CURRENT TRADE CONDITIONS.  
ONTARIO.

Navigation on the lakes is now practically closed, and the movement of lumber is confined to rail shipments. There is a steady trade doing in this way, as manufacturers and dealers have not yet caught up with orders placed in the fall, but which could not then be filled owing to an insufficient supply of cars. The open weather has also encouraged the demand. If any change in the situation should be reported, it is in the direction of higher prices and greater scarcity of low grade pine. The manufacturers are unable to meet the demand for box lumber, the supply of which has passed into the hands of wholesale dealers and box manufacturers, and by the latter the better grades are being purchased. There is a more plentiful stock of the upper grades, but on the whole it is many years since the yards have been so nearly cleaned out. These remarks apply alike to pine, hardwoods, shingles and lath. In the latter there is almost a famine, and in the Georgian Bay district those who have any stock are asking \$3.25 at mill for No. 1. Dealers in Toronto report numerous inquiries for basswood and ash lumber for shipment to the Eastern States.

QUEBEC AND NEW BRUNSWICK.

Several transactions in spruce are reported to have taken place which show the strength of that lumber. It is understood that Messrs. H. R. Goodday & Co., of Quebec, have contracted for the cut of several mills, including the well-known Breakey stock, which represents about 15,000,000 feet. Messrs. Dobell, Beckett & Co., Burstall & Co. and W. & J. Sharples are also believed to have purchased several Quebec cuts, and on the whole business is progressing favorably. While the prices have been kept quiet, those who pretend to know state that they are considerably higher than last year's prices. This is probably true, as spruce has improved wonderfully of late in the British market. The Maritime province production has also been contracted for to some extent, according to reports, and at prices from three to four dollars higher than were paid for the past season's cut. The mill men are in unusually good spirits, and look forward to a busy year in 1900. Most of the shingle mills are closed down, and there are very few shingles to move. For cedar, the price for No. 1 quality is \$3.15 to \$3.25, taking Boston rate of freight.

UNITED STATES.

Although there has been a visible falling off in the demand for lumber throughout the Eastern States, the market does not seem to have weakened in the slightest degree. Retail dealers and consumers are acting on the theory that

prices will not advance during the winter months, and that in the spring there is a probability that values will be lower. The manufacturers and wholesalers, on the other hand, contend that, while there is no expectation of a further general advance, it is quite probable that some grades will be marked higher before spring. One point in favor of the maintenance of present prices is the fact that contracts are being placed for next season's cut at current quotations, which indicates a good deal of confidence in the future of the market.

Buffalo and Tonawanda wholesale yards are fairly well stocked with pine, though some grades, such as box, No. 2 and No. 3 cuts and uppers, are in lighter supply than usual, as the box makers have been buying very heavily. Cutting-up stock is very scarce in the Tonawanda market. Throughout the New England States pine is rather quiet, but there is a steady movement of spruce, which is unusually firm. In New York city the demand exceeds the available supply. Of 9 and 10-inch, 13 foot lengths, very little is to be had, and almost any price can be obtained. Spruce clapboards show little life.

In the hardwood market there has arisen an extraordinary demand for basswood, due to some extent to the scarcity of poplar and cottonwood. There is an easier feeling in elm and less complaint of scarcity of oak, but no prospect of lower prices.

FOREIGN.

The tone of the British wood market is very firm. For stocks on hand high prices are being asked, and most buyers are accepting them without a murmur, as indications point to still higher prices before next spring. Business for next year is promising. Some sales of spruce are recorded, but in pine there seems to be a disposition to wait in the hope that importers will weaken in their prices. But this can scarcely be expected except in the case of lumber for late summer or fall delivery, when there is a possibility that lower values will rule.

At London 1st quality spruce is selling at £10 10s., 2nd quality at £9 5s. to £9 10s., and 3x9 3rd at £9. At Glasgow Quebec white pine deals of first quality, broad dimensions, now sell at £26 2s. 6d. to £27 3s., which is an advance of about 10s. as compared with one month ago. Nearly every kind of square and waney timber has also advanced, as will be seen by the prices published in another column. Birch timber is wanted, and brings 1s. 7d. to 1s. 9d. per cubic foot for 14 and 15-inch average, and 1s. 11d. to 2s. for 16-inch.

PERSONAL.

Mr. F. B. Budgett, of the firm of Budgett Bros., timber importers, London, England, expects to arrive at the Queen's Hotel, Toronto, about the 14th inst., where he will remain for a few days for the purpose of giving lumber manufacturers and exporters an opportunity to call upon him. His firm acts as agents for, and also buy outright, all kinds of wood goods, both rough and manufactured.

THE OTTAWA VALLEY.

[Correspondence of the CANADA LUMBERMAN.]

After an unusually busy and prosperous season, the mills in the immediate vicinity of Ottawa have closed down, and operations are now transferred to the limits. The prospects for 1900 are bright, as Canadian lumber is in great demand at advanced prices in both the English and American markets.

The marked activity in American manufacturing centres has created a steady and increased demand for the cheaper grades of Canadian lumber, but as prices did not advance till well on in the season, the Ottawa mill owners are not as far ahead as the increase in business would lead one to expect.

Wages of lumbermen are higher, but the present influx of mill hands, consequent upon the closing of the mills, will have a tendency to lower them. More men have been sent into the Georgian Bay district than last year, but the number is not increased to any extent in other districts.

W. C. Edwards & Co. have just shipped to the Paris Exposition the show cases for the Canadian exhibits. There are in all 2,000 feet of cases, making five carloads.

D'Amour & Charlebois, lumber dealers, of Hull, intend to enlarge their planing mill shortly. The addition will be a two storey one, 100 feet by 30 feet.

The present war in South Africa has interfered considerably with the Canadian lumber trade. The firm of Davidson & Thackray, of this city, which regularly sent shipments of doors, sashes, etc., to Cape Town, Newcastle, Johannesburg and Petermaritzburg, has been compelled to desist owing to the war and the absence of ocean carrying facilities.

Ald. Jas. Davidson, a member of the firm of Davidson & Thackray, lumber dealers, will make a business trip to England early in the year.

The high prices reigning in the lumber market will, it is expected, encourage the owners of small stationary and portable mills to take a hand in the business again.

Last week after closing the Hull mills, the Hull Lumber Co. sent a gang of mill hands with teams to join the choppers on the limits on the Kippewa river above Mattawa. The

Hull mills were closed for six weeks during the season owing to the non-arrival of logs. J. R. Booth's and Gilmour & Hughson's mills ran steadily all season, and shipped more lumber than ever.

The E. B. Eddy Co., of Hull, has a sufficient supply of pulpwood on hand to keep its paper mills running all winter, but nevertheless a shortage in the general supply of pulpwood is looked for, as the logs could not all be floated down to the mills.

A gentleman interested in lumber matters, who recently visited the Hawkesbury Lumber Co.'s limits on the Dumoine river, states that the timber there is as plentiful and of as good a quality as it was 38 years ago, despite the fact that cutting operations have been steadily carried on since.

In Davidson & Thackray's planing mill at Ottawa over 8,000,000 feet of lumber was used during the season. This firm has also a saw mill at Quyon, Que., and on its limits on the Quyon and Coulonge rivers 100 men are now working.

During the entire winter season a supply of logs will be brought to J. R. Booth's mills at Ottawa, by train over the Canada Atlantic Railway from the Parry Sound and adjacent districts. This will insure a supply of logs for the opening cut at the mill next spring.

OTTAWA, December 11th.

TIMBER LIMIT TRANSACTION.

Fraser & Co., of Ottawa, have disposed of their timber limits lying between the Coulonge and Crow rivers, containing about 250 square miles, to the Gillies Bros. Co., of Braeside, Ont. These limits are mostly covered with a dense growth of large pine, and are exceptionally well watered by numerous "drivable" creeks flowing from a central part to the main streams, making the haul very short.
