to her when the spring came? The chances for her would have come to an end before that. But now a fresh gleam of hope seemed to have entered her heart, and with a feverish movement she drew the old stump of pencil from her pocket and scratched off the unmarked date of that day; they were still far, far from the spring—too far. Oh, to go back in the spring, to escape from this prison of darkness, this country of horror and starvation and misery to be back once more in her home in the oak! Her mind fled away from the dreary interior of the darkening cabin. She stood once more in the rich, grassy meadow with the golden sunlight of an evening summer sky warm around her, the song of the birds in her ears, the soft scent of the meadow-sweet in her nostrils, before her the little narrow path leading to the cottage that seemed to bask sleepily in the yellow glow. She made a step forward with dilated eyes, then the cough seized her, the vision dissolved and fled. Again the cabin with its blackened rafters enclosed her. She turned from the calendar. What was the spring's coming? It might come, but they would not go back. What right had she to think of it? They had made no strike, and had not Will sworn he would never go back without the gold? This accused gold! If they could but have found it as others had! She put her hands to her head to drive away the thoughts, they were familiar and so useless. She had thought them over and over again so often. As she went back to the fire, she noticed one of Will's woolen shirts lying on a chair. Why, that was the one she had meant to wash that morning! How could she have forgotten it! And now perhaps she would not get it done before he returned. Her heart began to beat, her limbs trembled. How weak and queer she felt this afternoon! Still, she would do it somehow. There was hot water on the fire that Katrina had put there. She lifted with an effort the great iron kettle from the fire, and with that in one hand and the shirt in the other, she went into the adjoining sloping-roofed compartment that served as scullery, woodshed, pantry, and wash-house. It was many degrees colder here, and the long iron nails that kept the boards together overhead had sparkling icicles on them that glittered as the fire-light from the inner room touched them, and she could hardly draw her breath. Nevertheless, she walked over to the wash-tub and poured in the water, and set to work with shaking hands. "Had ever shirt seemed so large?" she wondered vaguely, and her thin arms moved slowly, lifting it up and down with difficulty. It seemed getting so dark, too. She should have lighted the candles; it wouldn't look so cheery for Will if he came back to find the cabin dark. But was this only the twilight falling? No, it was in her eyes. She leaned heavily on the edge of the wooden tub, trembling, the floor unsteady beneath her, a strangling suffocation in her throat, a swimming darkness pressed upon her, and then suddenly she knew that in the chill of that dark twilight she was alone with Death. He had come for her at last.

Oh! to have had Will's strong arms round her, a human breast to lay her head down upon, and so die! A nameless terror possessed her, overwhelmed her; she started from the wash tub. There was a sudden cry, "Will! Will!" and she fell forward on the damp flooring, a little eager scarlet stream of blood pouring out from the nerveless lips to stain the soap-suds under the trestle.

The child sitting playing in the ring of the warm fire-light in the adjoining room heard that last cry, and, startled, dropped his toys, looking with round eyes to the blackness beyond the open door. He listened with one tiny finger in his mouth for many minutes, but no further sound came to disturb him from the wash-house, and he went on playing.

An hour passed perhaps before Will set foot in Good Luck Row, and he tramped up it with a sounding pace. There was fire in his eyes, the blood ran hard in all his veins, his rubber boots had elastic springs in their soles. Yet he carried an extra weight with him. There was something in his pocket as it had been red-hot iron when he touched it. As he came to No. 14 and saw the windows dark, he merely hurried his pace, and hardly stayed to lift the door latch, but just burst through the half-opened door and brought his huge, curly frame over the threshold.

"Well, Annie, my girl, we've struck it at last," he shouted at the top of

his voice, "and you shall come home right away. Where are you, Annie? Didn't I say wait a bit for me?"

He had entered by the wash-house, but the darkness was thick, almost palpable, before his face and revealed nothing. He went forward to the open front door, beyond which the burned-down fire gave only a faint red light, and his foot kicked something heavy on the floor. With a curious feeling gripping his heart, he stopped dead short where he stood and fumbled for a match. Then he struck it, and in its sickly glare looked down. "Annie, my dear!" he called in a shaking voice, and bent down, holding the match close to the upturned face. The light played for an instant upon it and went out. "Annie!" he called again, and the word broke in his throat.

A thin wall went up from little Tim in the dusk of the inner room. Where the man stood was silence and darkness. His strike had come too late. His wife was dead.

Half an hour later a man burst into the Pistol Shot. It was between hours, and the bar-tender was just going round lighting the lamps; the place was nearly empty, only a few miners were standing at the end of the counter, talking together. The new customer staggered across the floor as if already under the influence of drink, kicking up the fresh seaweed on the ground; then he reached the counter and demanded drink after drink. He tossed the whiskeys handed to him down his throat, and then retreated to a bench that stood against the wall and sat down staring stupidly in front of him. The little group of men looked at him once or twice curiously, and then one said:

"Why, it's Bill Johnson, who's just made a strike. Come up, boys; let's congratulate him."

The men moved up to the motionless, staring figure, and one of them slapped him on the shoulder.

"Say, Bill, old man, you're in luck, and we'll all drink your health. Got any gold to show us?"

The sitting figure seemed galvanized suddenly out of its stupor. Will raised his head with a jerk, and the men involuntarily drew back from the glare of his bloodshot eyes. He put his hand to his pocket and drew out a small dirty buckskin bag. He dashed it suddenly on the ground with all his force, so that the sawdust flew up in a little cloud.

"Curse the gold!" he said; and he got up and tramped heavily out of the saloon.

CHAPTER IV.

They buried Mrs. Johnson very soon. As one of the neighbors sensibly, if rather crudely, remarked, "Them cabins were too small for them to keep corpses hanging around in them." And so, the second day after her death, in a flood of thin, sweet sunshine they buried her where she had loved the light and the sea, and had longed so wearily for them through so many days.

Katrine and Talbot stood side by side at the open grave. He had been in the town that day and met Katrine on the street, learned from her where she was going, and accompanied her. He knew something of all she had done for the dead woman, and he watched her now with interest and surprise at her composure. Katrine's face was unmoored, and her eyes were dry through it all.

"Another 'last gold has killed,' she said to him as they turned away, and her face looked grave and grey in the flood of the cold sunlight.

Will was not present. He was down at the Pistol Shot. He had been on a big drunk for the past two days, not even returning to his cabin at night, and the body of his wife would have lain unguarded had not Katrina brought her fur bag and slept beside it each night on the deserted beach. Little Tim had been taken in by a neighbor—all the mothers round seeming anxious for the honor after it was known that Will had "made his strike."

They walked in absolute silence for some time up the incline. Talbot was going back to the west gulch, and Katrine said she would walk a little of the way in that direction, too. The afternoon was bright and clear, and the air singularly still—so still that the intense cold was hardly realized. The rays of sunshine struck warmly across the snow-banks piled on each treading. The sky was pale blue, and side of the narrow path they were the points of the straight larches on the summit of the ridges cut darkly into it like the points of lances. There was something in the atmosphere that is called a day in late autumn in England. They were nearing the top of the ridge, and both had their gaze bent on the narrow ascending path before them, when suddenly a tiny ob-

MAGIC BAKING POWDER
Contains no alum

We unhesitatingly recommend Magic Baking Powder as being the best and purest baking powder possible to produce. It possesses elements of food that have to do the building up of brain and nerve matter and is absolutely free from alum or other injurious substitutes.

ject darted into the middle of it and ran up the opposite bank. On the instant Katrina drew one of the pistols from her belt and fired. The little dark form rolled down the bank, dropped back into their path and lay there motionless. It was a fine shot, for the tiny moving thing was fully thirty yards from them and looked hardly the size of a dollar. Talbot glanced at her with silent admiration. He himself never shot except for food or other necessity, and wanton killing rather annoyed him than otherwise, but here the skill and correctness of wrist and eye were so obvious that they compelled him to an involuntary admiration.

"You are a good shot!" he exclaimed, looking at the bright, clear-cut face beside him, warned into its warmest tints by the keen air and the continuous mounting of their steps.

"But not a good woman," she answered, shortly, quickly reading the thoughts that accompanied his words. She did not look at him, but straight ahead.

"You might be both," he said, with a sudden impulse of interest and regret.

Katrine laughed.

"I don't know," she said, lightly. "Good women are not usually good shots. You don't generally find them combined. But, anyway, what have I to do with goodness? I don't need it in my business."

He did not answer, and they walked on in silence till they came up to the little dark lump in the road. It was a small marmot. Katrina glanced at it and passed on. Talbot stopped and picked up the scrap of blood-stained fur.

"What did you do it for?" he asked, curiously.

"Practice, that's all," she answered. "Don't you feel sorry to kill merely for the sake of practice?"

"No, I wouldn't have been sorry if I had wounded it; but it's a good thing to be dead, I think. I wouldn't eat a mouse if I should kill it."

"There was another sense, and then she said, suddenly, "One must keep up one's practice here, going about as good as any other woman in the world on my living as I do. These," and she tapped her pistols, "are my great protection. Only last night a great brute leaped over me and wanted to kiss me—would have done, only he saw I would shoot him if he did."

"Would you shoot a man for kissing you?" replied Talbot in an astonished tone, elevating his eyebrows.

"Yes, why, I'd rather be shot than kissed!" exclaimed the girl, fiercely, with an angry flush on her smooth cheek.

Talbot looked at the contemptuous, curling lips, at the whole beautiful face beside him, and walked on in silence, wondering. Her momentary anger was gone directly, and they were good comrades all the rest of the way.

At the point where she stopped to say good-bye to him, she held out her hand: "Thank you for coming to the

M'neard's Linctum Co., Limited.
Dear Sirs—I had a Bleeding Tumor on my face for a long time and tried a number of remedies without any good results. I was advised to try MINARD'S LINCTUM, and after using several bottles it healed all up and disappeared altogether.

DAVID HENDERSON.
Belleisle Station, Kings Co., N. B. Sept. 17, 1904.

burial with me; it was good of you; and she pressed his hand with a grateful smile.

It was about a fortnight later on, one of those dreary gray afternoons of late winter, nearly dark already, though still early by the clock, and the mercury in the thermometer, had gone out of sight and stayed there. Katrina came tripping along a side street on her way back to the row, warm in her skin coat, and her face all aglow and abloom under her fur cap. She had turned into the Swan and Goose saloon on her way up, had put in half an hour over a game, and won a fat little canvas bag stuffed with gold dust; had thinned it out somewhat in hot drinks across the bar, and now, warmed through with rum, and light-hearted, she was returning with the bag still well lined in her waist-belt.

She had recovered from the great shock of Annie's death. Her nature, though essentially kind, was not of that soft, tender stamp that receives deep and painful impressions from other's sufferings. She would exert herself strenuously for another, as she had done for Annie, but it was not in her nature to sorrow long or deeply for the irretrievable. There was a certain hardness and philosophy in her temperament that her life and

surroundings and all her experience had tended to develop. And in Annie's death there was nothing striking or unusual, and in this corner of the world, so crowded with scenes of suffering, so filled with paths of every form. There were women hoping and waiting, and longing and starving, in every street of the town, she knew; sickness and sorrow and death looked her in the eyes for some poor face at every corner. Annie had been but one poor little unit in the crowd of sufferers, but one example of the misery of the town, the plague-stricken town, the town stricken with a curse—the curse of the greed of gold.

Matters had brightened very much in Dawson lately, a new feeling of hope and fresh life had gone through the town. The weather was less severe, the days were lengthening, the skies were brighter, the sickness had died out, and people went about their work looking more cheerful again; and Katrina, freed from her anxieties and nursing, felt her elastic spirits bound upward in response to the general brightness of the camp.

(To be continued.)

Yieldable Railroad Cars.

A western car manufacturer is building "yieldable extension" railroad cars, which, it is claimed, will greatly lessen the danger to life and limb in railroad accidents. The cars are especially constructed with a framework which is designed to yield and to a certain extent telescope under a severe shock, instead of going to pieces, while remaining rigid under ordinary bumps, such as would be received in every-day use by the coupling of cars or the sudden application of the emergency brakes.

A MOTHER'S TRIALS

Care of Home and Children Often Causes a Breakdown.

The woman at home, deep in household duties and the cares of motherhood, needs occasional help to keep her in good health. The demands upon a mother's health are many and severe. Her own health trials and her children's welfare exact heavy tolls, while hurried meals, broken rest and much indoor living tend to weaken her constitution. No wonder that the woman at home is often indisposed through weakness, headaches, backache and nervousness. Too many women have grown to accept these visitations as a part of the lot of motherhood. But many and varied as her health troubles are, the cause is simple and relief at hand. When well, it is the woman's good blood that keeps her well; when ill she must make her blood rich to renew her health. The nursing mother's Pink Pills are a fair trial. No wonder that the woman at home is often indisposed through weakness, headaches, backache and nervousness. Too many women have grown to accept these visitations as a part of the lot of motherhood. But many and varied as her health troubles are, the cause is simple and relief at hand. When well, it is the woman's good blood that keeps her well; when ill she must make her blood rich to renew her health. The nursing mother's Pink Pills are a fair trial. FOOD OF CHILDREN.

Nearly all of the babies that we were told in youth were wrong are looked upon with favor by Dr. Ganot, the French physician, who is a children's specialist. Children may eat between meals if they are hungry. Candy is good for children. Children should not go to sleep before dark, unless they are really sleepy. Children should not be punished for "sneezing" or "talking back." The old adage, "Children should be seen and not heard," is a mistaken one. These are just a few of the things that Dr. Ganot believes.

"Treat a child as an individual, not as an imbecile," he says. "If a child is hungry and says so, give him something to eat. Whether it is medicine or not. A child grows rapidly and needs a great deal of nutrition. The child himself is the best judge of whether or not he should have something to eat. A child who is given all he wants to eat, when he wants it, never overeats. The child whose food supply is restricted is the one who overeats at the first opportunity, when visiting at a neighbor's house or when his mother's back is turned."

Some food is too rich and is indigestible for a child. If a child is given heartful, muscle and bone producing foods, without too much flavoring or spices, he will not crave rich food. He will be satisfied with what is given to him, if it is fresh and wholesome. A child's palate is to be depended upon. Give him food whenever he asks for it, and give him what he wants.

SMOOTHEST REGULATOR FOR THE BOWELS IS HAMILTON'S PILLS

No Headache, Billiousness, Indigestion or Sour Stomach, Where They Are Used.

A FINE CONSTIPATION CURE!

They Cleanse the Liver and Move the Bowels While You Sleep.

Like a ship in the night, your constipated headache and digestive troubles will disappear after using Dr. Hamilton's Pills.

They cure the worst cases, act quietly at night while you sleep, and give you next morning the freshest, briskest, happiest feeling you have known in many a day.

Hamilton's Pills will cheer up the most despondent sufferer. They will make tired old folks feel like kids at play.

They overcome backache, sideache, liverache and stomachache, and kidney ills.

If they fail to do this, you can have your money refunded. Fair enough, eh?

Don't stay sick or ailing! Use this Grand family remedy at once. It will give you energy, spirits, ambition, appetite, good blood, better nerves—in short good health. You can get all this in a 25c box of Dr. Hamilton's Pills. Sold by all dealers in medicines.

No man is so selfish as to want to keep all his popularity to himself.

APPLE AND PEAR BLIGHT

Blight of apple and pear is a specific and contagious disease. Some varieties of pears are more susceptible to this disease than are others. There are three places on the trees where blight commonly occurs, the blossoms, twigs and larger limbs or trunk. The names blossom-blight, twig-blight and body-blight and canker are commonly used, but it should be remembered that these are different manifestations of the same disease. The bacteria which cause blight grow as parasites in the inner bark tissue and kill it. The individual bacteria are too small to be seen by the unaided eye. Nevertheless they are present by millions. They live over the winter at the edge of the cankers on the limbs and trunk. When warm weather comes in the spring they multiply to the extent that they ooze out in small drops near the edge of the canker. It is at this point that the new season's destruction begins.

Bees and other insects are attracted by the ooze, and after their bodies have become smeared with it they carry the bacteria from place to place. In this way bees deposit bacteria in the blossoms that they visit, and a few days later the blossoms wilt and turn black. In a similar manner other insects in their roaming, inoculate a few bacteria into the bark here and there and twig blight results. All this could be avoided by the grower of apples and pears if the cankers from which the ooze comes were eradicated during the winter. The cankers are irregular and slightly sunken areas of bark usually separated from healthy bark by a definite crack. By cutting into the canker it will be found that the bark is dry and brown. To remove the canker make a spindle-shaped cut with a sharp pointed knife, always keeping the outline of the cut at least a half-moore than any other woman in the world. After this outline cut has been made just deep enough to cut through to the wood, the bark is peeled off. Adhering shreds of bark should be removed and the wood scraped. It is advisable to wash the wound with corrosive sublimate solution (one tablet to a pint of water), which should be carried in a glass bottle and applied with a sponge. Although canker eradication is very important there are other sources of infection in the spring which need attention. Badly infected trees should be cut down and burned. Wild crab apple trees and hawthorns are often blighted and they should be removed from the vicinity of the orchard. Care should be taken also that any twigs which were blighted the past season should be removed. They are evident during the winter by the fact that the dead leaves cling to them. All suckers or water sprouts should be removed several times during the season. The operations outlined above must be carried out thoroughly if benefit is to be gained from them. They all serve to reduce the chances of infection the next spring if they are finished before any warm weather occurs. During the spring and early summer the grower should make careful inspections two or three times a week, walking down each row. All blighted blossoms should be removed by breaking off the spur. Blighted twigs should be broken or cut off several inches below the evident blackening. If cut with a tool the end of the twig should be swabbed with corrosive sublimate. All these control measurements.—W. H. Rankin, Plant Pathologist.

Cure That Cough To-day—Without Medicine

Easily Done By Breathing In the Healing Fumes of Catarrhones.

No medicine brings such prompt relief, exerts such an invigorating influence, or so thoroughly and speedily cures throat troubles as "Catarrhones." Doctors, hospitals, sanitariums—all say that for those who suffer from changeable weather, for those who are predisposed to catarrh, lung trouble, deafness, or bronchitis, no treatment is so indispensable as "Catarrhones."

For certain cure, for relief in an hour, use Catarrhones, the only direct breathable medicine. Two months' treatment guaranteed, price \$1; smaller size 50c, sample size 25c, at all dealers everywhere.

A VETERAN RIVER MAN

In the reexploration of previously traversed, almost forgotten country, the penetration of new, and the opening to settlement of that great region of Canada north from the North Saskatchewan River to the boreal limit of wheat cultivation, and west to the northern extension of the Rocky Mountains separating Yukon Territory from the Northwest Territories of Canada, there has been for the last eighteen years, following the Klondike movement a steady influx north and west of Peace River and Lake Athabasca. Spite of the modern motor, and rail extensions ever and persistently northward, the primitive equipment of trader and voyager still holds its place, and travel routes still follow the waterways. Transportation of goods on the rivers of the north though occasional steamboats there be, is still by bateau, barge and scow, or towed up, or run with the current downstream, under deft management of pole, sweep and bow and stern line at the rapids.

Among the great early explorers of the northwest, the names of Samuel Hearne and Alexander Mackenzie are first connected with Great Slave River, which in its two-hundred-and-sixty-five-mile course northwest connects Lake Athabasca with Great Slave Lake, out of which flows again the Mackenzie River, two thousand five hundred and twenty-five miles northwest to the Arctic Ocean. Samuel Hearne ascended Great Slave River for forty miles in December, 1771, on his return from exploration to the mouth of the Coppermine River. Seventeen years later Alexander Mackenzie came down it from Athabasca on his way to the Arctic Ocean, on which he was to discover the river that bears his name.

The rapids of the Slave River are on the boundary line between Alberta and the Northwest Territories, and constitute a stretch of sixteen miles between Smith Landing and Fort Smith. From here the river is continuously navigable to the lake, itself traversable by steamers of deep draft.

A veteran river man, speaking of running rapids, said: "It's not so much the rack dead ahead, though the rush of water seems to be taking you right on to it, you have to guard against. The side rush of the current where it splits on the rock is strong enough to sweep the craft to one side before it can strike. You watch logs running through a rocky rapid, and notice how seldom they strike a rock end on. The really important thing for us is the possible sideways wipe of the hull aft, by pressure of water on the stern after the bows have cleared. The merest thing is the half-bidden or covered rock with slow water. On successive trips you have to allow for all sorts of variations. A bit more or a bit less water coming down makes a difference in the way you have to handle a boat, same as in any other navigation. But given the same height of water in the river, and each trip you can say pretty certainly at each point of the rapid just which way the barge is likely to head, and be ready for its next move."

THURSDAY, SEPTEMBER 9, 1920

Township Council

REAR OF YONGE AND ESCOTT

The council met on Saturday evening, 4th inst., with all the members present. Minutes of last meeting were read and adopted. A by-law to appoint a collector and set time for completion of the roll by the clerk was passed, by which Thos. D. Spence, of Charleston, was appointed collector at a salary of \$53.00, postage, etc., included, and roll to be completed on or before October 10th.

Accounts ordered paid:—W. G. Parish, plank for Wiltse bridge railing, \$5.04; Erastus Livingston, 1 sheep killed by dogs, \$20; Wm. Spence, bonus on 70 rods 7-strand wire fence, \$11.20; J. C. Peterson, quarrying 101 1/2 cords of stone at \$2.75 per cord, \$279.13; E. Livingston, for 101 1/2 cords of stone at 30c. per cord, \$30.45.

Moved by C. B. Howard, seconded by G. O. Hayes, that Frank Blancher be authorized to fix Slack's bridge, also bridge in Road Division No. 9.—Carried.

Moved by C. B. Howard, seconded by Thos. G. Howorth, that the township treasurer be authorized to forward a cheque to Mr. Wm. Holmes, the county treasurer, for three thousand dollars for county road improvement.—Carried.

Moved by Thos. G. Howorth, seconded by Ezra S. Earl, that this council do now adjourn to meet again on October 2nd at one o'clock, or sooner at the call of the reeve.—Carried.

R. E. CORNELL, Clerk.

Leeds

Mrs. Fred. Mathews and family, of Battersea, returned home after a week's visit at the home of her sister, Mrs. John Chapman.

Messrs. Ross Gamble and Harry Blackman motored to Toronto and attended the exhibition last week.

Our school reopened last Wednesday, the 1st of September, with Miss Leila Gamble again as teacher.

Mrs. William Wills and family returned home after spending ten days at camp meeting at Lake Elvida.

Miss Nellie Cockrill began her duties as teacher at Ellisville school,

ATLANTA YOUNGSTER CONTENTED FOR OPEN GOLF TITLE

Bobby Jones, the young Atlanta golf star who is showing up well in the play for the open championship title at Toledo. Jones played the opening round with Harry Vardon, the British veteran, each turning in 75. The Atlanta youngster is only 20, while Vardon is past the 50 mark.

also Miss Blanche Wills, as teacher at Woodburn.

Mr. and Mrs. Robert Kelly and family, of Ottawa, are visiting at the home of her brother, Will Sweet.

Messrs. Will Kirkland and Howard Earl left for the West on the harvesters' excursion.

Messrs. Harold and Lawrence Edgers, of Smiths Falls, were week-end visitors at their parents' home.

Mr. H. Scott, of Watertown, is a visitor at the home of Mr. Miner Sweet.

Messrs. Justus Delong and Albert Brown made a business trip to Smiths Falls on Tuesday last.

Mr. and Mrs. Will Scott, of Gananoque, were calling on old friends last week.

Miss Mildred Burtch, of Jones' Falls, spent last week the guest of Miss Marjorie Gamble.

Rev. Mr. and Mrs. Dustin have returned home after a three weeks' vacation. Next Sunday, the 12th inst., there will not be any service at the Olivet appointment, as the church is being painted and papered.

Miss Hazel Blackman, of Seeley's Bay, spent last week at her brother's, Harry Blackman.

Mr. and Mrs. David Gamble spent Sunday at Athens, guests of Mr. and Mrs. Fred. Scovil.

Mr. and Mrs. Andrew Henderson and son, Alva, of Elvida, were recent visitors at Albert Brown's.

Miss Mary Brown is spending the week-end at Jones' Falls.

First Statue to Pilgrim Mothers to be Erected in Plymouth, Mass.

The model of "The Maid of 1620," a statue in memory of the Pilgrim Mothers, which will be erected in Plymouth, Mass., in November, in connection with the opening of the trecentenary of the landing of the Pilgrims in Plymouth. The statue is the first in honor of the women of the Mayflower. The figure will be of bronze and will stand six feet eight inches high. It is the work of Henry H. Kittson, a well known sculptor of Boston.

Charleston

Harry Webster and bride returned on Sunday evening from their wedding trip, which included Toronto and other western points.

Mr. and Mrs. Vanaman and Mrs. J. Vanaman are leaving this week for their home in Philadelphia, Pa., after a two months' stay at the lake, guests of R. Foster.

R. A. Montgomery and wife, Lambertville, N.J., and W. Harkins and wife, New Brunswick, N.J., arrived on Monday to spend a few days at the lake, guests of R. Foster.

Little Maurice Kavanaugh, who has been very ill for the past few days, is better.

Road work is being done here this week and the men are piling stone on Charleston roadside.

Our school opened last Wednesday with Miss Nellie Leeder, of McIntosh Mills, as teacher.

A number of the children and some

of the grown-ups in this section have the whooping cough.

A large number went across the lake on Sunday to attend the camp meeting at the Outlet.

Frankville

Mr. and Mrs. S. Montgomery, son Fred. and daughter Vivian, B.A., have returned after spending a few days guests of Dr. and Mrs. Miller, Utica, N.Y.

A number from here are attending Toronto Fair: Meredith Hanton, Albert Davis, Miss Kate Jones.

Mrs. W. Adams, of Moosejaw, who has been visiting her parents, Mr. and Mrs. J. L. Gallagher, left on Friday for Toronto.

Miss Kitty McManus, who has been spending her holidays with her aunt, Kate Jones, has returned to her home in Toronto.

Miss Fenton, Brockville, has returned to resume her duties in school.

J. Coad is improving his barn by painting.

Miss Vivian Montgomery, B.A., has returned to resume her duties as teacher in Transcona, Man.

Roy Kilborn, who has been quite ill the past week, is convalescing at the home of his parents, Mr. and Mrs. M. Kilborn.

W. C. Dowdley, I.P.S., and daughters, of Brockville, visited his brother, Roland, last week.

On September 1st Rev. A. E. Oliver united in marriage Miss Vera De Wolfe, of Toledo, and Morden McEwen, of Jasper.

Sorry to report Mr. Joe Carr quite ill.

Miss Pearl Oliver will leave tomorrow to visit friends in Kingston.

IT'S SO EASY IT'S FUN!

It's the simplest sort of a job to take an old, time-worn chair, a small can of Glidden Jap-a-lac and a brush and in a few minutes' time bring out the beauty of that chair you've hidden for years.

And it's fun to see its youthfulness return under the magic of the brush; to see again—through this clear, easy flowing and double-durable varnish stain—the beautiful grain of the natural wood.

You can find an old piece of furniture in your attic and any size can of Jap-a-Lac at our store. Bring them together. It won't cost you much, and you'll have a lot of fun getting some "brand new" furniture through the magic of Jap-a-Lac.

You can also obtain Glidden Paints and Varnishes, for the bigger jobs at

SUN DANCE LODGE AT TORONTO

The exhibit of the Canadian Pacific Railway Company at the Toronto Exhibition is unique and very representative of the spirit and beauty of the Canadian Pacific Rockies. It is housed in the popular Railway Building and immediately catches the interest of the visitor. It is the C.P.R. Sun Dance Lodge and quite typical of the Rockies and the Indians of the West. The premier attraction on entering the building is the huge Sun Burst which throws its rays around the gigantic tepee in which are garnered the side scenes portraying in miniature form some of the gorgeous settings which none but the Canadian Rockies can produce. The roof of the Indian tepee is hand painted with symbolic writings and signs typical of the Rocky and Plain Indians. The side embellishments are finished in white birch, the bark of which was always a favorite with the Indian not only for the construction of his canoe but for the building of a quick camp fire. On each side of the entrance office accommodation has been worked into the setting where information of every description can be obtained and telegraph service is also installed. This has the appearance of a real Indian tepee transported from the west for the purpose have been used. The lighting effect of these elaborate interiors are electric with miniature Indian tents as shades producing an interesting effect.

The scene from Sulphur Mountain overlooking Banff Springs Hotel in the foreground and the beautiful Rundle and Tunno Mountains and the stretch of the Bow river always in the background is undoubtedly realistic. A fine model of the C. P. R.'s famous hostelry built specially for the occasion by Messrs H. Morgan Limited, Montreal, is electrically illuminated and gives the visitor the impression that he is paying a visit to Banff instead of sweltering under the atmosphere of an exhibition. The Banff Hot Springs famous for their health giving qualities, especially for curing rheumatism, were known to the Red men long years ago and accidentally discovered by some engineers when surveying for the C.P.R. The huge swimming tank hidden from the view, but situated directly in front of the hotel has a depth of water from three to eight feet and is one of the great summer attractions. The beauties of Banff are to be found on all sides. There are mountains to the right, mountains to the left, mountains in front and also behind, and the Bow river seen in the back of the picture reminds one of opals with its pale green color, and its ever changing fires. The view is entrancing, and one need never feel dull or suffer from ennui, in this delightful spot. The scene cannot be eclipsed for grandeur, although Lake Louise depicted on the opposite side of the tent certainly gives it a close run—many and many people prefer this exquisite location high up amidst the innumerable peaks of the Canadian Rockies. This picture is a representation which meets the eye of the tourist looking for the grandeur of Lake Louise from almost any spot behind the Chateau with a glimpse of the wonderful gem of a lake and a gigantic glacier and mountains in the rear. On arrival here feelings of wonder, awe, and admiration grip the mind, compelling a reverential silence. The Victoria Glacier which forms the background feeds the lake which is shown by real water, while the towering peaks of Mount Lefroy and Mount Aberdeen are observed in the distance. The model of the Chateau is another masterpiece from Morgan's. The frieze of Indian decorations and the magnificent transparencies lend a perfect finishing touch to the Sun Dance Lodge effect. The remaining sides of the "Lodge" are of typical white birch interspersed with paneling of beautiful real Indian mats made from Cedar bark and there are also reproductions in miniature of the famous Totem poles from Aleri Bay. There is also on exhibition a very valuable collection of Indian relics from the West Coast, all of which are original and many over a hundred years old. They include eating and cooking utensils made of wood and whalebone, bows and arrows, coffins and tom-toms, cedar chests and models of Indian houses. The illumination effect is perfect, comprising some five hundred lights. The scenic paintings were executed by Mr. Hal Ross Perrigard assisted by Mr. A. Robinson, and the decorations by Mr. Perrigard assisted by Mr. James Crockett all of Montreal. Taking the exhibition as a whole, fifteen or twenty minutes could be spent to advantage in the Railway Building, as it is not only an historical representation but educational from every viewpoint.

There is more Catarrh in this section of the country than all the other diseases put together, and for years it was supposed to be incurable. Doctors prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Catarrh is a local disease, greatly influenced by constitutional conditions and therefore requires constitutional treatment. Hall's Catarrh Medicine, manufactured by F. J. Cheney & Co., Toledo, Ohio, is a constitutional remedy, is taken internally and acts through the Blood on the Mucous Surfaces of the System. One Hundred Dollars reward is offered for any case that Hall's Catarrh Medicine fails to cure. Send for circulars and testimonials.

Poultry World

GUARD AGAINST VERMIN
(H. Armstrong Roberts in London Free Press.)

The season when lice and mites are at their worst is at hand, because of warm weather which favors their multiplication, and because fowls are more susceptible to such irritation at this time. Indeed, vermin is one of the greatest impediments to success with poultry.

Lice, perhaps, are the least injurious to hens in that they do not actually suck the birds' vitality, as do mites, but lice do make the birds most uncomfortable, in which state they rapidly become less productive. Hens simply can't fight vermin and sustain a heavy egg yield at the same time. The wise poultrykeeper does the fighting.

The use of mercurial ointment is an effective treatment against lice. Mix equal parts of 50 per cent. mercurial ointment and vaseline; apply this compound in small quantities (about the size of a pea) to the flesh surrounding the fowl's vent and under each wing, where lice are seen to congregate; smear the grease over the surface of the skin, because it is poisonous, and must not be so left that the hens can eat it. Two or three applications of this ointment a year are sufficient to keep the hens entirely free from lice.

TREATMENT OF MITES
Mites must be treated differently from lice. The latter live on the bodies of the fowls; mites live in the crevices of boards, roosts, nests, walls and other fixtures in the poultry houses, whence they swarm by thousands, and seldom go on the fowls until nightfall. Again, unlike

MAGIC BAKING POWDER
Contains no alum

We unhesitatingly recommend Magic Baking Powder as being the best and purest baking powder possible to produce. It possesses elements of food that have to do the building up of brain and nerve matter and is absolutely free from alum or other injurious substitutes.

have a scouring effect, and shake the receptacle thoroughly. Scouring, properly done, pays a nice profit, and is as recommended wherever practicable as a means of greater revenue from the surplus cockerels. One of the greatest leaks in the poultry game has been that caused by the sale of surplus males as broilers when the markets are overstocked with this sort of poultry and paying depressed prices.

There is more or less of a limited demand for broilers at best. If the supply comes to be distributed throughout the entire year instead of during a couple of months prices would remain firm. As it is vast quantities cease to develop; they put on weight to the best advantage; they can be kept in confinement in large numbers without fighting; they can be in prime condition as table poultry, which means that they will fetch top prices at a time when broilers are pretty well out of the market.

It hardly pays to caponize surplus males of the smaller breeds such as Leghorns, because of their size. Plymouth Rocks, Wyandottes, Rhode Island Reds and Orpingtons are caponized advantageously; the best breeds of course, are the Asiatics, such as Brahmas and Langshans, or crosses between these breeds and Cornish fowls, which latter are celebrated as table meat. It is not uncommon for such capons to attain a weight of 15 to 20 lbs. to market such stock.

The combs and wattles of capons all over the country are dumped on the market at virtually the same time which depresses prices.

CAPONIZING
Caponizing serves to stabilize the broiler market, inasmuch as it holds the younger stock for another six months or longer without their deterioration as table poultry. Ordinarily it does not pay to keep males until they are fully matured with large combs, wattles and other indications of age, and then market them, because the chances are they will be judged as old roosters and at a low price offered.

Caponizing prevents the young males from becoming "stagnant." Birds so treated are made docile, inactive, easily fattened and increase in size, just as horses, beef cattle, hogs and other animals are improved for domestic purposes by a similar operation.

Minard's Liniment for sale everywhere
THE COLD POTATO.

Tasty Ways to Serve the Left-Overs.

Are you one of those cooks who never use any imagination in warming over your cold potatoes? Do you serve them plain 'til until the family begin to rebel? Try some of these recipes one day for a change and see how popular they will be.

Beat one egg well and add to it a cup of milk heated to the boiling point, a tablespoonful of sugar, one of butter, and a little grated lemon rind. Stir into it as much cold mashed potatoes as will form a stiff, smooth batter. Pour into a well-buttered mould and bake in a hot oven until it is nicely browned. Turn out onto a platter and surround with creamed vegetables or a stew.

Creamed potatoes with cheese are delicious. Melt one and a half tablespoonfuls of butter, add a tablespoonful of flour, and when smooth pour in slices of crisp bacon. Cook till thickened, then add a cup and a half of cold potatoes cut into tiny squares a third of a cup of grated cheese and seasoning to taste. Cook slowly till the cheese is melted.

Potatoes and pork is a very popular supper dish in New England. Cut several thin slices of salt pork into dice and fry a delicate brown. Pour off a part of the fat and slice cold potatoes into that remaining in the pan. When light mix in the pork crisps and serve.

Cut three or four cold potatoes into tiny squares. Beat two eggs slightly, add three tablespoonfuls of milk, seasoning, and the potatoes. Turn into a well-greased pan and fry a golden brown. Fold over like an omelet and serve on a hot platter garnished with slices of crisp bacon. This is an ideal Sunday morning breakfast with hot muffins or rolls.

Instead of grilling sold sweet potatoes, put a quarter of a cup of butter in a shallow pan, with two tablespoonfuls of brown sugar. Heat it until the sugar is melted, then lay in it the potatoes cut in halves. Season well, cover with boiling water and bake in a hot oven until brown.

Instead of letting your potatoes that you are to have for supper get cold, rice two cups of them, add two tablespoonfuls of butter, a half a cup of grated cheese, two tablespoonfuls of milk, the yolks of two eggs and seasoning to taste.

Minard's Liniment For Burns, Etc.

Poultry Accounts

Three dollars profit over cost of feed each year for every hen on the farm is a very good return, and, according to monthly accounts received from farmers, by the Poultry Division of the Experimental Farm, Ottawa, there are a good many farmers' poultry flocks which are actually giving this profit every year, and some even better.

Poultry keeping on the farm is not merely a side line now, but is a sane business proposition, and the hit-and-miss methods that formerly obtained in poultry work should no longer be tolerated. A national industry well on its way to a hundred million dollars a year demands business methods and in order to help the industry and to make it possible for the average poultryman to keep track of his poultry operations, the Poultry Division has put out a very simple form for poultry accounting, copies of which will be sent to any person making application and who will return to the Poultry Division each month a duplicate copy.

A FEW FIGURES.
For several years these poultry accounts have been supplied to persons asking for them and a compilation of the reports shows some very interesting data. For instance, of all the farms reporting their poultry operations 84.5 per cent. of them show a profit, and of this number the average profit per year is \$7.04. As might be expected, a number of reports show a distinct loss each year and that is where one of the benefits of the account form comes in. Either the farmer himself or the Poultry Division at Ottawa can pick out the weak point or points and have them rectified.

Some other interesting figures are obtained from these reports. Among these are the figures that show the

DR. MARTEL'S PILLS
FOR WOMEN'S AFFLICTIONS

These pills are recommended by the best medical authorities for the relief of all the ailments of women. They are sold in a small, neat, and convenient package, and are available at all drug stores.

average number of hens on the farms reporting is 52.9; the average expenditure per hen, that is for feed, application of medicine, and the average profit over expenditure is \$2.04. One farmer claims that he can attend to 100 hens while he is attending to one cow and his average return from 100 hens is \$250.00.

A MANITOBA FARM POULTRY ACCOUNT.

Mr. Frank Harman, Boisevalin, Man., has been sending in these accounts for some time and his inventory for the past year shows a very good profit on investment. He keeps an average of 150 White Leghorn hens, and for the 12 months his expenses were: Stock in hand, \$127.00; interest on capital invested, \$16.25; expenditure for feed and what appliances he purchased for the farm, \$282.37; or a gross expenditure of \$575.62. His receipts were: Sales, eggs, meat and stock, \$845.51; value of stock on hand at the end of the year, \$266.25; or a total receipt of \$1,112.06.

This leaves a balance over cost, without counting the labor, of \$533.49, which works out at an average profit over expenditure per hen of \$3.55. The average yield per hen was 132 eggs.

GOOD PROSPECTS.
The future looks bright for the poultry industry, and the man who can keep poultry, whether on the farm or in the back yard, may look for remunerative returns, if he uses business methods in his operations. Prices are good, and though feed and labor may be high, one can take for granted that the higher the price of feed the higher the price of the product.

WOMEN'S PHOSPHORINE

This is the Great English Preparation. It is a valuable tonic for women, especially those who are suffering from nervous debility, indigestion, and other ailments.

and the labor question on a well-organized poultry plant is not serious, for some one member of the family, even a boy or girl, can often look after the poultry. The value of poultry practice is being appreciated more each year. Last winter, when beef on a Canadian market was selling at from 10 to 12 cents for one pound live weight, guaranteed new laid eggs were selling at 10 cents for two ounces or 80 cents a pound. It is about time that the Canadian hen was considered as a valuable asset.

If you want to make money out of your poultry, write to the Poultry Division of the Experimental Farm, for free account forms. They will ask you to return each month a copy, but they will help you make your poultry pay.—W. T. Scott.

LET a woman ease your suffering. I want you to write, and let me tell you of my simple method of home treatment, and you feel days' free from pain, and put you in touch with women in Canada who will gladly tell what my method has done for them.

If you are troubled with weak, tired feelings, headache, dizziness, nervousness, and all the ailments that attend with derangement of the female system, write to me today for free trial treatment.

Mrs. M. Summers, Box 8, Windsor, Ont.

THE WALKER HOUSE

1000-1002 BROADWAY, TORONTO, CANADA

PEACH RECIPES

There is promise of a big peach crop this year. Now is the time for immediate consumption and for laying in needed stock for later-on supply. Here follow some good recipes:

PEACH SHORTCAKE.
Make a rich biscuit crust and bake it in two shallow cakes. When it is done, and while it is hot, split it with a hot knife. Lay one-half on a broad plate, the cut side upward, and cover it with peaches that have been cut rather soft, sweetened and allowed to stand for an hour or two before using. Put in another crust, also with the cut side up, and place upon it another generous layer of peaches. Continue in the same way until all the biscuit is used and the peaches cover the top. Serve with cream. Some persons add a little cream to the sweetened fruit.

PEACH MERINGUE PUDDING.
Bring to a boil one cupful of granulated sugar and two cupfuls of water. Peel and quarter 96 peaches and cook them, a third at a time, in the syrup. When all are done boil the syrup down until it is thick, pour it over the peaches and set them away to cool. About half an hour before serving heat the fruit in a shallow dish, and cover it with a meringue made with the stiffly-beaten whites of six eggs and five tablespoonfuls of powdered sugar and brown it quickly in the oven. Serve the pudding with a sauce made of one heaping tablespoonful of cornstarch, a quart of milk, the yolks of six eggs, one-third of a cupful of sugar and a teaspoonful of salt. Serve pudding and sauce cold. To brown the pudding meringue without heating the peaches stand the dish in a pan of cold water in the oven.

PEACH PUDDING.
Soak a cupful of fine bread crumbs in a cupful of hot water and a tablespoonful of melted butter. Cream together an egg and three tablespoonfuls of granulated sugar, and add them to the crumbs. Butter a pudding dish, sprinkle it with fine bread crumbs and put a layer of thinly-sliced peaches. Sprinkle them with sugar, cover with the batter and put in more peaches. Continue in this way until the dish is full. Sprinkle the top, which should be better, with bread crumbs, and bake until the peaches are soft and the top brown. Serve with sweetened cream or hard sauce.

NINE MOST USEFUL WORDS.
Nine words, declares a philologist do one-fourth of the work of our written and spoken English language, and thirty-four words one-half. The nine most useful words are stated to be: And, be, have, it, of, the, to, will, you

SOME FREAKS OF LIGHTNING

Scientists are inclined to pooch-pooch the idea that lightning makes "pictures" on the bodies of its victims occasionally, a further example of which was quite lately quoted. A man was struck while sheltering under a tree, and the newspapers told how at the inquest it was reported that a photographic likeness of the tree was imprinted on the man's skin.

Four people were sitting in a room, when they were all rendered unconscious by a flash which cut in half a tree outside. They all recovered eventually, but one of them, a child, was found to bear on its body the imprint of the whole tree. Every limb, branch and leaf, even the severed portion were said to be visible. In a month's time the impression had totally faded.

Sometimes lightning is strangely selective. One will be taken and another left. Quite recently twenty sheep were killed under a tree, but the number sheltered was over forty, and those killed were by no means all in a bunch. But a stranger instance is reported. Lightning entered a stable containing twenty cows. The first, third and so on were killed, the second, fourth and so on escaped.

Two friends were going round the links together recently, when a storm came on from which they took shelter in a corrugated iron building. One of the golfers sat near the door, and while waiting for the passing of the storm commenced to cut up an old golf ball with a knife. A very vivid flash struck the knife, melted the blade, made a deep hole in the ball and scorched the golfer's fingers badly and that was all.

THE WILY WOLF.
In the school of woodcraft and knowledge of how to keep out of danger wolves have no four-footed equals. The fox is a dunce in comparison; the coyote, or prairie wolf, a fool, and the rest nowhere.

The giant moose, king of the Canadian woods, is the most difficult of all the deer species to stalk in the fall months, but nevertheless it is often stalked successfully and shot by amateurs. Not so the wolf.

Knowing this, and that true sport must combine a maximum of exertion and even danger to a minimum of destruction (though nothing would be said about the destruction of too many wolves), also that there was more honor to be gained in outwitting and shooting one wolf than a dozen easily stalked and innocent deer, the writer organized a wolf hunt for the winter of 1908-09, built three log cabins some miles apart and invited sportsmen to participate.

During the three midwinter months they came into camp in twos and threes for a week or ten days' hunt. To all of them the sport was new, healthful and exciting, not to say dangerous, considering the quarry sought and the risk of breaking through thin ice on lakes and rivers in its pursuit.—From the Wide World.

Cook's Cotton Root Compound.

COMMODORE NUTT.

This Cat's Wisdom Proved Its Undoing at Last.

Commodore Nutt, pet cat of Major Cannon, of Governor's Island, was deported to-day by military order for making the squirrels on the island his favorite diet. He was canny in his methods of attack. He was roll a peanut near the squirrels and then lie in wait for a victim.

He was caught in the act and reported. Major Cannon was notified that Commodore Nutt must leave or else be provided with a bell. Thenceforth the tricky pet tinkled as he went. But the squirrels continued to die.

A sentry yesterday saw him creeping toward a chattering little animal. He was creeping on three feet. His left forefoot clutched the bell at his neck. When that bell tinkled again it sounded the deathknell of another squirrel. That settled tabby. He was brought from the island to-day and cast into the outer darkness to join the great army of unemployed cats.—New York corr. Philadelphia North American.

ON THE SHOOTING OF WHALES.

The announcement that Theodore Roosevelt was going to Long Beach, California, to harpoon whales is contradicted. The fact is they do not harpoon whales at Long Beach, but shoot them with a gun. The shooting of finback whales, a species ignored by the New Belfast whaler, who pursues only the sperm and right whale, has lately become a pastime with yachtsmen, and Frank Brown, who maintains the unique industry of manufacturing whaling implements for the whale hunters of the world, has sold a number of whaling guns lately to sportsmen. But shooting a bomb into a whale is a very different thing from the profession of the mighty Queequeg, who ate his steaks "mostly raw" or of the wielder of the long lance, "now wildly elbowed," with which "Nathan Swain did kill fifteen whales between a sunrise and a sunset."—New Bedford Evening.

Women of Canada Testify

Daera, Ont.—"I am more than pleased with Dr. Pierce's Favorite Prescription. I was so nervous that I could not even stay in the house alone in the day-time and I tried every kind of medicine I heard of but got no result. One of my friends advised me to take 'Favorite Prescription,' said that it would cure me, and it did. After taking four bottles I felt like a new woman and it is also the very best medicine for a woman bringing up a family. I will recommend 'Favorite Prescription' to any one suffering like I did."—MRS. JOSEPH BEAUDRY, R. R. 2.

WEAK AND NERVOUS

Tilsburg, Ont.—"I found Dr. Pierce's Favorite Prescription an excellent medicine for the ailments of women. I had become very weak and nervous. I was just miserable when I began taking the 'Favorite Prescription' and it proved most beneficial. It so completely restored me to health that I have never had any return of this ailment. I do advise the use of 'Favorite Prescription' by women who suffer with womanly troubles."—MRS. GEO. WALKER, P. O. Box 490.

Dr. Pierce's Favorite Prescription is made of lady's slipper root, black cohosh root, unicorn root, blue cohosh root and Oregon grape. Dr. Pierce knew, when he first made this standard medicine, that whiskey and morphine were injurious, and so he has always kept them out of his remedies. Women who take this standard remedy know that in Dr. Pierce's Favorite Prescription they are getting a safe woman's tonic so good that druggists everywhere sell it in liquid or tablet form.

SHILOH
30 DROPS COUGHS

lice, the young of mites are not hatched on the fowls, but in the hiding places of the parent mites. Consequently, to destroy these pests the poultryman must confine his attack to their breeding places in the structure of the building, and not on the fowls.

Spraying or painting the walls and fixtures, especially the roosting compartments, with a solution of crude carbolic acid, crude oil, fer-sul, or one of the coal tar or petroleum insecticides, is the surest way to rid a house of mites. Enough of the liquid should be used to thoroughly saturate the surface of the woodwork and to run freely into all cracks and crevices. Be sure to have the liquid reach the under side of the perches; this is a favorite abode of mites.

Because of its flowing and penetrating qualities and because of its volatile nature, which remains potent for a long time, crude oil is a valuable mite destroyer. Paint the perches every three or four months and they will not harbor mites; these pests abominate the fumes of the oil. The one objection to the use of oil is that it may stain the plumage of white birds, though this is not so detrimental, really, except in the case of exhibition stock.

The surest way to keep up the summer egg yield as far as feeding is concerned is to encourage the consumption of mash feed and reduce the grain ration. Because it is the dry mash mixture which enables you to supply the necessary protein, both animal and vegetable, which stimulates egg production. When hens are able to gorge themselves on whole grain, especially corn, they are prone

MINURINE A Wholesome, Cleansing, Refreshing and Healing Lotion—Mixture for Reddened, Itching and Swelling of the Eyes or Eyelids. Sold in 15c and 25c Bottles. Ask Your Druggist for Mixture when your Eyes Need Care. Minurine Eye Remedy Co., Chicago.

to put on fat and become lazy. And the lazy, overfat hen is a nonproducer.

If milk of any sort is available at a reasonable price, feed it liberally. There is no better feed to help fill the egg basket.

It is a temptation to sell as broilers all the cockerels from the early hatches depending upon the males from the later hatches to furnish the breeders for next season, but this is a mistake, because most of the breeding males are found in the early hatches. The thing to do is to select the most promising birds and await their development, culling them as they fail to measure up to the desired standards.

KEEP BEST STOCK
Among farm flocks especially it is all too common to market the best poultry because of prevailing high prices until there is little left but scrubs or immature stock to carry on next year's breeding. Needless to say this reduces the flock to an unprofitable state. Keep the best at home.

At the close of the hatching season the incubator lamp should be removed from the machine, emptied of oil and stored away from dust. Wrap it in paper. If the lamp is left in the heater of the machine the heater jacket and other parts of the apparatus will absorb a large amount of oil, which will cause the heater to smoke and small badly the next time the incubator is started. The same idea applies to lamp-heated brooders.

To clean the slime from chick fountains which cannot be reached with a brush place some gravel and water inside, something that will

the trouble of lighting a fire! The chimney was struck, and the fuel laid in one of the crates, was ignited. In the same severe storm a house at Northwich was struck twice, at the front first, and then at the back. The second flash denuded a scrubbing brush of all its bristles. Many instances are on record of hair and beard being shaved off by lightning, while the rest of the body was practically uninjured. Sometimes the hair falls out, and sometimes the part is permanently bald.

Sometimes lightning is strangely selective. One will be taken and another left. Quite recently twenty sheep were killed under a tree, but the number sheltered was over forty, and those killed were by no means all in a bunch. But a stranger instance is reported. Lightning entered a stable containing twenty cows. The first, third and so on were killed, the second, fourth and so on escaped.

Two friends were going round the links together recently, when a storm came on from which they took shelter in a corrugated iron building. One of the golfers sat near the door, and while waiting for the passing of the storm commenced to cut up an old golf ball with a knife. A very vivid flash struck the knife, melted the blade, made a deep hole in the ball and scorched the golfer's fingers badly and that was all.

THE WILY WOLF.
In the school of woodcraft and knowledge of how to keep out of danger wolves have no four-footed equals. The fox is a dunce in comparison; the coyote, or prairie wolf, a fool, and the rest nowhere.

The giant moose, king of the Canadian woods, is the most difficult of all the deer species to stalk in the fall months, but nevertheless it is often stalked successfully and shot by amateurs. Not so the wolf.

Knowing this, and that true sport must combine a maximum of exertion and even danger to a minimum of destruction (though nothing would be said about the destruction of too many wolves), also that there was more honor to be gained in outwitting and shooting one wolf than a dozen easily stalked and innocent deer, the writer organized a wolf hunt for the winter of 1908-09, built three log cabins some miles apart and invited sportsmen to participate.

During the three midwinter months they came into camp in twos and threes for a week or ten days' hunt. To all of them the sport was new, healthful and exciting, not to say dangerous, considering the quarry sought and the risk of breaking through thin ice on lakes and rivers in its pursuit.—From the Wide World.

Cook's Cotton Root Compound.
A safe, reliable, and effective medicine. Sold in three sizes: No. 1, 2, and 3. Price per bottle, 25c, 50c, and 75c. Free literature on request. THE COOK'S MEDICINE CO., TORONTO, ONT. (Solely Wholesale.)

COMMODORE NUTT.

This Cat's Wisdom Proved Its Undoing at Last.

Commodore Nutt, pet cat of Major Cannon, of Governor's Island, was deported to-day by military order for making the squirrels on the island his favorite diet. He was canny in his methods of attack. He was roll a peanut near the squirrels and then lie in wait for a victim.

He was caught in the act and reported. Major Cannon was notified that Commodore Nutt must leave or else be provided with a bell. Thenceforth the tricky pet tinkled as he went. But the squirrels continued to die.

A sentry yesterday saw him creeping toward a chattering little animal. He was creeping on three feet. His left forefoot clutched the bell at his neck. When that bell tinkled again it sounded the deathknell of another squirrel. That settled tabby. He was brought from the island to-day and cast into the outer darkness to join the great army of unemployed cats.—New York corr. Philadelphia North American.

ON THE SHOOTING OF WHALES.

The announcement that Theodore Roosevelt was going to Long Beach, California, to harpoon whales is contradicted. The fact is they do not harpoon whales at Long Beach, but shoot them with a gun. The shooting of finback whales, a species ignored by the New Belfast whaler, who pursues only the sperm and right whale, has lately become a pastime with yachtsmen, and Frank Brown, who maintains the unique industry of manufacturing whaling implements for the whale hunters of the world, has sold a number of whaling guns lately to sportsmen. But shooting a bomb into a whale is a very different thing from the profession

SUNDAY SCHOOL LESSON

SUNDAY SCHOOL LESSON XI

Sept. 12, 1920. The Glory of Solomon's Reign. I Kings 10:1-13, 23-25.

Commentary - I. A queen's visit (vs. 1-9). The queen of Sheba heard... While some are inclined to locate Sheba in Northeastern Africa, it is now generally supposed that it was a region in the southern part of Arabia...

II. Spiritual desolation. The outward splendor of Solomon's reign eclipsed the invisible decline in the real elements of national greatness and permanency...

III. Solomon's riches and wisdom (vs. 23-25). Solomon exceeded all for riches and for wisdom. This statement sets forth clearly the standing of King Solomon among the rulers of his time...

Questions—What great works had Solomon done during his reign? Who came to see his greatness? How could he reach remote places? What did the queen of Sheba hear to Solomon? How was she impressed with his wisdom and wealth? What respect had she for the true God? How did she regard the Israelitish nation? What did Solomon give her? PRACTICAL SURVEY. Topic—Tests of national greatness. I. Solomon's splendor. II. Spiritual desolation.

did the queen of Sheba hear to Solomon? How was she impressed with his wisdom and wealth? What respect had she for the true God? How did she regard the Israelitish nation? What did Solomon give her? PRACTICAL SURVEY.

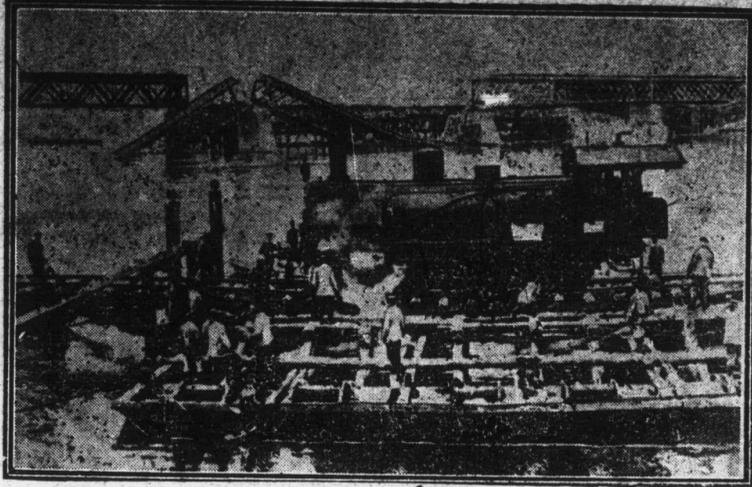

Topic—Tests of national greatness. I. Solomon's splendor. II. Spiritual desolation.

I. Solomon's splendor. The Hebrew monarchy reached its climax during the reign of Solomon; and also, according to the law of human greatness, found therein the beginnings of decline. The conquests of his father afforded a vantage-ground, and he preserved the ascendancy of his kingdom by his proverbial wisdom...

II. Spiritual desolation. The outward splendor of Solomon's reign eclipsed the invisible decline in the real elements of national greatness and permanency. Too great luxury destroys spiritual and physical vigor. The faults of Solomon were both personal and political, though the fruit of the latter scarcely appeared until the accession of his son to the throne.

III. Solomon's riches and wisdom (vs. 23-25). Solomon exceeded all for riches and for wisdom. This statement sets forth clearly the standing of King Solomon among the rulers of his time. To the southwest was the powerful Egyptian nation and to the east was Assyria...

Questions—What great works had Solomon done during his reign? Who came to see his greatness? How could he reach remote places? What did the queen of Sheba hear to Solomon? How was she impressed with his wisdom and wealth? What respect had she for the true God? How did she regard the Israelitish nation? What did Solomon give her? PRACTICAL SURVEY.

WHERE POLES CHECKED RED ADVANCE. A scene on the Vistula River, where the Russian drive was halted. The ruins of the old bridges are shown beside the structures built to replace them.

SHANKHILL DISTRICT OF BELFAST IS AN INFERNO

Belfast, Aug. 27. - A fusillade of shots from a military armored car caused a stampede on Royal avenue, the chief business street, early this evening. Two persons were killed. The total deaths for the day is six, and since the start of the rioting 17. The wounded number more than 100. There have been nearly 100 arrests. The situation remains threatening.

The death roll includes one boy, Robert MacAlpine, aged 11, and two women. The Shankhill district of Belfast late to-night was a blazing inferno. A score of fires had been started, and virtually all the grocery stores and public houses owned by Catholics in the district were being destroyed.

The police fired on the crowd during the disturbances, inflicting several casualties. Hundreds of men in Belfast are armed with rifles, others have revolvers and perhaps a thousand are equipped with improvised weapons - clubs and black jacks.

Out of this situation clashing are coming all over the area at practically every hour of the day and night. The armored cars of the military dash hither and yon. Soldiers jump from lorries and advancing as a line of skirmishers drop to their bellies on the

street and maintain a rifle and machine-gun fire to keep the factions apart. Frequently the fire is turned toward and sometime on the crowds to enforce a dispersal.

The earliest serious clash of to-day came when ship workers were attacked in York street. Revolvers were cracked, stones were flying through the air and wounded men were on the pavements. The police encircled the crowd and back again effectively separating the combatants, who drifted in lesser groups to side streets. Small frays continued. A few moments later another armored car shot into Ewart Row and broke up the pillaging and burning of houses.

In Royal avenue a battle between the Sinn Fein and Orange factions lasted for several hours, when soldiers lying in the street broke it up with rifle fire. The police encircled the Sinn Fein from the rear and the gang broke into small groups, hurrying down side streets.

Bands of ship workers roamed the streets, seeking and finding plenty of trouble. But most of the brushes were small. They were so frequent, however, that merchants closed their shops. Late in the afternoon the military occupied more and more strategic points.

GERMAN STRIKE IS SPREADING

Income Tax Boycott is Causing Grave Situation.

Press Warnings of Tax Needs Vain.

Berlin, Aug. 27. - The daring attempt of the Government to starve German labor into an agreement to a ten per cent. deduction in wages as income tax by locking the workmen out of the factories, is rapidly creating a serious situation.

The general strike with which the "income tax boycotters" of Wurttemberg promptly answered the Government's challenge, is rapidly spreading. Stuttgart is without water, gas, electric light or street car transportation. In Friedrichshafen, Ravensburg and numerous other cities, entire industries are at a standstill.

In Hanau Communist workers closed all municipal offices and public works. The agitation is spreading to the Ruhr and Westfalen districts. Employers are rigidly enforcing the deductions, taking refuge in the statement that the Government holds them responsible, and at the same time they are glad to make labor feel what it means to pay taxes.

The moderate press preaches in vain that the Government cannot exist without taxes. The radicals are operating with effect, declaring that

the rich, not the poor, should pay the taxes, and that the Government, in its collections, has begun with the workers, and not with the capitalists. The Communists are propagandizing for the establishment of political workmen's councils, to replace the present economic shop councils.

WILL NOT LOAD BRITISH SHIPS

New York, Aug. 27. - British shipping continued to be considerably tied up here as a result of the failure to report to work of many longshoremen who suddenly walked out in sympathy with the Irish freedom movement last Friday. Union leaders asserted efforts to induce the men to return to work had failed, and estimated that about 4,000 Irish sympathizers still were out. The men declared they would not load or discharge a ship flying the Union Jack until England allows Archbishop Mannix on Irish soil and frees the Lord Mayor of Cork from Brixton Prison.

NO DANGER OF PANIC IN U.S.

Washington, Aug. 27. - A gradual and natural readjustment of business conditions is predicted by the United States Chamber of Commerce, in its semi-annual bulletin on general business, made public here to-day. While many disturbing factors, such as labor unrest, tight money, high cost of necessities and the Russo-Polish war are mentioned, crop and other conditions are so satisfactory that the Chamber finds widespread belief that business will continue satisfactory throughout the year. Altogether, it states, there is no reason whatsoever to anticipate a panic.

PROPER DRESS OR NO COMMUNION

Madrid, Aug. 27. - No woman will be permitted to enter church unless dressed in "Christian modesty," says a notice circulated through the Diocese of Guadix by authority of Bishop Hernandez Hulas to-day. Any woman wearing a dress which exposes her chest and arms or who has a short skirt or transparent sex will be refused admission and also communion, while the clergy must refuse absolution to any woman so attired, the notice declares. Women disobeying these orders of the bishop are forbidden to become members of church societies.

HOLY WAR ON TIGRIS GROWS

Situation in Muntefik Area More Ominous.

Hope of Loot is Calling the Tribes.

London, Aug. 27. - Another attack against Hillah, west of the Euphrates River, in Mesopotamia, was launched by a force of 1,500 rebellious tribesmen, but the attackers fall back under heavy shell fire, says an official statement issued by the War Office to-day.

"The situation in the Muntefik area of Mesopotamia, that is, between the Lower Tigris and the lower Euphrates, grows more ominous," the statement continues. "A violent holy war is being preached, and this tribe is expected shortly to throw in its lot with the insurgents. The situation around Samawah also gives rise to anxiety."

LOOKING FOR LOOT. London, Aug. 27. - The tribesmen in the Ramadi-Fallujah area of Mesopotamia have become definitely hostile to the British, but British communications between the two places are still open, says a War Office statement, issued this evening.

There are signs of increasing restlessness in the Samarra division. The Sulimariyah division is in the main still steady, although some of the tribes are showing restlessness. The communication says it is reported that in both the Diyala and Kirkuk areas the disturbances are disjointed, and that except in Bakula they show no religious or nationalist color, but are dictated almost wholly by opportunities for looting.

Another flow of gas equal in pressure to that of the first well has been struck in well number two at the Doiran oil fields, a few miles from Meaford. Both wells are said to maintain an even pressure of 145 pounds each.

Reports from Lucerne and Budapest that France had given her assent to a restoration of the Hungarian monarchy, which was overthrown and a republic declared on Nov. 17, 1918, were officially denied by the French Foreign Office.

MESOPOTAMIAN TROUBLE GROWS

Rising Now in Muntefik Zone in South.

Opposition Still Strong Near Bagdad.

London, Aug. 27. - Reports from Mesopotamia indicate a further spread to the Muntefik area, in the South, of the anarchistic rebellion against the British Administration which had been prevalent recently, the War Office announced officially to-day.

The situation in the Shatt-el-Hai is reported critical, political officers at Shatra-el-Muntefik, 35 miles north of Naserye (on the south bank of the Euphrates, 112 miles northwest of Basrah), being withdrawn by airplanes to Naserye, the statement said.

The War Office stated that there had been considerable hostile movement in the vicinity of Hillah, west of the Euphrates, and about seventy miles south of Bagdad. A British brigade column encountered a strong band along both sides of the railway southeast of Hillah and drove it toward the river.

Northeast of Bagdad, the statement added, opposition to the British still is strong. A small body of Arabs held Bakuba, about 20 miles northeast of Bagdad, and Tuz Kurmati, ninety miles north of Bagdad, is reported to have been besieged. Kirkof, twenty miles southeast of Tuz Kurmati has been occupied by tribesmen and an assistant political officer has been captured. The War Office announcement further reported that Sherabab, forty miles south of Khanikin, where a British garrison withstood repeated attacks has been relieved by a column from Khanikin, which is eighty miles northwest of Bagdad.

The statement confirms reports that Bolsheviki in the northwestern part of Persia have received reinforcements from Baku, on the Caspian Sea, and the south coast of the Aspheron Peninsula, and have assumed the offensive forcing the Persian Cossacks to abandon Resht, which is near the sea coast. The Cossacks were reported to have lost heavily.

DE VALERA IN THIS COUNTRY

Irish "President" Made Visits to Dominion

New York, Aug. 27. - Plans for "organization of the Irish in Canada in the fight for Irish freedom" were discussed by Eamonn de Valera, "president of the Irish Republic," and a delegation from the Dominion at Cliffhaven, N.Y., yesterday, it was announced here to-day.

Coincident with the return of De Valera to New York it was stated that he "had outlined the campaign in Canada," and that "organization would be carried out as soon as possible." Eamonn de Valera, "president of the Irish Republic," has made several trips to Canada recently in connection with the Self-Determination for Ireland League of Canada, which is now being organized. He admitted this to a representative of the Canadian Press to-night, but declined to give out any information regarding his little excursions into the Dominion.

"I was in Canada no longer ago than last Sunday," he said. He intimated that he had been in Montreal, but refused to state whether he visited other Canadian cities.

BOLSHEVIK SOLDIERS CAPTURED BY POLES. First photograph to reach this country showing Bolshevik soldiers captured by the Poles. The defenders are now reported taking many thousand Red prisoners near War saw.

POLISH OFFICERS IN CANADA.

Capt. B. Kamienski, of the Polish army, and Miss A. Wichniarska, President of the Polish White Cross, photographed on their arrival in Toronto last Saturday. Capt. Kamienski forecasts the complete defeat of the Red forces.

Philipsville

Mr. and Mrs. W. W. Phelps, Delta, were week-end visitors with his sister, Mrs. E. A. Whitmore.

Mr. and Mrs. Roy R. Spafford, of Hartford, Conn., are spending a few weeks at the home of Mrs. Spafford's grandfather, Rev. and Mrs. Chisholm.

The two daughters of Joseph Mills, Gananoque, are the guests of Mabel Webster, Lyndhurst. Mr. Wm. McAlpin and son and Edward Jackson, of Gananoque, are visiting at Thos. Webster's.

Miss Alma Hammond, teacher, has returned and taken up her work for another year.

Miss Ella Devine will teach at the Delong school the coming year.

Mr. and Mrs. E. Kenny and family, of Lyndhurst, and Mrs. G. McVeigh and daughter, of Smiths Falls, are visiting at Mr. and Mrs. Elliott's.

On Thursday evening of last week Hester Tackaberry entertained the young people of the village and vicinity to a corn roast, which was enjoyed by all present.

Mrs. M. Sherwood, of Smiths Falls, was the guest of Mr. and Mrs. Harry Coon.

Mr. Allen Haskin, who has been employed in Detroit for some months, is home visiting his parents, Mr. and Mrs. R. C. Haskin.

Mr. and Mrs. M. Seed, of Toronto, and Mr. and Mrs. R. R. Spafford, of Hartford, Conn., who have been spending their vacations at Rev. F. and Mrs. Chisholm's, leave for their homes this week.

Mr. and Mrs. Hermon Earl, Mr. and Mrs. Godkin and Philo Haskin, motored to Watertown, N.Y., to visit friends.

Mrs. J. W. Halladay and daughter, Winifred, are taking in the exhibition at Toronto.

Miss Elvie Aimer left last week for Toronto to take a position.

Mr. and Mrs. A. Elliott spent a day at the home of Mr. and Mrs. H. Coon.

Hilton Warren spent Sunday with his father and mother at Fairfield.

Thomas Webster and family were the guests of Mr. and Mrs. B. Pope at Harlem.

Some of our sports took in the races at Gananoque on Monday.

Stanley Best has returned home after a few weeks' stay with his sister in California.

Junetown

Mr. and Mrs. Herbert Scott and family spent one day last week with relatives in Gananoque.

Mr. and Mrs. Claud N. Purvis and little daughter, Jean, Purvis Street, were visiting at J. S. Purvis' on Thursday.

Mr. A. M. Stevenson spent the week end with friends in Ottawa.

Miss Kathleen Earle, Warburton, is visiting her grandparents, Mr. and Mrs. W. W. Purvis.

Mr. and Mrs. Fred Tennant, Master Russell and Miss Dorothy Tennant were Friday visitors at J. B. Ferguson's.

Mrs. Walter Stinson, Detroit, has been visiting her sister, Mrs. Egbert Avery.

Miss Ethel Henry, Ottawa, is holidaying at Mr. J. A. Herbison's.

Mr. and Mrs. Robert Tennant, Mr. and Mrs. Omer Tennant, Mr. and Mrs. Wm. Green, Lyn, and Mr. and Mrs. Hilliard Earle, Fairfield, were recent visitors at Mr. Arden Warren's.

Masters Howard and Gerald Foley, Tilly, spent last week with their aunt, Mrs. J. Claude Purvis.

Mrs. Wm. Bourke and children, Viola and Russell, were here visiting the former's sister, Mrs. Norris Ferguson, last week.

Miss Janet Ferguson and Master Willie Ferguson spent the week-end with the former's niece, Mrs. Charlie Walker, Brockville.

Miss Mary Purvis returned to Ottawa on Monday after spending the holidays with her parents, Mr. and Mrs. W. W. Purvis.

Mr. and Mrs. J. A. Herbison were in Redwood, N.Y., a few days last week to see the former's mother, Mrs. M. G. Herbison, who is ill at the home of her daughter, Mrs. John Fletcher. We are glad to know that Mrs. Herbison is improving.

Mr. Wm. Hall has purchased a McLaughlin special car from Beacock Bros., Brockville.

Mr. Alvin Avery left on Monday for Vancouver, B.C.

Mrs. Robert Mulvaugh, who has been visiting friends in Brockville, returned home last week accompanied by Miss Annie Hutcheson, Brockville.

Mr. and Mrs. Robt. Percival and Miss Lena Percival spent one day last week at Mr. A. B. Ferguson's.

Mrs. Jacob Warren and Miss Mary Smith were week-end visitors with friends in Lyn.

Mr. and Mrs. Arden Warren and Mr. R. C. Purvis attended the Liberal picnic which was held at St. Lawrence Park, Brockville, on Saturday.

Mr. Grant McDonald, Kingston, who has been spending the summer with Rev. W. W. Purvis, left for home on Thursday.

Mr. and Mrs. Dyke, of Smiths Falls, moved here last week to the house formerly occupied by Mr. Harold R. Fortune. Mr. Dyke has been engaged as school teacher for the coming year.

The many readers of Rod and Gun in Canada who are interested in the fiction section of the magazine will be pleased to note that George Gilbert, the well known short story writer has written an absorbing romance staged in the great outdoors entitled Waters of Rejoicing. This along with ten other stories and articles together with the various Departments make up the September number of Canada's greatest sportsman's publication. With the coming of the autumn the "gunman's" thoughts turn to ducks and deer and this number contains several good stories telling how the other fellow got his quota of Canada's water fowl and big game. ROD AND GUN IN CANADA is published monthly at Woodstock, Ontario, by W. J. Taylor, Limited.

Fall Fair Dates

The following is a list of the fall fairs in this district issued by the Ontario Department of Education, Toronto, J. Lockie, Wilson, superintendent:

Alexandria	Sept. 7-8
Arden	Oct. 5
Bancroft	Oct. 7-8
Belleville	Sept. 6-8
Brockville	Sept. 21-24
Coe Hill	Sept. 28-29
Cornwall	Sept. 1-4
Delta	Sept. 13-15
Forest	Oct. 5-6
Frankville	Sept. 16-17
Inverary	Sept. 8
Kemptville	Sept. 7-8
Kingston	Sept. 28-Oct. 2
Lanark	Sept. 8
London	Sept. 11-18
Lansdowne	Sept. 16-17
Madoc	Oct. 5-6
Marmora	Sept. 27-28
Merrickville	Sept. 16-17
Morrisburg	Aug. 3-5
Napanee	Sept. 14-16
Ottawa	Sept. 10-20
Odesa	Oct. 1
Perth	Sept. 8-9
Pictou	Sept. 21-24
Renfrew	Sept. 15-17
Shannonville	Sept. 18
Stirling	Sept. 23-24
Stella	Sept. 28
Tweed	Sept. 30-Oct. 1
Toronto	Aug. 28-Sept. 11
Winchester	Sept. 1-2

Farm for sale

TENDERS will be received by the undersigned up to and inclusive of the first day of September, 1920 for the purchase of the property known as the "John Chant farm" containing 200 acres more or less being part of Lot Number 10, in the 6th concession of the township of Bastard. The farm is situate near Chipman's School House, Harlem, Post Office. Convenient to Churches, school and cheese factory. On the farm there are erected a good stone house with two kitchens and two wood-sheds. Cow stable for 20 cows, Frame silo, Barn 30 x 42. Drive house 26 x 30, Barn and horse stable 32 x 66. Hog pen 20 x 30 all said to be in good state of repair. One well at the house and a well with windmill at the barn. About 50 acres are under cultivation the balance in pasture and woodland. There is a good sugar bush of 10 or 12 hundred trees.

Possession to be given 1st March, 1921. The highest or any tender not necessarily accepted.

For further particulars apply to
T. R. Beale
Solicitor for Venders.
Dated at Athens, 11th. August, 1920

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrup. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.
