Editor Evening Telegram, Dear Sir,-On looking over the customs returns for the year 1910-11 1 notice a greater discrepancy, between imports and exports than is shown by the figures, as presented by Mr. Cashin in the House of Assembly. The total figures are, imports \$13.383,-910; exports, \$11.975,747; a difference of \$1.408,163. These figures convey a very wrong impression, as to the real value of our exports, and unless one has the official returns before him he is not in a way to see how the figures For the benefit of those who have not the report before them permit me to point out how the figures deceive. Out of the total value of the exports ist come \$108.299, because that represented by articles that are not of local production, but may be said to have been imported for to be again sent out of the coun-

ry. For the benefit of your readers give the list of articles and their Specie, \$290; spirits, \$15; \$9.364; old metal, \$10,328; wines, junk, \$10,098; miscellaneous, Foreign Products, \$98,204. It will be seen by those figures that the balance of trade against us is \$1,516,462, instead of \$1,408,163, as presented by the

trade before I conclude. I believe the Editor of the Chronicle. Jays, it Pond. is well known, will greedily pounce on anything that is thrown to them.

It would seem that some joker has thrown some joy bait in Mr. Mc-Grath's way, and he has, with chartempting morsel just now in mind, is that of Canadian Customs figures. He finds that Canada has had a balance years, whilst still amassing surpluses and uses that as an argument to show that it is not inimical to a country to have a balance of trade against her. Could anything be more ridiculous as an argument. Of course it is just what one might expect from the writer of "Newfoundland in 1911," but, from a Legislative Counciller, well,

one might reasonably expect something better. Does it not appear to the editor of the Chronicle that the more dutiable articles a country imports, the more duties collected? As revenues (in the country at any rate) are largely divided from taxes on imported goods. it must follow that the revenue will be the greater the greater the importation of dutiable articles. If an unusual amount is imported, the chances are you will have surplus of revenue. See the point, my honourable friend. In Badly Calked Horse-But Egyptian Liniment Saved Him

The season of icy roads and sudden heavy snowfalls, is an anxious one for horseowners, because it is so easy for a sharpshod horse to cut himself seriously when floundering in the deep snow. A bottle of Douglas' Egyptian Lini-ment on hand then, may be the means of saving a valuable animal for you. It not only stops the bleeding at once, but keeps the wound clean and healthy and quickly heals it.

keeps the wound clean and healthy and quickly heals it. Read what Mr. G. P. Ashbocker, Evan Mills, N. Y., says about it: "Egyptian Liniment has made ex-traordinary cures for me. One of my horses got badly calked, and everyone sid he would have the lockjaw. The wound gathereid and broke, and there was a great hole between the hair and the hoof. I used only Egyptian Lini-ment and the horse's foot was soon sound and well. It made a permanent cure. In my estimation there is nothing goal to this Liniment for cuts or sores of any kind." but really things have gone to the bad altogether and the time is about ripe for another "change" which is the "hue" and "cry" throughout this District.
