The copy filmed here has been reproduced thanks to the generosity of:

MacOdrum Library
Carleton University

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol $\rightarrow$ (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

MacOdrum Library
Carleton University

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole $\rightarrow$ signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

TO THE
MEMORY
OF
WILLIAM ROBERTSON SMITH

PREFACE

THE idea of preparing a new Dictionary of the Bible on critical lines for the benefit of all serious students, both professional and lay, was prominent in the mind of the many-sided scholar to whose beloved memory the present volume is inscribed. It is more than twelve years since Prof. Robertson Smith began to take steps towards realising this

Genesis of the Encyclopædia.

idea. As an academical teacher he had from the first been fully aware of the importance of what is known as Biblical Encyclopædia, and his own earliest contributions to the subject in the *Encyclopædia Britannica* carry us as far back as to the year 1875. If for a very brief period certain untoward events arrested his activity in this direction, the loss of time was speedily made up, for seldom perhaps has there been a greater display of intellectual energy than is given in the series of biblical articles signed 'W. R. S.' which appeared in the *Encyclopædia Britannica* between 1875 and 1888. The reader who is interested in Bible study should not fail to examine the list, which includes among the longer articles BIBLE, CANTICLES, CHRONICLES, DAVID, HEBREW LANGUAGE, HOSEA, JERUSALEM, JOEL, JUDGES, KINGS, LEVITES, MALACHI, MESSIAH, MICAH, PHILISTINES, PRIEST, PROPHET, PSALMS, SACRIFICE, TEMPLE, TITHES, ZEPHANIAH; and among the shorter, ANGEL, ARK, BAAL, DECALOGUE, ELLI, EVE, HAGGAI, LAMENTATIONS, MELCHIZEDEK, MOLOCH, NABATEANS, NAHUM, NAZARITE, NINEVEH, OBADIAH, PARADISE, RUTH, SABBATH, SADDUCEES, SAMUEL, TABERNACLE, Vow.

Nor should the students of our day overlook the service which this far-seeing scholar and editor rendered to the nascent conception of an *international* biblical criticism by inviting the co-operation of foreign as well as English contributors. That names like those of Nöldeke, Tiele, Welhausen, Harnack, Schurer, Gutschmid, Geldner, appeared side by side with those of well-known and honoured British scholars in the list of contributors to the *Encyclopædia* was a guarantee of freedom from dangerous eccentricity, of comprehensiveness of view, of thoroughness and accuracy of investigation.

Such a large amount of material illustrative of the Bible, marked by unity of aim and consistency of purpose, was thus brought together that the *Encyclopædia Britannica* became, inclusively, something not unlike an *Encyclopædia Biblica*. The idea then occurred to the editor and his publishers to republish, for the guidance of students, all that might be found to have stood the test of time, the lacunae being filled up, and the whole brought up, as far as possible, to the high level of the most recent scholarship. It was not unnatural to wish for this; but there were three main opposing considerations. In the first place, there were other important duties which made pressing demands on the time and energy of

the editor. Next, the growing maturity of his biblical scholarship made him less and less disposed to acquiesce in provisional conclusions. And lastly, such constant progress was being made by students in the power of assimilating critical results that it seemed prudent to wait till biblical articles, thoroughly revised and recast, should have a good chance of still more deeply influencing the student world.

The waiting-time was filled up, so far as other occupations allowed, by pioneering researches in biblical archæology, some of the results of which are admirably summed up in that fruitful volume entitled *The Religion of the Semites* (1889). More and more Robertson Smith, like other contemporary scholars, saw the necessity of revising old work on the basis of a more critical, and, in a certain sense, more philosophical treatment of details. First of all, archæological details had their share—and it was bound to be a large share—of this scholar's attention. Then came biblical geography—a subject which had been brought prominently into notice by the zeal of English explorers, but seemed to need the collaboration of English critics. A long visit to Palestine was planned for the direct investigation of details of biblical geography, and though this could not be carried out, not a little time was devoted to the examination of a few of the more perplexing geographical problems and of the solutions already proposed (see e.g. *APHK*, below, col. 191 f.). This care for accuracy of detail as a necessary preliminary to a revision of theories is also the cause of our friend's persistent refusal to sanction the republication of the masterly but inevitably provisional article *BIBLE* in the *Encyclopædia Britannica*, to which we shall return later. The reader will still better understand the motive of that refusal if he will compare what is said on the Psalter in that article (1875) with the statements in the first edition of *The Old Testament in the Jewish Church* (1880), in the *Encyclopædia Britannica*, article *PSALMS* (1885), and in the second edition of *The Old Testament in the Jewish Church* (1892).

It is only just, however, to the true 'begetter' of this work to emphasise the fact that, though he felt the adequate realisation of his idea to be some way off, he lost no time in pondering and working out a variety of practical details—a task in which he was seconded by his assistant editor and intimate friend, Mr. J. S. Black. Many hours were given, as occasion offered, to the distribution of subjects and the preparation of minor articles. Some hundreds of these were drafted, and many were the discussions that arose as to the various difficult practical points, which have not been without fruit for the present work.

In September, 1892, however, it became only too clear to Prof. Smith that he was suffering from a malady which might terminate fatally after no very distant term. The last hope of active participation in his long-cherished scheme of a Bible Dictionary had well-nigh disappeared, when one of the present editors, who had no definite knowledge of Prof. Smith's plan, communicated to this friend of many years' standing his ideas of what a critical Bible Dictionary ought to be, and inquired whether he thought that such a project could be realised. Prof. Smith was still intellectually able to consider and pronounce upon these ideas, and gladly recognised their close affinity to his own. Unwilling that all the labour already bestowed by him on planning and drafting articles should be lost, he requested Prof. Cheyne to take up the work which he himself was compelled to drop, in conjunction with the older and more intimate friend already mentioned. Hence the combination of names on the title-page. The work is undertaken by the editors as a charge from one whose parting message had the force of a command.

Such is the history of the genesis of the *Encyclopædia Biblica*, which is the result primarily of a fusion of two distinct but similar plans—a fusion desired by Prof. Robertson Smith himself, as the only remaining means of realising adequately his own fundamental ideas. With regard to details, he left the editors entirely free, not from decline of physical strength, but from a well-grounded confidence that religion and the Bible were not less dear to them than to himself, and that they fully shared his own unpromisingly progressive spirit. The Bible Dictionary which he contemplated was no mere collection of useful miscellanea, but a survey of the contents of the Bible, as illuminated by criticism—a criticism which identifies the cause of religion with that of historical truth, and, without neglecting the historical and archaeological setting of religion, loves best to trace the growth of high conceptions, the flashing forth of new intuitions, and the development of noble personalities, under local and temporal conditions that may often be, to human eyes, most adverse. The importance of the newer view of the Bible to the Christian community, and the fundamental principles of the newer biblical criticism, have been so ably and so persuasively set forth by Prof. Robertson Smith in his Lectures that his fellow-workers may be dispensed from repeating here what he has said so well already. ‘There remaineth yet very much land to be possessed.’ Let us assume, then, that the readers of this *Encyclopædia*, whatever be their grade of knowledge or sphere of work, are willing to make an effort to take this widely extended land in possession.

Every year, in fact, expands the narrow horizons which not so long ago limited the aspirations of the biblical scholar. It is time, as Prof. Robertson Smith thought, to help students to realise this, and to bring the standard books on which they rely more up to date. It may seem hopeless to attempt this with an alphabetically arranged encyclopædia, which necessarily involves the treatment of points in an isolated way. By an elaborate system of cross references, however, and by interspersing a considerable number of comprehensive articles (such as, in Part I, APOCALYPTIC LITERATURE, CAINITES, DRAGON), it has been sought to avoid the danger of treating minute details without regard to their wider bearings. Many of the minor articles, too, have been so constructed as to suggest the relation of the details to the larger wholes. Altogether the minor articles have, one ventures to hope, brought many direct gains to biblical study. Often the received view of the subject of a ‘minor article’ proved to be extremely doubtful, and a better view suggested itself. Every endeavour has been used to put this view forward in a brief and yet convincing manner, without occupying too much space and becoming too academic in style. The more comprehensive articles may here and there be found to clash with the shorter articles. Efforts, however, have been made to mitigate this by editorial notes in both classes of articles.

It will also doubtless be found that on large questions different writers have sometimes proposed different theories and hypotheses. The sympathies of the editors are, upon the whole, with what is commonly known as ‘advanced’ criticism, not simply because it is advanced, but because such criticism, in the hands of a circumspect and experienced scholar, takes account of facts and phenomena which the criticism of a former generation overlooked or treated superficially. They have no desire, however, to ‘boycott’ moderate criticism, when applied by a critic who, either in the form or in the substance of his criticism, has something original

to say. An 'advanced' critic cannot possibly feel any arrogance towards his more 'moderate' colleague, for probably he himself held, not very long ago, views resembling those which the 'moderate' critic holds now, and the latter may find his precautionary investigations end in his supporting, with greater fulness and more complete arguments, as sound the views that now seem to him rash. Prof. Robertson Smith's views of ten years ago, or more, may, at the present day, appear to be 'moderate' criticism; but when he formulated them he was in the vanguard of critics, and there is no reason to think that, if he had lived, and devoted much of his time to biblical criticism, his ardour would have waned, and his precedence passed to others.

There are, no doubt, some critical theories which could not consistently have been represented in the present work; and that, it may be remarked, suggests one of the reasons why Prof. Robertson Smith's early *Encyclopædia Britannica* article, BIBLE, could not have been republished, even by himself. When he wrote it he was still not absolutely sure about the chronological place of P (Priestly Code). He was also still under the influence of the traditional view as to the barrenness and unoriginality of the whole post-exilic period. Nor had he faced the question of the post-exilic redaction of the prophetic writings. The fundamental principles of biblical criticism, however, are assumed throughout that fine article, though for a statement of these we must turn to a more mature production of his pen. See, for example, *The Old Testament in the Jewish Church*⁽²⁾, pp. 16 ff. (cp 1st ed. pp. 24 ff.), and notice especially the following paragraph on p. 17:—

'Ancient books coming down to us from a period many centuries before the invention of printing have necessarily undergone many vicissitudes. Some of them are preserved only in imperfect copies made by an ignorant scribe of the dark ages. Others have been disfigured by editors, who mixed up foreign matter with the original text. Very often an important book fell altogether out of sight for a long time, and when it came to light again all knowledge of its origin was gone; for old books did not generally have title-pages and prefaces. And, when such a nameless roll was again brought into notice, some half-informed reader or transcriber was not unlikely to give it a new title of his own devising, which was handed down thereafter as if it had been original. Or again, the true meaning and purpose of a book often became obscure in the lapse of centuries, and led to false interpretations. Once more, antiquity has handed down to us many writings which are sheer forgeries, like some of the Apocryphal books, or the Sibylline oracles, or those famous Epistles of Phalaris, which formed the subject of Bentley's great critical essay. In all such cases the historical critic must destroy the received view, in order to establish the truth. He must review doubtful titles, purge out interpolations, expose forgeries; but he does so only to manifest the truth, and exhibit the genuine remains of antiquity in their real character. A book that is really old and really valuable has nothing to fear from the critic, whose labours can only put its worth in a clearer light, and establish its authority on a surer basis.'

The freedom which Prof. Robertson Smith generously left to his successors has, with much reluctance, yet without hesitation, on the part of the editors, been exercised in dealing with the articles which he wrote for the *Encyclopædia Britannica*. The editors are well assured that he would have approved their conduct in this respect. Few scholars, indeed, would refrain from rewriting, to a large extent, the critical articles which they had produced some years previously; and this, indeed, is what has been done by several contributors who wrote biblical articles for the former *Encyclopædia*. The procedure of those who have revised our friend's articles has in fact been as gentle and considerate as possible. Where these articles seemed to have been destined by himself for some degree of per-

manence, they have been retained, and carefully revised and brought up to date. Some condensation has sometimes been found necessary. The original articles were written for a public very imperfectly imbued with critical principles, whereas now, thanks to his own works and to those of other progressive scholars, Bible students are much more prepared than formerly to benefit by advanced teaching. There is also a certain amount of a new material from Prof. Smith's pen (in two or three cases consisting of quotations from the MS of the second and third courses of Burnett Lectures), but much less, unfortunately, than had been expected.

Freedom has also been used in taking some fresh departures, especially in two directions — viz., in that of textual criticism of the Old Testament, and in that of biblical archæology. The object of the editors has been, with the assistance of their contributors, not only to bring the work up to the level of the best published writings, but, wherever possible, to carry the subjects a little beyond the point hitherto reached in print. Without the constant necessity of investigating the details of the text of the Old Testament, it would be hard for any one to realise the precarious character of many details of the current biblical archæology, geography, and natural history, and even of some not unimportant points in the current Old Testament theology. Entirely new methods have not indeed been applied; but the methods already known have perhaps been applied with somewhat more consistency than before. With regard to archæology, such a claim can be advanced only to a slight extent. More progress perhaps has been made of late years in the field of critical archæology than in that of textual criticism. All, therefore, that was generally necessary was to make a strong effort to keep abreast of recent archæological research both in Old Testament and in New Testament study.

The fulness of detail with which the data of the Versions have been given may provoke some comment. Experience has been the guide of the editors, and they believe that, though in the future it will be possible to give these data in a more correct, more critical, and more condensed form, the student is best served at present by being supplied as fully as possible with the available material. It may also be doubted by some whether there is not too much philology. Here, again, experience has directed the course to be pursued. In the present transitional stage of lexicography, it would have been undesirable to rest content with simply referring to the valuable new lexicons which are now appearing, or have already appeared.

With regard to biblical theology, the editors are not without hope that they have helped to pave the way for a more satisfactory treatment of that important subject which is rapidly becoming the history of the movement of religious life and thought within the Jewish and the Christian church (the phrase may be inaccurate, but it is convenient). Systems of Prophetic, Pauline, Petrine, Johannine theology have had their day; it is perhaps time that the Bible should cease to be regarded as a storehouse of more or less competing systems of abstract thought. Unfortunately the literary and historical criticism of the New Testament is by no means as far advanced as that of the Old Testament. It may not be long before a real history of the movement of religious life and thought in the earlier period will be possible. For such a history for the later period we shall have to wait longer, if we may infer anything from the doubtless inevitable defects of the best existing handbook of New Testament theology, that of the able veteran critic, H. J. Holtzmann. The editors of the present work are keenly interested in the subject at

present called 'Biblical Theology'; but, instead of attempting what is at present impossible, they have thought it better to leave some deficiencies which future editors will probably find it not difficult to supply. They cannot, however, conclude this section without a hearty attestation of the ever-increasing love for the Scriptures which critical and historical study, when pursued in a sufficiently comprehensive sense, appears to them to produce. The minutest details of biblical research assume a brightness not their own when viewed in the light of the great truths in which the movement of biblical religion culminates. May the reader find cause to agree with them! This would certainly have been the prayerful aspiration of the beloved and lamented scholar who originated this *Encyclopædia*.

To the contributors of signed articles, and to those who have revised and brought up to date the articles of Prof. Robertson Smith, it may seem almost superfluous to render thanks for the indispensable help they have so courteously and generously given. It constitutes a fresh bond between scholars of different countries and several religious communities which the editors can never forget. But the special services of the various members of the editorial staff require specific acknowledgment, which the editors have much pleasure in making. Mr. Hope W. Hogg became a contributor to the *Encyclopædia Biblica* in 1894, and in 1895 became a regular member of the editorial staff. To his zeal, energy, and scholarship the work has been greatly indebted in every direction. In particular, Mr. Hogg has had the entire responsibility for the proofs as they passed in their various stages through the hands of the printer, and it is he who has seen to the due carrying out of the arrangements—many of them of his own devising—for saving space and facilitating reference which have been specified in the subjoined 'Practical Hints to the Reader.' Mr. Stanley A. Cook joined the staff in 1896, and not only has contributed various signed articles, which to the editors appear to give promise of fine work in the future, but also has had a large share in many of those that are of composite authorship and unsigned. Finally, Mr. Maurice A. Canney joined the staff in 1898; he also has contributed signed articles, and has been eminently helpful in every way, especially in the reading of the proofs. Further, the editors desire to acknowledge their very special obligations to the Rev. Henry A. Redpath, M.A., editor of the *Concordance to the Septuagint*, who placed his unrivalled experience at their disposal by controlling all the proofs at a certain stage with special reference to the LXX readings. He also verified the biblical references.

T. K. CHEYNE.

J. SUTHERLAND BLACK.

20th September 1899.

PRACTICAL HINTS TO THE READER

Further Explanations.—The labour that has been bestowed on even minor matters in the preparation of this *Encyclopædia* has seemed to be warranted by the hope that it may be found useful as a students' handbook. Its value from this point of view will be facilitated by attention to the following points:—

1. Classes of Articles.—The following notes will give a general idea of what the reader may expect to find and where to look for it:—

i. *Proper Names.*—Every proper name in the Old and the New Testament canons and the OT Apocrypha (Authorised Version or Revised Version, text or margin) is represented by an article-heading in Clarendon type, the substantive article being usually given under the name as found in the AV text. *Adoraim*, on the same line as *ADORA* (col. 71), and *Adullamite*, three lines below *ADULLAM* (col. 73), are examples of space-saving contrivances.

ii. *Books.*—Every book in the OT and the NT canons and the OT Apocrypha is discussed in a special article—e.g. Acts, Chronicles, Deuteronomy. The 'Song of Solomon' is dealt with under the title CANTICLES, and the last book in the NT under APOCALYPSE.

iii. *General Articles.*—With the view, amongst other things, of securing the greatest possible brevity, many matters have been treated in general articles, the minor headings being dealt with concisely with the help of cross-references. Such general articles are: ABI AND AHI, names in AGRICULTURE, APOCALYPTIC LITERATURE, APOCRAPHA, ARMY, BAKEMEATS, BREAD, CANON, CATTLE, CHRONOLOGY, CLEAN AND UNCLEAN, COLOURS, CONDUITS, CUTTINGS OF THE FLESH, DISPERSION, DIVINATION, DRESS.

iv. *Other Subjects.*—The following are examples of important headings:—ADAM AND EVE, ANGELS, ANTICHRIST, BLESSINGS AND CURSINGS, CHRISTIAN, NAME OF, CIRCUMCISION, COMMUNITY OF GOODS, COUNCIL OF JERUSALEM, CREATION, DELUGE, DEMONS, DRAGON.

v. *Things.*—The *Encyclopædia Biblica* is professedly a dictionary of things, not words, and a great effort has been made to adhere rigidly to this principle. Even where at first sight it seems to have been neglected, it will generally be found that this is not really the case. The only way to tell the English reader what has to be told about (e.g.) CHAIN is to distinguish the various things that are called, or should have been called, 'chain' in the English Version, and refer him to the articles where they are dealt with.

vi. *Mere Cross-references* (see above, 1, i.; and below, 2).

2. Method of Cross-References.—A very great deal of care has been bestowed on the cross-references, because only by their systematic use could the necessary matter be adequately dealt with within the limits of one volume. They have made possible a conciseness that attained at the expense of incompleteness, repetition of the same matter under different headings being reduced to a minimum. For this reason the articles have been prepared, not in alphabetical order, but simultaneously in all parts of the alphabet, and have been worked up together constantly and kept up to date. The student may be assured, therefore, that the cross-references have not been inserted at random; they have always been verified. If any be found to be unwarranted (no such is known), it must be because it has been found necessary, after the reference was made, to remove something from the article referred to to another article. The removed matter will no doubt be represented by a cross-reference (cp, e.g.,).

The method of reference employed is as follows:—

i. *Identification of Article.* (a) *Long Names.*—To save space long headings have been curtailed in citations—e.g., APOCALYPTIC LITERATURE is cited as APOCALYPTIC.

(b) *Synonymous Articles.*—Persons of the same name or places of the same name are ranged as 1, 2, 3, etc., under a common heading and cited accordingly. In other cases (and even in the former case when, as in ADNAH in col. 67, one English spelling represents different

PRACTICAL HINTS TO THE READER

Hebrew spellings (the articles usually have separate headings, in which case they are cited as i., ii., iii., etc., although they are not so marked. Usually geographical articles precede biographical, and persons precede books. Thus SAMUEL i., 2 is the second person called Samuel; SAMUEL ii. is the article SAMUEL, BOOK OF. If a wrong number should be found the reason is not that it was not verified, but that the article referred to is one of a very small number in which the original order of the articles had to be changed and the cross-reference was not detected. Thus in the article ALUSII the reference to BEREN ii., 1, ought to be to BEREN i., 1.

ii. *Indication of Place in Article Cited.* — Articles of any length are divided into numbered sections (§§ 1, 2, etc.) indicated by insets containing a descriptive word or phrase. As convenience of reference is the great aim, the descriptive phrases are limited to, at most, three or four words, and the sections are numbered consecutively. Logical subordination of sections, therefore, cannot appear. Divisions larger than sections are sometimes indicated in the text by I., II., etc., and subdivisions of sections by letters and numbers (*a, b, c, α, β, γ, i., ii., iii.*). References like (BENJAMIN, § 9, ii. β) are freely used. Most of the large articles have prefixed to them a table of contents.

iii. *Manner of Citation.* — The commonest method is (see DAVID, § 11, (c) ii.). EZRA (*q.v.*, ii. § 9) means the article EZRA-NEHEMIAH, BOOK OF, § 9. Sometimes, however, the capitals or the *q.v.* may be dispensed with. CHAIN printed in small capitals in the middle of an article would mean that there is an article on that term, but that it hardly merits *q.v.* from the present point of view. In articles (generally on RV names) that are mere cross-references *q.v.* is generally omitted; so, *e.g.*, in ABADIAS in col. 3.

3. Typographical Devices. i. *Size of Type.* — (*a*) *Letters* — Two sizes of type are used, and considerable care has been devoted to the distribution of the small-type passages. Usually the general meaning of an article can be caught by reading simply the large-type parts. The small-type passages generally contain such things as proofs of statements, objections, more technical details. In these passages, and in footnotes and parenthesis, abbreviations (see below, 8), which are avoided as much as possible elsewhere, are purposely used. (*b*) *Numbers*. — Two sizes of Arabic numerals are used. (Note that the smallest 6 and 8 are a different shape from the next larger 6 and 8). In giving references, when only the volume is given, it is usually cited by a Roman number. Pages are cited by Arabic numbers except where (as is often the case) pages of a preface are marked with Roman numbers. When numbers of two ranks are required, two sizes of Arabic numbers (5₃) are used in respect of whether the reference be to book and chapter, volume and page, or section and line. If three ranks are needed, Roman numbers are prefixed (v. 5₃).

ii. *Italics.* — Italic type is much used in citing foreign words. In geographical articles, as a rule, the printing of a modern place-name in italics indicates that the writer of the article identifies it with the place under discussion. For the significance of the different kinds of type in the map of Assyria see the explanations at the foot of the map. On the two kinds of Greek type see below, 4 ii. (*b*).

iii. *Small Capitals.* — Small Roman capitals are used in two ways: (1) in giving the equivalent in RV for the name in AV, or *vice versa*, and (2) in giving a cross-reference (see above, 2 iii.). On the use of small italic capitals see below, 4 ii. (*b*).

iv. *Symbols.* — (*a*) *Index Figures.* — In 'almost always' clear, *6* indicates footnote 6. In 'Introd.⁽⁶⁾', '(6)' means sixth edition. In 'D₂*2' means a later development of D (see below,).

(*b*) *Asterisk.* — B* means the original scribe of codex B. **anho* means that the consonants are known but the vowels are hypothetical. *v.* 5* means *v.* 5 (partly).

(*c*) *Dagger.* — A dagger † is used to indicate that all the passages where a word occurs are cited. The context must decide whether the English word or the original is meant.

(*d*) *Sign of Equality.* — *AALAR, 1 Esd. 5₃₆ AV = Ezra 2₅₉ IMMER, i., means that the two verses quoted are recensions of the same original, and that what is called Aalar in the one is called Immer in the other, as will be explained in the first of the articles entitled IMMER.

(*e*) *Sign of Parallelism.* — || is the adjective corresponding to the verb =. Thus *Aalar of 1 Esd. 5₃₆ AV appears as Immer in || Ezra 2₅₉.

(*f*) *Other devices.* — '99 means 1899. 1 Ch. 6 81 [66] means that verse 81 in the English version is the translation of that numbered 66 in Hebrew texts. √ is used to indicate the 'root' of a word.

v. *Punctuation.* — No commas are used between citations, thus: 2 K. 6 21 25 Is. 21 7. Commas are omitted and semicolons or colons inserted whenever ambiguity seems thus to be avoided — *e.g.*, the father Achbor [1] is called 'Father of Baal-hanan [1] king of Edom,' and the son Baal-hanan [1] is called 'ben Achbor [1]'; one of the kings of Edom.'

4. Text-Critical Apparatus. — As all sound investigation must be based, not on the ancient

texts as they lie before the student, but on what he believes to be the nearest approach he can make to their original reading, the soundness of every text is weighed, and if need be, discussed before it is used in the *Encyclopædia Biblica*.

i. *Traditional Original Text*.—In quoting the traditional Hebrew text the editions of Baer and of Ginsburg have been relied on as a rule; similarly in the case of the New Testament, the texts of Tischendorf and of Westcott and Hort (see below,).

ii. *Evidence of Versions*.—The Vulgate (ed. Heyse-Tischendorf) and the Peshitta (ed. Lee and London Polyglott) and the minor Greek versions (Field, *Hexapla*; Hatch-Redpath, *Concordance*) have been quoted quite freely; the testimony of the Septuagint has been attended to on every point.

In exceptional cases 'Holmes and Parsons' has been consulted; ordinarily Swete's manual edition (including the variants) and Lagarde's *Parv Prior* have been considered sufficient. In general (for the main exception see next paragraph) only variations of some positive interest or importance have been referred to. Almost invariably a quotation from the LXX is followed by symbols indicating the documents cited (thus *via* [BAL]). This does not necessarily imply that in some other MS or MSS a different reading is found; it is simply a guarantee that Lagarde and Swete's digest of readings have both been consulted. The formula [BAL] standing alone means that the editors found no variant in Lagarde or Swete to report. In the parts, therefore, where Swete cites κ or other MSS as well as BA, BAL includes them unless the context indicates otherwise; BAL might even be used where B was lacking. When BAL stands alone the meaning is everywhere the same; it is a summary report of agreement in Lagarde and Swete.

Proper names have been felt to demand special treatment; the aim has been to give under each name the readings of Lagarde and all the variants of B&A as cited in Swete. The commonest, or a common form for each witness is given at the head of the article, and this is followed at once or in the course of the article by such variants as there are. Where all the passages containing a given name are cited in the article, the apparatus of Greek readings (as in Swete and Lagarde) may be considered absolutely complete. In other cases, completeness, though aimed at, has not been found possible.

The distinction between declinable and indeclinable forms has generally been observed; but different cases of the same declinable form have not as a rule (never in the case of common nouns) been taken note of. Where part of one name has been joined in the LXX to the preceding or succeeding name, the intruding letters have usually been given in square brackets, though in some very obvious cases they may have been ignored.

When MSS differ only in some giving ι and others ϵ that is indicated concisely thus. ' $\alpha\beta\epsilon\alpha$ [B], $\alpha\beta\alpha$ [AL], becomes ' $\alpha\beta[\epsilon]\alpha$ [BAL]'. Similarly, $-\tau\alpha$, $-\tau\epsilon$ becomes $-\tau[\epsilon]\tau$.

A great deal of pains has been bestowed on the readings, and every effort has been made to secure the highest attainable accuracy. In this connection the editors desire to acknowledge their very special obligations to the Rev. Henry A. Redpath, M.A., editor of the *Concordance* to the Septuagint, who has placed his unrivalled experience in this department at their disposal by controlling the proofs from the beginning with special reference to the LXX readings. He has also verified the biblical references.

Unfortunately, misprints and other inaccuracies—inaccuracies sometimes appearing for the first time after the last proof reading—cannot be avoided. Corrections of errors, however minute, addressed to the publishers, will always be gratefully received.

Some typographical details require to be explained:—

(a) In giving proper names initial capitals, breathings, and accents are dispensed with; they were unknown in the oldest MSS (see Swete, I p. xiii 2).

(b) The Greek readings at the head of an article are given in uncials, and the Vulgate readings in small italic capitals; elsewhere ordinary type is used.

(c) The first Greek reading is given in full; all others are abbreviated as much as possible. Letters suppressed at the beginning of a word are represented by a dash, letters at the end by a period. In every case the abbreviated form is to be completed by reference to the Greek form immediately preceding, whether that is given in full or not. Thus, e.g., ' $\alpha\beta\epsilon\lambda\sigma\alpha\tau\tau\epsilon\mu$, β . . . $\tau\tau\epsilon\mu$, $-\tau\tau\epsilon\mu$, $\beta\epsilon\lambda\sigma\alpha$.'¹ means ' $\alpha\beta\epsilon\lambda\sigma\alpha\tau\tau\epsilon\mu$, $\beta\epsilon\lambda\sigma\alpha\tau\tau\epsilon\mu$, $\beta\epsilon\lambda\sigma\alpha\tau\tau\epsilon\mu$, $\beta\epsilon\lambda\sigma\alpha\tau\tau\epsilon\mu$.' That is to say, the abbreviated form repeats a letter (or if necessary more) of the form preceding. Two exceptions are sometimes made. The dash sometimes represents the whole of the preceding form—e.g., in cases like $\alpha\beta\alpha$, $-\alpha$,—and one letter has sometimes been simply substituted for another: e.g., ν for μ in $\epsilon\mu$, $-\nu$. These exceptions can hardly lead to ambiguity.

(d) The following are the symbols most commonly quoted from Swete's digest with their meaning:—

¹ This is a misprint in the art. ABEL-SHITTIM. ' $\beta\epsilon\lambda\sigma\alpha$,' should be ' $\beta\epsilon\lambda\sigma\alpha$ ', without the period.

PRACTICAL HINTS TO THE READER

- = original scribe.
- 1 = his own corrections.
- a, b, c = other correctors.
- ab = first corrector confirmed by second.
- a¹b = a or b.
- a²b = b, perhaps also a.
- a(vi)d = prob. a.
- a vid = a, if it be a *con a fide* correction at all.

- D = testimony of the Grabe-Owen collation of D before D was partly destroyed (see Swete, 1 p. xxiv).
- /¹il = readings inferred from the collation (*D*) *re silentio*.
- K^a = a corrector of K belonging to the 7th cent. (Sw., 2 p. viii; cp 1, p. xxi).
- H¹da = *e.g.*, on Sirach 461, p. 471.
- K^ab = see Sw., 2 p. viii.
- K^ac = *e.g.*, Sir. 107, p. 663.

(e) The following are the MSS most commonly cited:—

- | | | | |
|---|--|------|--|
| K | Sinaiticus (see Swete, 1 p. xv). | F | Cod. Ambrosianus (Swete, 1 p. xxvi). |
| A | Alexandrinus (Swete, p. xxii). | 87 | Cod. Chisianus (Swete, 3 xii). |
| B | Valicanus (Swete, 1 p. xvii). | Syr. | Cod. Syro. Hexaplaris Ambrosianus (3 xiii). |
| C | Cod. Ephraemi (Swete, 2 p. xli). | V | Cod. Venetus (= 23, Parsons; Swete, 3 p. xiv). |
| D | Cod. Cottonianus Genesios (Swete, 1 p. xxiii). | Q | Cod. Marchalianus (Swete, 3 p. vii). |
| E | Cod. Bodlerianus Genesios (Swete, 1 p. xxvi). | I | Cod. rescriptus Cryptoferratensis (Swete, 3 p. ix f.). |

5. Proper Name Articles.—Proper name articles usually begin thus. The name is followed by a parenthesis giving (1) the original; (2) where necessary, the number of the section in the general article NAMES where the name in question is discussed or cited; (3) a note on the etymology or meaning of the (personal) name with citation of similar names; (4) the readings of the versions (see above, 4 ii.).

6. Geographical Articles.—The interpretation of place-names is discussed in the article NAMES. The maps that are issued with Part I. are the district of Damascus, the environs of Babylon, and Syria, Assyria, and Babylonia' (between cols. and). The last-mentioned is mainly designed to illustrate the non-Palestinian geography of the Old Testament. It is made use of to show the position of places outside of Palestine mentioned in Part I. which happen to fall within its bounds.

In all maps biblical names are assigned to sites only when the article discussing the question regards the identification as extremely probable (the degree of probability must be learned from the article).

The following geographical terms are used in the senses indicated:—

- Dūr, dair*, 'monastery.'
- Haj* (j), 'pilgrimage to Mecca.'
- Jebel* (j.), 'mountain.'
- Kufr, Kufir*, 'village.'
- Kān*, 'caravanserai.'

- Khirbet* (Kh.), 'ruins of —.'
- Nahr* (N.), 'river.'
- Tell*, 'mound' (often containing ruins).
- Wād* (W.), 'valley,' 'torrent-course.'
- Weli, weli*, 'Mohammedan saint,' 'saint's tomb.'

7. Transliteration, etc.—Whilst the *Encyclopædia Biblica* is meant for the student, other readers have constantly been kept in view. Hence the frequent translation of Hebrew and other words, and the transliteration of words in Semitic languages. In certain cases transliteration also saves space. No effort has been made at uniformity for its own sake. Intelligibility has been thought sufficient. When pronunciation is indicated—*e.g.*, Behēmōth, Leviāthān—what is meant is that the resulting form is the nearest that we can come to the original as represented by the traditional Hebrew, so long as we adhere to the English spelling.

In the case of proper names that have become in some degree naturalised in an incorrect form, that form has been preserved: *e.g.*, Shalmaneser, Tiglath-pileser. Where there is an alternative, naturally the closer to the original is selected: therefore Nebuchadrezzar (with *r* as in Ezek., etc.), Nazirite. Where there is no naturalised form an exact transliteration of the original has been given—*e.g.*, Asur-rēs-isi—and the component parts of Assyrian names are thus separated by hyphens, and begin with a capital when they are divine names.

In the case of modern (Arabic) place-names the spelling of the author whose description has been most used has generally been retained, except when it would have been misleading to the student. The diacritical marks have been checked or added after verification in some Arabic source or list.

On the Assyrian alphabet see BABYLONIA, § 6, and on the Egyptian, EGYPT, § 12. One point remains to be explained, after which it will suffice to set forth the schemes of transliteration in tabular form. The Hebrew h (ה) represents philologically the Arabic h and h, which are absolutely distinct sounds. The Hebrew spoken language very likely marked the distinction. As the written language, however, ignores it, ה is always transliterated h. The Assyrian guttural transliterated with an h, on the other hand, oftenest represents the Arabic h, and is therefore always transliterated h (in Muss.-Arn. *Dict.*, x. for ח), never h. There is no h in transliterated Assyrian; for the written language did not distinguish the Arabic h from the Arabic h 'g or', representing them all indifferently by 'g, which accordingly does not, in transliterated Assyrian, mean simply h but h or ה or h or ח or g. Hence *e.g.*, Nabū-nahid is simply one interpretation

PRACTICAL HINTS TO THE READER

xvii

of Nabû-na'id. Egyptian, lastly, requires not only h, h, and h, like Arabic, but also a fourth symbol h (see EGYPT, §).

TRANSLITERATION OF HEBREW (AND ARABIC) CONSONANTS

ב	ב	ג	ד	ה	ו	ז	ח	ט	י	כ	כּ	ל	מ	נ	ס	ע	פ	פּ	צ	ק	קּ	ר	ש	שׁ	שׂ	ת	תּ	תׁ	תׂ

Ar. ā ī ū	a (e)	i (e)	u (o)
Ar. diphthongs: ai, ay, ei, ey, ē; aw, au, ō.			

8. Abbreviations, Symbols, and Biographical Notes.—The following pages explain the abbreviations that are used in the more technical parts (see above 3 i. (a)) of the *Encyclopædia*. The list does not claim to be exhaustive, and for the most part it takes no account of well-established abbreviations, or such as have seemed to be fairly obvious. The bibliographical notes will be not unwelcome to the student.

The Canonical and Apocryphal books of the Bible are usually referred to as Gen., Ex., Lev., Nu., Dt., Jos., Judg., Ruth, S(a.), K(i.), Ch[r.], Ezr., Neh., Est., Job, Ps., Pr., Eccles., C(an)t., Is., Jer., Lam., Ezek., Dan., Hos., Joel, Am., Ob., Jon., Mi., Nah., Hab., Zeph., Hag., Zech., Mal.; 1 Esd., 4 Esd. (i.e. 2 Esd. of EV), Tob., Judith, Wisd., Eccles., Baruch, cap. 6 (i.e. Epistle of Jeremy), Song of the Three Children (Dan. 3₂₃), Susanna, Bel and the Dragon, Prayer of Manasses, 1-4 Macc.; Mt., Mk., Lk., Jn., Acts, Rom., Cor., Gal., Eph., Phil., Col., Thes., Tim., Tit., Philem., Heb., Ja[s.], Pet., 1-3 Jn., Jude, Apoc. [or Rev.]. An explanation of some of the symbols (A, B, etc.), now generally used to denote certain Greek MSS of the Old or New Testaments, will be found above, at p. vx. It may be added that the bracketed index numerals denote the edition of the work to which they are attached; thus OTJC⁽²⁾ = *The Old Testament in the Jewish Church*, 2nd edition (exceptions RP⁽²⁾, AOF⁽²⁾; see below). The unbracketed numerals above the line refer to footnotes; for those under the line see below under D₂, etc.

When a foreign book is cited by an English name the reference is to the English translation. It is suggested that the *Encyclopædia Biblica* itself be cited as *EBI*. It will be observed that all the larger articles can be referred to by the numbered sections: or any passage can readily be cited by column and paragraph or line. The columns will be numbered continuously to the end of the work.

ABBREVIATIONS, SYMBOLS, AND BIBLIOGRAPHICAL NOTES

The following pages explain the abbreviations that are used in the more technical parts (see above, p. xiv, § 1. [a]) of the *Encyclopædia*. The list does not claim to be exhaustive, and, for the most part, it takes no account of well-established abbreviations, or such as have seemed to be fairly obvious. The bibliographical notes will, it is hoped, be welcome to the student.

The Canonical and Apocryphal books of the Bible are usually referred to as Gen., Ex., Lev., Nu., Dt., Josh., Judg., Ruth, S(a.), K(i.), Ch[r.], Ezra, Neh., Esth., Job, Ps., Pr., Eccles., Cant., Is., Jer., Lam., Ezek., Dan., Hos., Joel, Am., Ob., Jon., Mic., Nah., Hab., Zeph., Hag., Zech., Mal.; : Esd., 4 Esd. (*see* 2 Esd. of EV). Tob., Judith, Wisd., Ecclesi., Baruch, Epistle of Jeremy (*see* Bar. ch. 6), Song of the Three Children (Dan. 3₂), Susanna, Bel and the Dragon, Prayer of Manasses, 1-4 Macc.; Mt., Mk., Lk., Jn., Acts, Rom., Cor., Gal., Eph., Phil., Col., Thess., Tim., Tit., Philem., Heb., Ja[s.], Pet., 1-3 Jn., Jude, Rev. [or Apoc.].

An explanation of some of the symbols (A, K, B, etc.), now generally used to denote certain Greek MSS of the Old or New Testaments, will be found above, at p. xvi. It may be added that the bracketed index numerals denote the edition of the work to which they are attached: thus OJJC⁽²⁾ = *The Old Testament in the Jewish Church*, 2nd edition (exceptions K^P⁽²⁾, L^O^P⁽²⁾; see below). The unbracketed numerals above the line refer to footnotes; for those under the line see below under D₂, E₂, J₂, P₂.

When a foreign book is cited by an English name the reference is to the English translation.

It is suggested that this work be referred to as the *Encyclopædia Biblica*, and that the name may be abbreviated thus: *Ency. Bib.* or *EBi*. It will be observed that all the larger articles can be referred to by the numbered sections (§§); or any passage can readily be cited by column and paragraph or line. The columns will be numbered continuously to the end of the work.

ENCYCLOPÆDIA BIBLICA

A

AALAR (אללר [B]). 1 Esd. 5:35† AV=Ezra 2:59, IMMER, 1; cp also **CHERUB**, 2.

AARON (אֶהֱרֹן, § 7; see also below, § 4, end; אֶהֱרֹן [BAL.], אֶהֱרֹן, [A]; אֶהֱרֹן). In the post-exilic parts of the OT (including Ezra, Neh., Ch., and for our present purpose some of the Psalms) Aaron is the ancestor of all lawful priests,¹ and himself the first and typical high-priest. This view is founded upon the priestly

1. In P. document in the Hexateuch, according to which Aaron, the elder brother of Moses, took a prominent part, as Moses' prophet or interpreter, in the negotiations with Pharaoh, and was ultimately, together with his sons, consecrated by Moses to the priesthood. The rank and influence which are assigned to him are manifestly not equal to those of Moses, who stood to Pharaoh as a god (Ex. 7:1). He does, indeed, perform miracles before Pharaoh—he changes his rod into a serpent which swallows up the rods, similarly transformed, of the Egyptian sorcerers; and with the same rod he changes the waters of Egypt into blood, and brings the plagues of frogs and lice—but the order to execute the marvel is in each case communicated to him through Moses (Ex. 7:1). It is Moses, not Aaron, who disables the sorcerers by rods (Ex. 9:8 f.), and causes the final destruction of the Egyptians in the Red Sea (11:15-18). Through his consecration by Moses, Aaron became 'the priest' (so usually) or, as he is elsewhere called, 'the anointed priest' (Lev. 4:35; 16:15) or 'the high-priest' (Lev. 21:10; Nu. 35:25, 28). His sons, representing the common priests, act under him (Nu. 3:4). As high-priest he has splendid vestments, different from those of his sons (Ex. 28); he alone is anointed (Ex. 29:7²); he alone, once a year, can enter the holy of holies (Lev. 16). He is the great representative of the tribe of Levi; and his rod, unlike the rods taken to represent the other tribes, buds miraculously, and is laid up for ever by the ark (Nu. 17:6 f. [21 f.]). Within this tribe, however, it is only the direct descendants of Aaron who may approach the altar, so that Korah the Levite, when he claims the power of the priesthood, is consumed by fire from Yahwe (Nu. 16:35). Aaron occasionally receives the law directly from Yahwe (Nu. 18). Even his civil authority is great, for he, with Moses, numbers the people (Nu. 1:37), and it is against him as well as against Moses that the rebellion of the Israelites is directed (Ex. 16:2; Nu. 14:25-26; 16:1). This authority would have been greater but for the exceptional position of Moses, for in the priestly portions of Joshua the name of Eleazar (7:1, 11), the next high-priest, is placed before

the of Joshua. The 'priestly' writer mentions only one blot in the character of Aaron: viz., that in some way, which cannot be clearly ascertained in the present state of the text, he rebelled against Yahwe in the wilderness of Zin, when told to 'speak to the rock' and bring forth water (Nu. 20:1-13). In penalty he dies, outside Canaan, at Mount Hor, on the borders of Edom (7:22 f.).

As we ascend to the exilic and pre-exilic literature, Aaron is still a prominent figure; but he is no longer

2. In earlier either the high-priest or the ancestor of all legitimate priests. Ezekiel traces the

writers. origin of the priests at Jerusalem no farther back than to ZABOR (7:1, 1, § 3), in Solomon's time. Dt. 10:6 (which mentions Aaron's death, not at Hor but at Moserah, and the fact that Eleazar succeeded him in the priesthood) is generally and rightly regarded as an interpolation. In Mic. 6:4 (time of Manasseh?) Aaron is mentioned between Moses and Miriam as instrumental

3. In E. in the redemption of Israel. In the Elohist document of the Hexateuch (E) he is mentioned as the brother of Miriam the prophetess (Ex. 15:20; for other references to him see Ex. 17:12; 21:10; 24:13; Nu. 12:1); but it is Joshua, not Aaron, who is the minister of Moses in sacred things, and keeps guard over the tent of meeting (Ex. 33:11), and 'young men of the children of Israel' offer sacrifice, while the solemn act of sprinkling the blood of the covenant is reserved for Moses (Ex. 24:6). Aaron, however, seems to have counted in the mind of E as the ancestor of the priests at 'the hill of Phinehas' (Josh. 24:33) and perhaps of those at Bethel. At all events, the author of a section added in a later edition of E speaks of Aaron as yielding to the people while Moses is absent on Mount Horeb, and taking the lead in the worship of Yahwe under the form of a golden calf. The narrator, influenced by prophetic teaching, really means to attack the worship carried on at the great sanctuary of Bethel, and looks back to the destruction of Samaria by the Assyrians in 721 as Yahwe's 'visitation' of the idolatrous worship maintained in N. Israel (Ex. 32; see especially 7:34).

It is extremely probable that Aaron's name was absent altogether from the earliest document of the Hexateuch

4. In J. (J) in its original form. In it Aaron appears only to disappear. For example, according to our present text, Pharaoh sends for Moses and Aaron that they may entreat Yahwe to remove the plague of frogs; but in the course of the narrative Aaron is ignored, and the plague is withdrawn simply at 'the word of Moses' (Ex. 8:8-13 a 4-11 a). Apparently, therefore, the name of Aaron has been introduced here and there into J by the editor who united it to E (cp EXODUS, § 3 n.). If that is so, we may perhaps agree with Oort that the legend of Aaron belonged originally

¹ In 1 Ch. 12:27, if MT is correct, Aaron (AV AARONITES) is almost a collective term for priests said by the Chronicler to have joined David at Hebron. In 25:17† RV rightly reads 'Aaron'.

² On passages in P which seem to conflict with this, see the discussion and conclusions of P. in Lev. 8:12.

AARONITES

to the 'house of Joseph,' which regarded Aaron as the ancestor of the priests of Bethel, and that single members of this clan succeeded, in spite of Ezekiel, in obtaining recognition as priests at Jerusalem. So, doubtfully, Stade (*op. cit.* 583), who points out that no strict proof of this hypothesis can be offered,

As to the derivation of 'Aaron, Redshoe's ingenious conjecture that it is but a more flowing pronunciation of *hā'ar-n*, 'the ark,' is worth considering only if we can regard Aaron as the mythical ancestor of the priests of Jerusalem (*qnd hā'ar-n qnd .thū n*). See Lane, *De Gids*, Nov. 1871, p. 271.

See Pausanias; and esp. besides the works of Weil, Stein, and Kie, Oort's essay 'De Atrioniden' in *Thalysm.* 1890, 351 ff.

ABACUC (*abacuc*), 4 Esd 1:4, 1:14. See **ABACHUK**.

ABADDON (אַבְדֹּן, but in Prov. 27:20 Kr. אֲבֹדֹן, by contraction) or marring, though the full form is also cited by Gal. for Kt. אֲבֹדֹן, אֲבֹדֹן אֶחָא [18A], but Job 31:12 ΠΑΝΤΩΝ ΤΩΝ ΜΕΡΩΝ [18A], . . . ΛΕΡΩΝ [18C]; Rev. 9:11, ΑΒΑΔΔΩΝ [8A, etc.]; ΑΒΑΔΑ, [B etc.], ΑΒΒΑΔΑ, [some curs.]; etc.; אֲבֹדֹן; *PERDITION*, but Rev. 9:11 *ABADDON*, RV Job 20:6, Prov. 15:11 27:20; RV mg. Job 28:22 31:12, Ps. 88:11 [12], elsewhere *EV* DESTRUCTION; in Rev. 9:11 Abaddon is stated to be the Hebrew equivalent of ΑΠΟΛΥΩΝ (ΑΠΟΛΥΩΝ[8A]). Etymologically it means 'place of destruction.' We find it parallel to Sheol in Job 20:6 28:11; Prov. 15:11 27:20 (see readings above). In these cases RV makes it a proper name, either Abaddon or Destruction, as being parallel to the proper names Sheol or Death. In Ps. 88:11 [12] 'Destruction' is parallel to 'the grave'; in Job 31:12 the same term (in RV) is equivalent to 'utter ruin.' Thus Abaddon occurs only in the Wisdom Literature. There is nothing in the usage to indicate that in OT it denotes any place or state different from Sheol (q.v.), though by its obvious etymology it emphasises the darker aspects of the state after death. An almost identical word (אֲבִדָּן) is used in Leth. 25 (constr. אֲבִדָּן; 8) for 'destruction' in its ordinary sense as a common noun. In later Hebrew אֲבֹדֹן is used for 'perdition' and 'hell' (Eastrow, *Dict.* s.v.), and is explained in Targ. on Job 20:6 אֲבֹדֹן אֶחָא, house of perdition—i.e., hell. The Syriac equivalent word (ܐܒܕܕܐܢ) has the meaning 'destruction,' and is used to translate אֲבֹדֹן.

Rev. 9:11 mentions a king or angel of the abyss, whose name in Hebrew is Abaddon and in Greek Apollyon ('*Ἀπολλών*, Destroyer), the *-on* being supposed to be a personal ending in Hebrew, as it is in Greek. This is, of course, poetic personification (cp Rev. 18:20, 21), and may be paralleled in the OT (Job 28:22; cp Ps. 104:15), and in Rabbinical writers (Schottgen, *Horae Hebr.*, *Apoc.* ix. 11, and *PAR.*^{5b} 3.7.). The identification with the Asmodeus of the Book of Tobit is a mistake. Apollyon has become familiar to the world at large through the *Pilgrim's Progress*, but Abaddon may be said not to exist outside of the Apocalypse. W. H. R.

ABADIAS ($\Delta B \Delta \Delta \Delta C$ [BA]), 1 Ed. S₄₅⁺ = Ezra S₉.
 OIRADIAH, 11.

ABAGTHA (אבגתה, etymology doubtful, but see BIGVAI, BAGOVS; according to Ming. [*Faod* 71] the corresponding Gr. is **ABATAZA** [HSA], which [reading *abāṭara*] he regards as presupposing אבגתה *abagtha*; the 4th name in the list as it stands is

¹ K₀, *Hebr. Spr.*, loc. cit., ii, 473 γ, gives parallel contractions; cp BDB.

ABARIM

ΖΑΘΟΛΘΑ [HN]. ΖΗΒΑΘΑΘΑ [A], a chamberlain of Ahasuerus (Est. 1:6). See LESTER, ii, § 3.

ABANA, RV **Abanah** (אֲבָנָה, 2 K 5:14 Kt. אֲבָנָה [Kt]; **ABANA**, BL. **apB.** [*tp* superscr.] B¹⁹).

ANAB, [H¹⁰⁰⁰g] : NAB, [A] : **ناب** : *ANAB*, 1), one of the 'rivers' (נהרות) of Damascus. The name, which occurs nowhere else, should probably be read AMANA (AV *ing*.) or AMANAH (RV *ing*.) ; see further AMANA, 2) ; in this form, as meaning 'constant,' it would be equally suitable to a river and to a mountain, though it was first of all given to the mountain range of Anti-Lebanus, from which near Zebedim, the Nahr Baradā ('the cold') descends to refresh with its sparkling waters the city and the gardens of Damascus¹. The romantically situated *Nahr Fijeh* (فجّه), a little to the S. of *Suk Haday Baradā* (the ancient Aklat), appears from its name to have been regarded as the chief source of the Baradā. It is not, certainly, the most distant one ; Ion it does, at any rate, 'supply that stream with twice as much water as it contains before it is thus augmented' (Baed. *Pal^{est}* 336). Close to it are the remains of a small temple, which was presumably dedicated to the river-god. The clear waters of the Nahr Baradā have a charm which is wanting to the Jordan through the greater part of its course. This explains Nauman's question in 2 K. 512, as far as the Amman is concerned. It is the fate of the Baradā to disappear in the swamps called the Meadow Lakes, about 18 m. to the E. of Damascus, on the verge of the desert. See PHARPAR, 7. 8. 6.

ABARIM, THE (אֲבָרִים): Ἀβαρίμ [BAL], -IN [BL], and phrases with πέραν [BAL], see below; Jos., Ἀβαρίη, literally 'Those on the other side'—i.e., of the Jordan—is employed by the latest documents of the Pentateuch (P and K) in the phrase, Mt. or Mts. of the Abarim, to describe the edge of the great Moabite plateau overlooking the Jordan valley, of which Mt. Nebo was the most prominent headland (—Nu. 27.12 R1, το ὄρος το ἐν τῷ πέραν [BA], τ. ὄ. . . π. [τῷ ὄρει/ὄρειον]; Dt. 32.43 (P[R1]), τ. ὄ. π. Ἀβαρίμ [H1], . . . τῶν [A], 'this Mt. of the Abarim, Mt. Nebo'; Nu 33.47 f. [P[R] in Euseb's similarity between the Moab plateau and the plains of Shinar, 'Mts. of the Abarim' (τὰ ὄρη τὰ Ἀβαρίμ, ὄρη α. [BAL]). In Nu 33.44 we find Jhe-abarim (AV [H]-ABARIM), 'heaps of the Abarim' (to distinguish it from the Ijim of Judah, Josh. 15.29; see IIM, 1), on the extreme SE. of Moab. Since the employment of the name thus confined to Moab occurs only in late documents, it is probably due to the fact that at the time these were written the Jews were settled only over against Moab. Josephus, too, uses the word in the same limited application (Ant. iv. 848, ἐν τῷ ὄρει: τῷ Ἀβαρί, and Eusebius (OS² 2164, Ἀβαρίη) so quotes it as employed in his own day. But there are traces in the OT of that wider application to the whole trans-Jordanic range which the very general meaning of Abarim justifies us in supposing to have been its original application. In Jer. 22.20 (RV), Abarim (AV 'the passages'); צַבָּרִים, dividing the word in two, τὸ πέραν τῆς θαλάσσης) is ranged with Lebanon and Bashan—that is to say, is probably used as covering both G' d and A. ab.;—and in the corrupt text of Ez. 31.1, 'the valley of the passengers,' as AV gives it (similarly RV), most probably should rather be 'a valley of [Mt.] Abarim' (צַבָּרִים for צַבָּרִים; so Hb., Co., Siegf., Bu.). If so, that extends the name to Bashan. Thus the plural noun Abarim would denote the E. range in its entire extent—being, in fact, practically equivalent to the preposition זָרָה (originally a singular noun from the

¹ Rev. William Wright, formerly of Damascus, states that 'the river whose water is not prized like the Abanias, distributes the Abana' (*Leisure Hour*, v 74, p. 284; so *Exposita*, Oct. 1856, p. 214). Is the name due to a confusion with Nahr Baniās (certainly not the ancient Abana)? No Abanias is mentioned in Porter's *Five Years in Damascus* or in Barton and Drake's *Unexplored Syria*.

ABBA

same root) There is no instance of the name earlier than Jeremiah. Lag. Nu. 2712 Dt. 3249 gives אֶרֶץ

As seen from W. Palestine this range forms a continuous mountain-wall, at a pretty constant level, which is broken only by the valley-mouths of the Yarmuk, Zerka or Jabbok, and Arnon. Across the gulf of the Jordan valley it rises with great impressiveness, and constitutes the eastern horizon (cp Stanley, *S.P.*; G.A.S.M., *II* 53, 519, 548). The hardly varying edge masks a considerable difference of level behind. On the whole the level is maintained from the foot of Hermon to the S. end of the Dead Sea at a height of from 2000 to 2000 feet above the ocean. The basis throughout is limestone. N. of the Yarmuk it is deeply covered by volcanic deposits, and there are extinct craters N.E. of the Lake of Galilee. Between the Yarmuk and the Wady Heslan, at the N. end of the Dead Sea, run transverse ridges, cut by deep wadies, and well wooded as far S. as the Zerka. S. of Wady Heslan rolls the breezy treeless plateau of Moab, indented in its western edge by short wadies rising quickly to the plateau level, with the headlands that are more properly the Mts. of Abarim between them; and cut right through to the desert by the great trenches of the wadies, Zerka, Mi'in, and Mojt or Arnon. For details see ASIATICK. PISCAL, BAMOCH BAAI, BETU-PEOR, MOAB, NETO, PISCAL, ZORUM, etc., with authorities quoted there. On Nu. 33 17 see WANDERINGS, § 11. G. A. S.

ABBA (ABBA [Ti. VII], i.e. אבא, Ab, 'father,' in the emphatic state), an Aram. title of God used by Jesus and his contemporaries, and retained by Greek-speaking Christian Jews. See Mk. 11.6 Rom. 8.3 Gal. 4.6; where in each case *ὁ πατήρ* is subjoined.

ABDA (8722), § 51, frequent in Phoen. and Aram. On the form cp. Renan, *KE/v.* 165 f. [82], and see NAMES, §§ 37, 51).

1. Levite in list of inhabitants of Jerusalem (see EZEK. ii. § 6,

ABDIEL (עבדיאל, §§ 21, 37, 'servant of God'; אבדעאל [B]; אבדאל [AL]), in genealogy of GAD, 1 Ch. 5:5f.

ABDON (עבדון, Ἀβδων [AL], see also below).

one of the four Levitical cities within the tribe of Asher; Josh. 21.39, 1 Ch. 6.74(59)†. The site has not been identified, but Guérin has suggested that of

'Abdēh, 10 m N. from 'Akka (Acre). The same city is referred to in Josh. 19:23, where עֲבָתָא (*AV*: Hb BRON; RV EUGEN) is a graphical error for אַבְדָּה.

RV 1.660X) is a graphical error for $\text{[} \overline{\text{ב}} \overline{\text{ע}}$. Abdon, which, in fact, some MSS. read (Josh. 21 30, $\delta\alpha\beta\delta\omega\nu$ [B]; 1 Ch. 6:74 [L], $\alpha\beta\alpha\rho\nu$ [B], om. L); Josh. 19:28, $\epsilon\lambda\beta\omega\nu$ [B], $\alpha\chi\rho\nu$ [AL]),

ABDON אֲבֹדֹן, § 77; dim. of EBED; אΒΔΩΝ [BAL.].

t. b. Hillel, one of the six minor judges (see JUDGES, § 1). After judging Israel eight years, he was buried at Pirathon in Ephraim, his native

ABEL-BETH-MAACHAH

place. He had forty sons and thirty grandsons, 'that rode on three-score and ten ass colts' (v. 10), was head of a large and wealthy family (cp. Judg. 5b), Judg. 12 c'est (Aapδeu [M.], v. 15 ω A); on Lw's conjecture that

- his name should be restored in 1 S. 12:11, see B. DAN, 1.
2. b. Shashak, a Benjamin (1 Ch. 8:20, ἀβιζακ [B]).
3. b. Iziel the father of Gabien; 1 Ch. 8:30 (αβιζακ [B]).
4. b. Iziel (αβιζακ [B]), αβιζακ [A].
5. b. Muthi, a son of King Josiah (2 Ch. 34:20, ἀβιζακ [B]), elsewhere called A. muthi (y. p. 2). 5. See L. DAN, 2.

ABEDNEGO (עֶבֶד נֶבֹּא or עֶבֶד נְנֹא, § 86; a corruption of עֶבֶד נְבֹ 'servant of Nebo,' which occurs in an Assyrio-Aramaic inscription, *COF*²126, 23).

אֲזַרְיָהוּ [BA 87]; **حذيه**; *ARDENAGE*), the count name given to Azariah [10], the friend of Daniel (Dan 17, etc.). On name see also N. R. A. M.

ABEL (אָבֶל, § 6; ABEL [ADL.]; *ABEL*, Gen. 4,

7 There are three phases in Jewish beliefs respecting Abel. The second and the third may be mentioned first. The catastrophe of the Fall shifted the mental horizon, and made a right view of the story of Abel impossible. Abel was therefore at first (as it would seem from P) neglected. Afterwards, however, he was restored to more than his old position by devout though uneducated students of Scripture, who saw in him the type of the highest sanctity, that sealed by a martyr's death (cp Kohler, *JQR* v. 113 '93). The same view appears in parts of the NT (Mt. 23:35 = Lk. 11:41; Heb. 11:4; 12:24; 1 John 3:12). God bore witness, we are told (Heb. 11:4), that Abel was righteous — i.e., a possessor of true faith.

and it was by faith that Abel offered $\pi\epsilon\iota\sigma\iota\alpha$ (ᾠδὴν $\pi\epsilon\iota\sigma\iota\alpha$) $\theta\epsilon\omega$. Hence Magee assumes that Abel had received a revelation of the Atonement (1, 11 *ment and Sacrifice*, 1, 50; 3). The original narrator (J), however, would certainly wish us to regard Abraham as the first believer; the story of Cain and Abel is an early Israelitic legend retained by J as having a profitable symbolism for his own time.

tendency. On this earliest phase of belief, see C MS, § 4 f.
Meaning of the name.—The Massorists understood Abel
(Ġbel) to mean 'a breath,' 'sanity' (cf. Ps. 39 6 [7]); but
the true meaning, both of Abel and of the collateral form Jaba-
must be something concrete, and a right view of the story
favors the meaning 'shepherd,' or, more generally, 'herdman.'
This is supported by the existence of a group of Semitic words,
some of which denote domesticated animals, while others are the
corresponding words for their herdsmen. Cp., e.g., Ass. *diblu*,
'Lam, camel, ass' (but some explain 'wild sheep'; see Mss. S.
Ann. v. 7); Arab. *halbil*, 'herdman' (used widely; see PS, s.v.); Ar. bil, 'camels,' *abbil*, 'camel-herd.' The attempt of
Lennormand (*Les origines*, i. 170) and, upon definitely, Sayce
of a nature-myth, Abel (= Bab ablu, 'son') being originally 'the
only son Tammuz, who was a shepherd like Jaba and Abel'
(Sayce), and whom Lennormand regards as, like Abel in early
theology, a kind of type of Christ, is adventurous. The name
'son' is insufficient as a title of Tammuz (*Abal nārāz*); and
there is nothing said of a turning for Abel's death. The
title of 'shepherd' applied to Tammuz in R 27 r is explained
by the following word 'lord' (= Jeremiaš, *Tammuz Anmud*,
50). In the *Festament of Mani* (ed. James) Abū plays
the part of Judge of the nether world, like the Jamā (Yama)
of the Aryans.

ABEL (אֵבֶל, §§ 89-100) occurs, apparently in the sense of 'meadow,' in the place-names dealt with in the following six articles. As a place-name it is to be

struck out of $\alpha\sigma\delta\epsilon\lambda$, where for $\Delta\Gamma$ **עד אבל הנדולה** (so also Pesh.) Θ^A reads $\epsilon\omega\sigma$ (ϵ . $\tau\omega\sigma$ [1.] $\Lambda\theta\eta\sigma$ $\tau\omega\sigma$

RV). Ew., We., and others further change the points so as to read: 'and a witness is the great stone.' Dr.

suggests as an alternative: 'and still the great stone, whereon'—etc. On Abel in 2 S. 20:18, see ABEL-BERIT-MACRAIL.

ABEL - BETH - MAACHAH, RV, Abel - Beth -

Maacah (2 S. 20:14; אֲבֵלָה וּבֵית מַעַח, 'to Abel and Beth-maacah,' RV 'unto Abel and to Beth-maacah') [many strike out the conjunction, but the places may have been different; cp 2 S. 20:15 L₁].

ABEL-CHERAMIM

2 K. 15:29 [BVL], ΕΙΣ ΑΒΕΛ ΚΑΙ ΕΙΣ ΒΑΙΘΜΑΧΑ [H].
... ΒΗΘΜΑΧΑ [A]. κ. ΑΒΗΛΑ κ. ΒΑΙΘΜΑΧΑ [1.].
Cp 2 S. 20:15, אֶבְלָא וְבֵית בַּיְתָא. EV 'in Abel of Beth-
mau (heli), cp Αβελ της Βαιθμαχα [H], cp Α. της Βαιθμαχα [A], cp 27

ουκου (sh) Μαχα [A], Αβελμαχα [1.]; 2 K. 15:20, ΕΙΣ ΑΒΕΛ
Αβελ κ. της Βαιθμαχα [H], Καβελ κ. της Βαιθμαχα [A], Αβελ κ. της
Βαιθμαχα [1.]; 2 S. 20:15 (on which see ARAM, § 5), אֶבְלָא
EV Αβελ, (27) Αβελ [H].

This place, mentioned, although in now mutilated
form Αβελ, by Tiglath-pileser III (cp Schr. *VOF*
on 2 K. 15:29), is the present *Abil*—called also *Abil el-
Kiamh* ('of the wheat') to distinguish it from *Abil el-Suk*
(see ABILENE)—a small village inhabited by Christians on
the *Ahkr Barighil*, on a hill 1074 ft. above the sea,
overlooking the Jordan valley, almost directly opposite to
Rimidi, and on the main road thence to Sidon and
the coast. It is a strong site, with a spring and a
(probably artificial) mound; below is a broad level
of good soil, whence the modern name. See Yākhūt
156; Robt. *IBP* 372 f. (who argues against *Abil el-
Mizraim*, a site 8 m. farther north); *PEF. Mon.* 1. 85 107;
Merrill, *East of the Jordan*, 309, 315. In 2 Ch 16:1,
we have, instead of the Abel-beth-mamech of the
parallel passage (1 K. 15:23), ΑΒΕΛ ΜΑΙΜ (אֶבְלָא
מַיִם [A], -μαίμ [B], -μαίμ [1.]; cp Jos. *Ant.* vii.
121, Αβελμαίμ), or 'Abel of Waters,' a name suitable
for so well-watered a neighbourhood. On Judith 14:7,
where Pesh. reads Abelmeholah, and R. apparently Abelm-
maim, see BELMEN (cp also BERAI). On the ancient
history of the place see ARAM, § 5.

ABEL-CHERAMIM (אֶבְלָא כְרָמִים), 'meadow of vine-
yards,' § 103. ΕΒΕΛΧΕΡΑΜΕΙΝ [H]; ΑΒΕΛ ΑΜΠΕΛΑ-
ΝΩΝ [A]; Judg. 11:31 RV, the limit of Jephthah's
pursuit and slaughter of the Ammonites. Eus. and Jer.
(OS 2 225 961), Αβελ αμπελων, *Abel vinearum*) iden-
tify it with a village of their day, named Αβελ, 7 R.
m. from Philadelphia. This Abel may be any of the
many fertile levels among the rolling hills around
Amman, on which the remains of vineyards and of
terraces are not infrequent.

ABEL-MAIM (אֶבְלָא מַיִם), 2 Ch. 16:1, see ΑΒΕΛ-
ΒΕΤΘΙ-ΜΑΜΕΧΑΙ.

ABEL-MEHOLAH (אֶבְלָא מְהוֹלָה), i.e., 'dancing
meadow'; ΕΒΕΛΜΑΩΛΑ, ΑΒΩΜΕΗΛΑ, ΕΒΑΛΜΑ-
[B], ΑΒΕΛΜΑΟΥΛΑ, ΒΑΕΛΜΑΩ, [A]; ΑΒΕΛΜΕΟΥΛΑ,
-μαωλα [1.]; ΑΒΕΛΜΕΟΥΛΑ; Jos. *Ant.* vii. 137,
ΑΒΕΛΑ, the home of Elisha the prophet (1 K. 19:16),
and probably also of Abiel b. Barzilai 'the Meholahite'
(1 S. 15:1; 2 S. 21:1), is mentioned in conjunction with
Bethshean as defining the province of one of Solomon's
officers (1 K. 11:2). Gideon pursued the Midianites 'as
far as Beth-shittah towards Zorah as far as the border'
—lit. 'lip,' probably the high bank which marks the
edge of the Jordan valley proper—'of Abel-meholah, by
Tibbath' (Judg. 7:22). According to Eus. and Jer. (OS
97 11 227 35), Abelmahla (or Αβελμαελή) lay in the
Ghor, 10 R. m. to the south of Scythopolis (Bethshean),
and was still an inhabited village in their time, with the
name Bethaula, Βηθαυαλ (though they mention also
an *Ab. meia*, Αβελμαεία). This points to a locality at or
near the place where the *H. Milih*, coming down
from 'Am Milih, joins the Jordan valley.

ABEL-MIZRAIM (אֶבְלָא מִצְרַיִם) [see below], ΠΕΛΘΟΣ
ΔΙΓΥΠΤΟΥ [BVL]; so Pesh. Vg., Gen. 50:11 (H),
otherwise (cp 1:7) called GORSEN AVAD (גֹרְסֵן אַבָד);
ΑΛΩΝΙ ΑΤΑΛ [BVL], Α. ΤΑΛ [B^{vol}], Α. ΑΤΑΛ [D];
or 'the threshing-floor of the thorn-shrub' (EV 'of
ATAD,' see BRAMHAT 1), and said to be situated
'beyond Jordan' (cp 2: 10 J). It was there that Joseph
made a second mourning for his father, whence the

ABEL-SHITTIM

etymological play on the name (2: 11). After this,
Joseph and his brethren carried the embalmed body of
Jacob to Machpelah for burial, and then returned to
Egypt (2: 17, J and P). The words 'which is beyond
Jordan' (2: 10 J), however, cannot be accurate: the
original text of J must, it would seem, have been altered,
owing to a misreading or an editorial misunderstanding.
The circuitous route round the north end of the Dead
Sea has no obvious motive: had it really been meant,
something more would have been said about it (cp
Nu 11:25). For 2: 10, 'the Jordan,' J must have written
either 2: 10 J (less probably 2: 10 J), the most easterly
arm of the Nile (a frontier of Canaan, according to
Josh 13:1) or 2: 10 J, 'the stream'—i.e., the *Wady el-
Arish*, the usual SW. boundary of Canaan (cp Gen.
15:18, where J calls this Wady, not the S2 but the
27 of Egypt—i.e., 'the stream on the border of Egypt'
(Kautsch-Socini, on which see LXXV, RIVER OF).

The meaning of the narrative is this: At the first
Canaanite village (the first after the border had been
crossed) the 'great company' (2: 9) halted, while
Joseph and his fellow-Hebrews mourned in their own
way (cp 2: 18) in the very place where wedding and
funeral ceremonies are still performed in the Syrian
villages (Weitz.). The repetition of 'which is beyond
Jordan' must be due to the editor.

It is remarkable that Jer. (45: 8, 13), though he does not
question the reading 'beyond Jordan,' identifies *Arca Atath*
with *Archaia*—i.e., Βηθμαχα (G 55), which is certainly
on the west bank of the Jordan. Dillan is more consistently
conservative, and, followed by Sayce (*Orig. and Mon.* 27, 28),
finds in the trans-Jordanic Abel-Mizraim a testimony to the
Egyptian empire in Palestine in the pre-Mosaic age, proved by
the Amarna tablets. The exegetical difficulties of this view,
however, are insuperable.

As to the name Abel-mizraim it is not improbable that
its original meaning was 'meadow of Musri' (in N.
Arabia, see MIZRAIM), but that before J's time it had
come to be understood as meaning 'meadow [on the
border] of Egypt.' Cp Wi. *Akk. Forsch.* 34, and
see EGYPT, RIVER OF.

ABEL-SHITTIM (אֶבְלָא שִׁטִּים), § 100, i.e., 'the
meadow of the acacias'; Samar. omits the article; ΑΒΕΛ-
CATEIM [1.], Β. . . TTIM [A], -ΤΤΕΙΝ [1.], ΒΑΚΑ [B];
ABEL-SHITIM, Num. 33:49, or, more briefly, *Shittim*
(שִׁטִּים), 'the acacias,' CATEIM [B], -M [1.]; but
Nu. 25:1 CATEIM [F], -N [1.]; Josh. 2: 1 CATEIM [A],
ΕΞΑΤΤΕΙΝ [1.], 3: 1 ΕΚΑΤΤΕΙΝ [1.]; Mic. 6: 1 ΤΩΝ ΧΟΥ-
ΝΩΝ [BVL] (or ΧΑΙΝΩΝ? cp Sus. 54, in the Arabah
or Jordan basin at the foot of Mount Peor and opposite
Jericho). In the time of Jos. (*Ant.* iv. 84, v. 11) a town
named Abila (Αβίλα), rich in palm trees, occupied such
a site at a distance of 60 stadia (7½ R. m.) from the
river. Cp *B¹* iv. 7, 6, where it is described as near the
Dead Sea, and Jer. (Comm. on Joab), who locates it
6 R. m. from Livias. This seems to point to the
neighbourhood of *Khirbet el-Kefrin*, where the Wady
Kefrin enters the Jordan valley, and there are ruins,
including those of a fortress. It was at Abila, according
to Jos., that Moses delivered the exhortations of Dt.
The palm trees have disappeared, but there is an
acacia grove at no great distance (Tristram, *Conder*).
According to *KP²* v. 50, this is the Abul or 'Abel' men-
tioned among the places conquered by Thothmes III.

In Joab 3 [1] 2 222 should perhaps be treated as a
common noun and translated 'acacias' (so RV mg., and
Miri in *HS*: cp 222 222 222 [H 222]). At all events
the reference is not to Abel-shittim across the Jordan.
Some (We. Now.) think the name has been preserved
in the *Wady es-Sant* (see ELAM, VALLEY OF), but
the latter does not require the watering of which Joab
speaks; and he intends, rather, some dry gorge nearer
Jerusalem, perhaps (like Ez. 47: 12) some part of the
Kedron valley, *Wady en-Nar* (cp Dr. *ad loc.*; GASMI,
H¹ 511; also, for acacias on W. of Dead Sea, Tristr.
Land of Isr. 280, 298).

ABEZ

ABEZ RV Ebez (עֶבֶז: עֶבֶז [B], אֶבֶז [V], -wīc [L], אֶבֶז; Josh. 19.48f.),¹ one of the sixteen cities of Issachar. The site is unknown, but the name is evidently connected with that of the judge IZZAS (עִזָּא) of Bethlehem—i.e., the northern Bethlehem. This Bethlehem, it is true, is Zebulunite, while Ebez is assigned to Issachar; but the places must have been very close to each other, and the toponym, doubtless varied. Consider identification with *El Ebez*, 2 mi. from Beit Lahm, might suit as to position, but 'the white village' can have nothing to do with the old name.

W. R. S.

ABI (עֲבִי so Targ. Jon.; abbrev. of אֲבִיךָ הוּא; אֲבִי [B], אֲבִי [L]; Jos. 'אֲבִי' [B], daughter of Zechariah, wife of King Abaz, and mother of King Hezekiah (2 Ch. 18.18). In the parallel passage (2 Ch. 29.1) the name is given as אֲבִיחִי (עֲבִיחִי [B] see Swete), אֲבִיחִי [A], אֲבִי [L]; אֲבִי [A]; אֲבִי, but the probability is perhaps in favour of the contracted form in K. (So Gray, *HPA* 24.)

ABI. Names with. There has been much discussion as to the interpretation of the names compounded with *abi*, *abi* and some other words denoting relationship¹ (cp AMMI, HAMMI, etc.). Without assuming that this discussion is in all points closed (cp NAMES, § 41) the writer thinks it best to state the theory which he has himself long held, adopting certain points (with acknowledgment) from Gray's very lucid and thorough exposition, and then to consider the religious and archaeological aspects of the subject.

The question whether these names are sentences has long been answered by some critics in the affirmative, and the arguments of Gray (*HPA* 73-86)

put the student in possession of all the points to be urged. He also ably criticises the alternative view (viz., that the two elements in Abimelech, Ammiel, etc., are related as construct and genitive). It is usual to refer on this side to such Phoenician names as אֲבִיחִי, in which the term of relation is always fem. in names of women and masc. in those of men. But this is decisive only for Phoenician names, and even in their case only for names in אֲבִי and אֲבִי ('brother' and 'sister'). Compounds with *ab* ('father') are used indifferently of men and women in Phoenician, just as they are in Hebrew. In the latter case, therefore, at least, the term of relation cannot refer to the bearer of the name—i.e., cannot be in the construct state. No doubt in Ps. 110.4 Melchizedek (which suffers, along with other compound names containing a connective *i* [see below, § 3], from the same ambiguity as names containing a term of kinship) is understood as a construct relation, 'king of righteousness', and the phrase אֲבִי שָׁלוֹם—as we should certainly read in Is. 9.5 [6] for אֲבִי שָׁלוֹם²—obviously means for the writer 'glorious father' (i.e., glorious ruler of the family of Israel; cp Is. 22.21). It would seem, therefore, that in the post-exilic age some names of this type were so understood. But we must remember that in later times the original sense of a formation may be forgotten. Gray's main objections to taking *abi* etc., as originally constructs are as follows: (1) The theory will not account for names like Eliab, Joab, etc. Eliab clearly stands to Abiel as Elijah to Joel; in the latter case the

¹ On some possible but by no means clear instances of *am*, 'mother', in compound names, see Gray, *HPA* 64 n. 3.

² The interpretation of אֲבִי שָׁלוֹם as 'enveloping one' stands or falls with the interpretation of אֲבִי, 'Abimech' as 'father of graciousness', and of Abitab as 'father of goodness'. Though defended by reference to such names by Guthe (*Zukunftsbild* 188, 1178), it is now generally rejected in favour of 'perpetual father (of his people)', or 'father (i.e. producer) of booty'. But neither of these explanations gives a satisfactory parallel to 'prince of peace'. We must read אֲבִי שָׁלוֹם, 'Prince of peace', suggests a reminiscence of Abisalom, which the writer probably interpreted 'father of peace' (i.e., peaceful or prosperous) ruler.

ABI

genitive relation is excluded, inferentially it is equally so in the former. (2) The use of *ab* with a noun denoting a quality is a pure Arabism¹ which should not be lightly admitted, while such an interpretation as 'father of Yah' for Abijah is unlikely. (3) A woman's name like 'brother of graciousness' (Abimech) is inconceivable.² In favour of taking the names compounded with a term of relationship as sentences Gray urges that, though *ab*, *ab*, 'am' etc. all denote a male relative, the proper names compounded with them are used indifferently of men and women, while, on the other hand, nouns with *ben* (son) prefixed are used exclusively of men, the corresponding names of women having *bat* (daughter) for *ben*. He infers, therefore, that, while in the case of names in *ben* and *bat* the element denoting kindred refers to the bearer of the name, in the case of *ab* etc. it does not.

Assuming that these compound names are sentences, are there grounds for determining which of the two elements is subject and which is predicate? (1) In cases like Abijah, Abijah, only the first part can be regarded as indefinite³ and therefore is predicate. We must, therefore, render 'Yahwe is father,' etc. The same principle would apply to Joab, Joab (if these are really compounds). Quite generally, therefore, whenever one element is a proper name it must be subject.⁴

But (2) a divine proper name may give place to *sh* (god) or some divine title—e.g., Lord. Hence Abiel, Abimelech, will be best explained on the analogy of Abijah—i.e., 'God is father', 'the divine king is father'. Lastly (3) the divine name or title may give place to an epithet, such as *ram*, 'lofty'. Here the syntax is at first sight open to doubt. The usages of the terms of relationship in the cases just considered would suggest that *ram* in Abi-ram is subject; but the fact that *ram* nowhere occurs by itself designating Yahwe seems to the writer to show that it must be predicate. Abi-ram, therefore, means, not 'the exalted one is father,' but 'the (divine) father is exalted.' Cp ABONIRAM, ITORAM.

The question whether the connective *i*, which occurs in most of the forms, is the suffix of the first pers. sing., or an old ending, has been variously answered. Should Abimech, Abimech

3. Connective *i*. Should Abimech, Abimech be rendered 'my father (or my brother) is graciousness' (see Olshausen, *Lehrb. d. hebr. Spr.* § 277 e), or 'the (divine) father, or brother, is graciousness'? Gray well expounds the reasons for holding the latter view. Thus, there are certain forms in which *i* does not occur, e.g., Abram, Absalom, beside Abi-ram, Abi-ram. We also find Abiel beside Eliab. Lastly, the analogy of אֲבִיחִי (Jeremiah), אֲבִיחִי (Hezekiah), etc., favours the theory that the names before us contain utterances respecting the relation of a deity to all the members of the tribe or clan which worships him. To some this may appear a slight argument; but to the writer it has long been an influential consideration. An argument on the opposite side offered by Boscawen and Hommel will be considered later (see § 5).

It is not easy at first to appreciate, or even to understand, the conception which underlies compound names of this class. The representation of a god as the father of a tribe or clan may be less repulsive to us than the representation of him as a brother or as some other kinsman. Even a prophet does not object to the expression 'sons of the living God' (Hos. 1.10 [2]; see the commentators), but any one can see that to substitute some other relation

¹ Rare in ancient Arabic (see NAMES, § 43).

² It is if in modern Ar. *abu* is so used of a woman (see NAMES, § 43, third note).

³ This assumes that the connective *i* is not pronominal (see below, § 3).

⁴ The same principle will apply to other compounds containing, instead of a term of kinship, a title, e.g., as in MELCHIZEDEK (9.7), ABONIRAM, etc., or a concrete noun, as in URIAH.

ABIGAIL

is called Nahash (an error also found in **89**), and clearly produced by the proximity of that name in **27**; **89** gives the correct reading, 'Jesse' (*tseda*), and his husband is called 'the Ishmaelite' (so **MT**, *ʿisḥmaʿelīy*) [**B**], ~~אִשְׁמָאֵלִי~~, which, however, seems to be a corruption from the 'Jezreelite' (*ʿisḥmaʿelīy*) [**L**], *de Jezreel* [cf. **Rom** *de Jezreel*]; **Amitt** [**h**], *metas*, 'Ammoon or Jezreelless' (LS **27**), becomes in **B** *ʿisḥmaʿelīy* *q* *de ʿisḥmaʿelīy*. It is true, in **L** *h* *ch* *q*, 'Ishtar' is called 'the Ishmaelite' (*ʿisḥmaʿelīy*) [**B**], *ʿisḥmaʿelīy*, but this is plainly a conjectural emendation of the 'Jezreelite'; indeed his *ʿisḥmaʿelīy* [**h**], *metas*, 'Ishtar' is called 'the Ishmaelite' [**B**], *ʿisḥmaʿelīy* [**L**], *de Jezreel*. It was the Jezreelite situated in Judah (Josh. 15. 6), from which not only David's brother-in-law but also his first wife Ahinoam probably came (so **Marq.** **Fund.** 24, see **H. E. F. 11**, p. 24). T. K. C.

ABIGAIL (2817), RVF See ABIGAIL, 2

ABIHAIL (אֲבִיחַיִל, *s.* 45, 'the (dhyne) Lither is strength,' cp *Sib.* אֲבִיחַיִל and the S. Arabian woman's name, Ba hāl [Hommel, *IEIT* 320]; written אֲבִיחַיִל [Gk. Ba [in 2 and 4, Hommel] in the Ebers-Festschrift, 20]; cp *IEIT* 320 compares the same name with ה in S. Arabian inscriptions from Ghazir, 1906).

אֲבִיחַיִל is supported by Θ , אב[ח]ע[ח]א[ח] [BA1],
 ܐܒܝܚܝܠ, *ARH* III, *ARH* IV)

1. Father of ZERU (Nu. 3:5f, ἀδελφὰ [F])
 2. Wife of Abishai the Gathite (1 Ch. 2:24
 28 [G, B], [A], ἀδελφὰ [B], ἀδελφ[Α], ἀδελφ[Γ])
 3. A Goliath (1 Ch. 9:3f, υἱὸς ἑλίου [BA], ἀδελφ[Α]

4. Daughter of Eliah, David's brother, and wife of Eshbom (2 Ch. 11: 1, שִׁשְׁבַּי [Sh. Ba.] | שִׁשְׁבַּי [B], אֶת-שִׁשְׁבַּי [B] and], אֶת־שִׁשְׁבַּי [A], τοῦ πατρὸς αὐτοῦ [L, who reads אֶת־שִׁשְׁבַּי בֶּן־עֲלִיָּה]).

5. Father of Esther, whose name however is given as Aminadab by **𐎠𐎵** (Esth. 2:15-9:24), $\alpha\mu\iota\epsilon\{\mu\alpha\delta\alpha\beta\}$ [**𐎠𐎵𐎠𐎠𐎠𐎠𐎠𐎠**], and $\delta\alpha\tau$ [**𐎠𐎵**])

ABIHU (אֲבִיחִי, § 44, 'my father is he'; אΒΙΟΥΔ [BAL], *cf.* אΒΙΟΥ 'ABICOYD [A in Ex. 62], אΒΙΟΥ. See NABAR AND ABIM.

ABIHUD (אַבִּיהוּד, § 45, 'the (divine) father is glory'), a name probably appearing in contracted form in **אֲבִיהוּדָה** and in **אֲבִיהוּדָה**, **אֲבִיהוּדָה**, **אֲבִיהוּדָה** (cf. **אֲבִיהוּדָה**), an almost certain connection of **אֲבִיהוּדָה** [EV 'everlasting father' in Is. 95, which, however, is to be treated as an Arabic *kuzen*, 'father of glory' (Che. 'Israh,' in *SBOT*); **אֲבִיהוּדָה** [B.M.]; **אֲבִיהוּדָה** (Benjamite in Ch. S.D.).

ABIJAH (אֲבִיָּהָא, אֲבִיָּהָה, § 44, 'Yahwe is father'; on names ending in יָהּ, יָהִי, see NAMES, § 24, אֲבִיָּהָא [BAL.]).

1. Son of Rehoboam by a 'daughter of Absalom' (see *Macc* II, 31), and for three years king of Judah (somewhere about 400 B.C.; see *CHRON* II, 23).

32). The writer of the 'epitome' in Kings (see Dr. *Introd.* 178) only tells us (1 K. 15: 57)⁴ that he continued his father's war against Israel, and that he

¹ A more sophisticated $r_0(A) \neq r(A)$ so invariably in the case of $A \otimes_{\mathbb{Z}} \mathbb{Q}$.

² Yet PA have a BOM (i.e., α_{BOM}) 5 times for Alajon. See AUMH, 100 pl.

²⁰ In QSM this name is regularly substituted for Abder of M.F. xv. l. x. 6. (A). See *Ann.*

David had died, that which was right . . . all the days of his

life." From all the days of his life (1 Ch. xiii. 20) and Jeroboam (so read) in accordance with their parents (in 2 Ch. xxi. 25) and Jeroboam is probably a late gloss from the margin. The note respecting the war between Abiah and Rehoboam seems to be derived from 2 Ch. xiii. where alone it is found.

ABILENE

I walked in all the sins of his father;¹ and, since the first of these notices is very possibly due to an interpolator, we may confine our attention to the second. Why then does the epistomist take this unfavourable view of Abijah? As Stade points out, he must have read in the Annals of the kings of Judah statements respecting this king which, if judged by the standard of his later day, involved impurity, such as that Abijah, unlike his son Asa, tolerated foreign worship. It is surprising to find that the Chronicler (2 Ch. 13) draws a highly eulging portrait of Abijah, whom he represents as delivering an earnest address to Jeroboam's army (for there was war between Abijah and Jeroboam) on the side of rebellion and schism, and as gaining a great victory over the Israelites, because he and his people 'rebel on Yahwē the God of their fathers'. This, however, is a late Midrash, and has no historical value. The Chronicler (or his authority) wished to emphasize the value of the true ritual, and did this by introducing an artificial episode into an empty reign. ¹ Bennett, *Chron.* 320 ff. (Pesh. always **לוי**; Jos. **לזא** in 1 K. 11: 15 ff., MT has two times the corrupt reading **לזא** **אויזא**,¹ **אזא**² [BA], **לזא** [L.])

2. A son of Jeroboam I, king of Israel, who died in his father's lifetime.³ The account of his illness is given in 1 K 14:1-9 (MT 69), and in another recension in 69: immediately after the narrative of Jeroboam's return from Egypt on the death of Solomon (1 K 12:4 R^gg, Swete, 131-13, 1-). If we accept the former version as original, we are bound to bring it down to the age which was under the influence of Dt., for the prophecy in 1 K 14:9-10 is in tone and phraseology closely akin to similar predictions in 14:1-4, 21:20-24, 2 K 9:7-11, the Deuteronomic affirmations of which are unmistakable. Nor is it possible to simplify the narrative without violence. The 69 version, on the other hand, con, without arbitrariness, be brought into a simple and very natural form. Jeroboam is not yet king. His wife, not being queen, has no occasion to disguise herself, and Mijch simply predicts the death of the sick child, without any reference to sins of Jeroboam which required this punishment. The writers who supplemented and expanded the older narrative were men of Judah; the original story, however, is presumably Israeliish. (See Kue. I, 200; St. G¹ 11, 350 n.; Wü. *AltUnters.* 12 ff.)

4. Wife of Bezor: $\alpha\beta$ ουδ [B], ου [A]).

5. Son of the prophet Samuel, 1 S. 8:2 (AV: AMIAU: *agm*)

6. The eighth of the twenty-four courses of *PROUSTAS* (*ΠΡΟΣΤΑΣ*)

that to which Zechariah, father of John the Baptist, belonged (Ch. 24 to AV; Aram. 24; Lk. 1:5† (AV; Aram. 1:5)).

8. Priest in Zerubbabel's band (see Ezekiel ii 8-9). See *Art.*

u. Privately signatory to the covenant (see *FRYER*, ii. § 66), Neh. 12
10. 11. 12. 13. 14. 15. 16. 17. 18. 19. 20. 21. 22. 23. 24. 25. 26. 27. 28. 29. 30.

[8].

ABIJAM (אֲבִיָּאָם), 1 K. 11 f. + See **ABIJAH**, 1

ABILENE (ΑΒΙΛΗΝΗ {BA; W. and IL.}, ΔΒΙΑ, [S¹, 1-1]), given in Lk. 3 as the tetrarchy of Lysanias, at the time when Christ's ministry began, was a territory round Abila (ΑΒΙΛΑ), a town of some importance in Antilbanus, and known to both Josephus and Ptolemy as Abila of Lysanias (Α. ἡ Ἀναταλίη), to distinguish it from others of the same name, especially Abila of the Decapolis (L¹, 3). The Antonine and Peutinger itineraries place it 18 R. M. from Damascus on the way to Heliodorus or Balbek, which agrees with that portion of the gorge of the Amanus! The present village, Sak Wady Barada, lies N. of it. There are remains of a large temple on the precipitous heights to the E. of this village, with ancient aqueducts and a Roman road.

¹ It is defined, however, by Jastrow, *J. Biol. Chem.* 114 (1934).

³ Josephus calls this son 'Othniel' (*J. War.* 1.11).

ABIMAEEL

tombs and other ruins on both sides of the river, but inscriptions have been discovered, one of which records the making of the road by 'a freedman of Eysmas the tetrarch,' and another its repair 'at the expense of the Abilemans.' Moreover, a Moslem legend places on the temple height the tomb of Abel or Nebi Halal, doubtless a confused memory of the ancient name of Abila, which probably meant 'meadow' (cp. AMI, AMI, BITH-MACHAL). The place was, in fact, still called *Abel es-Sab* by Arabic geographers (e.g. *al-Buhārī*, 14). The site is, therefore, *Abel es-Sab* (170 f.) and Porter, *Five Years in Syria*, 1: 101. There is a plan of the gorge (C) on the political maps of Palestine, see LXXIV.

ABIMAEEL (אֲבִימָאֵל, read as a native 'ep Sab, name אֲבִימָאֵל, 'a father is 'Ava, 'Ama, Hal. *ABD*, *ZD* 16, xxxv, 18-183, and see J. KAHN 11, 1 n. 1) **ABIMECH** [M.]; Bome, or wanting, a descendant of JOKAN (Gen. 10:22). **ABIMECH** [L.]; 1 Ch. 1:1. **ABIMECH** [L.]. Tribal connection uncertain, but see Glaser, *Studia*, n. 420.

ABIMELECH (אֲבִימֶלֶךְ, אֲבִימֶלֶךְ [B.M.], אֲבִימֶלֶךְ [B. Judg. 9:9], i.e., most probably, 'Melech (Mlk), the divine king, is father.' Abimelech and Abimelech occur as names of princes of Arad in the Annals of Ashurnipal (*AB* 11, 12 f.); the former name, which is evidently Canaanite, also belongs to the Egyptian governor of Tyre in the Amarna tablets.

1. A Philistine, king of GERAR (see below), Gen. 26:7-11, who, according to a folk-story in J, took Rebekah to be Isaac's sister, and reproved Isaac for having caused this mistake, and so very nearly brought guilt upon the Philistines. The same tradition is preserved in E (Gen. 26), but without the anachronistic reference to the Philistines. The persons concerned are Abimelech, king of Gerar, Abraham, and Sarah. The details are here much fuller, and the differences from J's narrative are striking. There is reason, however, to think that the narrative of E in its original form made no mention of Gerar. In this case the principalty of Abimelech was described by E simply as being 'between Kadesh and Shur' (omitting the following words). In J's account (Gen. 26) there are traces of a confusion between two Gerars, the more southerly of which (the true seat of Abimelech's principalty) was probably in the N. Arabian land of Mesir (for particulars on this region see MIZRAIM, § 2 [f.]). J's account also refers to disputes between the herdsmen of Abimelech and those of Isaac about wells, which were terminated by a covenant between Isaac and Abimelech at Beersheba (Gen. 26:17-33). The Elohist form of this tradition passes lightly over the disputes, and lays the chief stress on the deference shown to Abraham by Abimelech when the oaths of friendship were exchanged. The scene of the treaty is, as in J, Beersheba (Gen. 21:22-32). On Ps 34, title, see ACHISH.

2. Son of Jerubbaal (Gideon). His history, as related in Judg 9, is of very great value for the light which it throws on the relations between the Israelites and the older population of the land in this early period. His mother was a Shechemite, and at his father's death he succeeded, through his mother's kinsmen, in persuading the Canaanite inhabitants of Shechem to submit to his rule rather than to that of the seventy sons of Jerubbaal. With silver from the temple-treasure of BATH-BERITH (7:1) he hired a band of braves and slaughtered his brothers, Jotham, the youngest, alone escaping, and was acclaimed king by the people of Shechem and Beth-millo, at the sacred tree near Shechem. From a safe height on Mt. Garizim, Jotham cried in the ears of the assembly his fable of the trees who went about to make them a king (see JOTHAM, 1), and predicted that the partners in the crime against Jerubbaal's house would destroy each

ABINER

other, a prophecy which was signally fulfilled. After a short time (three years, 9:22), the Shechemites rose against Abimelech.

Of the way in which this came about, and of Abimelech's vengeance, the chapter contains two accounts. According to the first of these (9:23-28, 30-31), an evil spirit from Yahweh sows discord between the Shechemites and Abimelech, who takes the city by a stratagem and totally destroys it. According to the other account (9:29-30), the insurrection is fomented by a certain Gaal, the son of Abimelech, who shrewdly appeals to the pride of the old Shechemite aristocracy against the Israelite half-breed, Abimelech. Abimelech, apprised of the situation by Zebul, his lieutenant in the city, marches against it, Gaal, at the head of the Shechemites, goes out to meet him, but is beaten and driven back into the city, from which he, with his partisans, is expelled by Zebul on this episode, cp. GAAL. Abimelech, carrying the war against other places² which had taken part in the revolt, destroys Migdal-Shechem (9:46-47, sequel of 17:1-2). While leading the assault upon Thebez he is mortally hurt by a mill-stone which a woman throws from the wall. To save himself from the disgrace of dying by a woman's hand, he calls on his armour-bearer to despatch him (9:54-55; cp. 1 S. 31:4).

Many recent scholars gather from the story of Abimelech that Israel was already feeling its way towards a stronger and more stable form of government. Jerubbaal, it is said, was really king at Ophrah, as appears from Judg. 9:24. His son Abimelech reigned not only over the Canaanites of Shechem, but over Israelites also (9:55). A short-lived Monastite kingdom thus preceded the Benjaminite kingdom of Saul (We., St., K.). This theory rests, however, on very insecure foundations. That Jerubbaal's power descended, if Abimelech's representation is true, to his seventy sons (9:2), not to one chosen successor among them, does not prove that he was king, but rather the opposite. Abimelech was king of Shechem, to whose Canaanite people the city-kingdom was a familiar form of government; that he ruled in that name over Israelite towns or clans is not intimated in the narrative, and is by no means a necessary inference from the fact that he had Israelites at his back in his effort to suppress the revolt of the Canaanite cities (9:43). Cp. GIDEON.

G. E. M.

3. 1 Ch. 18:6. A scribe's error for ABIMELECH. See ABIMELECH (note).

ABINADAB (אֲבִינָדָב, 'my father appertains,' see NABU, §§ 44, 46, or 'the father (i.e., god of the clan) is abundant,' cp. Ichonadab; אֲבִינָדָב [BNA], אֲבִינָדָב, [L.]).

1. David's second brother, son of Jesse; 1 S. 16:17-18, also 1 Ch. 2:13 (acc. [L.]). See DAVID, § 4 (a).

2. Son of Saul, slain upon Mt. Gilboa, according to 1 S. 31:2. The name Abinadab, however, is not given in the list in 1 S. 11:4. There may have been a mistake; Jesse's second son was named Menadab. So Marq. *Paral.* 25 (אֲבִינָדָב [B] i.e., JONADAB [9:1, 3]). 1 Ch. 8:33-34; also 1 Ch. 10:2 (אֲבִינָדָב [B] i.e., אֲבִינָדָב, [L.]).

3. Of Kirjath-jearim, in whose house the ark is said to have been kept for twenty years (1 S. 7:1 f.; 2 S. 6:1 f.; 1 Ch. 13:7). See ARK, § 5.

4. 1 S. 11, see BEN ABINADAB.

ABINER (אֲבִינֵר, 1 S. 14:5 f. AV mg.). See ABNER.

1. Judg. 9:21: 'Who is Abimelech, and who is Shechem, that we should be subject to him? Were not the son of Jerubbaal, and Zebul his lieutenant, subjects of Hamor (the blue blood of Shechem)? Why should we be subject to him?' For other interpretations and emendations of this non-lexical verse, see Moore, *Indices*, 25.

2. On the statement (Judg. 9:2) that 'Abimelech ruled over Israel three years,' see Moore, *Indices*, 25.

3. Judg. 8:22 f. is considered under GIDEON. Cp. also Moore, *Ju. ges.*, 209 f.

ABINOAM

ABINOAM (אֲבִינוֹאָם, § 45, 'the (divine) father is pre-eminence,' cp Abin-um, El-naam; אֲבִינֶעֱמָ [BAL], אֲבִינֶעֱמָ [A in Judg. 1:2]; אֲבִינוֹאָם, father of Barak (Judg. 4:12, 13).

ABIRAM (אֲבִירָם, § 44, 'the Father is the High One,' cp Abi, NAMS WITH, § 2; אֲבִירָם [BA], אֲבִירָם [L], אֲבִירָם [A], another form of Abu-rum, which (Abu-rum) is a well attested Babylonian and Assyrian name (it occurs in a contract-tablet of the time of Malsin, 2321-2300 B.C., and in the Assyrian eponym canon under B.C. 677).¹ The second element in the name (-ram) is a divine title (cp 'Papas δὲ θεός, Hesyeh), but is also used, in the plur., of all heavenly beings (Job 21:22). Parallel Hebrew names are Abi-rum, Adon-rum, Jeho-rum, Malch-rum (see also ABRAHAM). Abir-um is the name of a petty Babylonian king under Asur-nasir-pal, and Malk-rum-um that of a king of Edom in the time of Semai herib (*OT* 195, 281).

1. A fellow conspirator of DATHAN (q.v.), Nu 16 (אֲבִירָם [A once], אֲבִירָם [F twice], Dt 11:6 Ps. 106:17 and (AV ABIRAS) Eccles. 45:1, 4 Mace. 2:17 אֲבִירָם [A]).

2. Eldest son of Hiel the Bethelite, who died when his father laid the foundation of Jericho anew; 1 K. 16:34 (ABIRAM; L om. verse), cp Josh. 6:26 (אֲבִירָם, T. K. C.).

ABIRON (אֲבִירֹן, Eccles. 15:14 AV, Se. ABIRAM, 1.

ABISEI (אֲבִישַׁי etc.), 1 Esd. 1:1. See ABISHUA, 2.

ABISHAG (אֲבִישָׁג, § 45, meaning obs. ur; אֲבִישָׁג [B], אֲבִישָׁג [M], אֲבִישָׁג [L]; אֲבִישָׁג [A] the Shunammite, David's concubine (1 K. 1:1-4), afterwards sought in marriage (2 S. 13:1) by ADONIJAH, 1.

ABISHAI (אֲבִישַׁי, § 45, written אֲבִישַׁי in 2 S. 10:1) and always [five times] in Ch., where moreover A omits final *i*; meaning doubtful, cp JESSE, AMASA, and for Lag's view see ABNER; אֲבִישַׁי [B], A om. אֲבִישַׁי [A], אֲבִישַׁי [A three times], אֲבִישַׁי [L, also seven times B, and three times A], אֲבִישַׁי [A, 1 Ch. 2:16], אֲבִישַׁי [A, 2 S. 3:3], אֲבִישַׁי [L, 2 S. 20:3], the brother of Joab, is mentioned immediately after the 'first three' and at the head of 'the thirty' in the list of David's worthies (2 S. 23:13 ff.; 1 Ch. 11:20 ff.; reading 'thirty' for 'three' with *SHOT* etc., after Pesh.). He was one of David's close associates during his outlawry, and was his companion in the visit to Saul's camp on the hill of Hachilah (1 S. 26:6). He was faithful to him in Absalom's rebellion (2 S. 16:9), commanded a third part of the army (2 S. 18:2), saved David's life when it was threatened by a Philistine (2 S. 21:16-17), and, according to the Chronicler (1 Ch. 18:5), slew 18,000 Edomites in the Valley of Salt (but see JOAB, 1).

ABISHALOM (אֲבִישָׁלֹם, 1 K. 15:21 ff. See ABSALOM, 1.

ABISHUA (אֲבִישׁוּא, § 44, for view of Lag, see ABNER; 'the (divine) father is opulence?' cp MALCHISUR, and *Abi-shua*, Wi. *OT* 139 n. 3. See also Hom. *ITP* 101, 103 n. 209 n. 1, *ZDMG* xlv, 525 (1905).

1. A son of BELA (q.v. n. 2), 1 Ch. 8:4 (אֲבִישׁוּא [B], אֲבִישׁוּא [M], אֲבִישׁוּא [L], אֲבִישׁוּא [A]).

2. D. Phinehas, b. Eleazar, b. Aaron (1 Ch. 6:4, 15:17, 50:15), אֲבִישׁוּא [B], אֲבִישׁוּא [L], Ezra 7:5.

3. See Hommel, *PSR* I, vi, 212 (1911), Schr. *OT* 11, 187.

4. Fritsch and Maspero connect this name with Ab-sha, the Egyptian form of the name of the Asiatic chief represented in a famous wall painting at Beni-Hasan. But such evidence is wanting. See JOSEPH, 1, § 10, and cp WMM, xlv, n. 100 (1906 n. 2). Hommel (*ITP* 53) connects Ab-sha or Ish-sha with Abishua.

5. This presupposes אֲבִישׁוּא, a name for which there is no parallel in the OT, cp SAMSON, SICHAI.

ABNER

אֲבִינֶעֱמָ [BAL] = 1 Esd. 8:2, ABISUM [AV], i.e., אֲבִינֶעֱמָ [243, 248], RV ABISUM to Isaac [B], אֲבִינֶעֱמָ [A], אֲבִינֶעֱמָ [L]. Called Abisur in 4 Esd. 1:1 (Abisur [ed. Bously], Abisur [ed. Anb.]).

ABISHUR (אֲבִישׁוּר, § 44, 'the (divine) father is (as) a wall?' cp Saul, אֲבִישׁוּר, Asyr. *Abishur*; אֲבִישׁוּר [BA], אֲבִישׁוּר [L], אֲבִישׁוּר [A], b. Shammur the Jerahmeelite (1 Ch. 2:40, 11). Dorenborg (*AV* 1, 1880, p. 361) gives אֲבִישׁוּר as a Hittite divine title (Hitt. 1:1, 50). But the second part of Abi-shur may be a corruption of אֲבִישׁוּר; cp ABISHUM.

ABISUM, RV Abisur (אֲבִישׁוּמ [243 etc.], 1 Esd. 8:2, 1 Esd. 7:5, ABISHUA, 2.

ABITAL (אֲבִיטָל, § 45, 'my father is dew?' cp HAMUTAL; but should not these names be Abitub (אֲבִיטָב), Hamutub, cp ABITUB? A name com-

pounded with אֲבִי seems very improbable. אֲבִי and אֲבִי might be conformed in Palmyrene characters; *ABITAL*; wife of David, mother of Shephatiah; 2 S. 34, 1 Ch. 3:1 (אֲבִיטָל, THE GAB. [B], אֲבִיטָל [M], אֲבִיטָל [L]). In 2 Ch. 36:2, אֲבִיטָל reads אֲבִיטָל for HAMUTAL, the name of Jehoiakim's mother. T. K. C.

ABITUB (אֲבִיטָב, perhaps properly, as in versions, ABITUB, 'the (divine) father is good,' see NAMS, § 45; cp AMM. אֲבִיטָב; אֲבִיטָב [BAL]; *ABITUB*, b. Shalharaim (1 Ch. 8:11).

ABIUD (אֲבִיוּד [BA], אֲבִיוּד [N], i.e., Abihud, or Abihud, son of Zerubbabel, and ancestor of Joseph, husband of Mary (Mt. 1:13), see GENEALOGIES OF JESUS, § 2 c.

ABNER (אֲבִנֶר, § 44, but in 1 S. 11:50 אֲבִנֶר; אֲבִנֶר [BAL], אֲבִנֶר [A five times], אֲבִנֶר [A twice], ABNER. Lag. *OT* 75, holds that Abner = אֲבִינֶר = 'son of Ner.' This is suggested by the form 'Abenner'; but cp אֲבִינֶר = *Pejeka*, אֲבִינֶר = *Bozoph*. 'Abner' or 'Abiner' might mean 'my (divine) father is (as) a lamp'. Captain of the host under Saul and under Ishbaal. As a late but well-informed writer states, he was Saul's first cousin (1 S. 11:50, cp 9), Ner the father of Abner and Kish the father of Saul being both sons of Abiel. The fortunes of Saul and Abner were as necessarily linked together as those of David and Joab, but tradition has been even less kind to Abner than to his master. Of his warlike exploits we hear nothing, though there was 'sore war against the Philistines all the days of Saul' (1 S. 11:52), and tradition loved to extol the prowess of individual heroes. Even at the battle of Gilboa there is no mention of Abner, though it was a part of his duty, according to David, or at least an early narrator, to guard the sacred person of the king (1 S. 26:13). All that we hear of him in Saul's reign is that he sat next to the king at table (1 S. 20:25), that, according to one tradition, he introduced David to the presence of Saul (1 S. 17:57), and that he accompanied the king in his pursuit of David (1 S. 26:5 ff.). It was natural that upon Saul's death he should take up the cause of Ishbaal (DAVID, § 6). It suffices to mention here some personal incidents of that unhappy time. That Abner slew his pursuer Asahel (one of Joab's brothers) was, doubtless, not his fault but his misfortune. But his motive in passing over from Ishbaal to David was a shameful one. Ishbaal may indeed have been wrong in interpreting Abner's conduct to Rizpah, Saul's concubine, as an act of treason (cp 2 S. 16:2, 1 K. 2:22); but to give up the cause of the Benjamite kingdom on this account, and transfer his allegiance to David, was

1 In 1 S. 11:51 read אֲבִינֶר for אֲבִינֶר with Jos. *Ant.* vi. 6, 6, followed by Dr., Bu., Klo. The text of 1 Ch. 8:13, 9:39 should doubtless read, 'And Ner begat Abner, and Kish begat Saul' (see K. in note in *ITP*).

ABOMINATION

ignoble. The result was not what he had expected—the highest place under a grateful king. He had just left David with the view of procuring a popular assembly for the recognition of David as king of all Israel, when Joab entered, a lackey, and treacherously assassinated him beside the gate of Hebron (see STRAU, WILLIAM, partly perhaps from jealousy, partly in revenge for the death of Abiathar) (2 S. 3.30).

Abner's death was regarded by David as a national calamity. 'Know ye not,' he said, 'that a prince and a great man is fallen this day in Israel?' He ordered a public mourning for Abner, and himself sang an elegy over his grave, a fragment of which is preserved (2 S. 3.31-32); see POPE, ALFRED, § 4. iii. (b). The Chronicler gives Abner a son named JAASIEL (2 S. 3.30).

ABOMINATION, a word occurring over a hundred times in the OT as a rendering of four¹ somewhat technical expressions (sometimes paraphrased 'abominable thing,' etc.).

1. **שֶׂמֶט** (*semet*) occurs four times in exile and post-exilic writings (Lev. 17.14 [שֶׂמֶט], Lev. 7.18 *מִסְמָה*; 19.7 *מִסְמָה*; 15.17 [שֶׂמֶט], 'broth,' *λῶβον* . . . *μολογμένα*; Kt. שֶׂמֶט, 'scraps') is a technical term for sacrificial flesh become stale (*לֶחֶם עֵלֶיךָ* or *לֶחֶם עֵלֶיךָ* in Ez. [BAQ]), which it was unlawful to eat. See SACRIFICIAL. In the last passage WRS regarded *שֶׂמֶט* as carrion, or flesh so killed as to retain the blood in it (AS² 343 n. 3).

2. **רָעָה** (*ra'ah*), also confined to exile and post-exilic writings² (Ez. 8.10, Lev. 7.21, 11.42, 15.17, *רָעָה* [BAQ]), is a term for what is taboo. See CLEAN AND UNCLEAN.

3. **שִׁכְלָה** (*shikhlah*, variously rendered *שִׁכְלָה*, *שִׁכְלָה*, *שִׁכְלָה*, etc.), a much commoner word, of the same form as (1), and from the same root as (2), occurring once in the present text of Hos. 9.10, is freely used (over twenty times), chiefly from the Exile onwards, as a contemptuous designation of one of images of deities or of foreign deities themselves. See below, ABOMINATION OF DESOLATION AND IDOL, § 2 f.

4. **שִׁכְלָה** (*shikhlah*; *שִׁכְלָה*), a word of uncertain etymology frequently occurring from Dt. onwards (esp. in Ezek.), is by far the commonest of these terms. It designates what gives offence to God (Dt. 12.1) or man (Pr. 22.27), especially the violation of established custom. The former usage is the more common; it applies to such things as rejected cults in general, Dt. 12.1 (see IDOL, § 2 f.), child-sacrifice (Jer. 32.35), ancestral worship (Ez. 43.8), images (Dt. 27.15), imperfect sacrificial victims (Dt. 17.1), sexual irregularities (Ezek. 22.1), false weights and measures (Dt. 25.16), etc. The latter usage, however, is not rare (esp. in Prov.). Thus J tells us eating with foreigners (Gen. 43.1), shepherds (46.14), Hebrew sacrifices (Ex. 8.2 [22]), were an abomination to the Egyptians (see EGYPT, §§ 19, 31).

ABOMINATION OF DESOLATION, THE (το βδελύγμα τῆς ἐρημώσεως), an enigmatical expression in the apocalyptic section (Mt. 24.15-26) of the discourse of Christ respecting His ΠΑΡΟΥΣΙΑ. Mt. 24.15 = Mk. 13.14. The passage containing the phrase runs thus in Mt.—'When therefore ye see the abomination of desolation, which was spoken of by Daniel the prophet, standing (ἐστὶς) in the holy place (let him that readeth understand), then let them that are in Judaea flee unto the mountains.' The reference to Daniel, however, which is wanting in Mk., is clearly an addition of Mt. (cp Mt. 2.2; 14, etc.), and Mark's ἐστὶς (masc.),

ABOMINATION OF DESOLATION

being more peculiar than Matthew's ἐστὶς (neut.), is to be preferred. Both reports agree in inserting the parenthetical appeal to the trained intelligence of the reader, which, being both natural and in accordance with usage in an apocalyptic context, it would be unreasonable to set aside as an 'ecclesiastical note' (Alford). There is an exact parallel to the clause in Rev. 13.7 (cp 17.9), 'Here is wisdom: let him that hath understanding count the number of the beast,' and a parallel of sense in Rev. 2.7 13.9: 'He that hath an ear (or, if any man have an ear), let him hear,' i.e., let him understand (as 1s. 33.6); the best commentary on which is a *terzina* in Dante (*Inf. 9.100-1*, 'O voi, che avete gl' intelletti sani,' etc.). In fact, the whole section is a *μυστήριον*, not of the class in which Jesus delighted (Mt. 13.13), nor expressed in his highly original style, and is easily separable from its context. It is probably (apart from some editorial changes) the work of a Jewish writer, and was inserted to adapt the discourse, which had been handed down (itself not unaltered) by tradition, to the wants of the next generation.

Some light is thrown upon it by the 'little apocalypse' in 2 Thess. 2.1-12, which evidently presupposes an eschatological tradition (see ANTI-CHRIST). It is there explained how the *παρουσία* of Christ must be preceded by a great apostasy and by the manifestation of the 'man of sin,' whose *παρουσία* is 'with lying signs and wonders,' and who 'opposeth and exalteth himself against all that is called God or that is worshipped, so that he sitteth in the sanctuary (*ναὸς*) of God, setting himself forth as God,' but whom 'the Lord Jesus will slay with the breath of his mouth.' The resemblance between the two Apocalypses is strong, and we can hardly avoid identifying the 'abomination of desolation' in Mt. and Mk. with the 'man of sin' in 2 Thess. 'That the one stands and the other sits in the sanctuary constitutes but a slight difference. In both cases a statue is obviously meant. The claimant of divinity would not, of course, be tied to one place, as it was believed that by spells a portion of the divine life could be communicated to idols, so that the idol of the false god was the false god himself. In both cases, too, there is a striking resemblance to the *θημᾶ* of Rev. 13, the second of whom, indeed, is said to be represented by an image which can speak, trickery coming to the help of superstition (Rev. 13.15). In fact, the 'abomination' or 'the man of sin' is but a humanised form of the original of these *θημᾶ*—viz., the apocalyptic dragon, who in his turn is but the Hellenised version of the mythical dragon Typhon, which was destroyed by the Babylonian light god (see CRYSTON, § 2). We can now recover the meaning of τῆς ἐρημώσεως. The 'abomination' which thrusts itself into the 'holy place' has for its nature 'desolation'—i.e., finds its pleasure in undoing the divine work of a holy Creator.¹

But why this particular title for the expected opponent of God? It was derived from the first of the great apocalypses. In Dan. 9.27 11.31 12.11, according to the exegetical tradition in G, mention is made (combining the details of the several passages) of an apostasy, of an 'abomination of desolation' (or 'of desolations') in the sanctuary, of a time of unparalleled tribulation, of resurrection, and of glory. That the original writer meant 'abomination' to be taken in the sense described above, and the appended qualification to be rendered 'desolating' or 'of desolation,' cannot indeed be said. **שִׁכְלָה** as used in Daniel means 'image of a false god' (cp 1 K. 11.5; 2 K. 23.15), and the most natural rendering of **שִׁכְלָה** and (if the text be correct) **שִׁכְלָה** or **שִׁכְלָה** is 'appal-

¹ It is also used in 1 S. 13.4 for **שֶׂמֶט**, the word rendered 'stank' in 2 S. 10.6 (AV).

² But in 1s. 33.6, Dubin and Cheyne read **רָעָה**; so also Sam. and some MSS. at Lev. 7.21. In Lev. 11.42 ff. we may point **רָעָה**, and in 1s. 33.6 read **שֶׂמֶט** (with G, Co.).

¹ It is no objection that in 1 K. 21.3 the *ἐρημώσεως* is referred to the hemming in of Jerusalem by Roman armies; cp Jos. *Jud.* 5.11, where the passages in Dan. are explained of the desolation by the Romans. The true meaning must be decided by Matthew and Mark, where nothing is said of injuries from invaders. The memory of the experiences of 70 A.D. suggested to Luke a new interpretation of the traditional phrase.

ling.¹ The phrase appears to be an intentional alteration of אֱלֹהֵי שָׁמַיִם (*Elōhē šāmayim*), 'heaven's lord.' That this was a current title of Zeus may be inferred from the Surae of 2 Macc. 6.2, where the temple at Jerusalem is called by the emissary of Antiochus 'the temple of *he'el shemai*' (see Nestle, *Z. f. N. T.* iv, 248 [84]); cp his *Abrahamism in Materialism*, 35 f.; G. Hoffmann, *Die ein phon. Inschr.* 1889, p. 29; Bevan, *Daniel*, 1931. The author of Daniel (whose meaning is correctly given by *H P*) contemptuously says, 'Call it not "heaven's lord," but "an appalling abomination"'; and the object to which he refers is an image of Olympian Zeus, which, together with a small *καρπός*, the agents of Antiochus set up on the great altar (*θυσιαστήριον*) of burnt offerings. The statement in 1 Macc. 1.59 is not destructive of this theory, for altars and idols necessarily went together, and the phrase of the Greek translator of the Hebrew original in 1.51 (ἡ δὲ ἑστία ἐρημώσεν; cp τὸ δὲ ἑστία, 67) might be used equally well of both or of either.² All this, however, had been forgotten when the apocalyptic section in Mt. 21 and Mk. 13 was written.

Another (a highly plausible) interpretation of the little evangelical apocryph-e is given by Spitta (*Die Offenbarung Johannis*, 493-497), who thinks that it was written in apprehension of the erection of a statue of Caligula in the temple (see Schur, *Hist.* ii.). This implies that τὸ δὲ ἑστία ἐρημώσεν means the statue of a historical king who claimed to be the supreme God, which, considering the nature of the context, is improbable, and is not supported by the use of the Hebrew phrase in Daniel. It is, no doubt, highly probable that apocalyptic writers regarded the mad Caligula as a precursor of the expected embodiment of the principle of 'lawlessness' (*ἀνομία*, 2 Thess. 2.7); but, without putting some violence on their inherited eschatological phrases, they could not have said that he was ἐρημώσεν or ἀνομία in person. For, after all, a Roman emperor could not be a purely destructive or lawless agent. Spitta's view, however, is preferable to that of Weiss, who, appealing to 1 k. 21.20, understands the 'abomination' to be the Roman armies; and to that of Bleek and Alford, who explain it of the desecration of the holy place by the Zealots (Jos. *BJ* iv. 36-8). For the criticism and exegesis of the difficult passages, Dan. 9.27-11.31, see the commentary of Bevan and the translation and critical notes in Kau, *HS*; cp also Van Leunep's treatise on the seventy year-weeks of Daniel (Leicht, 1888), where it is proposed, on amply sufficient grounds, to change the impossible קָרַן קָרַן (9.27) into קָרַן, 'and instead thereof.' The greatest problem is how to explain or rather correct קָרַן קָרַן; in קָרַן קָרַן (11.31), for קָרַן we should perhaps read קָרַן, or delete קָרַן as a gloss on 9.27. There is a similar problem in 8.13.

T. K. C.

ABRAHAM (אַבְרָהָם, § 44; אַβְרָהָם [BAL.], ouce אַבְרָהָם [A]). The name has no meaning in

1. Name, etc. Hebrew, and seems to be another form of *ABRAM* (7.7), due probably to a misunderstanding of an early orthography.¹ In J and P, however, the latter is represented as the original name, which was changed at a critical point in the patriarch's life into Abraham (Gen. 17.5. P, where the etymology is a mere word-play; on J's narrative, see Frapp, *Gen.* 53). It is only from the time of Ezekiel

¹ See Kö, *Fid.* 482.

² Ges., Bert., Lit., Gratz, and others explain the 'abomination' of a statue of Zeus; Hitz., Hilentfeld, Bleek, Kue., of an altar. The insertion of the didactic story of Nebuchadnezzar's golden image slightly confirms the former view.

³ Himmelfahrt, manifesting that א in the Minae (S. Arabian) alphabet represents a (5) or, in some cases, h. The same peculiarity (for א) characterizes the Malabar, the Hebrew, and the Samaritan script. אַבְרָהָם, therefore, was originally pronounced Abram (Hommel, *Das graphische א im Minaeischen*, 22-3). WMM (*Is. u. Eur.* 309 n. 3) finds an Egyptian proper name B-r-g-ro-mau = Baal ram.

(see Ez. 33.24)¹ that Abraham was revered by the Jews as their greatest ancestor; cp Is. 41.8 f. 51.12 63.16 Neh. 9.7 f. 2 Ch. 20.7 30.6 Ps. 47.9 [1-10] 50.42 Ecclus. 14.9 1 Macc. 2.57 12.21 Mt. 1.23. Lk. 16.13 19.9 Jn. 8.55 159. Acts 7.2 13.26 Rom. 4.1, 6.16 11.17 14.5. 2.3, cp Gal. 3.7-9. But to give time for this general reverence to have arisen, we cannot help supposing that the name and, in some form, the story of Abraham were current in certain circles considerably earlier. Local traditions respecting him doubtless existed before the glory of the southern kingdom departed, and these traditions form the basis of the composite אַבְרָהָם or 'family history' of Abraham (P for a special reason substitutes Terah) contained in Gen. 11.27-25.13. That these traditions are legends, and not historical records of the times which the 'family history' appears to describe, is certain (see HISTORICAL LITERATURE). But that in their present setting they are much more than legends needs to be not less firmly held. They have been purified both by abridgment and by expansion; and, since the fusion of the original and of the added elements is by no means complete, it is not impossible to study the one from the point of view of prehistoric research, and the other from that of the history of religion. Let us, then, briefly consider these two questions: (1) What did the Abraham narratives of Genesis mean to their first editors and readers? and (2) may any of them be regarded as containing a historical element?

1. The first question can be readily answered. Abraham to J and E is not so much a historical personage as an ideal type of character.

2. Story of J and E. This theory alone will account for the 'dreamy, grand, and solemn' impres-

sion which this patriarch makes upon us. The framework of the narrative may be derived from myths and legends, but the spirit comes from the ideals stored up in the minds of the narrators. A school of writers (for J and E are not merely individuals) devoted themselves to elaborating a typical example of that unworldly goodness which was rooted in faith and fervently preached by the prophets. That typical example was Abraham, who might, with a better right than the old Babylonian king, Hammurabi, have called himself the prophet of the heaven-god, and indeed is actually recognised by the Pharaoh (Gen. 20.7 f.) as a prophet of Elohim. The 'dreaminess' which has been noticed in him is caused by his mental attitude. The Mohammedans appropriately call him 'the first Moslem.' He goes through life listening for the true *ḥikma*, which is not shut up in formal precepts, but revealed from time to time to the conscience; and this leaning upon God's word is declared to be in Yahwe's sight a proof of genuine righteousness (15.6 f.). The *Pirqe Aboth* (c. 5; cp *Ber. rabb.*, par. 56) reckons ten trials of Abraham's faith, 'in all of which he stood firm'; but this simply marks the intense Jewish reverence for the father of the faithful. The word קָרַן, 'he tried,'

occurs only once in the narratives (Gen. 22.1), but from the first the faith of Abraham was tried like gold in the fire. He marries a woman who is 'barren' (11.30 18.11 f. both J; 15.2 f. JE). He leaves his home at the divine bidding to seek an unknown land (12.1 f.). As the climax, he is commanded to offer up the child of promise as a sacrifice (22.1-13 f.). It is characteristic of the pre-exilic age that this privileged life presents no reverses of fortune (contrast Job). But prosperity does no moral harm to Abraham. He retains a pure and disinterested philanthropy, which would even, if possible, have saved wicked Sodom (18.23b-32a, a late Yahwistic passage).² Once, indeed, he appears as trusting in an arm of flesh, and defeating mighty kings (Gen. 14.1-17);

¹ This is the earliest mention of Abraham outside the Hexateuch; for Is. 29.22 Jer. 33.26 Mic. 7.20 belong to passages inserted after the Exile.

² See We. *CH* 20.27 f.; *The Elements of the Hex.* i. 26; Frapp, *Gen.* 15-50.

ABRAHAM

but this unique narrative, so flattering to the pride of the later Jews, is evidently a fragment of a post-exilic midrash on the life of Abraham.¹ It even contains a specimen of the mystic reckoning called 'gematria,' the number 318 in 1111 being suggested by the name of Abraham's servant Eliezer,² of which it is the numerical equivalent, just as it is stated in the Haggada that Abraham served God from his third year, because עקב אשר שבעת עקב (2218) is equivalent to 172 (he was 175 when he offered up Isaac, according to the Midrash Tanchuma), and as the 'number of the beast' in Rev. 13:18 is 666 (or 616).

The narratives of P differ, it is true, in some respects from those of J and E. This writer, who is a lover of

3. Story of P. gradual, orderly progress, even in the history of revelation, represents the migration into Canaan as having been planned, without any express divine command, by Ferah (Gen. 11:31), and admits no theophany before that in Abraham's ninety-ninth year (17:1). He introduces, also, some important modifications into the character of the patriarch. The friendly intimacy between Yahweh and Abraham has disappeared; when Yahweh at length manifests himself, Abraham falls upon his face (17:3, 17). A legal element, too, finds its way into his righteousness, the rite of circumcision having been undergone, according to P, by Abraham and all the males of his household. Still, it may be said of P as truly as of his predecessors that he regards Abraham as the greatest of men, and exhibits him as the pattern for Israelish piety. With this object in view, he has no scruple in dealing very freely with the traditional material. Since all things are best at their beginnings, he asserts that the ancestor of Israel was all, and more than all, that his own sober imagination can devise. Later writers attempted to supply his deficiencies. Even in the OT we have a strange reference in Is. 29:22 (post-exilic) to dangers incurred by Abraham, which agrees with the hints dropped in the *Book of Jubilees* (i. 12), and points the way to the well-known legend of the furnace of Nimrod. Not less did the enigmatical war-chronicle in Gen. 14 stimulate later writers. Nicolaus of Damascus, the court historian of Herod the Great, related (Jos. *Ant.* i. 72; cp Justin, 362) that Abraham came with an army out of Chaldaea and reigned in Damascus, after which he settled in Canaan; he adds that there still exists a village called *Ἀβραμὸν ὀλκισίς* (see HOBART). The only Biblical trace of such a story is in Gen. 15:2, where, however, 'Damascus' appears to be a gloss (see ELI ZUR, 1). It is held in Ew. (*Hist.* i. 312) to assume on such a basis that Damascus was a traditional link in the chain of the Hebrew migration. More probably the stories were invented by the Jews of Damascus (who were a numerous body) to glorify the national ancestor. The Moslems took up the tradition with avidity (see Ew. *Loc.*), and still point to the village of Berza, or Berzat el Hilal ('the marriage-tent of Abraham'), one hour N. from Damascus, where the marriage of the patriarch furnishes the occasion of an annual festival (Weiz. *ZDMG* xvii. 105 [1883]).

2. What historical element (if any) do these narratives contain? The Abraham traditions are twofold. Some belong exclusively to the great patriarch; others are also attached to one or another of his successors. The latter we can disregard: the foundation of the sanctuaries of Shechem and Bethel has a better traditional connection with Jacob (Gen. 33:18-20, 28:11-22), and that of Beer-sheba with Isaac (26:24 f.), while the

story of the imperilled wife has at least as good (or as bad) a claim to be connected with Isaac (26:1-11). There remain—(a) the migration from Harran or from Ur Kasdim; (b) the close affinity between Abraham and Sarah, Abraham and Hagar (and Keturah), Abraham and Lot; (c) the abode and burial of Abraham near Hebron; and, underlying all these, (d) the existence of an ancestor of the people of Israel bearing the name of Abraham or Abram. Let us first briefly consider (c) and (d).

ABRAHAM

1. Existence of Abraham and connection with Hebron. The tradition, as it stands, is doubtless inadmissible. So much may be conceded to that destructive criticism which, denying that the old reverence for the story of Abraham has any justification, would throw that story aside as an outworn and useless myth. But the view taken by the patient reconstructive criticism of our day is that, not only religiously, but even, in a qualified sense, historically also, the narratives of Abraham have a claim on our attention. The religious value is for all; the historical or quasi-historical for students only. In the present connection it is enough to say (but see further HISTORICAL LITERATURE) that, since Abraham may be a genuine personal name, it cannot be unreasonable to hold that there is a kernel of tradition in the narratives. Hebrew legend may have told of an ancient hero (in the Greek sense of the word) bearing this name and connected specially with Hebron. This supposed hero (whose real existence is as doubtful as that of other heroes) cannot originally have been grouped with Jacob or Israel, for the name Abraham has a different linguistic colouring from the two latter. It was natural, however, that when HERODOTUS (i. 171) became Israelish the southern hero Abraham should be grouped with the northern hero Jacob-Israel, and that the spirits of both heroes should be regarded as having a special connection with their people, and even as entitled to a kind of national cultus (cp II of AENEAS), which, though discouraged by the highest religious teachers, has left traces of itself both in early and in late books, and is characteristically Semitic.³ The cultus was no doubt performed at Machpelah, on the possession of which P lays such great stress (i. 23); but that the traditional hero was actually buried there cannot be affirmed. Even among the Arabs there is hardly one well-authenticated case of a tribe which possessed a really ancient tradition as to the place where the tribal ancestor was interred.⁴

ii. Relation of Abraham to Sarai, Hagar, Lot.—With regard to (b) it should be noted that, though an assertion of relationship may be literally correct, it may also merely mean that two particular tribes or peoples have been politically connected. If, with Robertson Smith, we may regard Sarah as a feminine corresponding to Israel, we may take the marriage between Abraham and Sarah (or rather Sarai) to symbolise the political fusion between a southern Israelish tribe and non-Israelish clans to the south of Hebron (see, however, SARAU, i. § 2). The relationship between Abraham and Hagar may also have a political meaning, for the close intercourse, and at times political union, between Egypt⁵ and Palestine and parts of Arabia is well attested. The story of the separation between Abraham and Lot⁶ may

¹ It is unnecessary to discuss here P's account of the origin of circumcision (see CHAIKIN, § 4), or the story of the dedication of the four kings in Gen. 14 (see above, § 2), or the birth and subsequent offering up of Isaac (see EXCURSUS, § 1 f.).

² See 18, 2813 (I saw Lublin), 18, 6817 Jer. 31:13, cp Lk. 10: 10, 18, 20, and cp Che. *Ant.* 18, 352 f. For parallel Arabian belief, see Goldziher, *Rev. de l'hist. des rel.* 1914, p. 339 ff., and for the later Jewish belief in the powers of the fathers, see 2 Mac. 1:13 f., and Talmudic references in Castelli, *II Mesora*, 1: 4 f.

³ WRS *Ktn*, 18.

⁴ We assume provisionally that Hagar is correctly regarded, from the point of view of the original tradition, as an Egyptian. See above, 102; HUBERT, and especially MACKAY, § 2 (6), 111 ff.; LAMM-RON, § 2.

⁵ On the details of the story, cp WRS *Ktn*, 14 f.

¹ Much confusion has been caused by the uncritical use of circumlocution (see Che. *Expositors*, 137 ff.). That the writer of Gen. 11:11 had a press, directly or indirectly, to Babylonian sources for some of his statements is denied by none. But this does not make him a historian. See Kue. *Her.* 143, 344; We. *CHD* 20; F. Mey. *Q. A. I.* 125 f. and cp CHAIKIN, LAMM-RON, MELCHUNGER, § 4.

² So, long ago, Hitzig, following Ber. *rabbi*, par. 43.

ABRAHAM

be but a foreshadowing of the separation between Israel and Moab and Ammon; but, if Lot is to be explained by Lotan (the eponym of an Edemite clan, Gen. 36 20-25) the asserted relationship between Abraham and Lot accords with the theory of the original non-Israelitish character of Abraham.

iii. *Connection with Harran or Ur.*—As to (a), even if we reject the theory of the migration of a clan called after Abraham from Harran or Ur Kasdim, it does not at once follow that the tradition is altogether unhistorical. Not only Abraham, but the wives of Isaac and Jacob also, are declared to have come from Harran. This cannot be a baseless tradition. Critics, it is true, are divided as to its historical value, nor can we discuss the matter here. But there is, at any rate, as Stade admits, nothing *a priori* improbable in the view that certain Hebrew clans came from the neighbourhood of Harran to Palestine. The fluctuation of the tradition between Harran and Ur Kasdim need not detain us (see special articles). Both Harran and Ur were seats of the worship of the moon-god under different names, and we can well believe that at some unknown period the moon-worship of Harran affected the Hebrew clans (cp SARAI, i. § 2, MULCAH, i.). For what critic of to-day can venture to assume that it was repugnance to this worship, and in general to idolatry (cp Josh. 24 2 f.),¹ that prompted the Hebrew clans to leave their early homes? Surely this asserted religious movement is a specimen of that antedating of religious conditions which is characteristic of the OT narrators, and was copied from them by Mohammed. First, the insight of Isaiah is ascribed to Moses; then, as a this were not wonderful enough, it is transferred to Abraham. But how recent is the evidence for either statement, and how inconsistent is the spiritual idealism ascribed to Abraham with sound views of historical development! Instead therefore of speaking of 'that life of faith which historically began with Abraham' (H. S. Holland, *Lux Mundi*, 41), should we not rather say 'that life of faith which, though germinally present from the earliest times, first found clear and undoubted expression in the writings of the prophets and in the recast legends of Abraham'?

Hommel's ambitious attempt to prove the strictly historical character of the Abraham narratives from the Arabian personal names of the dynasty of Hammurabi is, critically regarded, a failure. The existence in early Semitic antiquity of personal names expressing lofty ideas of the divine nature in its relation to man has long been known, though it is only in recent years that such names have been discovered so far back in the stream of history. But hitherto scholars have with good reason abstained from inferring the extreme antiquity of Hebrew narratives in which similar names occurred, because the age of these narratives had necessarily to be first of all determined by the ordinary critical methods, and the existence of such a phrase as 'in the days of Amraphel' (Hammurabi) proves only that the writer may have been acquainted with documents in which events of this period were referred to, not that his own narrative is strictly historical.

For the later Haggadic stories concerning Abraham see Beer, *Leben Abrahams nach Auffassung der jüd. Sage*, 1854; Hamburger, *RE für Bib. u. Talm.* (s.v. 'Abraham'); also Grünbaum, *Neue Beitr. zur sem. Sagenkunde*, 1803, pp. 80-131 (Jewish and Mohammedan legends); and, especially, a late apocryphal book called *The Testament of Abraham* (*Testis and Studies*, Cambridge, 1862), which presents perhaps the finest imaginable glorification of the character of the patriarch. All that he needs is to see the retributions

¹ The words, 'and worshipped other gods,' belong to R. But the sense of the earlier narrators is correctly given (cp. Gen. 31 25 f.). And, of course, Israel's point of religious departure must, considering primitive circumstances, have been in some sense polytheistic (cp Reinach, *REJ* xv. 311 [187], Boscawen, *The Migration of Abraham*, 20 f.).

ABRECH

of heaven and hell that he may learn (like Jonah) to have pity on sinners (see APOCRYPHA, § 11). For the archaeological aspects of the life of the patriarch see Tomkins, *Studies on the Times of Abraham* ('78; second ed. '97). The best critical literature is cited by Ki. *Hist.* i. 1; add to his list Hal. *KEJ* xv. 161 ff. ('87); *Rev. Sem.* i. 1 ff. ('93); Renan, *Hist. du peuple d'Israël*, i. (1887); and reviews of Renan by Renach, *KEJ* xv. 302 ff., and by WRS, *Eng. Hist. Rev.* in. 128 f. ('88). Renan's statements that the Abraham of Genesis is the type of an Arab sheikh, and that the ancient Hebrews, represented by Abraham, worshipped a 'patriarchal, just, and universal God,' from whom the worship of Yahweh was a falling away, are fantastically erroneous. For Nöld. view that Abraham and Sarah are divine names, see his essay on the patriarchs in *Im neuen Reich*, 1871, p. 508 ff., and on the other side Baethg. *Beitr. z. sem. Rel.-gesch.* 154 ff. See also EDOM (§ 2; supposed divine character of Abraham) and HORATH (his connection with Damascus).

T. K. C.

ABRAHAM'S BOSOM (Lk. 16 22 f.). See HADES.

ABRAM (אַבְרָם, § 41, Gen. 11 27-17 50 1 Ch. 1 27 Neh. 9 7 f.; אַבְרָם [BADL], but אַבְרָם [A twice in Gen.], אַבְרָם [A once in Gen.; B in Ch. and B* vid. NL in Neh.; אַבְרָם; אַבְרָם], i.e. probably, in the mind of the priestly writer (Gen. 17 1), 'high father' (patriarch), to which the name Sarai, it taken as another form of SARAI [q.v.], would be a suitable companion. If, however, the name ABRAM be a genuine traditional one, it will be related to ABIRAM [q.v.], as ABNER [q.v.] is to ABINER, and be explained similarly (cp ABRAHAM, § 1).

ABRECH (אַבְרֵחַ, Gen. 41 43 f., 'Then he made him ride in the chariot next in rank to his own, and they cried before him Abrech. So he set him over all Egypt' (Kau. *HS*). The passage occurs in E's (or E2's) version of the appointment of Joseph to be grand-vizier, and the strange word Abrech greatly puzzled the ancient interpreters. G¹ gives καὶ ἐκάρουεν . . . ἐκάρου; the Targumim אַבְרֵחַ, אַבְרֵחַ, while

Pesh., omitting אַבְרֵחַ, paraphrases אַבְרֵחַ אַבְרֵחַ [cp 45 8 Pesh.], and Vg. *clamante proclame ut omnes eum eo gressu flecterent*. Jerome himself, however (*Quaest. in Gen.*), remarks, 'Mihi videtur non tam praece sive adgenitio . . . intelligenda, quam illud quod Hebraei tradunt, dicentes "patrem tenerrum," . . . significante Scripturā quod iuxta prudentiam quidem pater omnium fuerit, sed iuxta aetatem tenerrimus adolescens et puer.' So, in fact, the Midrash (*Per. rabba*, par. 90) and the two later Targumim (as an appendage to 'father of the king') expressly interpret, and in *Rab. Bathra*, 41 we even find this justified by the combination of אַבְרֵחַ and אַבְרֵחַ. In *Jubiles* 40 7 (Charles) the form is Abner, i.e. Abner ('God is a mighty one,' or, being an imaginary form, 'mighty one of God').

The different views of modern scholars can only be glanced at here. Luther is content with *Landesvater*, EV with 'low the knee.' RV mg. adopts the view that the original word was 'similar in sound to the Hebrew word meaning to kneel' (so Bentley, Briggs, Chabas). The Mas. vocalisation, however, is guesswork, and the Hiphil of אַבְרֵחַ occurs only once again (Gen. 24 11), and then in the sense of 'to cause (the camels) to kneel down.' If we look at the context, we shall find reason to doubt whether any outward display of reverence at all (prostration would be more natural than kneeling) can be meant by Abrech. An official title is what the context most favours, not, *ho. c.*, such a title as 'chief of the wise men' (ap-rēx-u); but rather 'great lord,' or some other equivalent to 'grand-

¹ Harkavy, *Ms.*, mars-avril 1870, pp. 161-165. Le Page Renouf's explanation (*PSB.* i. xi. 5 ff. [188]), 'thy command is our desire' (ad-ru-rēk), i.e., 'we are at thy service,' is much less suitable to the context.

ABRONAH

vizer.' No such title including the letters b-r-k is quoted from the pure Egyptian vocabulary; but may it not be really a loan-word? This might account for the fact that Abrech is passed over in G. It is well known that from the fifteenth century onwards there was close intercourse between the Egyptians and the Semitic peoples, and that many technical words were borrowed from the latter. This being the case, it appears reasonable to connect Abrech with the Ass.-Bab. *abarakku* (fem. *abarakkutu*), which is applied to one of the five highest dignities in the empire.¹ Schröder, who once opposed this view (*OTL* 1. 139), now thinks that the Amarna discoveries (1888) have made it much more probable; and Brunnow has expressed the opinion that 'the Assyrian *ab-rak-ku* seem undoubtedly to be the prototype of Abrech'² (private letter). In spite of Dillmann's peremptory denial (1892), it has become very difficult to think otherwise. We might, indeed, correct the word out of existence; but Ball's text (*SBOT*) is hardly an improvement except in the substitution of the *אבנ* of the Sam. text (cp G Pesh.) for *אבנ*, which is justified by the context, and had already been made by Geiger (*Urschr.* 493). T. K. C.

ABRONAH, *Abbronah* (עֲבְרוֹנָה), one of the stages in the wandering in the wilderness (Nu. 33.14 f.; P; *עֲבְרוֹנָה* [10]. *עב.* [A1.]). See WANDERINGS §§ 12, 14. On *אֲבְרוֹנָה* [10] in Judith 24, see *ABRONA*.

ABSALOM (אֲבִישָׁלוֹם, § 45, or—less correctly, as Nold. thinks—as in 1 K. 15.11 אֲבִישָׁלוֹם, *ABISHALOM*, *ABISHALOM*; probably 'the [divine] father is peace,' cp *Yahwe-shalom* Judg. 6.24, a title of Yahwe, but not Ps. 129.7: *אַבְעֻשָׁלוֹם* [11], and in 2 S. 3.3, and 1 Ch., also 1.). *-עא.* [A, 2 S. 18.15], *-עא.* [L; but in 1 K. 2.28 *סολωμῶντος*, where also *אַבְעֻשָׁלוֹם*; *אַבְעֻשָׁלוֹם* [A], 2 S. 18.15; Jos. *אַבְעֻשָׁלוֹם* and *אַבְעֻשָׁלוֹם*; *ABSALOM*) was David's third son, his mother being Maacah, daughter of Tahmai, king of Geshur (7.7, 2). Born at Hebron, he grew up at Jerusalem, the idol of his father, and popular from his manly beauty and his winning manners. This tragic history is faithfully recorded by an ancient and well-informed writer in 2 S. 13-18.

We first hear of him in connection with the outrage on his sister Tamar by her half-brother Amnon, whom David out of weak-minded affection for his first-born (2 S. 13.21, *עֲמֹן*), omitted to chastise. Absalom soothed his sister, and silently bode his time. Then, after two years, he lured Amnon with the oilier princes to a feast of sheep shearing on Absalom's estate at Baal-hazor (see HAZOR, 2), and at a concerted sign his servants slew Amnon during the banquet. The next three years Absalom passed in exile in Geshur (7.7, 2), till Joab, knowing that the king pined for the fugitive, contrived by the help of a 'wise woman' from Tekoa to bring him back. The form of the parable (2 S. 14.5-7) may belong to the 'wise woman,' but the ideas which it suggested came from Joab. Why was the king so willing to mitigate the custom of blood-vengeance for a stranger, and so hard towards his own son? We die, and are like water spilt on the ground; but God spares the life of him whose thoughts are bent on the restoration of the banished (2 S. 11.4 with Ewald's emendation). The king gave way to this gentle pressure, and allowed his son to come back to Jerusalem, but refused to see him for two whole years. Nor would Joab take any further step, till the impetuous prince set his barley field on fire, and, when Joab came in person to complain, declared that death was better than con-

¹ Friedr. Del., *Heb. in the light of Assyrian Research* (1883), p. 25 f.; cp *Par.* 225; *Ass. Hitt.* 12. This brilliant suggestion was temporarily adopted by the present writer (*Jord.* 12th Apr. 1934), who has, since the Amarna discoveries, returned to it.

² So also Sayce (*Acad.* 7th May 1892; *Crit. Mon.* 214 f.), but with an interpretation which needs fuller evidence.

ABSALOM

tinued disgrace. He had his way. The king kissed him and restored him to full favour.

Four years followed (2 S. 15.7, L. Pesh. and Jos.; MT *עֲרָבָא* '40') during which Absalom prepared men's minds for coming events. He let his hair grow enormously long (2 S. 11.6), in token, as Robertson Smith thinks (*RS* 2. 484), of the sacredness of his person, though the ordinary view that it was merely a proof of vanity possesses the recommendation of simplicity. He rode in a chariot with horses (then scarcely known in Israel) and was accompanied by a guard of fifty men. He made every sutor's cause his own, and lamented aloud that his power did not match his desire to help (2 S. 15.1-6). At last he fired the train which had been so long and so carefully laid. On pretence of a sacrificial feast, he withdrew to Hebron, accompanied by 200 men, doubtless needy dependents, who followed him in ignorance of his plan. Here, at the old capital of Judah, amidst a people who were still unaccustomed to their absorption in a larger state, he raised the standard of revolt. Abithophel, a man of southern Judah, he made his principal counsellor; Amasa, Absalom's cousin, also from Judah, took command of the troops (cp GESHUR, 2). But an appeal was also made to the centrifugal forces always at work in the N. tribes, for, as he set out for Hebron, the rebel prince sent men through the land of Israel. At the sound of the trumpet these were to proclaim the accomplished fact, 'Absalom has been made king in Hebron.'

David, once the darling of the nation, was compelled to fly from the capital. Absalom is quickly entered it, and gave that public sign of his accession to the throne which the crafty Abithophel recommended. The number of his counsellors was now increased by the addition of Hushai, 'David's friend' (on the epithet see HESITAN, whose flattery he failed to see through). In reality Hushai only pretended to join the rebels. His object was twofold—to frustrate the counsel of Abithophel, and to betray Absalom's plans to the priests, Zadok and Abiathar. These trusty friends of David were to communicate with a maid, and she was to impart her knowledge to two sons of the priests, who waited to bear it to the king. This counterplot attained its end, Abithophel, who knew how deceptive was the popular enthusiasm, wished Absalom to 'strike David before there was time for second thoughts' (WRS). But Hushai persuaded the pretender to wait, and so David, who was informed of all that happened at Jerusalem, safely crossed the Jordan and established himself at Mahanaim, once Ishbaal's capital.

Thence, in three divisions, David's army sallied forth, and in the neighbouring forest (see EPHRAIM, WOOD OR) the rebel troops were routed. In the flight Absalom's head (hair?) Heb. *עֲרָבָא*, cp 2 S. 14.6) was caught in the branches of a terebinth tree, and his mule left him hanging between heaven and earth. 'Not for a thousand shekels' would the soldier who saw him hanging have taken his life. How could he venture to disregard the king's charge to watch over the young man Absalom? If he had treacherously attempted Absalom's life, would not the king have found it out, and would not Joab himself have stood aloof? But Joab, who felt his courage called in question (2 S. 18.14, *עֲרָבָא*; see Ba. *SBOT*), with an emphatic denial of the statement, plunged three javelins into Absalom's body. The corpse of the ill-fated prince was flung into a pit, and the soldiers cast stones upon it, that the restless spirit might trouble them no more.¹ Meantime the old king was waiting at the gate of Mahanaim. The pathetic story of his broken-hearted grief at hearing the news of his dearly loved son's death is enshrined in all memories.

Such was the close of the sad tragedy which opened with the barbarous outrage upon Tamar. Just eleven years had passed since that event, so that if Absalom

¹ See Tylor's *Prim. Cult.* ii. 22.

ABUBUS

was about twenty when he took up his sister's cause, he must have died a little over thirty. Apparently his three sons died before him (2 S 14:27-18:18). On his 'daughter,' see TAMAR, 3, and MAYA VII, 4, 4. The notice respecting Absalom's monument in 2 S 18:18 is not very clear, perhaps owing to some confusion in the text of vv. 17-19 (so Klo.). It is evidently parenthetical, and reminds the reader that Absalom had a suitable monument erected, according to Klo.'s reading, by David) in the King's Vale (see SHAVEH, 1, MELCHIZEDEK, § 3). The building close to Jerusalem, now known as Absalom's tomb, is of very late origin, as its Ionic pillars prove.

2. Father of Manthias (1 Macc. 11:70; Ἀθανάσιος [AV], Ἀθανάσιος [K]). Zöckler proposes to read 'Jonathan' for 'Manthias' here; or else to read Manthias in 1 Macc. 13:11 also.

3. Father of Jonathan (1 Macc. 13:11; Ἀθανάσιος [AVK]), probably the same as (2).

4. An ambass. to Tyrians, 1 Macc. 11:47 (Ἀνθιστάσιον [M], ἀνθιστάσιον [K]). Possibly also to be identified with (2).

ABUBUS (ABYBOS [ABV]; אבובוס, cp HIRSHAL, 1 Ch. 7:14 Kt.; אבובוס), father of Ptolemy, captain of the plan of Jericho, and son-in-law to Simon the Maccabean (1 Macc. 16:11, 13).

ABYSS, THE (Η ΑΒΥΣΣΟΣ), the term substituted in RV of NT for the 'deep' and the 'bottomless pit' of AV; see Lk. 8:31; Rom. 10:7; Rev. 9:1 f. 11:17 17:8 20:1 f. In the second of these passages, by an inexact use of the term, 'the abyss' is equivalent to Sheol; 'over the sea' in Dt. 30:11 is taken to mean 'over the world-encircling ocean into which the "rivers" of the underworld (Ps. 134[3], Ps. 135[3]) discharge themselves to "the place where all flesh wanders" (1 Cr. 3, Sheol; Ezech. 17:6). Elsewhere it means the deep-placed abode of the "dragon" or devil, of the "beast" his helper, and of the δαίμονια, —whether this abode be taken to be the 'deep (tchôm) that concheth beneath' (Gen. 1:9 RV), or the 'waste place' with 'no ornament above and no foundation of earth beneath,' by which the fire-filled chasm was thought to be bordered (Ezech. 5:12; cp 21:27). The former view is in accordance with OT usage, the *tchôm* of MT and the ἀβύσσος of G being the flood or ocean which once engulfed the earth, but is now shut up in subterranean storerooms (Ps. 33:7); and it is favoured by the use of θάλασσα in Rev. 13:1 as synonymous with ἀβύσσος. But the latter is more probably right in the Apocalypse, which agrees with Ezech. in asserting the existence of a lake of fire, destined for the final punishment of the devil and his helpers. This fiery lake is not in either book technically called 'the abyss'; in Ezech. 10:13 the Greek has τὸ χάος τοῦ πυρός, and in 21:7 διακοπὴν εἶχεν ὁ τόπος ὡς τῆς ἀβύσσου. The angelic overseer of this region is Uriel, who is described in Ezech. 20:2 (Gizeh Gk.) as ὁ ἐπὶ τοῦ κόσμου καὶ τοῦ τάρταρου. 'Tartarus' occurs also in Job 41:23, G, in the phrase τὸν τάρταρον τῆς ἀβύσσου [BNV], which, being used in connection with Leviathan, is doubtless to be taken of the subterranean abode of Yahwe's enemy, the dragon (see DRAGON, § 4 f.). Cp τάρταρος, used of the fallen angels, 2 Pet. 2:4.

ACACIA (אַקָצִיָּה), Ex. 25:5 etc., RV. See SHITTAN TREE.

ACATAN (ΑΚΑΤΑΝ [BA]), 1 Esd. 8:32 AV = Ezr. 8:12, HAKKATAN.

ACCABA (ΑΚΚΑΒΑ [B]), 1 Esd. 5:6 RV = Ezra 2:46, HIGAB.

ACCAD (אַכַּד, אַכַּדָּא [M], אַכַּד [D]; אַכַּד; אַכַּד is one of the four cities mentioned in Gen. 10:10 as forming the beginning of the kingdom of Nimrod in the land of Shinar or Babylonia. In the cuneiform inscriptions the name of Akkad is most frequent.

1 If a Hebrew original could have been supposed for 2 Macc. 1:24, accada might have represented a transliteration of part of a participle of אָכַד (cf. πεμψέμενος follow).

ACELDAMA

quently met with in the title *Jugal Kingis* (*Uruk*), which is rendered in Semitic by *har (mitu) Sumur u (mitu) Akkad*. This title, which implied dominion over the whole of Babylonia, was borne from the earliest times by the Babylonian kings, and was adopted by those kings of Assyria who conquered Babylon (cp BABYLONIA, § 1). The Akkad referred to in Gen. 10:10 has been identified by some with the ancient city of *Agadê* which was situated in northern Babylonia and attained a position of supremacy over the rest of the country under Sargon I. about 3800 B.C. This identification, however, is entirely hypothetical, and is based only on the superficial resemblance of the names.

ACCARON (ΑΚΚΑΡΩΝ [A*]), 1 Macc. 10:29 AV = RV EKKRIN (9:29).

ACCHO, RV Acco (ἄκχο), Judg. 1:31 and (see UMMATH) Josh. 19:31; see PROLEMAIS.

ACCOS (ΑΚΧΩΣ [A], ΑΚΧΩΣ [N], ΑΚΚΗ [V]); same as HAKKOZ [9:31], grandfather of Eupodemus; 1 Macc. 8:17 f.

ACCOZ (ΑΚΧΩΣ [B]), 1 Esd. 5:6 AV = Ezra 2:46 RV, HAKKOZ, 1.

ACCUSER (ΚΑΤΗΓΩΡ [Ti., W & H following A], ΚΑΤΗΓΟΡΟΣ [BN, etc.]). The form of word found in the best texts is simply a Hellenized form (κατήγορος) of the common word ΚΑΤΗΓΟΡΟΣ. For Rabbinic usage see e.g. Buxt. *Z. i. i.*, Rev. 12:10 f. See SAHAN, §§ 6 (3) 7.

ACELDAMA AV; RV Akeldama (ΑΧΕΛΔΑΜΑΧ [Fisch. A, etc.], ΑΧΕΛΔΑΜΑΧ [90 lat.], ΑΚΕ, [B followed by W & H], ΔΑΙΜ, [D], ΑΧΕΛΔΑΜΑΧ [d]), the name according to Acts 1:19 of a field bought by Judas Iscariot for some unknown purpose. The vet. Lat. of Mt. 27:7 applies the name (not, as in the Gk. MSS., merely in translation, but in the original) also to a field bought by the priests of Jerusalem to bury strangers in.

MS. evidence is so overwhelmingly in favour of some such form as Akeldamach that the RV is quite unjustified in rejecting it, especially when it corrects the *c* into *k*. Acts 1:19 states that in the language of the dwellers at Jerusalem this name meant 'the field of blood' (χρῶμα αἵματος).

כַּחַל דְּמָאָה (*châl demâh*), however, is obviously 'the field of the blood,' an impossible expression. Klostermann has therefore argued with great acuteness (*Probleme im Apokalypse*, 1-8 [83]) that כַּחַל (DMKH) is one word—viz., the well-known Aram. root 'to sleep.' All we have to do, then, is to understand it of the sleep of death, a usage known in Syr. and 'field of sleep' will mean cemetery, which, as Mt. tells us, was what the priests meant to make of the potter's field. Klostermann's argument is very strong—it is certainly natural to suppose that the name originated in some fact known to the people at large, as the transformation of a potter's field into a burying place would be—and his view was adopted by Wendt (Meyer² *ad loc.*). But we have no instance of a noun כַּחַל so used, and *ch*, *χ*, may = *κ* (cp *ωσπερ* [Lk. 3:20, BN, etc.], *כִּי*; *Σειραχ*, Sirach 3:14, Sirach). Hence, whatever may have been the real origin of the name—we can never know—its form was probably כַּחַל דְּמָאָה (Dalm. *Gram.*, 161 and 105 n. 1 respectively), 'the field of blood' (so Dalm. 161 n. 6; Arn. *Mey. Jesu Mutterstrasse*, 49 n. 1). On the questions who bought the field and why it was called Akeldama see also Acts, § 14. Cp JUDAS, 9.

Tradition which goes as far back as to the fourth century has placed Akeldama on a level overhanging the Valley of the Son of Hinnom on the NE. slope of the Hill of Evil Counsel, —a tradition which rests precariously

on Jer. 18:6, where the situation of the potter's house in Jeremiah's day is thought to be indicated. Potter's

1 On this form see Dalm. (*Gram.*, 304 n. 2), Kau. (*Gram.*, 8).

G. A. S. U. W. H.

In the NT we hear of only three towns of Achaia—ATHENS, CORINTH, and CECROEAE;—but the Salutations of the two Corinthian Epistles (esp. 2 Cor. 1:1) ἐν ὄλῃ τῇ Ἀχαΐᾳ imply other Christian communities in the province. In 1 Cor. 16 is the 'house of Stephanas' is called the 'first-fruits of Achaia' (ἀπαρχὴ τῆς Ἀχαΐας). In this place, for 'Achaia' we should expect 'Corinth'; for, according to Acts 17:34, Dionysius the Areopagite and other Athenians must have been the first-fruits of teaching in the province of Achaia. In Rom. 16:5, where, according to the Text Rec., Epiphanus is spoken of as the ἀπαρχὴ τῆς Ἀχαΐας, the best texts read Ἀσία; [Ti. W & H, following B&N, etc.]. The charity of Achaean converts is praised in 2 Cor. 9:2 Rom. 15:26; but the reference may be merely to the church at Corinth (cp 2 Cor. 8:10).

ACHAN (עָכָן, Josh. 7), called **Achar** (עָכָר, i.e., 'troubled'—, cp OCRAN, עֲכָרָן) in 1 Ch. 27 and **ACHAR** [Ach. Bousij] in 4 Esd. 7:57 [107] RV. S's readings are

אָאָפּ [BF and (except Josh 7:1, אָאָנ) L], אָאָנ [V; but אָאָפּ in Josh 7:24 (cf. 25)]; the son of Cuthah, Zabdi, Zerah b. Judah, who unlawfully took possession of one of the 'devoted' spoil of Jericho (see BHS¹). His taking of a taboo had involved the whole host in guilt (KS²⁰ 162), and the community had to free itself of responsibility by destroying not only Achan but also his whole family (Josh. 7). This is quite in accordance with primitive notions (KS²⁰ 421), although our present text is due to later insertions (vv. 24 f.). With the variety in the form of the name is to be connected the word-play in Josh 7:25. (Cf. AKMU, I.

2 b. Michal, a courtier of King Josiah (2 K 22:12, 14; Jer. 26:2, M¹ and Theod. in Q mg. [BAS ont.]; Jer. 36:12, ἀρχιβασις [B⁸⁷], βασις [S^{8*}], ἀρχιβασις [Q]); in 2 Ch. 31 so named Amnon (2 Ch. 34 (αρχιδόμου [B], αρχιδων [M]).

Of the allusions, that in 11:18 is wanting in the It.; those in 11:13 and 11:10 are absent from the 'Chaldee' and Heb. texts; while the Vg. omits all save that in 11:13 (*A. hier*)—perhaps the allusions were felt to have little to do with the story of Tobit.

Greek variants of the name are $\alpha\chi\epsilon\iota\alpha\pi\omicron\varsigma$ (14 in 6), $\chi\epsilon\iota\alpha\pi\omicron\varsigma$ (once in $\kappa\omicron\iota$), $\alpha\chi\epsilon\iota[\epsilon]\kappa$ (8 in 14 ro), $\alpha\chi\epsilon\alpha\pi$ (κ^* in 11 s), $\alpha\chi\epsilon\iota\alpha\pi\omicron\varsigma$ $\kappa\omicron\iota$, cp II. *Achiaris*, and in 14 ro *Achilar*. The equivalent Hebrew would be פֶּשֶׁתַּיִם and Meissner has pointed out that Pesh. has פֶּשֶׁתַּיִם for פֶּשֶׁתַּיִם in 1 Ch. 65. The name remains obscure however. Pesh. has פֶּשֶׁתַּיִם 'Chadd.' Hg., פֶּשֶׁתַּיִם Hg. פֶּשֶׁתַּיִם: Vg. *Achior*, and Pesh. in 12 f. פֶּשֶׁתַּיִם.

2. King of Media' (Tah. 1415 [K]; H. 1416). NFRU-
CHANEZZAR (P. [B]) = ANASERUS (id. [A]). See TABIT,
Book 16.

ACHIAS (*A. Mias*), 4 Esd. 1 et. See **ANJAH**, I.

ACHIM (אַחִים [Aḥīm]). - N. AḤIN, - HN [Δ etc.], AḤIM [N^h etc.], cp אַחִים אֲנִיכָא AḤIM, AḤI, 1135 [BNA], and = אֲחִי, J AḤIN, Gen. 46 to [A*^{ms}], 1 Ch. 21:17, 22 [B], a name in the ancestry of Joseph (Mt. 1:14). See GEN ALOGUES OF JESUS, § 2 c.

ACHIOR (אַחִיּוֹר [BNA], § 44), in the romance of JEHOIAD (q.v.), 'captain of all the sons of Ammon.' Having dared to warn Holofernes of the danger of attacking the Israelites, he was handed over to them to share their fate on the expected triumph of the Assyrian arms (65 ff.). He was hospitably received, and ultimately became a Jewish proselyte - no doubt to the great edification of Jewish readers of the story.

In some versions of John his name takes the place of that of ADRIANUS (p. 72) an error due to the similarity of δ and α in Syriac.

ACHIPHA (ACHIBA [15]), α -15d,53d RV = 127.0
250, 114 KIPHA

ACHISH (אַחִישׁ, אַחִישׁי [BA], אַחִי [L]), a Philistine, son of Muech (1 S. 27: 1) or Maachah (1 K. 2: 30 f.; אַחִישׁי [A]); a king of Gath, with whom David and his band took refuge from the persecution of Saul (see DAVID, § 5). He is described as a credulous man whom David found it easy to deceive, representing that his raids against Bedouin tribes were really directed against the Jafahites and their allies, and taking care not to leave any of his captives alive to reveal the truth to Achish. At Ziklag, which had been assigned to him as his place of residence, David lived as a freebooter in vassalage to Achish for a year and four months (only four months). The confidence, however, with which his suzerain regarded him was not shared by the Philistine lords, who prevented upon Achish to dismiss David from his army when starting to meet Saul at Gilboa. See 1 S. 27: 1-28: 29 ff., a connected passage of date prior to 800 (*SBo* 1). In another passage (1 K. 2: 35 f.), where the execution of Simei [?] is accounted for by his having gone to Gath in search of some runaway slaves, it is said that the fugitives went to Achish. No doubt the same king is meant (son of Muech, 2: 30) though the reference to Achish has the appearance of being a later ornamental insertion made in oblivion of chronology.

To a very much later writer (see 1.8.21.10-15 [11-16]) the account in 1.8.27-29 seemed to reflect on David's patriotism. He therefore devised an entertaining and unobjectionable story, in the style of the *Madras*, which he hoped would supplant the no longer intelligible historical tradition. According to him, David went alone, and was compelled to feign madness for safety.

¹ According to information received from Mr. F. C. Conybeare, there are two Armenian versions, the earlier of which appears to be in some respects more primitive than the Syriac. There is also, probably, a Georgian version.

ACHSAH

till he could escape. The author of the title of Ps. 34 accepted this story, but by mistake (thinking of Gen. 20a) wrote 'Abimelech' for 'Achish' ($\alpha\chi\iota\sigma$ [BARK], $\alpha\chi\epsilon\mu$ [U], *Achimelech*; Pesh. quite different).

ACHITOB ($\Delta\chi_{\text{CHITOB}}$ [B]), 1 Essd. 82 = 4 Essd. 114
 $\Delta V = 1.2 \text{ eV}$, ΔH_{CHITOB} , 2.

ACHMETHA (Ἀχμέτη), Ezra 6 24, the capital of Media, see ECHATANA.

ACHOR (אָחֹר, ἄχωρ [BAL.]), a valley on the N. boundary of Judah (Josh. 15:7), which, as we may infer from Josh. 7:1 Εἰμαχώρ [BAL.] combined with Hos. 2:15 [7], led up from Jericho into the highlands of Judah. In Is. 65:6 it represents the E. portion of Canaan on this side the Jordan. To an Israelite its name naturally suggested gloomy thoughts. Hosea promises that in the future, when Israel has repented, the evil omen shall be nullified, and a much later prophetic writer (Is. 7:2c.) that the valley of Achor shall become a resting-place of flocks. Early legend connected the name with the sin of Achan the 'troubler' of Israel (Josh. 7:24-26) /A/. Many (e.g. Grove, very positively, in Smith's *Ditt.*) have identified the valley with the Wady el-Kelt, which leads down through a stupendous basin in the mountains to the plain of the Jordan, and, as to nomadic observers, dark and dismal. This valley, however, is scarcely lifeless enough to be Achor, for its slender torrent-stream rarely dries up. It is also scarcely broad enough; it would never have occurred to the most ecstatic seer that flocks could be down in the Wady el-Kelt. Some other valley must be intended. According to the *OS* (217:25 89:34) the valley was to the N. of Jericho, and its old name still clung to it. This cannot be reconciled with the statement in Josh. 7:2c. respecting the N. boundary of Judah.

ACHSAH (אֲחִישָׁה, § 71, 'anklet'; אַחְסָה [B], אֲחִישָׁה [A]), according to Josh. 15:16-19, and (אַחְסָה [B], אַחְסָה [Bibb.-A]) Judg. 1:2-15 (cp. 1 Ch. 2:49); **AV** **Achsa.** אֲחִישָׁה [1-], a daughter of Caleb, who offered her in marriage to the conqueror of Kirjath-sepher. She was won by his younger brother Othniel. At her petition, because her home was to be in the dry southland (Negeb), Caleb bestowed upon her certain covered waters (called the Upper and the Lower Golith (see below). The simple grace of the narrative holds us spell-bound; but we must not, with Kittel (*Hist.* 1:299), pronounce the story historical on this account. That some clan should have been named after individuals is not inconceivable; but it is most improbable that we have any true traditions respecting the fortunes of such possible individuals, and it would be throwing away the lessons of experience to admit the life-likeness of a narrative as an argument for its historicity. According to analogy, Achsa must represent a Kenizite clan, allied in the first instance to the Calebites of Hebron, but also, very closely, to the clan settled at Debir and called Othniel; and the story arose in order to justify the claim of the Achsa clan to the possession of certain springs which lay much nearer to Hebron than to Debir (so Prof. G. F. Moore, on Judg. 1). That the cause is amply sufficient, can hardly be denied (cp. the Beersheba and Rehoboth stories in Genesis). It only remains to discover the right springs. We know where to look, having identified Debir with the highest degree of probability. And our search is rewarded. In all other parts of the district the water supply is from cisterns; no streams or springs occur. (But about seven miles (Conder) N. of *ed-Dihiriyeh* (the true Debir), and near Van de Velde's site for Debir (*Ah. ed-Dihbeh*), are beautiful springs worthy of being Achsa's prize), which feed a stream that runs for three or four miles, and does not dry up.¹ The springs, which are fourteen, are in three groups,

¹ *PEF Mem.* 3302; see also *GASm. Hist. Geog.* 279 (cp p. 78), who speaks of only two springs.

ACHSHAPH

and the two which are nearest to the head of the valley may be presumed to be the Upper and Lower Goliath. The identification is certainly a valuable one. See, further, GOLIATH-MAIM.

ACHSHAPH (אֲחִישָׁפַח, i.e. 'sorcery'; אֲחִישָׁפַח [B].

אֲחִישָׁפַח [V], אֲחִישָׁפַח [L]), one of the unknown sites in the book of Joshua. It lay, according to B, on the border of the Aserite territory (Josh. 19.25; אֲחִישָׁפַח [B]). Its king (i.e. the same Achshaph is meant) joined the northern confederation under Jabin, king of Hazor (11.1; אֲחִישָׁפַח [V], אֲחִישָׁפַח [L], [אֲחִישָׁפַח] אֲחִישָׁפַח [L]); and shared the defeat of his allies (12.2-4. Rob. (Hk 4.33) connects it with the modern Kesaf, a village near the bend of the river Litany where there are some ruins of uncertain date; this identification would suit Josh. 11.1 but not 19.25. Mispéro, on the other hand, followed by WMM (Ls. n. *Eur.* 154, cp 173), identifies Achshaph with the *Aksap* of the name-list of Thotmes III (K¹ 20.5.49). In this part of the list, however, there are names of localities in the region of Jerzeel, which is outside the land of Asher. Flinders Petrie (*Hist. of Isr.* 2.36) connects Aksap with 'Asefeh, 9 m. SSW. of Jebel, which is hazardous. At any rate there were probably several places noted anciently for their sorceries and therefore called Achshaph. The form אֲחִישָׁפַח (see above) has suggested a most improbable identification with Haifa (*PEF Mem.* 1165). The statement of Eus. in *OS*, 218.4 ff. (אֲחִישָׁפַח) is geographically impossible.

ACHZIB (אֲחִזִּיב; probably 'winter-torrent').

1. A town of Judah in the Shephelah, mentioned with Keilah and Maresah, Jos. 15.41 (אֲחִזִּיב א. אֲחִזִּיב [B], אֲחִזִּיב [V], אֲחִזִּיב [L]), also Mic. 1.11f, where אֲחִזִּיב, losing the intended paronomasia, renders 'the houses of Achzib' *oikoi paraitois*. The name becomes אֲחִזִּיב in Samit. text, Chazbah; אֲחִזִּיב [AEL.] in Gen. 38.5f, where the legend presupposes that Chazib is the centre of the clan of Shelah; and since in 1 Ch. 4.22f 'the men of Coreb' (אֲחִזִּיב; אֲחִזִּיב [AEL.]); but אֲחִזִּיב [B], cp אֲחִזִּיב = Socoh are said to belong to the same clan, we may safely recognise COZABA (so RV; AV CTOZABA) as another form of the same name. The

ACTS OF THE APOSTLES

name may perhaps linger in *Am el Kesbeh*, between Yarmuk (Jarmuth) and Shuweikh (Socoh), but to the E. of both (So GASM, after *PEF Mem.* 336). Consider's identification of Cozaba with the ruin of Kuweiziba 2½ m. N.E. of Halbul towards Hebron (*PEF Mem.* 333) is therefore superfluous. Build wisely counts the proposal to identify it with Kussab SE. of Tell el-Hesi (*Dial.* 192).

2. A Canaanite town, 9 m. to the north of Aecho, like which city it was claimed but not conquered by the tribe of Asher, Josh. 19.24 (אֲחִישָׁפַח [B], אֲחִישָׁפַח [V], אֲחִישָׁפַח [L], אֲחִישָׁפַח [L], Judg. 1.31 (אֲחִישָׁפַח [B], אֲחִישָׁפַח [V], Sennacherib mentions Akzib and Akku together in the Taylor inscription (K¹ 20.688). Achzib (Arām. *Achzib*) is the Bethgaza, *Ḥadḡma*, of *OS*, 251.2217, the *Ḥadḡma* (*H* 1.14), *Ḥadḡma* (*L* 1.12), where it is said to have been also called *Ḥadḡma* of Jos., the modern *es-Zib*.

ACIPHA (אֲכִיפָא [B]), 1. Est. 5.11f AV = Ezra 2.51, *Ḥakipha*.

ACITHO (אֲכִיזָו [V]), Judith 8.1. RV, *Antib* (7.7.4).

ACRA (אַקְרָא [AVP], Mac. 1.31 etc. AV 'stronghold', RV 'citadel'. See JERUSALEM.

ACRABBIM (אַקְרַבִּים, Josh. 15.31, RV *AKRABIM*.

ACRE (אֲכִרָא, *ακρεος* in Is.; for *α* in *α* Sam. cp *W. Dr. ad Is.* 1.5.1, 1.5.11 etc. AV *ing*, RV. The Heb. word seems to denote the amount of land which a span or Yoke [*g.*] of oxen could plough in the course of a day (cp below); perhaps, like the Egyptian *ḥpwp*, it ultimately became a fixed quantity (cp Now. *Isr.* 1.202). Even at the present day the fellahin of Palestine measure by the *faddan* (Syr. *faddana* 'yoke'; cp *DDP* 170), cp also Lat. *jugum*, *jugurum*. The term is not restricted to arable land, being applied in Is. *Is.* to a vineyard. Winckler, however (*IOF*, 2nd ser., 2.9), derives *aced* from Bab. *gamidu* (= *galku*) to weigh, properly to measure off, which is at any rate barely possible, and attempts to show that *aced* in Is. can denote only a liquid measure (which is by no means obvious). See WEIGHTS AND MEASURES.

ACTS OF THE APOSTLES¹

CONTENTS

The 'We' sections distinct in character from rest of book (§ 1); Inaccuracies (§ 2); 'Tendency' (§§ 3-7); 'Journey Record' (§ 8 f.); Other Sources (§ 10 f.); Trustworthiness (§§ 12-14); Authorship (§ 15); Date (§ 16); Blass's hypothesis (§ 17 f.); Religious Value of Acts (§ 18); Literature (§ 20).

Apart from scanty notices supplied by the NT epistles, this book is our only source for the history of Christianity during its first thirty or thirty-five years. The question of its trustworthiness is, therefore, of fundamental importance.

The sections in which, as an eye-witness, the writer gives his narrative in the first person plural (16.6-17.20

1. The 'We' sections or Journey Record.

5-15 21.1-23 27.1-28.16) may be implicitly accepted. But it may be regarded as equally certain that they are not by the same writer as the other parts of the book. In the sections named, the book shows acquaintance with the stages of travel of almost every separate day, and with almost every unimportant detail (20.13 21.2 f. to 28.11, etc.); outside these limits it has no knowledge even of such an important fact as that of Paul's conflicts with his opponents in Galatia and Corinth, and mentions only three of the twelve adventures catalogued so minutely in 2 Cor. 11.24 f. cp 23 (Acts 14.16 22.23 f.). Even had the writer of the book as a whole (assuming him to have been a companion of Paul) been separated from the apostle—remaining behind, e.g., in Macedonia during the interval between 16.17 and 20.5—he would surely afterwards have gathered the powerful details from eye-witnesses and embodied them in his

book, instead of satisfying himself with such extraordinarily meagre notes as we have in 18.21-23 20.1-3 or 16.4-8. Even were he following an old journal, he could never have passed over so many important matters in silence simply because they were not to be found in his notes. Further, he contradicts the Epistle to the Galatians so categorically (see GALATIANS, EPISTLE TO, § 5 f., and CONSTITUTION OF JERUSALEM) that, if we assume his identity with the eye-witness who writes in the first person, we are compelled (see below, § 6) to adopt one of two courses. We must either make Galatians non-Pauline or pronounce the writer of Acts as a whole to be a 'tendency' writer of the most marked character—hardly less so than a post-apostolic author who should have simply invented the 'we' sections. To suppose that the 'we' sections were invented, however, is just as inadmissible as to question the genuineness of Galatians. If the sections had been invented, they would not have been so different from the rest of the book. We must therefore conclude that the sections in question come from a document written by an eye-witness, the so-called 'we' source, and that this was used by a later writer, the compiler of the whole book.

It is upon this assumption of a distinct authorship for

¹ On title see below, § 3 n.

ACTS OF THE APOSTLES

the two sections that we are best able to pass a comparatively favourable judgment on the compiler's selection from historical facts in other parts of the book. But there is one change from which he cannot be freed, viz., that he has followed the method of retaining the 'we' without change. In the case of so capable a writer, in whom hardly a trace can be detected, either in vocabulary or in style, of the use of documents, this fact is not to be explained by lack of skill, such as is sometimes met with in the Mediaeval chroniclers. The inference is inevitable that he wrote what has actually happened, that the whole book should be regarded as the work of an eye-witness. An analogous case is to be found in the 'I' taken over from the Memoirs of Ezra and Nehemiah (Ezra 7:27-8:34; Neh 1:1-7:5; 12:1-13:31; also in Job 1:1-38, and in *Proterogospel from Jer.*, 1:1-3). Just as Ezra 10 and Neh 8, as well as the sections just mentioned, must be held to rest on those Memoirs, although modified and with the 'I' dropped out, so in Acts we may assume much other matter to have been drawn from the source from which the 'we' sections are derived. Any attempt, however, to assign to this source whole sections of the book not having the 'we', and to use the conclusion so gained as a proof of the trustworthiness of everything thus assumed to belong to it, must be postponed until this trustworthiness has been investigated by the means otherwise at our command.

In this investigation we begin with certain obvious inaccuracies, first of all with those which cannot be traced to the influence of any tendency.

2. Inaccuracies uninfluenced by tendency.

Let us take the manifestation of Christ to Paul near Damascus. According to 22, his companions see the light from heaven but do not hear the voice of Jesus; according to 9 they hear the voice but see no one and drop a fall down; according to 26:12-18 they fall down prostrate with Paul, but it is he alone who sees the heavenly light, and hears the voice. This last account, moreover, represents him as having received at the time a full explanation of what had occurred; according to 22, however, he did not receive the explanation until afterwards, through Ananias.

Further inconsistencies of statement are to be found when we compare the explanation of the departure from Jerusalem in 20:1-6 with that in 22:17-21; the account in 10:44-46 with that in 11:13-14; the explanation of the offering in 21:26-26 with that in 21:27-27; the account in 21:31-31; 22:29-31; 23:27 with 28:15, according to which Paul was, in Jerusalem, a prisoner of the Jews and not as yet of the Romans; the occasion of the appeal to Caesar in 25:1 with that in 28:17. The liberation of Paul and Silas from prison at Philippi (16:23-34) is not only a very striking narrative with resemblances to what we read in Euripides, *Phaëdra*, 430-441, 1:2-3, 1:6-7; but, as regards *Phaëdra*, 430-441, 1:2-3, 1:6-7, and as regards Acts 16:23-34, in Lucian, *Lucian*, 27:1-3, but is scarcely reconcilable with 1 Thess. 2:2, where Paul's God was in any measure due to an occurrence of this kind.

So much for inaccuracies that cannot be attributed to any tendency on the part of the writer. There are others, and these of much greater importance, which can only be so explained. Before discussing these, let us ascertain clearly what the tendency of the writer is.

Every historian who is not simply an annalist must have 'tendency' in the wider sense of that word.

3. Tendency of the book.

His trustworthiness is not necessarily affected thereby. Indeed, it has actually been urged by one of the apologists for Acts, as an argument for the trustworthiness of the book, that it was designed to be put in as a document at the trial of Paul, and was written entirely with this view—a position that cannot, however, be made good. Now, it is clear that the book does not profess to be a history of the first extension of Christianity, or of the Church in the apostolic age; it covers really only a small portion of this field. It is equally certain that the title *ᾠδὴς* (τῶν) ἀποστόλων does not express the purpose of its

author, who relates hardly anything of James and John, and of none of the apostles mentions nothing but the names. Neither is the book a history of Peter and Paul, for it tells also of John of both the Jameses, of the deacons, of Stephen, Philip, Apollos, and others. Nor is it a history of the spread of the gospel from Jerusalem to Rome, for the founding of the Roman Church is not described but presupposed (28:16), and all that has any interest for the writer is the arrival there of Paul (19:22-23). It is often supposed that the aim of the book is expressly formulated in 1:1, and that the purpose of the author was to set forth the spread of Christianity from Jerusalem, through Samaria, and to the ends of the earth. This is much too inadequate to account either for the difference in scale of the various narratives, sometimes so minutely detailed and sometimes so very vague, or for their marked divergences from actual history.

It is, therefore, no prejudice on the part of critics, but the nature of the book itself, that leads us to ascribe tendency to the writer. Only (1) we must not, with the Tübingen School, consider it 'concomitant.' According to this view, Acts was an attempt from the Pauline side, by means of concessions to bring Judaism to a recognition of Gentile Christianity. A reconciliation of the two was thus to be effected in face of the danger that threatened both, from Judaism on the one side and from state persecution on the other. This cannot have been the purpose. Acts is much too harsh towards non-Christian Jews, for whom Christian Jews continued to retain a certain sympathy (22:17-21; 18:17-19; 21:27-28; 23:12-13, etc.); besides, most of the details which it gives have no relation to any such purpose. The main point on which the supposed reconciliation turns, the Apostolic Decree (15:23-29), is to be explained otherwise (see *COHEN ON JERUSALEM*, § 10). (2) On the other hand, the book is not a mere apology for Paul. If it were, much of its contents would be unsuitable to the enumeration of the conditions required in an apostle (1:1-2), which were not fulfilled in Paul; it does not even give such a view of the personality of Paul as the facts known to us from the epistles demand (see below, §§ 7, 14). There remains only (3) one other possible view of the author's tendency. His aim is to justify the Gentile Christianity of himself and his time, already on the way to Catholicism, and he seeks to do this by means of an account of the origin of Christianity. The apostles, including Paul, are the historical foundation of Christianity, and 4:12-14, where we are told that all Christians were of one heart and soul, may be regarded as forming a motto for the book.

A whole series of denumerable inaccuracies becomes comprehensible when viewed as resulting from this tendency. Paul never comes into conflict with the original apostles or their followers as he does in Gal. 1:7-9; 2:12; 2 Cor. 10:11-13; 11:13-15; 12:1-4.

The one misunderstanding (Acts 15) that arises is cleared away by the original apostles; the attempt to enforce the circumcision of Titus (Gal. 2:1-5) may, the whole personality of Titus is just as carefully passed over in silence as are the dispute with Peter at Antioch (Gal. 2:11-21; see *COHEN ON JERUSALEM*, § 9) and the Judaizing plots to impose on the Galatians and Corinthians another Gospel, that of circumcision (Gal. 1:6-9; 5:12-13), and another Christ (2 Cor. 11:4-5). Apart

It is not to be inferred from the absence of the article from the title in good MSS (*ᾠδὴς ἀποστόλων* [B]) that the author meant to say that it was with the acts of only some of the apostles that he proposed to deal; for it would be very strange that he should admit such an incompleteness in the very title of his work. The article before *ἀποστόλων* is omitted because *ᾠδὴς* is without it; and that is so simply because such is the usual practice at the beginning of books (cp. Mt. 1:1; Acts 1:1, and see Wiesner, § 104, 10). Since therefore no form of the title can be assigned to the author of the book, we conclude that the title must date from the time when the book was first united with others in one collection—its first occurrence is in the last third of the second century (Mss. Fragm. Tert. Clem. Al.). The simple *ᾠδὴς* [et] *ἀποστόλων* (Crisostomus, *Origenes*, etc.) is meaningless as an original title, and intelligible only as an abbreviation.

¹ *Abrie, Bib. Theol. Quartalschr.*, 1863, pp. 84-134.

ACTS OF THE APOSTLES

from the Gentiles, who seldom show hostility to Paul (13:45; 17:17-18; 18:12-13; 19:35-40; 20:13-17; 21:27-31; 24:13-17; 26:10-11; 28:17-18). It is not without understanding the end of the story (1:1-2) that Paul meets with difficulties (13:45; 18:12-13; 19:35-40; 20:13-17; 21:27-31; 24:13-17; 26:10-11; 28:17-18). For further illustrations of the operation of this tendency in the writer, cf. Acts 13:45 and 18:12-13.

On the other hand, Paul brings forward nothing whatever in which the original apostles had not led the way. Far from going beyond them at all, he appears to be entirely dependent on them.

His journey to Antioch, Syria, and Cilicia (Gal. 1:22-23) are parallel to the journey of the apostles (Acts 13:1-3; 14:25-28; 15:36-41; 18:18-21; 20:1-6; 21:1-14). This is not to say, however, that Paul is a mere follower of the apostles, but that he is a true apostle, and that his journey is a true apostolic journey. The primitive church, so completely and as a consequence of apostolic principle, followed the reception of the apostles, the Christian community without his being subjected to the requirements of the Mosaic law, as is related in 14:1-18, the apostle is that led to the Council of Jerusalem, and never again have (passing up).

Again, when at Paul's times in a strange city, he seeks (as we should expect) to find a synagogue, first of all with the synagogue, and then the proselytes who might be found for him, he could not find any in the Gentiles. Our view agrees also with Rom. 10:1-4. According to Acts, however, in almost every place where Paul preaches himself with his message, to the Gentiles as distinct from the Jews, he has to purchase anew the right to do so, by first of all preaching to the Jews at a synagogue, and by then (13:45; 18:12-13; 19:35-40; 20:13-17; 21:27-31; 24:13-17; 26:10-11; 28:17-18). The only exceptions to this rule are Berea (17:10-12), Ephesus, Lystra, and Antioch (13:45; 14:12; 18:12; 20:13-17; 21:27-31; 24:13-17; 26:10-11; 28:17-18), where the narrative passes at once to a public singular incident, and towns so summarily dealt with as Lystra and Berea (14:12-13; 18:12-13; 20:13-17; 21:27-31; 24:13-17; 26:10-11; 28:17-18), along with Iconium, where Gentiles are brought to Christianity through the sermon in the synagogue (14:1-18). In 28:12-13, in order to make the right to preach to the Gentiles dependent on the relation of the gospel to the Jews, the very existence of the Christian church, already, according to 28:12, to be found in Rome is ignored. Such a dependence of Paul's work in mission to the Gentiles on the department of the Jews, and that too in every individual city, is quite irreconcilable with Gal. 1:22-23, and with the motives which the author himself holds in Acts 13:45-48, 18:12-13, as well as with 19:35-40, 20:13-17.

After the appearance of Jesus himself to Paul near Damascus, the apostle has yet further to be introduced to his work by human agency, the first instance being by Ananias (9:10-17; 22:1-21), and subsequently (11:1-3) by Evodius (12:1-3), a member of the original church, and this happens after the church of Antioch, the first Gentile Christian church, and Paul's first important congregation, had already been founded by Christians from Jerusalem (13:26-41). Both of these statements are contradicted by Gal. 1:1-2; the latter of them also by the order in which Syria and Cilicia are taken in Gal. 1:21. Moreover, at the Council of Jerusalem (15:1-35) Paul has only to give in a report and to accept the decisions of the primitive church.

The tendency we have pointed out throws light also on the parallel (which is tolerably close, especially where miracles are concerned) between the acts and experiences of Peter and of Paul.

Both begin by healing a man lame from birth (3:6-10; 14:8-10), and go on to the cure of another sick man (9:34-35; 28:23-24); they heal many men at once, both directly (5:9-10; 28:23-24) and indirectly (5:15; 19:12), besides doing signs and wonders generally (2:43; 5:12; 14:15-17; 19:12); both bring a dead person to life (9:34-35; 20:10-12); both perform a miracle of judgment (5:12; 13:6-11); both, by the laying on of hands, confer the gift of the Holy Ghost (8:14-17; 19:1-7), and in doing so, also impart the gift of tongues (10:44-46; 19:6); both have a vision corresponding with one experienced by another man (10:1-6; 19:1-7); both are miraculously delivered from prison (5:17-18; 16:23-24); both are scourged (16:23-24; 26:1-2); both decline divine honours in almost identical words (16:25-26; 21:17-18; 26:23-24).

The life of Paul included many more incidents of this kind than that of Peter; but from what we have already observed we can understand how the author's wish not to allow Peter to fall behind Paul must have influenced the narrative. Still, he has by no means wholly sacrificed history to his imagination, and this has been so, he would certainly have brought his narrative into much closer agreement with his own ideals. He has not, for example, introduced in the case of Peter, as in that of Paul, a stoning (14:16), or threats against him (9:23; 29:11-13), or an exorcism (16:16-18). And in like manner the omission of many of the items enumerated in 2 Cor. 11:22-27 may be explained, at least in part, by the supposition that he had no intimate knowledge about them. He has, it would seem, at least in the main,

continued to matter preserve the fiction merely of a selection and putting it into shape.

b. Subsidiary tendencies.

There is first the *political* tendency, the desire to say as little as possible unfavorable to the Roman civil power.

In the Third Gospel we already find Luke declaring that he finds no fault in Jesus, and he has the assurance confirmed by the Lord, who in the other Gospels is not mentioned at all, in connection with the exaltation of Jesus. Luke declares this over that he will release Jesus, and he is prevailed upon to pass adverse sentence only by the insistence of the Jews (13:35-36). In Acts (which has even been regarded by some as an apology for Christianity intended to be laid before Gentiles; see above, § 10), the first assaults of Peter and Paul are Roman others (19:13-17), where it is the Roman authorities who definitely declare Paul to be no political criminal as the Jews would have it (18:12-13; 19:35-40; 20:13-17; 21:27-31; 24:13-17; 26:10-11; 28:17-18). It is by them also that he is put to death in more than one instance, at any rate, to be conspired (18:12-13; 19:35-40; 20:13-17; 21:27-31; 24:13-17; 26:10-11; 28:17-18).

When this political tendency is recognised, the conclusion of the book becomes intelligible. Otherwise it is a riddle. Even if the author meant to do so, and still a *repositio* *Agar* (third treatise), which is pure conjecture, he could not suitably have ended the *de repositio* *Agar* (second treatise) of otherwise than with the death of Paul, that he did not survive. Paul is even less likely than that he was otherwise interrupted at this point of his work. When we take account of this political tendency, however, in forbidding him to die (*de repositio*), it really is skilfully devised. The very last word, thus, says something favourable to the Roman authorities, and, in order not to efface this impression, the writer leaves the death of Paul unmentioned.

2. Secondly, he has in his mode of narration an *aesthetic* as well as a political tendency; he aims at being graphic.

This end is promoted very specially by the use, and the details, otherwise purposeless, appropriate to the journey, but it is also very much in the way of 4:12 that, without having any claim to be regarded as historical, contribute to the enlivening of the picture. If the primitive Christian community (see below, § 10), also of the specific (see § 10), and particularly by the miracle-narratives, which in almost every case where they are not derived from the 'we' statement (see § 10) are characterised by touches of remarkable vigour (10:1-6; 11:1-3; 12:1-3; 13:1-3; 14:1-3; 15:1-3; 16:1-3; 17:1-3; 18:1-3; 19:1-3; 20:1-3; 21:1-3; 22:1-3; 23:1-3; 24:1-3; 25:1-3; 26:1-3; 27:1-3; 28:1-3).

The total influence of all these tendencies not having been so great as to lead the author wholly to disregard the matter supplied to him by tradition, it has often been supposed possible to affirm that he had no such tendencies at all. The inaccuracies of the book are in this case explained simply by the assumption that the writer was not in possession of full information, and that, in a naive yet still unbiassed way, he first represented to himself the conditions of the apostolic age, and afterwards described them, as if they had been similar to those of his own.

When the conflict of tendencies in the primitive Christian Church had already been brought to an end. Certain it is that in his unquestioning reverence for the apostles, it was impossible for him to conceive the idea of their having ever been at variance with one another. On the other hand, it cannot possibly be denied that he must at the same time have either passed over accounts that were very well known to him or completely changed them. It is hard to understand how any one can airily say that to this writer, a Paulinist, the Pauline epistles remained unknown. Paradoxical as it sounds, it is certainly the fact that such a lack of acquaintance would be more easily explicable had he been a companion of Paul (a supposition which, however, it is impossible to accept; see above, § 1) than it is on the assumption that he lived in post-apostolic times. It is not probable, though not probable, that Paul might sometimes have been unable to communicate his epistles to his companions.

ACTS OF THE APOSTLES

before sending them out. But a companion of Paul would at least be acquainted with the events which are recorded in the epistle. If we are not prepared to declare the whole use of the Pauline epistles to be spurious, and their sentiments about the events to which they allude unhistorical, there is no way of acquitting the writer of Acts from the charge of having moulded history under the influence of 'tendency'. Only this tendency must be understood as being simply a consistent adherence to the view of the history that he had before he studied his sources.

The tendencies of the author, once established in regard to points where his historical inaccuracies admit of definite proof from a trustworthy source, one may perhaps found on them presumptions in regard to matters that admit of no such control. Did Paul circumcise Timothy (16:1-2)? Since Timothy's mother is called a Jewess, and Paul held the principle laid down in 1 Cor 9:20, it is impossible to deny categorically that he did. Nevertheless, it remains in the highest degree improbable, especially after Paul had, just before (Gal 2:1-10), so triumphantly and as a question of principle, opposed the circumcision of Titus. The difficulty of the case is not much relieved even by the supposition that the circumcision happened *before* the Council of Jerusalem, and only on account of the Jews of that place (16:1) and therefore, notwithstanding the statement of the same verse, not with a view to the missionary journey. Again, did Paul take a Nazirite vow? We leave 18:18 out of account, since the text does not enable us clearly to decide whether that assertion concerns Paul or Aquila, and since a Nazirite could shave his head only in Jerusalem. In 21:23-26, however, Paul is represented as having taken such a vow, not only without waiting for the minimum period of thirty days required by traditional law (21:27-24:16, cf. Jos. *Ant.* 15:4 [§ 313]; Num. 6:1-21; see NABH 111), but also, and above all, with the expressly avowed purpose of proving that the report of his having exempted the Jewish Christians of the Diaspora from obligation to the ceremonial law was not true, and that he himself constantly observed that law (cp 28:17). This would, for Paul, have been simply an untruth, and that, too, on a point of his religious conviction that was fundamental (Gal 1:11-12; Rom 10:4, etc.). Just as questionable, morally, would it have been had he really described himself, especially before a court of justice (23:6, cp 21:21-26:5-8, 28:17), simply as a Pharisee, asserted that he was accused only on account of the doctrine of the resurrection of the dead, and held his peace about his Christianity.

In view of the tendencies that have been pointed out, there is, unhappily, some room for the suspicion that the author has not held himself bound to appropriate the 'we' source in its integrity. This is indeed made antecedently probable by the fact that he has —

8. The Journey Record: *or*, its treatment.

— only in the Pauline Gospel passed over much that lay before him in his sources, and that the sections of the Journey Record actually adopted supply for the most part only superficial notices of the stages passed, or miracle stories. And just in proportion to the freedom of the latter from legendary embellishments (16:6-17; 20:6-17; 28:16-31), and to their credibility even in the eyes of those who wholly reject the supernatural (although, of course, the narrators thought them miraculous), must be our regret at every instance in which the Journey Record has been set aside, or even in which its words (as has been conjectured to be sometimes the case; see above, § 1) are not reproduced exactly.

This free treatment of the Journey Record increases the difficulty of ascertaining who was its author. Had the record been adopted intact, we should have

been certain that it was not composed by any of those who appear among the companions of Paul in the sections where the narrative 'we' does not occur. But this means of solution is

9. A. Its author.

out of the question. And if the source came into the hands of the author of Acts as (let us say) an anonymous document, or if, in the interest of greater vividness, he had the 'we' without regard to the person originally meant, he may also at the same time have spoken of the writer of the Journey Record in the third person, even when he was otherwise following the document. Yet 20:5 is a strong indication that by the 'we' he does not wish us to understand any one at least of the seven mentioned in the immediately preceding verse. Thus the text at all events gives nowhere any ground for thinking of Timothy, who, moreover, is mentioned in 17:14, 18:5 in the third person. If we are to regard the record as coming from Silas, the author of Acts must have used it without the 'we' and, in a very fragmentary way indeed, for long periods during which, according to his own statement (15:41; 16:10-15; 17:1-18:1), Silas was with Paul. This, though not quite impossible, is very unlikely. Moreover, Silas is never again mentioned in Acts after 18:5; neither, from the same period, that of Paul's first stay in Corinth (2 Cor 1:10-12), is he again mentioned in the Pauline Epistles; and in 1 Pet 5:12, he appears by the side of Peter. Whoever attributes the Journey Record to Titus must in like manner assume that much of it has been either not used at all or used without the 'we'. For Titus was with Paul at the time of the Council of Jerusalem (Gal 2:1), and continued to be his companion at least during the latter part of the three years' stay at Ephesus, as also during the subsequent stay in Macedonia (2 Cor 2:13; 7:6-8; 10:14; 12:18-19). Besides, the writer of Acts would use a work of Titus somewhat unwillingly, for he completely suppresses his name (see above § 4²). Still, if so valuable a writing by Titus had been really available, the author of Acts would scarcely have completely neglected it.

If it is thus just possible that Titus wrote the Journey Record, it is perhaps still more conceivable that it was written by Luke. In this way we should best be able to explain how, ever since the time of the Minoritica Fragment and Hrekenius (*Abh. Hebr.* iii, 114), the entire book of Acts as well as the Third Gospel came to be ascribed to him. It is true that in the Pauline Epistles, the first mention of Luke is in Col 4:14; Phil 24:1; 2 Tim 4:11. In other words, not before Paul's imprisonment and the closing years of his life. Nevertheless, he may have been one of Paul's companions at an earlier period, if we are allowed to suppose that he occupied a subordinate position. The most suspicious fact is that, whilst Luke (see 1:1, 11), if we may trust Col 4:14, was, like Titus (Gal 2:1), unemancipated, the writer of the Journey Record not only uses Jewish specifications of date (Acts 16:13; 20:6; 27:9), and goes to the synagogue or the Jewish place of prayer (16:13), but also includes himself (16:17) among those who taught there (*ἡδωκότες*, 16:30), must not be pressed, as it may rest on an error on the part of the speakers; cp 16:17). We must thus, perhaps, abandon all attempt to ascribe the Journey Record to any known companion of Paul.

Other sources for Acts, in addition to that just mentioned, have long been conjectured; e.g. a Barnabas source for chap. 13¹. Here the naming over again of Barnabas and Saul, and the omission of John Mark (13:1), notwithstanding 12:25, are indeed remarkable, as are also

¹ Add to this that, if 2 Tim. 4:10 is to be taken as accurately preserving an incident in Paul's imprisonment at Caesarea, it could hardly have been Titus that accompanied Paul to Rome (Acts 27:28). The notices in the epistle to Titus are too untrustworthy to serve as a foundation for historical combinations.

² It is just as incorrect to suppose that he is named in Acts 18:7 as it is to identify him with Silas.

ACTS OF THE APOSTLES

the circumstance that, apart from 11 vs 12 vs 15 vs 25, it is precisely in these two chapters that Barnabas is often (13 vs 27 14 vs 4; contrast 13 vs 40 vs 11 vs 20) mentioned before Paul, and that it is only here (14 vs 14) that Paul (with Barnabas) is called an 'apostle' (see APOSTLES).

Of primary importance would be the establishment of sources for chaps. 1-12.

Many traces of distinct sources can be detected. In addition to what is said under CHAPS. SIXTEEN VI, and under CHAPS. XVII or XVIII, §§ 1-3, two themes had been long recognised as running through the speech of Stephen: viz. refutation of the idea that the blessing of God depended on the possession of the temple (7 vs 48 vs 50), and renunciation of the people against the divine will (7 vs 51 vs 53). The stoning of Stephen, moreover, is narrated twice (7 vs 54 and 10 vs 40), in every confusing way, and his burial does not follow till 8 vs 2, after the mention of the great persecution and the flight of all the Christians except the apostles (8 vs 1 vs 3). The persecution is resumed, but, as in 8 vs 1, only Saul is thought of as persecutor. The mention of Saul seems thus throughout (7 vs 58 vs 1 vs 3) to be a later insertion into a source in which he was not originally named. Besides, 8 vs 2 seems also to be an interpolation into the account of the last hours of Stephen. In as far as this interpolation speaks of the dispersion of the Christians, it is confirmed in 11 vs 1, while 8 vs 1 may easily be an ingenious transposition of some editor leading up to the story of Philip. 11 vs 1 is further followed by the statement (11 vs 2) that the church at Jerusalem elected a delegate. This representation of the right of the church to elect delegates, which is found also in 6 vs 3, seems to be more primitive than that in 8 vs 1, according to which such an election was made by the apostles. Further, in 16 vs 17 the apostles are raised to a rank unknown to the earliest times. For, that Christians did not receive the Holy Ghost by baptism, but only through subsequent laying on of hands, and those the hands of the apostles, is disapproved by Gal. 3 vs 2, and even by the presupposition underlying Acts 19 vs 6, although the same notion reappears shortly afterwards (19 vs 6). In like manner, finally, the words 'except the apostles' (8 vs 1) may have been subsequently inserted, to preserve the dignity of the apostles and the continuity of their role in Jerusalem. In 11 vs 1 the friendly gifts destined for distribution during the famine come into the hands of the presbyters, not, as 6 vs 1 would have led us to expect, into those of the deacons.

Observations such as the preceding have of late been expanded into comprehensive theories assigning the whole book to one source or to several sources, with additions by one editor or by several editors.

11. Theories as to Sources.

See B. Weiss, *Paul und die NT* (1875, 2nd ed. 1895), § 5, and *Ap. geu.*, 1891 (vol. 9, pts. 3 and 4, of Gehardt and Haenack's *Lehrb. u. Unters.*); Sordani, *Entstehung der Apostelgesch.* (1893); van Manen, *Pantheus*, 1: *die Entstehung der Apostelgesch.* (1893); Feine, *Eine vorchristliche Überlieferung des Lukas*, 1894 (only on chaps. 1-12); Spitta, *Ap. geu.*, 1897; Clemens, *Chronol. der Paulin. Br.*, 1891 and (for chaps. 1-5) in *St. Paul*, 1900, pp. 207-257; Joh. Weiss, *St. Paul*, 1896, pp. 380-420; 'Das Judentum in der Apostelgesch.', etc., and 1898, pp. 252-260; 'Die Chronol. der Paulin. Br.' *Gew. in Rom.*, 1894, pp. 373-382 (only on the first chapters); Jungst, *Die Quellen der Apostelgesch.*, 1895; Hagenfeld, *Zf. N.*, 1896, pp. 15-17, 176-217, 284-447, 481-517; 1896, pp. 21-79, 177-219, 331-382, 427-555.

No satisfactory conclusion has as yet been reached along these lines; but the agreement that has been arrived at upon a good many points warrants the hope that at least some conclusions will ultimately gain general recognition. It is certainly undeniable that this kind of work has sharpened the wits of the critics, and rendered visible certain inequalities of representation, points and seams, even in places where they are not so conspicuous as in 7 vs 8 vs 4.

Thus the tumult in Thessalonica is told in 17 vs 1 for a second time after 17 vs 1 in a disturbing way that leaves it impossible to say who it was that the Jews were trying (17 vs 1) to drag before the people, or why it was that Jason (17 vs 6), whose part in the affair does not become clear till 17 vs 6, was brought before the authorities. It is probable that 13 vs 2 originally followed immediately on 13 vs 1. Similarly, the account of the wholesale miracles of the original apostles (1 vs 1 vs 12 vs 1) is interrupted by the interpolation of a fragment (1 vs 12 vs 14) which is not homogeneous. The least that could be done here would be to arrange as follows: 1 vs 1 vs 12 vs 1 vs 12 vs 14. But that the text should have become so greatly disturbed by transposition is much less likely than the supposition of several successive interpolations. On 18 vs 28-29 (1 vs 1), see APOSTLES, and CHAPS. VI or VII, § 4 vs 5. In the latter passage (1 vs 1) the attempt has been made, by separation of sources, to solve questions to which otherwise only tendency criticism seemed to provide an answer. Similarly in the case of 21 vs 26. After the presbyters have just praised God for the success of Paul's mission to the Gentiles (21 vs 24) the proposal that he should put it in evidence how strictly leged he is in his views follows with but little fitness.

And had Paul been engaged in carrying out a Nazirite vow, it is hardly likely that his presence in the temple (21 vs 27 vs 28) could have led to an attempt on his life. A reason for this attempt is found (21 vs 28 vs 29) in the alleged introduction of a Gentile within the sacred precincts of the temple, a proceeding which no one would guess to be simultaneous with the presentation of an offering. Since, moreover, for a Nazirite vow at least thirty days are necessary (see above, § 3), it has been proposed to detach 21 vs 28 vs 29, and to refer the seven days of 21 vs 27 to the duration of the feast of Pentecost which Paul, according to 20 vs 1, was to spend in Jerusalem. 21 vs 27 vs 28 vs 29 would then also, along with 20 vs 1 and 21 vs 28, belong to the Lukaney Record.

We come now to the question how far this distribution of the matter among various sources affects the credibility of the book. It is indeed

12. Bearing of these theories on trustworthiness.

time that, in the case last mentioned, the archaeological mistake of assigning only seven days for the Nazirites would become more comprehensible if we recognised a variety of sources; yet even so we should have to admit that there is an error, and that the editor had been guilty of the oversight of incautiously bringing the two accounts together. And he, as well as the source from which 21 vs 28 vs 29 is perhaps taken, would still remain open to the reproach of having, under the influence of a tendency of the kind described above (§ 6), ascribed to Paul a repudiation of his principles of freedom from the law. It cannot be too strongly insisted that in as far as Acts, viewed as a homogeneous work, has to be regarded as a tendency writing, it is impossible to free it wholly of this character by distributing the matter among the various sources. The most that can be done is in cases of excessive misrepresentation to put this in a softer light. In general, however, the editor has dealt with his sources in so masterful a manner that an unhappy lot in the selection and arrangement of the pieces has but rarely to be noted. It has been a practice among some of the scholars enumerated above to claim absolute trustworthiness for the whole of an assumed source which they suppose themselves to have made out, irrespective of the nature of some of the contents, as soon as they have found it trustworthy in some particulars. Such an abuse of discrimination of sources in the interest of apologetics is not only illegitimate; it speedily revenges itself. These very critics for the most part find themselves compelled to attribute to their secondary sources and their editors an extraordinary amount of ignorance and awkwardness. In particular, all theories according to which a single assumed source of which the 'we' sections form part is taken as a basis for the whole of Acts must from the outset be looked upon with distrust. There is nothing to suggest that any diary writing companion of Paul also wrote on the beginnings of the church at Jerusalem, and, even if there were, any assumption that his information on such a subject would be as trustworthy as his assertions founded on his own experience, would be quite unwarranted.

The results then with reference to the trustworthiness of Acts, as far as its facts are concerned, are these:

13. Trustworthiness of narrative.

Apart from the 'we' sections no statement merits immediate acceptance on the mere ground of its presence in the book. All that contradicts the Pauline epistles must be absolutely given up, unless we are to regard these as spurious. Positive proofs of the trustworthiness of Acts must be tested with the greatest caution.

Ramsay thinks he has discovered such proofs in the accuracy with which geographical names and contemporary conditions are reproduced in the journey of Paul (*Church*, 1894, 1 vs 108; *St. Paul*, 1905). Some of the most important of these points will be considered elsewhere (ACTS VII, §§ 1 vs 14, 2 vs 1). On the other detailed instances many will be found to hang down on closer examination.

For example, Ramsay goes so far as to say (*St. Paul*, chap. II, 4): 'Aquila, a man of Pontus, settled in Rome, bears a Latin

ACTS OF THE APOSTLES

name; and must therefore have belonged to the province and not to non-Roman Pontus. This is a good example of Luke's principle to use the Roman provincial divisions for purposes of classification. As if a Jew from non-Roman Pontus, settled in Rome, could not have assumed a subsidiary Roman name, as countless other Jews are known to have done! And as it Luke would not have found it necessary to call him Hieronikos even if he were from non-Roman Pontus!

But it is not necessary to go thus into details which might be adduced as proving the author's accurate acquaintance with localities and conditions. For Ramsay attributes the same accuracy of local knowledge also to one of the revisers of the text, assigned by him to the second century A.D., whose work is now preserved to us in D, and also to the author of one source of the *Acta Pauli et Thecla* (§ 3), assigned by him to the second half of the first century, whose work, however, he declares to be pure romance (*Church*, 2564). If so, surely any person acquainted with Asia Minor could, even without knowing very much about the experiences of Paul, have been fairly accurate about matters of geography, provided he did not pick up his information so late in the second century as to betray himself by his language, as according to Ramsay (2364 [end] 5 [end] 759 83-6; *St. Paul*, see Index under 'Hezan Text') the above mentioned reviser, whose work lies at the foundation of D, has done. In point of fact, Weizsäcker (*Ap. Zeitalter*, 230 f., 2nd ed. 230 f.; ET 1274 f.) thinks that in Acts 13 f. the account of the route followed does come from an authentic source, but yet that the contents of the narrative are almost legendary.

Such, for example, are the incidents at Paphos in Cyprus, 13-12 (see BURGESS); also 13-14 46 f. 141 f., spoken of above (§ 4); the speech in 13-15-41 (see below, § 14); the healing of a lame man, 13-16, recorded after the model of 3-1-11; the paying of divine honours to Barnabas and Paul, 14-11-13, after the manner of the heathen fables (*Philemon* and *Reneis*, in adjacent Phrygia, see *Ov. Met.*, 8-821 (25 f.)); and the institution of the presbyterial organisation, 14-23. In the first main division of the book (1-12), great improbability attaches to the publicity with which the Christian community comes to the front, to the sympathy that it meets with even among the masses, although not joined by them (2-47 431 513), and to the assertion that only the Sadducees had anything against it, and they only on account of the doctrine of the resurrection (4-1 f.), while the Pharisees had given up all the enmity they had displayed against Jesus, adopting a slightly expectant attitude. See, further, BARNABAS, BARBARAS, GILES, COMMUNITY OF GOODS, PHILIP, PETER, CORNELIUS, CHRISTIAN, and also, for the journeys of Paul to Jerusalem, and the attempted rearrangement of them, COUNCIL OF JERUSALEM, § 1.

But, after every deduction has been made, Acts certainly contains many data that are correct, as, for example, especially in the matter of proper names such as Jason (17-5), Titus Justus, Crispus, Sosthenes (18-7 f. 17), or in little touches such as the title *ποταρχαί* (17-6), which is verified by inscriptions¹ for Thessalonica, as is the title of *πρωτοῦς* (28-7) for Malta, and probably the name of Sergius Paulus as proconsul for Cyprus (13-7). Only, unfortunately, we do not possess the means of recognising such data as these with certainty, where confirmation from other sources is wanting.

With regard to the speeches, it is beyond doubt that the author constructed them in each case according to his own conception of the situation. In doing so he simply followed the acknowledged practice of ancient historians. (Thucydides [i. 221] expresses himself distinctly on this point; the others adopt the custom tacitly without any one's seeing in it anything morally questionable.) This is clearly apparent at the very outset, in Acts 1-15-22.

It is not Peter who needs to recount these events to the primitive Church already familiar with them; it is the author of Acts who feels alk I am to tell his readers of them. And it was only for the readers of the book that there could have been any need of the note that the Aramaic expression *Avēdama* belonged to the Jerusalem dialect, for that was the very dialect

which the supposed hearers were using (cp. further THEODAS, and JENAS of GALILAEA).

The speeches of Paul in Acts embody a theology quite different from that of his epistles.

A thought like Acts 17-23 is nowhere to be found in the epistles. Paul derives idolatry, not, as in Acts 17-29 f., from excusable ignorance, but from deliberate and criminal rejection of God (Rom. 1-18-12). Only in Acts 13-38 f. 16-31 20-28, do some really Pauline principles begin to make themselves heard. The most characteristically Pauline utterances come, in fact, from Peter (15-7-11), or even James (15-19); see COUSCH, *DE JERUSALEM*, § 83. The speeches of Paul, especially that in 13-16-41, are so like those of Peter in idea, construction, and mode of expression, that the one might easily be taken for the other. For example, Paul's speech in 13-18 f. resembles Peter's in 10-43. Or cp. 3-17-13 f. (Peter) with 13-27 f. (Paul); 2-25-31 with 13-35-37; or 6-14-18 for 'Christ' in 3-14 with 22-14, but also with Stephen's in 7-55. For the speeches of Paul, especially 13-16-41, show affinities also with that of Stephen: see 13-17-19 22 as compared with 7-26 f. 36 45 f. In like manner, the apologetic discourses of Paul in his own defence betray clearly an unhistorical origin (see § 7).

In short, almost the only element that is historically important is the Christology of the speeches of Peter. This, however, is important in the highest degree. Jesus is there called *παῖς Θεοῦ*—that is to say, according to 4-25, not 'son,' but 'servant' of God (3-13-26),—holy and righteous (3-14 4-27 2-27); he was not constituted Lord and Messiah before his resurrection (2-36); his death was not a divine arrangement for the salvation of men, but a calamity the guilt of which rested on the Jews (3-13-15 5-30), even if it was (according to 2-21 4-28) fore-ordained of God; on earth he was anointed by God (1-27) with holy spirit and with strength, and he went about doing good and performing cures, but, according to 10-38, only upon denunciations; his qualification for this is in the same passage traced to the fact that God was with him. God performed miracles through him (2-22). A representation of Jesus so simple, and in such exact agreement with the impression left by the most genuine passages¹ of the first three gospels, is nowhere else to be found in the whole NT. It is hardly possible not to believe that this Christology of the speeches of Peter must have come from a primitive source. It is, nevertheless, a fact sufficiently surprising that it has been transmitted to us by a writer who in other places works so freely with his sources. At the same time, however, the *Didachē* or Teaching of the Twelve Apostles, especially 9 f., also bears evidence that in the second century, in spite of Paul, and of the Epistles to the Hebrews, to the Colossians, and to the Ephesians, and of the Gospel of John, an equally simple Christology still appeared at least in many Christian circles. That the writer of Acts also respected it may be conjectured from the fact that he has not put into the mouth even of Paul any utterances that go beyond it (13-23 22-14).

It has already been repeatedly assumed in the preceding sections that the writer of Acts is identical with the writer of the Third Gospel. The similarity of language, style, and idea, constantly leads back to this conclusion.

Differences of spirit between the two writings are so difficult to find that their existence at any time can be held only on the assumption of a subsequent revision of the Gospel, with a view to their removal, by the author of Acts.

The most important divergence between the two books is that according to Acts 1-3 (cp. 13-31) the ascension of Jesus did not occur till forty days after his resurrection, while according to Lk. 24-1 26 31 46 50 f., as also the Epistle of Barnabas (15-6) and probably even in 20-1, it was on the very evening of the resurrection.

According to the original view, as indicated by the absence of any special separate mention of the ascension, in 1 Cor. 15-4-12; Rom. 8-34; Heb. 1-3 10-12 12-2; Eph. 1-2 2-6 19 f.; 1 Pet. 3-18-22, and perhaps even also in Acts 2-32-33 (see *op. cit.* 2-3) the resurrection and the ascen-

¹ Such passages as Mk. 16-7 2-12 13-1 13-6 1; Lk. 11-20-22; Mt. 16-5-12 11 13 17 19 f. as contrasted with those in the same gospels which already present secondary reproductions of the same facts: viz., Mt. 12-10 12-29 (ἐξουσία); see below, § 17 f. 24 36 13-33 12-40 11-21 21; Lk. 7-21; Mk. 3-28-30.

¹ A detailed discussion by Dr. Wm. Burton will be found in the *Amer. Journ. of Theol.*, 1887, pp. 887-888.

² Unless the passage be indeed a legendary development of Mt. 27-3-10.

ACTS OF THE APOSTLES

sion were the same act, and all appearances of the risen Jesus were thought of as being made from heaven. Whether this follows also from 'growth before' (*πρόσθεσις*) in Mk. 16:7 and in Mt. 28:7, may be doubted. In any case the forty days indicate a significant development of the idea, already at work in the Third Gospel, that before his ascension Jesus must have continued on earth to maintain intercourse with his disciples, in order that he might instruct them as to matters which he had not been able to take up before his death. A development of this kind in the story of the ascension required time. Even the repetition of the list of apostles in 1:13 from Lk. 6:14-16 marks Acts as a new work. It is, accordingly, very rash to suppose that Lk. 1:1-4 applies to Acts also, or to draw conclusions from this.

As the book is dedicated to Theophilus, Blass thinks (*Neue kirchliche Zeitschrift*, 1874, pp. 720-723) that the latter must, according to the custom that prevailed in antiquity, have been named in the title (that the title *πράξεις τῶν ἀποστόλων* is not original, see above, § 311). The same custom, too, he argues, would require the author to mention his own name in the title. Accordingly, as, since the end of the second century, the author has been believed to be Luke (see above, § 9), Blass thinks he is justified in restoring the title thus—*ΛΟΓΙΑ ἈΠΟΣΤΟΛΩΝ ΠΡὸς Θεοφιλον λόγος δευτέρου*. But this pure conjecture cannot overthrow the proof that the book does not come from a companion of Paul. On the contrary, had the title really run thus, it must have been regarded as a fiction. We should have had to suppose that the author, not content with suggesting (by retaining the 'we' of his source [see § 11]) that he had been a companion of Paul on his missionary journeys, desired to make this claim expressly in the title.

The date of composition of Acts thus falls at least some time later than that of the Third Gospel. The

16. Date. Litter is now, on account of its accurate allusions to actual incidents in the destruction of Jerusalem (Lk. 19:43 f., 21:20), almost universally set down to a date later than 70 A.D., and on some other grounds, which, however, it must be said, are less definite, even considerably later (see GOSPELS). Similarly, for Acts, the dying out of all recollection of the actual conditions of apostolic times—in particular, the ignorance as to the gift of tongues (see GILLES, SPIRITUAL) and the approaches to hierarchical ideas (17:20 8:14-17 13:28 20:27)—points only in a general way to a late period. Hence the surest datum is the author's acquaintance with the writings of Josephus.¹ For an instance see THEODAS. Josephus completed his *Jewish War* shortly before 70 A.D., his *Antiquities* in 93 or 94, the work *Against Apion* after that, and his *Autobiography* somewhat after 100. As to the inferior limit, Marcion about 140 A.D. had the Third Gospel, but not Acts, in his collection; but we are not aware whether he rejected it or whether it was wholly unknown to him. As for the Apostolic Fathers, 1 Clem. 18:1, if it have any literary connection with Acts 13:22, can just as easily be the earlier as the later; and as regards the rest of their writings, apart from Polycarp 12 (= Acts 2:24), dating from about 130 A.D., we can find traces only of the speech of Stephen, in the Epistle of Barnabas (16:2 9:4 f. 5:11 4:8 14:3 = Acts 7:50 51 52 40-43), which in 16:4 speaks of Hadrian's projected building, about 130 A.D., of a heathen temple in place of the Jewish temple as imminent.² In Justin, about 152 A.D. (not 137; see *Apol.* 1896, No. 1230, p. 98), the points of contact are more marked. If Acts 20:13-35 has many ideas in common with those of the Pastoral Epistles, the indiscriminate use of *πρεσβύτεροι* and *ἐπίσκοποι* (20:17-28) shows that the author has not yet reached the stage in the development of church government which characterizes the First Epistle to Timothy, the latest of the Pastoral Epistles, which wishes to see the bishop, conceived of as a sole ruler and represented in the

person of Timothy as apostolic vicar, set over the presbytery (1 Tim. 5:17). The date of Acts must, accordingly, be set down as somewhere between 105 and 130, or, if the gospel of Luke already presupposes acquaintance with all the writings of Josephus, between 110 and 130 A.D.

The conclusions reached in the foregoing sections would have to be withdrawn, however, and the author of Acts regarded as an eye-witness, if the views recently put forth by Blass³ should prove to be correct. According to Blass,

17. Blass's Theory. the markedly divergent readings of D, and those of the same character found in some other authorities,² all came from the author's rough draft of the book (which he calls *β*), while the ordinary text, *α*, found in B, S, A, C, etc., comes from the fair copy of this intended for Theophilus, which the author (being a poor man) made with his own hand. In doing so he changed his original—without special tendency or motive—and, still more, abridged it as only authors do in copying their own work. And here, as we have intimated, Blass says, the author can be no other than the eye-witness who can give his narrative in the first person with 'we'.³ To pronounce upon this certainly interesting hypothesis is, however, not nearly so simple a matter as Blass allows himself to suppose.

(a) Blass himself says that D and the additions or marginal readings in Syr. hl. in many cases already exhibit a combination of *α* and *β*, and that—as is witnessed by 15:5 18:10, etc.—where both sources coincide—this occurred even in the archetype itself from which both (directly or indirectly) are derived.

But there are many cases where Blass ought to have expressly recognized this combination, where, instead of doing so, he simply deletes something in *β* without giving further explanation. For example, *ἐκθαύβοι* at the end of 3:11 comes from *α* along-side of *οἱ δὲ θαυμάζοντες ἐσθάρουν* in *β*, before *τῷ σταδίῳ*; but Blass does not recognise the *ἐκθαύβοι* as incorporated in *β* (i.e., by the process of combination just mentioned), though it is supported by the best witnesses for this text. Similarly, *πιστεύσαντι ἐπὶ τῷ κυρίῳ Ἰησοῦ Χριστῷ* (11:17), coming from *α*, is an expression parallel to *πιστεύσαντι ἐν αὐτῷ* after *τοῖς μαρτυροῦν ἀλλοῖς πρὸς τὸν κύριον* in *β* at the end of the verse. Here Blass wrongly questions the well-supported *πιστεύσαντι ἐν αὐτῷ*.

He points out other corruptions also in the witnesses to *β*.

For example, in cod. 137 and Syr. hl. after *Ἀριστάρχου Μακεδόνης* (27:2), instead of *θεσσαλονικίως*, the words *θεσσαλονικέων δὲ Ἀριστάρχου καὶ Σκευῆδος*, which can originally have taken their place in the margin only as a reminiscence of 20:4 and not as a variant. He does well to put all such things on one side when trying to reconstruct an old recension *β* as distinct from *α*.

¹ *St. Kr.* 1834, pp. 86-112; *Acta Apostolorum*, editio philologica, Götting, 1895; and *Acta Apostolorum secundum formam Romanam*, Leipzig, 1896. The theory of Blass finds a supporter in Joh. Belsert, *Beitr. zur I. theol. d. Ap. gesch. auf Grund der Lesarten des Cod. D in seiner Genossenschaft* (Freiburg im Breisgau, 1897); it is argued against by Bernhard Weiss, *Der Codex D in der Ap. gesch.*, 1897, v. d. 17 part 1 of Gebh. and Hamack's *Texte u. Untersuchungen* (well worthy of attention, though not comprehensive enough). On Ramsay, see above, § 13.

² The additions and marginal readings of the Harklensian version (Syr. hl.); the Henry palimpsest (ed. Sam. Berger, 1870); an Old Latin text of Acts 11:43-48 and 28:15-31, inserted in a MS of the Vg. from Perpignan (also edited by Berger); *Un ancien texte latin des actes des apôtres*, 1895, reprinted from *Notes et extraits des manuscrits de la bibliothèque nationale*, Paris, tome 26, 1 partie; Cyprian, and Augustine, and in a secondary degree the composite texts E, 137, Gigan Livorum (ed. Belsheim, 1879), Sahid., Irenaeus, etc.

³ In his second book Blass no longer calls *β* the rough draft of Luke himself, but says: 'Actu primum exemplar postquam Romae confectum est vel mansit ibidem vel Christianis Romanis ab autore ad describendum commodatum est; altera autem forma, carentis ab initio fuit illi Theophilum illum visisse . . . putat' (pp. vii, 7). In support of this, he appeals especially (p. vii) to the more detailed description in *α* of the journey on the coast of Crete (Acts 27), which would be more interesting in the first than in Rome, and on the other hand to the greater precision in *β* with regard to the journey by sea to Malta and to Italy, which would be interesting to people at Rome. This seems, however, to be no improvement on his earlier view, since (to mention no other reason) the dedication to Theophilus is to be found also in *β*.

¹ The evidence for this has of late been brought together with very great completeness by Krenkel (*Zeitschrift für Theol. u. Kirche*, 1894); see also the *Fortnightly Rev.* 22 485-501 [1897].

² The reference cannot be to the (historically very doubtful) rebuilding of the Jewish temple (about 120-125?). The *καὶ* after *αὐτοῖς* must be deleted, a coding to the best MSS and indeed as the connection demands.

ACTS OF THE APOSTLES

(A) Further, before putting forward this alleged recension as the original draft of Luke the eye-witness, he ought to have established it from the witnesses on objective principles; but there is often no indication of his having done so.

From the very instances in which he gets his readings for β —readings often indeed found in only one of them—he omits a great many additions and readings which, judged by the criteria mentioned above, must (a) show no signs of secondary character but stand on exactly the same footing with those which he adopts. It is very misleading when in Δ^c Δ^c (where he deals with only a selection of instances) it is made to appear (p. 117) as if there were in fact only four passages (2227 839 94 27) which from their start on should belong to β , but are open to the suspicion of having been interpolated, and value is attached to the fact that D and Δ^c Flenby palimpsest are free of them. For although Blass, in his second edition, omits such additions as $\alpha\sigma\tau\alpha\gamma\alpha\iota$ after $\nu\epsilon\mu\alpha$ (34), $\kappa\alpha\iota \mu\epsilon\theta\alpha\tau\alpha\theta\epsilon\rho$ before $\kappa\alpha\iota \theta\epsilon\alpha\sigma\alpha\iota\tau\omicron$ (63), $\tau\omicron\upsilon\gamma\alpha\iota$ after $\nu\epsilon\mu\alpha$ (70), which these two authorities agree in supporting, he still, in view of the attestation of the same documents, rejects the addition of $\epsilon\iota\varsigma$ of the attestation of the same documents, and the reading $\alpha\upsilon\tau\omicron\tau\omicron\epsilon$ for $\kappa\omicron\pi\omicron\tau\omicron\epsilon$ before $\epsilon\iota\varsigma\alpha\upsilon\tau\omicron\tau\omicron\epsilon$ (181), and the reading $\alpha\upsilon\tau\omicron\tau\omicron\epsilon$ for $\kappa\omicron\pi\omicron\tau\omicron\epsilon$ before $\epsilon\iota\varsigma\alpha\upsilon\tau\omicron\tau\omicron\epsilon$ (187). Moreover, in spite of weighty testimony, Blass rejects, for example, the Hebrewism $\alpha\lambda\epsilon\gamma\alpha\tau\epsilon\alpha\iota$ for $\kappa\alpha\iota$ before $\beta\alpha\lambda\lambda\alpha\sigma\sigma\alpha\iota$ in 1343, which even Tischendorf (in α) accepts. (In his second edition he is hesitant on the authority of the Latin of the Gigas in Greek MSS.) on the single testimony of Augustine, he adds before $\kappa\alpha\iota \pi\pi\alpha\gamma\epsilon\iota\varsigma$ in 113 the words $\epsilon\tau\epsilon\iota \kappa\alpha\iota \alpha\lambda\lambda\alpha\iota \gamma\alpha\iota$, on that of the Flenby palimpsest alone he deletes 912. In these last two cases, as well as in many others, it is difficult to reproach a suspicion that Blass allowed his decision to be influenced by his hypothesis. The credibility of the author and the possibility of making him out to have been Luke would have been called in question had he not intended to convey, in agreement with Mt. 27, that Judas had hanged himself, with the additional implication that the rope had broken, and had he recorded in the β version of so remarkable a character that even Blass finds it too remarkable. This last, therefore, he questions even in α . That it might also have struck the scribe of the Palimpsest or one of his predecessors as too marvellous, and that Augustine or one of his predecessors could have hit upon the reconciliation between Mt. and Acts adopted by Blass is not taken into consideration. It is, however, a reconciliation that cannot be maintained, for assuredly Luke would not have left out the most important particulars of a narrative, namely, that the rope had broken, and that Judas had hanged himself over the edge of a precipice described. Enough has been said to show what caution requires to be exercised with respect to the establishment of Blass's β text, quite apart from any judgment as to the manner of its origin.

(c) The very greatest difficulties present themselves when it is attempted to establish β in a really objective way. In many cases, more than two readings present themselves—so many sometimes that Blass in his first edition silently gives up the attempt to settle β ; though in the second edition, as he (here) prints only β , he has been compelled to determine its text throughout.

Take, for example, 1418 or 1011. Cases such as these are the first indication we meet with that we have to deal not *verum tantum* but with *several forms of the text*, and thus that Blass's hypothesis is false because insufficient. But, more particularly, there is an entire group of MSS. HLP which on Blass's own admission contains, if not so many various readings, readings quite as independent in character as those in β : e.g., 146 the $\delta\alpha\lambda\alpha\sigma\tau\epsilon\varsigma$ etc., which has found its way into the TR, and plays so important a part in the criticism of the epistle to the Galatians (see GALATIA, § 9; also below, under *m*). In its divergent readings E comes still closer than HLP to D; in D and E the substance is often the same, and only the expression different. Blass conjectures, therefore, that in the text from which E was copied additions from β had once been inserted in Greek and Latin, and that the Greek had afterwards faded; they had therefore to be restored by translating back from the Latin. In point of fact, this would explain very well why the addition of D in 12: (καὶ ἐκείνη ἀκούει τοὺς ἁγίους) becomes in E καὶ ἐκείνη σὺν πᾶσι τοῖς ἁγίοις ἀκούει, and would apply equally well to some ten other examples pointed out by Blass. But such readings as the *τοὺς ἁγίους* ἀκούει of E in 12 after the first καὶ; or the *subj. καὶ ὁμοῦσιν* in E instead of the ind. ἀκούουσιν, γὰρ (ἀὶ παρὰ ἀφ' ἑαυτῶν). Its addition after 5:15; or ἰσχυροὺς ἐκ τῆς δυναμὸς in E instead of ἀκονατοὺς ἐκ 5:10, such readings do not admit of this explanation; they are simply instances of the same kind of freedom as that with which a changes β (or β changes α). The same freedom may have manifested itself in other cases where Blass's hypothesis is about E, would it not be considered adequate enough; the hypothesis therefore demands fuller investigation¹ before it can be accepted (see further below, under *c*).

¹ In Acts 2, which we have specially examined with this view, we find that Blass omits no fewer than seven readings of E, which on his principles ought to have been noted as variants:

(d) On the other hand, it is proved that the Greek text of *D* rests partly on retranslation from the Latin. Of the many passages which show this, the following are

Of the many passages adduced in support of this by Rendell, Harris, indeed (*Codex Bezae Texts and Studies*, ed. Robinson, pp. 117-119), the present writer holds only nine to be really valid (3:20, 13:20, 18:2) and is surely worthy of remark that three of these variants, when so much that is less important is to be found—but simply passed over as *et cetera* or *et cetera* *facilia*; while the other (13:20) in the second, only Harris's hypothesis is merely mentioned by Blass, and that taken into further account. This would from his point of view have been evolvable if the Latinisms in D had been merely so has even an author writing in Greek might himself have employed, and in point of fact has employed in, for example, 17σ (in α and β *καταπαύειν* to *καταπαύειν* *αὐτοῦ*). It is to this category that the only instances from D discussed by Blass belong: *ἐπιθεῖναι* for *ἐπιβάλλειν* (11:2), *εἶναι* for *οὐκ εἶναι* (19:3), *ὑποκρίναι* for *κεφαλὴ* (*κεφαλὴ* for *πρωτὸς*) (16:22). But these last two Blass himself does not venture to attribute to Luke. The others are led, according to this view, to the much more serious result that the author of A is. The same holds good of all Harris's nine passages referred to above. In 13:21-22, we find an *οὐκ* being unaccountably added to an expression in which *καὶ* or *καὶ* *καὶ* occurs, because the original expression had been rendered into Latin by wanting in *aut* (in like manner 5:3) only, the *aut* is now the *aut* in the Latin text; in 3:26-27, the infinitive preceded by the *ut* has its subject in the nominative instead of the accusative, because the construction had been changed in the Latin by the employment of a subordinate clause; in 15:26 we have *παράδοξον* instead of *παράδοξον*, because the participle had been rendered by *qui* *trahit* *montem*; 14σ has *πρὸς* or *in* instead of *ad*, *inter* *venit* of *fingerunt*; 1:52 directly concerns one of the readings of β. Lastly, 19:2 directly concerns one of the readings of β. According to Blass this runs: *καὶ συνεχρήσθη ὁ λαὸς ἡ πόλις*, instead of *καὶ ἐπλήσθη ἡ πόλις τῆς συνεχρήσθη (so α)*. But this is found only in the Giza as a secondary authority—and in Pesh., which according to Blass is to a still less extent an authority for β. In this case the sole authority (in the proper sense of the word) for β, has: *καὶ συνεχρήσθη ὁ λαὸς αὐτοῦ*. As Harris has pointed out, this *αὐτοῦ* is only to be a translation from the Latin text of D: *et explicit est tota civitas confusio(n)em*. Thus a correct rendering of the Greek of α as above, but *confusio* is not used for *αὐτοῦ*—compare, for example, 1k. 14σ and *confundit* (often) for *αὐτοῦ*—*αὐτοῦ*, however, could in the first instance have been employed in retranslation only if the verb was *ἐπλήσθη* (*ἐπλήσθη*). *συνεχρήσθη*, therefore, can only have come in later, from another copy, to take the place of *ἐπλήσθη*. How precarious a proceeding it is to seek for the most thorough of such vicissitudes. If Harris has in any instances proved retranslation from the Latin, the other instances also, though in themselves incapable of proof, gain in probability. We mention only *ἐμὸν* for *ἐμε* (32:2), *ἵπ* for *ἡ* (32:2), and the additions *καὶ ἐπὶ τῶν προσκυνητῶν* (81:3), *αἰτίαν* (121), *ἥσαν* (3:4), *αὐτοῖς* (7:2), as also *καὶ ἐκείθεν κηρύσσει* to *εὐαγγελίζον* (1:2), the last four again being like 19:2 readings of β. In fact, it becomes a possibility that even such passages as reveal no error in retranslation were nevertheless originally Latin, and the suspicion falls naturally in the first instance upon the additions in β.

(c) *Other passages in B* we cannot accept as original, for the reason that they are *plainly derived from a fusion of two texts*:

It is possible that Luke can actually have written: (16 39) παρεκάλουν αὐτοὺς ἐξελθεῖν εἰσέλτες· ἡγήροσαντες τὰ καθ' ἡμᾶς, ἵνα ὅτε αὐτοὶ δίκαιοι, καὶ ἐξαγαγόντες παρεκάλουν ἡμᾶς, λέγοντες ἐκ τῆς πόλεως ταύτης ἐξέλθατε, κ.τ.λ. (Col. 127 and the emendation in Syrlb. prove conclusively the inadmissibility of this repetition, by omitting (καὶ) ἐξαγαγόντες παρεκάλουν αὐτοὺς λέγοντες. The probability is rather that παρεκάλουν stood, in the (or) MS with indirect speech, and in the other direct narration (in the MSS); in this case ἐξελθεῖν had reference originally to the city, καὶ ἐξέλθατε, and not, as now, to the prison. In 20 18 the addition in B—ὅσοτε οὐκ αὐτὸν—wholly tautologous as it is after ὡς δὲ παρεργετοὶ πρὸς αὐτὸν, is certainly not to be attributed to the author: it is a variant of ὡς δὲ κ.τ.λ. which was at first noted in the margin and after-

besides three others which he does notice (233.41-47), four of these seven (222 ὅμοις πάντες instead of αὐτοῖς; 234 δι' αὐτοῦ after λῦσις; 243 οἱ μικρὰ after σημεῖα, and τὸν χερσὶν before τὴν ἀποστολὴν) are unsusceptible of explanation by means of his hypothesis.

As another instance we may add διαπριξάντες . . . καὶ ἐπιβάντες (14.14) *considerant et villam suam et ci. 14.13.24.16.17.24.20.16*. Moreover ὅς (for ὁ) ἀλλήλας (42.15) is due to retransliteration of *omni locative est*; similarly 3.1.4.12.11. And the ὡς of 11.25 (ἐξῆλθεν ἀπὸ τῶν αὐτῶν καὶ ὡς συνταξάν παρὰ κατέν ἐξῆλθεν) can hardly be explained otherwise than as derived from the parallel Latin text: *cum (intensis) [et] deprecabatur venire*.

ACTS OF THE APOSTLES

wards crept into the text of DA Vg. Gias, but in E, on the other hand, with skilful avoidance of tamology, was changed to *ἀποβυβαίνω*. The case is similar with the addition in β (found only in D) *ἐξελθόντες τὸ πῦρ* an addition which, moreover, comes in very awkwardly after *παράγοντες δὲ ἀπὸ πύργου καὶ οἱ σὺν αὐτοῖς*, especially as, instead of *ἀντικαθεστάναι*, D goes on to say *καὶ ἀντικαθίσταντο*. Here even Blass asks whether perhaps *παράγοντες* may have been wanting in β .

Yet, it may be said that, in this and in the similar cases here passed over, the hypothesis of Blass is simply deprived of one of the arguments on which its demonstration rests, while there appear to be enough of them left.

(f) Decisive, however, against this appearance, is the fact that *precisely* the most characteristic of the variations of text between α and β bear witness against Blass's theory. This confutation of his hypothesis follows inevitably from the hypothesis itself.

First in proportion to the clearness and pointedness of β and the weakness of α in these respects, is the improbability of the author's having with his own hands obscured and perverted the sense. And here in the meantime we can leave altogether out of account the question whether or not he was also the eye-witness. In any case, after writing in his draft of 24.7 that it was on account of his wife Priscilla that Felix left Paul behind, he would not in his fair copy simply that it was on account of the Jews—even if, as Blass thinks, both statements were correct. If in his draft he had stated that Paul had proclaimed the apostolic decree, not only in the later course (16.4), but also at the outset, of his new missionary journey (15.4), he would not in his fair copy have omitted to state this in the first and therefore more important of the places. In 11's instance even Blass considers an interpolation in β as conceivable in 15.41, but chiefly because the expression seems to him to be somewhat obscure. In 22.29, although the officer is in fact because a Roman citizen has been bound, Paul is not released, according to α , till the following day, not as in β , immediately (*παραυτίκα*). Blass himself says (32. A2. 105): 'one cannot but be astonished at the carelessness of the abridgement in α '. All the more readily might it have occurred to him that it was the writer of β that perceived and corrected the defects of α . In his *Éditio philologica* Blass wishes *τῇ ἐκείνῃ* without any authority either deleted or changed to *τῇ ἐκείνῃ*. This would be justifiable only if they were perfectly certain that the narrative, even in α , is all of one piece and absolutely to the point. But such critics as Spitta, Clemen, and Jungst have assigned 22.29 and 22.30 to two separate sources. If it is only the addition *ὁ δὲ κύριος ἐδούκεν ἰσχυρὰ ἐκείνῃ* after 14.2 in the draft that enables us to understand how it was that in spite of the disturbance to, according to β , persecution) mentioned in 14.2, Paul and Barnabas remained in Iconium, why does the author omit the words in his fair copy? More accurately considered, they are to be regarded as an interpolation, designed to do away with the contradiction, an interpolation which carried with it the further change of *ἐκείνῃ* (14.2) into *ἡ δὲ ἐκείνῃ* and, in 14.5, the interpolation of *ἐκείνῃ* and *ἐκείνῃ*. It is not in D, however, that this interpolation occurs, but only in Syr. li., which elsewhere also smooths away the evidences of the work of various hands in D—as, for example, in 19.14 by the introduction of *οὗ* before *ἐκείνῃ*, in 18.6 by the omission of *δὲ* after *ἀντικαθεστάναι*, and in 14.2 by omitting the last two words in the quite tautologous expression of *ἀρχισυνάγωγῃ τῶν Ἰουδαίων καὶ ὁ ἀρχιεπίσκοπος τῆς συναγωγῆς*. If, as Blass supposes, it were necessary to hold that Syr. li. has preserved the original, whom could we possibly imagine, for example, to have added the words *τῆς συναγωγῆς*, or omitted the words *ἰερὸν καὶ ἱερὸν*? But, moreover, in 14.25 the changes mentioned above would not have been at all necessary unless first 14.2 had been wrongly interpolated between 14.1 and 14.3. Even though it may perhaps be a fragment from another source, 14.2 has its immediate continuation in 14.3. Here even Ramsay supposes a 'corruption': 'only it is 14.3 which he takes for a gloss.' Thus we come again up, on one of the many cases in which Blass holds β to be the original simply because it never occurs to him to bring the unity of Acts into question. Similarly, for example, he drops from β , and also even from α , the *ἐντὶ* of 19.14, which is irreconcilable with the *ἀποβυβαίνω* of 19.16, on the sole authority of D, without recognising that the omission in D may have been a late expedient for removing the contradiction just as much as the *διὰ* for *ἐντὶ* in Gias. If the author in his draft had referred to this (by a simple *ὁ δὲ*), why is it that in the clean copy his first use of the expression is to 15.6, so as almost inevitably to suggest the thought that a piece derived from another source begins at this point? (See CUNNINGHAM ON JERUSALEM, § 4). If, according to the rough draft (not only in 19.14, but also in 17.15 19.1 20.1), the journeys of Paul were determined by inspiration, why in his clean copy does the author leave this out in the last three of these passages? Here, too, we can see the inapplicability of another of Blass's assertions, viz. that nowhere in α or β is the narrative changed so as to become more interesting or more marvellous. Further, the author of this three-fold mention of divine inspiration has fallen into an oversight—that, namely, of attributing to Paul

(19.1) the intention of making a journey to Jerusalem just after he had returned from that city, without even the slightest reference to what had been said immediately before. For it is not possible to agree with Blass in regarding the journey of 19.1 as identical with that which had been intended by Paul, according to the addition of β in 18.21 (found also in TR). This last was actually carried out (18.22, see CUNNINGHAM ON JERUSALEM, § 1). And even if it had not been, the inspiration which hindered it must have been mentioned in 18.21, and not in 19.1, after he had already got back to Phrygia from Caesarea, which is only a few miles from Jerusalem. Cf. further BARNES, § 1.6.

(g) Over against these instances, the list of which could be greatly increased, there are a few mere cases in which β might really be held to be the original.

The additions *κατέβησαν τοὺς πύργους καὶ ἐβήσαν ἐπὶ τὸν πύργον* (12.10), *τῇ δὲ ἐκείνῃ* before 10.1 and in 27.1, *ἀπὸ πύργου πύργου* *τὸς δικαίους* after 19.1, *καὶ πενήντας ἐκ Τυρῶν* after 20.10, *δὲ ἡμῶν* before 20.1, before *ἐκείνῃ* after 27.1, do not seem to be inventions. And yet Blass not only opposes, at least in his first edition, the quite similar addition of *καὶ Μίνα* after 10.1 (21.1) in D, Sahr, and Gias, inasmuch as it could have been introduced from 27.1, but also refused to accept the *ἐκείνῃ* *αὐτῇ* *die* which we find in d (21.6) instead of *οἱ δὲ ἐκείνῃ* *ἡμῶν* *ἐκείνῃ* *τῶν ἡμῶν* (the Greek text of D is wanting here). On the other hand, in 21.1 to the text of α is not materially inferior to that of β , to which Blass attaches a very high value; for the imper. *ἀνταρῶντες* of 21.13 does not mean 'we went and arrived at Jerusalem' (this follows in 21.17), but 'we took the road for Jerusalem', and thus, even according to α , Miletus may very well be thought of as lying in a village between Caesarea and Jerusalem, as is expressly stated in β . The author, in this instance the author of the 'we' source, has here quite naturally taken for granted that the journey from Caesarea to Jerusalem cannot well be made in a single day.

(h) After what has been said, it is clear that *there is not the slightest necessity for assuming the bulk of the remaining variations in β , which are indecisive, to be original.*

They consist partly of what are simply changes in the construction, or periphrases, without changing the sense (for both see for example 16.1), and partly of a somewhat more vivid way of expressing the situation, which, however, in the cases we have in view—much more than seventy—could have been derived by a simple copyist from the adjoining context. Compare, for example, the very well-devised addition *τοὺς λοιποὺς ἀρβύλας αὐτοῦ* after 16.5.

(i) But do not these changes—materially so unimportant, but in form so considerable—at least prove that both forms of the text, no matter which is the earlier, emanate from the author of the book itself? They do not.

After having seen that precisely in the most significant passages of the book (see above, c and f) this does not hold, one must further remember that in III. P., and also in E, equally important variations are met with (see above, c). These, like those in β , resemble the variation by which one gospel is distinguished from another. Here, accordingly, transcribers have allowed themselves liberties which are usually regarded as permissible only to the authors of independent works. However small these liberties may seem to us, the fact cannot be denied. When in 21.1, for *οἱ ἐκείνῃ* (a reading which is a stumbling-block to many theologians even of the present day) D substitutes *οἱ ἐκείνῃ* *αὐτοῦ*, 'that he has exalted them', or at least 'that he has stirred them up', is not the liberty taken with the text just as bold as Mt. 5 in the exactly corresponding place, 12.3 (i.e., just before the reference to a league with Beelzebub), when he changes it to *ἐκείνῃ*? But this freedom of treatment is by no means without analogies elsewhere in the literature of the time. The text of Plato in the Flinders-Petrie papyri (Cunningham *Memoirs of the Academy of Dublin*, 1891) shows, similarly pronounced deviations from the ordinary text—deviations which, according to Usener (*Va. Gr. a. classisch. der Wiss. zu Gött.*, 1892, pp. 25-50, 181-183), are 1. the attributed to the copyists of the papyri, perhaps as early as within 120 years after Plato's death. In the papyrus text of Hyperides, *Agamemnon* (Philippides *Classical Texts from Papyri in Brit. Mus.*, ed. Kenyon, 1891), Blass himself discovers 'very often . . . interpolation and arbitrary emendation', and in the third Demosthenes letter published in the same collection, 'extensive variation' (*Jahrb. f. class. Philol.*, 1892, p. 42, and 1894, p. 447).

In order more easily to comprehend the possibility of changes in the text on the part of a transcriber, it may be allowable to conjecture that he may have been accustomed to hear the book recited or even himself to recite it (with variations of the kind exemplified), on the basis of a perusal of it, but without its being committed to memory. Such recital was by no means impossible in the second century.

(k) The question whether D shows in the gospel the same variations as in Acts may be left out of account.

ACTS OF THE APOSTLES

It would be important only if it could be answered in the affirmative for Mt., Mk., and Jn. For, that in these cases also the rough draft should have gone into circulation as well as the clean copy is really very improbable. But the independent variations are too few to warrant an affirmative answer. If the same be the case with the Third Gospel, then, according to Blass's hypothesis, we must assume that the draft of it was not copied; but if they are sufficiently numerous, as Blass has recently declared (*Thermotaphis*, 21, 1895, pp. 127-131; and 22, 1896, pp. 219-311; *Evangelium secundum Lucam*, . . . *secundum Mattheum quod videtur Romanum*, 1897; *Philology of the Gospels*, 1903), there is nothing to hinder our applying to them the judgment applied to those in Acts, however that judgment may go.

Neither is it decisive of the question that p is frequently not fuller but briefer than a (c.g., 26.26.74).

(2) Very important, on the other hand, is Blass's assertion that the *uniformity of expression in α and β* is a 'very strong proof' that both recensions come from the hand of the author. But it is sufficiently met by Blass's own index.

According to this, there occur in the divergent passages of β (which are by no means of great compass) 64 words never elsewhere, 105 which are in A or the Third Gospel. If we deduct from Latin text 5 proper names, the α vouches for only 15 of them a Greek text (although Blass himself has not succeeded in giving them a Greek text which suggests the authorship of Luke), there still remain 49, of which 44 are stated in Blass's *Editio philologica*, p. 334. After deduction of 4 numbers, and the expressions $\sigma\tau\alpha\tau\alpha\iota$ and $\sigma\tau\alpha\tau\alpha\iota\epsilon\sigma\theta\epsilon\iota\varsigma$, for which no other word could possibly have been chosen, the number stands at 44. So also in p. xxviii, although, from the somewhat different form of text adopted, the words that appear to be peculiar to β are not quite the same.

(iii) In support of Blass's highly important assertion that the *eye-witness Luke* 'now could have given his work in both the forms which we have in α and β , the most that can be adduced—out of all that has been remarked on in the course of the section—are the passages referred to under (g). But of the 'seven steps' in Jerusalem, Luke, according to Blass's own view, gained his knowledge not from personal observation, but only from the written (or oral) testimony of an eye-witness.

V. All the same, he takes the liberty, according to Blass, of leaving the note out of writing his fair copy. This being so, the omission of the five other data, even if with Blass one carries this back part of his own experience, he may equally well have obtained them from a written source, or from them (1911 205 271 s) belong, in point of fact, to the 'we' source. It is not at all easy to see why a transcriber might not have ventured to omit them, with so much else, as of inferior interest. We may therefore thankfully accept them, as well as other data in β which have been shown or may ultimately appear to be more original than α , as contributions to our historical knowledge, but they do not prove more than this - that in such cases β has drawn more faithfully from a true source than α has. There remains, accordingly, in favour of the eye-witness as author of Acts, only 11:28, where D (along with, essentially, the Perginian Latin text, and Augustine), instead of $\delta\alpha\sigma\iota\sigma\tau\epsilon\ \delta\epsilon$, has $\eta\upsilon\ \delta\epsilon\ \pi\omicron\lambda\lambda\acute{\alpha}\kappa\tau\iota\varsigma\ \sigma\upsilon\gamma\gamma\epsilon\gamma\mu\mu\epsilon\iota\omega\varsigma\ \delta\epsilon\ \eta\mu\omega\ \epsilon\phi\eta$, and then $\sigma\mu\alpha\tau\iota\sigma\mu\epsilon\iota\omega\varsigma\ \delta\epsilon\ \sigma\phi\epsilon\alpha\tau\iota\sigma\mu\epsilon\iota\omega\varsigma$. This might possibly be from the 'we' source; but the inference is not that it can only have been by an eye-witness that a 'we' in α was set aside. Or why is it that 'we' is set aside by L in 16:7, by K^* (and differently by $ABCH$) in 21:10, by H in 25:6, by P and Vg , in 27:1 (*τὸν περὶ τοῦ Παύλου, ὁ εὐαγγ.* for $\eta\mu\omega\varsigma$), by HLP in 20:7 21:28 28:1 16:13; or C^* also in 28:1, by D also in 14:1 ($\delta\epsilon\delta\omicron\kappa\epsilon\iota$ for $\epsilon\upsilon\alpha\gamma\gamma\iota\sigma\mu\epsilon\iota\omega\varsigma$)? And why, on the other hand, in 27:10 does it stand only in HLP Pesh. ? In all of these cases (except 27:1, see below) Blass has the same reading in β as in α . (In 16:13, he has, it is true, in β the $\delta\epsilon\delta\omicron\kappa\epsilon\iota$ mentioned above, but he likewise obtains in α also (by the conjecture $\epsilon\upsilon\alpha\gamma\gamma\iota\sigma\mu\epsilon\iota\omega\varsigma$ for $\pi\epsilon\pi\eta\gamma\mu\epsilon\iota\omega\varsigma$ $\epsilon\iota\pi\alpha\tau$) a reading in the third person.) He thus acknowledges $\delta\epsilon$ that it is caprice, not the eye-witness, that allowed themselves to remove the 'we', or to introduce it. Only in 11:28 does Blass assume that it was. Inke himself who changed into the third person in the 'we' which he had written in β . So also it is only in one place, and even that only in his second edition, that Blass regards the third person in place of 'we' as a reading of β - namely, in 20:5 (at the authority of D), for in 27:1 it is only through a change of the whole of the first part of the verse, rendering $\eta\mu\omega\varsigma$ impossible, that the third person is introduced. At all events, it is impossible that 11:28 as well as 11:28 can be derived from the 'we' source (see COMENT. OF JAC. LESTRUP, § 1). Even the 'we' of 11:29 may possibly have been the insertion of a transcriber who knew (with $Eus.$ *HE* iii. 4, 1, *De Tr. 16*, 7, and the Prologue [earlier than Jerome] to the Third Gospel in codd. Crisostom's, Cheltenham, Amiatinus, Fuldaensis, Antwerp, etc.) that Inke was understood to have been a native of Antioch. Or has Blass himself not recognised that Irenaeus also (III. 14), or one of Irenaeus's predecessors, has permitted himself on his own responsibility to say *non tenemus* instead

of *καὶ ἐξήρασαν* in 16a? The insertion of 'we' in 11z would not be holder than the other inflections changes in β. It ought to be noted that Syr.h1. is not implicated in this insertion; and the text of D is by no means in order, for it has *ἐξή* without telling what it is that Agabus did say (in the sense of *ἐλάλει*), while in the whole of the NT β is direct speech, or, as in four isolated exceptions in the case of Paul, at least indirect speech, that is connected with *ὁμιλῶ*. In Act 11z the indirect speech depends rather on *συνάμαρτον*.

(ii) A very dangerous support to the theory of Blass has been contributed by Nestle.¹

In his view *ἔβανυρε* in 11 (Hermas has *αἰγιαρισία*), instead of *ἡγίασθη* in 314, comes from a confusion of *בָּנָה* (Job 35:16 15:10) and *בָּנָה* in the *Semitic source of Acts 1:12* (Similarly, before him, Harris, p. 187, but otherwise pp. 162 f.), and in like manner *κόπος*, instead of *λαός* in 247, from confusion of *כָּפַל* and *כָּלַף* (or in Aramaic *כָּפַל* and *כָּלַף*). In itself considered, all evidence for the existence of a source (now pretty generally conjectured; see above, §§ 10 f.) for Acts 1:12 cannot be otherwise than welcome, but in the form thus suggested the evidence points rather to the conclusion (which Nestle leaves also open) that some person other than the author himself had, in transcription, adopted another translation of the Semitic text.

(v) No happier is an attempt of Conybeare to provide a new prop for Blass's theory,

He points out in the *American Journ. of Philology* (72 [1951], pp. 135-171) the most interesting fact that the Greek commentary of Chrysostom, and, to an even greater extent, the many extracts from it in an Armenian Catena on Acts, follow (or lead) and presuppose a series of β readings to be found partly in D (and earlier witnesses for the β text), partly only in Syr.h, or in cod. 137. He thinks he can thus prove that originally all the β readings were united in a single cod., in the copying of which they were partly removed to secure greater agreement with the prevailing text. But the number of β readings used by Chrysostom is insignificantly small when compared with those of which he shows no trace; and of such as *do not appear in D*. Conybeare has adduced only five. Chrysostom accordingly furnishes no stronger support for Conybeare's thesis than any other witness for β would, for each of them shames some of its readings with D and some with Conybeare's assumption that all β readings are from one hand: it will be explained equally well by supposing them due to the labours of successive copyists (or editors). Conybeare, however, goes much further, and asserts that Luke himself is the author of all these β readings. He ventures to rest this assertion on a single passage—a very small foundation for such a structure. Moreover, it would have been just as easy for another as for Luke to add 'so natural a phrase' as, according to Conybeare, *καταλαίρει* is in 19.25.

Blass's theory, then, it would seem, is so inadequately proved that it cannot be held to have subverted any of

18. Estimate of Blass's theory. The conclusions regarding Acts in preceding sections of this article. It

called attention in a very emphatic way to the importance of β . It has also raised new problems for the science of textual criticism—not to speak of the many valuable contributions it has itself made to that science and to the interpretation of the Book of Acts.

The value of Acts as a devout and edifying work, cannot be impaired by criticism. Indeed, the book is helped by criticism, which leads not only beyond a mere blind faith in

19. Religious value of Acts. is helped by criticism, which leads not only beyond a mere blind faith in its contents, but also beyond the unhistorical assumption that one is entitled to impose on the author the demands of strict historical accuracy and objectivity. Its very ideal, in apostolic times unhappily not reached, according to which the company of believers were of one heart and one mind (1 32), shows that the author knew where the true worth of Christianity was to be found. The early Christians pray everywhere with and for one another; they accompany the apostles and take pathetic farewells of them; they distribute their possessions and have all things in common. Particularly beautiful figures are those of Stephen, Cornelius, Lydia, and the jailer at Philippi. The jailer knows that most important question of religion, 'What must I do to be saved?' (16 30), and Peter also (11 2), as well as Paul, expresses the conviction that Christianity alone has a satisfactory answer to give. The writer of Acts is able to rise above all

¹ *Expositor*, Sept. 1895, pp. 235-239; *St. A'n.*, 1896, pp. 102-104.

ACUA

narrowness of sympathy (10.15.34f. 15.10); and the conception of God in 17.23, which cannot be attributed to Paul, is really much more apt, and is more closely in accord with the results of philosophically purified thought, than that apostle's, still hampered as it was by Jewish modes of thinking. Lastly, sayings such as we find in 21.16-20.34 11.22 21.11f. are of the deepest that can be said about the inner Christian life.

As Lightfoot remarks, the literature which has gathered round Acts is too large to catalogue profitably. To his own list (Smith's *D.P.*) may be added Holzmann's

20. Literature. comm. in the *Handb. comm. zum N.T.* (1879, 2nd ed. 1892). In the criticism of the book the most important landmarks are as follows: Schenkenburger (*Zwisch. d. Ap. gesch.*, 1841), whilst maintaining its absolute trustworthiness, credited it with tendency to vindicate Paul against Judaizers. Bauer (*Paulus*, 1845) and Keller (*Ap. gesch.*, 1854) regarded its tendency as 'reconciling' (unionistisch) in its scope, and its contents as untrustworthy. Bruno Bauer (*Ap. gesch.*, 1850), whilst holding the same view as to its tendency, went much further as regarded its contents, taking them to be free and often even purposeless invention. Overbeck, in his revised 4th edition of *De Wette's Handbuch* (1870), propounded a modification of the tendency theory substantially identical with that which has been set forth in the present article. Pfleiderer (*Paulinismus*, 1874, 2nd ed. 1880; *Urchristentum*, 1887), Weissacker (*JA. Zeitabw.*, 1886, 2nd ed. 1892; *ET*, 1894-95), and Jülicher (*Früh. und späte NT*, 1894) were, often with justice, that the author wrote in simple faith, and has much that is trustworthy. The most thorough-going sceptic has been Mich. Baumgarten (*JA. gesch.*, 1882, 2nd ed. 1890), Karl Schmidt (*JA. gesch.*, i. 1882), and Nissen (*Comm.*, 1882). The most promising new phase of the criticism of the book is that which has for its task a separation of the sources (see above, § 11). In this connection mention must be made of a very remarkable return to tendency-criticism in a Marburg University Program of Johannes Weiss (which appeared after the present article was in type) entitled *Über die Absicht u. den literar. Char. der Ap. gesch.* (1897). Weiss regards Acts as 'an apology for the Christian religion (against the accusation of the Jews) addressed to pagans, showing how it has come about that Christianity has taken over from Judaism its world-mission.'

ADAM (אָדָם, to which Kt. prefixes אָ, Kr. מ [so Symm. Targ. Pesh. Vg., and many MSS and editions];

ADAM AND EVE

Kt. is to be preferred; see Dr. S. note 1) is mentioned once, if not twice. In Josh. 3.16 it is the name of the place beside or near which the descending waters of the Jordan 'stood and rose up in one heap'; here it is followed by the words (which may possibly be a gloss) 'the city that is beside Zarethan.' An echo of this name may very plausibly be found in *Tell ed-Damich* and *Tir ed-Damich*, names of a hill and bridge at the confluence of the Jabbok (*Zerka*) with the Jordan, some 16 m. in a direct line above the ford opposite Jericho. Indeed it is possible that for אָדָם (Adam) we should read אֲדָמָה (Adamah), the א having dropped out owing to the circumstance that the following word begins with א (so Knappfeyner, *DDP* [1844]). In this case the resemblance of the ancient and the modern name will be closer. The same spot seems to be referred to in 1 K. 7.46, where, for 'in the thickness of the ground' (AV mg.), we should probably read, 'at the crossing of Adamah,'³ the name of some definite locality, not a description of the soil, being plainly required by the context (so G. F. Moore and Clermont-Ganneau).⁴ This gives us a definition of the site of Adam or Admah. It was at a ford of the Jordan between Succoth and Zarethan. Putting all the evidence together, we may hold that the Succoth of 1 K. 7.46 was E. of the Jordan on or near the Jabbok; while Zarethan was W. of the river, in the valley opposite Succoth. Beside Zarethan, at the 'crossing' or ford, was a town called Adam or Admah (cp Succoth, 2; ZARETHAN, § 1).

The second mention of a place of this name is in Hos. 6.7 where, for *E'adam* (RV 'like Adam,' RV mg. 'like men'; ὡς ἀνθρώπων [B.M.]), we must at any rate read *E'adām*—i.e., 'at Adam'—to suit 'there' in the next clause, and to correspond to the localisation of Israel's sin in v. 8 (so in the main We.). 'There' the Israelites 'were traitors to Yahwē' and 'broke his covenant.' Of course there may be a doubt which of the places called Adam or Admah is meant, and it may even be surmised that the letters אָדָם (ADM) are incorrect.⁵ The fact, however, that the ford of *Damich* is on the direct route (so we must believe) to the place called Gilead in v. 8, suggests that the 'city Adam' of Josh. 3.16 is intended. The confluence of two important streams may well have been marked by a sanctuary.

ADAM AND EVE.⁶ The use of Adam and Eve as proper names within the Reformed Churches symbolises

1. Reformation antipathy to allegory.

a theory of the Paradise story which is distinctively modern and western. The Reformers, always hostile to allegory, and in this matter especially influenced by the Augustinian anthropology, adhered strictly to the literal interpretation, which has continued to be generally identified with Protestant orthodoxy. This was a necessary reaction against that Hellenistic allegorising which transmuted everything that seemed low or trivial in the early narratives into some spiritual or theological truth. The reaction had begun no doubt in pre-reformation days. Bonaventura, for instance, says that 'under the rind of the letter a deep and mystic

¹ The σφῶδρα σφῶδρος of Dr. S. may be safely neglected, though if σφῶδρος (which is wanting in A) be correct, it testifies to the antiquity of the inferior reading (עֲרֹרָה). Symm., according to Field's restoration from the Syr. Hex., gives ἀπὸ ἀδου; Dr. S. ἀπὸ ἀδου (interpolated); Vg. ab urbe que vocatur Adom. Bennett in *S.B.T.* (crit. notes) regards the name 'Adam' and the description of it as 'the city, assuspicuous.' But 'Adam' should perhaps rather be 'Adamah,' and 'the city, etc. looks like a gloss. The text on the whole is correct.

² מִבְּרֵית אֲדָמָה. The 2 Ch. 4.17 has אֲדָמָה [B.M.].

³ אֲדָמָה [B.M.].

⁴ Moore, *J.R.T.* 77-79 [94], cp *Judges*, 212 [95]; Clermont-Ganneau, *PEF* (N. S.), Jan. 1896, p. 80.

⁵ One might conjecturally read *Damich*—i.e., the Eduma of the OS (25574; 11922, cp Guérin, *Sam.* 2.146), which is described as a village about 12 R. m. E. from Neapolis (Nāblus), and is the modern *Damich* (see Rob. *BE* 4.292 f.). This is obviously not the 'city' intended in Josh. 3.16. It is also not very likely to be meant by Hosea.

⁶ On the names see below, § 3.

ADAM AND EVE

meaning is hidden,' but states also that 'he who despises the letter of sacred Scripture will never rise to its spiritual meanings.' Still the completion of the movement (within certain limits) was reserved for the great vegetates of the Reformation—Luther, Melancthon, and Calvin. Thus Luther explicitly says—'It were better to read mere poetic fables than attach one's self to the so-called spiritual and living sense to the exclusion of the literal;' and again, 'We should stay by the dry clear words, except where the Scripture itself, by the absurdity of the simple meaning, compels us to understand some sayings figuratively' (quoted by Diestel, *Gesch. des N.T. in der chr. Kirche*). This predilection for a grammatical and historical interpretation was closely connected with the revival of classical studies, but had its primary justification in the endorsement which the N.T. appeared to give to the historical accuracy of the story of Paradise. It is the correctness of the historical acceptance of that story which criticism denies, and before proceeding to consider the results of criticism (see CREATION, § 1 and PARADISE), Protestant students may ask whether Jesus Christ and the N.T. writers really attached importance to the story of Eden as a piece of history. Our conclusion—of course have a direct bearing on the interpretation of the other early narratives.

Let us turn to (i.) passages spoken or written from a purely Jewish point of view. (a) In Mk. 10:6-8 (Mt. 19:4-6) we have a combined quotation from Gen. 1:27-28. Jesus passes over the facts of the Paradise story altogether, and fastens attention on the statement that man was from the beginning differentiated sexually, and that, by divine ordinance (so no doubt Jesus interprets Gen. 2:24), the marriage union was to be complete. His silence about the facts may no doubt be explained by the circumstances; elsewhere Jesus appears to many to accept the historical character of the deluge story (Mt. 24:37-39; Lk. 17:26-27). But one must be cautious; the reference to the deluge story presupposes the typical character of the early narratives, a theory which is inconsistent with a strictly historical point of view. (b) In Rev. 22:3-4, a literalistic view of the tree of life is presupposed. But these passages are undeniably based, not so much on Gen. 2, as on the apocalyptic description in Enoch 24 f. (c) In Rev. 12:9-10 we have a description of SATAN (2:7; § 6) as 'the ancient serpent,' alluding to Gen. 3:1; it is also said that he will 'deceive' the world as he deceived the first man. It is certain, however, that the writer also draws from a well of popular belief, enriched from a wider Oriental source, to which he gives as implicit a belief as to the biblical statement.

Passing to (ii.) the Pauline writings, we find (d) and (e) in Rom. 5:14 and 1 Cor. 15:22-23 references to details in the story of Adam; but the reference is made in a didactic interest. Paul accepts (as also probably does Luke) the Alexandrian idea of the typical character of the early narratives, and of the double creation of a heavenly and an earthly Adam. The latter doctrine, which the Alexandrian theology founded on the two separate accounts of creation in Gen. 1 and 2, Paul professes to base on the language of Gen. 27. There are also other anthropological ideas which he supports by reference to the fall of Adam. His real interest is in the ideas, not in the story of Paradise. He did not deduce them from the Eden story, and only resorts to that narrative as containing material which may, by the methods of Christian Gnosis, be made to furnish arguments for his ideas. (f) In Phil. 2:6 we have probably a contrast between the first Adam who thought equality with God an ἀπαλαύστη (an object of grasping) and the second Adam who, thinking far otherwise, humbled himself even to the death of the cross, and thereby actually reached equality with God (Hilgenfeld). Here the story of Eden is only illustrative of an idea, though the illustration is suggested

ADAM AND EVE

by the favourite typical view already referred to. (g) In 2 Cor. 11:3 there is a mere casual illustration.

(iii.) Other N.T. writers. (h) In Lk. 3:38 Adam is the last human link in the genealogy of the Saviour. The evangelist suggests a contrast between the first and the second Adam (see Lk. 3:3); but, scholasticism apart, what he really values is, not the historical character of Adam, but the universal Saviourship of Jesus. (i) John 8:44 contains a reference to Satan which presupposes the reality of the temptation and fall of the first man, but is simply and solely dogmatic, and belongs to the peculiar dualism of the Fourth Gospel. (k) In 1 Tim. 2:14-15 the social doctrine of the subordination of women is apparently inferred from the story of the first woman's temptation.

The conclusion to which these phenomena point could be fully confirmed by a similar examination of (iv.) Apocryphal passages—even the references in 4 Esd., which imply so much brooding over the Paradise story, being in close connection with the typical theory of the early narratives, and the whole system of thought being quite as much based on the imaginative book of Enoch as on the solar narrative in Gen. 2-3. As a final proof that a historical character could not be assigned to the latter in the early Christian age, it is enough to refer to the Book of Jubilees (first cent. A.D., but before 70), which, at any rate in its view of the biblical narratives, represents the mental attitude of the times. Here the biblical stories are freely intermixed with legendary and interpretative matter (see Charles's translation).

We conclude, therefore, that the N.T. writers, whether purely Jewish or touched by Greek influences, regard traditional facts chiefly from a didactic point of view, as furnishing either plausible evidence for theories derived from other sources or at any rate homiletical illustrations.

The literal and historical acceptance of the story in Gen. 2:4b-1, which strong church authority still considers 'nearer to the truth than any other interpretation as yet propounded,'¹ may be supposed to be required by the phenomena of the narrative itself. Is this the case? First, are the proper names Adam and Eve found in the original story of Eden? The facts are these.

(a) Adam (אָדָם; אָדָמָה), as a quasi proper name for the first man (cp. ΕΝΩΣΗ), belongs with certainty only to P₂ (Gen. 5:3-5),² who has used it just before generically, in the sense of 'man' or 'men' (Gen. 5:1 ἀνθρώπων [M.] followed by τὸν Αδάμ [i.e.] (cp. 1:26-27). The Vulg. [V.] habitually uses the term אָדָמָה, 'the man.' Once, however, if the text be correct,³ we find אָדָם (ādām) used generically for 'man' or 'men' (2:2-4), and once in lieu of a proper name subsequently to the birth of Cain and Abel (4:25), if we should not rather refer 4:25 f. to an editor. The conclusion is obvious. It is a true insight which is expressed in the quaint old couplet in Exeter Cathedral,

Primus Adam sic pressu Adam, salvet Deus illum,
Is qui venit Adam querere factus Adam.

'Adam' can be used only in one of two senses (1) mankind, (2) the first man (apart from all historical reference), and to compare a supposed proper name Adam.⁴

¹ Bp. John Wordsworth, *The One Religion* (Bampton Lectures for 1891), p. 128. So Bp. H. Browne in the *Speaker's Comm.* and Dr. Leathes in Smith's *Dict.*

² In Gen. 2:1-23:8 f. 20 f. RV has rightly 'the man' (אָדָם) for אָדָם 'Adam'; so in Dt. 32:8 'children of men' (or 'sons of Adam'); so EV mg. in Job 31:33 'after the manner of men' for 'as [like] Adam' (otherwise 1:25). In אָדָם the article is omitted in Gen. 2:19b 20:2 23:12 f. 29:4 1:25 Dt. 32:8 1 Ch. 1:1 (also in the last two passages).

³ In 2:20b 3:17 21 read אָדָם 'for the man' (אָדָם [AEL]) with Schr., Dillm., and Kau. *l.c.*

⁴ The present writer can see no probability in the view of Hammel (*PSB.*, 7th March 1893, pp. 44 f.) that Adam in Gen.

ADAM AND EVE

to that of the Babylonian divine hero Adapa (Sayce, *Crit. and Men.* 94), or, stranger still, to the Egyptian Atum (Lefébure, *TSBA* 90) are specimens of equal awkwardness. The word *adam* is of course earlier than any developed creation-myth (*ait tenna rebo*), though it implies (cp. Ass. *admu*, 'child' — i.e., 'one made by God'), the existence of the central element of all such mythic stories (see CREATION, §§ 20 f.).

(b) We must now proceed to consider the name Eve (Hawwah: *חַוָּה*; Gen. 3:20; AV mg. CHAVAH, RV mg. HAVVAT, *חַוָּה* [AL], Aq. Aræ. Symm. *Zawôvot*, elsewhere *eva* [BBL]; *Ἔβα*; *Ἑββά*). This undoubtedly occurs as a proper name (3:20 f.); but it is most probable that *eva* formed no part of the original story, and that in 4:1 the name Eve is a later insertion.² Can its meaning be recovered? According to 3:20 Eve was so called 'because she was the mother of all living' (77). This suggests the meaning 'a living being,' or, less probably, because an abstract conception, 'life' (*חַיָּה* *Zawî*).³ It is also possible, no doubt, to compare *1S* 18:18 (Kau. *HS*) and render 'mother of every kindred,'⁴ in which case Eve (*חַוָּה*) will mean 'kindship,' or more strictly 'mother-kinship,' the primitive type of marriage being supposed to be based on mother-kinship (cp. Gen. 3:20). It is best, however, to adhere to the first explanation, if we qualify this with the admission that Hawwah may possibly be a Hebraised form of a name in a non-Hebraic story.

Next, did the writer of the Eden story understand it *historically*? There are at least three points which must be regarded as decisive against this view.

4. The Narratives.

(1) The *narrative* of the description. The same writer (J), in Nu. 22:28, ascribes the speaking of Balaam's ass to a special divine interference; but the speaking serpent and the enchanted trees in Gen. 2f. appear as if altogether natural. Why? Because the author has no fear of being misunderstood. He knows, and his readers know, that he is not dealing with the everyday world, but with a world in which the natural and the supernatural are one. (2) The idealism of the narratives. The writer chiefly values certain ideas which the narrative is so arranged as to suggest. (3) The total disregard of the contents of these stories in the subsequent narratives of the Yahwist. To these most critics will add (4) the licence which the Yahwist appears to have taken of adding certain features to the primitive story, e.g. at any rate the tree of the knowledge of good and evil. It is not safe to add (5) the poetical form of the story in Gen. 2:4-3 (Briggs), for all that seems probable is that this story is ultimately based to some extent on lost poetical traditions.

It is equally certain, however, that the writer of our Eden story did not explain it *allegorically*. Reverence for tradition must have assured him that the kernel of it at any rate was trustworthy. After purifying the traditional story by the criticism of his religious sense, he must have supposed it to give an adequate impression of what actually took place once upon a time. Kant, among his other services in refutation of the unhistorical

5:1-5 is altered from *Adon*, i.e. Yahu or Ea. We have no right to take our critical starting-point in a list given to us only in P; apart from this, the theory that the lists of the patriarchs in Gen. 4 and 5 are derived, as they stand, from Babylonian lists is scarcely tenable (see *CANTAB.* §§ 4 ff.).

¹ To the proposal of W. (ALP 344, following Stucken) to connect *חַוָּה* with Ar. *adamâ*, 'skin,' Del.'s note on Gen. 27 (*Gen.* 77) will suggest a probable answer.

² Cp. *Ein.* *Gen.* 141, 212 f.; St. *ZATW.* 1864, pp. 266 ff.

³ Nöld. however (with We. [see now *Heid.* 154] and St.), thinks that *חַיָּה* properly means 'serpent' (Aram. *ḥayyâ*, *ZDMG* 42:37). The Midrash (*Ber. rab.* par. 21, on Gen. 3:20) actually compares the same Aram. word, explaining the name thus, 'She was given to Adam to glorify his life, but she counselled him like a serpent.' This hardly favours Nöld.'s suggestion.

⁴ WRS *Kin.* 177. But note that *חַיָּה* and *חַוָּה* are standing Hebrew phrases (see BDB *Lex.*).

ADAMAH

rationalism of the last century, has the merit of having forcibly recalled attention to the fact that the narrative of Genesis, even if we do not take it literally, must be regarded as presenting a view of the beginnings of the history of the human race (*Mythologische Anfang der Menschengeschichte*, 1786).

What, then, is the Eden story to be called? It is a problem which there is a growing disposition to solve by adopting, in one form or another, what is called the *mythic theory*. The story cannot indeed be called a myth in the strict sense of the word, unless we are prepared to place it on one line with the myths of heathenism, produced by the unconscious play of plastic fancy, giving shape to the impressions of natural phenomena on primitive observers. Such a course is to be deprecated. The story of Gen. 2:4-3 has been too much affected by conscious art and reflection to be combined with truly popular myths. Hermann Schultz has coined the expression 'revelation-myth'; but this is cumbersome, and may suggest to some an entirely erroneous view of the pre-Deuteronomie conception of revelation (cp. Smend, *AT Rel.-gesch.* 86, 202). The truth is that the story of Eden cannot be described by a single phrase. The mythic elements which it contains have been moralised far enough for practical needs, but not so far as to rob it of its primeval colouring. The parallel story in the Zoroastrian Scripture called *Vendidad* (Largard u.) is dry and pale by comparison. In its union of primitive concreteness with a nascent sense of spiritual realities our Eden story stands alone.

There is therefore no reason for shutting our eyes to the plain results of historical criticism. It is only when, as was the case when the late George Smith made his great discoveries (see his *Chaldean Genesis*), Babylonian myths are adduced as proofs of the historicity of Gen. 1-11, that they may truly be called *adapa dāpa*. It is not the mythic basis, but the infused idealism of the Eden story, that constitutes its abiding interest for religious men; and it was owing to a sense of this, quite as much as to a desire to harmonise Greek philosophy with Scripture, that the allegoric spiritualism of Alexandria found so much favour in Greek Christendom. From the point of view of the pre-critical period this system could not but commend itself to earnest and devout thinkers. Who, said Philo, could take the story of the creation of Eve, or of the trees of life and knowledge literally? The ideas, however, which the sage derives from the stories are Greek, not early Jewish. For instance, his interpretation of the creation of Eve is plainly suggested by a Platonic myth. The longing for reunion which love implants in the divided halves of the original dual man is the source of sensual pleasure (symbolised by the serpent), which in turn is the beginning of all transgression. Eve represents the sensuous or perceptive part of man's nature, Adam the reason. The serpent therefore does not venture to attack Adam directly. It is sense which yields to pleasure, and in turn enslaves the reason and destroys its immortal virtue. These ideas are not precisely those which advocates of a mystical interpretation would put forward to-day. There is an equal danger, however, of arbitrariness in modern allegorising, even though it be partly veiled by reverence for exegetical tradition. It is only by applying critical methods to the story, and distinguishing the different elements of which it is composed, that we can do justice to the ideas which the later editor or editors may have sought to convey.

For a discussion of 'Biblical Mythos' see Schultz, *OT Theol.* c. 2, and cp. Smend, *AT Rel.-gesch.* 112, 117-122; WRS *RSB* 19, 44f. On the Avesta parallels, see Domesteter, *Le Zendavesta*, tome 3, pp. 57 ff., and Kohut, 'The Zendavesta and Gen. 1-11,' *JQR* [vol.], 223-229. On apocryphal romance of Adam and Eve, see below, *APOCRYPHA*, § 10.

ADAMAH (אֲדָמָה). 1. One of the 'fenced cities' of Naphtali (Josh. 19:36† אֲדָמָה [B], אֲדָמָה [E], [V]).
2. The above article is written on the lines and sometimes in the words of WRS.

ADASA

2. SEE ADAM, I.

ADMATHA

heaven. The 112 (imitated perhaps in 1s 156¹) only implies that Admah and Zeboim had suffered some terrible destruction. As to the mode of their destruction and as to their locality no information is given. It is, in fact, not at all likely that the least famous of the 'cities of the plain' should have been selected by Hosea as representatives; Amos (111) and Isaiah (14.33) mention only Sodom and Gomorrah. It is possible that there was once some distinct legend respecting the destruction of Admah and Zeboim. Possibly, too, Zeboim was not a town, but the name of the district in which Admah was situated. Against this we must not appeal to Gen. 14, since the names of the kings there given are probably unhistorical. Nor can one be given jestering that (cf. as Rodiger, in *Gen. Thez.* suggests, עַדְמָה = עֲדָמָה) Hosea alludes to a story which accounted for the dreary character of the Valley of Zeboim (now the *Wady el Kelt*; see ZIEGLER 1), analogous to that connected with the valley of Achor. Such stories of overthrown villages are not uncommon. See SODOM AND GOMORRAH.

ADMATHA (אֲדַמְתָּה), one of the 'seven princes' (cp Ezra 7:14) at the court of Xabshertus (1 st. 144). [BAS, *Levi* 3]. According to Martini, however, these seven names have arisen from an original three (cp the *three satraps* Dan 6:1) of which CARSATHA (צַרְשָׁתָּה) is one. Shethar and Tarshish are corrupt variations of the second (see SHETHAR) and Meres and Marsena corruptions of the third (see MARSENA). Admatha (or rather אֲדַמְתָּה) would then be the father of Haman, and for אֲדַמְתָּה (cp note to MIVNEVA) should be substituted אֲדַמְתָּה (the designation applied to Haman). See, further, *Fund.*, 68 ff. Cp. LSHM, c. 3.

ADMIN (ADMIN [BX]), a link, in the genealogy of Joseph, between Ammadab and Amin (Amin, in Lk 3:34 RV mg. and W & H). See GENEALOGIES OF JESUS, § 3.

ADMINISTRATION. See GOVERNMENT

ADNA. 1. (𐤀𐤃𐤍) [Ginsb. 7.1.], 𐤀𐤃𐤍 [Kr.] 1. One of the line PAMIR-MOIRAN in the list of those with foreign wives (see LZKA 1, § 5 end), 𐤀𐤃𐤍 10 𐤁𐤏𐤕𐤁𐤍 [B], 𐤀𐤃𐤍 [B], 𐤀𐤃𐤍 [M] *anavazne* [I, combining with next name, which in 1. Esd 9 𐤀𐤃𐤍 1.1. is *sidai*], 𐤀𐤃𐤍 𐤓𐤏𐤕𐤁𐤍 [B = Adna + following name, Chutaki] = 1. Esd 9 𐤀𐤃𐤍 1.1. [I, B], Abut. 1. With this name should be compared Hadama, a Jewish name of the fifth century B.C., mentioned by Hilprecht as found at Nippur (cp. Hazan = 𐤀𐤃𐤍).

2. (Κ⁷⁷)(Ginsb. II.1.), priest temp. Juliakim (see ΕΙΣΑΓ. ii. §§ 6 A, II). Νεβ. 12 15 (αδελφας [Κ⁷⁷ + ιουδ. inf], om. [B⁷⁷A], εδρας [L]).

ADNAH (אֲדָנָה, *ʾAdnāh* [BA], -נָה [L]), a captain in Jehoshaphat's army (2 Ch. 17:14).

ADNAH (עֲדָנָה) [Ginsb. Ba.], other readings עֲדָנָה, עֲדָנָה; אֲדָנָה [HAB.], *Adnah*. A Manassite, who deserted from Saul to David (1 Ch. 12:20 [21]). See DAVID, § 11 a m.

ADONAI (אֲדֹנָי). See NAMES, §§ 119, 120 n.

ADONI BEZEK (אֲדוֹנִי בֶּזֶק, in 1: 7 with *makkaf*; אֲדוֹנִי־בֶּזֶק [BAL] Judg. 14:7; & has אֲדוֹנִי־בֶּזֶק also in Josh. 10:13 where MT has Adoni-zemek; a third variation is אֲדוֹנִי־בֶּזֶק [Jos. Procop. & edd.], the change may be accidental or harmonistic, a Canaanite king when Jurdah and Samoon, invading southern Palestine, encountered and defeated at Bezek. Adoni-bezek fled, but was overtaken, made prisoner, and mutilated. He was afterwards carried to Jerusalem, where he died (Judg. 14:7). The name Adoni-bezek is commonly interpreted 'Lord of (the city) Bezek'; but such a

1. S closes this verse thus, καὶ τοὺς καταλοιοὺς Ἀδὰμα [B. &. μ sup. ras. M], i.e., 'and the remnant of Admah.' This may possibly be correct (see Dahm, *Jes.* 1:5, Ch. *Int.* Is. 91). Moab may be figuratively called Admah, just as Jerusalem is figuratively called Sodom (Is. 1:10).

ADONIJAH

formation is entirely anomalous. In similar compounds (Adoni with proper name) the second element is regularly the name of a god, power of a place (there are, in fact, no Hebrew or Coptic proper names of persons in the OT) thus compounded with the name of a local divinity, nor is *adon* used of the sovereign of a city or country. In Job 10:19 which, in spite of radical differences, is based on a source closely akin to that of Judges 1, it is not identical with it, the head of the native kings who first made front against the Israeliite invasion of the S. is Adoni-zedek, king of Jerusalem (see Adoni-zedek) and it is to Jerusalem that Adoni-bezek is taken (² by his own servants) to die (Judg. 1:7). Hence the conjecture offered under Adoni-zedek appears very probable. See also BÉZAK. G. L. M.

ADONIJAH (אֲדֹנִיָּה, 2 S 34; 1 K 1:10; 2 S., 1 Ch. 32, Neh. 10:16 [17], elsewhere אֲדֹנִיָּה, 'Yahweh is lord,' 3 S., cp 1 Th 1:12 אֲדֹנִיָּהּ אֲדֹנִיָּהּ, Ἀδων[ε] Ἰακ [H], ὁπνία [L].)

David's fourth son (1 Ch 3:2 אֲדָמָה [Adm]; so also in 2 K 2:4) אָדָמָה [Adm]. Nothing is known of his mother, Haggith. Like Absalom, he was born at Hebron (2 S 3:4, אָדָמָה [Adm] אֶלֶף [Alf]). Like him he was conspicuous by his graceful presence, while like all David's sons he never left the constraint of his father's authority. Absalom's death left him heir to the throne, and 'all Israel,' as he said himself, expected that he would become king' (1 K 2:13). He therefore, in the manifest failure of the old king's family, as thought it time to assume a semi-royal state, like Absalom before him (1 K 15). On his side were the old and true servants of David—Joab, the commander of the forces. Another, who represented the old priestly family of Eli, and of whom the companion of David's wanderings—followed by the people as a whole rose (1 K 2:14). The 'new men,' however, Beniah, captain of the body guard, and Zadok, a priest of origin comparatively obscure, looked with evil eyes on his pretensions, and with the powerful aid of the prophet Nathan espoused the cause of the son of Hithshiah. The chance of each party, unless David's death was to be followed by civil war, lay in a sudden stroke which would put their claimant in possession and overawe his opponents.

The story is graphically told, though perhaps with a secret swing towards Adonijah. Nor can we doubt that, like the other narratives of the same writer, it is in the main trustworthy. Adonijah made the first move. He invited all the royal princes save Solomon, together with Joab and Abiathar and 'all the men of Judah,' to a sacrificial feast at a well-known sacred site (see ZOTHIEN) close to Jerusalem (I K. 1.9, f.). They had left the weak old king, however, exposed to the machinations of their enemies, while the fortress was in the hands of Benahai and his trained soldiers. Nathan was quick to seize the opportunity. By the help of Bathsheba and with a presentation of facts which may or may not have been perfectly accurate,¹ he obtained from David an order for the immediate enthronement of Solomon. Adonijah's banquet was disturbed by news that Solomon reigned by his father's will, and was protected by Benahai and the foreign guard. The company broke up in dismay, and Adonijah sought an asylum at the house of the altar. The clemency

of Solomon, however, spared his life, and but for an ill-timed revival of his ambitious dreams he might have remained in a happy obscurity. The cause of his ruin was a petition to be allowed to marry Abishag, for which he obtained the support of Bathsheba. Apparently the queen-mother did not detect his secret political

¹ The question is whether the promise of Solomon asserted by Nathan in 1 K. 1:21 is a clever fiction of Nathan, or not, and whether the description of the domes of Adonijah is, or is not, exaggerated. The former point is the more important of the two. We (*CH of n*) and K. (*Hist. ii. 180*) take different sides. We, in reply is, of course, to us the less palatable one; but we must consider Semitic craftiness, and the improbability of a merely private promise of Solomon. See 1 K. 1:21, 22.

ADONIKAM

motive, indeed Abishag had only nominally been David's concubine. Solomon, however, regarded the proposal as virtually, if not expressly, a claim to the throne, and Adonijah perished by Solomon's sentence and Benaiah's sword.

Compare the narrative of Sade (1/1. 1k v. c. 2), with the somewhat different treatment of the matter by Kattel (*Hist.* n. c. 4).

2. A votary to the covenant (see *Ezra*, i. 7-9; Neh. 10:16 [17] (*adonai* [H] though the names are otherwise divided); *adonai* [H], *adonai* [H]. In the great post-exilic list, *Ezra* 2:36-37; Neh. 7:71-72 (see *Ezra*, ii. 7-9), and in the list (*Ezra* 2:36) of those who came with *Ezra*, the name appears (*adonai* [H] 14:11 respectively) perhaps more correctly (*adonai* [H] 1:7 n. 2) as *Adonis* (*adonai*).

3. A 1. Temp. Jehoshaphat; 2 Ch 17:8 (*adonai* [H]).

4. See *APOLLO*.

5. See *ADONIS*.

ADONIKAM (אֲדֹנִיקָם; 'the Lord is risen up,' cp

ADONIKAM, אֲדֹנִיקָם [H]). The line *Adonikam*, a family in the great post-exilic list (see *Ezra*, ii. 7-9; Neh. 7:71-72; *adonai* [H] 10:16 [17] (*adonai* [H], *adonai* [H]). In the great post-exilic list, *Ezra* 2:36-37; Neh. 7:71-72 (see *Ezra*, ii. 7-9), and in the list (*Ezra* 2:36) of those who came with *Ezra*, the name appears (*adonai* [H] 14:11 respectively) perhaps more correctly (*adonai* [H] 1:7 n. 2) as *Adonis* (*adonai*).

ADONIRAM (אֲדֹנִירָם; § 40, 'the Lord is high'; אֲדֹנִירָם [H]). *ADONIRAM*, chief treasurer of tribute under David (2 S 20:24). Solomon 1 K 4:6, 5:14 [28], and Rehoboam, on whose deposition he was stoned to death by the Israelites (1 K 12:18; 2 Ch 10:24 [27]). *ADONIRAM*, אֲדֹנִירָם [H].

In 2 S 20:24 (see *adonai* [H]) and 1 K 12:18 (*adonai* [H]; *Adoniram*), it is incorrectly (cp We. Dr. *TEB*) written *ADONIRAM* (אֲדֹנִירָם). Hilprecht (*PEF Qa. St.*, Jan. '98, p. 35), indeed, attempts to explain the form by connecting it with *Adoniram* (Adon is high), a Jewish name on a tablet from Nippur; none, however, that is not expressed and that *ADONIRAM* reads 'Adoniram'.

ADONIS only in the phrase אֲדֹנִי (a double

plur.), Is. 17:10 RVmg 'plantings of Adonis' (1 FV has

1. OT reference. 'pleasant plants'). In justification of

the rendering see 1 Ch. 16:11-13,

Kattel in *De. Jos* (6). To Ewald (*Proph.* 2:116, *Licht d.*

hebr. Spr. 7:18, n. 3) and still more to Lag. (*Semitica*,

13), *Adonis*, 205, n. 1) is one this important correction

of the rendering. Clermont-Ganneau should also

be consulted (*Études d'archéol. orientale* 1, 1880, pp.

26 ff.), also WRS *Eng. Hist. Rev.*, 1887, p. 307, but

cp We. *Ar. Hist.* 7 n. Na'um (= pleasant,

gracious) was doubtless a title of the 'Lord' (Adon,

whence Adonis), and Adonis-worship seems to have

penetrated under this title into Syria and Palestine, as

we gather from the OT name *Na'um* [נָחֻם], from the

names *Numina* and *Namuna* in S. Palestine in pre-

Israelitish times (Thotmes III), and from the *Nahr*

Na'min (N. of Carmel), which seems to be the Belus

of the ancients. That Adonis-worship flourished in Pal-

estine when Isaiah wrote can easily be believed. The

N. Israelites were at this time specially open to Syrian

influences. They 'forgot' Yahweh because he seemed

unable to protect them. So Isaiah indignantly exclaims,

'Therefore, though thou plantest (little gardens with)

shoots of Adonis, and stockest them with scions (pred-

icated) to a foreign god . . . the harvest shall vanish

in a day of sickness and desperate pain.' The phrase

'shoots of Adonis' points to the so-called 'gardens of

Adonis,' baskets containing earth sown with various

plants, which quickly sprang up and as quickly

withered. In reality they were symbols of the life and

death of Adonis; but Isaiah takes the withering as an

image of the withered hopes of Israel. On these

'gardens' see Frazer, *Golden Bough* 1:22 f.; WRS

Rel. Sem. 414; Olnefisch Richter, *Kypros* 132 f.;

and cp Che. 'Isaiah,' in *SPOT* (Eng.), 146.

Adonis was one of those local gods who live with

and in nature, who suffer in summer's drought, die

1. *ἄδωνις ἀνίσταται* [EWAQ].

ADONI-ZEDEC

with the winter, and live again with the early spring.

Legend, however, explained the death of the god as

an event of far-off times. Adonis, it said,

was killed while hunting, the bear in fact

amon and accordingly in the heat of summer

was solemn. the great mourning festival of WRS

Ad. Son at which his corpse was exhibited

resting. . . flowers—the quickly fading

Adonis, and a . . . up in Lebanon, near the fountain

of Akka, did it suddenly overtake him, whereupon

the spring became red with his blood. By Akka was

an ancient temple of the goddess Aphrodite (see *Lam.*

2:1 Syr. 6. *Luc. 11:1* 388, *Sozom. HE* 2:4),

of which the ruins still remain, probably it contained

the grave of the god. This legend and the cult con-

texted with it, must be very ancient. Indeed, in a

source as early as the papyrus Anast. I, mention is

made of the goddess of the 'mysterious' city of Byblus.

In its origin it was distinct from the Babylonian legend

of the loves of Ishtar and Tammuz, though at an early

date both this legend and the Egyptian story of Osiris

were combined with it (Plut. *de Is.* 15, *Luc. 11:1* 388, 7,

cp Apollodorus n. 1, 3, 7, etc.). The cult spread through

all the Phoenician colonies, especially to Cyprus, whence

in the seventh century it was imported into Greece.

Adonis, however, is not to be taken as the true name

of the god; every god can be called 'Adon' 'lord,' just

as every goddess is entitled to be called Kabbath, 'the

lady.' At Byblus (see *Gal. VI*, 1) the favourite of the

goddess of Byblus was invoked as the 'lord' *per exel-*

lover, and thus it was that the Greeks came to call him

Adonis. What his real name was we do not know;

for the name Tammuz, which he also bears is Baby-

lonian and it is doubtful whether it ever became

naturalised in Phoenicia.

Possibly his name survives, unsuspected, among the many

divine names. Or perhaps the recollection of his sad fate may have

hindered the formation of proper names derived from his; for it is

impossible that in the worship he never received a real name at

all. For in point of fact Phobos, who was worshipped as Adonis, says

of a certain *khin* (φωβος-εχθρος, that he lived with a woman

named *Herai* in Byblus, that he was slain by wild beasts, and

was afterwards deified, and that his children brought him liba-

tions and offerings. This seems to be the euhemeristic version

of the Adonis legend. Now in 'Vashti in the neighbourhood of

Byblus, where doubtless is the village *Samaria* (see *Renan*,

234), and although such attributions are of frequent occurrence in

Syria, Renan is probably right in recognising in this 'highest

god' the *khin* of Phobos and Adonis. Moreover, according to

Philo (n. 10), the god *Ἀγροῖος* 'Agroios, 'the farmer,' whose

brother is called 'Agros, 'field' (see *Luc. 11:1* 388) and who 'had a

scroscinet image and a temple carried about Phoenicia on

wheels,' was honoured in Byblus as *θεὸς Ἀγροῖος*. He also

occurs in the Greek inscriptions. In Byblus a temple was

erected under Augustus *Ἀδωνίου* (Renan, 237; cp 212 *θεὸς*

Ἀδωνίου . . . and the same god had a temple deep in the recesses

of the mountains near Kufat Fakia to the SE. of Byblus

(*CEG* 455 . . . *ἐκ τῶν ὀρέων τοῦ Ἀδωνίου θεοῦ προσκυνοῦνται*). The

Phoenician name represented by *Ἀγροῖος* is unknown. See

TAMMIZ.

ADONI-ZEDEC, or rather **-Zedek**, as RV (אֲדֹנִי-צֶדֶק),

'Sedek is 'lord,' cp *ADONIKAM*, though to later

readers the name very probably meant 'lord of right-

eousness'; אֲדֹנִי-צֶדֶק [H]; *ADONIS-CEDEK*, a king

of Jerusalem at the time of the Israelitish invasion. See

Josh. 10:1, where he leads a confederation of five

kings of S. Canaan. According to *Josh. 10*, Joshua

came from Gilgal to the relief of the Gibeonites threaten-

ed by the coalition; surprised and completely routed the

army of the Amorite kings near Gibeon; captured the

five kings in the cave of Makkedah; put them to death

and impaled their bodies; then, turning back, razed

Lachish, Liglou, and Hebron, with many other cities in

the region. This story stands in a narrative of the

1. The inscription from the district of Hippo Diarrhytus (*CEG*

viii. 1:211) *adonai* (*adonai*) proves nothing as to the

cultus-name of the god; Adonis has here, as among the Greeks,

become a proper name.

2. From the time of Scaliger it has been assumed that this

name comes from a corruption or misunderstanding of צֶדֶק (see

SHADDAI). This is possible, but very far from certain.

ADOPTION

conquest of all Palestine by Joshua in two great campaigns (Josh. 10 *f.*) which cannot be historical. A much more credible account is to be found, though in an abridged form, in Judg. 1 (see Jos. *Ant.* v, § 8; Josh. 10 s, § 3). Here Adoni-bezek is the king who opposes the first resistance to the advance of the tribes of Judah and Simeon against the Canaanites of the S. It is therefore in Budge's opinion (*ZITW* 7.48 [87]) not improbable that the *Q* reading 'Adoni bezek, king of Jerusalem' in Josh. 10:1 is correct, especially as Judg. 17 may be understood as saying that his own followers carried Adoni bezek to Jerusalem, and so as implying that that city was his capital. The objection to this view is that the second element in Adoni bezek ought to be a god, and we know of no god named Beek. Hence it is very possible that Adoni-bezek in Josh. 10 (*Q*¹⁰) is a scribe's error, and that the original narrative of Judg. 1 had not Adoni bezek, king of some nameless city, but Adoni-zedek, king of Jerusalem (see ADONIZEDEK). W. R. S. G. E. M.

ADOPTION (ΥΠΟΛΕΙΨΙΣ). Ro. 8:23; 9:4; Gal. 4:5; Eph. 1:5. See FAMILY.

ADORA (see below) or **Adoraim** (אֲדוֹרַיִם; on form of name see NAMUS, § 107; ἀδωραι [13]. W. [A and Jos. *Ant.* vii, 10:1], ἁδωρα [14]; ἁδωρα, mentioned with Mareshah, Zaph, and Laish among the cities fortified by Rehoboam (2 Ch. 11:9). The sites of all these places having been securely fixed, there can be no hindrance to identifying Adoraim with the modern *Dara*, which is 5 m. W. by S. from Hebron, and is described by Robinson (2:25) as 'one of the largest (villages) in the district.' The site is well adapted for a town, being 'on the gradual eastern slope of a cultivated hill, with olive groves and fields of grain all round' (cp *PEF. Mem.* 3:391). Under the new Egyptian empire an Adoraim is perhaps mentioned twice (WMM, *16. u. Bar.* 167, 174); but it is not clear that Rehoboam's city is intended. At any rate, Adoraim is doubtless the Adora or Dara of Josephus (*Ant.* xiii, 154 and elsewhere ἁδωρα, ἁδωραϊος, δ.; *C. Ap. 2* ἁδωρα), and the Adora of Macc. 13:50 (ἁδωρα [ANV]). In the latter, Adora is a point on the route by which Tryphon entered Judaea; in the former, it is usually completed as an Idumean city, with Marissa (Mareshah), the fate of which it shared, being captured by John Hyrcanus and compelled to accept circumcision and the Jewish law (Jos. *Ant.* xiii, 24; *RF. i.* 26). T. K. C.

ADORAM (אֲדוֹרָם), 2 S. 20:21; 1 K. 12:26. See ADONIRAM.

ADRAMMELECH (אֲדָרַמְלֵךְ, Ἀδραμμελεχ [14]. Aek [V]; Jos. Ἀδραμ, Ἀδραμμελεχ).

1. A Babylonian deity. According to 2 K. 17:31, after 'the king of Assyria,' *i.e.*, Sargon (see SARGON), had transplanted the Spharvites into Samaria, they there continued to worship Adrammelech and ANANIMATHU (*q.v.*), the gods of Spharvaim. This passage presents two difficulties. In the first place, according to the biblical account the worship of Adrammelech was accompanied with the sacrifice of children by fire: 'they burnt their children in fire to Adrammelech and Anammelech.' Throughout the cuneiform inscriptions, however, there is no allusion to human sacrifice, and in the sculptures and reliefs no representation of the rite has been discovered. The second difficulty concerns the explanation of the name Adrammelech and its identification with some known divinity of Babylonia. The name was originally explained as *Adar malk*, 'Adar the prince,' Adar being regarded as the phonetic rendering of the name of the god *Ninurta*. This identifi- cation, however, was unsupported by any evidence, and has now been abandoned. A clue to the solution of the problem, however, is afforded by the statement that Adrammelech was a god of Spharvaim, a city that is generally identified with Sippar (cp S. PILAVAIM). The god whose worship was especially

ADRIA

centred at Sippar was Šamaš the Sun-god. That this was the case is abundantly proved by references throughout the historical and religious texts of the Babylonians and Assyrians, and the remains of the great temple of the sun-god exist in the remains of Aba Habbah at the present day. Some scholars, therefore, would see in Adrammelech a subsidiary name or title of the Sun-god himself. Others, however, do not accept this view. They strike at its chief support by repudiating the identification of אֲדָרַם with Sippar, suggesting that it is to be identified with *Šabara* or *Šabara*, a city mentioned in the Babylonian Chronicle. No satisfactory explanation of the name, therefore, has yet been offered. But cp NISROCH. L. W. K.

2. A son of the Assyrian king Sennacherib, who, according to 2 K. 19:37 (ἀδραμμελεχ [A]) and Is. 37:38 (ἀδραμμελεχ [BNAOQ]), ἀδραμμελεχ, in conjunction with his brother Sinar (q.v.), slew his father while he was worshipping in the temple of Nisroch at Nineveh, and thence escaped into Armenia. In the Babylonian Chronicle mention is made of this revolt, in which Sennacherib met his death; but the only trace of the name Adrammelech hitherto found is in Abydenus under the form Adramechis, and in Polyhistor under that of Ardimusanus. Scheil however thinks that ADRAK and Adramechis are corruptions of ASSUR-MU-SI-IR (or -GAL), the ideographic reading of the name pronounced ASUR-SUM-UBAŠA. This is the name of a son of Sennacherib for whom his father erected a house amidst the gardens of Nineveh. For analogies cp the royal name Samungilash-Samas-MU-SI-SA. The Ardimusanus of Polyhistor may be a corruption of the phonetic form given above, just as Σαυδορυγανος is Samas-Sum-ukim, the phonetic reading of Samas-MU-SI-SA. (See Scheil, *Z. i.* 121; *Rev. Bib.*, April 1897.) Cp ESAR-HADON, NISROCH.

ADRAMYTTIUM (Ἀδραμύτιον or Ἀτρ.; the adjective, which alone occurs in the NT, is, as in some cursive MSS of Acts, Ἀδραμύθηνος or Ἀτρ.; neither inscriptions nor coins give the form -ΤΤΗΝΟΣ of Tisch. following ΝΙΩ; W & H -ΥΝΤΗ, after AB¹⁶). A seaport of Mysia, which gave, and still gives, its name to the gulf, a great triangular indentation along the S. foot of Mt. Ida, whence it was called also the 'Idæan,' Adramyttium, in the E. recess of the gulf, was always important. It would profit by the trade in timber from Ida. There were also copper mines in the neighbourhood, and iron mines at Andania, not far to the NW. Strabo (p. 606) describes it accurately as 'a colony of Athens, a city with a harbour and roadstead'; but its importance goes back to a much earlier epoch, as Olshausen asserts (*Rhein. Mus. f. Phil.* 53, p. 322, cp Hagar-maveth). Of necessity Adramyttium was intimately connected with the road system of NW Asia. The coast road from Ephesus and the inland road from Pergamus converged to Adramyttium, whence they diverged, on the one hand, across the Mysian peninsula to Cyziens on the sea of Marmora, and, on the other, to Assos, Troas, and the Hellespont. Consequently, it became an assize town, or head of a *conventus iuridicus*. Adramyttian coasters such as that in which Paul performed the first stage of his journey to Rome (Acts 27:4) must have been familiar visitors to Caesarea and the Syrian harbours. *Adramyti* (*Edramiti*), which preserves the old name, is 5 m. from the sea. Thus, Kiepert is perhaps right in putting the ancient town on an eminence by the sea, 8 m. SW. of the modern Adramyti (*Z. d. Geograph. f. Erdk.*, 1880, 294 *f.*). Nevertheless, Edemid is here to the importance of Adramyttium. Silver mines are now worked in the hills behind the town. W. J. W.

ADRIA (ἐν τῷ Ἀδρια. Acts 27:27 [BNA]. *Adria* is 'stony sea,' Wicht), the division of the Mediterranean which lies between Sicily and Malta on the W. and Crete on the E. So the name is applied by Paus. v. 253 (speaking of the straits of Messina), ἐκ τοῦ Ἀδρίου καὶ

ADRIEL

ἐξ ἐτέρων πελάγους δ' καλεῖται Τύρρονον. Cp. id. viii. 514. Eusebius considers Malta as lying on the boundary (B1) i. 14: Γαλιλῆα τε καὶ Μεσσηνίαν προσέχον, αὐτὸς Ἀδριατικὸν καὶ Τύρρονικόν πελάγους διακρίνοντι. Ptolemy distinguishes between the Adriatic Sea and the Adriatic gulf. Acts reproduces the language of the sailors. For this extended application of the name cp. Strabo, who, writing about 10 A.D., says that the Roman Sea is 'part of what is now called Adrias' (p. 123). This implies that the ancient use of the word had been more limited. In medieval times the name was still more widely extended, being practically 'Levant' as opposed to 'Ægean' (cp. Kam. *Pand* 208. See MYRA). The question is connected with the identification of the island upon which Paul was cast (Acts 28) after fourteen days' drifting in Adria (see METANA). We may compare the shipwreck of Josephus 'in the middle of the Adria' (κατὰ μέσον τῶν Ἀδριαίων): he was picked up by a ship sailing from Cyrene to Ptochis (*J. J.* 3).

W. L. W.

ADRIEL (אֲדִרְיֵל, not 'God's flock,' but either (a) miswritten for אֲדִירְיֵל, 'God is helper' [cp. forms of name in *Q*, 2 S. 218 below]; or (b) the Aram. form of Heb. אֲדִירְיֵל. The former view is adopted in NAMES, § 28; the latter by Nestle, *Lev* 15:25; cp. BARZILAI; see also *HPV* 206 n. 1, 309 n. 8). Son of BARZILAI (*J. J.* n. 4) the Melchite, to whom Saul married his daughter MERAB (*J. J.* 1 S. 18 to com. B; cp. usually = *ισραηλ* [A], *εδωρα* [L], 2 S. 21: *ισραηλ* [B], *εδωρα* [A], *εδωρα* [L]).

ADUEL (אֲדוּיָה [B], נָאֻיָּה [A]; אֲדוּיָּה, the great grandf. of Tobit (Tob. 1:1). No doubt another form of אֲדוּיָּה.

ADULLAM (אֲדוּלָּאָם, אֲדוּלָּאָם [B.M.], אֲדוּלָּאָם [B], 2 Ch. 1:1; B.M., M.; A. 1 S. 23:13; A. Josh. 15:35; אֲדוּלָּאָם [L. i.]; אֲדוּלָּאָם, nouns אֲדוּלָּאָם, אֲדוּלָּאָם, אֲדוּלָּאָם; gentilic אֲדוּלָּאָם. Adullamite, אֲדוּלָּאָם [c] [D.L.], אֲדוּלָּאָם [E.], a town in the Shephelah (Josh. 15:35), with a changeful history. For a considerable time it seems to have remained Canaanite. We still have a legend in Gen. 38:13 (J) which describes the fusion of Judahite clans with a Canaanite clan whose centre was Adullam. This fusion had apparently not been accomplished in David's time, for Adullam was still outside the 'land of Judah' when David took refuge there (1 S. 22:1; cp. 23:5). We cannot therefore accept the editorial statement in Josh. 12:15 (cp. 2:7) that Joshua 'smote' the king of Adullam. The Chronicler speaks of Rehobaiim as having fortified Adullam (2 Ch. 11:7). He names the place in conjunction with Socco (Shuweikeh), which harmonises geographically with Hech's combination of it (Mic. 1:15, if the text be correct) with Mareshah (Merash). It is included in the list of cities which are stated to have been occupied by the Jews in the time of Nehemiah or Zernbabel (Neh. 11:35; so *B. M.* 1:1; *B. M.* om.); but the list in Neh. 11:35-6 appears to be an archaeological fiction of the Chronicler. Judas the Maccabee, at any rate, in a raid into 'Idumaea,' occupied Adullam and kept the sabbath there (2 Macc. 12:3).

The chief interest of Adullam, however, lies in its connection with DAVID (*J. J.* § 3). Here, not in some enormous cave (such as that fixed upon by tradition at Kharemmun)² but in the 'stronghold' of the town, David on two occasions found a safe retreat (1 S. 22:1; 2 S. 5:17; cp. 23:14).

Where was Adullam? The authority of the Palest-

¹ The word is found both with *d* and with *n* on Aramaic seals; e.g., אֲדוּלָּאָם (CNS 2, no. 124) and אֲדוּלָּאָם (CNS 2, no. 125).
² The Maghara Kharijites entered the town, not with David, but with an ascetic named Cherton, who, after having been taken by robbers on the way to Jerusalem, founded one of his two klanes here, and died in the cave about 450 A.D.

AGABUS

The Survey has led many recent writers to adopt the identification of Adullam with 'Id-el-ma, proposed in 1871 by M. Clermont-Ganneau. This is the name of a steep hill on which are 'ruins of indeterminate date,' with an ancient well at the foot, and, near the top, on both sides, caves of moderate size. The site is in the east of the Shephelah, about 3 m. S.E. of Socco, and 8 from Mareshah; and, though it is much more from Bethlehem, 'the journey would be nothing for the light-footed mountaineers who surrounded David' (Clermont-Ganneau, *PEF* 177 [75]). The identification, however, is only conjectural. The caves are unimportant (1) because the MT (cp. Jos. *Ant.* vi. 12) speaks of a single cave, and (2) because with We., Kt., Bn., and Kam. we should correct אֲדוּלָּאָם 'cave,' in 1 S. 22:1; 2 S. 23:1; 1 Ch. 11:15, into אֲדוּלָּאָם 'stronghold'; cp. 1 S. 22:4, 2 S. 23:1. Nor does the position of 'Id-el-ma exactly agree with that assigned to Adullam in the *Onomasticon*. On the very slight resemblance of the name to Adullam no reliance can be placed. Other sites are quite possible. Cp. GASm. *HB* 229 f. See M. A. H. § 2 a, n.

L. K. C.

ADULTERY. See MARRIAGE, § 4.

ADUMMIM. The Ascent of אֲדֻמִּים (Josh. 15:7 אֲדֻמִּים [B], אֲדֻמִּים [A], אֲדֻמִּים [L. i.]; 18:17 אֲדֻמִּים [B], אֲדֻמִּים [A], אֲדֻמִּים [L. i.]; אֲדֻמִּים, a point marking the frontier between Judah and Benjamin. The sharp rise near the middle of the road from Jericho to Jerusalem appears to be intended; the name (connected with אֲדֻמִּים 'red') was perhaps suggested by the reddish hue of the chalk rocks in that neighbourhood, to which appears to be due the name of the kham el Ahmar ('the red'), the traditional 'inn' of the Good Samaritan, and that of *Tahit el Dam* ('the hill of blood'), N.E. of the kham. With the latter spot the ascent of Adummim has been plausibly identified (*PEF* *Mem.* 3172).

ADVERSARY. The word so translated in 1 S. 1:1 (אֲדֻרָּא *sara*, RV 'rival,' אֲדֻרָּא [L. i.], cp. Lev. 18:13 [B.M.]) is the technical term for a fellow-wife, answering to Ass. *šarita*, Ar. *šarīṭa*, Syr. *šarīṭa* ('rival'). All these forms are dialectal variations of a single Old-Semitic word. Similarly, in Lev. 18:13 the words 'to vex her' are better rendered by RV 'to be a rival to her.' The words that follow may be rendered, interpreting the metaphor, 'marrying the second sister, in addition to the first, in the lifetime of the latter.'

The sense of the metaphor is given by the Arabic *šarīṭa* *šarīṭa*. See Dr. *IRS*, *ad loc.* and especially Lag. *S. Mittheilungen* 1125 f. (G.G.V. 1882, no. 13).

W. K. S.

ADVOCATE (ΠΑΡΑΚΛΗΤΟΣ), 1 Ju. 2:1; see PARACLETE.

AEDIAS (ΑΗΔΕΙΑΣ [B]), 1 Esd. 9:27 = Ezra 10:20, RV EIJAU, 3.

ÆNEAS (ΑΙΝΕΑΣ [B.M.]), a paralytic at Lydda healed by Peter (Acts 9:34). The form of the name, Æneās, not as in Homer *Enēas*, is more correct. It is met with in Thucydides, Xenophon, and Pindar.

ÆNON (ΑΙΝΩΝ [L. W.H.]), Ju. 3:2 f. See SALIM.

ÆSORA (ΑΙΣΩΡΑ [B.M.], etc.), Judith 14 f. RV = AV Esora (*J. J.*).

AFFINITY. See FAMILY, KINSHIP.

AGABA. RV AGABA (ΑΓΓΑΒΑ [B]), 1 Esd. 5:31 = Ezra 2:6, HAGAB.

AGABUS (ΑΓΑΒΟΣ [L. W.H.]; § 68), one of the 'prophets' who came from Jerusalem upon the tribulation that rose about Stephen (Acts 11:10, cp. 8:4). He predicted a great famine over all the world 'which came to pass in the days of Claudius' (Acts 11:27-28). The reference, of course, is to the great dearth which visited Judaea and the surrounding districts, especially Jerusalem, in 41 and 43 A.D. (Jos. *Ant.* xx. 26; 5:2).

¹ The text of BA differs.

AGAG

Eus. *HE* ii. 113). For other famines in the reign of Claudius, see Suet. *Claud.* 18; Tac. *Ann.* xii. 43.

The next mention of Agabus is in Acts 21 *io* f., where it is said that he 'came down from Judaea' to Caesarea when Paul was there, and, taking Paul's girdle, bound his own feet and hands with it to symbolise the captivity of the apostle. As this reference looks like a first mention of Agabus, those who ascribe the whole of Acts to one writer regard it as an indication that the second half of the book was written first. By other's the passage is naturally regarded as one of the indications that the author of Acts did not himself write the 'we' passages, but adopted them from an earlier source. On the other hand, Overbeck and Van Manen regard 21. 10-14 as an interpolation, and suppose that the 'we' was introduced by the last redactor. Jüngst thinks that the prophecy cannot originally have been ascribed to Agabus, but must have been assigned to one of Philip's prophesying daughters, or these would not have been mentioned. At all events, it is to be noted that 'from Judaea' (21. 10) does not harmonise with 218, for Caesarea belonged to Judaea.

Agabus is included in the lists of the 'seventy disciples of our Lord' by pseudo-Dorotheus and pseudo-Hippolytus, and is commemorated in the great Greek Menaea (Apr. 8), along with Rufus, Herodion, and Asyncretus.

AGAG (אַגַּג, אֲגַג, cp. Ass. *agga*, 'be powerful, vehement, angry'; *Aggi*, the spirits friendly to man, Maspero, *Diction of Civ.* 634; אַגַּג [BAL]), a king of the Amalekites, so celebrated in early tradition that the Yahwist makes Balaam say, by an obvious anachronism, of the future Israelitish kingdom, 'His king shall be higher than Agag' (Nu. 24. 7; אַגַּג [BAL], following Samar. text). Saul, after his successful campaign against the Amalekites, exempted Agag from the general doom of devotion to the deity by slaughter, and brought him to Gilgal, where Samuel hewed him in pieces before Yahweh—i.e., at the great sanctuary where festal sacrifices were offered (1 S. 15. 2 f., 20 f., 32 f.). Making allowance for the endeavour of the narrator to harmonise an old tradition with later ideas (see SACL, § 3), and throwing ourselves back into the barbarous period which begins to pass away under David, we cannot doubt that the slaughter of Agag was a eucharistic sacrifice (see SACRIFICE), akin to that of the *naki'a* (lit. 'victim rent in pieces'), which was in use among the Arabs after a successful fray, and which might be a human sacrifice (WRS RS² 491, cp. 363; We. *Ar. Meid.* 112 [87]).

AGAGITE (אַגַּגִּית; for Greek readings see below), a member of the family of Agag; a title applied anachronistically to Haman (Esth. 3. 10, 8. 15). Haman, as an Amalekite, is opposed to Mordecai, the descendant of Kish (Esth. 2. 6). Neither description is to be taken literally (see ESTHER, § 1, end). The meaning is that there is an internecine struggle between the Jews and their enemies, like that between Saul and Agag of old. Similarly, Haman is called a 'Macedonian' in the Greek parts of Esther; 126 (μακεδονα [L^a]); but βοργαίος [BNAL^a]; AV Agagite; RV BUCHEAN 16. 10 (EV Macedonian; μακεδων [BNAL^a]); but βοργαίος [L^a]), and the name has made its way back into 9. 24 (μακεδων [BNAL^a]); cp ESTHER, § 10. Elsewhere the G^o reading is βοργαίος [BNAL^a] (only in 3. 185 [N^o 4 mg.]), perhaps a corruption of βοργαίος (in Nu. 24. 7, the same version has Γωγ for Αγαγ).

AGAR (אַגַּר [BAL]). 1. The sons of Agar, Bar. 3. 23 RV; AV Agarenes. See HAGAR, § 2, n. 2. Gal. 4. 24 f., RV HAGAR 12. 1, end).

AGATE (אַגַּת, Is. 54. 12, ἰακτιν [BNALQ]; אֲגַת, Ez. 27. 16 [B^o, G^o], ἰακτιν [L^a], κορυμπς [V], etc.; אֲגַת, אֲגַת [BAL]) occurs four times in AV, twice for Heb. *kadkod*, RV 'rubies' and twice for *shoh*. On the identification of these stones, see CHALCEDONY. On the question whether the

AGRICULTURE

agate, which is a variegated chalcedony (translucent quartz) with layers or spots of jasper, was known to Israel, see PRECIOUS STONES.

AGEE (אֶגֶּי, אֶגֶּי [V]; אֶגֶּי [B]; אֶגֶּי [L]; Jos. הלוי [gen.]; AGE), father of SHAMMAI (q.v., 3); 2 S. 23. 11. His name should doubtless be corrected to Ela אֶלָּא (so Marq. *Fund.* 17); א and ל in the older character were very similar. He is mentioned again in 1 K. 4. 18. See ELAH, 6.

AGGABA (אַגְגָּבָא [B^o mg. A]), 1 Esd. 5. 29† RV = Ezra 2. 45, HAGABAH.

AGGÆUS, AV Aggeus (Aggei [ed. Bensly]), 1 Esd. 6. 17, 4 Esd. 1. 40†. See HAGGAI.

AGIA (אַגִּיא [BA]), 1 Esd. 5. 34† RV = Ezra 2. 57, HATTIL.

AGRICULTURE.—Agriculture is here considered (1) as conditioned by the land (§ 1), (2) as conditioned by the people (§§ 2-10), (3) as a factor in the life of the people (§§ 11-15); a concluding paragraph (§ 16) will contain some notes on historical points.

1. The great variety of the conditions in the different natural divisions of Palestine (Dt. 17) must be kept in mind.¹ The various local products,

1. Conditioned by land. natural and industrial, of these districts, so often alluded to by the Old Testament writers, the most important of which are wheat and barley, olive and vine and fig, will be described in special articles (q.v.). On the seasons see RAIN, DEW. We simply note here—*First*, the long dry season (Apr.-Oct.), including all the harvests, the dates of which vary slightly in the different districts (cp FEASTS, § 10); the קציר in spring, when rain seemed miraculous (1 S. 12. 16 f.) and the steady W. wind every evening made it possible to winnow with ease, barley beginning in April, wheat about a fortnight later; the קץ, summer fruits and vegetables, in summer; olives in autumn; the קציר, vines, from August onwards. *Second*, the wet season (Oct.-Apr.), the earlier part of which saw the preparation of the soil by the early rain (שׁוּבַת, שׁוּבַת) for the winter crops, to be brought to maturity by the succeeding showers, especially those in March-April (שׁוּבַת), before which was the time for sowing the summer crops.

With such stable conditions, all that seems to be needed is a fair amount of intelligent industry; and the lack of this, rather than any great change of climate, is probably the cause of the retrogression of modern times.² The productivity, however, was not uniform (cp parable of sower), and there seems to be a somewhat periodic diminution in the amount of rainfall. Agriculture is also exposed to pests; the easterly wind קד, drought, MILDEW, and LOCUSTS (q.v.; see also ANT, § 4).

II. We consider now, more in detail, agriculture as dependent on the energy, skill, and general condition of the inhabitants. Our account must naturally be fragmentary.³ The minute prescriptions of the Mishna must of course be used with caution. We begin with—

2. Sources of information. 1. Technical details of agricultural procedure. (For the most part we shall deal only with the raising of grain crops. For other departments see VINES, GARDEN, CATTLE, etc.) Incidentally the biblical records describe many agricultural processes, and mention by name some of the implements used. Of these implements, however, they give no description; and the only specimens found, up to the present time, are of sickles (see below, § 7).

For Egypt, however, we have fuller sources—many pictures of processes and implements, and some actual specimens. And

¹ See PALESTINE for details on Geology (§ 3), Physical divisions (§ 4 f.), Hydrography (§ 13), Climate and Vegetation (§ 14 f.).

² See however Fraas, *Aus dem Orient* 192.

³ There is no Hebrew word corresponding to our term *farm*. Tilling the soil is אֲגַת הָאֲדָמָה; husbandman is אֲגַת, etc.; field is שָׂדֶה.

AGRICULTURE

since modern Egypt and modern Palestine are very similar, these ancient Egyptian remains may be used to illustrate ancient Palestine. Further, since modern implements and methods are, in Egypt, very like those of antiquity, the same is probably true of Palestine. Hence it is reasonable to hold that, in Palestine also, modern may be taken to illustrate ancient.

Our main side-lights,¹ therefore, are modern Palestine and ancient Egypt; and they are best used in this order, subordinated always to the actual data of the OT itself.

We shall take the processes in natural order,

Sometimes land had to be cleared of wood or shrub (אֲרָז Josh. 17:18), or of stone (אֲבָן), chiefly in vineyards.

3. Prepar- ing soil.

3. Preparing soil. For loosening or otherwise moving the soil many words are used, such as

which the first group denotes ploughing, the second, breaking up the soil (אֲרָבָה) or the clods (אֲרָבָה Joel 1:17) with the mattock or hoe, while the third as clearly means levelling off the surface with something serving for a harrow. Of the names of the instruments? We have אֲרָבָה or אֲרָבָה, אֲרָבָה, of which the first pair probably represents the plough (NT ἀροτριον); the last, a sort of mattock; while אֲרָבָה must remain undetermined, plough-share or hoe. It is clear, therefore, that we have at least three processes—ploughing, hoeing, and harrowing. We cannot be sure that there was of old in different parts of the country any more uniformity than there is now.

It is not likely that the shallow soil would ever be much

FIG. 1.—Egyptian Hoe (*Brit. Mus.*). For picture of hoe in use see fig. 3, and cp EGYPT, § 34, n.

left unsown with grain and is overgrown with weed, this is ploughed in.

Turning now to the implements used for these purposes, and beginning with the less important, we

4. Implements for preparing soil.

ing soil. The goat is the natural symbol of agriculture, as the goad is in modern Palestine,⁶ has no representative in modern Syria; but neither has it in

¹ Babylonia, as well as Egypt, no doubt presented points of contact with Palestine; but in the department of agriculture our direct knowledge of Babylonia is very slight. See *KP*² 394 ff., and Meissner, *Beitr. z. altbab. Privatrecht*.

² See partial list of Talmudic names in Hamburger and Ungolius, and now also a very full collection in Vogelstein's work (see below, § 17).

3 In Egypt two ploughs seem generally to have been used, the one behind the other; perhaps the second turned up the soil between the furrows made by the first (p. however, next note). On the other hand, at least in later times, the Egyptians sometimes used a lighter plough, drawn by men or boys.

4 If we could regard the Egyptian agricultural pictures as representations of actual scenes we should have to conclude that in Egypt the hoe was used sometimes before (so always? in the Old Empire), sometimes after, or both before and after the plough, to break up the great clods of earth. The depicting of the various operations side by side, however, is very likely a mere convention designed to represent in one view all kinds of field work. So Prof. W. Max Müller in a private communication to the present writer.

⁵ The illustration (fig. 1) needs only the explanation that the twisted cord adjusts the acuteness of the angle of the two other parts.

⁸ Cp Wetzstein's note on Judg. 3:31 (*l.c.* below, § 17).

AGRICULTURE

modern Egypt. A modern Syrian hoe may be seen in *PEFQ*, 1891, pp. 110-115; as also mattock, spade, etc.

The *harroo* does not seem to have been used by the ancient Egyptians, although their modern representatives use a weighted plank or a toothed roller. In modern Palestine a bush of thorns is sometimes used. The writer of Job 39, however, seems to have known of some implement drawn by beasts following the labourer; but this throws little light on general usage.

The *plough*, although it is probably, strictly speaking, an inferior substitute for the spade, is in common practice a very important implement, and merits more detailed treatment.

Of the Israelish plough we know only that it had, at least sometimes, an iron share that needed sharpening (e.g., 1 S. 13²⁰, editorial comment in corrupt text). That the Syrian plough was light¹ we have the testimony of Theophrastus. The modern Syrian plough, which is light enough to be carried by the ploughman on his shoulder, and is simpler than the usual ancient Egyptian² plough (fig. 3) in having only one handle and therefore

FIG. 2.—a. Babylonian Plough (from cylinder seal, *circa*. 2000 B.C., belonging to Dr. Hays Ward). b. Syrian Plough and Goad (after PEAKE, 1891).

not needing two men to manage it, may safely be taken to illustrate that used by the Israelites. There is no more uniformity in its construction than in any other matter relating to agriculture, and it would seem to be at its simplest in Southern Palestine. The woodcut (fig. 2) illustrates its general form. It is of wood, often oak. The stake on to which the pointed metal sheath that serves for a share is thrust, passing through a hole in the pole, to end in a cross handle piece. The pole is of two pieces, joined end to end. The pole (עֵבֶר, עֵבֶר, more rarely עֵבֶר עֵבֶר; ἑβρῶν, ἑβρῶν) is repeatedly mentioned in the OT. It varied in weight according to circumstances (1 K. 12.4). It is now made as light as possible, often of willow. Two pegs, joined below by thongs or by hair string, form a collar for each of the oxen, and two smaller pegs in the middle keep in position the ring or other arrangement for attaching the plough pole. Repairs are attended to once a year by a travelling

¹ The simplest plough would be made of one piece of a tree, bent while growing. See Verg. *Georg.* I, 136, and illustration in Graevius, *Thes. Antiq. Rom.* II, p. 1074.

² The ancient Egyptian plough, which underwent little modification in the course of millenniums, was all of wood, although, perhaps, the share was of a wood (thicker?) different from the rest of the plough, and may sometimes have been sheathed in metal (Wilkinson). Of the Assyrian plough we know from an embossed relief found near Mosul, that it (sometimes) had a board for turning over the earth, and just in front of it a drill that let the seed down, to be covered by the soil as it turned over.

³ Where two forms of the Arabic name are given, the first is from Schumacher, and the second from Post (17, *cit.* below, § 17). The Hebrew names are from Vogelstein (2, *cit.* below, § 17).

AGRICULTURE

expert. The ploughman holds in his left hand a *goad* (*messay* = מַסְיָה) some eight or nine feet in length, having at one end a metal point, and at the other a metal blade to clear the share.

The *hara* (הָרָא, *gogos*) would, as now, oftenest consist of oxen (Am. 6:12), but sometimes of cows (Job

FIG. 3.—Ploughing, hoeing, and sowing. From the *maṣṣaba* of Ti at Sakḥāra (Old Empire). After Baedeker.

14, Heb. text), and perhaps sometimes of asses (Is. 30:24; Dt. 22:10). Even camels and mules may now be seen occasionally. In Armenia many pairs of oxen draw one plough, the driver sitting on the yoke; but this is hardly the meaning of 1 K. 19:13.

The *furrows* were called קֶרֶן (קֶרֶן, *keren*). They are now sometimes very carefully drawn (cp. מאדוק: Ps. 129:4), and are some nine to ten inches apart.

Irrigation (מִיָּדָה, *miyada*; see GARDENS) must have been one of the processes used by Israel.² Palestine, indeed, differed from Egypt (Dt. 11:10f.), on which see EGYPT, § 24, n.) in having

a copious supply of rain and in having natural springs (Deut. 8:7); hence many districts, especially in valleys,³ would bear crops without being watered artificially. But later practice shows that even these would yield better harvests if they had artificial irrigation, and there may have been districts under cultivation which were entirely dependent on it. It would not be safe to assign an early date to the elaborate methods and regulations of Mishna times; and it is difficult to determine whether by the streams that were so highly prized (Dt. 8:7; Nu. 24:6; Cant. 4:15),⁴ and without which a garden could not live (Is. 1:30), artificial canals are meant, and whether, e.g., the bucket (שֶׁבַע, Is. 40:15; Num. 21:5) was used in irrigation. The Mishna has regulations concerning *manuring* (מְזִיָּה), and there may be a reference to it in such passages as Ps. 83:10[11] (מְזִיָּה) or Is. 25:1 (Kithib). In NT times, at least, manure was used for trees (Lk. 13:8; *πάλα κόπρος*), as now for figs, olives, etc.; it was worked in at the last yearly ploughing, which was after the first winter rain. For grain crops the use of manure is exceptional (e.g., at Hebron). Remains show that in the hilly country *terraing* (מְזִיָּה, Cant. 5:13?) was used even more than now, especially for vine cultivation; but the water terraces are still used for grain, the clearing of the soil being called *malāh*.

Fences (מִגְדָּר) were employed, perhaps only in vine-

¹ Vogelstein argues from *Kelim*, 96 that this is the name of the metal head.

² Cp. however, Hcl. on Ps. 129:4, 15; Buhl *sub* voc. etc.

³ See now the account in Vogelstein, § 4.

⁴ Cp. *R.S.* 2:106.

⁵ The prophets delight to speak of the copious supplies of water that will refresh even the most unlikely places in the ideal future (see Cheyne on Is. 30:25).

AGRICULTURE

yards (Is. 5:5; Leeches, 28:28), where hedges (מִגְדָּר Is. 5:5) were also in use; and there was sometimes a border, e.g., of מִגְדָּר (see FENCES, 2) (Is. 28:25). Between grain-fields, however, the commonest practice was to set up *stones* to mark the line of partition (עֲזָר: Hos. 5:10); on the strong sentiment that prevailed as to the unrighteousness of tampering with these, see below (§§ 12, 14).

Whether the various words used for sowing the seed were technical terms we cannot tell. *ṣā* is a word

6. **Sowing.** of general significance. In Is. 28:25 three words are used in converse: *ṣā* and *ṣā* of scattering *ṣā* (see FENCES, 1) and *cumin* with the hand; *ṣā* of setting wheat and barley in the straight furrows.² Nowadays a drill is sometimes used. The common practice

is, whether the land has been already ploughed or not, to plough in the seed.³ This protects it from ants and from dryness due to intermission of the early rain.⁴ As to protection from man and beast, see IICT.

To reap is *ṣā*. Two names of implements have been preserved (*ṣā*, only in Dt. [169; 23:61]; *ṣā*, only in Jer. [50:10; AV mg. scythe²] and Joel [3 (1):11]; *ḥarṣan*); but whether they

7. **Reaping.** refer to the same thing or to varieties, we do not know. Perhaps the commonest method was to pull up by the root (see fig. 5), a practice confined in ancient Egypt to certain crops, but still followed both in Egypt and in Palestine. The use of *sickles* in

Canaan in very early times is, however, proved by the finding of sickle-flints⁶ at Tell-el-Hesi in the earliest and all succeeding layers, while the use of iron sickles by the Jews in at least pre-Hellenistic times is proved

FIG. 4.—Rams trampling in the seed. From the *maṣṣaba* of Ti. After Baedeker.

by the finding of the specimen represented in fig. 7.

By putting together different allusions,⁷ we can follow the various steps. The reaper (מִגְדָּר) filled his hand

FIG. 5.—Pulling up grain. After Erman.

¹ In Am. 9:13 *ṣā* is used of the process of sowing.

² It is not unlikely that *ṣā* is to be dropped, with We. Che. and Dt. (against Dt.), as *ṣā*.

³ According to Strabo, this was done also in Babylon (cp. above, vol. 7, n. 2), and in ancient Egypt the seed was sometimes trodden in by sheep (Erman, *Life in Ancient Egypt*, ET 429; not goats), in the time of Herodotus by swine.

⁴ On the stages and accidents of growth cp. Vogelstein, § 10.

⁵ For *ṣā*, which AV mg. thrice renders 'scythe', L.V. has, more correctly, *PRUNING-HOOKS* (*ḥarṣan*).

⁶ The method of setting the sickle flints is shown by the specimens found by Dr. Petrie in Egypt (*Tell-el-Hesi*, etc. pl. 7 no. 27; see above, fig. 6).

⁷ *Ruth*, 2:23; Ps. 129:7; Is. 17:5; Job 24:2; Jer. 9:22[21].

AGRICULTURE

(Is. 28:27) it was usual to beat out cummin and קציר (see FITCHES, 1) with rods (קציר and קציר respectively). The other processes were probably more common in later times. For these was needed a threshing-floor (קציר, δλωρ, δλωρ), for which was selected some spot freely exposed to the wind, often a well-known place (2 S. 24:16)² Beating the floor hard for use may be alluded to in Jer. 51:33 (H. b. Text; קציר). Sometimes the wheat heads may have been struck off the straws by the sickle onto the threshing-floor (Job 21:24), as Tristram describes (*East. Christ.* 125); but usually the bundles would be first piled in a heap (קציר) on the floor, and then from this a convenient quantity (קציר)³ from time to time spread over the floor.

The threshing then seems to have been done in two ways: either (b) by driving cattle round the floor on the loosely scattered stalks till their hoofs gradually trampled (קציר) out the grain (קציר), for which purpose oxen⁴ were used (Hos. 10:11),⁵ or (c) by special implements.⁶

The instruments mentioned, which were drawn usually by oxen, are (a) קציר, קציר (2), קציר, קציר; (b) קציר with קציר⁷ (wheel) pivoted (Is. 28:27), and perhaps alone (Am. 2:13); see, however, We. *ad loc.*. These two sets of expressions probably correspond pretty closely to two instruments still in use in Palestine, and a description of them and their use will be the nearest we can come to an account of their ancient representatives.

a. The Syrian *nirag* (קציר) is a wooden drag⁸ (see fig. 10) with a rough under-surface, which when drawn over the stalks chops them up. The illustration needs few explanations. The roughness is produced by the skilful insertion in holes, a cubic inch in size, of blocks of basalt (קציר Is. 41:13) which protrude (when new) some inch and a half. The sledge is weighted by heavy stones, or by the weight of the driver, who, when tired, lies down and even sleeps, or sits on a three-legged stool.

β. The *Hilan* of Northern Syria, called in Eg. by

¹ 'Barndoor,' 2 K. 6:27 AV.

² But in 1 K. 22:19 קציר is probably dittography for קציר.

³ So written, without dagesh, by Baer.

⁴ It is not clear how the horses of Is. 28:28 are supposed to be used. Du. proposes to read קציר as a verb.

⁵ In Egypt in later times oxen were so used, thresh in a with their heads bound together at the horns by a beam (see fig. 10), or in the ancient empire, donkeys, ten in a cart so in modern Syria, the line being called a *haran*.

⁶ Just as several rods are used together in mud, (a), so there could be duplicates of *haran* (b), or of implement (c), or mixtures of (b) and (c) used simultaneously, as now in Hauran.

⁷ 'Threshing-wain,' Job 41:30 [22] RV.

⁸ Clearly some kind of sharp instrument of iron (2 S. 12:11).

⁹ Ch. 20:30, RV 'harrow,' Hoffm. (*Z. 111* 20:30) 'pick.'

¹⁰ Perhaps by a gloss we have here independent names for one thing (Is. 41:13). By קציר (Judg. 8:7, 16), which some would add here, the Talmud (with *Sh. [once]*; *Sh. [once]* trans-literates) understands 'thistles'; a view that is confirmed by the existence in modern Egyptian Arabic of a word *haran* as the name of a thorny plant. See Hoffm. 1.

¹¹ קציר alone = (threshing) wheel, Prov. 20:26 RV.

¹² Same π ft. × 3 ft. × 2 in.

handle of the winnowing instrument, or even with a special two-pronged fork (*diñkal*, διήκλα)—the mixed mass (*diris*) of grain (*kabb*), chopped straw (*tibn* ¹⁷τσ), and chaff etc. (*zappir*), is formed into a heap (*'arama*), to make room for a new *tarka*.

1 The Mishna seems to assume the practice in *Kelim* 16:7 לֹא יִשְׁתַּחֲוֶה אֶת הָעֵינַיִם. It is doubtful whether the preceding phrase וְלֹא יִשְׁתַּחֲוֶה אֶת הָעֵינַיִם refers to a practice, reported by some travellers, of bandaging the eyes of the oxen in threshing. Philological considerations would give the preference to Maimonides' explanation: '*Sacculus pellis in eorum colligunt stercus iumentis ne pereat triticum dum trituratur*'.

AGRICULTURE

The process of winnowing (זרר) is often mentioned. Two names of instruments are preserved, the זרר (EV 9. **Winnowing.** 'fan') in Is. (30:24) and Jer. (15:7), and the זרר (EV 9. 'shovel') in Is. alone (30:24).¹ They seem to refer to different things; perhaps to

the implements still called by similar names in Palestine² —the fork and the shovel. The products are grain (כֶּסֶם), chopped straw (כֶּסֶם), and chaff (כֶּסֶם, *ḥayyāṣ*). The first is heaped up in round heaps (כֶּסֶם) Ru. 37; Cant. 7³, Heb. Text). The second is kept for provender (Is. 117). The third is blown away by the wind (Ps. 14).

In modern Syria the *miḏrā* (see fig. given in Wetzstein, *op. cit.* below, § 17) is a wooden fork almost 6 ft. in length, with some at least of

FIG. 12.—Winnowing.
After Eрман.

the *daris* against the wind or straight up, or simply let it fall from the inverted fork, according to the strength of the evening W. breeze. While the chaff

is blown away some 10 to 15 ft. or more, the straw (*tibn*) falls at a shorter distance, and is preserved for fodder; the heavy grain, unbruised ears, and joints of stems, fall almost where they were, ready for sifting.

Strange to say, in the case of sifting it is the names of the implement that are best

10. **Sifting, etc.** preserved. The *shiv* is called *ʾāḥārah* (אָהָרָה, Am. 9:4) and *nāḥārah* (נָהָרָה, Is. 30:3). In the former case

AGRICULTURE

and a proverb-writer points out the superiority of the quiet prosperity of the husbandman to an insecure diadem (Prov. 27.24-27).

Not unnaturally it is the life of harvest time that has been most fully preserved to us. We can see the men, especially the younger men (Ru. 2.9), cutting the grain, the young children¹ going out to their fathers (2 K. 11.9) in the field, the jealousies that might spring up between the reapers (Gen. 37.7), and the dangers that young men and maidens might be exposed to (Ru. 2.9 *perh.* Hos. 9.1 *f.*), the simple fare of the reapers (Ru. 2.14), and the unrestrained joviality of the evening meal (Ru. 3.7) after the hot day's work (2 K. 1.9), the poor women and girls gleaning behind the reapers and usually finding more than they seem sometimes to find nowadays, beating out the grain (Ru. 2.17) in the evening and carrying it away in a mantle to the older ones at home (Ru. 3.15), not only the labourers but also the owners sleeping by the corn heaps at night (Ru. 3.7), so that the villages would, as now in Palestine and Egypt, be largely emptied of inhabitants. The Egyptian monuments could be drawn on for further illustrations.

Such a mode of life had naturally a profound effect on the popular sentiment, the religious conscience, and, in time, the literary thought of the people; and, to complete our survey of the subject, a few words must be said here on these matters.

14. Sentiment.

That the agricultural mode of life was regarded as originating in the earliest ages is evident from Gen. 3 and 4;² but it was sometimes regarded as a curse (3.17 *f.*), or at least as inferior to pastoral life (13 *f.*), while at other times nomadic life was a curse (4.12), instead of being a natural stage (12.9). These two sides are perhaps reflected in the glowing descriptions in which certain writers delight—e.g., Dt. 33.8: a tilled land of corn and wine and oil (Dt. 8.7-9), a pasture land flowing with milk and honey (Ezek. 20.6). This land, which is lovingly contrasted with other lands (Ezek. 20.6-15), was felt to be a gift of Yahwē to his people, and specially under his watchful care (Dt. 11.12). The agricultural life was, therefore, also of his appointment (Gen. 3.23; Eccles. 7.15 [6]), and indeed lay as the basis of his Torah. From him the husbandman received the principles of his practice (Is. 28.26), as also, he depended absolutely on Yahwē for the bringing into operation of the natural forces (Dt. 11.14) without which all his labour would be in vain (7.17). This, however, was only a ground of special security (Dt. 11.12), for no other god could give such blessings as rain (Jer. 11.22), and Yahwē did give them (Jer. 5.24). If they were not forthcoming, therefore, it was because Yahwē had withheld them (Am. 4.7), and this was because of his people's sins (Jer. 5.25), which also brought more special curses (Dt. 28.38-40). The recognition of Yahwē had, therefore, a prominent place in connection with the stages of agricultural industry (see FEASTS, § 4), the success of which was felt to depend on the nation's rendering him in general loyal obedience (Dt. 11.8-17); the Land itself was Yahwē's; the people were but tenants (Lev. 25.23); and the moving of the ancient landmarks, though not unknown, was a great wrong (Job 21.2). Some of the moral aspects of agricultural life have been already sufficiently touched on. It is probable that many of the maxims referred to were widely observed, being congruent with the better spirit of the people. Thus Amos records it as an outrage on the ordinary sentiments of common charity, that even the refuse of the wheat should be sold for gain (Am. 8.6). Other maxims, again, can be little traced in practice.

In this description of Hebrew ideas we have taken no note of the differences between earlier and later times. Deuteronomy and the prophets have been the main

¹ Several children may sometimes now be seen weighting and driving the threshing-sledge.

² Cp also Gen. 4.28 *f.* and WRS R.52: 307

AGRICULTURE

authority. In the public consciousness, however, there lived on much of the old Canaanitish popular belief, in which the *El'ālim* hold the place here assigned to Yahwē, so that, e.g., the fertile spot is the El's plot of land, who waters it from unseen sources, underground or in the heavens (see BAAL, § 1)—a mode of expression that lived on into Mishna times, although its original meaning had been long forgotten.

The influence on Hebrew literature was very deep. The most cursory reader must have observed how much

15. Literature. the modes of expression reflect the agricultural life. Prophetic descriptions of an ideal future abound in scenes conceived in agricultural imagery.³ Great joy is likened to the joy of harvest (Is. 65.14 *f.*); what is evanescent is like chaff that is burned up or blown away; something unexpected is like cold (Pr. 25.13), or rain (Pr. 26.1), in harvest—and so on. Lack of space prevents proof in detail of how, on the one hand, figures and modes of speech are drawn from all the operations and natural phenomena of agriculture, while, on the other hand, every conceivable subject is didactically or artistically illustrated by ideas and expressions from the same source. It is a natural carrying forward in the NT of this mode of thought, to find Jesus publishing his epoch-making doctrines of the 'kingdom' so largely through the help of the same imagery. No doubt the commonest general expression is 'kingdom'; but even this often becomes a vineyard, or a field, or a tree, or a seed; and it is extended by sowing etc. It is unnecessary to pursue the subject further. The whole mode of thought has passed over into historical Christianity, and thus into all the languages of the world.

16. Historical. We shall now in closing give some fragmentary notes towards a historical outline of the subject.

The traditional account of the mode of life of the ancestors of Israel in the earliest times introduces agricultural activity only as an exceptional incident. Agriculture must be rudimentary in the case of a nomadic people. That Canaan, on the other hand, was for the most part well under cultivation,⁴ when the Israelites settled in the highlands, there can be no doubt. The Egyptian Mohar found a garden at Joppa,⁵ and of the agricultural produce claimed by Thothmes III. at the hands of the Rutennu⁶ some at least must have been grown in Palestine. Israel doubtless learned from the Canaanite not only the art of war (Judg. 3.2), but also the more peaceful arts of tilling the soil, which, as the narratives of Judges and Samuel prove, were practised with success, while it is even stated that Solomon sent to Hiram yearly 20,000 Kor of wheat and 20,000 Bath of oil (1 K. 5.11 [25] Var. Bible). Later, Ezekiel (27.17; see Cornill) tells us how Judah bartered wheat with Tyre,⁶ as well as honey, oil, balm, and *zib* (see PANNAGE); which illustrates the tradition in 1 K. 20.34 (see C. T.) that there were bazaars (see TRADE; STRY GER, § 2) for Israelitish merchants in Damascus, and for those of Damascus in Samaria. It is strange, but true, that in the very period to which this last notice refers, there arose a popular reaction against the precious legacies of Canaanitish civilisation (see RECHABITES). The Assyrian conquest of Samaria naturally checked for a time the cultivation of the soil (2 K. 17.25, lions), the colonists introduced by Sargon and Asur-bāni-pal being imperfectly adapted to their new home. In Judaea under Gedaliah the Jews 'gathered wine and summer

AGRIPPA

fruits very much' (Jer. 10.12), and had stores of wheat, barley, oil, and honey, carefully hidden in the ground (Jer. 11.18). In Is. 11.14 mention is for the first time explicitly made of a threshing instrument with teeth (מַעֲדָה); but whether this was of recent introduction it is impossible to determine. On the fall of the Babylonian power the old relations with Tyre were doubtless renewed (Ezra 3.7; cp Is. 23.15). The imperial tribute, however, is regarded as heavier than the agricultural resources of the country could then well bear (Neh. 5.3 f.). This tribute may have been partly in money (5.4), but also apparently to a considerable extent in produce (Neh. 9.37, מַעֲדָה). In Joel, of course, there is a description of agricultural distress, but in such a way as to imply that agriculture was in general receiving full attention. In Eccles. (25 f.) there is acquaintance, as in other things, so in agriculture, with several artificial contrivances. To go into the detailed accounts of the Mishna is beyond the present purpose.

AGRIPPA (ΑΓΡΙΠΠΑ), Acts 25 f.† See **HERODIAN FAMILY**, 7.

AGUR (אגור; so Pesh.; אגור; but א and Vg., translating, ΦΩΒΗΘΗΤΙ [BAN]; *Congregatio*), i. Jakoh, an author of moral verses (Prov. 30.1). His name is variously explained as 'herding' of wisdom (Bar Bahlul) and 'collector' of words of Torah (Midr. *Shemot* R., par. 6). Such theories assume that Solomon is the author of the verses, which (see **PROVERBS**) is impossible. All the description given of him in the heading is 'the author of wise poems' (read, not אגור, but אגור, with Grätz, Cheyne, Bickell). Very possibly the name is a pseudonym. The poet who 'takes up his parable' in 25.5 expresses sentiments very different from those of Agur; he seeks to counteract the bold and scarcely Israelitish sentiments of his predecessor.

AHAB (אחאב, § 65.¹ 'father's brother,' cp Ahiam and the Assy. woman's name, Ahat-abish, and see Wi. *Zf.* 1808, Heft 1; also אהאב [for אהאב] on an inscription from Safa [*Journ. As.* 1881, 19.463]). i. (Αχααβ [BAL]), אחאב [A once]; *Ahab*; Assy. *Ahabbu*. Son of Omri, and king of Israel (875-853? B.C.). Cp **CAROTOGY**, § 32, and table in § 37. The importance of this king's reign is shown by the large space devoted to it in the Book of Kings.

1. Sources. To obtain a just idea of his character, however, is not easy, the Israelitish traditions being derived from two very different sources, in one of which the main interest was the glorification of the prophets, while the other was coloured by patriotic feelings, and showed a strong partiality for the brave and bold king. To the former belong 1 K. 17.19 and 21; to the latter, chaps. 20 and 22.² Both groups of narratives are very old; but the former is more difficult than the latter to understand historically. In chaps. 20 and 22 we

¹ Cp Nöldeke, 'Verwandtschaftsnamen u. Personennamen' in *Achtzigsten zur semitischen Onomastologie* (HZA. III 307-316 1922).

² See **KINGS**, § 8, and cp Ki. *Gesch.* 2.184-186 [E. F. 2.274-276].

AHAB

seem to get nearer to the facts of history than in chaps. 17-19, 21; at the same time we must remember that even here we have to deal, not with extracts from the royal annals, but with popular traditions which are liable to exaggeration, especially at the hands of well-meaning interpolators.¹ The story of Ahab, in his relation to Elijah has been considered elsewhere (see **ELIJAH**, § 1 ff.). We can hardly deny that the writer exalts the prophet to the disadvantage of the king. Ahab

2. Ahab's policy. was not an irreligious man, but his interests were mainly secular. He wished to see Israel free and prosperous, and he did not believe that the road to political salvation and physical ease lay through the isolation of his people from all foreign nations. The most pressing danger to Israel seemed to him to be in its being slowly but surely Aramaised, which would involve the depression and perhaps the ultimate extinction of its national peculiarities. Both under Baasha and under Omri, districts of Israelitish territory had been annexed to the kingdom of Damascus, and it seemed to Ahab to be his life's work to guide himself, not by the requirements of Yahwe's prophets, but by those of political prudence. Hence he not only maintained a firm hold on Moab, but also made himself indispensable as an ally to the king of Judah, if he did not even become, in a qualified sense, his suzerain (see **JERUSALEM**, 1). Besides this, he formed a close alliance with Ethbaal, king of Tyre (Jos. *Ant.* viii. 13 f.), whose daughter Jezebel (Ishatzebel?) he married. The object of this alliance was doubtless the improvement of Israel's commerce. The drawback of it was that it required on Ahab's part an official recognition of the Tyrian Baal² (commonly known as Melkart), which was the more offensive because the contrast between the cultus even of the Canaanitish Baalim and that of the God of Israel was becoming stronger and stronger, owing to the prophetic reaction against the earlier fusion of worship. Ahab himself had no thought of apostatising from Yahwe, nor did he destroy the altars of Yahwe and slay his prophets. Indeed, four hundred prophets of Yahwe are said to have prophesied before him when he set out on his fatal journey to Ramath Gilead. His children, too, receive the significant names of Athaliah, Ahaziah, and Jehoram.

We can understand Ahab's point of view. But for its moral dangers, we might call it thoroughly justifiable. It was of urgent importance to recover the lost Israelitish territory and to secure the kingdom of Israel against foreign invasion. If Israel were absorbed by Damascus, what would become of the worship of Yahwe? To this question Elijah would have given the answer which Amos (7.1, § 18) gave after him: 'Perish Israel, rather than that the commandments of Yahwe should be dishonoured.' Jezebel's judicial murder of Naboth and Ahab's tame acquiescence showed Elijah what might be expected from the continued combination of two heterogeneous religions. It was for the murder of Naboth that Elijah threatened king Ahab with death.³

¹ We must begin, however, with an analysis of the narratives. Van Doornick (*Th. F.* 1895, pp. 576-584) has made it highly probable that the narrative of the siege of Samaria and the battle of Aphek in 1 K. 20 has received many interpolations tending to make the deliverance of the Israelites more wonderful, in addition to those already pointed out by We. (*CH* 225 f.), and Kue. (*Eint.* § 25, n. 10).

² Of Baalath, the female counterpart of Baal, the Hebrew tradition makes no mention. It is an interpolator who has introduced into 1 K. 18.19 the words 'and the prophets of the Ashtera, 400,' which are wanting in the MT of 17.22, though supplied in *Q¹* (see *ib.* only 400 in 17.22) (cp WRS, *RS* 22.189; We. *CH* 221; Kie. *St. K.* 367; Ki. in Kau. *HS*). Of course, Baalath may have had her cultus by the side of Baal, but not in such a way as to strike Israelitish observers. Nor could either Baalath or Ashtera (Jezebel's father had been a priest of Ashtera, Jos. c. *Ap.* 1.15) have been called 'the Ashterah' by a contemporary writer.

³ Note that 1 K. 21.20b-26—in which (1) the whole house of Ahab is threatened, and (2) the punishment is connected with Ahab's religious policy—forms no part of the old narrative (see Ki. in Kau. *HS*).

and it was probably for this, or for other unrecorded moral offences of Ahab and the partisans of Baal, that the uncourtly prophet Micaiah 'never prophesied good concerning Ahab, but evil' (1 K. 22:8).

To what precise period of Ahab's reign his encounters with Elijah belong, we are not told. Nor is it at all certain to which years the events recorded in 1 K. 20 are to be referred. To the popular traditions further reference is made elsewhere (see ISRAEL, HISTORY OF, § 29). Suffice it to say here that they show us Ahab's better side; we can understand from them that to such a king much could be forgiven. Our remaining space will be devoted to the two inscriptions relative to episodes in the life of Ahab.

3. Mesha Inscription

The earliest record comes from MOAB (q.v.). King Mesha informs us in his famous inscription (L 8) that Moab had been made tributary to Israel by Omri, and that this subjection had continued 'during Omri's days and half of his son's days, forty years,' after which took place the great revolt of Moab.¹ How this statement is to be reconciled with that in 2 K. 11:14 need not be here considered. It is, at any rate, clear that the loss of the large Moabitish tribute, and of the contingent which Moab would have to furnish to Israelish armies, must

4. Shalmaneser II's Inscription

have been felt by Ahab severely. The second mention of this king occurs in the Monolith Inscription of SHALMANESER II (q.v.). In the list there given of the allied kings of Syria whose forces were defeated by Shalmaneser at the battle of Karkar (near the river P'rontes) in 854 B.C. occurs the name of Ahabbu Sar-lai, which, as most scholars are now agreed,² can only mean Ahab³ of Israel⁴ (or, as Hommel thinks, of Jezreel). Two important questions arise out of this

5. Why was Ahab at Karkar?

record. (1) Did Ahab join Bir'idri (Benhadad I.) of Damascus of his own accord, jealousies being neutralised by dread of a common foe? or was he a vassal of Bir'idri, bound to accept the foreign policy of his suzerain and to support it with (or at any rate through) his warriors on the field of battle? The former alternative is adopted by Kittel⁵ and McCurdy; the latter by Wellhausen and Winckler. To discuss this here at length is impossible. The remarks of Wellhausen will seem to most students very cogent. 'If feelings of hostility existed at all between Ahab and Benhadad, then Ahab could not do otherwise than congratulate himself that in the person of Shalmaneser II. there had arisen against Benhadad an enemy who would be able to keep him effectually in check. That Shalmaneser might prove dangerous to himself probably did not at that time occur to him; but if it had, he would still have chosen the remote in preference to the immediately threatening evil. For it was the political existence of Israel that was at stake in the struggle with Damascus.'⁶ Cp BEN-HADAD, § 2.

It does not follow, however, that we must give Wellhausen's answer to the second question, which is (2) Are the events related in 1 K. 20 22, with the exception of the contest for Ramath Gilead, to be placed before or after the battle of Karkar (854 B.C.)? It is, no doubt, highly plausible to suppose that

¹ For a somewhat different view, see CHRONOLOGY, § 29, n. 1.

² Against Kamph's view, that Ahab is mentioned by a mistake of the Assyrian scribe instead of Joram, cp Schr. *AGF* 370.

³ The form Sar-lai may be illustrated by the vocalisation אֶהָבִי Asarel, 1 Ch. 4:16, which Lag. (*Ubers.* 132) thinks may represent the original pronunciation rather than אֶהָבִי.

⁴ Ki., however, after adopting this view of the course of events in his narrative, turns round, and with some hesitation indicates his preference for the view of Kamph. (*Chronologie der hebr. A.Zn.* 80), held also formerly by We., according to which the Assyrian scribe confounds Ahab with his son Jehoram (*Hist.* 2:273). On the whole question cp Schr. *AGF* 375-377.

⁵ *Hist.* 61. So the conservative critic Köhler (*Bibl. Gesch.* 3:379). On the other side, see McCurdy, *Hist. Proph. Mon.* 1:27 ff.

Ahab took advantage of the blow dealt to the power of Damascus at Karkar to stake off the suzerainty of Benhadad: so far, at least, it seems reasonable to follow Wellhausen. But it is not likely that, considering the threatening attitude of Assyria, Benhadad would have thought it prudent to fritter away his strength on these 'furious attacks' on Israel to which Wellhausen refers; it is not likely, in short, that the siege of Samaria and the battle of Aphek are to be placed after 854 B.C. It may be asked, if they are not placed thus, where are we to find room for them? In 1 K. 20:23-24, Ahab is represented as gaining the mastery over Benhadad, who has to make most humiliating concessions to him. After such a success, how can we account for Ahab's enforced presence at Karkar as vassal of Benhadad? The answer is that tradition selects its facts, and that the facts which it selects it idealises as an artist would idealise them. We may admit that Ahab, in his obstinate and patriotic resistance to Damascus, was not unvisited by gleams of good fortune; but the fact, which tradition itself records, that he was once actually besieged in his capital, cannot have stood alone. Of Ahab's other misfortunes in war tradition is silent; but we can easily imagine that the power which was too strong for Omri was at last able to force his son to send a large contingent to the army which was to meet Shalmaneser at Karkar.

That the siege of Samaria, at any rate, was before 854 B.C. is rendered probable by the criticism given elsewhere (see JEHORAM, 1, § 2) of the narrative in 2 K. 7. In particular, the kings of the Hittites and of *Muwi*, who are referred to in 2 K. 6, are just those with whom Benhadad would have to deal before 854 B.C., while Shalmaneser was still occupied at a distance.

The above solution of the historical problem is that of Winckler, which unites elements of Wellhausen's view and of that of Kittel.

The last-named critic deserves credit for an ingenious explanation (*Gench.* 2:232) of the magnanimity attributed to Ahab in 1 K. 20:31-34. It will be remembered that, according to Kittel, Ahab sent forces to Karkar of his own accord, not as a vassal of Benhadad. This enables him to suggest that the king of Israel may have spared his rival's life in order to enlist him in a coalition against Assyria, the idea of which (according to this hypothesis) was Ahab's. It must be confessed, however, that this view ascribes more foresight to Ahab than, according to AMOS (2:7, § 5), was possessed by the Israelites even at a later day, and it was certainly unknown to the compiler of our traditions, who make no mention of the battle of Karkar.

We may regard it, then, as highly probable that the battle of Karkar was fought at some time in the 'three (?) years without war between Syria and Israel' mentioned in 1 K. 22:1.

The numbers of the force assigned by Shalmaneser in his inscription to Ahab (2000 chariots, 10,000 men),

as compared with those assigned to other kings,² deserve attention. It is possible, no doubt, as Winckler suggests, that contingents from Judah and Moab were reckoned among the warriors of Ahab.³ This does not, however, greatly diminish the significance of the numbers. After all, the men of Judah were southern Israelites. Even if Moabitish warriors were untrustworthy against a foe such as Benhadad, there is no reason to doubt that the men of Judah would sooner see Israel free from Benhadad than swallowed up by its deadly foe. Ahab was

certainly no contemptible antagonist in respect to the number of warriors he could bring into the field. He himself, like David (2 S. 18:3), was 'worth ten thousand,' and the dread with which he inspired the Syrians is strikingly shown in the account of his last campaign. We read that

¹ *I/6* 50; 2nd and 3rd ed. p. 71.

² Bir'idri (Benhadad) has 1200 chariots, 1200 horse-men, 20,000 men (Schrader, *COI* 1:186).

³ That Jehoshaphat's military support of Ahab was not altogether voluntary is surmised by We. and positively asserted by Wi. That it only began at the expedition to Ramath Gilead is too hastily supposed by Ki. (*Gench.* 2:232 [ET, 2:272]).

AHASUERUS

² See further Bevan, *Daniel* 122, where Ahašyār or Ahsayār is proposed as the original Jewish form.

AHAVA

ΔΗΛΑΝΑ (ΔΗΛΑΝ), a place (Δηλανά, **ΔΕΛΩΝ** [B], **ΕΥΕΙ** [A]), or, as in the parallel 1st Ed 840 (ΠΗΛΩΝ, om. B), **ΘΕΡΑ**, accus. [A], **ΕΨΕΑ** [I.] and **ΕΨΕΑ** **ΣΥΝ** **ΘΗΥΕ** [B], **ΛΟΥΕ** [B.A., in v. 31 **ΣΥΝ** **ΡΑΒ.**], **ΔΟΛΟΥΘ** [I.] in 1st Ed. 850 (cf. for the young men, **ΤΩΝ** **ΠΕΝΤΕΚΟΣ** [B.M.], i.e., apparently **חַמִּישִׁים** for **חֲמִישִׁים** **סָגֵל** **סָגֵל** [Thoms., **ΘΕΡΑ** [B.M.] **ΕΨΕΑ** [I.], a river, near which) **πρὸς** assembled his caravan before its departure for Jerusalem. The site and the river remain unidentified. We know that both were in the Euphrates basin, and that Cassimira (*ibn.*, cp. *Jew. Ant.* x. 5 2; see Be-Rys, *Parat.* ad *ib.*) was not very far off. The form **Theray** (see above) seems to have arisen from **חַמִּישִׁים** for **רָב.**, which is the reading of some MSS for **חַמִּישִׁים** in 1st Ed. 858.

AHAZ (𐤁𐤇𐤆, a shortened form of JETHAH-AZ, the Jihazai of the inscriptions: see *A/1* 220). 1. (A)AZ

1. Syro Ephraim-
itish war.

eleventh king of Judah (733-721; cp. CHRONICLES, § 34, and Isaiah, i § 37). He was young, perhaps only twenty years of age (2 K. 16:1), when he ascended the throne, and appears already to have struck keen observers as having Isaiah by a want of manliness which was quite consistent with tyranny (Is. 37:36). The event seems to have been regarded by Rezin (or rather Rezon) of Damascus as favourable to his plan for uniting Syria and Palestine in a league against Assyria. Pekah, who had just become king of Israel by rebellion and assassination, was only too glad to place himself at the disposal of Rezin, who alone could defend him from Tiglath-pileser's wrath at the murder of an Assyrian vassal. Rezin and Pekah, therefore, marched southward, — being safe for the moment from an Assyrian invasion — with the object of forcing Judah to join their league (2 K. 16:5; Is. 8:9; cp. ISAAH, i § 11). They could not but have confidence, however, in any promise which they might extort from Ahaz. For Ahaz, who, unlike Rezin, had no personal motive for closing his eyes to the truth, was conscious of the danger of provoking Assyria. Let us, then, said Rezin and Pekah, place a creature of our own, who can be trusted to serve us, on the throne of Judah (Is. 7:6). Their nominee is called *Ben-Zabab* (see TAYLOR, 1), whom the language ascribed to the allies hardly allows us to identify with Rezin.² He was probably one of Rezin's courtiers, and thus (what a disgrace to Judah!) a mere Syrian governor with the title of king. The attempt to take Jerusalem was a failure. The fortress proved too strong to be taken by storm, and to have prolonged the siege, in view of the provocation given to Assyria and the terrible promptness of Assyrian vengeance, would have been imprudent. Ahaz, too, in his alarm (which was fully shared by the citizens),³ had already made this vengeance doubly certain by sending an embassy to Tiglath-pileser with the message, 'I am thy slave and thy son: come up and deliver me' (2 K. 16:7; this verse should be read immediately after v. 5).⁴

¹ In 2 Ch. 29:1 some MSS of $\mathfrak{B}$ and Pesh. read 'twenty-five' for 'twenty.' This is more natural, in view of the age assigned to Hezekiah at his accession. The 'five' may, however, have crept in from 27:1-29:1. $\mathfrak{B}^{16}$ reads 'twenty.'

² *W. J. F. Finkelstein*, 73:75; cf., however, ISRAELI, *HIST. OF*, 32.

21 See Is. 7:25-8. The latter passage is partly corrupt; but it is clear, at least, that the people of Judah are opposed to distrusting Yahweh's power to save his people, and 'the world' because of 'Rezin and ben-Kendiah'. The 'waters of Shiloah' are a symbol of Yahweh (cf. Is. 38:1; Is. 38:10). So 'Ché, 'Isaïele' (*SABT*). The interpretation of *Is.* 38, which paraphrases *פָּרַח* (AV and RV, ungrammatically, 'rejoice in') by *ῥοδωσάτωσαν ἑξῆτι βασιλεία*, is certainly wrong, though supported by some ancient names (Ges., Ew., Knab, Schaff), but it is opposed to Is. 7:2-8. Even were the supposition that there was a large party in the capital favorable to Rezin and Pekah more plausible than it is, it would still be unwise to base the supposition on a passage so strangely expressed and of such questionable accuracy as Is. 38.

⁴ If the statement of the compiler in 2 K. 163 that Ahaz

AHAZ

One man, Hersh ben Amoz, had kept his head cool amid this excitement. He assured Abaz on the

2. Isaiah's advice.

Samaria themselves would almost immediately become a prey to the Assyrian soldiery (Is. 7:49, 6:8, 1:47) (4a). He bade Ahaz be wary and preserve his competence (עָזְרוּךְ יִשְׁתָּמֵךְ) – to take no rash step, but quietly perform his regal duties, trusting in Yahwe. When the news came that Ahaz had hurriedly offered himself as a humble vassal to Assyria in return for protection from Rezin, Isaiah changed his tone. He declared that Judah itself, having despised the one means of safety (trust in Yahwe and obedience to his commands), could not escape punishment at the hands of the Assyrians. Under a variety of figures he described the havoc which these dreaded warriors would produce in Judah – a description to which a much later writer has added some touches of his own (Is. 21:25; see *SHOT*).

Was Ahaz right or wrong in seeking the protection of Assyria? Stale has remarked that "he acted as any

3. Ahar's policy.

Robertson Smith thought that 'the advice of Isaiah displayed no less political sagacity than elevation of faith.' 'If Abaz had not called in the aid of Tiglath-pileser, his own interests would soon have compelled the Assyrian to strike at Damascus; and so, if the Judean king had had faith to accept the prophet's assurance that the immediate danger could not prove fatal, he would have reaped all the advantages of the Assyrian alliance without hiding himself in the perilous position of a vassal to the robber empire. As yet the schemes of Assyria hardly reached as far as Southern Palestine.'² There is some force in this. The sending of tribute to Assyria was justifiable only as a last resource. To take such a step prematurely would show a disregard of the interests of the poorer class, which would suffer from Assyrian exactions severely. It is doubtful, however, whether the plans of Assyria were as narrowly limited as is supposed. Tiglath-pileser did not, even after receiving the petition of Abaz, attack Damascus instantly. First of all he invaded Philistia and Northern Arabia.

We shall have occasion to refer again to the important chapter of Isaiah which describes the great encounter between the king and the prophet (see *ISAIAH*, II, § 2 *ib.*). Suffice it to say that we misunderstand Isaiah if we connect his threat of captivity in chap. 7/, too closely with the foreign policy of Ahaz. It was not the foreign policy but the moral weakness of Ahaz and his nobles which had in the first instance drawn forth this threat from Isaiah (Is. 7:8-16). Nor can we venture to doubt that, if Ahaz had satisfied the moral standards of Isaiah, this would have had some effect on the prophet's picture of the future. 'Visions' and 'tidings' of men of God such as Isaiah are not merely political forecasts: they are adjusted to the moral and mental state both of him who speaks and of those who hear.

It is not to Isaiah or to a disciple of Isaiah, but to the royal annalist, that we owe the notice that the tribute of Ahaz was derived from

4. Consequences.

the treasury of the palace and of the temple, and that Ahasd had not spare even the sacred furniture (2 K. 16: 17).⁴ It would be interesting to know whether he sent the brazen oven on which the brazen 'seal' had hitherto rested (they were copies of Babylonian sacred objects, and properly symbolised Marduk) to Tiglath-pileser, or whether he melted them off on his son (2K. 18: 16) and Sennam, say 'his sons', with 2 Ch. 28: 19 is correct, we may perhaps assign the fearful act to this period.

$$t = 6.1 / 1.1 = 5.5$$

³ On the text of a killing, which is, however, not a killing, see

⁵ On the text of 2 K. 16-17, which is corrupt, see St. Zdz. 11* 6163.

HAZIAH

down for himself. It is more important, however, to notice that the time, apparently, the tribute for Assyria was paid without any increase in the taxation. Israel, we may suppose, would have approved of this.

For this reason, it is more probable, though not, indeed, to such an extent, that modern speculation about the prophetic books demands that it is in this generation required. Dinnicus has 732. Sennacherib, there was a partial capture of Judah in the next reign. It was after the first of these events that Ahaz first came in contact with an Assyrian king. In 734 the name of Jathah of Judah occurs among the names of the kings who had paid tribute to Tiglath-pileser, but we have no reason to suppose that he paid it in person. It was in 734, after the fall of Dinnicus, that he paid homage in person to his superior. On this occasion he saw the altar that was at Dinnicus (2 K. 16:10), and, on aesthetic grounds, liked it better than the bronze altar which had hitherto been used at Jerusalem for burnt offerings. It probably an Assyrian altar for the Assyrian principle introduced their own cultus into the cities. So Ahaz sent a model of the altar to the priest. Uriah (Isa. 46:1), who at once introduced upon the pattern and transferred the old position. This was doubtless, against the protest of those who in his earliest extant prophecy so strongly deplored the love of foreign fashions. Possibly, however, the similarity of the two phrases the expression, "the steps of the altar" (Isa. 46:1, 46:11). Nor is it likely that the prophet's suggestion of a return to the old cultus was a worship is traceable in 2 K. 23:12; and the difficulty in the passage (see Kamphaus's *Text* 1883, 1884).

The reign of Ahaz was inglorious, but not uneventful. It was a severe blow to the country when Rezin, on the accession of Ahaz, captured Lath on the Arabian Gulf, and carried it to its former possessors, the Edomites; but at the close of Ahaz's reign Isaiah was able to contrast the peace enjoyed by the poor of Yahweh's people with the chastisement inflicted by Assyria on the restless Philistines.³

Other readings of $\mathfrak{B}^A$ are: $\alpha\chi\alpha\varsigma$ [H often, Δ^1 vel forte Δ^2 once, Λ once, Q twice], $\chi\alpha\alpha\varsigma$ [V twice], $\alpha\chi\alpha\beta$ [V, 2 Ch, 18]. In Jcr, 22 (5) $\mathfrak{B}^A$ $\alpha\chi\alpha\varsigma$ 'Abah' takes the place of the true reading 'Abah' of $\mathfrak{B}^A$ (see $\Delta^1\chi\alpha\beta$, 1 [end]).

T. K. C.—W. E. A.

AHAZIAH (אֲחִזְיָהוּ, אֲחִזְיָהוּ, 'the whom Yahwé supports'; אֲחִזְיָהוּ *ʾaḥizyāhu* B.A.L., for other readings see end of no. 2). 1. Son of Ahab and Jezebel, and king of Israel (853-851? B.C., Cp CHRONOLOGY, § 28 and table in § 37). A poor successor to the heroic Ahab. Once more Israel must have been dependent on Damascus, while Moab (see AHAAB, § 2) continued to enjoy its recovered independence. The single political action reported of him is his offer to JEHOASHAPAT (7:26) to join in a trading expedition to Uphir (1 K. 22:47). The close of his life is described in a prophetic legend of very late origin (see ELIJAH, § 3). He fell through the lattice of an upper room in his palace in Samaria, and though he lingered on a sick-bed for some time, did not recover. The story (2 K. 1:2-17) is a painful one, and was used by Jesus to point the contrast between the unchastened zeal of his disciples and the true evangelical spirit (1 K. 9:45-6). The one probably historical element is the consultation by Ahaziah of the oracle of Baal-zebub of Ekron. To most of Ahaziah's contemporaries his

AHIEZER

action would have seemed quite natural¹ (cp. a K. 582 ff.)

2. Son of Jehoram for forty and Abiah's daughter Athaliah, king of Judah (443-424 B.C.). Cp. CHRONICLES, I, 32, § 28 and II, 1 in § 37. He was only twenty-two when he ascended the throne, and only one event in his brief reign has been recorded: the part which he took with Jehoram king of Israel in a campaign against Hazael of Damascus. The kings of Israel and Judah laid siege to Ramoth in Gilead (the place before which Ahab lost his life in battle) which was still held by the Arameans. Jehoram withdrew wounded. Athaliah also went to his home, but afterwards visited his sick father at Jezreel. During this visit JIHU (7.7.1) revolved, and the two kings (equally obnoxious to Jehu) went forth in their chariots to meet him. Athaliah saw his uncle Jehoram pierced by an arrow, and took to flight. As he fled in the direction of BEIRUT, he was overtaken (7.7.2, 2.7.29, 3). Jehu dashed after him with the cry, "Hear ye, O!" At the ascent of Gur by Telmou, on the road to Jerusalem, he too was struck by an arrow. Thereupon he turned his horse south-west, and reached Megiddo, but died on the way, and was buried in the royal sepulchre. The conflicting account in the Samaritan version whatever its source derived, is of

K. 8. 9. 21. $\alpha\chi\sigma\varsigma\alpha\iota$ [P]; $\alpha\chi\sigma\varsigma\alpha\iota$ [A]. [illegible]

AHER אֶהָר, אַפּ [B], אֹפּ [V], om. [L Pesh.];
// , very doubtful Benjaminite name (1 Ch. 7:12+).
See THE SHIM, 2; DAN, § 9; BENJAMIN, § 9 n. a.

He (*On 6a*) explains the name as meaning 'the other one,' and conjectures it to be a euphemism for Han, the express mention of the name of this tribe seeming in more than one instance to have been deliberately avoided. (See however DAN, § 3.) On the other hand *QDAI* reads 'his son' for 'the sons of' (92 for 93), and the name is entirely wanting in *Q* and Pesh., the former (and perhaps originally also the latter) connecting Hashim (هشام, *hūšā*) with what goes before (see *Id.*). See also *ADARAB*.

ΔΗΓΓ (778, § 52, probably abbrev. from **ΔΗΓΑΓΓ**).

1. In genealogy of GAB, 1Ch. 5:1st (Vg. wrongly translates, *fratres quoque*; Pesh. and Sy. om.) & Sy¹ accords with the preceding name Buz (בִּזְיָאָה) [B], אֲחֵי (brothers) [A].

2. In genealogy of ASUK (§ 5, n.), 1Ch. 7: 4th. Sy¹, attaching part of the following name (see ROTHAM), produces Αϰδ(ουα)[A], or Αϰ(ουα)[B]; but Sy¹ has *noy*.

AHI, NAMES WITH. See **ABI, NAMES WITH.**

ΑΗΙΑΗ, frequently in AV* and once (Neh. 10:26 [25]) inconsistently in RV. See **ΑΗΙΑΥ**, *l. 4*.

ΔΙΑΜ (אֲדָמָה, § 65, for which we should probably point אֲדָמָה, 'mother's brother' [cp. אֲחִי, analogous to the Sub. p.n. אֲחִי, 'sister of his mother']; cp. *HN* 64, n. 2), one of David's heroes, 2 S. 23:3; **ΔΙΑΜΑΝ** (בָּא), om. [L], 1 Ch. 11:35; **ΔΙΑΙΜ** (בָּא), *ΔΙΑΜ* [L]. See *DAVID*, § 114.

AHAN (1778, § 65, 'relative, cousin,' cp *ሕና*;
 ሕናዊ [B], ሕና [A], ሕናዊ [L], .AHV), a Mamas to-
 name (cf Ch. 71, 1). See *SHIMDA*.

ABIEZER אֲבִיעֶזֶר. § 44. 'the [divine] brother is help,' cp Abiezer, Eliezer; ΑΒΙΕΖΕΡ [BAFL.]).

1. 16. Ammishaddai, chief of the Danites, temp. Moses [P]
(Nu. 14: 225 ex. [F]: 7667: 10 25)†.

¹ Smend, *AT Kel.-gesch.*, 127.

² So 2 K. 526. In 2 Ch. 22² his age is given as forty-two (2 K. 20); but this is clearly miswritten for twenty-two (so B¹; cp 21 5 20).

AHINOAM

AHIO

αχιοαμ [A. αμ. sup. rts. A¹]. cp 1: 18; 2 Sam. 23 (αχιοαμ [B]). 32 (αχιοαμ [B]); 1 Ch. 31 f.

AHIO (אֲחִיו). §§ 24, 43, possibly, if MT is correct, 'brother of Yahwē' or 'Yahwē is brother.' The analogy of other names ending in *ā* seems against this view; Jastrow, *HB*, 1894, p. 101.

1. In genealogy of Benjamin (§ 9 ii, β), 2 S. 21: 1; 1 Ch. 13: 17 'his brethren,' and We reads אֲחִיו, 'his brother'; see Dr. (in each case, however, שְׁבַת has αἱ ἀδελφοὶ αὐτοῦ, i.e., אֲחִיו, in 2 S.).

2. In genealogy of Benjamin (§ 9 ii, β), one of the sons of Beriah, who put together the inhabitants of Gilead, 1 Ch. 8: 11 (ἀδελφοὶ αὐτοῦ, 'his brother' [B], or ἀδελφοὶ αὐ, 'his brethren' [A], or ἀ. αὐτοῦ, 'their brethren' [L]; Be. and Kau. אֲחִיו; We. אֲחִיו [De Gent. l. 29]; Ki. אֲחִיו).

3. In genealogy of Benjamin (§ 9 ii, β), son of Jehiel, the 'father' of Gilead; 1 Ch. 8: 11 (ἀδελφοὶ αὐτοῦ [B], αὐτοῦ αὐ, [L], or αὐ, [L], or αὐ, [L] (BA om. αὐτοῦ).

AHIRA (אֲחִירָא). אֲחִירָא [BAFL]; אֲחִירָא; *AHIRA*. A Naphtalite family-name reported in P (Nu. 1: 15 29 7283; 19: 27 f.). The old interpretation 'my brother is evil' must be abandoned. Either *ā* is miswritten for *ē* (see the Pahlavene characters), in which case we get the good Heb. name Ahiram,¹ or we have here a half-Egyptian name meaning 'Ra' (or Re' - i.e., the Egyptian sun god) is brother or protector' (so Che. *Isr.* 2: 144). The latter view is quite possible (cp the Egyptian name Ptahiri). The Canaanites, who were strong in the territory of Naphtali, were very receptive of foreign religious influences.² Cp ASHER, HUR, HARNEPHER. The reading of Pesh. (uniformly Ahira) is no doubt either merely a natural variant, or a copyist's substitution of a more normal for a rarer form; cp AHRA. T. K. C.

AHIRAM (אֲחִירָא). § 44. cp Jehoram; אֲחִירָא [AL]. אֲחִירָא [B]. אֲחִירָא [F]; *AHIRAM*. 1. In the genealogy of Benjamin (§ 9 i, i); Nu. 26: 38 (where we have also the gentle *Ahiramite*; אֲחִירָא; אֲחִירָא [F], α. α. α. [B], α. α. α. [A], α. α. α. [F]) - Gen. 46: 21, where 'Ahiham, Shephuphan' ought no doubt to be read for 'Thi and Kesh, Muphan' (שֶׁפְּהֻפָּן for שֶׁפְּהֻפָּן, cp Rosin). In the similar list in 1 Ch. 8 we find in 7: 1 AHIRAM [A] (אֲחִירָא), and in that in 1 Ch. 7: 6 f. in 12: 1 AHIR [A] (אֲחִירָא), cp HIRSHIM, 2; DAN, § 6.

2. Perhaps we should read Ahiham also for AHIRA (cp. c) in Nu. 16, etc.

AHISAMACH (אֲחִישָׁמַח). 'the [divine] brother sustains'; אֲחִישָׁמַח [B]. אֲחִישָׁמַח [AFL]; Jos. (ΑΜΑΧΟC, ΙCΑΧΑΜΟC), a Dantz; Ec. 31: 6 (ΑΙCΑΜΑΧ [B]) 35: 34 38: 23 [F]. See DAN, § 9 n.

AHISHAHAR (אֲחִישָׁהָר). §§ 35, 44. 'the [divine] brother is dawning light' cp Ahmor, Shehariah; אֲחִישָׁהָר [B]. אֲחִישָׁהָר [A]. אֲחִישָׁהָר [F], in genealogy of Benjamin (§ 9 ii, α), 1 Ch. 7: 1 f. See JIRIAFL, I.

AHISHAR (אֲחִישָׁר). § 41. Solomon's comptroller of the palace (1 K. 4: 6 f.). The name, however, is suspicious.

αἰ gives the double rendering, αἰετὶ ὡς ἀεὶ αἰετὶ, and αἰετὶ ὡς ἀεὶ, and perhaps even a third meaning, αἰετὶ ὡς ἀεὶ ὡς ἀεὶ; αἰετὶ should be αἰετὶ, which αἰ has, and may be the true & reading. But A. I. (αἰετὶ αἰετὶ) has yet to be accounted for. For αἰετὶ we should probably read אֲחִישָׁר, Zolnd, who has just been mentioned, is described as not merely a priest but 'the officer (pl. of) over the palace' (so Klc). See Zolnd, l. 1. T. K. C.

AHITHOPHEL (אֲחִיתופֶּל). § 45, meaning uncertain; אֲחִיתופֶּל [BAFL]. Apc. Jos. 1, a Gilonite (see Gilon), a counsellor of David much esteemed for his

1. Apc. Jos. in 3 K. 2: 46 f. [B] answers to Adoniram (cp 1 K. 16) of MT.

2. On names of foreign origin in Israelite names, see under EUDAB, and NAMI, § 12, 1, 84.

AHLAB

unerring insight (2 S. 15: 12 16: 23). His son EITAM (cp. 1) was, like Uriah, a member of David's body-guard (2 S. 23: 34; cp DAVID, § 11 a i), and since Bathsheba, the wife of Uriah, is described as the daughter of Eliam (2 S. 11: 3), it has been conjectured that Ahithophel was her grandfather, and that indignation at David's conduct to Bathsheba led Ahithophel to cast in his lot with Absalom's rebellion. This, however, is a mere possibility, and ambition would be a sufficient motive for Ahithophel's treason to David, just as the slight involved in Absalom's preference of Hushai's counsel to his own was certainly one chief cause of his final withdrawal from Absalom. At last, indeed, he had full possession of the ear of the pretender. It was by his advice that Absalom took public possession of his father's concubines, and so pledged himself to a claim to the throne, from which there was no retreat (2 S. 16: 20 f.). Ahithophel was also eager in his own person to take another bold and decisive step. He wished to pursue David with 12,000 men and cut the old king down in the first confusion and entanglement of his flight towards the Jordan (2 S. 17: 1-4). This plan was defeated by Hushai, whereupon Ahithophel, seeing that all hope was gone, went to Giloh and strangled himself.

In 1 Ch. 11: 36 'Ahithophel the Gilonite' has been corrupted into 'Ahijah the Pelonite'; אֲחִיהָר הַפֶּלֹנִי for אֲחִיתופֶּל הַגִּילוֹנִי; cp Klc. Sam., ad loc. (αἰετὶ) [BAFL]; and see below, end.

W. G. A.

AHITOB (אֲחִיתוֹב). § 45, etc.; 1 Esd. 8: 2 RV, 4 Esd. 1: 1 RV. See below, AHITUB, 2.

AHITUB (אֲחִיתוֹב or אֲחִישָׁב). § 45; cp Ahi tabu A. I. 5, no. 11: 14. אֲחִיתוֹב [BAFL];

1. A member of the family in which the priesthood, first at Shiloh, then at Nob, appears for some generations to have been hereditary. He was grandson of Eli, son of Phinehas, and elder brother of Ithobad (1 S. 14: 3; cp 1: 21). His son, Ahijah, is mentioned as priest in 1 S. 14: 3; another son, Ahimelech, appears as priest in 1 S. 22: 10 12: 20. It is unnecessary with Thénius and Bertheau to identify Ahimelech with Ahijah; but that Ahitub, the father of Ahimelech, is identical with Ahitub, the father of Ahijah, is clear from 1 K. 2: 27, which implies that Ahitub, the son of Ahimelech (1 S. 22: 20), was of the house of Eli. Nothing further is directly told of Ahitub; but, if Wellhausen's suggestion that the destruction of Shiloh (Jer. 7: 6) took place after the battle of Aphek (1 S. 4) be accepted, the transference of the priestly centre from Shiloh to Nob (1 S. 22: 9-11), will have taken place under him.

The description of Ahitub as father of Zadok (2 S. 8: 17 1 Ch. 18: 16, 1 Ch. 6: 15 34: 51) is due to an ancient and early corruption of the text in Samuel, which originally ran 'Ahitub, the son of Ahimelech, the son of Ahitub, and Zadok were priests' (for the argument see We. *1 S.* 17: 6).

2 and 3. Father of a (later) Zadok, mentioned in 1 Ch. 6: 11 f. (15: 17 f.), and in pedigree of Ezra (see EZRA, i. § 1) Ezra 7: 2-1 Esd. 8: 2 2 Esd. 1: 1 (in the last two passages AV Ahithophel, RV Ahithob); and a priest, father of Abiathar and grandfather of Zadok, in the list of inhabitants of Jerusalem (Ezra, ii. § 5, 8, 15 [c] d), 1 Ch. 9: 11. Neh. 11: 11 (אֲחִיתוֹב [B], אֲחִיתוֹב [A]). These references, however, are probably due to intentional or accidental amplification of the original genealogy, and do not refer to any actual person. Kyle, apparently takes another view; see his notes on Ezra 7: 5 and Neh. 11: 11.

4. Ancestor of Judith; Judith's father, AV following אֲחִיתוֹב, *Ahitob*; so also B. Syll. 1 om. B.

G. R. G.

AHLAB (אֲחִלָּב). § 45, 'fat', 'fatty'; אֲחִלָּב [BAFL]. 1. A. A. A. A. A. (Cheremot Gannan points out the place-name Ahilab, N. of Tyre (*Riv. Lib.* 1867, p. 503)). A Canaanite town claimed by Asher (Jud. 1: 1), and referred to probably in Josh. 19: 20, at the end of which verse there appears to have been originally a list of names including (by a correction of the text) Ahilab and Achizib.¹ See HET NATH.

1. Josh. 19: 29 ends thus, אֲחִלָּב וְאֲחִזִּיב, which AV renders 'at the sea from the coast to Achizib,' and RV 'at the sea by the

AI

AIAH

occupied by Benjamites; Ezra 2:28 (אִיאָ [PA]) = Neh. 7:32 (אִיאָ B.S., at A) = 1 Esd. 5:21 (אִיאָ and אִיאָ only; 7:20 L.). In the time of Eusebius (OS 181, 76, Αγγα) it was once more deserted; but its situation was still pointed out. Its name was prophetic of its history. Or had it some other name before its destruction by Joshua?

2. (אִיאָ without article; פִּאִי Q¹; Symm. ἡ ἰσχυρὴ) an Ammonite city, the first in Jer. 19:1 is correct (S¹ omits; K¹ thstein in Kau. HS and Co. in SROF, after Graf, read 'Ar 72). T. K. C.

AIAM, more strictly Ayyah (אִיאָ, 'falcon'). 1. An Edomite tribal name individualised, Gen. 36:24 (AV, AM); אִיאָ AD. S. [1; S precedes], אִיאָ L. (= 1 Ch. 140 (AIO) B., אִיאָ AL. L.). The tribe seems to have broken off from that of Zibon, and to have been less important than that of ANAM (q.v.). To identify this insignificant Aiah with the 'goodly land' in which Semihyt the Egyptian exile found a home, according to the old story (so Maspero, RZ¹ 2:1723; PS¹ 18:16-96) is unsafe. On the Iaa (Maspero, Aia) of the story of Semihyt, see WMM 15, n. Eur. 47.

2. Father of Saul's concubine Rizpah (2 S. 3:7, אִיאָ vel forte אִיאָ B¹, אִיאָ vel forte אִיאָ [L¹], IoA. A¹, Σαῦα L.), Σαῦα Jos. 2:18 ff., Αἰα BA, Αἰαία L.). To draw a critical inference (with Moz, Die Bibel des Jos. 35 f.), from L's Σαῦα in 3:7 seems unwise. We must not assume that Ziba is the original reading rather than Aiah. A and S could very easily be confounded, and from Σαῦα to Σαῦα was but a step. The name of one of Rizpah's sons was Mephibosheth (Meribai), and the son of Jonathan, whose steward was Ziba, was also called Mephibosheth (Meribai). The question as to the source or sources of the passages in which RIZPAH (q.v.) is referred to, remains therefore where it was.

AIATH (אִיאָ), Is. 10:28f. See AI, 1

AIJA (אִיאָ), Neh. 11:31. See AI, 1.

AIJALON, or (Josh. 10:12 19:42; 2 Ch. 28:18f, all AV) less correctly AJALON (אִיאָלֹן from אִיאָ 'hart'; אִיאָלֹן B.A.L.).

1. A town in the Shephelah, assigned to Dan in Josh. 19:42 (אִיאָלֹן B., אִיאָלֹן A), εἰ. L.; but with אִיאָלֹן 2:4; for Elon), and named as a Danite Levitical city in 21:24 P; (אִיאָלֹן A) = 1 Ch. 6:60 '54 (corrected text, see Ball ad loc. in Ellicott's Bible; εἰλαμ B., ηλαμ A.). It is the modern Yidd, situated on a ridge on the south side of the broad level valley of Ajalon, well known from Joshua's poetical speech (Josh. 10:12; אִיאָלֹן L.), and now called *Merj* (the meadow of) *Ibn Umar*. It is about 5 m. from Lower Beth-horon, and 14 from Jerusalem.

In the time of the Judges it was still in the hands of the Amorites (Judg. 1:35; apparently misread at ἀραο B.A.L., and translated a second time μωριων [B], which, however, stands for HERES in L.), but was afterwards occupied by Benjamites, 1 Ch. 8:1 (אִיאָלֹן B.), אִיאָלֹן [A], אִיאָלֹן L.; ep. 2 Ch. 11:15. The Chronicler states that Rehoboam fortified it (2 Ch. 11:15, אִיאָלֹן B.), אִיאָלֹן [A], and that Ahaz lost it to the Philistines (2 Ch. 28:18, אִיאָלֹן B.), on whose territory it bordered. In 1 S. 14:1, the occurrence of the word is doubtful. For 'to Ajalon' Klost and Budde (SROF) read 'until night.' S¹ omits altogether. Some fresh references to Ajalon are derived from Egyptian sources. For instance, Shushak (Sheshonk I.) mentions Ayurun - i.e., Ajalon - among the conquered cities of Judah in his Karnak List, and there is an earlier mention still in the Amarna tablets, where Aahina appears as one of the first cities wrested from the Egyptian governors. A vivid sketch of the battle-scenes of the valley of Ajalon will be found in G.A.S.M. HG 210-13.

2. (Josh. 12:12; Αἰαία B., Νεῖκα AL.), a locality in Zebulun, the burial-place of Eilon (q.v., n. 1 f.).

AIN

Its name ought probably to be pointed אֵינֹן (Ēlōn), and etymologically connected with אֵינֹן or אֵינֹן, 'oak' or 'terebinth' (see TURKISH, § 11, indicating a sacred spot. Cp ALLOS, 2. T. K. C.

AIJELETH-SHAHAR, UPON, RV 'set to Aijelet

hash-Shahar (אֵינֹן הַשָּׁהָר, ἡ πόλις τῆς ἀντιλήψεως τῆς ἐωθενῆς B.S.A.); Aq. ἡ πόλις τῆς ἀλάφου τῆς ὀρθρινῆς, Ps. 22, title. If we consider the tendency of the phrase, 'Upon ALAMOTH (q.v.), to get corrupted, it seems highly probable that 'Aijelet' should rather be read 'Alamoth' (A and S confounded), while Shahar should perhaps rather be שִׁיר הַשָּׁהָר, 'a new song.' (The article prefixed to Shahar may be in the interests of an exegetical theory.) The latter corruption has very probably taken place in Ps. 57:9 (see Che. Ps. 57:9). A 'new song' would be a song upon a new model.

AIN (אֵינֹן). 1. If MT may be followed, this is the name of a city in the Negeb of Judah (Josh. 15:32) assigned to Simeon (197; ep. 1 Ch. 1:1). According to Josh. 21:16 it was one of the priests' cities; but the parallel list in 1 Ch. 6:59, 44, probably correctly substitutes ASHAN (q.v.) which is mentioned in Josh. 19:7 (MT S¹ alongside of Ain as a distinct place. The name being thus removed from this list, Ain always appears in close conjunction with Rimmon, and Mihlah (III' 7:52, 53, 'Ain') suggests that the two places may have lain so close together that in course of time they joined. Hence he would account for the EN-RIMMON (עֵין רִמְמוֹן; cm. B.S.A.; κ. εν ριμμων S¹ a mg. ad.; κ. εν ριμμων L. 1 of Neh. 11:29. But if we consider the phenomenon of S¹ (see below), and the erroneous summation of M¹ be adhered to) in Josh. 15:32, it becomes evident that Bennett's thorough revision of the readings in his Joshua (SROF) is critically justified (cp ASHAN), and that the real name is EN-RIMMON (q.v.).

How, indeed, could a place dedicated to the god Rimmon (Rammān) have been without a sacred fountain?

Josh. 15:32, καὶ ἐρριμὸν [B], καὶ ριμμὸν [A], καὶ αἰν καὶ ριμμὸν [L]; Josh. 19:7, αἰν καὶ ριμμὸν [A], αἰν καὶ ριμμὸν [L], but ἐρριμὸν [B]; Josh. 21:16, αἰν [B] which favours S¹ ASHAN (q.v.), αἰν [A], αἰν [L], which harmonise with MT. In 1 Ch. 1:1 (ε. ριμμὸν [B], κ. ηρ [L]) Ps. sup. 105, [A¹] followed by ριμμὸν [A], κ. ἐρριμὸν [L]) we should also, with K¹, read En-rimmon.

2. (אֵינֹן), the article being included; (עֵין) πηγὰς B.A.L.; Vg. (contra) fontem Daphnim; Tg. Onk. as MT; for the rest see below.) A place mentioned in Nu. 31:11 to define the situation of one of the points on the ideal eastern frontier of Canaan; 'to Harbel on the east side of Ain' is the phrase. Though both AV and RV sanction this view of אֵינֹן, it is more natural to render 'the fountain,' and to find here a reference to some noted spring. Jerome thought of the spring which rose in the famous grove of Daphne, near Antioch; in this he followed the arguments of Ps. Jon. and Jerus. which render '(the) Riblah' (רִבְלָה) by 'Daphne,' and 'the fountain' (אֵינֹן) by 'Amutha.' Robinson² and Conder prefer the fountain which is the source of the Orontes. Both these views rest on the assumption that Riblah on the Orontes has just been referred to, which is a pure mistake (see RIBLAH). The fountain must at any rate be not too far N. of the Lake of Gennesaret which is mentioned at the end of the verse. Most probably it is the source of the Nahr Hasbany, one of the streams which unite to form the Jordan (see RIBLAH). From this fountain to the 'east shoulder' of the Lake of Gennesaret a straight line of water runs forming the clearest of boundaries. If, however, we place Baal-gad at Bannus, we should then, of course, identify 'the fountain'

¹ Except of course in Josh. 21:16 (see above). In Zech. 14:10 the first half of the name is omitted (see EN-RIMMON).

² See RIBLAH. R. C. S. view (cp. Vg. on the Daphne) of Vg. (connecting it with the spring at Daphne, near Tlepchady) seems erroneous.

AIRUS

with that w^{ch} springs from the famous and romantic cavern at the southern base of the Hermon mountains. It should be added that it is not impossible to alter the pointing and read אִירָא (eastward) of Ijon, Ijon being mentioned elsewhere as on the N. frontier of the land of Israel. But then why did the writer introduce it merely incidentally?

T. K. C.

AIRUS (אִירָא [A]), 1 Esd. 5:31 AV = Ezra 2:47 REPHAN, 3.

AJAH (אִיָּה), Gen. 36:24† AV = RV ALAH (A, V, 1).

AJALON (אִיָּלֹן), Josh. 10:12 AV = RV AHALON, 1.

AKAN (אִקָּן), Gen. 36:27† = 1 Ch. 1:43 AV JAKAN.

AKATAN (אִקָּטָן [BA]), 1 Esd. 8:38† RV = Ezra 8:12 HAKKATAN.

AKELDAMA (אִקְעֶלְדָּמָא [B]), Acts 1:19† RV, AV ACELDAMA.

AKKOS (אִקְקֹס [B]), 1 Esd. 5:38† RV = Ezra 2:61 HAKKOS, 1.

AKKUB (אִקְקֹב), 'posthumous,' but the name seems corrupt: אִקְקֹב [BA], אִקְק [1, 2]. b. Eisehai, six generations removed from Zerubbabel: 1 Ch. 3:24 (אִקְקֹב [B], אִקְקֹב [A], אִקְקֹב [1, 2]).

2. The Bne Akkub, a group of doorkeepers in the great post-exilic list (see EZRA, ii. § 9); EZRA 2:42 (אִקְקֹב [BA], אִקְק [1, 2]); Neh. 7:45 (אִקְקֹב [B], אִקְק [1, 2]); 1 Esd. 5:38 (אִקְקֹב [BA], אִקְק [1, 2]); RV DAVEN; אִקְקֹב [A], אִקְקֹבֹת [B]. Akkub is a porter in the list of inhabitants of Jerusalem (see EZRA, ii. § 5 [A], § 15 [C] A); 1 Ch. 9:17 (אִקְקֹב [B]) = Neh. 11:17 (אִקְקֹב [1, 2], cp. 1 Esd. 10:24, 1 Esd. 10:25 (where, however, the name is omitted between Shallum and Teled). He is mentioned also in Neh. 12:25 (אִקְקֹב [BA], cp. [1, 2]; om. B⁹ V).

3. An expounder of the Law (see EZRA, ii. § 13 [C]; cp. i. § 8, ii. § 16 [3], 15 [1, 2]); Neh. 8:7 (אִקְקֹב [1, 2], om. B⁹ V) = 1 Esd. 9:43 (EV, JACOB); אִקְקֹבֹת [A], אִקְקֹבֹת [B].

4. The Bne Akkub, a family of NEPHINIM (q.v.) in the great post-exilic list (see EZRA, ii. § 9; EZRA 2:45 (אִקְקֹב [B]) Neh. 7:45 (אִקְקֹב [A], אִקְק [1, 2]; om. B with MT, EV) = 1 Esd. 5:30 (אִקְקֹב [BA]; AV ACFA; RV AKUB).

AKRABATTINE, RV; AV incorrectly ARABATTINE 1 Macc. 5:3†, Jos. Ant. xii. 8:1; אִקְרַבַּטִּינָה [BA]; אִקְרַבַּטִּינָה [A]; אִקְרַבַּטִּינָה [C]. The district intended is no doubt that to the SE. of Judaea, in Idumaea (see AKRABIM). There is no sufficient ground for the opinion of Ewald that the Edomites had settled as far N. as another Akrabatta, a toparchy or district in Central Palestine, to the N. of Judaea (Akrabatta, אִקְרַבַּטִּינָה, etc. Jos. B⁹ iii. 35 Pl. I⁹ v. 14 iv. 93 g); אִקְרַבַּטִּינָה [A], OS⁹ 21461), apparently represented by the modern 'Akrabeh, 8 m. SE. of Nablus. (The reading ἐν Ἰερουσαλὴμ in 1 Macc. must therefore be rejected.) See Schur, Hist. 1220 n. 2, 3158.

Doubtless, however, we should identify with 'Akrabeh the ΕΚΡΕΒΕΛ (εἰρεβηλ BA), εἰρεβηλ [A]; חֲרִיבִי, near Chusi, on the brook Mochnur (Judith 7:18†), the names being almost the same in the Syr. (= Talm. חֲרִיבִי).

T. K. C.

AKRABBIM, Ascent of, so always in RV; also Nu. 34:4 in AV which has in Judg. 1:36 'going up to Akrabim,' in Josh. 15:3† mg. 'to Akrabim,' text מַלְאֲכֵי-אִקְרַבִּימ (מַלְאֲכֵי עֲקֻרְבִּימ, i.e., 'ascent of Scorpions,' [πρὸς ἀναβάσειν ἀκραβειν [BA]; ascensus scorpionum, mentioned in Josh. 15:3 (ἀκραβειν [sup. ras. A⁹ V]) ΕΚΡΑΒΕΙΝ [1, 2]) as one of the localities marking the southern frontier of Judah.

It must have been one of the passes leading up from the southern continuation of the Ghôr into the wate mountain country to the west. Knobel identifies it

1 Cp. BAKKIK.
2 The reverse supposition is sometimes held, viz. that the material is derived from the place-name. The ultimate origin of the word is unknown.

ALAMMELECH

with the pass of es-Safa, leading up towards Hebron out of the W. el-Fikreh on the road from Petra. Robinson (BAR⁹ 230 f.) describes this pass as being 'as steep as a man can readily climb.' 'The rock is in general porous and rough, but yet in many spots smooth and dangerous for animals. In such places a path has been hewn in the rock in former days; the slant of the rock being sometimes levelled, and sometimes overcome by steps cut in it. The vestiges of this road are more frequent near the top. The appearance is that of a very ancient pass' (BAR⁹ 230). Robinson, however, identifies this Nakh es-Safa with Zophath or Hornath, and not with Akrabim (see also HATTAH, MOUNT). Scorpions are of frequent occurrence throughout this neighbourhood.

AKUD (אִקְוָד [B]), 1 Esd. 5:30 RV = Ezra 2:45 AKKUB, 4.

ALABASTER (ἀλαβάστριν [accus. Ti WH⁹ Mk. 11, also with art. τὴν α, W & H after B⁹], τὸν α, Ti after N⁹ V; τὸ α, 1R after G, etc.; also F in Lk. 7:37; cp. ο ἀλα [B], τὸ ἀλα [A] 2K. 21:13 [for πῶς 'dish,' 'cup']) was found in large quantities in Mesopotamia, and from it are made the huge bulls who have to be seen in the British Museum and in the Louvre. The alabaster of the ancients was a stibnite carbonate of lime, hence called by mineralogists 'Oriental alabaster' to distinguish it from the modern alabaster, which is the sulphate of lime. See EBB⁹, 317, ALABASTER. In Greek the word ἀλάβαστρος or ἀλάβαστρος is frequently used of vases or vessels made to hold unguents, as these were generally fashioned out of this material, which was thought by many (cp. e.g., Pl. I⁹ vii. 3) to preserve the aroma of the ointment: Theophrastus (H. 15:14) is able to speak of 'golden alabasters.' Many alabaster vases have been found in Egypt, and the specialised sense given to πῶς in the Egyptian Greek version of Kings (see above) is natural enough. The town of Alabastron, near the famous quarries of Hat-nub¹ (cp. Erman, Anc. Eg. 470, n. 3), was well known for the manufacture of such articles (in fact it seems to have derived its name from the material)². Many of these go back to nearly 4000 B.C. and often show fine workmanship. Similar articles have been found in Assyria dating from the time of Sargon (8th cent. B.C.).

Such a vessel was the 'alabaster cruse' which was emptied upon Jesus's head by the woman at the house of Simon the Leper at Bethany (Mt. 26:7 = Mk. 14:3 Lk. 7:37†). The expression 'brake' in Mark does not refer, it would seem, to the breaking of a seal or of the neck of the vessel; the object was to prevent profanation of the vessel by subsequent use for any commoner purpose (cp. Comm., ad loc.).

ALAMETH (עֲלֵמֶת), 1 Ch. 7:9 AV, RV ALEMETH.

ALAMMELECH, RV ALAMMELECH (עֲלֵמֶת מֶלֶךְ [Ba], עֲלֵמֶת [Gl], עֲלֵמֶת [v.d. Hooghi]; εἰλεμελεχ [B], εἰλεμελεχ [1, 2]; om. A⁹), a place in Asher on the border of Zebulun (Josh. 19:26†), the name of which is possibly echoed in that of the Hady el-meleh, which drains the plain of the Buttauf (Asochis), and joins the Nahr el-Mukatta' (Kishon). So Di. Buhl. The pointing of the Heb. is peculiar: עֲלֵמֶת is usually explained as if עֲלֵמֶת 'sacred tree of Melech'; but ע can hardly have been assimilated to מ, nor is this the best reading. Possibly the real name was עֲלֵמֶת (עֲלֵמֶת), El Melech; cp. El Paran. The authors of the points may have wished to avoid confusion with the personal name Elmelech. Or the name might be a corruption of elumak (see ALMUG TREES), if Solomon was able to naturalise this tree.

T. K. C.

1 Near Tell el-Anatina (see JSR. 41674 [194]).
2 The reverse supposition is sometimes held, viz. that the material is derived from the place-name. The ultimate origin of the word is unknown.

ALAMOTH

ALAMOTH, UPON (על-עלמות), a technical musical phrase of uncertain meaning; cf. *Music*, § 6.

(a) Ἰς, ἡ τοῦ [1] ὑπὲρ τῶν κρυφίων [KKT] = $\tau\acute{\iota}\nu\epsilon\gamma\epsilon\gamma\epsilon$; sm.
 Λ: Λι. ἐπὶ φανερῶν τῶν $\tau\acute{\iota}\nu\epsilon\gamma\epsilon\gamma\epsilon$; Symm. ὑπὲρ τῶν αἰσίων);

[illegible]

Thus we find it three times forming part of a heading of a psalm, but the *psalmist* should be restored as *psalmist* from its present position to the heading of Ps. 49, on the analogy of Ps. 46. On the two half-translations of AV and RV from a lively type, Alamothe, (set to Alamothe), the former psalmist, that the phrase denotes the particular nature of the accompaniment; the latter, that Alamothe, be the name of a tune. Most moderns explain for *sopra* as 'Almothe' having the correct meaning 'tuneless'. Whether *sopra* two voices would be suitable for Ps. 46, the musician reader may judge. Gratz and Weismann suppose a reference to some *Flamite* instrument. There is, however, a more probable source. See PSMMS, and cp. MITH-ABSEN, MAHMAHI, NABILOTH, and AHLEH-SHABAR.

ALCIMUS (ΑΛΚΙΜΟΣ) occasional forms -IN.
 (1 Macc. viii. 10; ii Macc. viii. 8). Several cursive MSS of I
 and 2 Macc., and in Jos. *Jnt.* xi. 97 with add. καὶ ὀν-
 οκ, if [α]lak e[ph]aic; m. *Jnt.* ix. 103, and one cursive at i Macc. vii simply if α]lak[e]phaic; *Lxx*, 2 P¹. = 1 lak-
 m or lēlak-m, for which he adopted the like-sound-
 ing Greek name by which he is known, cp NABIS, gōn),
 a priest of the race of Aaron (*i*, *Cuth.* ix. 10), admitted
 by the named writer of i Macc.; 'of the seed of
 Aaron' (*2* 7. 10); Zuleika though not of the family
 of Christ is not of the race (*2* 4. 10; xxi. 10).

ἡμεῖς οὐκ ἐσμὲν οἱ ἱερεῖς ἐν τῇ οἰκίᾳ ('we are not the priests in the house') (*εἰς τοὺς οἴκους*) with 'not' of the stick of the high priests [at all] (*οὐκ ἐστὶν τῆς ῥάβδου ἀρχιερέων γενεά*); but this was here followed by Jos., as on other grounds apparently before, and we may conclude that Alcimus was not to be reckoned 'to the chief priest's office' than his enemy, the Hasm. who were of binary priests.

When, therefore, the victorious king of Syria, DEMETRIUS I. (7.25, 2) determined (I Macc. 7.9) to support his claim to the 'high priest's' office (7.5) with force, Alcimus was a representative not only of the Hellenising party but also (7.13) largely of the legitimist party, the Assideans (7.1).

The treaty (C. Min. 112a) of Lysias . . . and the youthful Antiochus V. Luptat at Antioch, with a further aim of the Assyrians and made it possible for the latter to identify themselves with the friends of Judas (C. Min. 112b) had been immediately followed, if we may trust Ant. 137, by the execution of the now "impossible" high priest Menelaus (p. 77.) C. Min. . . our most important source . . . having mentioned Menelaus at all, say . . . that of what took place between his tenure of office and the definite appointment (*κατανομα αὐτοῦ ἐπισημαίνω*, 72) (p. 2 Mac. 14:13 *κατανομα*) of Alimus by Demetrius. According to the same passage in Jos., which states also that a young Onias, son of Onias III., made his way to Egypt on the death of his father (in which, however, see Jos. 20: 18; ISRAEL, p. 90). Alimus became (*γενετο*) high priest (*ἐγένετο*) the death of Menelaus, the office being indeed bestowed (*ἐδόθη*) to him by the king (Antiochus V. according to the present context). According to 2 Mac. 14 a too, Alimus had been some time high priest before his appointment by 14 kings. We know real, nothing certain about the events of this short interval. We first reach firm ground with the intervention of Demetrius.

Demetrius did not mean to resume the hopeless policy of his uncle Epiphanes (or the Assideans would have

¹ γένους μετ' τοῦ Ἀσώτου.

2. *Supra*, 11, pp. 7-8.

ἐκ τοῦ σπέρματος Ἀδὰμ·

Although we cannot of course trust 2 Mac. 11:7, 'mine and stral glory (την προγορευην δοξαν). According to 2 Mac. 11:10, Alcimus's faith was his: - *hugareia* Hellenising (ἐκουσας, 143), contrast 'by compulsion', *kara anagkēn*, 153). Cf. Köster, *Th. 1* 12538 [78].

ALCIMUS

held aloof); but he wanted Alcinous and his friends to help him in crippling the Hasmorean party of political independence.

There would be a special reason for Alcimus being active against the Hasmonaeans if he was shrewd enough to foresee (what we now know) that their ultimate goal must be the high priesthood. (On the other hand the 'calumnies' [v. 27] put into his mouth by the author of 2 Mac. [14-17] that Judas had already been made high priest seems historically impossible; it belongs to the 'fictitious story' of 2 Mac. [v. see next note].)

Bacchides (17.7.1) was the agent selected for the task.¹ At first the presence of Alcimus was a great help; his legitimacy was a source of strength.

This would be a special weight if his predecessor Mendelssohn really be a grandchild, with H. Mace, (3 + 1) as a 'Benjamin' and with Williamsen (*Hib.*, 2, 6, n. 1), and ed. 3, 5, n. 3) and of the Toldike (see, h. a. v., I. m. i. s., *Pter* 1809, n. 77, and cp I. m. i. s., 2, 6). If we could find it's laboured there would be a special point in his biography, more so with Jose b. Jozef, k. r. i. s. t. o. f. Sanderin (Jusm. b. *Rio*, *Kat.*, ch. 67); his father, *Rio*, *Bath.*, 1, 11, 1).

41. The mass of the people seem to have followed the Athenians in accepting Alcimus (t. Macc. 7:13) 'first'; cf. W. *Phoc. u. Sid.* 84, n. 21; but the severity of the measures taken by the representatives of Demetrius,² sixty men (perhaps the 50 that had been till now much implicated with the Hasmonean party)³ being slain in one day (t. Macc. 7:20), in face of solemn pledges of peaceable intentions, entirely changed the situation. Fear and dread fell on all the people (t. Macc. 7:12). After some further sacrifices Blacchus considers 'his task accomplished and returned to Antioch'. Two late seventies, however, had turned the heart of the people again to Judas, who was trying to to maintain his position (t. Macc. 7:24), and Alcimus judged it prudent to withdraw (ibid. 7:25). He had of course no difficulty in bringing further incriminating charges against Judas (*ibid.* 7:26, 27, 28, 29, 30). This time NISANOR (3:1) was entrusted with the task of restoring Alcimus. During the various exciting incidents of the next 2 years, the diplomacy, battles, and death of Nicanor, we hear nothing of Alcimus (t. Macc. 7:36-43).

Of course in the rejection of our Nicanor's law and the recovery of the Maccabean party (the report, perhaps, he was sent, (It is at this point, in fact, that *3 Macc* 10:10) make a man die,⁵ but this belongs not to the story there followed, but to the suggestion to the high-priesthood, on which see *Macc* 11:18 f. § 4 and op. cit. below.)

When Bacthides came a second time (c. 140 B.C.) to carry through what Nicator had been unable to accomplish, Judas failed to find adequate support and fell (140 B.C.), and the Maccabean party were without a leader. Menus was once more installed, and probably accepted by all except the Maccabees, who ere long chose Jonathan as successor to his brother.

How far the Hellenistic tendencies of Menenius carried him we do not know. At his death (c. 170 B.C.) he seems to have been engaged on some changes in the temple enclosure, the nature and even the object of which we do not know with any certainty.

According to this, Jesus has had no mind in intention of pulling down the wall of the temple (ἐκκαθάρσει καὶ οὐκ οὐκ κατασκευάσει τοῦ ναοῦ, *Int.* xii, 10-12, 5). M. G. states (61 p) that it was the wall of the inner court of the temple (τοῦ τῆς ἀνάης τῶν ἁγίων τῆς εὐρυτείας) that he commanded (ἐνετείλατο) to pull down, adds that he pulled down the works (ἔργα) of the priests, and then affirms the popular statement that he began the pulling

1. See 1 Mac. 7:1, on the distorted account in 2 Mac. 7, where 14:1 has to do duty for both 1 Mac. 7:1 and 7:17, cf. Kosterle, *ThT* 12:533-535, and on the displacement of Bacchides to 2 Mac. 8:1, cf. 5:4 f. (cf. the placement of Bacchides in Jos. *BJ* i. 12).

2. How far these transpositions are to be attributed directly to Minius (so apparently 1 Mac. 7:14 ff. 23), and how far they were due to Bacchides (so apparently *Ant.* xii.103; cf. 1 Mac. 7:16) we cannot say.

³ His uncle being, according to *Ber. Kabbah* and *Bahz Bathaz* (Hag.), of the number.

⁴ On the motive of the author of 2 Mac., in representing Nicanor as native to his master (2 Mac. 14: 2-5) and thus born, not alien, to his race.

⁹ And when he was dead the people bestowed the high-priesthood on Judas, who, hearing of the power of the Romans, etc. (*Act. 1. 18-19*).

¹ The text assigns him variously three years (*Ant.* xx, 103) or four years (*ib.* xii, 106) of office.

down. It seems rash to assume that this confused account is in its original form. If the last clause is not an interpolation (and there is cursive MS authority for its omission, see H & P), and even perhaps if it is, should we not perhaps read 'to pull' for 'he pulled' (*καθάραι* for *καταλύναι*)?

The much discussed question what the wall (*τείχος*) referred to was, we have really not the means of determining. Its identification with a low barrier in the Herodian temple beyond which Gentiles must not pass, the *adyk* (2:2) described in *Matt. 24* is at the best precarious (see the remarks of Schürer, *op. cit.* 1:176, n. 5 and the discussions there referred to).

The somewhat sudden death of Alcimus (1 Macc. 9:55 f.; cp. however, *Ant.* xii. 106, *αρχὴν ἡμέρας*) was naturally treated by his enemies as a sign of divine displeasure. The moderation (such as it is) of the writer of 1 Macc. was not at all to the taste of the later rabbis (see the stories in Haimbinger, *KE* 428 f., Derenbourg, *Hist. Pal.* 52, n. 2). That on the whole, however, Alcimus did not interfere much with ritual and practice is plain, or at least probable, from this last act being all that is mentioned against him, and even in this case we do not know his motive (cp. Grimm *ad loc.*, and We 216, *116*² 262). Still, if he has been rather severely judged, even for the evidence supplied by the opposite party, Wellhausen (*loc.*) seems to go to the other extreme.

The historical importance of this, perhaps in himself somewhat insignificant character (who figures all the more strikingly on the scene that we cannot find very clear traces of any immediate predecessor or successor²), lies in the fact that his tenure of office formed a turning-point in the development of Jewish parties.³ The Assideans refused to follow the Hasmoneans. Two generations later, the meaning of this became more apparent (see ASSIDEANS, PHARISEES, ESENESES).

The primary source is 1 Macc. 7:40. Cp. Jos. *Ant.* xii. 97-112, xv. 104, and on the relation of these see MACCABEES, FIRST, i. § 9. On the relative value of 2 Macc. 14 see the elaborate article of K. G. R. 'De polemiek van het tweede boek der Makkabeen', *ibid.* 124:1-552 [78], especially as cited above; on parties, We 196, n. 2nd, § 4 v. 76 ff., Lucius *loc. cit.* on later Jewish sentiment concerning Alcimus, Haimbinger, *KE* 428 f.; on 2:2, etc., *ibid.* 411 § 6, n. 5, and Grätz in *M. W. J.* 1876, pp. 355-397; Grätz, *Gesch.* 3:4564 ff.

ALCOVE (חֲבִיטָה), Nu. 25:17 RV mg., AV TENT (q.v.).

ALEMA (עֵל אֶלְמַוִּיִּת 'A', -אֶל־מִי, [N?], -אֶל־עֵי־מִי, N. 4:10, 10:11 V, Syr. *ܐܠܡܐܝܬܐ*, in *Almas*), a place mentioned along with Bosora, Carnaim, etc. (1 Macc. 5:26).

Ben = Gilead cannot be, as some say, the Beer-sheva of Is. 15:8 as belonging to Moab, and the Ben of Nu. 21:6 (see Bosora). It has been placed by Abenul at Alma, S. of Edrei, and by Schumacher at Keir el-Ma, E. of Lake of Galilee; but it is probably 'Uml, 10 m. SW. of the Lajja, and of Basr el-Hariri, which is probably Bosora. (Cp. Buhl *Topog. des N. Ostjordanlandes* 13; We. *HG* 212 [3rd ed. 257] n.) G. A. S.

ALEMETH or **ALLEMETH** (אֶלְמֶת; so everywhere Bu G), except 1 Ch. 7:8 'in pause' אֶלְמֶת, ALAMETH, רַמְּעֶשֶׁת B, אֶלְמֶת־עַמֶּי A; ordinary edd. have אֶלְמֶת, whence RV ALLEMETH in 1 Ch. 6:60 [45] =

Josh. 21:17, where the form is ALMON, רַמְּעֶשֶׁת, רַמְּמֶלֶת B, אֶלְמֶת־עַמֶּי A, [L]; usually רַמְּמֶלֶת B, אֶלְמֶת־עַמֶּי A, a Levitical town in Benjamin (1 Ch. 6:60, 45, רַמְּמֶלֶת A) the name of which appears in 1 Ch. 8:36 (רַמְּמֶלֶת B, רַמְּמֶלֶת A, אֶלְמֶת L) = 9:42 f. (רַמְּמֶלֶת B, אֶלְמֶת L) as that of a descendant, or 1 m. of BENJAMIN (q. 9, 1, p. 1). See also ZALMON.

¹ The seventeenth of the thirty-five festivals prescribed in *Megillah* (Talmud - Yerushalmi, 3rd Mon. 15:1, 15:2, 15:3, 15:4, 15:5, 15:6, 15:7, 15:8, 15:9, 15:10, 15:11, 15:12, 15:13, 15:14, 15:15, 15:16, 15:17, 15:18, 15:19, 15:20, 15:21, 15:22, 15:23, 15:24, 15:25, 15:26, 15:27, 15:28, 15:29, 15:30, 15:31, 15:32, 15:33, 15:34, 15:35, 15:36, 15:37, 15:38, 15:39, 15:40, 15:41, 15:42, 15:43, 15:300, 15:301, 15:302, 15:303, 15:304, 15:305, 15:306, 15:307, 15:308, 15:309, 15:310, 15:311, 15:312, 15:313, 15:314, 15:315, 15:316, 15:317, 15:318, 15:319, 15:320, 15:321, 15:322, 15:323, 15:324, 15:325, 15:326, 15:327, 15:328, 15:329, 15:330, 15:331, 15:332, 15:333, 15:334, 15:335, 15:336, 15:337, 15:338, 15:339, 15:340, 15:341, 15:342, 15:343, 15:344, 15:345, 15:346, 15:347, 15:348, 15:349, 15:350, 15:351, 15:352, 15:353, 15:354, 15:355, 15:356, 15:357, 15:358, 15:359, 15:360, 15:361, 15:362, 15:363, 15:364, 15:365, 15:366, 15:367, 15:368, 15:369, 15:370, 15:371, 15:372, 15:373, 15:374, 15:375, 15:376, 15:377, 15:378, 15:379, 15:380, 15:381, 15:382, 15:383, 15:384, 15:385, 15:386, 15:387, 15:388, 15:389, 15:390, 15:391, 15:392, 15:393, 15:394, 15:395, 15:396, 15:397, 15:398, 15:399, 15:400, 15:401, 15:402, 15:403, 15:404, 15:405, 15:406, 15:407, 15:408, 15:409, 15:410, 15:411, 15:412, 15:413, 15:414, 15:415, 15:416, 15:417, 15:418, 15:419, 15:420, 15:421, 15:422, 15:423, 15:424, 15:425, 15:426, 15:427, 15:428, 15:429, 15:430, 15:431, 15:432, 15:433, 15:434, 15:435, 15:436, 15:437, 15:438, 15:439, 15:440, 15:441, 15:442, 15:443, 15:444, 15:445, 15:446, 15:447, 15:448, 15:449, 15:450, 15:451, 15:452, 15:453, 15:454, 15:455, 15:456, 15:457, 15:458, 15:459, 15:460, 15:461, 15:462, 15:463, 15:464, 15:465, 15:466, 15:467, 15:468, 15:469, 15:470, 15:471, 15:472, 15:473, 15:474, 15:475, 15:476, 15:477, 15:478, 15:479, 15:480, 15:481, 15:482, 15:483, 15:484, 15:485, 15:486, 15:487, 15:488, 15:489, 15:490, 15:491, 15:492, 15:493, 15:494, 15:495, 15:496, 15:497, 15:498, 15:499, 15:500, 15:501, 15:502, 15:503, 15:504, 15:505, 15:506, 15:507, 15:508, 15:509, 15:510, 15:511, 15:512, 15:513, 15:514, 15:515, 15:516, 15:517, 15:518, 15:519, 15:520, 15:521, 15:522, 15:523, 15:524, 15:525, 15:526, 15:527, 15:528, 15:529, 15:530, 15:531, 15:532, 15:533, 15:534, 15:535, 15:536, 15:537, 15:538, 15:539, 15:540, 15:541, 15:542, 15:543, 15:544, 15:545, 15:546, 15:547, 15:548, 15:549, 15:550, 15:551, 15:552, 15:553, 15:554, 15:555, 15:556, 15:557, 15:558, 15:559, 15:560, 15:561, 15:562, 15:563, 15:564, 15:565, 15:566, 15:567, 15:568, 15:569, 15:570, 15:571, 15:572, 15:573, 15:574, 15:575, 15:576, 15:577, 15:578, 15:579, 15:580, 15:581, 15:582, 15:583, 15:584, 15:585, 15:586, 15:587, 15:588, 15:589, 15:590, 15:591, 15:592, 15:593, 15:594, 15:595, 15:596, 15:597, 15:598, 15:599, 15:600, 15:601, 15:602, 15:603, 15:604, 15:605, 15:606, 15:607, 15:608, 15:609, 15:610, 15:611, 15:612, 15:613, 15:614, 15:615, 15:616, 15:617, 15:618, 15:619, 15:620, 15:621, 15:622, 15:623, 15:624, 15:625, 15:626, 15:627, 15:628, 15:629, 15:630, 15:631, 15:632, 15:633, 15:634, 15:635, 15:636, 15:637, 15:638, 15:639, 15:640, 15:641, 15:642, 15:643, 15:644, 15:645, 15:646, 15:647, 15:648, 15:649, 15:650, 15:651, 15:652, 15:653, 15:654, 15:655, 15:656, 15:657, 15:658, 15:659, 15:660, 15:661, 15:662, 15:663, 15:664, 15:665, 15:666, 15:667, 15:668, 15:669, 15:670, 15:671, 15:672, 15:673, 15:674, 15:675, 15:676, 15:677, 15:678, 15:679, 15:680, 15:681, 15:682, 15:683, 15:684, 15:685, 15:686, 15:687, 15:688, 15:689, 15:690, 15:691, 15:692, 15:693, 15:694, 15:695, 15:696, 15:697, 15:698, 15:699, 15:700, 15:701, 15:702, 15:703, 15:704, 15:705, 15:706, 15:707, 15:708, 15:709, 15:710, 15:711, 15:712, 15:713, 15:714, 15:715, 15:716, 15:717, 15:718, 15:719, 15:720, 15:721, 15:722, 15:723, 15:724, 15:725, 15:726, 15:727, 15:728, 15:729, 15:730, 15:731, 15:732, 15:733, 15:734, 15:735, 15:736, 15:737, 15:738, 15:739, 15:740, 15:741, 15:742, 15:743, 15:744, 15:745, 15:746, 15:747, 15:748, 15:749, 15:750, 15:751, 15:752, 15:753, 15:754, 15:755, 15:756, 15:757, 15:758, 15:759, 15:760, 15:761, 15:762, 15:763, 15:764, 15:765, 15:766, 15:767, 15:768, 15:769, 15:770, 15:771, 15:772, 15:773, 15:774, 15:775, 15:776, 15:777, 15:778, 15:779, 15:780, 15:781, 15:782, 15:783, 15:784, 15:785, 15:786, 15:787, 15:788, 15:789, 15:790, 15:791, 15:792, 15:793, 15:794, 15:795, 15:796, 15:797, 15:798, 15:799, 15:800, 15:801, 15:802, 15:803, 15:804, 15:805, 15:806, 15:807, 15:808, 15:809, 15:810, 15:811, 15:812, 15:813, 15:814, 15:815, 15:816, 15:817, 15:818, 15:819, 15:820, 15:821, 15:822, 15:823, 15:824, 15:825, 15:826, 15:827, 15:828, 15:829, 15:830, 15:831, 15:832, 15:833, 15:834, 15:835, 15:836, 15:837, 15:838, 15:839, 15:840, 15:841, 15:842, 15:843, 15:844, 15:845, 15:846, 15:847, 15:848, 15:849, 15:850, 15:851, 15:852, 15:853, 15:854, 15:855, 15:856, 15:857, 15:858, 15:859, 15:860, 15:861, 15:862, 15:863, 15:864, 15:865, 15:866, 15:867, 15:868, 15:869, 15:870, 15:871, 15:872, 15:873, 15:874, 15:875, 15:876, 15:877, 15:878, 15:879, 15:880, 15:881, 15:882, 15:883, 15:884, 15:885, 15:886, 15:887, 15:888, 15:889, 15:890, 15:891, 15:892, 15:893, 15:894, 15:895, 15:896, 15:897, 15:898, 15:899, 15:900, 15:901, 15:902, 15:903, 15:904, 15:905, 15:906, 15:907, 15:908, 15:909, 15:910, 15:911, 15:912, 15:913, 15:914, 15:915, 15:916, 15:917, 15:918, 15:919, 15:920, 15:921, 15:922, 15:923, 15:924, 15:925, 15:926, 15:927, 15:928, 15:929, 15:930, 15:931, 15:932, 15:933, 15:934, 15:935, 15:936, 15:937, 15:938, 15:939, 15:940, 15:941, 15:942, 15:943, 15:944, 15:945, 15:946, 15:947, 15:948, 15:949, 15:950, 15:951, 15:952, 15:953, 15:954, 15:955, 15:956, 15:957, 15:958, 15:959, 15:960, 15:961, 15:962, 15:963, 15:964, 15:965, 15:966, 15:967, 15:968, 15:969, 15:970, 15:971, 15:972, 15:973, 15:974, 15:975, 15:976, 15:977, 15:978, 15:979, 15:980, 15:981, 15:982, 15:983, 15:984, 15:985, 15:986, 15:987, 15:988, 15:989, 15:990, 15:991, 15:992, 15:993, 15:994, 15:995, 15:996, 15:997, 15:998, 15:999, 16:000, 16:001, 16:002, 16:003, 16:004, 16:005, 16:006, 16:007, 16:008, 16:009, 16:010, 16:011, 16:012, 16:013, 16:014, 16:015, 16:016, 16:017, 16:018, 16:019, 16:020, 16:021, 16:022, 16:023, 16:024, 16:025, 16:026, 16:027, 16:028, 16:029, 16:030, 16:031, 16:032, 16:033, 16:034, 16:035, 16:036, 16:037, 16:038, 16:039, 16:040, 16:041, 16:042, 16:043, 16:044, 16:045, 16:046, 16:047, 16:048, 16:049, 16:050, 16:051, 16:052, 16:053, 16:054, 16:055, 16:056, 16:057, 16:058, 16:059, 16:060, 16:061, 16:062, 16:063, 16:064, 16:065, 16:066, 16:067, 16:068, 16:069, 16:070, 16:071, 16:072, 16:073, 16:074, 16:075, 16:076, 16:077, 16:078, 16:079, 16:080, 16:081, 16:082, 16:083, 16:084, 16:085, 16:086, 16:087, 16:088, 16:089, 16:090, 16:091, 16:092, 16:093, 16:094, 16:095, 16:096, 16:097, 16:098, 16:099, 16:100, 16:101, 16:102, 16:103, 16:104, 16:105, 16:106, 16:107, 16:108, 16:109, 16:110, 16:111, 16:112, 16:113, 16:114, 16:115, 16:116, 16:117, 16:118, 16:119, 16:120, 16:121, 16:122, 16:123, 16:124, 16:125, 16:126, 16:127, 16:128, 16:129, 16:130, 16:131, 16:132, 16:133, 16:134, 16:135, 16:136, 16:137, 16:138, 16:139, 16:140, 16:141, 16:142, 16:143, 16:144, 16:145, 16:146, 16:147, 16:148, 16:149, 16:150, 16:151, 16:152, 16:153, 16:154, 16:155, 16:156, 16:157, 16:158, 16:159, 16:160, 16:161, 16:162, 16:163, 16:164, 16:165, 16:166, 16:167, 16:168, 16:169, 16:170, 16:171, 16:172, 16:173, 16:174, 16:175, 16:176, 16:177, 16:178, 16:179, 16:180, 16:181, 16:182, 16:183, 16:184, 16:185, 16:186, 16:187, 16:188, 16:189, 16:190, 16:191, 16:192, 16:193, 16:194, 16:195, 16:196, 16:197, 16:198, 16:199, 16:200, 16:201, 16:202, 16:203, 16:204, 16:205, 16:206, 16:207, 16:208, 16:209, 16:210, 16:211, 16:212, 16:213, 16:214, 16:215, 16:216, 16:217, 16:218, 16:219, 16:220, 16:221, 16:222, 16:223, 16:224, 16:225, 16:226, 16:227, 16:228, 16:229, 16:230, 16:231, 16:232, 16:233, 16:234, 16:235, 16:236, 16:237, 16:238, 16:239, 16:240, 16:241, 16:242, 16:243, 16:244, 16:245, 16:246, 16:247, 16:248, 16:249, 16:250, 16:251, 16:252, 16:253, 16:254, 16:255, 16:256, 16:257, 16:258, 16:259, 16:260, 16:261, 16:262, 16:263, 16:264, 16:265, 16:266, 16:267, 16:268, 16:269, 16:270, 16:271, 16:272, 16:273, 16:274, 16:275, 16:276, 16:277, 16:278, 16:279, 16:280, 16:281, 16:282, 16:283, 16:284, 16:285, 16:286, 16:287, 16:288, 16:289, 16:290, 16:291, 16:292, 16:293, 16:294, 16:295, 16:296, 16:297, 16:298, 16:299

ALEXANDRIA

where he was killed at Alke after a reign of five years, 150-145 B.C. (1 Macc. 11.13-12). For classical references see *Dict. Class. Biog.*, v.7; Schürer, *GH* 1.178, n. 10; and for the history of the time see ISRAEL, § 70, MACCARTHEES, i. § 5.

3. Son of Simon of Cyrene, mentioned together with his brother, REPHUS (1 Macc. 13.21).

4. A member of the family of the high priest in Acts 46, probably to be identified with the third son of Annas, called Eleazar by Josephus (*Ant.* xiii. 22). See ANNAS.

5. Of Ephesus, a Jew, who was 'brought forth' (*προεβιβασεν* [Text. Rec.] from the multitude, or 'brought down' (*κατέβη* [D], etc.) or (more probably) 'instructed' (*συνεβ.* [BMA], cp RV mg) by the Jews, and unsuccessfully attempted their defence in the theatre, on the occasion of the tumult excited by Demetrius, the silversmith (Acts 19.35). There is no conclusive reason either for or against identifying him with:

6. The coppersmith (6 *χαλκουργ*), who is described (2 Tim. 4.14) as having done Paul 'much evil' (at his trial?).

7. Mentioned with Hymenaeus (2 Tim. 1.19 f.) as having 'made shipwreck concerning the faith' (1 Tim. 1.19 f.), and as having been, in consequence, delivered by the apostle unto Satan. Whether or not he is to be identified with no. 6 above, we cannot tell. In some texts of the Apocryphal *Acts of Paul and Thecla*, he appears with Demas and Hermogenes as a hypocritical companion of Paul; in others it is 'Alexander the Syrian' who is mentioned. See Lipsius, *Apok. Ap. Gesch.* ii. 1462-466.

ALEXANDRIA (ΑΛΕΞΑΝΔΡΕΙΑ [V.V.], 3 Macc. 3.1; gentile ΑΛΕΞΑΝΔΡΕΥΣ [BMA], Acts 18.24). The site of the city was chosen by Alexander the Great during his passage from Memphis down the

1. The city. Canobic (Canopic), or most westerly, branch of the Nile, on his way to the Oracle of Ammon (331 B.C.).

Holm remarks that it was a novelty to call a city after its founder, this particular form of name having previously been made only from names of deities (e.g., Apollonia); it indicates Alexander's desire for divine honours, a claim supported by the priests of Ammon (Holm, *GH Hist.* 3.384 E.D.). The city was laid out by Demetrius under the king's supervision, 12 m. W. of the Nile, and thus its harbours were not clogged by the Nile mud, which is carried east by the current.

It lay on the neck of land, 2 m. broad, interposed between the Mareotis lagoon and the sea. A mile distant, parallel with the coast, lay the island of Pharos, connected with the city by a dam (which served also as an aqueduct to supply the island), seven stades in length (hence called the Heptastadion), pierced with two openings. Two harbours were thus created, both protected by projections from the mainland.

The western harbour was called that of Eumostus, after a king of Sili, son-in-law of Ptolemy I. (but see Mahaffy, *Greek Life* 195, for another suggestion). The eastern harbour was then the more important, although it is not so to-day. Its entrance was marked by the huge lighthouse (built on the island by the Cnidian Sostratus) which gave its name (*pharos*) to all similar structures. Opposite to it ran out the point of Lochias.

Bordering on the great (eastern) harbour was the palace-quarter (Brucheum), the abode of the Macedonians. The western division of the city, occupied previously by the village Rhacotis, continued to be the Egyptian quarter. The Jewish colony was in the east of the city.

Lake Mareotis was connected with the sea by a canal, and as it communicated with the Nile, the periodical flood prevented the accumulation of silt and the formation of morass. To this, and to the constant Etesian winds, Strabo traces the salubrity of the site (p. 793). The lake was the haven for the products of upper Egypt coming directly from Syène, as well as for those of India and the East, brought by way of Arsinoë on the Red Sea and the royal canal to the Nile or through Berenice or Myos Hormos, lower down the coast. Hence the commerce of the lake was more valuable than that of the outer ports, whose exports largely exceeded their imports (*ibid.* p. 793). Alexandria became the great port of transshipment for eastern commodities, while Egypt, under the Ptolemies, also took the place of the Black Sea coast as a grain-producing country. Most of her grain went to Italy (cp. Acts 27.6-28.11; Jos. *BJ* vii. 2; Suet. *Tib.* 50). Near Ostia was a sanctuary modelled on the Alexandrian temple of Sarapis, with a

ALEXANDRIA

mariners' guild (*CIL* 1447). Even under the Lagids Alexandria contained a large colony of Italians engaged in the trade with the West (cp. *Epiph. Epigr.* 1600-602). For the importance of the trade to Rome see Momms. *Prov. of Rom. Emp.* 2.252 I.F.

Alexandria was not organised as a πόλις—i.e., it possessed neither deliberative assembly nor senate (πόλις),—but from the first was merely a 'royal residence of the satrap king, never a foundation of Graeco-Macedonians

2. Its constitution. with city privileges in a foreign land' (Mahaffy, *Emp. of Ptol.* 76). The Burgess body was Greek (primarily Macedonian),—standing alongside of the native Egyptian and the foreign elements not reckoned Hellenic, in somewhat the same way as the English in India alongside of the natives (Momms. *Prov. of Rom. Emp.* 2.262 ET). Chief among the non-Hellenes were the Jews, occupying two out of the five wards, apparently here not on the Ghetto system, but on the basis of original settlement; they were naturally attracted by the commercial advantages of the city, and were also deliberately settled there by the founder (Jos. *c. Ap.* 24. *BJ* ii. 187). Josephus asserts that the Alexandrian Jews had equal rights with the Macedonians and other Greeks. This, though technically an exaggeration, was probably practically true, seeing that such rights can only have been privileges enjoyed by the Greeks over the natives; but it is doubtful whether the Jews were free from the poll-tax. Of all the non-Hellenes, the Jews alone were allowed to form a community within that of the city, with a certain amount of self-government. 'The Jews,' says Strabo (quoted by Jos. *Ant.* xiv. 72), 'have in Alexandria a national head of their own (ἐθνάρχης), who presides over the people and decides processes and disposes of contracts as if he ruled an independent community' (ὡς ἂν πολιτείας ἄρχων αὐτοτελεῖς). Josephus traces their legal position to Alexander, but it was apparently Ptolemy I. who settled them in Egypt in large numbers (Jos. *Ant.* xii. 1; App. *Syr.* 50). The general result was that 'in acknowledged independence, in repute, culture, and wealth, the body of Alexandrian Jews was, even before the destruction of Jerusalem, the first in the world' (Momms. *op. cit.* 2.267 ET). Cp. DISPERSTON, §§ 7, 15 ff.

Of the development of the city, and especially of the foundation of the institutions which gave it its place in the history of literature and science, little is known. The famous Museum was

3. Letters. probably founded by Ptolemy I., aided by the advice of Demetrius of Phalerum, who migrated to Egypt on his expulsion from Athens (307 B.C.).

The name (*Μουσείο*) points to an Attic origin. No detailed description can here be given. Besides the materials are very scanty. It was a royal foundation, with a common hall, porticoes, and gardens, for the exclusive use of literary and scientific workers dependent on royal bounty, under the presidency of a priest who was the king's nominee; it was the 'first example of a permanent institution for the cultivation of pure science founded by a government' (Holm, *op. cit.* 4.317 ET). It was not a teaching establishment or training-place for youth, but a home of research adequately endowed. Attached to it was the Library, with more than 500,000 volumes (Jos. *Ant.* vii. 21).

The Museum and the Library combined were essentially a centre of learning, not of creative power. In their artificial atmosphere exact science and literary criticism flourished with brilliant results; but literature decayed—perhaps the uninspiring environment of the city had no slight effect upon its art and poetry (Mahaffy, *Greek Life* 195).

The Museum served as a model for subsequent foundations—e.g., that of the emperor Claudius—both Jews and Christians at a later time had similar centres of learning in the city. The fate of the library is uncertain; it is doubtful whether it was accidentally burnt along with the arsenal in 480 C. (C. *IL* 3111). The words of Dio, 43.48 ὥστε ἅλλα τε καὶ τὰ νεώτερα, τὰς τε ἀποθήκας καὶ τοῦ σιτοῦ καὶ τῶν βιβλίων—παλαιστῶν ἐν καὶ ἀμειψῶν, ὡς ἔασι, γυμνασίου, καθάρσιον, πρὸς τὸν ἅλιν ἐκ τῶν σπέρων τοῦ βιβλίου (Mahaffy, *Emp. of Ptol.* 4.40).

Ptolemy II. established a supplementary library in the Satrapion, in the quarter Rhacotis. In science,

ALEXANDRIA

especially, Alexandria maintained a sort of primacy throughout the imperial period, and residence in the Museum was the hall-mark of learning (cp. Acts 18²⁴, and a $\phi\lambda\omega\sigma\phi\omega\varsigma$ ἀπὸ Μουσείου, in H. Heckerhassius, *Bull. de Corr. Hell.* 14.5). Alexandrian physicians, in particular, were regarded as the best in the empire; cp. $\epsilon\upsilon$ Ἐφεσὺ ἀπὸ τοῦ Μουσείου ἰατροὶ (Wood, *Ephesus*, Appendix, Inscriptions from Funerals, etc., 7, 1. 6).

In Roman times Alexandria was the second city in the empire, and the first commercial city in the world

4. Character. (Strabo, p. 798; *μεγίστην ἐμπειρίαν τῆς οἰκονομίας*). At the end of the Ptolemaic period she numbered upwards of 300,000 free inhabitants, and in imperial times still more (Diod. 17.52). Mommsen (*op. cit.* 2.202 ET) develops the comparison between her and Antioch—both 'monarchical creations out of nothing' (Lauts. viii. 33).

The latter excelled in beauty of site and in the magnificence of her imperial buildings; the former in her suitability for world-trade. In the character of their population and their attitude towards their respective national religions, the similarity between the two cities is close. The Alexandrian mob, like that of Antioch, was capricious and turbulent; the smallest spark kindled a conflagration to be quenched only with blood (Thod. I 24, Dio 39 47).

Polibius (3114) says that a personal visit to the city filled him with disgust at the demoralisation produced by the constant presence of massed mercenaries necessary for keeping under control the morgeled Greeks, the degenerate descendants of the Greeks; compared with the *paucis* the native Egyptian element (B² 3110). A vivid illustration is found in the bloody scenes which heralded the accession of Ptolemy V. (Pol. 1.59-33). A point of similarity with the Antiochians was the fondness of the Alexandrians for giving nicknames (c.p. Plutarch, *Antiochus*, 21.12: καὶ μὲν οὖν τοὺς ἀνδρᾶς ἐκ τῆς ἐκκλητικῆς τοῖς Ἀλεξανδρίαις ἐκράτειν. Id. 1.91; Sen. *ad Helv.* 190: 'Lopax et in contumeliam praetorum incognosca provincia . . . etiam periculosae placuit'). The Ptolemies had even a nickname, and even Vespasian (for his tax on salt fish, was called the 'sardine-dealer' (Sen. *epist.* 122: *salisarius*). As regards the status of the highly composed population, the Roman emperors mostly retained the old state of things. The Alexandrians continued to stand quite apart from the rest of the country in character and in privileges (c.p. Philo, *in Isai.* 1.1: *ὅτι* 4457) so much so that the Alexandrian franchise was a necessary preliminary to the acquisition of Roman citizenship (Play. *epist.* 1.1222: *Admittis sum a peritibus decessis ne ante e Alexandrian civitatem impetare, deinde Romanam* (Latin esset 1221us = *Is. c.* 46.24). The Egyptians of the Nomes were unable to gain Roman citizenship, like other provincials, by enlistment in the legions.

The greatness of Alexandria has led some to speak of its founder as though he were endowed with more

5. Its success. Alexandria was more than human foreknowledge, and had foreseen the future of the city as a centre of Hellenism and queen of the Levant. Others regard the city as merely a Greek emporium, a second and more successful Naxos, owing to accident its rise to the position of a cosmopolitan capital. Nevertheless, it was the only city in the world which

Nevertheless, it must have been evident to Alexander that, after the destruction of Tyre, the great trading area of the Levant was for the moment without focus (Hogarth, *Tycho and Alex.*, 12), and the site actually selected was the only one possible on the Egyptian coast (though Mahaffy, *Emp. of Ptol.*, 12, calls this in question). Egypt, further, offered peculiar facilities for that amalgamation of Greeks and Macedonians which he desired, and, owing to its support of his secret belief in his divinity, it had a special place in his affections. The success of Nearchus undoubtedly exerted an influence in the way of directing attention to the W. of the Delta; and it is not without reason that Cleomenes, a native of Naucratis, created financial governor of Egypt, is called one of the architects of Alexandria (Justin 134). Nor should we fail to take account of the fact that the island of Pharos was the traditional landing-place of Odysseus (Hom., *Od.*, 1-55). This influence is distinctly asserted in the story of the dream which directed the king to the site opposite Pharos (Plut., *Alex.*, 26).

In fine, considering Alexander's economic designs and achievements in the far East, and the success of his eastern colonies, we cannot venture to deny that he consciously created a centre for a new mixed race, with a definite dream of the possibilities afterwards realised.

The modern town stands mainly on the site of the old one.

6. Sites not recoverable. All the great monuments of the Ptolemaic age seem to have stood within the present inhabited

ALMOND

אלגדאין [A] v. 47; apparently the same as BETH-DIBLAITHAIM (7.v.).

ALMOND, ALMOND TREE, ALMOND BLOSSOM

(קֶרֶן, קָרֶן [ADL] Gen. 41:1, Num. 17:8-21) קָרֶן [B]; אֲמִיגְדָלוֹן בְּשֵׁל, Eccles. 12:5; as an adjective קָרִינִיחַ [BQ and practically S.A.], Jer. 1:11; קֶרֶן = 'made like almond blossoms,' עֲקֵטֵי-פְּרִי־מִנִּי קָרִינִיחַ: BATH, Ex. 25:31 f.; קָרֶן-וֶטָא BATH 37:10 f.). The Hebrew root means to 'wake' or 'watch'; and the tree is said to be so named because it is the first to awake from the sleep of winter.¹ The etymology is alluded to in Jer. 1:11 f.

The almond is referred to in the story of Jacob, who (Gen. 43:11, f.) instructs his sons to take with them into Egypt a present of the fruits of Palestine including almonds. The verisimilitude of this detail cannot be questioned. It was natural for a Hebrew to presume that Palestinian almonds would be prized in Egypt, nor need we trouble ourselves as to the exact date of the acclimatisation of the almond tree on the banks of the Nile.²

The original native country of the almond (*Prunus Amygdalus*, Stokes) was W. Asia, from which it has gradually spread, in the main probably by human intervention, throughout the Mediterranean region. Almonds are still an important article of commerce in the Persian Gulf, nor is there anything improbable in their being exported from Syria into Egypt in early or even in more recent times. No ancient writer, according to Celsius (*Herod.* 1:293), mentions them as grown in Egypt.

The 'cups made like almond blossoms' on the branches of the golden candlestick, consisting each of 'a knop' or knob 'and a flower' (Ex. 25:31 f., 37:10 f.) represented, says Dillm. (*ad loc.*), 'not the corolla but the calyx of the almond flower.' Some have proposed to translate עֲקֵטֵי 'awakened' i.e., fully opened (as opposed to closed buds); but this is certainly untenable. In Jer. 1:11 an almond staff seen by the prophet becomes, from the associations of its name, a symbol of Yahweh's watchfulness. The most interesting reference is in the difficult passage Eccles. 12:5. There are three clauses in the verse, and in each unfortunately there is some obscurity. It is the first, rendered by AV, 'The almond tree shall flourish,' [RV 'blossom'], which now concerns us. As regards this, it has been doubted, (1) whether קֶרֶן by itself can mean the almond tree; (2) whether the pinkish-white blossoms are a likely metaphor (according to the ordinary view) for an old man's white hairs; and (3) what is the meaning of the verb (קָרַן). The consonants of the Heb. text support the meaning 'he will reject the almond,' i.e., will be unable to eat it, though a delicacy; but the vowel-points and all the ancient versions have the same rendering as EV. This seems on the whole more probable. Though Jer. 1:11 is not sufficient to prove that קֶרֶן can mean the tree, the equivalent form in Syriac, *ḡadlā*, appears to have this sense. The metaphor is possible if we remember that the flowers come out as a pale flash on the dark leafless branches; if the metaphor is to be pressed closer, the flowers are, as Koch describes them, 'white or of a pale red.'³

(2) See HAZEL.

ALMS. The English word is derived through the

1. **Terms.** A.S. form 'almesse' from the eccl. Lat. *elemosyna*, which again is borrowed from

¹ Syriac has the same word in the form *ḡadlā*; the Arabic for almond is *luz*. Hebrew *luz* (see HAZEL).

² Lag. *Cyrenaica* 45. Cp. Plin. 16:25 (quoted by Celsius): 'Ex illis quæ hieme aquila exorientem concipit, floret et maximum amygdala mense Januario; Martio vero pomum maturat.'

³ Cp. Maspero, *Paragon of Cities* 27.

⁴ Prof. Ch. Yenc. informs us that the wild almond, now rare, was noticed in a gash of Hermon by Robertson Smith, who found its blossoms distinctly white. Tristram speaks of many almond trees on Mt. Carmel (*NHB* 332).

ALMS

the Greek *ἐλεημοσύνη*. The Greek word, which is exceedingly rare in classical authors, means *pity*, and in the Greek of the NT (Lk. 11:41 12:11 Acts 3:2 f., 10:10 f., 10:43) signifies also a special result of pity—viz., relief given in money or kind to the poor. In biblical Hebrew there is no corresponding word, and it is not even quite certain that the technical and restricted use of the word *ἐλεημοσύνη* occurs in O. No doubt in such passages as Eccles. 7:10 and Tob. 4:7 12:11, the author or translator has almsgiving chiefly or even exclusively in view. Still *ποιεῖν ἐλεημοσύνην* does not in itself mean more than *ἔσθω ἡμεῖς*, 'to do that which is merciful or kindly.' On the other hand, the NT use of 'to give *ἐλεημοσύνας*' etc., is quite decisive for the specialised sense of the word.

The close connection between religion and deeds of mercy frequently appears in ancient religion. The

2. **OT estimate.** Bedouin Arabs, maintaining thereon a perennial usage, regard the wayfarer as 'the guest of Allah,' to whom hospitality is due (Douglas, *Ar. Des.* 1:226). The sacrificial meal often included an act of charity to the poor. Thus the poor were allowed to take handfuls from the meal-offering made to the Arab god, al-'Okaisir (WKS *Rel. Sem.* 12:22), and the same use of sacrifice was familiar to the Greeks (see, e.g., Xen. *Anab.* v.39). Indeed the general law of sacrificial feasts was open-handed hospitality in which the poor shared. The OT, however, carries this beneficent tendency farther than any other ancient religion. It made systematic provision for the poor, and institutions of this kind can be traced throughout the religious history of Israel, from the eighth century onwards. Indeed it is significant that in the OT scarcely a trace of beggars and begging in the strict sense is to be found (see, however, 1 S. 2:6 Ps. 109:10). In the 'Book of the Covenant' (see EXODUS, ii. § 3), Ex. 23:10 f., the Hebrew landowner is directed to leave his land fallow each seventh year 'that the poor of thy people may eat.' The merciful spirit of the Deuteronomist is conspicuous in the stress he lays on the care for the poor. Every third year the owner was to bring forth a tenth from his granaries and bestow it exclusively on the poor, including the Levites (Dt. 11:28 f.). According to a custom still preserved in Palestine, every Israelite was free to pick and eat grapes from his neighbour's vineyard, or to pluck ears from the cornfield, as he passed along (Dt. 23:24 f., 23 f.). Out of consideration for the poor, the owner must not, in a grasping spirit, glean to the uttermost his cornfield, vineyard, or oliveyard (Dt. 24:19-22). The earliest part of the Priestly Code, viz., the 'Law of Holiness' (see LEVITICS), reflects the same precept (Lev. 19:9, 23:22); besides this, in Deuteronomy and generally in the later writers of the OT, private and voluntary almsgiving is especially commended. On the whole it may be said that the prophets plead the rights of the poor as their advocates, while in Deuteronomy and in post-exilic literature, the needy Israelite is commended to the charity of his brethren. See, among passages too numerous to quote, Is. 58:7 (a very late passage) Prov. 14:21 19:17 Ps. 112:9 Job 29:12 f. One reference to almsgiving—viz., Dan. 1:27[24]—deserves special notice. Probably the force of the Aramaic words is 'redeem' or 'make good thine iniquities . . . by showing mercy to the poor,' and if this interpretation of *ḡadlā* be correct, we have here a clear implication of the later Jewish doctrine that alms had a redemptive or atoning power.

In the OT Apocrypha and in Rabbinical literature almsgiving assumes a new and excessive prominence. So much was this the case that *ḡadlā*, which in the older writings means 'righteousness' in general, came to be used for almsgiving in particular, and this use of the word has been naturalised in the Arab. *ḡadlā* 'alms for God' (*Kor. Sur.* 9:104, etc.;

In the OT Apocrypha and in Rabbinical literature almsgiving assumes a new and excessive prominence.

ALOES

The following citations furnish examples of the propitiatory virtue ascribed to alms in later Judaism: 'Shut up mercy (*ḥesed*) to me, O alms, to thy treasures, and it shall deliver thee from all afflictions' (Ecclus. 29:14); 'Mercy (or 'alms') 'delivereth from death' (Ecclus. 29:15); 'Through alms a man partakes of eternal life' (*Ḥagigah* 12b, 37a); 'The who says, I give this piece of money as alms, that I do not buy some, may indeed eternal life, is a perfectly righteous man' (*Pesahim* 114a); 'Ref. from Weiser, *Altjudenth.* 1860, 276 ff.); 'Almsdeeds are more meritorious than all sacrifices' (*Sam.* 47 f.); 'Assim-offering makes atonement for Israel, so alms for the Gentiles' (*Ḥagigah* 12b, 37a); 'Ref. from Levy, *NH* 18, v. 3285).

Alms were systematically collected in the synagogue of the Diaspora for poor Jews in Palestine (this custom is mentioned by Jerome as existing in his time), and also every week for the poor of the synagogue itself. Officers were appointed to make the collection, and boxes for the reception of alms also were placed in the synagogues (Vitring, *Syn. Vet.* n. 11). In Mk. 124*f.*, however, the reference is not to alms-chests but to one of thirteen trumpet-shaped boxes, placed in the court of the women to receive contributions towards the expenses of the temple worship (Schür., *G/T* 2.283).

Jesus, then, did not need to awaken zeal for almsgiving among his countrymen: it was there already.

4. NT. and there was apparently more occasion for it, since in the NT we meet with persons who were, in consequence of bodily infirmity, beggars by profession (Mt. 10.46 Lk. 18.35 In 9 f., and note the technical term *πρωταίτης*). He purified it from the ostentation which often corrupted it (Mt. 6.2-4); he accentuated the feeling of compassion, without which it is worthless (Lk. 10.33); above all, he taught that the dispensation which gives alms by mechanical rule and bargains with God for compensation here or hereafter should yield to that impulse of the new heart which sees the supreme reward in likeness to a heavenly Father (Mt. 5.45). We cannot wonder then that, in the infant church at Jerusalem, without compulsion or rigid communistic system (see Acts 5.4), there was an ideal charity which made 'all things common' (Acts 1.32), and prompted rich men like Barnabas to sell their property for the sake of the needy (Acts 1.36 f.). No doubt the expectation that Christ's second coming was at hand stimulated this uncalculating generosity; but low esteem of worldly goods and love of the brethren were the mainsprings of this new development. It is also significant that the first election of Christian officers was made to secure a due distribution of alms. The Gentile churches, moreover, were bound to the mother church at Jerusalem by the offerings which they made for the poor in that city (Rom. 15.26 f. 1 Cor. 16.1-3 2 Cor. 9.1 f. Acts 21.17). Of course almsgiving found other channels. The author of the epistle to the Hebrews assumes that it is a necessary feature of the Christian life, and speaks of it as a sacrifice of thanksgiving which continues after the Jewish altar has been done away with. From very early days each church had its lists of poor (1 Tim. 5.9) and its common fund (Ignat. *Ad Polyc.* 4); and whereas in heathen clubs 'charity was an accident, in Christian associations it was of the essence' (Hatch, *Origins of early Christ. Church* 30). Cp COMMUNITY OF GOODS, especially § 5. W. L. A.

[BA]. ἀπ. [L]. 1 K 10¹¹ f. f. אֶזְרוֹמִים P¹ CYR¹ [BA]. 2 Ch 28 [9] 9 f. f. (π. ἀπελεκητά. L. γ. ω; ἀπελ., L. γ. ω) yielded a precious wool, which was brought to Sodomén, along with gold and gems, from OPHIR (q. r.; cp. Σε. μόν) by the ships of Itham, and was used to make "pillars" (מַסְכֹּת, ἐπιστήθια [BA]. RV mg. "a railing," 1 K. 10¹² = 2 Ch. 9¹¹ מַסְכֹּת, ἀναστάεις [BA]. RV

¹ The two forms, though differently rendered by 𐍆 and other variants, are obviously variants of the same word. The etymology is unknown.

'terraces') for the temple and the palace, as well as 'harps and psalteries.' In 2Ch 28⁷, these trees appear along with cedars and brs among the products of Lebanon, with which Solomon asks Hiram to furnish him; but there is no mention of them in the parallel passage in Kings.¹

The very various opinions that have been held as to the identity of the tree are enumerated by Celsius (*Herod.* I, 74 r).

There may be mentioned: (1) The Jewish traditional rendering is 'coral'; but this is obviously unsuitable, unless we may understand by 'coral-wood' simply a red wood. (2) Kuntli takes it to be 'Brazil-wood', the *bakum* of the Arabs, a red dyewood found in India. (3) Most moderns, following Celsius (see his reasons, *op. cit.* 1779 p. 8), believe it to be 'santalwood', probably of the redder sort (*Pterocarpus Santalinus*, Lam.), which is still used in India for purposes similar to those recorded below. The ancient varieties yield no high; but see

The evidence appears to point to some valuable local wood brought (like lign albes and cassia) into the Eastern Mediterranean by the ancient commerce of the Red Sea. If we may assume it to be a real wood adapted for dyeing, it may well be either (1) brazil-wood (a name of uncertain origin; the French *bruisse*, a glowing coal, has been suggested; it was transferred to the S. American country) = *Casipinna Sappan*, Linn., a tree of India and the Malay Isles, apparently the *hakkam* of the Arabs; or it may be (2) red sandal-wood, *Pterocarpus Santalinus*, Linn., an odorous dye-wood, still surviving as a colouring matter in pharmacy,³ a native of Southern India, where it is much valued for temple pillars. Possibly both species may be included under the expression, *lignum aloë*.

[6 in 2 Ch. 28 9¹⁰ f. gives *Ḥāḏā ḥāḏāra*, which agrees with the Chroniker's statement that the alghum-wood came from Lebanon. Cheyne, therefore, proposes to identify 'alghum' (the form attested by the earlier record, that in Kings) with *Ḥammuku*, the name of one of the trees used by Sennacherib in building his palaces. The tree seems from its name to have been of *Hamite* origin; but so useful a tree may have been planted in Hermon and Lebanon. For *ḥmd* in 1 K. 10 ii, it is possible to read *ḥmḥ*. Less probably we may suppose with Hommel that this hard and rare wood was 'a product of the trade of Ophir.' See *Isis*, T. 9470 f. 528 ('98), and cp *ALAMUḤLECU*.] N. M.—W. T. T.-D.

ALNATHAN (ΕΛΝΑΘΑΝ [Λ]), 1 Esd. 8.44, RV
ELNATHAN, 2.

ALOES and (once) **Lign Aloes** (לִּיגְנֵי אֱלֹהִים; Num. 216
 עֲקֻנָּהי בַּאֲלֵי; Ex. lign aloes'; Ps. 77, 78 טֹחַן אֱלֹהִים
 1. **Substance.** מוֹי בַּאֲלֵי; or לִיגְנֵי Ps. 45² [9].
 עֲקֻנָּהי אֶל אֱלֹהִים; Cant. 1:4 אֱלֹהִים
 [BA], אֱלֹהִים [N] אֶל אֱלֹהִים. Syn. ΘΥΜΙΑΜΑ, Jn.
 19:40 אֱלֹהִים [BA]³, the modern *aglio-wood*, a precious
 wood exported from SE. Asia, which yields a fragrant
 odour when burnt. It is entirely distinct from (1) the
 common bitter 'aloe' used in medicine, to which alone
 the name was given by classical writers,⁴ (2) the plant

¹ The *Chronicle* has probably mistaken an imported article of iron handaxe for a native product of Phoenicia.

² Jerome renders *thyia* - i.e., 'citron wood' (*Callitris quadrivalvis*, Vent.) - an Algerian tree inordinately valued by the Romans for tables, and likely to have been known in biblical times or to biblical people.

⁴ *I.e.*, *λίγνιον αλόν*, a hybrid phrase; *vide* Skeat, *Etym. Dict.*

⁷⁰ The critical student will not fail to observe that three of the four OT passages in which **מִסְכָּח** or **מִסְחָח** occurs belong to books or parts of books which eminent critics have regarded as post-exilic, and may be reminded here that the occurrence of rare plant names is one of the phenomena which have to be considered in fixing the period of such documents. He will also notice that the reading of the fourth passage has on good grounds been amended. See the close of this article. — E.D.]

⁶ This latter is described, among ancient writers, by Pliny (H V 274) and Dioscorides (322), and its bitterness alluded to by Juvenal (6181; 'plus aloeis quam mellis huius').

ALOES

commonly known as the American aloe (*Agave americana*), celebrated for the long period which elapses before its flowering. The biblical wood must probably correspond to that described by Dioscorides (112) under the name ἀγλαύχου¹ (cp Ges. *Thes.* 2888): 'a wood imported from India and Arabia, resembling thymic wood (Rev. 1812), compact, aromatic, in taste astringent and rather bitter, with a skin-like and somewhat variegated bark'. He speaks of its medicinal use—sweetening the breath and improving the internal condition of the body—and adds that it is burned instead of frankincense (cp Ar. *Kutur* and see INCI NSI).

The Hebrew name עֵשֶׂה or עֵשֶׂה and the Greek ἀγλαύχου² are almost certainly, and the Greek ἀλὼν³ and English *aloe* not improbably, derived from the same Sanskrit word *agaru*=eagle-wood (see especially Vnde's *Hobson-Jobson*, art. 'Eagle-wood').

This appears in Pali as *agaru* or *agala*, in Marathi as *agaru* or *agaru*; probably another form is the Malayalam *agil*, whence Portuguese *agila*, Fr. *bois d'agile*, and Eng. *eagle-wood*. The Malays call it *Kayu* (wood) *agala*, evidently the same name, though which way the etymology flowed it is difficult to say (Vnde, *loc. cit.* [Hammel, *Exp.* 1: 3545, compares *agalluh* (vnt. *akuchun*) in Am. Tab.]).

It is, however, possible that Gr. ἀλὼν, Syr. *alawa* (or *elawa*), Pers. *alawa*⁴ have an entirely separate origin; the SYRIAC word often means the bitter medicinal aloes (so in the majority of references quoted in PS *Thes.*, v. r.), and the Persian word is so explained by the lexicographers.⁵ In that case we have an instance of what is not uncommon in language, viz., that two things have arrived at the same name from different starting-points.

The 'aloes' and 'lign aloes' of the Bible are thus identified with the product of some tree of the genus

3. Source. *Aquilaria*, the chief home of which is in SE. Asia. According to Arab writers there were many different varieties of the *aghalu* or *ad* found in different parts of India and Ceylon, differing from one another in value according to the greater or less compactness of the wood, though all had the property of yielding a fragrant vapour if burned when dry.⁶ They speak of its use in perfuming clothes and persons, thus illustrating Ps. 15: 9 and Cant. 4: 14; and there are parallels to the usage mentioned in Pr. 7: 17.

It would seem that the kind of eagle-wood most likely to be introduced into Europe in classical times was that yielded by a tree generally distributed through the Malayan region, which in early Eastern commerce would therefore naturally be associated with cassia. This is *Aquilaria malaccensis*, which is figured by Rumphius under the name of *Garo*, and has from ancient times been esteemed by the Chinese. To this day 'it is the most important product of the forests of S. Teisseret and the Mergui Archipelago'. Another kind is obtained in NE. India from *Aquilaria agallocha*, but it is less likely that this should have formed an article of commerce in biblical times. Other kinds were obtained from the East in the Middle Ages; what the early Arab travellers have to say about them may be seen in Hymock, *Pharmacographia India* 3: 218, 220. They were similar but no doubt inferior products derived from different trees, and are probably to be regarded as comparatively modern substitutes.

Eagle-wood consists of diseased wood, infiltrated with odoriferous oil and resin. It occurs in irregular pieces varying in colour from grey to dark brown. It

¹ In later Greek also called ἐυαλόν.

² This latter passed into Arabic as *aghalu* or *aghalukht*; but Arab writers usually call it *al-'ad* 'the wood' *par excellence*, or *al-'ad al-Hindi*, 'the Indian wood'.

³ These three are evidently forms of the same word; but here again it is difficult to say which way the etymology flowed.

⁴ On the other hand, in the single instance mentioned by Huys (Suppl.) of the occurrence of the same word (*alawa*) in Arabic, viz., in a poem quoted by Al-Makkari (*Hist. and Lit. of Arabs in Spain*, ed. Huys, etc. 2: 776, l. 13)—it seems to have the same meaning as the biblical word. Describing the pride of certain people, the poet says, with allusion to the old Arab custom of lighting fires in prominent places near their dwellings to attract wanderers to hospitable entertainment, 'and they throw on the fire of hospitality, from pride, their *alawa* and their *kib*' (the latter also is said to be a species of *agallocha*).

⁵ See the Arabic references discussed at length in Celsius, *Hierobot.* 1: 135-171.

ALPHAËUS

is found in the centre of the tree, and the search for it is laborious. The account of Dioscorides (see above, § 1) is accurate. The exterior, which cannot of course be the bark, is veined with a darker colour.

As regards the importation of this substance into W. Asia no difficulty arises when we remember the undoubted fact of a trade carried on by China with India and Arabia in early times, of which Ceylon was probably a chief depot. See on this subject Flückiger and Hanbury, *Pharmacographia* and ed., p. 520 f. A difficulty, however, appears when we consider Biblical words (Num. 21: 3 f.):—

'How good are thy tents, O Jacob,
Thy dwelling places, O Israel!
As valleys strewn with fat,
As gardens beside a river,
As lign aloes which Yahweh has planted,
As cedars beside waters.'

The wood may, indeed, have been imported by the Phoenicians, and thus be mentioned side by side with myrrh, cassia, cinnamon, etc., the spices of Arabia and India; but how could a Palestinian writer use, as a suggestive simile for the expansion of Israel, the growth of a tree which *ex hypothesi* was never seen in Palestine, but only far away in SE. Asia? The difficulty is pointed out by Dillmann, who remarks, 'Perhaps the original reading was עֵשֶׂה (palms, Ex. 15: 27; Gen. 11: 6).' The word suggested, however, seems generally to mean 'cerebrius', Prof. Cheyne points out the parallel in Is. 61: 2. *Prickly Pteleanthus*, though often only a bush, may be a tree of from twenty to forty feet.

S. M. W. E. T. D.

ALOTH (אֶלוֹת) According to 1 K. 1: 6 Solomon had a prefect, Baanah, 'in Asher and in Aloth' (עַן וְתַי מַאֲלָא (B). . . . גַּלְאֲלָא (L. omitting 'Asher'; עַן אֲשֶׁר וְתַי מַאֲלָא (A)). It is better, as in RV and Kau. *HS*, to read 'in Asher and Bealoth.' See BAAL-VII-III R. Klossmann, recognising that a more northerly place is desirable, suggests the emendation 'Zebulun' (notice 'Naphtali,' 7: 15, and 'Issachar,' 2: 17).

ALPHA AND OMEGA (ΤΟ ΑΛΦΑ ΚΑΙ ΤΟ Ω) [Ti. VII] Rev. 18: 216 and [Ti. Δ in B] 2213. For similar use of first and last letters of the alphabet in Rabbinic writings see Schottgen, *Horæ Hebraicæ* 1: 26 f.

ALPHABET. See WRITING.

ALPHAËUS (ΑΛΦΑΙΟΥΣ [Ti. VII]; Heb. [Aram.] אֶלְפָּאֵי [אֶלְפָּאֵי]), either a contraction from אֶלְפָּאֵי or a gentilicium from the place-name Heleph; on account of the α W & H write 'Αλφαίος).

1. Father of Levi the publican, named only in Mark (Mk. 2: 14 = Lk. 5: 27 = Mt. 9: 9 [where Matthew is usually identified with Levi]).

2. Father of the second James in the lists of apostles (Mt. 10: 3; Mk. 3: 18; Lk. 6: 15; Acts 1: 13; see APOSTLES, § 1), not to be identified with Clopas and so made a brother of Joseph the father of Jesus. See CLOPAS, § 3.

There is no reason for identifying (1) and (2). The Itala, it is true, and apparently also the more important of the MSS known to Origen, as well as D, read 'Ιάκωβον instead of Αλεω in Mk. 2: 14; but if this had been the original reading, it would be impossible to account for the subsequent substitution for James of a quite unknown Levi. The reading 'Ιάκωβον arose simply because, at a very early date, a copyist knew of no son of Alphaeus but James, and therefore took Αλεω for an error which he was bound to correct. If the Alphaeus of Mk. 2: 14 were to be identified with the Alphaeus of the lists of apostles, on the assumption that Levi and the second James were brothers, then we should expect to find these two

¹ Instead of אֶלְפָּאֵי Q¹ reads אֶלְפָּאֵי, 'Levi'; but this is obviously unsuitable. Cp its rendering in Pr. 7: 17 (רֹחַ עֵץ אֶלְפָּאֵי מִוֶּנֶּה).

² But see SHOT, Heb. on Is. 46, and cp CEDAR.

ALTANEUS

brothers forming a pair in the lists just as Peter and Andrew do, or John and the first James. This objection to the identification, however, is valid only on the assumption that Levi under the name of Matthew was admitted into the number of the twelve.

The Syrian writer Annas in the 14th cent. makes Alphaeus accompany Nathaniel (identified with Bartholomew) on his journeyings through Nisibis, Mesopotamia, and the rest of Western Asia (Lipsius, *Apoc.*, i. p. 95 seq. ii. 261 f.). — I. W. S.

ALTANEUS (ΑΛΤΑΝΝΑΙΟΣ *A'*). RV MALTIAN-
NEUS, 1 Esd. 9⁹† - Ezra 10₃₃ MATTENAI, 2.

ALTAR.¹ The Heb. **זֶבֶח** means literally 'a place of slaughter or sacrifice' (cp. Ar. *Madhah*,² and Syr. *Madkēha*). The Gk. and Lat. terms,

1. **Names.** *Μαθητήν*. The Gk. and Lat. terms, *μαθητής* (ep *μαθητής*, *ana* ep *ἀκούω*), *disciple* (ep *discipulus*), on the other hand, describe the form of the altar as a raised structure without reference to its purpose. Occasionally (23 times) *Θ* uses the Gk. word *βωμὸς*; as a rule, however, *βωμ* is rendered by *θεοστασίριον*. The translation thus effected is close and exact; but *θεοστασίριον* is unknown in classical literature, being apparently confined to biblical, Jewish,³ and ecclesiastical writers. In the NT *βωμὸς* occurs only once (Acts 17:23), and there the writer is speaking of an altar used for heathen worship. Elsewhere *θεοστασίριον* is always employed.

We have, then, in the Hebrew word an accurate definition of the altar; it is a place of sacrifice. Why

2. Primitive idea. an altar should be required in order that the victim may be slain in a manner accountable to the law.

to the worshipper, is not so obvious as we might at first be inclined to think. We might deem it a sufficient explanation to say that the altar served ends of obvious convenience, the flesh of the victim being placed on a raised platform specially appropriated to this object, the sacrifice was separated from contact with common things and from contamination, while a means was provided for performing the rite with due solemnity and in full sight of those who desired to associate themselves with the sacred offering. There is evidence, however, that in primitive times the altar possessed a much deeper significance than this. (The development of this primitive idea is traced elsewhere. See IDOLATRY, § 2; SACRIFICE; MASS-BAIL.)

To the Arabs any stone might become for the nonce an altar, and evidently their Hebrew kinsfolk followed

3. Usage. originally the same ancient way. Thus, after the victory of Michmash, when Saul was told that his hungry warriors were devouring the flesh meat which they had taken as booty, without reserving the blood as an offering to Yahwé, he commanded his people to roll a great stone towards him, and on this natural altar the blood, the mysterious seat of the soul, was poured out, so that all was in order (1 S. 14 : 35). It is to be observed that here there is no question of burning. In Gideon's sacrifice, of which we have an account in Judges 6 : 21, the offering of cooked flesh and unleavened cakes is indeed consumed by fire miraculously kindled; but the altar on which the gifts are placed is simply a rock, and the broth of the cooked flesh is poured out upon it or at its base.

According to Ex. 20:24-25, on the other hand—a passage which, whatever be its date (see EXODUS, II, § 3), may represent an ancient usage—the altar is to be of earth—a material used in early times by other nations—e.g., Carthaginians, Romans, and Greeks (for references see Dic. *ant. heb.*—or, if of stone, then of unhewn stone, the reason given being that an iron instrument would

¹ On references to Greek altars see UNKNOWN, *God and Abominations*, ii.

² The Arabic *ḥaṭṭ* 'it does not mean 'altar.' It has acquired that meaning through transliteration of the Bible. It is also used in the sense of 'trench' (on which see WRS *Rec. Sem* (2) 244, n. 1); and the marks on *ḥaṭṭ* *ḥaṭṭ* are not.

sometimes state it, in Philo, but also in Eupolemus, *Ep. Arist.*, Jos., and other Jewish authors.

ALTAR

destroy the sanctity of the altar. Originally, it can scarcely be doubted, the idea was that changing the form of the sacred stone would drive the deity from his abode (cp *Idolatriy*, § 40; but such ideas had passed away when the compiler wrote, and iron tools continued to be forbidden in deference to ancient custom no longer understood. Further, the altar here prescribed was to have no steps. In this way the person of the sacrificer was to be saved from exposure, an object secured by the priestly legislator in a very different way,—viz., by making "linen breeches," or drawers, part of the priestly attire. Altars so constructed might be erected all over Israel; see *HIGH PLACE*, § 2*f*. On the recognition of the altar as a sanctuary for homicides see *WRS Rel. Sem.* 183 *f*., and cp *ASHTUM*.

Very different was the altar erected in the fore-court of Solomon's temple at Jerusalem. The first

4. Solomon's temple. Book of Kings (9:25) makes direct mention of the fact that Solomon built an altar on which he offered sacrifices to the Lord.

times a year. So, too, in 804, reference is made to the altar which 'stood before Yahwē'—i.e., in front of the temple proper—and it is described as the 'brazen altar' (מִזְבֵּחַ נְחָשׁ). Thus the material itself offers a striking contrast to the altars of earth and stone which had been in use previously. Like the rest of the temple and its furniture, it was the work of a Phœnician artist. HIRAM-ABI (2 Ch. 2:13, perhaps rightly; see, however, HIRAM, 2). Unfortunately, the account of the altar, which we should expect before 1 K. 7:23, is wanting.

The text of the passage has been mutilated because a later editor, mis-interpreting 1 K. 54 (itself a very late insertion), supposed that the furniture of the Tabernacle, including, of course, the brazen altar, had been moved by Solomon into his temple, so that no further altar of this kind was needed. The excision of the passage describing Solomon's brazen altar must have been effected in comparatively modern times, for the Chron. le. shows that he had it before him in the text of the Books of Kings which he used (see St. in *ZATW* 3:17 [3]).

The Chronicler (2Ch. 11) gives its dimensions. It was 20 cubits long and broad by 10 cubits high. Now, these are precisely the measurements of the altar in Ezekiel's temple (Ez. 43:13ff.). The prophet really constructs his ideal temple of the future from his recollections of the old temple in which he may very well have served as a priest. We shall, therefore, not go far wrong if, with most modern archaeologists, we take Ezekiel's description as applicable to Solomon's altar. On that supposition, although the altar was 20 cubits broad and long at the base, the altar-hearth¹ was only 12 cubits by 12. The altar consisted of three platforms or ledges, the higher being in each case two ells narrower than the lower ledge. At the base was a gutter (EV 'the bottom,' RV mg. 'the hollow,' Ez. 43:13) one ell broad (πρὸς ἑκατὼτα, κοίλευα, κοίλευα in G), intended apparently for the reception of the sacrificial blood; and there was a similar gutter at the top round the altar-hearth. At the four corners on the top

5. Horns of altar, etc. Possibly they represent, as Stade has suggested, the beginning of an attempt to carve the altar stone into the form of an ox, which symbolised the power of Yahweh² (Nu. 23.22-24). Be that as it may, down to the latest times the horns of the altar were regarded as specially sacred, so that in the consecration of priests (Ex. 29.12) and in the ritual of the sin offering (Lev. 4.7) the blood was sprinkled upon them. It has been inferred from Ps. 118.7 that at one time the horns were used also for fastening the victim; but the meaning of the words is exceedingly obscure, and no conclusion of any value can be deduced from them.

The ascent to the altar was made by a flight of steps

¹ The word for hearth or place for burning, which should probably be written $\text{N}^{\text{N}}\text{-R}$ (see ARN 1, 2), occurs not only in Is. 29: 24 Z_1 but also on the stone of Meshia ($\text{P}^{\text{P}} 100: 6$).

² Robert on Smith, however, regards the 'horns of the altar' as a modern substitute for the actual horns of sacrificial victims, such as the heads of oxen which are common symbols on Greek altars (*KS* 436).

ALTAR

on the E. side, and it is plain that an arrangement of this kind was absolutely necessary, when we consider the great height of the structure.

On the whole matter we must remember that Solomon had no strict rule to follow: he simply desired, with the help of Phoenician art, to consult for the splendour

6. Ahaz's altar.

of the royal worship. We need not, therefore, wonder that one of his successors, Manasse, with the co-operation of Uriah the priest, constructed a new altar after the pattern of one that he had seen at Damascus, and made it the chief place of sacrifice.

Solomon's altar was placed, as has been already implied, in front of the temple proper. Can we identify the exact site? Not perhaps with anything like certainty, but it is

7. Site.

worth while to mention the theory advocated by Willis, and more recently by Nowack. The Kubbet es-Sakhra, or dome of the rock, which stands on the temple site, covers a great rock pierced by a channel which passes into a sink beneath, and is connected with a water-pipe. The rock has been an object of the highest veneration to Christians, and (especially) to Moslems. It has been supposed that the rock stood on the threshing-floor of Araunah the Jebusite (on the name see ARAMAH), that it was there David saw the angel (2 S. 24.18 ff.), and erected his altar, and that Solomon (2 Ch. 3.1 ff.) afterwards included the ground within the temple site. Solomon would naturally build his altar on the spot already chosen by his father and hallowed by the apparition; nor is it incredible, when we consider how tenaciously Orientals, under changed modes of belief, cling to the old sacred places, that David and Solomon built their altars on the rock now covered by the Kubbet es-Sakhra. The story of the apparition to David would, on this hypothesis, find a parallel in the apparition to Gideon (Judg. 6.11 ff.), and in that to Manoah (Judg. 13.19). The perforation, the water, and the sink would be explained as means for carrying off blood and offal from the altar. It is true, as Dean Stanley has pointed out, that the rugged form of the rock would make it unsuitable for a threshing-floor; but that is no reason why the rock should not have stood 'by the threshing-floor' and been the place where the angel appeared. Cp. ARAMAH.

Within the temple proper, and in front of the Debar or innermost shrine, stood another altar, mentioned in

8. Altar of shewbread.

1 K. 6.25 ff. The text, which is corrupt, should be emended thus, with the help of ἑστῶς (ἐκδορῶν): 'he made an altar of cedar in front of the Debar.' From Ez. 41.22 we learn that it was 3 cubits high by 2 cubits broad, and that the altar had 'corners' which took the place of the horns of the brazen altar. Ezekiel speaks of it also as a 'table.' Upon it, from ancient times (1 S. 21.6 ff.), the shewbread was placed before Yahwe, to be afterwards consumed by the priests.

We assume here that the TABLET (7.7.1), as described by the 'priestly writer,' is an ideal structure.

9. P's brazen altar.

Said to have been made at Sinai, it was in reality an imaginary modification of the temple, suitable (so it was supposed) to the circumstances of the time when the Israelites wandered in the wilderness.

(a) The altar, called simply 'the altar' (Ex. 27.1 30.13 40.7 32, etc.), 'the altar of burnt offering' (Ex. 30.23 31.6, etc.), or 'the brazen altar' (Ex. 38.3 39.34), stood in the outer court, and was square, 5 cubits broad and long, by 3 high. Instead of being wholly of brass, it was a hollow framework of acacia planks overlaid with brass. It was thus small and portable. It had four 'horns'; midway between top and bottom ran a projecting ledge (so RV, AV 'compass'; 27.2; 27.5), intended, perhaps, as a place for the priests to stand upon when they ministered, though the meaning of the word and the purpose intended are disputed.

ALTAR

Below this ledge there was a brazen grating (so RV, AV 'grate,' 27.4) or NETWORK (7.7.1), $\text{רֶשֶׁת} \text{בְּרָזָה}$ רֶשֶׁת , which may have been a device to support the ledge and admit the passage of the blood poured out at the base of the altar. There were four brazen rings at the corners of this network, and into them the staves for carrying the altar were inserted. These staves, like the altar itself, were of acacia wood, overlaid with brass. So, too, the altar utensils: אֵשֶׁת , רִמְסֵי or pans for clearing away ashes, מַטְבֵּחַ or shovels, מַטְבֵּחַ לֵאשׁוֹן or scoops for catching the blood and sprinkling, מַטְבֵּחַ לֵאשׁוֹן fleshhooks for flocks, מַטְבֵּחַ or fire-pans for removing coals, etc.—were all of brass. Perpetual fire was to burn on this altar (Lev. 6.12 ff.).

(b) Ezekiel, as we have seen, mentions an altar within the 'holy place,' which he also calls 'the table' (Ezek. 41.22), 'which stands before Yahwe.' The

10. P's 'table.'

'priestly writer' calls it 'the table' (Ex. 25.23 37.10), 'the table of the face or presence' (Nu. 17.1 שֻׁלְחָן פָּנֵי cp. RITUAL, § 2), because it stood before Yahwe (Ezek. 41.22), 'the pure table' (Lev. 24.6). In 2 Ch. 29.1 it is spoken of as 'the table of shewbread' (שֻׁלְחָן לֶחֶם —lit., the table on which rows of loaves were laid—to describe the purpose for which it was intended. It was of acacia wood overlaid with gold, and was 2 cubits long, 1 cubit broad, 1½ high. It was surrounded by a golden rim or moulding (so, Ex. 25.11; see CROWN), and at the bottom there was a border or ledge (מַטְבֵּחַ , Ex. 25.23, IV 'border'), with a golden rim of its own. Where the feet of the table joined the ledge, golden rings were placed for the insertion of staves. The table was furnished with deep plates (מַטְבֵּחַ , Ex. 25.29, EV 'dishes'), 'spoons' or sancters (מַטְבֵּחַ) for the incense (Lev. 24.7), 'flagons' (מַטְבֵּחַ , Ex. 25.29 [see FLAGON]) for the wine, 'bowls' (so EV, מַטְבֵּחַ 25.29) for pouring the wine in libations.

(c) The altar of incense (מַטְבֵּחַ קִטְוֶה , Ex. 30.1, or מַטְבֵּחַ קִטְוֶה), also called 'the golden altar' (Ex. 39.38), belongs only to the secondary sections of the Priestly Code. Ezekiel knows of

11. P's incense altar.

no altar within the temple proper save the altar of the shewbread, and originally 'the golden altar' was only another name for this table. The Priestly Code, in its original form, speaks of the brazen altar as 'the altar'; and, whilst in Ex. 30.10 the high priest on the day of atonement is to place blood on the horns of the altar of incense, in Lev. 16, where the solemn ritual of that great day is minutely prescribed, nothing is said of an altar of incense. The mention of the altar in the books of Chronicles and Maccabees (as also in the interpolated passage 1 K. 7.45) is due simply to the influence of these novellæ in the 'Priestly Code.'

This altar was to be made of acacia wood; it was to be 2 cubits high, 1 cubit broad and long; the flat surface on the top (so, Ex. 30.13, AV 'higher place,' RV 'base'), and the sides and horns, were overlaid with gold. It had a golden moulding round it (so, and beneath this at the four corners were golden rings for the staves, which also were overlaid with gold.

In the reign of Darius a new altar of burnt offering was built, probably on the old site (cp. Hagg. 2.15), but, in accordance with the law in

12. Post-exilic. Ex. 20.25, of unhewn stone (1 Macc. 4.44 ff.). It was desecrated, and, according to Josephus (*Ant.* xii.54), removed by Antiochus Epiphanes. A new altar, also of unhewn stone, was built by Judas Maccabæus. Within the temple proper were the table for the shewbread and the golden altar of incense (1 Macc. 1.22 1.50 ff.); but the latter, as far as it was distinct from the table, seems to have been introduced late, for Hecateus (*Jos. c. 11*, 122) mentions only the

AL-TASCHITH

candlestick and one altar (or table) as the furniture of the holy place.

In Herod's temple the altar of burnt offering in the court of the priests was still of unhewn stones. The Mishna (*Middoth* 3:1) states that it was

13. Herod's temple.

32 cubits square at the base, and gradually narrowed to 24 cubits at the top; but the dimensions are differently given by Josephus (*Juv.* 5:6), and, before him, by Ptolemy (Müller *Fragm.* 2:304). The priests approached it by an ascent of unhewn stone. There was a pipe to receive the blood, which was afterwards carried by a subterranean passage into the Jordan, and there was a cavity beneath the altar for the drunk offerings. On the N. side were brazen rings for securing the victims. A red thread marked the place for sprinkling the blood. The altar of incense stood within the holy place, between the golden candlestick and the table of shewbread.

As we have seen (§ 1), the word *θυσιαστήριον* is frequently used in the NT for the Jewish altars; and the 14. NT. Apocalypse speaks of the 'golden altar' (8:3, and 'altar' in the same sense *παύσι*), because the writer pictures the worship of heaven under forms drawn from the old temple worship. In a passage which is unique, the author of Hebrews (13:10) speaks of a Christian altar. The altar is, of course, not material but spiritual; it is the cross on which Christ offered himself, and the author is following the same line of thought when he exhorts believers 'to do good and communicate, since with such sacrifices God is well pleased.'

For the origin of altars see *THEOLOGY*, § 2; SACRIFICE; *Hebr. Place*, § 3, and WRS *Rel. Sem.*; for the Hebrew altars in later times Beninger's and Nowak's *Hebr. Arch.* (both works 1904). See also Stade, 'Text d. Beriches im Salomon's Bauten' (*Z.ATW* 3:129 ff.), Smend's *Ezekiel* (20), Cornill's critical text of Ezekiel (36), and the comm. of Bertholet in *ATW*. For an account of the older literature on the archaeology of Ezekiel's temple see Batcher, *Proben ATlicher Schriftklärung*, 1333.

AL-TASCHITH, RV Al-Tashheth (תַּשְׁחִיתָ)

צִיָּה אֶל־, Symm., *μη διαφθεیره*; Symm. Ps. 75:1, *περι αφθαρείας*. It is usual to supply *עַל* or *עַל* before the phrase (Ps. 57-59 75 f. headings [v. 1]), and to explain 'To the tune of "Destroy not" (cp Is. 65:8; so WRS *OTW* 209). If, however, the view of the musical notes in the headings taken in Psalms is correct, there can be no doubt that the phrase is corrupt, and that we should read with Gratz תַּשְׁחִיתָ, 'on the Shemith' (see *SHEMINITH*).

ALUSH (אֲלוּשׁ; Sam. שִׁינִי; *αίλου* [AFL], -*λειμ* [B]; *Alus*), a desert station of the Israelites between Dophkah and Rephidim (Nu. 33:13 f. + 12). Not identified with certainty; but see Di. on Ex. 17:1. The Ar. (ed. Lag.) reads *al-wathanain*, 'the two idols,' probably because the translator understood by Alush the heathen temple at Elusa (see *BERED*, i. 1, and cp. WRS *Alin*, 293 f.). See *WANDERINGS*, §§ 12, 14.

ALVAH (אֲלָוָה; *αλφα* [ADEL] = *הָלָוָה* *Alv.*), Gen. 36:40 = 1 Ch. 1:51 f. *Alv.* (EV *ALLAH* after *Kz.* *הָלָוָה*; BA as above; *αλφα* [L]), one of the 'dukes' (?) of Edom (*q.v.*, § 4). Cp *ALVAN*.

ALVAN (אֲלָוָן; *αλων* [A], -*ων* [DE], -*ων* [L]) transposing *λ* and *ν*, Gen. 36:23 = 1 Ch. 1:40 f. *ALLAN* (L), but in many MSS *אֲלָוָן*; so *αλογαν* [L], but *αλων* [B], *αλων* [A], a name in the genealogy of Seir. Cp *ALVAH*.

AMAD (אֲמָד; *αμιμα* [B], *αμαδ* [A], *αμφαδ* [L]), an unidentified point in the border of Asher (Josh. 19:25 f.). *Am* presupposes Ammiel. There are several other place-names compounded with *am*. See Gray, *HPV* 43 f., who rightly declines the explanation of

¹ *Am* points to a reading *עֲמִי*. Elim. Perhaps the writer, wishing to fill up the interval between the wilderness of Sin and Rephidim (cp Ex. 17:1), repeated Elim, the name of an earlier station. See *ELIM*.

AMALEK

Am'ad as 'people of eternity.' *Am*'s *αμφαδ* may point to *עֲמִי* (EUPAL) for which *Am* in 1 Ch. 8:11 gives *αμφαδ*. This may be correct. T. K. C.

AMADATHA, RV Amadathus (αμαδαθου [B]), Esth. 10:3, etc. See *HAMMATHA*.

AMAL (אֲמָל; *αμαδ* [BA], *αλαμ* [L]), in genealogy of Ashur (§ 4 ii.), 1 Ch. 7:35 f.

AMALEK (אֲמָלֶק; *αμαληκ* [BAL], but *αλ* 1 S. 15:25 [A]; gentile, *Amalekite*, *αμαληκ* [BAL], but also *αμαληκ* [BAL]), a tribe with

1. *Seat*, which the ancient Israelites, at several periods of their history, were engaged in warfare. According to two passages, each of which confirms the other, there appears to have been a time when Amalekites dwelt even in Central Palestine; in the Song of Deborah we read of 'Ephraim whose root is in Amalek' (Judg. 5:14; *Am*), however, *εν κοιλιάδι*, and Pirathon in Ephraim (the modern *Pirata*, about 6 m. WSW. of Nablus) was situated 'on the mountains of the Amalekite,' or 'of the Amalekites' (Judg. 12:15, *αμαλ* *Al*). Of these northern Amalekites nothing further is known. According to several passages of the OT, the home of Amalek was in the desert of the Sinaitic peninsula, the modern *Tih*, S. and SW. of Judaea. It is scarcely safe to conclude from Nu. 13:29 11:25 13:45 that they once had settlements also in southern Judaea; still less can we build any such theory upon Gen. 14:7, although the geographical allusions in this chapter have more authority than the legendary narrative itself. When the Israelites

2. *Exodus*, came out of Egypt into the desert of Sinai, they had an encounter with the Amalekites at Rephidim (Ex. 17:8-16), which is not very far from Mount Sinai (Nu. 33:15). It was natural enough that the nomads, who lived on the scanty products of this region, should do their utmost to expel the intruders, nor can we wonder at the mortal hatred with which the Israelites thenceforth regarded Amalek. That the narrative, in spite of its legendary features, has a historical foundation cannot be doubted. The story of an encounter in the desert of Paran—i.e., the *Tih* itself (Nu. 14:33-34)—is probably nothing more than a less accurate version of the same struggle, which, it is true, can hardly have been limited to a single skirmish. Whether the account of the Deuteronomist (Dt. 25:17-18) was derived from any other source besides Ex. 17:8 f. is not quite clear, although he mentions one additional circumstance, namely 'the cutting off of those who were wounded (?)'—the term *שָׁחַת* was perhaps suggested by *שָׁחַת* in Ex. 17:13. The verbal repetition of the curse is worthy of note. In 1 S. 15:2, there is an obvious allusion to the passage in Exodus.

The mention of the Amalekites in Judg. 3:13 is perhaps due only to an ancient dittography (*אמלק* *Am*, a reading which, at all events, must have been known to the author of the Maccabean Psalm 83—see *q.v.* [§]); but it may be questioned whether Budde is justified in considering the reference to the Amalekites in connection with the Midianites (Judg. 6:33 7:12) as a mere gloss; it is in fact by no means improbable that besides the Midianites various other nomadic tribes made incursions upon the Israelite peasantry at the period in question.

The account of the wars of Saul against the Amalekites (1 S. 15) is unfortunately not altogether trustworthy.

3. *Saul and David*. Even in its original form it must have contained many exaggerations; and it has been subjected to considerable revision.

The high figures which appear in the narrative have no historical value. The same may be said of the vast extent attributed to the Amalekite territory in a passage imitated from Gen. 25:18 (1 S. 15:6). We may with some certainty, however, conclude that the very first king of Israel inflicted severe losses upon the wild nomads (cp *SAUL*, § 3). In this connection we read of King Agag (the only

AMALEK

Amalekite proper name known to us, it may be noticed in passing, to whom the words of Balaam in Nu 21.7 refer. The description of the death of Agag, obscure as it is, has a very antique colouring, and reminds us of Judg. 8.21. Popular tradition has strangely interwoven the fate of the Amalekites with that of Saul.

According to one story, which does not agree with the narrative in 1 S. 31, Saul was slain by an Amalekite, who forthwith carried the news to David, but instead of being rewarded was put to death. Even in the book of Esther, composed many centuries later, reference is made to the enmity between Saul and Agag, as the Ra'abim long ago observed: the righteous Mordecai is descended from the one, and the wicked Haman from the other.

At the moment when Saul fell on Mount Gilboa, the Amalekites, as it happened, were signally defeated by David. An ancient and well-informed narrator tells us how David, an exile at the court of the king of Gath, while professing to be very differently occupied (see Actus, DAVID, § 5), was in reality carrying on a war of extermination against the aboriginal tribes, in particular the Amalekites (1 S. 27.1). On one occasion the Amalekites profited by his absence to seize his residence, Ziklag, and carried off all its inhabitants. He pursued them, however, made a sudden attack with a band of only 600 men, rescued the whole of the spoil, and slew them all, with the exception of 400 who escaped on their camels (1 S. 30). Even the details of this narrative may, for the most part, be regarded as historical; it is obvious that the struggles here described were not wars on a large scale but mere raids such as are usual in the desert.

In after times Amalek does not come into prominence. The words of Balaam, which describe it as 'the first-born of nations' (i.e., primeval nation?), and at the same time foretell its overthrow, are spoken rather from the point of view of the age in which Balaam is placed than from the point of view of the real author, who seems to have lived about the eighth century B.C. (cp BALAAM).

4. Later times. According to the remarkable notice contained in 1 Ch. 14.17, 500 men of the tribe of Simeon, under leaders whose names are specified, exterminated the last remnant of the Amalekites in the mountain country of Seir and settled down in their place. Hence it would appear that the last Amalekites dwelt in the mountains of Edom. With this it agrees that Gen. 36, the substance of which must be at all events pre-exilic, represents Amalek as the son of Esau's first-born, Eliphaz, by a concubine—i.e., as an Edomite tribe of inferior rank: see Gen. 36.12 (of which 1 Ch. 1.5 is an incorrect version), and compare 7.16. The concubine in question is Timna, according to 7.22 (= 1 Ch. 1.39), a sister of Lotan of Seir, and according to the second list in 7.41 ff. (where Amalek is omitted), an Edomite tribe or settlement. Thus the remnants of Amalek are, to some extent, reckoned as members of the Edomite race.

The mention of Amalek among the contemporaneous enemies of Israel, by a psalmist of the Maccabean period (Ps. 83.7-9), is merely an example of the poetical licence whereby an ancient name is applied to a modern people, just as, e.g., Greek writers of the sixth century A.D. call Goths 'Scythians.' As far as we can judge, the Amalekites were never a very important tribe; at their first appearance in history they are threatened with total destruction, and it would seem that neither Egyptian nor Assyrian records allude to their existence.

5. Late writers. Ancient Arabic authors, indeed, describe them as a mighty nation which dwelt in Arabia, Egypt, and other countries, and lasted down into post-Christian times. The present writer, however, thinks that in his short essay 'On the Amalekites' (Göttingen, 1864), he has succeeded in proving that these and other similar statements are either fancies suggested by passages in

AMALEK

the OT, or else deliberate fictions, and therefore have no historical value. At the present day this opinion seems to be generally accepted.

One branch of the Amalekites, it is true, appears to have lasted somewhat longer than the rest. When Saul attacked the Amalekites he ordered the

6. Kenites. *Kenites* to separate themselves from the doomed people, on the ground that they had shown kindness to Israel at the time of the exodus (1 S. 15.6). The Kenites must therefore have belonged to Amalek, or must, at least, have stood in close connection with them (cp Judg. 1.16 as in *S/10/1*). Thus we find that the oracle of Balaam (Nu. 21.26 ff.) mentions this people, under the name of Kain (7.22, *LY mg.*), immediately after Amalek. Their friendly relations with Israel are, moreover, shown by the fact that, according to Judg. 1.16, the father-in-law of Moses was a Kenite (elsewhere a Midianite), and also by the fact that his descendants entered Palestine in company with the tribe of Judah. Hence the Kenites are reckoned as a part of Judah (1 S. 30.29, cp 1 Ch. 2.55); but according to the more accurate view they were a distinct people, though they dwelt in the south of Judah, and were recognised as kinsmen by David (1 S. 27.10). From 1 Ch. 2.55, it would appear that the Rechabites, with whom the nomadic life had become a religious institution, were included among the Kenites (Jer. 35.2 K. 10.15.23).

In another district, the great plain of S. Galilee, we meet with Heber the Kenite (Judg. 1.16). For W. Max Müller is mistaken when he derives the name from a city called Kên (*cf. Is. u. Eux.* 17.1); the Song of Deborah reckons Jael, the wife of Heber, among 'women in the tent' (Judg. 5.24), which shows that the people in question are nomads. Accordingly we have no right to regard these Kenites as wholly distinct from those in the South.

The oracle of Balaam mentions Kenites in the rocky hills of the South, foretelling that they will be carried away captive by the Assyrians. Gen. 15.19 includes the Kenites among the ten nations whose land God will give to Israel.

This people must therefore have been a nomadic tribe, which, at least in part, belonged to Amalek, in part was absorbed into Israel, and in part, it may be, maintained a separate existence for some time longer. It is not impossible that the Bedouin tribe, Kaim, which dwelt in the desert of Sinai and the neighbouring districts about six centuries after Christ, may be connected with the Kenites (Kaim) of the OT, as the present writer, following Ewald, has stated (*op. cit.*). At the present time, some further arguments might be brought forward in favour of this hypothesis, which, however, is still very far from being absolutely proved.

On the other hand, there are many objections to the theory that Cain, the fratricide, is a representative of the

7. Cain. Bedouin tribe of the Kenites, as well as to other hypotheses of Stade (*Z. 17 H. 14* 250-513 [194]), great as is the acuteness with which they are supported. A few points alone can be here referred to. Cain, the brother of Abel the shepherd, is expressly described as a *husbandman*. After his evil deed he becomes 'a wanderer and a fugitive'—i.e., an outlawed, homeless criminal. This is something quite different from a nomad, who regularly goes to and fro within the same pastures in the 'desert.' That the Kenites, from among whom Moses fetched a wife, and who have a good name almost everywhere in the OT, were a tribe of smiths¹ (and therefore of parish), has no evidence in its favour, nor can we find any indication that the later Arabian tribe of Kaim (Bal-Kaim) was of such a character. In the Ar. *Kaim*, which, it is true, also means 'smith, craftsman,' several words appear to be combined. Besides, blood-vengeance, which is first mentioned in the story of Cain, is by no means a

¹ Similarly Sayce, *Races of OT* 118. 'They formed an important guild in an age when the art of metallurgy was confined to a few.' See however Doughty, *Ar. Des.* 1280-282.

AMAM

peculiarity of nomad tribes; it prevailed also among the ancient Israelites, who of course were agriculturists (see also *GEN.* § 4 f.).

AMAM (אָמאָם; CHN [B]; אַמאַם [AI.]), an unidentified site in the Negeb of Judah (Josh. 15:26f.).

AMAN. 1. (AMAN [A], ADAM [B], NAḌAB [N]) Ward of Tobit's nephew Achicharus (Scunacherib's vizir, Tob 1:22), who barely ill-used his benefactor, but came to grieve himself while his victim escaped (Tob 11:4); called Nadan in romance of Ahikar (see ACHICHARUS), and no doubt, therefore, the same as NAḌAB (נאדב[ar] [B] na.ḏab [N]; ناهد: *nahath* [Vg.], *nahat* [It.]), the ἐξάδελφος (V 'brother's son') of Achicharus (Tob 11:3f.), probably to be rendered, in accordance with the romance, 'sister's son' or accompanying father. See ACHICHARUS.

'1. 01.01.01]

Tobit

Ann. 1

Achiacharus (Job. 121 f.) singular

 $\sin \tau$

i.e., Nadas (romance)
pr ob. Amas (Job, 14 10).

7. (amar [B&M]) 'Rest of Esther' 107, etc. See HAMAN.

AMANA אַמָּנָה 'firm, constant'; אַמָּנָה translates 'from the top of Amana' ἀπὸ ἀπῆς πύργους; **אַמָּנָה**; *Amāna*. 1. The name of a mountain, in Cant. 48, where 'the top of Amāna' is introduced parallel to 'the top of Senu and Hermon.'

⁴With me from Lebanon. O bride, with me from Lebanon come ;
From the summit of Amana, from the summit of Senir and
Hamon.

In the preceding diachronic reference is made to Lebanon. Evidently the post means some part of the range of Anti-Lebanon, probably the Jebel ez Zebedūni, below which is the beautiful village of Zebedūni and the source of the Nahr Biraḍā (the Heb. ARAB. *q. v.*). In inscriptions of Tiglath-pileser III. and Sennacherib the mountain ranges Lebanona and Ammanana are coupled (*Del. Par.* 103 f.).

2. Considering how well the form *Amnana* is attested, it becomes a question whether in 2 K. 512 we should not adopt the Kt. in preference to the Kt., and read 'Amnana' (so AV mg.) or AMANAH (so RV mg.) as the old Hebrew name of the Nahr Barada (see ARABAN).

Many MSS with the two Soncino and the Brescia editions have this reading in the text in Kings; Targ. and Pesb., with the Complut. ed. of **B** and the Syro-Hex. text, also presuppose it.

AMANA (אמנה Kr.), 2 K. 5₁₂† RV = AV

AMARIAH (אַמַּרְיָה [and אֲמַרְיָה, see nos. 5, 6, 7] 'Yahwē hath spoken' [see NAMES, § 33] or 'promised'. Less probably 'man of Yahwē' on analogy of Palm. n. pr. אֲמַרְיָה 'man of the sun,' see Baethge, *Beitr.* 89 n. 1. אֲמַרְיָה [אַמַּרְיָה] [B M.], a name occurring frequently, but with the exception of (1) only in post-exilic literature.

i. b. Hezekiah, an ancestor of Zephaniah (Zeph. 1.1, $\alpha\mu\phi[\epsilon]\nu$ [BA], $\alpha\mu\phi\sigma\epsilon\upsilon$ [S*], $\pi\text{-}\pi\upsilon\alpha$ [S^b vol.], $\alpha\mu\phi\upsilon$ [S^c vol. Q]). The readings with 'o' as the second vowel suggest the pronunciation, 'Amori' = Amorite. Another ancestor is called 'Cushi', i.e. the Cushite.

2. In list of Judahite inhabitants of Jerusalem (see EZRA, ii, § 5 [6] § 15 [1] *a*), Neh. II 4 (אֲשֶׁר־עִמָּנוּ [BA], אַמ. [X], יְהוּדָיִים [L]) = 1 Ch. ii 4. *YHWD*, abbreviated form (יְהוָה, אֲשֶׁר־עִמָּנוּ [BA], -בְּרִי [L]).

3. One of the two Bani in list of those with foreign wives (*Ezra*, i. § 5 end), *Zēra* 10 42 [*aapia*] [H], [*aaparia*] [AL]).
4. A priest in Zerubbabel's band (*Ezra*, ii. § 6 b), Neh. 12 2 ([εὐσταθίου] [*eustathiou*] [B], [*mepia*] [K], *qu.* [k' ⁴], [*aaparias*] [L]), cp. i. 13 [*aapasia*] [k'], and in list of signatures to the covenant (see I ZRA, i. § 7), Neh. 10 3 14 [*aaparias*] [L]). A comparison of

¹ For another suggested compound of $\pi_2(N)$ see MERIBBAAL.

AMASAI

the lists in Neh. with 1 Ch. 24 makes it plausible to identify 'Amariah' with the priestly house of 'Ammer' (7: 14) whose institution is ascribed to David's time (see EMMERT, 2).

In the following (nos. 5-8), the unhistorical nature of the context strongly suggests that the name is introduced merely to give an air of antiquity to this priestly family.

5. Chief priest, temp. Jehoshaphat (2 Ch. 19:11 יְהוֹשָׁפָט; Jos. ἀμειβιστας).

c. A Levite, temp. Hezekiah, 2 Ch. 31:15 (חֲזַקְיָהּ; μαριας [H.A.], αμ. 111).

7. One of the line Helbron, a Kohathite Levite (αμαδια [E]); 1 Clc 23 17; in 24 23 אַמַּרְיָאס (αμαριαν [A]).

(g) Amariah occurs twice in the genealogy of the high priests, (a) as a son of Merath; 1 Ch. 6.7, 8 (*amariaq* [A]; Jos., *Amparion*) (b) as 1370 (*amaraia* [B], i.e., MA misread MAA), and (c) as a son of Azaziah, 6.11-13, 37 (*amariaq* [A]; cf. L^a, 17; (*amaraia* [BA] *Amariel* [L]) 1 Esd. 5.2 (*amariaphon* [H] *amariop* [AL], I.V. *amari*), as in 4 Esd. 12, *Amariel* [ed. Bentley]), probably the same as c above (cf. llo.). See further Hittin Petrus and note that the supposition recurrence of the name Amariah, Ahitub, and Zadok (p We. *Proph.*²⁴ 222).

AMARIAS (ΑΜΑΡΙΟΥ [-Α]), 1 Esd. 8:2 = Ezra 7:3
AMARIAH (אֲמַרְיָהוּ),

AMASA (אֲמָסָא; rather, perhaps, אֲמִישָׁא, *Amiṣṣai*, cp אֲמִישָׁאִי [B in 2 S. 19, BA in c. 20, A in c. 17], אֲמִישָׁאִי [A], אֲמִישָׁא [L, always; A occasionally], and other variants, see below; cp אֲמִישָׁאִי, *AMASAI*. The form *Amasa* rests on a false etymology [from אֲמָסָא = אֲמָסָא]; cp אֲמִישָׁאִי, so Marq. *Fund.* 24).

1. Son of Abigail, the sister of Zeruiah and David (1 Ch. 2:16 f., 2 S. 17:25 *אַבְגַּיִל* [B], *-gā'ail* [A]). His father was Jether a Jethite—*not* an 'Israelite' or an 'Ishmaelite' (see ABIGAIL, 2). He was among those that fell away from David to ABSATON (? 7:7), who entrusted him with the command of his forces (2 S. 17:23). In spite of this, David thought it prudent to conciliate Amasa by a promise of the same position in his own army, JOAB (? 7:3) having earned the king's displeasure (2 S. 19:13 [14] *אַמָּסָא* [A]). On the renewal of revolt under Sheba (2 S. 20:1), in which according to one view he was implicated, Amasa was entrusted with mustering the men of Judah (? 7:4). Joab soon took his revenge upon his rival, Amasa having failed to appear at the appointed time. David commissioned Abishai (2 S. 2:18) to go with his men in pursuit of the rebels, and Joab naturally joined the party. The cousins met at Gibeon, and while Joab was pretending to give Amasa a friendly *shalev*, he gave him a deadly blow² (2 S. 20:8-10). The paragon is not interested enough in the unfortunate man to tell us whether he ever received an honourable burial (? 2 *אֶשְׁכָּחָהּ* [B once], *אַשְׁכָּחָהּ* [A once]). See SEFEA, ii. 1 (end).

His death is referred to in 1 K. 25 ἀμεσσα [B], -σσα [I], ἀμμεσα [A] and in 32 (ἀμεσσα [B]; A omits). (The β of ἀμεσσαβ in 1 Ch. 217 [B] may come from the following Hebrew word.)

2. (ἀμασ[ε]ίας [B.M.]), an Ephramite, temp. Abaz (2 Ch.
2812f).
T. B. C.

AMASAI (אִמַּסַּי, perhaps rather to be read אִמַּשַׁי, Ammishai [so We. *II* Cr²¹ 24, n. 2], cp אִמַּשִׁי in 1 Ch. 6:23 35; אִמַּסַּי [B.L.], -ע [S]). 1. A name in the genealogy of Kohath (1 Ch. 6:25 [10], אִמַּסַּי [B.], -מַסַּי [A.], -סַי [L.]; 1 Ch. 6:35 [20], אִמַּשַׁי [B.], -מַש [A.]).

2. Chief of David's 'thirty,' 1 Ch. 12:18 [19]; see DAVID, § 11 *a* iii., to whom the Chronicler ascribes an obviously not very ancient poetic speech.

It has been very anciently identified with Amasa (e.g., by Ew.) and with Abishai, who is called Abisai in 1 Ch. 11:20. Kienhorst corrects to 'Abishai' (*SCHOT, ad loc.*). Neither Amasa nor Abishai, however, occupied the rank of chief of the thirty, according to the lists in 2 S. 23 and 1 Ch. 11. The matter is of no great moment, since the connection in which Amasai is mentioned in 1 Ch. 12 does not permit us to use the passage for historical purposes. The Chronicler's conception of Saul's fugitive son-in-law is dominated by the later view of David as

¹ Most critics change *Abishai* here and in n. 7 to 'Joab,' (the reading of Pesh.), but perhaps mistakenly. See *Rev. SBOT*, ad loc.

² See Dr., or Bu., for restoration of the text.

AMASHAI

the 'anointed' of Yahwe and the founder of the one legitimate dynasty (We. *Israhel* 1).

3. A priest, temp. David (1 Ch. 15:24).
4. Ancestor of Maluth, a Kohathite Levite, temp. Hezekiah; probably a family name; cp no. 1 (2 Ch. 29:12; *מאשי* [BAV], *אמשי* [L]).
5. See below, AMASHAI.

AMASHAI, or rather, as in RV, **Amashai** (אֲמָשַׁי), where **א** implies a reading אֲמָשַׁי based on a false derivation from אֲמָשַׁי, perhaps really to be read Ammishai, see AMASAI, a priestly name in the post-exilic list of inhabitants of Jerusalem (see EZRA, ii. § 15 d), Neh. 11:13 (אֲמָשַׁי [BAV], -מאי [L], -מכאי [M]) = 1 Ch. 9:12 where the name is MAASAI, AV MAASAI (מַאֲשַׁי [Ba, Gi], some authorities מַאֲשַׁי [Gi], MAACAIA [B], -מאי [L], MAACAI [M]; *מאשי*, in Neh. *מאשי*).

AMASIAH (אֲמָשִׁיָּה, § 29. 'Yahwe bears,' cp Amos; MAACAIA [B], AHAC [M], AMACIA [L]), one of Jehoshaphat's captains (2 Ch. 17:16).

AMATHEIS (אֲמַתְהִישׁ [B]), 1 Esd. 9:29 AV = Ezra 10:23 AMTHAI.

AMATHIS (אֲמַתְהִישׁ [A]), 1 Macc. 12:25+ AV, RV HAMATH (q. r.).

AMAZIAH (אֲמַזְיָה, and in nos. 2-4, אֲמַזְיָה, § 29. 'Yahwe is mighty,' cp Amos; AMACIA [BAV], -מאי [L], -מכאי [M], -מכאי [L]).

1. b. Jewish; father of Uzziah and king of Judah c. 796-780 B.C. (see CHRONOLOGY, §§ 35, 37) 2 K. 14:20 2 Ch. 25. Two points in his favour are mentioned in Kings—viz., that he punished his father's murderers and that he reconquered the Edomites who had revolted (see EDOM, § 8; JORDAN, 2). Whether he was to any extent successful against that restless and warlike people has indeed been doubted, but on grounds which will not bear examination.

Am. 1:11, is, in fact, more than probably a later insertion (see Amos, § 4), so that the inference drawn from this passage by Stade (in 7) and Kittel, that Amos knew of no great calamity befalling Edom in recent times, falls to the ground.

Amaziah's unfortunate challenge to Joash king of Israel (who treated him, according to the narrative, 'as a good-natured giant might treat a dwarf,' 2 K. 11:8 ff.) ended seriously enough, in the strengthening of the old supremacy of northern over southern Israel (see ISRAEL, § 31). It is quite possible that the Edomites took advantage of the weakness of Judah to recover in some degree their independence; but of this we have no information.

The Chronicler assures us (2 Ch. 25:14) that, on his return from the sanguinary battle in the 'valley of salt' (cp 2 K. 11:7), Amaziah adopted the worship of the Edomitish deities, forgetting that such an act would be possible only if the Edomites were either the masters or the allies of the people of Judah.

Like his father, Amaziah died a violent death; possibly, as Wellhausen, Stade, and Kittel suppose, the conspiracy against him was not unconnected with the disgrace which he had brought on his country. The Chronicler's treatment of Amaziah's reign is of special significance for the Chronicler's period (see Bennett, *Chron.* 413-417, and cp Kue. *Fint.* § 51, n. 4).

Sources. The account given in Kings is of composite origin. 2 K. 11:8-14 comes from a somewhat unfriendly source, which may be of N. Israelish origin. The rest of ch. 11 belongs to the Deuteronomistic compiler, who lays stress on Amaziah's better side, and who at the close of his story probably makes use of the royal annals.

2. Priest of Bethel, temp. Amos (Am. 7:10-12). See Amos, § 1.
3. A Simonite (1 Ch. 4:34 *אמשי* [BAV], -משי [L]).
4. A Merarite, temp. David (1 Ch. 6:45 [3] *אמשי* [2] [B], -משי [L], -משי [A]).
- T. K. C.

AMBASSADOR the EV rendering of the following three Hebrew words:—

1. *Mal'akh* (מַלְאָךְ) in 2 Ch. 32:21 (*προσβυρς*), more properly 'interpreter' (as EV in Gen. 42:23 (*ἐρμηνεύς*), in Is. 43:27 [RV mg., *ambassador*, *ἀποστολὴ* [BAV], but Ap. Sym. *ἐρμηνεύς*], and in Job 33:23 (*מַלְאָךְ* have *בְּרִיָּה* [BAV]).
2. *Mal'akh* (מַלְאָךְ) in 2 Ch. 33:21 Is. 30:33 7 Ez. 17:15 (*ἀγγεῖος* to send; cp BDB *Lex.*, ad loc.; *ἀγγεῖος*, a word used indefinitely

AMBER

of any messenger; so, e.g., of a priest (cp Mal. 2:7), a prophet (Is. 42:19; cp *ἐρμηνεύς*), or frequently an angel. *Mal'akh*, accordingly, often approximates to the idea of 'ambassador'; cp the instances sent to Edom, when king of the Amorites, and Ammon (Num. 20:14-21 *προσβυρς*, Judg. 11:12; EV 'messengers').

3. *Shil* (שִׁל) in Is. 18:2 (*ἀμπα* [BAV], and Th., but Ap. *προσβυρς*, Sym. *ἀποστολὴ*, 'hostages,' cp 1 Macc. 1:58 7:52, etc.), 18:37 RV (AV 'messengers'; *προσβυρς*). Jer. 49:14 Pr. 13:17 25:13 (EV in the last, messenger, *ἀγγεῖος*) and Ob. 1:1 (*προσβυρς*, a confusion with *שִׁל* or *שִׁל*). The demon, viz. *שִׁל*, 'to feign one's self an ambassador,' found in MT of J. is, 9 (cp EV) should be read *שִׁל*, 'take provision' (so RV mg. after most versions; cp Bennett, *Isaiah*, ad loc.).

In the Apocrypha 'ambassador' represents *προσβυρς*, *προσβυρς* in 1 Macc. 6:72 11:4 11:41 (*προσβυρς* [RV]) 40 (*προσβυρς* [VD] 13:17 2 Macc. 11:41 (in 1 Macc. 13:42 AV has 'messengers'), and *ἀγγεῖος* in Judith 3: AV (BA here and EV elsewhere 'messenger'). In N. I the word occurs in 2 Cor. 5:20 Eph. 6:20 (*προσβυρς*), Philom. 9 RV mg. (*προσβυρς*).

A distinction between messengers and diplomatic agents naturally presupposes an acquaintance with statecraft hardly possible in Israel before the monarchy, and even in David's time emissaries from one court to another were liable to be abused, although the punishment inflicted upon the offenders may suggest that ambassadorial rights were beginning to be recognised (see 2 S. 10:1 ff.). The first use of *שִׁל*, apparently the only approach to a specific word for 'ambassador,' naturally belongs to the time when Israel had been forced into diplomatic relations with Egypt and Assyria (of whose frequent intercourse with Israel at a much earlier period the Amarna tablets tell us so much). From the nature of the case *שִׁל* is presumably a loan-word.² The employment of the term *mal'akh*, 'interpreter,' is the more interesting since Aramaic was the language of diplomacy for Assyrians and Hebrews; cp Is. 36:1, and see ARAMIC LANGUAGE, § 2. See Post, KAN-HAKTI II, S. A. C.

AMBER (אֲמַרְבָּ, in pause [Ez. 8:2, where, however, Co. regards it as a gloss, אֲמַרְבָּ]).

Cp Egypt. *hsmu*, 'electrum' (cp 'haunze'; see EGYPT, § 36), last note, also Lag. *Ubers.* 221; but cp Eranm. *ZfA* 46 115 [2], and also Eranm. *ib.* 31 454; against

1. **Hashmal** the usual explanation of *שִׁל* see König, *Lehrbuch*, = **amber**. 1. 9. Fr. Del. in *Is.* Del. *Ezekiel* xii. identifies the Egyptian word quoted, and also Heb. *שִׁל*, with Ass. *hsmu*, which he defines in *Is.* 17:1 B as a costly brilliant metal (C). So Hommel, *Die Semit. Wörter* 1450.

The Heb. *hashmal* occurs thrice (or twice; see above) in Ezek. 1, and is rendered by the EV 'amber.' *שִׁל* has *ἤλεκτρον*, Vg. *electrum*, a rendering which most scholars (e.g., Smend) have adopted, supposing, from the context, that some metallic substance is meant, and understanding *ἤλεκτρον* to mean here a certain alloy of gold and silver (Egyptologists have even the same meaning to the apparently related Egyptian word). This interpretation, however, rests upon a mistake as to the ancient use of the term *ἤλεκτρον* (see also EGYPT, § 36, last note).

It is true the name is sometimes used of a metallic substance. Thus, to cite the earliest case, Sophocles (*Trach.* 1036-38) makes Creon speak of *electrum* from Sardis (*τοῦ ποταμοῦ Σαρδῶν ἤλεκτρον*) and Indian gold (*καὶ τοῦ Ἰνδικοῦ χρυσοῦ*), doubtless meaning by the former what the Greeks commonly called pale gold (*λευκὸς χρυσός*), a natural alloy of gold and silver (one part silver to three or four parts of gold) found native in great abundance in Lydia. That *electrum*, however, was not a term commonly applied to such an alloy seems indicated by the pains which Strabo takes to explain the term as used in metallurgy of the residuum (*καθάρσις*) left after the first smelting of gold ore (*ἀργύριον*). The

1. *שִׁל*, 'ambassador,' appears in *ש* in four other places in Is., viz. 13:5 (for *שִׁל*, a *šing*) 21:2 (*שִׁל* for *שִׁל*) 39:1 (between *שִׁל* and *שִׁל*) and 63:9 (for *שִׁל* compare Dan. ad loc., Che. *Intr.* Isa. 35:5).

2. The connection with Ar. *šār*, 'to go' (Gies. *Is.*), does not commend itself. It may perhaps be compared with Ass. *širātū*, 'stick' or 'sceptre' (see Del. *Is.* *III R.* 2:7); the official derives his name from the emblem of office, originally the courier's stick (C).

3. 14:27, 'and out of the midst thereof as the colour of amber,' I saw as the colour of amber'; 8:2 'as the appearance of brightness as the colour of amber.'

4. For a rendering *šil* in Ezek. 14 see Field, *Hexapla*.

himself usually employs the expression 'pale gold' when he alludes to the native alloy. Sophocles, too (L.C.), shows that he is employing the word in an unusual and extended way, by appending the qualifying phrase 'from Sardis.'

Usually the word has quite another meaning.

In Homer, e.g., where the word occurs three and is significantly applied to an article trafficked in by Phoenicians, the trader who captured Lameias is described (Od. 15.460) as laying a golden necklace (αὐτὰ δ' ἡλεκτροῖσι ἐσπύει) string with pieces of electrum (similarly in Od. 18.26, ἡλεκτροῖσι ἐσπύειν). The use of the term in the plural in these passages forbids us by any possibility taking it as meaning the gold and silver alloy.

If, then, by electrum the versions do not mean metallic electrum they must mean amber. There are, however, two kinds of amber, and it remains to consider which is meant. The one, usually a dark red (rarely of a light colour), is found in the south of Europe (Catania, Reggio) and in the Lebanon; the other, usually of a yellow or golden colour, but occasionally darker in hue, has from ancient times been met with in great abundance on the shores of the Baltic (whence our chief modern supply is derived), and also occurs on the coasts of the North Sea. As the Phoenician had red amber thus at his very door, he may early have learned to employ it for purposes of art and ornament, just as he learned his art of dyeing with purple from having the murex in abundance by his shores. Moreover, red amber is, as stated above, also to be found in Sicily, and may have been procured thence. As increased demand called for an increased supply, traders, sailing round the coast of the Aegean in quest of new fishing grounds for the purple-fish, would naturally search keenly for fresh supplies of the precious substance, for the ancients prized amber far beyond its modern value.

Its power of attracting light substances, and the fact that when warmed it emitted a faint perfume, invested it for them with an element of mystery. How far they actually ascribed to it certain medicinal properties, as is still the case in the East with ambergris—an animal substance that has lent its name (adopted by us from the Arabs) to amber—it is impossible to say. As these two substances, which have really nothing in common save the power to emit a kind of perfume, have been called by the same name, the fact that ambergris is prized as an aphrodisiac may perhaps indicate that there was some belief that amber (electrum) possessed some similar potency. This is actually stated by Pliny (VII.311), who tells us that in his own time the peasant women in the regions north of the Po wore amber necklaces, chiefly as an ornament, but also for medical reasons, and goes on to enumerate a number of ailments for which it was regarded as a specific, either taken as a potion or applied externally. That its property of attraction (whence our modern word electricity) was early known to the Greeks is proved by the notice of Thales.

But how would red amber naturally give a name to a metallic electrum? To the eye of the Greek the

essential difference between pure gold and the alloy (to which we have in

English confined the name electrum)

being the pale colour of the latter (λευκὸς χρυσός), any name which he would apply to it to differentiate it from pure gold would naturally be one which would indicate this paleness. The reddish amber of the South would not furnish such a name, having no resemblance in hue to metallic electrum. But the yellow Baltic amber, varying as it does in shade from almost white to a bright golden, would give a fairly accurate description of the alloy, whose hue varies with the proportion of its component parts. Similarly when, in the second passage quoted above from the Odyssey, a necklace of gold set with pieces of amber is likened to the sun (ἡέλιος ὤς), the golden (Baltic) amber answers to the description far better than the red. We may assume, then, that from remote ages supplies of Baltic (yellow) amber as well as of red amber were available.

Nor is this a mere hypothesis. It has been removed from the realm of probability into that of established fact, by the finding of amber in the tombs discovered at Mycenae by D. Schliemann in 1876, and of beads of the same material in his more recent excavations at Tiryns. As the red amber and the Baltic amber differ essentially in chemical composition, Dr. Helm, an eminent chemist of Dantzig, has been able to prove

by actual analysis that this amber is the Baltic variety (Schliemann's *Tiryns*, 1880, App. p. 372).

It was, doubtless, from the German tribes along one of the highways which were in constant use in historic times that the ancient supplies of Baltic amber were obtained. We know that down to the time of Herodotus (about 430 B.C.) the Greeks had not as yet opened up any line of communication with the amber coasts from the side of the Euxine.

Herodotus visited Olbia, and though he has given a pretty full account of those regions, mentioning a trade-route leading towards the East, and though we know from his own words (3.113) that the amber trade was a subject which had excited his attention, he expresses the commonly received opinion that it was obtained at the mouth of the Eridanus (114).

Neither does Baltic amber seem to have reached Greece in his time by any Russian-Balkan route (59). Down to the time of Theophrastus (315 B.C.) it was entirely through northern Italy that the Greeks got their supply of it.¹ The lake-dwellings of Switzerland and the valley of the Po have yielded abundance of beads of Baltic amber, and similar beads are well known in the tombs of central Italy. We need have little hesitation, therefore, in believing the statement of Pliny² (VII.344) that it was brought by the Germans into Pannonia and thence reached the Veneti, who dwelt at the head of the Adriatic.³ As the main lines of commerce change but little through the ages, it was probably by this route that the amber beads reached Mycenae and Tiryns in the bronze age, and articles of the same kind may even have reached Palestine. The bead found at Lachish, however, has been proved, since this article was in print, to be not Baltic amber, but, like that found at Tell-Zakariya (PEFQ, April 1899, p. 107), a resin, and no trace of amber has yet been found in Mesopotamia (Per. Chipp., *Art. Chald.* 2362). Nevertheless it is possible that even the yellow variety may have reached Palestine in the sixth century B.C., and the view of the ancient versions that the Hebrew *hashmal* indicates this substance may be correct.

W. R.

AMEN (אָמֵן);⁴ in G usually ἁγνοῖτο;⁵ in work of Chronieler ἀμῆ, and so in NT very often,⁶ an adj.⁷

1. In OT, signifying stability, used only as an interjection expressive of assent of one kind or another.⁸ Three stages may be distinguished: (1) *Initial Amen*, referring back to words of another speaker; probably the earliest usage, occurring even in common speech⁹ (1 K. 1.36 Jer. 28.11 s., the only certainly pre-exilic Amens).¹⁰ (2) *Detached Amen*, the complementary sentence being suppressed (Dt. 27.15-20 Neh. 5.13; double in

1 They appear to have confused with it a stone called ἀγροῖον or *agrios*; as so often occurs they mistook the region whence the article was transmitted to them for the actual place of production (Theophr., *De lap.* 16).

2 Pliny's statement is confirmed by a remark of Herodotus (1.106) from which it appears that the only knowledge then obtainable respecting central Europe came by way of the Veneti, a fact which shows that the Greeks knew of a line of communication in this direction.

3 Pytheas of Massilia had, in the fourth century B.C., found the Guttones gathering it and giving it in trade to the Tylones.

4 It probably occurs in twelve places in the Hebrew, for in Is. 65.19, although Ap. (ἀπεσπύειν), Sym., Pesh., and Vg. have *amen*, it should probably so (Che. Di. Du. Rys. in *HS*).

5 Perhaps Targ. Jon. אָמֵן (or) be vocalised otherwise, perhaps אָמֵן (as in Is. 25.1, where indeed the Gk. Vss. [but Sym. not, as usual, ἀμῆ, but πιστεῖ] and Vg. read *amen*).

6 *אָמֵן* read also, in a corrupt text, in Jer. 17.11 and in Jer. 31.9. EV has *amen* also; RV even in Jer. 11.5. It occurs in six places in G Apoc. (for Jude. 13.20 cp. Eph. Pesh.). Vg. adds Tob. 9.12 13.23 and 2 Esd. (Neh.) 13.31; in Eccles. 50.2, it is probably late.

7 Eight (eleven) times, ἀγῆσθαι once.

8 There is much variety of text. TR has it in some 119 places, of which RV rejects 19 (see below, § 2).

9 See, however, Baril. *NB* §§ 50 and 76.

10 For three kinds see *Shibboleth* 30a (mid.).

11 It seems most likely that in Jer. 3.19 G read אָמֵן as אָמֵן = אָמֵן אָמֵן.

12 G has it also in Jer. 3.19 15.11 (Is. 25.1 is not pre-exilic).

AMEN

Nu. 5:22 and in Neh. 8:6 (= 1 Esd. 9:47). Amen must have been in liturgical use in the time of the Chronicler (1 Ch. 16:36 = Ps. 106:1). Later, but very similar, are Judith 13:2, Tob. 9:12 (Vg.), and Tob. 8:6. With the fact that none of these relates to temple service may be compared, e.g., Jer. 18:14, 14c. The Chronicler, however, appends Amen (1c.) to extracts from Ps. 105 and 96¹. (3) An apparent final Amen, there being no change of speaker; frequent from NT Epist. onwards, but in OT only (2) in subscription to first three (four) divisions of Psalter and 3 and 4 Macc., and (4) at end of prayer, Neh. 13:6 and Tob. 13:13 (both only in Vg.). In Tob. 14:15 (B8A) we have almost a fourth stage: (4) a simple *subscriptio* Amen, like that, e.g., of the TR of Lk., without, strictly speaking, any preceding doxology.²

Just as Amen translates, as we have seen, by $\gamma\epsilon\mu\alpha\tau\omicron$ in the Law, the Psalms, and even the Psalter, but has in NT Lk. often avoids (omits or translates) Amen, and so even Mt. and to a less extent Mk. Stage (1) is represented by only Rev. 7:11 + 19:4, 22:20; (2) by Rev. 5:14 and the usage testified to by 1 Cor. 14:16; (3) by usage of Epistles (fifteen doxologies, mostly well-attested; 2 nineteen blessings, mostly ill-attested).³ There is no real instance of (4).

The Amens of the Gospels (fifty-two in Synopt., twenty-five in Jn.) are a peculiar class, declared by Delitzsch⁴ unparalleled in Hebrew literature: initial Amens⁵ like group (1), but lacking the backward reference. The sayings that they introduce are only sometimes at all related to what now precedes them. The double Amen (twenty-five times) of the Fourth Gospel, which occurs even in Jn. 13:33 (= Mk. 14:30, etc.), Delitzsch tried (i.e.) to explain as Aram. *amen amēna* (= *amen amen'na* = Amen Amen), which sounded like Amen Amen ; but Dalman argues strongly against this.⁶ For a suggestion of a different kind see GOSPELS, § 50 n.¹⁰

The key to Rev. 3:14 ($\delta\ \text{Amen}$), 'the faithful and true witness,' is doubtless the traditional Massoretic pointing of Is. 65:16 (at least as odd as Sym.) with possibly a reminiscence of the practice of Jesus and of 2 Cor. 1:20. Here, again, Amen is neut., and the meaning is not quite so clear; but probably Amen has about the same meaning as in 1 Cor. 14:16.

The liturgical use of Amen, vouched for in apostolic times by this last passage, is attested, as regards the Eucharist, by Justin Martyr for the second century (*Apol.* i. 65, $\delta\ \text{παππὸς} \lambda\alpha\beta\epsilon\iota \epsilon\upsilon\epsilon\theta\eta\kappa\epsilon\iota \lambda\epsilon\gamma\omega\upsilon\ \text{Amen}$), and, e.g., by Jerome two centuries later (preface to Bk. ii. of *Com. in Ep. ad Gal.*, 'ad similitudinem . . . tonitruum *amen* rebat'), while the introduction of Amen in the liturgical service is probably later. Post-biblical Judaism greatly developed the theory of the use of Amen.¹¹ He who pronounced it was greater than he who blessed. It opened the gates of heaven.¹² It must not be uttered in a slovenly or careless way, nor yet prolonged too much.¹³ The synagogue still uses it,¹⁴ and Malactomedans are in the habit of adding it after reciting the first *Sura* of the Koran.

For references to older literature see, e.g., Vigouroux, *Bib. Dict.*, s.v.; for references to passages in Talm. see, e.g., Kohut's *Aruch*, s.v.; for usage of temple doxology (Gratz, *MGH*, 1872, pp. 431-96, and *Palmer* 62 f., 91 f.); for Rabbinic treatment, e.g., Jehuda Khahis, *Seder ha-Mishar*, Pereq. 4 (ed. Mantia, 42); Josef Caro, *Beith Josef* (Orach-Hajim) ed.

4. Literature. Gratz accordingly argues that our Psalms are a synagogue arrangement.

¹ Gratz accordingly argues that our Psalms are a synagogue arrangement.

² This is hardly true of 8.

³ Except Judith 13:20.

⁴ W & H give, in square brackets, also a final 'Amen.'

⁵ All except 2 Pet. 3:13.

⁶ Also Rev. 17 (after 14c); neither doxology (?) nor benediction. Rev. 1:15 1 Jn. 5:21 2 Jn. 13 are excluded in RV. Cp *JGK* 98, n. 2.

⁷ Talm. Stud. ix. *Amēn* *Amēn* in *ZI. Th.*, 1866, pp. 422-4.

⁸ All in sayings of Jesus. The five finals (Mt. 6:13; 28:20 Lk. 24:49; Jn. 21:25 Mk. 16:7c) are wanting in the best MSS.

⁹ See Dalman, *Gram.* 103 (p. 71-77 4th, 228 14th).

¹⁰ See now also Dalman as cited below, § 4.

¹¹ See *Shebu'oth* as above and many other places. For an example of 'Amen' in conversation see *Abot* 2:4a.

AMMI

Venice, 1550, 1 fol. 143^{ab}. On the whole subject see H. W. Hogg, 'Amen, notes on its Significance and Use in Biblical and Post-biblical times,' *JGK* 9:1-24, 1901, and in connection therewith Nestle, 'The Last Word in the Bible,' *Z. v. vort. u. Lom.*, January 1907, p. 175 f. To the above must now be added Dalman, *Die Worte Jesu* 135-7 (1908).

AMETHYST (ἀμέθυστος, ἀμεθυστος [BAF], ἀμέθυστος [L.], *amethystus*, *أمethyst*). The amethyst is a variety

of quartz (SiO₂) or rock crystal (crystal) of a clear purple or bluish violet colour from iron peroxide or manganese, often marked by zigzag or undulating lines (the colour being disposed in clouds). The Greek name (Rev. 21:20; cp Ex. 28:19 = 39:10 [36:10 in B]), which was adopted into Latin, implies, in ancient belief that the wearer of an amethyst could drink wine freely without fear of intoxication. The source of the belief is found in Theophrastus (*Lap.* 31), who is the earliest Greek writer to mention the stone, which he calls *τὸ ἀμέθυστον*. It is a simple case of sympathetic magic, for Theophrastus says (*Lap.* 31) *τὸ δὲ ἀμέθυστον οὐρανὸν τῇ χροῇ*; it is wine-coloured, hence its amuletic potency against the effects of wine. Greek engravers, accordingly, not infrequently cut Bacchanalian subjects on this stone. Hence the point of several epigrams in the *Anthologia Graeca* (e.g., ix. 752, on the ring of Cleopatra, adorned with Methē, Drunkenness; and ix. 748, on a gem engraved with a figure of Bacchus). It seems also to have been believed that the amethyst caused those who wore it to dream, or to have prophetic dreams (cp the extract from Burhān in Lag. *Matth.* 1:236). Hence the engraved *ahlimi* of the 'breastplate' of P (Ex. 28:19 = 39:12; explained by Kimchi as the dream-stone; *מִשְׁכָּנִי* from *דָּמָה* 'to dream') has been commonly identified with the amethyst (thus apparently B), so much engraved by the Greeks. Cp PRECIOUS STONES.

Del., on the other hand (*Heb. Lang.* 36 n.), derives the name from *ahlimi*, an Aramaean people and district often mentioned in Babylonian and Assyrian texts, supporting the suggestion by referring to Semaherib's repeated mention of Arimena and its neighbourhood 'as a rich mine of certain precious stones'. Bonelli considers it an Egyptian loan-word (*akhnūme*), while Di. connects it with *amēn*, the mallow, and adopts the explanation 'green malachite.'

W. R.

AMI (אִמִּי), Ezra 2:57 = Neh. 7:59 AMON (q.v.).

AMINADAB (אִמִּינָדָב [Ti. VII]), Mt. 14 and (אִמִּינָדָב [WH], mg. אִמִּינָדָב) Lk. 3:33¹ AV = RV AMINADAB (q.v.).

AMITTAI (אִמִּיטַי, § 52, from אִמִּיטַי, 'truth,' perhaps a theophorous compound; אִמִּיטַי [BAF]), father of the prophet Jonah (2 K. 14:25 Jonah 1:1).

AMMAH, The Hill of (אִמִּי הַטֵּל עַמִּי; ο ΒΟΥΝΟC ΑΜΜΑΝ [B], -μα [V], ΕΜΜΑΘ [L], ΟΜΜΑΤΟΝ or ΑΜΜ. [Jos. Ant. vii. 13.], an unknown hill 'that lieth before Giah' (?), where Jacob and Abishai stayed their pursuit after Almer (2 S. 22:4). From a comparison of 17:24 and 25 it is probable that we should restore the name also in 17:25 for 'one hill,' AV 'an hill' (אִמִּי הַטֵּל עַמִּי).

See Bn. (*SPT*), Sam. *ad loc.*, following We.'s suggestion that the two hills are the same. Otherwise Klo., who in 17:25 conjectures אִמִּי (אִמִּי), the ascent of Admah.

In 17:24 Sym. (vamp, gully) Theod. (ὄρεα γωγος) and Vg. (*agueductus*) give the word a meaning which it bears only in post-biblical Heb.; moreover, since the word אִמִּי has no article prefixed, it cannot be an appellative here.

AMMI (Hos. 2:1, and, in Lo-ammi, 2:23 [23]). See LO-RUTHAMAH.

AMMI, Names with. The element 'ammi' (אִמִּי) or, at the end of words, 'am' (אִם) has been interpreted in

three different ways viz., as meaning (1) [my] people, or (2) [my] kinsman or uncle, or else as being (3) the proper name of a god.

So long as this group of names¹ was regarded by itself in the light of Hebrew philology alone,

¹ The exact limits of the group are uncertain; for in those cases of several names that have been included in it, it is open to doubt

AMMIHUR

AMMON

Ἄνθρωπος δὲ ἰσὺς τοῦ γεννηθέντος. 'He received His new text, however, appears to regard the name of the Father of the Animatees as Ben-minim (son of my kindred), i. e. 'I should be noted in this connection that the *ἄνθρωπος* 'genitive' in the *ἄνθρωπος* of the *ἄνθρωπος* 'minim' father'. The *ἄνθρωπος* 'animatees' and as they stand examples of 'paganism' in the *ἄνθρωπος* 'minim' point the way, however, to more 'prophetic' and 'new' and we may 'devise' and 'both' 'I then' and 'of' 'I then' 'kindred' in 'I then' 'minim'.

[illegible]

2. Land and People.

ful value, since the edition *Index Hieronymus* of uncertain origin, and may be no longer in its original form (see *Rev. Commun.* 84), and esp. *Die AGS* 123, *Kat. bib. h. 2* 10. At any rate, all that *Su 21* (esp. *Index Hieronymus*) attests is that the Ishmaelites conquered the land of the Amorites 'from Amur unto Laddak' (that is) into (the land of) the Ammonites, and, as the same version continues, 'the border of the Ammonites was Jazer' (so *Lw.*, *Dn.*, *Nobd.*, reading *גזר* with *Boeth.* instead of *גזר*), i.e., the frontier town of the Ammonites towards Ammon was Jazer (see p. 10). According to this statement, the Ammonites occupied the east of the district now called *Belka*, a view which accords excellently with the easterly position of the ancient capital city *Rabbah* or *Rabbath Ammon*, and is no doubt accurate for the period to which *Isb.* belongs.

Little is known of the social condition of this people; but there is nothing to suggest a high degree of civilisation. There were no doubt other 'cities' besides Rabbath (Judg. 11: 32, 38, 41); but they were too insignificant to be mentioned by name. Although the district of Rabbath (see RABATH) was exceptionally well irrigated, the total area of tillage between the Euphrate frontier and the arid steppes to the east was narrow. Some of the Amorinitish clans must have ranged over these steppes as nomads. Their population, too, must have been comparatively small. According to all analogies they would enter from time to time into loose and shifting alliances with the neighbouring tribes; so that their fighting strength would be subject to great and sudden fluctuations.

3. Traditions. The real history of the Ammonites does not begin till the time of Saul, though we have one very interesting and probable tradition from the legendary period of the Judges (see below in *Leubethan*).

We do indeed hear, in a passage that sounds like history (Gen. 14.5), of a people, called Zuzim, whom Chedorlaomer "smote" (Hunt² (222) a name which is most probably corrupt (see 2.1.1.1, ii), but which some regard as another form of Ammon; and it is tempting to identify the *Zuzim* with the *Zamzumim*, whom, according to Deut. 2.20, the Ammonites in early times possessed. But what we hear of the *Zamzumim* has a family likeness to the legends of other aboriginal races which are expelled by more powerful invaders, and the author of Gen. 14.4-5 (he did not write till after 527 B.C. (Kue, *Heb.* 1.34)) in his time there were various influences at work to render the accurate writing of history, and it is even doubtful whether we can safely accept what he tells us of the early

^t Cp also Nestle, *Ilg.* 50, 187 (n).

2 For further evidence in favour of a Semitic god Ammu, see Hammd's review of Meissner's *Beitr. zum altbab. Privatrecht*, *ZDMG* 49 522 ff. (1951); but cf Jensen's criticism *JdL* 10 242 f. (1951).

1. $\frac{1}{2} \times \frac{1}{2} = \frac{1}{4}$

142

² Prof. Ryle (*Isaiah and Neh.* 115) thinks that 'the mention of the Ammonites, Moabites, and Egyptians together, suggests the influence of Deut. 23: 1-7 [42f.]'. Guthrie (*SAOT*) assigns the enumeration of the peoples to the Chir side.

(ענין) K. Hagenbach 1903

The Amurites are mentioned also in the lists of Canaanitish peoples subjugated by the Israelites (Gen. 15:2; Ex. 33; and elsewhere). The lists commonly include the Canaanites, Gergashites, Hittites, Hivites, Jebusites, and Peizzites, and once, in Gen. 10:12, the Kenites, Kenizzites, Kachmonites, and Rephaim, for which reference must be made to the separate articles. On the variation in the order of these enumerations, which are obviously rhetorical rather than geographical or historical, see Dr. Gress.

The passage in Amos (2:9b) is remarkable, because Amorite is used, precisely as by the Eblait (E), as a general term for the primitive population of Canaan, and because the Amorites, as an extinct race, are invested with a half mythical character (like the Anakim).

Wellhausen (*UH* 341 f.) regards the designation

deep, inscrutable'), post-exile priestly

Amorites as substantially synonymous with that of "Amunites," though not quite so comprehensive. According to this view, the Amorites, in the time of the biblical narrators, are still living in the land (*i.e.*, in the cities of the plain which were not occupied by the Israelites). The Amorites, on the other hand, are thought of as the old inhabitants of the hill-country E. and W. of the Jordan, now inhabited by the Israelites. Thus the Amorites belonged exclusively to the past:

AGARDH [1]. With following No. 100.

They hid their clay and ceased to be rich. (50:15). This explains how it is that, although under ordinary peaceful circumstances the Canaanites are spoken of as the old inhabitants of the land, whenever mention is made of war and conquest, the Amorites at once take their place (Gen. 18:1-6). So Moses' adversaries, Sihon and Og, are kings of the 'Amorites'; and, similarly, it is with the twelve kings of the Amorites that Joshua has to deal W. of the Jordan. Winkler however (6/1 52 ff.) disputes the synonymy of the terms 'Canaanites' and 'Amorites' on the ground that, as 'Amorite' letters show, the *ca* is found as *for* N., as *Sihon* or even further, was called *Ki-ahhi* (= *Canan*), and that

Der 40.5 RV. — See N. J. 3501X.

the Amerite population had its seat in the interior. He explains the distinction in the nomenclatures from the different local origin of the two writers (an Ephraimite and a Judahite respectively). On the extra-biblical facts, and on the inferences to be drawn, see CANAAN, §§ 3-9 and cp. PROPHETIA.

AMOS (אָמֹס, § 56, 'borne' by God¹); cp. AMASAI, Ar. *Omey*, Phoen. אַמַּוַס, אַמַּוַס [BAQ].

1. Prophetic activity.

Amos is the earliest of the prophets of whose discourses and predictions we possess written records with an accompanying statement of their authorship. On the external facts of his life we should know little but for the narrative digression in 7:6-17, which interrupts the series of prophetic visions on the fall of Israel. From a statement there assigned to Amaziah, 'the land is not able to bear all his words,' we may reasonably infer that Amos's ministry in the northern kingdom had lasted for some time, when it was brought to an abrupt close by an act worthy of the H. one Elijah. Amos, it appears, came forward at length in a place where success was more difficult than anywhere else, and uttered a prophecy to this effect: 'Jeroboam shall die by the sword, and Israel shall be carried away from its land.' It was in Bethel, the seat of the royal temple corresponding to that of Jerusalem in the south, and probably at some great festival, that Amos said this; and the priesthood, tutored to its royal hand, took the alarm. Not so much because the prophet had threatened the reigning dynasty (for he had not done so in the interest of any upstart noble) as because he had begun to weaken the moral courage of the Israelitish people (Jer. 28:1). With the half-contemptuous speech, 'Carry thy prophecies to those in the neighbouring country who may think them worth paying for,' Amaziah, the head priest of Bethel, by the royal authority, bade Amos fly from the land of Israel. Amos would not retire without a parting testimony. These are his significant words: 'No prophet, no member of a guild of prophets, in I'; that is, I am no ecstatic enthusiast, like the prophets of Bethel, whose prophesying is a trade, and whose oracles are mere heathenish divination (cp. Mic. 3:1). 'But a sheep-breeder am I,' he continues, 'and one who tends sycomore-trees' (see STICKEL, SYCOMORE); that is, I am above the sordid temptation to take fees. 'Yahwé took me from following the flock; Yahwé said unto me, Go, prophesy unto my people Israel.' That is, My prophesying has an immediate practical object which concerns the whole nation, and it is due to a moral impulse which has come straight from Israel's God. Then, in answer to the command, Prophecy not against Israel, Amos repeats his message with a startling personal application (cp. Is. 22:17-18).

Such was Amos—a strange phenomenon to the head priest of Bethel, as representing an entirely new type of prophecy. Whence then did this prophet come?

2. Home.

Was he a native of Israel or a 'sojourner' from Judah? The heading of the book (on the origin of which see below, § 4) at first sight appears to be decisive in favour of the latter view. Buddie has made it probable² that we should render 'Amos, who had been among the sheep breeders, (a man) of Tekoa.' In any case, Amos is represented as a Tekoite. Now, there is no trace in ancient or in modern nomenclature of more than one Tekoa (תְּקוֹא). That Amos belonged to the southern kingdom has, nevertheless, been doubted.³

¹ Read אָמֹס with Oort, We. (ἀμω, ἀπόλος); cp. 1:1. Mesha is also called אָמֹס (2 K. 3:4). The word refers to a breed of stunted sheep, valued for their fine wool (see SMITH).

² Kohut, *Script. Studies* 20:1-6 ff.

³ According to Oort, Amos was an Israelite who cultivated sycomores in his own country, but after his expulsion dwelt among the shepherds of Tekoa (*Ph. P.* 2:121, etc., 1910). Graetz (and so formerly Oort), following Kimchi, supposes a second Tekoa in the north.

on the twofold ground (1) that the interest of Amos is absorbed by (northern) Israel, and (2) that Tekoa lies too high for sycomores to be grown there. As to the first point, Amos, though deeply interested in Israel, is not, like the native Israelitish prophet Hosea, a sympathetic observer of the life and manners of the north. The inner impulse from above sending him to Israel is psychologically accounted for by the vastly greater importance of Israel as compared with Judah in religion, in politics, and, we may add, in literature. As to the second, Amos may very well have possessed a plantation of sycomores in some low-lying district in the Shephelah or in the Jordan valley (see SYCOMORE). We may accept it, then, as a fact, that Amos was a Judahite, and springing from a place famous in the time of David for the quick wits of its inhabitants (2 S. 11:3).

3. Preparation.

The situation, too, of Tekoa, was well fitted to develop the future prophet's capacities. From the extensive view which his own hill commanded, he would gain, at any rate, a sense of natural grandeur, though we must not infer from this that he was capable as a Tekoite of writing Am. 4:1 and the parallel passages.⁴ Not far off, he would meet with the caravans of the Dedanites (Is. 21:13) and other Arabian peoples, and would imbibe from them a longing to see other men and manners. Possibly, too, such an idiom as אָמֹס אָמֹס (1:3) may be explained from Arabian influence (so We.).⁵ Whatever the social position of Amos may have been, he was not tied to the soil, and may, before his journey to Samaria, have wandered, either on business or from curiosity, far away from home and have seen and heard much of which his neighbours were ignorant. To suppose this is not to deny that even the stayer at home had opportunities of hearing news,⁶ but to try to understand the alertness of Amos's intellect, the width of his knowledge, and the striking culture and refinement of his style. At any rate, it is plain that he studied thoroughly, on the spot, the condition of life and thought in the northern kingdom, and we must regret that we have no further contemporary traditions respecting him, than that contained in 7:6-17. One very singular tradition, indeed, we have, which appears to be a very late distortion of his story. It is the story (1 K. 13) of the man of God from Judah, who went to Bethel in the reign of Jeroboam I, and threatened the altar there with destruction by an earthquake (cp. Am. 3:1, 7:9-10). Though this teaches us much concerning a late view of prophecy, however, it affords no flesh glimpse of Amos.

A post-exilic editor says (Am. 1:1) that Amos prophesied during the contemporary reigns of Uzziah of Judah, and Jeroboam II. of Israel. Of

4. Notes of date.

Uzziah there is no express mention in the book; but the description of the careless ease of Jerusalem in 6:12 accords with the circumstances of his reign; to Jeroboam II. the prophet refers in 7:9, and his biographer in 7:10. The heading also states that the prophecy as a whole was delivered (*i.e.*, in its original form) 'two years before the earthquake.' Unfortunately, our only other authority for this earthquake⁷ in Uzziah's reign is about as late as this note (Zech. 14:4). It is no doubt plausible to defend its historical character by referring to 1:1 ('I wrought an overthrow among you') and by our prophet's vivid idea of earthquakes as one of God's means of punishment (8:8; cp. Is. 29:6). Am. 8:1, however, is certainly an interpolation, and it is not impossible that the rather too precise

¹ G. A. Smith (*HB* 115) has given eloquent expression to this view. In *Tekoa Prophets*, however, he admits the late origin of the passages.

² On the intellectual opportunities of Tekoa see STICKEL (*HB* 269-271), who makes 1-b to have been written in this district.

³ Robertson, *Early Religion of Israel* 230.

⁴ Kib. *Sam. u. Kib.* 21, and cp. KINGS, § 8, note.

⁵ Jos. (*Ant.* iv. 10:4) gives a long fabulous story about it.

statement in 1 is merely an exegetical inference from 7:19 (cp 7:8-8:2) which seemed to the editor to imply that Israel's punishment had been twice postponed, and that each postponement meant a year's grace (so G. Hoffmann; cp *Cairo* 1904, § 3). It is remarkable that the author of the heading, if he had access to tradition, did not rather refer to the solar eclipse prophesied in 8:9 in its present form. This seems to be the eclipse which an Assyrian list of eponyms assigns to the month Sivan 763 B.C.¹ It is less important that, according to the same list, pestilences ravaged Assyria in 765 (the year of a campaign in the land of Hadrach, near Damascus and Hamath) and in 750. Pestilence in the land of Israel is indeed mentioned in Am. 4:6, but it is described as 'after the manner of Egypt'. The Egyptian Delta was of course not the only source of pestilences; the Assyrian plague may have originated elsewhere. Still, it remains true that the period indicated by these last dates sufficiently accords with

5. Circumstances.

hints dropped in the Book of Amos. For example, the Israelites, according to Amos, have no apprehension of a speedy attack from Assyria. The circumstances of the period just mentioned enable us fully to account for this. Shalmaneser III (723-705 B.C.) had too much trouble with the land of Urartu (see ARAM, § 2, ASSYRIA, § 324), and his successor Assur-dan III (772-755 B.C.) had too many revolts at home to put down, to be dangerous to the kingdom of Israel. Assyria being thus occupied, it was easy for Jeroboam II to recover from Damascus (repeatedly humiliated at the time by Assyria) the districts which Hazael had taken from Israel. Hence, when Amos wrote, the extent of the Israelite dominion was 'from the point where the Hamathite territory begins (חֲמָתִי) to the torrent of the Arabah,' a definition which is presumably equivalent to that in 2 K. 11:25, which gives 'the *oz* of the Arabah' (עֵז הָאֲרָבָה), the Dead Sea. The prophet's hearers delighted to see themselves in this new prosperity, and boasted of the capture of LOTBIKAR and KARNAM in Gilead as a great military feat (see LOTBIKAR, and We on Am. 6:1). True, melancholy thoughts of the past would sometimes intrude: thoughts of the recent terrible earthquake, of the famines and pestilences, of the friends and neighbours lost in battle, and of the revolting cruelties of the Syrians and their Ammonitish allies in Gilead (1:3-11; 16:1-11). Nor is it arbitrary to connect the splendour and fullness of Israelite ritual in the prophet's time with the popular anxiety lest Yahwe should renew the 'tribes of the past'. On the whole, however, the tone of Israelite society is joyous and optimistic. As in Isaiah's earliest discourses, the upper classes appear as self-indulgent and luxurious, and, as in Isaiah, the women come in for a share of the blame (1:7, cp Is. 3:16). Not only the king (1 K. 22:5) but also the nobles have horses inlaid with ivory (3:15; cp 6:1). Feasting is habitual (6:4-6), and the new custom of half-reclining on the *dywan*² has been introduced at Samaria (3:6). The good old sentiment of brotherliness is dying away; oppression and injustice are rampant (2:6-8; 3:9-10, 15; 4:1; 5:1-2; 8:4-6). This indicates that great economic changes are going on (Isaiah makes the same complaint, 18:5). Side by side with this we notice a keen interest in the ritual side of religion (1:4-5; 5:1-2; 8:14-15). Idolatrous worshippers sing the praises of the uncomparable 'God of Jeshurun' (5:23; cp Dent. 33:26), and they think of his deliverances in the past, they even 'desire the battle day of Yahwe' (5:18). Amos, a stranger, alone sees below the surface of things. He does not, indeed, once name Assyria,³ and seems to have

no clear idea of the geography of the region 'beyond Damascus'; but every one knows what he means when he warns his hearers that Yahwe 'will raise up against them a nation' (6:14; cp Is. 5:26, where read '28:1' and 'will carry them into captivity beyond Damascus' (5:27). On the whole, we may probably date the original prophecies of Amos between 765 and 750 B.C.⁴

There are only two passages which may be regarded as inconsistent with this date, as referring to later events: 1:11 and 1:2. It is predicted that

6. Objections to 765-750 B.C.

'the people of Aram shall go into captivity into Kir,' which was fulfilled, according to 2 K. 16:9, on the capture of Damascus by Tiglath-Pileser III in 732. The prediction, however, was not meant to be taken so literally. 'Unto Kir' is evidently suggested by the tradition (9:7) that the Arameans came from Kir; the prophet cannot mean to lay stress upon such points as the locality of a captivity; otherwise, why does he describe the scene of Israel's captivity so vaguely? The 'fulfilment' in 2 K. 16:9 is obviously due to interpolation; the later view of prophecy differed from that held by the great prophets themselves. (2) The other passage is 6:2, which, as emended by Gieger⁵ (to make sense), reads thus, 'Pass ye to Calneh, and look; and go thence to Great Hamath, and go down to Philistia Gath; are ye better than these kingdoms, or is your region greater than theirs?' These places, says the writer, have already succumbed to the common enemy: how can Israel hope to escape? Calneh (not the Calneh of Gen. 10:6, but the N. Syrian city Kallan) was conquered by Tiglath-Pileser III in 733, Hamath by Sargon in 720, and Gath by the same king in 711.⁶ and the passage breaks the connection between 6:1 and 7, and is not in the rhythm which is so closely adhered to in 6:1-7. The verse must, therefore, be a later insertion, by a scribe or editor who had read Is. 10:9 (Calno = Calneh), and is properly a marginal gloss on the words, 'Woe to them that are at ease in Zion' (6:1). Observe that Great Hamath (H. Rabba) contrasts with the simple Hamath of 1:4.

A strict analysis is indispensable, both for a sound view of the origin of this book, and for a due comprehension of the great prophet himself.

7. Analysis of Book.

We must, therefore, test the common assertion that the book possesses such a true literary unity as Amos, when in retirement, might naturally wish to give to his remembered prophecies. So much, at any rate, is clear, that, as it now stands, the book has three well-marked divisions: (1) Chaps. 1-2:6 present a series of judgments on the peoples of Syria and Palestine, each framed on the same plan, and coupling the description of an unpardonable moral fault with the declaration of punishment. The most detailed of the accusations is that brought against Israel, which forms a striking culmination of the series. The vaguest and least impressive is Judah's, which comes next before Israel's, and somewhat spoils its effect. (2) Chaps. 3-6 seem at first sight to contain three discourses, each introduced by 'Hear ye this word' and closing with a prediction of national ruin. Upon a closer examination, however, none of the 'discourses'

¹ The reason offered for a later date (740-734) by Zeydner and Adelson (in Wildenhöft, *ibid.* 110) is insufficient. Any observer who was not blinded by a national religious belief could see that the activity of Assyria was only temporary, not permanent; that the year 765 saw the Assyrians on the northern border of Palestine. Besides, the events which accompanied the accession of Tiglath-Pileser III in 745 were of a exciting nature not to have suggested to Amos a fuller and more precise threatening than we find in his prophecies.

² On the former part of this verse see BETH-EDEN and AVEN, 2.

³ On 6:8 readings see KIR.

⁴ *Cairo* 1904, 207. Fourny's hesitation to remove 7:2 from the context which it disturbs (*IBL*, 1891, p. 62 f.) seems very needless.

⁵ Schr.'s view of Calneh (*COP* 2:143 f.; *HWB* 1-4) seems untenable (see CAHNER).

¹ See Schr. *COP* 2:143; Sayce, *IBL* 3:149; Schr. *KoP* 3:187, and cp *Cairo* 1904, § 24.

² In 3:2 render 'that sit in Samaria in the corner of a conch, and on the cushion of a *dywan*' (for 7022 read 2222, an obvious correction, which We. has somehow not made). See *CAH* 10:572.

³ According to 6:9, however, there is once an express mention of Assyria (3:9, אֲשׁוּר, אֲשׁוּר, for 7722, אֲשׁוּד).

proves to have more than a semblance of unity. The section may be analysed into ten loosely connected passages—3.1 f. 3.4-8 3.9-15 4.1-3 14 f. 16-13 5.1-17 5.18-27 6.1-7 6.8-14.

(3) Chaps 7-9. This is a series of five visions, interrupted, first by a short biographical elucidation of the third vision (7.10-15), and then by a threatening address (8.4-14), and followed by an evidently composite discourse, closing with most unexpected promises of the regeneration of Judah.

Now, if this summary is correct, it becomes impossible to maintain the true literary unity of the book. More than one editor must have been concerned in its arrangement, and the latest editor has had considerable difficulty in so disposing his material as to produce three portions, each one of a reasonable length. Considering that the book of the Twelve Minor Prophets comes to us from the post-exilic age (see CANON, § 39), and that the primary object of the later editors was not critical accuracy but

8. Post-exilic insertions:

Such an insertion we find at the very outset. The opening verse (1.2) has

been often viewed as the text of the following discourse; but it seems very ill-adapted for that purpose, for the object of the discourse is not to exhibit the connection between Yahwe and a privileged sanctuary, but to show that even Israel (which has so many altars of Yahwe, 2.8) shall be punished like the other nations. Nor is the elegiac tone of 1.2b at all in harmony with the cycle of stern declarations which follows. The truth is that 1.2a is borrowed from Joel 3 [1] 10a, where alone the words suit the context, and 1.2b has a close phraseological affinity to Joel and other late writings.² It is no argument to the contrary that in 3.8 Yahwe is said to 'roar' and that the phrase 'the top of Carmel' is used by Amos in 9.1; the editor had naturally made some slight study of the language of Amos. The reason of the insertion will be clear if we compare (a) 1.9 f. with Joel 3.2-6, (b) 1.11 f. with Joel 3.19, and (c) 9.13 with Joel 3.14. These passages can all be shown to be late insertions, and 1.2 can be understood only in connection with them.

First, as to (a) and (b) it will be noticed that 1.9 f. differs from 1.6 f. only in the substitution of 'Tyre' for 9. chap. 1.9 f. 11 f. 'Gaza,' and in the addition of the covenant of brethren. (Even if, with Winckler, we correct 7.3 in 7.9 f. into 7.22—i.e., the N. Arabian Musri [see MIZRAIM].—part of the following argument is still applicable.) It seems incredible that Amos should have condescended to repeat himself in this way, and doubtful whether the early Israelitish prophets knew anything about such an act as is imputed to Tyre in 1.9. And what can be the meaning of 'the covenant of brethren' in Amos's mouth? Many critics, indeed, have found in the phrase an allusion to the alliance between Solomon and Hiram (RV mg. refers to 1 K. 5: 9-11-14); but this was a purely personal connection, and lay far back in the past. We might also think of the covenant between the kings of Israel and Tyre presupposed in 1 K. 16.31 f.; but would the Elijah-like prophet Amos have been the man to recognise this? Moreover, this was a personal or family covenant, whereas the charge against Edom in 1.11, that he 'pursued his brother with the sword,' presupposes a true national covenant resting on kinship (cp. Mal. 1.2).

¹ Observe that between Am. 5.15 and 16 something analogous to 7.7-7.10 must have fallen out (7.7, 3.9 are an interpolation). 7.7, 14-17 should correspond to 7.7, 4.7-7.13.

² 7.28 metaphorically, as Joel 1.10; 7.28, as Joel 1.10 f. 2.22; 7.28, as Joel 1.12. Cp. also 1.2b as a whole with Jer. 9.10-9.23-25-27. Is. 33.9; Nah. 1.4 (all post-exilic passages except the first). See Ch. Intro. to WRS's *Proph. Isr.* xv. f. [Volz has lately expressed the same view (*Die post-exil. Jahresprophetie* p. 19 f.), which Nowack (*Kl. Proph.* ad loc.) does not refute.]

This view is confirmed by Obad 12, where 'in the day of thy brother' implies the same charge that is brought against Edom in the words quoted from Am. 1.11. Thus, the fault imputed to Tyre is that it co-operated with Edom in the time of Israel's distress, by making raids into Israelitish territory and selling captive Israelites to their immaterial 'brethren.' Was there ever such a time of distress for Israel between the age of David and that of Amos? It is, of course, the history of Judah, not that of N. Israel, that we have to search, for the claim to the overlordship of Edom was maintained by the Davidic family. The answer depends primarily on the results of our criticism of Chronicles. If we can regard the Chronicler as an only slightly prejudiced recorder of old traditions, we may believe that the Philistines and Arabians broke into and plundered Jerusalem (2 Ch. 21.16 f.), and conjecture that Tyrian slave-merchants drew their profit from the circumstances. Further, if, some time before that, the Edomites revolted from Judah and defeated King Joram (this, happily, is a fact attested not only in 2 Ch. but also in 2 K. 8.20-22), it is easily conceivable that Edomitish passion vented itself in a great slaughter of fugitive Israelites. Is it worth while, however, to defend the integrity of Am. 1 and the accuracy of the Chronicler by such a lavish use of conjectures? A prophet such as Amos was could not have fastened on such an offence of the Edomites to the exclusion of the cruel treatment of Edomites by Judahites referred to in 2 K. 11.7 (cp. 2 Ch. 25.12), and we ought not to imagine a case of special barbarity in the ninth century when there is a well attested one in the sixth. It was, in fact, at the fall of Jerusalem in 586 that the Edomites, who had no such stern moralists as Amos and Isaiah to reprove them, filled up the measure of their revenge, to the indignation of Jewish writers, who forgot the cruelties of their own ancestors. Hence, to explain Am. 1.11-12 aright, we must refer to Ezek. 25.12-35.3 Is. 34 Obad. 10-14 Ps. 137.7, together with Joel 3 [1] 19; and, to understand 1.9 f., we must compare (besides the passages just mentioned) the description of the offence of Tyre in Joel 3 (4) 2-6 (subsidiary evidence for the late date of Am. 1.11 f. is given below).¹ If it be asked, when these judgments on Tyre and Edom were inserted, the answer is, during (or much more probably after) the Exile, at a time when some fresh insult on the part of the Edomites reminded Jewish writers of earlier and deeper injuries (see ISRAEL, ii. § 14).

Next as to (c). Plainly, Joel 3 (4) 1-6 is the original of Am. 9.13. The opposite view would be inconsistent with the fact that Am. 9.13a is dependent on 10. chap. 9.8-15, the late passage Lev. 26.5a (see LEVITICS), Am. 9.13, however, is not a later insertion in the section in which it occurs. From 9.11 (or rather from 9.8) onwards, we are struck by affinities in expression or idea to works of the Babylonian and Persian periods, and by corresponding divergences from the style and thought of Amos.² That 7.7 cannot have been the conclusion of the prophecy is certain; but we have to regard 7.7, 8-15 as a post-exilic substitute for the original close. The editor cannot endure the idea of the final destruction of the whole house of Israel, and so he makes Amos declare in a strangely softened mood that only the 'sinful kingdom' (i.e., that of Ephraim) will be wiped out, whereas the less guilty Judahites will

¹ Notice (1) the vague description of the offence of Edom. Does it consist in the purchase of Israelitish slaves from the Tyrian slave-merchants? or in the slaughter of Israelitish fugitives? or, more probably, did Edom prove that 'he kept his wrath for ever' in both these ways? (2) The mention of 'Teman' and 'Bozrah,' which names seem first to occur in Jer. 49.7-13. Cp. the threat in 1.2 with that in Obad. 9.

² For the evidence, which is singularly strong, see Cheyne, 'Notes on the Prophets,' *Expository*, Jan. 1897, pp. 44-47. On Am. 9.8-15 see also Preuschen, *ZATW* 15.24-27 (1883); Torrey, 'Notes on Am. 27 etc.,' *JBL*, 188-172 (1902); Driver, *Joel and Amos* 120 ff., who vainly endeavours to diminish the force of the arguments.

suffer the milder doom of dispersion among the nations. Even this will be only for a time. Israel shall return, the old Davidic kingdom shall be restored, and the sweet commonplaces of prophetic idylls shall be fulfilled.

Now, can we not see the reason of the insertion of the opening verse or prologue? It was to assure the post-exilic readers of Amos that the threats of the prophet had long since been fulfilled, and that restored Zion should be safe under the care of its Ion-like divine protector. In other words, Amos was to be read in the light of the concluding portion of Joel. The insertion of the epilogue (9:15), in which we ought to note the reference to Edom (cp Joel 3:19), has a similar reason.¹

Here, then, are already four certain post-exilic insertions. The companion passages now to be enumerated are equally noteworthy. No satisfactory picture of the prophet Amos is possible till we have recognised them.

First, Am. 2:4^b is too deficient in concreteness to be the work of Amos, and is, on phraseological

grounds, late.² If so, the *whole* of the judgment upon Judah also must be late. This is every way a gain. In particular, we can now see better how thoroughly Amos was absorbed in his mission to N. Israel. He cannot perhaps forget Judah; but his native country is only a fragment: the national pulse beats most vigorously in Ephraim (cp Is. 9:2 f. [7:7] f.). The post-exilic editor, however, felt the need of a distinct reference to the sin and punishment of Judah, which he meant to be taken in combination with the encouraging statements of 12 and 9:11-15. It was a different feeling which prompted the insertion

of 4:11 (with which 1:2^b is connected) 12. chaps. 4:12-13 5:8 f. 9:5 f. The conception of God had become deeper and fuller; the germs long ago deposited by the preaching of Amos and Isaiah had, through a widened experience, developed into the rich theology of H. Isaiah and the Book of Job. Not only by the wonders of history but also by those of nature was the sole divinity of Yahwé proved, and an ordinary reader of Amos inserted these doxologies (as we may call them) to relieve the gloom of the prophetic pictures.³ Another such insertion was made (according to the text used by G) in Hos. 13:4.

We now pass on to Am. 5:26. The construction and rendering of this passage have been much disputed.

On the assumption that Am. 5:25-27 was all written by Amos, it is perhaps easiest (see Driver) to render עֲשֵׂה לָכֵן, 'So ye shall take up . . . (Succoth your king and Kaiwan your god, which ye made for yourselves), עֲשֵׂה לָכֵן, 'and I will carry (you) into exile.'⁴ But how unnatural this is! Nowhere else does the prophet mention an inclination of the Israelites to the worship of Assyrian gods, and the carrying of Assyrian gods by Israelites into Assyria is a very strange feature in a threat. Hence the whole verse is more than probably

a later insertion, which took the place of a passage that had become illegible. The case of Is. 10:34 seems exactly parallel (see SROD, *ad loc.*). Whether or no Succoth-benoth, the name of a god in 2 K. 17:35, contains the divine name Succoth,⁵ we may suppose that the writer of the inserted passage merely antedates a worship introduced into Samaria by the Babylonian colonists after 722 B.C. The awkwardness of the connection need not surprise us (this against König, *Synt.* § 368 b); the עֲשֵׂה in עֲשֵׂה is simply the Hae *explanatum* so often prefixed to glosses. Render, 'That is, ye carried in procession'; cp Is. 45:20. See CHEN AND SROD.

Am. 6:2, another insertion, has been treated of already (see § 6 [b]). We pass on to 8:11 f. Verse 8

14. chaps. 3:14^b 5:11-15 6:29 8:11 f. is not at all suitable as a description of the threatened punishment (see We., Nowack). The comparison with the Nile recurs in an interpolated verse

(9:5). Passing on, we note that 7:13 speaks of literal thirst (suggested by the mention of the festivals in 7:10), but in 7:11 the hunger and thirst are metaphorical. Verses 9:1, 13 f. announce a sudden catastrophe; but in 7:11 a lengthened time of misery is described. The passage is clearly late, and is parallel to Is. 8:20 f. (partly late). The silence of prophecy is spoken of as a sore trial in Ps. 74:9. Other probable late insertions are 3:14^b 5:11-15 (cp Mic. 7:6), and the expression עֲשֵׂה in 6:5 (see DAVID, § 13); and 6:9 f. is at any rate misplaced. To these it is plausible to add the reference to 'those who are at ease in Zion' in 6:1 (but it may be better to correct עֲשֵׂה into עֲשֵׂה; so Che. JQR 10:573); also 3:7, which, as Duhm points out, may be a gloss on 7:8; certainly it interrupts a noble passage (7:8 for עֲשֵׂה read עֲשֵׂה with We., or, much better, עֲשֵׂה). The last insertion is 9:8-15 (see § 10).

After these insertions have been removed, may we safely suppose that the rest of the book represents what

Amos said in public? No; the analogy of the prophecies of Isaiah makes such

a supposition highly improbable. Let us be content with knowing that we have a truthful record of the prophetic certainties of Amos, even though he did not always utter them in public. The manner and the contents of the passages into which the true Book of Amos falls must be our guide in determining the class (whether that of public or of private prophecies) to which they severally belong. It is both inherently difficult and contrary to analogy to suppose that 1:2-2:16 was ever really uttered; at any rate, 1:2-2:16 is more adapted to produce an effect on readers than on hearers. Nor can we possibly imagine that the visions in chaps. 7-9 were used by the prophet as texts of spoken addresses; passages from discourses are no doubt here and there introduced, but they come from the arranging hand of the editor of this part.

It is a further question whether the arrangement of the different sections may be due to Amos himself. In answering it we must leave sufficient room for the *growth* of the book. It is not unreasonable to suppose that on his expulsion from Bethel the prophet paid a visit (perhaps a second visit; cp 6:1) to Jerusalem, and there 'noted' his prophecies (in 10:1) a book for a later day' (Is. 30:8), when the judgment upon Israel should have been accomplished. There, too, he may have committed his record (enriched with some never-spoken prophetic certainties) to the custody of those 'disciples' of Yahwé and of his prophets (see Is. 8:16), who began the long succession of students and editors of the religious literature. In their hands we may suppose that the book assumed by degrees its present form. At any rate, a written record of Amos must have become quickly known; for Isaiah, it is clear, steeped himself in the originality of Amos before displaying his own truly

¹ There are similar interpolations in Hosea (e.g., 1:7 1:10-2:1 [2:1-3] and the words 'David their king' in 3:5). See HOS. v. § 4.

² Cp 2 K. 16:15, Demeronomistic. Critics on the other side quote Is. 5:24; Hos. 2:14; Ex. 18:16; Dent. 30:15; but they do not meet the argument from weakness of style, and produce no parallel for the second part of the description of Judah's sin. Moreover, the two Pentateuch passages are not in point. Nor have critics realised the consequences of admitting the post-exilic origin of the prophetic books in their present form.

³ The style is that of H. Isaiah and the later poets (cp Strackel, *Hos.* p. 276), not that of Amos. The strings of participles remind us of Is. 40:22 f.; Job 12:17-24; Jer. 12:1; Dan. 2:21 f. Notice also עֲשֵׂה (cp Cheyne, *Int. Is.* xvi. 25), in 9:5 עֲשֵׂה, which violates the usage of Amos (but cp 6:5). The ideas are equally late, though they are such as Amos, had he met with them, would have owned. *Inter alia*, comp. the third descriptive phrase in 4:13 with Ps. 139:2. It is probable that 5:8 f. originally stood after 4:13. Am. 9:5 f., however, presumably retains its original position.

⁴ On the text see, besides the commentaries, N. Schmidt, *JBL*, 1894, p. 1 f.; Torrey, *ib.* p. 14; WRS and Che., *Proph. Isr.* (2) 300 ff.; G. Hoffmann, *ZATW* 3 (1892) 3; Tiele, *Gesch. van het godsdienst* 315. On the construction see Dr. in Snell, *DBB* 122 (art. Amos).

⁵ So Del. *Par.* 215 f., but see SUCCOTH-BENOTH.

original genius. To Hosea, however, such a record cannot be proved to have been known (see We. on Hos. 8:14-15 10:58); in other words, the circulation of Amos's prophecies was, originally at least, confined to Judah. The latest editor of the book, as we have seen, was post-exilic.

A special interest attaches to the description of the visions, together with the historical interludes in chaps. 7-9, partly because they exhibit the growth of Amos's prophetic certainty respecting the fall of Samaria, and partly because, like Is. 67:1-8:12, and 20 (in their original form), they appear to come from a partly biographic, partly prophetic, work, written or dictated by the prophet himself.

Some have been surprised to find 'a plain countryman' like Amos possessed of such a refined and yet vigorous style.¹ They forget that the differences of culture in the East are still

16. Amos's style.

sometimes comparatively trifling, and that a man of low rank may express himself with considerable elegance. It is still more in point to remark that the most classic Arabic poems are the work of men who had a calling similar to that of Amos, while, even under the new Moslem empire, sons of the desert were wont to appear at court and win a rich guerdon by the finished style of their improvisations. Such critics have also forgotten the opportunities of self-culture which, both at Tekoa and elsewhere, Amos must have enjoyed; and when even G. Baur and Ewald point to certain 'solecisms in pronunciation and orthography' as evidences of provincialism, it may be replied that the errors in question may reasonably be ascribed to late *copists*.² That Amos delights in images drawn from nature is clearly no fault (e.g. 29:3-4 f. 8:12-5:10, and the first, second, and fourth, 18). Only one of them is distinctively the comparison of a shepherd (3:12); and Amos is just as willing to speak of wonders of which he knows only by hearsay—such as the giant cedar trees (29), and (if the text be correct) the inundation of the Nile (88)—or of which he has a true Israelitish dread—such as an earthquake or a solar eclipse (88 f.), or the mysterious sea which yields no harvest (6:12; cp ἀρπύγεραι), and which somewhere hides the terrible serpent of primitive mythology (9:3; see SERPENT, § 3 f.). It is a pity that, for reasons already given, we cannot speak of Amos as a sympathetic observer of the sky³—that is an essential characteristic of a much later poet (see JOB). As a literary craftsman he ranks high. In 1:3-2:6 we have a literary prophecy, which, until Amos torgets his art in his grief at the manifold offences of Israel, is marked by great regularity of structure. So in 4:6-11 we have the literary model of an equally symmetrical passage in Isaiah (Is. 98:21 [7-20] 52:6-30 10:1-4), and in 5:2 we have a short but strictly rhythmical elegy. Altogether, the Book of

17. Degree of originality.

Amos forms a literary as well as a prophetic phenomenon. It is true that both as a writer and as a speaker he must have had models; J and E were, of course, not the only writers of the pre-Amosian period, and Elijah and Elisha (of whose doings a faint echo has reached us) were not the only prophetic reformers (Am. 2:11 f. 3:7). There is no occasion, however, to suppose that there were prophets of precisely Amos's type before him—prophets who had exactly his conception of their duties, and were also, in a qualified sense, writers. It would be a mistake to infer, from Amos's use of formulae, that he was acquainted with earlier written prophecies. Prophetic formulae could be transmitted by word of mouth

¹ Against Jerome's application of Paul's self-deprecating language in 2 Cor. 11:6 to Amos see Lowth, *Praelect.* 21 (*Lectures*, F.T. 297 f.).

² Take e.g., פָּרָשׁ (79) for פָּרָשׁ. The same form occurs in Jer. 33:26, Ps. 105:9, both post-exilic passages. In 5:11 פָּרָשׁ is not a 'dialect form' for פָּרָשׁ; the scribe wrote פ by an error, and then corrected it by writing פ. Read simply פָּרָשׁ with We.

³ G.A.S.M. (*HB* 316).

as well as by the pen. That Amos had left Tekoa at intervals before his prophetic call is not only inherently probable, but also follows from such a passage as 3:7 f. (if correct), which Amos could hardly have written unless he had had the most vivid and direct ocular evidence of the effects of a true prophetic impulse even before his own turn came to receive one. His originality is shown, not only in his prophetic message, but also in his being (probably) the first to conceive the idea of using the pen in aid of the voice. The *litera*-literature of the priests had already taken a considerable development (Hos. 8:12). Amos was, it appears, the first prophet who followed the example of the literary priests. The importance of this step it was beyond his power to estimate. Within a generation he expected Israel as a nation to disappear; but he thought it worth while to gather disciples who, like himself, could praise Yahwé even in the midst of ruin; and, after all, who could tell but Yahwé might have some other secret to reveal to one of these—to a Hosea or to an Isaiah? See § 18.

That Amos's message is a gloomy one is in accordance with his conception of the divine character. In an age like his, the divine purpose

could not be one of peace, though it required an immense devotion to Yahwé to be able to declare, seemingly unmoved, that He purposed the complete destruction of Israel (or as we should say, of Israel and Judah). In spite of the universal scepticism which meets him (for how, it is said, can Yahwé be conceived of apart from his people?), Amos persists in his message, and even conceives the possibility that legendary supernatural agencies may be used to make the destruction more complete (9:1). It is not, therefore, open to us to account for the confidence of Amos simply by the advance of the Assyrian power. He does, indeed, regard Assyria as the chief destructive agent (6:14 7:17); but Assyria, when Amos spoke and wrote, was passing through a period of decline; consequently his conviction must have some other ground which naturally sharpens his eyes for the still present danger from Assyria. To this it must be added that, according to Amos, it would be easy for Yahwé, if the agency of Assyria were not available, to bring some other hostile nation from some corner of the earth, just as he 'brought up the Philistines from Caphtor, and the Aramaeans from Kir' (9:7). The real ground of Amos's prophetic pessimism is the increasingly unsound religious condition of his people. He may very possibly have admitted that there were fifty or at least ten Israelites who lived by the same pure religion as himself; but he could not conceive of Yahwé's saying, 'I will not destroy the land for ten's sake.' The righteous must, according to him, suffer with the wicked (9:10 was inserted to correct this idea), though he might perhaps have left a door of hope open for those who, like himself and his disciples, had close personal contact with the true God: the nation might perish; but when this had happened, God might have some secret purpose for those who 'knew' him.

Of this vague hope we hear nothing from Amos (cp ISAIAH). What the popular religion was, we know but too well. Whatever the nobler minds may have believed, 'the mass of the people,' as Robertson Smith well says, 'still thought of Him as exclusively concerned with the affairs of Israel,' and the connection between Yahwé and Israel had a non-moral, natural, basis. Ritual tended to make morality almost superfluous, and by its increasing costliness actually promoted that injustice and inhumanity which Yahwé abhorred. There were also immoral superstitions at which Amos glances less (see 2:7) than Hosea. To this

19. Idea of God.

pernicious system the religion of Amos is diametrically opposed. Once, at any rate, he uses the striking title, 'Yahwé, the God of the Hosts' (5:27 is admittedly a genuine passage)—i.e., the God of celestial as well as earthly

AMOS

legions—together with 'the Lord Yahwē' (perhaps nineteen times), in anathematis to the nationalistic expression, 'Yahwē, the God of Israel'.¹ The Yahwē whom he himself worshipped was, in virtue of his perfect moral nature the Sovereign alike of nature and of nations. Amos had not, indeed, fathomed the depths of this conception as had the Second Isaiah and the author of Job (Am. 4.13) and the parallel passages are later insertions; see above, § 12; but he is already to all intents and purposes an ethical monotheist, and his conviction of the impending destruction of Israel does but intensify his sense of the majesty of the one God. He does not, indeed, reject the old belief in the connection between Yahwē and Israel altogether (cp 7.15 'my people Israel'); he moralises it. For some wise object, Yahwē brought Israel out of Egypt (3.17), and entered into a personal moral relation to it; but his will, at any rate, is not unknown to the other nations, and their history is equally under his direction. Once, indeed, under the stress of moral passion, Amos even places the 'sons of Israel' on a level with the 'sons of the Cushites';² this occurs near the end of his prophecy (3.7), and is evidently intended as a final withdrawal of a temporary and conditional privilege. It is not, however, on all the nations of the earth, but only on those which are in close proximity to Israel, that judgment is pronounced by Amos, as the spokesman of Yahwē; he aims at no theoretic consistency. These nations are to suffer the same doom as Israel at the hand of Assyria, because they, like Israel, have violated the unwritten law of justice and humanity. [Thus we can divine Amos's true attitude towards the lately written ethico-religious priestly laws (see Exod. 23.1). He is probably acquainted with such laws (28: cp Ex. 22.25f.); but he does not recognise them as of primary authority, for he nowhere appeals to them.] And if by many favours, inclining to the crowning favour of prophecy (2.11), Yahwē has made him especially known to the Israelites, it follows that he will judge Israel more strictly than he will judge the other nations (3.12). As a faithful friend, Amos assures his people that if they would only 'seek' the true Yahwē they would 'live' (5.41)—i.e., would escape captivity and enjoy prosperity in their own land (cp Hos. 6.2f.). He has no hope, however, that they will do so; the false popular religion is too deeply rooted. Indeed, Am. 5 has been so much interfered with by editors that it is doubtful whether 7.14 can be appended to as authorities on such a point; 7.14, at all events, appears to belong to an inserted section (see Nowack).

It is not idolatry that Amos complains of. When he says, ironically, 'Go to Bethel and transgress' (4.4), he means, as he expressly tells us, 'Carry out the prescriptions of your wilfully devised ritual law.' Nor can we venture to say that a protest against the 'golden calves' is implied,⁴ for no prophet is more explicit than Amos in mentioning the sins of his people. The two passages in which a reproof of Israelish idolatry does appear to occur are certainly interpolations. In 8.14, for 'the sin of Samaria' we should read 'the god of Bethel' (cp Gen. 31.13), in parallelism to 'thy god (7.7-8), O Dan,' and 'thy patron (read 7.7 with W. and see 10.6), O Beersheba,' and the whole of 5.6 is a later insertion.

¹ 'Thy God (O Israel)' is put into Amos's mouth by a later editor (4.12); see above, § 12.

² Who these Cushites are, is uncertain (see CUSH. § 2.4). Apparently they had recently experienced some calamity.

³ Here he contrasts with Hosea, who clearly invests the written *torah* which arose in certain priestly circles with primary authority (Hos. 8.12). Perhaps, as Duhm suggests, Hosea was himself a priest.

⁴ So Davidson (*Expositor*, 1887 (1), p. 178). To say that Amos does not protest against the 'golden calves' is of course not to assert that he thinks them worthy symbols of Yahwē. Cp St. G. 1. 599; WRS, *Proph.* 575f.

⁵ The text appears to have been altered by the same editor who inserted the reference to 'the two inquiries' in Hos. 10.10.

AMPHIPOLIS

and is not true to the facts of the age of Amos (see above, § 12). What Amos most vehemently denounces is sacrifice. One may perhaps be tempted to suppose that he says more than he means, and that he does not object to sacrifices altogether, but only to the belief that when duly performed they can change the mind of the Deity. His language, however, seems too strong to be thus explained away, especially when we find him appealing in support of his statement to the fact that in the olden time, when Yahwē was so near to Israel, no sacrifices were offered (5.6). Is there, then, no form of worship in which Yahwē delights? None, except the practice of righteousness—i.e., justice and humanity (see 5.21-24). But, alas, the Israelite will not recognise this. Pilgrims who are wholly indifferent to plain moral duties crowd to the sanctuaries of Bethel and Gilgal, and even to the far-off southern shrine of Beersheba (5.8-14, cp Hos. 4.15), and parade their devotion to the different local forms of Yahwē in pious oaths, as if the true Yahwē could be pleased with the offerings or the oaths of such worshippers. How painful will be the awakening from this moral sleep, when the greatest of all realities makes its existence known, annihilating at one blow the sanctuaries of Israel and their worshippers (9.1)! Such was the announcement of the shepherd of Tekoa.

21. Estimate of Amos. Taken in connection with the ideas on which it is based, it seems to justify us in calling him a surprising phenomenon. That the phenomenon can be partly explained there is no doubt. Neither Amos nor his special follower Isaiah is so entirely abnormal a product as an unthinking study of the works of either might suggest (see PROPH. CY). But not the most comprehensive study of the history of Israel will altogether account for their appearance. And if they neither of them saw the whole truth, and both needed the correction of history and of later prophets and sages, we may still pay them the reverence which belongs to those who first uttered great moral and religious truths with the power that belongs to God-possessed men.

T. K. C.

22. Special helps. 1. Amos (AMOS [RECI]) is the best supported reading in Mt. 1.10, where, however, King Amos (7.7) is plainly intended; so TR and EV. It is a constant variation in BA.

2. An ancestor of Joseph, Mary's husband (Lk. 3.25 [BA]). On the two lists see GENEALOGIES OF JESUS.

AMOS (אָמֹס, § 57, 'strong'; אַמֹּס [אַמֹּס, אִמֹּס], [A in 2 K. 19.2 20.1 Is. 37.2; AMOS, father of ISAMM, 1 (Is. 1) אַמֹּס [אִמֹּס] = אַמֹּס הָאֵל [N*^{vid.}], 20 [N*^{vid.} om.], 2 Ch. 26.22 [BA om.]].

AMPHIPOLIS (ΑΜΦΙΠΟΛΙΣ [Ti. WH], ΠΟΛΙΣ [N*]), one of the most important positions in northern Greece; it stands on a bend of the river Strymon, between the lower end of lake Cercinias and the head of the Strymonic gulf, thus commanding the pass leading from the east into Macedonia (Liv. 45.30). Consequently it was a station on the *Via Egnatia*, 'the great military road which ran through Macedonia and connected Rome with the Hellespont' (Cic. *De part. cons.* 2 § 4). Paul, therefore, 'passed through' Amphipolis

¹ Hal. thinks that a northern Beersheba (perhaps Beeroth) is intended (*KT* 11.72-77); but if Elijah went on pilgrimage to Horeb, which was not even in Palestine, why should not N. Israelites have gone to a venerated spot in S. Israel? נֶזֶק is precisely the right word to use of a sanctuary across the border (cp 6.2).

AMPLIAS

on his way from Philippi to Thessalonica (δοδισσάρες, Acts 17:1).

The site was intimately connected with some of the most interesting passages in Greek history; but it would be a mistake to imagine that the apostle or his companions either knew or cared for these things. It is now Neochori. [Leake, *North*, 60:315 f.] W. J. W.

AMPLIAS, or rather as in RV **Ampliat** (ἀμπλάτιος [L. WH]), sibilant as 'my beloved in the Lord' (Rom. 16:8 f.); not otherwise known.

The name was not infrequently borne by slaves. In the list of the seventy disciples (Pseudo-Dorothius) Amplias is represented as having been bishop of Odessus or Odysseus (on the Black Sea, near the site of the modern Yanna).

AMRAM (עמרם, § 77, 'in good condition' ? or, 'the [divine] kinsman is exalted'; אַמְרָאָם [BL]; A in Ex. Nu. [AF]; B in Nu. [J]).

1. B. Kohath, head of a Levitical subdivision, and father of Moses, Aaron, and Miriam (Ex. 6:12-20; Nu. 3:19 אַמְרָאָם, [AF]; אַמְרָאָם [L.]; 26:58 f. 1 Ch. 6:2 [5:23]); from him come the **Amramites** (עמרמית, Nu. 3:27, הַאֲמֶרָמִיתִּים [B], אַמְרָאָם עִיס [A], -רָאָם עִיס [F], -רָאָם עִיס [L.]; 1 Ch. 26:22, אַמְרָאָם [A]). See LXXI.

2. One of the line BANA, 2, in list of those with foreign wives (1 Chr. 1:5 end) Ezra 10:34 (אַמְרָאָם [B], אַמְרָאָם [R], אַמְרָאָם [L.], 1 Esd. 9:34 ΟΥΑΜΕΡΕΣ, RV ΙΣΜΑΕΡΕΣ (Ισμερ [B], Ισμ. [A], Αμραμ [L.]). See EZRA, II, § 14 f.

3. 1 Ch. 14:6 (עמרם), RV AMRAM. See HEMDAN.

AMRAPHEL (אַמְרָפֶּל; אַמְרָפֶּל [ADEL]; Jos.

'Αμράφης), king of Shinar (Gen. 11:9 f.) = Hammurabi, king of Babylon, who, according to trustworthy cuneiform data, may have flourished about 2250 B.C. This assumes that אַמְרָפֶּל is corrupted from עמרם (Lindl. Sayce) אַמְרָפֶּל; but see CHEDORI-MOMER (§ 4 f.), and cp Schr. *COT* 2:299 f.; Hommel, *BAG* 109, *ATF* 193; W. *IOF* 143 f.; Bezold, *PSB* 1138 ('88). Earg. Jon. ingeniously, if incorrectly, identifies Amraphel with Nimrod, who 'commanded Abram to be cast into the furnace.' If the identification with Hammurabi be accepted, we may be reminded that Nabopolassar and Nebuchadnezzar delighted to imitate this founder of Babylonian greatness, both in his building plans and in his methods of administration (see BABYLONIA, § 66, and e.g. *Outlines of Early Bab. Hist.* 27-30). It may be that some Jewish favourite at the Babylonian court, who had received a Babylonian education (Sambassar or Sheshbazzar for instance—note the Babylonian name), heard Hammurabi spoken of, and made historical notes from cuneiform tablets on events which had happened 'in the days of Amraphel,' also that one of these was adopted by later writers as the basis of a Midrash on A'ham and Melchizedek. On the other hand, those who identify NIMROD (q.v.) with Nazi-mar-adaš (Nazi-maridatš) may incline to think that the setting of contemporary history may be derived from an early pre-exilic traditional source, though the narrative in its present form is undoubtedly the production of post-exilic writers. The latter view is the more difficult one, but not therefore to be hastily rejected. Cp Lehmann, *Zwei Hauptprobleme der altorient. Chronologie* (1898) 84, and see ABRAHAM, § 4, CHEDORI-MOMER (§§ 2, 4 end), HAM (i.), MELCHIZEDEK (§ 2), SHAVEH, I. T. K. C.

AMULETS is the RV rendering of *phylacteria*, אֲמֻלִּים, Is. 3:20, a word used elsewhere of any charm (Is. 3:3, נִכְנֹךְ לְהַשִּׁיב, RV 'skilful enchanter'—not 'eloquent orator' or 'skilful of speech' as in AV and AV mg.), or, more specifically, of a charm against serpents (Jer. 8:17 Eccles. 10:11). In Is. 3:20 some sort of female ornament is meant, most probably earrings (so AV), which seem to be treated as idolatrous in Gen. 35:4. Doubtless, as WRS suggests ('Divination and Magic' in *J. Phil.* 11:122 ['85]), the amulet is worn in the ear to prevent an incantation from taking effect. Among early

ANAHARATH

peoples amulets and ornaments are closely connected (cp Wc. *Heid.* (2) 165). When the early significance of the protective power of the object is forgotten it serves as a simple adornment.¹ The Syr. equivalent *khāṣā* is properly 'a holy thing,' and the same idea is seen in the occurrence of the root in the old Yemenite *khāṣā*, 'pearls'; cp WRS *Rel. Sem.* (2) 453; and see MAGIC, § 3 (3). cp also RING, § 2.

AMZI (אַמְצִי, § 52, perhaps abbrev. from Amaziakh).

1. In the genealogy of EPHRAIM: 1 Ch. 9:46 (31) (אַמְצִי [B], אַמְצִי [A], אַמְצִי [L.]). See also LXXI.

2. In genealogy of Adadi, 3, the priest (see MACHAN, 3); Neh. 11:12 (אַמְצִי [B], אַמְצִי [L.], אַמְצִי [R]), omitted, however, in the 1 Ch. 9:12.

ANAB (אַנָּב, אַנָּב [AL]), a hill-town of Judah, Josh. 15:50 (אַנָּב [B], אַנָּב [L.]), one of the seats of the Anakim; Josh. 11:21 (אַנָּב [B]). It is doubtless to be connected with HANANAB (אַנָּב), mentioned in *Am. Tab.* 237, 26 with Magdali (see MIGDAL-GAD) and other cities of the land of *Gad* (SW. Judah). There is still a place of the name (*Anab*) on the west side of the Wady el-Khalil, about 14 miles to the SW. of Hebron, and 4 or 5 m. W. from Shuweikah (Rob. *BR* 2:150; so *PE. Mem.* 3:392 f.). See also ANUB.

ANAEI (אַנָּה [BN], אַנָּה, HANANEEL), brother of Tobit and father of ACHACHARUS (Tob. 1:2). See also AMAN.

ANAH (אַנָּה, meaning uncertain, cp Gray, *HPV* 110; אַנָּה [ADEL]), a Horite clan-name (Gen. 36). As the text stands the descent of Anah is represented in three ways. Anah is

1. Daughter of Zibeon (אַנָּה [L.], in ver. 2:14, 'Hivite' in v. 2 being obviously an old error of the text for 'Horite'.

2. Son of Seir and brother of Zibeon, v. 20 (אַנָּה [L.], 1 Ch. 1:38 (אַנָּה [L.]).

3. Son of Zibeon, v. 24 bis (אַנָּה [AD], אַנָּה [L.], אַנָּה [E], אַנָּה [AE]), also 1 Ch. 1:40 f. (אַנָּה [B], אַנָּה [A]; v. 41 אַנָּה, אַנָּה [L.], 25 bis 29).

The first of these may, however, safely be disregarded. 'Daughter of Zibeon' is a variant (based on v. 24) of 'daughter of Anah' (dependent on ver. 20:25), which has intruded into the text (so Di., Kau.). As to (2) and (3), the differences of statement need not surprise us, for the genealogy only symbolises tribal relations. Anah was originally a sub-branch of the clan called Zibeon, and both alike were 'sons of Seir'—i.e., Horites. A twofold tradition, therefore, could easily arise. The 'mules' which, from v. 24 AV, Anah would appear to have 'found in the wilderness' are an invention of the Midrash, some Rabbis explaining אַנָּה (אַנָּה [ADE], אַנָּה [L.]) by *ḥulavos*, others by *ḥulavim* (Ber. rabbai, par. lxxvii.). The 'hot springs' of Vg. and RV are purely conjectural; the word אַנָּה is evidently corrupt. As Ball points out (*SPOT* Gen. crit. notes, 93), it may have come in from v. 22 (אַנָּה). In ver. 2:14 and 18 (where AEL omits), Anah is called the father of Ohobamah, the wife of Esau. See BASHMATI.

T. K. C.

ANAHARATH (אַנָּהָרָת; אַנָּהָרָת, אַנָּהָרָת [ADEL])

[B], אַנָּהָרָת, אַנָּהָרָת [A], אַנָּהָרָת [L.]), a site on the border of ISSACHAR (Josh. 19:19 f.). The reading seems corrupt (note the conflated readings of AEL). Perhaps we should read אַנָּהָרָת and identify with *Arnach*, a village on rising ground in the plain of Esdraelon, a little northward of Jeim (= En-gannim). So Schenkel's *Bib.-Lex.* and Richman's *HB* (2) (after Knobel).

Knobel's alternative view (adopted from de Sauley by Conder) identifies Anaharath with en-Nā'ūra, which is not far from Ikāl (Chesilloh) and Sū'īm (Shunem), and is therefore not altogether unsuitable, but somewhat remote from every attested form of the ancient name.

¹ For analogies cp CUTTINGS OF THE FLINT.

ANANIAH

ANANIAH (אַנָנְיָהּ), § 23, 'Yahwē has answered'; **ANANIAH** (ע) [BAM.], thus identifying the name with **ANANIAH**.

1. In list of Ezra's supporters (see **EZRA**, ii. § 14 f.; cp. i. § 8) at the reading of the Lev. (Neh. 8.1, 1 Esd. 9.4, **ANANIAS**, 4).
2. Signatory to the covenant; Neh. 10.24 [23] (**AN**); **ANAN** [AR.]. See **EZRA**, i. § 7.

ANAK. See **ANAKIM**.

ANAKIM RV; AV, less correctly, **ANAKIMS** (אַנָקִים); and **אַנָקִים**, in Lagg. generally rendered **גִּבְרִיִּם** 'giants'; **ANAK** [ע] [BAM.], but -N [F* 717 D. 210]; **ANAKIM**.

The **Anakim** are mentioned in **Dn**. 2.10 f. 21 **Josh**. 11.21 f. 11.23 **Jer**. 47.5 (**ANAK**); **Hbk**. reads 'of their valley'; elsewhere called 'sons of Anak' (אַנָקִים, **ANAK** [BAM.]) **Nu**. 13.23 (**ANAK** [BAM.]) **Dn**. 9.28 and **AM** 'sons of the Anak' **Josh**. 15.14a; **Judg**. 1.20; 'sons of the Anakim' **Dn**. 1.28 **וְהָאֲנָקִים** [BAM.] 9.24 (**ANAK**); 'the children (sons) of Anak' (**AN** 'the Anak' **Nu**. 13.23 28 (**ANAK** [BAM.], **ANAK** [AD.], **Josh**. 15.14b. The phrases are exactly parallel to 'Rephaim' and 'children of the Rapha' (see **REPHAIM**); indeed in **Dn**. 2.11 a writer of the Deuteronomistic school, 'interested in history and archaeology' (Kue.), makes the **Anakim** a branch of the **Rephaim**.

These and other descriptive terms (which are not to be mistaken for race-names) are given at any rate to some portions of the pre-Israelitish population of Palestine, whom, like the Amorites, tradition endowed with colossal height (cp. **Nu**. 13.33). On the inhabitants of Palestine generally see **CANAN**.

According to **Josh**. 11.21 (13), the **Anakim** were to be found in the mountains about Hebron, in the fenced cities **Debir** and **Anab**, and, in general, in the mountains of **Judah** and **Israel**, whence **Joshua** and **Israel** drove them out. Verse 22 also states that a remnant of them survived in the Philistine cities of **Gaza**, **Gath**, and **Ashdod** (cp. **Jer**. 17.5 **ע**; **οἱ καταλοιποὶ ἐνακείμ** [BAM.]), where **MT** has 'the remnant of their valley'. The oldest narrator, however, gives the credit of their expulsion to **Caleb**, who drove out from **Kirjath-arba** the three sons of **Anak**: **Sheshai**, **Ahimai**, and **Tahmai**—i.e., the three tribes or clans which bore those names (**Josh**. 15.14). The editor of **Judg**. 1, quoting this passage, refers the deed to the tribe of **Judah** (v. 10); see **HEBRON**. In later times, a too literal interpretation of 'sons,' and genealogical interest, led to the transformation of **Anak**, and what is still stranger—of **Arba** ('four') in the place-name **Kirjath-arba**, into personal names. Thus **Anak** (virtually a personal name where it has the article) becomes father of **SHESHAI**, **AHIMAN** (1), and **TALMAI** (1), an 'son of **Kirjath-arba**'; cp. **Josh**. 21.11 (**MT** **ע** 7), 15.14 f. **Judg**. 1.10 (**ANAK** [A]).

The proof of this is supplied by **ANAK**, which in **Josh**. 15.13 21.11 instead of 'father of **Anak**' has **μητρόπολιν** (**ANAK**). This no doubt represents the original text, which stated that **Kirjath-arba**, or **Hebron**, was an important city (a 'mother,' cp. 2 S. 20.19) of the **Anakim**. A later scribe, prepared to find a genealogical notice and therefore surprised to find the word 'mother' in apposition to **Arba**, altered 'mother' (**ANAK**) into 'father' (**ANAK**). Thus he obtained the statement that **Hebron** was the city of one **Arba**, who was the father of 'the **Anak**.' In **Josh**. 11.15, however, he took a different course. The true reading must be that of **ANAK**, which gives (nearly as in the parallel passages) **πόλις ἀπὸ** (1.), **ἀπὸ** [A], **ἀργος** [B], **μητρόπολις** τῶν **ἐνακείμ** αὐτῇ. For this the scribe substituted 'the city of **Arba**, the greatest man among the **Anakim**.' The consequence was that **Sheshai**, **Ahimai**, and **Talmi** (the three **Anakim** mentioned in **Josh**. 15.14) became, literally, 'sons of (the) **Anak**,' and grandsons of **Arba**—no contemptible acquisition for genealogists. So virtually **Schlensker** (Thes. s.v. **μητρόπολις**); but see especially **Moore**, *Judges* 24 f. Cp. also **Swally**, *ZATW*, 1898, p. 139 ff.

ANAMIM (אַנָמִים), one of the peoples of **Mizraim**, **Gen**. 10.13=1 Ch. 1.11 f.; unidentified. See **GEOGRAPHY**, § 15 (2).

ANAMMELECH (אַנָמְמֶלֶךְ), **ANAMMELECH** [B], **ANAM** [A]; om. L.; **אַנָמְמֶלֶךְ**; **Anammelech**, a Babylonian

1. **Anak**, 'long-necked' (St. and most), or 'those with neck-laces' (Klo.), with which cp. Heb. **אַנָקִים**, 'a chain for the neck,' **Aram**. **אַנָקִים**, 'neck.'

ANANIAS

deity, whose worship was carried by the Sepharvites into **Samaria** when, along with the inhabitants of other Babylonian cities, they were transplanted thither by **Sargon**. As in the case of the kindred deity **Adrammelech** (see, however, **ADRAMMELECH**, 1), the worship of **Anammelech** was accompanied by the rite of human sacrifice (2 K. 17.31). The name **Anammelech** is probably to be explained as **Anam-malk** 'Ami the decider or prince' (Schr., **Del.**), although there is no evidence that **Ami** enjoyed any special veneration in **Sippura** (see **SEPHARVIM**), a city that was especially devoted to the worship of **Samas** the **Sim-god**.

It is very possible, however, that the text is corrupt (**Hommel** proposes a rather elaborate restoration **ANAMMELECH**). It is also possible (see **NISROCH**) that **Anammelech** is merely a faulty variant of **Adrammelech** (rather **Adarmelech**). **AN** in 2 K. 17.31 has only **adrammelech**.

Anu was the god of **Heaven**, and with **hi** were identified a number of gods representing personifications of powers or localities of the upper region, such as **Uraš**, **Anšargal**, **Anšar**, **Enšar**, **Du'ur**, **Luhma**, **Ekur**, **Alala**, **Alu-alam**, and **Emurula**. He stood at the head of the Babylonian pantheon, forming one of the supreme triad of Babylonian divinities, in which he was associated with **Bel**, the god of **Earth** and of created things, and **Ea**, the god of the **Abyss** and all that is beneath the earth. See **BABYLONIA**, § 26. According to **G. Hoffmann** (*Z. f.*, 1866, p. 258), however, the name is **אַנָתֶם**—i.e., **Anath-malk**. Cp. **Astar[ti]-Kemosh** and **Mel[ki]-Astar**. **Anath** (**Ana**) was the consort of **Ami** (see **ANATH**).
L. W. K.

ANAN (אַנָן), § 50; shortened from **ANANIAH**.

1. Signatory to the covenant (see **EZRA**, i. § 7); **Neh**. 10.26 [27] (**ANAN** [B]), **ANAN** [A], **ANAN** [A].

2. **Anan** (**ANAN** [BAM.]) in 1 Esd. 5.30—**HANAN**, 3 (**ANAN**) **Ezra** 2.46.

ANANI (אַנָנִי), § 50, abstr. from **ANANIAH**, cp. **Sab**. **ANANI** and **Palm**. **ANANI** [B], **ANANI** [A], **ANANI** [A], descendant of **Ziherabai** (1 Ch. 3.24).

ANANIAH (אַנָנְיָהּ), **ANAN** A om., **ANANIAH** [S' aug. inf.], **ANIA** [L.] in **Benjamin**, mentioned (v. 32 f.) in the list of villages, **Neh**. 11.20-26 (see **EZRA**, 2. § 56, § 15 (1)), along with **Nub** and **Ramah** (**Neh**. 11.21), and possibly represented by the modern **Beit-Hanina**, 3½ m. NNW. of **Jerusalem**.

ANANIAH (אַנָנְיָהּ), §§ 33, 50; **ANANIAH** [BAM.], ancestor of one of **Nehemiah's** builders (**Neh**. 3.23).

ANANIAS (ANANIAS [BAM.]), the Gk. form of **HANANIAH** or **ANANIAH**.

1. RV **ANANIAS**, **ANANIAS**, a family in the great post-exilic list (see **EZRA**, ii. § 5), mentioned only in 1 Esd. 5.16 (**ANANIAS** [B], **ANANIAS** [A], om. L.). The name has probably arisen from a misreading of **Hodiah** (הוּדְיָהּ read הוּדְיָהּ); cp. **Neh**. 10.17 f., and see **HODIAH**, 2. Cp. also **Meyer**, *F*, 143, 155.

2. 1 Esd. 9.21 = **Ezra** 10.20 **HANANIAS**, 3.

3. 1 Esd. 9.29 = **Ezra** 10.28 **HANANIAH**, 7.

4. 1 Esd. 9.43 = **Neh**. 8.4 **ANANIAH**, 1.

5. 1 Esd. 9.43 (**ANANIAS** [B]) **Neh**. 8.7 **HANANIAS**, 4.

6. A kinsman of **Tolai**. The unchanged **Raphael**, while in disguise, claimed to be his son (**Tob**. 3.12). He is designated **Ananias** 'the great,' son of **Semeus** or **Semelius** (see **SEMAIAH**, 23), also called 'the great.'

7. b. **Gideon**, ancestor of **Judith** (**Judith** 8.1, om. B).

8. In **Song of Three Children**, v. 66 (**Θ** **Theod**. **Dan**. 3.88); see **HANANIAH**, 1.

9. Son of **Nedelaios** (**Ant**. xx.52, **Νεδεδαιός** in some MSS [AE] **Νεδεδαιός**; cp. **NEDABAIH**), high priest, circa 47-59 A.D., under **Herod Agrippa II.**, king of **Chalcis**. He is mentioned in **Acts** 23.2 ff. 24.1 as the high priest before whom **Paul** was accused during the procuratorship of **Felix**. He flourished in the degenerate days of the priesthood, and, though **Josephus** says (**Ant**. xx.92) that after his retirement he 'increased in glory every day,' allusion is made to him in the **Talmud** (**Pesahim**) in terms of the greatest contempt. Cp. **ANANAS** (end).

1. In which case cp. **Anu** (Muss-Arn. *Ass. Dict.* 65).

ANANIEL

10. Husband of SAPHIRA (q.v.), Acts 5:1. See COMMUNITY OF GOODS, § 3.

11. A 'disciple' at Damascus, who was the means of introducing Paul, after his conversion, to the Christian community there (Acts 9:1-19).

ANANIEL (אַנַנְיָהּ [BNA]; Heb. [ed. Neubauer] אֲנַנְיָהּ, Hananeel, Tobit's grandfather (Tob. 1:1).

ANATH (אַנַּח; אֲנַח [BAL]), a divine name, mentioned in connection with Shamgar in Judg. 3:31 (ΔΕΙΝΑΥ [B]) and 5:6f (ΚΕΝΑΘ [A]). If SHAMGAR (q.v.) were an Israelite, and b. Anath ('son of Anath') his second name, it would be tempting to take 'Anath' in 'ben Anath' as shortened from Ebed Anath 'servant of Anath' (so Baethgen, *Beitr.* 141; but see Noldeke, *ZDMG* 42:479 [88]). More probably, however, Ben-nath is a Hebraised form of the name of a foreign oppressor who succeeded Shamgar (certainly a foreign name), and in this case Anath must designate a foreign deity.

Who then was this deity? Evidently the well-known goddess worshipped in very early times in Syria and Palestine (as appears, e.g., from the names mentioned below), and adopted, as the growing evidence of early Babylonian influence on Palestine scarcely permits us to doubt, from the Babylonian pantheon. Anath was in fact the daughter of the primitive god Anu, whose name is mentioned as that of a Syrian deity in 2 K. 17:31 (see ANAMMELECH, SEPHARVIM). Of her character as a war-deity there can be no doubt. In ancient Egypt, where her cultus was introduced from Syria, she was frequently coupled with the terrible war-goddess Astart, and on an Egyptian stele in the British Museum she appears with a helmet on the head, with a shield and a javelin in the right hand, and brandishing a battle-axe in the left. She was, therefore, a fit patron-deity for Shamgar or for Sisera. That the fragmentary Israelitish traditions make no direct reference to her cultus need not be matter for surprise. The names ANATHOTH, BETH-ANATH, BETH-ANATH, compensate us for this omission. Wellhausen thinks that we have also one mention of Anath in Hos. 14:2[9], where he renders an emended text 'I am his Anath and his Asherah' (in clause 2)—surely an improbable view. For a less difficult correction see Che. *Exp. Times*, April 1898.

For Archaeology see Jensen, *Kosmos*, 103 272 f.; E. Meyer, *ZDMG*, 31:717 [77]; Fiedt, *Gesch. von den Göttern in die oudheid*, etc. (93); WMM, *Is. u. Eur.* 313. T. K. C.

ANATHMA. See BAN, § 3.

ANATHO (אַנַּחְוֹ; אֲנַחְוֹ [BAL]), a town of Benjamin (cp below, 2), theoretically included by later writers among the so-called Levitical cities (see LEVITES), Josh. 21:18 P; 1 Ch. 6:60[45] (אַנְחֹוֹ [B]). -וֹ and אֲנַחְוֹ [A], אֲנַחְוֹ [L], Neh. 7:27 נַחְוֹ [A; om. B]).

The form of the ethnic varies in edd. and versions² (cp also ANATHOTH). AMEZER, 2, is called אֲנַחְוֹ, 28:23-27, AV the ANETHOTHITE (אַנְחֹוֹתִים [B], אֲנַחְוֹ, [A], -וֹתִים [L]), אֲנַחְוֹ, 1 Ch. 27:12 (AV, ANETHOTHITE, אֲנַחְוֹתִים [BAL]), and finally אֲנַחְוֹ, 1 Ch. 11:23 (AV, ANETHOTHITE, אֲנַחְוֹתִים [BAL], -וֹתִים [L]). The last-mentioned form is used to designate JERU, 5, in 1 Ch. 12:4 (אֲנַחְוֹתִים [BAL], -וֹתִים [L]; 4, אֲנַחְוֹתִים [L] not in Heb. or S⁷V). RV in each case ANATHOTHITE.

The name appears to be the plural of ANATH, and may refer to some images of this goddess which once stood there. Under the form Anath the place seems to be once referred to in the Talmud (*Yoma* 10a), where its building is assigned to Ahiman the Anakite. Tradition said that Abiathar, the priest in David's time, had 'fields' at Anathoth (1 K. 2:26); and

¹ Reading in Jude 56, 'In the days of Shamgar and Ben Anath.' The notice in 3:17, which is much later than the song (see Moore) is, of course, valueless.

² Bā. and Ginsb., however, read everywhere אֲנַחְוֹ (cp the former's note on 1 Ch. 11:23). Exceptionally in Sam. *lc.* Ginsb. אֲנַחְוֹ.

ANDRONICUS

Jeremiah was born of a priestly family which had property there (Jer. 1:1 29:27 32:7-9, ἀναθωθ [A⁷, 7] 37:12). It is once referred to by Isaiah (Isa. 10:3), and is mentioned in the great post-exilic list (see EZRA, ii. § 9), Ezra 2:23 = Neh. 7:21 = 1 Esd. 5:18 (ἀναθωθ [B]).

The connection of Anathoth with Jeremiah gives a special interest to its identification. A tradition, not older than the 15th century, fixes it at Kariet el-Enab (Robinson's Kirjath-jearim); but, as Robinson has shown, it can only be the village now called 'Anata', which is situated N.E. of Jerusalem, just at the distance required by the *Onomasticon*, and by the reference in Isa. 10:30. 'Anata is well placed, but only from a strategical point of view. Eastward and south-eastward its inhabitants look down on the Dead Sea and the Lower Jordan—striking elements in a landscape, no doubt, but depressing. Jerusalem is quickly accessible by the Wady Sulam and Seopus, but is not within sight. Here the saddest of the prophets presumably spent his earlier years.

2. b. BECHER (q.v.) in genealogy of BENJAMIN (§ 9, ii. a), 1 Ch. 7:8 (ἀναθωθ [BAL]).

3. Signatory to the covenant (Neh. 10:29[28]). See EZRA, i. § 7. T. K. C.

ANCHOR (ἀγκυρα), Acts 27:29. See SHIP.

ANDREW (ἀνδρεῖος [Ti. W1]) 'manly', one of Christ's twelve disciples. Like Philip, he bore a Greek name; but so did many Jews of his time, and in Dio Cassius (68:32) we meet with another instance of a few called Andrew.

Besides the account of his call (see PETER), and his inclusion in the lists of the apostles (see APOSTLE, § 1), nothing is said of Andrew in the Synoptics, except that, in Mk. 13:3, he appears as one of the inner circle within the twelve, for he is one of the four who question Christ 'privately' about the impending ruin of the temple.

In the Fourth Gospel the picture is more fully drawn, and in one respect completes and explains the account of Andrew's call given in the Synoptics. We read that he belonged originally to Bethsaida (Jn. 1:41), that he was a disciple of the Baptist and heard his witness to Christ, that he and a companion (no doubt John) asked the wandering teacher where he dwelt, and went with him to his temporary home. Then, having 'found the Messiah,' Andrew made his brother, Simon Peter, a sharer in his joy.

We next meet with Andrew, on the E. of the lake of Galilee, at the miraculous feeding of the multitude, on which occasion it is he that tells our Lord (6:9 f.) of the lad in the crowd who has 'five barley loaves and two fishes.' Once more, when the end is near, he shows in a memorable scene his special intimacy with the Master. When Greeks approach Philip with the 'desire to see Jesus,' it is to Andrew first that Philip communicates the request which they together lay before Christ (Jn. 12:22).

The rest of the NT, apart from the list of the disciples in Acts 1:13, is absolutely silent about Andrew. Such other tradition as we have is worthless.

Eusebius (*HE* iii.) speaks of him as preaching in Scythia, and we have in Andrew's 'Acts' the story of his martyrdom, at Patrae in Achaia, on a cross shaped like the letter X. 'Acts of Andrew the Apostle' were in circulation among the Gnostics of the second century, but survived only in various Catholic recensions of much later date. Harnack enumerates (1) *Acta Andreae et Mathiae* (and their mission to the Amphipolitani) in Greek (edited by Tisch. *Act. Apost. Apostol.*), Syriac (edited by Wright, *Apoc. Acts of the Apostles*), Ethiopic, and Coptic (fragmentary). The Latin version survives only in its influence on the Anglo-Saxon *Andrew andoline* by Cynewulf, and in the *Miranda B. Andrew* by Gregory of Tours; see Lips, *Apoc. Act. gesech.* 1343 ff., pp. 27. (2) *Acta Petri et Andreae*, in Greek (fragments edited by Tisch.) as well as in an Ethiopic recension and a Slavonic translation (cp Lips, 1553 f.). (3) *Martyrium Andreae* in various Greek recensions (one edited by Tisch.) and in Latin (Harnack, *Althrist. Lit.* 1127 f., cp Lips, 1564 ff.). A 'gospel of Andrew' is mentioned in the *Decription Gelastii*.

ANDRONICUS (ἀνδρονίκος [VA; ἀνδρονίον] 2 Macc. 4:38 A⁷). 1. The Deputy of Antiochus Epiphanes

ANEM

in Antioch, who (according to 2 Macc. 4:31 ff.), at the instigation of Menelaus, put to death the deposed high priest Onias—a deed for which he was himself slain with ignominy on the return of the king. See MACCABEES, SECOND, § 3, end.

2. Deputy of Antiochus at Gerizim (2 Macc. 5:23). See MACCABEES, SECOND, § 3, end.

3. Andronicus and Junias are named in Rom. 16:7 as kinsmen and fellow-prisoners of Paul, as of note among the apostles, and as having been 'in Christ' before him. The expression 'kinsmen,' if taken literally, seems to imply that they were Jews by birth; 'fellow-prisoners,' on the hypothesis that Rom. 16:3-20 belongs really to an Ephesian Epistle, has been conjectured by Weizsäcker to allude to an imprisonment which they shared with Paul in Ephesus, most likely in connection with the great 'affliction' (2 Cor. 1:8-11), which ultimately led to his leaving that city (Acts 19:23-20:1); on the application of the term 'apostle' to them see APOSTLES, § 3. The name Andronicus was not uncommon among Greek slaves; and it has been conjectured that this Andronicus may have been the Jewish freedman of a Greek master.

In the lists of 'the seventy disciples' which we owe to the Pseudo-Dorotheus and the Pseudo-Hippolytus Andronicus is spoken of as bishop of 'Panonia,' or of 'Spain.' In the fragments of the Gnostic *apocrypha* Iwānaw, he and his wife Drusiana figure prominently as hosts of the apostle John at Ephesus, and he is represented as having been made by that apostle *prophētēs*, or president, of the church of Smyrna. In the Greek church Andronicus is commemorated, along with Crescens, Silas, and Epaphroditus, on 30th July. See Lipsius, *Apokryph. Ap. gesch.* (Index, p. 134).

ANEM (אָנֶם), 1 Ch. 6:73[58] = Josh. 19:21 EN-GANNIM (גַּן עֵינַן).

ANER (אָנֶר), 1. (Sam. עֵינַן; אָנֶם [ADEL]; Jos. ΕΝΝΗΡΟΣ, a Hebronite) Gen. 14:13-24. Perhaps a local name; cp *Nir*, a hill near Hebron (ZIMM 12:470[58]). The correctness of the name Anēr, however, is doubtful. The *אָנֶם* of G points to עֵינַן, Enan (i.e., place of a spring), a name which may refer to one of the six springs near Hebron—e.g., the deep spring of Sarah called 'Ein Tefidich' (Baed. (2) 137), at the E. foot of the hill on which ancient Hebron lay.

2. (אָנֶם [11], אָנֶם [A], אָנֶם [11]) a city in Western Manasseh (1 Ch. 6:70[55])—perhaps a corruption of TAANACH (תַּעֲנַךְ); cp Josh. 21:25. T. K. C.

ANETHOTHITE, ANETOTHITE. See ANATHOTH, 1.

ANGEL. The English word 'angel' is a transcription of ἄγγελος, G's translation of Heb. *mal'akh*.

1. **Names.** (מַלְאָכִים). The English word denotes primarily superhuman beings; but both the Hebrew and the Greek terms are quite general, and, signifying simply *messenger*, are used indifferently of human or superhuman beings.¹ Other terms, less ambiguous in this particular respect, also occur.

These are: 'gods' (אֱלֹהִים), cp Ps. 85[6], and see AV, RV mg. *ib.* 82:16 97:7 138:1, 'sons of [the] god[s]' (בְּנֵי אֱלֹהִים), cp Gen. 6:24 Job 1:6 2:1 38:7, or אֱלֹהִים בְּנֵי, Ps. 29:1 80:6[7], EV text, 'sons of [the] mighty,' 'mighty ones' (אֱלֹהִים בְּנֵי, Ps. 78:25, cp *ib.* 103:20, 107:13), 'holy ones' (קְדוֹשִׁים), Dan. 4:14[17], 'host of heaven' (צְבָאוֹת שָׁמַיִם), 1 K. 22:19 Dt. 17:1, 'host of the height' (צְבָאוֹת שָׁמַיִם), 1 S. 21:10, or 'host of Yahwē' (צְבָאוֹת יְהוָה), Josh. 5:14, cp use of צְבָאוֹת in Ps. 103:21 148:2 Neh. 9:6, and 'God's camp,' אֶמְקֵי אֱלֹהִים, Gen. 32:2[3]. In the case of Ps. 68:17[18] (אֶמְקֵי שָׁמַיִם) we owe the AV rendering 'thousands of angels' to old Heb. tradition (Ezra, Saul, and Abiath), which treated the difficult שָׁמַיִם as a synonym of צְבָאוֹת (cp Del., *ad loc.*). RV 'thousands upon thousands' is equally hazardous; cp Dan. 7:10.

In the NT also we find other terms in use: 'spirits' (πνεύματα, Heb. 1:14), 'principalities' (ἀρχαί, Rom. 8:38), 'powers' (δυνάμεις

¹ Karpe (Journ. As. ser. ix, 9:125) reads מַלְאָכִים, a derivative of מַלְאָכִים, as if 'the walker'—the messenger, or Yahwē marching (1 S. 6:1, *SBOT*) as opposed to Yahwē mounted on the cherub (Ps. 18:10 [11]).

ANGEL

ib., ἰδούσας, Eph. 6:12), 'thrones' (θρόνοι, Col. 1:16), and 'dominions' (κυριότητες, *ib.*), cp further Cremer, *Lex. NT* 3:20 ff. 237, and the Heb. and NT Lexicons, s.vv.

The earliest OT writings contain no definite or systematic angelology, but indicate a prevalent belief in other superhuman beings besides

2. **Pre-exilic.** Yahwe. These were (1) the 'other gods' or 'gods of the nations,' who were credited with real existence and activity; cp, e.g., Nu. 21:29 Judg. 11:24 and v. Bandissin, *Stud.* 155-79. (2) Closely connected with these were the 'sons of God'—i.e., members of the divine guild. There is but one pre-exilic reference to these (Gen. 6:24), whence it appears that they were not subject to Yahwe, but might break through the natural order of his world with impunity. (3) Attendants on Yahwe—in 1 S. 6 some of these attendants are termed Seraphim (see SERAPHIM), but others distinct from these seem to be implied; cp 7:8. In a similar scene (1 K. 22:19-22), those who attend Yahwe and form his council are termed collectively 'the host of heaven.' Such divine councils are also implied in Gen. 3:22 11:7 (both J); cp the plurals in these passages with that in 1 S. 63, and the question in 1 K. 22:20. In another passage (Jos. 5:14 ff.) the pre-exilic origin of which, however, has been questioned (Kue. *Heb.* 248 ET)—the host of Yahwe appears as disciplined and under a captain. According to some, the 'hosts' in the phrase 'Yahwē (God of) hosts'—a phrase current in early times—were angels (Che. *Proph. Is.* 1:11 ff.; see further NAMES, § 123). The original text of Deut. 33:2 ff. contained no reference to angels (see Dillm. *Comm.*; cp also Driver). Another element in early Hebrew folklore worthy of notice in the present connection is the belief in the horsemen of the air (2 K. 2:12 6:17). For a parallel in modern Bedouin folklore cp Doughty, *Des. De. I* 449. 'The meluka are seen in the air like horsemen, tilting to and fro.' Angelic horsemen play a considerable part in later literature—e.g., in Zech. 1 Apoc.

The most noteworthy features, then, of the pre-exilic angelology are the following:—(1) except in Gen. 28:32, these beings are never termed 'angels.' 'Angel' occurs frequently in the singular, but only in the phrase 'angel of Yahwē' (more rarely, 'of God'), which denotes, not a messenger of, and distinct from, Yahwe, but a manifestation of Yahwē himself in human form (see THEOPHANTASIES, § 4). Koster treats even Gen. 28:10-12 32:1[2] 18:1 f. 19:1 f. as statements of the manifestation of the one God in many forms (cp WRS *Rel. Sem.* 426 f., 2nd ed. 445 f.), and concludes that, before the Exile, מַלְאָכִים was used exclusively of appearances of Yahwe. Against this, Schultz's reference (*OT Theol.* 2:219) to 1 S. 29:9 2 S. 14:17 19:27[28] is not quite conclusive. (2) These attendants on Yahwe are not also messengers to men. Even if the angels of Gen. 28:32 be distinct from God, they bring no message. For such a function there was no need so long as Yahwē himself appeared to men. (3) Beside these subordinate divine beings that attend Yahwē, but have no relations with men, there are other beings ('other gods,' 'sons of the gods') which are not subject to Yahwē, and do enter into relations with men.

Comparatively few as are the early references to angels or kindred beliefs (cp DEMONS, § 1), they are

3. **Later.** yet such as to justify us in attributing a comparatively rich folklore on these matters to the early Hebrews; but it is not until the exilic and post-exilic periods that angels come into prominence theologically. They do so then in consequence of the maturing belief, on the one hand, in the transcendence of Yahwē, on the other, in his supremacy. The development of angelology at this time must also have been favoured by the contact of the Jews with the Persians; and some details of the later doctrine may be due to the same influence—e.g., the naming of angels, although the great majority of the names themselves (as in

Enoch 4.69) are quite clearly Hebraic, though of a late type (cp *HPA*, p. 210).

With the growing sense of Yahwē's transcendence, belief in his self-manifestation in human form ceased; and thus the phrase 'angel of Yahwē,' set free from its old meaning, now came to denote one of the beings intermediate between Yahwē and men. At first it was apparently the title of a particular angel (Zech. 1.11 f.), but subsequently it became a quite general term (note the pl. Ps. 103.20, cp 34.7 f. and N1 *passim*). It is now by angels, and no longer directly, that Yahwē communicates with men—even prophets. The experience of Ezekiel marks the transition—Yahwē speaks to him, sometimes directly (11.2), sometimes through another (40.1). With Zechariah the change is complete. He never sees Yahwē; he receives all divine instructions through angels (contrast Am. 7 f.). Daniel receives the explanation of his visions in the same way; and in NT, warnings or other communications of the divine will are given by angels (Mt. 1.20-21, Lk. 1.19, Acts 10.1-6). The angels thus become the intermediaries of Yahwē's revelation; but they are also the instruments of his aid (Ps. 91.11; Dan. 3.28, and frequently; cp later, 2 Macc. 11.6-3 Macc. 6.18, Susan. 42 ff. [in LXX, but not in Theod.], Bel and Drag. 34-39; cp Acts 8.26-30 f. Tobit, *passim*, Acts 12.7 ff., and especially Heb. 1.14), or punishment (Ps. 136.35-36 f. Enoch 53.1-62.11-63.1 Apoc. Bar. 21.23 Rev. 6 f., also in 6 Job 20.15-31.23 40.11 [v. 6 in Heb. and EV] and see further below, § 5). Especially prominent in the apocalyptic literature is the cognate belief in the intercession of angels with God, in behalf of the righteous, or against the unrighteous: see, e.g., Enoch 9.10-15.2 106 (where the function is specially referred to Gabriel, 40.6; yet cp also Tob. 12.12-15 where Raphael intercedes) 99.116-101.1 Rev. 8.3 f. Cp also in OT, Zech. 1.12 Job 5.1-33.23 Eccles. 5.6-7, and perhaps in NT, Mt. 18.10, unless this be a case of angelic guardianship.

In other respects also, the later angelology shows the influence of the growing sense of Yahwē's transcendence; the angels, exalted far above men by the functions just mentioned, are themselves adored before God (Job 1.6).

4. Supremacy of Yahwē.

The awful exaltation of even angels above men, is prominent in Daniel (Dan. 8.16-8 10.16 f.). The countless number of the angels is emphasised (Job 33.23, Dan. 7.10, and later, Enoch 10.1-71.8 Mt. 26.53 Heb. 12.22 Apoc. Bar. 48.10-51.11-59.11), and they are divided into ranks. Even in Zech. the angel of Yahwē is a 'kind of grand vizier receiving the report of (less exalted) angels' (Smead). This conception of ranks becomes, later, more detailed¹ (see Dan. 10.13-12.1 Tob. 12.15, and Enoch—e.g., chap. 40), and creates in Gk. the term ἀρχάγγελος (see Charles, *Book of Enoch*, p. 67; 1 Thes. 4.16 Jude 9); it may be traced farther, in NT, in the

references to the 'seven spirits of God' (Rev. 1.4 cp 8.2), and to Michael (Jude 9 Rev. 12.7) and Gabriel (Lk. 1.19); probably also in the use of several terms together, in certain passages (e.g., thrones, dominions, principalities, powers, Col. 1.16), and perhaps in the term 'elect angels' (1 Tim. 5.21).

The doctrine of Yahwē's supremacy involved either an absolute denial of the existence of other superhuman beings or their subordination to him. To the latter method of accommodation post-exilic angelology owes some striking features. Thus, the patron angels of nations (clearly referred to in Dan. 10.1-20 12.1, probably also in Is. 21.1 ff. Joel 3[1] 11 Ps. 82.58-10; see Charles, *Book of Psalms* 229 ff. and *comm.*) are merely the ancient 'gods of the nations'—for which, in this connection, cp especially Dt. 1.9 29.25 f. 33.8 6.—transformed to suit the new doctrine. Again, the 'sons of the Elohim'—formerly independent of Yahwē, whose laws they broke with impunity—now become identified with the angels (cp Ps. 29.1 with 103.20, and 6's translation of Gen. 6.2 [not L.] Job 1.6 etc., cp also Lk. 20.36); as such they constitute his council and do his bidding (Job 1.6 2.1; cp Zech. 1.11 f.). Similarly, the host of heaven, which in the later years of the monarchy had been favourite objects of worship (cp, e.g., Zeph. 1.5 Jer. 8.2 Dt. 1.19), and therefore rivals of Yahwē, now again become subject to him and do him homage (Neh. 9.6); he is as supreme over them as over men (Is. 45.12, cp 40.26); he is equally supreme over all gods (e.g., cp Ps. 96.4).

On the other hand, the difficulty with which Yahwē's claim to universal worship against all others was

established is also reflected in the new angelology. Yahwē's supremacy over the 'gods,' or the 'host of heaven,' was won and maintained only by force (Job 25.2 cp 21.22 Is. 21.21 34.45; cp 27.1—for the passages in Job see Davidson's, for those in Isaiah, Cheyne's *Comm.*). This incomplete assimilation of the 'other gods' etc. to beings wholly subservient to Yahwē, combined with a growing dislike to attribute evil or disorder directly to him, led to the differentiation of angels as beneficent or maleficent (see DEMONS, § 5. SATAN, § 3); but the OT nowhere lays stress on the moral character of angels, or knows anything of their 'fall.' Consequently, angels were divided not into good and bad, but into those who worked wholly, and those who worked only partly, in obedience to God. This latter division still seems to hold its own in NT alongside of the former; and, for this reason, in passages such as Rom. 8.38-1 Cor. 15.24 f., the question 'Are the angels referred to good or bad?' is probably out of place (cp Everling).

For several centuries after the Exile the belief in angels did not gain equal prevalence in all circles: thus

P never mentions them (on Gen. 1.26-21 see Dillm. 1); the Priestly Chronicler does so but rarely—save when quoting directly from his sources—and Esther, Ecclesiastians, Wisdom, and Maccabees, are marked more by the absence than by the presence of such references; 'Angel' does not occur in the Hebrew of Eccles. 48.21. Still later the differences become conspicuous; the Sadducees were credited with complete scepticism (Acts 23.8); the

ESSENES (7.1, § 3) attached an exaggerated importance to the doctrine; the popular Pharisaic party and all the NT writers share, in general, the popular beliefs. Yet in John angels are alluded to only in 20.12-13 (a passage based on an OT narrative), 12.29 (a saying of the populace), and the intrusive verse 5.4; the epistles contain no mention of them (cp the comparative infrequency of references in John to demons (7.7, § 6)).

Several features of NT angelology have been already incidentally discussed; they are common to both Jewish and Christian writings. Scarcely less

influential over the writers of the NT than the OT were the apocalypses

and NT. already extant—especially Enoch. It is in Enoch we

¹ [The influence of non-Jewish upon Jewish beliefs can here scarcely be denied. These are the facts of the case: In Daniel (10.13) we hear of a class of 'chief princes,' two of whom (GABRIEL and MICHAEL, 11) are named (chaps. 10-12; cp also RAPHAEL and URIEL). In Tob. (12.15) the number of the 'holy angels who present the prayers of the saints, and go in before the glory of the Holy One,' is given as seven (if the text is correct). In Enoch the number of the chief angels varies between three, four, six, and seven (see chaps. 20-40.7 78.1-89.1 90.21-31, and other passages). Manifestly this highest class of angels was suggested by the Zoroastrian Amesha Spentas or Amshaspands ('immortal holy ones'), who (like the counselors of the king of Persia, Ezra 7.14) are seven; and this seems to be confirmed by the reference to the archangels in the Book of Tobit, which also mentions the Zoroastrian name of the chief demon (see ASMODEUS). In referring to this Iranian belief, however, we must not forget the possibility that it is to some extent historically connected with Babylonian spirit lore. The cults of the seven planets is no doubt primeval in Babylonia, and may have spread thence to the Iranian peoples. To explain the belief in the angels solely from Babylonian sources would be plausible only if the Zoroastrian Gāthas, which are pervaded by the belief in the Amshaspands, were not earlier than the time of Philo. For this bold theory see Darmesteter, *Le zandavesta* 3.56 (Cp), etc.; but contrast the same writer's earlier theory in *SRE* (*Zandavesta*, i. Introd.)—T.K.C.]

ANGEL

first see elaborated a doctrine of the 'fall' of angels. The fall is regarded as the punishment for the intercourse mentioned in Gen. 6:2-4, and for an improper revelation of 'the secret things of the world' (cp in NT Jude 6-2 Pet. 2:4). Through their fall they become inferior to men, who therefore judge them (1 Th. 4:7-15, cp 1 Cor. 11:10-12). Enoch should be especially compared with Revelation.

The influence of the OT may be clearly seen in the NT angelophanies, which seem modelled on those of the early OT narratives, only that now, under the influence of the later development, the angel is quite distinct from God (Acts 10:1 f. is not an exception). These angelophanies abound in the nativity and resurrection narratives, and in Acts (5:9, 8:26-40, 10:1-7, 12:7-17, 27:23), but are conspicuous by their absence from the narratives of the life of Christ—the badly attested passage 1 k. 22:11 being unique, except so far as Mt. 4:11—Mk. 1:13 (contrast 1 k. 14:7) may be considered parallel.

Jesus accepts the popular belief in the existence of angels, but never (even in Mt. 18:10 or 26:53) counter-

8. Jesus.

balances the belief that they influence life in the present—perhaps in the parable of the wheat and the tares (Mt. 13:41-43, 47-49) he directly discommends it. All he says of them has reference to themselves alone, or to their relations to men after life. Thus, at the second coming they will accompany the Son of Man (Mt. 16:27 and parallels; Jn. 1:51), and will then separate the good from the evil (e.g., Mt. 13:41; cp 1 k. 18:22). They do not marry (Mt. 22:30, and parallels); their knowledge is limited (Mt. 21:27—Mk. 13:32); and they rejoice over repentant sinners (1 k. 15:16; cp 1 k. 12:3 f., with which contrast Mt. 10:42 f., and cp earlier, Job. 33:23). In particular, Jesus breaks away from the prevailing tendency to make angels the intermediaries of revelation: he himself becomes the sole revealer (Mt. 11:27, Jn. 1:76; cp 11:6 ff.), he will himself always be with his disciples (Mt. 28:20), and will instruct them directly (1 k. 21:45), or through the Spirit whom he sends (Jn. 15:26, 11:26). Thus this part of the doctrine of angels was doomed to give way to the Christian doctrines of the abiding presence of Christ and of the Holy Spirit. It still survives, however, in Revelation (1:17, 21:9; cp also in the contemporary Jewish *Apoc. Bar.* 55:3, 'The angel Ramud who presides over true visions'); also in Acts (10:3 ff., 27:23 f.)—yet here alongside of the new belief (10:1-6).

9. Paul.

Paul already shows the influence of the teaching of Jesus—he claims to receive his gospel direct from him (Gal. 1:12 f.; cp Acts 9:6)—but still shares (Gal. 3:19) the common belief (Acts 7:53; Heb. 2:2, Jos. *Ant.* xv. 54; cp 1 k. 33:2) in the past instrumentality of angels in revelation, perhaps also in the present possibility of the same (Gal. 1:8; cp 2:4 f.). With him, too, angels still play a large part in human life; his own practice and practical exhortations are governed by this belief (1 Cor. 4:9, 6:3, 11:6). An emphatic warning, however, is uttered against a practice (which was springing up in some quarters) of worshipping angels (Col. 2:8, cp Rev. 19:6). In the same epistle the creation of angels is asserted (1:6)—a point to which, as might be expected, no reference had been made in OT, where they are once mentioned as being present at the creation of the world, Job. 38:7 (in Jewish literature, cp Job. 2:2 Apoc. Bar. 21:6). The question whether Paul associated angels with cosmic forces turns on the interpretation of τὰ στοιχεῖα τοῦ κόσμου, Gal. 4:3 Col. 2:8 (see, on the one hand, Lightfoot, *in loc.*, on the other, Everling, as cited below, and cp ELEMENTS). Such an association would, at least, have accorded with the tendency of the time: note the angels of winds, sun, fire, and water, etc. (Rev. 7:1, 19:7, 11:3, 16; cp Heb. 1:7 and Jn. 5:4, and, somewhat earlier, Enoch 60:1 ff., 61:10). The tendency began much earlier; in the OT angels and stars are closely associated (cp Job

ANKLETS

38:7, 1:8, 31:4, and, in general, the double meaning attaching to the phrase 'host of heaven') and the transition from Ps. 104 to a lived belief in elemental angels is easy. See PERSEA.

The literature of the subject is large; all the Old and New Testament Theologies contain discussions, on the OT, Peppering's *Theol. de Caelum et Terris*, 1900 (11, 1904), New York, 9, 3, and Smoos's *11. Keltische*, 1904 are specially helpful. The chief monographs for the OT are by Koster (Die Malach. Yahweh und die Entstehung der Entwicklung der Angelologie under Israel, *Th. f. v.* 367, 1903 [73], 10, 1909, 11-14, 1909); for the Pauline doctrine, by Everling (*Die Paulinische Angelologie und Demonologie* [1883]). On the vocabulary of the subject see M. Schwab, *Les origines de l'angelologie d'après manuscrits hébreux* (Paris, 1897). The question of foreign influence is discussed by Kohut (*Ueber d. jüd. Angelologie u. Demonologie in ihrer Abhängigkeit von Persien*), for further information on this point see Che. *OTs* 282. See further the valuable discussions of Momigliano (*Heb. Lit.*, viii, esp. p. 499 ff.) and Cheyne (*OTs* 322-327, 340-347) and cp Lucken, *Malach* (1903).

ANGLE (Is. 19:8; Hab. 1:15). See HOOK, 3, ENSL, § 3.

ANIAM אֲנִיָּא, surely not 'mourning of the people' (Ges.), but unwritten [see Θ^p] for אֲנִיָּא, see FIAM, differently Gray, *HPV* 44 n. 1, who would omit א, and derive from אֲנִי, אֲנִיָּא (13). **ANIAM** [A], CN [11], in genealogy of MANASSER (1 Ch. 7:19). — L. K.

ANIM אֲנִיָּא, אִימָא [B], **ANEIM** [V], 18 [11], Josh. 15:41, a hill town of Judah, mentioned after Eshtemoa (a name equally distorted in Θ^p). Perhaps the modern el-Ghuwein, which lies to the south of el-Khalil (Hebron) between es-Sem' and Tell 'Arad.

ANISE (ANHOON [T, WH], Mt. 23:31) or DILL (RV mg.) is the plant *Anethum graveolens*.¹ The correct rendering is 'dill',² and the plant is distinct from *Prunella Anisum*, which is the modern 'anise'. The biblical plant is described (Flückiger and Hanbury's *Pharmacographia*,³ 327 f.), as 'an erect, glaucous annual plant, with finely striated stems, usually one foot to one foot and a half in height, pinnate leaves with setaceous linear segments, and yellow flowers. It is indigenous to the Mediterranean region, Southern Russia, and the Caucasian provinces, but is found as a corn-field weed in many other countries, and is frequently cultivated in gardens'.⁴

It is mentioned in Mt. 23:31, along with mint and cummin,⁵ as being subjected by the scribes and Pharisees to tithe. This practice accords with the general principle stated at the commencement of the Mishna tracton 'tithes' ('Whatsoever is food, and is private possession, and has its increase out of the earth, is subject to tithe'—a rule based on the precept of Dent. 14:22, 'Thou shalt surely tithe all the increase of thy seed, that which cometh forth of the field year by year'), and the liability of dill in particular to tithe is, in the Talmud, specially mentioned (see the references in Celsius, *Herobot*, 1497). — S. M. — W. T. G. D.

ANKLETS and **ANKLE-CHAINS**. These have ever been favourite ornaments among Orientals.⁶ Probably the oldest specimens are some in gold and silver which have been found in Egypt, where they appear to have been worn by men as well as women. The chains obliged the wearers to take short and tripping steps. To enhance the effect, bells were (at

¹ The Syriac and the Arabic versions correctly render by the word *shabbetta, shabbat*, a name for this plant which is probably derived from Persian (see Liow, 373).

² This, though supplanted by 'anise' in all the English versions from Wyclif onwards, is the word used in the A.S. version, 'myntan and dille and cymonyn'.

³ Virgil gives it a place in the flower-garden (*Eccl.* 2:48), and Pliny in the vegetable garden (*IIA* xix. 85). Cp the Greek refl. in Liddell and Scott.

⁴ In the parallel passage in 1 k. (11:42) dill is not mentioned—'mint and rue and every herb (*παν λαχανον*)'.

⁵ Cp *Ar. kalhil*, and 1 k. περιφύριον and περισκελίς, the latter of which is Θ^p 's rendering of the Heb. אֲנִיָּא (in the plur. or dual) 'breeches'.

ANNA

my rate, in later times) attached to the chain—a practice which is attested in terms of disapproval in the Koran (S. 21:1). Ornaments of this nature are referred to in 1 Lk. 11:41.

They are here called **אֲנָנִים** RV 'anklets'; AV 'tinkling ornaments' (**אֲנָנִים**), a word from which comes the denominative verb **אָנַן** (cp. **אָנַן** **אֲנָנִים** 'they make a tinkling with their feet', **אָנַן** **אֲנָנִים**). Similar is **אָנַן** 1s. 3:21, RV 'ankle chains'; AV 'ornaments of the legs', **אָנַן** **אֲנָנִים** 6p. **אָנַן** **אֲנָנִים** (cp. **אָנַן** No. 3, 30, RV as above, AV 'chain', **אָנַן** 'to walk', **אָנַן** is applied also to ornaments worn on the arm; see B. 11:1, 5).

ANNA (**אָנָּה** [ANNA]), the Greek form of the name **חַנָּנִיָּה**.

1. Wife of Eliah (1 Lk. 1:4, 7).
2. Daughter of Phineas, of the tribe of Asher (Lk. 2:36). Like Simeon, she represents the class of those who 'waited for the consolation of Israel,' and, like him, she is said to have had the gift of prophecy. Being constantly in the temple, and prepared for the honor by fastings and prayers, she was enabled to meet the child Jesus and his parents, when, like Simeon, she burst into a prophetic song of praise. She is also it would seem a prototype of the 'widows indeed' (see WIDOW) of the early Christian community (1 Tim. 5:9); hence the particularity with which the circumstances of her widowhood are described.

The name Anna or Anne is one common among Christians from the tradition that the mother of the Virgin Mary was so called.

ANNAAS (**אָנָּאָס** [A]), 1 Esd. 5:23, AV = Ezra 2:35 **חַנָּנִיָּה**.

ANNAS (**אָנָּאָס** [A]), 1 Esd. 9:32, RV [Heb. **אָנָּאָס**], **אָנָּאָס** 10:11 **חַנָּנִיָּה**.

ANNAS and CAIAPHAS (**אָנָּאָס וְכַהֵן** [Ti. VII]; **כַּהֵן** **אָנָּאָס** [Ti. VIII]). In 6 A.D. Quirinus, who on the deposition of Archelaus became governor of Syria, followed the custom of the Herodian family and appointed a new high priest. His choice fell on a certain Annas (so in Josephus) or Annas, son of Sethi (Jos. 2:104) who continued to hold the office until the change of government in 15 A.D. After this Annas, who succeeded Quirinus, gave the post in succession to three men, none of whom, however, held it for more than a year. The second of the three was a son of Annas, called Eleazar by Josephus (1 Ant. xviii. 22). At last, in 18 A.D., Valerius found in Joseph, called Caiaphas, one who was strong enough to hold the office till 36 A.D. Then Vitellius (35-39 A.D.) once more, in 36 and 37, appointed, one after the other, two sons of Annas named Jonathan and Theophilus (1 Ant. xviii. 435). Jonathan still held a prominent position in 50-52 (10/ ii. 123), a point of which we have good proof in the fact that Felix cursed him to be assassinated (10/ ii. 134, 135). As in Acts 16, Annas, Caiaphas, Jonathan (so D); the other MSS have Joannes, EV JOHN), and ALEXANDER are assigned high-priestly rank, and the first three can be identified from Josephus, JOSEPHUS being a son, and CAIAPHAS, according to Jn. 18:13, a son-in-law, of Annas, we seem to have good reason for conjecturing Alexander to be the Græcised name of Eleazar the son of Annas.

CAIAPHAS, then, was the acting high priest at the time of the trial of Jesus. His long term of office shows that in his relations with the Romans he must have been obsequious and adroit. Mk. and Lk. do not mention him in their account of the passion; but in Jn. 11:49-18:13, 24:23 and Mt. 26:57, we read that he presided over the proceedings of the Synhedrion; he therefore it was who rent his clothes. According to

1 Cp. **אָנָּאָס** a fetter(?) in Pr. 7:22, the pr. name **אָנָּאָס** (see ACUSUM) and the Ar. **ʾikās**, a chain connecting the head and forehead of a camel—the usual method of hobbling the animal.

ANOINTING

In 1149-52, he became also an involuntary prophet as to what the death of Jesus meant. With regard to his character in general, the accounts accessible to us give no details.

The most important personality in the group would appear to have been old ANNAS. This seems to be sufficiently implied in the fact that four of his sons² and a son-in-law successively held the high-priestly office—whether we assume that Annas expressly wrought for this end, or whether it was simply because those in power sought by this means to win him over to themselves. Only on the assumption that he was, in truth, the real manager of affairs, can we account for it that, according to Jn. 18:13-14, he gave a private hearing in the case of Jesus, as also that Lk. (Lk. 3:2) names him as co-regent with Caiaphas, and (Acts 16) enumerates him in the first place, along with Caiaphas and two of his high-priestly sons, as holding high-priestly rank. Other instances, however, of a similar co-ordination of past high priests are not unknown; for example, in the case of Jonathan, son of Annas (10/ ii. 123), of Annas son of Nedebarus (1 Ant. xv. 124), of ANANIAS, q.v., and of the younger Ananias and Jesus son of Gamaliel, both of whom were high priests for some time during the years 62-65, and had the conduct of affairs in their hands during the first period of the Jewish wars.

The Annas (Ananias) just mentioned, son of Annas, appointed in 62 A.D. by Agrippa II. availed himself of the confusion following on the death of Festus to procure the death of his enemies by tumultuary sentence. Among the victims of his tyranny was, it would seem, James, the brother of the Lord. The passage relating to it in Josephus (20:7), however, may perhaps be a Christian interpolation (see JAMES, § 3, end). In any case, the king himself, even before the arrival of the new procurator, put an end to Annas's reign of terror by deposing him from the high-priesthood after a tenure of three months.

II. v. s.

ANNIS, (**אָנָּאָס** [B]), 1 Esd. 5:16, RV, RVmg. **Annias**, AV **ANANIAS** (q. v., 1).

ANNUUS (**אָנָּאָס** [A], om. BL), 1 Esd. 8:42, a name not in Ezra 8:10, in Ezra's caravan (see EZRA, i. § 2, ii. § 15 (11) d)—supposed by some to be a corruption of 'with him' (**אָנָּאָס**) in Ezra, which may itself be a misreading sign of the accusative (so **אָנָּאָס**).

ANOINTING. In the OT two distinct Hebrew terms, frequently occurring, are translated in EV by 'anoint,' while a third (**אָנָּאָס**) is incorrectly so understood. It stood in Ps. 26 by Tag. and Sym. and also by Ewald (cp. We. *Heid.* 118). (a) **אָנָּאָס** (*anok*) is always (Dt. 28:40 Ruth 3:3 2 S. 12:30 11:2 2 Ch. 28:13 Ezek. 16:9 Dan. 10:4 Mic. 6:15) used of the application of unguents to the human body as a matter of toilet, and hence Ex. 30:32 means that the holy anointing oil shall not be used for ordinary toilet purposes. (b) **אָנָּאָס** (*anashah*) and its derivatives.³ In this case we have to distinguish between the primary physical, and a secondary and metaphorical use. In its physical sense **אָנָּאָס** is used (1) rarely, probably with the retention of the original meaning of the root, of rubbing an unguent or other substance on an object,—e.g., oil on shields (Is. 21:5

1 It has been suggested that the reference to his prophesying may have arisen out of a popular etymology of Caiaphas, cp. Ar. *kaif* 'soothsayer' (*qui movet vestigia et indicia rerum, physionomus*, FRET.) (cp. Nestle, *ZWTh.* 40:149, and see Dalm. *Gram.* 127, n. 4). Blass thinks that Nestle has upset the etymology from **אָנָּאָס** 'stone' and **אָנָּאָס** 'oppression,' by showing that the name in Aramaic is written with **אָנָּאָס**.

2 The fourth, Matthias, was appointed to the office for a short time, between 41 and 44, by Agrippa; perhaps Annas did not live to see this, and certainly he did not survive to see the priesthood held by his fifth son, Ananias II. (in 62 A.D.).

3 On these, as well as on several matters referred to in the course of this article, Weinel's study 'Ananias und seine Derivate' (*ZATW.* 18:1-2 [1882]) should be consulted. Unfortunately, it appeared too late to be used in the preparation of the present article.

ANOINTING

28 Let paint on a ceiling, for 22:4 (here translated in LX by 'painted'), and probably we should interpret the word similarly in the recurring phrase (e.g., in 1:20:2) where an individual is anointed with oil, i.e. of the application of a unguent to persons or things. (See also 1:20:2 for details see below § 3 f.) but clearly not, with the possible exception of Am 6:6, where it is used in the sense of 'anoint'. In its metaphorical sense *ḥšm* is used of the divine appointment or selection of a man for a particular purpose (e.g., for the king, 1:18:10; 1:18:15; 2:8:12; 2:K 9:6; 1:15:1; 1:18:1; 2:Ch 22:1, cp. below, § 3). For the relation of *ḥšm* to the usage under discussion see MRSAT, § 1. 'Anoint' in Ps 92:11 corresponds to Heb. *ḥšm* in Ps 23:5 it corresponds to *ḥšm*, 'anointing' in the possibly corrupt passage 1:10:7 corresponds to *ḥšm* (2:K 2:1) and 'anointed ones' in Zech 14:19 and RV 'sons of oil'; 2:K 2:10 *ḥšm* corresponds to 2:K 2:10.

In NL the LX also confuses two sharply distinguished terms, *ḥšm* which in the LXX, as in classical Greek, may be used in a physical sense, is in the NL used in a metaphorical sense, for we can hardly regard the quotation from Ps 137 in 1:16:1 as an exception. The derivatives *ḥšmā* (1:16:2) and *ḥšmā* are used similarly, but the compounds *ḥšmā* (1:16:3) and *ḥšmā* (1:16:4) retain the original physical sense.

Thus the NL use of *ḥšm* resembles the metaphorical use of *ḥšm*. The other NL term *ḥšmā* is also used of the application of unguents to the body, whether (like the Heb. *ḥšm* which it frequently represents, e.g., Ruth 3:1; Micah 6:1, cp. also 2:K 1:2:30) for toilet purposes (Mt. 6:17 Lk. 7:39; Jn 11:2), or medicinally (Mk 6:13; Jn 5:14), or as a tribute of respect to the dead (Mk 16:1; cp. Jn 12:7).²

From the foregoing analysis of the terms, it will be clear that 'anointing' was practised by the Hebrews both for secular and for sacred purposes. The unguent used was olive oil, with or without the addition of aromatic spices, for details see OLL. Anointing formed among the Hebrews, as among many other peoples (cp. e.g., Pl. *Her.* viii 146), a regular part of a full toilet, being in particular associated with washing (Ruth 3:1; Ezek 16:3; Sus 17); the omission of it was a sign of mourning, the resumption of the practice a sign that mourning was over (2:8:11; Dan 10:1 [cp. Mt. 6:17]; 2:8:12; Judah 10:3; cp. Is. 61:1; Eccl. 9:8); and hence 'to anoint' is a suitable figure for 'to make glad' (1:8:23; cp. 1:17:3). The head and face appear to have been most usually anointed (1:8:10; 1:8:11; Judah 14:1; Mt. 6:17 Lk. 7:39; cp. Ps 23:5; 141:5; Eccles 9:8), and the anointing of the feet to have been a special luxury (Lk 7:39; Jn 12:3). The medicinal use of unguents is referred to not only in Ja. 5:14; Mk 6:13, but also in Is. 16 Lk 10:34. On anointing the dead see FMDALING.

Leaving the significance of anointing as a religious rite to a final section, we will here simply classify the persons or objects which were so anointed; and treat the persons. (a) *The king.* In the OT, especially in the earlier writings, there are numerous references to the anointing of kings (cp. e.g., 1:8:16; 1:8:17; 1:8:18; 1:8:19; 1:8:20; 1:8:21; 1:8:22; 1:8:23; 1:8:24; 1:8:25; 1:8:26; 1:8:27; 1:8:28; 1:8:29; 1:8:30; 1:8:31; 1:8:32; 1:8:33; 1:8:34; 1:8:35; 1:8:36; 1:8:37; 1:8:38; 1:8:39; 1:8:40; 1:8:41; 1:8:42; 1:8:43; 1:8:44; 1:8:45; 1:8:46; 1:8:47; 1:8:48; 1:8:49; 1:8:50; 1:8:51; 1:8:52; 1:8:53; 1:8:54; 1:8:55; 1:8:56; 1:8:57; 1:8:58; 1:8:59; 1:8:60; 1:8:61; 1:8:62; 1:8:63; 1:8:64; 1:8:65; 1:8:66; 1:8:67; 1:8:68; 1:8:69; 1:8:70; 1:8:71; 1:8:72; 1:8:73; 1:8:74; 1:8:75; 1:8:76; 1:8:77; 1:8:78; 1:8:79; 1:8:80; 1:8:81; 1:8:82; 1:8:83; 1:8:84; 1:8:85; 1:8:86; 1:8:87; 1:8:88; 1:8:89; 1:8:90; 1:8:91; 1:8:92; 1:8:93; 1:8:94; 1:8:95; 1:8:96; 1:8:97; 1:8:98; 1:8:99; 1:8:100; 1:8:101; 1:8:102; 1:8:103; 1:8:104; 1:8:105; 1:8:106; 1:8:107; 1:8:108; 1:8:109; 1:8:110; 1:8:111; 1:8:112; 1:8:113; 1:8:114; 1:8:115; 1:8:116; 1:8:117; 1:8:118; 1:8:119; 1:8:120; 1:8:121; 1:8:122; 1:8:123; 1:8:124; 1:8:125; 1:8:126; 1:8:127; 1:8:128; 1:8:129; 1:8:130; 1:8:131; 1:8:132; 1:8:133; 1:8:134; 1:8:135; 1:8:136; 1:8:137; 1:8:138; 1:8:139; 1:8:140; 1:8:141; 1:8:142; 1:8:143; 1:8:144; 1:8:145; 1:8:1198; 1:8:1199; 1:8:1200; 1:8:1201; 1:8:1202; 1:8:1203; 1:8:1204; 1:8:1205; 1:8:1206; 1:8:1207; 1:8:1208; 1:8:1209; 1:8:1210; 1:8:1211; 1:8:1212; 1:8:1213; 1:8:1214; 1

on a man (or people) for a particular purpose—e.g., on Saul to smite the Amalekites (1 S 15:17), on Jehu to smite the house of Ahab (2 K 9:6 f.), on 'the servant' 'to preach good tidings' (Is 61:1). Thus, after Yahwé has anointed Saul (1 S 10:1), the spirit of Yahwé comes mightily upon him (1:6), cp 1 S. 16:13; and the connection between the outpouring of the spirit and anointing is clear in Is. 61:1 (Lk. 4:18) 2 Cor. 1:21, and especially in Acts 10:18. Similarly, 'the anointing from the holy one' (1 Jn 2:27) is the illumination of the Holy Spirit, which teaches those that receive it concerning all things. Hence, the term 'anointed' could suitably be applied to Israel as a people—e.g., Hab. 3:13; see further *Messiah*, § 3. In Ps 157:89, the whole phrase 'to anoint with oil' is used with God as subject; in these cases either the whole phrase is a metaphor, or *malah* has acquired a quasi-causative sense.

On the relation of the various terms and customs to one another there have been different views, some of which must be briefly referred to. Some (e.g., Kamphausen in the article 'Salbe' in *HWB*²⁶) derive the religious use from the toilet use, seeing in the rite of anointing both the means of setting apart to God some person or thing as clean and sweet-smelling, and also the symbol of such a condition. But (1) it may be questioned whether the sharp distinction of terms relative to the two uses (cp § 1) be not against this view; (2) there is no positive evidence that the Hebrews interpreted the rite in this way, unless we so regard the custom of mixing sweet-smelling substances in the anointing oil—a custom which cannot be traced before P; and (3) the metaphorical use cannot be satisfactorily explained in this way. Reasons have been given in the preceding section for thinking that the religious rite of anointing men was at any rate understood at an early period to symbolise the outpouring of the divine spirit; but it is possible that this symbolism is not original, even in the case of persons. It certainly does not explain the anointing of things—particularly the pillar at Bethel. This custom Robertson Smith (*Rel. Sem.* 26 233, 370 ff., especially 313 ff., cp *SACRIFICE*) seeks to explain as a sacrifice, the oil being a substitute for the animal fat which was smeared (smeared, it is to be remembered, being the original sense of *malah*) by the Arabs on similar pillars, and played a considerable part in many other forms of sacrifice. Fat being, according to ancient thought, one of the great seats of life, was peculiarly fitted for the food of the gods (hence the anointing of the pillar), and also for imparting living virtue to the persons to whom it might be applied (hence the anointing of things or other persons). In this case the view that anointing symbolised the imparting of the divine spirit, is a refinement of the idea in which the custom may be presumed to have originated (cp *CHURCH*, § 5 end). The anointing of the temple and sacred furniture will then be a survival similar to that of sprinkling them with blood. G. H. G.

ANOS (אָנוֹס [AV; om. L¹], 1 Esd. 9:34, apparently VANISH of Ezra 10:16).

ANT (אַנְתִּי, אַנְתִּי [BSA]; *formica*, Pr. 6:30, 34).

1. Name and allusions. Classical writers often refer to the industry, forethought, and ingenuity of the ant, and especially to its habit

¹ The etymology of this word is very doubtful. It has been supposed to derive it (1) from a doubtful Heb. verb *anah* (cp *anah*) to cut, referring either to the shape of the ant's body (cp *anah*), or to its habit of cutting seeds from the corn-ears, or to the fashion it is supposed to make in the seeds themselves to prevent their sprouting (though this last was hardly known to the ancient Hebrews); (2) from Ar. *namala* 'to creep' or 'to ascend by creeping'; (3) from a supposed root akin to Heb. *anah*, 'to make a slight sound'. The connection with Ar. *namala* is certain; but possibly the meaning of the verb may be derived from the noun. A kindred word is Ar. *anwal* 'finger tip' (Eg. *Uchra*, 20). The Syr. equivalent is *anwalat* ('keen-scented'); Ar. has the same word as Heb. *anwal*.

of storing grain-seeds beneath the ground in time of harvest.¹

This Aelian tells us that so great is the industry of ants that, when there is moonlight, they work by night as well as by day. It was noted how carefully their work was organised; they were described as marching like an army, the oldest acting as general; when they reached the cornfield, the older ants ascended the stalks and threw down the grains to the others, who stood round the food. Each took its part in carrying away the food to the subterranean homes, which were carefully constructed with several chambers, and protected above by walls of earth to keep out the rain. The seeds were divided into two, sometimes into four, segments, and in other cases peeled, to prevent their sprouting; if wetted by rain, they were brought out and carefully dried in the sun. The ant showed a weather-knowledge far surpassing man's. It was in all respects a *polytechnic* creature, and is so classed by Aristotle along with the crane and the bee.

The same observations are repeated in later times by Arabic and Jewish writers.

The Mohammedans seem to have associated the ant with Solomon; the 27th chapter of the Koran is styled 'the ant,' because it mentions that Solomon, on his march, once entered 'the valley of ants,' whereupon an ant said, 'O ants, enter into your habitations, lest Solomon and his army tread you underfoot and perceive it not.' It was a custom with the Arabs, says Bochari, to place an ant in the hand of a new-born child, with a prayer that he might grow up wise and sagacious.

The only two passages in the OT which mention the ant obviously refer to some species of Harvesting Ant

2. Species.—probably either to *Phaenogaster* (formerly called *Atta barbara*, or to *A. structor*, or to *Pheidole megacephala*, which are to this day found in Syria, and, indeed, all round the Mediterranean basin.

Numerous other species of ant have been described in Palestine; but, as far as is known, they resemble in their habits the ants of temperate and colder climates, and do not lay up any store of provisions against the winter; it is possible that, like the latter, they pass the cold season in a torpor or winter sleep.

The harvesting ants all belong to the genus *Phaenogaster*, or are closely allied to it. Their habits

3. Harvesting ant. were well known to the ancients and to medieval writers. These observers,

generalising on insufficient data, assumed that all ants stored up food for winter consumption. When, however, the centre of learning shifted farther N. from the shores of the Mediterranean, the leaders of science were found in central and northern Europe, the position of things was reversed.

Naturalists, noticing that the ants whose habits they observed did not store grain and seeds, arrived at the conclusion that no ants did, and attempted to explain the accounts of the earlier writers by pointing out that they had probably mistaken for seeds the pupae which, when anything disturbs the ants' nest, are at once seized and borne to a place of safety. The consensus of opinion, accordingly, until about a quarter of a century ago, was that ants never lay up stores of food.

The investigations of Moggidge and Lepès, however, showed that, although this opinion is probably correct as far as ants in more northern climates are concerned, many of the ants in the countries bordering on the Mediterranean store up seeds collected from different plants. Not only do they collect seeds that have fallen, but they also frequently tear the fruit or seed-pod off the plants and bear them to the *formicarium* or nest. They will, moreover, travel considerable distances to obtain their food, marching in two nearly continuous parallel lines, the length of the column sometimes measuring 24 yards or more. The two lines are moving in contrary directions—the one toiling laden with spoils towards the nest, the other hurrying back with empty mouths to the harvest ground.

The nests both of *A. barbara* and of *A. structor* are simply excavations in the ground—long cylindrical passages or rounded hollows, the floors of which are to some extent smoothed and cemented. In these hollows, about the size of a billiard

4. Nests; storing.

¹ See the list of passages quoted in Bochari, *Hier.*, among them *Hor.*, *Sat.*, i. 1:13; *Ag.*, *En.* 1402; *Plin.*, *NH* 11:10; *Aelian*, 2:25, 141:644. A brief account of the Jewish notices by Rev. A. Lowy in *PSA* 4:308 [1880-81].

ball, the seeds are stored. In one nest Moggridge counted seeds from twelve different species of plant, and he enumerates eighteen distinct botanical families containing plants which furnish ants with seeds. *A. destructor* is frequently found in the neighbourhood of towns or villages, and even in the streets; *A. barbara*, usually in the country.

The amount of seed collected and stored in the granaries is very considerable and may cause serious loss to the agriculturist; from one nest an amount of seed estimated at 1 lb. in weight was taken, and there must be many hundreds of nests to the acre. The seed stores of the ants of Palestine are sufficiently important to be mentioned in the Mishna, which records the rules adopted as to their ownership.

The ants belong to the order Hymenoptera (which includes bees, wasps, and saw flies), and to the family Formicidae.

The species here intended may be the *Anthypus* (or *Oxy*, cf. Ⓔ), or the *A. bubaita*. Against the former proposal the objection has been raised that the *Oxy* is called in the modern vernacular of N. Africa *rahmar*, which Heb. רֶמָר 'fallow-deer' (see Rott.); but it is not uncommon for the same name to be given to members of different species by different peoples.¹ On OX ANTHYPE see UNTOXN (fig. 1), S. A. v.

ANTICHRIST (ANTIchristos [Ti. VII]). *History*

1. History : of the Question.² Reaches into the meaning of 'Antichrist' here

² Cf. Lucke, *l.c.* in d. *op.cit.* loc. cit. 153 ff.; Bornemann, 'Die Thessalonicherbriefe' in Meyer's *Handb.* 3, 4, 1897.

2 Thess. 2:1-12 and certain passages in the Apocalypse (chap. 13).

Of the two methods that came into vogue during the Middle Ages, the ecclesiastico-political method with polemical purpose (since Joachim of Floris, afterwards in chief favour with Protestant scholars, especially in the form hostile to papal claims) and the universal-historical (perhaps, since Nicolas de Lyra) neither advanced the question in the least.

This method maintained its ground, until quite recently, among all scientific interpreters of the apologetic school. There is one of its few weaknesses, in which the eyes of the moderns – as, for example, Habington, *Confessions* and Luthardt (*Die drei ersten letzten Dingen*) and others – have been able to detect. The writers on the subject fall far below that of the church fathers; the concrete eschatological figures are made far less spiritualised. Thus, Antichrist becomes an imprecise and general tendency; the 'temple' (2 Thess. 2) is interpreted as meaning Christendom; and the *korai yam*, as law and order.

3. Recent. Abandoning this (on the whole, mistaken) line, a few scholars have sought an interpretation of Antichrist in a Jewish tradition dating farther back than the Christian era and not resting on any historical events.

¹ Malvondas *De Antiquitate* (Lyons, 1617) being perhaps the fullest. The commentaries of Kilward (Lugdunum, 1591) and Blasius Vianeti (Lyon, 1604) were specially influential.

ANTICHRIST

for the first time he combined 2 Thess. 2 with Mt. 24.15 ff. and Rev. 11.3 ff., and thus the problem ceased to be one of exegesis merely. The best work in this direction has been that of Schneckenburger (see Böhm's survey of his writings in *Jahrb. f. deutsche Theol.*, 1850), who endeavoured systematically (as the only true method) to ascertain the kindred Jewish tradition that lay at the basis of the NT passages. (Preliminary researches in the same sense had been contributed by Corroli, *Krit. Gesch. des Cölitismus* 1781 ff.; Bertholdt, *Christol. Jud.*, 1811, § 16; and Gfrörer, *Jahrbuch d. Heile* 2256 ff. 405 ff. 438.) Schneckenburger also brought Mt. 24. Rev. 11 and Jn. 5.43 into the field of his survey, and his view may be said on the whole to have stood the test of time.¹

Still more recently Bousset (*Der Antichrist in der Ueberlieferung des Judentums, des NT, u. der Alten Kirche*, 1895), following up the suggestions of Gunkel's *Schöpfung u. Chaos* (1895), and the method then for the first time securely laid down, has sought to supplement these investigations in two directions: (1) by a comprehensive induction based on all the eschatological portions of the NT that belong to the same circle of ideas, and the careful exclusion of all that do not so belong; and (2) by an attempt at a comprehensive and complete presentation of the tradition (which comes before us in the NT only in a fragmentary way) as it is to be met with in the Jewish sources, and, still more, in the later Christian exegetical and apocalyptic tradition. This tradition is in great measure quite independent of the NT, and in all probability dates, as far as its sources are concerned, from pre-Christian times.²

The NT Tradition. The name ἀντίχριστος occurs in the NT only in the Johannine Epistles (1 Jn. 2.18.22; 4.3; 2 Jn. 7), and thus in all probability its formation belongs to the late NT period.

4. NT.

For an answer to the question who or what is meant by the name, it is best to start from the well-known (probably Pauline) passage in 2 Thess. 2.1-12, where we read that before the end of all things the man of sin, or, rather, of lawlessness (ὁ ἀνθρώπος τῆς ἀνομίας), the lawless one (ὁ ἀνόμος), the son of perdition (ὁ υἱὸς τῆς ἀπωλείας), must be revealed. This 'man of sin,' it is clear, is to make his appearance as a false Messiah—an observation which, from the outset, precludes us from referring the expression to any foreign potentate such as Caligula³ or Nero. He is sent to 'them that are perishing' (namely the Jews), because they received not the love of the truth (the true Messiah).⁴ He does not employ any outward force, but accomplishes his work by means of false signs and lying wonders (cp the tradition of the Church fathers, as continued by De Wette, Ewald, Schneckenburger, B. Weiss, Lünemann, Bornemann). He will make his appearance in Jerusalem. In this account of the Antichrist the specially perplexing assertions are that he is to seat himself in the temple of God and that he is to declare himself to be God. This last act, at any rate, does not belong to the rôle of a false Messiah. It is also doubtful who or what ought to be understood by ὁ κατέχων, τὸ κατέχων, the power that stands in the way of the manifestation of Antichrist. If once a reference in the passage to a Jewish false Messiah be accepted, the mystery of iniquity (lawlessness: τὸ μυστ. τῆς ἀνομίας) will most probably mean the cruelty which the Jews as a whole had begun to show towards the Christians (same authorities as above). At this point we obtain a clear light upon Rev. 11. The perplexing fact that there the beast rises out of the deep and makes its appearance in Jerusalem (a view of the passage that appears certain—not only from 11.2, but also from the connection of 11.2 with 11.3—as against the other interpretations referring it to Rome) is explained by 2 Thess. 2.

2. The beast that rises out of the deep and appears in

¹ This applies also to the first part of the *Apocryphische Studien* of B. Weiss, 1866.

² Attempts in this direction had already been made by Bertholdt and Schneckenburger.

³ 2 Thess. 2.4 does not at all fit in with Spitta's interpretation of the passage as referring to Caligula's proposal to set up a statue of himself in Jerusalem.

⁴ Cp Jn. 5.43.

ANTICHRIST

Jerusalem is the Antichrist. If this be so, we are supplied with the following additional elements in the tradition: (1) a great drought that comes over the world in the last times (in Rev. through the two witnesses); (2) the two witnesses, their slaughter by the Antichrist, and their resurrection; (3) a previous assemblage of many nations in the neighbourhood of Jerusalem. The dim and fragmentary character of the whole narrative, however, is striking. In another place in the Apocalypse we find another parallel to the figure of the Antichrist—in Rev. 13.11 ff. 'The beast that had two horns like unto a lamb' (RV) is designated by the author of Revelation himself as a False Prophet. When it is spoken of as 'coming up from the land' (not 'earth' as in EV), we may reasonably understand Palestine to be meant. This false prophet also does his work by means of signs and wonders. Here we meet with a new and rather perplexing consideration: the sealing on their foreheads and hands of those whom he has led astray, and the buying and selling of them that is thus made possible. To the same great group of traditions a part of the eschatological discourse in the Synoptic Gospels (especially in Mt.) also appears to belong. Older theories of the βδέλυγμα τῆς ἐπηύσεως of Mt. 24.15 having broken down, and Spitta's explanation of it as referring to Caligula being beset with difficulties (indeed, an apocalypse which arose only in 40-41 A.D. could surely not have found its way among utterances of the Lord which were already becoming fixed), we seem compelled to fall back on an older tradition, and to explain the strange phrase of the Antichrist of 2 Thess. 2.4 sitting in the Temple (on these points cp AROMINATION OF DESOLATION). In this case we arrive at new elements in the tradition: the subsequent flight of those who have believed, the shortening of the days (Mt. 24.22), and the picture of the end of the world and of the final judgment (Mt. 24.29 ff.). Here again the fragmentary brevity of the tradition is surprising.

If we now survey these eschatological fragments as a whole, two conjectures immediately force themselves on

5. Results.

us: (1) that all these eschatological phantasies were not independently conceived by the various authors from whom we derive them;¹ that, on the contrary, the authors are mostly reproducing a tradition which already lay before them; and (2) that it is a single consistent tradition that underlies all these (partly coincident, partly complementary) fragments. If the second conjecture be true, we may venture to think that the tradition in question has not been lost beyond all possibility of recovery. In point of fact, our very first glance at later Christian apocalyptic literature satisfies us that this literature rests upon a tradition which is but partially dependent on the NT.

The Tradition of the Early Church regarding Antichrist. Sources.² The tradition becomes tangible as soon as we have a Christian literature copious enough. The influence of this tradition is already visible

6. Early Church tradition.

in the *Teaching of the Twelve Apostles* (chap. 10). Irenaeus (*Adv. haer.* 5.25-30) also presents himself in this connection. Special importance, however, among the earlier witnesses, attaches to Hippolytus's *ἀποδείξεις περὶ τοῦ ἀντιχρίστου*, the *Carmen Apologeticum* of Commodian, Lactantius's *Inst.*, *Div. 7.18 ff.* (Commodian and Lactantius have a place of their own in the tradition), and the *Commentary on the Apocalypse* of Victorinus. A further group of writings ascribed to an ecclesiastical writer of very great influence, Ephraim Syrus, must be mentioned. Under his name are current three Homilies on the Antichrist: (1) One in Syriac (De Lamy, 3.187 ff.,—all of it genuine with the exception of a few chapters); (2) one in Greek (Assmann, 2.222-30 3.14-143), perhaps genuine; and (3) one in Latin (Caspari, *ut sup.* 208 ff.). The historical event from which all these prophecies start is the

¹ See the detailed argument for the impossibility of this in Gunkel, *Schöpf. u. Chant.*

² See Malvestra, *De Antichristi* (1845); Ebert, 'On Commodian's "Carmen Apologeticum"' in *Abh. d. Kon. Sachs. Ges. d. Wissensch.* 5.387 ff.; Caspari, *Briefe und Abhandlungen* (C.) 208 ff. 429 ff., and, for the later period, Zerschwitz, *Von römischen Kaiserthum deutscher Nation*, 1877; Gutschmid, *Kleine Schriften* 5505 ff.; W. Meyer, *Ludus de Antichristo*, 1880.

ANTICHRIST

beginning of the great barbarian migrations, the invasion of the eastward regions of the Roman Empire by the Huns (Gog and Magog).

Alfred in character to the foregoing are Cyril's *Catechesis* (xv), the pseudo-Johanne Apocalypse (Tisch. *Apoc. apoc.*), and the Commentary on the Apocalypse by Andrew of Cesarea. Dependent on Ephraim's Greek homily are the *επιγραφὴ ἀποκαλύψεως τοῦ κοκκυνοῦ* (ed. Lagarde) of the pseudo-Hippolytus, and the *Dioptra* of Philip Solimanis (110 ff.). Migne, *PL*, lxx, 127. This whole mass of tradition is exceedingly valuable for a count of its archaic oriental character. Of the older church fathers, Jerome also (*Ad. Magasiam*, Quæ. i. xli; *In Danielum* vii, and vii), and Theodoret (*Harer. fab.* 523), but not Augustine, and, of the later, John Damascenus (*Expositio* 127) claim special attention.

As, in the uniform view of these apocalyptic interpreters, the advent of the Antichrist is after the downfall of Rome, one might reckon almost with certainty on finding evidence of the currency of the tradition about the time of that downfall. Such evidence we actually possess in the primary document which was the common source of both the so-called Apocalypses of Daniel, the Greek (ed. Klostermann, *Unabg.* 96), and the Armenian (ed. Katenkian, *Wien. v. L.* 112 f.; cp. *Zahn, Forschungen* 119 ff.). Again, at the time of the Mohammedan conquests, as we see in the apocalypses of the pseudo-Methodius (7th century, *Orthographia* 2, Basel, 150, a, closely connected with which is the later Apocalypse of Peter, now extant in Syriac, Arabic, and Ethiopic redactions (Brake, *Zf. f.* 189, 2), and also a series of late Byzantine (Vassiliev, *Unabg. Græco-Egyptiana* 1, Moscow, 1893), and late Jewish apocalypses (Jellinek, *Becha-Midrash*; cp. Bousset, *Z. f.* 173 ff.). This body of tradition reached the west through a compilation (*De Antichristo*) by the monk Alvo (Migne, *PL*, lxx, 120 ff.), based on the book of Methodius and on a 5th-century book, which last is to be found also (in a redacted form) in the works of Isidore (Migne, *PL* 1133) and dates perhaps from the fourth century. Lastly, an isolated and very archaic source is to be found also in the Apocalypse of Zephaniah (Steru, *Z. f.* 186).

7. He who letteth.

Subjoined is a brief summary of this tradition as it occurs, almost uniformly, in the sources that have been named.¹ In the first place, the universally prevalent conviction is that the *εχθρὸς* (2 Thess. 27) is the Roman empire. This, we may be sure, was the view of Paul also; if he expected a Jewish false Messiah, then the one power left which could 'hinder' was the Roman empire (cp. on this point 4 Esd. 41 ff.). The political rôle played by this idea in the history of Christianity may be seen in Tertullian (*Apoc.* 32, *ad Scap.* 2) and Lactantius (*Inst. div.* 725).

8. Antichrist.

Of equally universal prevalence is the conception of Antichrist, not as a Roman or foreign ruler, but as a false Messiah, who is to arise among the Jews themselves, in Jerusalem. Almost universally (with the exceptions to be afterwards mentioned) it is predicted that he is to establish himself in the temple and lay claim to Messianic (and, so far, divine) honours. (Sometimes, as in *Ascens. Is.* 41, Viet. in *Apoc.* 1313, and in the Ethiopic Apocalypse of Peter, we read that he will set up his statue in the temple, doubtless a reminiscence of the Caligula episode.) After the destruction of Jerusalem, accordingly, the expectation that the Antichrist will rebuild the temple in Jerusalem becomes universal. He will show special favour to the Jews, will receive circumcision himself, and will compel others to do so. He will arise from the tribe of Dan (*Apoc.* 89; Jewish haggada is at the root of this [cp. *Testam. Dan* 5 f.; also the omission of Dan in Rev. 75 ff., as to which see Hen. v. 302, perhaps also even 1 Ch. 6114; see *S. B. O. T.* 91541]; see Schneckenburger-Böhmer, 412). If, bearing all this in mind, we once more turn to 2 Thess. 29 ff. In 543 Rev. 113 ff., it immediately becomes plain that any 'historical' or preterist interpretation of the Antichrist is out of the question. On the basis of a haggadic view of Dan. 114378, there came into the tradition this further element, that the Antichrist, at his first appearing, is to conquer the kings of Egypt, Ethiopia, and Libya. Another invariable element of the tradition under consideration is the enumeration of the miracles to be wrought by the Antichrist, particularly celestial signs (Rev. 1311 ff.), and miracles of healing (although that of raising the dead is beyond his reach). Hereupon the Antichrist will achieve the dominion of the whole world, and gather round himself to his capital all peoples and vast armies (4 Esd. 131 ff. Apoc. Bar. 40 Rev. 119 ff.).

Next, a great drought and famine will come upon the whole earth (differently and less clearly put in Rev. 11), and in these straits the Antichrist will order his servants (spoken of also as demons) to mark men with his mark (according to the Latin Homily of the pseudo-Ephraim, a serpent mark), so that only those who bear it shall be permitted to buy bread (Rev. 1316 ff.). Against the Antichrist come forward the two witnesses (almost unanimously taken to be Elijah and Enoch) who disclose his real character, so that many turn away from him (otherwise, and very obscure, what we read in Rev. 113 ff.). It is noteworthy that in many sources there is no mention of the resurrection of the two witnesses—doubtless an incident introduced for the first time by the author

ANTICHRIST

of Rev. 11. At the preaching of the witnesses a considerable company of Israel are converted and begin the opposition to the Antichrist (perhaps Rome, so is to be interpreted in this connection). The 144,000 who are sealed in Rev. 75 ff. certainly have their explanation here. The faithful now break themselves to the wilderness or to the mountains (Mt. 2429 ff.); but the days of Antichrist's reign of terror shall be shortened. The years shall become months, the months days, the days hours (Mt. 2422). Then the Antichrist will send his armies in pursuit of the faithful who have fled into the wilderness; but there they shall be delivered by the angels of God or by the Messiah (Rev. 1213 ff.), and the army of the Antichrist destroyed (cp. the mysterious angelic battle outside the city, in Rev. 1144 ff.), and, in connection with this, the appearance of the lamb with the 144,000 in Rev. 151 ff.). The Antichrist is finally slain, according to authorities, by the Messiah, with the breath of his mouth (Is. 1142 Thess. 28—the same statement is found in late Jewish sources, such as Targ. Jon. on Is. 114 and others). Perhaps an older tradition may be traced in the view that the angel Michael is to be the conqueror of the Antichrist (Dan. 121 Rev. 127, *Is.* 3610). Now is seen a mighty sign in heaven (Mt. 2429)—the sign of the Son of Man—interpreted by later writers (cp. already *Paul. 16r. σημεῖον υἱοῦ ἀνθρώπου ἐν οὐρανῷ*) as referring to the Cross, but originally, we may be sure, denoting the Divine Judge of the world (Bousset, 154). Then follows the coming of the Divine Messiah to judgment, amid mighty convulsions of nature (Mt. 2429 f., Rev. 612 ff.). From the four corners of heaven desolating storms burst upon earth and cleanse it (Rev. 71 ff.), and before the divine advent descends a tempest of fire, which burns the earth down to its depths, and dries up the sea and the rivers (Rev. 211).

At the very first glance it is plain that, in this tradition, we are dealing not with an artificial exegetical mosaic of the various passages of the New Testament (and the Old) which here come into account, but with an original body of tradition, organically and inherently consistent; and that the separate eschatological fragments of this tradition in the NT become intelligible only when they are brought into their organic place in the scheme of the tradition as a whole, so that their essential consistency becomes manifest.

11. Coherence of tradition.

Origin of the Tradition.—Naturally we turn, in the first instance, to the eschatological ideas of the OT.

12. OT. Schneckenburger will have it that the idea of the Antichrist comes from the eschatology. prophecies concerning Gog and Magog in Ezek. 138 f.). That in every form of the tradition the prophecy concerning Gog and Magog occurs in close connection with the story of the Antichrist is indeed true to the extent that they are made to appear, sometimes after (Rev. 207 f.), and sometimes before, the time of his rule. Positive identification of Gog with Antichrist, however, does not occur till the seventh century, and even then only in Jewish sources. Many of the details of the traditions can be traced, as has been already said, to Jewish haggada. In this particular point Dan. 711 f. is approximated to most nearly; but even here there is a marked difference, and the originality of the view outlined above is conspicuous. In Daniel the disturber is a foreign power; but here the seducer, who personates God or simulates the Messiah, rises up from amid the people of God. Thus there has been an important development since Daniel. Perhaps, as was suggested in conversation to the present writer by Prof. Smend, the historical occasion for this advance was supplied by the experiences of Israel under the Maccabees and the Herods. In any case, we must note a parallel in Jewish Apocalyptic.

13. Belial. That ideas allied to those in our tradition were active among the Jews about the time of Christ is shown by 4 Esd. 51 ff. 156; *reguabit quem non sperant*, *Apoc. Bar.* 36-40, *Sibyl.* 363 ff. (2107 ff.), *Test. Dan* 5, *Is.* 36, 8 ff., and the (probably Jewish) nucleus of *Is.* 36, 3 (243-173). Now, in this tradition, the constantly recurring name of the great enemy of the last times—a name already known to the apostle Paul (2 Cor. 613)—is Belial (Belial). But, according to many passages of the *Testaments*, Belial is a spirit of the air, ruler of the evil spirits. According to *Test. Dan* 5, the Messiah will fight against him in the last days. The supporters of Belial are the children of Dan. In *Sib.* 363 ff. (probably dating from the time of Cleopatra), Belial is already presented in an aspect closely resembling that

¹ For the references in detail see Bousset, *Der Antichrist*, Göt., 1897.

ANTICHRIST

of Antichrist (still more so in the *Ascensio*, which, however, has unquestionably undergone Christian revision). In the *Ascensio* the angel Samael interchanges parts with Belial, and Samael figures also in later Jewish tradition as the enemy of the last times¹ (on the origin of Belial, and on the various developments of meaning, see BELLAL). Suggestions of the same idea occur in 1k. 10:13 Ju. 12:1 (Col. 2:13). Here we would seem to have an aspect of the tradition that, in point of time and contents, comes a great deal nearer that of Antichrist (2 Cor. 6:15: 'and what concord hath Christ with Beliar?'), which is not of historical but of purely eschatological origin: the idea of a rebellion of an angelic power against God at the end of time. Perhaps it is out of this figure—behind which in turn stands the wilder figure of the dragon rising in rebellion against God in the last times, which Gunkel conjectures to have its origin in the Babylonian creation-myth (see CREATION, § 2 f.)—that, under the experiences of the Maccabean period, the humanised figure of a pseudo-Messiah came into existence. In this way we can explain also the superhuman traits in the picture, such as his declaring himself to be God (2 Thess. 2:4), and his sitting in the temple of God (cp the myth of the storming of heaven by the dragon in Rev. 12:1 ff.). These conjectures find further confirmation in the fact that, in later tradition, the ghostly-demonic element in the portrayal of Antichrist comes again more conspicuously to the front, and the Antichrist is even represented as a dragon who rebels against God (cp the writings of Ephraim Syrus, and Apoc. Zeph.).

14. Dragon.

Points of Contact with other Traditions.—One legend that comes into relation with that of Antichrist in many ways is that of Nero redivivus. Not that the figure of Antichrist had its beginning in the story of Nero. Originally both legends had currency side by side. It was only after Nero's return at the head of the Parthians (at first conceived of in a purely human way—cp the nucleus of Rev. 17) had become indefinitely delayed, and after men had begun to expect the returning Nero only as a spirit from the under-world, that they gradually transferred to him some traits belonging to the Antichrist² (cp Sib. 3:61 ff., where, in like manner, Belial is interpreted to mean one of the Caesars; see APOCALYPSE, § 95). Such an amalgamation of the two figures is already met with in Rev. 13 and 17 (in their present form). The old form of Antichrist, however, retains such vitality that in the end (Rev. 13:1 ff.) it appears as a second beast, servant of the first and on the same scene. A similar and (as far as its occasion is concerned) still more manifest doubling of Antichrist is seen in Commodian's *Carmen Apologeticum*, in Lactantius (as above), in Martin (see Sulpicius Severus, *Dial.* 2:14), and in the *βιβλίον Κλήμεντος* (Lagarde, *Reliq. juris eccl.* 3:3 ff.). There is a complete fusion in the *Ascensio Jesu*, and in the commentary on the Apocalypse of Victorinus. This complicated figure of Nero redivivus took special hold on the Sibylline literature of the second century,³ and here again, in the delineation of this, we meet once more with the old features of the dragon myth. A fusion between the Antichrist tradition and the Simon Magus legend has already been observed by Schneckenburger, and traced in a variety of points by the present writer. The same tradition comes into fusion with the later Alexander legend and the old German saga of the end of the world (Muspilli, *Edith*).

On this and other connected subjects see Bonnet, *Der Antichrist*, in the English translation of which (1896) special attention has been bestowed on the index (see, e.g., 'Simon Magus,' 'Alexander'). See also E. Wadstein, 'Die eschatologische Ideengruppe: Antichrist, Weltabbath, Weltende und Weltgericht in ihrer christlich-mittelalterlichen Gesamtwirkung,' *ZWIT*, 1895 and 1896. ANTIMONY (ἄντιμον, Is. 51:1 RV mg., EV 'fair colours.' See PAINE.

ANTIOCH (ΑΝΤΙΟΧΕΙΑ [Ti. WH]). 1. in Pisidia; more correctly, 'Antioch towards Pisidia' (Αντιόχεια ἡ πρὸς Ηλισδα), to distinguish it from the Antioch on the Meander (the form 'Pisidian Antioch,' Αντιόχεια ἡ Ηλισδα [Ti. WH], Acts 13:14, arose to distinguish it from the more famous Antioch of Syria). It was really a Phrygian city; but in NT times it was of course included within the Roman province Galatia. Strabo (p. 577) accurately describes it as lying 'on a hill,' on the south side of the range now called Sultan Daghi, in Phrygia Paroreia; but it was not until 1833 that Arundell found its ruins at *Yalobach*. The town was founded about 300 B.C. by the Seleucid kings, and the transportation of 2000 Jewish families to the fortresses of Lydia and Phrygia, as recorded by Josephus (*Ant.* xii. 31, must in part refer to Antioch. By Augustus it was made a Roman colony (6 B.C.); hence its coins bear the legend CAESAREA. Antioch was adopted as the centre of military and civil administration in Southern Galatia, and from it radiated the roads to the colonies designed to check the unruly highlanders of Pisidia and Isauria. As an element in the pacification of this district, the privileges of the Jews were confirmed by the Emperors, and Paul found a large Jewish colony in the city. The Romanisation of this part of Galatia was in especially active progress during the reign of Claudius, 41-54 A.D. At the time of Paul's visit, therefore, Antioch was at the height of its importance. Besides its relations with Apamea (on the W.) and with Iconium, Lysra, and eastern Asia Minor, it must have had a commercial connection with the Pamphylian seaports, among them Attalia and Perga; and Paul must have reached Antioch by following this southern trade-route, which probably ran through Adada (*Kara Barlo*, *Barlo* being the modern pronunciation of the apostle's name). There was a large body of Jewish proselytes in Antioch, many of them women of position through whom the Jews were able to influence the magistrates against the apostles (Acts 13:50). The magistrates had summary jurisdiction over disturbers of the public peace, such as the apostles were alleged to be (cp τ. 44: πᾶσα ἡ πόλις συνεήθη, and τ. 45: ὁδῶντες τοὺς ὁχλοὺς); but the 'casting of them out of the borders' of the colony could not imply permanent banishment—at any rate in the case of Paul, who was a Roman citizen. Accordingly we find the latter returning to Antioch from Derbe (Acts 14:21) and perhaps revisiting the city at least twice (Acts 16:1823, 25; GALATIA). If the trade of Antioch was concentrated in the hands of the Jews, we can the more easily understand Paul's first success here in Asia Minor: the new teaching did not conflict with any commercial interests of the gentile inhabitants, as it did at Ephesus and Philippi, while at the same time the Jewish proselytising had prepared the people for its reception. It is also not without significance that on the death of king Amyntas, some seventy years before Paul's visit, the ancient worship of 'Men' (Μην Ἀσκαῖος, Ἀσκαῖος Strabo, Ἀσκαρὸς coins) had been abolished, so that there was probably no gentile hierarchy in existence to oppose the apostles. Hence the effect of their preaching was more marked here than in any other case, except Corinth (Acts 13:4437). All the more strange is the subsequent prominence of the South Galatian churches.

2. In Syria. 2 Macc. XV ANTIOCHIA. This great city, the metropolis of the Roman world,

1. City. the Queen of the East (ἡ κατὰ Ἀθην. 175; orientis apex pulchra), and the residence of the imperial Legation of Syria, survives in *Ἀντάρχη*,

ANTIOCH

a town of only 6000 inhabitants. It is situated at the point of junction of the ranges of Libanus and Taurus, on a fine site hard by the left bank of the Orontes, just where the river turns westwards to run between Mt. Pieria on the N. and Mt. Casium on the S., to the sea 16 m. distant. A little higher up the river Antigonia had been built in 307 B.C. by Antigonus; but seven years later Seleucus Nicator transferred its inhabitants to his new city of Antioch.

Strabo's meagre account (p. 750) is the foundation of our topographical knowledge of the city. Like the district in which it lay, Antioch was a *τετράπολις*, an agglomeration of four parts.

The first contained the population of Antigonia; the second the bulk of the citizens. The third part was the creation of Seleucus Callinicus (246-236 B.C.), and the fourth, on Mt. Silphius, of Antiochus Epiphanes. Each part had its own wall; but in addition, the whole vast area, larger than that of Rome, was surrounded by huge walls running over the mountains and across the ravines. From Nicator's time dates the well-known statue 'the Fortune' (Τύχη) of Antioch, a work of the Sicilian Enkylides, a pupil of Lysippus (Paus. vi. 27). The memory of it is preserved in the coins, and in a small marble statuette in the Vatican. The goddess, a graceful gentle figure, rests negligently on a rock; while the river, a vigorous youth, seems to swim out from under her feet.

Seleucus Nicator also embellished DAPHNE (Δάφνη [VA]), 5 m. distant from Antioch, but reckoned a suburb. It was a spot musical with fountains; its groves, crowded with temples, halls, and baths, were the seat of a cult of Apollo and Artemis.

Among its artistic treasures was a statue of Apollo Musaeus by the Athenian Bryaxis. The precincts of Daphne were endowed with the right of asylum and naturally became the haunt of villainy—of runaway slaves, debtors, and cut-throats (Tac. *Ann.* 360; Tiberius in 22 A.D. attempted to regulate this abuse in several cities): if we may trust the story of Onias in 2 Macc. 133, Daphne 'flung away the one rare chance of sheltering virtue.' The site is now called *Bet el Ma'*, the 'house of Water.' It retains no traces of its former magnificence.

From this suburb, which Roman wealth, Greek art, and Oriental licentiousness conspired to make unique even in the East, Antioch took its distinguishing name—*ἡ ἐπὶ Δάφνῃ*. In itself the title bore no reference to the pleasure pursuits of the suburb—as though insinuating that there the true life of the city was to be found: it was a genuine official title.

Accordingly we find it on coins (cp. *Ἀντιοχείων τῶν ἐπὶ Κελευσίων; τῶν ἐν Μυδονίᾳ; τῶν πρὸς τῇ Δάφνῃ*). Hence Pliny (*HN* 5. 21 [18]) writes 'Antiochia Epidaphnes.' Tacitus (*Ann.* 2. 23) transliterates the Greek, and calls the suburb itself 'Epidaphna.'

Holm has summed up in a striking sentence the historical position of Antioch under the Seleucid kings.

2. Character. Although close to the sea (*ἀνὰ πλοῖς ἀσθημένον* Strabo, p. 751), it was yet no seaport; on the borders of the desert, it was yet something more than a centre for the caravan trade between the East and the West. The city reflected the character of the kingdom of which it was the capital, a kingdom which itself also was neither a genuine naval nor a genuine land power. Antioch was a Greek city, just as the Seleucid kingdom was an attempt to impose upon the Orient the political ideas and forms of Hellas. Yet, in the capital as in the kingdom at large, there was no true Hellenism; the commingling of Oriental and Western elements resulted in the perpetuation of the worst features of both races, and the moral worthlessness of the Syrian found in the brilliance and artistic temperament of the Greek merely the means of concealing the crudities of his own life. The characteristic failing of the Greek also was exhibited on a great scale. A third element, and that the one most important for biblical history, was provided by the Jews. The colony was in fact coeval with the city, for it dated from the time of Seleucus Nicator, who gave the Jews the same privileges as he gave the Greeks (Jos. *Ant.* xii. 31).¹ For this connection with the Syrian kings see 1 Macc. 11. 42f. Herod completed the marble-paved street which we can

¹ According to 2 Macc. 40 (cp. also 7. 19) Jason conferred on the people of Jerusalem the status of citizens of Antioch (ANTIOCHIANS) on which see *Jh. T.* 12. 544 (79).

ANTIOCHUS

trace from the 'Gate of St. Paul' to the modern town (Jos. *Ant.* xvi. 53). Thus all the forms of the civilised life of the Empire found in Antioch some representative. In its agora, said Libanius, the customs of the world might be studied. In no city was pleasure more earnestly pursued. *Daphnici mores* were proverbial, the Orontes was synonymous with superstition and depravity (Juv. *Sat.* 362). Yet it would be of value to discover to what extent the lower and middle orders of the population were really affected by the luxury and *abandon* of which we hear so much; that is after all but one side of the city's life, and there is a temptation to exaggerate it. There was little real intellectual life; epigram and light prose were the most flourishing forms of literature. Cicero (*Pro Arch.* 3, § 4) is exaggerating with his 'eruditissimis hominibus liberalissimisque studiis adfluenti.' Antioch is far less celebrated than Alexandria in the literature of the first and second centuries A.D. This intellectual attitude is a fact of some importance, in its relation to the first Christian teaching.

The mixture of Roman, Greek, and Jewish elements admirably adapted Antioch for the great part she played in the early history of Christianity.

3. Christianity. The city was the cradle of the church. There, as elsewhere, Judaism prepared the ground for the seed of the word (cp. Chrys. *Hom.* xiv.). 'Nicolas, a proselyte of Antioch,' one of the first deacons (Acts 6. 5), was only one of a vast multitude of Greeks who in that city were attracted to the Jewish doctrine and ritual (Jos. *H. J.* 3. 3; cp. Acts 11. 19-21). The ancient and honourable status of the Jews in Antioch gave to the infant church a firm and confident organisation. Very early the city became a centre on a level with Jerusalem in importance (Acts 11. 22-26-30 131). The cosmopolitanism of its inhabitants inevitably reacted upon the Christians in the way of familiarising them with universalist ideas, and Antioch consequently became the centre of missionary labour. It was Paul's starting-point on his first journey with Barnabas (Acts 13. 1-3), and thither he always returned with his report of work done (Acts 14. 26f. 15. 30 18. 22). It was at the instance of the church at Antioch that the council of Jerusalem sent the circular letter to the gentile Christians (Acts 15. 23 Gal. 2. 14), and, according to Acts 11. 26 (on which see CHRISTIAN, beginning, and § 2 [end]), it was in Antioch that 'the disciples were called Christians first'—undoubtedly as a nickname. We know that the people of Antioch were noted for their scurrilous wit (Philostr. *Vit.* 3. 16 Zos. 3. 11 441 Procop. *BP* 28).

ANTIOCHIA (ANTIOX[ε]IA [ANV]), 1 and 2 Macc. AV, RV ANTIOCH, 2.

ANTIOCHIANS (ANTIOXETIC [VA]), 2 Macc. 4. 19 (-XIAIC [A]), and in AV also 7. 9 (-XON [V]), where RV has 'citizens of Antioch.' See ANTIOCH 2, § 2 n.

ANTIOCHIS (ANTIOX[ε]IC [VA]), concubine of Antiochus IV. Epiphanes (2 Macc. 4. 30).

ANTIOCHUS (ANTIOXOC [ANV]; ANTIOXOC [N* once, V* once, A once]). 1. Antiochus III., surnamed the Great, was the son of Seleucus Callinicus, and ascended the Syrian throne at the age of fifteen, on the death of his brother Seleucus Ceraunus. He is the earliest of the great SELEUCIDAE (7. 1) mentioned in the Apocrypha, but Antiochus II. Theos and Antiochus I. Soter (his grandfather and great-grandfather respectively) are alluded to in Dan. 11 (see DANIEL, § 6). His reign (223-178 B.C.) embraced a series of wars against revolted provinces and neighbouring kingdoms, wars in the prosecution of which his disasters and successes were equally great. The events of his life are briefly alluded to in Dan. 11. 10ff.—notably his expedition in Asia Minor in 197 B.C. (cp. 7. 18) which, after varying fortune, ended in a crushing defeat at the hands of Scipio Africanus near Magnesia in 190 B.C. (cp. 7. 18). This was one of the exploits of the Romans which

ANTIOCHUS

Julius the Maccabee is said to have heard of (1 Mace. 8).

On account of its present form it is not free from inaccuracies. Thus, the writer states that Antiochus, the 'great king of Asia,' had with him 120 elephants (cp. *insep. arroyo* [8th D]; but according to Livy (37. 2) there were only fifty-four. It is not unlikely that in the popular tradition the original number was exaggerated (Camber. Bible, *ad loc.*). Cp. MACCABEES, FIRST, § 10.

One of the conditions of the humiliating peace imposed in 188 B.C. was that twenty hostages, including a son of the king (cp. 1 Mace. 13 and below, 2), should be sent to reside in Rome. Antiochus the Great was killed in an attempt to plunder the temple at Elymais (187 B.C.), and was succeeded by his son Seleucus IV. Philopator. See SELEUCIDAE.

2. Antiochus IV. Epiphanes (Ἐπιφανής 'the illustrious' [cp. 1 Mace. 13 where Ἀ-εῖς], called in mockery Ἐπιφανής 'the madcap'), youngest son of no. 1. On his place as hostage (see above, 1) being taken by his nephew DEMETRIUS, he returned to the East, and—his elder brother, Seleucus IV. having meanwhile been murdered—seized the Syrian throne (175 B.C.), and soon became famous for his conquests in Coele-Syria, Palestine, and Egypt (cp. 1 Mace. 10 ff. 2 Mace. 51 ff. and see Dan. 11. 21 ff.). During his Egyptian campaign he twice took Jerusalem (1 Mace. 120 ff. 2 Mace. 511 ff.). In spite of the presence of a strong favourable Hellenistic party (see JASON, MENELAUS), Antiochus appears to have seen that he could never hope to subdue Judaea until he had rooted out the peculiar Jewish religion (see ISRAEL, § 60 f.). He accordingly promulgated a decree enjoining uniformity of worship throughout his dominions (1 Mace. 141 ff.), and even went so far as to endeavour to force upon the Jews the worship of heathen deities (see ABOMINATION, II.). His persecuting policy was responsible for the rise of the ASSIDEANS, and stirred up the successful resistance of the Maccabees. His end (164 B.C.) is variously described. According to 1 Mace. 61-66 he was visiting a rich and celebrated temple in Persia (see ELYMAIS), when tidings of the ill-success of his troops in Judaea, and remorse for his sacrilege at Jerusalem, caused his death—according to Polybius (31. 2) at Tabe in Persia.¹ The usually accepted reference to his end in 2 Mace. 110-17 is not very probable, see MACCABEES, SECOND, § 7. He is doubtless alluded to in Ps. 75. 4 ff., and there are numerous references to his life and character in DANIEL (q.v., §§ 1, 6, 8, 10, 18).

The post-Talmudic tract *Megillah* Antiochus is a legendary account, in Aramaic, of the persecutions in his reign; cp. Schli. G/P 1123 (see MACCABEES, SECOND, § 11). See SELEUCIDAE.

3. Antiochus V. Eupator (Ἐπατάτωρ), the young son of Antiochus IV. Epiphanes (see 2, above), was left under the care of LYSIAS, whilst the father conducted his wars in Persia (1 Mace. 332 ff.). On the death of Epiphanes (164 B.C.) Lysias obtained the regency, ousting his rival PHILIP, 5, and set up Epiphanes' son as king, giving him at the same time the surname Eupator (1 Mace. 614 ff.)—on account of the virtues of his father (Appian). Together they entered Judaea (see ISRAEL, § 75 beg.) and, encamping at Beth-zacharias, besieged Bethsura (see BETH-ZUR). The Maccabees were defeated and the famous ELEAZAR (q.v., 7) was killed (1 Mace. 628 ff.).² The war was brought to an abrupt close, however, by the news that Philip had occupied Antioch, and a hasty peace was concluded restoring to the Jews the privileges they had enjoyed previous to the persecutions of Antiochus Epiphanes (cp. ISRAEL, *loc.*). In the following year (162 B.C.) the king and his guardian were put away by DEMETRIUS (q.v., 1) (1 Mace. 71 ff. 2 Mace. 141 ff.). See SELEUCIDAE.

4. Antiochus VI., surnamed TIGRIS (Θέος), son of Alexander Balas, spent his early youth as a ward of

¹ His father, Antiochus III. the Great, died whilst engaged in this same district upon a similar expedition. Tradition may have confused the son with the father.

² 2 Mace. 1321 ascribes their ill-success to treachery (see RHODOCUS).

ANTIPATRIS

an Arabian (see ISMAELITE). He was brought forward by Tryphon, a former follower of Balas, and set up as king in opposition to Demetrius Nicator (see DEMETRIUS, 2) who was rapidly becoming unpopular (1 Mace. 1130-54; 145 B.C.). On his coronation he received the surnames 'Epiphanes' and 'Dionysus.' Henceforth he became a mere tool in the hands of Tryphon, who ultimately found an opportunity of slaying him (1 Mace. 1331). See further TRYPHON, SELEUCIDAE.

5. Antiochus VII. Sidetes (Σιδηήτης)—i.e., man of Sidē in Pamphylia,—called also Ἐδσηθής (Jos. *Ant.* xiii. 82), was the son of Demetrius I. and younger brother of Demetrius II. Nicator. The capture of his brother by the Parthians gave Sidetes the opportunity of asserting his claim to the Syrian throne in opposition to the unpopular TRYPHON. To win over the Jews he wrote, from Rhodes, to Simon 'the chief priest and governor,' and by advantageous concessions, remission of royal debts, and the formal permission to coin money, attained his end (1 Mace. 151 ff.; *ἀντιπατρις* [8th v. 1]). Tryphon was besieged at Dor (v. 25), and ultimately forced to flee to Orthosia (v. 37). The situation immediately changed. Antiochus felt his position secure, and sent Athenobius to Simon demanding Joppa, Gazara, the citadel of Jerusalem, and the arrears of tribute (28 ff.). The refusal of these demands brought about war, and CENDRIBUS was dispatched against the Jews (153 ff.). Sidetes appears no more in 1 Mace.; but in the time of John Hyrcanus (see MACCABEES, I. § 7) he came and besieged Jerusalem (133 B.C.), and five years later met his death whilst fighting the Parthians under Pharnaces II. (Arsaces VII., 128 B.C.). See SELEUCIDAE.

6. Father of NUMENIUS (1 Mace. 1216 1422).

ANTIPAS (Ἀντίπας [Ti. WH], abbrev. from ἀντιπατρις, see Jos. *Ant.* xiv. 13; cp. Cleopas from Κλεόπατρος). 1. See HERODIAN FAMILY, 2.

2. The 'faithful witness' of Pergamum named in Rev. 213. According to the *Acta Sanctorum* (Apr. 11) he was bishop of Pergamum, and suffered death (by the 'brazen bull') under Domitian.

ANTIPATER (Ἀντιπατρις [ANV]), son of Jason [3], an ambassador sent by the Jews to the Lacedaemonians (1 Mace. 1216 1422). See SPARTA. For the Antipater from whom Antipatris (see below) was named see HERODIAN FAMILY, 1.

ANTIPATRIS (Ἀντιπατρίς [Ti. WH]) was founded by Herod the Great on 'the finest plain' of his kingdom

1. **Allusions.**—i.e., Sharon—in memory of his father Antipater (Jos. *BJ* i. 219), but also, as the history of the town abundantly proves, for strategical reasons. The other details given by Josephus are, that it lay 'close to the mountains' (*BJ* i. 17) on the plain of Kaphar Saba (Καφαρσαβὰ), fertile and well-watered, that a river encompassed the city, and a grove of very fine trees (*Ant.* xvi. 52). In another passage, probably from a different source, Josephus identifies it with Kaphar Saba (Καφαρσαβὰ ἢ νῦν Ἀντιπατρίς καλεῖται), and tells how, to resist Antiochus on his march against the Arabians (circa 85 B.C.), Alexander Jannaeus made a deep ditch and a wall, which however Antiochus destroyed, extending thence, a distance of 150 (?) stadia, to the sea at Joppa (*ib.* xiii. 151). During Roman times Antipatris was a station at or near the junction of the military roads from Lydda and from Jerusalem respectively to Caesarea, where the latter road issued from the hills. Thus Paul was brought by night from Jerusalem to Antipatris and thence, part of his escort returning, to Caesarea (Acts 23. 31). The return of so much of Paul's escort is explained by the fact that, Antipatris being according to the Talmud (*Talm. Bab.*, *Gittin*, 76a) on the limits of Jewish soil, all danger of an attack by the threatened Jewish ambush (Acts 23. 16 20 ff.) was now past. There, in 66 A.D., Cestius Gallus halted on his way to Lydda (*BJ* ii. 191), and to this point, on his subsequent retreat from Jerusalem, he was pursued by the Jews (*ib.* 19). There,

ANTONIA

too, in the same year, Vespasian halted on his march from Caesarea to Lydda (*ib.* iv, 81).

Antipatris is not marked in the *Tab. Pent.* The Bordeaux Pilgrim (333 A.D.) gives it as 10 R.m. from Lydda and 26 from Caesarea; the *Itin. Ant.*

2. Site. Lydda and 26 from Caesarea; and Eus. and Jer. in the *Onom.* as 6 S. from Galgulis (in all probability the present Jiljehyeh). Schuer (*Hist.* 5130) and others, following Robt. (*BK* 4130 f.), identify it with the present Keir Saba, 23 R.m. (as the crow flies) from Caesarea. But, as Keir Saba is no less than 17 R.m. from Lydda and 2 R.m. N. from Jiljehyeh; as, besides, it has no ancient remains, nor any such wealth of water or encompassing river as Josephus describes, it is more probable that Antipatris lay farther S. on the upper waters of the 'Anjeh, which are about 29 R.m. from Caesarea, 4 S. of Jiljehyeh, and about 11 S. of Lydda, in a district which better suits the data of Josephus. Here Dr. Sandrecky and Sir C. W. Wilson (*PEF Qu. St.*, 1874, p. 192 f.) have suggested the site of *Kal'at Ras el-'Ain*, at the very copious sources of the 'Anjeh, which they identify with the crusading castle of Mirabel (el-Mirr being a neighbouring place-name). They point out, too, that the valley of the 'Anjeh would be a more natural line for the great ditch of Alexander Jannaeus than a line from Keir Saba to the sea. Although Neplamer (*Géog. du Talm.*, 80 ff.) thinks that the Talmud distinguishes between Keir Saba and Antipatris, this is doubtful, for, while their names are given separately, both are defined as border towns—between Samaria, a heathen country, and Judea. These are all the data for the question of position. Without excavation on the sites named, and the discovery of the rest of the Roman road—probably the road by which Paul was brought—traced by L. I. Smith in 1843 from Gophna to the plain, but lost at the edge of the hills (*Biblioth. Sac.* 1475 ff.), it is impossible for us to be certain where exactly Antipatris stood. We cannot expect to find many ruins on the site. Unlike other Herodian sites, it is not stated to have been embellished by great buildings; and the town did not afterwards develop. Buhl (*Pal.*, 1900) favours Ras el-'Ain.

In 333 the Bordeaux Pilgrim calls it a *mutatio*, or change-house, not a *castrum* like Lydda (the next 'change' he mentions—Bethar, 10 R.m. towards Caesarea—is perhaps the present el-Tirah, *PEF Mon.* 2106). In 404 the *Perier*, S. Paula calls it 'semirutrum oppidulum'. In 451 it had a bishop (*Acts of the Council of Chalcedon*; cp *Deser. Palaestina*, *des. a* 460), and in 744 it still contained Christians. With their disappearance before the Arabs, the Greek ecclesiastical name would vanish, and has not been recovered (but see the curious statement of a native in *PEF Mon.* 2134, that the name of Keir Saba is Anifatrak). The Crusaders wrongly identified Antipatris with 'Arsif, the ancient Apollonia.

ANTONIA, see JERUSALEM.

ANTOTHIJAH, or rather RV ANTHOTHIAH (אנתותיה, ענתותיה [Gi.], ענתותיה [Bi.]; probably a feminine adjective formed from ANATHOTH [q.v.]), in genealogy of BENJAMIN (q.v.), § 9 ii, β), 1 Ch. 8:24 f. (ANATHATHO [ANATHATHA: A] και ΑΘΕΙΝ [Θω], ANATHATHA [L.]).

ANTOTHITE (אנתותי), 1 Ch. 11:28 AV. See ANATHOTH, 1.

ANUB (ענוב; ENNON[†] [B], ענוב [A], אנוב [L.]; ANUB), a Judahite, descendant of Coz (RV Hakkoz) (1 Ch. 4:8). Probably to be identified with ANAR (We.).

ANUS (אננא [B]), 1 Esd. 9:43 AV = Neh. 8:7 HANAN, 4.

ANVIL (עפר), Is. 41:7 f. See METAL WORK.

APAME (ΑΠΑΜΗ [BA], -ΠΗ [L.]; ܐܡܐ, ܐܡܐ), daughter of Bartaicus and concubine of Darius 1 Esd. 4:29.

APAMEA (Jer. Talm. *Av. l.* 9:2c אִפְמֵיָא, but oftener אִפְמֵיָא), mentioned in the Vg. text of Judith 3:14, apparently as a district ('pertransiens . . . omnem Apameum') in the line of march of Holofernes.

APHARSACHITES

'*Aparsach*, one of the ten districts of N. Syria under Rome (Prof. Geogr. v. 1549), took its name from 'Aparsach, a fortified town (named after Seleucus Nicator's Persian wife), built on a hill some six or more miles east of the Orontes, half-way between Tamesa and Antioch, and now represented by important ruins under the village that occupies the site of the old citadel, now called *Kal'at el-Muqib*. See Strabo, p. 732; Ritter, *Expedition* 17, Abth. ii. 1075-6; L. Sachau, *Reise in Syrien u. Mesopot.* 71-2 (photo-graphs and map); also ref. in Bengt. *Lev. Jos.*

APE (אֵפֶה, אֵפֶה; ΠΙΘΗΚΟΙ [BAL.]; *simia*, 1 K.

10:22, *Αἰὼν τοῦ αἰῶνος* [BL.], 1 p. 11; 2 Th. 9:24). An animal mentioned among the rarities brought from Ophir by Solomon's fleet. The Heb. *kaphē* 'ape,' is evidently a loan-word,¹ and is usually connected with *kafī*,² the Sanscr. name of the ape; thus the home of the animal, though not necessarily the situation of Ophir, will be indicated. It is mentioned in each case, in MT (the phenomena of *Q* are here very peculiar), in connection with the peacocks of the common story is correct) imported by Solomon from Ophir. Perhaps 'monkey' would be a more correct modern English rendering than 'ape,' which suggests the tailless *quadrumanus*, while the animals of this order represented on the Assyrian and Egyptian inscriptions have tails. Just so, *ἀῖθροι* would have been a better Greek rendering than *πίθηκοι* (the LXX word), if Aristotle is correct in making the *πίθηκοι* tailless. Four kinds of monkeys are represented on the Assyrian monuments. Those on the black obelisk of Salmanser II. seem to belong to an Indian species; they appear in company with the Indian elephant and the Bactrian camel (Houghton, 'On the Mammalia of the Assyrian Sculptures,' *TSR*, 15:36 f. [77]). Monkeys (*gib*) and baboons were much in request in Egypt. Queen Hatshepsut ('Hatsa'), 18th dynasty, received them among other rarities from the (African) land of Punt; see the picture of the native ambassadors leading specimens of the *Cynocephalus Hamadryas* and the *Cynocephalus Babuinus*,³ Hatshepsut, however (*KP* 21:63 f.), would identify Solomon's אֵפֶה and אֵפֶה (see P. COCKS) with the *taku* and *kukufi* mentioned in the Amarna tablets in the requests of the Asiatic princes—i.e. different sorts of vessels full of aromatic oil, etc.⁴ Plutarch (*de Is. et Osir.* 81) gives an account of the sixteen ingredients of the Egyptian *ἀφρῆ*.⁵

S. M.—A. L. S.

APELLES (ΑΠΕΛΛΗΣ [Ti. WH.], contracted from *Ἀπολλωνιος*) is saluted in Rom. 16:1, where he is called 'the approved (*δοκιμος*) in Christ,' an expression which seems to suggest that he had shown constancy as a confessor in time of trial. Nothing further is known of him. Weissacker suggests that his Christian activity may have been chiefly within the household of Aristobolus also mentioned in *1 Cor. 16:11* (*Post. Age* 1399).

In the list of the 'seventy apostles' which we owe to Pseudo-Dionysius, Appelles is represented as bishop of Hieraclea; that of Pseudo-Hippolytus, much as Smyrna. According to the *synonyma* of Peter and Paul by the Pseudo-synonym Metaphrastes, he was consecrated bishop of Smyrna by Peter.

APHAEREMA (αφαίρεμα [SV[†]], 1 Macc. 11:34 RV, AV APHEREMA).

APHARSACHITES (אִפְרַסַּחִי [Ba.]; אִפְרַס [Gi.]; ΑΦΑΡΣΑΧΑΙΩΝ [BA] but -ΑΡΧΑΙΩΝ [B] in Ezra 5:6; -ΑΡΧΑΙΩΝ [L.]; see also next 'idol', a word used (Ezra 5:6 f.) apparently as the title of certain officers under Darius. Another form is APHARSACHITES; see Ezra 4:9, where the word is misunderstood (see Ezra, ii.

¹ If it belongs to the original text: see Euseb., § 23.

² Whence also *κῆφος* or *κῆψος*, and Eng. *ape*.

³ Edwards, *Pharaoch, Belshazzar, and Esop*, 292. See also the apes and baboons on a wall-painting in a tomb, *El Bersheh* (Egypt. Explor. Fund), Pl. II, plate xi; (p. 29).

⁴ See Am. Tab. II:25. Wi. 2:4, col. 2:40; 1 *kukufi* Sa . . . [kalen nakamisu, 'a *kukufi* . . . with its lid']; col. 3:43 . . . *kukufi* Sami pabi, ' . . . a *kukufi* of good oil'; Pl. 5, 1, 25 (no. 10) Sami Sa tabu ahiya n'rami H *dule* *kukufi*, 'send me, my brother, good oil, two vessels *kukufi* (so Hal., not in Wi.). *Duk* or *dule* (q. v. *dule*) is the ordinary ideogram for 'vessel, receptacle.'

⁵ The Assyriological notices are mostly due to Prof. Cheyne.

APHARSATHCHITES

§ 10) and treated as the name of a tribe settled in Palestine by ASSAPTER. Its etymology is still very uncertain. See G. Hoffmann, *Zd* 254 f.; Marquart, *Fund.* 64; and Andreas in Marti, *Bibl.-aram. Gram.*, Glossary, p. 53*.

APHARSATHCHITES, The (אֶפְרַסְתְּחִי [Ba.]; אֶפְרַסְתְּחִי [Gi.]; פֶּרֶסְתְּחִי [B.]; אֶפְרַסְתְּחִי [A.]; אֶפְרַסְתְּחִי [L.]; Ezra 49f. See APARSATHCHITES.

APHARSITES (אֶפְרַסִּי [Ba. Gi.]; אֶפְרַסִּי [B.]; אֶפְרַסִּי [A.]; אֶפְרַסִּי [L.]; mentioned in Ezra 49f. as a tribe settled in Palestine by ASSAPTER. Various attempts at identification have been made (*Persians*, by Rawlinson, *Pulp. Com.* ad loc., but see *KAT* 370; *Persia*, a Median tribe, by Del. *Par.* 327); but the word is best regarded as a scribe's error, related (some think) to אֶפְרַסִּי (EY APARSACHITES, Ezra 56 66), or, more probably, miswritten for אֶפְרַסִּי, 'scribes.' The last letter of אֶפְרַסִּי (MT אֶפְרַסִּי, see TAPPELITES) was attached by dittography to the next word (Marquart, *Fund.* 64).

APHEK (פֶּן אֶפֶק [Ba. L.]). It is not easy to determine how many places of this name are mentioned in the OT. Only one of them has been satisfactorily identified.

1. In Josh. 134 (אֶפֶק [B.], אֶפֶקָ [A.], -אֶק [L.]) Aphek appears as the limit of the Sidonian country, apparently as its northern limit towards the Gileadites or Byblians. This Aphek, therefore, is commonly identified with Aphaca (now *Ifka*), famous for its sanctuary of Astarte, which lies at the source of the river of Byblus, the Adonis or (as it is now called) Nahr Ibrahim; 'cp Lucian, *De Syria* 6-8.

2. The Aphek assigned in Josh. 1930 to the tribe of Asher is mentioned in Judg. 131 (where the name is written אֶפֶק, אֶפֶק, אֶפֶק [A.], אֶפֶק [B.]) as one of the towns which the Canaanites were able to maintain against the invaders. Here also some suppose that Aphaca is meant; but it is difficult to believe that Asher ever attempted to extend so far north, and, as it appears from Josh. 1711 that Asher had a theoretical claim to part of the plain of Sharon S. of Mt. Carmel as far at least as Dor, it is probable that Aphek in Sharon (no. 3) is meant.

3. In Josh. 1213 (אֶפֶק [B.]) we read, in the list of the kings smitten by Joshua, 'the king of Aphek, one; the king of Lasharon, one'; but it is better to emend the verse with the aid of *Θ* ('Ὁφὲκ τῆς Ἀρώκ) and read 'the king of Aphek in the (plain of) Sharon, one' (see Di. on the passage). This Aphek in Sharon, as Wellhausen has pointed out, is the city (α) from which the Syrians of Damascus made repeated attacks on Samaria, 1 K. 202630 (אֶפֶקָ [Ba.], -אֶק [L.]), 2 K. 1317,2 and (β) and (γ) from which the Philistines assembled their forces for war with Israel before the battles of Gilboa (1 S. 291) and of Eben-ezer (1 S. 41; Jos. אֶפֶקָ or אֶפֶקָ).

(α) As regards the Aphek of Kings: that it lay in a lowland plain is clear from 1 K. 2023, and that the plain is that of Sharon follows from 2 K. 1322 *Θ*, where we find the addition (undoubtedly genuine) 'and Hazael took the Philistine from his hand from the Western sea to Aphek.' Aphek therefore lay on the verge of Philistia—i.e., in Sharon—and we must understand that, both in Benhadad's time and in the time of Hazael, the Syrians avoided the difficulties of a direct attack on the central mountain-land of Canaan by striking into the maritime plain south of Carmel and so securing the mastery of the fertile coast-land without having to besiege Samaria. Their route would, in fact, be the present great road from Damascus to Ramleh through Megiddo.³ At Aphek,

¹ On this passage see ASHR, § 2.
² See We. *CH* 254; cp *Hist.*, ET, 39 (but cp GASm. *HG* 350 401 f.).

³ Cp the route of Al Nābulus, ed. Tach.

APHEK

somewhere in the north of the Sharon Plain, they had a great military post from which they could direct their armies either against Samaria or against the Philistines (2 K. 1217 [12]).

(β) As regards the Aphek of Samuel: it is clear that a point in the northern part of the Sharon Plain, on the road to Megiddo and the plain of Esdraelon, is appropriate to 1 S. 291. The mustering place of the Philistines cannot have been in the heart of the Hebrew territory, least of all at such a place as el-Fakīn' on Mt. Gilboa (in the rear of Saul's army) where it is absurdly placed by Conder and Armstrong. It is argued that the Philistines were at Shumen (1 S. 284) before they reached Aphek; but to argue thus is to forget that 1 S. 28425, the story of Saul and the witch of Endor, is a distinct narrative, by a different hand, and that 291 originally followed directly on 281 f.

(γ) Finally, the attack on central Israel which issued in the battle of Eben-ezer and the destruction of Shiloh (1 S. 4) would naturally be taken to have been made from the same Aphek, were it not that commentators have assumed that the position of Eben-ezer, and therefore of Aphek, is fixed somewhere near Mizpah by 1 S. 712. It is certainly safer, however, to distinguish the battlefield of Eben-ezer in 1 S. 41 from the stone Eben-ezer set up by Samuel many years later, than to assume the existence of two Apheks fitted to be the starting point of a Philistine campaign (cp EBEN-EZER). And here also it is to be observed that chaps. 4 and 7 are derived from distinct documents, and that the historical value of the second is very insecure.

From what has been said it will appear without further argument that it is illegitimate to seek an Aphek in the region, between Mt. Tabor and the Sea of Galilee, to which Eus. and Jer. give the name of Saron, or to place the Aphek of Kings at the caravan-station of Fik in the mountains to the E. of the Sea of Galilee. This may be the Apheca near Hippus or Hippe of OS 9124 and 21972; but is not a biblical site.

The existence of an Aphek in Sharon is put beyond doubt by the following additional evidence. *First*, in the lists of Thotmes III. (c. 1600 B.C.) nos. 60-76 form a group by themselves; 62 is Joppa, 64 Lydda, 65 Ono. Then come 66 Apukn, 67 Suka, 68 Yhm. At this last place, Thotmes had to decide which of three roads he should take over Carmel. Yhm must therefore have lain near the most southerly road—that is, somewhat south of the mouth of the Wādī 'Abū Nār—and may be the present Yemma by the high road along the edge of the Samaritan Hills. Suka is doubtless the present Shuweikēh, 2 m. farther S. Apukn therefore lay between it and Ono. Maspero, it is true, identified Suka and Apukn with the Judean Shocoh and Apheka of Josh. 154853; but W. Max Müller (*As. u. Eur.* 161) has shown that the list contains nothing S. of Ajalon. The *n* of Apukn may be the common termination of place-names *pn*. Max Müller says it may also be read as *i*. *Secondly*, in the autumn of 66 A.D. Cestius Gallus, advancing on Jerusalem from Caesarea, reached Antipatris, and 'sent before' a party to drive the Jews out of 'the tower of Aphek' (Ἱέρως Ἀφὲκωδ). After taking the tower he marched on Lydda (Jos. BJ ii. 191). This agrees with the data of Thotmes III. and places Aphek between the River 'Anfeh and Lydda. Here there is now no place-name which affords any help in the case, unless it be that of the village Fejjeh—i.e., originally, Feggēh—about 9 m. NE. of Joppa (which, however, does not lie quite near enough to the E. limit of the plain to suit Lucian's text of 2 K. 1322), and it ought not to be overlooked that in a list of medieval Arab place-names quoted by Röhrich (*ZDPV*, 1896) there occur both Sair Fuka and Fakīn. *Again*, in a fragment of Esarhaddon (681-668 B.C.) a city Apku is described as 30 'kasbu-kakkar' from Raphia on the Egyptian frontier. Schrader (*KAT* 204), who translates kasbu kakkar by 'double leagues', takes Apku to lie on

APHEKA

the E. of the lake of Gennesaret (*i.e.*, the present Tiberias) and the Aphek of 1 K 20.20, etc. This, however, seems less likely to give the distance from Raphia of a place so situated than of an Aphek on the plain of Sharon. The 'Aphek' it may be remarked, is 70 m. from Raphia. It ought not to be overlooked that the particularising of one Aphek as 'in Sharon' (Josh. 12.11; see above, 3) implies the existence of other Apheks in the land.

G. A. S.

APHEKA (אֶפְקָא, אֶפְקָא [M.L.], פֶּאקוּדָא [B]), an unidentified city in the mountain-land of Judah (Josh. 15.35).

APHEREMA RV APHEREMA (אֶפְרַיִם [N.], אֶפְרַיִם [V.], אֶפְרַיִם [M.L.]), 1 Macc. 11.4, probably a Graecised form of the city-name EPHRAIM (*q.v.*, n.).

APHERRA (אֶפְרָא [B.V.]), a group of children of Solomon's servants (see NEPHTHIM) in the great post-exilic list (Ezra, ii. 39, § 80), one of eight inserted in 1 Esd. 5.11 (om. L) after Pochereth-hazzebaum of Ezra 2.57 = Neh. 7.59.

APHIAH (אֶפְיָא [B.L.], אֶפְיָא [A.], אֶפְיָא [A.]), 1 S 9.11, according to MT, one of Saul's ancestors; but 'son of Aphiah, a Benammin', should probably be of Gilead of Benjamin (אֶפְיָא בֶּן-בְּנֵימִן). So virtually Wellhausen; but he did not notice that Aphiah (cp *Q*) and note that אֶפְיָא in Relat. N. 318 is a corruption of Gilead. This was reserved for Marquart (*Found.* 15).

T. K. C.

APHIK (אֶפִּיק), Judg. 1.14. See APHIC, 2.

APHRAH, HOUSE OF, RV Beth-le Aphrah (בֵּית אֶפְרָא),

אֶפְרָא אוֹרֵקוּדָא קַטָּאֶלְוֹטָא [B.V.], Mic. 1.6f. the name of a town not identified with any certainty. The determination of the site of Beth-le Aphrah cannot be separated from the larger question of the text of the whole passage, Mic. 1.6-13, which cannot be discussed here (see Taylor, *MT of Mic.*; Ryssel, *Untersuch.* on the Book of Mic. 26 ff.; W. K. P. *Phyph.*; W. A. P. *Unters.* 185 f., 104-113). So much, however, is plain: the vocalisation cannot be trusted, especially in view of the paronomasia ('house of dust' RV mg.), and even the consonants were differently read by *Q*. The older writers (e.g., Winer, so now also Nowack) identified Aphrah with OPHRAH (*q.v.*); cp Pesh. 'the houses of Ophrah'. But the context seems to demand some place farther W. and S. Winkler, with his rather too ingenious emendation 'Bethel' (reading אֶפְרָא for אֶפְרָא *IOB*, *Le.*), seeks to avoid this objection by reading 'Gildat' for the historically impossible 'Gath,' and (with We.) 'Bekaim' (see Beckwith) for the very questionable אֶפְרָא (in 1.14, Hitz. *KGH*, ad loc.), followed by Mithani in *HEB* 21, suggests a 'Afra' that Yāqūt (*Mo'jam el-buhār*, sub: *ec.*) mentions as 'a castle in Palestine near Jerusalem.' Ges.-B. suggests doubtfully *Belegabra* (Eleutheropolis, *Bar Libani*), which, however, represents an Aram. בית-גברא (Nestle in *ZDP* 1.224 f.). Perhaps the name of the Wady el-Ghaffr running E. not far S. of Mirash may be an echo of Micah's Aphrah. So G.A.S. (*Twelve Proph.* 138). Che. (*QJR*, July 1898). The S in אֶפְרָא seems to be a scribe's error (as if 'in the dust').

APHSES (אֶפְסֵס), 1 Ch. 21.15, AV, RV HAPPIZZA.

APIS (אֶפִּיס; אֶפִּיס [B.V.], אֶפִּיס [A.], אֶפִּיס [A.]), (superscript *Q* 1.60); Egyptian *Hapi*, the Nile-bull-god of Memphis (see EGYPT, § 14). Though the name of this famous deity does not occur in EV, he is mentioned once in OT (Jer. 46.15a). *Q* alone has preserved the true division of the words, for אֶפִּיס AV 'are swept away' (similarly RV Pesh. Vg.), we must read אֶפִּיס אֶפִּיס 'hath fled Apis' (אֶפִּיס אֶפִּיס). Cp König, *Synthe* 210, n. 1. For an analogous correction see Geschechicht and Cornill ad loc. and cp CATI, Got. m. s. 2.

APOCALYPSE

APOCALYPSE, THE (BOOK OF REVELATION)

According to the best authorities (SC¹ [in subscription] 28, 82, 93, 95; 11. W. 11), the title runs 1. Name. ἀποκαλύψας ἡμῶν (cp. Later MSS add τοῦ θεολογίου (Q and many cursives), or τοῦ ἀποστόλου, or τοῦ απ. καὶ ἐπαγγέλιου (P vg. cod., Syr. 1).

In almost all MSS the Apocalypse now holds the last place in the NT. The stichometry of Cod. Bezae Cantabrigiae (D. Paul) arranges as follows: Evang. Paul. Cath. Apoc. Act. (see Greg. *Prolog.* 31.6; cp also what is said about the Evangelia, 175 and 368). In the Syriac version of the Apocalypse which has been edited by Gwynn, the book was preceded by the Fourth Gospel. The hiatus in Cod. D was perhaps originally occupied by the Apocalypse and Johanneine Epistles (Bousset, *NTZ*, 1892), thus giving the order Evang., Apoc., Epist. Joh., Acts. All this perhaps indicates that the Apocalypse and the other Johanneine writings were originally handed down together. The point of fact, Tertullian actually speaks of an 'instrumentum Johannis,' which consisted of Apoc. and 1 Jn. (*Rescript.* 38, 39; *Paul.* 19; *Enchiridion* 33). Cp Rensch, *Die neue Test. Textual.* 528.

The book seems to be presupposed in two places in the Ignatian epistles. (1) *Ad Eph.* 15: ἵνα ὡς αὐτοῦ

2. External evidence: canonicity.

Paul (N¹ read λαοί in Rom. 21.3 καὶ αὐτοῦ ἡνὶν θύς. (b) *Ad Philad.* 6: οἱ τοῦ ἐμοῦ στήλαι εἰσὶν καὶ τόφοι νεκρῶν ἐφ' οἷς γέγραπται μόνον ὀνόματα ἀνθρώπων (cp Rev. 3.12 f., in the epistle to the church of Philadelphia). Andrew of Caesarea, moreover, mentions Papias, amongst others, as bearing witness to the Apocalypse (ταύτη προμαρτυροῦντων τὸ ἀξιόπιστον), and on Rev. 13.7 adduces (324. ff., ed. Sylle. two observations taken verbatim from Papias. That Irenaeus does not mention the testimony of Papias is doubtless to be accounted for by the historian's unfriendly attitude towards the book. Irenaeus appeals in support of the traditional number 666 to 'elders' who had actually seen John. (In all probability we could reduce this testimony of the elders to that of Papias alone; Harnack, *Chron. der altchristl. Lit.* 133 ff.). We find a writer so early as Justin asserting the book to be apostolical (*Dial.* 81: παρ' ἡμῶν ἀνὴρ τις ὃς ὄνομα Ἰωάννης εἰς τῶν ἀποστόλων Χριστοῦ ἐκ ἄποκ.) and canonical (4.14.1. 23: ὡς ἐκ τῶν ἡμετέρων συγγραμμάτων κατὰ δόξαν). This early recognition of the Apocalypse as a canonical writing need not surprise us: the book itself puts forward a claim to this character (13.7, 22.18).

In the second half of the second century we find the Apocalypse widely recognised.

It is generally current (a) in Asia Minor, alike among Montanists, anti-Montanists (Apollonius; Euseb. *HE* v. 18.14), and mediating writers (Melito of Sardis; *ib.* iv. 26.2); and (b) in Gaul, both with Irenaeus (*Adv. Haer.* ii. 22.1 ff. iii. 1. 34. xi. v. 30.1) and in the writing of the church of Lugdunum and Vienna (in Eus. *HE* v. 18).

3. 2nd Cent. (c) In Africa, as already mentioned, Tertullian knows of an *instrumentum Johannis* to which both the Apocalypse and 1 Jn. belong; the *Acts of Perpetua and Felicitas* shows acquaintance with it (cp *cc.* Land 12). (d) In Egypt the *Judith of Petri* seems to know the book (Hilgenf. *Nor. Test. extr. Civ. Rescriptum* 101); (e) for Antioch, Bishop Theophilus (Eus. *HE* iv. 24) is our witness to the same effect; and (f) for Rome, the Muratorian Canon. (g) Clement of Alexandria cites the Apocalypse (*Prolog.* 2 n. 3. 114; *Strom.* 6.16). Origen is unaware of any reason for doubting its apostolic origin (in *Jos. Hom.* 6; cp Eus. *HE* vi. 25.9).

The situation changes, however, in the third century. As early as in the second century Marcion had refused to recognise the book (Tert. *Adv. Marc.* 1. 4).

4. 3rd Cent. both the Apocalypse and the Fourth Gospel to Cerinthus (Epiph. *Haer.* 51, Philast. *Haer.* 60, Hippolytus; cp Iren. iii. 11.6) probably on account of their own hostility to Montanism (after Irenaeus; Th. Zahn, *Einleitung* 2. 12. 9 ff., Bousset, *Konm.* 16 f.).

This opposition by the Alogi was continued by the Roman presbyter Caius, who, in his dispute with the Montanist Priscus,

APOCALYPSE

also attributed the work to Cerinthus (Euseb. *HF* iii, 28). From the relation of Caus by Hippolytus (*apokalypsa kata Iason*, Assen. *Bibl.* 16, 18, 115; fragments in *Exegym*, *Hebr.* 11, 12, 13) equals the writing catalogued in the inscription on the throne: *ἡ ἀποκάλυψις τοῦ κυρίου καὶ ἡ ἀποκάλυψις τοῦ κυρίου* we learn that Caus directly took up and continued the criticism of the Apoc.

The criticism of Dionysius of Alexandria (Euseb. *HF* vii, 25) was more moderate and more effective. He does not hold Cerinthus to have been the author of the Apocalypse, but conjectures that it must have been the work of some other John than the son of Zebedee, arguing from a comparison between the Apocalypse on the one hand and the Gospel and Epistles on the other as to style, language, and contents. The criticism of Dionysius was afterwards taken up by Eusebius, who was the first to provide a firm basis for the conjecture of Dionysius as to a second John by a reference to what Papias says of 'both' Johns (*HF* iii, 39) and inclines to class the Apocalypse with the spurious books, *apoc.* *HF* iii, 25-4).

Henceforward the view of Dionysius and Eusebius became the prevailing one in the Eastern Church.

The book was recognised, indeed, by Athanasius of Tyre (*Synops.* 156, 84 ff.) and Pamphilus (*Apok.*, ed. de la Rue, 124 ff.), but on the other hand unrecognised by Cyril (*Catech.* 133-5), Greg. of Naz. (*Carin.* 11), the Synod of Laodicea (Can. 64, see Zahn, *op. cit.* 217 ff.), the *Apostolical Constitution* (Can. 85 [84]; Zahn, 219 ff.), the *Lambus* of Seleucus (Zahn, 217).

6. Eastern Church. The Apocalypse is not mentioned by Theodore of Mopsuestia, or by Chrysostom (p. the *epitropia* of the Synops. of Chrysostom, Zahn, 220), or by Theodoret. In the *Antilegomena* of Nicephorus, manipulated in Jerusalem (150-85; Zahn, 223, 26 ff.) it figures among the Antilegomena; in the list of the sixty canonical books it is not found, though it is again introduced into the *Synops.* of Athanasius.

The unfavourable judgment of the Syrian church regarding it is very noteworthy.

The *Doctrine of Addai* which, in the form in which we now have it, dates from about 400 A.D., recognises, as authoritative scripture, nothing beyond the four gospels (Diatessaron), the Pauline Epistles, and Acts. From the Peshitta it is wholly absent. Whether Ephraim recognises the Apocalypse as canonical is, to say the least, doubtful. The Greek works that pass under his name, being of uncertain authenticity, cannot here be taken into account, and thus the evidence that he did appears to rest mainly on a single passage (*Opera*, Assen. 227, cp. Rev. 51-52). In any case, the noteworthy fact remains that Ephraim cites the Apocalypse but little, and develops his apocalyptic ideas on lines supplied by other writings.²

Besides, the Syrian Church did not look upon the book with favour.³ Jacob of Edessa (*op.* 708) cites it (Ephraemi opera, ed. Assen. 192), and Bar Sahb (*op.* 177), bishop of Mabug (Mabugh), comments on it (Gwynn, *lxxxvii* ed.); but Bar Hebraeus (*op.* 123) holds it to be the work of Cerinthus or of the 'other' John (Assen. *Bibl.* *Or.* 815), and 'Ebed Jesu' (*op.* 113) omits it from his list of canonical scriptures. In an Armenian Canon also, by Mesbhar of Nivrank (1290), the Apocalypse is reckoned among the Antilegomena.

Though the opposition to the Apocalypse was thus persistent in the Syrian Church, it gradually died away in the other Eastern provinces.

7. Rest of East. The book is acknowledged by Athanasius, Basil, Cyr. Alex., Nilus, Father of Pelusium (Egypt),⁴ Gregory of Nyssa, Epiphanius of Salamis, and Johannes Damascanus. Andrew, archbishop of Caesarea in Cappadocia, wrote his commentary on it in the first half of the fifth century. He was not, however, followed in this until the ninth century, when Arethas, his successor in office, also undertook the task.

In the Western Church, on the other hand, the Apocalypse was accepted unanimously from the first.

8. West. Hippolytus (see above) defended and commented on it in a no longer extant work, and makes copious quotations from it in his Commentary on Daniel and in his *De Antichristo*.

Similarly, it is recognised by Lactantius (*Inst.* 2, 27, 3, 4; 42; cp. 715 ff.), Hilary (*De Trin.* 10, 11), Ambrose

¹ Gwynn (*The Apokalypsa of St. John in a Syriac Version*, Dublin-London, 1897, p. ciii) cites also De Lamy, *Hyom.* 106 a passage which the present writer finds himself unable to accept as proof.

² Thomas of Harkel, it is true, included it in his translation, as probably also according to the latest researches of Gwynn) did Philoxenus of Mabug (Mabugh).

³ See Lücke, *Versuch einer vollständigen Einleitung in die Offenbarung Johannis* (2, Bonn, 1829).

APOCALYPSE

(*De Virg.* 14, *De Spiritu* 3, 20), Rufinus (*Exp. in Apoc.* 1-11; on Novatius, Commodian, Amobius, and others see Lardner, *Credibility of the Gospel History*).

Augustine (in *Trang. Joh.* 13, 6, 17; 118, 17; *De Civ.* 2, 27) insists on the identity of the author of the Gospel with the writer of the Apocalypse.

The book was acknowledged at the synods of Hippo (19) and Carthage (397). As early as the end of the third century it was commented on by Victorinus, bishop of Pettau (*op.* 103 A.D.). He was followed by the Donatist Theodorus (before 385).

An exceptional position was taken up by Jerome, who, under eastern influence, relegated the Apocalypse to the second class of *scripturae catholicæ* (*in Is.* 149), as also afterwards by Philastrius, if it be indeed the case that the book was not mentioned in the Canon of his *De hæresibus* 87 f.

At a later date the capitulum Aquileiense (*Corp. Lit.*, *cap.* 177, 2, cap. 20), adopting the decision of the Synod of Laodicea, removed it from the Canon.

At the Reformation the view of Jerome was revived by Erasmus in his *Annotationes*. Luther's well-known

9. Since Reformation. adverse judgment, pronounced in his preface of 1522, rests more on a religious than on a scientific foundation. Subsequently he gradually modified his view in a sense more favourable to the book. In his translation, however, he indicated his unfavourable opinion so far as all events that he relegated James, Jude, Hebrews, and the Apocalypse to the end of the NT without pagination. The 1st edition of the NT in this form appeared in 1609.

Carlstadt (*Intellect de canonis scripturarum*, 1520), falling back on the canon of Eusebius, classed the Apocalypse among the seven Antilegomena. The opposition to its reception lasted down to the following century, and disappeared only after the introduction of John Gerhard's cunningly devised distinction between canonical and deuter-canonical writings (*Loc. theol.* 1, cap. 9, § 241). In the reformed churches the opposition disappeared much earlier—from the time of Calvin, indeed.

In the eighteenth century the question was again revived by Abauzit (*Phisians hist. sur l'Apoc.* (in *Cheremistories*, tom. 1, 1770); Hermann Oeder (*Christlich freie Untersuchung*, 1720), *sovereignste Offenb. Joh.*, published by Semler, Halle, 1799), reverting to the view of Caus of Rome, attributed the book to Cerinthus. He was followed by Semler (*Freie Untersuchung der Canon*, 1772), and in many controversial writings, and by Corrodi (*Gesch. der Philonismus*, 1781). The last defence was that of Hartwig (*Apokalypsa Joh.*, 1780-81). Cp also the successive editions of J. D. Michælis, *Einl. in die göttlichen Schriften* from 1750 onwards.

Our sources for the text are the following:—

A. *Greek MSS.*—(1) *Evangel.* It exists in *8AC* (39-51, 7-14-17, 8-5-216, 10-10-11, 11-13-18-2, 19-5-22-21) being absent also in P¹.

10. Text.—(1) *Evangel.* Porfirianus Chioensis sec. 9, A¹ Cath. Paul. Apoc. (10-12-17, 19-12-20-22-6-2) being absent.

the material. and Q (in Tischendorf, B, Vaticanus 2066 sec. 8 (Apoc. 1013)). (2) *Cursive.* Of these some seventy are more or less collated. Their readings can be learned from the editions and collations of Mill-Kuster (1710), Bengel (1744 ff.), Wetstein (1751-2), Matthæi (1782-88, tom. x.), Alier (1780-87), Birch (*Varie Lect. in Apoc.*, 1800), Schulz (1803), Schneier (*Index Augustin.*, 1859; *Adversaria Critica*, 191), Tregelles (57-72), Tischendorf (ed. octava major), Alford (*New Test.* vol. iv, ed. 2, 1885), Simcox (*J. Phil.* 22, 285 ff.).

B. Versions.—(1) *Latin.*—A good deal is now known about these. The oldest stage is represented by h (Florænsis), the Latin translation used by Primasius (Haußleiter, *Forschungen zur Gesch. der Kanons* iv); the intermediate, by the Gigas Holmensis (ed. Holsheim, 79). The best material for the Vulgate is brought together in Lachmann (*Nov. Test.*) and Tischendorf. (2) *Syriac.* A valuable Syriac rendering (probably the Philonensis) has recently been edited by Gwynn (*op. cit.*)³. The Syriac MSS. hitherto known (see Gwynn, *lxxv* ff.) represent the text of Thomas of Harkel. (3) *Importance* also attaches to the still comparatively unexplored Coptic (see Gwynn, *Stud. Theol.* 1), and Armenian versions.

C. Church Fathers. There are copious citations in Origen, Hippolytus (especially in the *De Antichristo*) and in the com-

APOCALYPSE

mentary on Daniel; see the new edition by Bonwetsch and Achelis) and Cyprian. The text used by Andrew of Caesarea and Arethas in their commentaries has not as yet been fully established. The text of the last commentary of Theodorus can best be made out from the excerpt from the commentary on the Pseudo-Augustinian Homilies.

In the attempt to classify this material, it is best to begin with the class which shows the latest text—namely,

11. **Classifica- tion.**

(1) the Arethas class, so named because a text of this order was used by Arethas for his Commentary (hence also many cursives of this class are, strictly speaking, MSS of Arethas Commentaries). To this class belong Q and about forty of the more or less known cursives. The material being so defective, separate groups within the class can hardly be distinguished.

Tentatively and under great reservation a few may here be suggested: (i) 96, 111, 127, 131 are somewhat closely connected (cp *HE* v. 1874, p. 632); (ii) 12, 2, 114, 115, 131, 204, 30, 97 (the last three very intimately related); 94, 100, 116, 117, 118, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

The second class, which we can detach from the rest as having arisen out of a later recension, is (2) the so-called 'Andrew' class—the class to which the text used by Andrew (see above, § 10 c) in his commentary belonged. It falls into several clearly distinguishable subordinate groups.

(i) The group consisting of 15, 63, 87, 121 stands almost entirely apart, presenting as it does many points of contact with the Arethas group, but often showing a very peculiar text. The following three groups, on the other hand, are very closely akin: (ii) 1, 12, 15, 81, 182 (often with a very archaic Latinising substratum); (iii) 22, 73, 79, 80, 92; (iv) 119, 175, 37, 94, 121, 101, 96, 154, 161. Each of these is being ranked with this class as a whole, but cannot be associated with any of the subordinate groups in particular.

Of all the known cursives there are only (3) four—{20}, 38, 51, 95—which it has hitherto been found impossible to classify; they show an ancient text.

It is as yet difficult to detect the 'Western text'

12. **'Western Text.'**

(see *Text*) in the Apocalypse; but this will gradually become practicable as in recent years new sources have become accessible.

Witnesses to it, though only in part, are the *inicial* π (with a very erratic and only partially ancient text), the text of Primasius (identical, according to Hanssler's investigations, with Cyprian's text, and thus old African), the fragments of β , the Gigas Holmensis, γ , Hieronymus containing a later development of the text), and the Syriac version edited by Gwynn and designated Σ (the latter version known as Σ shows a text almost everywhere corrected in accordance with the Arethas class, though in many places also it contains a text older than Σ). To the same category belong also, in part, the group 1, 12, 36, 21, 152 (cp Gwynn, *etc.*), and, finally, the Armenian version, which, unfortunately, is not yet sufficiently known (note the coincidence of 1, 12, 36, etc. with arm.; cp Bousset, *Comm.*, 175). A further point worthy of notice is the close affinity of π , Σ (S), and Origen's, one might almost venture to constitute $\pi\Sigma$ or a distinct group in the Western Class (Bousset, 181; Gwynn, *loc. cit.*).

Distinctly the best text is that presented by ACVg. The Vulgate furnishes us with good means of controlling the text of AC, especially where

13. **Result.**

the two differ or where C is wanting. AVg., therefore, where C is wanting, often constitutes a stronger testimony than that of all the other witnesses together.

'John' can be that heard and saw these things' (22: RV; cp 14: 1). Are we to identify this John with the apostle, the son of Zebedee? Within the book itself 21: 4 might fairly be urged against this identification. 'The

14. **Professed author.**

first to submit the question to thorough discussion was Dionysius of Alexandria (see above, § 4); in the result he attributed the book to another John. 'This theory of a second John, adopted also by Eusebius (*HE* iii. 39: 1 ff.), was not'—in the present century (Bleek, Ewald, de Wette, Lücke, Numbler, Düstordieck, etc.), the John of the Apocalypse being usually in this case identified with the 'Presbyter' of *Eus. HE* iii. 39: 1 ff. Criticism advanced another step, however,

APOCALYPSE

and declared the whole tradition regarding the presence of John the Apostle and Evangelist in Asia Minor to have been due to a confusion between his name and that of the presbyter.

St. Angel, *Der Evangelist Johannes*, 1804: 1, 2; Zeller, *Die kirchliche Tradition über den Apostel Johannes*, 1844; Kuntz, *Die Joh. von Nazareth*, 1867, 1868 f.; Scholten, *Der Ap. Johannes in Kleinasien*, 1872; Weittenbach, *Das Papianische Fragment*, 1874; Thoma, *Das Johannische*, 1882; and others. A recent edition of Hagenfeld, *ZIT*, 1886: 57, also Zahn, *St. Paulus*, 1890: 49 ff.; *Die Johanneische Schrift*, St. K., 1898, p. 194 ff.; Herzig, *RTD*, 1895: 75 ff.

The question is difficult. The first remark to be made upon it is that the assumption that there were two Johns in Asia Minor—the apostle and the presbyter—finds only slender support in ancient tradition. Whatever the interpretation we may put on the important testimony of Papias preserved by Eusebius (*HE* iii. 39: 1 ff.), it is at least certain that Papias speaks not of two Johns in Asia Minor—the apostle and the presbyter—but of one John, whom we are to look for as a near neighbour of Papias in space and time. Of a second John the second century and the first half of the third know nothing; he is unknown to Irenaeus and to those who disputed the claims of the Fourth Gospel, to the Allog and to Celsus, to Tertullian, to Clement, and to Origen. Not till the time of Dionysius of Alexandria is reached do we find any indication of the sort (*Eus. HE* vi. 25: 16). Even Dionysius alleges no other evidence than that in his day two graves of 'John' were shown.

The inference he draws from this—that there must have been two Johns—is by no means a string of one. It would not be less reasonable to suppose that in his day the precise burial-place of John was no longer known, or that the two *apocrypha* presented two distinct 'places' of John (so Jer. *de corr. ill.*, 9: *due memorie*; Zahn, *Acta Jo.*, clvi). For this supposition, Eusebius has supplied a plausible basis by combining the statement of Papias about two Johns with the traditions mentioned by Dionysius about two graves of John at Ephesus.

If the assumption that there were two Johns in Asia Minor proves to be a baseless hypothesis—and its baselessness is shown by the fact, among other things, that the 'John' of Asia Minor is so often spoken of without distinguishing

16. **Viz., the Presbyter.**

phrase of any kind—the question which text arises is as to whether this John was the apostle or the presbyter. At this point the important testimony of Papias turns the scale in favour of the presbyter. For his contemporary and the authority whom he quotes is—next to Aristion—the 'presbyter' John (*Eus. HE* iii. 39: 1); and Aristion and John are doubtless also to be identified with the *προφῆται* whom, according to *Eus. HE* iii. 39: 3, Papias could still directly interrogate. The evidence of 2 Jn. and 3 Jn., claiming as they do to be written by the *προφῆται*, points in the same direction. Moreover, as has already been pointed out (§ 11), the Apocalypse apparently does not profess to have been written by the apostle. On the other side, it is true, we already find Justin (*Dial.* 81; see above, § 2) asserting the apostolic authorship. It is, however, noticeable that Irenaeus—for whom the Gospel, the Epistles, and the Apocalypse are all by one and the same author—speaks of John as an apostle only in indefinite expressions similar to those in Gal. 1: 19, but elsewhere invariably designates him as 'disciple' (*μαθητής*); see Bousset, *op. cit.* 41 ff.

Further, Irenaeus, who calls Papias a disciple of John, also speaks of Polycarp as his fellow-disciple (*Eus. HE* iii. 39: 1). If we refuse to suppose that Irenaeus had already confounded the presbyter with the apostle, then the great teacher of Polycarp was also, according to Irenaeus, the 'presbyter' John; for Papias was a disciple of the presbyter. In the Murabaran canon, further, John is called simply 'discipulus,' whereas Andrew is 'apostolus.' The testimony also of Polycrates in the letter to Victor (*ap. Eus. HE* v. 24: 2 ff.) claims particular attention in this connection. Here, in a passage where everything turns upon the exact titles of the persons named, Polycrates designates

APOCALYPSE

s the *συνεργία* of Asia Minor (1) the apostle Philip and his daughters, (2) John who lay on the bosom of the Lord, *κατὰ τὸν κόλπον* who was buried in Ephesus, *ὁ ἐξουσίῃς ἰσχυρὸς τὸ πύλαρον πεφορημένος*, (3) the bishops Polycarp, Thraseas, Sagaris, Papias, Meito. Polycrates thus designates, plainly with intention, the author of the Fourth Gospel also as teacher and witness, not as apostle. Indeed, the traditions relating to the Fourth Gospel become much more intelligible if we are able to assume that the witness (In 1913, *ἐκδοὺς ὁμολογία* is not the Galilean apostle, the son of Zebedee, but another John, a Jerusalemite (Bousset, *Komm.* 41 f.). It may also be remarked that the statement of the Fourth Gospel — that the beloved disciple was 'known unto the high priest' (18.1) — harmonises well with the account of Polycrates, 'who became priest' (*ὁς ἑαυτὸν ἐξουσίῃς*, cp further, H. Döll, *St. Kr.*, 1891, and Harnack, *Church*, 1.50 ff.).

The inference from all this would seem to be that the (true) John of Asia Minor, who was the presbyter, was one who had seen Jesus indeed, but not one of the number of the apostles. The John of the Apocalypse (cp the superscription of the Epistles) is thus the presbyter.

Whether the Apocalypse was really written by him is another question. In order to understand how the Apocalypse and the Fourth Gospel could both be attributed to the same disciple of the Lord, it is necessary to remove them both a little distance away from him. John is only the eye-witness, not the author of the Fourth Gospel; so, in like manner, in the Apocalypse we may have here and there a passage that can be traced to him, but the book as a whole is not from his pen. Gospel, Epistles, and Apocalypse all come from the same school. They show also at various points linguistic affinities (Bousset, *Komm.* 202 ff.). They had, moreover, at first the same history — they were, it would seem, the favourite writings of Montanism, and were all three alike rejected by the opponents of Montanism, the Alogi.

The earliest Greek fathers who in any measure attempted to interpret the Apocalypse were Irenaeus, Hippolytus, and Methodius:

Irenaeus, in *Adv. Haer.* 5; Hippolytus, in *Comm.* on Daniel, in *apocryphic text*, *τοῦ ἀποκαλύπτου*, in extant fragments of the *ἀποκάλυψις κατὰ Πάριον*, and in a no longer extant commentary on the book itself.

18. Interpretation: Greek and Latin. Methodius, in *Symph.* 15.45-54 ff. Of continuous commentaries originating in the Greek Church we possess only those of Andrew (5th cent., ed. Sylburg) and of Arethas (6th cent., ed. Cramer).

The oldest Latin commentary, which contains much interesting and ancient material (for example, the interpretation of various passages referring to Nero), is that of Victorinus of Pettau (c. 303). We possess it only in Jerome's redaction. Haussleiter is about to edit it in its original form. An exceedingly powerful influence was exercised also by the commentary of Tyconius.

This work is, unfortunately, no longer extant, and has to be reconstructed, as far as the materials allow, from the pseudo-Augustinian *Homilies in Apoc.* (Migne, *Pat. Lat.* 35), the commentary of Pseudo-Basilius (c. 886, ed. p. 100, Basel, 1841), and (finally) the great compilations of Bede, written in 776 (*on Apoc. Rev.*, ed. Horst, 1773).

In his commentary, written before 380 A.D., wholly from the Donatistic point of view, Tyconius consistently carries out the spiritualistic interpretation. In his explanation of the millennium passage (20.1 ff.) he was afterwards followed by Augustine (Bousset, *Komm.* 65). Down to the Middle Ages the exegesis of the book continued to follow that of Tyconius, if his Donatistic tendency he left out of account.

APOCALYPSE

Apart from the works already named, mention must be made of those of Cassiodorus (*Commentaries in Apocalypsin* [ed. S. P. Maffey, Florence, 1721]), Bede (c. 735; *explanatio apocalypsis in Biblioth. Pat.*, Cologne, vol. 5), and Androsius Anstetius (c. 770; *in Apocalypsin* [ed. R. L. F. F.], vol. 3). Theopandus, in turn, on Anstetius' account (Migne, *Pat. Lat.*, 100) and Raymo of Halberstadt (1041) (Migne, *Pat. Lat.*, 110) depends on Haymo. To the same class of interpretations belong the predilections of Anselm of Laon (Migne, 102), Bruno of Asti (Migne, 103), Rupert of Deutz (Migne, 109), Richard of St. Victor (Migne, 108), Albertus Magnus (*Opuscula*, Lyons, 1601, tom. 12), a commentary, probably in reality of Willemstad origin, which is found, in two recensions, among the works of Thomas Aquinas (*Opera*, Friburg, 1890; tom. 23, 34 ff., 312 ff.), Hugh of St. Caro (1261; *Postillae*, Douai, 1615, 1618, 1619), and thus the single commentary of 1100 continued to dominate the whole interpretation of the Apocalypse until far down in the Middle Ages.

The next interpreter of the Apocalypse to attain wide influence was Joachim of Floris (c. 1135).

19. Joachim. *Epistola . . . abbatis Joachimi in Apoc.* (Venice, 1527). With him the fantastic futurist (chilist) interpretation began to gain the upper hand over the formerly prevalent spiritualising view. He was at the same time the originator of a 'recapitulation theory', which he carried out into the minutest details. As 'the Age of the Spirit,' associated with a messianic order that was to appear, occupied a central place in the prophecies of Joachim, he naturally became the prophet of the 'opposition' Franciscans, and his works were accepted by them as sacred. It was in these circles accordingly that his immediate followers in the interpretation of the Apocalypse arose (Peter Johannes Oliva, Albertus de Casale, Seraphinus de Fermo, Amicus Viterbiensis, Petrus Galatinus); but his influence spread very widely in the course of succeeding centuries, and a continuous chain of many links connects the name of Joachim with that of Cocceus, who, in virtue of his *Capitulum de apoc.* (S. Joannis) (Leyden, 1603), is usually taken as the typical representative of the modern 'recapitulation theory.'

Among the precursors of the Reformation the anti-Roman and anti-papal interpreters began to appear.

20. Reformation. ground, although not only methodical exposition of this view that can be named is the commentary (by John Purvey?) emanating from Wycliffite circles and written in 1390, which was afterwards published by Luther (*Commentarius in Apoc.*, ante centum annos editus, 1530).

The founder of a consistently elaborated universal-historical interpretation was Nicolaus de Lyra (1320).

21. Universal-historical method. In the *Postillae*, which have been often printed. He is followed by certain Catholic interpreters, and, in method at least, by Luther, who in his preface of 1534 (Walch, II) gives, in the space of a few pages, a clever but fantastic interpretation of the entire book, in which, as might be expected, the anti-papal interest holds a central place. Luther's view continued to dominate the interpretation of the Apocalypse within the Lutheran church.

It prevailed from the time of Lucas Osiander (*Bibliotheca sacra*, pars 3) down to that of Jos. Gerhard (*Comment. in Apoc. Joh.*, Jena, 1749) and Vir. Calvisius (*Biblioth. Sacra*, Part. II, 1750, tom. 2, Frankfurt, 1772). A learned work with valuable introductory material and persistent polemic against Hugo Grotius; for a list of the commentaries dependent on Luther see Bousset, *Komm.* 92. None of the works mentioned was of any value for the real interpretation of the book; the Apocalypse and its interpretation, so far as the Lutheran Church in Germany is concerned, became merely the arena for anti-Catholic polemics.

Within this period the number of works produced in Germany and Switzerland on this subject without dependence on the dominant Lutheran view was very small.

Among them the *Polycentum atque expositio expositio libri Apoc. Joh.*, 1547, of Theodor Biliander is worthy of notice, in it we can discern in the treatment of chaps. 12 and 13 the influence of Wycliffe's own interpretation of Rev. in the *Postillae* in Neander, *KG* 6.225.

APOCALYPSE

beginning of an interpretation looking to contemporary conditions. Bullinger (*Interpretation*, 1897) and James (*Apoc. John*, 1890) have a good deal in common with the founder.

Wildt and most fantastic of all are the English commentaries of this period.

Among them may be named Napier of Merchiston, the inventor of logarithms (*Apoc. John*, 1593), Thomas Brightman (*Apoc. John*, 1601), Thomas Mede (*Apoc. John*, 1627), Joseph Mede (*Apoc. John*, 1676), and John Newton (*Apoc. John*, 1704). The *Apoc. John* of 1704 is a map about upon Mede.

The history of a strictly scientific interpretation of the Apocalypse, on the other hand, must be held to begin with the learned commentaries of French and Spanish Catholic theologians.

22. Scientific. They meet the Protestant polemic with conspicuous and indeed often astounding erudition, and, going back to the point of view of the earlier Church fathers, lay the foundations of a cautious and for the most part purely eschatological interpretation.

To this connection the works of Francisus Ribera (1578), Hieronymus Vassier (1603), Bellarmine, *De Symbolo Pontificis*, his treatise *De Antichristo*, Benedictus Perreye (1606), and Cornelius a Lapide (1609) are well worthy of mention.

Conspicuous above them all is the *Verlegung und Anweisung in Apokalypsa* of Ludovicus de Alazar. That writer was the first to carry out consistently the idea that the Apocalypse in its earlier part is directed against Judaism, and in its second against Paganism, so that in chaps. 12-17 we read of the first persecution of the Christians in the Roman Empire, and in ch. 19 of the final conversion of that Empire. He thus presents us with the first serious attempt to arrive at a historical and psycho-historical understanding of the book.

The idea worked out by Alazar had already been expressed by Hieronymus in the preface to his edition of *Arctas* (*Arctas Commentarius*, ed. Morenus et Huterius 2), and by Salmeron (*Opera*, 14, Cologne, 1514, 'In scriptum Jo. Apoc. prophetia'). Though to be added here that the explanation of the wounded head as referring to Nero Redivivus is found for the first time since Victorinus in the commentary of the Jesuit Juan Mariana. It is to the Jesuits that Protestant science first learned how to work this field.

Victorinus (*Innot. ad A.P.*, Paris, 1664), who is so often spoken of as the founder of scientific exegesis, is, in his remarks on the Apocalypse at any rate, entirely dependent on Alazar, whose interpretation, indeed, he has not improved by the details assuming references to universal history and contemporary events which he has introduced into it.

Corotius in turn was followed by Hammond (op the Latin editions of Clericus, 1601, 1, Amsterdam, 1693, and Clericus's notes, 1, Hammond, Bossuet (1631), and Hervaeus (1684). In Holland and Germany the fantastic school of interpretation continued to flourish for some time longer, prominent representatives being, in Holland, Veringa, with his profoundly learned *ἀποκαλύπτει ἀποκαλύπτει* (1705); dependent on Mede, and his many followers, and in Germany, Bengel, with his commentary (1705-46-53) and sixty practical discourses on the Apocalypse. Much greater sobriety is shown by Joh. Mark in his *In Apoc. Comm.* (1693), with its copious exegetical material and valuable introduction; also by a group of eschatological interpreters in which are included Flemona Peters (1696), Antonius Priessen (1717), and Joachim Lange (*Apokalypstischer Traktat*, 1717).

In the eighteenth century, although Aubert de Versee (*La clef de l'Apocalypse*, 1703) followed the lines laid down by Corotius, Hammond, and Bossuet, the interpretation founded on allusions to contemporary events gained the ascendancy, and in a very narrow form. At this period it took for the most part the very unfortunate course of endeavouring to treat the whole of the Apocalypse, after the analogy of Mt 24, as a prophecy of the destruction of Jerusalem.

In this category must be placed the expositions of Alonzi (*Dei suo Apoc.*, 1713), Harduin (1741), Weistien (*Libellus ad vnam alicuius interpretationem*, 3rd ed., Semler, 1766), Harenberg (1753), Hartwig (op 40), and, finally, Züllig (1834).

On the other hand, we find much that is rightly said in Semler's notes to Weistien in Corotius's *Gesch. des Chiliasmus*. And a return was made to the sounder general principles of Alazar by Herrenscheider

APOCALYPSE

(*Unvorgedrachte*, Strassburg, 1780) and by Eichhorn (*Commentarius*, 1781). Even those streaks of the interpretation that looks to universality, which had still persisted in showing the universality of the work, were now stripped away, and thus a provisional resting place was reached.

This stage is seen in the works of Bleek (*Apoc. John*, 1812), Baumgarten-Crusius (*Apoc. John*, 1813), Eichhorn (*Apoc. John*, 1813), and Eichhorn (*Apoc. John*, 1813). The *Apoc. John* of 1813 is a map about upon Mede.

In all these works the interpretation from contemporary history is consistently carried out. All set forth from the decisive chapter 11 that in chap. 11 the preservation of the temple is predicted, and all, accordingly, date the book from before 70 A.D. Further, they all rightly recognise that the main drift of the Apocalypse is directed against Rome, all too except Dusterdieck, recognise Nero Redivivus in the wounded head. In particular, since the discovery, independently arrived at by Fritzsche, Baur, and Renss, that the number 666 is intended for 667, the reference to Nero has become the *raison d'être* of all exegesis of the Apocalypse.

In passing, mention may be made of some works which, although following obsolete exegetical methods, are not without scientific value. Hengstenberg (*Apoc. John*, 1820), Elberfeld (*Apoc. John*, 1821), and Elberfeld (*Apoc. John*, 1821). The *Apoc. John* of 1821 is a map about upon Mede.

The interpretation of the Apocalypse entered on a new phase¹ as soon as doubts arose regarding the unity of the work and the method of literary criticism to be applied. The conjecture, which had been hazarded more than once,² that the Apocalypse was really a composite work was again taken up independently (1) by Daniel Volter, at the suggestion of Weizsäcker, whose pupil he was. The particular hypothesis put forth by Volter³ as to the composition of the Apocalypse may for convenience be called the redaction hypothesis (*Ueberarbeitungs-Hypothese*).

He assumed in his first sketch, which he has not substantially modified, a fundamental text (*Grundchrift*) consisting (apart from single verses) of 14:1-17:18, 19:1-20:1, 21:1-22:1, 23:1-24:1, 25:1-26:1, 27:1-28:1, 29:1-30:1, 31:1-32:1, 33:1-34:1, 35:1-36:1, 37:1-38:1, 39:1-40:1, 41:1-42:1, 43:1-44:1, 45:1-46:1, 47:1-48:1, 49:1-50:1, 51:1-52:1, 53:1-54:1, 55:1-56:1, 57:1-58:1, 59:1-60:1, 61:1-62:1, 63:1-64:1, 65:1-66:1, 67:1-68:1, 69:1-70:1, 71:1-72:1, 73:1-74:1, 75:1-76:1, 77:1-78:1, 79:1-80:1, 81:1-82:1, 83:1-84:1, 85:1-86:1, 87:1-88:1, 89:1-90:1, 91:1-92:1, 93:1-94:1, 95:1-96:1, 97:1-98:1, 99:1-100:1, 101:1-102:1, 103:1-104:1, 105:1-106:1, 107:1-108:1, 109:1-110:1, 111:1-112:1, 113:1-114:1, 115:1-116:1, 117:1-118:1, 119:1-120:1, 121:1-122:1, 123:1-124:1, 125:1-126:1, 127:1-128:1, 129:1-130:1, 131:1-132:1, 133:1-134:1, 135:1-136:1, 137:1-138:1, 139:1-140:1, 141:1-142:1, 143:1-144:1, 145:1-146:1, 147:1-148:1, 149:1-150:1, 151:1-152:1, 153:1-154:1, 155:1-156:1, 157:1-158:1, 159:1-160:1, 161:1-162:1, 163:1-164:1, 165:1-166:1, 167:1-168:1, 169:1-170:1, 171:1-172:1, 173:1-174:1, 175:1-176:1, 177:1-178:1, 179:1-180:1, 181:1-182:1, 183:1-184:1, 185:1-186:1, 187:1-188:1, 189:1-190:1, 191:1-192:1, 193:1-194:1, 195:1-196:1, 197:1-198:1, 199:1-200:1, 201:1-202:1, 203:1-204:1, 205:1-206:1, 207:1-208:1, 209:1-210:1, 211:1-212:1, 213:1-214:1, 215:1-216:1, 217:1-218:1, 219:1-220:1, 221:1-222:1, 223:1-224:1, 225:1-226:1, 227:1-228:1, 229:1-230:1, 231:1-232:1, 233:1-234:1, 235:1-236:1, 237:1-238:1, 239:1-240:1, 241:1-242:1, 243:1-244:1, 245:1-246:1, 247:1-248:1, 249:1-250:1, 251:1-252:1, 253:1-254:1, 255:1-256:1, 257:1-258:1, 259:1-260:1, 261:1-262:1, 263:1-264:1, 265:1-266:1, 267:1-268:1, 269:1-270:1, 271:1-272:1, 273:1-274:1, 275:1-276:1, 277:1-278:1, 279:1-280:1, 281:1-282:1, 283:1-284:1, 285:1-286:1, 287:1-288:1, 289:1-290:1, 291:1-292:1, 293:1-294:1, 295:1-296:1, 297:1-298:1, 299:1-300:1, 301:1-302:1, 303:1-304:1, 305:1-306:1, 307:1-308:1, 309:1-310:1, 311:1-312:1, 313:1-314:1, 315:1-316:1, 317:1-318:1, 319:1-320:1, 321:1-322:1, 323:1-324:1, 325:1-326:1, 327:1-328:1, 329:1-330:1, 331:1-332:1, 333:1-334:1, 335:1-336:1, 337:1-338:1, 339:1-340:1, 341:1-342:1, 343:1-344:1, 345:1-346:1, 347:1-348:1, 349:1-350:1, 351:1-352:1, 353:1-354:1, 355:1-356:1, 357:1-358:1, 359:1-360:1, 361:1-362:1, 363:1-364:1, 365:1-366:1, 367:1-368:1, 369:1-370:1, 371:1-372:1, 373:1-374:1, 375:1-376:1, 377:1-378:1, 379:1-380:1, 381:1-382:1, 383:1-384:1, 385:1-386:1, 387:1-388:1, 389:1-390:1, 391:1-392:1, 393:1-394:1, 395:1-396:1, 397:1-398:1, 399:1-400:1, 401:1-402:1, 403:1-404:1, 405:1-406:1, 407:1-408:1, 409:1-410:1, 411:1-412:1, 413:1-414:1, 415:1-416:1, 417:1-418:1, 419:1-420:1, 421:1-422:1, 423:1-424:1, 425:1-426:1, 427:1-428:1, 429:1-430:1, 431:1-432:1, 433:1-434:1, 435:1-436:1, 437:1-438:1, 439:1-440:1, 441:1-442:1, 443:1-444:1, 445:1-446:1, 447:1-448:1, 449:1-450:1, 451:1-452:1, 453:1-454:1, 455:1-456:1, 457:1-458:1, 459:1-460:1, 461:1-462:1, 463:1-464:1, 465:1-466:1, 467:1-468:1, 469:1-470:1, 471:1-472:1, 473:1-474:1, 475:1-476:1, 477:1-478:1, 479:1-480:1, 481:1-482:1, 483:1-484:1, 485:1-486:1, 487:1-488:1, 489:1-490:1, 491:1-492:1, 493:1-494:1, 495:1-496:1, 497:1-498:1, 499:1-500:1, 501:1-502:1, 503:1-504:1, 505:1-506:1, 507:1-508:1, 509:1-510:1, 511:1-512:1, 513:1-514:1, 515:1-516:1, 517:1-518:1, 519:1-520:1, 521:1-522:1, 523:1-524:1, 525:1-526:1, 527:1-528:1, 529:1-530:1, 531:1-532:1, 533:1-534:1, 535:1-536:1, 537:1-538:1, 539:1-540:1, 541:1-542:1, 543:1-544:1, 545:1-546:1, 547:1-548:1, 549:1-550:1, 551:1-552:1, 553:1-554:1, 555:1-556:1, 557:1-558:1, 559:1-560:1, 561:1-562:1, 563:1-564:1, 565:1-566:1, 567:1-568:1, 569:1-570:1, 571:1-572:1, 573:1-574:1, 575:1-576:1, 577:1-578:1, 579:1-580:1, 581:1-582:1, 583:1-584:1, 585:1-586:1, 587:1-588:1, 589:1-590:1, 591:1-592:1, 593:1-594:1, 595:1-596:1, 597:1-598:1, 599:1-600:1, 601:1-602:1, 603:1-604:1, 605:1-606:1, 607:1-608:1, 609:1-610:1, 611:1-612:1, 613:1-614:1, 615:1-616:1, 617:1-618:1, 619:1-620:1, 621:1-622:1, 623:1-624:1, 625:1-626:1, 627:1-628:1, 629:1-630:1, 631:1-632:1, 633:1-634:1, 635:1-636:1, 637:1-638:1, 639:1-640:1, 641:1-642:1, 643:1-644:1, 645:1-646:1, 647:1-648:1, 649:1-650:1, 651:1-652:1, 653:1-654:1, 655:1-656:1, 657:1-658:1, 659:1-660:1, 661:1-662:1, 663:1-664:1, 665:1-666:1, 667:1-668:1, 669:1-670:1, 671:1-672:1, 673:1-674:1, 675:1-676:1, 677:1-678:1, 679:1-680:1, 681:1-682:1, 683:1-684:1, 685:1-686:1, 687:1-688:1, 689:1-690:1, 691:1-692:1, 693:1-694:1, 695:1-696:1, 697:1-698:1, 699:1-700:1, 701:1-702:1, 703:1-704:1, 705:1-706:1, 707:1-708:1, 709:1-710:1, 711:1-712:1, 713:1-714:1, 715:1-716:1, 717:1-718:1, 719:1-720:1, 721:1-722:1, 723:1-724:1, 725:1-726:1, 727:1-728:1, 729:1-730:1, 731:1-732:1, 733:1-734:1, 735:1-736:1, 737:1-738:1, 739:1-740:1, 741:1-742:1, 743:1-744:1, 745:1-746:1, 747:1-748:1, 749:1-750:1, 751:1-752:1, 753:1-754:1, 755:1-756:1, 757:1-758:1, 759:1-760:1, 761:1-762:1, 763:1-764:1, 765:1-766:1, 767:1-768:1, 769:1-770:1, 771:1-772:1, 773:1-774:1, 775:1-776:1, 777:1-778:1, 779:1-780:1, 781:1-782:1, 783:1-784:1, 785:1-786:1, 787:1-788:1, 789:1-790:1, 791:1-792:1, 793:1-794:1, 795:1-796:1, 797:1-798:1, 799:1-800:1, 801:1-802:1, 803:1-804:1, 805:1-806:1, 807:1-808:1, 809:1-810:1, 811:1-812:1, 813:1-814:1, 815:1-816:1, 817:1-818:1, 819:1-820:1, 821:1-822:1, 823:1-824:1, 825:1-826:1, 827:1-828:1, 829:1-830:1, 831:1-832:1, 833:1-834:1, 835:1-836:1, 837:1-838:1, 839:1-840:1, 841:1-842:1, 843:1-844:1, 845:1-846:1, 847:1-848:1, 849:1-850:1, 851:1-852:1, 853:1-854:1, 855:1-856:1, 857:1-858:1, 859:1-860:1, 861:1-862:1, 863:1-864:1, 865:1-866:1, 867:1-868:1, 869:1-870:1, 871:1-872:1, 873:1-874:1, 875:1-876:1, 1283:1-1284:1, 1285:1-1286:1, 1287:1-1288:1, 1289:1-1290:1, 1291:1-1292:1, 1293:1-1294:1, 1295:1-1296:1, 1297:1-1298:1, 1299:1-1300:1, 1301:1-1302:1, 1303:1-1304:1, 1305:1-1306:1, 1307:1-1308:1, 1309:1-1310:1, 1311:1-1312:1, 1313:1-1314:1, 1315:1-1316:1, 1317:1-1318:1, 1319:1-1320:1, 1321:1-1322:1, 1323:1-1324:1, 1325:1-1326:1, 1327:1-1328:1, 1329:1-1330:1, 1331:1-1332:1, 1333:1-1334:1, 1335:1-1336:1, 1337:1-1338:1, 1339:1-1340:1, 1341:1-1342:1, 1343:1-1344:1, 1345:1-1346:1, 1347:1-1348:1, 1349:1-1350:1, 1351:1-1352:1, 1353:1-1354:1, 1355:1-1356:1, 1357:1-1358:1, 1359:1-1360:1, 1361:1-1362:1, 1363:1-1364:1, 1365:1-1366:1, 1367:1-1368:1, 1369:1-1370:1, 1371:1-1372:1, 1373:1-1374:1, 1375:1-1376:1, 1377:1-1378:1, 1379:1-1380:1, 1381:1-1382:1, 1383:1-1384:1, 1385:1-1386:1, 1387:1-1388:1, 1389:1-1390:1, 1391:1-1392:1, 1393:1-1394:1, 1395:1-1396:1, 1397:1-1398:1, 1399:1-1400:1, 1401:1-1402:1, 1403:1-1404:1, 1405:1-1406:1, 1407:1-1408:1, 1409:1-1410:1, 1411:1-1412:1, 1413:1-1414:1, 1415:1-1416:1, 1417:1-1418:1, 1419:1-1420:1, 1421:1-1422:1, 1423:1-1424:1, 1425:1-1426:1, 1427:1-1428:1, 1429:1-1430:1, 1431:1-1432:1, 1433:1-1434:1, 1435:1-1436:1, 1437:1-1438:1, 1439:1-1440:1, 1441:1-1442:1, 1443:1-1444:1, 1445:1-1446:1, 1447:1-1448:1, 1449:1-1450:1, 1451:1-1452:1, 1453:1-1454:1, 1455:1-1456

APOCALYPSE

supposition of a Jewish origin. As he nevertheless continued to be convinced of the essential unity of the book, he inferred that in the form in which we now have it it is a *Christian redaction of a Jewish writing*. To the Christian redactor, besides isolated expressions, he attributed the following passages: 1-3:5-14:7, 15:1-12:13, 14:1-15:8, 16:1-17:1, 19:1-20:1, 21:1-22:1.

Vischer's able treatise found wide acceptance. Among those who signed their acceptance of his main thesis were Tschann (*Die Offenbarung des Johannes*, 1873), Apokalypsischen Studien (an anonymous writer in *Die Offenbarung*, 1887), Overbeck in *Die Offenbarung*, 1875, p. 25, 63; Menegor in *Rev. de théol. et phil.*, 1877, p. 101; Kroger in *Ev. l.*, 1887, pp. 26-35; Simon in *Ev. l.*, 1887, p. 187. On the other hand, Volter (*Die Offenbarung des Johannes*, 1880), Heyshlag (*St. A. v. 1880*), and Hagedorn (*Die Offenbarung*, 1880) sided themselves against it.

Although it must be cordially acknowledged that to Vischer belongs the honour of having first raised the question in its entirety, it must be said that he was not successful in his attempt to solve it. He has neither proved the Jewish character of chap. 11, nor justified his fundamental thesis regarding the unity of the book. We shall be doing him no injustice if we classify him among those who uphold the 'redaction' hypothesis.

The earliest exponent of the 'sources' hypothesis (*Quellen Hypothese*), which has lately come into competition with that of redaction, was Weyland, who wrote almost contemporaneously with Vischer (*Die Offenbarung*, 1880, pp. 451-470; and *Untersuchung in Compilativem Charakter des Apokalypsischen*, 1888). Weyland finds in the Apocalypse two Jewish sources (S and Q) which have been worked over by a Christian redactor.

R corresponds, roughly, to Volter's primary document; Q to the second of Volter's redactions (in Volter's Appendix R and Q are separated). Weyland's Christian redactor corresponds in a general way with Vischer's redactor. In 1894 Rauh (*Die Offenbarung*, 1894) signified his adherence to Weyland.

Against both the hypotheses we have just described serious and far-reaching objections present themselves.

27. Objections. Against the 'sources' hypothesis must be urged, in substance, the linguistic unity of the book (see below, § 34); against the redaction theory it has to be observed (a) that the fundamental document made out by Volter and his followers (see above, § 25) has no special character of its own, inasmuch as all the really living and concrete passages occurring within it are attributed to the redactor; (b) that the disappearance of every trace of these numerous literary redactions is remarkable.

From such considerations the necessity for a third way became apparent. This third way was first pointed out by Weizsäcker in his *Apokalypsis*, 1890. He rightly discerned in the

28. Fragment hypothesis. Apocalypticist's three repeated number of seven the fixed plan of an author who wrote the Apocalypse as a whole, and gave to his work the character of a literary unity. Into this literary unity certain interpolations intrude with disturbing effect (7:1-2; 17:11-13; 12:1-13:17). Thus Weizsäcker arrived at his fragment hypothesis. According to him the Apocalypse is a literary unity proceeding from a single author, into which, however, apocalyptic fragments of various date have been introduced by the author himself. In the opinion of the present writer these are the lines along which the true solution of the problem is to be sought. All later investigators in this field have followed one or other of the three hypotheses just enumerated.

Oskar Holtmann (*Die Offenbarung*, 1896) assumes a Jewish groundwork into which again a still older source (13:14-15) has been worked in a Christian revision. Pfeiderer (*Die Offenbarung*, 1897, pp. 100-101) takes another course; Sabatier (*Les origines littéraires de l'Apocalypse*, 1897) and Schoen (*Le régime de l'Apocalypse*, 1897) represent a combination of Weizsäcker and Vischer (regarding the Apocalypse as the work of a Christian author who has embodied Jewish fragments in his book).

APOCALYPSE

A thoroughly elaborated 'sources' theory is that of Spitta (*Offenb. Joh.*, 1884). In diametrical opposition to Weizsäcker, he claims to see, in the

29. Spitta. three repeated series of seven, three sources.

These are (a) the seal source or Christian primitive Apokalypsis (1-11 apocalyptic), written soon after to A.D. (probably, apart from the specifically Christian interpolations of the redactor, chaps. 1-6 and 7:1-7:8; 19:1-19:22; 21:1, 6-7); (b) the trumpet source (12-14), a Jewish writing (1-11), of the reign of Caligula (67-68 A.D.); (c) the vials source (15-16), of the time of Pompey (containing, approximately, the remainder of the book).

These three have been worked together into a collected whole by a Christian redactor. (The additions assigned to him by Spitta are of about the same extent as those assigned to him by Vischer.)

The sources theory was next carried to the utmost by P. Schmidt (*Untersuchungen über die Compilativität der Offenbarung*, 1891).

Fries (*Die Offenbarung*, 1891) in his separation of the literary sources agrees in the main with O. Holtmann, but also maintains with Volter (whose hypothesis he simplifies) the thoroughly Christian character of the whole book. Bousset (*Der Antichrist in der Offenbarung*, 1892) pursues a path of his own. Menegor (*Commentaire de l'Apocalypse*, 1893, 1:1-1:11, pp. 47-48) assumed two Jewish apocalypses and a Christian redactor.

The unity of the book is defended by certain scholars: Not only by the time of Vischer mentioned above, but also by B. Weiss (*Offenb. Joh.*, 1891), and E. H. Reuss (*Die Offenbarung*, 1891), Bousset (*Der Antichrist in der Offenbarung*, 1892), Hirsch (*Die Offenbarung*, 1892), and H. Holtmann (*Die Offenbarung*, 1896).

Finally, altogether new lines of investigation were opened up by Gunkel in his *Schöpfung und Chaos* (1901). He

30. Gunkel. controverted sharply, and sometimes perhaps not altogether fairly, both the current methods of interpreting the Apocalypse (that which looks to contemporary history for a clue, and that which adheres to literary critical methods), and proposed to substitute for them, or at least to co-ordinate with them, a history of apocalyptic tradition. He insisted with emphasis upon the thesis that the conical Apocalypticist was not himself the creator of his own representations, that his prophecies were only links in a long chain of tradition. In his investigation of this apocalyptic tradition he greatly enlarged the scope of the usual question 'Jewish or Christian?' by his endeavours to prove for chap. 12 a Babylonian origin, and in other places also (see below, § 40) to trace Babylonian influences in the book. Even if we grant that Gunkel has often overshot the mark, as, for example, when he refuses to recognise Nero in the beast and its number it is undeniable that his book marks the beginning of a new epoch in the interpretation of the Apocalypse.

Stimulated by Gunkel, and accepting some of his results, Bousset (*Der Antichrist in der Offenbarung des Judentums, des neuen Testaments, und der neuen Kirche*, 1895) proceeded

31. Bousset. to illustrate Gunkel's method by applying it to a definite concrete example, investigating the entire tradition regarding Antichrist, and endeavouring to show that in this instance a stream of essentially uniform tradition can be traced from New Testament times right through the Middle Ages and beyond them. In his view the Apocalypse can be shown to be dependent in a series of passages, particularly in chap. 11, on this already ancient tradition regarding Antichrist.

This view has been controverted by F. E. (Theologische Zeitschrift und die theologischen Wissenschaftlichen Predigerzeitung, 1902, 4, Freiburg, 1902, 1903), who, as against it, advocates for the contemporary day method in its most perverse form.

Finally, in the *Kritisch-geograph. Kommentar* (1903), Bousset has sought to bring to a focus the results of the labours of previous workers. In his method of interpretation he follows Weizsäcker (fragment hypothesis), and then he gives a continuous commentary, describing the character of each particular fragment in its own place. In his egresses he has given special attention to

APOCALYPSE

[illegible][illegible]

The general style of the Apocalypse is monotonously diffuse: article and preposition are almost always repeated when there are more substantives than one, as also is the governing word before the governed. Whole clauses are gone back upon and repeated in the negative; Hebrew parallelism is not uncommon.

We are now at last able to form a tolerably clear conception of the personality, the time, the circum-

35. **Date.** states, and the literary aims of the apocalyptic who planned the Apocalypse, as a whole, in the form in which we now have it.

(a) The Apocalypticist writes at a time in which violent persecutions have already broken out—indeed they are beginning to become, so to say, epidemic.

Of the seven churches, four—Ephesus, Pergamum, Smyrna, Philadelphia—are passing through such times of trial. The martyrs already form a distinct class in the general body of believers. They are destined to have part in the first resurrection before the thousand-years reign begins (20.4 ff., esp. 7.9 ff.). The sea-bellows then under the altar (6.9 ff.). All through the book this time of struggle is kept in mind (13.1 ff., 14.1 ff., 16.6 ff., 17.8 ff., 20.2-4).

(8) The Apocalyptic predicts a still tougher and more strenuous struggle.

In this struggle the predestinated number of martyrs is to be fulfilled (6:4, 9). Philadelphia is to be preserved in this last great tribulation (6:10) (cf. the *μεγάλη θλίψις* of 7:14). This time is not far off; the martyrs who have already suffered are hidden and live only a little longer (6:11). Therefore, "Blessed are they that die in the Lord from henceforth" (*ἄν' ἄρτι*; 14:13).

(c) This struggle turns, and will in the future turn, upon the worship of the beast. That this beast is in one sense or another the Roman Empire, or some

with the Jews, and another, the Roman Empire, or connected with it, is admitted on all hands. It is important, however, to consider the grounds on which the Apocalypse opposes Rome. Rome's horrible deed is not, as might perhaps be guessed, the destruction of Jerusalem, nor

the emperor's question, the deification of Terentianus, nor yet – in the first instance, at least – the Verulam persecution, but the worship of the beast – i.e., Caesar-worship (cp. 13.149 ff., 160 ff., c. 176.191 ff., 204 ff.) (cp. Mommsen, *Röm. Gesch.* § 55 n. 3). What the

200

(6) The *contractio ad sensum* is specially frequent (e.g., 17, 17, 36, 12, 1, 9, 9, 11, 11, 11, 13, 17, 17, 10, 19, 14); sometimes involving a plural predicate after a neuter plural object (32, 2, 18, 9, 11, 9, 20, 11, 13, 13, 14, 18, 1, 21, 4), less clearly attested is the simple ungrammatical confusion of gender (9, 7, 14, 9, 19, 20, 21, 14, 22, 21; see the MSS.).

(2) Various other systematic peculiarities of idiom. For example, *παροικία* governs the dative when the object is *ἐν* (110.7, 111.1, 119.4, 220, cp 147) or *δρακμή* (134), whilst, on the other hand, we have *παρεν* to *θηναίων*, *τῆς ἐκκλησίας*, (131) 112.15, 113.1, 119.1, 120.4 (in 162 also we should read *τῆς ἐκκλησίας* accord-

¹ A justification of these results in detail will be found in the author's Commentary on this book (Introd. pp. 13-208). In some cases, where the reading adopted is less strongly attested, the citations are in brackets.

book predicts is the great conflict about to break out all over the world between Christianity on the one hand and the Roman Empire (with the Roman state religion, the worship of the emperors) on the other (cp. ANTI-NRST, § 7).

(f) This great battle will begin with the return of Nero Redivivus.

In common with the rest of the men of his day, the Apocalyptic shares the popular expectation of the coming again of that emperor. Nero is (13:12-14) the head that was wounded to death and afterwards healed. He is only 'as it were' (καὶ ὡς) slain, like the lamb (6:16). For as the latter continues to live on in heaven, so does Nero prolong a shadowy existence in hell. Out of the abyss (17:8) he will again return, and as Roman Emperor demand adoration. Then will be the days of the great future struggle. Hence the name of the beast is *εὐρώπαιος*, ὁ βασιλεὺς (cp. ANTI-NRST, § 13).

(g) Thus the date of the Apocalypse admits of being approximately determined. The end of the first century is already sufficiently indicated by the fact that the Apocalyptic expects the return of Nero from hell (Th. Zahn, 'Apocd. Stud.' in ZKNT, 1885, pp. 561-76, 1886, pp. 337-52, 393-495; see below, § 45). The following consideration points to the same inference. Behind the Apocalyptic in point of time there already lies a great persecution. He himself is again living in times of persecution, and is expecting worse to come. Inasmuch as the former persecution must be assumed to be the Neronian, we are compelled to carry the Apocalypse down to the later period of Domitian. When we do so the fact that 11:1 ff. points to a time before the destruction of Jerusalem need not cause us any misgiving; doubtless the passage comes from an earlier source. On the other side we should be able to fix an inferior limit for the date, could it be shown that the epistles were already known to Ignatius (see above, § 2). The date thus indicated—the close of the first century—was in point of fact the date at which, it would seem, the general persecutions of the Christians, turning substantially on the rendering of divine honour to the emperor, first broke out (see CHRISTIAN, § 6). The Apocalypse, as we now have it, presupposes conditions very similar to those which we meet in the well-known correspondence between Pliny and Trajan. In this it is not implied that the Apocalypse could not have been written some ten years or more earlier.

In the conclusion just indicated we find ourselves in agreement with the best attested tradition as to the date of the writing of the Apocalypse.

According to Irenaeus (c. 180-2; cp. v. 20-5), the Apocalypse was 'seen' at the close of Domitian's reign at Pannos, and therefore, of course, to say the least, not written earlier (cp. Viet, Petron, Comm. on Apoc. 10:11; Eus. HE, iii, 18:13; Jer. De vir. illis, 9; Sulp. Sev. Chron. 2:11). A different tradition is met with, it is true—perhaps in Tertullian, who (*De praescr. Haer.* 36) mentions the martyrdom of John (by boiling oil—a death from which he was miraculously delivered), and his subsequent banishment, in connection with the martyrdoms of Peter and Paul (but see, on the other hand, *Scorpia*, 15). It is certain that at all events Jerome (*Adv. Jovin.* 1:26 [2:16]) understood Tertullian as assigning this martyrdom and banishment of John to the reign of Nero (cp. Eus. *Dem. Evang.* 3; the superscription of the Syriac translation of the Apocalypse edited by Ludovici de Dieu; the Gnostic *Acts of John*; Theophylact (who gives the date as thirty-two years after the Ascension; cp. the notes of some of the Greek cursives of the Fourth Gospel; thirty years after the Ascension, under Domitian (?); Erbes, 43). Finally, Epiphanius (*Haer.* 51:12-13) will have it that the book was written under Claudius. The same statement occurs in the Commentary of Aprinthus (upon whom see Bonset, *GG.V.* 1895, p. 2), whence it found its way into that of Beatus (ed. Florez, 35).

The Apocalypse is distinguished from the apocalyptic literature of Judaism from the time of the book of Daniel onwards by the high prophetic consciousness which it displays.

36. Personality of Apocalypticist.

The Apocalyptic as he stands at one of the turning-points of the world's history looks with a clear eye into the future and feels himself to be a prophet. He is a Christian of an especial type. For the prophets are servants of God in a peculiar sense (1:10; 11:18; 22:6); they are the fellow-servants of the angels (22:3); other Christians are so only in so far as they follow the revelation of the prophet.

(22:6). God is master of the spirits of the prophets (22:6 cp. 17:17; 19:10). Hence the author directly claims for his work the rank of a sacred book. It is intended from the first to be publicly read (1:3); those who hear it and obey what is written therein are blessed (1:3; 22:7), and whosoever adds to or takes away from it falls under the most grievous curse (22:18). The frequent mention of the prophets along with the saints (7:13; Christians in general) (see 11:12; 16:9; 18:20-24) is a proof, not, as many critics have supposed, of the Jewish, but of the Christian, origin of the related passages. The Apocalypse in this respect was the forerunner of Montanism, and it is no matter for surprise that it was specially valued in Montanistic circles. It is also noteworthy that the Apocalyptic speaks to his own age and time. Whilst Daniel is represented as receiving, at the close of his vision, the command to seal the book for long, here in sharp contrast we read (22:3): 'Seal not up the words of the prophecy.' The Apocalyptic seems to have been a Jewish-Christian of universalist sympathies. For him the name of Jew is a name of honour (2:9, 30); he seems to uphold a certain prerogative for the Jewish people (7:1-3; 11:1-12; 20:7 ff.). He shows himself intimately familiar with the language of the O.T.

Into the apocalyptic unity thus defined, isolated fragments have been introduced in a manner which cannot still be more or less clearly detected.

37. Details of criticism. Of these the more important at least must now be discussed, and some detailed account of the more noteworthy results of criticism given.

Of recent critics the majority (Vischer, Volter, Weyland, Pfeiderer, O. Holtzmann, Schmidt) regard

38. Chaps. 1-6. 1-3) as having been originally separate from the rest of the book and as having been prefixed only after the Apocalypse had in other respects assumed its present form; but Spitta has shown good grounds for believing that chaps. 1-3 and 4-6 ought not to be separated, and (as against Vischer and others) has established for the whole of chaps. 4-6 that Christian character which unquestionably belongs to 5:6 ff. Thus Spitta takes chaps. 1-6 as a single original document (Christian primitive apocalypse = U).

He seeks to prove this by pointing out that there is a definite close at the end of 6, and a fresh beginning of a new apocalypse in 7:1 (so also P. Schmidt). But the sixth seal (6:12 ff.) does not represent the final catastrophe; it only pictures a great earthquake in the typical apocalyptic manner. In 6:15 ff. the end is still to come, and if, with Spitta, we pass on to 7:1-17 immediately after 6:17, any representation of the end of all things has completely disappeared from our reconstructed Apocalypse. In any case, it is impossible that one should fail to recognise an interpolated fragment in the short passage (6:9-11) relating to the fifth seal. We have an exact parallel to it in 4 Esd. 4:35 (cp. also *Ethiop. Enchir.* 47). And the tradition of 4 Esd. must be regarded as the original one. It speaks quite generally of a predestined number of the righteous which has to be fulfilled before the coming of the end, whilst in the Apocalypse the conception is applied to the predestined number of the martyrs—a modification which can be explained very easily by his general position (see above, § 35).

Spitta's view that 7:1-8 constitutes a fresh beginning, which has nothing to do with the preceding chapters,

39. Chap. 7:1-8. is certainly correct; but neither has the passage anything to do with that which follows it (7:9-17); as to this practically all critics are agreed. These facts, however, will not justify us in attributing 7:9-17 to the redactor (as do Volter, Vischer, Pfeiderer and Schmidt), nor yet in carrying out a system of deletions in chap. 7 (as do Erbes, Weyl, Ranch) until the two disparate sections have been brought into harmony. Our proper course is to recognise (cp. also Spitta) in 7:1-8 an interpolated fragment—probably Jewish.

The sudden mention of the four winds, which are held by the angels and are nowhere in the succeeding narrative let loose, points to this conclusion, as also does the introduction of the 144,000 Israelites of the twelve tribes—a number which in 14:1 ff. is interpreted in a sense inconsistent with the original intention.

Bonset has hazarded the conjecture that here we have a fragment of the Antichrist legend.

APOCALYPSE

The next passage which presents special difficulties is 11:1-13. Here all critics are agreed in recognising a

40. Chap.

11:1-13. Further, almost all critics agree in regarding chap. 10 as an introductory chapter connected with this fragment. On closer examination it is found, moreover, that 11:1-13 really consists of two smaller fragments: (a) 11:1-6, a prediction of the preservation of the temple, written before the destruction of Jerusalem, and presenting points of contact with 1k 21:2-4; (b) the prophecy relating to the beast and the two witnesses (11:7-13). This latter piece is of an extremely fragmentary and enigmatical character.

Certain matters are introduced without any preparation; the two witnesses, the beast from the abyss, the war of the beast with the witnesses, the plagues and tribes rejoicing over the death of these last. All these are *dispositio monstra* which point to some larger connection.

In this passage, too, Bonsset has sought to show that we have a fragment from the Antichrist legend.

In accordance with Jewish and primitive Christian anticipation the Antichrist is destined to appear as a god-defying ruler in Jerusalem, to lead the people astray and tyrannise over them, and to gather together a great army from all nations. Against him will arise the two prophets Elijah and Enoch, and Israelites not a definite number (71-82) will be converted. A great famine and drought will come. Then Antichrist will put to death the two witnesses, and the end will draw near. It is evident that here we have a coherent tradition, of which some fragments are preserved in chap. 11.

Chap. 12 is the most difficult in the book. It also falls into two sections, 12:1-12 and 12:13-17, and betrays itself as a foreign intrusion both by its unfamiliar character and by its strange and bizarre representations.

41. Chap.

12:1-13. A. Dietrich (Abraxas) was the first who sought to trace in the chapter an adaptation of the myth of the birth of Apollo: he held the pregnant fugitive woman to be Leto, the dragon was the Python, the child (who in the original legend himself slew the Python, Michael being a later introduction) was Apollo. The water which in the Greek myth figured as a protecting power has here become auxiliary to the dragon.

Recently Gunkel, in his *Schöpfung u. Chaos*, has directed special attention to this chapter, and shown that an adequate understanding of it could be arrived at neither on the assumption of a Christian nor on that of a Jewish origin (Vischer, Weyland, Spitta) - that on either hypothesis there remains an intractable residuum, bearing a mythological character. Here, accordingly, as elsewhere in the Apocalypse (cp. the seven angels, stars, candlesticks, torches [EV 'Lumps'], eyes, pp. 294-302; the twenty-four elders, 302-8; Armageddon, 203-06; and p. 325 n. 2; the number 34, pp. 266-70; also chaps. 13 and 17, 379 ff.), he found elements taken from Babylonian mythology, and in particular the myth of the birth of the sun-god Marduk and of the persecution of Marduk by the dragon Tiamat. The difficulty in this construction of Gunkel's is that down to the present date it has been impossible to find in the Babylonian mythology any trace of the myth of the birth and persecution of the youthful sun-god. Bonsset (*Apok.* 410 ff.), however, has called attention to parallels with one chapter in Egyptian mythology (the myth of the birth of Horus).

In the result, there seems much probability in the supposition that chap. 12 embodies a myth of the birth of the sun-god and the persecution of the young child by the dragon, the deity of winter and of night. The Apocalypticist has changed the sun-god, however, into the *παῖς ἡσυχίας* Χριστός, the persecutor into the devil, and the deliverance of the child into the resurrection to serve the community of this adaptation. In this treatment of the material laid to his hand, he was not able to give full significance to the flight of the woman, which is so prominent a feature in the original myth. This is accordingly only briefly touched on in 12:6; but it receives copious and special treatment in the second half of the chapter (vv. 13-17). Hence the incongruity between 12:1-12 and 12:13-17 which Weissaker pointed out.

APOCALYPSE

What historical occurrence is intended by the flight of the woman in 12:13-17 is not quite clear. Usually the flight is taken as referring to circumstances

42. Chap.

12:13-17. - either to the destruction of Jerusalem or the deliverance of Judaism, or, better, to the flight of the primitive Christian Church.

Kries, who seeks to explain ch. 13 as referring to the Caligula period (see below), interprets the flight and deliverance of the woman in connection with the first persecution of Christians at Jerusalem, strangely taking 17:17, 'the remnant of her seed who hold the testimony of Jesus,' as pointing to the Jews (at the time of the Caligula persecution). Spitta actually takes the persecution of the woman as representing an occurrence in heaven. 'The remnant of the seed of the woman represents, he thinks, the actual Israel as contrasted with the ideal pre-existent Jerusalem (Israel'). Others (Vischer) interpret the remnant as meaning believers as distinguished from the Messiah.

Chap. 13 also contains two passages of a peculiar character - those describing the first beast and the

43. Chap. 13:

second. O. Holtzmann, Spitta, and

the first beast.

Lohs were agreed in recognising here a Jewish (Holtzmann, Spitta) or a Christian (Lohs) source dating from the time of Caligula. Independently of each other, they all (as had already been done by Th. Zahn) accepted the number 666 which is given in some MSS (C, 11, 1600), instead of 606, and interpreted it as meaning *ἑξάς ἑξαράς*. The beast demanding worship, whose image (*εἰκών*) is repeatedly spoken of, is, on this view, the half-mad tyrant Caligula, who in 30 A.D. ordered his procurator, Petronius, to set up his statue in the temple at Jerusalem. Parallels to this prophecy belonging to the same date were found in Mt 21 ('domination of desolation') and in 2 Thess. 2. The 'wound' (*πληγή*) of the beast was interpreted by Spitta as meaning the sickness which befell Caligula towards the beginning of his reign. These conjectures are by no means impossible; but if they are accepted, certain important particulars in the chapter must be deleted - in particular, references to the wounded head of the beast. This and the number 666 (כס"ו) show distinctly that (in its present form) the chapter was intended to be understood of the return of Nero Redivivus. Whether an older source dating from Caligula's time has here been worked over remains doubtful.

As compared with this interpretation, the view which takes the wounded head to be Julius Caesar (Gunkel, Bruston) has little to be said for it - since the number 666 in that case remains unexplained; nor can we reasonably interpret the death-wound to mean the interregnum of Galba, Otho, Vitellius, or refer the number to the Roman empire (*Ἀρετινός*, Diesterdieck; קיסר, Kewale).

Still greater has been the perplexity of interpreters over the second beast. All attempts to make it out to be some definite personality have hitherto been unsuccessful. Bonsset (*Comm. ad loc.*) upholds the view that it is in reality a modification of the older conception of Antichrist, who is here represented as serving the first beast, the Roman emperor, and perhaps is to be interpreted as signifying the Roman provincial priesthood, the active agency in promoting the worship of the emperor.

The objection usually urged against referring the passage to Nero - that the beast whose number is 666 cannot mean Nero the man; that it must mean the Roman empire - is not valid. To the Apocalypticist Nero Redivivus is at the same time the incarnation of all that is dreadful in the Roman empire. 'The number of the beast is the number of a man: cp 17:11, 'and the beast is himself also an eighth' (*καὶ αὐτὸς ὅγδοος ἐστίν*).

Chap. 17 is intimately connected with chap. 13, and this duplicate treatment of the same subjects is in itself proof

45. Chap. 17. sufficient that the Apocalypticist had before him older prophecies, which he has worked over more than once. In this chapter also the reference to the returning Nero is clear. Since Eichhorn, however, it has further been recognised on all hands (cp. De Wette, Bleek, Lucke), and with justice, that the kings with whom the beast returns for the destruction of Rome are

APOCALYPSE

the Parthians, whose satraps might already be regarded as independent kings (Mommson, *Röm. Kaisergesch.* 572). Thus our present chapter also comes into a larger historical connection. As early as the year 69 A.D. a pseudo-Nero had raised commotions in Asia Minor and Greece (Tac. *Hist.* 23 f.; Dio Cassius, 64); Zonaras, 11.13; in the reign of Titus a second pseudo-Nero showed himself on the Euphrates (Zonaras, 11.18) and was acknowledged by the Parthian King Artabanus (Mommson, 551). About 88 A.D. a third pseudo-Nero again made his appearance, also among the Parthians, and threatened the Roman empire (Suet. *Nero*, 50; Tac. *Hist.* 1.2). In this form we find the same expectation also in the fourth Sibylline book, written shortly after 70 A.D. (Sib. *ff.* 119 ff. 137 ff.), and in the oldest portion of the fifth book, written about 74 A.D. (Sib. *ff.* 361 ff.); in the last passage it is associated with a denunciation of Babylon and a prophecy of the rebuilding of Jerusalem (Rev. 18.21); cp. Z. his exhaustive researches (as above, § 33). By both time and place our chapter (perhaps associated with the threatening utterance against Rome and the prophecy of a new Jerusalem) belongs to the same circle of expectations and predictions. It was doubtless written in Asia Minor; but the exact date is disputed.

According to 17 the Apocalypticist represents himself as with 2 under the sixth emperor, five having died and a seventh having yet to come, to be succeeded by the eighth, who is to be one of the seven (Nero). To reckoning, it is possible to begin either with Julius Caesar or with Augustus, to count or not to count the interregnum of Galba-Otho-Vitellius, and finally to ask whether the passage was really written under the sixth emperor, or later, rather, as a *retrodictum ex eventu*, under the seventh or eighth. Thus interpreters have taken the sixth emperor to be now Nero (small, who held the Apocalypse to have been written before 70 A.D.; also Väter), now Vespasian, and, conformably, take the chapter to have been written now under the last-named emperor, now under Titus (the seventh; Weyland) or Domitian, who is then taken, on rationalising lines, as Nero Redivivus (Loes).

The parallels cited above appear to render the reign of Vespasian the most probable date. The writer—probably a Christian—expected after Vespasian a short reign for his successor also. The tradition was that seven Roman emperors were destined to reign. Thereafter Nero was to come back with the Parthians, and, in alliance with these, to take vengeance on Rome, the bloody persecutor of the Christians (17.6); 'with the blood of the saints'; the words 'with the blood of the martyrs of Jesus' appear to be a gloss. The denunciation of Rome (chap. 18) connects itself very well with this prophecy (see Sibyll. 5).

It is further to be noted that chap. 17 has already, in the form in which we now have it, undergone redaction.

On the one hand, Nero is simply the eighth ruler who was one of the seven; on the other, he is the least who comes up from the abyss. On the one hand, he wages war along with the Parthians against Rome; on the other, he wages war along with the kings of the earth against the lamb. In this redacted form (17.12-14 or 15; cp. also Väter) Nero is designated as the dread spectre of the time of the end who comes back from hell. Now, we find the same expectation in chap. 13, where Nero is plainly represented as dead (*ὁ νεκρὸς*), 'as though it had been smitten unto death' and as a counterpart (*Wiederspiel*) of the lamb that had been slain and is to come again. This mode of representing Nero probably comes from the latest redactor. Parallels to it can be found in the later portions of the fifth book of the Sibyllines (33 f. 215-26), and in the eighth book (1-215).

The legend of Nero Redivivus first arose towards the end of the century, a full generation after Nero's death, when he could no longer well be supposed to be still alive among the Parthians (cp. Zahn, as above). Its reception into the Apocalypse supplies one of the elements for determining the date of the book.

Chap. 16.12 ff. (the sixth and seventh vials) also must have originally belonged to chap. 17. In this passage the angel pours out his vial upon the Euphrates, 'that the way may be made ready for the kings from the east' (cp. 9.13 ff., with its reference to the angels bound and loosed at the Euphrates; on which, see Iselin in *Thol. Z. aus der*

APOCALYPSE

Schweiz, 1887, as above, § 25). The representation of the gathering of the kings at Armageddon (Har-Magedon) in this passage is noteworthy; it is not very intelligible, as we read of no mountain of Megiddo, but only of a plain (but see ARMAGEDDON). It recalls the ancient accounts of battles of the gods upon the mountains (Gunkel, *Sibyll.* 263 ff. 389 n. 2).

Chap. 11.14-20 also appears to be an ancient fragment. It thus early sets forth a final judgment by the Son of Man. The passage, however, is so very fragmentary that it is hardly possible for us to make out what its original character may have been (cp. the expression 'without the city' in 11.20). Bousset has sought to explain it by reference to the Antichrist legend.

Fragments of older date seem to have been introduced into the account of the chaining of the dragon, the millennium, the irruption of Gog and Magog (20.1-7), cp. 20.9, *παρευθλή των ἁγίων, πόλις ἡγαγμενη*, and Ethiop. *Ench* 56, *Sibyll.* 3319-3221. The description of the binding and loosing of Satan recalls the Persian legend of the chaining of the dragon Azi Dahak on Mt. Fomayend. Finally, a continuous piece—perhaps of Jewish origin (see 21.2-22.2)—lies before us in the description of the new Jerusalem, 21.2-22.5.

We ought to compare Tob. 13.16 ff., Ps. Solom. 17.23 ff., *Sibyll.* 5217-35, 414-15, and the Hebrew *Apocalypse of Elijah*, edited by M. Bartenweiser, 65-67. In this last-named Jewish source also we find the new Jerusalem coming down from heaven.

To summarise the results of the foregoing analysis: With the conclusion of the epistles to the seven churches

47. Summary. (chaps. 1-3) the Apocalypse, properly so called, begins. Here the first six seals succeed one another uninterruptedly, till the interpolated fragment in 7.1-8 is reached. As a pendant to this fragment, with its distinctly Jewish character, the Apocalypticist prophetically introduces in 7.9-17 a picture of the blessedness of believers from every nation who have come out of the great tribulation. Now follow the seventh seal and, arising out of this, the seven trumpets (chaps. 8-11). Between the sixth and the seventh trumpets the passage 10.1-11.13 has been interpolated. In chap. 10 the Apocalypticist indicates to some extent what the 'disposition' of the remainder of the book is to be (cp. 10.11). It is to be observed that in chaps. 9 ff., in addition to the distribution under seven trumpets, the Apocalypticist has attempted a second under three woes. The first woe answers to the fifth trumpet; the second, the mention of which might have been expected after the sixth trumpet, does not come up until 11.14, after the great interpolation has been reached. The third great woe (which is not expressly named by the Apocalypticist) is doubtless indicated in 12.12. It is hardly likely that we have here a redaction from an older source. Before, then, he comes to the culmination of his prophecy, in chap. 13, the Apocalypticist casts his glance backwards in chap. 12. Borrowing the imagery of an ancient sun-myth, he depicts the birth, persecution, and rescue of the Saviour, and afterwards the persecution of the Church. In chap. 13 he goes on to foretell the coming final struggle, the last great and decisive battle between the faithful ones and the least who demands adoration. For him the supreme crisis of this struggle still lies in the future, when Nero Redivivus is to appear. In the bright picture which he prophetically introduces at 14.5 by way of contrast to chap. 13, he adapts and modifies 7.1-2. 11.1-13 is intended to effect the transition to what follows. 14.14-20 is a smaller interpolated fragment. The great finale remains. The Apocalypticist still had to work in the prophecies contained in chap. 17 f.; by way of introduction to these, chap. 15 f. are given. Then follows, after an intermediate passage (19.1-1), the picture of the final judgment (19.11-218); after which we have a new fragment, 21.9-22.5, followed by the close.

Literature.—The literature of the subject has been indicated in the course of the article.

INTRODUCTORY: The objects and nature of apocalyptic literature (§§ 1-4).

I. APOCALYPSE OF BARUCH.—A composite work derived from at least five authors, written mainly in Palestine, if not in Jerusalem, by Pharisees (ib. A.D. 50-70). Preserved only in Syriac (§§ 5-17).

1. Synopsis of Article. II. Ethiopic Book of Enoch.—Written originally in Hebrew or Aramaic by at least five Assidarian authors (200-400 B.C.) in Palestine. Part I, chaps. 1-36 earlier than 170 B.C.; Part II, chaps. 37-50, 100-161 B.C.; Part III, chaps. 91-104, 114-95 B.C.; Part IV, (the Similitudes) chaps. 37-70, 64-64 B.C.; Part V, (the Book of Celestial Physics) chaps. 72-75, 82, 79; Part VI, (Fragments of a lost Apocalypse of Noah) (§§ 12-13).

III. Slavonic Book of Enoch, or THE BOOK OF THE SECRETS OF ENOCH.—Written by an Alexandrian Jew, mainly from pre-existing materials, about A.D. 150. Eclectic in character; preserved only in Slavonic (§§ 33-41).

IV. ASCENSION OF ISMAEL.—A composite work, written originally in Greek, partly by Jewish, partly by Christian authors, A.D. 150-200. Preserved in Ethiopic and partially in Latin (§§ 12-17).

V. BOOK OF JUBILEES.—Written originally in Hebrew by a Palestinian Jew, a Pharisee of the Pharisees, probably 400-300 B.C. Preserved in Ethiopic and partially in Hebrew, Syriac, Greek, Latin, and Slavonic (§§ 42-47).

VI. ASSUMPTION OF MOSES.—Written in Palestine, in Hebrew, 70-100 A.D., by a Pharisee. Preserved only in Latin (§§ 53-67).

VII. TESTAMENTS OF THE XII. PATRIARCHS.—A composite work written originally in Hebrew by two Jewish authors representing respectively the legalistic and the apocalyptic sides of Pharisaism, 170 B.C. to A.D., and interpolated by a succession of Christian writers from the close of the 1st century down to the 4th century A.D. Preserved in Greek, Armenian, and Slavonic versions (§§ 68-76).

VIII. PSALMS OF SOLOMON.—Written originally in Hebrew, possibly in Jerusalem, by two or more Pharisees, 70-100 B.C. (§§ 77-83).

IX. SILYHINE ORACLES.—Written in Greek hexameters by Jewish and Christian authors, mainly by the latter—the earliest portions belonging to the 2nd century B.C., the latest not earlier than the 3rd century A.D. (§§ 84-92).

INTRODUCTORY.—The object of apocalyptic literature in general was to solve the difficulties connected with

a belief in God's righteousness and the suffering condition of his servants on earth. The righteousness of God postulated the temporal prosperity of the righteous, and this postulate was accepted and enforced by the Law. But while the continuous exposition of the Law in the post-exilic period confirmed the people in their monotheistic faith and intensified their hostility to heathenism, their expectations of material well-being, which likewise the Law had fostered, were repeatedly falsified, and a grave contradiction thus emerged between the old prophetic ideals and the actual experience of the nation, between the promises of God and the bondage and persecution which the people had daily to endure at the hands of their pagan oppressors. The difficulties arising from this conflict between promise and experience might be shortly resolved into two, which deal respectively with the position (1) of the righteous as a community, and (2) of the righteous man as an individual.

The OT prophets had concerned themselves chiefly with the former, and pointed in the main to the restoration (or 'resurrection') of Israel as a nation, and to Israel's ultimate possession of the earth as a reward of righteousness. Later, with the growing claims of the individual, and the acknowledgment of these in the

religious and intellectual life, the second problem pressed itself irresistibly on the notice of religious thinkers, and made it impossible for any conception of the divine rule and righteousness which did not render adequate satisfaction to the claims of the righteous individual to gain acceptance. Thus, in order to justify the righteousness of God, there was postulated not only the resurrection of the righteous nation but also the resurrection of the righteous individual. Apocalyptic literature, therefore, strove to show that, in respect alike of the nation and of the individual, the righteousness of God would be fully vindicated; and, in order to justify its contention, it sketched in outline the history of the world and of mankind, the origin of evil and its course, and the final consummation of all things; and thus, in fact, it presented a Semitic philosophy of religion (cp CHRONOLOGY OF OT, § 1). The righteous as a nation should yet possess the earth either in an eternal or in a temporary Messianic kingdom, and the destiny of the righteous individual should finally be determined according to his works. For, though he might perish untimely amid the world's disorders, he would not fail to attain through the resurrection the recompense that was his due in the Messianic kingdom, or in heaven itself. The conceptions as to the duration and character of the risen life vary with each writer.

The writings that are treated of in the rest of this article, however, deal not only with the Messianic expectations but also with the exposition and application of the Law to the numberless circumstances of life. As Schürer has rightly observed, the two subjects with which Jewish thought and enthusiasm were concerned were the Law and the Messianic kingdom. These were, in fact, parallel developments of Pharisaism. As we have the former—its legalistic side—represented in the *Book of Jubilees*, so we have the latter—its apocalyptic and mystical side—set forth in the *Book of Enoch*. The *Testaments of the Twelve Patriarchs* give expression to both sides of Pharisaism; but this book, as we shall see in the sequel, is really a composite work and springs from authors of different schools. The rest of the books here discussed belong mainly to the apocalyptic side of Pharisaism.

It is a characteristic of apocalyptic as distinguished from prophecy that the former trusts to the written, the latter to the spoken, word. This is due

3. Method. largely to the fact that the prophet addresses himself chiefly to the present and its concerns, and that, when he fixes his gaze on the future, his prophecy springs naturally from the circumstances of the present. The apocalyptic writer, on the other hand, almost wholly despairs of the present; his main interests are supramundane. He entertains no hope of arousing his contemporaries to faith and duty by direct and personal appeals. His pessimism and want of faith in the present thus naturally lead him to pseudonymous authorship, and so he approaches his countrymen with a writing which purports to be the work of some great figure in their history, such as Enoch, Moses, Daniel, or Baruch. The standpoint thus assumed is as skilfully preserved as the historical knowledge and conditions of the pseudonymous author admit, and the future of Israel is 'foretold' in a form enigmatical indeed

¹ On other Apocalypses of Baruch, see below, APOCRYPHA, § 20.

² Ch. lxxv. 71-80, see § 30.

APOCALYPTIC LITERATURE

but generally intelligible. All precision ceases, however, when we come to the real authors' own time, his predictions, thenceforward, are mere products of the religious imagination, and vary with each writer. In nearly every case, we should add, these books claim to be supernatural revelations given to the men by whose names they are designated.

It will not be amiss here to notice the gross misapprehension under which Jost, Graetz, and other

4. Historical value.

Jewish writers laboured when they pronounced this literature to be destitute of value for the history of Jewish religion. To such statements it is a sufficient answer that from 200 B.C. to 70 A.D. the religious and political ideals that really shaped the history of Judaism found their expression in this literature. It is not in the discussions and logomachies of the Rabbinical schools that we are to look for the influences and aims that called forth some of the noblest patriotism and self-sacrifice the world has ever witnessed, and educated the nation for the duties that waited it in the first century of our era, but in the apocalyptic and pseudopigraphic books which, beginning with Daniel, had a large share in preparing the most religious and ardent minds of Greece and Judaea either to pass over into Christianity, or else to hurl themselves in fruitless efforts against the invincible might of Rome, and thereby all but annihilate their country and name. Still it is true that the work of the scribes and the exposition of the schools had opened the way for this new religious and literary development. The eschatological element, moreover, which later attained its full growth in such pseudopigraphical writings as Daniel, Enoch, Noah, etc., had already strongly asserted itself in later prophets such as Is. 21-27, Joel, Zech. 12-14. Not only the beginnings, therefore, but also a well-defined and developed type of this literature had already established itself in the O.T. Its further developments were moulded, as we have pointed out above, by the necessities of the thought and by the historical exigencies of the time.

Cp. Siever's introductory essay on Jewish apocalyptic, *ZATW* 3 229-250 (C 5); Schürer, *Hist.* 3 44 ff.; Hilgenfeld, *Die jüd. Apokalyphe in ihrer geschichtlichen Entwicklung*, 1857 (Eint.).

1. THE APOCALYPSE OF BARUCH. — The Apocalypse of Baruch was for the first time made known to the modern world through a Latin version of Ceriani in 1866 (*Mon. Sacra* i 271-98). This version was made from a Syriac MS. of the sixth century, the text of which was also in due course published by the same scholar, in ordinary type in 1871, and in a photo-lithographic facsimile in 1883. An examination of the Syriac version makes it clear that this version is a translation from the Greek. It occasionally transliterates Greek words, and the text is at times explicable only on the supposition that the wrong alternatives of two possible meanings of certain Greek words have been followed by the translator. Even before Ceriani's publication, however, we had some knowledge of the Apocalypse of Baruch; for chaps. 78-86, which contain Baruch's Epistle to the nine tribes and a half that were in captivity, had already appeared in Syriac and Latin, in the London and the Paris Polyglots, in Syriac alone in Lagarde's *Lib. Vet. Test. Apoc. Syr.* 1861, in Latin alone in Fabricius's *Col. Pseudop. Vet. Test.*, and in English in Whiston's *Authentic Records*. Ceriani's Latin version was republished in Fritzsche's *Lib. Apoc. Vet. Test.* (77) in a slightly emended form; but, as the Syriac text was still inaccessible, Fritzsche's emendations are only guesses more or less fortunate—generally less.

We have just remarked that the Syriac version is a translation from the Greek. We shall now enumerate the reasons from which it appears that the Greek was in turn translated from a Hebrew original.

6. A translation from Greek.

7. The original Hebrew.

(i) The quotations from, or references to, the O.T. agree in all cases but one with the Massoretic text against the (iii) Hebrew idiom survive in the Syriac text. Thus there are many instances of the familiar Hebrew idiom of the infinitive absolute combined with the finite verb, and many locutions of Syriac grammar in the Syriac text are plainly to be explained as survivals of Hebrew order and Hebrew syntax. (iii.) Unintelligible expressions in the Syriac can be explained and the text restored by retranslation into Hebrew. Thus, among many others, the passages 21 9, 11, 12, 21 2 and 62 7 can be read by retranslation into Greek and thence into Hebrew. The Syriac in these verses is the slavish rendering of *ἀκαταστάτος*, and this in turn of *ἄστατος*; but *ἄστατος* also *ἀκαταστάτος*, and this is the meaning required in the above passages, where the Greek translator erroneously adopted the commoner rendering. (iv.) Many *paronomasiae* discover themselves on retranslation into Hebrew. See Charles, *Apoc. Bar.* 44-53.

The final editor of this work assumes for literary purposes the person of Baruch, the son of Neriiah, of Jerusalem; the supposed time is the period immediately preceding and subsequent to the capture of the city by the Chaldeans. Baruch, who begins by declaring that the word of the Lord came to him in the twenty-fifth year of Jeconiah,¹ speaks throughout in the first person. If we exclude the letter to the tribes in the captivity (chaps. 78-87), the work naturally divides itself into seven sections, separated from one another in all but one instance (*i.e.* after 35) by fasts which are, save at the end of the first section, of seven days' duration. The omission of a fast after chap. 35 may have been due either to an original oversight of the final editor or to the carelessness of a copyist.

8. Contents. The scene is laid in the neighbourhood of Jerusalem; the supposed time is the period immediately preceding and subsequent to the capture of the city by the Chaldeans. Baruch, who begins by declaring that the word of the Lord came to him in the twenty-fifth year of Jeconiah,¹ speaks throughout in the first person. If we exclude the letter to the tribes in the captivity (chaps. 78-87), the work naturally divides itself into seven sections, separated from one another in all but one instance (*i.e.* after 35) by fasts which are, save at the end of the first section, of seven days' duration. The omission of a fast after chap. 35 may have been due either to an original oversight of the final editor or to the carelessness of a copyist.

That the text requires the insertion of such a fast is to be concluded on the following grounds: According to the scheme of the final editor events proceed in each section in a certain order (see Charles, *Apoc. Bar.* 9, 26, 61). Thus first we find a fast, then generally a prayer, then a divine message or disclosure, and finally an announcement of this to an individual or to the people. Thus in the fifth section, 21-34, we have a seven-days' fast (21 1), a prayer (21 4-26), a revelation (22-30), and an address to the people (21 24). Then another seven-days' fast should ensue at the beginning of the sixth section (36-46). With the exception of this omission events follow in this section as in the others.

These sections are very unequal in length—1-56 57-8 9-124 125-20 21-35 36-46 47-77—a fact that though it does not in itself make against unity of authorship, confirms the grounds afterwards to be adduced for regarding the work as composite.

1. The first section (1-56) opens with God's revelation to Baruch regarding the coming destruction of Jerusalem. But a time of prosperity should return.

2. According to the next section (57-91), Baruch fasts until the evening, and the Chaldeans encompass Jerusalem next day. In a vision Baruch sees the sacred vessels removed from the temple by angels and hidden in the earth till the last times. The angels next overthrow the walls, the enemy are admitted and the people carried away captive to Babylon.

3. In the third section (92-124), Baruch fasts seven days, and receives a divine command to tell Jeremiah to go to Babylon; but Baruch himself is to remain at Jerusalem to receive God's revelations regarding the future. Baruch bewails Jerusalem and the lot of the survivors. "Would that thou hadst ears, O earth, and that thou hadst a heart, O dust, that ye might go and announce in Sheol and say to the dead: 'Blessed are ye more than we who live!'"

4. In the fourth section (125-20), Baruch fasts for seven days, and is told by God that he will be preserved till the end of time in order to bear testimony against the nations that oppressed Zion. When Baruch complains of the prosperity of the wicked and the calamities of the righteous, God answers that the future world is made on account of the righteous—that the blessings of life are to be reckoned not by its length but by its godliness and its end. Baruch is bidden not to publish this revelation (20 2).

5. In the fifth section (21-35), Baruch fasts, as usual, seven days. He deplores the littleness of life, and supplicates God to bring about the promised end. God reminds him of his ignorance, and declares that the end, though close at hand, cannot arrive till the predestined number of men be fulfilled, and again, in answer to Baruch's question respecting the nature and the duration of the judgment of the ingodly, describes the coming time of tribulation, which will be divided into twelve parts. At its close the Messiah will be revealed. Baruch summons a meeting of the elders in the valley of Kedron, and announces to them the future glory of Zion.

6. The sixth section (36-46) should begin with the missing fast of seven days. Shortly after, he has a vision of a cedar and a vine

¹ We may observe here that Jeconiah reigned only three months, and was carried captive to Babylon eleven years before the fall of Jerusalem.

APOCALYPTIC LITERATURE

which symbolise the Roman power and the triumph of the Messiah. When Baruch asks who shall share in the future blessedness, God answers: 'To those who have believed there will be the blessedness that was spoken of above.' Baruch then (14:47) calls together his firstborn son and seven of the elders, tells them of his apocalyptic vision, and exhorts them to keep the law, for 'a wise man will not be wanting to Israel, nor a son of the law to the race of Jacob'.

7. After a fast of seven days, Baruch in the seventh section (15:1) prays for Israel. The revelations that ensue tell of the coming tribulation. Baruch knew as the evil effects of Adam's fall. In answer to this request, he is inspired as to the nature of the resurrection bodies. Then, in a new vision (16:1), he sees a cloud ascending from the sea and covering the whole earth. There was lightning about its summit, and soon it began to discharge first black waters and then clear, and again black waters and then clear, and so on till there had been six black waters and six clear. The last it rained black waters, darker than had been all that were before. Thereupon the lightning on the summit of the cloud flashed forth and healed the earth where the last waters had fallen, and twelve streams came up from the sea and became subject to that lightning.

In the following chapters the vision is interpreted. The cloud is the flow, and the twelve successive discharges of black waters and clear waters symbolise six evil periods and six good periods of the world's history. The eleventh period, symbolised by the black waters, pointed to the supposed present tribulation of Jerusalem. The rest of the interpretation follows in the future tense. The twelfth clear waters point to the renewed prosperity of Israel and the rebuilding of Jerusalem. The last black waters that were to flow pointed to troubles, earthquakes, and wars over the whole earth. Such as survived these were to fall by the hands of the Messiah. These blackest of all the waters were to be followed by clear waters, which symbolized the blessedness of the Messianic times. This Messianic period should form the boundary line between corruption and incorruption. 'That time is the consummation of that which is corruptible, and the beginning of that which is incorruptible.'

Baruch thanks God for the revelation you have had. He is then informed of his coming departure from the earth, but is bidden first to go and instruct the people. He admonishes them to be faithful (chap. 17), and at their request sends two epistles, one to their brethren in Babylon (the two and a half tribes) and the other to the tribes (nine and a half) beyond the Euphrates. The latter is given in chaps. 18-21. It is probable that the last letter to the two tribes and a half is identical with, or is the source of, the Greek Baruch 3:2-4:24. See Charles, *Apoc. Bar.*, 1:54-7.

From the discovery of the Apocalypse of Baruch in 1860 till 1891, it was regarded by scholars as the work of one author. In the latter year, Kabisch, in an article entitled 'Die Quellen der Apokalypse Baruchs' (*UPT*, 1891, pp. 66-107), showed beyond the possibility of question that the work was composite and derived from at least three or four authors.

Thus he distinguishes 1:21-3, 30:2-34, 41-52, and 75:87 as the groundwork written after 70 A.D., since these chapters imply the destruction of the temple. He further observes that these parts are marked by a despair which no longer looked for peace and happiness in this world, but fixed its regards on the world of incorruption. In the other pieces of the book there is a strong faith in Israel's ultimate triumph here, and an optimism which looks for the consummation of Messianic bliss in this life; and, as Kabisch rightly remarks, the temple is still standing. These other sections, however, are the work not of one writer but of three, being constituted as follows: a short Apoc. 21:1-29, the Nine and Cedar Vision (36-40), and the Cloud Vision (53-74); 30:1-32:24, 35 are due to the final editor.

This theory is certainly in the right direction. It is open, however, to transmissible objections. There is

no unity in the so-called groundwork. When submitted to a detailed criticism, it exhibits a mass of conflicting conceptions and statements. The results of such a criticism may be stated briefly as follows (for the details see Charles, *Apoc. Bar.*, 53-67). 1-26 31-35 41-52 75-87 were written after the fall of Jerusalem, and were derived from three or possibly four authors, B₁, B₂, B₃, and possibly S.

B₁ 1:21-43:44 45:1-77:82 84-86 f., written by a Pharisee who expected Jerusalem to be rebuilt and the dispersion to be brought back from exile.

B₂ 1:12 1:25 20:25 41 f. 48:15 47:52 75 f. 83, also by a Pharisee who looked for national restoration, but only for the recognition of the righteous in heaven.

B₃ 85, written by a Jew in exile.

S. 10:2-12:4, possibly by a Sadducee, but perhaps to be assigned to B₂.

The rest of the book was written before the fall of Jerusalem. It consists of an Apocalypse 27-30 (= A₁)

and the two Visions 36-40 (= A₂) and 53-74 (= A₃) already mentioned. All these different elements were combined by the final editor to whom we owe also 1:1-26 28:1-32:24 and possibly some other additions.

Jewish tradition thought of it, as already observed, mainly with two subjects, the Messianic hope

and the Law, and in proportion as the one became more prominent the other fell into the background. Now, the chapters written before 70 A.D. are mainly Messianic.

Chaps. 27-30 (= A₁) and 36-40 (= A₂) take account of the Law only indirectly, whereas in those written after that date the whole thought and hope of the writers centre in the Law, which is their present mainstay and their source of future bliss. For chaps. 53-74 (= A₃) again, the Messianic hope and the Law are equally emphasised. This writing marks the dawn of early Rabbinism and the popular Messianic expectation. (See Charles, *op. cit.*)

In the sections B₁ and B₂, on the other hand, written after the fall of Jerusalem, we have two distinct outlooks as to the future. In B₁ the writer is still hopeful as to the future of Jerusalem.

It is delivered into the hands of its enemies indeed, but only for a time (11:6). The consolation of Zion should yet be accomplished (41:8-14), and the ten tribes brought back from their captivity (52:8-14). Moreover, the tribulation of the Gentiles will cease at God's (12:20), and in due time will arrive the judgment, in which God's justice and truth should exact their mighty due (8:5).

In B₂, on the other hand (and if possible still more in B₃, chap. 85), the writer is full of memorable despair as to the earthly lot of Zion and its people in this world (10:6-11).

Destruction awaits this world of corruption (21:1, 31-3). The righteous have sought to look for save the new world (41:1), the world that does not (41:3), the world of incorruption (8:5). Only in the world to come will every man be recompensed in the resurrection according to his works (20:12), when the wicked shall go into torment and the righteous shall be made like unto the angels.

In the sections written before the fall of Jerusalem, the Messianic element, which was wanting in B₁, B₂, and B₃, is predominant. The three Apocalypses 27-30 (= A₁) 36-40 (= A₂) 53-74 (= A₃) have many features in common—such as an optimistic outlook as to Israel's earthly prosperity, the earthly rule of the Messiah till the close of this world, and the material blessings of his kingdom. There are, however, good grounds for regarding them as of different authorship. The Messianic reign is to close with the final judgment. On the Eschatology of the book see, further, ESCHATOLOGY, § 78.

All the elements of this book are distinctly Jewish. Its authors, as already observed, were Pharisees, full of

confidence in the future glories of their nation, either in this world or in the next, notwithstanding their present humiliations. They enter on the most lofty conceptions as to the divine election and the absolute pre-eminence of their race.

It was on Israel's account that not only the present world (11:6) but also the coming world (1:7) was created. Israel is God's chosen people whose like is not on earth (1:5); the perpetual felicity of Israel lay in the fact that they had not mingled with the nations (18:2). The one law which they had received from the one God (18:24) could help and justify them (31:3); for so far as they kept its ordinances they could not fall (18:25); their works would save them (44:1-51-63). In due time also all nations should serve Israel; but such of them as had injured Israel should be given to the sword (72:9). The eternal source of the Messiah and his kingdom (20:6-8-40 72:10) is essentially Pharisaic. There was to be a general resurrection (42:1-2); but apparently only Israel should be saved (51:4).

It is possible to determine approximately the earlier limit of the composition of A₁ by means of what we might call the Linochic canon. This is: *No early Jewish book which extols Enoch could have been written after 50 A.D., and the attribution of Enoch's words and sayings in a Jewish book to other Old Testament heroes is a sign that it was written after the Pauline preaching of Christianity.* This liability to Linochism from 50 A.D. onwards (cp. Enoch) is to be traced to Linoch's pre-eminence among the Christians as a Messianic prophet. For the grounds and illustrations of this canon see Charles, *Apoc. Bar.*, 21:22, 100. Now, in 20:1-21 of this Apocalypse many of Enoch's prophecies and revelations are assigned to Moses. Hence A₁ was written after 50 A.D.

APOCALYPTIC LITERATURE

The affinities of Apoc. Bar. with 4 Esdras are so striking and so many that I would ascribed the two books to the same author. Though this view has not been accepted in later criticism, it will not be amiss to draw attention to these

13. Affinity with 4 Esd.

(1) The main features of the two books are similar. They have one and the same object: to deplore Israel's present calamities and awaken hope in the coming glories, temporal or spiritual, of their race.

In both the speaker is a notable figure of the time of the Babylonian captivity. In both there is a sevenfold division of the work, and an interval (as a rule, of seven days) between each two divisions; and, whereas in the one Ezra devotes forty days to the restoration of the scriptures, in the other Baruch is hidden to spend forty days in admonishing Israel before his departure from the earth.

(2) They have many doctrinal peculiarities in common.

According to both, man is saved by his works (4 Esd. 7:77-8:33; 9:7, *Ap. Bar.* 2:214 etc.); the world was created in behalf of Israel (4 Esd. 6:55-7:119-13; *Ap. Bar.* 14:19-15:7 etc.); man came not into the world of his own will (4 Esd. 8:5; *Ap. Bar.* 14:11-18:15); a predetermined number of men must be attained before the end (4 Esd. 4:30-4; *Ap. Bar.* 23:45); God will visit his creation (4 Esd. 5:55-6:129-2; *Ap. Bar.* 20:2-24:4); Adam's sin was the cause of physical death (4 Esd. 3:7; *Ap. Bar.* 28:4); the souls of the good are kept safe in treasures till the resurrection (4 Esd. 4:35-37; 32:80-95; *Ap. Bar.* 30:2).

This list might have been indefinitely added to. On the other hand, there are clear points of divergence.

14. Divergence from 4 Esd.

In Esdras the Messianic reign is limited to 400 years (7:23 f.), whereas in Baruch this period is quite indeterminate. Again, in the former (7:20) the Messiah is to die, and the Messianic reign is to close with the death of all living things; whereas in the latter, according to 30, the Messiah is to return in glory to heaven at the close of his reign, and, according to 73 f., this reign is to be eternal, though it is to belong partly to this world and partly to the next.

Again, in Esdras the writer urges that God's people should be punished by God's own hands and not by the hands of their enemies (5:29 f.), for these have overthrown the altar and destroyed the temple, and made the holy place a desolation (10:21 f.). In Baruch it is described at length how the holy vessels were removed by angels and the walls of Jerusalem demolished by the same agency before the enemy drew nigh (6:8).

On the question of original sin likewise these two books are at variance. Whilst in Esdras the entire stream of physical and ethical death is traced to Adam (3:7-21 f.; 4:30-7:48), and the guilt of his descendants minimised at the cost of their first parent (yet see 7:55-6), Baruch derives physical death indeed from Adam's transgression (17:123-4-51-5), but as to ethical death declares that "each man is the Adam of his own soul" (51:19; yet see 45:42).

It will be clear from the facts set forth above that the relations of these two apocalypses constitute a complex problem. If we attempt to deal with this problem on the supposition that each book is derived from a single author, no solution is possible; and the barrenness of criticism hitherto in this direction is due to this supposition of their unity. When, however, we come perforce to recognise their composite nature, we enter at the same time on the road that leads to the desired goal. For a provisional study of the relations between the various constituents of this apocalypse and 4 Esdras, the reader can consult Charles, *Apoc. Bar.* 67-76. The results of this study tend to show that, whilst some of the constituents of 4 Esdras are older than the latest of Baruch, other constituents of Baruch are decidedly older than the remaining ones of 4 Esdras.

15. Real relation.

The points of contact between this apocalypse and the NT are many; but they are for the most part insufficient to establish a relation of dependence on either side. The thoughts and expressions in questions are explicable from pre-existing literature or as commonplaces of the time.

Such, among many others, are Mt. 3:16, *Ap. Bar.* 22:1, Mt. 26:24, *Ap. Bar.* 10:5, Lk. 21:28, *Ap. Bar.* 22:7, Rom. 8:18, *Ap. Bar.* 1:6.

The following passages are of a different nature and postulate the dependence of our apocalypse on the

NT, or possibly, in one or two of the instances, of both on a common source.

With Mt. 16:26, 'For what shall a man be profited, if he shall gain the whole world and forfeit his soul? or what shall a man give in exchange for his soul?' cp. *Ap. Bar.* 51:15, 'For what then have men lost their life, or for what have those who were on the earth exchanged their soul?' Also with 1 Cor. 15:19, 'If in this life only we have hoped in Christ, we are of all men most miserable,' cp. *Apoc. Bar.* 21:1, 'For if there were this life only . . . nothing could be more bitter than this.' Also with 1 Cor. 15:35, 'How are the dead raised and with what manner of body do they come?' cp. 49:2, 'In what shape will those five who live in that day?' Cp. also Lk. 14:2 with *Ap. Bar.* 64:10, Jas. 1:2 with 52:6, and Rev. 4:2 with 51:2.

As the Apocalypse of Baruch was written between 50 and 100 A.D. it furnishes us with the historical setting

17. Value and background of many of the NT problems, and thereby enables us to estimate

the contributions made in this respect by Christian thought. Thus, whereas, from 49:2-51, we see that the Pauline doctrine of the resurrection in 1 Cor. 15:35-50 was not an innovation but a developed and more spiritual exposition of ideas already current in Judaism, it is clear, on the other hand, from the teaching of this book on Works and Justification, Forgiveness and Original Sin and Freewill (see Charles, *op. cit.* pp. 80-85), what a crying need there was for the Pauline dialectic, and what an immense gulf lay herein between Christian and Rabbinic teaching. No ancient book is so valuable in attesting the Jewish doctrine of that period.

Bibliography.—In addition to the works already mentioned, the reader may consult Lange, *De Apoc. Bar. comm.* (187); Lk. *OGA* (187), 17-6-17, 17-20; *Hist. of Israel*, 8:57-61; Drummond, *The Jewish Messiah* (77), 117-132; Kneucker, *Das Buch Bar.* (76), 190-198; Di. 'Pseudep.' in *PKK* 12, 12:356-358; Deane, *Pseudep.* (91), 130-162.

II. THE BOOK OF ENOCH.—By the exegesis of later times, the statement that Enoch walked with God (Gen.

18. Jewish view of Enoch.

5:24; see Enoch) was taken to mean that he enjoyed superhuman privileges of intercourse with God, and in this intercourse received revelations as to the nature of the heavens and the earth, the present lot and the destinies of men and angels. It was natural, therefore, that an apocalyptic literature should seek the shelter and authority of his name in ages when such literature became current. In the *Book of Enoch* preserved in Ethiopic we have large fragments of this literature proceeding from a variety of Jewish writers in Palestine; and in the *Book of the Secrets of Enoch* preserved in Slavonic we have further portions of it, written originally by Hellenistic Jews in Egypt. To the latter book we shall return.

The Book of Enoch as translated into Ethiopic belongs to the last two centuries B.C. All the writers of

19. Book of Enoch: its fortunes.

the NT were familiar with it and were more or less influenced by it in thought and diction. It is quoted as a genuine production in the Epistle of Jude (14 f.) and as Scripture in that of Barnabas (Ep. 4:3-16). The authors of the *Secrets of Enoch*, *Jubilees*, *Test. xii. Patr.*, *Apoc. Bar.* and 4 Esd. laid it under contribution. With the earlier Fathers and Apologists it had all the weight of a canonical book; but towards the close of the third and the beginning of the fourth centuries it began to be discredited, and finally it fell under the ban of the Church. The latest references to it are to be found in Synellus and Cedrenus, who have preserved large fragments of the Greek version. The book was then lost sight of till 1773, when two MSS of the Ethiopic version were discovered by Bruce. From one of these MSS Lawrence made the first modern translation of Enoch in 1821.

Enoch was originally written in Heb. or Aram., not in Greek. On this question the chief Apocalyptic scholars are practically agreed.

In the case of chaps. 1-32 this view is established beyond the reach of controversy; for in 19:25-18:27-28:4-29:31 of the Greek version we find the translator transliterated Heb. or

APOCALYPTIC LITERATURE

Arām, words that were unintelligible to him. The same view as to the remaining chapters has been amply proved in the *Journal*, ix. (63) 350-395 by Halesy, who regards the entire work as copied from a Hebrew original. See also Charles, *Book of Enoch*, i. 22, 325. Recently some Dutch and German scholars have argued for an Arām. original on the ground that three Arām. forms have been preserved in the Greek text-fragment viz. *dōwka* in 180, *uachdāpa* in 224, and *hāpāpa* in 224. The first is, it is true, an Arām. form of דָּוָק and the two latter of הָפָק . This argument, however, is in no wise decisive. We find *axara* in 2 K. 14:13 [14] as a transmutation of אָרָא , and *Asa* in Neh. 2:14 [18] as a transmutation of אָסָא ; and there are other instances of the same peculiarity in אָ . Hence the presence of such Arāmisms in a text is not sufficient in itself to establish an Arām. original.

The Heb. original was translated into Greek, and from Greek into Ethiopic and Latin. Of the Greek

21. Version
Greek.

21. Versions
Greek.

M. Lohd's crucial edition of this fragment, as accompanied by a translation, appeared almost simultaneously, and next year it was edited by the present writer, with an extensive comparison of the Greek and Latin versions of 1332, as an Appendix to his work on *Enchir.* The other Greek fragments will be found in my *CVIII* [vol. II, fasc. 1, pp. 100-102]. The fragments of the Greek *Enchir.* with a critical apparatus are to be published in the 2nd edition of vol. III. of Sweet's *Cambridge LXX.*

The Latin version is wholly lost—with the exception of 19, which is found in a treatise of the Pseudo-Augustin.

22. Latin

22. Latin. entitled *At Vertuam* (see Zahn's *Gesch. d. V. Theol. Kanons*, 2, 1904), and 1061-12, which owes its discovery to Mr. James, in an eighteenth-century MS in the British Museum. This fragment is critically edited in Charles's *Text of Enoch*, 372-375. James, *Apocrypha Anecdota*, 1, p. 150.

The Ethiopic version alone preserves the entire text, and that in a more ancient and trustworthy form than

23. Ethiopic.

23. Ethiopic. the other versions. It has fewer additions, fewer omissions, and fewer and less serious corruptions.

1. *The Ethiopic MSS.* The Ethiopic MSS are comparatively many. There are about twenty scattered throughout the libraries of Europe; half of them are found in the British Museum. The best of all the known MSS is undoubtedly that designed *Orion*, 45 in the Lin. Museum.

II. *Editions of the Phlegon*. . . . Only two editions have appeared—that of Lawrence in 1871, from one MS, and that of Dillmann in 1881 from five MSS. Unhappily, these MSS were late and corrupt. The present writer hopes to issue a text based on the incomparably better MSS now accessible to scholars. Such a text is actually presupposed in his Translation and Commentary of 1893.

III. *Translations and Commentaries.* Translations accompanied by Commentaries have been issued by Lawrence (27), Hoffmann (33-35), Tillmann (53), Scholde (52), and Charles (93). Of Tillmann's and Scholde's Translations the reader will find a short review in Charles (6-7).

will find a Short review in Charles (69).

(iv) W. C. Oetzel, *Inquiry* 85. Some account of these will be found in Schreier, *History*, pp. 7-23, and in Charles's *Book of Enock*, p. 201-209, 311. Of many works on this book the following deserve particular mention here: Luke, *Enoch*, in *d. Offenb.* des Joh., 121 (134); Ew. Abhandl. *W. d. ant. Buches Henoch Entstehung, Sinn, und Zusammenhang* (1855); Kistling, 'Zur Theol. Entsch.-d. B. Henoch' (*Theol. Jahrb.* 1856, pp. 246-279, 373-380); Hülsmeyer, *Die jüd. Apokryphen* 157; Grotzinger, 'Gehört die "Die 7 Hirten des Buches Henoch und ihre Deutungen" (Merk's) Archiv f. wissenschaftl. Erforschung' (*Bibl. u. Pgr.* 1892, vol. 3, liss. 2, 153-60); Drummond, *The Jewish Messianic Prop.*, 17, 73; Hepburn in Smith and Wace's *Dict. of Chr. Biogr.* (Vol. 1), 123-128; Schuler, *Past.* 54-73; Lawlor, *Journ. Phil.* vol. XXV, pp. 174-205 [187].

The Book of Enoch is a fragmentary survival of an entire literature that once circulated under his name.

24. Compositeness

24. Compositeness. To this fact the plurality of books assigned to Enoch from the first may in some sense point: as, for instance, the expression 'books' in 101¹²; *Test. xii. Patr.* Jud. 18; Origen, *c. Celsum*, 554, and elsewhere. Of this literature five distinct fragments have been preserved in the five books into which the Book of Enoch is divided (1-36

37-71 72-82 83 90 91-108). These books were originally separate treatises; in later times they were collected and edited, but were much mutilated in the course of redaction and incorporation into a single work. In addition to this Enoch literature, the final editor of the book made use of a lost apocalypse, the Book of Noah (mentioned in Jubilees 10:1, 21:1-3), from which he drew 6:11 (2) 17:19 31:1 x 41:1 43 f. 54 f. 55 f. 59 f. 65-69:2 100 f. Another fragment of the Book of Noah has been embodied in the Book of Jubilees (see below, § 57).

We have already remarked that in the five books into which the whole work is divided we have the writings

25. Criticism.

25. Criticism. of by different authors. Before we proceed to give some of the grounds for this statement, we shall give in brief outline the different constituents found in the work by the chief scholars who have studied the subject.

think in his *Stud.* (See above, § 2) regards the book as consisting of two parts. The first part embraces 1:36-7:165, written at the beginning of the Maccabean revolt, or, in another later view, in the reign of John Hyrcanus, the second consists of the Similitudes (36:7-11), and was written in the early days of the fall of the Temple. In the latter, however, there are some interpretations. Hofmann (J. Chr. C.) ascribes the entire work to a Christian author of the second century. In this view he was followed later by Weiss and Philippi. Hofmann deserves mention in this connection on the ground of his having been the first to give the correct interpretation of the seventy shepherds in 9:17. I w. in his *Abhandl.* (See above, § 2) gives the following scheme: Book I, (37:7-11) (*chap. 144-145*); Book II, (1:16-8:1 + 8:19-20:16) (*chap. 145-146*); Book III, (20:26-72:90) (*chap. 146-147*); Book IV, (72:91-81:1) (*chap. 147-148*); Book V, (81:2-87:10) (*chap. 148-149*); Book VI, (87:11-94:1) (*chap. 149-150*); Book VII, (94:2-100:1) (*chap. 150-151*). Kautzsch in his essay (See above, § 2), a contribution of great worth, arrives at the following analysis: the 2nd-ndwark (1:16-21:36) + 165; 2nd-ndwark; the Similitudes (37:7-11 and 17-19) before 70 A. C.; the Næstorian fragments (51:55-52:60-53:25, possibly also 50:52-52:165 A. C.); 108 is an Essene addition; 113-114-115-116-117-118-119-120-121-122-123-124-125-126-127-128-129-130-131-132-133-134-135-136-137-138-139-140-141-142-143-144-145-146-147-148-149-150-151-152-153-154-155-156-157-158-159-160-161-162-163-164-165-166-167-168-169-170-171-172-173-174-175-176-177-178-179-180-181-182-183-184-185-186-187-188-189-190-191-192-193-194-195-196-197-198-199-200-201-202-203-204-205-206-207-208-209-210-211-212-213-214-215-216-217-218-219-220-221-222-223-224-225-226-227-228-229-230-231-232-233-234-235-236-237-238-239-240-241-242-243-244-245-246-247-248-249-250-251-252-253-254-255-256-257-258-259-260-261-262-263-264-265-266-267-268-269-270-271-272-273-274-275-276-277-278-279-280-281-282-283-284-285-286-287-288-289-290-291-292-293-294-295-296-297-298-299-300-301-302-303-304-305-306-307-308-309-310-311-312-313-314-315-316-317-318-319-320-321-322-323-324-325-326-327-328-329-330-331-332-333-334-335-336-337-338-339-340-341-342-343-344-345-346-347-348-349-350-351-352-353-354-355-356-357-358-359-360-361-362-363-364-365-366-367-368-369-370-371-372-373-374-375-376-377-378-379-380-381-382-383-384-385-386-387-388-389-390-391-392-393-394-395-396-397-398-399-400-401-402-403-404-405-406-407-408-409-410-411-412-413-414-415-416-417-418-419-420-421-422-423-424-425-426-427-428-429-430-431-432-433-434-435-436-437-438-439-440-441-442-443-444-445-446-447-448-449-450-451-452-453-454-455-456-457-458-459-460-461-462-463-464-465-466-467-468-469-470-471-472-473-474-475-476-477-478-479-480-481-482-483-484-485-486-487-488-489-490-491-492-493-494-495-496-497-498-499-500-501-502-503-504-505-506-507-508-509-510-511-512-513-514-515-516-517-518-519-520-521-522-523-524-525-526-527-528-529-530-531-532-533-534-535-536-537-538-539-540-541-542-543-544-545-546-547-548-549-550-551-552-553-554-555-556-557-558-559-560-561-562-563-564-565-566-567-568-569-570-571-572-573-574-575-576-577-578-579-580-581-582-583-584-585-586-587-588-589-590-591-592-593-594-595-596-597-598-599-600-601-602-603-604-605-606-607-608-609-610-611-612-613-614-615-616-617-618-619-620-621-622-623-624-625-626-627-628-629-630-631-632-633-634-635-636-637-638-639-640-641-642-643-644-645-646-647-648-649-650-651-652-653-654-655-656-657-658-659-660-661-662-663-664-665-666-667-668-669-670-671-672-673-674-675-676-677-678-679-680-681-682-683-684-685-686-687-688-689-690-691-692-693-694-695-696-697-698-699-700-701-702-703-704-705-706-707-708-709-710-711-712-713-714-715-716-717-718-719-720-721-722-723-724-725-726-727-728-729-730-731-732-733-734-735-736-737-738-739-740-741-742-743-744-745-746-747-748-749-750-751-752-753-754-755-756-757-758-759-760-761-762-763-764-765-766-767-768-769-770-771-772-773-774-775-776-777-778-779-780-781-782-783-784-785-786-787-788-789-790-791-792-793-794-795-796-797-798-799-800-801-802-803-804-805-806-807-808-809-810-811-812-813-814-815-816-817-818-819-820-821-822-823-824-825-826-827-828-829-830-831-832-833-834-835-836-837-838-839-840-841-842-843-844-845-846-847-848-849-850-851-852-853-854-855-856-857-858-859-860-861-862-863-864-865-866-867-868-869-870-871-872-873-874-875-876-877-878-879-880-881-882-883-884-885-886-887-888-889-890-891-892-893-894-895-896-897-898-899-900-901-902-903-904-905-906-907-908-909-910-911-912-913-914-915-916-917-918-919-920-921-922-923-924-925-926-927-928-929-930-931-932-933-934-935-936-937-938-939-940-941-942-943-944-945-946-947-948-949-950-951-952-953-954-955-956-957-958-959-960-961-962-963-964-965-966-967-968-969-970-971-972-973-974-975-976-977-978-979-980-981-982-983-984-985-986-987-988-989

26. Results. We shall now proceed to discuss this question directly, and endeavour to carry the criticism of the book one further stage towards finality.

26. Results

26. Results. directly, and endeavour to carry the criticism of the book one further stage towards finality.

Disregarding the interpolations from the Book of Noah already mentioned as well as the closing chapter, we find that all critics are agreed in ascribing the *Similitudes* (37-70) to an authorship different from the rest. The remaining chapters (1-36, 72-104) have been regarded by all critics except Ewald and Lipsius as proceeding from one and the same author; but these scholars, while differing from each other, have not persuaded any one but themselves as to the justice of their respective analyses. In their contention, however, as to the compositeness of these chapters they were undoubtedly right. This question has been gone into at length in Charles's *Book of Enoch*, 55 f., 187-189, 220 f., 260-263, where grounds are given for believing that sections 1-36, 72-82, 83-99, and 101-104 are writings distinct as to authorship, system of thought, and date. We must now proceed to sketch briefly the various independent writings contained in the entire work, assigning to each its most probable date.

Part I., consisting of chaps. 1-36 (for the Noachic interpolations, see § 24), was written at latest before

27. Chaps.

27. Chaps. 170 B.C., and mainly from the prophetic standpoint of such chapters as 18, 45, 1-36. This is, undoubtedly, the oldest part of the book, being anterior to 72-82, 83-90, 91-104, as it is used by the writers of these sections.

As 88:40 was written not later than 161 n.c., 1-50 must be some years earlier, and, as there is no allusion to the massacres

APOCALYPTIC LITERATURE

of Antiochus Epiphanes, the above date, 170, is the latest reasonable limit for its composition.

This book, i.e., 1361, is the oldest piece of Jewish literature that teaches the general resurrection of Israel, describes Sheol according to the conception that prevails in the N.T. as opposed to that of the O.T., or represents Gehenna as a final place of punishment (cp. *ESCHATOLOGY*, § 64). The prebend of the author is to justify the ways of God to men.

The righteous will not suffer always (11). Sin is the cause of this suffering, and the sin of man is due to the lust of the angels (the Watchers) (9:6-9 to 10:1). Hence the Watchers, their companions, and their children, will be destroyed (10:1-11:1). The destruction will be the prelude to the first world-judgment, of which the Deluge, however, though the influence of the evil spirits that went forth from the slaughtered children of the Watchers and the daughters of men (10:1). These act with impunity till the final judgment. In the meantime character finds its recompense in some measure immediately after death (22). In the last judgment the Watchers, the demons, and all classes of Israelites with one exception, will receive their final award (1:22-23). This judgment is preceded by a general resurrection and Israel (20). The wicked are cast into Gehenna (27:2), the earth is cleansed from sin (10:1-2); the Messianic Kingdom is established, with Jerusalem as a centre (25:1), and Gentiles with men (25:1). The Gentiles are converted (10:1). The righteous eat of the tree of life (27:2) and thereby enjoy eternal life (27:2). As to what befalls the righteous after the second death there is no hint in this fragmentary section.

Part II., consisting of 83-90, was written between 100 and 160 B.C., mainly from the same standpoint as Daniel. On a variety of grounds we are obliged to discriminate this section from the preceding.

It will be enough to mention that, whereas in this there is a Messiah, in the preceding there was none; in this the life of the righteous is apparently ending, in the other it was beginning; in this the scene of the kingdom is the New Jerusalem set up by God himself, in the other it was Jerusalem and the entire earth unchanged though purified. Finally, the picture in 83-90 is developed and spiritual, while that in 1-36 was naive, primitive, and sensuous.

The date assigned above is not difficult to fix. The Hasmonean (see *ASIA*), symbolized by the lambs that are born to the white sea (cp. 90:6), are already in organized party in the Maccabean revolt. The lambs that become horned are the Maccabean family, and the great lion who is still waiting while the author of the section is writing is Judas the Maccabee (90:6), who died in 130 B.C.

Chapters 83-90 recount two visions: S. f., dealing with the first world-judgment, 85-90, dealing with the entire history of the world till the final judgment. In the second vision the author considers the question of Israel's unmitigated suffering.

Israel has indeed sinned; but the punishment immeasurably transcends it (91:1). These unending severities, the author shows, have not come from the hand of God, they are the doing of the seventy shepherds into whose care God committed Israel (85:5). These shepherds or angels have proved faithless to their trust; but not with impunity. An account has been taken of all their deeds (89:6-9), and for them and for their victims there is laid up a due recompense (90:13). More over, when the tribulation is darkest, a league of the righteous is organized in Israel (90:1). In it there will arise a family from which will come forth the deliverer of Israel, Judas the Maccabee (90:1-16). Every effort of the Gentiles to destroy him will prove vain, and God's appearance in person to judge will be the signal for their destruction. The apostates will be cast into Gehenna, and the wicked angels, into an abyss of fire (90:20-25). God himself will set up the New Jerusalem (90:26-29); the surviving Gentiles will be converted and serve Israel (90:30); the righteous dead will be raised to take part in the kingdom; and finally the Messiah will appear among them (90:37). The Messianic kingdom lasts on earth for ever, and its members enjoy everlasting blessedness.

It will be observed that this is the earliest appearance of the Messiah in non-canonical literature (see *MESSIAH*, § 5; *ESCHATOLOGY*, § 60). He has, however, no rôle to play; he has not as yet vindicated for himself a place in the apocalyptic doctrine of the last things.

Part III., consisting of 91-104, was written between 134 and 65 B.C. The well defined opposition of the

29. Chaps. 91-104. Pharisees and the Sadducees depicted in this section cannot have been earlier than the breach between John Hyrcanus and the Pharisees (see *ISRAEL*, § 78; *SCRIPTURES*, § 18); hence not earlier than 134 B.C. On the other hand, it cannot

have been later than 95 B.C., as the merely passing reference to persecution in 103:13 could hardly be interpreted of James after his savage massacres of the Pharisees in 95 B.C., which won for him the title, 'the saviour of the poor.'

This section is originally, like 83-90, an independent writing. In adapting it to its present environment, the redactor of the entire work took up its original arrangement. In order to receive this we must read it in the following order: 92:1-1:1; 93:1-94:1; 91:1-94:1. On a variety of grounds (see *CHRONOLOGY*, § 104), we must attribute this work to quite another author than that of either of the preceding sections.

In passing from 83-90 to 91-104 we enter on a world of new conceptions (cp. *ESCHATOLOGY*, § 61). In all previous apocalyptic writings the resurrection and the final judgment have been the prelude to an everlasting Messianic kingdom; whereas in the present writing these great events are relegated to the close of the Messianic kingdom, and not till then do the righteous enter on their reward. This kingdom is temporary (91:1-14); there is no Messiah; the righteous with God's help vindicate their just cause and destroy their oppressors. On the close of the kingdom follow the final judgment (91:15) and the risen spiritual life of blessedness in a new heaven (91:16-19:2). In this view of the future the centre of interest has obviously passed from the material world to the spiritual, and the Messianic kingdom is no longer the goal of the hopes of the righteous. Their faith finds its satisfaction only in a blessed immortality in heaven itself. This immortality is an immortality of the soul only (101:3-1). As for the wicked, they will descend into the pain of Sheol and abide there everlastingly (98:1-101:2). Here (103:7) Sheol appears as Hell for possibly the first time.

30. Similitudes. Part IV. The Similitudes, consisting of 37-70, were written between 94 and 70 B.C., or between 70 and 64 B.C.

'The kings and the mighty,' so often denounced, are the later Maccabean princes and their Sadducean supporters; the later Maccabean princes, for the blood of the righteous was not shed (as the writer complains, 57:24) before 95 B.C.; not the Herods, for the Sadducees were not allies of the Herods, and Rome was not as yet known to the writer as one of the great world-powers. This last fact necessitates an earlier date than 64 B.C., when Rome interposed authoritatively in the affairs of Judaea.

In his attempt to solve the problem of the suffering of the righteous, the author of the Similitudes has no interest save for the moral and spiritual world. His view, too, is strongly apocalyptic, and follows closely in the wake of Daniel.

The origin of sin is traced one stage further back than in 1-36. The first authors of sin were the Satans (107). The Watchers fell through becoming subject to these and leading mankind astray (51:2). Though the Watchers were forthwith confined in a deep abyss, sin still flourishes in the world and sinners deny the name of the Lord of Spirits (58:2) and of his Anointed (18:10). Suddenly there will appear the Head of Days, and with him the Son of Man (102:3-4-8-2), to execute judgment upon all alike. To this end there will be a resurrection of all Israel (51:6-15), and all judgment will be committed to the Son of Man (41:5-6-27), who will judge all according to their deeds (41:1). Sin and wrong-doing will be banished from the earth (41:2), and heaven and earth be transformed (15:1-4), and the righteous will have their mansions in Paradise (39:4-11). The Elect One will dwell among them (45:4); they will be clad in garments of life (62:15-16), become angels in heaven (51:4), and continue to grow in knowledge and righteousness (58:1).

It will be observed that the Messianic doctrine in this section is unique, not only as regards the other sections of Enoch but also in Jewish literature as a whole (see, further, *ESCHATOLOGY*, § 66).

The Messiah exists from the beginning (48:2); he sits on the throne of God (41:2-5-7-3), and possesses universal dominion (62:3); and all judgment is committed unto him (62:27). If we turn to the other sections we find that in 1-36 and 91-104 there is no Messiah at all; whilst in 83-90 the Messiah is evidently human, and has no real rôle to play in the doctrine of the last things.

If the reader will turn to the list of Noachic interpolations (see above, § 24) he will find that many of them are to be found in this section.

APOCALYPTIC LITERATURE

They have as a rule been drawn from an already existing Apocalypse of Noah, and adapted by an editor to their present contexts in Enoch. This he does by borrowing from the Similitudes certain terms, such as 'Lord of Spies,' 'Head of Days,' 'Son of Man,' which, however, either through ignorance or of set intention, he generally gives a new connotation.

Chapter 71 does not belong to the Similitudes. It shows the same misuse of characteristic phrases as the interpolations just referred to (see Charles, *Book of Enoch*, 183 f.).

Part V, the Book of Celestial Physics, consists of 72-78, 82-79. This, like the preceding sections, is a work of independent authorship. There are no means of determining its date.

It has suffered from both rearrangements and interpolations at the hands of the editor of the whole work. In the first place, 81 f. is a manifest insertion written from a standpoint quite different from that of the rest. In the next place, 82 does not stand in its original position. The opening words of 79 in fact presuppose 82 as already read. We have found a similar dislocation of the text in Part III.

Part VI, the Nochiem and other interpolations. These have been enumerated above (§ 24).

The influence of Enoch on Jewish literature (to exclude for the moment the NT) is seen in *Jubilee* (written about the beginning of third Christian era), in the Slavonic *Enoch* (150 A.D.), *Test. xii. Patr.*, *Apoc. Bar.*, and in *1 Enoch*.

In Jewish apocalyptic before 70 A.D. Enoch is the chief figure next to Daniel; but his acceptance by the Christians as a Messianic prophet led to his rejection by the Jews. See note on § 10.

In patristic literature, Enoch is twice cited as Scripture in *Ep. Barn.* (13, 16). It is also quoted with approval, though not always by name, by Justin Martyr, Iren., and Athenag., Tert., Clem. Alex., Origen, Anatolius. Thenceforward it is mentioned with disapproval by Hilary, Iren., Jer., August., and finally condemned in explicit terms in the *Const. 17, 66*.

Far more important than its influence on Jewish literature, was its influence on NT doctrine (a) and doctrine (b).

(a) We shall here draw attention only to the indubitable instances. Enoch is quoted directly in Jude 14 f. Phrases, clauses, or thoughts derived from it, or of closest kin with it, are found in Jude 4, 14 f.; Rev. 2, 7, 3, 12, 18, 19, 20, 21; Rom. 8, 3, 24; 1 Pet. 1, 21; Heb. 11, 5; Acts 3, 14; Jn. 5, 22, 23; Lk. 9, 35, 10, 23, 35; Mt. 13, 24, 25, 41, 20, 42.

(b) The doctrines in Enoch that had a share in moulding the analogous NT doctrines, or formed a necessary link in the development of doctrine from the OT to the NT, are those concerning the Messianic kingdom and the Messiah, Sheol and the resurrection, and demonology, on which reference must be made to the separate articles on these heads and to Enoch's biography. We here content ourselves with remarking, as regards the doctrine of the Messiah, that four titles, afterwards reproduced in the New Testament, are first applied to the personal Messiah in the Similitudes. These titles are 'Christ' or 'the Anointed One,' 'the Righteous One,' 'the Elect One,' and 'the Son of Man.' The first title, found repeatedly in earlier writings but always in reference to actual contemporary kings or priests, is now for the first time (18, 10-52, 4) applied to the ideal Messianic king that is to come. It is here associated with supernatural attributes. The second and the third of these titles, found first in Enoch, have passed over into the NT: the former occurring in Acts 3, 17, 7, 52, 22, 14, the latter in Lk. 9, 35, 23, 15. The last title, that of 'the Son of Man,' is historically the source of the New Testament designation. To the latter it contributes some of its most characteristic contents (see Charles, *Book of Enoch*, 312-317).

III. THE BOOK OF THE SECRETS OF ENOCH.—This book has, as far as is yet known, been preserved only in Slavonic. For the sake of convenience we shall call it 'the Slavonic Enoch,' in contradistinction to the older book, which for the same reason we shall designate 'the Ethiopic Enoch.'

33. Secrets of Enoch: its fortunes.

This new fragment of the Enochic literature has only recently come to light through certain MSS., some of which were found in Russia and some in Syria. Although the very knowledge of such a book was, after probably twelve hundred years, the book was much used by both Christians and heretics in the early centuries.

Quotations appear from it though without acknowledgment, in the *Book of Adam and Eve*, *Apoc. Moses and Aaron* (480-500 A.D.), *890*, and *Dei actus, the book of Enoch* (500-550 A.D.). It is quoted by name in the *Apoc. of Bar.* (500-550 A.D.), *Test. xii. Patr.* (600-700 A.D.). It was referred to by Origen and probably by Clement Alex., and was used by Iren. Some passages of the NT may be derived from it.

There are five Slavonic MSS.; in two of them the complete text is found, while the remainder in three supply only a shortened and incomplete reduction. For the edition published by the present writer the two best of the above MSS. (A and B) were translated and put at the service of the editor by Mr. Monod.

The editor had at his disposal also Mr. M. Hill's translation of Prof. Sokolov's text, which is founded on these and other MSS. In 1890 Prof. Bonwetsch published his *Das Apokalyptische Enochbuch*, in which he gives a German translation of the MSS. A and B side by side, preceded by a short introduction.

35. Language. (a) The main part of the 'Slavonic Enoch' was written in Greek.

This is clear from such statements as (1) 30, 14, 'And I gave him a name (i.e., Adam) from the four substances: the East, the West, the North, and the South.' Adam's name is thus derived from the initial letters of the Greek names of the four quarters: ἀνατολή, δυσίς, ἄρκτος, μεσημβρία. This derivation was first elaborated in Greek; it is impossible in the Semitic languages. (2) The writer follows the chronology of Gen. 1; in 50, 4 he reproduces the 8 text of Gen. 32, 35 against the Hebrew. (3) He constantly uses Ecclesiastical, which was current chiefly in Egypt.

(b) Certain portions were based on Hebrew originals. Such a hypothesis is necessary to account for the quotations from it or references to it which appear in the *Test. xii. Patr.* The fact that the latter work was written in Hebrew obliges us to conclude that its author drew upon Hebrew originals in quotations and references.

36. Place. The book was written in Egypt.

This is deducible from the following facts: (1) The variety of speculations which it holds in common with Philo and other Hellenistic writers: thus souls were created before the foundation of the world, 23 f. (cp. Philo, *De Somno*, 1, 2; *V. Sol.* 8, 19, 20). Again, man had seven natures, 30, 9 (cp. Philo, *De Mundi Op.* 1, 3). (2) The whole Messianic teaching of the OT does not find a single echo in the work of this Hellenistic Israelite of Egypt, although he shows familiarity with most of its books. (3) Such monstrous creatures as appear in chap. 12 are natural products of the Egyptian imagination. (4) The syncretistic character of the creation narrative in 25 f. betrays Egyptian elements.

Materials originally derived from this book are discoverable in Joel and Cedrenus (1050-1200 A.D.), though in these authors the materials are assigned to other names. Two passages of the *Book of Adam and Eve* (see *Apocrypha*, § 10) in 16 and 18 are all but quotations from 29, 4 f. and 31, 2 of our book.

Again in the *Apoc. Moses*, 19 (ed. Tisch. 1866), we have a further development of 14-24 of our text, just as in *Apoc. Paul*, 14, οὗτος ἐστὶν ὁ παπιδεναός, εἶπα . . . δεινός . . . τοῦ γεννημένου τοῦ νεκροῦ τοῦ ἀγίου, a Christian adaptation of 8, 3. And in the midst of Paradise (8) the tree of life, on which God rests when he comes into Paradise. The section on the derivation of Adam's name in the anonymous *De Montibus Sina et Zion*, 4, is to be traced ultimately to 50, 13, and Augustine's speculation, *De Civ. Dei*, xxi, 30, 5, on the eighth eternal day to 33, 2.

Still earlier we find almost a verbal reproduction of 50, 5, 13, 1 in the Sibylline Oracles, 2, 75. In Irenaeus, *Contra Haer.*, 2, 3, the Jewish speculation of 33, 1 f. is reproduced, and possibly in Origen (see Lammatsch, ed., vol. xxi, 59). However this may be, there is no doubt as to the direct reference to 24, 30, 33, 8 in the *De Pernip.* 1, 32: 'Nam et in eo libello . . . quem Irenaeus conscripsit, ita refertur: Primo omnium crede, quia unus est Deus, qui esse fecit omnia . . . sed et in Enoch libro his similia describuntur.' There are good grounds for believing that in a still earlier period (50-100 A.D.) the writers of *Ab. Ev.*, 8, 10 and of *Apoc. Bar.*, 4, 2 were acquainted with 19, 1 and 31, 2 of this book respectively. In *1 p. Bar.*, 10, 8 and probably in 18, 4 the thought and diction are dependent on 32, 2-3 and 30, 15.

In the NT the similarity of matter and language is sufficiently great to establish a close connection if not a literary dependence.

With Mt. 5, 'Blessed are the peacemakers,' cp. 52, 11, 'Blessed is he who establishes peace'; with Mt. 5, 34, 35, 47, 'Swear not at all,' etc., cp. 29, 1, 'I will not swear by a single oath, neither by heaven, nor by earth, nor by any other creature which God made. . . . If there is no truth in men, let them swear by a word,

APOCALYPTIC LITERATURE

yes, yes, or nay, nay.' Again, with Mt. 23 and 24, cp 42:4 and 43:1, with Jn. 14:2 cp 9:2, with Eph. 4:3 cp 42:2; with Rev. 9:1 and 10:5 cp 42:1 and 43:7. Still earlier we find this book not only used but quoted by name in the *Test. Benj.* 3, where the statement *et hoc apocalypsis est* appears. *Apocalypsis* is drawn from 18:1. These are the 'origins' (*origines*) who, with their prince Satanael reject the holy God. Finally, the references to Enoch in *Test. Naph.* 4, *Test. Sim.* 3, *Test. Benj.* 9, are adaptations of 34:3.

The question as to the date has, to a large extent, been determined already. The portions which have a Hebrew background are at latest pre-Christian.

The *Test. Benj.* as from the fact of their quotation in the *Test. Sil. Patri.* Turning to the rest of the book, we find that the *Test. Benj.* is determined by the fact that it frequently uses *Heb.* 6:13-17, 17:5-18:1, 21:1-3, see the writer's edition of the Slavonic Enoch. The Ethiopic Enoch, further, is continually presupposed to be in the background. Its phraseology and conceptions are reproduced (7:4 f., 34:4 f., 35:2, etc.). At times its views are put forward in a developed form (8:1 f., 40:1 f., 64:1), and occasionally divergent conceptions are circulated (16:7-18). Finally, explanations are claimed to have been given by this writer which, as a matter of fact, are to be found only in his writings but in the *Test. Benj.* (see 40:4 f., 87:1). It is possible that the Book of Wisdom also was used by our author (see 65:4).

Since, therefore, Enoch, the *11th Enoch*, and Wisdom (1) were used by this author, his work cannot have been earlier than 30 B.C.

The *terminus a quo* must be set down as earlier than 70 A.D. For (1) the temple is still standing (12). This book was known and used by the writers of *1 Pet.*, *Revel.* and *1 Jo.* 1:1, and probably by some of the writers of the N.T. We may with reasonable certainty, therefore, assign the composition of the book in Greek to the period 30 A.D. The author is thus a contemporary of Philo, with whom, accordingly, we find that he holds many speculations in common. Much of the book, however, goes back to a Hebrew background of an earlier date.

The author was thus an orthodox Hellenistic Jew who looked to Egypt. He believed in the value of sciences (42:5-59:66:1), though he is content to endorse enlightened views with regard to them (15:4 f., 61:1 f.)—in the law (52:3 f.), and in a broad humanity (50:2-65:5 f.), in which the righteous will wear 'the raiment of God's glory' (22:9). In questions affecting the origin of the earth, of sin, and of death, he allows himself the most unrestricted freedom and borrows from every quarter. This Platonism (30:14), Egyptian (25:2), and Zoroastrian (58:1-6) elements are incorporated in his system. The result is highly syncretistic.

The book opens with a short account of Enoch as 'a very wise man' whom 'God loved and received so that he should see the heavenly abodes, the kingdoms of the wise, great, and never-changing God.' In chap. 1 two angels appear to Enoch and bid him make ready to ascend with them into heaven. In chap. 2 he admonishes his sons and directs them not to seek for him till he is brought back to them. Thereupon (3:6) he is carried up through the air into the first heaven, where he beholds a great sea and the elders, the rulers of the orders of the stars, and the treasures of the snow and ice and clouds and dew, and the angels who guard them. Then the angels bear him to the second heaven (7), where he sees the angels who had rebelled against God, imprisoned and suffering torments. These angels ask Enoch to intercede for them. Next, he ascends to the third heaven (8), where is Paradise, with all manner of beautiful fruits and 'the tree of life on which God rests when he comes into the garden,' and the four streams of honey, milk, oil, and wine, that water the garden, and go down to the Paradise of Eden, between cornubility and immortality. The angels inform Enoch that 'this place is prepared as an eternal inheritance for those who turn their eyes from unrighteousness, and accomplish a righteous judgment, and give bread to the hungry, and clothe the naked, and raise the fallen . . . and walk without blame before the face of the Lord.' Enoch is then taken to the northern region of this heaven (10), and shown 'a very terrible place' of 'savage darkness and impenetrable gloom,' with 'fire on all sides, cold, and ice.' He is told that 'this place is prepared as an eternal inheritance for those who commit evil deeds on earth, robbery, witchcraft . . . who oppress the poor, who are guilty of stealing, lying, envy, evil thoughts, fornication, murder, who worship gods without life.'

Thence Enoch is conducted to the fourth heaven, where he is shown the courses of the sun and moon (11), and the planets,

and the *chaikain*? (12; cp 10:6-7-8-9), and the eastern and western gates of the sun (13-16), and 'an armed host serving the Lord with cymbals and organs' (17).

In 18 he is taken up to the fifth heaven, where he sees the Watch-towers who had rebelled; their brethren were already confined in torment in the second heaven. Then he passes to the sixth heaven (19), where the angels who regulate all the powers of nature and the courses of the stars, and write down the deeds of men. Finally, he is raised to the seventh heaven (20-21), where he sees God sitting on his throne, and the heavenly hosts in their ten orders on the steps of the throne, and the Seraphim singing the trisagion. He takes down and worships (22). At God's command, Michael takes from him his earthly robe, and puts him with the holy oil, and clothes him with the raiment of God's glory. Thus Enoch becomes like one of the glorious ones. Under the instruction of Uriel (chap. 23), he writes 365 books, in thirty days and thirty nights, about things in heaven and earth, and about the souls of men created from eternity, and their future dwelling places.

In 24-26 God makes known to Enoch how he created the invisible out of the visible; how he commanded Ahab (possibly a corruption of Uriel, regarded as light or truth), and Abdiash (possibly from *אבד* or *אבד*, *אבד*, *אבד*, earth), to come forth and first ascend; and so the light on high and the world below were produced. And God divided the light and the darkness (25), and made the seven heavens, and caused the waters under the heaven to be gathered into one place, and made the earth in the waters (26). Such was the creation of the first day. And on the second day God created the heavenly hosts (27-31). And one of the archangels (Satanai) rebelled, and God cast him down (29:4 f.) from the heavens. On the third day (30:1-2) God raised the earth to produce trees and herbs, and planted Paradise. On the fourth (30:3-5), he made 10,000 lights to be in the various circles of the heavens: Saturn, Venus, Mars, the Sun, Jupiter, Mercury, the Moon. On the fifth (30:6-7), he created the fish of the sea, and the fowl of heaven, and every thing that moveth on the earth, and on the sixth he made man from seven substances, and called him Adam, and showed him the two ways. While Adam was in Paradise he could see the angels in heaven (31); but Satan envied him and deceived him. And God established the eighth day (31:2), at the beginning of which time should be a new world. The corruption of the earth and the deluge are then foretold, and the preservation of Noah (32). God bids Enoch return to the earth for thirty days and teach his sons during that time (36:18). Enoch admonishes and instructs his sons, tells them what he has seen, and gives utterance to nine beatitudes (39:1-42). He impresses on them the incomparable dignity of godliness: 'none is greater than he who fears God' (43). They are not to revile the person of man, but to present the offerings; yet they must not value these in fully, but consider the heart from which they spring (44-46). Enoch gives his books to his sons (47), instructs them not to swear (49), and bids them in meekness to accomplish the number of their days, and be obedient to the laws which they have received (50:1). Again he enumerates seven beatitudes and the ways with which they are contrasted (52). The departed saints, he says, do not intercede for the living (53). At the close of the appointed time (55:9) Enoch again addresses his sons. He declares that no soul shall perish till the final judgment, and that the souls of beasts will then bring charges against the men who ill-treated them. Further instruction follows, as to sacrifice and man's duty to the needy, and warning against contempt and lying (56-59). The people assemble in Ahuzan to take leave of Enoch, who addresses them on various topics and exhorts them to faithfulness. He is then carried up to the highest heaven. His sons build an altar in Ahuzan and hold high festival, rejoicing and praising God (64:18).

The value of the book, in elucidating contemporary and subsequent religious thought, may be exemplified by the fresh evidence it contributes on the following beliefs:

1. *The millennium.*—This Jewish conception is first found in 32:2-33:2. From this its origin is clear. The account in Genesis of the first week of creation came in pre-Christian times to be regarded not only as a history of the past, but also as a sketch of the future of the world. Thus, as the world was created in six days, its history was to last 6000 years; for 1000 years with God are as one day (Ps. 90:4; Job. 1:13; 2 Pet. 3:8), and as God rested on the seventh day, so at the close of 6000 years there should be a rest of 1000 years. *I.e.*, the millennium.

2. *The seven heavens.*—The detailed account of the seven heavens in this book has served to explain difficulties in the N.T. conceptions of the heavens, and has shown beyond the reach of controversy that the sevenfold division of the heavens was believed by Paul, by the author of Hebrews, and probably by the author of Revelation. On the Secrets of Enoch see also *ESCHATOLOGY*, § 75.

APOCALYPTIC LITERATURE

IV. THE ASCENSION OF ISAIAH. This apocryph has come down to us in its entirety only in the Ethiopic version. It is a composite work, as we

42. Accense. Isa. shall see, and two if not three of its constituents existed independently before their incorporation in the present work. Of these the oldest is undoubtedly 2:3-12 and 5:1-17, which contains an account of the martyrdom of Isaiah (cp. ISMAEL 1:31, 1:41). From this section, which is of Jewish authorship, seem to have been derived such statements as: 'they were sawn asunder, they were tempted, . . . they went about in sheepskins . . . being destitute . . . wandering in deserts and mountains' (11:1-17), cp. 2:1-12 5:1-17.

The next probable reference is in Justin Martyr (*c. Tryph.* 129), where he says, 'ye sawed (I and) in two with a wooden saw. So we find it in *1 Enoch* (*ch. parv.* 14) the reference is unmistakable, while in *Targum* the book in its matter is discussed; it is there called *apocryphus* *Isaiah*, or simply *apocryphus* (*1 p. ad. Genesim*, 9, *ad Mal.* 13:7 23:7, *in Jeremias* 1:1, 1:4). The first reference to the second part (6:11) is in *1 Enoch* (*11:1-17*, 10 and 11), where we are told that certain heretics made use of this work, which he calls *apocryphus* *Isaiah*, to support their opinions. There are speaks of an *Isaiah* *Isaiah*, and in the list of the Canon edited by Montfaucon and others is called *Isaiah apocryphus*.

The various renderings of the book were written originally in Greek. Thus, in 1:1-17 5:1-17 is followed where it differs from the

43. Language. Hebrew. Of the Greek the greater part has come down to us in a MS found in the National Library in Paris, and edited by Gebhardt in *Hilgenfeld's Zeitschrift* (1878), though it is not the original work, but a free recast and rearrangement of it (see below).

Translations from the Greek were made into Latin, Ethiopic, and Slavonic. Of the Latin version 6:11

44. Versions. were extant in the sixteenth century and were printed at Venice in 1522, but had long been lost to view when Tischler re-edited them in 1832. Two other fragments, 2:1-17 and 7:1-19, were discovered and published in 1828 by Müll, though that editor was not aware that they belonged to this apocryph. Happily, as remarked above, the entire work has been preserved in Ethiopic, and on the whole faithfully, as we can infer from the Greek and the Latin fragments.

The source of its corruptions are often immediately recognisable by retranslation into Greek. Thus in 3:1-14 the Ethiopic is 'quise ad advenit', the Latin 'prophetaus'. The original of both is *emprophus*, as we find in the Greek, but the Ethiopic translator has followed an inappropriate meaning. That followed by the Latin translator is admissible; but the context requires the ordinary sense of *emprophus* 'permitting'.

The Ethiopic version was first edited by Laurence in 1819 from one MS, and afterwards in 1877 by Dillmann from three MSS. To the latter edition are appended the Latin fragments. Next year, as we have already noticed, Gebhardt edited the Greek text. Although a free recast of our apocryph, it is very valuable for critical purposes, and in many respects confirms the critical acumen of Dillmann. Still there is need of a work which will give a text emended and corrected with the help of this Greek MS as well as of the Slavonic version and will deal more exhaustively with the different elements from which the apocryph is composed. This need Charles has tried to meet in his forthcoming work, *The Ascension of Isaiah*.

Ewald was the first to recognise the composite structure of this book, finding in it the works of three distinct authors. Subsequent criticisms, however, have only in part confirmed his analysis, and the best work as yet done in this direction is that of Dillmann. Dillmann's hypothesis is as follows: There were originally two independent works: one, an account of the martyrdom of Isaiah (2:3-12 5:1-17), of Jewish origin; the other, the vision of Isaiah (6:11 12:4), of Christian authorship. These two works were next combined into one volume by a Christian, who supplied them with a prologue and an epilogue (1:1-2 11:42 f.). Finally,

when the book had assumed this shape, another editor inserted 1:1-2 3:1-17 11:1-17 11:22-41. This will do as a provisional hypothesis, but it is not final, and Gebhardt, Schürer, and Deane are wrong in saying that it is borne out by external testimony, averring that in the Greek work there is no trace of the sections 3:1-17 11:1-17. By a minute examination of the Greek certain phrases which imply the author's acquaintance with 3:1-17 11:1-17 are discoverable (see Charles, *op. cit.*). Thus the final editing was completed before the composition of the Greek legend. Further, since 3:1-17 is found in one of the Latin fragments published by Müll, this section (1:1-17, 3:1-17) was already present before the Latin version was made. Too much stress must not be laid on the fact that 11:22-41 is represented in the Latin version by only a few lines, for it is characteristic of this version to abridge the text it is rendering.

The following is an outline of the contents of the book.

In the twenty-sixth year of his reign Hozekiah summoned Malinzech in order to entrust to him certain writings touching the future (1:1-2). Isaiah foretells to Hozekiah his martyrdom at the hands of Manasseh (1:1-17). On the death of Hozekiah, Manasseh abandons the service of God for that of Satan, and thus, owing to the evils perpetrated in Jerusalem, Isaiah and other prophets withdraw into the wilderness (2). Thereupon Bakuria, a Samaritan, accuses Isaiah and the prophets of prophesying evil things against the king and the people. As Bura has gained possession of the king's heart, the king sends and seizes Isaiah (3:1-17).

There is a sudden break in the narrative here (the conclusion of the martyrdom of Isaiah follows in 5:1-17), to explain the reason of Bura's anger, viz. Isaiah's vision and the revelation in which he had seen the future, rule and destruction of Samaria, as well as the coming redemption by Christ. In fact, we have the history of the Christian Church summarised briefly from the coming of Christ to the Second advent, and the last judgment (3:1-17). In this short apocryph we have the account of an eye-witness of the foundation of the early Church, 30-50 A.D. Church organisation is still in its infancy; the rulers are called presbyters and pastors; bishops are nowhere mentioned. There are disputes about the second advent, no plenary has as yet disappeared; the vice and greed of the Christian teachers are unparaphrasedly dealt with. The writer feels that the end is at hand. On 1:2-14, see above.

With 6:1 begins the vision which Isaiah saw in the twentieth year of the reign of Hozekiah; he discloses it to the king and to Josiah his son. In this vision Isaiah is conducted by an angel through the firmament and the six lower heavens, and is shown the chief wonders in each (7-12). Next he is raised to the seventh heaven, where he sees and the righteous from Adam downwards. He is then told of the coming advent of the Beloved into the world, and of his eternal dominion and resurrection. Finally, he sees the Beloved in the form of an angel, and likewise the Holy Spirit in the same form, and 'the Great Glory'—i.e., God, worshipped by the Beloved and the Spirit (9). In 10, Isaiah hears God commissioning his Son to descend into the world, and thereupon follows an account of this descent. In the concluding chapter are revealed the birth of Jesus and the history of his life on earth down to his crucifixion and resurrection, and ascension through the seven heavens to his seat at the right hand of God.

The Martyrdom of Isaiah proper (2:3-12 5:1-17), which is of Jewish authorship, was written some time in the

47. Date. first century of our era; the Vision (6:11) probably about its close; and the apocryphic section (3:1-17) *circa* 50-80 A.D.

For additional bibliography on this book, see Schürer, *Hist.* 5:145-146; Charles, *The Ascension of Isaiah*.

V. THE BOOK OF JUBILEES. The Book of Jubilees, which is really a haggadic commentary on Genesis, is

48. Book of Jubilees, its value. important as being the chief monument (practically the sole monument) of legal-istic Pharisaism belonging to the century immediately preceding the Christian era.

Just as we have the other side of Pharisaism, its apocalyptic and mystical side, represented in the Book of Enoch, so here we have its natural complement in the hard and inexorable legalism to whose yoke, according to the author, creation was subject from the beginning and must be subject for evermore.

Jubilees is not only indispensable to students of the NT and of the history of the Pharisaic movement; it is likewise of fundamental importance as a witness to the readings of the Hebrew text of Genesis about the

APOCALYPTIC LITERATURE

beginning of the Christian era. In this respect it comes next in worth to **S** and the Samaritan text, and presents us with much earlier readings than are to be found in the Syr. or Lat. versions, or in Targ. Onk. In the matter of determining the respective values of the Samaritan, **S**, and Massoretic chronologies its evidence will be practically of decisive weight.

This book has been variously named at different stages of its career. Its original name seems to have been 'Jubilees,' and not the 'Book of 49. Name.' So we find it in the Syriac fragment, and likewise in Epiphanius, where it is designated *ra' IwbyNai'a* or *o' IwbyNai'a*.

It is also called *h' Aeterni Perseae* in Epiphanius, Syncellus, and others. A title pointing back to *נִסְחָא דְּגֵנְזִי*. This name was given to it not because of its smaller bulk, for it is greater than that of the canonical Genesis, but on the ground of its inferior authority. Other variations of this title are *Μικρογενεσις* and *τα Αιωνια Ποσειδος*. In the Abyssinian Church it is named the 'Book of the Division,' from the first words of the inscription at the beginning; and we find still other designations. Thus, in the decree of Theodosius, according to Ronsch's emendation, we find 'Liber de Iulianis, Ade, hoc est Iepigenesis.' This name, as Ceriani observed, was given to the book because it contains the names of all the Patriarchs' wives and assigns them a prominent role in the course of events: a view that is confirmed by the Syriac fragment. Again, it seems to be identified by Syncellus with 'the so-called Life of Adam' *h' Aeternae Perseae* *h' Aeternae Perseae*, for he cites as from that book three passages that occur in Jubilees. This *Life of Adam* may have been identical with a part of Jubilees, or a later enlargement of a portion of it. Jubilees is once described as the 'Testament of Moses,' and once as the 'Apocalypse of Moses,' but only by very late writers.

Such being the origin of Jubilees and the conditions under which it was produced, it was naturally written in the sacred language of Palestine. **50. Language.** Of this we have direct testimony in Jer. 1 p. 78, *ad Ethiolim, mansione 18*, where he discusses a Hebrew word for which he could cite no authority save that of this book. The entire cast and the idiom of the book confirm the statement of Jerome.

We have further testimony to the same effect in the title of the Syriac fragment, in which the present book is designated 'The Hebrew Book called Jubilees.' It is further, impossible to deal with the textual corruptions unless we deal with them on this presupposition. In the case of many of these it is only necessary to retranslate them into Hebrew in order to discover the original misapprehension or misreading of the Greek translator. Some interesting translations of Hebrew words, moreover, still survive in the text.

Finally, fragments of the Hebrew original have come down to us embedded in the Midrashim. In these at times an entire sentence survives, preserving not only the words, but even their original order, as we can infer from the evidence of the versions.

There were probably four versions of Jubilees—Greek, Syriac, Ethiopic, and Latin. The first two were made from the original Hebrew. Of the Greek only some fragments have come down to us in Epiphanius and through such annalists as Syncellus and Cedrenus. Of the Syriac only a small fragment, containing the names of the Patriarchs' wives and a few other facts, survives.

The Ethiopic and the Latin versions were made from the Greek version, not from the original text. The former survives almost in its entirety, and from an exhaustive comparison of the best attainable text with all existing materials we find that it is most accurate and trustworthy. It is, indeed, as a rule, servilely literal.

It has, of course, suffered from the corruptions naturally incident to transmission through MSS; but it is singularly free from the glosses and corrections of unscrupulous scribes, though the temptation to bring it into accord with the Ethiopic version of Genesis must have been great. Only in about a dozen places did the temptation prove too great, with the result that changes were introduced into the text in subservience to that version.

Of the Latin version (made, as we have seen, from the Greek) more than a fourth has been preserved.

53. Latin. First published in 1571 by Ceriani (*Mon. sacra et prof. tom. i. fasc. i. pp. 130-2*), it was next edited with great learning by Ronsch in 1771 (*Das Buch der Jub. mit. Bistag. d. christlichen Kirche des 1. lat. Fragments*). Ronsch

emended the text in many passages; but as he was not aware that it had been corrected in conformity with **S** and with the A.g., and as, further, he had only a late representative of the Ethiopic version before him, his work is defective and far from final. A critically revised text of these fragments is given in Charles's edition of the Ethiopic text.

The Ethiopic MSS, of which there are four, belong respectively to the National Library in Paris (A), the British Museum (B), the University Library in Tübingen (C), and to M. d'Aldade (D). B is by far the

54. Text of most valuable; next in value comes A; C and D are late and very corrupt. In addition to these MSS, however, there is a vast wealth of materials for the criticism and reconstruction of the text in the Mass. and Sam. Texts, and in the Gr., Syr., Arm., and Lat. versions of Genesis; in the fragments of the Greek, Syriac, and Latin versions of Jubilees mentioned above; and in abundant other documents of a less directly serviceable nature.

(a) *The Ethiopic Text* has been edited twice: first by Di. in 1850 from two MSS (B, D), and next, by the present writer from A, B, C, D. Though Di. made no use of the critical materials just enumerated in the formation of his text, and it was, accordingly, in no sense a critical edition, it was a great boon to scholars at the time.

(b) Three translations have appeared: the first by Di. in 1850 from one MS (B, C); the second by Schade (*Bibl. Sacra*, 1855) from Di.'s edition of the text; and the third by the present writer (*JQH*, 1894, 1895) from the text published in 1895 referred to above.

Jubilees cannot have been written later than 70 A.D.; for the temple is throughout supposed to be standing.

As the book repeatedly uses Enoch (1-36) before 60 B.C. Though there is some evidence that would place it nearer the earlier than the later date, we shall leave the date undecided for the present.

56. Author. The author was a Palestinian Jew and a Pharisee.

Frankel's view (*Mon. 1856*, pp. 31-36, 320-40) that it was written by a Hellenistic Jew belonging to Egypt is rendered untenable by the fact that it was written originally in Hebrew. Nor can the writer have been a Samaritan, as Beer supposes (*Das Buch der Jub.*, 1857, *Nach ein Wort u. d. Buch der Jub.*, 1857); for, whereas the text agrees in turn with MT, **S**, Syr. A.g., with Onkelos, and even with the Ar. against all the rest, it never, strange to say, agrees with the Samaritan. This evidence is conclusive in its force; but we might further observe that, in speaking of the four places most favoured of God in all the earth, the author enumerates Eden, Sinai, Zion, and the mountain in the East, but not Gerizim. Again, that he is not a Sadducee is proved by the fact that he believes in angels and in the immortality of the soul. Nor, finally, was he an Essene; for, though some characteristics (a highly developed angelology, the doctrine of the immortality of the soul without the resurrection of the body, the exaggerated reverence for the Sabbath and the number seven) would seem to agree an Essene origin, such an origin is absolutely precluded by the enforcement of animal sacrifice and the absolute silence as to the washings and purifications that were of such importance among the Essenes. Thus, though in some legal questions of less moment (Beer, *Das Buch der Jub.*) the author's views are at variance with traditional Pharisaism, in all essentials he is emphatically a Pharisee of the Pharisees.

That Palestine was the home of the author is deducible in the first instance from the language in which he wrote. A Hellenistic Jew would not have written in Hebrew. Again (not to press other details), the duty of absolute separation from the heathen, which is repeatedly enforced, would have been impossible of fulfilment for any Jew outside Palestine.

There are several lacunae in the book; but as far as evidence is forthcoming, these seem to be slight. It appears, on the other hand, to be free from interpolations.

A curious phenomenon, however, presents itself in chap. 7. Verses 22-23 seem to be an extract from the Book of Apoc. of Noah, beginning in an indirect form with 22, 23 and changing into the direct with 24, 25, whence to the end Noah admonishes his sons in the first person. These verses are similar to the Non-lit. interpolations in the Book of Enoch (see above, § 4).

The contents of Jubilees may be briefly described as a haggadic commentary on the biblical text, from the creation of the world to the institution of the Passover, in the spirit, and from the point of view, of later Judaism. Its aim is to prove the everlasting validity of the law. The work assumes the form of a revelation to Moses, made on Mt. Sinai by the 'angel of the presence' in the first year

1. *The 14th Vers. of the Heb. Book of Jubilees*, ed. from four MSS. R. H. Charles, M.A., 1895. Clarendon Press, Oxford.

APOCALYPTIC LITERATURE

of the Exodus. The author thereby seeks to secure a divine sanction for the additions he makes to the biblical narrative. Among these the most important novelty is his chronological system.

In this system the basis of reckoning is the jubilee period of forty-nine years. This jubilee period is subdivided into seven year-weeks of seven years each. Hence, in order to date any event exactly, the author determines it as occurring on a certain day of a certain month of a certain year in a certain year-week of a certain jubilee period. Fifty of these jubilee periods are assumed as the interval between the creation and the entrance of the Israelites into Canaan. The year strangely consists of fifty-two weeks (*i.e.*, 34 days), and, in opposition to the Pharisaism of his time, he claims that the year should be regulated by the movements of the sun without reference to those of the moon. The dates assigned to the various events, though presenting many difficulties, favour in the main the Samaritan chronology.

Another object of the author is to carry the Jewish edicts back into the patriarchal or even pre-Adamite period.

Thus we are given to understand that the angels observed the rite of circumcision; while, as regards the great annual festivals, the Feast of Weeks was observed by Noah and Abraham, the Feast of Tabernacles was first celebrated by Adam about the time of the birth of Isaac, and the Day of Atonement was established by Jacob in memory of the loss of Joseph. Again, the law regarding the purification of women after childbirth (Lev. 12) is traced to the fact that Adam was created in the first week and Eve in the second; to this is due the command 'Seven days for a woman-child and two weeks for a middle-child.'

Certain variations from the prescribed ritual are observable in relation to the festivals. Thus, the mourning of fasting on the Day of Atonement and the exclusion of the manumitted from the Passover are omitted; while in the case of the Feast of Tabernacles there is no reference to the custom of drawing water from the pool of Silvan and pouring it out upon the altar. Though in the last instance the author agrees with the Sadducees, it must be admitted that the practice was a Pharisaic innovation and that the Sadducees had the law on their side.

Another notable characteristic of the work is the increased rigour of many of the Levitical ordinances.

Thus, the man who eats blood is to be utterly destroyed, and the father who gives his daughter, or the brother who gives his sister, in marriage to a heathen, is to be stoned to death, and the woman to be burned. Death is to be the universal penalty for breaking the Sabbath; and the Sabbath is broken by buying or selling, by lighting a fire, by drawing water, by talking of an intended journey, or by lying with one's wife.

Another no less interesting characteristic is the care either to leave unrecorded or to palliate the faults of the Patriarchs as well as to multiply their virtues.

Thus, from the first they were scrupulous observers of the ritual and ceremonial law before its authoritative promulgation on Sinai. There is no mention made of Abraham's deceit at the court of Pharaoh; Jacob's answer to Isaac's question 'Art thou my very son Esau?' is cleared from verbal falsehood by representing him as answering 'I am thy son.' This quibble is found likewise in the Talmud, and may therefore have been a stock interpretation of Jewish exegesis. Again, whereas in Genesis Levi is cursed for his share in the destruction of Shechem, in Jubilees he is highly honoured for the same action and his posterity elected to an everlasting priesthood. We find the same view taken by Philo (*De Fecunditate*, 20).

Akin to the aim just described is the attempt to justify from the standpoint of a later age the severities practised by Israel in their conquest of Canaan.

It is a Jewish prototype of Rousseau's Social Contract. Thus it is represented that, in the presence of an angel, Noah divided the earth by lot amongst his three sons, and bound them and their successors by the most sacred oaths to observe the arrangement. Destruction was involved on the head of him who transgressed it. According to the sequel, Canaan seized upon Shem's inheritance; and thus our author justifies the extermination of his descendants by Israel.

As has already been pointed out, though the immortality of the soul is taught, there is no resurrection of the body. In the restored theocracy that is foreshadowed there may be a Messiah. See, further, ESTERHARTZ, § 72.

For the literature of this book see Roush, *Das Buch der Jub.* 422-432; Schurer *op. cit.*; Charles, *The Book of Jubilees*.

VI. THE ASSUMPTION OF MOSES. Of this book, which from the twelfth century was regarded as lost, a

large fragment was rediscovered by Ceriani in the Ambrosian Library in Milan and published by him in 1861 (*Mon. tom. i. fasc. 6. pp. 55-64*). This fragment was part of an old Latin version, and is written on a palimpsest of the sixth century—the same

MS. that contains the Latin version of Jubilees—which originally belonged to the monastery of Bobbio.

Before this discovery, however, we were, from various sources, in some degree acquainted with the contents of the book.

Thus, the account of the strife between the archangel Michael and Satan about the body of Moses was drawn, as we know (Origen, *De Principiis*, 3.21), from the apocryphal book entitled the *Assumptio Moysi* (i.e., ἀνάληψις Μωϋσέως). Many other writers testify to the existence of this apocryph. Besides the reference already noticed in Origen, there are other references in citations in Clem. Alex. (*Strom.* 1.21.153.615.119); in Origen (*In Joannem homil.* 21); Diodorus Alex. (*In ep. Jud. canon. at.* in Galland, *Biblioth. Patr.* 6.207), in Eusebius, Apollinarius, the Stichometrists, and in the *Acta Synodi Nicaenae*, 218. This last reference must be given in full as the passage quoted is found in Ceriani's fragment, — Μελλοεισιν ἀποσταλῆναι Μωϋσῆν εἰς τὸν οὐρανὸν, ὡς γέγραπται ἐν βιβλίῳ Ἀναλήψεως Μωϋσέως, πρὸς καθάρτην τῶν ἁγίων τοῦ Ναου καὶ διαδοχῆς πρὸς αὐτοὺς εἶρη· καὶ πρὸς καταστάσιν τοῦ σώματος αὐτοῦ ἐν τῇ δόξῃ τοῦ αἵματος. The words quoted are thus rendered in the Latin fragment (114): *Itaque exspectavit ei mittent moysi, ut dimitteret orationem pro peccatis suis, ut simul ad iter testamenti illius.* The text of the quotations are in the main from the part of this book which is lost.

Of the derivation of our Latin text from the Greek there can be no question. This Greek work is trans-

lated; as *chēdōn* from *κεδῶν* 117, *herēnā* from *ἐρήνω* 31, *libēn* from *θαλίης* 37, and *acrobēstia* from *ἀκροβήστρια* 84.

Again, we are not infrequently obliged to adopt not the Latin text but the Greek it presupposes, which has been misunderstood by the translator. Thus 'ab oriente usque ad occidentem,' which means 'from the east to the west,' is derived from *ἀπὸ ἡλίου ἀνατολῆς μέχρι διαμεριού*, which means also 'from sunrise to sunset' the meaning required by our context. For similar instances see 11 and 18. Finally, retranslation into Greek makes it evident that in the case of some corruptions in the Latin the error arose through the confusion of different though similar forms of words: *ep* 27 34 56 114. In 11 we have the Greek article rendered by *hic*.

The derivation of our text from a Semitic original was stoutly denied by Volkmar, Hilgenfeldt, and others.

This position, however, can no longer be persevered in. A Semitic original must now be conceded. It remains a matter of debate whether the balance of evidence is in favour of an Aramaic or of a Hebrew source. Rosenthal decides for the latter; Schmidt-Mey, Colan, and Carrière for the former. Notwithstanding all that has been advanced by these three scholars, however, in support of their contention, the evidence points decidedly in the direction of a Hebrew original.

Rosenthal restores three or four passages by means of retranslation into Hebrew. In Charles's *Assumption of Moses* (1897) the necessity of such an hypothesis is shown alike in the Hebrew character of the Latin version and in the possibility of removing most of its corruptions by means of retranslation into Hebrew. Thus in 616 we must follow the Hebrew presupposed by the Latin; next, in 64 there is a play upon words possible only in the Hebrew; again, there are Hebrew phrases and constructions reproduced in 115 247 311 316 101. Finally, it is only through retranslation into Hebrew that we can understand the text or get rid of its corruptions in 14 53 109 116 127.

Schurer has already pointed out (*Hist.* 3.21) that the Latin version we possess is in reality a 'Testament of

Moses,' although quoted in the Acts of the Council of Nicaea as the *Assumptio Test. Moses*. Moreover, and has concluded that 'these designations were the titles of two separate divisions of one and the same work, the first of which has been preserved, whereas the quotations in the Fathers almost all belong to the second.' The present writer's studies tend in some degree to support this conclusion.

Thus in the Latin version (114 and 1014) Moses speaks of his death as an ordinary one, and the same fact undoubtedly was stated in 1012 before it was interpolated by the editor who joined the 'Testament' and the 'Assumption of Moses' into one book. Thus in 1012 the text is: 'erunt enim a mortis receptione usque ad adventum illius tempore CCI.' Schmidt-Mey and Hilgenfeldt, and Hilgenfeldt, in their editions, are failing to see that 'receptione' was introduced by the final

APOCALYPTIC LITERATURE

editor into the text of the 'Testament' which recounted nothing of Moses' Assumption, in order to prepare the reader for the main subject of the added work, the 'Assumption of Moses'.

Schürer apparently assumes that both the 'Testament' and the 'Assumption' were from one and the same author; but the facts stated above are against this supposition. The Latin fragment is the *Διαθήκη Μωσέως* mentioned in the Stichometry of Nicephorus. It is there said to consist of 1100 lines. Of these about half have survived. Some writers have sought to identify this 'Testament' with the Book of Jubilees. This is impossible. Since 4300 lines are assigned to Genesis in Nicephorus' Stichometry, this 'Testament of Moses' would have above 5000 or 6000 if it were the Book of Jubilees, for the latter is much longer than Genesis.

About one-half of the original Testament has been preserved by our Latin Version.¹ It is possible that the latter half dealt with certain revelations about creation made by Moses, and that it closed with his disappearance in a cloud, so that his death was hid from human sight.

We make this conjecture on the ground of the following statement in an old Catena on the Pentateuch (Fabric. *Cod. Apoc. l. 7. f. ii. 121-122*). "Est quidem in apocrypho mysticoque codice legere, ubi de creatis rebus subtilius agitur, nulum in sciam, quo tempore mortuus est Moses, locum sepulchri complexum oculis circumstantium perscrutasse ita, ut nullus neque morientem legislatorem neque locum videre posuerit, nisi cadaver conderetur." On the 'bright cloud' see also Jos. *Ant. iv. 849*.

On the question of the date of the Assumption of Moses the opinions of critics oscillate between the death of Herod the Great and the death of

64. Date. Bar-Cochba. The later date is impossible. Ewald, Wieseler, Drummond, Dillmann, and Schürer assign it to the first decade after Herod's death; Hilgenfeld assigns it to 44-45 A.D.; Merx to 54-64 A.D., and so also Fritzsche; Baldensperger to 50-70 A.D. On various grounds all these determinations are unsatisfactory. The real date appears to lie between 4 B.C. and 30 A.D. It cannot be later than 30 A.D. Towards the close of chap. 6 it is stated that the sons of Herod should reign for a shorter period (*breuiora tempora*) than their father—a statement that could have been made only while they were still living, since it is true of Archelaus alone; for Antipas reigned forty-three years, Philip thirty-seven, and Herod himself only thirty-four. The book must, therefore, have been written at the latest less than thirty-four years after Herod's death (4 B.C.)—i.e., earlier, at all events, than 30 A.D. The limits may, however, be defined more closely; for the prediction that Herod's sons should rule for shorter periods than their father, may owe its origin to the general expectation that the sons of such a wicked king could not long preserve their authority, but still more to the actual deposition of Archelaus in 6 A.D.—an event that would naturally be construed by our author in the light of a divine judgment and suggest to him the prediction that appears in the text as to the impending fate of Philip and Antipas. Hence the earliest limit of composition is 7 A.D.

As for the author, he was not a Sadducee; for according to chap. 10 he looks forward to the establishment of the Messianic kingdom by God in person. Nor is it possible, with Wieseler

and Schürer, to regard him as a Zealot; for (1) there is not a single incentive held forth to encourage men to take arms in behalf of the theocracy; (2) the actual advent of the kingdom is brought about, not by any action of the righteous in Israel, but

¹ It is to be remarked that we have in this Latin Fragment a clear instance of dislocation of the text. The perception of this fact removes some of the main difficulties in the way of interpretation. In order to recover the original order, we have to restore 8 f. to their original position, before 6. For the grounds of this restoration of the text, see the present writer's edition of the book.

by the archangel Michael (10:2) and God himself (10:7); (3) the author's ideal of duty as regards preparation for the Messianic kingdom is that depicted in 9—i.e., absolute obedience to the law and non-resistance. The faithful Israelite was quietly to do his duty and await God's will. The writer, accordingly, glorifies the old ideals cherished and pursued by the Hasid and Early Pharisaic party, which the Pharisaism of the first century B.C. had begun to disown in favour of a more active rôle in the life of the nation. See § 81. God would in his own good time interpose in person (10); at all events, he would avenge the death of his servants (97). Our author pours the most scathing invective on his religious and political opponents, the Sadducees, whom in 7 he describes in terms that frequently recall the anti-Sadducean Ps. of Solomon. (Through some inexplicable misapprehension, Schürer and others have regarded this chapter as a description of the Pharisees.) The author, therefore, was a Pharisee, and a Pharisee who was the antithesis of the Zealot exactly in those respects in which Pharisaism differed from Zealotism. His book was designed as a protection against the growing secularisation of the Pharisaic party through its adoption of political ideals and popular Messianic beliefs. To guard against the possible suggestion of an Essene author, we may remark that such a derivation is absolutely precluded by the recognition of animal sacrifices, by the declaration of the speedy coming of the Messianic or Theocratic kingdom, and by the strong sense of national life, unity, and triumph. See Charles's *The Assumption of Moses*, pp. 51-54; and cp ESCRATOLOGY, § 73.

The following is an outline of the contents of Ass. Moses 11-19: Introduction. 10-17 Moses tells Joshua that he is about to die, and commits certain books of prophecies to his safe-keeping. In 2 f. the subsequent history of Israel down to the captivity is briefly but

66. Contents. clearly outlined. In their captivity the tribes remember that all that had befallen them had already been foretold by Moses. In 4, owing to the prayers of one who is over them (Daniel), God will take pity on them and raise up a king (Cyrus) who will restore some fragments of their tribes to their own land. These will mourn because of their inability to sacrifice to the God of their fathers. Judgment (5-7) will overtake their oppressors (the Seleucid kings). Yet they themselves (the Sadducees and the Hasids) will be divided as to what is true, and the altar and temple will be defiled by men who are not priests (as Menelaus, who was a Benjamite), but slaves born of slaves (5:2-4) (the paganising high-priests who were nominees of the Seleucids), and many of them (the Sadducean priesthood and aristocracy), moreover, will be respecters of persons and unjust, and their country will be filled with unrighteousness (5:5). Then (8:1-5) a fresh vengeance will alight upon them, in which the king of kings (Antiochus) will crucify those who confess to their circumcision, and force them to bear on their shoulders impure idols, and to blaspheme the word. A man of the tribe of Levi (9:1-7), whose name is Taxo (i.e., Eleazar (2 Mac. 6:19); for, as Burkitt has discovered, Taxo is a mistake for Taxoc = ταξω = תאצו which by gematria = תאצו), will say to his seven sons: 'Let us fast three days, and on the fourth let us go into a cave which is in the field and die, rather than transgress the commands of the God of our fathers.' In 9:1-7 we are told of the assumption of royal power by the Maccabees, and of Herod as their successor who is to reign for thirty-four years. He will beget sons, who will reign as his successors, but for shorter periods. Then follows (9:8-9) the capture of Jerusalem by a king of the west (Varns). Soon after, Judea becomes a Roman province. The author next launches out into a scathing denunciation of the Sadducees, of whose injustice, greed, and gluttony we have an account in 7. Thereupon (10:1-10) the times are fulfilled, and God appears to judge the enemies of Israel (10). Moses is then represented as exhorting Joshua to guard these words and this book (10:11). When Joshua deprecates his inability to lead Israel (11), Moses bids him not to depreciate himself and not to despair of the future of his people (12). Here the fragment ends.

APOCALYPTIC LITERATURE

VII. THE TESTAMENTS OF THE XII. PATRIARCHS.— The earliest reference to this book by name is in Origen in his *Hom. in Joannem*, 156 (Ed. Lommatsch 1144): 'in aliquo quodam libello qui appellatur testamentum duodecim patriarcharum, quamvis non habetur in canone, talem tamen quendam sensum invenimus, quod per singulos peccantes singuli satanae intelligi debent' (cp Reuben 3). It is possible, indeed, that in the preceding century the ideas of *Fragment 17* in Stieren's edition of Irenaeus (136-337) are derived from this book: *ἐξ ὧν ὁ Χριστὸς προετιπώθη καὶ ἐπεγνώσθη καὶ ἐγεννήθη ἐν μὲν γὰρ τῷ Ἰωσήφ προετιπώθη· ἐκ δὲ τοῦ Λεὼ καὶ τοῦ Ἰούδα τὸ κατὰ σάρκα, ὡς βασιλεὺς καὶ ἱερεὺς ἐγεννήθη· διὰ δὲ τοῦ Σιμεὼν ἐν τῷ ναφ̄ ἐπεγνώσθη. . . διὰ δὲ τοῦ Βενιαμὴν τοῦ Ἰακώβ, εἰς πάντα τὸν κόσμον κηρύχθεις ἰδοῦσασθαι*. This conjunction of Simeon and Levi is found in *Sim. 7*; *Lev. 28*; *Dan 5*; *Gad 8*; *Jos. 19*; *Benj. 11*. Since, however, it is now demonstrable that the Christian elements in the Testaments are due to interpolation, it is not possible at the present stage of criticism to determine the relative chronology of these elements and the writings of Irenaeus.

The passages in Tertullian *Adv. Marc.* 51, *Scorpiae* 13, which most critics from Grabe onwards have regarded as based on *Benj. 11*, are due, as Schürer has already recognised, simply to the patristic interpretation of *Gen. 19:27*. This eleventh chap. of *Benj.*, which contains the striking account of Paul, is not found in the Armenian version, and is for the most part wanting in the Greek MS R. On these and on other grounds we may safely regard it as one of the latest of the Christian interpolations.

There is possibly an allusion to this book in the contemptuous words of Jerome, *Adv. Vigilant.* 6. The Testaments are next mentioned in the *Stichometry of Nicephorus*, in the *Synopsis Athanasii* as well as in the anonymous list of books cur- by Montefaucon, Petra, and others. In these lists the book is simply called *Ἡραπάρχαι*. After this date the Testaments are lost to knowledge till their reappearance in the thirteenth century, when Robert Grosseteste, Bishop of Lincoln, translated them from Greek into Latin. The MS from which the translation was made is the tenth century Cambridge MS of this book (Sinker). This Latin version was the parent of almost all the European versions.

The work consists, as its present title indicates, of the dying commands of the twelve sons of Jacob to their children. Each Testament deals with a fresh virtue or vice which finds apt illustration in the life of the particular patriarch. Thus, according to the titles in Sinker's text, Simeon deals with the vice of envy, Zebulun with compassion and mercy, Dan with anger and lying, Gad with hatred, Joseph with chastity, and Benjamin with a pure mind. These titles are appropriate; but in manuscripts O and R all mention of the virtues and vices is omitted; in P they are generally wanting, and when they are given they differ in all but two instances from Sinker's text, while in the Armenian version they are wanting in Simeon, Issachar, Zebulun, and Benjamin; for 'concerning chastity' in the title of the Test. Joseph we have 'concerning envy'; they differ in the case of Levi, Gad, and Asher; only in the case of Judah do they give a divided support to the Cambridge MS, which Sinker follows. We may, therefore, regard the title of each Testament as originally consisting of the word *Δαθήκη*, followed by the name of the patriarch to whom it was attributed. It is possible, moreover, that the title was originally still shorter—i.e., as we find it in the Oxford MS, merely the name of the patriarch. The fact that in the *Stichometry of Nicephorus* and in the *Synopsis Athanasii*, as well as in the anonymous list of books edited by Montefaucon, Petra, and others, the book as a whole is designated simply *Ἡραπάρχαι* points in the same direction; and this evidence is the more weighty since

the adjoining books in these lists have their full titles given. This supposition receives further support from the initial words of the Testaments themselves. In the case of seven of the Testaments the contents are simply described as the *λογος* of the Patriarch, which they spake or ordained (*ἔλαλεν*, *εἶπεν*, or *διατίθησθαι*) before they died. It is only in the case of the remaining five that each is described as a *δαθήκη* which the patriarch spake, enjoined, or ordained (*ἔλαλεν*, *εἶπεν*, *ἐντέλλεσθαι*, *διατίθησθαι*). It is probable, therefore, that the original title of the entire book was 'The Twelve Patriarchs.'

In the next place, it is noteworthy that in each of the Testaments three elements are distinguishable. (1) In

each instance the patriarch gives a brief or detailed account of his life, in which his particular virtues or vices are vigorously emphasised. The biblical notices of his life are expanded and enriched after the manner of haggadic Midrash. In a few instances their place is taken by materials that conflict directly with the biblical narrative. (2) The patriarch next proceeds to press upon his children a series of exhortations based upon and naturally suggested by the virtues or the vices conspicuous in his own career; they are to imitate the one and to shun the other. (3) Finally, the patriarch gives utterance to certain predictions which bear upon the future of his descendants, and the evils of overthrow and captivity which they will entail upon themselves by their sins and apostasies, and their breach with the tribes of Levi and Judah. These predictions are generally (a) of purely Jewish authorship; but many are (b) distinctively Christian.

To account for the difficulties which confront us in this work, Grabe (*Spicileg. Patrum*²⁹ [1714], 1430-1443-574) was the first to suggest that

the book was written by a Jew and subsequently interpolated by a Christian. This hypothesis was for the time so successfully combated by Corrodi (*Krit. Gesch. des Chiliasmus*, 210-115) that most subsequent writers, such as Nitzsch, Lücke, Ritschl, Vorstmann, Hilgenfeld, Dilmann, and Sinker, have practically ignored the question of the integrity of the book and confined themselves mainly to the discussion of the religious and national affinities of the author.

Nitzsch (*De Test. xii. Patriarcharum libro P^o psudo.*, Wittenberg, 1810) describes the author as a Jewish Christian of Alexandria who had imbibed many of the Essene doctrines that were then current. Ritschl (*Entsteh. der altkathol. Kirche*, 1. Aufl. 322 ff.) assigns the book to a Gentile Christian, appealing principally to *Benj. 11* (a chapter really due to Christian interpolation; see § 68). Ritschl's view was vigorously assailed by Kayser (*Die Test. d. Zwölf Patr.* in Reuss and Cunitz's *Beitr. zu den theol. Wissenschaften* [1751], 107-140), who on several grounds derives the book from Ebionite circles, reviving on a large scale Grabe's theory of interpolation in order to arrive at this result. Kayser's treatise was in turn examined by Vorstmann (*De Test. xii. Patriarcharum origine et pretio*, 1857), who, after a detailed criticism of Kayser's arguments, concluded that the Testaments present no trace of Ebionism, but were the work of a Gentile Christian. Hardly had Vorstmann thus vindicated the view of Ritschl when a second edition of this scholar's work (see above) appeared, in which his former contention (pp. 172-177) was abandoned as impossible, and the theory of a Nazarene authorship was advocated. Ritschl's first view, however, has received the continued support of Hilgenfeld (*Zit. T.* [1853], 395 ff. [1871] 302 ff.), whilst Lange (*Des Judenthums in Pal. zur Zeit Christi*, 140-157) and Sinker (*Die Test. xii. Patr.* [1860], 16-24; art. 'Test. xii. Patr.' in Smith's *Dictionary of Christian Biography*, 485-487) hold fast to the theory of a Jewish Christian authorship.

If there were no other methods of determining the questions of authorship and date than those pursued by Nitzsch and his successors, finality or even progress in such matters would be a sheer impossibility. To Schnapp (*Die Test. der xii. Patr. untersucht*, Halle, 1884), however, is due the credit of lifting the criticism of this book out of the arena of fruitless logomachies by returning to Grabe's hypothesis of Christian interpolation of an originally Jewish work. Schnapp's theory is that in its original form the book consisted of biographical details respecting each of the patriarchs and of exhortations suggested by these details. Thus the work com-

APOCALYPTIC LITERATURE

prised only two of the three elements mentioned in the preceding section (§ 70). Subsequently, however, the book was worked over by a Jewish writer, who inserted, generally towards the end of each Testament, sections dealing with the future fortunes of the tribes and other matter of an apocalyptic nature. Finally, at a later period still, the book thus enlarged was revised by a Christian, who in some passages merely modified the text by slight changes, but in others made large interpolations. Thus we have three writers concerned in the Testaments: the original Jewish author, the Jewish interpolator, and the Christian interpolator. It is not difficult to prove that in the main this theory is true.

claim to prove that in the main this theory is true, this in the Testament of the Messiah we have two partially collating accounts derived from different authors: *Lev.*, 1-10a, and 10b-18. As early as 1830, indeed, Sinkov suggested a post-terrestrial authorship as the solution of certain difficulties in the narrative,¹ but he made no attempt to verify this hypothesis, and it was reserved for Schnegge to establish beyond question the dual origin of this Testament and the other Testaments. The same co-mingledness is observable on a smaller scale in *Benj.* 2, where 25 conflicts with 27 and with every other reference to the same subject in the rest of the Testament. Again, in *Levi* 2 *ὁ δὲ ἀποστασίου* (27) *ἢ ἐν τῇ καπνῷ μου* we have a large addition which conflicts with the words before and after, *Levi* 3, *ἀποποιεῖς ἐξ Βεθλὴν* is open to the same criticism. Again, in *Dan.* 5, in adjoining sentences *Levi* is commended as the guide and stay of Israel and denigrated as the leader in Israel's apostasy. It is needless to multiply such instances further. The presence of additions to the list from a Jewish interpolator is unquestionable.

It is, however, no less certain that all the Christian passages have been inserted in the text not, as Schnapp supposed, by a single Christian interpolator, but by a succession of such interpolators.

The grounds for this conclusion will be found in Conybeare's valuable article (*On the Jewish authorship of the Twelve Patriarchs*) (*JQR* [1904] 375-398). By collating the Armenian version with the Greek text of Simke, this scholar has shown that most of the Christian passages in the latter are not to be found in the former. Thus when the Greek MS used in making the Armenian version was written, the process of Christian interpolation had advanced only a short way in the direction in which later it progressed so far. In the Armenian version we have thus a striking confirmation of the critical sagacity of the scholars who saw in the Testaments a Jewish work interpolated later from Christian sources. With the fresh materials at our disposal, there is a splendid opportunity for a critical edition of the text, and a scientific edition of the work in which the various elements will be duly discriminated, their dates as far as possible determined, and their bearing on history elucidated.

We have now arrived at a stage when we are in a position to consider the question of the original language of the Bible.

72. Language. of the Testaments. Apart from Grabe, no notable critic has advocated a Hebrew or Aramaic original. This is only what might be expected, since nearly all the students of this book believed in its integrity and Christian authorship. However, now that by means of external and internal evidence we have come to see that the book was originally Jewish, the question as to its original language can no longer be evaded. On two grounds the present writer is inclined to advocate a Hebrew original. Space does not suffice for dealing with the first here. Let it merely be observed that fragments have been found in the Testaments which are not explicable on the assumption of a date later than 100 B.C. This and other kindred questions will be dealt with at length in the present writer's forthcoming edition of the Testaments. The second reason for supposing a Semitic origin is to be found in the language. Dr. Gaster ('The Hebrew text of one of the Test. xii Patr.' *PSRL*, Dec. 1893, Feb. 1894) gives some evidence which points in this direction.

In the article just referred to, indeed, he publishes what he claims to be the "actual Hebrew text of the Testament of Naphthi" entitled *SEPHARVA*. "In this text," he writes, "we have undoubtedly the original version of the Testament, free from any interpolation." He adds: "The Greek counterpart of the Hebrew makes no sense and has no meaning at all; while the Hebrew is rounded off and complete, and perfectly clear." It is not necessary to traverse the statements at any length.

¹ Most of Schnapp's conclusions have been accepted by Schurer (1935, p. 114-124).

First of all, the style of the Hebrew is not earlier, as Dr. Neulohr informs us, than the 7th or the 8th century A.D. In the next place, even if it were early, it can lay no claim to being the original of the Greek 'Testament.' All that could be urged is that the two texts possess some material in common. Their aim and their spirit are as antagonistic as possible. This Hebrew Naphthali, in fact, is a strong polemic against Joseph, whereas in the Greek Text, xii. Patr. as well as in Jubilees, Joseph is universally extolled for his goodness and virtue, and the various patriarchs are punished in proportion as they are hostile to Joseph. By the name of Joseph in this polemical treatise we are probably to understand the ten tribes and their successors the Samaritans. Though this treatise was undoubtedly

[illegible]

Subjoined are some of the arguments for a Hebrew original.

[illegible]

Before leaving the question of a Hebrew original it will be well to notice some of the arguments advanced by Mr. Sinker in favour of the original being Greek.

(1) He urges that the very title αἰ διαφάσι κ. τ. λ. is against the hypothesis of a Hebrew original. But it is probable that the title was merely of ἡ παρὰ τὴν ἑβραϊκήν; see § 69, end. (2) He argues that such periphrastics as ἀσβερί, ροδεντρί (Benj. 4); ἀσάβρις, ἀσάβρις (Judah 23); ἐν τὰς, ἀκρότι; and τὰς, ἀτὰς (Nab. 23) imply a Greek original. As regards the first pair, they are late interpolations, since the passage in which they occur is wanting in the Armenian version and in O. R. As regards the second pair, P reads ἀσάβρις in both cases. R omits ἀσάβρις, and the Armenian version omits ἀσάβρις. It is probable, therefore, that there was no periphrasis in the early Greek version. There is no weight attaching to the other periphrastics cited. (3) Again, Mr. Sinker speaks of the use of certain philosophical terms as favouring a Greek original. But these are found also in G. (4) Again, the use of Θ in Judah 24, which he presses in favour of a Greek original, is to longer a valid argument, since we find from the Armenian version that the passage in which it occurs is a Christian interpolation.

We may, therefore, reasonably conclude that the groundwork of the Testaments was originally written

APOCALYPTIC LITERATURE

in Hebrew. The additions of the Jewish interpolator were, as far as I have examined them, in the same language. Christian interpolations were introduced at the close of the first century of the Christian era, and some probably as late as the third or the fourth.

The earliest versions were the Greek, the Syriac, and the Armenian. Of the Syriac version only a fragment survives, preserved in the British Museum (*Cat. of Syria MSS* Cod. 94. 1). Of the Armenian version six MSS, varying in date from 1220 to 1656, are in Venice (in the Library of the Mechitarists of San Lazzaro); one, of 1382, in Vienna; another, of the fourteenth century, in the library of Lord de la Zouch; and a ninth, in the possession of the British and Foreign Bible Society. An edition of the Armenian version by the Mechitarist Fathers is soon to issue from the press. No trace has as yet been discovered of a Latin version anterior to that of Grossesetio in the thirteenth century. This version and the later European versions are of no critical worth. There is also an old Slavonic version published by Tichonravov in the *Denkm. der altross. Apocri. Lit.*, St. Petersburg, 1876.

Four of these MSS have already been made known to the public: the Cambridge MS of the tenth century, and the Oxford MS of the fourteenth, through Sinker's edition of the Greek text; the Vatican MS of the thirteenth and the Farnes MS of the sixteenth, through the Appendix he published in 1870. These four MSS are designated by their editor respectively as C O R P, and this notation has been followed in the present article.

It has already been observed that the process of Christian interpolation probably extended from the close of the first century A.D. to the fourth.

74. The Greek MSS. As regards the apocalyptic sections (see *ESCHATOLOGY*, § 61), which are due to a Jewish interpolator, we have no means at present of determining their date with any exactness. Some of them are the oldest portions in the book, and were probably written in the second century B.C.; but some of them are very much later, since they contain citations from the Ethiopic and the Slavonic Enoch. As far as the present writer has examined them, he is inclined to regard them as all springing from a Hebrew original. The date, therefore, of these interpolations may possibly extend from the second century B.C. to 300 A.D. It may be added, partly on the evidence of the Armenian version and partly from the context, that it is clear that in Levi 15, Judith 23, and Dan 5, there are no references to the Roman destruction of the temple in 70 A.D. The groundwork may have been written about the beginning of the Christian era. We can hardly suppose it to be based upon Jubilees, for it never mentions it; yet, since it possesses in common with it a vast mass of biographical details as well as the same chronological system, it is natural to regard both works as almost contemporary and as emanating from the same school of thought.

No attempt has been made to give a systematic statement of the Christology, since the passages relating to this subject are derived not from one writer or period, but from a variety of scribles and times. The value, therefore, of the Christological portions in this book is slight.

VIII. THE PSALMS OF SOLOMON.—Very little is known of the early history of these psalms. Only six direct and undoubted references to them are found in early literature.

Four of these occur in catalogues of canonical and uncanonical books, viz., in the *Synopsis Libanensis*, the Sticherometry of Nicophorus, the 'Sixty Books,' and the table of contents in the Alexandrian MS. The fifth reference is found in the fifty-ninth canon of the Council of Laodicea, which ordains *οτι ου δευ ιδιοτεκνους ψαλμους λεγασθαι εν τη εκκλησια, ουδε ακανωνικα βιβλια, αλλα μονα τα κανονικα της παλαιας και καινης διαθενης*. The sixth belongs to the twelfth century, and consists merely of a note on this canon. With doubtful references we have here no concern.

Mr. Sinker has since discovered two other Greek MSS; and these six MSS, with the other versions, he is using as the foundation of a new Greek Text which, we hope, will see the light soon.

16

It is obvious, therefore, that the book never attained a large circulation. On the other hand, as Ryle and James point out, 'where it was read' it was 'read with respect'; for 'it is the solitary instance of an OT book which, from being merely *ἀντιλεγόμενον*, became *ἀκριβήρον*.' As belonging to the former it appears in the first two lists above mentioned; as an *ἀπόκριφον* it is enrolled in the 'Sixty Books.'

It is notable in the next place that, whereas these psalms are designated in the first two lists as *ψαλμοὶ καὶ ᾠδαὶ* (Fabricius *ᾠδαὶ Σολομώντος* and *ψαλμοὶ καὶ ᾠδαὶ (varia lectio-n) Σολομῶντος*), in the next two they are described simply as *ψαλμοὶ Σολομώντος*, with the addition of *οἱ* in the case of A.

78. Extent. The book, therefore, circulated as early as the fifth century in two forms: one consisting simply of the eighteen 'Psalms of Solomon,' the other of these together with certain Odes. The first form is the older. The second probably originated in an attempt to supplement a defective edition of the first by certain odes or songs, partly of Jewish, partly of Christian, authorship, that were current under Solomon's name. For if we accept the number of *στίχοι* assigned to the psalms in the MSS (*i.e.*, 1000), we must regard the present psalms as deficient to the extent of 300. On the other hand, as the Sticherometry of Nicophorus assigns 2100 *στίχοι* to the psalms and the odes combined, the odes themselves must have been about the same length as the psalms. Of the only two have been preserved. These are edited in an appendix to the edition of Ryle and James.

Up to the present, five MSS of this book have been found; but of these the Augsburg MS has long been lost, though we possess a record of its readings in de la Cerda's edition, which was based upon it. The second codex is that of Vienna (V). This MS was collated by Haupt for Hilgenfeld's two editions (*ZW* *Th.* 1870-1, 133-163, and *Messias Juuacorum*, 1869, pp. xlviii-133); but the collation has been recently shown to be most inaccurate. The next edition is that of Geiger, *Der Psalt. Salomons herabg. u. eckl.* (1871), based on the same critical materials as Hilgenfeld's. Though agreeing with Hilgenfeld as to the date and situation, Geiger maintains, in opposition to him, the Hebrew original. Fritzsch's edition was published in the same year (*Lebr. apoc. 177*, pp. 560-89); and that of Pick in 1883 (*Presb. Rev.* 773-813). The third codex is the Copenhagen one (H), to which attention was first called by Graux in the *Rev. Crit.* (1877), 201-203. The Moscow (M) and Paris (P) MSS were discovered and collated by Gelhardt. All these authorities have been used in the edition of Ryle and James (*Ψαλμοὶ Σολομώντος, the Psalms of the Pious, 1891*). In this edition, emended for its learning and for its critical insight, the reader will find everything worth knowing on the subject.

For the remaining literature on these psalms we must refer the student to this work (*Introd.* 13-23), and to Sinker (*on loc.*); but we must not forget two of the most fruitful studies that have yet been made—namely, an article by Mörs in Herder's *Kirchen-Lexikon* (1847), and an Appendix to Weis's *Die Phil. u. Sadd.* (1874), which contains the translation with notes.

The date must be determined by the references to

1 Ryle and James make it clear that in both cases 'we should read the plural, against the best MSS.'

2 Since the above account was written two new editions of the text have appeared. The first is that of Swete (*The OT in Greek*, 375-387). This edition has made a valuable contribution to the criticism of the text by means of a hitherto uncollated MS (which Gelhardt designates R) belonging to the Vatican. According to Gelhardt, however, his collation of this MS is deficient in point of accuracy. The second edition is that of O. von Gebhardt (*Ψαλμοὶ Σολομώντος—Die Psalmen Salomons*, 2100 ersten Male mit Benutzung d. Athoshandschriften und d. C. d. Casanatensis, Leipzig, 1893). In the formation of his text Gebhardt has used the MSS C H J L R. Of these only H (the Copenhagen MS) was used by Ryle and James, and H R by Swete. Hence C J L are here used for the first time. These are respectively the Codl. Bezae Cantabrigiae, and Casanatensis. The remaining MSS, M P V, Gebhardt regards as not deserving consideration. He gives the following genealogy of all the MSS. Z represents the archetype:—

APOCALYPTIC LITERATURE

contemporary events; and, as these are many and varied, there will be little difficulty in assigning a definite period to the activities of the authors.

The book opens with the alarms of war (1.2, 8.1) in the midst of a period of great material prosperity (1.12, 8.7); but the prosperity is only seeming; from their ruler to the vilest of the people they are altogether sinful (17.21, 7.6). The king, too, belongs to the family that has usurped the throne of David (17.6-9). A righteous judgment, however, speedily comes upon them. A hostile army advances against them, led by a 'mighty striker,' who came from the ends of the earth (8.16). The princes of the land go forth to meet him with joy, and greet him with the words, 'Blessed is thy path; come ye, enter in with peace' (8.16). When he has established himself within the city he seizes its strongholds (8.21); he casts down its fenced walls with the battering ram (21). Then the Gentiles tread Jerusalem under foot (2.6), yea, they pollute even the altar with their presence (2.3). Its princes and wise counsellors are put to the sword, and the blood of its inhabitants flows like water (8.24); its sons and daughters are carried away captive to the West (8.24, 17.14) to serve in bondage (2.4), and its princes to grace the triumph of their conqueror (17.14). But the dragon who has conquered Jerusalem (2.2), armed at birdship of land and sea, and thought himself to be more than man, at last meets with shameful death on the shores of Egypt, and there is none to bury him (2.30, 7.1).

There can be little doubt now as to the interpretation of these facts. The family that had usurped the throne of David are the Asmonean, who, since 105 B.C., had assumed the royal name. The 'mighty striker' who comes 'from the ends of the earth' is Pompey. The princes who welcomed his approach are Aristobulus II. and Hyrcanus II. When the followers of the latter opened the gates to Pompey, the party of Aristobulus shut themselves up within the temple, where they were besieged by Pompey and their defences battered down with battering-rams. The massacre that follows, and the carrying away captive to the West of princes and people, agree only with the capture of Jerusalem by Pompey. Finally, the circumstances attending the death of the conqueror on the shores of Egypt recall the death of Pompey in a manner that cannot be misconceived.

We conclude, therefore, that the second psalm was written very soon after the death of Pompey in 48 B.C., and that 1, 8, 17 were composed between 63 and 48, as they presuppose Pompey's capture of Jerusalem but show no knowledge of his death. Psalms 5, 7, 9, 13, and 15 seem to allude to the same sequence of events as 1, 3, and 17, and therefore to belong to the same period. In 4 and 12, on the other hand, 'the sinners' are denounced; but as yet no visitation by the Gentiles is spoken of, nor any interposition of the Gentiles in Jewish affairs foretold. Hence these psalms are probably anterior to 64 B.C. Psalms 3, 4, 11, 14, and 16 betray no distinctly historical colouring; but there is nothing in them which requires us to assume different authorship and date from those of the other psalms. We may, therefore, with Kyle and James, safely assign 70-40 B.C. as the limits within which the psalms were written.

It may be added that Movers, Del. and Keim have identified the invader of Palestine with Herod; but this is impossible on many grounds; and just as many difficulties are against Ew's identification of this personage with Antiochus Epiphanes. In fact, all modern critics support the view advocated above.

The authors were clearly Pharisees. Thus they divide their countrymen into 'righteous' (δικαιοι; 2.3, 3.3, 5.7, 14.4, etc.) and 'sinners' (ἀμαρτωλοί; 2.3, 3.13, 4.9, 13.6, 7.10), 'saints' (ἅγιοι; 3.10, 4.7, 8.40, etc.) and 'transgressors' (παράνομοι; 4.11, 13.27, 14.14, 17.27), of whom the former were the Pharisees and the latter the Sadducees. They assail the 'sinners' for having usurped the throne of David (17.35) and laid violent hands on the high-priesthood (17.6). This assault on the Asmonean house evidently emanates from a Pharisee.

The authors further denounce the priests for polluting the holy things by their uncleanness and their neglect of the true observances (2.3, 5.13, 26), and likewise for offending the heathen in their abominations (1.8, 5.6). Their attitude, moreover, to the law, their conception of the theocracy, their idea of the bearing of a righteous man in the case of Gentile oppression, all alike mark them out as belonging to the Pharisaic school. To the

same school appertains the doctrine taught regarding future retribution and the Messiah. In regard to the last, Kyle and James observe with justice that the Messianic conception in these psalms 'marks the revolution which had passed over Pharisaic thought since the time, not a century before, when Israel's mission in the world was identified only with the fulfilment and dissemination of the law. . . . The heroic deeds of Judas Maccabaeus and his brothers had rekindled the ardour of the people for a Jewish dynasty and a Jewish kingdom; and the Pharisaic supporters of a theocracy were powerless so long as their teaching showed no sympathy with this patriotic enthusiasm. But as it was hopeless to look for Israel's redemption to the helpless and hated later Asmoneans, so it is just at this crisis that the author of these psalms combines the recognition of the failure of the Asmonean house with the popular enthusiasm for a Jewish monarchy' (p. 57). Thus the Pharisees 'appealed to the patriotic feelings of those who had no power to appreciate the abstract beauty of the old legalism. By its hope for a "son of David" it proclaimed the downfall of the Levitical Asmonean house. By its ideal reign of "wisdom and righteousness," it asserted the fundamental Pharisaic position that the law was supreme. Thus the Messianic representation of our seventeenth psalm marks the stage at which Pharisaic thought passed beyond the narrow limits of its earlier teaching, and availed itself of the popular aspiration for an earthly kingdom. This step, however, entailed upon the theocratic party no policy beyond the exercise of patience till God should raise up the king, and until then the minute observance of this law' (p. 58). Against the attitude adopted by the writers of this book the *Assumption of Moses* is a protest from beginning to end (see above, § 65).

We give below (§ 85) some grounds for assuming that ps. 1-16 and 17-18 are due to different writers.

As the main interests of the psalms centre in Jerusalem, the writer probably lived in that city.

It is 'the City of the Sanctuary' (8.4); in it shall the song of triumph be sung when God brings back its children from the east and from the west (11.1-3). Though Jerusalem has now been trodden under foot by the Gentiles (2.2), the Messiah will cleanse it from all such pollution (17.25, 33), and thither all the nations of the earth will go up to see the Messiah's glory (17.34). The psalmist's indictment of the Sadducean members of the Sanhedrin (1.1), and his account of their vices and abominations, are best understood as coming from a contemporary inhabitant of Jerusalem. To the writer of psalms 2, 8, and 17 that city is the centre of all the world, and the history of other nations or world-empires is of moment only in as far as it connects itself with 'the Holy City.'

The circumstances connected with these psalms point undoubtedly to a Hebrew original—i.e., their composition, circa 70-40 B.C., by a Pharisee

83. Language. residing in Jerusalem;—and, notwithstanding Hilgenfeld's strong advocacy of a Greek original, all modern scholars admit that the psalms were composed in Hebrew.

This fact was first established by Geiger in opposition to Hilgenfeld's view. It has further been substantiated by Kyle and James with a fulness and insight that cannot fail to win conviction (*Introd.* pp. 77-87). As for the Greek translation, we may provisionally accept the date assigned by the editors just named, who, by a hypothetical train of reasoning, show that it 'is not later than the middle of the first century A.D.'

We will now sketch in a few words some of the teaching of these psalms regarding the Messiah and the resurrection.

85. Eschatology. First, in regard to the Messiah, the writer of psalm 17 returns to the conception of the prophets and describes him as 'the son of David' (17.23). He calls him also 'the Anointed One' (17.36, cp 1.8, 6.8)—a title that had been applied a few years before to the ideal Messianic king in association with supernatural attributes (Enoch 48 to 52). Here, however, the Messiah is a man and nothing more.

He is to be raised up by God himself (17.23, cp 1.8). He is to destroy the supremacy of the Gentiles (the Romans) and drive them forth from the borders of Israel (17.25, 27, 31). The 'proud sinners' (the Sadducees) will be expelled from the heritage of God which they had unlawfully seized (17.26, 41, 51). The Messiah will purge Jerusalem from all impurity and make it his capital (17.33, 35); he will bring back to Palestine the dispersed tribes (17.28, 34, 50); the Gentiles will become tributary and be converted to the faith of Israel (17.31, 33, 34). He shall himself be free from sin (17.41), and all his people will be holy (17.30). Further, he will not conquer by force of arms (17.37), but will smite the earth with the word of his mouth (17.30). Finally, his rule is temporary (17.42): 'He shall not faint all his days.' Only the surviving righteous share in his kingdom (17.50); the departed righteous are not raised to participate in it.

APOCALYPTIC LITERATURE

As these hopes of the Messiah are confined to pss. 17 f., and as not even the remotest hint of such hopes can be discovered in the preceding sixteen psalms, it appears necessary to assume for them a difference of authorship.

In these, we should observe, there is not a hint that redress for present evils is to be looked for from the Messiah. In every instance the Psalmist expresses his faith that wrong will be set right, either by God's present judgments, by which his righteousness is or shall be justified (2. 6, 19, 87, 93), or by his final judgment of the world, when the righteous shall rise to eternal life (3. 16-17), and hell and destruction and darkness shall be the heritage of transgressors (11. 10-14). This final judgment is spoken of as a 'visitation' of God upon the righteous and the wicked (3. 14, 16, 17, 19); it is likewise called in respect of the righteous 'the day of mercy for the righteous' (14. 13-16), when in respect of the wicked it is named 'the day of the judgment of the Lord' (16. 1).

Since there is in pss. 1-16 only a resurrection of the righteous, Sheol was conceived as the perpetual abode of the wicked, 16. 1. Into Sheol, thus conceived as hell, the wicked enter immediately on death (16. 2 compared with 14. 15-16). The intermediate abode of the righteous is probably to be regarded as the 'treasures' to which we find the first reference in Eth. Eub. 100. 5. See also Eschylology, § 97.

IX. THE SIBYLIC ORACLES. — The Sibylline literature belongs to a class of productions highly characteristic of Hellenistic Judaism.

86. Propagandist Literature.

'These,' as Schürer justly remarks, 'were Jewish works under a heathen mask.' However divergent the outward form assumed, they all exhibited one characteristic in common: they addressed themselves to heathen readers, under cloak of some name that was influential in the heathen world, and in the form most natural to their alleged origin. Indirectly or directly, their aim was the propagation of Judaism among the Gentiles. Whilst the works ascribed to Heceatus and Aristas belong to the former category (indirect propaganda), the Sibyllines are distinctly of the latter.

The Sibyl was regarded in the ancient world as an inspired prophetess. She belonged to no prophetic order or priestly caste, but held a position free and uncontrolled as a supernaturally gifted organ of the will and counsels of the gods.

The number of such Sibyls is variously stated at different times. Heraclitus in Plutarch (*De Pythie orac.* 6), Aristophanes (*Par.* 1045), and Plato (*Phædr.* 22), speak of only one. Tacitus (*Ann.* 6. 12) is doubtful whether there were more than one. Pausanias (*Descr. Græc.* 10. 12) mentions four, while Varro (in Lactantius, *Div. Instit.* 1) specifies ten. For further information on this subject the reader should consult Alexandre, *Orac. Sibyl.* (1st ed.), 1856, 241-4; Maass, *de Sibyllarum Indivisiis* (1879), and the arts. on the subject in Smith's *Dict. of Gr. and Rom. Lit.*, and the *Ency. Brit.* 10.

Written accounts of the oracles delivered by the Sibyls obtained in Greece and Asia Minor only a private circulation. Still though they were not preserved by the State or publicly consulted, we must not under-

88. Sibylline Oracles.

rate their importance in the life and thought of the Eastern classical world. In Rome, however, they acquired quite a unique position. It is not necessary to treat here of the very ancient collection of these oracles, said to have been purchased by King Tarquin, or to record the frequent occasions on which they were consulted by the state before their destruction in the fire that consumed the Capitol in B.C. 83. (Alexandre [2192] has traced sixty such occasions.) Their place was soon afterwards taken (75 B.C.) by a collection, amounting in all to about 1000 verses, made in Greece, Asia Minor, Africa, and Italy, by order of the Senate. (After being revised under Augustus, it seems finally to have been burnt by the order of Stilicho in 404 A.D.)

Inasmuch as such oracles enjoyed high authority and a wide circulation in the East,—inasmuch, likewise, as they were anonymous in origin, free from authoritative revision, and capable of modification or enlargement at pleasure by those in whose hands they were for the

time being,—they offered to the missionary spirit of Hellenistic Judaism a form of literature which would readily admit the disguised expression of its highest beliefs, and at the same time procure for them a hearing in Gentile circles. It is not unlikely, too, that the prolonged search of Roman officials for Sibylline oracles in the East may have further stimulated the inventive faculties of the Alexandrian Jews and led to the composition of many of the verses in our present collection. In this method of propaganda the Christians proved themselves later to be apt pupils of the Jews. So rampant, indeed, had become in early Christian times the invention of such oracles that Celsus (*Orig. contr. Cels.* 5. c.) terms Christians *Σιβυλλιστæ*, believers in sibyls, or sibyl mongers.

This charge of Celsus was not unheeded; for with the exception of a citation about the tower of Babel made by Alexander Polyhistor, 80-40 B.C. (see Luc. *Chron.* 1. 21), and found likewise in Josephus (*Ant.* 1. 43), it is to Christian writers that we are indebted, not only for all other references, but also for the preservation of the entire collection that has come down to us.

Hermas (*Vis.* 2. 4) mentions the Sibyl, but not her verses; but quotations are frequent in Clement Alex. and Lactantius. A collection of the Patristic quotations from the Sibyllines will be found in Struve (*Fragmenta librorum Sibyllinarum quæ apud Lactantium referuntur*: 1817), in Vercorst (*De Carmine Sibyllino abud sanctis Patribus descriptio*, Paris, 1844), in Hesugon (*De l'empire que les Pères de l'Église ont fait des oracles sibyllins*: Montauban, 1850), and in Alexandre (2. 234-311).

The Sibylline Oracles, as we now have them, are a chaotic medley. They consist of twelve books—there were originally fourteen—of various authorship, date, and religious conception. This arrangement, which is due to an unknown editor of the sixth century (Alexandre), does not in itself determine identity of authorship, or of time, or of religious belief; for many of the books are merely arbitrary groupings of unrelated fragments. As the editor, moreover, was guided by caprice as often as by any discernible principle of editing, it is not strange that the same passage frequently recurs in different contexts.

The first printed edition of these Oracles was published at Basel, in 1545, from an Augsburg (now a Munich) MS, and consisted of eight books. A metrical Latin translation of these books by Sebastian Castalio appeared in the following year, and an emended Greek text from the same scholar in 1555.

The most valuable of the early editions is that of Opsoporus (i.e., Koch), Paris, 1569, in which fresh MS evidence is brought to bear upon the text. These were followed by that of Galeus, Amsterdam, 1680; but his work is of no critical worth. These eight Sibylline books were likewise reprinted in Gallandi's *Bibliotheca Vett. Pat.* (Venice, 1785). Book 14 was first edited by Mai in 1817 from a Milan MS and Books 11-14 from two Vatican MSS in 1828 by the same scholar. Books 9 and 10 have not been recovered. All these editions have been superseded by the first edition of Alexandre's *Oracula Sibyllina* (2 vols. Paris, 1841-1866), and his second edition of 1876, in which the valuable excursuses of the first are omitted; and by the edition of Friedlieb (Leipzig, 1883). The latter has a useful introduction, and is accompanied by a translation into German hexameters; but the text is untrustworthy.

By far the best text that has yet appeared is that of Raich, *Oracula Sibyllina* (Vienna, 1861). For the formation of this text fourteen MSS have been used; the text has been further emended by an exhaustive collation of quotations in the Fathers. Our citations will be made from this text.

For further literature on the subject, see Alexandre's work (1st ed. 271-321; 2nd ed. 410-410); Schürer (*Hist.* 5. 238-242). English readers will find the subject well treated in the work of Schürer just mentioned; *Edinb. Rev.* (July 1877, pp. 31-47); and Deane (*Pseudepigr.* 1891, pp. 276-344).

The relation of the Jewish and the Christian Sibyllines to the ancient heathen ones it is practically impossible to determine. 1. They assumed, of course, the outward form of the older hexameter verse; but they transgress every rule of prosody. Short syllables are lengthened through the in-

91. Rel. to heathen Sibyl.

APOCALYPTIC LITERATURE

fluence of the accent, or even without it, owing to the exigencies of the verse; and long syllables are likewise shortened.

For peculiarities of metre and syntax, see *Alexandre, Z. i. c. 7*. It must be acknowledged, however, that many of these disappear in the better text of Rzach. Of acrostic verses, which, according to Dionys. Hal. (463) and Cicero (*De Div.* 2.51), was the form of the most ancient Sibyllines, only one specimen is still preserved, viz., in 217-220, the initials of which are **ΗΘΟΥΣ ΧΡΕΙΣΤΟΣ ΘΕΟΥ ΥΙΟΣ ΣΟΥΗ ΣΥΛΛΗΟΣ**. It should be observed, further, that without the last word the initials of the title compose the word **ΙΧΘΥΣ** 'a fish'—a frequent symbol of the Christian faith on early monuments.

2. As regards the matter, it is more than probable that the later Sibylls used much of the older material lying ready to hand.

Thus, in 311-113 (the passage about Helen), 'the Erinyes from Sicily', is from a heathen source; so likewise the punning couplet in 404-10, which frequently recurs:

καὶ Σάρον ἄμμος ἄπασαν ὅτ' ἵππεσσι καλύψαι
ἀλλος δ' οὐκ ἐτι ὁρῶς, ἀδρῆα δὲ πάντα τὰ ἄλκον.

Another notable instance is 810, where a line from an ancient Delphic oracle is given verbatim. See II. c. 147.

We must turn from such questions to discuss the various elements of which the work is composed.

These, as we have already observed, are both Jewish and Christian, and the latter largely preponderate. Owing,

however, to the character of the work, it is not always possible to distinguish between the two. It is therefore only on some of the smaller portions that we can arrive at any certainty. Much is of a neutral character, and, as far therefore as internal evidence goes, may equally well have proceeded from either class of writers. There is a great lack of external evidence. We shall now deal with the various elements of the work in their chronological order as far as that is possible. Our space does not admit of an analysis of all the books; we shall, however, give a short survey of the more important.

The first and oldest part is 307-329² and probably the Prohemium. The latter is not found in our MSS; it is

93. **Prohemium.** istaken from the *1.7 Apocalypse of Theophilus* (180 A.D.). It consists of two fragments, of thirty-five and forty-nine lines respectively.

Rzach (pp. 232-238) and Alexandre link them together by another short fragment of three lines. On very inadequate grounds the latter editor assigns them to Christian authorship; but they contain nothing of an essentially Christian cast (on their contents, see *ESCHATOLOGY*, § 58).

94. 307-329. With regard to 307-329 opinions are conflicting. Bleek regards verses 97-207—with the exception of 330-350, a later Christian interpolation—as the work of an Alexandrian Jew 170-100 B.C.; Hilgenfeld thinks that the whole of 97-217 was written about 140 B.C.; Ewald brings down the date to 124 B.C. Alexandre assigns 307-204, 430-223, to 168, but 295-488 to the age of the Antonines. The strongest evidence in favour of Alexandre's view is to be found in the difficulty of interpreting adequately such passages as 346-473 as applying to the civil war and the dissensions of Marius and Sulla (Friedrich, p. 33).

307-813 falls naturally into three groups: (a) 37-214; (b) 295-488; (c) 430-512.³ The first (a) opens abruptly with the building and the destruction of Babel (37-104). Then the earth is peopled and its rule is divided between Cronos, Titan, and Jupiter (105-110). In the strife that subsequently arose between the Cronides and the Titans these races were destroyed, and in their place in succession the great kingdoms of the earth—those of Egypt, Persia, Media, Ethiopia, Assyria, Macedonia, again of Egypt, and of Rome (111-197). This closes the retrospect of the Sibyl; now begins her prophecy (198-166). First, she predicts the rise of the Jewish (under Solomon), the Macedonian, and the Roman kingdoms; during the reign of the seventh king of Egypt, of Hellenic race, the people of God will again become powerful (197-194). Then are recounted the judgments of God

¹ A Latin rendering with the last seven verses omitted is given in Augustine's *De Civ.* 18.24.

² Where Friedrich and Alexandre give 828, Rzach gives 829 verses.

³ In the detailed analysis that follows, certain verses, unimportant for the present purpose, are (for the sake of brevity) left unaccounted for.

on the kingdoms of the world and on the Jews (196-212). Next, the Sibyl takes as her theme the praise of the Jewish nation, their virtues, and the salient points in their history from their departure from Egypt down to Cyrus (218-224).

The second group (b) is mainly concerned with judgments against Babylon, Egypt, Gog and Magog, Libya (295-313), and likewise against individual cities (401-466). Then follows the promise of Messianic prosperity and peace (367-480), and this group closes with oracles regarding Antiochus Epiphanes and his successors, and various countries, towns, and islands (481-488). In 412-412 we have the celebrated diatribe against Homer.

The third group (c) opens with oracles against Phoenicia, Crete, Thracæ, Gog and Magog, and the Hellenes (489-572). Then Israel is praised for its worship of the true God (573-600). Thereupon ensues a second prophecy of judgment and a call to conversion, and an account of the evils that were to befall the ungodly (601-651). Then the Sibyl foretells the coming of the Messianic king, who would take vengeance on his adversaries; next comes a detailed account of the period of Messianic prosperity (652-731), and, finally, the signs that are to herald the end of all things (736-808). The Sibyl declares that she is neither the Erythraean Sibyl nor yet the Cumæan (809-813).

3. Though it is obvious from the above epitome that 307-813 is not a single and homogeneous composition but rather an aggregate of separate oracles, we are safe (with Schürer) in regarding the three groups as derived in the main from one author, and as dating from the same period, the reign of the seventh Ptolemy, which is referred to in all three groups (192-193, 316-318, 602-610).

Ptolemy VII. Philometor (170-164 B.C.) He was then banished, but recovered the throne in 145 and reigned as sole king till 117 B.C. That the composition dates from the latter period is clear (220-572) from the prophecy of the complete subjugation of all Hellas. As Hilgenfeld, Schürer, and Drummond point out, this cannot have been written before the fall of Corinth (146 B.C.). The doom of Corinth is actually referred to (422), and possibly that of Carthage (492-504). Verses 388-400, which deal with the Seleucid kings, were written (according to Hilgenfeld's interpretation) about 140 B.C. Therefore, since the author represents the Messianic kingdom as beginning during the reign of Ptolemy Philometor, we may safely take 97-813 to have been written in the second half of the second century B.C. The Prohemium, with which we have already dealt (see above § 93), most probably formed the introduction to these verses, and Schürer adduces external evidence from Iacintus (iv. 65) to that effect.

Before proceeding to discuss 31-96, we should add that Friedrich and others reject 810-828 as a later addition, as these verses are at variance with 809-811.

With regard, however, to 31-92 all previous critics seem to have gone wrong in connecting 63-92 with the preceding verses. In 63-92 the end of all

95. 31-92. things is to come during the sway of Rome over the world (75-80). In 1-92, on the other hand, only the partial judgments that are to take effect on the coming of the Messianic king in 497 are recounted. The Sibyl then promises in 617 to enumerate the cities that are to suffer; but here the account breaks off, and not a word more is said in 103-92 in fulfilment of her promise. Hence these two sections are of different authorship. 63-92 is certainly late and Christian. On 31-62, see also *ESCHATOLOGY*, § 68.

In 63-74 we have a reproduction of the myth concerning Nero, according to which Beliar was to return in the form of that emperor and work many mighty signs. This idea recurs in 2167-171 (a distinctly Christian product), and in the *Asc. Isa.* 313-51 (cp. *ANTICHRIST*, § 15).

As regards 31-92, it may be derived from one author, and 71-92 may refer to the triumvirate of Antony, Octavian, and Lepidus. In that case this section was written before 31 B.C.

Book 4 is, with Friedrich, Ewald, Hilgenfeld, Alexandre, and Schürer, to be regarded as of Jewish authorship, and was written about 70 A.D. or somewhat later. This

96. **Book 4.** date is determined by two allusions: the destruction of Jerusalem (70 A.D.) in 133-137, and the eruption of Vesuvius (79 A.D.) in 140-145. The latter was to be the immediate precursor of the vengeance that was to be wreaked on Rome by Nero, returning with many myriads from the East (133-134). There are no grounds for assigning this book, with Ew. and Hilgenfeld, to Essene authorship; for, with the exception of the reference to additions in 163-165, there is no mention of anything characteristic of the Essenes, and the words in question are most naturally taken as referring to proselyte baptism (Schürer). The teaching enforced in 170-192 shows that the author cannot have been a Jew of Alexandria, but probably belonged to Palestine; for the eschatology is very naive. From the bones and ashes of men's bodies God

APOCALYPTIC LITERATURE

will fashion anew the bodies in which they will rise to judgment. The judgment will then proceed according to their deeds. The wicked will again die, but the righteous live again on earth. The recalls Enoch 1:9.

Book 5 professes to be the work of an Egyptian Sibyl, the sister of Isis (7: 52). It is mainly Jewish; but there may be Christian elements. There is a marked absence

97. Book 5. of ideas characteristic of Judaism or Christianity, and also of internal connection. Friedrich attributes the book to an Egyptian Jew in the time of Hadrian; Alexandre to a Christian Jew of Alexandria in the age of the Antonines. The first fifty-one lines are in effect a chronological oracle ending with Hadrian. As the rest of the book deals with Egyptian affairs, it is probably of different authorship and date, and we may, with Ewald, Hilgenfeld, and Schurer, accept 80 A.D. as an approximate date for 52-53. Some passages are decidedly Jewish; but of blessing on Israel, 27: 307-313 (the destruction of the Temple in Jerusalem), 27: 414-416, 422-311 (the building of a new Temple in Egypt which is to take the place of that already destroyed at Leontopolis), there are others also. The one passage that seems to be certainly Christian is 256-259:

APOCRYPHA

εἰς δὲ τις εἴρωι αὐτὴν ἀπ' αἰθέρος ἔξωκτος ἀνθρ.
ὁ παλαιὸς ἠπλωσεν ἐπὶ ζήλου ἀγαλλομαρπύ
Ἰβραίων καὶ ἀριστὸς, οὐ γένοιτο ποτὲ στήθεον
ἰσχυρὰς μῆσει τε καλῇ καὶ χελεσιν ἀγίοις

Book 6 is the work of a Gnostic (?) Christian. Jesus, the natural son of Joseph, is united with Christ at baptism. The book describes certain incidents at the baptism

98. Books 6 & 7. somewhat after the manner of the apocryphal gospels. Book 7 is of like authorship and is not earlier than the third (see above).

Book 8, in which the famous apocryphal story, is of Christian origin but of divided authorship. It belongs to the second century; 436-437 to the third. As to Books 1-5, and 11-14, there is a great variety of opinion. Alexandre assigns the former to a Christian author of the third century, and the latter to an Alexandrian Jew of about the year 267. Friedrich places 1-5 at the close of the second century; 11-14 he ascribes to Jewish writers of the second and the third centuries A.D. respectively, 12-14 to Christian writers of the third century.

Some of these judgments are simply hypotheses; there is still room for indistinct study on these questions. K. H. C.

Bibliography (§ 32).

It is proposed in the present article to give, in the first place, a general survey of the very miscellaneous collection of books known as 'the Apocrypha' (details being reserved for special articles), and then to proceed to an enumeration and classification of the larger literature which lies beyond the limits of that collection. Fuller treatment of the subdivision 'Apocalyptic,' however, will be reserved for a special article (see above, APOCALYPTIC), where will be found an account of the following nine works:—Apoc. of Baruch, Ethiopic Book of Enoch, Slavonic Book of Enoch, Ascension of Isaiah, Jubilees, Assumption of Moses, Test. xii. Patr., Psalms of Solomon, Sibylline Oracles. The later Christian literature will be excluded, only those writings being considered which contain portions assignable, at latest, to the early years of the second century.

The name Apocrypha (nom. pl. neut. of Gk. adj. *ἀπόκρυφος*, *hidden*) is used to denote a large body of

2. Name. Jewish and Christian literature, consisting of writings which either their authors or their admirers have sought to include among canonical scriptures, but which have ultimately failed to secure such a position in the estimation of the Church at large.

This special usage of the word is derived from the practice common among sects, religions or philosophic, of embodying their special tenets or formulae in books withheld from public use, and communicated to an inner circle of believers. Such books, generally bearing the name of some patriarch, prophet, or apostle, were called by their possessors apocryphal, the designation implying that they were hidden from the outer world, and even from the ordinary members of the sect itself; in such cases the epithet apocryphal was used in a laudatory sense. Since, however, the books were forgeries, the epithet gradually came to take colour from that fact, and in process of time it was employed to indicate other writings that had been forged. In the common parlance of to-day, it denotes any story or document which is false or spurious.

One of the earliest instances—and certainly a typical instance—of the use of the word *apocryphal* in its laudatory sense, occurs

in a magical book of Moses edited from a Leyden papyrus of the third or fourth century by Leeman and by Dieterich (*Urb. v. 1893*). The book may be as old as the first century A.D. Its title is *Μωϋσῆος ἐπὶ βιβλὸς ἀποκρυφὸς ἐπικαταμνητὴ ὁρῶν ἡ ἁγία*, 'A Holy and Secret Book of Moses, called the Eighth, or the Holy.' For the earliest use of the word *in uoluntate paratum*, on the other hand, we have to turn probably to Cyril of Alexandria (348 A.D.); and for a more frequent and clear employment of the adjective in a disparaging sense, to Jerome, whose constant use of it is probably responsible for our employment of it at the present day as the equivalent of 'non-canonical.'

Finally the name Apocrypha has come to be applied, and is now applied, by the reformed communities to a particular collection of writings. While some of these are genuine and authentic treatises, others legendary histories, and the rest apocryphal in the disparaging sense of bearing names to which they have no right, all come under the definition proposed above, for each of them has at one time or another been treated as canonical.¹

1. The Apocrypha Proper.

3. Apocrypha. This collection of books may be properly classified in several ways. We might classify them critically thus:—

1. *Additions to canonical books:*—
 - 1. Esdras (interpolated form of Ezra): see below, § 4, ii.
 - Additions to Esther: see below, § 5, 1.
 - Additions to Daniel: see below, § 5, 2.
 - Prayer of Manasses: see below, § 6, 3.
2. *Pseudepigraphical writings:*—
 - 1. Esdras: see below, § 7.
 - Wisdom of Solomon: see below, § 8, 2.
 - Barnabas: see below, § 6, 1.
 - Epistle of Jeremy: see below, § 6, 2.
3. *Legendary or Haggadic writings:*—
 - 1. Tobit: see below, § 5, 3.
 - Judith: see below, § 5, 4.
4. *Genuine and authentic treatises:*—
 - 1. Ecclesiasticus: see below, § 8, 1.
 - 1, 2. Maccabees: see below, § 4, i.

Probably the most natural and convenient division

¹ It does not seem necessary to devote space here to commenting upon the use of the word *Deutero-canonical*, as applied to these books by the Church of Rome; for it is expressly said by the authorities of that Church that no distinction of authority is implied in the term.

APOCRYPHA

will be one depending upon the kind of literature which each book represents, as thus:

- I. Narrative: (a) Historical; (b) Legendary (or Haggadic).
II. (a) Prophetic; or (b) Apocalyptic.

III. Didactic.

I. (a) HISTORICAL. 1. *The Book of Maccabees*. 1. *Maccabees*.—An important and generally trustworthy history, extant in Greek. It was translated from a Hebrew original.

4. **Historical.** history, extant in Greek. It was translated from a Hebrew original, which survived as late as the time of Jerome. On this and the following see MACCABEES, BOOKS OF.

2. *Maccabees*.—Extant in Greek; an abridgment of a work in five books by Jason of Cyrene (see 221). Prefixed to it are two letters, from the Jews of Jerusalem to the Jews of Egypt, commonly held to be spurious (see, however, MACCABEES, SECOND, § 7).

3. *Maccabees*.—Greek. A fragmentary history of an attempted massacre of the Jews under Ptolemy Philopator, and of their miraculous deliverance. This book and the following are not included by the Roman Church in its Canon, and do not appear in the Vg. though found in $\mathfrak{S}$.

4. *Maccabees*.—Greek. A philosophical discourse, illustrating the triumph of Reason over Matter, by the story of the martyrdom of Eleazar, and of the 'Seven Maccabees' and their mother. The work was traditionally attributed to Josephus. An edition of the Syriac version with kindred documents, prepared by the late Prof. Bunsen, has been printed under the supervision of W. E. Barnes.

ii. 1. *Esther*.—Greek. A recasting of the canonical Ezra, to which is added the legendary tale of the Dispute of the Three Counters (known to Josephus). This book appears in Vg. as an appendix to the NT; but no authority is attributed to it by the Church of Rome. See ESTHER, BOOKS OF, First and Second.

(b) LEGENDARY. 1. *Additions to Esther*.—Greek. They consist of a number of letters, prayers, visions, and the like, which are found intercalated into the canonical book of Esther in $\mathfrak{S}$. See ESTHER, § 10.

2. *Additions to Daniel*.—Greek. These are three in number:—

- (i.) The Story of Susanna, prefixed to the book.
- (ii.) The Song of the Three Children, inserted in ch. 3.
- (iii.) The Story of Bel and the Dragon, following ch. 12 and attributed to Habakkuk.

They are found both in the $\mathfrak{S}$ Version and in that of Theodotion. What is said to be the Hebrew original of the Song of the Three Children has been recently found by Dr. M. Gaster in the Chronicle of Jeremiah, and printed by him in *TSAI*, 1894. Cp DANIEL, § 5.

3. *Tobit*.—Greek and 'Chaldee.' A romantic narrative of the period of the Captivity, written not later than the first century A.D. at latest, and perhaps in Egypt. The book has a literary connection with the story of Ahikar (see ACTHACHARUS). The date cannot at present be considered at all certain. The 'Chaldee' or Aramaic version (on the name see ARAMIC, § 4. end), published by Dr. Neubauer in 1878, is probably not the earliest form of the book. Of the Greek there are three recensions, and there are three old Latin recensions besides Jerome's Vg. version. There are also two Hebrew texts, one derived from $\mathfrak{S}$ and the other from the Aramaic. Dr. Gaster has printed some fresh Hebrew texts of the story in *TSAI*, 1896. See TOBIT.

4. *Judith*.—Greek. A romance which, in its present form, may date from the first century B.C. It tells the story of the deliverance of the city Bethulia from the Assyrians under Holofernes, through the bravery of Judith, a Hebrew widow. No miraculous element appears in the story. See JUDITH.

1 So called in EV and $\mathfrak{S}$ (e.g. Swete [B]). In $\mathfrak{S}$ A (subscr.) it is called δ *τερεβ*; in Lag.'s Luc. it is *Εσθρας Β'*, and in Vg. it is 2 Esdras.

APOCRYPHA

II. (a) PROPHETICAL. 1. *Baruch*.—Greek. A pseudepigraphical book (i.e. one written under a false name) ascribed to Baruch son of Nehiah, amanuensis of Jeremiah. It consists of

6. **Prophetical.** two parts: (1) 1-32, which may date from the times of the Persian supremacy, possibly has a Hebrew original, and certainly shows close affinities with Dan. 9; (2) 33-54 (end), originally written in Greek, probably after 70 A.D.; chap. 5 is modelled on the 11th Psalm of Solomon. Edited most fully by Kneucker. Appended to this book is—

2. *The Epistle of Jeremy* (Baruch 3 in our Apocrypha).—Greek, also pseudepigraphical, purporting to be a letter of Jeremiah addressed to the Jews at Babylon, inveighing against the worship of idols.

3. *The Prayer of Manasse*.—Greek. This is attributed to Manasseh, king of Judah, when in prison. It is very likely an extract from a legendary history of Manasseh, of which other portions appear to be quoted (in connection with the prayer) in the *Apostolical Constitutions* (222); or possibly it was written with a view to insertion into the text of 2 Chron. 33. It is not in the Roman canon, but is appended thereto.

(b) APOCALYPTIC. —Of this large and important class of writings only one specimen is contained in our Apocrypha,

namely:—

4. *Esdras*.¹—Latin, Syriac, Arabic, Ethiopic, and Armenian. The original Greek is lost. Only chaps. 3-14 appear in any Version save the Latin; chaps. 1f. 15f. are later accretions, probably of two different dates, 1f. being perhaps of second century, and 15f. of third century; 3-14 are a wish apocryphal, probably written about 97 A.D.; 1f. are Christian, 15f. most likely Jewish. Rejected by the Roman Church, it is printed as an appendix to the Vg. See ESTHER, BOOKS OF, and APOCALYPTIC LITERATURE, §§ 13-15.

III. DIDACTIC. 1. *Wisdom of Jesus the Son of Sirach*, commonly called *Ecclesiasticus*.—Greek, avowedly translated from the Hebrew of which a considerable portion has lately been recovered. A genuine authentic treatise, in parts of high literary excellence. The author was a Palestinian Jew of the second century B.C. See ECCLESIASTICS.

8. **Didactic.** 2. *Wisdom of Solomon*.—Greek. Written under the name of Solomon, perhaps by Philo (according to an early tradition), certainly by a Jew of Alexandria in the first century. It is of great merit in parts; but the tone deteriorates towards the end. The book seems, moreover, to be incomplete. See WISDOM, BOOK OF.

II. Other Apocryphal Literature.

Our survey of the remaining literature is a much more difficult matter. The idea of classifying the books upon chronological principles must be

9. **Other literature.** set aside at once as impracticable; the data are in a majority of cases far too vague. The simplest division that can be made is between those books which have to do with the OT and those which associate themselves with the New. Within those the classification will be made, as in the case of the apocrypha already described, according to kinds of literature represented; writings which unite more than one element will be arranged according to their most prominent feature. In the case of the OT literature, slightly modifying our previous classification, we can include all the documents we possess under the following headings:—i. Legendary or Haggadic Narratives. ii. Prophetical and Apocalyptic books. iii. Poetical. iv. Didactic.

¹ Called 2 Esdras in EV, but oftener, as here, 4 Esdras—i.e., 4th after 1st Esdras, the Heb. Ezra, and Nehemiah. It is called 3 Esd. when Ezra-Neh. are counted one book, as in $\mathfrak{S}$. In an Amiens MS chaps. 1f. 3-14 15f. are called 3rd, 4th, and 5th Esd. respectively.

APOCRYPHA

A. OLD TESTAMENT (§§ 10-25)

1. LEGENDARY OR HAGGADIC NARRATIVES (§§ 10-15)

10. Adam and Eve, etc.

These versions represent variously developed forms or fragments of a Jewish romance dealing with the life of Adam and Eve after the Fall, and with their death and burial. We no longer possess the romance in its original form.

The remains of it must be sought in the following documents:—
(a) Greek, *Apocalypsis of Moses*, more properly *Apokalypsis 'Adām kai Ewēs*. Edited by Tischendorf (*Apocrypha Apocrypha*, 1866) and, in a fragmentary text, in the best MS, by Ceram (*Monumenta sacra et profana*, 5, 4). It is principally concerned with the death of Adam and Eve, and includes an important narrative of the Fall. It is essentially Jewish.

(b) Latin *Acta Iste et Iste*; extant in many MSS, printed by Wih. Meyer in *Urk. d. Münch. Akad.*, Philo-soph. Kl. II, 1878. It covers the same ground as (a) and introduces elements which occur in (c) and (d).

(c) Arabic and Ethiopic *Book of Adam and Eve or Conflict of Adam and Eve*. A long romance, Christianized throughout, dealing with the sufferings and temptations of Adam and Eve after the Fall. The history is continued to the birth of Christ, and has close affinities with the *Book of Enoch* (ed. Raddi; *Schöndel*). It is derived in large part from the lost Jewish romance. First translated by Dillmann (*Das christl. Adambuch des Morgenlandes*, 1853); Ethiopic text by Trümpf in *Urk. d. Münch. Akad.*, 1879-81; English version by S. C. Malan (*Book of Adam and Eve*, 1883). See below the article 'Adam, Book of,' by Hort, in *Pict. Christ. Biogr.*

(d) Greek, Syriac, and Arabic fragments of the *Testament of Adam*. Prophetic and apocalyptic in character; some are extracts from the old romance in its original form; others are Christianized. Edited by Roman in *Journal*, 18, 1881, pp. 427-471; the Greek by M. R. James (*Apocrypha Aecdotica: Texts and Studies*, ii, 3, 1883).

(e) Coptic. Abstemious Moses Adam apocalypse, gnostified. Edited by Schmidt and Harnack in *Sitzungsber. d. k. pre. Akad. d. Wiss.*, 1874, p. 1045. It is now recognised by Harnack to be part of the late Coptic *Apocalypse of Bartholomew*.

2. *Book of Jubilees*, *Little Genesis* (*Leptogenesis*), *Apocalypse* (or *Testament*) of *Moses*. A 'haggadic commentary upon Genesis.' The book is in the form of a revelation made to Moses on Mount Sinai by the angel of the Presence. Hence it has been called the *Apocalypse of Moses*. The narrative communicated by the angel begins with the Creation, and extends to the giving of the law, and the whole time is reckoned in periods of jubilees; hence the name *Book of Jubilees*. The events narrated in Genesis are for the most part sketched slightly with the addition of details of a legendary character; hence the name *Leptogenesis*, 'a detailed treatment of Genesis' (see, however, *ESCHATOLOGY*, § 49). These details include the names of the wives of the patriarchs, the wars of Jacob and Esau, the last words of Abraham and Isaac. Much of the legendary element in *Test. vii. Patr.* (see below) is derived from this book; see *APOCALYPTIC*, §§ 48-53.

3. *Testaments of the Three Patriarchs* (Abraham, Isaac, and Jacob).—Referred to in the *Apost. Const.* 16 (6).

11. *Patriarcha*. Books under these names, combining the legendary, apocalyptic, and haggadic elements Christianized, are found in Greek, Slavonic, and Rumanian (*Testament* [or *Apocalypse*] of *Abraham*), and in Arabic and Ethiopic (*Testaments of Abraham, Isaac, and Jacob*). They narrate the circumstances attending the deaths of the three patriarchs. Their early date is maintained by the present writer (one is quoted by Origen), but is not universally allowed. Dr. Kohler (*JQR*, 1895) assigns an Essene origin to the *Test. of Abraham*.

Edited by M. R. James ('*Test. of Abraham*'), *Texts and Studies*, 2, 2, and by Dr. Gaster ('*Rumanian version of Apoc. of Abraham*'), *ESR*, 1, 1, 71. The Greek version is printed from one MS by Vassiliev (*Uncodita Graeco-Syriantina*, 12, 1).

4. *Apocalypse of Abraham*. Slavonic, from Greek. An interesting Jewish book with Christian insertions. The first part is haggadic, and gives the story of Abraham's conversion; the second is an expansion of the

APOCRYPHA

vision narrated in *Gen. 15*, edited by N. Bonwetsch in *Studien zur Geschichte d. Theologie u. Kirche*, 1897.

5. *Testaments of the Twelve Patriarchs*. A book combining the three elements of legendary, apocalyptic and haggadic matter in twelve sections, each of which gives the last dying speech of one of the sons of Jacob; see *APOCALYPTIC*, §§ 68-76.

6. *Life* (or *Confession*) of *Joseph*. A Jewish legend of early date, Christianized. Extant in Greek and

12. *Aseneth*. Syriac (and Latin). It is connected with the *Test. vii. Patr.* and narrates the circumstances attending the marriage of Aseneth with Joseph. There is much beauty in the story. The Latin version was, according to the present writer's belief, made by or for Cassiodorus, at the same time as that of the *Testaments*.

The Greek and Latin are edited by P. Banaul, *Studia Patristica*, 1896. The Syriac will be found in Land, *Ann. L. Sin.*, and Oppenheim, *Parula Scriptae et Sanctae*, 1896. See Hort's article in *Pict. Christ. Biogr.*

7. *Testament of Job*.—A Midrash on Job, containing a mythical story of his life, Christianized to a very

13. *Job*. *Nephtali* (Nahoi). Job's wife is called Seta. Elhan is represented as inspired by Satan. The story is worth reading.

It exists in Greek and seems to be quoted in the *Apoc. Pauli* printed from a Vatican MS by M. (Script. Lat. Aec. coll. 7, 1874); a French translation in Migne's *Pat. des Apoc. 1895*; edited last from two MSS by M. R. James, *Apocrypha Aecdotica*, ii, 1897.

8. *Testament of Solomon*. Greek. Practically a magical book, though interspersed with large haggadic sections. It is mainly Jewish, though

14. *Solomon, etc.* Christian touches have been introduced. It narrates the circumstances under

which Solomon attained power over the world of spirits, details his interviews with the demons, and ends with an account of his fall and loss of power.

Ed. first by F. L. Fleck in *Wiener Zeitschr. f. d. Kunde d. Alterthums*, vol. ii, as an appendix to Fleck's writings. A German translation by Bornemann in *Bibl. des Z. f. Kirchengesch.*, 1843.

9. *Contradictio Salomonis*.—A work under this name is condemned in the 'Gelasian' Decree (*de scriptis et non recipiendis libris*). It was in all likelihood an account of Solomon's contest in wisdom with Hiram, and was the groundwork of the romance still extant in many forms and under many names—e.g., *Dialogue of Solomon and Saturn* (Anglo-Saxon), *Solomon and Kiboras* (i.e. Kentauros, Slavonic), *Solomon and Marcolph* (Latin, etc.). Josephus mentions the Hiram-legend. See on all these books J. M. Kenilbe's Introduction to the *Anglo-Saxon Dialogue of Solomon and Saturn*, Elfric Society, 1843, and compare *ATTACHARS*.

10. *Ascension of Isaiah*.—Partly haggadic, but chiefly important as an apocalypse—under which heading it will be treated. See *APOCALYPTIC*, §§ 42-47.

11. *Pseudo-Philo's Liber antiquitatum Biblicarum*.—Latin, from Greek, and that from Hebrew. Printed

15. *Pseudo-Philo*.—thrice in the 16th century (in 1527, in 1550, and in 1599), this book had practically escaped the knowledge of all modern scholars (except Cardinal Pitra) until Mr. Lennell Cohn introduced it to the world in an article in the *Hebrew Quarterly Review*, 1898. It is a haggadic summary of Bible history from Adam to the death of Saul, full of most interesting visions, prophecies, and legends.

The Latin version, the only form in which the book is known, very much resembles the version of a *Psalm*. Four fragments published by the present writer (*Prayer of Moses*, *Vision of Kenaz*, *Lament of Sella*, and *Song of David*, *Apoc. Aecdotica*, i, 1) turn out to be extracts from this work of Pseudo-Philo. It is apparently pre-Christian and merits careful study.

12. *Book of Jasher*.—A haggadic commentary upon the Hexateuch, containing ancient elements, but pre-

16. *Jasher*.—served in a medieval form. There is a French translation by Draeh in Migne's *Dict. des Apocryphes*, vol. ii.

17. *Noah*.—Haggadic and apocalyptic fragments of this work are incorporated in the Book of Enoch; there is also a Hebrew Midrash under this name printed by Jellinek in *Be-sha'ar Ha-sha'ar*, 3, partly based on the *Book of Jubilees*. See Ronsbohl and Charles, and esp. APOCALYPTIC, §§ 21, 57.

18. *Book of Enoch*.—The title 'Enoch' occurs in Greek lists of apocryphal books. A story of Enoch is treated (as the Slavonic one does) of the accidental slaying of Cain by Enoch.

19. *Book of Oig*.—In the Gelasian Decree a book is mentioned as 'The Book of Oig the giant, whom the heretics feign to have fought with a dragon after the Flood.' It was, according to the present writer's belief, identical with a book *Ἡρακλῆς καὶ τὸν Φύδρον* or *De Pise of the Giant*, which is mentioned in a list of Manichaean apocrypha by Timotheus of Constantinople (Fabricius, *cod. apoc. A.P. I*, 100). It was no doubt a Jewish haggada, containing, to judge from the title, some stirring incidents. Possibly it may have given a Jewish form of the ancient Dragon-myth of Babylon, on which see Gunkl *U.S. Hoff*.

20. *Pentence of James and Mambres*.—Mentioned also in the Gelasian Decree, and perhaps, like the *Pentecost of James*, a confession of the wicked magical arts of the two Egyptian wizards. See an article by Iselin in Hildenhof's *ZIT*, 1894. There is a fragment (in Latin and Anglo-Saxon) apparently belonging to this book in the Cotton MS. Bib. B.V.; but it has not yet been printed.

21. *Father*.—Origen on Romans (9.1: p. 646) has the following passage, which clearly refers to a romance about Esther: 'We have found it written in a certain book of an apocryphal nature (*apocryphon*) that there is an angel of grace who takes his name from grace. For he is called Ananias (ἄννης), which being interpreted means the grace of God. Now in this writing it was said that this angel was sent by the Lord to Esther to give her grace in the sight of the king.'

There are, besides, many haggadic histories—e.g., of David, Jonah, the Captivity, and (see *Rev. S. Soc.*, 1898) the Rechabites—in Syriac, Coptic, Arabic, and Ethiopic, which are still unpublished; they are to be found in MS. at Paris and elsewhere.

See Zotenberg's *Cat. der MSS. Syriacae* and *Cat. der MSS. Ethiopicae de la Bibliothèque Nationale*, and Wright's *Catalogues of Ethiopic and of Syriac MSS. in the British Museum*. Much Slavonic apocryphal literature also remains unknown to critics, though most of it has been printed. See Kozak's list of Slavonic apocryphal literature in *IFT* xviii, and Bonwetsch in Harnack's *Altchristl. Lit.* 902-917.

22. *Apocryphic*.—1. *Book of Enoch*; and 2. *Secrets of Enoch*.—See APOCALYPTIC, §§ 18-32 and 33-41 respectively.

3. *Sabbellian Oracles*.—Greek hexameter verse, in fourteen books of various dates. See APOCALYPTIC, §§ 86-98.

4. *Assumption of Moses*.—Quoted in the epistle of Jude, as well as by later Christian writers; extant in Latin incomplete. See APOCALYPTIC, §§ 59-67.

5. *Apocalypse of Baruch*.—A long and important apocalypse, closely resembling 4 Esdras in style and thought. See APOCALYPTIC, §§ 5-17, and also below under Zoroaster (§§ 23, no. 15).

6. *Other Apocalypses of Baruch* (a), (b), (c).—As far as is known at present (a) is contained in only a single Greek MS (Brit. Mus. Add. 10,073); edited by M. R. James, *Apoc. Anecd.* ii., with a translation of the Slavonic version by W. R. Morfill; Bonwetsch also has published a German translation of the Slavonic. The Greek text has two Christian passages. In the main it is very well Jewish and of early date. It contains predictions about the course of the sun and

moon, the history of the Tower of Babel, the Vine of Hirsutia, and the offering of the prayers of men to God by Michael. (c) An Ethiopic *Apoc. of Baruch*, preserved in a British Museum MS 1414 in Dillmann's *Catalogue* is apparently the production, in part at least, of an Abyssinian Christian. The title of another, is mentioned in Wright's *Catalogue* (No. 27, b, c, d). A quotation from Baruch not found in any existing book of his, is in the *Liberatio Simonis et Theophili* (Text of Luther, 141), and a larger one in some MSS of Cyprian's *Testament*, 324. It is noticed by Dr. J. Rendel Harris in *The Rest of the Words of Baruch*, p. 10.

7. *Reliqua verborum Baruchi* (The rest of the words of Baruch), in *Paralipomena Jeremiae* (Greek and Ethiopic). There is hardly anything really apocalyptic in this book, which is a Christian appendix to the *Apocalypse of Baruch*, haggadic in character. It narrates the destruction of Jerusalem by Nebuchadnezzar, the miraculous rescue of Ebed-melech, and the martyrdom of Jeremiah.

Printed first in Ethiopic by B. Christomathos (Ethiopic, 5), in Greek by Ceram (Mon. 20, 1, et passim), and lastly in Greek by Dr. J. Rendel Harris (*Rest of the Words of Baruch*, 1899). Harris regards it as an *exortation* addressed by the church of Jerusalem to the synagogue after the Bar Cochba rebellion. It was often printed in various abridged forms in the Greek *Menaea*.

8. *A Short Prophecy of Jeremiah* is uniformly attached to the *Epistle of Jeremiah* in Ethiopic MSS of the Old Testament. It consists of only a few lines, and is written to justify the quotation from 'Jeremy the prophet' in Mt 27.9. It is addressed to Pashur, Jerome had seen a Hebrew volume in which a similar passage occurred. Dillmann printed it in his *Christomathia Aethiopia*, 1866 (p. viii n. 2).

9. *Conversion of Baruch*.—See APOCALYPTIC, §§ 42-47.

10. *Apocalypse of Elias*, and

11. *Apocalypse of Zephaniah*.

The first of these was supposed to be the source of Paul's quotation in 1 Cor. 2.9, 'Eye hath not seen, etc.'

22. *Elias, Zephaniah, etc.*—The second is quoted by Clement of Alexandria. They both survive in

two dialects of Coptic. Fragments of 10 and 11 were published by Baumant in the *Moniteur de la Mission archéologique au Caire*. Stern translated them into German in *ZIT*, 1886. The whole, with additional fragments, has been edited by Stendorff in Harnack and Gelhardt's *Texte u. Unters.* The *Apocalypse of Elias* is fairly complete; the editor assigns only one leaf to the *Apocalypse of Zephaniah* and a large fragment to an unknown *Apocalypse*. It is the present writer's belief that this last is from an *Apocalypse of Zephaniah*. Both are seemingly Christianized forms of Jewish books, containing sections descriptive of heaven and hell, and prophecies of Antichrist, and his conflict with Tabitha and the two witnesses. There is an *Apocalypse of Elias* in Hebrew and one was printed in Jellinek's *Be-sha'ar Midrash* and edited in 1897 by Bittenwieser. A passage from a Gnostic *Visions of Elias* is quoted by Epiphanius (*Haer.* 26.13).

12. *A Revelation of Moses*, containing a visit to the unseen world has been translated from Hebrew by Dr. Gaster (*IR. IS.*, 1893).

13. *An Apocalypse of Esdras*, extant in Syriac, edited by Baethgen from a late MS, and published

22. *Esdras, etc.*—with a translation in *ZIT* 11 (61-72) (1896), is by some thought to be an old Jewish apocalypse which was remodelled in Mohammedan times. There is an Ethiopic *Apoc. of Esdr.* in the British Museum (see Wright's *Catalogue*).

14. The same remark applies to a Persian *History of Daniel* edited and translated by Zotenberg in Merx's *Archiv* (1896), which in its present form is certainly medieval. The Armenian, the Coptic, and the Greek *Visions of Daniel*, which are printed respectively by

¹ It may be noticed in this connection that in *Ch. of Theodotion's* Daniel the whole book is divided into twelve *Visions* (*opascēs*).

single leaf of a papyrus book found by them at Oxyrhynchus. It contains a small number of sayings of Jesus which in part agree with sayings contained in the canonical gospels and in part differ from them. Harnack believes them to be extracted from the *Gospel according to the Egyptians*; but it is as yet not possible to express a final opinion on their character.

7. *Gospel of Matthew*. Probably identical with the *Traditions of Matthew*, from which we have quotations. It was most likely a Basilidian work, for the Basilidians professed to regard Matthew as their special authority among the apostles. See Zahn, *Gesch. d. NT Kanons*, ii. 275.

8. *Evangelium Mariæ* (the Descent of Mary), quoted by Epiphanius (*Her.* 26c), was a Gnostic anti-Jewish romance representing Zacharias as having been killed by the Jews because he had seen the God of the Jews in the temple in the form of an ass.

9. *Zacharias, the father of John Baptist*. A. Berendts in *Studien zur Zacharias-apokryphen u. Zach.-legende* gives a translation of a Slavonic legend of Zacharias which may be taken from an early book, subsequently incorporated into the *Book of James*.

Almost every one of the apostles had a gospel fathered upon him by one early sect or another, if we may judge from the list of books condemned in the so-called Gelasian Decree, and from other patristic allusions.

Of a gospel of Philip we have fragments, descriptive of the progress of the soul through the next world, showing it to have been a Gnostic composition; it was probably very much like the *Pistis Sophia* (a long Gnostic treatise in Coptic), in which Philip plays a prominent rôle. The *Questions of Mary* (Greek and Latin) was the title of two Gnostic books of the most revolting type, quoted by Epiphanius (*Her.* 26a).

A Coptic papyrus volume recently acquired by Berlin contains texts as yet unpublished of two Gnostic books connected with the names of the Virgin and John, and also a portion of some early Acts of Peter.

For the most part, however, these heretical pseudepigrapha, where we know anything of their contents, must be assigned to a period later than that contemplated by our present scope.

27. Extant Gospels.

Extant apocryphal gospels two must be mentioned—
1. *Book of James*, commonly called *Protogospelion* (this name being due to Guillaume Postel, who first noticed the book, in the sixteenth century). Extant in Greek, Syriac, Coptic, etc. A narrative extending from the Conception of the Virgin to the death of Zacharias. The James meant is perhaps James the Just. In one place, where Joseph is speaking, the narrative suddenly adopts the first person. Origen, and perhaps Justin, knew the book. A Hebrew original has been postulated for it. It is undoubtedly very ancient, and may possibly fall within the first century. From it we ultimately derive the traditional names of the Virgin's parents, Joachim and Anne. The work has been edited by Tischendorf (*Evangelia Apocrypha*).

2. *Acts of Pilate*, often called the *Gospel of Nicodemus*.—Greek, Latin, Coptic, etc. In two parts: (1) an account of the Passion and Resurrection; (2) a narrative of the Descent into Hell. Part 1 may be alluded to by Justin Martyr, who more than once alludes to Acts of Christ's Passion. It is possible, however, that he may be referring to another apocryphal document which exists in many forms—the *Anabasis Pilati* or official Report of Pilate to Tiberius. In any case, the *Acta Pilati* (Part 1) in some form probably date from early in the second century. Edited by Tischendorf (*l.c.*); see also Lipsius, *Die Pilatusakten*, and Schubert on the Gospel of Peter.

3. *Acts of James* (Ἀποστολὴ Ἰακώβου), only mentioned by Epiphanius (*Her.* 30).—An Ebionite and anti-Pauline book of which we most likely have an abstract in the end of the

first book of the *Clementine Recognitions*. It contained

addresses delivered by James the Just in the Temple. See Lightfoot, *Galatians*, 330, 367.

4. *Acts of Paul and Thecla*.—Greek, Syriac, etc. Tertullian tells us that this romance was composed in honour of Paul by a presbyter of Asia, who afterwards confessed the longevity (*De Baptismo*, 17); and Jerome, quoting Tertullian (probably from the Greek text of the same treatise), adds the detail that the expense took place in the presence of John. In the present writer's opinion, this may be a false reading: 'apud Iohannem' may have been corrupted into 'apud Iohannem.' Undoubtedly the romance is the earliest of the kind which we possess. It details the adventures and trials of a virgin, Thecla of Iconium, who was converted by Paul. Ed. Lipsius (*Acta Petri et Pauli*). Professor Ramsay contends for the historical accuracy of much of the local detail. It is now clear that this episode formed part of the *Acts of Paul* which has just been discovered by Carl Schmidt in a fragmentary form in Coptic. Until the text is published, however, little can be said.

The Acts of Paul, Peter, John, Thomas, Andrew, and Philip have all survived in part. They may be referred to some time in the second century. The author of all of them, save the first and last, was most likely one Leucius. The Passions and Acts of the remaining apostles are all later.

III. EPISTLES. 1. *The Abgarus Letters*. A letter from Abgar Vologases, king of Edessa, to our Lord,

begging him to visit Edessa and take up his abode there, and an answer from our Lord, promising to send an apostle to Abgarus, are given by Eusebius (*HE* I. c. 13), who translates them from Syriac, and derives them from the archives of Edessa. They are very early, and are intimately connected with the legend of the apostolate of Addai or Thaddæus at Edessa. A fragment of a fourth century papyrus text of the letters (which are very short) is in the Bodleian. They are found also in Syriac.

2. *Epistle of Paul to the Laodiceans*. Latin. It was founded upon Col. 4.6, and is a short cento of Pauline phrases. An Epistle to the Laodiceans is mentioned in the Muratorian Canon. See Lightfoot's *Colossians*, 317 ff., and Zahn, *Gesch. d. NT Kan.*, ii. 256b; also COLOSSIANS AND EPHESIANS, § 14.

3. *Epistle of Paul to the Alexandrines*.—Also mentioned in the Muratorian Canon, and nowhere else. Zahn (*l.c.* 58) has printed, from the Bobbio Sacramentary and Lectionary, a lesson purporting to be taken from the Epistle to the Colossians, which he assigns to the Epistle to the Alexandrines, or to some similar Pauline apocryph.

4. *Third Epistle of Paul to the Corinthians* (and letter from Corinth to Paul).—Armenian and Latin (and Coptic). These are now known to have formed part of the *Acta Pauli*.

There are but few other spurious epistles, and these are all of a distinctly later character.

IV. APOCALYPSES. 1. *Apocalypse of Peter*.—Greek. Quoted by Clement of Alexandria and by the heathen

antagonist of Macrinus Magnus (who is possibly Porphyry), and mentioned in the Muratorian Canon. We have now a considerable fragment of it, which was discovered in the same MS. as was the excerpt from the Gospel of Peter (see § 26 no. 4). This contains the end of a prophecy of Jesus about the last times, and a vision of the state of the blessed, followed by a much longer description of the torments of various classes of sinners. It was probably written rather early in the second century, and has had an enormous influence on later Christian visions of heaven and hell. Dieterich, in his *Apokalyphe*, has pointed out the strong influence which the Orphic literature has had on the writer. A trace of the influence of this apocalypse on Latin documents has been recently pointed out by Harnack in the Pseudo-Cyprian tract *De Laude Martirum*, and earlier by Robinson in the

APOLLONIA

Passion of St. Perpetua, and there is a possible trace in the earlier tract *De Alcatribus*. The Arabic and the Ethiopic *Revelation of Peter* or *Books of Clement* (see an article by Bratke in Hilgenfeld's *Zeitschr.*, 1893) seem not to contain the old book embedded in them; but as yet they are not very well known. Ed. Dieterich, Harnack, James.

2. *Preaching of Hystaspes*.—Lost. There are quotations from it in the *Preaching of Paul* (quoted by Clem. Alex.), in Justin Martyr (*Apol.* 1:344), and in Lactantius (*Div. Inst.* 7:1518). In every case it is coupled with the Sibylline Oracles, with which it is clearly to be associated, as a Christian forgery in pagan form. Ammianus Marcellinus (236) calls Hystaspes a 'very wise king, father of Darius,' Lactantius, 'a very ancient king of the Medes, who has handed down to posterity a most wonderful dream as interpreted by a prophesying boy (sub interpretatione vaticinantis pueri).' The same author represents Hystaspes as saying that the Roman name was to be wiped out, and, further, that in the last days the righteous would cry to God and God would hear them. Justin says that he prophesied the destruction of all things by fire, and the quotation in Clement makes him declare that the kings of the earth should hate and persecute the Son of God—the Christ—and his followers. It is this last passage which fixes the book as Christian rather than Jewish.

V. DIDACHE.—1. *Teaching of the Apostles* (Didachē).—Greek. The literature of this manual of ethics and church discipline is enormous, and the

31. **Didactic.** history of its various forms cannot be attempted here. It was discovered by Philotheos Bryennios in a MS. 1056 at Constantinople, and printed first in the year 1533. It consists of two distinct parts: the first an ethical manual which may be founded on a Jewish document, and reappears in the Epistle of Barnabas, the second relating to church matters, containing disciplinary rules and liturgical formulae. Opinions as to its date differ widely. Harnack would assign it in its present form (which is probably not primitive) to 130-160. It forms the groundwork of the 7th Book of the Apostolic Constitutions.

2. *Preaching of Peter*.—Apparently an orthodox second century book, of which Heracleon and Clem. Alex. have preserved important fragments containing warnings against Judaism and polytheism, and words of Jesus to the apostles. Another set of fragments, which there is no sufficient reason for repudiating, contains a lament of Peter for his denial, and various ethical maxims. There are strong similarities between the first set of fragments and the *Apology of Aristides*. Dobschütz (in a monograph in *Texte u. Untere.*) rejects the second set. The relation of the book (a) to a supposed *Preaching of Paul*, the existence of which is very doubtful, and (b) to the Pseudo-Clementine literature, is by no means clear. A Syrian *Preaching of Simon Cephas*, published by Cureton, has none of the matter appearing in the quotations from the Greek book.

For the books noticed above, and the

32. **Bibliography.** later documents not named (which are many), the student must consult: J. A. Fabricius, *Codex Pseudepigraphicus*, Vet. Test. M. R. J.

APOLLONIA (ΑΠΟΛΛΩΝΙΑ [Ti. VII]). A town on the Egnatian Road, in that part of Macedonia which had the name Mygdonia and lay between the rivers Strimon and Axios. It was near Lake Bolla (*Βολή*); but its exact site is not yet known. From the

APOLLOS

Itin. Ant. we learn that it was 30 R. m. from Amphipolis, and 37 from Thessalonica. Leake places it to the S. of the lake, at the modern village *Potima*; and this is probably right, though others are inclined to look for it more to the W. at the post station of Khsali, which is seven hours from Thessalonica. Apollonia was at any rate on the main road between Amphipolis and Thessalonica by the Anlon, or pass of Arcthesa. Paul and Silas, therefore, 'passed through' the town on their way to Thessalonica (Acts 17:1).† W. J. W.

APOLLONIUS (ΑΠΟΛΛΩΝΙΟΣ [VA], ΑΠΟΛΛΩΝΙΟΣ; ܐܡܠܠܐܢܝܐ).

1. (Son) of THIRASTAS [q. v.]; the governor of Coele-syria and Phoenicia who, according to 2 Macc. (35-14), induced Seleucus IV. to plunder the rich temple treasury of Jerusalem (see THIRASTASTES). He may possibly be the same as

2. The governor of Coele-syria under Alexander Balas, who came to the help of Alexander's rival, Demetrius II. (Nicator), who made him chief of the army. This is more explicable, it, as in Polyb. xxxi. 21:2. Apollonius was the foster brother (ἀνερρωτός) of Demetrius I. He was besieged at Joppa, and was entirely defeated by Jonathan near Azotus (Ashdod) in 147 B.C. (1 Macc. 10:60 ff.). Jos. (*Ant.* xiii. 1) calls him Δαός (or rather Ταός, Niese), i. e., one of the Dui (the classical Dahae) on the E. of the Caspian Sea, and erroneously represents him as fighting on the side of Alexander Balas.

3. General of Samaria, one of the officers of Antiochus Epiphanes, beaten and slain by Judas the Maccabee, 106 B.C. (1 Macc. 3:6 ff.). He is probably the chief tax commissioner (ἀρχισυνταμίσιος), who previously (168-167 B.C.) had been sent to hellene Jerusalem, and by taking advantage of the sabbath had routed the Jews and occupied a fort there (1 Macc. 1:2 ff., 2 Macc. 5:24 ff.). He may perhaps be identified with—

4. The son of Menesibius sent by Antiochus Epiphanes to congratulate Ptolemy VI. Philometor on his accession (δῶτα τὰ πρωτοκλήσια; 2 Macc. 4:21).

5. Son of GESSIUS (ὁ γὰρ Γεσσιανός); a Syrian general under Antiochus V. Eupator (2 Macc. 12:2).

APOLLOPHANES (ΑΠΟΛΛΟΦΑΝΗΣ [VA]; Syr. has ܐܡܠܠܐܢܝܐ). Apollonius?, a Syrian slain by the men of Judas the Maccabee (2 Macc. 10:37).

APOLLOS (ΑΠΟΛΛΩΝ; [Ti. VII]), according to 1 Cor., our most important source, was a missionary

and teacher who continued Paul's work in Corinth after the first visit of the latter (36), and was afterwards his companion in Ephesus, though not perhaps at the time the Epistle was being written (see *Ep.* in 16:12). Shortly before the writing of the First Epistle four parties had arisen in Corinth (1:10-12), one of which claimed to be 'of Paul,' and another 'of Apollos'; it argues, therefore, delicacy of feeling in Apollos that he did not comply with Paul's invitation to revisit Corinth again. The invitation itself, on the other hand, makes it plain that there were no very fundamental differences between the two men, least of all as to doctrine. Yet neither is it conceivable that the party division turned upon nothing more than the personal attachment of their individual converts to the two men respectively. On that supposition there would be nothing so blameworthy about it; and it would be impossible to explain the existence, alongside of them, of the party of Christ, and still more of that of Peter. Our earliest authority for Peter's ever having been in Corinth at all is Dionysius, bishop of Corinth about 170 (his *III* n 25), who, contrary to all the known facts of history, will have it that Peter

† The contraction, like Ζηνάς from Ζηνοδοτός, Ζηνός from Ζηνοδόρος, and so on (cp. NAIMES, § 80, col. 1). The latter form is more probably Ἀπολλωνίος than Ἀπολλωνίος, of which the usual contractions were Ἀπολλός, Ἀπολλας, Ἀπολλας. The reading Ἀπολλωνίος is actually given by D in Acts 18:24. By analogy the accentuation Ἀπολλώνιος ought to be preferred to the currently adopted Ἀπολλων.

came both to Corinth and to Italy simultaneously with Paul. Thus the formation of an Apollos party, as distinguished from the party of Paul, can have been due only to the individuality and manner of teaching of Apollos. Paul finds it necessary to defend himself against the charge that 'wisdom' is absent from his teaching. His answer (117-34) is that in substance 'wisdom' is really contained in the simple preaching of the Cross, but that in form he offers it only to Christians of mature growth, and (this not being the Corinthians' case) that he has purposely kept it in the background in his dealings with them. The teachers who offered 'wisdom,' and thus excelled Paul in the eyes of many of the Corinthians, however, were assuredly not the Judaizers among whom the parties of Christ and of Peter found their supporters. Apollos, therefore, must be meant. Paul actually says that on the foundation laid by himself in Corinth, besides the gold, silver, and precious stones, wood, hay, and stubble have been built (312). But the energy with which he pronounces his judgment in 119 f. 29-25 can be explained only by the fact that the adherents of Apollos overruled their teacher and subordinated substance to form.

With this agrees the notice in Acts 18:24-28 (our secondary source; see ACTS),¹ that Apollos was an

2. In Acts. eloquent man, mighty in the Scriptures, and an Alexandrian Jew. We may accordingly assume that the distinguishing quality in Apollos' teaching of 'wisdom' showed itself in an allegorising interpretation of the OT, such as we see in Philo or in the Epistle of Barnabas. But the fact that he was a Christian and taught the doctrine of Jesus 'exactly' (ἀκριβῶς; 18:25a) contradicts the statements (on the one hand) that he knew only the baptism of John (18:25c) and (on the other) that he had to be instructed more perfectly in Christianity by Priscilla and Aquila (18:26c). Whilst, therefore, it is possible for us to regard 18:24-25a as derived from a written source which the compiler had before him, 18:25c-26b would seem to be later accretions. The effect of these last expressions (even if they are traditional) is to represent Apollos as subordinate to Paul; for, according to 19:1-7, the rest of the disciples of John must receive the gift of the Holy Ghost for the first time at the hands of Paul. As to the rest, the fact that in 19:1-3 mention is made of these as of something new goes to show that originally in 18:25 there was no reference to a disciple of John. Further, Acts 18:28 is not easily reconcilable with what is said in 1 Cor. 12:2 compared with 7:18). In that case Acts 18:28a may be attributed to the same author to whom 18:28 (and 18:25c-26b) must be ascribed.

Of the most recent attempts to deny the existence of the contradictions indicated above none can be pronounced successful. Blass (*Exp. Times*, 7, 1895-96, pp. 241ff., 364, and *Philology of the Gospels*, 1893, p. 39 f.) supposes Apollos to have derived his knowledge of Christianity from a book where, as in the second canonical gospel, the baptismal precept was wanting. Arthur Wright (*Exp. Times*, 9, 1897-98, pp. 8-12, 437 f.) replies, with reason (as it seems to us), that such use of a book could not have been intended by the word *κατηχίσθαι*. It is only of *ἀκούειν* that Blass has been able to show that in some few cases it is practically equivalent to 'learning by reading' (see the examples, in Stephanus, *Thes.* I, Paris, 1831, p. 126^a A and B. They are not, however, all of them quite certain. Nor is Jn. 12:34 a case in point; the meaning is 'Our teachers have read in the law, and have to do us by word of mouth that the Christ abideth for ever'). No single instance can be adduced in which *κατηχίσθαι* denotes acquisition of knowledge without intervention of a teacher. In particular, in Rom. 2:17 f. the meaning is, 'thou leastest the name of a Jew and . . . provest the things that differ, being instructed out of the law' [by frequenting the synagogue, or the instruction of the scribes]; and even in those cases where *ἀκούειν* has practically the sense of 'read,' the underlying idea is always that the book is read not by the 'hearer' himself, but by some other person, as, for example, a slave, so that the primary sense of the word has never entirely disappeared. In the case of Apollos, however, the idea that he

used a Christian book, not however reading it himself but getting it read to him by some other person, is too far-fetched to be brought into requisition here. To the suggestion (referred to by Blass, *Acta Apostolorum*, ed. philol. 1895, ad loc.) that Apollos may have been orally instructed by a man whose knowledge of Christianity, in its turn, was limited to the contents of a book from which the baptismal command was absent, it has to be replied that the supposition is irreconcilable with the ἀκριβῶς of Acts 17:25.1 Wright himself, however, contributes nothing new to the solution of the question except the emendation of ἀκούειν into ἀπεκάλει (so 14), the verb being then taken as meaning 'to repeat by rote' or at least 'to glibly recite.' Even if such a meaning could be established for the word, it would not nearly suffice to remove the difficulties of the passage. Lastly, Baldeusperger (*Der Prolog des 4. Evangeliums*, 1877, pp. 93-95) is constrained to take refuge in the view that what Apollos taught ἀκριβῶς consisted only of Messianic matters as enumerated in such passages as Heb. 6:1 f.; that the editor of the source of Acts here employed says τὰ περὶ τοῦ Ἰησοῦ only from a point of view of his own, meaning all the while not the historical Jesus but simply the Messiah in the larger sense, in whose coming the disciples of John also believed. If this be so, he could not possibly have expressed his meaning in a less appropriate and more misleading way.

Tit. 3:13, the only other NT passage in which Apollos is named, cannot be used as a historical source; and there is no ground for the conjecture that

3. Other points. what constituted the difference between Apollos and Paul lay in the value attached

by the former to the administration of baptism with his own hands (1 Cor. 1:13-17), and that thereby he gave an impulse to the practice of baptism for the dead (1 Cor. 15:29). Paul, indeed, regards the church of Corinth, although he has personally baptized hardly any of its members, as wholly his own (1 Cor. 4:15 and often). On the other hand, the hypothesis put forward by Luther (as having already been suggested somewhere) that Apollos wrote the Epistle to the Hebrews is, at all events, preferable to any other that ventures to descend on a name.

In the lists of 'the Seventy' (Lk. 10:1), dating from the fifth and sixth centuries, Apollos is enumerated, and has the diocese of Caesarea assigned to him (*Chron. Pasc.* Bonn ed., i. 442, ii. 125). P. W. S.

APOLLYON (ἀπολλύων [Ti. VII]. Rev. 9:11. See ABADDON.

APOSTLE (ἀποστολος, 'a messenger')² was the title conferred by Jesus on the twelve disciples whom

1. 'The Twelve.' he sent forth, on a certain occasion, to preach and heal the sick. In the earliest Gospel tradition the disciples appear to be

spoken of as apostles only in reference to this special mission (Mk. 3:14 [NB] = Lk. 6:13, cp Mt. 10:2; and Mk. 6:30 = Lk. 9:10); but the name soon became a customary designation, and is so employed in Lk. (17:5 21:10) and Acts (12, etc.). The number twelve was symbolical, corresponding to the twelve tribes of Israel; and when Judas fell from his 'apostolate' (Acts 1:25) the number was restored by the election of Matthias.³ It is used in this symbolical and representative sense in Rev. 21:14.

Lists of the Twelve. In the four lists (Mt. 10:2 Mk. 3:16 Lk. 6:14 Acts 1:13) the names fall into three groups of four names, the first name in each group being constant, while the order of the rest changes. Thus:

I. Mk.	Peter	James	John	Andrew.
Mt. Lk.	Peter	Andrew	James	John.
Acts	Peter	John	James	Andrew.
II. Mk. Lk.	Philip	Bartholomew	Matthew	Thomas.
Mt.	Philip	Bartholomew	Thomas	Matthew.
Acts	Philip	Thomas	Bartholomew	Matthew.

III. Mk. Mt.	James	Thaddaeus	Simon the	Judas
	of Alphaeus		Canaanean	Isariot.
Lk. (Acts)	James	Simon Zelotes	Judas of	Judas
	of Alphaeus		James	Isariot.

Mark's order of the first group recurs in Mk. 13:3. It puts first the three who were selected as witnesses of the raising of Jairus's daughter (Mk. 5:37), of the Transfiguration (9:2), and of the Agony (14:33). Their importance is further marked by surnames given by Jesus (Cephas (Cephas) and Boanerges. Mt. and Lk.

¹ Blass now (*Phil. of Gospels*) expressly rejects the idea.

² ἀπόστολος, a stronger word than ἀγγελος, properly denotes not a mere messenger, but rather the delegate of the person who sent him. It seems to have been used among the Jews of the fourth century A.D., of persons sent on a mission of responsibility, especially for the collection of moneys for religious purposes.

³ On this subject, see MATTHEWS, I.

¹ The reference to Acts 18:24-28 occurs in § 11.

APOSTLE

drop the Aramaic surname Boanerges, and class the brothers together ('Peter and Andrew his brother'). In Acts the order is accounted for by the prominence of Peter and John in the opening chapters. This seems to have had a reflex action on the writer's mind, for in Lk. 8.51-58 we have 'Peter and John and James,' though where Peter is not mentioned we have 'James and John,' 9.54.

The original signification of the term (delegate or missionary) is recalled by its application to Barnabas and Saul (Acts 11.41), who had been selected under the direct guidance of the Spirit from among the prophets and teachers of the church of Antioch and sent forth on a missionary enterprise. Paul in his epistles defends his claim to be an apostle in the highest sense, as one directly commissioned by God; and in this connection he emphasises his personal acquaintance with the risen Christ (Gal. 1. 2 Cor. 11. 5 1 Cor. 9. 1: 'Am I not an apostle, have I not seen Jesus our Lord?'). As 'apostle of the Gentiles' (Rom. 11. 13) he received full recognition from the chief apostles in Jerusalem (Gal. 2.7-9).

The stress laid by Paul on his own apostolate, as 'not a whit behind' that of the Twelve, was probably a main factor in the subsequent restriction of the title to the original apostles and himself.

3. Others. In the NT, however, it is certainly applied to Barnabas, as we have seen, and almost certainly to Silvanus (1 Thess. 2.6), Andronicus, and Junias (Rom. 16.7) - apart from its more limited reference in the case of the 'apostles of the churches' (2 Cor. 8.23) and Epaphroditus (Phil. 2.25 'your apostle'). Moreover, we see it claimed in the church of Ephesus by certain persons to whom it is denied only after they have been tested and 'found false' (Rev. 2.2).

Rules for deciding the validity of such claims are given in the early manual called *The Teaching of the Apostles*. This book, which shows us a primitive type of Church life existing in the locality in which it was written, confirms the view suggested by the NT of the extension of the title of apostle beyond the limits of the Twelve and Paul. Apostles are here spoken of as teachers essentially itinerant; ranking above the prophets who may or may not be settled in one place, and in no specified relation to the bishops and deacons who are responsible for the ordinary local administration of the community. Even as the first apostles were sent forth 'without purse or scrip,' so these, 'according to the ordinance of the gospel,' move from place to place, and are not to remain in a settled church more than two days, nor to receive money or more than a day's rations. These wandering missionaries are referred to by Eusebius as 'holding the first rank of the succession of the apostles' (*HE* 3.37.5.10; he avoids the actual designation 'apostle,' perhaps in deference to later usage); and the strict regulations in the *Teaching* prove that there was danger lest the frequency of their visits should become burdensome to settled churches.

It is interesting to observe that the tradition of the application of the title to missionaries survives at the present day in the East. Among the Greeks the word for a missionary is *ἀποστόλος*, and the delegates of the Archbishop of Canterbury's mission to the Nestorians are regularly called apostles by the Syrians of Urm.

Having thus clearly established the wider use of the term 'apostle,' we must return and consider the uniqueness of the position occupied by the

4. Apostolate. Twelve and Paul, to whom *par excellence* the title belongs. The distinction of their office which first comes under notice is that they were witnesses of the Resurrection. This is emphasised at the election of the new apostle in Acts 1.21. 'Of the men which have accompanied with us all the time that the Lord Jesus went in and out among us, one of these must with us be a witness of his resurrection.' Their personal discipleship to Jesus, however, and the special training which he had bestowed upon them, had fitted them to be not only the preachers of faith and repentance to the multitudes, but also the authoritative instructors of the 'brethren' (cp. Acts 2.42 'the apostles' doctrine'). Their commission was derived directly from Christ, even as his was from the Father (Jn. 20.21, and cp. 1 Clem. 45: 'Christ then is from God, and the apostles from Christ'). In performing cures they lay stress upon the fact that they are his representatives; their acts are in fact his (cp. especially Acts 3.10-34). Certain functions are in the first instance

APPEAL

exercised exclusively by the apostles: as the laying on of hands, to convey the Pentecostal gift to the baptized, and the appointment of local officers in the church. In the earliest stage, too, the contributions of wealthy believers are laid 'at the apostles' feet'; though at a later time it is 'the presbyters' who receive the offerings made for 'the brethren in Judaea' (Acts 11.30).

The authority implied in their commission is now formally defined; but on two important occasions we are permitted to observe the method of its exercise. Thus, in the appointment of the Seven the apostles call on the whole body of believers to elect, and thereupon themselves appoint the chosen persons to their work by a solemn ordination. Again, when the question of the obligation of Gentile believers to observe the Mosaic ritual arises in Antioch, it is referred to 'the apostles and elders' in Jerusalem (see *CONC.*, ii.), and a letter is written in their joint names ('the apostles and elder brethren'). This letter is couched in terms of authoritative advice rather than of direct command; and the authority which it implies, with regard to the distant communities whose interests are involved, is moral rather than formal.

In the churches of Paul's foundation we find that apostle acting with a consciousness of the fullest authority, in appointing presbyters, conveying the gift of the Spirit, and settling all kinds of controverted questions (Acts 14.23 19.6 1 Cor. 7.17). His relation to the Twelve is marked by a firm sense of independence together with an earnest desire for concerted action. In the case of Timothy at Ephesus and of Titus in Crete we see him delegating for a time during his own absence his apostolic authority.

For the relation of the apostolate to other forms of the Christian ministry, see *CHURCH*, § 12.

Bishop Lightfoot's note 'on the name and office of an Apostle' (*Comm. on Gal.* 5th ed. 92-101) had, even before the recovery of the *Teaching*, destroyed the fiction of the limitation of the term in the first age. It needs now to be supplemented by Harnack's important discussion, *Lehre der Apostel*, 93-118. The whole subject has been freshly and vigorously treated by Hort in *Eccelesia* (*passim*).

APOTHECARY (אֶפֶסֶק Ex. 30.25 35. רֶקֶת Eccl. 10.1). The Heb. word means 'perfumer.' See *CONFECTION*, *PERFUME*. G's term is *μυρεῖος*, the medical or magical aspects (see *φαρμακία*, *λενεν*, *κον* in G) of whose trade may be seen in Eccles. 38.8, where his skill in compounding the medicines (ἡ *φαρμακία*, *medicamenta*) that the Lord created out of the earth is referred to. In Neh. 3.8 is mentioned a guild of perfumers, one of the 'sons' or members of which was Hananiah (the idiom is effaced in RV, and misrepresented in AV, which gives 'son of one of the apothecaries').

APPALIM (אֶפֶסֶק *efraim* [B]; אֶפֶסֶק [A]; אֶפֶסֶק [L]), a Jerahmeelite (1 Ch. 2.30 f.).

APPARITION (φαντασμα), Mt. 14.26 RV. See *DIVINATION*, § 3 (3), *SOUL*.

APPEAL On inferior and superior courts, or what might be called courts of review or of appellate jurisdiction in the Hebrew commonwealth, see *GOVERNMENT*, §§ 19, 31, and *LAW AND JUSTICE*, § 16. As regards Roman criminal procedure, the appeal of Paul to Caesar is best understood from the narrative of Festus to Agrippa (Acts 25.14-21). Accused by his compatriots in 'certain questions of their own superstition,' and asked whether he was willing to go to Jerusalem and there be judged, he had 'appealed' (*ἐπαλεσάμενος*) to be reserved for the hearing (*διάγνωσιν*, *cognitionem*) of Caesar. The apostle as a Roman citizen was well within his rights when he invoked the authority of the emperor and thereby virtually declined the jurisdiction alike of the Jewish courts and of the Roman procurator; and his reasons for choosing to do so are not far to seek. Under the republican procedure every Roman citizen had the right of *provocatio*

APPHIA

ad populum. From the time of Augustus the *populus* ceased to exercise sovereign criminal jurisdiction; the emperor himself took cognisance of criminal cases as a court of first instance, having co-ordinate jurisdiction with the senate.—The *questio* procedure continued as before to be the ordinary mode of trial.

APPHIA (Ἀπφία [Pi. WH], etc., *APPIA*, etc. Cp especially Iaghtf. *Col. and Philem.* 372 ff.), probably the wife of Philemon (Philem. 2).

APPHUS (Ἀπφους [A]; *CAPIPH*. [NV]), 1 Macc. 25. See JONATHAN, 18, MACCABEES, § 5.

APPII FORUM, RV 'Market of Appius' (Ἀππίου Φορὸν [Pi. WH]; modern *Foro Appio*), a well-known halting-place on the *Via Appia*, where Paul was met by brethren from Rome (Acts 28.13). The distance from Rome is given in the *Itin. Anton.* (107) as 43 R. m. and so perhaps *It. Hier.*—*g.* Migue, *PL* 8.794, but in other edd. [611 f.] as 37.

For inscription on XIII milestone, found near *Foro Appio*, see *ILL* x. pt. i. 630. The road leading to Appii Forum from the south through the district of the Pontine Marshes was often abandoned in favour of a journey by boat (cp Horace, *Sat.* i. 5.1-26, where Appii Forum is described (*G.* 4) as being 'Bifferium nautis, campobus atque malignis'. See also THOMAS JAVIERSS,

APPLE (תַּפְּחִי; Pr. 25.11 Cant. 2.15 78.3) 85 Joel 1.11, see also FRUIT, § 12), by some understood as a

1. **Name.** generic name including various fruits, and by others supposed to mean not the apple but the quince, citron, or apricot. The origin of the Hebrew name is not quite certain; but there seems no sufficient reason for rejecting the accepted derivation from תַּפַּח, to breathe; the name thus alludes to the perfume of the fruit. תַּפַּח in post-biblical Hebrew, and the corresponding word *tufāh*² in Arabic, ordinarily denote the 'apple'; and this rendering is, so far, supported by the ancient versions—Greek, Syriac, Arabic, Latin, and the Targum. It must be admitted, however, that all the words used—*μᾶλον*, *hazzōri*,³ *ṭufāh*, *malum* (s. *potum*)—are capable, with or without the addition of an epithet, of being applied to other fruits; *μᾶλον*, indeed, originally meant 'large tree,' or fruit in general, and only gradually became confined to the apple;⁴ cp the very wide use of *potum*, *poma* in Latin. Still, an examination of the biblical passages where תַּפַּח occurs seems to show that some particular fruit is intended; and the question must be answered by considering (1) which kind of fruit possesses in the highest degree the qualities of beauty of colour and form, of fragrance, and of efficacy in overcoming the feeling of sickness; and (2) which fruit-tree was most likely, under the conditions of climate and of botanical history, to be found abundant in Palestine during biblical times. [Though all the six occurrences of תַּפַּח are possibly, not to say certainly, post-exilic, the antiquity of the cultivation of the tree (or class of trees?) in Palestine is proved by the place-names Tappuah and Beth-Tappuah.]

The following identifications have been proposed:—(1) apricot (Tristram, *FFP* 294); (2) apple (especially WRS, *J. Phil.* 1365 f.); (3) citron or orange (Del. *Comm. on Prov.*); (4) quince (Houghton, *PSRA* 1242-43 [1889-90]).

1 It seems doubtful whether there was, as postulated by Löw (*Aram. Pflanzennamen*, 136) and Houghton (*PSRA* 1247 [1889-90]), any word תַּפַּח to swell, even in Rabbinic Hebrew. It is at all events unknown to biblical Hebrew, to Syriac, and to Arabic. See, further, Lag. *Ubers.* 111, 129; and F. Hommel, *Aufsätze u. Abhandl.* 107, and in *ZDMG* 44.546 (1900).

2 This must be a loan-word in Arabic (Fränkel, *Aram. Fremdw.* 140), probably from Aramaic, though no trace of it has yet been found in Syriac.

3 Lag. is inclined to derive this, the Aramaic equivalent of תַּפַּח, from the Armenian word for apple (*hutsor*) and thus prove that the fruit came to Semite lands from Armenia (*Ubers.* II. cc.); but Hommel shows the probability of the word being genuinely Semite, connecting it with an Arabic root *ḥanaza* (*Aufsätze u. Abhandl.* 1-7).

4 Hehn and Stallybrass, *Wanderings of Plants and Animals*, 499.

APPLE

1. With regard to the first of these—the apricot (*Prunus Armeniaca*, L.)—it is to be remarked that it is not mentioned by Theophrastus, and does not appear to have been known to the Greeks or the Romans before the commencement of the Christian era (De C. *Orig.* 171).

Its original home was E. Asia (probably China), whence it gradually spread westward to Armenia (Ἰσχυρὸν Ἀρμενίαν, *malum armeniacum*), but Tristram is certainly wrong in saying (*Nat. Hist.* 335) that it is native there.

The present abundance of the apricot in Palestine is almost certainly post-biblical.

2. The apple *Pyrus Malus*, L.—is found without doubt in a wild state in Northern Asia Minor, especially about Trebizond, and occasionally forms small woods.

It extends eastwards to Transcaucasia, and apparently to Persia (cp Boissier, *Fl. Orient.* 206). Sir Joseph Hooker says that it is 'apparently wild' in NW. Himalaya and W. Tibet, but that everywhere else in India it is cultivated (*Fl. Brit. ind.* 2373). De Candolle (*Orig.* 180) thinks the apple was indigenous and cultivated in Europe in prehistoric times; but Boissier (*loc. cit.*) restricts its natural occurrence to Macedonia and Euboea.

In any case the original apple clearly required a cool climate. Under cultivation there have been obtained varieties which will tolerate and even require a warmer one;¹ but these are notoriously modern inventions, and it is absurd to take account of them in considering the ancient history of the fruit. In truth the original apple—and the apple of biblical times was presumably somewhat similar—cannot have been very attractive; it was in fact a 'crab' only about an inch in diameter.

Sir Joseph Hooker says (from his own knowledge) 'Palestine is too hot for apples.' With this agrees Tristram's account:

'Though the apple is cultivated with success in the higher parts of Lebanon, out of the boundaries of the Holy Land, yet it barely exists in the country itself. There are, indeed, a few trees in the gardens of Jaffa; but they do not thrive, and have a wretched, woody fruit. Perhaps there may be some at Askani. What English and American writers have called the "apple," however, is really the quince. The climate is far too hot for our apple tree' (*NHB* 334 f.).

As there is no evidence of the apple ever having been found native in Syria, those who render *tappuah* 'apple' have to show (1) that it was introduced from without (Pontus), and (2) that it became established when introduced. Both propositions are improbable. What is said above of the introduction of a few modern sorts into Syrian gardens is true;² but it is impossible to infer from this fact that the biblical *tappuah* was the apple.

The strongest argument for the apple is that *tufāh* is used in modern Arabic for this fruit; but, as we have seen above, the word may have wider significance, and it is exceedingly probable that in such passages as those quoted by Robertson Smith in an article (*Journ. Phil.* 65 f.) which, though short, appeared to him (prematurely?) to be almost decisive, it is really the quince that is meant. Even if 'apple' be the usual modern meaning of *tufāh*, it is far from uncommon in botanical history for a name to pass from one to another of two plants so nearly allied as the quince and the apple.

[J. Neill (*Pal. Explored*, '82, p. 186) differs widely from Prof. G. Post of Beyrout (Hastings, *DB*, 'Apple'), who argues that the apple as grown in Palestine and Syria to-day alone fulfils all the conditions of the *tappuah*.

Post remarks, 'almost all the apples of Syria and Palestine are sweet (Cant. 2.3). To European and American palates they seem insipid. But they have the delicious aroma of the better kinds. . . . Sick persons almost invariably ask the doctor if they may have an apple; and if he objects they urge their case with the plea that they only want it to smell.' This being so, it is needless to conjecture that 'such an epicure as Solomon would have had many of the choicest kinds,' for, according to Post, the ordinary and (to us) disappointing Syrian apple can still, without poetic idealisation, be referred to in the language of Canticles. But was Canticles written for Syria?]

3 No citrus (orange or citron) will do.

The citron has its home in the sub-Himalayan tract of N.

¹ Thus the best American apples succeed in Great Britain only under glass.

² Similarly, in the Deccan four sorts of apples are now found; but these are all introduced, two from England and two from Persia.

APRONS

India. Thence it spread W. through Mesopotamia and Media; hence its current botanical name, *Citrus medica*, L.¹ It is first mentioned by Theophrastus (*το μῆλον το μέλιον ἢ τὸ πῆρικον*; *Hist.* iv, 42); but he says that it is not eaten (*οὐκ ἐσθιέται*). It was probably, therefore, not much developed by cultivation.

The Romans did not know the citron. Their citron wood was the wood of *Callitris quadrivalvis*, Ventr., from N. Africa. The true citron was probably not introduced into Italy till the third or fourth century A.D.

The claims of the citron² (to be the *tappach*) are so exceedingly slight that its introduction into Palestine is chiefly interesting in connection with the Feast of Tabernacles, at which, in the time of Jos., it was carried by the Jews (a custom which is continued to the present day; see 'The Citron of Commerce,' *Nero Bulletin*, June 1894). It was introduced at any rate during the period of their relations with Media and Persa, and we find it depicted upon Jewish coins (see Stadel, *GTZ* 2, facing p. 106).

The statement of Jos. (*Ant.* xiii, 13) is, that according to the law of the Feast of Tabernacles branches of the palm and citron tree (*ῥαβδὸν τῶν φοινίκων καὶ ῥαβδὸν*) were to be borne by every one; elsewhere (*ib.* iii, 104) he specifies the myrtle, the willow, and boughs of palm-tree, and of *παντὶ δένδρῳ μύλος τῆς περσικῆς*. The Talmudic law particularly ordained that the fruit should be held in the left hand, and the branches (*arabes*) in the right. The priestly law, on the other hand, has not the provision which the translators and exegeses of a later age gave to it. In Lev. 23:40 ff. (H) among the requirements for the feast of Ingathering, stands the 'fruit of goodly trees,' or (better) 'lovely tree-fruit' (*פרי עץ נחמד*; cp *DBAL*, *καρπὸν ἑυδαίου ὁπαίου*), which *Varag*, Pesh., and ancient Jewish tradition identified with the orange or citron.³ This identification is open to question, and the expression may be correctly, preferably with the 'fair boughs' mentioned in the account of the Feast of Tabernacles, 2 Mac. 10:6 ff. (*καλὰυθα ὁπαύων*; *varag* *varag*; Pesh. om.). Nor is the citron specifically mentioned in the somewhat fuller and less vague list in Neh. 8:15 (the Pesh. apparently renders 'palm trees' by 'citrons'), although commentators find an allusion to it in the *עץ זית*, the fat or oily tree (AV 'pine,' RV 'wild-olive').

The orange was unknown to the Greeks and Romans. It was introduced into Mediterranean countries by the Arabs about the ninth century.

4. Whereas the development of the modern apple is most probably to be attributed to the northern races, the quince (*Pyrus Cydonia*, L. = *Cydonia Vulgaris*, Pers.) is a fruit characteristic of the Mediterranean basin and requires a warm temperate climate. A native of W. Asia, it extended to the Euxas, and thence spread through all Mediterranean countries.⁴ The best sort came from Crete; hence *μῆλον κρήτιον* and *Atlantia cydonia*, and the various European names (*Cydonia*, Ital.; *Coing*, Fr.; and *Quince*, Engl.). Hehn (*l.c.* 185) says: 'The golden apples of the Hesperides and of Atlantis were idealised quinces . . . Its colour, like that of the pomegranate, made a lively impression.' This would well accord with the reference in Prov. 25:11; whilst the well-known aroma of the quince (much stronger than that of the apple) would explain Cant. 2:578[9]. It is true that the taste of the fruit, unsweetened, is harsh and bitter, and there is hence some difficulty in reconciling our theory with Cant. 2:4; but something must be there allowed for the idealisation of the picture, and undoubtedly the fruit could be prepared in such a way as to have a delicious taste. Moreover the whole classical history of the fruit is saturated with erotic suggestion, and this falls in with the repeated mention of it in Canticles.

S.M. — W. T. T. D.

¹ Sir Joseph D. Hooker (*Fl. Brit. Ind.* 1514) gives its range as Garwal to Sikkim.

² *תפוח*, from Pers. *tūmū*. For the various traditions connected with it cp Levy, *s.v.* See *l.c.* 46.

³ The Daphnephoria as depicted by Leighton is a familiar and popular illustration of this custom.

⁴ Rashi referred to the annual beauty of the tree, and the Talmud supposed that *תפוח* = *l.c.* *תפוח* — an allusion to the fact that the citron grows beside all waters (cp Field, *Heb. Lex.* ad *loc.*). See De Candolle (*Orig.* 32, 141 f.), who quotes Rashi to show that the citron was not recognised by the translators of *DB*. If *תפוח* is really a genuine (and ancient) Semitic word (cp above, § 1, n. 3), it is tempting to read it here instead of *תפוח*.

⁵ De Candolle, 189, says: 'Avant l'époque de la guerre de Troie.'

AR, AR OF MOAB

APRONS. For *תַּרְלוֹת*, the (tig-leath) coverings of Gen. 37 (AV ⁹⁸ 'things to gird about,' RV ⁹⁸ 'girdles'; G⁹⁸ *περιζωματα*), see GIRDLE, 2. For *מִצְנֵפִים* (Ruth 3:15 AV ⁹⁸) see MANTLE, § 2, no. 3. The *σχιματῖδια* [Ti. VII] of Acts 19:1 (used for healing purposes) are the *semicincta* or aprons worn by servants and artisans.

AQUILA [αἰγυλας [Ti. VII]] is the Latin name by which alone we know one of the Jewish companions of Paul. A Jew, native of Pontus, he had removed to Rome and there carried on his calling as tent maker; probably it was also in Rome that he married his wife Priscilla, whose name is always associated with his. Most commonly indeed placed before it. The banishment of the Jews from Rome by Claudius (*ca.* A.D. 49) led to the settlement of Aquila and his wife in Corinth (Acts 18:2). Here, presumably, their acquaintance with Paul began and they were converted to Christianity. It was with them that the apostle, also a tent maker, lodged on his first visit to Corinth. Afterwards, looking back upon his relations with them at this time [Rom. 16] he applies to them the words: 'fellow-workers in Christ Jesus, who for my life, laid down their own necks; unto whom not only I give thanks, but also all the churches of the Gentiles.' From Corinth Aquila and Priscilla accompanied Paul to Ephesus (Acts 18:18), and here they remained behind while he went on to Jerusalem. At this time Apollos (*ca.* 37) arrived in Ephesus, and the zealous pair undertook to 'expound unto him the way of God more perfectly' (v. 26). Writing to the Corinthian Church after his return to Ephesus, Paul encloses the message: 'Aquila and Priscilla salute you much in the Lord, with the church that is in their house' (1 Cor. 16:19). What is meant by this church is not quite clear; but the expression shows that they must have held a somewhat prominent and perhaps official position in the Ephesian community. That Ephesus continued on was supposed to have continued to be their home long after Paul left it is shown by the salutation addressed to them in 2 Tim. 1:10. That they are saluted in Rom. 16 shows (on the assumption that Rom. 16:20 is an integral part of the epistle in which it now occurs; see ROMANS) that at some period they must have returned to Rome for at least a season; but the occurrence of their names here is one of the facts that are held to make it probable that the salutations of Rom. 16:20 really belong to an Ephesian epistle.

Ecclesiastical tradition has little to say of either Aquila or Priscilla; in some late forms of the *Acts*, Aquila and Priscilla are represented as having been the disciples and companions of that evangelist, and as having been the Gospel entrusted to them by him. They are enumerated as two of the 'Seventy' (Lk. 10), dating from the fifth or sixth century, Priscilla being sometimes read for Prisca. See *Life of St. Paul*, *Apocrypha*, i. 203 ff. 399 ff. 2:367.

AR, AR OF MOAB, is mentioned in the two ancient songs which celebrate Israel's passage across Moab:—Nu. 21:15, 'the slope of the valley that stretches to the seat' or site 'of Ar' (*עַר*, *הַר* [B.M.]); and Ps. 124, 'a fire hath devoured Ar of Moab' (*בְּעַר* *בְּעַר* *מוֹאב* [L.]; *עַר* M. [B.V.]). *i.e.* *עַר* *כַּ*; so Sam. and some Heb. MSSs and consumed the high places of Arnon.' This 'Ar Moab' is usually taken to be the same as the 'Ir Moab,' 'city of Moab' (*בְּעַר* *בְּעַר* *מוֹאב* [B.M.]), 'which is on the border of Arnon at the utmost part of the border' (Nu. 22:36), where Barak met Balaam when he came to Moab from the E.; and indeed *עַר* in these ancient songs may be the primitive spelling of *עַר*. It is also the 'Ar Moab' of Is. 15:1 (*הַ מְוָאבֵיטִים* [BNAQI]), there parallel to Kir Moab, another chief fortress of the country, the present Kerak. It may also be 'the city (*עַר*) in the midst of the valley'—*i.e.*, of Arnon (Deut. 2:6 Josh. 13:9 and 28:24). In harmony with these passages, it is called the 'border of Moab' in Deut. 2:13 (*עַר* *מוֹאב* *אֲרֹנָה*); but in *עַר* *מוֹאב* (*אֲרֹנָה* [B.F.]) and 29 (*אֲרֹנָה* [B.F.]; *אֲרֹנָה* [A]) of the same chapter it seems

ARA

to mean a district rather than a town, and in this connection it is interesting that **ARA** renders 'Ar Moab' in Is. 15 by Moabit. Our present knowledge of the topography of Moab does not enable us to identify the site of 'Ar, the city.

We may be sure it was not the modern Rabbā (so the *PEF* map), the Anapoda, which in the fourth century of our era was the capital of Moab. Others have suggested the Melat el-Haj on the left bank of the Arnon opposite Aroer (see Burckhardt, *Arab.* 374).

More probably (cp Nu. 22.36) it lay at the E. end of one or other of the Arnon valleys.

There Langer (*Reisebericht*, vii) has proposed Lejin (Legio?) described by Doughty (*Arab. Deserts*, 1.30) as a 'four-square, lime-stone bailey, walled town in ruins, the walls and corner towers of dry block-building, at the midst of every wall a gate.'

ARA (אֲרָא; אֲרָא [BA] -אֲרָא [L.]), in a genealogy of ASHER (גִּזְרָה, i. § 4), 1 Ch. 7.34. Perhaps אֲרָא should be pronounced אֲרָא (Ural for אֲרָא, i. riah). See ULLA.

ARAB (אֲרָב; אֲרָב [B], אֲרָב [A.]), a site in the hill-country of Judah (Josh. 15.62). If Dt. Matt. (7.7, 4) is ed-Dameh, there may possibly be an echo of Arab in *er-Rithra*, the name of a site, with ruins, in the mountains of Judah, S. of Hebron (*PEF* Mem. 3 in 300).

ARABAH (הַעֲרָבָה; אֲרָבָה [BA]), often translated by ἡ ἄραια (εἰς, εἰς, κατα) ἄραια, sometimes by καὶ ἡ ἄραια (εἰς) ἄραια [BA], as a common noun, from a root probably meaning 'dry' (cp ARABIA, § 1), is used as a parallel (Is. 35.16, etc.) to 'desert-steppe,' and to 'עֲרֵב, ' parched ground,' with much the same force. As a proper name, with the article, it is generally confined to the great depression of the Dead Sea valley, 'the Arabah.' So correctly in RV; in AV it is more usually translated 'plain' (7.7, 6) or 'wilderness' (but in Josh. 18.18 'Arabah,' *BA* Bathapaia, see BATH-ARABAH). Along with the hill-country, the slopes, the Shephelah, and the Negeb, it is reckoned as one of the great parallel divisions of the land (Dt. 17 Josh. 11.6 12.8), and it is clear that the name was applied not only to the depression from the Lake of Galilee (Dt. 3.17; cp ARABATIS) to Jericho (2 K. 25.4) and the Dead Sea (which was called the Sea of the Arabah; Dt. 4.49, etc., Josh. 3.16, etc.), but also to the rest of the same great hollow as far as the Gulf of Akabah (Dt. 1.1).

Different parts of the Arabah were called 'Arboth (construct plur. of 'Arabah); cp Josh. 5.10 Jer. 39.5, etc., EV 'plains of Jericho'; Nu. 22.263, etc., 'plains of Moab.' See too ARABATIS.

To-day the name *Ar. Araba* is confined to the south of the line of cliffs that crosses the valley obliquely a few miles south of the southern end of the Dead Sea; and all N. of this is known as *El-Ghōr*, 'the depression' (Rob. BR 2.490).

The singular geological formation of the Arabah is indicated under PALESTINE (§ 31). Here it is sufficient to explain how such a name was applied to the valley even N. of the Dead Sea. In spite of the enormous possible fertility of the Jordan valley under proper irrigation, the vast stretches of jungle, near, saline soil, and parched hillsides out of reach of the streams, along with the sparseness of cultivation in most ages (owing to the great heat, unhealthy climate, and wild beasts), fully justify the name Arabah. In the NT also the valley is called a wilderness (τῇ ἐρήμῳ Mk. 1.4).

For the Arabah S. of the Dead Sea, see Rob. BR 1. and ii, Hall, *PEF* Mem., 'Geology,' and for the part N. of the Dead Sea, Stanley, *SP* 7; Conder, *Tent Work in Pal. II*; F. A. S. 117.22.

ARABAH, BROOK OF THE, AV River of the Wilderness (הַנָּחַל הָעֲרָבָה), is in Am. 6.14 the southern limit of the land of Israel in opposition to the northern Pass of Hamath. The name occurs nowhere else; but by some has been taken as another form of Brook of the Arabim (עֲרָבִים; EV BROOK OF THE WILLOWS [AV^{ms} BROOK OF THE ARABIMANS]—rather of the *Populus euphratica*; ZDPV 2.25-31).

ARABIA

given in Is. 15.7 as the southern boundary of Moab. This may be the long Wady el-Hasy (or Hesi, *PEF* Map) which Doughty (*Ar. Des.* 1.26) describes as dividing the uplands of Moab and Edom, and running into the S. end of the Dead Sea; by some thought to be also the Brook Zikrid. It is doubtful, however, whether the Israelite kingdom could ever have been described as extending S. of the Arnon. Hoffmann (*Z. LIT.* 3.115 [83]) suggests that the Brook of the Arabah may have lain at the N. end of the Dead Sea. *BA* rendering, τοῦ χειμάρρου τῶν δεσμάτων [BAQ], is no help. It is to be noted that N. Israel under Jeroboam II. in the time of Amos is stated in 2 K. 14.9 to have extended from 'the entering in of Hamath unto the Sea of the Arabah.' The difficulty is increased by the uncertainty as to whether Amos means to include Judah. G. A. S.

ARABATTINE Ἰακρὰβαττίνη [AN], 1 Macc. 5.34 AV, RV AKRABATTINE.

ARABIA, ARABIANS (עֲרָב; gentile עֲרָבִי and in Neh. עֲרָבִי, pl. עֲרָבִים, also once עֲרָבִיָּים, and once Kt. עֲרָבִים; אֲרָב[ε] [A] decl. and indecl. [ANAL, etc.], Bicea [BAN], אֲרָב[ε] [ABU], [BAN], etc., אֲרָב[ε] [BAN]).

The name 'Arab' (עֲרָב) seems originally to have meant nothing more than 'desert': hence 'people of the desert.' So Isaiah¹ uses the word,

1. Earlier

OT usage.

'In the forest in the desert (*Arabah*); but *BA* εἰσέρχας ye halt for the night' (Is. 21.8). More usual in Hebrew is the fem. form *Arabah* (e.g. Job 21.39), a word employed as a proper name to denote the desolate valley, in which the Dead Sea is situated, reaching to the north-eastern extremity of the Red Sea (see ARABAU, i.). In the OT the term 'Arab,' as the name of a particular nation and country, is confined to comparatively late writings; it must therefore appear highly improbable that the Homeric *Ἐρεβῶν* (*Od.* 4.84) are to be identified with the Arabs. The lists in Genesis, which specify various Arabian tribes, do not mention the name—a very significant indication of their antiquity. The word being certainly an appellative ('desert') in Is. 21.13 (with EV cp Hab. 1.8, Zeph. 3.3), the heading קָצָה עֲרָבִים, 'Oracle concerning the Arabs,' cannot be in accordance with the author's real meaning.² No certain instance of the use of 'Arab' as a proper name occurs before the time of Jeremiah. He speaks of 'all the kings of Arab' (עֲרָבִים, Jer. 25.24). The words which follow in MT, וְהָעֲרָבִים כָּלֵב הָעֲרָבִים, are of course a dittography; in order to make sense the scribes pronounced קָצָה 'the mixed people,' a form which really occurs in 2.20, as well as in Ez. 30.5 and 1 K. 10.15 (where *BA* reads קָצָה 'the mixed'). The Greek text of Jer. 25.24 (κ. πάντας τ. συμμικτούς [BAQ]), it may be noticed, does not presuppose a repetition, and moreover (followed by Co.) omits the word 'kings,' necessary though it is to the sense. The phrase, 'like a *Arabi* in the desert' (Jer. 32, κοπύνη [BAN]; Aq. ἀραβ [Q^{ms}]), may be explained to mean either 'like an Arab' or 'like a Nomad'—the word has not yet acquired a strictly ethnographical signification. The same thing applies to a passage dating from the end of the Babylonian Exile, 'No *Arabi* shall pitch his tent there, nor shall shepherds cause their flocks to lie down there' (Is. 13.20, 'Αραβ [BAN^{ms}]). In Ez. 27.20, however, 'Arab' (עֲרָב; אֲרָב[ε] [BAQ]), with the note εἰσέρχας [Q^{ms}]), appears as the name of a people, coupled with Kebar, a desert tribe very frequently mentioned at that period (see ISHMAEL, § 4 [2]).

¹ Isaiah's authorship, it is true, has been disputed (see ISAHIAH, § 6).

² Q omits it; but Aq. Symm. Theod. all have it.

³ Gieseb., however, while agreeing as to the dittography which follows, denies that 'and all the kings of Arab' are the words of Jeremiah; the closing words of the verse ('who dwell in the wilderness') alone are genuine; they give the locality of those 'who have the corners of their hair polled' (7.20). Cp. 9.26 [25], 'all that have, etc., who dwell in the wilderness.'

⁴ *BA* has κ. π. τ. σ. αυτου.

ARABIA

It would seem that the name of the Arabs came into use among the Hebrews at a time when the old names Ishmael, Midian, etc., were disappearing from ordinary speech. This change may be connected with the fact that during the period in question various tribes were advancing from the S. into the northern deserts and dispossessing the former inhabitants, who, in all probability, were closely akin to the Hebrews. Such shiftings of the population have occurred repeatedly in the course of ages. However unproductive the districts to the E. and to the S. of Palestine may appear to us, they are nevertheless, from the point of view of the Nomads, decidedly preferable to many parts of Arabia proper.

From the ninth century B.C. and onwards, the name of the Arabs occurs in the Assyrian inscriptions, where it presents a variety of forms¹ (*Arabi, Arabu, Arbu*, etc.), the adjective being *Arbaya*.

The name *Arbi* (*KB* 2 4 f.), however, can scarcely be, as Dehtsch (*loc.*) supposes, another form of the same word and the equivalent of the Arab *ʿArabi* (which appears to be quite later and of the Heb. אַרְבִּי). The Arabs mentioned in the cuneiform inscriptions were probably all, or for the most part, natives of the Syrian desert, though we have no reason to assume that the name was applied to them exclusively as distinguished from the inhabitants of Arabia proper.

The inscriptions of the Persian King Darius (*e.g.*, Behistūn, l. 15) mention *Arabaya* among the subject lands, always placing it after Babylonia and *Athura* (*i.e.*, Assyria, Mesopotamia proper, and possibly northern Syria) and before Egypt; here also the word must refer to the great deserts of Syria—perhaps also to those of Mesopotamia and the Sinitic peninsula.

Æschylus (*Pers.*, 316), the first extant Greek writer in whose works the name occurs, speaks of a distinguished Arab in the army of Xerxes, and the contemporary authority whom Herodotus follows in his account of the Persian army makes mention of Arabs on the same occasion (*Herod.*, 769). While the notions of Æschylus, however, about the geographical position of the Arabs, are altogether fantastic—he represents them as dwelling near the Caucasus (*Prom.*, 422)—Herodotus shows himself much better informed. He applies the term Arabia to the whole peninsula (*cp.* *Herod.* 2 1 3107-113 439); but, as might have been expected, he refers in particular to those Arabs who inhabited the country between Syria and Egypt (2 12 30347 ff. 82091, etc.). It is also to be remarked that, in accordance with a peculiar classification, he gives the name of Arabia to that part of Egypt which lies to the E. of the Nile valley (23, etc.). Xenophon (*Anab.* vii. 825) speaks of a governor set by the Persian king over 'Phœnicia and Arabia,' by which is meant the S. of Syria, including Palestine and the neighbouring desert—a separate governor being set over 'Syria and Assyria.' Similarly in the *Cynopædia* he doubtless always means by Arabia the desert lands which were to some extent dependencies of the Persian Empire, not the peninsula itself; we must remember, further, that Xenophon had no definite ideas about these countries, through which he had not himself travelled. The name Arabia is used, in particular, for the desert of Mesopotamia (*Anab.* i. 51); it can hardly be an accident that this very district is called *ʿArab* by Syriac writers from the third century after Christ and onwards. Whilst, however, the term is regularly applied to that part of the desert which remained under Roman dominion till the Mohammedan conquest, the eastern portion, which belonged to Persia, is more commonly known as *Belth*, *ʿArabāyē* (or *Bil* *ʿArabāyē* in the Arabicised form) *i.e.*, 'land of the Arabs.' Traces of this usage are found in late Greek authors also.

A strictly ethnographical sense belongs to the word

¹ See Del. *Par.* 295 304 ff.; and *cp.* Schr. *KGF.* 100 ff.

ARABIA

'Arab' in the writings of a contemporary of Herodotus, Nehemiah, who suffered much from the enmity of an Arab (*Neh.* 2 19 61-6) and commemorates the Arabs as such in the list of his opponents (*Neh.* 17 11).

3. Later OT writers. The Arabian question bears a name which, according to the Massoretic vocalisation, is to be pronounced *Gashmū* (*גַּשְׁמוּ*) or *Gashmū*, and appears in the Greek text as *Γασημ* [*ΓΑ*]. *Γασημ* [1.]; the correct form is probably *Gashmū*, a well-known Arabic name. It is very likely that at that time the great migration of the Nabateans had already happened (see *EDOM*, § 1, NABATEANS). The Chronicler too refers to 'the Arabians.' They brought tribute, he tells us, to the pious King Jehoshaphat (2 Ch. 17 11). He relates, also, how God punished the wicked Joram by means of the Philistines and 'the Arabians who were beside the Ethiopians' (2 Ch. 21 16, *cp.* 22 1), and how he succoured the pious Uzziah in the war against 'the Arabians that dwell in Gilead' [*גִּלְעָד*] and other nations (2 Ch. 26 7). All this is written from the point of view of the author's own time (*circa* 200 B.C.), and has no claim to be regarded as historical.

By the beginning of the Macedonian period the kingdom of the NABATEANS [*נַבְיָאִי*] had long been firmly established. At that time various other Arabian tribes were also to be found in the great Syrian desert, and from among these certain families and persons rose to great power during the decline of the Seleucid Empire. In several Syrian towns we find Arabian sovereigns, and at Palmyra, at least, there was an Arabian aristocracy; elsewhere also Arabian chieftains occasionally played an important part in the politics of that period. Place, several times mentions Nabateans and other Arabs (525 39 9 15 11 17 to 12 31, *cp.* 2 Macc. 5 8 12 to f.).

The apostle Paul, after his conversion, retired into Arabia (*Gal.* 1 17) probably some desert tract in the Nabatean kingdom. When he speaks of **4. NT.** Arabia he of course includes the Sinitic peninsula (*Gal.* 1 25). Similarly, 'Arabs' (Arabian Jews or proselytes) in Acts 21 probably means natives of the Nabatean kingdom (see NABATEANS) or of the Roman province of Arabia which covered almost the whole extent of that kingdom. The province was constituted by A. Cornelius Palma, governor of Syria (*circa* 105 A.D.).

At what period certain tribes began to call themselves Arabs, and at what period the name was adopted by the

5. Native Arabian usage. The distinguished scholar, D. H. Müller,¹ has maintained that the name 'Arab' was unknown to the natives of Arabia till Mohammed introduced it as a national designation. This view, however, is scarcely tenable. The present writer does not happen to have made any notes on the occurrence of the name in the pre-Islamic poetry;² but the verse in Tabari, i. 10365, which dates from the beginning of the seventh century, is a sufficient proof of its occurrence—the poet, who can have known nothing of Mohammed, speaks of 3000 Arabs as opposed to 2000 foreigners. The events there described happened in the neighbourhood of the lower Euphrates—that is to say, in a district where Arabs, Aramaeans, and Persians frequently came into contact with one another, and where, for that very reason, a special term to denote the Arabian nationality and language was absolutely required. When we take into account the frequent communication between the Arabs of this district and those of the distant W. and S., and the great uniformity of the Arabian nation, it must appear highly probable that the name had long been generally used in Arabia itself.

¹ *Neue Freie Presse*, 1894, 20th April.
² He would not lay great stress on the words *kura* 'arabiyātin', 'villages of Arabian women,' or *kura* 'arabiyātin', 'Arabian villages,' in a verse ascribed to the old poet Imra' al-kays (about 550 A.D.), 392 (Ahlwardt), the fragment being very obscure and the text not quite to be trusted. Nor could he affirm the genuineness of the verses ascribed to old poets in *ʿAḡāḡ* ix. 10 second last line, x. 149 2 where the word 'Arab' occurs.

ARAM

scription of Tiglath-pileser III. (745-727 B.C.), and an inscription of Sennacherib (705-681 B.C.). (See *Hel. Z.* 238, Schr. *K 11* 110, *A 11* 23). The name occurs also in a few other Assyrian inscriptions; but, owing to the imperfection of the writing, it may sometimes be doubted whether the word is really 'Aram,' and not some such form as *arā*, *arā*, or *arā*. It is remarkable that the cuneiform inscriptions, at least according to the opinion of Del. and Schr., never give the name of 'Aramians' to the Aramaic-speaking populations W. of the Euphrates, whereas in the OT this is the Aramaean country *par excellence* (cp ARAM-NAHARAIM, MESOPOTAMIA, § 1).

Though at several periods the whole, or the greater part, of the Aramaean nation has been subject to a single foreign power, the Aramaeans have never formed an independent political unity; in fact, so far as we know, there has never existed a state comprehending the Aramaeans of the main part of Syria or of Mesopotamia proper, to the exclusion of other races.

From a very early time, however, the population of these countries must have been predominantly Aramaean, as is shown by the fact that all the other nationalities were gradually eliminated, so that, even before the Christian era, the various dialects of the Aramaeans, as the Greeks say, Syriani language prevailed almost exclusively in the cultivated lands which lie between the Mediterranean and the Mountains of Armenia and Kurdistan. Aramaic was used by the neighbouring Arabs as the language of writing; it also took possession of the land of Israel (see § 5, end). It is indeed very unlikely that, as early as the time of Solomon, there was an important Aramaean element in Palestine, as W. Max Müller supposes (*Is. u. Pers.* 171); the ending *ai* in many names of Palestinian cities in the list drawn up by the Egyptian king Šosēnk is probably nothing more than the Hebrew ending *ay*, expressing motion towards—the so-called *Hebraïsme*. Even in some books composed before the Exile, however, the influence of the language spoken by the neighbouring Aramaeans is occasionally perceptible. This influence became very much greater after the Exile (when those Israelites who remained, or founded settlements in Judaea, Samaria, and Galilee, were at first feeble in numbers) and little by little the Aramaic tongue spread over the whole country. Though the language of such parts of the OT as Esther, Ecclesiastes, and several of the Psalms is Hebrew in form, its spirit is almost entirely Aramaic. The compiler of Ezra inserted into his book an extract from an Aramaic work composed, it would seem, about 300 B.C.; and half of the Book of Daniel (which was written in 167 or 166 B.C.) is in Aramaic. Moreover, a dialect of this language was spoken by Christ and the apostles, and in it the discourses reported in the Gospels were originally delivered. Nor did the Latin language (under the Roman rule) ever threaten to supplant the prevalent Aramaic. Greek, it is true, gained some footing in Syria, and, since it was the vehicle of intercourse and literary culture, exercised a great influence on the native dialects. It was the conquests of the Moslems, however, that suddenly brought to an end the ascendancy of Aramaic after it had lasted for more than 1000 years. The Arabic language was diffused with surprising rapidity, and at the present day there are only a few outlying districts in which Aramaic dialects are spoken.

What group of tribes the author of Gen. 10:23 includes under the name of Aram, we are unable to say precisely.

3. In Pentateuch. Of the 'sons of Aram' enumerated there is unfortunately none that can be identified with tolerable certainty (see GEOGRAPHY, § 24). The position of 'Uz, although it occurs several times in the OT, is unknown. It must, however, have been situated not far from Palestine. 'Mash' is usually supposed to be the country of the *Μάσιον ὄρος* (Strabo, 506, etc.), the source of the river Mashē (*n'hār*

ARAM

Mashē, in Arabic *Horma*), which flowed by Nisibis ([pseudo-]Dionysius of Tel-Mahre, ed. Chabot, 712, and Thomas of Margā, ed. Budge, 346-7), this is, however, by no means certain. Other theories respecting the names in Gen. 10:23 might be mentioned; but they are all open to question.

A second list, in Gen. 22:24, represents Aram as a son of Keturah, son of Nahor and brother of Uz, Keturah (i.e. Chetah), the eponym of the Chaldeans, Bethuel, and others. Bethuel is called an 'Aramaean' in Gen. 25:20-28:5, as is also his son Laban in Gen. 25:26-31:30. The passages in question belong, it is true, to different sources; but they may have been harmonised by the redactor. All these statements seem to point to the district of Harran (HARAN, § 2), where, as Hebrew tradition attests with remarkable distinctness, the patriarchs (Abraham, Jacob), and the patriarchs' wives (Rebecca, Leah, Rachel, either were born or sojourned for a long time. Here, in remote antiquity, Hebrew tribes and Aramaean tribes (represented by Nahor) probably dwelt side by side.¹ Hence it is said in Dt. 26:5 'a nomad Aramaean was my father.' In one of the sources of Genesis the country of Laban is called 'Aram of the two rivers,'² which seems to mean, as has long been held, the Aramaean land between the Euphrates and the Tigris, or between the Euphrates and the Chaboras (Kiepert, *Lehrb. d. alt. Geogr.* 154). What is meant by Paddan Aram, however, the name given to the dwelling-place of Laban and his kinsmen in the other source (see PADAN), is not clear. In Assyrian (?) and Aramaic *Paddan* signifies 'yoke,' and by a change of meaning, found also in other languages, it comes to denote a certain area of land, and finally 'corn-land,' but not a 'plain,' as is sometimes assumed by those who wrongly take the phrase 'field of Aram' (Hos. 12:13[12]) to be a translation of 'Paddan Aram.' This latter can scarcely be the name of a country. It may denote a *locality* situated in the land of Aram. We might, therefore, be tempted to identify Paddan Aram with a place near Harran called *Paddana* (see Wright, *Cat. Syr. MSS.* 1127a; Georg. Holman, *Oxyr. Zettor.* 129, l. 21), in Gr. *παδαν* (Strabo, 614), and in Ar. *Paddan*, in the neighbourhood of which *Tel Paddan* is situated (see Yakūt s.v.). It is, however, a somewhat suspicious consideration that several of the passages which have been cited mention the patriarchs in connection with the place. Hence the name may be due to a mere localisation of the biblical story on the part of the early Christians. According to the narrative of Balaam, 'Pethor' is in Aram (Nu. 22:5-23:7; see PETHOR). If Schr. (*KAT* 155 ff. *KB* 113) be right in identifying it with the city of *Pitra*, mentioned in Assyrian inscriptions, and situated on the river Sagur (Sajūr)—that is to say, not far from Mambij (Hierapolis)—the statement that Pethor is on the Euphrates itself cannot be quite correct. Such an inaccuracy, however, would not be surprising.

What historical foundation there may be for the account of the subjugation of Israel by Cushan Rishathaim (§ 2), 'king of Aram of the Two Rivers' (Judg. 3:8-10), is uncertain.

Of all the Aramaean states, by far the most important from the point of view of the Israelites, during the kingdom period, was Damascus, the inhabitants of which, from the time of David (§ 2, § 86) onward, were often at war with their Israelite neighbours; but there must also have been much peaceable intercourse between the two nations. In most cases where the OT speaks of Aram the reference is to Damascus (even though the latter name be not expressly mentioned), the small Aramaean states of the neighbourhood being sometimes included. That

¹ On this point see ISRAEL, § 1.

² It is not necessary to suppose with W. Max Müller (*Cl.* 252, 255) that the Dual *naharain* is a mistake for the plural *naharim*. On this subject, however, cp ARAM-NAHARAIM, MESOPOTAMIA, § 2.

ARAM

this mode of speaking was actually current in early times is proved by such passages as Am. 1:9 Is. 7:24/8. Cp. DAMASCUS.

Not far from Damascus lay the Aramaean districts of Maacah (2 S. 21 and Geshur (2 S. 11). That Maacah was Aramaean is not expressly stated.

6. Maacah, Geshur, Rehob.

except in 1 Ch. 19:6, where the text is very doubtful,¹ but it seems to be indicated by Gen. 22:4 where Maacah is represented as a son, or daughter, of Nodiv by a concubine. Moreover, in 1 Ch. 7:6 Machir, chief representative of the tribe of Manasseh beyond the Jordan, is the husband of Maacah, and in 1:14 of the same chapter he is a son of Manasseh by an Aramaean concubine—whence we may infer that the Israelite tribe which had penetrated furthest to the NE. became mingled with the Aramaeans of Maacah. That the Maacathites were not included in Israel, though they dwelt among the Israelites, is stated in Josh. 13:13. Their geographical situation is to some extent determined by the fact that Maacah, though regarded as an ancient Israelite city (2 S. 20:1), is sometimes called 'Abel-beth-Maacah', 'Abel in the land of Maacah' (2 S. 20:14² etc.), in order to distinguish it from other places bearing the name Abel. In accordance with the statements in 1 K. 15:20 2 K. 15:9 to which must be added 2 S. 20:18, a passage preserved in M but mutilated in MT, this Abel is now generally admitted to be identical with the northern Abel, near Hinn, on one of the brooks which unite to compose the Jordan (see ARAM. IN THE MIDDLE EAST). That this region, on the slopes of Hermon, was the home of the Maacathites appears from Dt. 3:14 Josh. 12:13 13:13, where they are mentioned together with the Geshurites, another foreign people who continued to dwell among the Israelites (Josh. 13:6), and belonged to Aram (2 S. 15:8; cp. also 1 Ch. 2:24, where the text, it must be admitted, is obscure and seems to be corrupt). Not far off was the territory of Rehob or Beth Rehob, which included the city of Dam (Judg. 18:23), often mentioned as the northern limit of Israel, the modern Tell el-kādi, a few miles east of the aforesaid Abel. In Josh. 19:28 Rehob, it is true, is reckoned as belonging to the Israelite tribe of Asher; but, according to 2 S. 10:6, its inhabitants were Aramaeans. Thus it appears fairly certain that several Aramaean tribes were settled near, or within, the borders of the northern tribes of Israel (Naphtali, Asher, and Eastern Manasseh). In these parts the Aramaean population seems to have extended, with scarcely any interruption, as far as Damascus. The Aramaeans of Maacah and Rehob fought on the side of the Ammonites against David (2 S. 10:6 = 1 Ch. 19:6), David married a daughter of the king of the Geshurites,³ and she became the mother of Absalom. It is remarkable that she bore the name of Maacah (2 S. 3:3 = 1 Ch. 3:1), which, as we have seen, occurs often in connection with Geshur, and the same name was given by Absalom to his daughter,⁴ afterwards the mother of two kings of Judah (1 K. 1:22 2:13 2 Ch. 11:20 ff.). After he had murdered his brother Amnon, Absalom took refuge with his grandfather the king of Geshur, and remained there for a considerable time (2 S. 13:38 14:13 15:2). The king of Geshur must, therefore, have been to some extent independent of David. Of all these Aramaean tribes we hear nothing more in later times; but one of them has left a trace in 'the Maacathite' (see MAACATH, 1), an appellation borne by the father of Jaazaniah, a contemporary of Jeremiah the prophet (2 K. 25:23 = Jer.

¹ Instead of מַאכָּה, the 'Aramaean of Maacah', the parallel passage 2 S. 10:6 has מֶלֶךְ מַאכָּה, 'the king of Maacah', for which B⁹⁷ reads βασιλεῖς Ἀμαλῆα. Here the word Ἀμαλῆα is certainly due to a mistake (B⁹⁷ have μααῖα); but βασιλεῖα [BAL] supports the Masoretic reading מַאכָּה.

² In this verse we should no doubt read מַאכָּה בֵּית מַאכָּה with Ew., Wellh., and others.

³ See, however, GESHUR, 2, where the view is proposed that David's wife was from the Southern Geshur.

⁴ On this see, however, MAACATH, ii.

ARAMAIC LANGUAGE

408). These Aramaeans, who were so closely connected with the Israelites, probably played an important part in the diffusion of the Aramaic language over Palestine.

Another name, also described as Aramaean, was that of ZOBAB (2 S. 10:6; cp. 1 Ch. 19:6 Ps. 60 [title]).

6. Zobab, greater consequence. In it was situated the city of BEROOTH (2 S. 10:6), no doubt identical with BEROOTH (2 S. 10:6), which in 1 K. 17:16 is placed between Hamath and Damascus. With this it agrees that, according to the statements of the historical books, Zobab had relations with Hamath on the one side, and with Damascus on the other. Its site must, therefore, be approximately in the neighbourhood of Lamsa, and we may hope that archaeological researches will throw further light upon the subject.¹

The statement about Saul's wars with 'the kings of Zobab' (1 S. 14:7) is open to grave suspicion; it is, in fact, doubtful whether the warlike operations of Saul ever extended so far (see SAM. § 3). A little later, however, we find Zobab and Damascus assisting the Ammonites in their war against David (see DAVID, § 86). At length Hadadfezer, king of Zobab, even brought to his help Aramaeans from beyond the Euphrates, but was utterly defeated, together with the king of the Ammonites, and David carried off a rich booty. Upon this the king of Hamath, who had been at war with the king of Zobab, sent an embassy to the Jewish king, expressing great satisfaction (2 S. 8:1-4). According to 2 S. 23:6, one of David's heroes (among whom were several non-Israelites) came from Zobab; in 1 Ch. 11:8, however, the reading is quite different (see ZOBAB). A servant of the above-mentioned Hadadfezer, named Rezon, fled from his master, became the chief of a band of robbers, and after David's death founded a kingdom at Damascus (1 K. 11:13 ff.; see DAMASCUS, § 3). It is not easy to extract a satisfactory sense from the passage which describes the capture of 'Hamath of Zobab' by Solomon (2 Ch. 8:6), and there is reason to suspect the integrity of the text. After the time of Solomon we find no mention of Zobab in the OT; but Assyrian monuments bear witness to the existence of this city in the seventh century B.C.—if, as seems likely, the same place be meant.

In the account of the wars of David against the Ammonites and their allies, these latter are classed

7. 'Arameans', together under the name of 'Arameans' (2 S. 10:8 ff. 14 ff.); but this is perhaps nothing more than a classification *a posteriori*. It is of more importance to notice that the army of Nebuchadnezzar is called by a contemporary 'the army of the Chaldeans and of the Aramaeans' (Jer. 35:11). That the great mass of the Babylonian army was composed of Aramaeans might have been naturally inferred, even if we had not this explicit statement on the subject.

Cp. Noldeke, 'Die Namen der Aram. Nation u. Sprache' in *Zeitschr. f. d. Kunde d. Alterthums*, 5, 443 ff.; and the section on the Aramaic dialects in Ari. 'Semitic Languages', *Erlaub.*, published separately in German, *Die Sem. Sprachen*, Leipzig, 1887, p. 27 ff., 2nd ed., 1892.

ARAMAIC LANGUAGE.² Aramaic is nearly related to Hebrew-Phoenician; there is, nevertheless,

1. Geographical extent. a sharp line of demarcation. Of its original home nothing certain is known. In the OT 'Aram' appears

at an early period as a designation of certain districts in Syria (see ARAM, § 1) and in Mesopotamia. The language of the Aramaeans gradually spread far and wide. It occupied all Syria—both those regions which had been in the possession of non-Semitic peoples, and

¹ It would appear that the Assyrian inscriptions sometimes mention this place as *Sulutu* or *Subiti* (see Del. *Par.*, 270 ff.; Schrader, *KAT*, 122, K. 1. 182 ff.); but they have not enabled us to fix the site.

² Revised and adapted by the author from art. 'Semitic Languages' (Aramaic section) in *EB* 21.

ARAMAIC LANGUAGE

those which were most likely inhabited by Canaanite tribes. First of all, Palestine became Aramaised (ib. § 2). Towards the E. this language was spoken on the Euphrates, and throughout the districts of the Tigris S. and W. of the Armenian and Kurdish mountains, the province in which the capitals of the Arsacides and the Sassanians were situated was called 'the country of the Aramaeans'. In Babylonia and Assyria a large, or perhaps the larger, portion of the population were most probably Aramaeans, even at a very early date, whilst Assyrian was the language of the government.

Some short Aramaic inscriptions of the Assyrian period, principally on weights, have long been known.

2. Earlier history. To these have recently been added longer ones from the most northern part of Syria (Zenjirli, about 47° N.). In these, as in the weight inscriptions, the language differs markedly from later Aramaic, especially by its close approximation to Hebrew-Canaanite or, perhaps, to Assyrian; but Aramaic it undoubtedly is. It is to be hoped that more of these inscriptions, important alike for their language and for their contents, may yet be discovered.¹

In the Persian period Aramaic was the official language of the provinces W. of the Tigris; and this explains the fact that some inscriptions of Cilicia and many coins which were struck by governors and vassal princes in Asia Minor (of which the stamp was in some cases the work of skilled Greek artists) bear Aramaic inscriptions, whilst those of other coins are Greek. This, of course, does not prove that Aramaic was ever spoken in Asia Minor, and as far north as Sinope and the Hellespont.

In Egypt Aramaic inscriptions have been found of the Persian period, one bearing the date of the fourth year of Xerxes (482 B.C.),² we have also official documents on papyrus, unfortunately in a very tattered condition for the most part, which prove that the Persians preferred using this convenient language to mastering the difficulties of the Egyptian systems of writing. It is further possible that at that time there were many Aramaeans in Egypt just as there were many Phoenicians, Greeks, and Jews.

This preference for Aramaic, however, probably originated under the Assyrian Empire, in which a very large proportion of the population spoke Aramaic; in it this language would naturally occupy a more important position than it did under the Persians. Thus we understand why it was taken for granted that a great Assyrian officer could speak Aramaic (2 K. 18. 26-36), and why the dignitaries of Judah appear to have learned the language (*ibid.* 1); namely, in order to communicate with the Assyrians. The short dominion of the Chaldeans probably strengthened this preponderance of Aramaic.

A few ancient Aramaic inscriptions have been discovered far within the limits of Arabia, in the palm oasis of Tema (in the north of the Hijaz); the oldest and by far the most important of these was perhaps made somewhat before the Persian period.³ We may presume that Aramaic was introduced into the district by a mercantile colony, which settled in the ancient seat of commerce; and, in consequence, Aramaic may have remained for some time the literary language of the neighbouring Arabs. These Aramaic monuments, which we may with more or less certainty ascribe to the Persian period, exhibit a language which is almost absolutely uniform. The Egyptian monuments bear marks of Hebrew, or (better) Phoenician, influence.

Intercourse with Aramaeans caused some Aramaic

words to be imported into Hebrew at a comparatively

3. Biblical Aramaic. early date. This influence of Aramaic on Hebrew steadily grew, and shows itself so strongly in the language of Ecclesiastes, for example, as almost to compel the inference that Aramaic was the writer's mother tongue, and Hebrew one subsequently acquired without complete mastery.

Certain portions of the OT (Ezra 4. 7-17, 5. 1-17, 7. 1-26, Dan. 2. 4-7, also the ancient gloss in Jer. 10. 11) are written in Aramaic. The free and arbitrary interchange between Aramaic and Hebrew, between the current popular speech and the old sacred and learned language, is peculiarly characteristic in Daniel 1. 16-7 and 1. 19-20; see DANIEL, II § 117. Isolated passages in Ezra perhaps belong to the Persian period, but have certainly been remodelled by a later writer.⁴ Still in Ezra we find a few antique forms which do not occur in Daniel.

The Aramaic pieces contained in the OT have the great advantage of being furnished with vowels and other orthographical signs. These were not inserted until long after the composition of the books (they are sometimes at variance with the text itself); but Aramaic was still a living language when the punctuation came into use, and the lapse of time was not so very great. The tradition ran less risk of corruption, therefore, than in the case of Hebrew. Its general correctness is further attested by the innumerable points of resemblance between this language and Syriac, with which we are accurately acquainted. The Aramaic of the OT exhibits various antique characteristics which afterwards disappeared—for example, the formation of the passive by means of internal vowel-change, and of the causative with *ba* instead of *witha*—phenomena which have been falsely explained as Hebrewisms.

Biblical Aramaic agrees in all essential respects with the language used in the many inscriptions of Palmyra

4. Nabatean, etc. (beginning soon before the Christian era and extending to about the end of

the third century), and on the Nabatean coins and stone monuments (concluding about the year 100 A.D.) Aramaic was the language of Palmyra, the aristocracy of which were largely of Arabian extraction. In the northern portion of the Nabatean kingdom (not far from Damascus) there was probably a large Aramaic population; but Arabic was spoken farther south. At that time, however, Aramaic was highly esteemed as a cultivated language, for which reason the Arabs in question made use of it, as their own language was not reduced to writing, just as in those ages Greek inscriptions were set up in many districts where no one spoke Greek. The great inscriptions cease with the overthrow of the Nabatean kingdom by Trajan (105 A.D.); but, down to a later period, the Arabian nomads in those countries, especially in the Sinaitic peninsula, often scratched their names on the rocks, adding some benedictory formulae in Aramaic. These inscriptions having now been deciphered with completeness and certainty, there is no longer room for discussion of their Israelitic origin, or of any similar fantastic theories concerning them. That several centuries afterwards the name of 'Nabatean' was used by the Arabs as synonymous with 'Aramaean' was probably due to the gradual spread of Aramaic over a great part of what had once been the country of the Nabateans. In any case, Aramaic then exercised an immense influence. This is proved by the place which it occupies in the strange Pahlavi writing, various branches of which date from the time of the Parthian empire. Biblical Aramaic, as also the language of the Palmyrene and the Nabatean inscriptions, may be described as an older form of Western Aramaic. The opinion that the Palestinian Jews brought their Aramaic dialect directly from Babylon—whence the incorrect name 'Chaldee'—is untenable.

¹ The discovery which is said to have been sent by Artabanus (Ezra 7. 12-20) is in its present form a comparatively late production (cp. EZRA, II § 10).

ARAMAIC LANGUAGE

By the time of Christ Aramaic had long been the current popular speech of the Jews in Palestine, and the use, spoken and written, of Hebrew

5 NT. (in a greatly modified form) was confined to scholars. Christ and the apostles spoke Aramaic, and the original preaching of Christianity the *Ἑβραϊσμός*, was in the same language. And this too not in the dialect current in Jerusalem, which roughly coincided with the literary language of the period, but in that of Galilee, which it would seem, had developed more rapidly, or, as is now often but erroneously said, had become corrupted. Unfortunately, it is impossible for us to know the Galilean dialect of that period with accuracy. The attempts made in our days to reduce the words of Jesus from Greek to their original language have, therefore, failed.

In general, few of the sources from which we derive our knowledge of the Palestinian dialect of that period can be implicitly trusted. In the synagogues it was necessary that the reading of the OT

6. Targums. should be followed by an oral 'Targum', a translation, or rather a paraphrase into Aramaic, the language of the people—which was at a later period fixed in writing; but the officially sanctioned form of the Targum to the Pentateuch (the so-called Targum of Onkelos) and of that to the prophets (the so-called Targum of Jonathan) was not finally settled till the fourth or fifth century, and not in Palestine but in Babylonia. The redactors of the Targum preserved, on the whole, the older Palestinian dialect, yet that of Babylon, which differed considerably from the former, exercised a vitiating influence. The punctuation, which was added later (first in Babylonia) is not so trustworthy as that of the Aramaic passages in the OT. The manuscripts which have the Babylonian superlinear punctuation may nevertheless be relied upon to a great extent. The language of Onkelos and Jonathan differs but little from biblical Aramaic. The language spoken some time afterwards by the Palestinian Jews, especially in Galilee, is exhibited in a series of rabbinical works—the so-called Jerusalem Targums, a few Midrashic works, and the Jerusalem Talmud. Of the Jerusalem Targums, at least that to the Pentateuch contains remains that go back to a very early date, and, to a considerable extent, presents a much more ancient aspect than that of Onkelos, which has been heavily revised throughout; but the language, as we now have it, belongs to the later time. The Targums to the Hagiographa are, in part, very late indeed. All these books, of which the Midrashim and the Talmud contain much Hebrew as well as Aramaic, have been handed down without care, and require to be used with great caution for linguistic purposes. Moreover, the influence of the older language and orthography has, in part, obscured the characteristics of these popular dialects: for example, various gutturals are still written, although they are no longer pronounced. The adaptation of the spelling to the real pronunciation is carried furthest in the Jerusalem Talmud, but not in a consistent manner. All these books are without vowel-points; but the frequent use of vowel letters in the later Jewish works renders this defect less noticeable (cp. *TLNT*, § 641).

Not only the Jews but also the Christians of Palestine retained their native dialect for some time as an ecclesiastical and literary language. We possess

7. Christian Palestinian. translations of great portions of the Bible (especially of the Gospels) and fragments of other works in this dialect by the Palestinian Christians dating from about the fifth century, partly accompanied by a punctuation which was not added till some time later. This dialect, the native country of which was apparently not Galilee, but Judea, closely resembles that of the Palestinian Jews, as was to be expected

from the fact that those who spoke it were of Jewish origin.

Finally, the Samaritans, among the inhabitants of Palestine, translated their sacred books, the Pentateuch, into their own dialect (see *TLNT*).

8 Samaritan dialect. § 43. The critical study of this translation proves that the language which

lies at its base was very much the same as that of the neighbouring Jews. Perhaps, indeed, the Samaritans may have carried the softening of the gutturals a little farther than the Jews of Galilee. Their absurd attempt to embellish the language of the translation by arbitrarily introducing forms borrowed from the Hebrew original has given rise to the false notion that Samaritan is a mixture of Hebrew and Aramaic. The introduction of Hebrew and even of Arabic words and forms was practised in Samaria on a still larger scale by copyists who lived after Aramaic had become extinct. The later works written in the Samaritan dialect are, from a linguistic point of view, as worthless as the compositions of Samaritans in Hebrew—the writers, who spoke Arabic, endeavoured to write in a language with which they were but half acquainted.

All these Western Aramaic dialects, including that of the oldest inscriptions, have this characteristic among others in common, that they form the third person

9. Western dialects. singular masculine and the third person plural masculine and feminine in the im-

perfect by prefixing *r*, as do the other Semitic languages. And in these dialects the termination *ā* (the so-called *āramēphaticus*) still retained the meaning of a definite article down to a tolerably late period.

As early as the seventh century the conquests of the Moslems greatly circumscribed the domain of Aramaic, and a few centuries later it was almost completely supplanted in the W. by Arabic. For the Christians of those countries, who, like every one else, spoke Aramaic, the Palestinian dialect was no longer of importance. They adopted as their ecclesiastical language the dialect of the other Aramaean Christians, the Syriac (Edessan; see § 11 *Z*). The only localities where a W. Aramaic dialect still survives are a few villages in Anti-Lebanus.¹

The popular Aramaic dialect of Babylonia, from the fourth to the sixth century of our era, is exhibited in the

10 Babylonian and Mandæan. Babylonian Talmud, in which, however, as in the Jerusalem Talmud, there is

a constant mingling of Aramaic and Hebrew passages. To a somewhat later period, and probably to a somewhat different district of Babylonia, belong the writings of the Mandæans, a strange sect, half Christian and half heathen, who, from a linguistic point of view, possess the peculiar advantage of having remained almost entirely free from the influence of Hebrew, which is so prepotent in the Aramaic writings of Jews as well as in those of Christians. The orthography of the Mandæans comes nearer than that of the Talmud to the real pronunciation, and in it the softening of the gutturals is most clearly seen. In other respects there is a close resemblance between Mandæan and the language of the Babylonian Talmud. The forms of the imperfect which we have enumerated above take in these dialects *n* or *z*. In Babylonia, as in Syria, the language of the Arabic conquerors rapidly drove out that of the country. The latter has long been extinct—unless, which is possible, a few surviving Mandæans still speak among themselves a more modern form of their dialect.

At Edessa, in the W. of Mesopotamia, the native dialect had already been used for some time as a literary language, and had been reduced to rule through the influence of the schools (as is proved by the fixity of the grammar and the orthography) even before Christianity

¹ On this subject we have now very valuable information in a series of articles by M. Parisot (*Journal*, etc., 1898); moreover it is hoped that Professors Hym and Sacha will soon be able to furnish more ample details.

¹ This in opposition to Dalman's *Gramm. d. jud. pal. Aram.* (Leipzig, 94)—a book highly to be commended for the fulness and accuracy of its facts, but less so for its theories.

ARAMAIC LANGUAGE

acquired power in the country, in the second century. At an earlier period the Old and the New Testaments were not so isolated, with the help of Jewish tradition (see *TEXT*, § 59). This version, the so-called Peshitta or Peshito became the Bible of Armenian Christians, and Edessa became its capital. Thus the Aramaic Christians of the neighbouring countries, even those who were subjects of the Persian empire, adopted the Edessan dialect as the language of the church, of literature, and of cultivated intercourse. Since the ancient name of the inhabitants, 'Armenians,' lost before that of 'Ephraim,' had acquired in the minds of Jews and Christians the unpleasant significance of 'heretic,' it was generally avoided, and in its place the Greek terms 'Syrians' and 'Syria' were used. 'Syria,' however, was also the name given by the Jews and the Christians of Palestine to their language, and 'Syrians' was applied by both Jews and Persians to the Armenians of Babylonia. Therefore, in order to employ the word 'Syriae' in the language of Edessa alone, that, surely, being the most important of these dialects, it has been usual to claim to this generally received appellation. As we have said, a form very definitely fixed in the mentioned forms of the imperfect in the Babylonian dialects, the terminations *-ān* and *-ān*, so completely a part of the substantives, is not added that it has wholly lost the meaning of 'and' in this article; whereby the clearness of the text is not perceptibly impaired. The influence exerted by the very apparent in Syriae

From the third to the seventh century, a local literature was produced in this language, consisting of a number of books, the best of which are the

12. its history.

literature the *Syriacs of the Persian empire* took a more important part. In the Eastern Roman empire Syriac was, after Greek, by far the most important language, and under the Persian kings it virtually occupied a more prominent position as an organ of culture than the Persian language itself. The conquests of the Arab totally changed this state of things. Meanwhile, even in Edessa, a considerable difference had arisen between the written language and the popular speech, in which the process of modification was still going on. About the year 700 it became a matter of absolute necessity to systematise the grammar of the language and to introduce some means of clearly expressing the vowels. The chief object aimed at was that the text of the Syriac Bible should be recited in a correct manner. It happened, however, that the eastern pronunciation differed in many respects from that of the W. The local dialects had, to some extent, exercised an influence over the pronunciation of the literary tongue; and, on the other hand, the political separation between Rome and Persia, and yet more the ecclesiastical schism—since the Syriacs of the E. were mostly Nestorians, those of the W. Monophysites and Catholics—had produced divergences between the traditions of the various schools. Starting, therefore, from a common source, two distinct systems of punctuation were formed, of which the western is the more convenient, but the eastern the more exact, and generally more in accordance with the ancient pronunciation: it has, for example, *ā* in place of the western *a*, and *ḡ* in many cases where the western Syriacs pronounce *g*. In later times the two systems have been intermingled in various ways.

Arabic everywhere put a speedy end to the pre-dominance of Aramaic, a pre-dominance which had lasted for more than a thousand years, and soon began to drive Syriac out of use. Nevertheless, up to the present day Syriac has remained in use for literary and ecclesiastical purposes, and may perhaps be even spoken in some monasteries and schools; but it has long been a dead language. When Syriac became extinct in Edessa and its neighbourhood is not known with certainty. It is very desirable that theologians who interest them-

ARAM-NAHARAIM

Archeology scientifically in the history of the first centuries of Christianity should *do no harm*. The task is not very difficult for those who know Hebrew.

In small quantities in northern Mexico and in the Mescal territory, of Kurdistan and on Lake Urmia, Armenia.

13. Neo Syriac
dialects.

that of Syria has become the most important since American missionaries have formed a new literary language of it. Maron, the Roman Propaganda has printed books in twofold the New Syriae dialects.

On the Aramaic dialect, in general, see Nöldeke, 'Die Syriacisch-Aram. Sprache', in *ZfA*, 2 (1877), 2 (1902), 3 (1903), 4 (1904), 5 (1905), 6 (1906), 7 (1907), 8 (1908), 9 (1909), 10 (1910), 11 (1911), 12 (1912), 13 (1913), 14 (1914), 15 (1915), 16 (1916), 17 (1917), 18 (1918), 19 (1919), 20 (1920), 21 (1921), 22 (1922), 23 (1923), 24 (1924), 25 (1925), 26 (1926), 27 (1927), 28 (1928), 29 (1929), 30 (1930), 31 (1931), 32 (1932), 33 (1933), 34 (1934), 35 (1935), 36 (1936), 37 (1937), 38 (1938), 39 (1939), 40 (1940), 41 (1941), 42 (1942), 43 (1943), 44 (1944), 45 (1945), 46 (1946), 47 (1947), 48 (1948), 49 (1949), 50 (1950), 51 (1951), 52 (1952), 53 (1953), 54 (1954), 55 (1955), 56 (1956), 57 (1957), 58 (1958), 59 (1959), 60 (1960), 61 (1961), 62 (1962), 63 (1963), 64 (1964), 65 (1965), 66 (1966), 67 (1967), 68 (1968), 69 (1969), 70 (1970), 71 (1971), 72 (1972), 73 (1973), 74 (1974), 75 (1975), 76 (1976), 77 (1977), 78 (1978), 79 (1979), 80 (1980), 81 (1981), 82 (1982), 83 (1983), 84 (1984), 85 (1985), 86 (1986), 87 (1987), 88 (1988), 89 (1989), 90 (1990), 91 (1991), 92 (1992), 93 (1993), 94 (1994), 95 (1995), 96 (1996), 97 (1997), 98 (1998), 99 (1999), 100 (2000), 101 (2001), 102 (2002), 103 (2003), 104 (2004), 105 (2005), 106 (2006), 107 (2007), 108 (2008), 109 (2009), 110 (2010), 111 (2011), 112 (2012), 113 (2013), 114 (2014), 115 (2015), 116 (2016), 117 (2017), 118 (2018), 119 (2019), 120 (2020), 121 (2021), 122 (2022), 123 (2023), 124 (2024), 125 (2025), 126 (2026), 127 (2027), 128 (2028), 129 (2029), 130 (2030), 131 (2031), 132 (2032), 133 (2033), 134 (2034), 135 (2035), 136 (2036), 137 (2037), 138 (2038), 139 (2039), 140 (2040), 141 (2041), 142 (2042), 143 (2043), 144 (2044), 145 (2045), 146 (2046), 147 (2047), 148 (2048), 149 (2049), 150 (2050), 151 (2051), 152 (2052), 153 (2053), 154 (2054), 155 (2055), 156 (2056), 157 (2057), 158 (2058), 159 (2059), 160 (2060), 161 (2061), 162 (2062), 163 (2063), 164 (2064), 165 (2065), 166 (2066), 167 (2067), 168 (2068), 169 (2069), 170 (2070), 171 (2071), 172 (2072), 173 (2073), 174 (2074), 175 (2075), 176 (2076), 177 (2077), 178 (2078), 179 (2079), 180 (2080), 181 (2081), 182 (2082), 183 (2083), 184 (2084), 185 (2085), 186 (2086), 187 (2087), 188 (2088), 189 (2089), 190 (2090), 191 (2091), 192 (2092), 193 (2093), 194 (2094), 195 (2095), 196 (2096), 197 (2097), 198 (2098), 199 (2099), 200 (2100), 201 (2101), 202 (2102), 203 (2103), 204 (2104), 205 (2105), 206 (2106), 207 (2107), 208 (2108), 209 (2109), 210 (2110), 211 (2111), 212 (2112), 213 (2113), 214 (2114), 215 (2115), 216 (2116), 217 (2117), 218 (2118), 219 (2119), 220 (2120), 221 (2121), 222 (2122), 223 (2123), 224 (2124), 225 (2125), 226 (2126), 227 (2127), 228 (2128), 229 (2129), 230 (2130), 231 (2131), 232 (2132), 233 (2133), 234 (2134), 235 (2135), 236 (2136), 237 (2137), 238 (2138), 239 (2139), 240 (2140), 241 (2141), 242 (2142), 243 (2143), 244 (2144), 245 (2145), 246 (2146), 247 (2147), 248 (2148), 249 (2149), 250 (2150), 251 (2151), 252 (2152), 253 (2153), 254 (2154), 255 (2155), 256 (2156), 257 (2157), 258 (2158), 259 (2159), 260 (2160), 261 (2161), 262 (2162), 263 (2163), 264 (2164), 265 (2165), 266 (2166), 267 (2167), 268 (2168), 269 (2169), 270 (2170), 271 (2171), 272 (2172), 273 (2173), 274 (2174), 275 (2175), 276 (2176), 277 (2177), 278 (2178), 279 (2179), 280 (2180), 281 (2181), 282 (2182), 283 (2183), 284 (2184), 285 (2185), 286 (2186), 287 (2187), 288 (2188), 289 (2189), 290 (2190), 291 (2191), 292 (2192), 293 (2193), 294 (2194), 295 (2195), 296 (2196), 297 (2197), 298 (2198), 299 (2199), 300 (2200), 301 (2201), 302 (2202), 303 (2203), 304 (2204), 305 (2205), 306 (2206), 307 (2207), 308 (2208), 309 (2209), 310 (2210), 311 (2211), 312 (2212), 313 (2213), 314 (2214), 315 (2215), 316 (2216), 317 (2217), 318 (2218), 319 (2219), 320 (2220), 321 (2221), 322 (2222), 323 (2223), 324 (2224), 325 (2225), 326 (2226), 327 (2227), 328 (2228), 329 (2229), 330 (2230), 331 (2231), 332 (2232), 333 (2233), 334 (2234), 335 (2235), 336 (2236), 337 (2237), 338 (2238), 339 (2239), 340 (2240), 341 (2241), 342 (2242), 343 (2243), 344 (2244), 345 (2245), 346 (2246), 347 (2247), 348 (2248), 349 (2249), 350 (2250), 351 (2251), 352 (2252), 353 (2253), 354 (2254), 355 (2255), 356 (2256), 357 (2257), 358 (2258), 359 (2259), 360 (2260), 361 (2261), 362 (2262), 363 (2263), 364 (2264), 365 (2265), 366 (2266), 367 (2267), 368 (2268), 369 (2269), 370 (2270), 371 (2271), 372 (2272), 373 (2273), 374 (2274), 375 (2275), 376 (2276), 377 (2277), 378 (2278), 379 (2279), 380 (2280), 381 (2281), 382 (2282), 383 (2283), 384 (2284), 385 (2285), 386 (2286), 387 (2287), 388 (2288), 389 (2289), 390 (2290), 391 (2291), 392 (2292), 393 (2293), 394 (2294), 395 (2295), 396 (2296), 397 (2297), 398 (2298), 399 (2299), 400 (2300), 401 (2301), 402 (2302), 403 (2303), 404 (2304), 405 (2305), 406 (2306), 407 (2307), 408 (2308), 409 (2309), 410 (2310), 411 (2311), 412 (2312), 413 (2313), 414 (2314), 415 (2315), 416 (2316), 417 (2

14 Literature.

[illegible]

Some grammar is Nöldeke's *Aramäische Grammatik* (Leipzig, 1909), and the *Ar. Dialects* (Leipzig, 1909) in connection with the other Aramaic dialects, and the *Lehrbuch der aramäischen Sprache* (Leipzig, 1910), a literary handbook. To theologians wishing to study *the Bible in the original* (ed. Halle), we recommend Articles on the N. Testament, the Christian-Palestinian dialects by Nöldeke in the *ZPMG* 179, 180, 181, 21, 59, 114, 115, 116, 117. Some dictionaries, useful for a long time was the only one of general utility. Recently there have appeared, Payne Smith's great *Thesaurus* (fortunately not yet finished), Brockelmann's and Bruns'. Of glossaries to the Aramaic inscriptions, we must now add to Lehmann's *Notae de novis linguis Pahlavicae* (1872) the glossary of Stanley A. Cook (Cambridge, 1881) and Lidzbarski's *Handbuch der nordarabischen Inschriften* (1902).

For the above, *Chalif* is used in early Jewish literature, including the Hebrew parts of it, we have, besides the *Id. Chalif* of (Basel, 1764), Isaac Lewis *Chalif*, n. *Chalif*, *Hebrew Chalif*, 1770, and the shorter one of J. Dalman (part 4, Leipzig, 1875). Levy had previously edited a *Chalif*, *Hebrew*, n. *Id. L'argumim* (Leipzig, 1875).

On the biblical Aramaic there are, besides the Grammar of Kautsch (1883), the little books of Strack (1924 ed.), Leipisch (1925) and of Mann (Leipisch, 1926). For the Targum dialects there is no grammar that meets the requirements of modern science. Nor is there an adequate grammar of the Aramaic dialect of the Babylonian Talmud, although the little treatise of S. D. Luzzatto, *La lingua grammatica e volgare della babilonia dei talmudisti* (Padua, 1863) is a very useful work. For the Palestine Talmudic dialects see Dalman's Grammar (Leipisch, 1922), for the Samaritan, the grammar of Meinhof (Leipisch, 1927) and the grammar of Dalman (Leipisch, 1928) of the naturally Semitic dialects of the Samaritans, and the little book of Dalman, which sends the reader to the modern scholarship. For the Mandaic, see that of Noddeke (Halle, 1875), for the Neo-Syriac that of the same author (Leipisch, 1876) and especially the most valuable grammar of A. T. Maclean (Cambridge, 1925).

1 OT expression.

ἵς σφύρας ποταμῶν) where MT has simply Ἀσφύρας (278: σφύρας [V; I, om. altogether]). The other D-forms are: Jud2, 3, ποταμῶν σφύρας [H]; σφύρας α σφοταμίας ποταμῶν [M]; 1 Ch. 19, 6 σφύρας μεσσοποταμίας [B¹ V].

Apart from Judg. 38, where its genuineness is more than doubtful (see *Thesaurus biblicus*), and the confused editorial data of 1 Ch. 19:6 and Ps. 60:2 (title in

ARARAT

ARARAT

the Tigris and the Euphrates rise, whilst Ararat proper (Urartu) lay to the N. in the plain of the Araxes; but that between the eleventh century and the ninth, the Urartians (whom their language shows to have been a non-Semitic people) conquered the more southerly region, and established there the chief seat of their dominion: a conquest which they were enabled to make by the great decline of Assyria at that time. Afterwards, both names, Nairi and Urartu, were used for the whole country. The Assyrian king Sargon broke the power of Urartu for a long time; but his successors did not succeed in their endeavours to destroy it, and so it is not unnatural that Assyriologists have sometimes defended the pre-exilic origin of the long prophecy against Babylon at the end of the Book of Jeremiah, on this ground among others, that the kingdoms of Ararat and Minni are still well known to the Israelites, and considered to be formidable powers.¹ Kuenen, however (*Oud^e 241*, *Int.* 242 f.), has sufficiently shown that these arguments are not conclusive. Proper names like Ararat and Minni simply prove the literary and antiquarian research of the author, and the phenomenon of the prophecy as a whole appear to both the present writers to presuppose a period later than that of Jeremiah. (See FURUMAH, n.c.)

2. Ararat is mentioned also in the post-exilic version of the Deluge-story. The statement runs thus: 'And the ark rested . . . upon the mountains of Ararat' (Gen. 8:4 RV; Samar. *בְּהָרֵי אֲרָרָת*). This is precisely paralleled to the statement of the cognate Babylonian story (see DILLMANN, § 11). The mountain of the land of Nisir stopped the ship, or, as the following lines give it, 'The mountain Nisir stopped the ship.' That Nisir (protection? deliverance?) is properly the name of a mountain or mountain range seems to be clear from Nisir nasir pal's inscription (see KR 177), and Ararat too, in the intention of the Hebrew writer, will be the name of a mountain or mountain range. The situation of Nisir is clear from the inscription just referred to. It was in Media, E. of the Lower Zab, and S. of the Caspian Sea. There lies Elburz, the Hara berezanti, or Hara haraiti hares, thus named by the S. Iranians after their mythic sky mountain. Now, it is remarkable that Nicodorus Damascenus (in Jos. *Ant.* i. 36, cp. also *OS²* 299-300) names the mountain of the ark Barris, and places it 'above Minvas' (i.e., Minni (Mannai). Barris (*bar* = high) appears to be a fragment of the Iranian name of Elburz, which this writer took for the whole name.² It may be conjectured that this was the mountain which the Hebrew writer, in accordance with the Babylonian tradition, had in view. If so, he gave it the name which it bore in his own time, Hara haraiti, shortening it into Ararat, not perhaps without confusing it involuntarily with the land of Urartu, which latter name may have had a different origin.

It was natural enough that the most widely spread tradition accepted the identity of the Ararat of the Hebrew Deluge story with the kingdom of Ararat spoken of above. There (*loc. cit.*) in the plain of the Araxes) a lofty mountain rises, worthy, so it may have appeared, to be the scene of such a great event as the stranding of the ark. But, as we have seen, the name of the mountain of the ark Barris, and places it 'above Minvas' (i.e., Minni (Mannai). Barris (*bar* = high) appears to be a fragment of the Iranian name of Elburz, which this writer took for the whole name.² It may be conjectured that this was the mountain which the Hebrew writer, in accordance with the Babylonian tradition, had in view. If so, he gave it the name which it bore in his own time, Hara haraiti, shortening it into Ararat, not perhaps without confusing it involuntarily with the land of Urartu, which latter name may have had a different origin.

It was natural enough that the most widely spread tradition accepted the identity of the Ararat of the Hebrew Deluge story with the kingdom of Ararat spoken of above. There (*loc. cit.*) in the plain of the Araxes) a lofty mountain rises, worthy, so it may have appeared, to be the scene of such a great event as the stranding of the ark.

¹ Sayce, *Crit. Mon.* 485 f. Prof. Sayce is uncertain whether Jeremiah 'has made use of some earlier prophecy of which Nineveh was the burden, or whether "the prophecy belongs to a time when Babylon had already taken the place of Nineveh, but when in other respects the political condition of W. Asia still remained what it was in the closing days of the Assyrian Empire." In any case the prophecy must be earlier than the age of the second Isaiah, to which modern criticism has so often referred it. This was pointed out in 1894, five years after the appearance of vol. II of the most authoritative summary of "modern criticism," Kuenen's *Oud^e 241*, and two years after that of the German translation. Prof. Hilde, who, in 1886 (*Bibl.* 420), found an incomplete view of the critical arguments, maintained Jer. 30 f. to have been written before Cyrus, among the exiles in Babylon, now accepts Kuenen's main conclusions as expressed in the work referred to.

² Whether Lulair, the name of the mountain of the ark in *Jubels*, chaps. 3 and 10, has any connection with Barris, it is unimportant to decide.

ARAUNAH

the ark. Of its two conical peaks, one is crowned with perpetual snow, and rises 17,000 ft. above the sea-level; the other is 4000 ft. lower. That the Hebrew writer thought of these mountains is in the highest degree improbable (see *De Geogr.*, 131). Another tradition identified Ararat with the land of Cardu (so Pesh., *Int.* 170), the ancient Kordine or Kordichia on the left bank of the Upper Tigris, and the mountain of the ark with the Jebel Judi, SW. of Lake Van, which has become the traditional site with the Moslems.

In the Table of Nations (Gen. 10) the name of Ararat does not occur, but Ashkenaz, Kaphath (or Diphath), and Togarmah (see special articles) probably denote districts of W. and NW. Armenia.

For the geography of Urartu (especially Sayce, 'Cuneiform Inscri. of Van,' *KR IS* vii pt. ii 488 ff.), where, however, the Armenians, who entered the country from the W., and are related to the Aryan races of Asia Minor, are regarded as Iranians. It is against this view that, shortly after the first mention of the name Urartu by Assyrian pal. names of an Aryan sound occur in an inscription of his son Shalmaneser II. (*Atlas* and *Datal.* C. P. T. W. H. K.).

ARARATH, *AR²* 134; RV ARZARATH.

ARARITE (אַרְרָיִי), 2 S 23:36 RV; AV HARARITE, 3.

ARATHES (אַרְאֶתֶס [VA]), 1 Mac. 15:2 RV; AV ARARATHUS (q.v.).

ARAUNAH (אַרְוֵנָה, so Kr. everywhere in 2 S 21, but Kr. אַרְוֵנָה in 10, אַרְנִיָּה in 18, אַרְוֵנָה in 22-24), or ORANAN (אֲרָנָן in Ch.), a Jebusite, whose third floor, consecrated by the presence of the angel of Yahwe, David purchased as a site for an altar (cp. MORIAM). The story is told in two forms, which agree in essentials. On 1 Ch. 21:20 see note to Kittel's translation in *SBOT* (2 S 21:16 ff., 1 Ch. 21:15 ff., 2 Ch. 31, *opra* [BAI]; cp. *opra* Jos. *Ant.* vii. 3; *opora* ib. 134). The real name, however, was not Arannah, which is thoroughly un-Hebrew, and presumably an Aramæish. The critics have in this case not been critical enough. Even Biddle (*SBOT*, Heb. ed., note on 2 S 21:16) admits, rather doubtfully, the form Arannah. Kloss, prefers אֲרָנָה, which, however, is no better than the Ornan of the Chronicler. One has a right to require a definitely Hebrew name, and such a name for this Jebusite MT actually gives us in 2 S 21:18 אֲרִיָּה אֲרִיָּה אֲרִיָּה (cp. *opra* [s] [VI.] Arannah in 2 S. 3, and in *Ch.* 1 Ch. 3, and in 1 K. 1:1). It is proposed, therefore, to correct Arannah into Arannah throughout, except in 2 S 23:10n which see below; cp. 'Arannah,' misspelled in Judg. 1 for 'Arannah' (*q.v.*).

The critics have been very near making this correction. They have rightly rejected the pretty romance based on the phrase 'Arannah the king' in 2 S 24:21 (MT), from which Lwald (*Hist.* 300) inferred that Arannah was the old deified king of Jebus. They have also rejected the makeshift rendering of RV, 'All this, O king, doth Arannah give unto the king,' because a subject speaking to his sovereign was bound to call himself humbly 'the king's servant' (cp. 1 S 26:14 K. 120). As Wellhausen first saw, the sense required is, 'All this doth the servant of my lord the king give unto the king.' This means correcting אֲרִיָּה אֲרִיָּה אֲרִיָּה and prefixing אֲרִיָּה a capital correction which only needs to be supplemented by the emendation of אֲרִיָּה elsewhere into אֲרִיָּה (see above).

An additional argument has thus been gained for the substitution of 'Arannah' for 'Arannah.' The correction is certain, and it is of the highest interest. The Jebusite king and his Jebusite subject worship the same god, the god of the land of Canaan. Arannah too was not an ex-king, but simply a member of the Jebusite community, which continued to exist even after the conquest of Jerusalem. *Ch.* (2 S. 6:6 *opra*, Heb. אֲרִיָּה).

ARBA

apparently identified the place with the threshing-floor at Perez-Uzzah (see NACHON).

ARBA (אַרְבָּע; אַרְבַּע [B], אַרְבַּע [A] - 8e [L]), 'the greatest man among the Anakim' (Josh. 11:21). See ANAK, and HEBRON, 1.

ARBAH (אַרְבָּע) Gen. 35:27 AV. See HEBRON, 1.

ARBATHITE (אַרְבַּתִּי) = i.e., a man of Beth-arabah (2 S. 23:31; 1 Ch. 11:32). See ARA-ALBON.

ARBATTIS AV, or rather **Arbatta** RV (ἐν ἀρβατοῖς [AN²]; -ΒΑΝΟΙΣ [N²], -ΒΑΤΝ, [V²], -ΤΑΝ, [V²]; Vg. in *Arbattis*; the Syriac gives the strange form *Arbat*, אַרְבַּת), 1 Mace. 5:23, 24. Simon the Maccabee, after his successes in Galilee against the Gentiles, brought back to Judea 'those [Jews] that were of (reading *ἐκ* for *ἐν*) Galilee and in Arbatta'. A district rather than a town is obviously to be understood. Ewald (*Hist.* 5:14) thinks of the plain called el-Battha on the NE. shore of the Sea of Galilee (cp the Syriac form); more probably the Arabah or Araboth (אַרְבַּת) of Jordan is intended. See ARABAH, 1.

ARBELA (ἐν ἀρβηλοῖς [ANV]), 1 Mace. 9:2. Bacchides and Alimus, in their second expedition into Judea, 'went forth by the way that leadeth to Gulgala (γὰλααδ [cod. 64, 93]), and pitched their tents before Masaboth (RV Mesaboth; μεσσαβωθ [V], μαῖσα, [NV]), which is Arbela'. There are four alternative explanations (but see CHRISTIAN-THORP).

First: Josephus (*Jud.* vii. 111) seems to have read for 'Gulgala,' 'Galilee,' which Wellhausen (*JHJ* 3:261,

1. In Galilee? n. 2, where he quotes the parallel case, Jos. xii. 23 ὁ τῆς Γαλιλαίας ἀδοκῆς), adopts, and, without explaining Masaboth, takes Arbela to be the well-known spot at the head of the cliff overhanging the western border of the plain of Hattin, the modern Irbid. The interchangeableness of the two forms Arbel and Arbēl is proved by the Arab geographers. Nāsir-i-Khinsari, 1047 A.D., calls it Irbil; Vākūt in 1235 A.D., and others, call it Irbil. The limestone caverns near Irbid were the haunts of bandits, who were only with difficulty dispossessed by Herod the Great; the methods he employed are graphically described by Josephus (*Jud.* xiv. 154 *cf.* 163 ff.). Robinson, who, with most moderns, accepts this identification, conjectures that Masaboth 'which is in Arbela' represents the Heb. מַסְבֵּת in the sense of *steps, storeys, terraces*, and describes the fortress on the face of the almost perpendicular cliff (3 *et seq.*). With more reason Tuch (*Quest. de Elai; Jos. Libb. Hist.*), followed by Wellhausen (*JHJ*), proposes to read μεσσαβωθ cp Hipp. 93. μασσαβωθ as if for μεσσαβωθ 'strongholds.' The objections to this identification are that Josephus is the only authority for the reading Γαλιλαίας, and that, by all we can learn from him, the task of reducing Arbela would have cost Bacchides more time than in the circumstances he was likely to be willing to spend. The direction through Galilee by Arbel would, however, be a natural one for the Syrians to take.

Second: As natural a line of march for the Syrian army lay along the coast down to the mouth of the valley of Ajalon, and up that valley or one of the parallel defiles further S. On this line there was a Γαλααθ, the present Jilbulch, a little more than 13 m. NE. of Joppa, on a site so important that the main road might well be described as ὁδὸς τῆς εἰς Γαλααθ. There is, however, no trace along it of a μεσσαβωθ or an Ἀρβηλα.

Third: If Bacchides wished to avoid the road by the coast and up Ajalon, which had proved so fatal to Nicanor, he may have taken the road from Esdraelon S. through Samaria,

which Holfernes is represented in Judith as taking the road which this book (17) expressly calls 'The

ARCHES

ambush of the hill-country,' 'the entrance into Judaea.' Upon it there stand two Gulgals, one near Shechem, and one 5 m. N. of Gulgala, which Ewald (*Hist.* Eng. ed. 5:23) takes to be the Gulgala of the narrative (but see GULGALA). On this route Masaboth might be Meselich or Meithalim, respectively 5 and 8 m. S. of Jeim, each of them a natural point at which to resist an invader. A greater difficulty is presented by ἐν Ἀρβηλοῖς. The plural form evidently signifies a considerable district. Now, Eusebius (*OS* 2: Ἀρβηλα) notes the name as extant in his day, on Esdraelon, 6 R. m. from Lejjun, while the entrances from Esdraelon on Meselich and Meithalim are 3 R. m. from Lejjun. It is therefore possible that the name Ἀρβηλα covered in earlier days the whole of this district. The suggestion is, however, far from being capable of proof. The chief points in its favour are the straight road from the N., which was regarded as a natural line of invasion, and the existence along the road of a Jilbulch, a Meselich, and a Meithalim.

Fourth: There is some MS authority¹ for reading γὰλααδ instead of γὰλααθ; and if the march of

4. In Gilead? Bacchides be conceived as having been through Gilead, the Arbela of 1 Mace. 9:2 may be the Ἀρβηλ (mod. Irbid) which Eusebius (*OS* 2:171) vaguely defines as a certain village beyond Jordan on the confines of Pelcia. This Irbid, however, lies very far E. and not in a direct line from the N. Even from Damascus, it would be a roundabout way for the Syrian troops marching with speed on Jerusalem. (We can hardly compare the advance of Antiochus III. upon Ptolemy IV. [*Polyb.* 5:6], in the course of which Antiochus, after taking Tabai and Bethshean, crossed Jordan and overran Gilead from Arbela to Rabbath-ammon.)

Of these four alternatives the first and third seem the most probable. The difficulties of all, however, are so great that most historians (e.g. Schürer and Stadelshirk) discussion of the line of march, and bring Bacchides without delay to the walls of Jerusalem. G. A. S.

ARBITE, THE (אַרְבִּיטָה), 2 S. 23:15, probably an error for Archite. See PARAT.

ARBONAI (ἀρβωνά [V], χερβων [N]; ܐܪܒܢܐ [Syr.], *arbanay*). In Judith 2:4 it is stated that Nebuchadnezzar 'went through Mesopotamia, and destroyed all the high cities that were upon the river (χερσαρρος) Arbonai till ye come to the sea.' Various commentators, following Grotius, have taken the Chaboras to be meant. There is much plausibility, however, in the suggestion of Movers that the proper name may have arisen out of a failure to understand the original, which he conjectures to have been אַרְבַּת נָחַר (the cities which were) beyond the river, נָחַר having been taken for a proper name and supplied with a Greek ending.

ARCHANGEL (ἀρχαγγέλους [LW]) Jude 9. See ANGEL, § 4.

ARCHELAUS (ἀρχαλαός [LW]). Mt. 22:4, son of Herod the Great by Mathabe, and elder brother of Herod Antipas. By his father's will he was made ruler over Judea and Samaria, and his visit to Augustus for the confirmation of this mission undoubtedly suggested a point in the parable Lk. 19:12 ff. Upon his coins he bears the family name of Herod and is called 'Ethnarch', for 'king' he never was, in spite of the assumption (cp Jos. *Jud.* xv. 1-3). He may, however, have been popularly called 'king' (cp Jos. *Jud.* xvii. 13, and the use of βασιλεὺς in Mt. 2:2). See further HERODIANS FAMILY, 3.)

ARCHER. See WAR, WEAPONS.

ARCHES is the rendering in the EV of ἄρχει etc., in Lz 19:16 ff. The word ἄρχει or ἄρχα occurs in MT only in this chapter, but ἄρχα transliterates ἀρχαί, also where MT has ἄρχα ἄρχα. Whatever explanation be adopted of the variation of form, the meaning is

¹ Hipp. ὁδὸς εἰς γῆν γὰλααδ (cod. 64), ο. τῆς εἰς γὰλααδ (cod. 93).

ARCHEVITES

doubtless the same throughout—viz., 'porch'. See PORCH, PALACE, TEMPLE.

That the principle of the arch early became known to Israel is a probable inference from the shape of their TOMBS.

ARCHEVITES (Kt. אֲרֶכְוִי ep Kan. *Gram. d. bibl. Aram.* §616; Kr. אֲרֶכְוִי; S. Swete, ἀρχαίται; ἀρχαίοι [B]; ἀρχαί; [A]; ἀρχ. [L.]), mentioned in Ezra 4:9 as a tribe settled in Palestine by ASSYRIAN (7.7.1). The word is not to be regarded as meaning inhabitants of Erech (Ryssel, Kyle), or as equivalent to ἀρχαίται (Hensen, *ILL.* 1845, n. 201), but rather as miswritten for אֲרֶכְוִי, 'who are Cantharids' (see 2 K 17:24 'from Babylon and from Cantharid,' cp 1. So Marq. *Fund.* 64 f.).

ARCHI (אֲרֶכְוִי), Josh. 16: AV, RV ARCHITES.

ARCHIPPUS (ἀρχιππιδης [Ti. WH]) is included as a 'fellow-soldier' of Paul and Timothy in the address of the epistle to Philemon (Philem. 2), and in that to the Colossians (1:17) he received this message: 'Take heed to the ministry (ὑποακousα) which thou hast received in the Lord, that thou fulfil it.' Most probably he had recently become the minister (more than 'deacon' in the narrower sense) of the church at Colosse, perhaps in succession to Epaphras, who was now with the apostle. In *JA. Const.* (7:49) he is said to have been apostolically ordained bishop of Laodicea in Phrygia.

ARCHITES, AV ARCHI (אֲרֶכְוִי); TOY APY [L.]; אֲרֶכְוִי combine the word with the following Ataroth, χαταρωθ [B]; ἀρχαταρωθ [A]; a clan mentioned in the difficult phrase נְבוֹל הָאֲרֶכְוִי (Josh. 16:21) in the delimitation of the southern frontier of Joseph. Probably we should reverse the order of the last two words and read 'the border of Ataroth-of the Archites.' Indeed, we might plausibly go a step further and change אֲרֶכְוִי to אֲרֶכְוִי (or אֲרֶכְוִי, 'Addarites' (or 'Ardites'). See ATAROTH, 2. That the name Archi lingers in that of the village 'Ira' (*Irak*, 5 m. WSW. of Beitin [*PEF. Mem.* 37]), is at best a hazardous hypothesis (cp Ötli, and Buhl *Pal.* 170 f.). The home of the clan of Archites to which HUSHAJ and, according to S. 12 S. 2311 אֲרֶכְוִי, δ' Αραχας [B]; δ' Αραχ [L.], and 1:15 אֲרֶכְוִי, [τοῦ Ουρα] οραχ [B]; δ' Αραχίτης [A]; δ' Αραχ [L.], SHAMMAH (7:3 and 4) and PYARAI, two of David's heroes, belonged, may have been farther S.

ARCHITECTURE. See CONSTITUTION AND RESERVOIRS, FORTRESS, HOUSE, PALACE, TEMPLE, TOMB.

ARCHIVES. See HISTORICAL LITERATURE, § 5.

ARCTURUS, AV's rendering of אֲרֶכְוִי (Job 9:9) and אֲרֶכְוִי (Job 38:32); RV BEAR. Most probably, however, אֲרֶכְוִי in Job 9:9 has arisen from dittography of אֲרֶכְוִי which precedes, for אֲרֶכְוִי follows without s. The whole verse seems to be an immetrical interpolation (see Bickell), Duhm agrees as to אֲרֶכְוִי, and goes so far as to excise 7:81 (so also Beert). Observe that Am 5:2, which is certainly (see AVOS, § 12) an interpolation, and very possibly alludes to Job 9:9 (as Am 4:1), also interpolated, may allude to Job 9:9, does not include אֲרֶכְוִי among the constellation. We have, therefore, only to explain the אֲרֶכְוִי (אֲרֶכְוִי?) of Job 38:32. That the Pleiades are meant is not unlikely (see STARS, § 3 (a)); cp Tg. (38:32) אֲרֶכְוִי אֲרֶכְוִי, 'the hen with her chickens'. Cheyne, however, prefers 'the Lion with his sons' (on Job 38:31, etc., *ILL.* 1846, 103 f.). Epping's list of 'stations' for Venus and Mars, obtained from Sumerian tablets, gives as the tenth—the fourth son behind the king—(p. Leonis). The 'king' is Regulus (α Leonis); he is preceded by α Leonis (Lion's head α Leonis).

(Cenepor [BBA]; *kythia* [Pesh 1]; *arcturion* [Vg. 90], *arcturion* [ib. 38:32]. In 9:9 S. Pesh., presuppose the order אֲרֶכְוִי, אֲרֶכְוִי. Cp MAZZAROTH, OKIOS, PLEIADES.

C. F. B. —T. K. C.

AREOPAGUS, AREOPAGITE

ARD (אֲרֶד, Gen. 46:21 Nu. 26:40) (cp ARDON, ARON), perhaps a better form than ARDAR (אֲרָד) of 1 Ch. 8:34 (Gen. אֲרָד [A]; B lacking; Jos. אֲרָד [A]; Nu. אֲרָד [B]; אֲרָד [A]; 1 Ch. אֲרָד [B]; אֲרָד [A]; אֲרָד [L.]) in genealogy of BENJAMIN (7:7, § 9; n. 3); variously designated son of Benjamin (Gen. ALE, son of Bela (Nu. and 1 Ch.), son of Gerah, Bela (Gen. [A]; B lacking)). Gentile ARDITE (אֲרֶדִי; S. om., δ' Αδρι [L. 7:7]).

ARDATH, RV Ardat, the name of a field mentioned only in 4 Esd. 9:26 as the scene of a vision of Esdras.

The Eth. and Syr. read *Ardat*, which Fritzsche and Hilf. follow. The Lat. Vss. vary: *ardath* [Vg.], *ardar* [S.], *ardul* [L.], cp Binsly *ad loc.* Supported by the description in 7:24 'a field . . . where no house is built', Volkmar would emend to *Arda*, 'desert' (more correctly *Araba*). Similarly Rendel Harris, who, however, connects Arda with Kujatharia (*Rev. of Herodotus* [Paruch, Camb. 1876]), in which case the 'oak' in 14:1 will be Abrahams oak of Hebron. On the other hand, we should then expect rather the usual name Hebron, or, at least, the fuller form, Kirjath-Arba. If Ardat is indeed to be sought for in this district (cp 3:1 Esdras is in Babylon) we might follow T. Ren. more closely and identify it with the well-known Arad, which also was situated in a desert. See ARAD, 1.

ARDITES (אֲרֶדִי), Nu. 26:40. See ARD.

ARDON (אֲרָד; OPNA [BA], ΑΒΔΩΝ [L.]), B. Azubah, a Calebite (1 Ch. 2:18). See AZUBAH, 1.

ARELI (אֲרֶלִי; Gen. 46:16; ΑΡΙΗΛΙC [D], ΑΡΗΛΙC [A], ΑΡΗΛΙC [L.]; Gen. Lxx, also τω ΑΡΙΗΛ [BFL.], om. A; see ARIEL, 1. B. Gad. In Nu. 26:56 the name is used also collectively with the art. (AV 'the Arelites'; Α ΑΡΙΗΛΙC) [BFL.], with consciousness that 'son of Gad' = Gadite clan. Doubtless 7:176 should be corrected to Α ΑΡΙΗΛΙC, the family of the Arelites (אֲרֶלִי), and it is possible that the names should rather be Uriel, Urielites (see NABUS, § 35).

AREOPAGUS, AREOPAGITE (Acts 17:19) (ΑΡΙΕΤΑΝ ΑΠΟΛΙΟΝ ΠΑΓΟΝ [Ti. WH] EV 'unto [the] Areopagus'; 7:22, AV 'Mars' Hill', RV 'Areopagus').

1. **The hill.** Hence the title 'Areopagite', Acts 17:34, ΑΡΕΟΠΑΓΙΤΗΣ [L.], אֲרֶכְוִי [WH]. Difficulty is caused by the fact that the name signifies both a hill and a court. The hill is that formless mass of rock which lies towards the NW. below the Acropolis, separated from it by a depression now largely filled with earth (Herod. 8:52. Luc. *Proc.* 42). The NE. corner of the hill is a precipice, to the top of which we ascend by means of sixteen ruined steps, cut in the rock at the SE. angle. At the head of the stair are the remains of an altar. The deep chasm at the foot of the precipice was connected with the worship of the Semnai (Eumenides or Furiae). The whole place was sacred to the most awful associations. Mythology had here lent to the majesty of the law a most solemn background. As a Court,

2. **The Court.** the Areopagus was, before the development of the democratic spirit, the supreme authority in Athens. Its powers were of two kinds, definite and indefinite. The definite powers were: (1) a limited criminal jurisdiction; (2) the supreme direction of religious worship, especially of the cultus of the Eumenides. The indefinite powers were:—a general supervision or guardianship (1) of all magistrates and law courts; (2) of the laws; (3) of the education of the young; and (4) of public morals. In addition to which there was (5) the competence to assume in political and national emergencies a dictatorial authority.

During the earlier history of the city the court held its sittings, for the trial of blood-guiltiness, upon the hill itself. For the hill was the Hill of the Ares, the God of Impetuousness. The place for the solemn trial—solely, the natural scene for the trial of terrible offences of blood—sitting that might not be tried under a roof. Moreover, to the early city, the Areopagus was the

AREOPAGUS, AREOPAGITE

place *without* the gates, a place to condemn the criminal, to erect a monument for the outcast tyrant, to bury the stranger (Robert, *Ant. Koll. theon.* 101). It was during the earlier and the later periods of Athenian history that the Court of the Areopagus (*ἡ ἐκ τοῦ Ἀρείου Πάγου βουλὴ*) enjoyed its powers to the full. In the interval Ephialtes, aided perhaps by Themistocles (Arist. *const. Ath.* 25; 462 B.C.), abolished most of its indefinite functions, and thus deprived it of its strongest influence; it became merely a criminal court of narrow competence. Thenceforth, as in Aristotle's time, it dealt only with cases of wilful homicide, of poisoning, and of arson (*const. Ath.* 57), while the superintendence of religion was in the hands of the King Archon. As indictments for impiety (*ὑπερβίας ὁμοφρονας*) came, in their preliminary stages, before the latter cases which once would have gone before the Areopagus were now tried before the popular jury-courts. It was in this way, therefore, that Socrates, accused like Paul of not worshipping the gods of the city and of introducing new divinities,¹ was tried. As the regular place of business of the King Archon was the Stoa Basileios, the associations of which were, in later days, exclusively religious, it was within that portico that the charge of impiety was brought against the philosopher. It is probable, however, that the Areopagus also always met within the Stoa (*Dein. in Aristot.* 776) when ritual did not demand a midnight-sitting on the open rock. In other words, in all cases other than those of murder. When, with the advent of the Romans, the Areopagus reappeared, after its long eclipse, as once more the supreme authority of the city (ep Cic. *Ep. ad Fam.* xii. 15; *Nat. Deor.* 274), and the specific control of religion fell again within its competence, it would naturally continue to meet there.

There it was, therefore, and before that body, that Paul was summoned. To speak of him as 'perhaps standing on the very stone where had once stood the ugly Greek who was answering the very same charge' (Harrar, *St. Paul* 300) is to sacrifice historical truth to sentiment. We must relinquish the fond idea that Athens has the interesting distinction of being the one city of the world where we can tread in the very footsteps of the apostle. The view now generally taken errs in a double manner. It maintains, first, that the proceedings were in no sense legal or magisterial; and secondly, that they were upon the hill.

The marginal rendering (AV 7: 22) is no doubt right in representing that it was before the court that Paul was brought. Can we believe that a crowd of idlers, parodying the judicial procedure of the court, could have been allowed to defile the neighbourhood of 'that temple of the awful goddesses whose presence was specially supposed to overshadow this solemn spot, and the dread of whose name was sufficient to prevent Nero, stained as he was with the guilt of matricide, from setting foot within the famous city' (Suet. *Agr.* 31; Dio Cass. 43.14)? Such a view requires better support than is given by the bare assertion that 'the Athenians were far less in earnest about their religion than in the days of Socrates, and if this was meant for a trial it could only have been by way of conscious parody' (Harrar, *op. cit.* 300 n. 3). Nor can an appeal to Acts 17: 19 prove that *παλαίστρα* (Acts 17: 19; AV 'took') is here not used in the sense of 'arena'.

The view advocated by Curtius (*St. Paul in Athens*, 292) is correct. Paul was taken not to the Areopagus hill, a place not adapted either for hearing or for speaking upon occasion such as this, but to the Stoa Basileios (*ἡ ἐκ τοῦ Ἀρείου Πάγου*, ep Acts 17: 19), etc., for a preliminary examination (*ἀνάκρισις*). Thence it was to be decided whether the new teaching and its missionary proclamation for the introduction of a new religion, standing in the midst of the assembled

¹ Ep Nro. 37. m. 1 c with Acts 17: 18. Yet there is probably no conscious reference in the latter of the Christian writer to the trial of Socrates, though the contrary has been asserted.

ARETAS

Areopagites (*ἐν ὑπό τοῦ Ἀρείου Πάγου*, ep Cic. *ad Att.* i. 115; *Fouilles d'Éphèse*, 108, 'Ἀρείος πάγος Ἀγορῆς προσηγορία'), he made his defence. Much of what fell from his lips may be presumed to have awakened an echo in the breasts of his audience (on the speech see H. L. L. XI. 81, § 91); but the mention of the resurrection of the body seemed to remove the case altogether out of the domain of the serious and practical. The court refused to continue the examination, and Paul was contemptuously dismissed (*ἐξ Ἀραβῶν*, 32 f. 1). Curtius, *Paulus in Athen.* modifies his view. For another view, see Rams. *Paul* 243 f. See also Lindley, *Ann. Brit. Sch.* 175 f.

W. J. W.

ARES (ἄρης [BA] 1. Esd. 5: 1. Ezra 25. ARAM, 2.

ARETAS (ἄρετας [1. WH], an ancient name (strictly ἄρετῃ in inscriptions, e.g., Euting *Ach. Inschr.* No. 196 of Nabatean princes, mentioned in the story of Jason the high priest on the time of Antiochus Epiphanes), 2 Macc. 5: 1. ἄρετας [BA]). The Aretas of this passage is called 'king of the Arabians'; he was hostile to Jason (7: 1). Another Aretas was master of Damascus in the time of Paul—three years after the apostle's conversion. This 'emarch' sought (see below) to apprehend Paul, who, however, made good his escape (2 Cor. 11: 32). The story of the Nabateans has been told elsewhere (see DAMASCUS, § 12, NABATÆANS). It is certain that about 85 B.C. they had possession of Damascus; but it should be added that the autonomy of Damascus in 70-69 B.C. is established by numismatic evidence. The first collision with the Romans was in 64-62 B.C., when the Nabatean king, Aretas III, intervened in the struggles between Hyrcanus and Aristobolus. Damascus now came under Roman sovereignty. During the following decennia the Nabatean kingdom became involved in the wars occasioned by the Parthians—with varying but for the most part ill success. The king also had various disputes with his neighbour Herod the Great. Aretas IV. (9 B.C. 40 A.D.) had tact and skill enough to keep terms with Augustus; his daughter became wife of Herod Antipas (Jos. *Ant.* xviii. 54), but was set aside in favour of Herodias. Disputes on frontier questions furnished the aggrieved father with pretexts for war. Vitellius was ordered by Tiberius to avenge the defeat inflicted by Aretas upon Herod; but the death of the Emperor put an end to the scheme (ep CROXOTORY, § 78). At this time, according to 2 Cor. 11: 2, Damascus must again have fallen into the hands of Aretas; Damascus coins of Tiberius do not occur later than 33-34 A.D. A tempting conjecture is that it was Caligula that sought at this price, after his accession,¹ to buy over Aretas, against whom Tiberius had so recently ordered war; yet, in our complete ignorance of this chapter of history, we are not precluded from supposing that Tiberius himself in 34 A.D. had already taken occasion to present Aretas with the city as a peace-offering (ep CROXOTORY, § 78). A violent capture of the city by Aretas is not to be thought of; such a deed would have called for exemplary punishment at the hands of the Romans. Equally improbable is the view of Marquardt (*Röm. Staatsverwaltung*, 1451) and Mommsen (*Röm. Gesch.* 547b) that Damascus had remained subject to the king of Arabia continuously from the beginning of the Roman period till 106 A.D. For (1) in Pompey's time Damascus belonged to the Decapolis (Plin. *HN* v. 1874; Ptol. i. 15: 2; ep DECAPOLIS, § 21); (2) in the reign of Tiberius it was the Roman governor that gave the authoritative decision on a question of frontier between Damascus and Sidon (Tac. *Ann.* xvii. 63); (3) we have imperial coins of Damascus with figures of Augustus, Tiberius and Nero; (4) in Domitian's time there was a cohort raised in Damascus, the Cohors Flavia (CIL.

¹ So also Gutschmid (Feyrus in Euting's *Nab. Inschr.* 85) and Schürer (*GH* i. 618, ET 2: 357 f.).

ARIMATHÆA

name will become no longer Uriel, but (by a slight modification) Ariel (i.e., altar-hearth). The reading Uriel seems to have been known to the author of 31:6: 'says Yahwē, who has a fire (שֶׁר) in Zion and a furnace in Jerusalem.' The other explanations of this prophetic name are (1) lion, or lioness, of God (Isa. 29:1; Jer. 2:3; 23:1); (2) hearth of God (Jer. 17:1; 23:1); (3) altar-hearth (Isaiah, Dalm., Che., *SBOT*). Of these, the third is probably the easiest; but none of them quite accounts for the selection of the new name for David's city, nor for the expression 'and will become to me like (an) Ariel (cf. 28:1)'.
L. K. V.

ARIMATHÆA (ἀριμαθαία [Ti. WH]), Mt. 27:57, etc. See *RAMATHAIM-ZORAIM*.

ARIOCH (אַרְיוֹךְ; ἀριώχ [BADEL 87, *See*], *CHHC* [87 in *Dm* 2:14 f.]) Probably a Hebrew form of an old Babylonian name (see CHÉRONOMER, § 3) used, (1) possibly with archaeological accuracy, in Gen. 11:9 (an ally of an ancient king of Elam); (2) by a literary fiction, of Nebuchadrezzar's captain of the guard (*Dm*, 2:14 f., 2:14 f.); and (3) of a king of Elam (so the Syriac) in alliance with Nebuchadrezzar (*Judith* 16, ἀριώχ [S*], Cp. Bezdant, *Babyl. Assy. Lit.* 53).

ARISAI (אַרְסַי; Ἀρισάιν [BNI], -φανον [A], unless we regard this as an intruder and identify Arisai with the succeeding name Ἀρισταίος; see ARIDAI), son of Human (Es. 26). See *ESTHER*, § 3 (enth).

ARISTARCHUS (ἀρισταρχός [Ti. WH]), a Thessalonian (Acts 20:27), one of Paul's companions in travel (Acts 19:29), was among those who accompanied him from Ephesus on his last recorded visit to Jerusalem (Acts 20:17) and also on his voyage to Rome, having joined him at Caesarea (Acts 27:1). As the apostle's 'fellow-prisoner' (ἑταῖος, *etaios*) he unites with him in saluting the Corinthians (Col. 4:10). Cp. COLUSTANS, § 10 f. He joins the salutation to Philemon (Philem. 24), but in this passage is designated simply as 'fellow-worker,' Epiphraus alone being called 'fellow-prisoner.' From this it has been inferred, with much probability, that the companions of Paul relieved one another in voluntarily carrying his captivity.

In the list of the 'seventy disciples' given by the Pseudo-Dorotheus (Pseudo-Hippolytus (not earlier than the fifth cent.), Arisai is bishop of Amasea in Syria. Pseudo-Dorotheus also has it that along with Phileas and Trophimus he was beheaded in Rome at the same time as Paul.

ARISTOBULUS (ἀριστοβούλος [V.V.], Ti. WH), a Greek name adopted by Romans and Jews, and borne by several members of the Maccabean and Herodian families.

1. The teacher (διδάσκαλος) of Ptolemy (no. 1), to whom Judas (the Maccabee) sent letters (2 Macc. 1:10). He is the well-known Jewish-Hellenistic philosopher of that name, who resided at the court of Ptolemy VI. Philometor (180-145 B.C.). He was of priestly descent (απὸ τοῦ τῶν Χριστῶν ἱερέων γένους, *cf.* *Ex* 13:1-22 *עֲשֵׂה*), and was the author of (among other writings) certain works on the Pentateuch, fragments of which are preserved in Clement of Alexandria and in Eusebius. See *Schur* *GTI* 2:260 ff., *Ex* *GTI* 4:353, and *Koe*, *Galat.* 2:41 ff.

2. 'The chief of the household of Aristobulus' are saluted in Rom. 16:11. It is not implied that Aristobulus himself was a Christian. The name was a common one in the dynasty of Herod. The list of the 'seventy disciples' given by the Pseudo-Dorotheus names Aristobulus as bishop of Batium.

ARIUS (ἄριος [ANV]; *See* not certain, see *Swaete*)
AR 1 Macc. 12:1, RV. See *SPARTA*.

ARK. See *DELEG.* § 10.

1. The ark (ship) is the ark (Che. *Inte*, Isa. 20:1). It is the ark of the Lord (Isa. 2:12). The ark of the Lord would then disappear. Moreover 'ark' in the sense of fire seems to be late. Cp. 30:12 f.; 33:17 (late).

ARK OF THE COVENANT

ARK OF THE COVENANT or Sacred Ark (אֲרוֹן; אֲרוֹן הַבְּרִית [BAI]; *See* *ARK*).

There is nothing more significant than the changes in the titles of sacred objects. We must, therefore, be careful to place these titles in their chronological order. According to Seyring (*1711*)

1. **Names:** Ark of God, etc. (11:16 [91]) the oldest name of the ark (or sacred chest) is 'the ark of Yahwe the God of Hosts (Sēbā'ōth) who is enthroned upon the cherubim.'

This title is reached by an analysis of the designations of the ark in (a) 2 S. 6:2 and (b) 1 S. 14 (both passages belong to early documents). The titles given in (a) are 'ark of God' (*hosei-šēbā'ōth*), and 'called by the name of Yahwe Sēbā'ōth that is enthroned upon the cherubim.' In (b) the title is 'ark of the *hosei-šēbā'ōth* of Yahwe Sēbā'ōth who is enthroned upon the cherubim.' Recombining the supposed oldest elements in these titles, Seyring obtains the title mentioned above. This usually careful scholar, however, has overlooked, in dealing with (b), *See* reading in the preceding verse - viz., 'the ark of our God' (τῆς ἐκδοῦ τοῦ θεοῦ ἡμῶν [B]). τ. κ. τῆς διαθήκης τοῦ θ. ἡ. [A], τ. κ. τ. ὁ, λέγοντες τ. θ. ἡ. [1.]), which is self-evidently more correct than the Deuteronomian formula of MT, and, taken together with 7:6 ('ark of Yahwē'), justifies us in assuming that the equally simple title 'ark of Yahwē' stood originally in 7:4 and 7:5, and 'ark of God' (cp. 7:14, 17 [9:22] in 7:4b). Nor has Seyring noticed that after 'ark of God' in (a) the relative clause which follows is superfluous, and presumably a later insertion. It must be added that it remains most improbable that the divine name Yahwe Sēbā'ōth is older than the Assyrian period, to which indeed Amos who undoubtedly uses it belongs; at any rate the theory that this name represents Yahwe as the God of Israel's hosts, and has any special connection with the ark, has insuperable difficulties. Thus, so far as (a) and (b) are concerned, the popular names for the ark were very short - viz., 'ark of Yahwē,' 'ark of God,' and 'ark of our God,' - and from the context of the former passage we find that there was a still shorter name, 'the ark' (2 S. 6:1), which occurs thrice in old parts of Samuel, and five times (for seven, including Josh 3:11, 17; see *Kat.* 28) in the Hexateuch. The title 'ark of God' (עֲרֹן הָאֱלֹהִים, or twice עֲרֹן הָאֱלֹהִים) occurs often in old parts of Samuel, and also in Chronicles. In a solemn speech of David in 1 Ch 15:11-14 we find the sonorous phrase 'the ark of Yahwe the God of Israel,' which reminds us of the phrase used by the Philistines in 1 S. 5:7 f. 11. Side by side with 'the ark of Elolam' we naturally find the phrase 'the ark of Yahwe.' It occurs first in the composite work JE, and may reasonably be ascribed in the first instance to J, though in some passages it may have been inserted by the editor, either as an altogether new addition, or in lieu of the phrase 'the ark of God,' which was probably used in E. Once (Josh. 3:1) we find this remarkable addition 'the Lord of the whole earth,' which, apart from 7:11-13, occurs only in late writings, and, as Seyring points out, is

1 Cp. Ass. *Ass.*, *Ass.* (C. 1000), 'the ark' (receptacle) (D. 1000, 1001).

2 The same renderings are given for עֲרֹן Noah's ark, but not for עֲרֹן, the 'ark' in the bulrushes.

3 This rendering implies that עֲרֹן, 'name,' occurs twice in MT by pure accident. Otherwise we should have to suppose that the name by which the ark was called was 'the name of Yahwe Sēbā'ōth, etc.

4 Smend's arguments (*Religgesch.* 125 ff.), weakly met by Marti (*Gesch.* 10, *Ass.* 14), appear conclusive, only he should have formed himself by Assyrian parallels. Thus, Ass. is said to be the overlord of the mass, or entire multitude, of the gods; 'Nobis' to be the overlord of the mass, or entire multitude, of the gods (multitude) of heaven and earth. Amos and his school represent Yahwe as the lord of all supernatural beings in the universe, in opposition to all rival deities. See, however, NAMES, § 123.

5 On these points see further, Budde's crit. note in *SBOT*; Conard, *1711* 12:71 [102], n. 1; We. *1711* 167 (especially as to the right rendering of 1 Ch. 12:3).

ARK OF THE COVENANT

presumably due to a post-exile writer whose idea of Yahwé differed from that of JE. The phrase 'the ark of Yahwé' passed from JE into the terminology of the historical books in general (including Chronicles).

A new title for the ark seems to have been coined by the author of the original Deuteronomy (Deut. 10:1), and adapted from him by writers and editors

2. Ark of *brith*. who shared his religious point of view, and even (strange to say) by the Chronicler, who, in general, stands so completely under the influence of the Priestly Code. This phrase is 'the ark of the *brith*' (usually rendered 'covenant'; see below), either simply (Josh. 3:6) or in various combinations, such as 'ark of the *brith* of Yahwé,' 'ark of the *brith* of Elohim,' and 'ark of the *brith* of Adonai.' The Deuteronomistic editors have freely introduced the term *brith* into the titles of the ark in the older sources which they edited. The work of the editor clearly betrays itself in such phrases as *אֲרוֹן הַבְּרִית* (Josh. 3:6), *אֲרוֹן הַבְּרִית* (Josh. 3:17), where the editor has forgotten to make the omission of the article, necessitated by the introduction of a dependent genitive.

And now as to the correct meaning of the phrase *אֲרוֹן הַבְּרִית*. It is rendered by *ὁ ἀρχαιοὶς τῆς διαθήκης*, Vg. *arca foederis* and *arca testamenti* (Num. 17:10), and by EV 'ark of the covenant.' That *brith* cannot, however, in this phrase mean 'covenant' in our sense of the word is clear from 1 K. 8:21 (= 2 Ch. 6:11), where we are told that 'the *brith* of Yahwé' was 'in the ark.' The phrase is parallel to that in 1 S. 25:22, 'into the ark thou shalt put the testimony' (*אֲרוֹן הַבְּרִית*), which (see below) is a technical term for the 'two tables' of the Decalogue. Hence Kan. *HS* rightly rejects the obscure if not misleading phrase 'ark of the covenant,' and substitutes 'ark with the law (of Yahwé),' which is at any rate, by common admission, the best approximate rendering (cp COVENANT, § 1).

The latest phase in the historical development of the names of the ark is marked by the title which occurs

3. Ark of *eduth*. eleven times in the Priestly Code and also in Josh. 1:6 (introduced into JE by the editor), meaning 'ark of the publicly delivered ordinance' (*ὁ ἀρχαιοὶς τῆς διαθήκης τοῦ μαρτυρίου*, Vg. *arca testimonii*, EV, ark of the testimony). The meaning given above is confirmed by Ex. 31:18 (1:2) 32:15 (1:3) 34:1 (P), where we hear of 'the two tables of the *עֵדוּת*.' Probably this new title appeared to the priestly writer clearer and more definite than that introduced by Deuteronomy. It did not, however, displace the older phrases, which reappear not only in Chronicles but also in the Greek Apocrypha, and (α, τῆς διαθήκης) in the NT (see below, § 15).

On looking back, we see that the names and titles of the ark fall into three classes. We have, first, the names 'ark of Yahwé,' 'ark of God,' 'ark of our God,' which indicate that the ark contained an object which in some way symbolised and represented Israel's God; and next, the names, 'ark of the law,' 'ark of the ordinance,' which suggest that the object contained in the ark was inscribed with laws; and lastly, attached to the older names, titles such as those in Josh. 3:11; 2 S. 6:2, which indicate a desire to correct the materialistic interpretation which might seem to convert the ark into an idol. A critical study of the texts is the necessary commentary on these deductions from names. The following sections aim at bringing together the chief notices of the ark, indicating the sources from which they are derived, and then, at fitting points, giving the reader some idea of the results which follow from a critical treatment of these notices.

We turn first of all to the documents called J and E (as far as we can separate the one from the other) in the Hexateuch. It is more than probable¹ that both J and

E, in their original form, related how Yahwé or Elohim, at Sinai or at Horeb, directed an ark to be made as a

4. Traditional origin of ark: JE. substitute for his personal presence as leader of his people. These passages were omitted by the editor, who preferred the much more suitable account

(so he must have deemed it given in P (see below, § 13), but has preserved the tradition of J and E that, both in the wilderness and on the entrance into Canaan, the ark led the van of the host. In referring to this J quotes two poetic formulae (Num. 10:35), which he says were spoken by Moses at the beginning and the end of a day's march, but which more probably arose at a later time.² Whether J and E agreed with Deuteronomy in stating that the 'two tables of stone' were placed in the ark is a matter which can be only conjecturally decided. There is, however, a very strong probability that they did not. The story, at any rate, is much more forcible if we suppose no renewal of the shattered tables (Ex. 32:19), and we cannot believe J to have omitted on this important point from E. Historical considerations (see below, § 10) confirm this conclusion. In particular, the ark was not, in the succeeding narratives of J and E, a symbol of the revealed law, but the focus of divine powers. Twice, we are told, the Israelites omitted to take the ark with them and were defeated (Num. 14:4 Josh. 7:1), and on the latter occasion Joshua prostrated himself before the ark,³ and remonstrated with Yahwé, the God of Israel. The crowning proof of the potency of the ark was given when the Israelites crossed the Jordan (according to one of the traditions, at harvest time), and captured Jericho (Josh. 3:6). The Deuteronomistic editor has made the former part of the narrative difficult to restore to its original form (which was a combination of J and E); but it is probable that J and E already described the priests (not, the priests, the Levites) as bearers of the ark. In the latter part it is not very difficult to recover a simpler, more natural, and presumably earlier account, in which no express mention is made of the ark, and nothing is said of the falling down of the walls of Jericho (on the narrative see Jos. A. ii. § 71.³ Thus far, then, the most genuine tradition is clear and intelligible.

The invention of portable sanctuaries, and especially of portable idols, may possibly go back to the nomadic Semites and to a time when the gods were still tribal rather than local, but the probabilities are all against such a view. There is less trace of such an institution in Arabia than in any other part of the Semite world, and nowhere else is the principle so strongly marked that a tribe that changes its seats changes its gods. Even the ark of Yahwé is not carried back by Hebrew tradition to patriarchal times; the patriarchs do worship only where they have a fixed altar. It is, therefore, more likely that portable symbols of the godhead first arose among the settled Semites and in connection with the religion of the army in war. In this connection the idea of a portable god involves no great breach with the conception that each deity has a local home, for when the campaign is over the god returns to his temple. When the notion of portable gods was once established, however, its application could easily be extended and would serve to smooth away the difficulty of establishing new permanent sanctuaries in conquered regions or colonies over the sea. A Greek colony always carried its gods with it, and it is probable that this was often done by the Phoenician colonists also. Even in Israel we find that the sanctuary of Yahwé at Dan was constituted by setting up the image from Mahab's sanctuary (Judg. 18), just as David gave a religious character to his new capital by transferring the ark to it.⁴

But by what critical process can we bring simplicity

¹ Delissch, however, defends the Mosiac authorship of JE.

² So MT and EV; EV omit 'the ark (ark)'

³ We. *CH* 12:1; *KL* II. 1. 1. 232 L.

ARK OF THE COVENANT

into the episode of the capture and restoration of the

8. Capture and recovery.

sacred ark by the Philistines (1 S. 1:7-10). Some facts are admitted. That at the end of the period of the Judges the ark rested at the Ephraimite sanctuary of Shiloh is a trustworthy statement, guaranteed by 1 S. 1:1-4 (chap. 3 we must regretfully pass over, as coming from a different hand and later writer; see SAMUEL, II). It must, also, be a fact that the Philistines had defeated the Israelites near Eben-ezer (1 S. 11:1-11). Tradition doubtless added that the leaders of Israel attributed their misfortune to the absence of the ark from the host, and that they therefore fetched the sacred chest from Shiloh. The immediate consequences are graphically described. On the arrival of the ark the Israelites were in a state of wild delight; and the Philistines who heard the shoutings were proportionately alarmed, for 'who (said they) can deliver us from these great gods?' (*elohim*). Nevertheless, with the courage of despair, the Philistines renewed the fight with complete success, and were even able to carry off the ark in triumph. Then begins a series of wonderful incidents from which it is difficult to extract a kernel of early tradition. Stade thinks (GIL 1:22 f.) that in chaps. 5 and 6 he can find the remnants of two distinct accounts; but the recognition of this would only diminish the number of difficult features in the narrative. It would obviously not provide an intelligible statement of facts. Of the difficult details referred to there is only one which it is necessary to criticise here. It is a statement which is historically impossible. The Philistines, we are told, under the pressure of pestilence, returned the 'gods' which they had captured from Israel. Ancient nations did not act thus in such circumstances. For example, we know that the image of the goddess Nani (see NANI) was taken from Erech by an Elamite king, and detained in Elam for 1235 years. Did any calamity ever suggest to the Elamites the idea that Nani was chastising them for the insult to her image? No. Ashurbanipal, king of Assyria, had to devote all his energies to the task of crushing the Elamites before he could restore the image to its ancient home (cp. ASHURBANIPAL, § 8). Similar stories of reconquered idols are told in connection with the names of Ashurbanipal's grandfather Sennacherib (cp. ASSYRIA, § 20) and the old Babylonian king Agak-kak (rime).

The fragmentary document which we have thus far studied closes with the statement that the ark was placed in the house of Abinadab at Kirjath-jearim, and that Abinadab's son was consecrated to keep it. It is to an entirely different (and probably earlier) source² that we owe the narrative of the bringing of the ark to Zion. We learn here that at the time when David bethought himself of the ark, it rested at a place called Baal in Judah (2 S. 6:2; see DRIVER *ad loc.*). During the whole of Saul's reign and during David's seven-years' reign in Hebron, it had lain forgotten in a provincial town. Neither Saul nor David had thought of taking it into battle; nor, so far as our evidence goes, had it been visited by the people. What, then, had been the effect of the repeated attestations which the divine judgments had given to its supernatural power? Let us see whether the narrative in 2 S. 6 (which appears to be older than that in 1 S. 1:7-10), when critically treated, suggests any way out of our manifold difficulties. It is permissible, and indeed necessary, to disregard so much of chap. 6

relates to the death of Uzzah (a passage which in its difficulty resembles parts of the story in 1 S. 5:1-4), and the growth of which can be accounted for, and to fix our attention on the simpler narrative in 2 S. 6:1-5, the kernel of which is that early in David's reign, the ark

was in the house of one Obed-edom of Gath, and that David fetched it thence with much jubilation to Zion. How came the ark to be there? That David of his own accord entrusted such a sacred object to a Philistine is highly improbable; but how if Obed-edom was not a Philistine sojourning in Judah, but a foe residing in his native town of Gath? How if the ark had never left Philistine territory, though it had been shifted from Dagon's temple to a private house? How if David acted as Assyrian kings acted in similar circumstances, and reconquered the precious object which was to him in some sense the dwelling of his God? This is the hypothesis of Kisters, who held not only, with Kittel and Budde, that 2 S. 21:15-22 is properly the continuation of the narrative in 2 S. 5:17-25, but also that the sequel of the story of the battle in Gath (2 S. 21:20) was once the notice that David fetched the ark from the house of Obed-edom in Gath and deposited it for a time at Baal.¹ After this, according to Kisters, came originally the story of the capture of Jerusalem (an event which this critic places *after* the hostilities referred to in 2 S. 5:17 ff.), and of the bringing up of the ark to Zion. The editor to whom the present form of 2 S. 6:1-12 is due appears to have had a religious rather than a historical motive. The facts as stated in the original narrative might suggest to some readers that Yahweh needed the interference of David to deliver him from captivity: in other words, that David was stronger than his God. The editor shrank from inventing an entirely new narrative, but, to counteract that idea, put the central facts in the traditional story in an entirely new setting.

This hypothesis, the present writer has long felt, is absolutely required to clear up an important historical episode.² Without it the central facts of tradition, including David's almost ecstatic joy (2 S. 6:14), are hopelessly obscure. A glance at 2 S. 6:1 f. will convince the reader that there is nothing arbitrary in the view proposed. That 2 S. 21:20 cannot have been the original sequel of 2 S. 6 must be clear. Unless 2 S. 6 is simply misplaced, it must have been followed by a record of some martial exploit of David. To the present writer it seems probable (see DAVID, § 7) that the exploit consisted in a great victory near Gath (cp. 2 S. 21:20 f.), which so weakened the Philistines that they offered to restore the ark on condition of David's making with them a treaty of peace, and that David himself fetched the ark from Obed-edom's house. It will be remembered that when David defeated the Philistines at Baal-perazim he had 'taken away the images' (2 S. 5:20) which, by their presence, should have ensured a Philistine victory. It seems probable that when the Philistines restored the ark David gave back the captured 'images'. Cleverness was a characteristic of this king. It was all-important to him not to wage an internecine warfare with the Philistines, and he therefore 'contented himself with a peace honourable for both parties' (Kamphausen). The original story may have referred to this restoration of the images captured at Baal-perazim, and this compound name may have suggested the mention of 'Baal' and 'Perez-uzzah' in 2 S. 6 as it now stands. In a certain sense, indeed, the ark *was* recovered from Baal-perazim.

Our next notice of the ark is in 2 S. 7, a passage full of varied interest, though in its present form not older than the sixth century. It tells us and no doubt the

¹ The reason why David deposited the ark in Gath, according to Kisters, that he had not yet reconquered Jebus or Jerusalem. Those who hold another view as to the time of the capture of Jebus will give a different reason. David had indeed conquered Jebus, but had not yet adapted it to his fresh buildings to serve the purpose of a capital. See DAVID, § 7.

² Since the above was written, Wackler has made another attempt to produce an intelligible view of the history of the ark (GIL 70 ff.). It is difficult to see that there is any solid ground for his very revolutionary hypothesis; but, if any rate, he perceives a problem which escaped the earlier writers before Kisters.

¹ Tiele, *Bibl. Ges.* 1895 f. 112 ff., referred to by Kisters, *PhP* 27, 374 f. ch.

² The reference in 2 S. 6:11 to the house of Abinadab seems to be an editorial insertion (see Kisters, *op. cit.* 302).

ARK OF THE COVENANT

statement is historical) that David wished to build a cedar-house for the ark, but was forbidden by an oracle.

6. Permanent
abode.

6. Permanent abode. We can understand, therefore, that for a time (see 2 S. 11.) suggests) the ark was still carried with the army as an insurance against defeat.¹ The capture of it by the Philistines, however, had already given a blow to the primitive, fetishistic conception of the ark, and an occasion arose when David, it would seem, was inwardly moved to express a far higher view. It was probably a turning point in Israel's, as well as in David's, religious development. The circumstances were these. David was fleeing from Jerusalem before Absalom. Zadok wished to carry the 'ark of God' with David and his body-guard. The king, however, protested, and commanded Zadok to carry it back, 'that it may be seated in its place' (2 S. 15. 25, 26). He was conscious (if 2. 26 may be followed) that Yahwe might have cause to be displeased with him, and would rather suffer his punishment meekly than seem, by having the ark with him, to demand the interposition of Yahwe as a natural right. Henceforth, therefore, the symbol of Yahwe's presence should no more 'leave its place': Yahwe would direct Israel's affairs, both in peace and in war, from Zion. Early in Solomon's reign the greatest of all Israel's sanctuaries was erected. Much as the original passage of Solomon's biography has been edited (see Kau. *HS* and cp. *G*), it is beyond question that this king transported the ark from its temporary abode to the sanctuary of his temple. 'There—so both he and David hoped—it was to serve as a national centre, and complete the unification of Israel. The hope was, however, disappointed; nor do even the writers of Jewish spend a word on the ark, or give a hint as to the feelings of the people towards it.

Our next news of the ark is indirect, and comes from an exile or post-exile passage of the Book of Jeremiah:

7. Disappear-
ance.

7. Disappearance. (39c). The passage runs thus: "In those days to morrow shall one say, 'The ark of the *birth* of Yahweh,' neither shall it come into one's mind, neither shall one think upon it, nor miss it, neither shall it be made again." The full import of the words may be doubtful; but at least one thing is clear, the ark, on the possession of which the well or woe of Israel had once seemed to depend, had passed away. This is too patent from later writings to be denied. Ezra 1 and 1 Macc. 4 do not mention the ark among the sacred vessels. Josephus (*Ant.* 5.5) declares that the Holy of Holies contained nothing at all. Lastly, Tacitus, relating the entrance of Pompey into the temple, uses the emphatic words, "Inde vulgatum nullas intus domus effigies; vacuum sedem et inania arcam" (*Hist.* 5.9). How the ark disappeared will be considered presently (see next §). Suffice it to add here that the *sepher torah* or 'Book of the Law' succeeded to the undivided reverence of true Israelites, and is still, with its embroidered mantle and ornaments, the most sacred object in every synagogue.

When, then, and how did this holy thing, which, according to Jer. 36, was by many so painfully missed, pass

8. Its fate.

8. **Its fate.** — out of sight? We have accounted for one strange gap in our historical notices respecting the ark, — how shall we explain the still longer and stranger hiatus which extends from (say) 690 to 850 B.C.? Why is it that neither the historians nor the prophets of this period (so far as we possess their works) refer to the fortunes of the ark or to the popular reverence for it in their own time? Three answers seem possible. — 1. Soon after 690 the ark may have been captured by an enemy, — calamity which was deliberately suppressed by the king, — just as they suppressed the

destruction of the temple of Shiloh—Giesebrecht and Cornill have pointed to the invasion of Judah by Shishak (Sheshank I.), king of Egypt, about 628, as the occasion of this (see 1 K. 11. 6). The objection is that Shishak's campaign, as the bas-reliefs at Karnak appear to prove,¹ was against Israel as well as Judah, and that, Egypt being too weak at that time to think of permanent conquests, the expedition must have been simply due to vainglory and to greed. If Shishak took away from Palestine anything in the nature of an idol, it must have been the 'golden calves' of Jeroboam, and not the outwardly unattractive wooden chest in the sanctuary of the temple of Rehoboam. Besides, Rehoboam and his priests would never have allowed the capture of the ark to become known—they would certainly, in the interests of the temple, have substituted a new chest, for which provisions for the supposed discoveries of Babylonian kings mentioned by Tiele (*B. H.* 461) may perhaps furnish a parallel. (2) The ark may have been carried away with the temple treasures in 785, by Joash, king of Israel (2 K. 11. 14), who would hardly have omitted to reclaim the long-lost treasure of the Ephraimite sanctuary at Shiloh. The objection to this is that the ark had long ceased to be the special possession of a tribe, and that events had proved that Joash could well dispense with the ark, while to have carried it away would have been an offence against the great hero of united Israel—David. (3) The ark (which was probably renewed by the priests, when, decayed from age) may have retained its place till the great catastrophe in 586, and precisely to this may have lost much of its ancient prestige owing to the growing sense of the inconsistency of identifying such an object as the ark with the great God Yahweh, and perhaps also to discourses of the prophets against a superstitious reverence for the ark which have been lost, or even suppressed by editors. This view—which is in the main that adopted in 4 *I. d.* 10. 2, and implied by the legend in 2 Mace. 2. 3 (see below, § 15), that Jeremiah² hid the tabernacle and the ark and the altar of incense in a cave—is by no means an improbable one. The only obvious objection to it can easily be met. The assertion in Dent. 10. 4 that the ark was simply the repository of two inscribed tables of stone need not imply that D, like P, is an archaeologist, and that the object which is thus wrongly described no longer existed. It is more natural to suppose that—like the other fashions to which this writer is so vehemently opposed, the sacred stones which (as we shall see) were the objects venerated of old in the ark still held their place, concealed from view but secure. The Deuteronomist, speaking in the name of Moses, could not help assuming the sanctity of the ark and its contents. In the interests of piety, however, he transformed (as far as words could do it) the nature of the objects in the ark. That venerable enter was not, he meant to say, in any sense the dwelling of the deity, whom no temple could hold (1 K. 8. 27): it simply contained a perfect written embodiment of the fundamental demands of Israel's righteous God.

This leads us to consider the origin and affinities of the ark. For the ark of the Deuteronomist (and of 1

9. Real nature.

9. Real nature. With its two inscribed tables, no parallel has been found. Prof. Sayce indeed refers to Mr. Rassam's discovery of a coffer with two inscribed alabaster tablets in a little temple at Balawat, near Mosul;² but the coffer (which was not placed in the sanctuary) also was of alabaster, and with its contents corresponds to the chests containing sacred books which were among the regular appurtenances of Egyptian (and probably of Syrian) temples, but were not meant to be carried. For the ark known to the earliest Hebrew traditions, however, there are many monumental

¹ I was just not clear here that it is *ark*, which states, according to MT, that 'As often used to see the ark before David' i.e. in his campaigns. The right reading is, not **ark*, but **ark*' (*ark*)! (cf. S. ...). It is quite somewhat different from MT (S. first time ...).

1. St. G. 11, 12; WMM, 1s, n, Eur. 166, 169.

ark of the Father (Hebrews, 120) it is Josiah who hides the ark of the Father's sacred objects, including the pot of manna (see Hebrews, 9:4).

³ Sayre, *Hilbert Lectures*, p. 10; Pinches, *ASB* 763.

ARK OF THE COVENANT

parallels. In Egypt, for instance (from which Rezan too hastily derives the Israelite ark), no festival procession could be sculptured or painted without them.¹ The arks, with their images, were placed on boats, which were ornamented at the ends with heads of the deities within, the king himself, being divine, also had his ark boat. Such an ark boat, too, is referred to in the strange story of the daughter of the king of Babylon,² where an image of the god Honsu is said to have been transported to Syria, to deliver a princess from the spirit that oppressed her. These shrine boats must originally have had their parallels in Babylonia, the constant expression for the sacred arks in the cuneiform texts is *elip-pu*, i.e., 'ships'. Within the best known historical periods, however, it was in simple arks or coffers that the images of the gods were borne in procession at the Babylonian (and Assyrian) festivals.

Thus it appears that two things were essential in a sacred ark: that it should be of a size and material which would permit it to be carried, and that it should contain a representation or mystic symbol of a deity. The ark known to David and Solomon doubtless complied with these conditions. It was a simple wooden box, such as the ancestors of the Israelites had used in their nomadic state for their few valuables,³ without either the cladding of gold or the cherubim with which the reverence of a later writer provided it. As to its contents, the inscribed 'tables of stone,' which we should never have expected

10. Contents

to find in the Holy of Holies, were but a substitute of the indignation for some mystic symbol or representation of Yahwe. Of what did that symbol consist? We are, of course, bound to do what we can to minimise the fiction or error of the Deuteronomist; but we must not deviate from the paths of historical analogy. Those duties are reconciled by the supposition that the ark contained two sacred stones (or one).⁴ This view, no doubt, implies a survival of fetishism; but there are traces enough of fetishism (on which see FOOTNOTES, § 1) elsewhere in Hebrew antiquity to justify it. The stones (or stone) must have been ancient in the extreme. They (or it) originally had no association with Yahwe; they represented the stage when mysterious personality and power were attached to lifeless matter. Being portable, however, they were different from the sacred stones of Bethel, Beth-shehem, Shechem, and En-rogel, and are most naturally viewed as specimens of those fetters, animated stones, which, according to Sancho-mathon, were formed by the heaven-god, and were presumably meteorites. They may have belonged originally to the tribe afterwards called Ephraim; and when the several tribes united in worshipping Yahwe, the God of Moses, the Ephraimitish ark with its contents may have been adopted as the chief sacred symbol of Yahwe. The earliest narrators (see above, § 3, end) viewed the ark (which was virtually one with what it contained) as a substitute for the immediate presence of Yahwe, the son of the 'Golden Calf' at Sinai having proved the Israelites to be unripe for direct or immediate privilege. The primitive Israelites, however, who knew nothing of the story referred to, must have regarded it, not as a substitute, but as the real presence itself.

The portableness of the Israelitish ark did not, it is true, lead to its being carried about in processions. The reason is that, to the Israelite, the object within the ark was much more than an

1 See the procession of the arks of Amen-Ré, Mût, and Honsu (the Theban triad) in the second court of the temple of Ramesses III. at Medinet Hâbû (Wilkinson, *Anc. Egyptians*, 320), and Plate V. in Naville's *Festivals of Osorkon*, 2 (pp. 13).

2 Def. *Isr. HVB* sv. *elip-pu*. On the processional arks in Babylonia, see Tiele, *Z 12* 170 ff.; C. J. Ball, *ISB* 144.

3 Cp. Doughty, *Ar. Des.* 1227.

4 Cp. Vatke, *Die Rel. des A T* 121, St. *GPT* 457 f.; Beninger, *Hebr. Arch.* 37 s. There were and still are two sacred stones, a black and a white, built into the wall of the Ka'ba at Mecca (WRS, *Kin.* 297 f.).

idol. It is not merely one of a class of objects, each of which contained a portion of the magical virtue of the deity whom it represented.⁵ It was the only object with which Yahwe was so closely connected that the ark (for reverence forbade mention of the stones) and Yahwe were practically synonymous terms. It was, therefore, too sacred to be moved for a slight reason. Worshippers would rather make a procession round or before the ark (cp. 2 S. 6:14) than bear it in procession themselves. The reverence implied in the story in 2 S. 6:7 may represent the feeling of an age later than David's, but in instances had long been leading up to that extreme exaggeration. The higher the conception of Yahwe became, the greater was the awfulness which encompassed the ark,⁶ until (it appears probable) by a natural reaction the nobler Israelites rejected the fetishistic conception of the ark and its contents altogether. Thus we get one great distinction between the ark of the Israelites and other sacred arks: it was not subservient to idolatry. The only occasions on which it left its resting-place were times of war. Then, indeed, it was carried with the host into the fray, just as the Philistine images were carried into battle by the Philistines (2 S. 5:10), not to speak of Arabian and Artabanian parallels.⁷ It was not specially a 'warlike palladium,' however, except for the periods when war rather than peace was the normal state of the people,⁸ and we have found even David, at a great crisis in his life, deciding to put his trust in his God with out the presence of the ark.

The notices of later writers are valuable mainly for the religious history of the period of their authors. They show us how, near the close of the pre-exilic (and afterwards in the post-exilic) age, poets and men imagined to themselves the nature and circumstances of the ark. It is, therefore, unsafe to infer with Berthelm, from 2 Ch. 35:1, that the ark was removed from the sanctuary by Manasseh; unsafe, also, to infer, with the old Cambridge scholar Spencer, from P's description of the ark, that it was designedly made like the arks of Egypt, in order that the Israelites might miss no splendour or elegance which had charmed their eyes at Zorn. That Manasseh, with his syncretistic liberality, would have removed the ark is altogether unprobable. Spencer's theory, on the other hand, may contain an element of truth, and is, at any rate, more plausible than the view developed out of P's account by Richm.⁹ It is probable that the priestly legi-lator (P₂), in his description of the ark, did, unconsciously and in no servile manner, take suggestions from the sacred chests of Babylonia and Egypt, which he had seen or heard of. The simple chest of which J and E had doubtless spoken was unworthy (he thought) to be in any sense the symbol of the 'Lord of the whole earth.' Not such an ark could Moses have ordered to be made, for Yahwe was all-wise and must have 'filled' the artificers of the ark and the tabernacle 'with a divine spirit in wisdom and understanding' (Ex. 35:31).

We must not, however, overlook the references to the ark in writings of the Deuteronomistic school. We are told (Dt. 10:1) that Yahwe 'separated the tribe of Levi to bear the ark of the *Erith* of Yahwe,' and in Dt. 31:9 (cp. 25 f.) we find a special title given to 'the priests the sons of Levi,' which is derived from this function (cp. Josh. 3:3). For other Deuteronomistic references to the ark, see Dt. 31:25 f., Josh. 8:33, 1 K. 3:15, 6:19, 8:9, 21.

1 Cp. Maspero, *RP* 2:343, n. 2.

2 Cp. 1 S. 6:20. 'And the men of Beth-shehem said, Who is able to stand before Yahwe, this holy God?'

3 See WRS, *Rel. Sem.* 2:37.

4 Kuntze and Kraelzschmar (see 'Literature') hardly seem to hit the mark. We cannot lay any stress on the titles in 1 S. 4:4, 2 S. 6:2, on grounds stated already (above, § 1).

5 Richm. thinks (*III RP* 2, art. 'Bundeslade') that the ark was constructed in such a way as to show the diametrical opposition between the religion of revelation and the religion of nature worship, the presence of Yahwe (symbolised by the cherubim on the ark) being conditional on Israel's performance of its covenant duties.

ARMENIA

semi-mythic stories eschatologically interpreted, it becomes a question whether his interpretation of the name of the great battlefield as meaning 'mountains of Megiddo' is correct. The restoration of the original text offered by a writer in *ZfN* 7:170 [87], *וְגִבְרִית יְהוָה יִגְבְּרוּ* 'I will gather them into his fruitful mountain' (i.e. the mountain-land of Israel), does not give a definite locality, which seems to be required in this context. Nor are the attempted numerical explanations quoted by Spitta (*Opuscul.* 402) more probable. Gunkel, therefore, thinks (*Schoff.* 295) that 'Harmagedon' must be a name of mythic origin, connected in some way with the fortunes of the dragon who is the lineal heir of the Babylonian dragon Tiamat, the personification of chaos and all evil (cp CREATION, § 1). On p. 380 of the same work Zimmern communicates a conjecture of Jensen that *μαργαδων* is identical with *μαργαδων* in the divine name *Ἐρεσκιγὰλ*, the husband of *Ἐρεσκιγὰλ* (= Bab. Ereskigal), the Babylonian goddess of the underworld. See *Rhein. Mus.* 1909, where in a magic formula given by Kuhnert from Greek papyri we read, *θεὸς χθονίους Ἐρεσκιγὰλ καὶ αὐτῆς Ἐρεσκιγὰλ* (see also HADAD-RIMMON). The same two (doubtless Babylonian) names occur on a lead tablet from Alexandria, *Rhein. Mus.* 18503, where the former is given as *Ἐρεσκιγὰλ*. It would be natural that the spot where Tiamat was defeated (and was again to be defeated) by Marduk should be called by a name which included that of a god of the underworld.

F. K. C.

ARMENIA (אַרְמֵינִי), 2 K 19:37-38, 37:34 AV, RV ARARAT.

ARMLET (כַּוְכָבִית, *CHALOKION* [BAFL.], so RV for AV TABLET in Ex 28:29 (ΠΕΡΙΔΕΣΙΝ) [BAFL.], Nu. 31:50. It may be doubted, however, whether the word does not mean an ornament for the neck (so RVing, NECKLACE) — perhaps a necklace consisting of a number of little spheres, cp Ar. *kamzani*, a little ball. See ORNAMENTS.

ARMONI (אַרְמֹנִי, 'Palatium?'; ΕΡΜΩΝΟΙ [B], NIEL [A], ΑΛΙ [L]), a son of Saul sacrificed by David to the vengeance of the Gibeonites (2 S. 21:8 ff.). See RIZPAH. Neither he nor Mephioseth [L], the two sons of Rizpah, is mentioned elsewhere.

ARMOUR, ARMS (בְּרִיחַ), 1 S. 17:54. See BREAST-PLATE, 1. HELMET, GLOVES, SHIELD; and cp WAR, and WEAPONS.

ARMOUR-BEARER (נִשְׂאֵה בְּרִיחַ), which happens to occur only with a suffix, נִשְׂאֵה בְּרִיחַ, Judg. 9:54, etc., or in the constr. st., נִשְׂאֵה כָּל יוֹאָב, 2 S. 23:37 (1 Ch. 11:39). Abimelech, Saul, Joab, all had armour-bearers; Goliath's squire is called a shield-bearer (1 S. 17:7). On the use of armour-bearers, cp WRS, *OT* 10:431; Che, *Heb. Crit.* 77 n. 18, 521; נִשְׂאֵה בְּרִיחַ (EV 'Ye that bear the vessels of the Lord') is taken by most commentators (Aben Ezra, Kimchi, Cheyne formerly) to mean 'armour-bearers of Yahweh'; but this is improbable (see Dr. *ad loc.*).

ARMOURY. In Neh. 3:10 הַנְּשִׂיחַ, 'weapons, armory', (G, ἡ συνάπτοις), and in Jer. 50:25 אוֹצֵר 'treasure, store', are probably contractions for בֵּית הַנְּשִׂיחַ, 'house of weapons', and הַבֵּית הַנְּשִׂיחַ, 'house of treasure' respectively. In Cant. 4:4 'thy neck is like the tower of David builded for an armoury' הַתְּלַפִּיחַ is difficult. Vg. renders it *cum propugnaculi*, while G merely translates (θαλασσῶν [BS]) Ἀρα, [A], and Q² 202, 81 has θαλασσῶν - ἐπὶ ἁλῶν ἢ ἐπὶ ἁλῶν. The meaning 'armoury' has no philological basis (see Del. *ad loc.*), and yet it is the only meaning which suits the context. Cheyne (*Exp. Times*, June '98) supposes corruption of

ARMY

the text and reads לְשִׂמְעֵים for the shields. The neck of the Shulamite is compared to the tower of David adorned with small metal plates — i.e., perhaps to the 'house of the forest of Lebanon' in which were suspended the shields and targets of gold. Fancifully the poet represents these shields as suspended on the outside (cp Ezek. 27:11). Biddle and Siegfried agree in placing the 'tower' at Jerusalem.

ARMY (צְבָא, חֵי, מִצְרָה). The main army of Israel, like that of all primitive nations, and, in the last resort, of all nations, consisted of the whole able-bodied adult male population.

1. General levy. In Nu. 1:1-4 (P), twenty is fixed as the age at which a man became a soldier; but it is not probable that any such regulation was rigidly observed in practice. This general levy constituted the fighting force of Israel in the wilderness, at the time of the settlement and under the 'judges,' and remained its chief military resource throughout its national history. Under the 'judges,' the armies mentioned are, for the most part, the levy of the tribes or clans immediately concerned. On special occasions, however, such as the war against Sisera, and Saul's relief of Jabesh-gilead, all the fighting men of Israel were summoned, and their obedience to the summons was represented as a paramount religious duty.

The armies obtained from such levies varied greatly in number and efficiency; a clan, or even a tribe, whose immediate interests were threatened, would readily take the field in its full strength. An appeal for a general levy of Israel would scarcely ever be more than partially responded to; Deborah (Judg. 5) complains of the absence of Reuben, Gilead, Dan, and Asher; the national leaders sought to prevent such derelictions from duty by the most solemn appeals to religious sanctions. Deborah curses Meroz (Judg. 5:23), and Saul, when a spirit (or impulse) from God came upon him, threatened to cut in pieces the oxen of all recruits (1 S. 11:6).

When armies were required these national or tribal levies were called together by messenger (צִבְיָה, 1 S. 11:7), sound of trumpet (שֹׁפָר, Judg. 6:1), or erection of standard, or other signal (נֵס, Jer. 46, see ENSIGN); when the emergency was over they dispersed to their homes. They were well suited to carry on or repel border forays, but could not maintain prolonged warfare, especially at any distance from their own territory, or even oppose adequate resistance to any formidable invasion. These levies were composed entirely of infantry (2 S. 18:4 to 154); the Israelite territory, in early times, was chiefly hill-country, where cavalry force could neither be formed nor used. The first Israelite who is mentioned as possessing horses is Absalom, 2 S. 15:1 (cp HORSE, § 3).

Such armies were very loosely organised. As Wellhausen (*III* 439 [85]) points out, 'what there was of permanent official authority lay in the hands of the elders and heads of houses';

2. Command. So Abraham leads the expedition to rescue Lot (Gen. 14), and Jair conquers the 'tent villages of Jair' (Nu. 32:41). Similarly, P describes the 'princes' of the tribes as also their captains in war (Nu. 1:4). Deborah (Judg. 5:4 f.) speaks of the princes and leaders of Issachar and other tribes (see GOVERNMENT, § 21). In practice, however, the hereditary heads of tribes and clans were often set aside on account of the ability and self-assertion of other leaders. Indeed, these hereditary heads of houses play a very small part in the actual history, possibly because history emphasises what is exceptional. The 'judges,' whose main function was to head the Israelite armies in special emergencies, were men called by a kind of divine inspiration. Gideon and Saul are not the heads of their tribes or even clans.

ARMY

Gideon's family was 'poor in Manasseh and he was the least in his father's house' (Judg. 6.15), and Saul's family is described in almost identical terms (1 S. 9.21). In the absence of any other widely recognised authority, the priests of the great sanctuaries, and especially of the ark, sometimes assumed the command of armies, when called by ambition or the sense of duty (DUBORAH [7.1], the house of Eli [9.1], SAMUEL [9.1]). When the tribes were partly merged in the kingdoms, and the clans and families were in a measure superseded by the towns and village communities, the levy would naturally follow the new order (Amos 5.1). Probably under the kings the levies did not always assemble by clans, but men were collected by the royal officials from the various districts (cp GOVERNMENT, § 20). In any case, the organisation of the levies was subordinated to that of the standing army, and they were divided into 'thousands,' 'hundreds,' 'fifties,' and 'tens,' institutions which are said by an ancient tradition, Ex. 18.25 (JE), to have originated with Moses.

A second important element of the military strength of Israel, as of all nations at a similar stage of develop-

ment, lay in the personal following of men who made war their occupation. These 'bands' (חֲבִירִים), also used of a division of an army) may be roughly likened to the vassals of feudal chiefs, the 'free companies' of the middle ages, and even to the banditti in unsettled districts. As in the case of England and Scotland, the 'bands' flourished specially on the frontiers; the territory of Israel had a frontier very long in proportion to its area. Such 'bands' could take the field much sooner than a clan-levy, and would be better disciplined and much more expert in warfare. More than once they rendered signal service to the nation. The 'vain fellows' whom that captain of banditti, Jephthah, gathered round him (יְהוֹשָׁפָט, Judg. 11.3) were the kernel of the army which defeated Ammon, and David's following was one chief instrument in the restoration of Israel after Gilead. 1 S. 22.30 gives us a detailed account of the formation, character, and career of such a body (see DAVID, § 4). It was a self-constituted frontier-guard, living on the plunder of the neighbouring tribes and by levying blackmail on their fellow-countrymen, whom they claimed to protect. The warlike services rendered by the 'bands' were accompanied by serious drawbacks. They added to the danger of civil war; they embittered the relations with neighbouring tribes; and they were capable, like David, of taking service with foreigners even against their own countrymen. We do not hear of them after David's time; they would scarcely be tolerated by powerful kings, but were sure to reappear in unsettled times.

As the main function of a king was that of permanent commander-in-chief, a monarchy implied some sort of

4. Army. standing army and permanent military organisation. In time of peace the king kept a bodyguard as the main support of his authority, and this bodyguard formed the nucleus of the army in war (cp GOVERNMENT, § 18). We find Saul 'choosing' 3000 men (1 S. 13.2) and sending the rest of the people to their tents. He did not keep these chosen men as a permanent army, for in 1 S. 24.2 he chooses another 3000 when he wishes to pursue David. Probably he did his best throughout his reign to keep by him a picked force, which was virtually a standing army. He had a permanent commander-in-chief, Abner (חֲבִירִים 1 S. 11.50), and his personal following must have included other permanent military officers (cp GOVERNMENT, § 21). David's band of followers during his exile served as the kernel of a much more complete and extensive military organisation. The office of commander-in-chief remained a permanent institution, and the captains of the host (צְבָאוֹת 2 S. 21.4) also appear as permanent officers. A bodyguard, practically a

ARMY

continuation of David's companions in exile, was formed, and its captain is mentioned as one of the great officers of state (2 S. 8.1: צְבָאוֹת וְצָרִיף וְשָׂרֵי צְבָאוֹת). Now, however, the bodyguard had come to consist of foreign mercenaries ('Cherethites and Pelethites,' probably Philistines (see CHERETHITES, PELETHITES). In 2 S. 15.1 we find 600 Philistines from Gath in David's army; צָרִיף וְשָׂרֵי צְבָאוֹת, however, in a doublet, suggests a reading *gibbionim*, or 'Gibbeon men,' for *gibbim*, or 'statutes'. If the latter is the correct reading, the Gibbeonites may have been either part of the bodyguard, or else an independent band of mercenaries (see DAVID, § 11.11). The Cherethite and Pelethites are not mentioned after the death of David; but the bodyguard of foreign mercenaries must have remained a permanent institution. 1 K. 11.7 speaks of the captains of the guard, literally 'runners' (רָצִיף צְבָאוֹת) that kept the palace gates (cp 2 K. 10.25). 2 K. 11.4 speaks of 'the centurions of the Cherites and of the guards' (רָצִיף צְבָאוֹת וְשָׂרֵי צְבָאוֹת), where the Cherites are possibly identical with the Cherethites. If the reading in 2 S. 23.2 is correct, and if רָצִיף צְבָאוֹת (RV 'chief among the captains'; RV 'chief of the captains') is rightly explained as referring to the third occupant of a chariot (צָרִיף צְבָאוֹת [B.M.], Ex. 11.7 15.4, etc.), it may indicate the use of chariots by David, though it is probably used in its later sense of 'captain' (see CHARIOT, § 10).

With the very doubtful exception of these 'Shalishim,' we have no reference to Israelite chariots and cavalry before the end of David's reign.

According to EV of 2 S. 8.4, he reserved horses for a hundred chariots out of the spoil taken from Hadadizer ben Rehob, king of Zobah; B.M. translates 'reserved for himself a hundred chariots.' Reuss and Kautzsch translate 'a hundred chariot horses.' No reference is made to the use of these chariots or horses in war; moreover, the passage probably belongs to the last editor of Samuel.

Solomon, however, established a force of 1,400 chariots and 12,000 horsemen (1 K. 10.26), and accordingly we find mentioned among his officers 'captains of his chariots and of his horsemen' (צָרִיף צְבָאוֹת וְשָׂרֵי צְבָאוֹת, 1 K. 9.22). Occasional references occur in the later history to Israelite chariots and horsemen (2 K. 8.2 13.7). Probably the armies of Israel and Judah were modelled on the army of Solomon till the end of these monarchies; but their main reliance would be on the infantry. Towards the close of the Jewish monarchy a quasi-religious feeling against the use of chariots and cavalry seems to have arisen, and Dt. 17.16 forbids the king to multiply horses (cp. Dt. 20.1 18.31). The references to the houghing of horses by Joshua (Josh. 11.6) and David (2 S. 8.4) are probably due to a Deuteronomie redactor.

Nothing is said about paying soldiers. In earlier times the Israelites who formed the national levy would

5. Maintenance. find their own weapons and provisions, the latter being often obtained from the enemy by plunder or from friends by gift or exaction. Probably throughout the history the general levy was mostly provided for in this way; though, as the royal government became more powerful and more completely organised, it may have done something towards feeding and arming these levies (see GOVERNMENT, § 20).

The bodyguard and the rest of the standing army, including the charioteers and cavalry, stood on a different footing. They were maintained by the government (1 K. 1.7), chariot cities being assigned as a provision for the chariots and cavalry. They were probably paid; certainly the foreigners in the bodyguard did not serve for nothing. The plunder taken from enemies would be an important part of the remuneration of the soldiers, and a principle of division between the actual combatants and the reserve is laid down in 1 S. 30.24. The rules as to exemption from military service in

ARMY

Dt. 20 are probably an ideal based on traditional public opinion.

No reliance can be placed on the numbers which are given for Israelite armies. At the same time, the two kingdoms seem to have been populous in prosperous times, and a general levy of able-bodied adults may sometimes have attained very large dimensions.

Under powerful kings the Israelite armies were strengthened by the auxiliary forces of subject allies—e.g., Edom (2 K. 31). Doubtless such assistance was sometimes purchased, after the manner of the narrative in 2 Ch. 25.

The details as to the Levites in the account of the deposition of Athaliah in 2 Ch. 23 (cp. 2 K. 11) were probably suggested by the institutions of the Chronicler's own time (c. 300 B.C.).

6. Levitical guard.

These details seem to show that the Levitical guard of the Temple was then in existence. As this guard is not provided for in the Priestly Code, it was probably formed after the time of Ezra. Possibly the *προστάτης τοῦ λευοῦ* [VA] in 2 Mace. 34 may have been the captain of this guard. If so, however, it is difficult to suppose that the present text is correct in ascribing him to the tribe of Benjamin (see, however, BENJAMIN, § 7 end). The captain of this guard, under the title of *στρατηγός*, is mentioned by Josephus in his account of the time of Claudius Caesar (*Ant.* x. 62), and of the destruction of the Temple (*J.* vi. 53), and in Lk. 22.42 and Acts 1.5426. Probably the officers, *ἐπημεταί*, who assisted in the arrest of Jesus (*Jn.* 18.3, cp. 7.45) belonged to this body.

In the post-exilic period, under the suzerainty of the Persians, and of the Greek kings of Egypt and Syria, the Jews could scarcely be said to have an army. The Book of Nehemiah

clearly shows that they had to trust to their own energy and courage for protection against hostile neighbours; but they fought as a city militia rather than as a peasant levy.

The revolt of the Maccabees made Judaea a military power. The long wars not only habituated the bulk of the people to arms, but also produced a standing army, which soon included many foreign mercenaries. Jewish soldiers also received pay (1 Mace. 14.22), probably, however, only picked bands that formed the standing army and ranked with the other mercenaries. Josephus (*J.* 25) tells us that Hyrcanus I. (135-107 B.C.) was the first Jew who maintained foreign mercenaries (*ἐξωτερικοὶ*). Alexander Jannaeus (106-79 B.C.) employed Padian and Cilician mercenaries, and at one time was at the head of a mercenary army of 1000 horse and 8000 foot, in addition to 10,000 Jews. These mercenaries are styled 'Greeks' (*J.* i. 135, cp. 54). As the Jews had long been subjects of the Greek kings of Egypt and Syria, their armies would be equipped and disciplined after the Greek fashion.

When the East fell under the supremacy of Rome, the Herods, as clients of Rome, formed their armies on the Roman model. Indeed, Herod the Great was at times in command of Roman forces, and Jewish and mercenary 'cohorts' (*σπεῖραι*) are spoken of as fighting side by side with the Romans (*J.* i. 156-162). Herod's army consisted largely of mercenaries drawn chiefly from the Teutonic subjects and neighbours of the empire—Thracians, Germans, and Gauls (*J.* i. 339).

The insurgent armies in the Jewish war were very heterogeneous. The national government appointed military commanders for the various districts, among whom was Josephus. He tells us that he organised an army of 100,000 on the Roman model, including 1500 mercenaries, a body-guard of 600, but only 250 horsemen; a typical Hebrew army in its constitution. The garrison of Jerusalem is said to have consisted of 23,400 men, including Idumaeans and bands of Zealots. They seem to have possessed some organisation and dis-

ARNAN

cipline, but were divided into adverse factions (*J.* v. 61).

The armies of the other states of Syria did not differ essentially from those of Israel. From the first, however, they made use of chariots and cavalry, and throughout the history, except during the reign of Solomon, the Syrians

were superior to the Israelites in these arms (*Josh.* 11.4-17.16 *Judg.* 1.10-4.7 *1 S.* 13.5 *2 S.* 8.4 *1 K.* 20.1-25 *22.31*, etc.). On the other hand, the great military empires of Egypt, Assyria, and Babylon possessed a much more extensive and effective military organisation. They had corps of chariots, light-armed and heavy-armed cavalry and infantry, together with archers and slingers and engineers. Their armies included large forces of mercenaries and tributaries. For military purposes these great empires stood to the Syrian kingdoms in about the same relation as that of a first-class European power to the smaller Asiatic states.

It is not necessary to notice the Persian army, and of the armies of the Ptolemies and Seleucides we need say only that they were modelled on the Macedonian armies of Philip and Alexander, with some modifications due to Oriental influences. For example, they employed elephants (*1 Mace.* 1.17, etc.).

The Roman army is incidentally alluded to in the NT. The legion (*Mt.* 26.53 *Mk.* 5.9-15 *Lk.* 8.29) varied considerably at different times in numbers and in constitution; during the early empire it was a composite force, consisting

10. Roman army.

of about 6000 legionary infantry, together with cavalry, light-armed auxiliaries, and military engines. The legionary infantry, or legion proper, were divided into ten cohorts. The 'band' (*σπεῖρα*) which took Jesus (*Mt.* 27.27 *Mk.* 15.16 *Jn.* 18.13) was probably a cohort (so RV¹⁸⁸¹) forming the Roman garrison in Jerusalem. The same cohort is mentioned in Acts 21.1. In Acts 10.1 we read of the Italian band, and in 27.1 of the Augustan band. The Italian band may have been an independent cohort of Italian volunteers (*Schür.* *OT* 1.366). The 'Augustan band' (*σπεῖρα Σεβαστεῖος*) may have been part of the Sebasteia—i.e., Samaritan auxiliaries, who, according to Josephus (*Ant.* x. 87), formed a large part of the Roman garrison of Palestine. The name might be, and doubtless was, understood as 'Augustan' as well as 'Sebasteia' (the title 'Augustan' was borne by some of the Roman legions). See further, CORNELIUS, § 1. The officers of the legion were the tribunes and centurions. Six tribunes were attached to a legion and were associated in command. We frequently find a tribune holding independent command of a cohort or larger force; the 'chief captain' (*Jn.* 18.12 *Acts* 21.25), *καταρχος*, commanding the cohort at Jerusalem was a tribune. Each cohort contained ten centuries or bodies nominally consisting of a hundred men; these were commanded by centurions. As the independent cohorts were organised on the model of the legions, it is probable that the cohorts, tribunes, and centurions of the NT belonged to the auxiliary forces. Mommsen says of the Roman garrison in Palestine that it consisted, as elsewhere in provinces of the second rank, of a moderate number of cavalry and infantry divisions, in this case of Samaritans and Syrian Greeks—subsequently one ala and five cohorts or about 3000 men. The province, therefore, did not receive a legionary garrison. A small force under a Roman commandant occupied the citadel at Jerusalem. During the time of the Passover this was reinforced by stationing a stronger division of Roman soldiers in one of the temple buildings (*Proc. Rom. Emp.*, ET, 2.130).

W. H. B.

ARNA (*ARNA*) b. Ozias, in the genealogy of Ezra (4 *Esd.* 12), apparently = ZERATHAN in Ezra 7.4

ARNAN (אַרְנָן; אֲרָנָא [BA], אֲרָנֹון [L]). According to MT of 1 Ch. 3.4, the 'sons of Arnan' occur in the

ARNI

genealogy of Zerubbabel. **Q**, Vg. and Syr., however, make Arnan the son of Replath. The name might mean 'noisy'; but ארנן elsewhere, as a personal name, being corrupt (see ARNAN), and the names of the other descendants of Hananiah (see RV) being compounded with -nah, it seems plausible to correct to ארני (Arni), which may have been abbreviated ארנ (Arn) (whence, by corruption, ארנן or ארנן). T. K. C.

ARNI (ארני) [Heb. after NBLXI], Lk. 3:3; RV, is the reading to be preferred to AV ARAM. See RAM, 1.

ARNON (ארנון), Nu. 21:1; see MOAB.

AROD (ארוד, ארודי [U], ארודא [C], [B⁹AE], ארודא [L], Nu. 25:17 = Gen. 46:19, **Arodi** (ארודי, ארודיח [A], אגאריח [U], ארודיח [L], for which the gentilic form **AR** in Nu. 25:17 has **Aredite**. A name in genealogy of GAD (Gen. 46:19). Cp. ARKEL.

AROER (ערוער, ערוער, in Judg. 11:5 שרעויר; *i.e.*, 'bushes of dwarf juniper' [Lag. *Semit.* 1:30]; ארוער [BAL]; gentilic **Aroerite**, ערוערי, see HORTHAM, 2).

1. A city 'on the edge of the torrent-valley of Arnon,' see MOAB (Dt. 2:36 etc.); cp. *OS* 2:12 (86:12, *ἐπ' ὄρους τοῦ ὄρους, in vertice montis*); the descriptions agree with the position of the ruins of 'Ar'ir, on the edge of the precipitous N. bank of the ravine of the Arnon (Barekhardt, *Syria*, 37:2; Tristram, *Moab*, 129-131). The spot is about 11 m. from the mouth of that river. Aroer marked the S. limit of the Remenite territory and of the Israelitish possessions eastward of the Jordan, Nu. 32:33; Dt. 2:36-37; Josh. 12:1 (ארוער [B], 13:16 2 S. 24:5 (ארוער [B], 2 K. 10:33; cp. Judg. 11:5 (ארוער [A], om. L); 1 Ch. 5:8. In Jer. 48:16 (post-exilic) and in the inscription of Moshai (l. 29, ערוער) it appears as Moabish. The Moabites had in fact possessed it before the Israelites, in succession to the Amorites (cp. Nu. 21:29). That Aroer on the Arnon is meant in 2 S. 24:5 is now generally admitted (see Dr. *TBS* 285 f.). The expression 'the cities of Aroer' in Is. 17:2 is geographically difficult; there is no doubt a corruption of the text (see C and cp. *SLOT*).

2. A place E. of Rabbath-Ammon, Josh. 13:25 (ארארא [B], ארארא [A] Jud. 11:14; not identified. Jer. 49:29 96:5) says it was on a mountain 20 R. m. N. from Jerusalem.

3. A place in the far south of Judah, 1 S. 30:3 (mentioned after Jattir), and probably Josh. 15:2 (mentioned after Dimnah). Identified by Rob. with the ruins of 'Ar'ara, 3 hrs. ESE. from Beersheba. (The *ארארא* of *Q* is, in 1 S. is perhaps from *ארארא*; see ADADAH.) T. K. C.

AROM (ארום [BA]), 1 Esd. 5:16. See HATHUM.

ARPACHSHAD (ארפכשד), Gen. 10:22 RV; see below, ARPHAXAD, 1.

ARPAD, AV twice (in Is.) **Arphad** (ארפד, ארפדא [BAL], ארפדא, Ass. *Arpadda*, 2 K. 18:4 (ארפדא [B], ארפד [A], 19:1 (ארפד [B]), Is. 10:9 (not in *Q*), 36:19 and 37:33 (ארפד [B⁹AD (Q)], Jer. 49:23 (ארפד [A], ארפד [S*]). Of these passages Is. 10:9 is the most important, because we can unambiguously fix its date and authorship. Isaiah, writing in 711 B.C., makes the Assyrian king refer to the recent capture of Hamath and Arpad (reckoned by the Assyrians to Hatti-Land) as a warning to Jerusalem. Arpad had been frequently captured by the early Assyrian kings, but was finally subjugated and Assyrianised by Tiglath-pileser III. in 740. From this time it takes its place among the Eponym cities. Its importance probably lay in its command of a Euphrates ford, though it was not on that river. We find that a city Nibiru ('the ford') was reckoned to belong to the governor of Arpad. Arpad is now *Tell-Rifai*, 13 m. from Aleppo to NW. C. B. W. J.

1 'Aroer' is an Arabising 'broken plural' of *'ar'ār*, 'dwarf juniper,' a plant which abounds in rocky localities (see HATHUM).

ARPHAXAD

ARPHAXAD, RV *Arpachshad* (ארפכשד; ארפכשדא [BAL]; -Δηκ [Jos.], the third son of Shem, Gen. 10:22-24; cp. Gen. 11:10-11 (all P), 1 Ch. 1:17 f. (*Q*) omits these two) 24. The name has been much discussed.

Hochart and many after him (e.g. Luzzatto, Kautzsch in *HWB*, and N. S. Zohar, *ibid.* 1:2 f.; *Menorah*, *ibid.* 20) identify it with the Arpachlitis of Ptolemy (vi. 12), a region on the Upper Zab, NE. from Nineveh. On this theory, however, *Arpachshad* (as we can hardly write it) would have to be the Arpachlitis (as we can hardly write it), on the other hand, long ago identified Arpachshad with the Chaldeans (Gen. 10:9), and Ges. (*ibid.*, *Sch.* 6:1 f.; 1 Ch. 1:17, Sayce (*ibid.*, *Men.* 147), adopting this view, treated the *ארפכשד* as compounded of an assumed noun *ארפכ*, 'boundary' (Ar. *arfa*), and *שד* = *שדן*, 'Chaldean'.

Two things at least are certain; we cannot dispense with Babylonia in this context, and in Gen. 11:27 Arpachshad is represented as the source of the Tenthite family to which Abraham belonged. The latter part of the name *ארפכשד* must, therefore, be *שדן* = *שדן*, Chaldean. It is equally clear, however, that the Assyrian province of Arbaha (which may, or may not, be the Arpachlitis of Ptolemy) would be very appropriately introduced after Ashur, and that, apart from the last syllable (*shad*), Arpachshad has received from the earlier writers no explanation that is even plausible, except that of Hochart and Noldeke.

Putting these facts together, the present writer suggested (*ibid.*, Feb. 1897, pp. 145 ff.) the following theory. Arpachshad, or at least *ארפכשד*, is really not one word but two words. Arpach (*ארפכ*) and Chesed (*שדן*). The former is the Heb. name of the Assyrian province of Arbaha or (*KB* 2:2 f.) Arabaha, which, according to Winckler, is not Arpachlitis, but a district N. of the Tigris, S. of the Median Mountains, and W. of Elam. The latter is Chaldean (see CHALDEAN, Gen. 10:9), therefore, upon this theory, originally ran, 'The sons of Shem; Elam and Ashur and Arpach' = Chesed and Land and Aram. Verse 24, as E. Meyer and Dillmann agree, is an editorial interpolation (cp. 11:27 ff.). The form Arpachshad in 11:27 ff. will be due to the editor, who misunderstood *ארפכשד* in 10:22, and it will not be too bold to restore *ארפכ* = *ארפכ*, Chesed. The alternative² is to suppose the original reading to have been *ארפכשד* = *ארפכ*, Arpach Chesed, which the scribe, through an error of the ear, changed into Arpach Chesed (*ארפכשד*).

Hommel, however (*ibid.*, 17th Oct. 1896; *MTT* 212, 264-268), prefers to explain the word as Arpachshad, an 'Egyptian variant' for the Heb. Ur-kasdim, *ur* being taken as the Egyptian article; he compares the old (?) Egyptian-Helwan name Putel, and the Semitic-Egyptian *putel-ur-kasdim* (WM. *ibid.*, *ibid.* 304). If only we had sure evidence that there was an Egyptian mania in early Palestine similar to the Semitic mania of the Egyptians of the Middle Empire, and could also think that P had access to records of extreme antiquity, fairly accurately preserved, this explanation would at once become plausible. A comprehensive study of the names in P, however, does not compel us, indeed it scarcely permits us, to make the second of these assumptions. PUTHEL (*putel*) is distinctly an artificial name, and if Arpachshad should really be read Ur-kasdim we should on this analogy be inclined to regard it as artificial too. In it, if a reference to Ur-kasdim would no doubt be admissible, since this place or district is referred to by P (11:27) as well as by J₂. It is chiefly the presence of *ur* in *ארפכשד* that

¹ Prof. Jensen informs the writer that he has independently formed the same opinion as to the origin of Arpachshad, but that he prefers to identify Arpach with Arpachlitis (mod. *Arpach*). This view has occurred to the writer also.

² The transition from *ur* (Arbaha) to *ur* in *ארפכשד* has not then to be accounted for. On the former theory, the Priestly Writer, who was not indebted either to a cuneiform record or to a Babylonian informant, received the name in a slightly incorrect form, the final *h* having been softened in pronunciation to *ch*.

ARROW

prevents us from reading Ur-Gasdm (written אר קסד) in Gen. 10:22 between Asshur and Lud.

The name given in Isai. i. to the king of Media who was formerly identified with Deioces the founder of Ecbatana, or with Phraortes, his son. The name, however, has been borrowed to give an air of antiquity to the narrative, and, as in the cases of Hecataeus, and others in this book, stands for some more modern personage, probably Mithradates. See Isai. ii. 10, 11.

ARROW, see WEAPONS, DIVINATION, § 2111.

ARROWSNAKE in Gen. 49:17 אֲרֻנָּה [עֲרֻנָּה] (epitaphos, ΕΡΚΑΘΗΜΕΝΟΣ [ΕΡΑΔΗ]) (see SERPENT, § 1, no. 10), and in Is. 31:4 קֶשֶׁן [קֶשֶׁן] (ΕΙΧΙΝΟΣ [ΕΙΧΙΝΟΣ]), AV GRV AT OWL (q.v.), 21; see SERPENT, § 1, no. 5.

ARSACES (ΑΡΣΑΚΗΣ [AR. -σακ Nonce V]), 'king of Persia and Media, by whom Demetrius Nicator (Dimitrios [2]) was defeated, and made a prisoner in Mace. 11:2 f. 15:22. See PERSIA.

ARSARETH, RV ARZARETH (so Lat. *arsareth*, also *arsareth*, *arsary*; AV^{mg} ARARATH) אֲרָרָת (cp Dt. 2:27 [28] Jer. 22:30) 'the other hand,' 'the region, a journey of one year and a half beyond the Euphrates, where the exiled tribes were supposed to be settled (q. v. 13:45); cp 7:43. This belief in the 'Lost Tribes' is found already in Jos. 4:12, vi. 5, 23.

ARSIPHURITH (ΑΡΣΙΦΟΥΡΙΘ [BA]), 1 Esd. 5:16, RV; see JOKAII.

ARTAXERXES (אַרְתַּחְשֶׁרֶשׁ, Ezra 4:7, or אֲרֻחְשֶׁרֶשׁ, Ezra 4:7b, or אֲרֻחְשֶׁרֶשׁ, Ezra 4:7c 17:14 St. Neh. 2:1 5:14 13:6, Baer's text; ΑΡΤΑΞΕΡΞΗΣ [B]; ΑΡΘΑΞΕΡΞΗΣ [A]; ΑΡΤΑΞΕΡΞΗΣ [N^o 1] splendour and dignity—men of Arvad, he says, rowed its ships (1 K 10) and named its walls (1 K 11) and likewise mentioned (1 K 10), the only Syrian place named in the list of nineteen places in 1 Macc 15:22 (see MACE 10:18, 15:22, § 30). Arvad was the most northerly of the great Phoenician cities, antecessor, with Sidon and Tyre, of Tripoli, which lies some thirty miles farther south.

Built on an island (*la habal t. amir*, K 41:108, l. 26 f.), about half a mile long N. to S., and a little over a quarter of a mile broad, lying slightly less than two miles from the mainland, it dared to resist Thutmose III, when apparently most of the other Phoenician cities yielded without notice (see his Annals in Briggs, *Hist. of Egypt*, 1:11, 296 f.); and Tiglath-pileser I. tells how he embarked on ships of Arvad and sailed on the Euxine Sea. It was still independent in the ninth century B.C., and in the time of Sargon II and Tyre and Gebal were the really important Phoenician centres. (Cp also ASUR-RAVI-EM, § 4, end.)

In the days of Ezekiel it was subordinate to Tyre; but in the Persian age it regained its ancient importance, and in the time of Alexander exercised control over quite an extensive district on the mainland.

In the first half of the second millennium B.C. there must have been more equality between the Arvadites of the mainland and those on the island, if W. Max Müller is right in believing that the Egyptian name corresponds to a plural form *arwz*. The ruins of the gigantic wall that once surrounded the island on three sides (see Pictorial, as below, and esp. Renan, *Pl. n. 7*) prove that the Arvadites knew other things besides rowing. Euseb. *Chron.*, *Armenia*, ed. Anheir, 2:172, records that Arvad was founded in 700 B.C., and Strabo (xvi, 2:137) states, although only with a *causa*, that it was founded by fugitives from Sidon. We cannot, of course, assign to the eighth century the real founding of Arvad or even what Dillmann (art. Gen. 10:12) seems to suggest. The founding of the smaller town distinguished from a settlement on the mainland (cp the later Antaradus, mod. Tartus [see Euseb., above]). The words of Assyriologists quoted above (cp *AT* 25:2-22) preclude this. The Egyptian inscriptions show that in the second millennium B.C. Arvad was one of the most important Phoenician cities (see *Encyclop.*).

Literature: Strabo (*Geog.*); Ptolemy (*Geog.*); Renan, *Arvad*, 40; WMM, *Ar. n. Eur.*, 156 f.; *COF* 1:27 ff.; Renan, *Arvad*, 40; *Ar. n. Eur.*, 156 f.; G. J. Chester, *Suez, West, East, Suez, Suez*, 75-78; see further ref. in Vigouroux; a map of island in Admiralty Charts No. 2765, or W. Allen, *The Dead Sea*, 1, end.

ARZA (אֲרָצָה: אֲרָצָה [B], אֲרָצָה [V], אֲרָצָה [L]). King Baasha's prefect of the palace at Tirzah, and doubtless Zimri's accomplice in the assassination of the king (1 K 16:11), see ZIMRI. The form of the name appears to be somewhat uncertain.

ARZARETH (אַרְזָרֶתְחִי, 4 Esd. 13:45, RV; AV ARSARETH).

ASA (אָסָה, § 51 אֲסָה [BAL],² perhaps short for אֲסָהִי, i.e., 'Yahweh healeth'; cp Aram. and Ar. *asā*, 'to heal'; Ass. *asān*, 'a physician'; a title applied to the god [cp Del., *Is. II/77*]; the name may express a pious wish that Yahweh would heal; i.e., restore prosperity to—his people; cp Hos. 7:11 f.).

c. Son of Abijah and third king of Judah (first half of 9th cent. B.C.; see CHRONOLOGY, § 32). Of Asa's long reign but one event is handed down to us on the best authority (1 K 15:16-22), and it speaks in favour of the royal annals that they have not buried such an action of the reigning king in oblivion. The subject of the narrative is nothing less than the purchase by Asa of help from the king of Damascus against Judah's northern brethren. All the silver and gold that was still to be found in the royal treasury, Asa, we are told, sent to Benhadad, king of Aram, to bribe him to transfer his covenant of friendship from Israel to Judah. Thus it was to Judah that the first Aramæan invasion of Israel was due, and we can believe the statement of the Chronicler that Asa's conduct did not pass without prophetic rebuke (2 Ch. 16:7-9) on the details no stress can be laid. The situation of Asa was, it is true, difficult. By pushing his frontier to Ramah, Baasha threatened to

reduce the kingdom of Judah to vassalage, for Ramah was only 4 m. from Jerusalem. The diversion caused by the Aramæan invasion removed this danger. Asa summoned 'all Judah' to the task of pulling down the fortifications erected by Baasha at Ramah, and with the material fortified Geba and Mizpah, the one a little to the NE. the other to the SW., of Ramah. It is quite another writer who tells us that Asa 'did then which was right in the eyes of Yahweh, like David his father' (1 K 15:11). To the Deuteronomistic compiler matters affecting the cultus were more important than was political morality; a later writer, the Chronicler, has a much more complete justification of it (it was but trustworthy for his religious eulogy of Asa). The details of 1 K 15:12-24 are dealt with elsewhere (see BAASHA, BENHADAD, § 2 (1), etc.).

Three other points alone, in the compiler's own statements, need to be referred to. The name of Asa's mother is given (1 K 15:1) as 'Maacah' (מַאכָה), and she is called the daughter of Meshalem, whilst in 2:2 Maacah is the name of the mother of Abijah. Most probably 'Meshalem' in 2:2 is a mistake for 'Uriel' (see 2 Ch. 13:2); but it is not altogether impossible to hold with Wellhausen that Abijah and Asa were brothers (cp MAACAH, n. 4).

The second point is that in his old age, according to the compiler, Asa had a disease in his feet (1 K 15:23). The Chronicler accepts this (doubtless traditional) statement, but gives it a new colour, partly by changing the date of the war between Asa and Baasha (cp CHRONICLES, § 8, and WRS, *OTJ* 197), partly by the remark (cp MOUTRIEN) that 'he sought, not to Yahweh, but to the physicians' (2 Ch. 16:12). Whether the assumption that there was a class of physicians who treated diseases from a non-religious point of view is just or not may be questioned.

The third point is a tantalising mention (1 K 15:14) of 'all Asa's warlike deeds' (כָּל מַעֲשֵׂי מִלְחָמָה). Is this, as Klostermann supposes, an allusion to the victory over that Cushite king, who, according to 2 Ch. 14:6-15, invaded Judah with a huge force, and came as far as Maresah (see ZERAH, § 2)? Or does not the compiler make the most of the achievements to which Asa, it is probable, could legitimately lay claim (cp 1 K. 15:23), not always with much benefit to his reputation?

2. Father of BERECHIAH, 2; 1 Ch. 9:16 (אֲסָה [B]); omitted in Neh. 11:17.

ASADIAS (אַסַּדְיָהוּ [B] אֲסַדְיָהוּ [A], *asadi*), an ancestor of Banihabbar, 10; cp. HASABIAH.

ASAEI (Tob. 11, אֲסַיָּה [BNA]; Itala, *Asahel*; Eth. *Asahel*; Heb. versions אֲסַיָּה, אֲסַיָּה, a name occurring in the genealogy in Tob. 11. The genealogy is omitted by the Aram. version, but given in a very regular form in the Heb. text, Neubauer, *Itala*, and S. The Greek texts, however, mark off Asahel from the other names by saying *ἐκ τοῦ σπέρματος* 'Asahel', a distinction preserved in Vg. 'ex tribu et civitate Nephthali', though the word 'Asahel' is omitted. They are, therefore, probably right also in their orthography, since, according to Gen. 16:24 Nu. 26:4 [A], etc., אֲסַיָּה is a Naphtalite (see JAHZIEL). If this is so the name is אֲסַיָּה.

ASAHIEL (אֲסַחִיָּהוּ, § 31; אֲסַחִיָּהוּ [BNA]; acc. [L], but 1 Ch. 11:20 as in B); אֲסַחִיָּהוּ Jos. 1, youngest (22 S. 21) son of Zerah David's sister, and brother of Joab and Abishai. He was renowned for his lightness of foot (*ib.*). As in the case of his unfortunate cousin, almost all we know of him is the story (2 S. 21:25) of his death at the reluctant hands of Abner (7:7). 'There lacked of David's servants but unquiet men and Asahel' (7:30); such is the statement of David's loss in the battle of Gibeon. With this special mention agree the fact that his name stands first in the list of the 'thirty' heroes in 2 S. 23 and 1 Ch. 11 (but cp AMASAI). It is true, another account is given in the new version of the battle of

¹ It has been supposed (e.g. Ges. *Thes.*) that the name Arvad means 'Refuge'.

² Mr. Burkitt argues that *Arabah*, *Asaph*, 'was once the rendering of the LXX' for *Asa*, as *ασαφ* is for *אסא* Sira (*Cambridge University Reporter*, March 1877, p. 609 f.). Cp. ASAPH, 4.

ASAHIAH

heroes in 1 Ch. 27 (v. 7), where we find Asahel commander of a division of David's army. The incompleteness of this statement with his death before David became king of Israel was obvious. The present text, accordingly, adds 'and Zebadiah his son after him, for which (B) has 'son and of Adadapha, to which (C) adds *δυναστεύοντες*.

2. An itinerant Levitical teacher temp. Jehoshaphat, 2 Ch. 17 (17:17) (B.V.) Azara (L.).

3. A 'corcor of chambers in the temple temp. Hezekiah (2 Ch. 31:1).

4. Father or ancestor of JONATHAN (L.), temp. Ezra, Ezra 10:11 (A) (B), temp. (R.), R.V. as in (1) 1 Esd. 9:14, Azara (A) (B).

ASAHIAH (אֲסַחִיָּה), 2 K. 22:14 (L.), RV ASAHIAH, 2.

ASAIAH (אֲסַיָּה), § 31, 'Yahwe bath made'; אֲסַיָּה (BAL.).

1. One of the Simeonite chieftains who dispossessed the Meninim (see RV), 1 Ch. 4:11 (A) (B).

2. King's servant, to Josiah, 2 K. 22:12, AV ASAHIAH (אֲסַיָּה) (M.), אֲסַיָּה (L.), 14 (אֲסַיָּה) (B.V.) אֲסַיָּה (L.) 2 Ch. 31:10 (A) (B), אֲסַיָּה (L.).

3. A Merarite family, 1 Ch. 6:35 (L.) (A) (B), 156 (A) (B), אֲסַיָּה (L.), 11 (אֲסַיָּה) (L.).

4. A Shilohite family, 1 Ch. 9:3 (A) (B), probably same as (3), but cp Macc. 1:1, 13 (Neh. 11:2).

ASANA (אֲסָנָה) (B), 1 Esd. 5:1 = Ezra 2:50, ASANAH.

ASAPH (אֲסַפִּי), an abbreviated name, § 50, אֲסַפִּי (BAL.).

1. The father of Joah, the recorder, 2 K. 18:18 (אֲסַפִּי) (B.V.), אֲסַפִּי וְיֹאחָז (L.), 37 (אֲסַפִּי) (B) = Is. 36:1, but (C) suggests the reading 'Shaphat' or 'Shaphat'.

2. The keeper of the royal 'paradise' or forest (probably in Palestine), Neh. 2:3 (אֲסַפִּי) (L.), אֲסַפִּי (L.).

3. The eponym of the Asaphite guild of singers, Ezra 2:43 (L.), Neh. 7:41 (L.) (only R.V. in (C) 22 (אֲסַפִּי) (B.V.) 1 Ch. 25:1, and elsewhere, who is represented by the Chronicler as a seer (2 Ch. 29:30) and as a contemporary of David and Solomon, and chief of the singers of his time, Neh. 12:46 1 Ch. 15:17 (A) (B) 16:5 (אֲסַפִּי) (L.) 2 Ch. 5:12, etc. On the later equation of Asaph with the Ar. Lokman and Gk. Esop, cp *Story of Asaph*, xxvii, f. Complicated as the history of these guilds is, we are able to see from Ezra 2:41 that at one time the terms 'b'ne Asaph' and 'singers' were identical, and that the singers were kept distinct from the Levites. The guilds of the b'ne Asaph and b'ne Korah were the two hereditary choirs that superintended the musical services of the temple. They do not seem to have been very prominent before the Exile. More important, however, was the triple division. This comprised the three great names of Asaph, Heman, and Ethan (or Jeduthun), which were reckoned to the three Levitical houses of Gershon, Kohath, and Merari (1 Ch. 6:1; see PSALMS). A still older attempt to incorporate the name among the Levites may, according to WRS, *OTC* 204, n. 1, be seen perhaps in the occurrence of the name ANTASAPH (q.v.), the eponym of the Asaphite guild; a clear example may be seen in Neh. 12:4 where Hashabiah, Sherebiah, and Jeshua, the chiefs of the Levites, are appointed to praise. Similarly, in Neh. 11:17 three singers are mentioned: Mattaniah, Abda, and Bakbukiah. Mattaniah and Abda are descendants of Asaph and Jeduthun. 'Bakbuk' we should correct to 'Bukkiath', a son of Heman. Thus, each of the three great guilds finds its representative. See EPHRAIM, 2, HEMAN, JEDUTHUN.

The name Asaph occurs in the titles of certain Psalms (see PSALMS).

4. The best supported reading in Mt. 17 (אֲסַפִּי) (L. WH.), cp RV¹⁹⁰²; on this reading see ASA, footnote).

1 In 2 Ch. 31:15 (B.V.) has אֲסַפִּי for אֲסַפִּי.

2 In 1 Ch. 26:1 (B) reads אֲסַפִּי, which corresponds very nearly to 1 Ch. 26:1 (C) אֲסַפִּי. In 2 Ch. 29:13 (B) reads אֲסַפִּי.

ASCENT OF THE CORNER

where TR and EV have Asa. See GENERALITIES OF JESUS, § 2 b.

ASARA (אַסָּרָה) (B.V.), 1 Esd. 5:1 RV; AV AZARA.

ASARAMEL, a name occurring in the inscription set up in honour of Simon the Maccabee (1 Macc. 14:21). The writing begins as follows: 'On the 18th day of Ithul in the 172nd year, this is the third year of Simon the high priest *εὐσπαρευ* (A) (B), whence AV SARAMEL, *εὐσπαρευ* (B.V.), *εὐσπαρευ* (L.) in a great congregation etc. It has long been recognised that this expression is a transliteration of some Hebrew word which stood in the original, as is the case with the difficult *εὐσπαρευ* in the title of this book (see MACCABEES, FIRST, § 11). By some it is taken to represent a place, e.g., it might be a corruption of Jerusalem (Castellon) or to represent the Heb. אֲסָרָה, 'the court of the people of God' (L.), the great court of the temple (Kell); cp Lw. *Ges. d. H.* 1412) or אֲסָרָה, the court of Millo (Grotius), or אֲסָרָה, 'the gate of the people of God'. It is better, however, to see in this expression an honorary title. From 1 Macc. 13:42 we see that contracts were dated from the first year of Simon 'the great high priest, and captain and leader of the Jews' (cp the titles given him in 11:47 and 15:1), and it seems natural that in an inscription written in honour of Simon we should find more than the simple title 'high priest.' (cp the Pesh. אֲסָרָה, 'leader for "great one" in Israel'). Hence Asaramel is taken by many (Wernsdorf, Scholz, Grünm, Zuckler, etc.) to represent אֲסָרָה, 'prince of the people of God.' The great difficulty would then be in the presence of the preposition *εὐ*. This, however, may have been inserted by a copyist who supposed that the word was the name of a place not of a person. Possibly *εὐ* is an integral part of the word, and we should read אֲסָרָה, 'the sprout (cp Is. 11:1) of the people of God, or better, אֲסָרָה, 'protector of the people of God' (cp 7:47).

ASAREEL, or, better, RV Asarel (אֲסָרְאֵל, § 67; cp אֲסָרְאֵל, and see ALAN, § 4, n. 5; אֲסָרְאֵל (B), *εὐ*, [A] אֲסָרְאֵל, [L] which adds *καὶ ὠρα* (L.), 'son' of (the unknown) Jehaleleel (1 Ch. 4:10) and 'brother' of Zipp (q.v.), 2), Ziphah and Tina.

ASARELAH (אֲסָרְאֵלָה) (B.V. Ginsb.), § 73; cp אֲסָרְאֵלָה; אֲסָרְאֵלָה (B), אֲסָרְאֵלָה (L.), 'son of Asaph' 1 Ch. 25:2; called Jesarelah, EV JESHARELAU (אֲסָרְאֵלָה); אֲסָרְאֵלָה (L.) in 7:14.

ASBACAPHATH (אַסְבַּאֲכַפָּאֶת) (L.), in Pesh. the name is אֲסַפִּי (L.), 1 Esd. 5:60 RV¹⁹⁰², AV (16:11) **Asbazareth**, RV **Asbasareth** (אַסְבַּאֲכַפָּאֶת) (L.), the name answering in 1 Esd. 5:60 to the Esarhaddon of 1 Esd. 4:2 (which is reproduced by (C), *αχσορδαν*). The right reading is *ασβαφαθ*, which represents אֲסַפִּי. This is evidently an alternative to the reading אֲסַפִּי of Ezra 1:6, and it suggests that the writer of the gloss in Ezra 1:6 (see 'Ezra' in *SBOT*) found, not אֲסַפִּי, but אֲסַפִּי in his text of Ezra 1:2. So Marq. (*Fund.* 56); but, in connection with the difficult theory that the name originally given in Ezra 1:2 was אֲסַפִּי = אֲסַפִּי, Sargon; see ASAPHAR.

ASCALON (אַסְכַּלֹּן), 1 Macc. 10:36, etc., RV ASIKELON (q.v.).

ASCENT OF THE CORNER (עֲלִיַּת הַכֹּרֶן): אֲסַפִּי

1 The prefixed *εὐ* is explained by Schürer (*GH* 1:107, n. 17) as a corruption of *σπερ* (שֶׁפֶר), which corresponds to the Gr. *σπερματός*. Renan's suggestion (*Hist. d'Isra.* ix, cap. 1 *ad fin.*) that *εὐσπαρευ* is a corruption of some *εὐσπα*, may be mentioned; in his view the expression is similar to those which Arabian authors often add to the names of persons.

the Ashdodites (cp 'Gath of the Philistines,' Am 6:2, and for a wider use of Ashdod see below). Others (Del. *Proc.* 289 f., W. 1) have read as two names, and explain the latter as אֲשֶׁדּוֹת, the port of Ashdod (cp note 1, below).

Ashdod soon regained its power, and in the following century the great city of Syria (Herod 2:157) was besieged by Antiochus for twenty-nine years, an allusion to which is seen in Jer 25:22 (less probably also Zeph 2:4; see ZEPHANIAH, n. 3). Further evidence of its independence may be seen in the mention of Abimilk, king of Ashdod, temp. Esarhaddon (K 17¹⁰ 355:12).

The Ashdodites were allied with the Ammonites and the Ammonites against the Jews of Jerusalem (Neh. 4:7 [1]), and Nehemiah, denouncing the foreign marriages, mentions the women of Ashdod (also of Ammon and Moab), whose offspring speak a degraded dialect called אֲשֶׁדּוֹתִי (Neh. 13:24, אֲשֶׁדּוֹתִי [cf. BSM]). cp the allusion in Zeph. 9:6. The use of Ashdod in these passages is peculiar, and, it genuine, suggests that the name Ashdod comprised also the surrounding district (cp Schrader's explanation of *asduddumma* above).

Ashdod and its neighbourhood was ravaged by Judas (1 Macc. 5:68, cp 4:18), and in 117 B.C. his brother Jonathan defeated Apollonius there and burnt the temple of Dagon (1 Macc. 10:77 ff., cp 11:4). John Hyrcanus burnt the towers in the surrounding fields after defeating Gedeonians (1 Macc. 16:1). In the time of Alexander Jannaeus it belonged to Judaea (Jos. *Ant.* xii. 154); but it was separated from it under Ptolemy (Jos. *Ant.* 7:7). In the N.E. it is mentioned only once, in connection with Philip's return from Gaza to Caesarea (Acts 8:40). See Schür., *GTZ* 267 f., W. *GTZ* 1223 f.; and cp PITT-RIVERS.

ASHDOTH-PISGAH (אֲשֶׁדּוֹת פִּסְגָּה) is uniformly translated, in RV, 'the slopes (image or springs) of Pisgah' (Dt 3:27-4:4 [here also W.]). Jos. 12:1 [p. 100 mng. note] 13:1; for G's readings see PISCATH. In like manner, the Heb. אֲשֶׁדּוֹת, rendered 'springs' in Josh. 10:43-12, is in G's slopes. The declivities or shoulders of a mountain plateau, where it sinks sharply into the plain, are meant. The word is perhaps derived from אֲשַׁךְ, in the sense of 'pouring out';² the explanation usually given is that the Ashdodites are the line on the mountain-side where springs break forth. See PISCATH.

ASHER (אָשֶׁר: אֲשֶׁר [B.M.], אֲשֶׁר [A.N. 7:7], אֲשֶׁר [B. Jos. 17:14]; Jos. אֲשֶׁר: gentile אֲשֶׁר).

1 Name and origin. Asherite, the eponymous head of the tribe of the same name. Important for the history of Israel, it is traced by the Yahwist to Zilpah, Leah's maid (Gen. 30:12 f.), this tribe, perhaps more than the other Zilpah and Bilhah tribes (see ISRAEL, § 5), raises questions difficult to answer. Is the popular etymology (Gen. 30:13, probably also alluded to in the 'Blessings') correct, or does the name not rather point to some deity – in which case it is natural to connect it with the root אֲשַׁךְ ('to be propitious,' whence the name of the Assyrian God Asur²³). In what relation is Asher, stand to a once somewhat important state called *Aseru*,

Ashurru, which occupied W. Galilee in the time of Seti I and Ramses II (WMM, *Is. n. 1* 236-9)? Did that ancient people to some extent throw in their lot with the invaders from the wilderness (cp HANANIER), or is Asher in the O.T. simply a geographical name for some Israelites who settled in a district already long known as Asher? Hommel (1881 228-237) thinks that the Asherites were one of several Isachthian tribes which, before the time of Moses, had encamped in the district between Egypt and Judah (cp STUTTGARTER) and that they are the Habiri referred to in the Amarna letters as having burst into Palestine from the south. Lastow, on the other hand, inclines to identify the Habiri with the Asherite clan Heber (see below, § 4) and to connect the Asherite clan Malchiel with the followers of Malki, the writer of several of the Amarna letters, while G. A. Barton suggests that the sons of Abi-asita (Abi-Isa-Asa), of whom we hear so much in the letters of Kile-Addi of Gaba, may have become an important constituent part of the O.T. tribe of Asher, so that it inherited their name in abbreviated form. That the O.T. Asherites were at all events not

2. Earlier references. very closely bound to Israel is proved by our earliest historical notice of the tribe, according to which it took no interest in the rising against Sisera: 'Asher sat still at the shore of the sea, and abode by his creeks' (Judg. 5:17).¹ Moreover, that they were somewhat mixed up with older inhabitants appears clearly enough in Judg. 1:2. Whilst, therefore, the fertility ascribed in the 'Blessings' of Jacob and Moses to the district where Asher dwelt, although it at once suggests the popular etymology (see above), is known to have been really characteristic of the part of Galilee in question (see ref. in Dr. on Dt 33:14, and cp BRZATH), we can hardly say how far the distinctness from the Phoenicians of the coast, apparently implied in 7:23 of the later Blessing, was an actual fact. On the other hand, the writer of the account of ISRAEL (7:7-11) seems to have thought Asher worth mentioning as included in the Benjaminite claim (see ASHURITES, GUTHRIE, 1). It is not surprising in view of the prevailing vagueness, that the 'Blessing of Jacob' speaks of ZEBULUN in almost the same words that the Song of Deborah had applied to Asher, and that the 'Blessing of Moses' then associates ISRAEL with Zebulun. Definite boundary there can hardly have been, whilst the distribution of the population must have changed somewhat from age to age. We need not wonder that the account of Asher's territory

3. Boundaries. which the priestly compiler has given us in Josh. 19:24-31 (in which some scholars have found traces of JE) is unusually vague. Not many of the places can be identified with certainty. ALAMATH (Wady el-Melek), JIMATH (Jefat), KAMATH (Kadab), KANAN (Kana) have probably been identified, and possibly also ELAM (A. 100, A. 100, 1) and HANATH, (C. 100, 100). UMMATH should probably be read Acher, SAMATH (7:7) may perhaps be the Nahr ez-Zarka, MISATH and HOSATH (7:7) are probably to be recognised in Egyptian and Assyrian inscriptions.

That Acher or Achizib or Sidon was ever included in an Israelite tribe Asher, is a purely ideal conception, and the same is clearly true (Judg. 1:31) of other cities in the list. For indications of an Aramæan element in the population (2 S. 10:6) see ARAM, § 5.

The tribe to the S. of Asher was Manasseh. In Josh. 17:11 we have a Yahwistic passage which is commonly interpreted as declaring that Dor lay within the limits of territory ideally assigned to Asher, although it really belonged to Manasseh. This interpretation gives support to the hypothesis that Sihor-Labnath (Josh. 19:26) is to be taken as the southern boundary of Asher, and to be identified with the river Zarka, which enters the sea almost midway between Dor and Caesarea. If Asher really moved northwards from an earlier home

¹ On the statement in Judg. 6:35-7:23, that Asher took part in the conflict with Midian, see Moore, *ad loc.*

¹ So in 1 Macc. 14:34 Gazara (in reality 17 m. to N.E.) is 'upon the borders of Amos'; cp also (doubtfully) 2 Ch. 28:18. ² Delitzsch compares the Ass. *adu*, pl. *adû*, the 'base' of anything (*Proc.* 107; cp Dr. on *Deut.* 3:17).

³ Aacle long ago wrote, 'Asher, like Gad, is a god of good fortune, the consort of Aserah' (*Verdicht. Gesch. von der Egypt. zu Mesopotam. Götterwelt*, 1877, p. 542), and both parts of this statement may still be defended. So Che. *Geogr.* 7, (4) 1, 100 (on Is. 17:4). Cp Del. *Acc.* 117R 143. G. A. Barton (*Proc.* 13174-13175) suggests a connection with the divine name implied in the name Abi-asita referred to towards the end of § 1 (see ASHURITE, § 3). Jensen (*Witter u. Armenier*) offers proof that the name of the consort of the goddess Asera was Hadad or Kammân, the storm-god. Had he also the title ASIR? Lastly H. Skipwith (*Proc.* 11241 f.) even suggests a connection between אֲשֶׁר and Osiris (the father of Horus; cp HANANIER 1).

ASHER

in S. Palestine (see above, § 1), traces or at least memorials of it may have long survived (see SHILOH-LEVIATHAN). This would make it not quite so difficult to understand the account of P. even if it is a fact that he really brings Asher farther S. than Carmel (Josh. 19:26).

The linguistic peculiarities of the verse Josh. 17:11 support the suggestion of Tufanau (*loc. cit.*) that all that follows the word 'Asher' except the three heights 'belongs really to 17:12, taking the place there of the words 'these cities' (6 p. Judg. 1:29). But we do not know what the three heights are though they certainly might include 'the heights of Dor' (cp. Josh. 11:12-13). There is, however, little historical importance to the question whether Dor is represented as belonging to Asher, since, as a matter of fact, it and the cities mentioned with it remained in the possession of the Canaanites or Philistines.

On the other three sides the territory of Asher is even less defined. According to Josh. 19:27, it was contiguous with Zebulun on the E., while according to 7:14 it stood in the same relation to Naphtali. It is difficult to bring it into relation with Issachar. In general, Asher must be regarded as the north-western-most district connected with Israel, and as stretching indistinctly W. and N. and losing itself gradually amongst the Philistines of the coast.

(1.) P.'s genealogy of Asher given twice (Nu. 26:44, probably the more original, Gen. 49:17), which is reproduced in almost identical form by the Chronicler (1 Ch. 7:1-7), is very simple, consisting probably of (primarily) the three clans, the limits (perhaps really Jamin, so G¹ in Nu. and perhaps G² in 1 Ch. 7:1), Shives (phonetic), and Herites.

With the last mentioned are associated as secondary clans the Herites (known as a Kenite name)² and the Malchielites (known as a personal name in the Amarna letters from S. Palestine) as 'sons', and Sorah (perhaps an Aram. name; not found in Hebrew) as sister. There is no earlier mention, however, of any of these names in connection with Asher, though the first and third are well known in the central highlands of Palestine.

(2.) To this simple genealogy the Chronicler appends (1 Ch. 7:6-9) a remarkable list of one Malchielite and over thirty Herites—remarkable because the names are not of the distinctive type that abounds in the Chronicler. The list, if we remove certain textual corruptions,³ looks as if it were meant to be schematic (e.g., 3 sons and 17 grandsons, followed by some seventeen in the fourth, fifth, and sixth generations); but we cannot reach a text that inspires confidence. It must be remembered, however, that many of the names may well be foreign. Haraphier has been referred to above. The affinities of some of the names are worthy of note: note, e.g., the remarkable groups Heber, Ithran, Jether; so also Beria, Shiesh=Shilsha of 7:37 (Shilsha? cp. Sh²), Shual.

Lk. 2:6 speaks of a certain Anna as being of the tribe of Asher (but see GENEALOGIES, i, § 8).

2. Tob. 12 RV, AV ASER. See HAZOR, 1.

R. W. H.

ASHER (אָשֶׁר; ACHP [BAL]), a town on the southern border of Manasseh, mentioned in Josh. 17:7 (RV) in the following terms:—'And the border of Manasseh was from Asher to Michmethath which is before [i.e., E. of] Shechem.' After this we are told that 'the border went along to the right hand [i.e., to the S.] unto the inhabitants [i.e., the district] of Entappuah.' These statements must be taken in connection with the description of the N. border of Ephraim in 16:6, where the names which correspond to Asher and Michmethath are Michmethath and Tamath-Shiloh, and Tamath-Shiloh is stated to be E. of Michmethath. On the assumption that Entappuah is SW. of Shechem (see TAPPUAH, 2), Asher must lie somewhere to the E. of Shechem, between Michmethath and Tamath-Shiloh. Thus far we have proceeded on the

¹ 'Dor' in Judg. 1:31 G¹ has no objection, for it does not fit the context, and is probably simply an insertion based on the passage in Joshua.

² Note that for Jehubkath (1 Ch. 7:34) G² reads κ. ωδασ. *loc. cit.* H. B. H.

³ Ashi in 7:13 should certainly be 'his brother.' Probably Hothan (7:13) is a miswritten Helem (cp. 7:35), in which case 'sister' (*ibid.*) in 7:32 may be a duplicate of Hothan. Ulla (7:36) as it ought to resume some name already mentioned, may be a corruption of Shual, which we should perhaps restore for Shua in 7:12.

ASHERAH

theory that RV's reading is correct—it is in fact that of most scholars, including Dillmann and Knutson. The rendering seems, however, to need revision. Concerning that Michmethath (7:13) stands in 17:11 in close proximity to Asher (without any connecting words) and that it would be natural to distinguish these Asher from the better known one (with which indeed Ken in *ETP-Qa St.*, 1877, p. 15, actually confounds it by adding the name of the district in which it was (cp. Kedesh, Naphtali), it seems probable that Michmethath is the name of a district and that we should render against the accents and Lutz, but in accordance with G¹, 'And the border of Manasseh was from Asher of (other) Michmethath,' the starting-point alone being mentioned in the opening clause (as in 15:10) (see Reiland, J. Schwarz, Conder). The description in 17:7 will then exactly correspond to that in 16:6 in so far as Michmethath is the first point mentioned on the border between Ephraim and Manasseh. 'Asher of the Michmethath' might be some place in the N. of the district called 'the Michmethath.' If this district is the plain of *el-Makhsa*, two ruined places at once suggest themselves, now called the upper and the lower *Makhsa* respectively (Garin, *S. m.*, 1:39 f.). Here, however, no villages preserve any traces of the ancient name. Lutz and Jer (1882, 222-23, 234 f.) suggest another identification. They refer to a village called Asher, 15 K. m. from Naphtali on the road to Sythopolis, a description which points to *Ἰσχυρία*, 1 K. m. N. of Thaboz, where the 15th K. milestone has actually been discovered (Sperduti, *Rev. de l'É.*, 1885, p. 617 f.). *Ἰσχυρία* is now a mud hamlet, but it succeeds a place of some importance. Rock-cut sepulchres abound (Garin, *S. m.*, 1:39 f.). It is not probable, however, that Lutz and Jer had a clear or correct view of the boundary line, and the transition from Asher to *Ἰσχυρία* is not an easy one. (The latter name seems to be the plur. of *ἰσχυρία*, inf. 2 conj. of *ἰσχυράω*. So Kamptzmeier, *ZDPV* 16:2.) T. K. C.

ASHERAH, plur **Asherim**, the RV transliteration of the Heb. אֲשֵׁרִים (pl. אֲשֵׁרִים; in three late passages אֲשֵׁרִים, a word which AV, following G¹ (אֲשֵׁרִים [BAE]), and Vg. (*lucina*), renders *grove, groves*. That this translation is mistaken has long been universally recognised. RV avoids the error by not translating the word at all; but, by consistently treating the word as a proper noun, it gives occasion to more serious misunderstanding.

The *āshērā* was a wooden post or mast, which stood at Canaanite places of worship (Ex. 31:17 Judg. 6:25 and frequently), and, down to the seventh century, also, by the altars of Yahwe, not only on the high places, or at Samaria (2 K. 13:6) and Bethel (2 K. 23:15), but also in the temple in Jerusalem (2 K. 23:6). The *āshērā* is frequently named in conjunction with the upright stone or stile (*masōbā, hamman*; see MASSEBATH and TROT ATRY, § 4). The pole or post might be of considerable size (cp. Judg. 6:25 f.); it was perhaps sometimes carved (1 K. 15:13),¹ or draped (2 K. 23:7), but the draping especially is doubtful. The shape of an *āshērā* is unknown. Many Cypriote and Phoenician gems and seals representing an act of adoration show two (more rarely three) posts, generally of about the height of a man, of extremely variable forms,² which are supposed by many archaeologists to be the *āshērā* and *masōbā* of the OT (see PHOENICIA). This is not improbable, though direct evidence is thus far lacking; but in view of the

¹ 'A shocking thing (Jewish tradition, *phallos*) as an *āshērā*;' on 2 K. 23:7 see below.

² See E. J. G. *Culte de Mithra*, 1917 f.; O. Neufeldt-Richter, *Kypros*, 1881, where a great many of these pieces are collected. Similar figures are found on Assyrian reliefs, and on Carthaginian *cippi*. We may compare the Egyptian *dédu-colum* (at Bastri), the Indian sacrificial post (Obenberg, *Religion des Veda*, 90), the so-called 'totem-posts' of the N. American Indians, etc. See in general Lippert, *Kulturgeographie*, 2: 376 ff., and Jevons, *Iran, Hist. Rel. Cult.*

ASHTORETH

Much more difficult is the question of identifying any of these sites, or the two Ashtaroths of the *OS*, with the

ASHTAROTH (עֲשֵׁתְרוֹת)—*i.e.*, Ashtoreth in her different representations: אֲשֵׁת־אֶשֶׁת [BA], אֲשֵׁת־אֶשֶׁת [13] Josh. 9:4, אֲשֵׁת־אֶשֶׁת [A] Josh. 13:4; the adjective is **Ashterathite**, עֲשֵׁתְרָתִי, אֲשֵׁת־אֶשֶׁת [ε] [BA], אֲשֵׁת־אֶשֶׁת [13], אֲשֵׁת־אֶשֶׁת [13], 1 Ch. 11:20. **Ashteroth Karnaim** (עֲשֵׁתְרוֹת קַרְנַיִם): אֲשֵׁת־אֶשֶׁת kapnain [A], אֲשֵׁת־אֶשֶׁת kapnain [13]—*i.e.*, 'Ashteroth of the two horns'? 'Ashteroth of (near) Karna'im'?) in Gen. 14:3, and **Be-eshterah** (בְּעֵשֶׁתֶּרָה, *i.e.*, בית עֲשֵׁתְרָה, or 'house of

1. References. *Ashtarim*: Βοκόφαν [B], -ppa [L], Βεε-
θαπα [A] in Josh. 21:27, but עֲשְׁתָּרִית
simply in Dt. 14 Josh. 9:10 12:13 12:21, where it appears,
along with Edrei, as a chief city of Og, king of Bashan;
and in 1 Ch. 6:50 [71] (Ἀσχροῦθ [B]) Ραμουθ [A] as a
Levitical city. Then, in Am. 6:1 (Gritz's restored
reading) we have Karnam as the name of a city E.
of the Jordan taken by Israel, and in 1 and 2 Mac.
Karnani or Karnion as a city in Gilead with a temple
of ΑΒΑΓΑΡΙΣ [2:71] attached to it. The lists of
Thames III. (*Annales* 1950 ff.) contain an 'As-tira-ty
(*RP*² 54; WMM, *As. a. Exc.* 162, 313; cp *Ashtarim*,
Beard and Budge, *Tell el-Amarna Papyri in First Mu.*
43, 64). Whether these names represent one place or
two places is, on the biblical data, uncertain.

It is significant, however, that Eusebius and Jerome

¹ For example, Halevy compares Pers. *akānā*, 'hospitium' (*Id.* 1.1.1¹, 2.1.1²); Noy *et al.* explain 'hospes' from the Aramaean (*Id.* 1.1.3³). Föl. Del. and Schm. offer no explanation.

² It can be seen from the form $\gamma\gamma\gamma\gamma$, a slight difference to the summation will be the result.

³ Here it is described as the abode of the Rephaim at the time of the invasion of the Amorites. 'O were there two neighbouring cities? Kanaan, Babel, and Siegf. read 'Ashtaroth and Karnaia' claiming 'the city of their sin'. Probably, however, the right reading is *Arazaad* (see *ibid.* [sic] (see Nestle, *ibid.*). Moore explains 'the Ashtaroth of the two-peaked mountain'; see especially 1. 1. Moore, *IBL* 156 ff. 157 ff. and cp. col. 39, n. 3.

3. **OT sites.** with the corresponding names of OT. Names in this part of Palestine have always been in a state of shift. That Tell 'Ashdath is the 'Ashteroṯ Karnaim of Gen. 11:5 or the 'Asharoṯh of other texts has in its favour, besides its name, the existence of a sanctuary, even though this has been transferred in Christian times to Job. On the other hand, Mizreṯh must have been of too great importance not to be set down to some great place-name of the OT; and its accessibility from Edrei suits the association, frequent in the OT, of the latter with Asheroṯh. As to the Karnaim of 1 Mac. 5:26 (which, of course, is the same as the Karnaim of Am. 6:1), it cannot have been Mizreṯh, as Buhl contends, for in such a case the lake would certainly have been mentioned in connection with the assault of Judas upon it (a lake is mentioned near Caspis or CASPION [q.v.] to which Judas took previously); and in 2 Mac. 12:21 Karnaim is said to be difficult to get at διὰ τὴν πάντων τῶν τοπιῶν στενότητα. This does not suit Mizreṯh, or Tell 'Ashdath, or Sheikh Sa'el. Further, therefore, has suggested for Karnaim *Karn or Gen.*, the Agnena of the Romans, in the inaccessible *Lep.* Tell the various sites have been dug into and the ancient name of Mizreṯh is recovered, however, we must be content to know that there was an 'Ashteroṯh Karnaim near Tell 'Ashdath, and that possibly there was a second site of the same name in the same region in OT times.

On the whole subject see especially *DDP*, xiii, xiv, and xv; Schumann, *l. c.*; also the *Forar* (203, 210), and Pohl, *Stad. zur Forstg.*, *As. u. Stationen*, in *Inden*, 13 ff., *Pal.*, 248-250; also Moore, *DDP*, 6155 ff., and, for an Egyptological explanation of the name 'Asinoreth' of the two horns, WMM, *As. u. For.*, 31.

ASHTORETH (עֲשִׁתֶּרֶת), a goddess of the Canaanites

1 *Sub* Arr. Kapraev. 2 *Sub* Kapraev. The double peak of the southern summit of *Tell-el-Yisari*, formed by the depression running from N. to S., would make the appellation of Karnion, or "double-headed," extremely appropriate" (*Lebanon Journal*, 208). In a Talmudic discussion as to the constructions for the Feast of Booths it is said that Asheroth Karnion was situated between two mountains which gave much shade (*Sukca*, 54; cp. *Nerub. Giga*, 24b). Many of these statements are purely imaginative.

ASHTORETH

and Phoenicians. The Massoretic vowel pointing, which

is followed by EV, gives the word the vowels of *h sheth* 'scandalous thing' (cp Melech for Melek); the true pronunciation, as we know from the Gr. *Ἀσθάρτη* (so even *Ἀσθάρ*), alongside of *Ἀσθάρη* [BAI.] and from Augustine,¹ was 'Ashtart'. In the OT the name in the plural (the *Ἀσθάρη*) is coupled with the Baals, in the general sense, 'the heathen gods and goddesses,'² a usage with which the Assyrian *ilani uštarati* is compared. Solomon is said to have built on the Mt. of Olives (1 K. 11.5, cp 7) for the Phoenician 'Ashtart a high place, which was destroyed more than three centuries later by Josiah (2 K. 23.13).

Of the character of this goddess and her religion we learn nothing directly from the OT. Her name does

not occur either in the prophets or in historical texts in any other connections than those cited above; it is nowhere intimated that the licentious characteristics of the worship at the high places were derived from the cultus of Astarte. The weeping for Tammuz (Ec. 8.14, which Cyril of Alexandria and Jerome identify with the Phoenician mourning for Adonis (so *Ἀδωνίς*), was more probably a direct importation of the Babylonian cult.³ This is doubtless true also of the worship of the 'Queen of Heaven' (Jer. 7.18 [*Ἡ βασίλισσα ἡ ἀρπαρὶς τοῦ οὐρανοῦ*], 14.7 ff.), whatever the name may mean (see QUEEN OF HEAVEN). The law which forbids women to wear men's garments, or men women's (Dt. 22.5), may be aimed at obscene rites such as obtained in the worship of many deities in Syria and Asia Minor, but need not refer specifically to the cult of Astarte.

Many inscriptions from the mother-country and its colonies, as well as the testimony of Greek and Latin

writers, prove the prominent place which the worship of Astarte had among the Phoenicians; Egyptian documents place the 'Ashtart of the Hittite country' by the side of the 'Sutech of Heta,' the principal male divinity; the Philistines deposited Saul's armour as a trophy in the temple of 'Ashtart' (1 S. 31.10 [*τὸ ἀσθάρτη*]), perhaps the famous temple at Ashkelon of which Herodotus writes (1.105);⁴ the stole of Mesha, king of Moab (6th cent. B.C.), tells how he devoted his prisoners to 'Ashtar-Chemosh; a city in Bashan often mentioned in the OT bears the name Ashteroth (cp also Ashteroth Karnaim, Gen. 14.5, and Beeshterah, Josh. 21.27; see ASHTEROTH). 'Ashtart was worshipped in Babylonia and Assyria under the name Istar (considerable fragments of her myth have been preserved); in Southern Arabia as 'Athtar (masc.); in Abyssinia as 'Astar; in Syria as 'Astar or 'Athar (in proper names: e. g. ATARGARTIS, 9.7); in Deréto. The Arabs are the only Semitic people among whom we do not find this deity; and even here it is possible that al-Lat and al-'Uzza were originally only titles of Astarte. The normal phonetic changes in the word show that the worship of Astarte did not spread from one of these peoples to the others, but was common to them before their separation. The fem. ending is peculiar to the Palestinian branch of the race, and, as has been observed, in Southern Arabia 'Athtar was a god, not a goddess.

Unlike Baal, Astarte is a proper name; but under this name many diverse divinities were worshipped. The Istar of Arbela was recognised by the Assyrians themselves as a goddess different from the Istar of

¹ *Quest. 16 in Isid.*, Istar, Ashtar. Confirmatory evidence is given by the Egyptian transcription.

² *Isid.* 2.13.10; 1 S. 7.1 (*Ἀσθάρ*); 12.10 (*Ἀσθάρ*); all belonging to the later Elohistic (Eg.) or deuteronomistic school.

³ The identification of Tammuz with Adonis is found also in Melito (c. 400 A.D., *Op. 23*). The connection of the myths is unquestioned. See TAYLOR.

⁴ It is, of course, not to be inferred that the Philistines worshipped Astarte before they invaded Palestine. The temple was an old Canaanite sanctuary.

⁵ Halevy's discovery is confirmed by the recent publication of the Aramaic inscriptions.

ASHTORETH

Nineveh; the Istar of Agade from the Istar of Uruk (see ASSYRIA, § 6, BABYLONIA, § 26). The inscription of Eshmunazar shows that more than one 'Ashtart had a temple in Sidon; and we know many others. Whether those differences are only the consequence of natural divergence in the worship of the primitive Semitic deity, in the immense tract of time and space, or, as is altogether more probable, in great part due to the identification of originally unconnected local *ashtara* with Astarte, the result is the same; there were many Astartes who were distinguished from one another by character, attributes, and cultus. A class of goddesses rather than a single goddess of the name.²

Astarte was often the tutelary divinity of a city, its 'prophetess' (*Ἀσθάρη*), and then, of course, its protectress and champion, a warlike goddess.

On the other hand, she was a goddess of fertility and reproduction, as appears strikingly in the myth of the descent of Istar. These two characters might be attributed to different Astartes, as among the Assyrians (cp the Aphrodites); but they might also coexist in one and the same goddess, and this is doubtless the older conception.

The figures from Babylonia and Susiana, as well as from Phoenicia and Cyprus, which are believed to represent Astartes, express by rude exaggeration of sexual attributes the goddess of generation.³ That the cultus-images of Astarte were of similar types is not probable. At Paphos she was worshipped in a conical stone, and many representations show the evolution from this of a partially acorned lot.

In the astro-theology of the Babylonians the planet Venus was the star of Istar. It is a common but ill-founded opinion that in Palestine Astarte was a moon goddess. The name of the city, Ashteroth Karnaim, is often alleged in support of this theory. Even if the translation, 'the horned Astarte,' be right, however, it is a very doubtful assumption that the horns represented the crescent moon. It is quite as natural to think of the horns of a cow or a sheep, or of an image of the goddess made after an Egyptian type (see EGYPT, § 131);⁴ and it is a still more unwarranted assumption that Astarte was elsewhere in Palestine represented in the same way. It would be a much more logical inference that the horns were the distinctive attribute of this particular Astarte.⁵ The other testimony to the lunar character of Astarte is neither of an age nor of a nature to justify much confidence (*De dea Syr.* 3; Herodotus, v. 64). The point to be insisted on is that the widely accepted theory that Astarte was primarily a moon goddess, by the side of the sun god, Baal, has as little foundation in the one case as in the other.

In Dt. 7.13 'the *Ἀσθάρη* of the flocks' are parallel to the 'offspring of the herds,' from which it has been ingeniously argued that among the nomadic Semites Astarte was a sheep-goddess (WRS, *Rel. Sem.* 310, and 460 ff.); but this also seems hazardous.

Of the cultus of Astarte we know comparatively little. Religious prostitution (Hdt. 1.109; Strabo XVI.1.5;

Ep. Jerem. 42 f. [*Bar.* 1.4 f.]; *De dea Syr.* 6, etc.) was not confined to the temples of Astarte, nor to the worship of female divinities.

Nr. 25.1-5 connects it with Baal-peor; Am. 27 Dt. 23.13 (17), etc., show that in Israel similar practices infected even the worship of Yahwé. There is no doubt, however, that the cultus of Astarte was saturated with these abominations.

¹ In the period from which most of our monumental evidence comes, still another cause must be recognised: syncretism with the Egyptian religious (see EGYPT, § 10).

² This use predominates in Hebrew, which has, indeed, no other word for 'goddess'; but, as has been remarked above, it is found in Assyrian also.

³ Henze, *Rev. Archéol.* xxxix, 1880, p. 1. *Op.* 23; Oltendörff-Richter, *Agyptos*, etc. On the origin of this type see, however, S. Reinach, *Rev. Archéol.* 1895, p. 207 ff.

⁴ Cp the representation of Baal of Byblos, 1881, Pl. 1.

⁵ On Ashteroth Karnaim see *Isid.* 16.1.12.

ASHUR

Phalaris, *Psalidium*, *Solidago*, *Dr. De Sprée*, syn. in ch. 2; Mövers, *Phalaris*, I, 159 ff., S. 80, *Waldstätt und Zuccarissen bei den alten Hebräern*, 1767, p. 1, Handlissin, art. *Aarte and Aschera, in *FZ* 1702-147-109, 1703, p. 1, lit. in full may be found; Rasthen, *Betr. zur semit. Kelt.*, 1803, I, 1, Meyer, art. *Aarte, in Roscher's *Lexikon der Mythologie*, 1803, II, 1, Meyer, art. in part corrected by his art. *Bach, Dr. 287 f.; Rosen, *Aph. 195*; Roth and her folium in the OF, *IBL*, 1973, 12; The Semitic Lexicograph, *The Journal*, 1913-195 10 174. ASHUR (אַשּׁוּר), 1 Ch. 24 AV, RV ASHUR.

ASHURITES, THE אַשּׁוּרִי, תֹּנָה אַשּׁוּרִי [B],
 Ἀσσυρίων [M] (cp I 1; Jezreel follows), are mentioned
 in a Sam. 24 among various clans subject to the
 authority of Ishbaal. Pesh. Vg. read אַשּׁוּרֵי, the
 Gosharites, which is accepted by some (see GOSHURI),
 while others (Kamph. Ki. Klo. Gr.) follow the Targ.
 אַשּׁוּרֵי דְבָא, cp Q and read אַשּׁוּרֵי (cp Judg. 12)
 = i.e., 'the Asherites,' whose land lay to the W. of Jordan
 above Jezreel, which is mentioned next, the enumeration
 proceeding from N. to S.

ASHVATH (אֲשֵׁוֹת; אֲשֵׁוֹת [BA], -ασηαθ [L]), in a
 generalty of ASHER (Gen. 48:16; 1 Ch. 7:33).

ASIA (H. ACIA [T. W.]). Great uncertainty prevailed during the apostolic period as to the usage of the names of the districts of Asia Minor. The boundaries of several of the districts had long been uncertain—those between Mysia and Phrygia were proverbially so (Strabo, 50 p.). This confusion arose from the fact that the names denoted ethnological rather than political divisions, and belonged to diverse epochs. They are like geological strata, which are clear enough when seen in section, but impossible to disentangle when represented on a single plane. A further complication arose when the Romans imposed upon the country the provincial system. The official nomenclature was applied without any account being taken of the older history or of ethnical facts or popular usage. In the case of Lycia, Bithynia, or Pamphylia there was no distinction of any moment between the old and the new usage; but in the case of Galatia and Asia the difficulty of distinguishing the precise sense of the names is very great.

The province of Asia was formed in 133-130 B.C. when Attalus III. of Pergamum left his kingdom by will to Rome; the name Asia had early come into use because there was no other single term to denote the Asian coast lands. The area of the province was subsequently increased, first by the addition of Phrygia (116 B.C.); we are, therefore, confronted by the difficulty of distinguishing whether, in any given case, the word Asia is restricted to the coast or extended to the entire province—in other words, whether it includes Phrygia or not.

In Acts 21, Asia indicates the towns of the highly-civilised coast land, for the enumeration is popular and Greek in style, as is proved by the mention of Phrygia *alongside* Asia; according to the Roman mode of speaking, Phrygia was included in Asia, with the exception of that small part round Antioch (Phrygia Galatica) which fell to the province Galatia. Such names as Phrygia, Mysia, or Lydia were to a Roman without any political significance, being merely geographical terms denoting parts of the province of Asia, used in occasion to specify exactly the region referred to by the speaker (Cic. *pro Clu.* xxvii § 65; Asia vestra et statim ex Phrygia, Mysia, Cilicia, Lydia). Such use can be paralleled from the NT. In Acts 16:7 *καὶ τὴν Μυσίαν* [i. e. W.] is used to define rigidly the point reached by the apostles, when warned from Bithynia. In Acts 19, a decision is more difficult, as the Jews who 'disputed' with Stephen were probably those educated in the schools of Smyrna or Pergamum; but we cannot on *proof* grounds decide that some of them did not belong to Phrygia. Here, therefore, Asia may or may not be used in its Roman sense. So also in Acts 21:27-28:48.

ASIARCH

The whole question of the sense in which geographical terms are used by the writer of Acts centres round Acts 16, where the apostles are forbidden to preach in Asia (*κωλυόμενους . . . λαλῆσαι τὸν λόγον ἐν τῇ Ἀσίᾳ* [Ti. WII]). Those interpreters (e.g., Con. and Hows. 1324) who take the preceding words (*διήλθον δὲ τὴν Φρυγίαν καὶ Γαλατικὴν χώραν* [Ti. WII]) to express the opening up of new ground by missionary enterprise N. of Antioch in Pisidia are compelled to restrict the prohibition of preaching in Asia to the coast land—in other words, to take Phrygia, Galatia, and Asia in their popular non-Roman sense—for all Phrygia N. of Antioch belonged to Asia in its Roman or administrative sense. Yet we must ask if the simple *διήλθον* ('AV 'gone throughout') can be taken to imply preaching. If, however, the apostles did not preach in their passage through the district called here *ἡ Φρυγία καὶ Γαλατικὴ χώρα*, there appears to be no necessity for giving a popular meaning to the geographical terms here used, unless in the interests of what Ramsay calls the N. Galatian theory (see GALATIA, §§ 7-30, especially §§ 9-16). On this view, then, the words indicate such parts of Galatic Phrygia as had not been traversed at the time of receiving the prohibition (or, more probably, that part of Phrygia which belonged to the province Asia, together with Old or North Galatia. In favour of this is the fact that the part *κωλυόμενους* must be prior in time to, i.e. contain the ground of, the action denoted by *διήλθον*, 'they traversed . . . because they had been forbidden.' If, in face of the difficulties of the N. Galatian view, we fall back upon the S. Galatian theory, the district *ἡ Φρυγία καὶ Γαλατικὴ χώρα* must be regarded as partly identical with that called *τὴν Γαλατικὴν χώραν καὶ Φρυγίαν* in Acts 18:23 (which can hardly be other than that of the S. Galatian churches); and also it must already have been traversed wholly or in part *before* the prohibition to preach in Asia (Rams. 1720c, May 1895, p. 302; *Church*, 5 ed. p. 75). Ramsay consequently attempts to interpret the words *διήλθον κωλυόμενους* as—*διήλθον καὶ ἐκωλύθησαν* (*διελθόντες ἐκωλύθησαν*, or on purely subjective grounds adopts, with Lightfoot, the reading *διελθόντες* *δε* from inferior MSS (*St. Paul*¹⁰, p. 192). It seems better to take *διήλθον* *δε* as resumptive and as summing up the previous verses, with an ellipse—'so then they traversed . . . (neglecting Asia) having been forbidden'; in which case, here, as elsewhere throughout the narrative of Paul's journeyings, the word Asia is used in its technical, Roman, sense.

This sense is clearly the best in the following passages:— during Paul's residence in Ephesus, 'all they which dwell in Asia heard the word of the Lord Jesus' (Acts 19:10; see also for Asia (Acts 20:4); other instances in the same chap. are 27:16, Ephesus was virtually capital of the province) and 18. In 27:2, *Karya tpe Arxou romos* [Ti. Will], there is nothing in the Epistles, the technical sense is required, e.g., Rom. 16:5, Epaphroditus, the first-fruits of Asia (RV); 1 Cor. 16:19, the churches of Asia; 2 Cor. 18, (probably) alluding to the riot at Ephesus, or the dangerous illness there; 2 Tim. 1:15, the Roman province is meant also in 1 Pet. 1, where the enumeration Pontus, Galatia, Cappadocia, Asia, Bithynia (= Bithynia-Pontus) sums up all Asia Minor within the Taurus. Finally, in Rev. 14, the seven churches of Asia are those established in the chief cities of the Roman province. In 1 Macc. 8, 'Antiochus, the great king of Asia', the word is used in a wider sense = Asia Minor, with Syria (so also 11:13, 'the diadem of Asia'; 12:19, 13:12, 1 Macc. 8:3; cf. Jos., *Ant. xii. 8* [13:47]). In 2 Esd. 15:46, 'Asia, that art partaker in the beauty of Babylon', the sense is still wider = Persian empire (16:1; cf. Herod. i. 69, 177; Jos., *Ant. xi. 8*).

ASIARCH (of ἀσιάρχαι [Ti. VII], AV 'the chief of Asia'; RV 'chief officers of Asia'). An officer

¹ See Acts 15:11, διηγήσασθαι, but with ἐπιστηρίξαι added; 16:4, διεπορεύεσθαι, but with παραδίδωκεν added. On the other hand we have 13:44, διαβαίνετε ἀπὸ τῆς Ἡερῶς – no preaching on the road; and 17:1, διευδαντίζετε τὴν Ἀντιόχειαν καὶ τὴν Ἀπολλωνίαν [Fl. WH], where also there was no attempt at evangelisation, so far as we can tell. (But see Rams. *Ερῶς*, May 1895, p. 385 f.)

ASIBIAS

heard or only once in the NT—viz., in the account of the riot made by 'Demetrius and the craftsmen' at Ephesus (Acts 19, c). The annual assembly of civic deputies (*κοινὸν Ἀσίας*), over which he presided, was combined, in Asia, as in other provinces, with an annual festival in honour of the reigning emperor and the imperial system.

Soon after the victory of Actium, in fact as early as 29 B.C., Augustus had allowed temples to himself and Roma to be dedicated in Pergamum, the *de jure* capital of Asia, as well as in Nicomedia and Smyrna, the capitals respectively of Bithynia and Galatia (Tac. *Ann.* iv, 37-4). This blending of a religious with an administrative institution became a leading line of the imperial policy; but, as regards the pomp of the festivals and the civic rivalries excited, the institution nowhere developed as it did in Asia. Naturally, the conduct of the games and festival in honour of the emperor fell to the president of the provincial Diet.

As the Asiarch bore most of the expense, though some was borne by voluntary subscription or apportioned to the several towns, this politico-religious office was open only to the wealthy—the prosperity of Tralles, for example, was shown by its continuous series of Asiarchs¹—and the title was retained after the expiration of the year of office. To find Paul counting friends among the Asiarchs—*i.e.*, among those who then head or who previously had held the office—throws, therefore, a valuable side-light upon the attitude adopted towards Christianity by the upper classes of the provincials; it was in Asiarch, Philip, who at Smyrna resisted the cry of the mob to 'let loose a lion on Polycarp' (Ius. *HE* 115, § 27).

It would be a mistake, then, to imagine that the Asiarch, as such, had any connection with the Ephesian worship of *Artemis*.

In fact Ephesus, like Miletus, was expressly rejected by Titus as a claimant for the honour of an imperial temple, probably because of the risk of Caesar's worship being overshadowed by the local cult (Tac. *Ann.* iv, 55-6). It would naturally, however, have the right to put forward a candidate for the Asiarchate. We hear of similar officers in other provinces—*e.g.*, a Galatarch, a Bithynarch, a Syriarch, and a Lycarch. The last of any rate is clearly originally a political officer—the head of the League (Strabo, 663).

There was thus, at first, but one Asiarch in office at a time in all Asia—the president of the Diet at Ephesus; but as temples dedicated to Caesar multiplied in the province,² and each of them became the centre of an annual festival, the chief priests at such temples performed the functions discharged at the festival at Ephesus by the Asiarch, and finally the presidency of the festival even at Ephesus was taken from the chairman of the Diet and given to the chief priest. The Diet and its civil functions thus fell into the background, and the name Asiarch came to mean the priestly provider of a popular festival in connection with the worship of a dead or reigning emperor. With the growing importance of this worship the religious influence of the priestly Asarchs extended; and as the worship of the emperor became the outward sign of loyalty to the empire, it was through the provincial chief-priesthoods that the old and the new faith came into contact. Hence Julian writes to the Galatarch as the proper medium for his anti-Christian propaganda. (See Mommsen, *Provinces*, 1344 fol. ET, Rams. *Class. Rev.* 3174. A different view in a long article by Brandis in Pauly's *R. Enc.* new ed. 3, 71.) W. J. W.

ASIBIAS (Ἀσιβίας [B], Ἀσιβίας [A], μελιχίος [1.]), in the list of those with foreign wives (see EZRA, i, § 5, end), 1 Esd. 9:26 = Ezra 10:25 (αἰβία [S], α. [A], B om.). See MALCHIJAH 5. Asibias is probably a Graecised form of HASHTABIAH.

ASIEL (Ἀσιήλ, § 31; Ἀσιήλ [BAL]). 1. A name in the genealogy of SIMEON (1 Ch. 4:35).

¹ καὶ ἀεὶ τινες ἐξ αὐτῆς εἰσιν οἱ ἠρωτεύοντες κατὰ τὴν ἐπαρχίαν, οὓς Ἀσιάρχας καλοῦσιν (Strabo, 649).

² Already in 26 A.D., for example, a temple was erected in Smyrna to Tiberius, jointly with his mother Livia, and the Senate (Tac. *Ann.* iv, 154-503).

ASNAPPER

2. A scribe, 4 Esd. 14:24 (ASHTT).

3. Tob. 1: RV, AV ASML (q.v.).

ASIPHA (Ἀσιφά [A]), 1 Esd. 5:29 = Ezra 2:43. HASUPHA.

ASKELOS (Ἀσκελός), Judg. 1:13 AV, RV ASHELOS.

ASMODEUS, RV **Asmodæus** (Ἀσμοδαῖος [B], Ἀσμοδαῖος [S], Ἀσμοδαῖος [A]), called 'the evil demon' (1 Job. 2:3, 17). Considering (1) the close connection of the story of Tobit with Media, (2) the affinity of the seven archangels in Tob. 12:15 to the seven Mazdean Amesha Spentas, and (3) the impossibility of deriving Asmodeus or Asmodai (or the later Hebrew forms, on which see below) from אָשָׁמ, 'to destroy,' we are obliged to look for an arch-demon of similar name and attributes in Mazdean demonology. The Asmodeus of Tobit has two attributes: he is lustful (like a satyr), and has the power to slay those who oppose his will (1 Job. 3:1-6). Now, it is true that there is no demon in Mazdeism of similar name who has exactly these characteristics; but one of the seven arch-demons who are opposed to the seven Mazdean archangels is called Aeshma, and as the impersonation of anger (the primary meaning) and rapine. So constantly is he mentioned in the Avesta beside Angia Manyu or Manu (with his weapon 'the wounding spear') that we could not wonder if he became naturalised in the spirit-world of the Jews in the Persian period. Once adopted, he would naturally assume a somewhat different form; his attributes would be modified by the sovereign will of the popular imagination. This was actually the course of history, as modern critics hold. By the time the Book of Tobit was written Aeshma had already a well-defined form, and, though vindictive as ever, had exchanged the field of battle for less noble haunts. The Asmodeus of Tobit is, in fact, the counterpart of LILITH (q.v.), and in still later times divided with her the dominion of the *shedim* or demons. Asmodai, *o.*, as his name is written in Targ. and Talmud, אָשְׁמַדַּי or אָשְׁמַדַּי, was as dangerous to women as Lilith was to men, though he also had him represented in a less odious character as a potent, wise, and sometimes even pious elf (see Gittin, 68a, in Wunsche's *1 or 2 bib. Lit.* 217-18). The second part of the name Asmodeus is of uncertain origin. Most connect it with the Zend *asmo*, 'demon'; but, though the combination *Aeshma asmo* is not impossible, it is nowhere found in the texts. Kohut's explanations (*Jud. Angelologie* and *Aruch*, s.v.) are precarious.

Cp *Zendavesta and Pahlavi Texts* in SBE; Spiegel, *Erân. Alterthumskunde*, 213 f.; Grünbaum, *ZDMG* 31:204, etc.; Kohut's *Jud. Angelologie*, 72, etc.

T. K. C.

ASNAH (אֲשָׁנָה, 'thornbush'; אֲשָׁנָה [B], אֲשָׁנָה [A]; *asna*). The Bne Asnah, a family of NETHINIM in the great post-exilic list (see EZRA, ii, § 9), Ezra 2:50 = 1 Esd. 5:11, ASANA (אֲסָנָה [B], אֲסָנָה [A]) = Neh. 7:52 (A), following BNA, om.).

ASNAPPER, RV **OSNAPPER**, better **Āsenapper** (אֲסֵנַפֶּרֶס; אֲסֵנַפֶּרֶס [A], אֲסֵנַפֶּרֶס [B], אֲסֵנַפֶּרֶס [S], אֲסֵנַפֶּרֶס [A]), 1 Esd. 4:9 f. To the great and noble Āsenapper is ascribed the transplanting of several nations into Samaria from beyond the Euphrates. The two epithets naturally suggest that an Assyrian king is referred to, and, as Bosanquet in G. Smith's *Hist. of Assyriology*, 394 [71], suggested, the king can only be the conqueror of Susa—Āsur-huni-pal (אֲסֻר-חֲנִי-פָּל) from אֲסֻר-חֲנִי-פָּל = אֲסֻר-חֲנִי-פָּל.¹ This view is confirmed by the discovery (due to Marq. Fund. 50) of a various reading for אֲסֵנַפֶּרֶס which underlies the impossible ASHAPPHATH (q.v.) of 1 Esd. 5:6, viz. אֲסֵנַפֶּרֶס. The two readings supplement each other, and are explained by a common original אֲסֻר-חֲנִי-פָּל, which is clearly Āsur-huni-pal. This great king's name must have stood both in Ezra 4:

¹ An explanation, in the form which Gelzer gave to it (*ÄZ* 75 ff. (75)), now widely accepted. Cp, however, Halévy, *REJ* ix, 12.

ASOM

'Ešarhaddon' being an ignorant scribal's alteration) and in the source from which the statement in Ezra 4:2 is derived (perhaps 2 K. 17:24, which at present merely refers to 'the king of Assyria'). See further, ASUR-BANI-PAL.

ASOM (אסוֹם [BA]), 1 Esd. 9:33 = Ezra 10:33, HANANIM.

ASP (אֶסֶף, *petent*; אֶסְפִּיע [BAL]) in Dt. 32:33 Job 29:10 (ΔΡΑΚΩΝ [BNAC]) Is. 11:8 AV, in Ps. 58:4 (11:13 AV) (ΒΑΚΙΛΙΚΟC [BNARF]), and in Rom. 3:14; probably some species of viper (cp ADDER, 2), see SERPENT, § 1, n. 5.

ASPALATHUS (ΑΣΠΑΛΑΘΟC [BNA]; *balsamum*) is associated with cinnamon and other perfumes in the Praise of Wisdom (Eccles. 2:15). Theophrastus (*Hist.* 9:7) mentions it along with various spices, etc., used in making unguents, and in Pliny (*HN* 22:24) it is '*radix unguentis egyptiacae*'. Fraas, the most recent writer on classical botany (*Synopsis Plantarum Florae Classicae*, 49), refers it conjecturally to *Genista acanthochala*, D.C., a native of Greece and the Greek archipelago; but the most that can safely be said is that it seems to have been a prickly shrub, probably leguminous, with a scented wood or root. The ante-LXXian commentaries devoted much attention to it, but with no more definite result. It has evidently been lost sight of since classical times, and supplanted by other perfumes. W. T. T. D.

ASPATHA (אֶסְפָּתָה, פֶּאֶסְפָּה [BNA], פִּיאָפָּה [N^{vid}], פֶּאֶ, [A], פֶּאֶסָה [L]), one of the ten sons of HAMAN (7:7) Est. 9:7. Pott and Bentley explain the name as the Pers. *aspadata*, 'ab equo sacro datus' (cp Be.-Rys.); but the MT reading is too insufficiently supported.

ASPHAR, אֶסְפָּה POOL (ΑΣΚΚΟC, ΑΣΦΑΡ [NV; Jos.], Α. ΑΣΦΑΛ [A], *Asphar* [Vg.]), in the wilderness of Tekoa, is mentioned in connection with the struggle of Jonathan and Simon the Maccabees with Bacchides (1 Mace. 9:11; cp Jos. *Ant.* xiii. 12). The Be'er Asphar is probably the modern *Bir-Selhub*, a considerable reservoir in the wilderness, 6 m. WSW. of Engeledi, and near the junction of several ancient roads (described by Rob. *BR* 2:202); the hills around still bear the name *Safra*, an equivalent of Asphar. A less probable identification is that with the ruins and cistern, *es-Za'feranich* to the S. of Tekoa (Buhl *Pal.* 158). G. A. S.

ASPHARASUS (ΑΣΦΑΡΑCOC [BA]), 1 Esd. 5:8 = Ezra 2:2, MIZPAR.

ASRIEL (אֶסְרִיֶּל, § 67, ΕCPIHΛ [BAI]; the patronymic is *Asrielite*, אֶסְרִיֶּלִּית, A[el] [BAF], *cepi* [L]), a Gileadite family, descended from Manasseh through Machir, Josh. 17:2 (ΕCZEIΛ [B], *epi* [A]), Nu. 26:31 (*cepi* [L]). In 1 Ch. 7:14-19 (ΑCΕPΕIΛΛ [B], AV ASRIEL; see MANASSIIM), a very different Manassite genealogy, the name is probably dittography of the syllables immediately following (אֶסְרִיֶּל; cp also text of G¹¹); read, 'The sons of Manasseh whom his concubine the Aramitess bare' (cp Gen. 46:20 G¹¹). The name may be old, though it comes to us from late writers.

ASS (אֶסֶס, fem. אֶסְסָה, ² ΟΝΟC [BAL]; *asinus*, *asinus*, *Wild Ass* (אֶסֶס or אֶסְסָה = Chald. אֶסְסָה, ⁴ ΟΝΟC *argyros*; *onager*), and *Young Ass* (אֶסְסָה, *πῶλος* [BAL]).

The following are the passages: (a) for 'ass' Gen. 12:16 22:3 40:11 14 (G¹¹ το καλόη), Ex. 13:13 Nu. 22:28 Dt. 22:10 Judg. 5:10 (υποδύον [A]), 15:15 2 K. 6:25 Is. 21:7 Zech. 9:9 (G¹¹ υποδύον) Mt. 21:2 1 K. 13:15 etc.; (b) for 'wild ass' Job 6:5 11:12 (G¹¹ ονός ερημικής) 24:5 (G¹¹ ονός) Ps. 104:11 (G¹¹ οναγγοί) Is. 32:14 Jer.

¹ The usual rendering of אֶסֶס or אֶסְסָה in G¹¹.

² Root אֶסֶס 'to be red.' On the form cp Lag. *Ubers.* 11, Barth. *AB* 1:20.

³ The Ar. verb *atana* = 'contracto brevique gressu incessit'; but this may be denominative. אֶסְסָה has of course no connection with *asinus*; see Lag. *Form.* 817.

⁴ L¹² derives אֶסְסָה from *arada*, 'he threw a stone far,' referring to the effect of the animal's trampling hoofs (*Ubers.* 38 f.). אֶסְסָה seems to be connected with the notion of swift flight.

ASSAPHIOTH

2:24 (G¹¹ ΕΑΛΑΤΥΡΟC) 14:6 Dan. 5:21 (G¹¹ οναγγοί) Hos. 8:9 (G¹¹ om.) Gen. 16:12 RV (G¹¹ οναγγοί); there was perhaps originally a reference to the wild ass (as in 1 S. 24:14 [15] 26:29, where MT now reads אֶסְסָה. FLEA [p. 31]). (c) For 'young ass' Is. 30:6 (G¹¹ ονός), 21 (G¹¹ βοεC), EV 'colt' Gen. 49:11 32:16, EV 'colt' Zech. 9:9 and (G¹¹ ονός) Job 11:12, EV 'ass colt' Judg. 10:4 12:14.

A comparison of the passages in which אֶסְסָה and אֶסְסָה respectively occur shows that the former was more used for carrying burdens and for agriculture, the latter for riding. Hence some have thought that אֶסְסָה denotes a superior breed and not simply 'she-ass'; but this opinion is now given up. We must conclude that she-asses were preferred for riding. As the name אֶסְסָה shows, the Eastern ass is generally reddish in colour; ¹ white asses are rarer, and, therefore, used by the rich and distinguished. This explains the reference in Judg. 5:10.²

The אֶסְסָה (young ass, colt, foal; in Ar. specifically wild ass; see Hommel, *Saugethiere*, 127 ff.) was used variously for carrying burdens (Is. 30:6), for agriculture (17:24), and for riding on (Zech. 9:9). On Judg. 10:4 12:14, see J. VII. On the place of the ass and on its employment among the Jews see generally Jos. *c.* 1 p. 27.

The ass has been from the most ancient times a domesticated animal, and probably, in Egypt at any rate, preceded the horse as a servant of man. It is even questioned whether the wild stock from which it was derived survives at the present day, some authorities holding that the flocks of wild asses met with in various parts of Asia and Africa are but the descendants of those which have escaped from the domesticated state.

The domestic ass, *Equus asinus*, is believed to be descended from the wild ass of Africa, *E. asinus*, of which there are two varieties, *Africanus* and *Somalicus*; and the strong disinclination to ford even narrow streams which these animals show, and their delight in rolling in the dust, are regarded as indications that their origin is from some desert-dwelling animal. In former times this species seems to have extended into Arabia.

In the East the ass plays a large part in the life of the people, and has received a corresponding amount of care at their hands. Much trouble is taken in breeding and rearing the young. Darwin distinguishes four different breeds in Syria: 'first, a light and graceful animal (with an agreeable gait, used by ladies; secondly, an Arab breed reserved exclusively for the saddle; thirdly, a stouter animal used for ploughing and various purposes; and lastly, the large Damascus breed, with peculiarly long body and ears.'

The wild asses which roam in small herds over a considerable part of Asia are sometimes regarded as belonging to one species, the *Equus hemionus*; sometimes to three, the *E. hemippus* found in Syria, the *E. onager*, the Onager of Persia, Beluchistan, and parts of Northern India, and the *E. hemionus* of the high table-lands of Tibet. Sven Hedin describes the last-named as resembling a mule. Living at such high altitudes it has unusually large nostrils. These are artificially produced by the Persians, who slit the nostrils of their tame asses when about to use them for transport purposes in mountainous districts. The Syrian species or subspecies rarely enters the N. of Palestine at the present time. Wild asses congregate in herds, each with a leader, and are said to migrate towards the south at the approach of winter. They are so fleet that only the swiftest horses can keep pace with them, a fact recorded both by Xenophon and by Layard; and they are so suspicious that it is difficult to approach within rifle-shot of them. They are eaten by the Arabs and the Persians. N. M.—A. E. S.

ASSABIAS (ΑΣΑΒΙΑC [L]), RV SABIAS, 1 Esd. 19:2 = 2 Ch. 35:9, HANABIAH, 6.

ASSALIMOTH (ΑΣΑΛΙΜΟΘ [really -ΑΣC CAA, A]), 1 Esd. 8:36 AV = Ezra 8:10, SHELUMITH, 4.

ASSANTIAS, RV *Assamias* (ΑΣΑΜΙΑC [B]), 1 Esd. 8:54 = Ezra 8:24, HANABIAH, 7.

ASSAPHIOTH (ΑΣΑΦΕΙΩΘ [B]), 1 Esd. 5:33 RV = Ezra 2:55, HANAPHETHIL.

¹ Cp Plutarch's statement that the Egyptians execrate the ass διὰ το πύδον γεγονότα τοις Τυφύρτα, και ἀνισθῆναι τῆς χροῆς (quoted by Bochart).

² מִצְרַיִם, not strictly white, but white spotted with red, as the same word means in Arabic, where it is specially applied to the she-ass.

ASSASSINS

ASSASSINS, the RV rendering of *ציקאיון* [Ti. VII]. *starii* — i.e., 'daggersmen': Acts 21:38 (AV murderers). They are so called from the *sica* or small curved sword, resembling the Persian acinaces (Jos. *Ant.* xx. 810), which they carried under their cloaks. Though used generally without any political meaning (cp Schür. *GT* 1430, note), the term *starii* came to be employed to denote the baser and more fanatical associates of the zealots, whose policy it was to eliminate their antagonists by assassination. See ZEALOT.

ASSEMBLY (עֲדָה) is frequently used, especially in post-exilic literature, to denote the theocratic convocation of Israel, the gathering of the people in their religious capacity. It thus becomes synonymous with *ἐκκλησία* (so generally *ἑ*; in Nu. 20:40-42 συναγωγή), so I. k. 4 1314, which in the NT is used of the Christian church, in contrast to the Jewish *kahal* of the Mosaic dispensation. See CHURCH, § 1. Closely allied in meaning and usage is *קָהָל* (from *קָהַל*, 'to appoint': a company assembled together by appointment), employed to denote the national body politic, Mosaic Israel encamped in the desert (cp Kue. *Leit.* § 15, n. 12). Both, *עֲדָה*, include the *qer* (cp for *q* Ex. 12:16, for *q* Nu. 15:15; see STRANGER AND SOJOURNER), but are sometimes interchanged (cp Nu. 16:40 ff. [17:10 ff.] 201). The distinction between the two, which was doubtless always observed, is clearly seen, e.g., in Lev. 14:1 f. (if the whole congregation of Israel shall sin, and the thing be hid from the eyes of the assembly . . . when the sin therein is known then the assembly shall offer . . .), where the *kahal* is composed of the judicial representatives, the picked members of the *עֲדָה* (cp also Dt. 23:1 f. where certain classes of the people — i.e., the *edah* — may not enter into the *kahal*). See SYMBOLOGY.

Apart from their occurrence in the more secular meaning of 'multitude, number, swarm,' both *עֲדָה* and *קָהָל* occur only rarely in pre-Deuteronomian literature.

עֲדָה (1) Ex. 'assembly': cp 1 S. 16:3; Lev. 4:12 ff. and Jer. 26:17 (סυναγωγή) 509 (γῶμα) 1 S. 22:4 (ἀγλος), etc. (2) Ex. 'congregation': 1 K. 8:14 65 123 (see KINGS, § 3) Ezra 10:6 (of the *golah*) Pr. 9:14 Mt. 25. (3) AV 'congregation,' RV 'assembly': Nu. 15:12 16:47 [17:12] Dt. 23:1 ff. 31:30 Jos. 8:35; Judg. 21:5 (see 1 S. 16:3, § 13) Job 30:28 Ps. 89:5 [6] 107:2. The collocation 'day of assembly' Dt. 9:10 104 (ἑορτή) 18:6, refers to the day on which the law was given upon Sinai. For its more secular meaning cp Gen. 35:11 (P² Ex. 17:17 (ἑορτή) Ex. 10:6 (of the *golah*) Gen. 23:2 48:4 (P² Nu. 22:4 (ἑορτή) 2 AV 'multitude,' RV 'company' (in Ex. 16:40 23:46, ἑορτή, RV 'assembly'). Cp also 1 S. 17:47; the assembly of Israel present at the light between David and Goliath (1 S. 17:47; see SAMUEL, § 4). The earliest occurrence is probably Gen. 49:6 (ἑορτή) the *kahal* of Simon and Levi (parallel to *עֲדָה*). Closely related is *עֲדָה* 'assembly,' Neh. 5:7; cp Dt. 33:2 (AV 'congregation'), and 1 S. 19:20 (after *עֲדָה*; cp *ḥad* *ad hoc*). The passage is Midrashic. The verb *עֲדָה* (עֲדָה, *עֲדָה*, *עֲדָה*) is equally rare in pre-exilic literature; cp Jer. 26:9 Dt. 4:10 31:12 28 also 1 K. 8:17 12:21 (see KINGS, § 4) Judg. 20:1 (see JUDGES, § 13) Ex. 32:1 (ἑορτή) (συναστάναι) 16:40 (παρεμβολή) and 2 S. 20:14 (E² cp under *SUBBA*).

קָהָל, 'congregation' (ἑορτή usually συναγωγή) EV Ex. 16:1 ff. Nu. 20:11, etc. EV 'assembly,' Ps. 22:16 [17] Pr. 5:14; but RV 'congregation,' Lev. 8:4 Nu. 8:9 10:2 f. 16:2 20:8 Ps. 86:14. In pre-exilic literature cp Nu. 20:11 (R²); Jer. 6:18 (ἑορτή) and Hos. 7:12 (ἑορτή) (in both corrupt) 1 K. 8:5 (ἑορτή) (cp above) Judg. 20:1 21:13 16 (cp above). In a wholly secular sense, cp Judg. 14:9 swarm (of bees), Ps. 68:30 [31] multitude (of bulls).

'Assembly' also represents the following:—

1. *עֲדָה*, *עֲדָה* *ḥadrah*, *ḥadrah*, apart from Jer. 9:2 [1]

2. *קָהָל* (to call) = Ar. *kāla* (to speak); cp Syr. *kāla* to call, collect; *kāla* *ḥadrah*. The change from 'calling' to 'assembling' is easy; cp use of Heb. *קָהָל*. The relation between *קָהָל* (assembly) and Ar. *kāla* is analogous to that between *קָהָל*, council, etc., and Syr. *qāwāḥā*, talk, conversation (in Gen. 49:6 they are parallel). *קָהָל* finds an interesting parallel in Sab. *qāwāḥā*, the assembly of 'Ahtar (Ashoreth). On the usage of *kāla* see Holzinger, *Z. A. W.* 9 105 f. [30].

3. In these passages *ḥadrah* has *ḥadrah*.

4. From *קָהָל* to press, restrain; cp *קָהָל* 'detained' (1 S. 21:1 Jer. 36:5); perh. *qāwāḥā*, *tempus clausum*; cp WRS, *Sem.* 436, who notes the proverbial *קָהָל* 'one under a taboo and one free.' Cp Ass. *qāwāḥā*, to bind, enclose; *qāwāḥā*, magical spell, constellation (Muss-Arnolt).

ASSHURIM

where it is used of a 'band' of evil doers (συνεδοσ, EV 'assembly'; Che. emends to *קָהָל*, *QQA*, July 1898), is a technical term for some public religious convocation imposing restraints on the individual (EV, SOLEMN ASSEMBLY); cp 2 K. 10:1 in honour of Baal, *ἡμεῖς* [B.A.], *θεοῦ* [L.], Joel 1:4 2:15 (ἡμεῖς *ḥadrah* parallel to *עֲדָה*, *ḥadrah*, *θεοῦ* [L.] = *קָהָל*), Am. 5:21 (parallel to *עֲדָה*, *ḥadrah*, *θεοῦ* [L.] = *קָהָל*), and Is. 1:11 (ἡμεῖς *ḥadrah*, and see Jastrow, *Amer. J. Theol.* '98, p. 330; *ḥadrah* *ḥadrah*, *ḥadrah*).

Technically, *ḥadrah* is used almost wholly in post-exilic writings (ἑορτή invariably ἑορτή, finale, close; cp *ḥadrah* title Ps. 28 [29]), of (a) the assembling upon the seventh day of unleavened cakes, Dt. 16:21 (RV⁹⁸ CROSSING FESTIVAL); (b) the eighth or supererogatory day — in ecclesiastical language the octave — of the Feast of Booths, Lev. 23:36 Nu. 29:35 (RV⁹⁸, see above) Neh. 8:12; similarly 'the eighth day at the close of Solomon's dedicatory festival' (2 Ch. 7:9), and (c) the Feast of Weeks, Jos. *Ant.* iii. 106 (*ἑορτή*) and in the Mishna.

2. *קָהָל*, *ḥadrah* (Nu. 16:21) *ḥadrah*, famous in the congregation, RV, preferably 'called to the assembly'; *ḥadrah*; cp also 1 S. 7:18 (RV⁹⁸ EV synagogues, *ḥadrah*). The locution *קָהָל* *ḥadrah*, 'tent of congregation' (RV 'meeting') (*ḥadrah* *ḥadrah*), occurs frequently in P. also Ex. 33:7 Nu. 12:4 Dt. 31:14 (E² Nu. 11:16 [1]); and outside Hex. in 1 S. 22:2 *ḥadrah*; but *ḥadrah* (1 K. 8:4) *ḥadrah* *ḥadrah* (see KINGS, § 5). Cp also CONGREGATION, MOUNT OF; SYNAGOGUE; and see TABERNACLE.

קָהָל is properly an appointed time or place (like *קָהָל* from *קָהָל*; cp Gen. 18:14 (ἑορτή), etc.; Lam. 2: (ἑορτή), etc.; hence used of a sacred season or set feast (Hos. 9:5, *ḥadrah*, etc.), probably also one set by the moon's appearance (cp Gen. 1:14 *ḥadrah*). In designating feasts it is employed in a much wider sense than *קָהָל* (see FEASTS, § 6, DANCE, § 3). It is used not only of the year of Release (Dt. 31:10 *ḥadrah*), and of the Passover (Hos. 12:9 [10] *ḥadrah*), but also of the Sabbath, New Year, and Day of Atonement (cp Lev. 23 *ḥadrah*).

3. *קָהָל*, *ḥadrah*; Is. 1:13 *ḥadrah*, the calling of assemblies (*ḥadrah* *ḥadrah*); cp Is. 4:15 (*ḥadrah* *ḥadrah*). 'The locution *קָהָל* *ḥadrah*, 'holy convocation' (*ḥadrah* *ḥadrah*, or *ḥadrah* *ḥadrah*), only in P (Ex. 12:16 Lev. 23:2 ff. Nu. 28 18:25 f. 29:17 12:1).

4. *קָהָל*, *ḥadrah*, Jer. 6:11 (*ḥadrah* *ḥadrah*) 15:17 (*ḥadrah* *ḥadrah*); Ps. 89:7 [8] 111:1, RV 'council,' *ḥadrah*; also in Ez. 13:9, AV⁹⁸ RV 'council,' RV⁹⁸ 'secret,' *ḥadrah*. See COUNCIL, 3.

5. *קָהָל*, *ḥadrah*, *ḥadrah*, Eccl. 12:11 (*ḥadrah* *ḥadrah*), masters of assemblies, a reference to the convocations of the wise men (cp Ph. *ḥadrah* *ḥadrah*, 'member of an assembly'); RV⁹⁸ 'collectors of sentences'; Tyler, 'editors of collections'; Haupt, 'verses of a collection'; Che. 'framers of collections' — i.e., *ḥadrah* (*ḥadrah*, *ḥadrah*, 182).

6. *ḥadrah* (cp above) Mt. 16:13 18:17 Acts 19:32 39 41 Heb. 12:21; see CHURCH.

7. *ḥadrah* (cp above) Ja. 2:2 AV, RV⁹⁸; RV SYNAGOGUE (p. 7).

ASSHUR. See ASSYRIA.

ASSHUR, CITY OF. See TELASSAR.

ASSHURIM (אַשּׁוּרִים, *ashurim* [A]; *ashurim* [D]; *ashurim* [E]), the first born of DEBAN (Gen. 25:23). The name is enigmatical. Hommel (*MT* 239 f.) thinks that we should read Ashurim, not Asshurim, and that Ashur is the fuller and older form of SHUR. In a Minæan inscription (Glaser, 1:155; cp Wi. 10:28 f. and see ZDMG, 1893, p. 527) Egypt, Ashur and 'The Naharûn are grouped together (see EBLER). The same territory, extending from the 'River of Egypt' (?) to the country between Beersheba and Hebron, may perhaps be meant in Gen. 25:18, where the gloss 'in the direction

1 The only pre-exilic occurrence of 'y' in a technical sense; but note that according to St. *GT* 1:658, 27, 1-4 5-8 are doubtful; cp Nowack, *Arch.* 2:154 note.

2 We, however (*KL Proph.* 60), reads *קָהָל*, and Now. *קָהָל*.

ASSIDEANS

of אַשּׁוּר ('Ashur') was misunderstood by the authors of the vowel-points. The reference intended was, according to Hommel, to Ashur in S. Palestine; he proposes to read Ashur, not Asshur, also in Nu. 21:22-24. The latter view, at any rate, is very improbable (see BALAAM, § 6). Cp. also GISHUR, 2.

ASSIDEANS, RV 'Hasideans,' RV⁹²: 'that is Chasidim' (חַסִּידִים [ANV]), is a transcription of the Hebrew *hasidim*, 'pious ones' (AV, generally, *saints*). It is often used of faithful Israelites in the Psalms (17 times in plur., 5 times in sing.), and sometimes unquestionably of the so-called Assideans (e.g., 116:15 119:50). In 1 Macc. the name appears as the designation of a society of men zealous for the Law (1 Macc. 2:42—according to the correct text as given by Fritzsche), and closely connected with the scribes (1 Macc. 7:12 f.). It is plain from these passages that this society of 'pious ones,' who held fast to the law under the guidance of the scribes in opposition to the 'godless' Hellenising party, was properly a religious, not a political, organisation. For a time they joined the revolt against the Seleucids. The direct identification of the Assideans with the Maccabean party in 2 Macc. 1:46, however, is one of the many false statements of that book, and directly contradictory to the trustworthy narrative of 1 Macc. 7, which shows that they were strictly a religious party, who scrupled to oppose the legitimate high priest, even when he was on the Greek side, and withdrew from the war of freedom as soon as the attempt to interfere with the exercise of the Jewish religion was given up. We are not to suppose that the Assidean society first arose in the time of the Maccabees. The need of protesting against heathen culture was doubtless felt earlier in the Greek period. The 'former *hasidim*,' as a Jewish tradition (*Nedarim*, 10a) assures us, were ascetic legalists. Under the Asmonean rule the Assideans developed into the better known party of the Pharisees, and assumed new relations to the ruling dynasty. It appears, from the *Psalter of Solomon*, which represents the views of the Pharisees, that the party continued to affect the title of 'pious ones' (חסידים), but less frequently than that of 'righteous ones' (דיקאים). Indeed, the third Jewish party of the Asmonean period had already appropriated the former name, if we may adopt Schürer's derivation of ESSENE (q.v.). See We. *Ph. u. Sadd.* 74, p. 76 ff., whose results WRS adopted, and cp. Schür. *II st. ET* 1:12; Che. *OPS*, 56 (on the use of 'Assideans'), and other passages (index under *hasidim*). W. R. S.—T. K. C.

ASSIR (אַסִּיר, 'prisoner'; but perhaps rather אֲסִיר = Osiris; 1 ep IIUR).

ASSYRIA

1. (In Ex. אַסּוּר [BF], אַסּוּר [AL]; in 1 Ch. אַסּוּר, אַסּוּר, אַסּוּר [B], אַסּוּר [V], אַסּוּר אַסּוּר [L]; *Assir*). The eponym of one of the families or divisions of the Korahite guild of Levites; Ex. 6:24 [L]. Cp. 1 Ch. 6:22 f. 37 [7 f. 20], and for the interpretation of these disreputable genealogies see KORAH.
2. Son of Jeconiah (1 Ch. 3:17, אַסּוּר [BAL]). So AV, following a Jewish view that Assir and Shebriel are the names of two different sons of Jeconiah (*Sanhedrin*, 37a; Midrash *Tanpura*, par. x.; Midr. *Shur hashirim*, on 86; so Kiuchi); but the best texts (B¹, G¹, G², G³) make 'Jeconiah-Assir' the name of one man. Kau. *HS* and *SROT* rightly restore the article before Assir (the preceding word ends in *n*). Render, therefore, 'Jeconiah the captive' (so RV). Cp. SNEALTIE.

ASSOS, or **ASSUS** (Ἀσσοῦ [Ti. WH]), Acts 20:13, a town and seaport in the Roman province of Asia; now *Behram Kalasi*. Strabo, who ranks Assus and Adramyteum together as 'cities of note,' pitifully describes the former as lying in a lofty situation, with splendid fortifications, and communicating with its harbours by means of a long flight of steps (610, 614). So strong was the position that it gave rise to a pun by the musician Stratomenus, who applied to it the line

ἄσσον ὦ, ὅς κεν θάσσον δαέθρου πείραθ' ἔλθαι.
'Come anigh, that anon thou mayest enter the toils of death' (Hom. *Il.* vi. 143). The joke lay in reading ἄσσον ὦ = 'Come to Assus.' The town was always singularly Greek in character. Leake observes that its ruins give 'perhaps the most perfect idea of a Greek city that anywhere exists.' The material is granite, which partly accounts for their immunity from spoliation. One of the most interesting parts is the Via Sacra, or Street of Tombs, extending to a great distance to the NW. from the gate of the city. It is bordered by granite coffins, some of them of great size. In Roman times, owing to its supposed power of accelerating the decay of corpses (Pl. *HA* 2:93 36:27), the stone of Assus received the name *sarcophagus*. Paul must have entered the city by the Street of Tombs on his last journey to Jerusalem (Acts 20:14). The apostle had landed at Troas and walked or rode the 20 m. thence to Assus in time to join his companions, who had meanwhile sailed round Cape Lectum.

A good account of Assos is given in Fellows, *Asia Minor*, 52; Murray's *Handbook of A. M.* 64; for its inscriptions see *Report of the American Expedition*, 1882. W. J. W.

ASSUERUS (Ἀσούρος [B] etc.) Tob. 14:15† AV, RV AHASUERUS (q.v., no. 3).

ASSUR (אֲשּׁוּר) Ezra 4:2 Ps. 83:8 AV, 4 Esd. 2:8 EV (*Assur* [ed. Bensly]) Judith 2:14 etc. AV, RV ASSHUR; elsewhere RV ASSYRIA (q.v.).
2. (Ἀσσυρία [BA]), 1 Esd. 5:31 = Ezra 2:51, HARKUR.

Assur, the name of the country known to us as Assyria, was written in Hebrew אַשּׁוּר, EV ASSHUR, or more fully אֲשּׁוּר אַשּׁוּר, in the LXX.

1. **Names.** Ἀσσυρία and Ἀσσυρίοι (sometimes Ἀσσυρία) by Josephus and the Greek historians; Ἀσσυρία, in the Greek of the Alexandrian epoch; Ἀσσυρία, and in Aramaic *Athur*, *Athuriya*, in which form the name survived as that of a diocese of the Nestorian Church.

Other forms occurring once in *OT* are: -אֲסּוּר in E and in A; אֲסּוּרֵי in D, in A, and in L respectively; -אֲסּוּר in E; אֲסּוּרֵי in L.

1 Nestle, *Eigenamen*, 111; Che. *Proph. Is.* 3:2 144 300, and on Is. 10:1 in *SROT*; see also NAMES, § 82.
2 For literature see BABYLONIA, § 19 ff.

in A¹; אֲסּוּרֵי in A; אֲסּוּרֵי in B²; אֲסּוּר in B³ אֲסּוּרֵי a, b, c, 1 (and twice in A); אֲסּוּר in K².

By the Assyrians themselves the name of their country was written phonetically אֲשּׁוּר or אֲשּׁוּר אֲשּׁוּר, or (combining the two) אֲשּׁוּר אֲשּׁוּר, the signs אֲ and אֲ being determinatives respectively for 'land' and 'place.' Subsequently, the two signs that formed the word, אֲ (= a) and אֲ (= sur), were run together and the name was written אֲשּׁוּר אֲשּׁוּר.

1 In 20:13 Vg. translates ἀπαρτες ἄσσον (Ti. WH) by *cum sustulissent de Asson*, taking the word (incorrectly) as the name of the city.

name

² On this see SVRJA.

4. Description. E. and W. Assyria and divides Assyria into an E. and a W. district. That part of Assyria which is situated on the E. or left bank of the Tigris, though the smaller, has always been much the more important. The country on that side of the river consists of a continuous plain broken up by low detached ranges of limestone hills into a series of shallow valleys through which small streams run. All the main tributaries, too, that feed the Tigris rise in the Kurdish mountains, and flow through this E. division of the country. The E. Khābūr, the Great or Upper Zab, the Little or Lower Zab, the Arhem, and the Diyālā join the Tigris on its left or E. bank. Being therefore so amply supplied with water, this portion of the country is very fertile, and well suited by nature for the rise of important cities. On the other hand, W. Assyria, which lies between the Tigris and the Euphrates, is a much drier and more barren region. The fall of the two rivers between the point where they issue from the spurs of the Taurus and the point where they enter the Babylonian alluvium—a distance of six hundred or seven hundred miles—amounts to about one thousand feet, the Tigris having the shorter course, and being, therefore, more rapid. The country between the rivers consists of a plain, sloping gently from the NW. to the NE. In its upper part this region is somewhat rugged; it is intersected by many streams, which unite to form the Beḥdī and W. Khābūr. The rivers flowing S. join the Euphrates, and the district through which they pass is watered sufficiently for purposes of cultivation. In the SW., however, the supply of water is scanty, and the country tends to become a desert, its slightly undulating surface being broken only by the Sinjar range, a single row of limestone hills. The district

ASSYRIA

S. of these hills is waterless for the greater part of the year; the few streams and springs are for the most part brackish, while in some places the country consists of salt deserts, and in others vegetation is rendered impossible by the nitrous character of the soil. It is true that on the edges of this waterless region there are gullies from one to two miles wide which present a more fertile appearance. These have been hollowed out by the streams in the rainy season, and, being submerged when the river rises, have in the course of time been filled with alluvial soil. At the present day they are the only spots between the hill-country in the north and the Babylonian plain in the south where permanent cultivation is possible. It has been urged that this portion of the country may have changed its character since the time of the Assyrian empire, and it is possible that in certain districts extensive irrigation may have considerably increased its productiveness; but at best this portion of Assyria is fitted rather for the hunter than for the tiller of the soil. The land to the left of the Tigris is, therefore, much better suited for sustaining a large population, and it is in

5. Cities.

this district that the mounds marking the sites of the ancient cities are to be found. Asur, the earliest city of Assyria, is indeed situated to the west of the Tigris, near the spot where Kāfāt Sherkat now stands; but its site is within a short distance of the river, and it was the only city of importance on that side of the stream. Apart from its earliest capital, the chief cities of Assyria were Nineveh, Calah, and Dar-Sargina. Nineveh, whose foundation must date from a period not much more recent than that of Asur, was considerably to the N. of that city, opposite the modern town of Mosul (*Marāṣīṭ*), on the E. bank of the Tigris, at the point where the small stream of the Khosr empties its waters; its site is marked by the mounds of Kuyunjik and Nebi Yūnus (cp NINEVEH). Calah, founded by Shalmaneser I., corresponds to the modern Nimrud, occupying a position to the S. of Nineveh on the tongue of land formed by the junction of the Upper Zab with the Tigris (cp CALAH). Dar-Sargina, 'the wall of Sargon,' was founded by that monarch, who removed his court thither; the site of the city is marked by the modern village of Khorsabad, to the NE. of Nineveh (cp SARGON). It will be seen that there was a tendency throughout Assyrian history to move the centre of the kingdom northwards, following the course of the Tigris. Other cities of importance were Arbā'il or Irbā'il (Arbēla) on the E. of the Upper Zab; Ingur-Bēl (corresponding to the modern Tell-Balawān), situated to the SE. of Nineveh; and Tarbis, its site now marked by the village of Sherif-Khan, lying to the NW. of Nineveh.

From the above brief description of the country, it may be inferred that Assyria presents considerable differences of climate. E. Assyria was the most favoured region, possessing a good rainfall during winter and even in the spring, and having, in virtue of its proximity to the Kurdish mountains and its abundant supply of water, a climate cooler and moister than was generally enjoyed to the W. of the Tigris. In this latter region the somewhat rigorous climate of the mountainous district in the N. presents a strong contrast to the arid character of the waterless steppes in the centre and the S. The frequent descriptions of the extreme fertility of Assyria in the classical writers may, therefore, be regarded as in part referring to the rich alluvial plains of Babylonia. Not that Assyria was by any means a barren land. She supplemented her rainfall by extensive artificial irrigation, and thus secured for her fields in the hot season a continual supply of water. Her cereal crops were good. Olives were not uncommon, and the citrons of Assyria were famous in antiquity. Fruit trees were extensively cultivated, and, although the dates of Assyria

6. Natural resources.

were much inferior to those of Babylonia, olives, pomegranates, apricots, mulberry, vine, and figs were grown successfully. The tamarisk was exceedingly common shrub; oleanders and myrtles in the eastern district; but, except along the river on the mountain slopes, trees were scanty. The however, included the silver poplar, the dwarf oak, plane, the sycamore, and the walnut. Vegetables as beans, peas, cucumbers, onions, and lentils grown throughout the country. Though Assyria not compete with Babylonia in fertility, her supplies of stone and minerals far exceeded that of the south. Dig where you will in the alluvial soil of the south, you come upon no strata of rock or stone reward your efforts. In Assyria limestone, sandstone, and conglomerate rock were common, as were gray alabaster of a soft kind, an excellent material for sculpture in relief, abounds on the left bank of the Tigris; hard basaltic rock and various marbles also accessible in the mountains of Kurdistan. Copper, and lead were to be found in the hill country not far from Nineveh, while lead and copper obtained from the region of the upper Tigris in the neighbourhood of the modern town of Darbeker. Sulphur, alum, salt, naphtha, and bitumen were also common. Bitumen was extensively employed, in place of mortar or cement, in building (cp BRIT MUSEUM). Of wild animals of Assyria the lion and the wild bull are those most often mentioned in the historical inscriptions as affording big game for the Assyrian kings. Less ambitious sportsmen might content themselves with the wild boar and the deer, the gazelle, ibex, and the hare; while the wild ass, the bear, the jackal, the wild cat, and wild sheep were to be found. The most common of the birds were the eagle, the vulture, the bustard, the crane, the stork, the wild goose, wild duck, teal, tern, partridge (red-legged), the sand grouse, and the plover. We know from the monuments that fish were common. Of domestic animals of the Assyrians the principal were camels, horses, mules, asses, oxen, sheep, and goats. Dogs, resembling the mastiff in appearance, were employed for hunting. From the fact that heavy stone weights carved in the form of ducks have been found it may be assumed that the duck was domesticated.

The Assyrians belonged to the northern family Semites, and were closely akin to the Phœnicians, the Arameans, and the Hebrews. Their robust physical proportions and facial characteristics are well known from their monuments, and tally with what we know of their character from their own inscriptions and the writings of the Hebrew prophets. Is. 33:19 describes the Assyrians as 'a fierce people'—an epithet that fits a nation whose history is one perpetual warfare. The dividing line between courage and ferocity is easily overpassed, and in a military nation, such as the Assyrians were, it was but natural that there should be customs which to a later age seem barbarous. The practice of impaling the defenders of a captured city was almost universal with the Assyrians; the torturing of prisoners was common, and the practice of beheading the slain, whilst adding insult to the vanquished, was adopted as a convenient method of computing the enemy's loss, for it was easier to count heads than to count bodies. The difference in character between the Assyrians and the milder Babylonians was due partly to the absence of that non-Semitic element which gave rise to and continued to influence the more ancient civilisation of the latter (see BABYLONIA, § 7), partly, also, to differences of climate and geographical position. The ferocity and the courage of the Assyrians are to a great extent absent from the Babylonian character. It has been asserted that the Semites never make great soldiers, yet there have been two prominent exceptions to this generalisation—the Assyrians and the Carthaginians. The former indeed not

ASSYRIA

only displayed the energy of conquest, but also combined with it a great power of administration by which they organized the empire they had acquired. It was, however, the foundation of the Greek barbarism, and afterwards of the Roman, to regard the Assyrians as a singularly luxurious and sensual nation. Their riches, from the borders of the empire down to the kingdom which held the throne, were described as given up to luxury. It is possible that as regards the latter empire this tradition contains a substantial truth, for the growing luxury of Assyria may well have been one of the causes that brought about her fall. For the earlier and the middle period of Assyrian history, however, the statement is proved to be untrue both by the records of Assyria herself and by the negative evidence of the Hebrew prophets. These contemporaries of Assyria, who hated her with the bitter hatred which the oppressors of Israel always feel for their oppressors, truly, if ever, denounced her luxury. It was her violence and robbery that oppressed her victims. In the language of prophecy the nation is pictured as a lion (Nah. 2:9), and it is not as a centre of vice that is "the bloody city" that Nahum foretells the destruction of her capital city.

8. Language, etc. The Assyrians spoke a Semitic language, which they inherited from the Babylonians, a language that was more closely allied to Hebrew and Aramaic than to Arabic and the other

8. Language,
etc.

characters of the S. Semitic group. They wrote a non-Semitic character, one of the varieties of the cuneiform writing (see BABYLONIA § 4.7). Like their language, this system of writing came to them from the Babylonians, who had themselves inherited it from the previous non-Semitic inhabitants of Babylonia. The Assyrians, although retaining the Babylonian signs, made sundry changes in the formation of them, and in some it is possible to trace a steady development throughout the whole period covered by the Assyrian inscriptions. The forms of some of the characters in the inscriptions of almost every Assyrian king display slight variations from those employed by his predecessors. Indeed in some few cases the forms used at different periods differ more widely from one another than they do from their Babylonian original. The literature of the

then Babylonian original. The literature of the Assyrians was borrowed. In a sense they were without a literature, for they were not a literary people. They were a nation of warriors, not of scholars. In this they present the greatest contrast to the kindred in the S. Possessed of abundant practical energy, they were without the meditative temperament which fostered the growth of Babylonian literature; and, although displaying courage in battle and devotion to the chase, they lacked the epic spirit in which to tell the tales of their enterprise. The majority of the historical inscriptions which they have left behind them are not literature; they are merely lists of conquered cities, catalogues of captured spoil, and statistics of the slain. Though not original, however, the Assyrians were far from being illiterate. They took over, root and branch, the whole literature of Babylonia, in the copying, the collection, and the arrangement of which they displayed the same energy and vigor with which they prosecuted a campaign. It was natural that the priests and scribes, whose duty it was to copy and collate, should attempt compositions of their own; but they merely reproduced the matter and the methods of their predecessors. In a word, the Assyrians made excellent librarians, and it is to their powers of organisation that we owe the greater part of our knowledge of Babylonian literature. Since, therefore, the language, the system of writing, and the literature of the Assyrians were not of their own making, but merely an inheritance into which they entered, the description of them in greater detail falls more naturally under the article BABYLONIA (see § 19 ff.).

The religion of the Assyrians resembles in the main that of the Babylonians, from which it was derived. The ear's colonists from the south carried with them the

ASSYRIA

goals of the country which they were helping to attain. In the very first three weeks after the invasion, some 100,000 soldiers

9. Religion.

countryman and leader given a high position in the party. The party has a number of prominent leaders who were formerly in the army and navy, and who were formerly in the government. The party has a number of prominent leaders who were formerly in the army and navy, and who were formerly in the government. The party has a number of prominent leaders who were formerly in the army and navy, and who were formerly in the government.

Assyria is sometimes termed "the land of Ashur" and Nineveh, the city of Ashur. Her title, "the great," was not inconsistent with Ashur's supremacy. He was "the king of all the gods," and his national successes were regarded as the result of his initiative. It was Ashur who marked out the kings of Assyria from their birth, and in due time called them to the throne. It was he who invested them with power and gave them victory over their enemies, listened to their prayers, and ordained the policy they should pursue. The Assyrian army was "the troops of Ashur," the national war was Ashur's enemy, and every expedition is stated to have been undertaken only at his direct command. In fact, the life of the nation was consecrated to his service, and its energies were spent in the attempt to vindicate his majesty among the nations that surrounded them. His symbol was the winged circle in which was frequently enclosed a draped mitre, figure wearing a head dress with three horns and with his hand extended; at other times he is represented as holding a bow or drawing it to its full extent. The symbol may, perhaps, be explained as a visible representation that Ashur's might had no equal, his influence no limit, and his existence no end. This symbol is often to be found on the monuments as the accompaniment of royalty, signifying that the Assyrian king, as Ashur's representative, was under his special protection; and we find it not only symbolical above the king's image, but also carved on his seal and even embossed on his garment. It is possible that we may trace Ashur's exaltation of the god Ashur the Semitic tendency to monotheism, the complete vindication of which he effected, and express it in the Hebrew prophets. It may be supposed, however, that the new duty stood in only opposition to the older gods, and should by Ashur's side, not so powerful, it is true, but retaining considerable influence and leading them and without prejudice to the advancement of the nation's interests.

The spouse of Asur was Belti—that is, 'the Lady' *par excellence*—and she was identified with the goddess E-tar (see especially 3 R. 24, 80; 53, n. 2, 367) and, in particular with E-tar of Nimech. Another goddess who enjoyed especial veneration in Assyria was E-tar of Arbēl, who has been particularly prominent under Sennacherib and his successors, and was generally mentioned by the side of her namesake of Nimech. She was especially the goddess of battle, and from Assurbanipal we know the conventional form in which she was presented. 'This monarch, on the eve of an engagement with the E-lamites, feeling far from confident of his own success, appealed for encouragement and guidance to E-tar of Arbēl. The goddess answered the king's prayer by appearing that night in a vision to a certain son while he slept. On recounting his dream to the king, the seer described the appearance of the goddess in these words: 'E-tar, who dwells in Arbēl, entered, on the left and the right of her luring quivers; in her hand she held a bow; and a sharp sword that she draw for the waging of battle.'

Besides Asur and Ishtar, two other gods were held in particular respect by the Assyrians—Ninuth, the god of war, and Nergal, the god of the chase. Almost all

ASSYRIA

the Assyrian kings, however, had their own pantheons, to whom they owed especial allegiance. In many cases the names constituting the pantheon occur in the king's inscriptions in a set order that does not often vary.

Such were the principal changes which the Assyrians made in the pantheon of Babylonia, the majority of whose gods they inherited, with their functions and attributes to a great extent unchanged. It is true that our knowledge of Babylonian religion, like that of Babylonian literature, comes to us mainly through Assyrian sources; but though it passed to them, its origin and development are closely interwoven with the history of the older country. The cosmology of the Assyrians and their conception of the universe were entirely Babylonian (see BABYLONIA, § 25); their astrology (*ib.* § 34); their science of omens (§ 32); their system of ritual and their ceremonial observances (§ 20*f.*) were an inheritance from the temples and worship of the south.

Though in language, writing, and literature Assyria so closely resembles Babylonia, in her architecture she presents a striking contrast. The alluvial plains of the southern country contained no

10. Architecture.

stone, and the Babylonian buildings were, therefore, mainly composed of brick. The resources of Assyria were not so poor; the limestone and the alabaster with which her land abounded stood her in good stead.

The palace was the most important building among the Assyrians, for the principal builders were the kings. It was erected, usually, on an artificial platform of bricks or earth; in which fact we may possibly see a survival of a custom of Babylonia, where such precautions against inundation were necessary. The platform was generally faced with stone, and was at times built in terraces which were connected by steps. The palace itself was composed of halls, galleries, and smaller chambers built round open courts, the walls of the former being ornamented with elaborate sculptures in relief. It is only from their foundations that our knowledge of the Assyrian palaces has been obtained. From these remains a good idea of their extent can be gathered; but there is no means of telling the appearance they presented when complete. Their upper portion has been totally destroyed; it is a matter of conjecture whether they consisted of more than one story. The paving of the open court was as a rule composed of brick; but sometimes stone slabs, covered with shallow carving in conventional patterns, were employed.

The temple was subordinate to the palace. Our knowledge of its appearance is based mainly on its representation on the monuments, from which it would appear that the Assyrians inherited the Babylonian *zikkurratu* (temple-tower), a building in stages which diminish as they ascend (see BABYLONIA, § 16, *beg.*). Unmistakable remains of a building of this description were uncovered on the N. side of the mound at Nimrud. Another type of building depicted on the monuments has been identified as a shrine or a temple; it was a single storied structure, with a broad entablature supported by columns or pilasters.

The domestic architecture of the Assyrians has perished. The dwellings of the more wealthy must have resembled the royal residence. On the bas-reliefs are to be found villages which bear a striking resemblance to those of modern Mesopotamia; and, having regard to the eternal nature of things eastern, we may regard it as not unlikely that the humbler subjects of Assyria were housed no better nor worse than the villagers of to-day.

It was to adorn their palaces and temples that the Assyrians employed the sculptured slabs and bas-reliefs with which their name is peculiarly

10. Sculpture.

associated. The majority of these have come from the palaces of Asur-nisir-pal, Sargon, Sennacherib, and Asur-bani-pal. The work of the earliest of these kings is distinguished from that of his successors by a certain breadth and grandeur of treatment; but the constant repetition of his own figure, accompanied

ASSYRIA

by attendants, human or divine, becomes monotonous. The work of Sargon presents a greater variety of subject and treatment; but it is in the sculptures of Sennacherib and Asur-bani-pal that the most varied episodes of Assyrian life and history are portrayed. It was natural that battle-scenes should chiefly occupy the sculptor; yet even here the artist could give his fancy play. Whilst he was bound by convention to depict the vulture devouring the slain, he could carve at the top of his slab a sow with her litter trampling through a reed-bed. Armies in camp or on the march, the siege of cities or battles in the open, the counting of the slain and the treatment of prisoners—all are rendered with absolute fidelity. When an army crosses a river and boats for transport are not to be had, the troops are represented as swimming over with the help of inflated skins—a custom that survives on the banks of the Tigris to the present day.

Though the sculptures of Sennacherib and Asur-bani-pal have much in common, as regards both their matter and the method of their treatment, each king had his own favourite subject for portrayal on his monuments. Sennacherib liked most to perpetuate his building operations; Asur-bani-pal, his own deeds of valour in the chase. Sennacherib erected two palaces at Nineveh—the one at Nebi Yünüs, the other at Kuyunjik—but it is only at Kuyunjik that the palace has been thoroughly explored. On the walls of this latter edifice he caused to be carved a series of scenes in which his builders are represented at their work. Stone and timber are being carried down the Tigris upon rafts; gangs of slaves are collecting smaller stones in baskets, and piling them up to form the terrace on which the palace is to stand; others are wheeling hand-carts full of tools and ropes for scaffolding, or transporting on sledges huge blocks of stone for the colossal statues. The hunting-scenes of Asur-bani-pal may be regarded as marking the acme of Assyrian art. Background and accessories are for the most part absent. Thus, grotesque efforts at perspective, common to the most of early art, are avoided, with the result that the limitations in the methods of the early artist are not so apparent. The scenes portrayed are always spirited. The figures are all in motion. Whilst the elaboration of detail is not carried to an extreme, action is represented with complete success. This series of hunting-scenes contains pieces of great beauty. It is in striking contrast to the large majority of Assyrian sculptures, which tend to excite interest rather than admiration. Still, even the earlier work has not entirely failed in its purpose—ornamentation. The stiff arrangement of a battlefield has often a decorative effect; and the representation of a river with the curves and scrolls of its water contrasting with the stiff symmetrical line of reeds upon its bank, is always pleasing. Indeed, from a decorative point of view, Assyrian art attained no small success. Traces of colour are still to be found on some of the bas-reliefs, on the hair and beards of figures, on parts of the clothing, on the belts, the sandals, etc.; but the question whether the whole stone-work was originally covered

1 A singular detail may be noticed with reference to the representation of these skins. The soldier places the skin beneath his belly, and by means of his arms and legs paddles himself across the water. Even with this assistance he would need all his breath before his efforts landed him on the opposite bank; but in the sculptures each soldier is represented as retaining in his mouth one of the legs of the inflated skin, into which he continues to blow as into a bagpipe. The inflation of the skin could be accomplished far more effectively on land before he started, and the last leg of the beast could then be tied up so that the swimmer need not trouble himself further about his apparatus, but devote his entire attention to his stroke. This, no doubt, was what actually happened; but the sculptor wishes to indicate that his skins are not solid bodies but full of air, and he can find no better way of showing it than by making his swimmers continue blowing out the skins, though in the act of crossing. This instance may be taken as typical of the spirit of primitive art, which, diffident of its own powers of portrayal, or distrustful the imagination of the beholder, seeks to make its meaning clear by means of conventional devices.

ASSYRIA

with paint, or only parts of it picked out in colour, cannot be decided.

Even more famous than their sculptured slabs are the colossal winged lions and human-headed bulls of the Assyrians. They fired the imagination of the Hebrew prophet Ezekiel, and they impress the beholder of to-day. These creatures were set on either side of a doorway or entrance, and were intended to be viewed both from the front and from the side—a fact that explains why they are invariably represented with five legs. A very curious effect was often produced by running inscriptions across the bodies of these beasts without regard to any detail of carving or design. Asurnāsir-pal was a great offender in this respect. Not content with scarring his colossi in this manner, he ran inscriptions over his bas-reliefs as well, and displayed a lack of imagination by repeating the same short inscription again and again with but few variations.

Carving in the round was rarely practised. A stone statuette of Asurnāsir-pal, a seated stone figure of Shalmaneser II., and some colossal statues of the god Nebo have been found; but, though the proportions of the figure are more or less correct, their treatment is exceedingly stiff and formal. Modelling in clay, however, was common. A few small clay figures of gods have been discovered, and we possess clay models of the favourite hounds of Asurnāsir-pal. We know, too, that the stone bas-reliefs were first of all designed and modelled on a smaller scale in clay: the British Museum possesses fragments of these clay designs, as well as the rough drafts on clay tablets which the Assyrian masons copied when they chiselled the inscriptions.

In their metal work the Assyrians were very skilful. This we may gather both from the monuments and

11. Metal work.

from the actual examples of the art that have come down to us. A good majority of the originals of the metal trappings, ornaments, etc., that are represented on the monuments must have been cast. The metal weights in the form of lions are among the best actual examples of casting that we possess. In the British Museum, moreover, there is to be seen an ancient mould that was employed for casting. It was found near Mosul, and, although it must be assigned to a period about two centuries subsequent to the fall of Nineveh, it probably represents the traditional form of that class of matrix, and we shall not be far wrong in supposing that such moulds were extensively employed in the Assyrian foundries of at least the later empire. The mould in question is made of bronze, and is formed in four pieces which fit together accurately. Three holes may be observed on the flat upper surface. Into these holes the molten metal was poured. When the mould was opened after its contents had been given time to cool, there would be seen lying within it three barbed arrow-heads.

It was, however, in the more legitimate art of metal-beating that the Assyrians excelled. Much of the embossed work that adorned their thrones, their weapons, and their armour was wrought with the hammer, while the dishes and bowls from Nimrud and the shields from the neighbourhood of Lake Van are covered with delicate *repoussé* work, the design on the upper side being finished and defined by means of a graving tool. The largest and finest examples of this class of work that have been preserved are the bronze sheathings of the gates of Shalmaneser II., which were excavated at Tell-Balawat in 1871 and are now to be seen in the British Museum. The bronze gates of nations in antiquity were not cast in solid metal. They would have been too heavy to move, and metal was not obtained in sufficient quantities to warrant such an extravagance. The gate was built principally of wood, on which plates of metal were fastened; the object being to strengthen the gate against an enemy's assault, and especially to protect its wooden interior from destruction by fire. The metal coverings of Shalmaneser's

ASSYRIA

gate consist of bronze bands which at one time strengthened and adorned it. A brief inscription runs round them, while the space is filled with designs in delicate relief illustrating the battles and conquests of the king and in general treatment resembling the bas-reliefs of stone to which reference has been made.

Iron was used by the Assyrians; but bronze was the favourite substance of the metal-worker. Specimens of the bronze employed have been analysed, and it has been ascertained that it consists roughly of one part of tin to ten parts of copper. We know from the jewels represented on the monuments that ornamental work in silver and in gold was not uncommon, and specimens of inlaid work and of work in ivory have been found at Nimrud. Many of the examples we possess, however, betray a strong Egyptian influence, apparent in the general method of treatment and in the occurrence of the scarabæus, the cartouche, and a few hieroglyphs. Thus they must be regarded not as genuine Assyrian productions, but rather as the work of Phœnician artists copying Egyptian designs. Enamelling of bricks was extensively employed as a means of decoration. The designs consist sometimes of patterns, and sometimes of scenes in which men and animals take part. The colouring is subdued, and the general effect is harmonious. The fact that the tones of the colouring are so subdued is regarded by some as a proof that they have faded. Some excellent examples of enamelled architectural ornamentation in terra-cotta have been found at Nimrud. They bear the name of Asurnāsir-pal.

Engraving on gems and the rarer stones and marbles was an art to which the Assyrians especially devoted themselves. There have been found a

12. Seals, etc. few gems and seals that are oval in shape; but the general form adopted was that of a cylinder. Those of cylindrical form vary from about an inch and a half to two inches in length and from about half an inch to an inch in diameter. They were pierced along the centre so that the wearer could suspend them from his person by a cord. The use to which they were put was precisely similar to that of the signet ring. A Babylonian or an Assyrian, instead of signing a document, ran his cylinder over the damp clay tablet on which the deed he was attesting had been inscribed. No two cylinder seals were precisely alike, and thus this method of signature worked very well. As every wealthy Assyrian carried his own seal-cylinder, it is not surprising that time has spared a good many of them. (It may be noticed in passing that the class of poorer merchants and artisans did not carry cylinders. When they attested a document they did so by impressing their thumb-nail on the clay of the tablet. Whether a certain social status brought with it the privilege of carrying a cylinder, or whether the possession of one depended solely on the choice or rather on the wealth of its possessor, is a question that has never been solved.)

The work on the cylinders is always intaglio, the engraver aiming at rendering beautiful the seal impression rather than the seal itself. The subjects represented, which are various, include acts of worship, such as the introduction by a priest of a worshipper to his god, mythological episodes, emblems of gods, animals, trees, etc.; the engravings are generally religious or symbolical. The official seal of the Assyrian kings forms the principal exception to this general rule; it is circular and represents a royal personage slaying a lion with his hands. The character of the work itself varies from the rudest scratches to the most polished workmanship, and it may be regarded as a general rule that the more excellent the workmanship the later the date. The earlier seals are inscribed by means of the simplest form of drill and graver, and the marks of the tools employed for hollowing are not obliterated, the heads of the figures being represented by mere holes, while the bodies resemble fish-bones; it should be noted, however, that

ASSYRIA

early Babylonian seals of great beauty have been found at Telloh.

It is strange that the Babylonian and the Assyrian, living in a land of clay, building their houses of brick and writing on clay tablets—in fact, with plastic clay constantly passing through their hands—produced no striking specimens of pottery.

13. Pottery. They employed clay for all their vessels; but the forms these assumed do not show great originality, and ornamentation was but niggardly applied. That the Assyrians were glass-blowers is shown by the discovery of small glass bottles and bowls.¹

The domestic furniture of the Assyrians does not demand a detailed description. All that was made of wood has perished. Only the metal fittings survive; but these, with the evidence of the bas-reliefs, point to a high development of art in this direction.

14. Furniture and embroidery. Perhaps the most sumptuous specimens of Assyrian furniture that the monuments portray are the throne in which Sennacherib is seated before Lachish, the furniture in the 'garden-scene' of Ashur-bani-pal (both in the British Museum), and the chair of state or throne of Sargon on a slab from Khorsabad in the Louvre.

Of the art of embroidery, also, as practised by the Assyrian ladies, the invaluable evidence of the monuments gives us an idea. The clothes of the sculptured figures are richly covered with needle-work, especially on the sleeves and along the bottom of robes and tunics, while the royal robes of Ashur-nasir-pal are embroidered from edge to edge. The general character of the designs, whether consisting of patterns or of figures, resembles that of the monuments themselves.

One other subject must be noted in this connection, — it does not strictly fall under the heading either of art or of architecture, though it is closely connected with branches of both,—the knowledge of mechanics that the Assyrians display.

15. Mechanics. To those who have had any experience in the removal or fixing of Assyrian sculpture, and know the thickness of the bas-reliefs and the weight of even the smallest slab, the energy and skill required by the Assyrians to quarry, transport, and fix them in position is little short of marvellous. Yet all this was accomplished with the aid of only a wedge, a lever, a roller, and a rope. Representations of three of these implements in use are to be seen in the building-slabs of Sennacherib.

Among mechanical contrivances may be mentioned the crane for raising water from the rivers to irrigate the fields, and the pulley employed for lowering or raising a bucket in a well. The ingenuity of the Assyrians is apparent also in their various engines of war and the elaborate siege-train that accompanied their armies. The battering-rams, the scaling-ladders, the shields and pent-houses to protect sappers while undermining a wall—not to mention their chariots, weapons, and defensive armour—all testify to their mechanical skill.

The position of Assyria was favourable for commerce. Occupying part of the most fertile valley of W. Asia, she formed the highway between E. and W.

16. Commerce. Of her two great rivers, the Euphrates approaches within one hundred miles of the Mediterranean coast, yet empties its waters into the Persian Gulf. At the time of the Assyrian empire a highway of commerce must have lain from the Phœnician coast to Damascus and thence along the Euphrates to the Indian Ocean. Many important caravan routes

¹ They shine with beautiful prismatic tints. Most glass that has been buried for a considerable period, indeed, whether of Assyrian, Egyptian, Greek, or Roman manufacture, presents this iridescent appearance. It is a popular error to suppose that it possessed these tints from the beginning and that the art by which the colouring was attained has perished with those who practised it. The ancients must not be allowed to take the credit due to nature. The earth and the atmosphere acting on the surface of the glass have liberated the silice, and the process of decomposition is attended with the iridescent appearance.

ASSYRIA

also lay through Assyria. Nineveh maintained commercial relations with the districts around Lake Urmiah, and with Ecbatana, while to the west the Phœnician traders journeyed by the Sinjar range to Thapsacus on the Euphrates, thence south to Tadmor and through Damascus into Phœnicia; a second western caravan route lay through Harran into upper Syria and Asia Minor, while Egypt's trade with Assyria as early as the fifteenth century is attested by the Amarna tablets. The prophet Ezekiel has borne witness to the presence of Assyrian merchants at Tyre in his time; yet it was the nations that traded with Assyria rather than Assyria with the nations, for the Assyrians were essentially a people who preferred to acquire their wealth by conquest rather than in the market-place. The internal trade of Assyria is represented by the contract tablets dating from the ninth century to the end of the empire, that have been found at Kuyunjik. These tablets—not nearly so many as those discovered throughout Babylonia (*q.v.*, § 10, *beg.*)—deal with the sale of slaves, cattle, and produce, the purchase of land, etc., and bear witness to the internal prosperity of Assyria. They are written more carefully than the majority of those of Babylonia; and the Babylonian device of wrapping the tablet in an envelope of clay on which the contract was inscribed 1 in duplicate, with a view to its safer preservation, was not often adopted.

The form of government in Assyria throughout the whole course of her history was that of a military despotism. The king was supreme. He was Ashur's representative on earth and under the special protection of the gods.

17. Government.

Whatever policy he might adopt was Ashur's policy, and it was the duty of every subject of Assyria to carry out his will. The nation therefore existed for the monarchy, not the monarchy for the nation. The kingship rested on the army, on which it relied to quell rebellion and maintain authority as well as to conquer foreign lands. The army was in consequence the greatest power in the state. Its commander-in-chief, the *tartan* or *tartan*, held a position next to that of the king himself, in whose absence he led the troops and directed operations (*cp* TARRAN). The *saku* was an important lower officer; the *rab-kisir* was his superior; and the *lud-lake* and *rab-lake* were only second to the *tartan* (*cp* RAB-SHAKKI). The titles of many court officers are known; but it is difficult to ascertain their functions. The more important were eligible for the office of the *limmu*, to which they succeeded in order, each giving his name to the year during which he held office (see § 19 and CHRONOLOGY, § 23). In a military state such as Assyria a system of civil administration, it may be said, had almost disappeared. The governors of the various cities in the realm, whose duty it was to maintain order and send periodical accounts to the king, were not civilians. In fact, every position of importance in the empire was filled from the army. Priests and judges exercised a certain authority; but it was small in comparison with that of similar classes in Babylonia.

18. Excavations. It was Assyria that at first attracted the attention of explorers, though within recent years Babylonia has enjoyed a monopoly of excavation and discovery.

In the year 1820 Rich, the resident of the East India Company at Bagdad, visited Mosul and made a superficial examination of the mounds of Kuyunjik and Nebi Yûnus. He obtained some fragments of pottery and a few bricks inscribed in cuneiform characters, and he published an account of what he had seen. It was not until 1842 that attention was again attracted to these mounds. Botta, the French Consul at Mosul, then began to explore Kuyunjik. His efforts, however, did not meet with much success, and next year he transferred his attention to Khorsabad, 15 m. to the N. of Mosul. There he came across the remains of a large building that subsequently proved to be the palace of Sargon, king of Assyria (722-705 B.C.). The majority of the sculptures that he and Victor Place excavated on this site are to be found in the Louvre; some, however, were obtained for the British Museum by Sir Henry Rawlinson.

In 1845 Sir Henry Layard explored the mounds at Nimrud

ASSYRIA

and Kuyunjik, undertaking excavations at these places for the trustees of the British Museum; these diggings were continued by Loftus, Rassam, and others, under the direction of Sir Henry Rawlinson, who was then serving as Consul-General and political agent at Bagdad, and they resulted in the discovery of the principal remains of Assyrian art that have been recovered. At Nimrud the palaces of Ashur-nasir-pal (883-869 B.C.), Shalmaneser II. (860-824 B.C.), and Esarhaddon (681-669 B.C.) have been unearthed (cp. CAI, III), and at Kuyunjik (cp. NINEVEH) the palace of Sennacherib (705-681), and that of Ashur-bani-pal (669-625). The bas-reliefs, inscriptions, etc., from that palace are preserved in the British Museum. At Kuyunjik (1852-54) the famous library of Ashur-bani-pal, from which the greater part of our knowledge of Babylonian and Assyrian literature is derived, was discovered. At Kal'at Sherkat and at Sherif Khân excavations were successful; important stone inscriptions and clay cylinders of the early kings were found at Kal'at Sherkat.

The years 1878-79 were times of remarkable discoveries. During this period the 'finds' at Kuyunjik included the great cylinder of Ashur-bani-pal (775), the most perfect specimen of its kind extant; at Nimrud a large temple dating from the time of Ashur-nasir-pal was unearthed, while excavation at Tell-Bakawât resulted in the recovery of a second temple of Ashur-nasir-pal and the bronze coverings of the gate of Shalmaneser II. (cp. supra). Besides the excavators and explorers of Assyria to whom reference has been made, two others should be mentioned—George Smith and E. A. Wallis Budge. George Smith, in the years 1873, 1874, and 1875-76, undertook three expeditions to that country, on the last of which he lost his life. The most recent additions to the collection of cuneiform tablets from Kuyunjik were made by Budge in the years 1883 and 1891.

Of the Assyrian antiquities which have been recovered, most of the sculptures—sarcophagi from Khorsabad are in the Louvre; Berlin possesses a stele of Sargon found at Cyprus (cp. SARGON) and a stele of Esarhaddon; a few slabs from the palace of Ashur-nasir-pal have found their way into the museums at Edinburgh, the Hague, Munich, Zürich, and Constantinople, and others from Kuyunjik into private galleries; almost all else is to be found within the walls of the British Museum.

There are four main sources of information for the settlement of Assyrian chronology—the so-called

19. Chronology. 'Eponym lists' (see below), the chronological notices scattered throughout the historical inscriptions (see § 20, beg.), the genealogies of some of the kings give of themselves (see § 20, end), and lastly those two most important documents which have been styled the 'Synchronous History' (§ 21, beg.) and the 'Babylonian Chronicle' (§ 21, end).

The early Babylonians had counted time by great events, such as the taking of a city, or the construction of a canal (cp. CHRONOLOGY, § 2, beg.). This primitive system of reckoning, by which a period or date could be but roughly estimated, gave place among the later Babylonians to the fashion of counting time according to the years of the reigning king.

The Assyrians adopted neither of these methods. They invented a system of their own. They named the years after certain officers, each of whom may possibly have been termed a *limu* or *limmu*, though the majority of scholars agree in regarding this term as referring not to the officer himself, but to his period of office. These officers or eponyms were appointed in a general rotation; each in succession held office for a year and gave his name to that year; the office was similar to that of the archonate at Athens or the consulate at Rome. Lists of the *limmys* have been preserved from the reign of Ramman-nirari II. (911-890 B.C.) down to that of Ashur-bani-pal (669-625 B.C.). Some of them merely state the name of the eponym; others add short accounts of the principal events during his term of office. Now, it is obvious that the dates of all the years in this known succession will be known if there be any of them that can be determined independently. It fortunately happens that there is such a year. From the list we know that in the eponymy of Pur-Sagali in the month of Sivan (May-June) the sun was eclipsed, and astronomers have calculated that there was a total eclipse at Nineveh on the 15th of June 763 B.C. Hence the year of Pur-Sagali is fixed as 763, and the dates of the eponyms for the whole period covered by the lists are determined (see further CHRONOLOGY, § 24, and cp. below, § 32).

For the chronology before this period other sources must be sought. Approximately it can sometimes be

ASSYRIA

determined by means of data supplied by the inscriptions of the kings in the form of chronological notices or *reue ks*. For example, Sen-

20. Earlier period. nacherib in his inscription engraved on the rock at Bavian (see A 112 no. 7, i, in recounting his conquest of Babylon (689 B.C.), adds that Ramman and Sala, the gods of the city of Ekallati which Marduk-nadin-ahê, king of Akkad, in the time of Tiglath-pileser, king of Assyria, had carried away to Babylon, he now recovered and restored to their place after a lapse of 418 years (cp. below, § 28). According to Sennacherib's computation, therefore, Tiglath-pileser I. must have been reigning in the year 1107 B.C., and from the inscription of Tiglath-pileser himself on his cylinders (cp. below, § 28, beg.) we know that this year is probably not among the first five of his reign (cp. below, § 28). Moreover, Tiglath-pileser himself tells us that he rebuilt the temple of Anu and Ramman, which sixty years previously had been pulled down by Ashur-dan because it had fallen into decay in the course of 641 years since its foundation by Samsi-Ramman (cp. below, § 25). This notice, therefore, proves that Ashur-dan must have been on the throne about the years 1170 or 1180 B.C., and further approximately fixes the date of Samsi-Ramman as about the year 1820.

The date of one other Assyrian king can be fixed by means of a reference made to him by one of his successors. Sennacherib narrates (cp. below, § 27) that a seal of Tukulti-Ninib I. had been brought from Assyria to Babylon, where after 600 years he found it on his conquest of that city. Sennacherib conquered Babylon twice, once in 702 and again in 689; it may be concluded, therefore, that Tukulti-Ninib reigned in any case before 1289 B.C., and possibly before 1302 B.C. We thus have four settled points or pegs on which to hang the early history of Assyria.

Further assistance in the arrangement of the earlier kings is obtained from genealogies. Ramman-nirari I., for example, styles himself the son of Pudil (=Pudi-ilir), grandson of Bêl-nirari, great grandson of Ashur-uballit, all of whom, he states, preceded him on the throne of Assyria. Most of the Assyrian kings of whom we possess inscriptions at least state the name of their father, while in one instance we know the relationship between two consecutive kings from a considerably later occupant of the throne, Tiglath-pileser I., informing us that Samsi-Ramman was the son of Isini-Dagan and that each was an early *patesi* of Assyria. We thus know to a great extent the order in which the kings must be arranged, and in cases where a son succeeds his father we can assign approximately the possible limits of their respective rules.

A further aid is found in the 'Synchronous History' of Assyria and Babylonia. This inscription was an official document drawn up with the aim of giving a brief summary of the relations between Babylonia and Assyria from the earliest times in regard

21. Synchronous history, etc. to the boundary line dividing the two countries. The chief tablet on which this record is inscribed is, unfortunately, broken; but much still remains which renders the document one of the most important sources for Babylonian and Assyrian history. From it we ascertain for considerable periods which kings of Babylonia and Assyria were contemporaries.

Similar information for the period from about 775 to 604 B.C. is obtained from the Babylonian Chronicle.

Now, we know the order and the length of the reigns of a great majority of the Babylonian kings from the Babylonian lists of kings that have been discovered, and the dates of some can be fixed, like those of the earlier Assyrian kings, from subsequent chronological notices (cp. BABYLONIA, § 38). The dates and order, therefore, of the kings of both Babylonia and Assyria can to some extent be approximately settled independently of one another, and each line of kings can be controlled

from the other by means of the bridges thrown across between the two by the 'Synchronous History' and the 'Babylonian Chronicle.'

A further means of control is supplied by the points of contact that we can trace between Assyria and Egypt. Such are the Egyptian campaigns of Asur-āni-pal recounted on his cylinder inscription and the letter from Asur-ahallit to Amenophis IV., recently found at Tell el-Amāriā, and now preserved in the Gizeh Museum. These points of contact are not, however, sufficient to warrant a separate classification; and to go to Egyptian chronology to fetch help for that of Assyria would be to embark on an explanation *ignoti per ignotius* (cp. EGYPT, § 55 f., and CHRONOLOGY, § 19).

Assyrian chronology, therefore, unlike that of early Babylonia, may be regarded as tolerably fixed. The dates of the later Assyrian kings, with the exception of the successors of Asur-āni-pal, can be settled almost to a year, while the dates assigned by various scholars to the earlier Assyrian kings, though differing, do not differ very widely. The data summarised above, which must form the basis of every system of Assyrian chronology, are not elastic beyond a certain point. Thus, whilst no two historians agree precisely as to the dates to be assigned to many of these earlier kings, the maximum of their disagreement is inconsiderable, and the results arrived at by almost any one of them may be considered approximately correct.

With the Semitic races in general and the Babylonians and Assyrians in particular proper names retained their original forms with great persistency. Among these two nations, in fact, many names consist of short sentences, complete and perfectly grammatical; indeed, were it not for the determinatives placed before them to show that they are names (I for males, ♀ for females) the difficulty of reading Assyrian texts would be considerably increased.

The following are translations of some of the names of Assyrian kings the interpretation of which may be regarded as certain. Where the real Assyrian form of the name differs from the form now in common use it is added in brackets:—

Ismi-Dagan	'Dagon hath heard.'
Samši-Rammān	'My son is Rimmon.'
Asur-bēl-nīšū	'Asur is lord of his people.'
Puzur-Asur	'Hidden in Asur.'
Asur-ādīn-ahē	'Asur giveth brethren.'
Asur-ahallit	'Asur hath quickened to life.'
Bēl-nirari	'Bel is my helper.'
Rammān-nirari	'Rimmon is my helper.'
Shalmaneser (Sulmānu-ašaridu)	'Sulman is chief.'
Tukulti-Ninib	'My help is Ninib.'
Bēl-kudur-nur	'Bel, protect the boundary.'
Ninib-pal-Ešara	'Ninib is the son of Ešara.'
Asur-dān	'Asur is judge.'
Asur-rēšā	'Asur, raise the head.'
Tiglath-pileser (Tukulti-pal-Ešara)	'My help is the son of Ešara.'
Asur-bēl-kala	'Asur is lord of all.'
Asur-nāzir-pal	'Asur protecteth the son.'
Asur-nirari	'Asur is my helper.'
Sargon (Sarru-kīnu)	'The legitimate king.'
Sennacherib (Sin-ahē-erba)	'Sin (i.e., the Moon-god) hath increased "brethren."'
Esarhaddon (Ašur-ašiddina)	'Asur hath given a brother.'
Asur-āni-pal	'Asur is the creator of a son.'
Asur-ēil-ilāni	'Asur is prince of the gods.'
Sin-sar-iskun	'Sin hath established the king.'

The beginnings of the Assyrian empire are not, like those of Babylonia, lost in remote antiquity. It is far more recent in its origin. The account contained in Gen 10 11 to the effect that the Assyrians went forth from the Babylonians and founded their own cities is supported by all the evidence we can gather from the inscriptions. It is true that no actual account of this emigration has yet been found among the archives of either nation; but every indication of their origin tends to support the biblical account, for the Assyrians in all that they have left behind them

betray their Babylonian origin. Their language and method of writing, their literature, their religion, and their science were taken over from their southern neighbours with but little modification, and their very history is so interwoven with that of Babylonia that it is often difficult to treat the two countries separately.

The period at which the Assyrian offshoot left its parent stem, though not accurately known, can be set within certain limits. It must have been at least before 2300 B.C. The Babylonian emigrants, pushing northwards along the course of the Tigris, formed their first important settlement on its W. bank some distance to the N. of its point of junction with the Lower Zab. Here they founded a city, and called it Asur after the name of their national god, a city that long continued to be the royal capital of the kingdom.

The oldest Assyrian rulers did not bear the title of king. They bore that of *īšakku*, a term equivalent to the title *patesi*, assumed by many rulers of the old Babylonian cities in the S.

25. Earliest rulers.

The phrase *ī-īshiku* of the god Asur is not to be taken in the sense of 'priest.' In all probability it implies that the ruler was the representative of his god—an explanation that is quite in accordance with the theocratic feeling of the period.

The earliest *īšakkus* at present known to us are Ismi-Dagan and his son Samši-Rammān. The latter built a temple to the gods Anu and Rammān, which, Tiglath-pileser I. tells us, fell into decay; 641 years afterwards Asur-dān pulled it down, and 60 years later it was rebuilt by Tiglath-pileser himself. This reference enables us to fix the date of Samši-Rammān at about 1820, and it is usual to assign to Ismi-Dagan, his father, a date some twenty years earlier, *circa* 1840 B.C. In addition to his buildings at Asur, Samši-Rammān restored a temple of Ishtar at Nineveh. The names of other *īšakkus* are known, although their dates cannot be determined.

Bricks, for example, have been found at Kal'ai-Sherkat, the site of the ancient city of Asur, which bear the name of a second Samši-Rammān, the son of Isur-kapkapu, and record that he erected a temple to the national god in that city. Another brick from the same place is inscribed with the name of Iššun, the son of Hallu, commemorating his dedication of a building to the god Asur for the preservation of his own life and that of his son.

There are no data for determining the relation of Assyria to Babylonia at this period. Whether the early *īšakkus* still owed allegiance to their mother country or had already repudiated her claims of control is a question that cannot be decided with certainty. It is generally supposed, however, that at some period between 1700 and 1600 B.C. Assyria finally attained her independence.

The oldest Assyrian king whose name is known to us is Bel-kap-kapu. Rammān-nirari III., in an obscure

passage in one of his inscriptions, mentions Bel-kapkapu as one of his earliest predecessors on the throne of Assyria. This passage is, however, the only indication we possess of the time at which he ruled. The first Assyrian king of whom we have more certain information is Asur-bēl-nīšū. With this king our knowledge of Assyrian history becomes more connected, and we can trace in greater detail the doings of the various kings and the relations they maintained with Babylonia. The source of information that now becomes available is the 'Synchronous History' (see above, § 21).

From this document we learn that Asur-bēl-nīšū was on friendly terms with Kara-indas, a king of the third Babylonian dynasty, with whom he formed a compact and determined the boundary that should divide their respective kingdoms. These friendly relations were maintained by Puzur-Asur, *circa* 1440. Puzur-Asur, who concluded similar treaties with Burna-Buriat of Babylonia, Puzur-Asur was probably succeeded by Asur-ādīn-ahē (*circa* 1420). This king is mentioned in a letter of Asur-ahallit to Amenophis IV., king of Egypt, in which he refers to Asur-ādīn-ahē as his father. How long the friendly relations between Assyria and Babylonia continued we

ASSYRIA

cannot say; but it was impossible that friction should always be avoided. Assyria was proud of her independence, while Babylonia could not but be jealous of her growing strength. Thus it was not long before their relations became hostile. It is under *circa* 1410. Asur-uballit, to cement his friendship with Babylonia, had given his daughter Mutallipatsena in marriage to a Babylonian king, and Karad-ladā, the offspring of this union, in time succeeded his father on the throne. He was slain, however, in a revolt, and Nazib-laga, a man of unknown origin, was set up in his stead. To avenge the death of his grandson, Asur-uballit invaded Babylonia, slew Nazib-laga, and set the youngest son of Burna-buriāš, Kurigalzu II., on the throne. (Such is the account given in the 'Synchronisms History' of Asur-uballit's intervention in Babylonian affairs. It may be mentioned, however, that a parallel text contains a somewhat different version of the affair, with which the account in the 'Synchronisms History' has not yet been satisfactorily reconciled.) Kurigalzu did not long maintain his friendship with Assyria. Soon we find him at war with Asur-uballit's son *circa* 1380. Asur-uballit, Bel-ibni, however, defeated him at the city of Saggak, and after plundering his camp, added to the Assyrian territory half of the country from the land of Samarra to Babylonia. Bel-ibni's son Paili-lu (*circa* 1370) retained the territory his father had acquired, but did not attempt to make further encroachments on the S. He undertook successful expeditions, however, against the tribes on the E. and S.W. of Assyria. We possess an inscription on a brick from his palace at Asur, and another inscription of his on a six-sided stone (in the British Museum) records that he erected a temple to Samas at the Saggak. His son *circa* 1345. ruled in the territory recently acquired by his father, turned his attention to his S. boundary. He conquered the Babylonian king Nazi-marutāš in Kar-Estar-Akarsallu, and added considerably to his empire.

Ramman-niriri was succeeded by his son Shalmaneser I. He has left us no account of the expeditions he undertook; but that he was a great conqueror we gather from a reference in the annals of Asur-nasir-pal. This king relates that in his reign the Assyrians whom

Shalmaneser, king of Assyria, a prince who preceded him, had settled in the city of Halzidipha revolted under Huldi, their governor, and took the royal Assyrian city of Danilumusa. These places lay on the upper course of the Tigris; and it is evident from Asur-nasir-pal's account that Shalmaneser had formed a sort of military outpost at this spot which shows that he must have undertaken successful expeditions against the countries to the NW. of Assyria. We may conclude that it was in consequence of this extension of his territory along the Tigris that Shalmaneser transferred his capital from Asur in the south, which had formed the royal residence of Assyria, to Calah, a city of which he was the founder, as we learn from Asur-nasir-pal. This new capital was situated about eighteen miles S. of Nineveh (cp CALAH). Shalmaneser, however, did not neglect the older capital. He enlarged its royal palace and restored the great temples. We know also that he restored the great temple of Ishtar at Nineveh.

On his death he was succeeded by his son Tukulti-Ninib, who, like his father, busied himself in extending the NW. limits of his kingdom. At the *circa* 1290. sources of the Salmat, a river that joins the Tigris some distance above the modern Dair-bekr, he caused an image of himself to be hewn in the rock. He conquered Babylonia, and for seven years governed the country by means of tributary princes. Though we have not recovered any actual inscription of this king, we possess a copy of one made by the orders of Sennacherib, on a clay tablet in the British Museum. The original was inscribed on a seal of lapis-lazuli, and Sennacherib tells us it had been carried from Assyria to Babylon. Six hundred years later, says Sennacherib, on his conquest of that city, he found the seal among the treasures of Babylon and brought it back (cp above, § 20). The inscription itself is short, merely containing the name and titles of Tukulti-Ninib, and calling down the vengeance of Asur and Ramman on any one who should destroy the record. How or at what period the seal was brought to Babylon cannot be said with certainty; but it is not improbable that it found its way

ASSYRIA

there during Tukulti-Ninib's occupation of the country. This occupation was not permanent. At the end of seven years the nobles of Babylon revolted, and set Ramman-Sum-usur, or Ramman-Sum-nasir (the name may be read in either way), on the throne there as an independent king. Tukulti-Ninib was not a popular ruler, for he was slain in a revolt by his own nobles, who set his son, Asur-nasir-pal, upon the throne. We possess an Assyrian copy of a letter written by a Babylonian king named Ramman-sum-nasir to Asur-nasir and Nabu-danin, kings of Assyria. If, as has been suggested, the writer of this letter and the king who succeeded Tukulti-Ninib on the throne of Babylon are identical, we obtain the names of two other Assyrian kings of this period.

A few years later, under Bel-kudur-usur (*circa* 1245), we find the Assyrians and Babylonians again in conflict. Bel-kudur-usur, the Assyrian king, was slain in the battle; but Ninib-*circa* 1205. pal-I-sara retreated with the Assyrian army, and when the Babylonians followed up their advantage by an invasion of Assyria he defeated them and drove them from the country. The Babylonians, however, though repulsed, appear to have regained a considerable part of their former territory from the Assyrians.

The next occupant of the throne was *circa* 1200. Asur-dan, the son of Ninib-pal-I-sara. He retrieved the disasters which his father had sustained at the hands of the Babylonians. He invaded Babylonia against Zannan-Sum-iddin, captured the cities of Zaban, Irani, and Akarsallu, and returned with rich booty to Assyria. The only other fact that we know of this king was that he pulled down the temple of Ramman and Asur which had been erected by Samas-Ramman, but had since fallen into decay. His must have been an energetic reign, to justify the eulogy pronounced on him by his great-grandson Tiglath-pileser I. This monarch describes him as one 'who wielded a shining sceptre, who ruled the men of Bel, whose deeds and offerings pleased the great gods, and who lived to a good old age.' Asur-dan was succeeded by his son Mutakkil-Nusku (*circa* 1175), of whose reign we know *circa* 1140. nothing. He in turn was succeeded by his son Asur-rē-isi, whom Tiglath-pileser calls 'the mighty king who conquered the lands of the foe and verthrew all the exalted'; and from a clay bowl of his, bearing an inscription, we learn that the peoples of Lullum and Kuti were among those he overthrew. He was victorious against the Babylonians. The Babylonian king, Nebuchadnezzar I., desiring to extend the northern limits of his country invaded Assyria and besieged a border fortress. Asur-rē-isi, however, summoned his chariots of war, and on his advance the Babylonians retreated, burning their siege-train. Nebuchadnezzar, with tresh chariots and troops, soon returned; but Asur-rē-isi, after reinforcing his own army, gave him battle and inflicted on him a crushing defeat. The Babylonian camp was plundered, and forty chariots fell into the hands of the Assyrians.

On the death of Asur-rē-isi the throne passed to his son Tiglath-pileser I., whose reign marks an *circa* 1120. epoch in Assyrian history. He is, moreover, the first Assyrian monarch who has left us a detailed record of his achievements. The great inscription of this king is contained on four octagonal cylinders of clay which he buried at the four corners of the temple of Ramman at Asur to serve as a permanent record of his greatness and of the extent of the Assyrian empire during his reign. Each of the four cylinders contains the same inscription. Where one is broken or obscure the text can be made out from the others.¹

In the course of the introduction with which he prefaces the account of his expeditions he gives the following description of himself: 'Tiglath-pileser, the mighty king, the king of hosts who has no rival, the king of the four quarters, the king of all rulers, the lord of lords, . . . the king of kings, the excellent priest who, at the command of the Saggak, was entrusted with the shining sceptre and has ruled all men who are subject to Bel, the true shepherd whose name has been proclaimed into the rulers, the exalted governor whose weapons Asur has commanded and whose name for the ruler of the four quarters he has proclaimed for ever, . . . the mighty one, the destroyer who like the blast of a hurricane over the hostile land has proved his power, who by the will of Bel has no rival and has destroyed the foes of Asur.' On the conclusion of this preface the inscription goes on to recount the various campaigns in which Tiglath-pileser was engaged during the first five years of his reign. He first advanced against the inhabitants of Musku (the Meshech of the O.T. see CALAH), who had overrun and conquered the land of Kuti, which lay on both sides of the Euphrates to the NW. of Assyria. Tiglath-pileser, therefore, crossed the intervening mountainous region and defeated their

¹ Translation in *ANU* 1147

ASSYRIA

five kings with great slaughter. 'The bodies of their warriors,' he says, 'in the destructive battle did I cast down like a tempest. Their blood I caused to flow over the valleys and heights of the mountains. Their heads I cut off, and around their corpses I heaped them like . . . Their spoil, their possessions, their property without limit, I brought out. Six thousand men, the remainder of their armies, who before my weapons had fled, clasped my feet (i.e., tendered their submission). I carried them away and reckoned them as the inhabitants of my land.' Tiglath-pileser then attacked the land of Kummuh, burnt the cities, besieged and destroyed the fortress of Serife on the Tigris, and captured the king. He defeated the tribes that came to the assistance of Kummuh, and after receiving the submission of the neighbouring city of Urartu returned to Assyria with great booty, part of which he dedicated to the gods Asur and Ramman.

This expedition was followed by one against the land of Subari (or Subarti), in the course of which he defeated four thousand warriors of the Hatti (see III 111) and captured one hundred and twenty chariots. Another campaign in the mountainous regions of the NW, met with similar success, and resulted in the submission of many small states and cities. Tiglath-pileser now devoted his energies to extending his border in another direction. He crossed the Lower Zab and overran the districts of Murattāš and Saadadāš to the S. of Assyria. Shortly afterwards, however, he returned to the N., whence he brought back with him the captured images of twenty-five gods, which he set up as trophies in the temples of his own land. Tiglath-pileser next extended his conquests still farther north into the district around the upper course of the Euphrates. The mountains he passed with great difficulty, and crossed the Euphrates itself on rafts which his troops constructed out of the trees that clothed the hill-sides. Here twenty-three kings of the land of Nairi, alarmed at his approach, assembled their combined forces to give him battle. 'But,' writes Tiglath-pileser, 'with the violence of my mighty weapons I oppressed them, and the destruction of their numerous host I accomplished like the onslaught of the Storm-god. The corpses of their warriors I scattered in the plains and on the mountain-heights.' After completing the subjugation of the district he restored the kings he had captured, and in addition to the spoil he had taken he received from them as tribute twelve thousand horses and two thousand oxen. The Assyrian king now turned his troops against the region of the W. Euphrates. He subdued the district around the city of Caribonish, and even extended his conquests beyond the river, which his army crossed on rafts buoyed up by inflated skins. The last campaign of which we have a detailed account is that against the land of Musri to the N. of Assyria, the inhabitants of which, when at length driven into their chief city of Arini, tendered their submission. Tiglath-pileser then marched through the neighbouring country carrying with him fire and sword, burning the cities he took and digging up their foundations. The royal scribe, speaking in his master's name, concludes his record of these early conquests of Tiglath-pileser with the following summary: 'In all forty-two lands and their kings from beyond the Lower Zab, from the border of the distant mountains as far as the farther side of the Euphrates up to the land of Hatti and as far as the upper sea of the setting sun (i.e., Lake Van), from the beginning of my sovereignty until my fifth year, has my hand conquered. One command have I caused them to bear; their hostages have I taken; tribute and tax have I imposed upon them.'

The cylinder-inscription of Tiglath-pileser does not recount the later expeditions of his reign. From the 'Synchronic History,' however, which deals with his relations with Babylonia, we learn that Tiglath-pileser, king of Assyria, and Marlik-nadin-aḫē, king of Babylonia, had 'a second time' set in battle their chariots of war that were assembled above the Lower Zab in Arzu-ina. 'In the second year' they fought in Akkad, where Tiglath-pileser 'captured the cities of Dūr-Kurigalzu, Sippar of the Sun-god, Sippar of Anunitu, Babylon, Opis, the great cities together with their fortifications; at the same time he plundered Akkad as far as the city of Labbi, and the land of Sa ii (on the Euphrates to the NW. of Babylon) in its entirety up to the city of Rapiqū he subdued.'¹ The phrase 'a second time' is puzzling, for the 'Synchronic History' does not relate a previous campaign of Tiglath-pileser against Babylonia. Some scholars therefore suggest that it refers merely to the former struggle of Asur-erīš, Tiglath-pileser's father, with the Babylonian king Nebuchadnezzar I; but it must be remembered that Tiglath-pileser did not meet with unvarying success in his relations with Babylonia, for Sennacherib mentions that during his reign Ramman and Sala, the gods of the city of Ekallāt, had been carried off by Marlik-nadin-aḫē, king of Akkad (op. above, § 20). The question whether this conquest of Ekallāt was before or after Tiglath-pileser's successful Babylonian campaign is still indeed an open one; but the supposition is plausible that Marlik-nadin-aḫē's advance against Assyria was in the first year of hostilities between the two countries, and that his success was merely temporary, being followed 'in the second year' by Tiglath-pileser's extensive conquests in Babylonia as related in the 'Synchronic History.'

Tiglath-pileser was a great hunter. He kept a record of the beasts he slew in the desert. This was inserted in the cylinder-inscription after the account of his campaigns. From it we learn that with the help of the gods Ninro and Nergal

ASSYRIA

he slew 'four wild oxen, mighty and terrible in the desert of the land of Mitāni and in Arāzīki, which is in front of the land of Hatti,' ten elephants in the district of Harrān and on the banks of the Khābūr, one hundred and twenty lions on foot, and eight hundred with spears while in his chariot. He caught four elephants alive, and brought them back, together with the hides and tusks of those he had slain, to the city of Asur.

No less energetic was the king in his building operations. The temples of the gods in Asur that were in ruins he restored; he repaired the palaces throughout the country that his predecessors had allowed to fall into decay; he extended his water-supply by the construction of canals; he accumulated considerable quantities of grain. As a result of his conquests, he kept Assyria supplied with horses, cattle, and sheep, and brought back from his campaigns foreign trees and plants, which became naturalised.

The reign of Tiglath-pileser was a period of great prosperity for Assyria. He pushed his conquests until the bounds of his empire extended from below the Lower Zab to Lake Van and the district of the Upper Euphrates, and from the mountains to the E. of Assyria to Syria on the W., including the region watered by the Khābūr. He was a good warrior; yet he did not neglect the internal administration of his realm, devoting the spoil of his campaigns to the general improvement of the country. In fact, the summary he gives of his own reign is a just one: 'To the land of Asur I added land; to its people I added people. The condition of my people I improved; I caused them to dwell in a peaceful habitation.'

The prosperity which Assyria had enjoyed under Tiglath-pileser does not appear to have long survived his death.

At the time of Asur-dān I, Tiglath-pileser's son, relations between Assyria and Babylonia were of a friendly nature. Asur-dān-kada at first made treaties with Marlik-šapik-zēr-māri, king of Babylonia; and later, when Ramman-aplu-iddina, a man of obscure extraction, assumed the throne of Babylonia, he further strengthened the connection between the two countries by contracting an alliance with the daughter of the Babylonian king. Sam-šī-Ramman, another son of Tiglath-pileser I, also succeeded to the throne, but whether before or after his brother Asur-dān-kada cannot be determined. The only inscription of this king that we possess records that he restored the temple of the goddess Ishtar in Nineveh.

Such are the only facts we know concerning the immediate successors of Tiglath-pileser I., and at this point a gap of more than one hundred years occurs in our knowledge of the history of Assyria. We may surmise that the period was one of misfortune for the empire. What little can be gathered from the inscriptions concerning these years speaks of disaster.

Shalmaneser II., in his monolith-inscription,¹ states that he recaptured the cities of Pethor and Murrin (beyond the Euphrates), which had been originally taken by Tiglath-pileser I., but had meanwhile been lost by Assyria in the time of a king named Asur- . . . (the latter half of the name being broken). This king may be identified with Asur-erbi, and in that case he must have met with at least some success in the W., for we know that at a place on the coast of Phoenicia Asur-erbi cut an image of himself in the rock, near which at a later time Shalmaneser II. caused his own to be set. The names of two other kings are known: Erba-Ramman and Asur-nadin-aḫē, whose reigns must have fallen during this period. They are mentioned in the so-called 'Hunting Inscription' of Asur-nāzir-pāl as having erected buildings in the city of Asur, which were restored by Asur-nāzir-pāl.

No direct light is thrown on this dark period by the 'Synchronic History.' As, however, it is written with a strong Assyrian bias, its silence is an additional testimony that during this period Assyria must have suffered misfortunes.

When we once more take up the thread of Assyria's history, our knowledge of the succession of her kings is unbroken down to the time of Asurbanipal.

Tiglath-pileser II., hearkens this succession of rulers; but of him we know nothing beyond his name, which occurs in an inscription of his grandson Ramman-nirari II.,² who styled himself king of hosts, king of Assyria. Tiglath-pileser II. was succeeded by his son Asur-dān II. Of this king we know that he constructed a canal, which, however, in the course of thirty years fell into disrepair, and was therefore made good by Asur-nāzir-pāl. Ramman-nirari II., who succeeded his father, has left behind him only the short inscription (just

¹ A.B. 1193.

¹ A.B. 1193.

² A.B. 1193.

ASSYRIA

mentioned) recording his own name and those of his father and grandfather. He was an energetic ruler, as is evinced by the 'Synchronism History,' which records various successes of his against the Babylonians—first against the Babylonian king, Šamaš-mudammiq, and later against his successor, Nabu-šum-iškun, who had set himself before him upon the throne. From this later monarch he captured many cities and much spoil. He did not, however, press his victory. He concluded a truce with the Babylonian king, either Nabu-šum-iškun or his successor, and each added the other's daughter to his harem. His son, Tukulti-Ninib, succeeded him, and from an inscription of this monarch at Sebeneh-Su we may infer that he undertook successful expeditions to the N. of Assyria, at least.

Tukulti-Ninib was succeeded by his son Asur-nāsir-pal, one of the greatest monarchs Assyria ever produced. The annals of his reign he inscribed on a slab of stone, which he set up in the temple of the god Nimb at Calah. In this inscription, one of the longest historical inscriptions of Assyria, he gives an account of the various campaigns he undertook.

In the first years of his reign, he tells us, he went against the land of Nimme, a mountainous tract of country to the N. of Assyria, and subdued the lands and cities in its neighbourhood. He then passed against the district of Kurriri that lay along the W. shores of Lake Urmiyah. Turning W. from Kurriri, he passed through the land of Kiriri on the Upper Tigris, and city after city fell into his hands. He returned to Assyria with the booty he had collected, and brought with him Bubu, the son of Bubu, the governor of Nisim, a city where he had met with an obstinate resistance. This wretch he flayed alive in Arbela, nailing his skin to the city wall. In the same year he again repaired to the region of the Upper Tigris, against the cities at the foot of the mountains of Nipur and Pasutu. He then passed westward to the land of Kummuh, quelling a revolt in the city of Sutu on the Khabur, and seizing the rebel leader, Ammeha, who was brought back to Nineveh, where he was flayed. The tribes surrounding the disaffected region rendered their submission. In the next year the first act of the king was to stamp out another rebellion. News was brought to him that the city of Halziplia, which Shalmaneser II. had colonised (see above, § 27, beg.), was in a state of revolution, and had attacked the Assyrian city of Damdamusa. While on his way against the rebels he set up an image of himself, at the source of the river Subnat, beside images of two of his predecessors, Tiglath-pileser I. and Tukulti-Ninib. He then defeated the rebels at the city of Kinabu, which he captured, and proceeded to punish the revolt with severity, flaying the rebel leader Hulai. Next he attacked the city of Tela and burnt it, mutilating the prisoners by cutting off their ears and hands and putting out their eyes. These wretches, while still alive, he piled up in a great heap; he made another heap out of the heads of the slain, while other heads he fastened to trees round the city; the youths and maidens he burnt alive. These details may suffice to show the brutal practices of this great conqueror. Asur-nāsir-pal next proceeded to the city of Tušia, which had been deserted by the Assyrians in consequence of a famine. After restoring and strengthening its walls, he built a palace for himself and brought back the former inhabitants of the city. After his return he again undertook a pillaging expedition in the mountainous regions of the north. The next two years were mainly taken up with campaigns in Dagara and Zama, which were in a state of insurrection. Nūr-Ramman, the chief of Dagara, leading the revolt. The war was a protracted one, and three expeditions were required before order was completely restored. These expeditions were followed by others in the region of Kummuh, and in the land of Na'iri. From his residence at Tušia, the king then crossed the Tigris and captured Bitura and certain towns round the city of Arbaki. Asur-nāsir-pal records at this point the death of Ammeha, one of his nobles, who was murdered by his subordinates. The king's anger, however, was appeased by a large tribute, although, according to one account, he flayed Būr-Ramman, the chief rebel, and nailed his skin to the wall of Sinabur.

One of the most important campaigns in the reign of Asur-nāsir-pal was that against the land of Subi. Although Šapulu, the ruler of that land, obtained help from Nabu-apin-šilina, king of Babylonia, his capital Šuru was taken and he himself escaped only by flight. A second campaign led to the subjugation of the whole district and a considerable extension of the Assyrian sphere of influence along the Euphrates. Asur-nāsir-pal next crossed the river and carried his arms into S. Syria. He first made his way to Carchemish and received the submission of Sangara, king of the land of Hami. Proceeding SW. and exacting tribute from the districts through which he passed, he crossed the Orontes and marched S. into the district of Lebanon. The cities on the coast of the Mediterranean, including Tyre, Sidon, Byblos, and Arvad (Arvad), sent presents. In the N. districts he cut down cedars, which he used on his return in building temples to the gods. One more expedition Asur-nāsir-pal undertook on the N. of Assyria, traversing the land of Kummuh and again penetrating to the upper reaches of the Tigris.

¹ K B 150 ff., R P 22 134 ff.

ASSYRIA

Asur-nāsir-pal finally established the rule of Assyria in the NW and the N., while he extended his empire eastwards and laid the foundations of Assyria's later supremacy in the W. on the coast of the Mediterranean. He was one of Assyria's greatest conquerors; but his rule was one of iron, and his barbarity was exceptional even for his time. He was a great builder. At Nineveh he restored the royal palace and rebuilt the temple of Isur. The city of Calah, which Shalmaneser I. had founded, he rebuilt, peopling it with captives taken on his expeditions. He connected it with the Upper Zab by means of a canal, and erected two temples and a huge palace, from which his bas-reliefs, now in the British Museum, were obtained (cp above, § 18).

Asur-nāsir-pal was succeeded by his son Shalmaneser II., who extended the kingdom of his father beyond Lake Van and Lake Urmiyah. He exercised a protectorate over Babylonia in the S., and his kingdom included Damascus, which he had conquered. During his reign, for the first time in history, Assyria came into direct contact with Israel.

he mentions Aha of Israel as one of the allies of Benhadad of Damascus (cp SHALMANESER II.). His later years were troubled by the revolt of his son, Asur-dān-pal; but his younger son, Samši-Ramman, put down the rebellion, and on his father's death succeeded to the throne.

On a monolith of Samši-Ramman II., now in the British Museum, is an inscription in archaic characters narrating four campaigns of this monarch. He restored order to the kingdom, which had been thrown into confusion by the rebellion of his brother, and, having established his own authority over the territory subjugated by his father, extended it on the E. He routed the Babylonian king, Marduk-balassu-iddi, in spite of the large army the latter had collected, comprising drafts from Elam and Chablea in addition to his regular troops.

Samši-Ramman II. was succeeded by his son, Ramman-nirari III.

Two inscriptions on stone slabs from Calah, an inscription on some statues of the god N. 150, and an inscription on a brick from the mound of Nib-Yunis, are the records actually dating from his reign; but these are supplemented by a short notice in the 'Synchronism History,' and by the Eponym Canon, which adds short notices of the principal events during each year of his reign.

Ramman-nirari III. undertook expeditions in Media, Persia, and the region of Lake Urmiyah on the E.; conquered the land of Na'iri on the N.; and subjugated all the coastlands on the W., including Tyre, Sidon, Israel, Edom, and Philistia. Mari, king of Damascus (see BENHADAD, § 3), attempted no defence of his capital. He sent to Ramman-nirari his submission, paying a heavy tribute in silver, gold, copper, and iron, besides quantities of cloth and furniture. A considerable portion of Babylonia also owned the supremacy of Ramman-nirari. In his inscription on the statues of Necho, he mentions the name of his wife Sammuramat (the Assyrian form of the Greek Semiramis). He was a great monarch. His energetic rule and extensive conquests recall those of Shalmaneser II., his grandfather.

Of the three kings that follow not much is known.

Shalmaneser III. succeeded Ramman-nirari, and from the Eponym Canon we gather that he undertook campaigns against Urartu (Armenia), Iuti, Damascus, and Hatarika (Hadrach). He was succeeded by Asur-dān III. This king made foreign expeditions. His was a troubled reign. The most important event recorded in his time was the eclipse of the sun in 763 (cp above, § 16, end; AMOS, § 4, ECLIPSE, § 1). The same year saw the outbreak of civil war; the ancient city of Asur had revolted. In 761 the rebellion was joined by the city of Arapha, and in 759 by the city of Gozan. In 758, however, after it had lasted six years, the revolt was brought to an end; Gozan was captured, and order once more restored. The troubles of Assyria during the reign of Asur-dān

ASSYRIA

were aggravated in the years 705 and 759 by visitations of the plague. On his death he was succeeded by Asurnirari. Although at the beginning of his reign

754. this king undertook expeditions against Hadrach and Arpad, and later two campaigns against the Zimri, for the greater part of his reign he was inactive. In 746 the city of Calah revolted, and next year a man of unusual energy usurped the throne, and, assuming the name of Tiglath-pileser, extended Assyrian supremacy farther than it had ever reached. In the reign of Tiglath-pileser III, Assyria came into close contact with the Hebrews, a contact that continued under each of his successors until the reign of Esarhaddon. The events of their reigns and the influence they exerted on the history of Israel and Judah are described in the separate articles on these successive kings.

33. Tiglath-pileser III. and successors. 745. Tiglath-pileser III. was succeeded in 727 by Shalmaneser IV. (727), and he in 722 by his son Sargon II. (722), to whom succeeded in 705 his son Sennacherib (705), and in 689 his grandson Esarhaddon (689), and in 669 his great-grandson Ashurbanipal. For the expeditions of the last-named monarch in Egypt, Elam, Arabia, etc. see ASUR-BANI-PAL. His literary tastes found expression in the collecting of a great library at Nineveh. The Eponym list and his own inscriptions cover only the first part of his reign; his later years are clouded in uncertainty, and the date of his death is a matter of conjecture. The period from his death until the fall of Nineveh is equally obscure. We know the names of two of his sons, Ashur-etil-ilam and Sin-kar-isum, who both occupied the throne; but the length of their respective reigns and even the order of their succession are matters of dispute. It used to be assumed that during this period Assyria was entirely stripped of her power and foreign possessions; but this view has now been modified in consequence of recently discovered contract-tablets dated from both northern and southern Babylonian cities according to the regnal years of the last two Assyrian kings. These prove that the Assyrian supremacy in Babylonia continued for some little time at least. Assyria's power, however, was waning. A long career of conquest had been followed by an age of luxury, and her strength was sapped. The Scythian hordes that had swept across W. Asia had further weakened her. Thus, when Nabopolassar, repudiating Assyrian control, allied himself with Cyaxares, king of Media, and their combined forces invaded the country, her resistance met with no success.

Though Nineveh held out for two years, the city was at last captured and destroyed, and Assyria was annexed to the empire of the Medes.

The most recent, and at the same time most scientific, work on Assyrian art and architecture is Perrot and Chipiez's *Hist. de l'art dans l'antiquité*, vol. II, *Chaldée et Assyrie*, Paris, 1884. Of works which appeared soon after the discovery of the remains of Assyria, and do not attempt a scientific treatment, one of the earliest was Botta and Flandin's *Monuments de Ninive*, 5 vols., Paris, 1847-50. The two works of Sir Henry Layard, *Niniveh and its Remains* and *Monuments of Niniveh*, contain a good account of his discoveries. In *Assyrian Discoveries*, Lond. 1875, George Smith has described the results of his own explorations.

For the history of Assyria the principal work is Tiele's *Bab. Ass. Gesch.* Göttingen, 1866-82. Reference may also be made to Hommel's *Gesch. Bab. u. Ass.*, Berlin, 1885-88, the *Gesch. Bab. u. Ass.* by Münder and Delitzsch, Göttingen and Stuttgart, 1891, and Winkler's *Gesch. Bab. u. Ass.*, Leipzig, 1892. Among English works dealing with the history of Assyria, see George Smith's *Assyria* (SPCK, Oxf. 1875), and Prof. G. Rawlinson's *Five Great Monarchies of the Eastern World*, vols. I. and II., Lond. 1871. Both these works have been superseded on several points in consequence of later discoveries.

Assyrian history can be rightly understood only if followed in the inscriptions themselves. Translations of most of the historical inscriptions of Assyria are given in Schrader's *KAT.* and II., Berlin, 1886-90, each of which contains an explanatory map. A series of popular English translations of Egyptian and Assyrian monuments was founded and edited by Dr. S. Birch of the British

Museum and entitled *KAT.* (12 vols. Lond. 1873-81), of which vols. I. to v. VII., ix., and xi. deal with Assyrian and Babylonian inscriptions. These translations have now, of course, been superseded. In a new series edited by A. H. Sayce (6 vols. Lond. 1888-92) the old methods and plan were not modified. A collection of all the points in the OT illustrated or explained by the monuments, Schrader's *OT* is still unrivalled.

For works treating of the religion of the Assyrians see BABYLONIA, § 71.

For the student who would gain a more than superficial knowledge of Assyriology it is needless to give a list of works, as this has already been done in Bezold's *Bab. Ass. lit.*, Leipz. 1886; the literature since 1886 can be ascertained from the bibliographies appended to the *Z.* and to the *American Journal of Semitic Languages and Literatures*, and from the *Or. Bibliographie*, L. W. K.

ASUR (אַסּוּר [BA]), 1 Esd. 5:31 RV = Ezra 2:51, HARRUR.

ASUR-BANI-PAL. Though mentioned by name only once or twice in OT (see ASSURIPER), Asur-bani-pal is important to OT literature from his deportation of troublesome populations to the region of Samaria (see SAMARIA, SAMARITANS, and cp below, § 12); also from references to his campaigns in Egypt and Arabia in the prophesies (see ISAAH, II, § 9, and NAHUM, § 2). He was one of Assyria's greatest kings, and famous not less for his devotion to art and literature than for his extensive conquests.

His name, which is best read Asur-bani (or bani)-aphi, means 'Asur is the creator of a son.' He was the eldest son of Esarhaddon, and ascended the throne in 668 B.C. His succession had been secured by his having been publicly proclaimed king before his father's death, while his brother, Shamash-sum-ukin, was installed in Babylon as viceroy or tributary prince.

From the moment of his accession he was plunged into a prolonged war in Egypt, for Tarkū (TIRTIKAM), king of Ethiopia, in the words of

1. 1st Egyptian campaign. Asur-bani-pal, 'forgot the might of Asur, Istar, and the great gods my lords, and trusted in his own strength'; that is, he raised a large army and descended upon Egypt. The prefects and governors appointed by Esarhaddon fled at Tarkū's approach. He captured Thebes, descended the Nile to Memphis where he fixed his capital, and proclaimed himself king of Egypt. On receiving the news of this disaster, Asur-bani-pal determined to recover Egypt. During the passage of his army through Syria and along the coast of the Mediterranean, reinforcements in men and ships, in addition to the customary tribute, were received from twenty-two subject kings of

AŠUR-BANI-PAL

Palestine and Cyprus, among whom Manasseh, king of Judah, is mentioned (cp ESARHADDON). Tarku, hearing of the advance of the Assyrians, sent out his own forces from Memphis. At Karkamish, within the Egyptian border, the forces of Tarku were utterly routed, while the king himself abandoned Memphis and escaped by boat to Thebes, leaving his capital and the whole of Lower Egypt in the hands of the Assyrians. The various governors and petty kings, who had formerly been tributary to Esarhaddon and had been expelled by Tarku, now returned, and joined their own forces to those of the Assyrians, upon which the combined armies ascended the Nile in a fleet of boats to dislodge Tarku from Thebes. In forty days the journey was accomplished. Tarku abandoned the city without striking a blow, and retreated into Ethiopia, leaving the whole of Egypt in the hands of the Assyrians.

He did not, however, abandon his designs upon Egypt, and, as his former attempt at open opposition had proved unsuccessful, he now resorted to stratagem. Perceiving that the native Egyptian princes were far from contented

2. Revolt suppressed.

under the military sway of the Assyrians, he opened secret negotiations with them, Niku (Nikho), Sarriuladri, and Pakruti, leading the conspiracy on the Egyptian side. It was agreed that they should transfer their allegiance to Tarku, who in return would leave them in undisturbed possession of their principalities, and that, while he attacked Egypt from the south, they would raise a revolt in the interior. The Assyrian generals, however, suspecting that some treachery was afoot, intercepted their messengers, and learnt the full extent of the plot. Niku and Sarriuladri were bound hand and foot and sent to Nineveh, while their fellow-conspirators were slain. The revolt, thus prematurely hastened, was quelled without difficulty. Tarku was once more driven from Upper Egypt, and soon afterwards died.

Ašur-bani-pal, in restoring the country again to order, appears to have mitigated his former rigour, seeking to conciliate rather than to suppress the native rulers. Niku was pardoned. He was clad in costly raiment; a ring was set upon his finger, and a fillet of gold about his head (as an emblem of his restoration); and with presents of chariots, horses, and mules, he returned to Egypt, where he was once more installed as governor in Sais, while his son Nabin-Sezilamu was appointed governor of Athribis.

Ethiopia, however, could not long keep her eyes from Egypt; and, although Tarku was dead, the ambitions of his country did not die with him.

3. 2nd Egyptian expedition.

It was not long before Urdamanē, his successor, marched northwards and took Upper Egypt (cp EGYPT, § 66). He advanced from Thebes to meet the Assyrian expedition sent against him, but was worsted in the battle, returned to the city, and thence fled farther south to Kipkip. The Assyrians marched on Thebes, and the city itself, together with immense booty, fell into their hands. They carried back with them to Assyria two huge obelisks, and thus set the fashion, adopted by all the later conquerors of Egypt, of perpetuating their victory by means of the monuments of the conquered country itself. 'With full hands,' writes Ašur-bani-pal, 'I safely returned to Nineveh, the city of my rule.' This successful expedition, however, had no lasting effect, Egypt was too far off to remain for any length of time the vassal of Assyria. Psammetichus, the son of Niku, obtained the supremacy over the whole country, and permanently shook off the Assyrian yoke.

After his second Egyptian campaign Ašur-bani-pal directed his forces against Bā'al, king of Tyre, 'who dwell in the midst of the sea'—a good description of the city (see TYRE). Like his predecessors, Ašur-bani-pal failed to capture a stronghold so favoured by nature. He erected towers and earthworks, however, and attempted to cut off communication from the sea as well as from the land, and maintained so effectual a blockade that Bā'al, at last reduced to extremities, sent Yahi-milki to

AŠUR-BANI-PAL

ask for terms. Ašur-bani-pal contented himself with levying tribute on the city, and with demanding the king's daughter and nieces for his harem, together with their dowries.

After humbling Tyre, it was no hard matter to obtain the submission of the less important princes of the Mediterranean coast. Among these were Yakinu, king of the island city of ARAD, Ningallu, king of Tabal, and Sandasirimi, king of Cilicia (CITICA, § 21).

Gyges (GUGGI), king of Lydia, also appears to have heard of the success of the Assyrians, and to have sent in his submission. For some years he maintained these friendly relations, and

5. Gyges of Lydia, etc.

to this fact attributed his success over the Cimmerians, in proof of which he sent to Nineveh two captive Cimmerian chiefs bound hand and foot with fetters of iron. Towards the end of the reign of Ašur-bani-pal, however, Gyges severed his connection with Assyria, and aided Psammetichus (Psametik) in his struggle for Egyptian independence (cp EGYPT, § 67).

Ašur-bani-pal was now free to turn his attention to the eastern borders of his kingdom.

During the absence of the Assyrian army in its distant campaigns, the E. frontier of Assyria had been constantly violated by the king of Manak (see MANSUK). Ašur-bani-pal returned to chastise Akšeri. He marched northwards, and forced an attempt of his opponent to surprise the Assyrians by a night attack. Akšeri fled to his capital Urtu, while Ašur-bani-pal had waste the country. On his death in a revolt he was succeeded by his son Ualli, who bought terms of peace from Ašur-bani-pal.

The most warlike nation on the E. of Assyria, however, and indeed her most powerful enemy, was ELAM.

6. Elam.

Urtaku, its king, had shown his hostility to Assyria already in the reign of Esarhaddon, by attempting to stir up a rebellion in Chaldaea; and although, when his people were suffering from famine, he had received assistance from Ašur-bani-pal himself, he now proposed an invasion of Babylonia, hoping thereby to cripple the Assyrian power.

Acting on the advice of his general, Marduk-šam-pa'di, he formed an alliance with Belakša, king of Garmaru, a country, situated in the lower basin of the Tigris, on the shores of the Persian Gulf, and having won over to his side Nabu'sumut, a governor in Chaldaea, he crossed the Babylonian border. On news being brought to Ašur-bani-pal that the Elamites had advanced 'like a flight of hoasts' and were encamped against Babylon, he set on foot a expedition, and, marching southwards, drove Urtaku beyond the frontier.

On the death of Urtaku, shortly afterwards, the throne was seized by Teumman, who immediately sought to rid himself of the sons of the former kings, Urtaku and Ummannabā'si. His intended victims, however, escaped with their friends to the court of Ašur-bani-pal, where they were in kindness received, and protected. This incident caused a renewal of the war between Elam and Assyria. An interesting fact, which throws light on Assyrian prophecy, is related. On the eve of the campaign Ašur-bani-pal prayed solemnly to the goddess Ishtar, who to encourage him appeared in a vision to a seer, and promised victory to the Assyrian arms.¹ Confident of success, Ašur-bani-pal set out for Elam, and pressed on up to the walls of Susa. Here, on the banks of the Euleus, there was a decisive battle, in which the Elamites were utterly routed.

'The land of Elam,' writes Ašur-bani-pal, 'through its extent I covered, as when a mighty storm approaches; I cut off the head of Teumman, their king, the rebel who had plotted evil. Beyond number I slew his warriors; alive in my hands I took his fighting men; with their corpses as with thorns and thistles I filled the vicinity of Susa; their blood I caused to flow in the Euleus, and I stained its waters like wool.'²

Ašur-bani-pal divided the land, proclaimed as vassal kings Ummannigā and Tammuritu, the two sons of Urtaku who had cast themselves on his protection, and,

¹ See the striking passage in the annals (Smith, *Hist. of Assyria*, 123-126).

² [5 R. 3, 43, *agrup kima nabisi. Nabisu* = 'red-coloured wool.' The adverb, *nabisi*, 'like red wool,' acc. to Roben, 10 553, is an Ass. loan-word in the Song of Deborah, corrupted in our text.]

AŠUR-BANI-PAL

returning by way of Gambulu, exacted a terrible vengeance from that land.

We now approach the greatest crisis in the history of Ašur-bani-pal. On ascending the throne of Assyria he

7. Revolt of Babylon suppressed.

had appointed his younger brother Šamaš-šum-ukin king of Babylon, without nominating his own suzerainty. Šamaš-šum-ukin, however, was dissatisfied with his dependent position, and resolved to revive, if possible, the relations between Assyria and Babylon. His own resources being insufficient for subjugating Assyria, he began to form a coalition of the neighbouring nations, all glad of an opportunity to strike a blow at their powerful neighbour. The Chaldeans and the Aramean tribes of the coast gave assistance; Ummanigāš, king of Elam, threw over his patron Ašur-bani-pal, and joined the revolt; Arabia, Ethiopia, and possibly Egypt, sent help. Ašur-bani-pal did not lose an instant, but set out with the whole of his force to the S.E., where he successfully kept his enemies in check.

Fortune favoured him by neutralising to some extent the assistance which Šamaš-šum-ukin expected to receive from Elam, his most powerful ally. That country was thrown by internal revolution into a state bordering on anarchy, Ummanigāš and the whole of his family having been slain by Tammartu, who in turn was dethroned by Indabigaš, and only saved his life by flight to Assyria.

Ašur-bani-pal hastened to attack the allied forces, easily defeated them, and proceeded to besiege the four cities—Babylon, Borsippa, Sippara, and Cutha—in which they had sought shelter after their defeat. The defenders held out stubbornly for some time. When all was over, Šamaš-šum-ukin, to avoid his brother's vengeance, set fire to his palace and perished in the flames.

After stamping out the rest of the rebellion and restoring order throughout Babylonia and Chaldaea, Ašur-bani-pal directed his forces against

8. Subjugation of Elam.

Elam, where for the next two or three years he carried on a war with Ummanaldāš II., who had ascended the throne of Elam after slaying Indabigaš, his predecessor. It is true that for a short time during this period Ummanaldāš was driven into the mountains by Ašur-bani-pal, who set Tammartu on the throne of Elam in his stead; but, as soon as the Assyrian army had withdrawn, Ummanaldāš came out from his retirement, gathered his forces, and compelled Ašur-bani-pal again to take the field against him. On the appearance of the Assyrian army Ummanaldāš retired, allowing Ašur-bani-pal to capture the cities and lay waste the country on his march. At length, however, he hazarded a battle. He met with a signal defeat and was again driven to take refuge in the mountains, while Susa and its accumulated riches fell into the hands of the conquerors.

'By the will of Ašur and Ištar,' boasts Ašur-bani-pal, 'into its palaces I entered and so myself down reboicing. Then opened I their treasure-houses, within which silver and gold, furniture and goods were stored, which the former kings of Elam and the kings who had ruled even to these days had collected and placed therein, whereon no other foe besides myself had set his hands; I brought it forth and as spoil I counted it.' He recovered also all the treasures with which Šamaš-šum-ukin and his predecessors had purchased Elamite support. Susa itself was raised to the ground; the royal statues were carried to Assyria; the groves were cut down and burnt, and the temples violated.

After the subjugation of Elam the annals of Ašur-bani-pal relate a series of conflicts with Arabia (Smith, *Hist. of Assyria*, 256 ff.). This was the

9. Arabia. last great war in which this monarch is known to have engaged. At the beginning of his reign he appears to have had friendly relations with the Arabian king Uaiat; but on the revolt of Šamaš-šum-ukin the latter joined the coalition against Assyria. Uaiat himself attacked Palestine, overrunning Edom and Moab, and penetrating almost as far N. as Damascus. Here, however, he was defeated by the Assyrians.

Leaving his camp standing, Uaiat fled alone to Nafara. He

AŠUR-BANI-PAL

appears, however, to have surrendered to Ašur-bani-pal, who threw him into chains, and kept him a prisoner in a kennel with his hounds. Uaiat's wife, and the king of Kedar, his ally, sharing the same fate. The other division of the Arabian army, which had joined the forces of Šamaš-šum-ukin, shared his defeat and perished in Babylonia. Uaiat's leader, surrendered to Ašur-bani-pal, kissed his foot in token of submission, and was appointed king of Arabia in the place of Uaiat. No sooner, however, had he returned to his country, than he associated himself with the Nabataeans in a series of joint attacks on the frontier of Assyria. Ašur-bani-pal, therefore, crossed the Tigris with his army, and embarked on a difficult march through the Syrian desert. The Assyrians, after some minor conflicts in which they were successful, eventually engaged the main body of the Arabian army in the mountains of Hakkurina, to the S.E. of Damascus. The Arabians were defeated, Uaiat and Ayamu were taken, and Ašur-bani-pal set out for Assyria with immense numbers of captives and herds of cattle; on his return camels were distributed throughout Assyria 'like sheep.'

The annals conclude their record of the wars of

10. Closing years.

Ašur-bani-pal with an account of his triumphal procession through Nineveh in celebration of his victories. Ummanaldāš, the Chaldean, who had shortly before been captured, Tammartu and Pa'e, two other captive Elamite kings, with Uaiat, the king of Arabia, were fastened to the yoke of the chariot in which he rode. He then entered the temple of his gods, offering sacrifices and praising them for the triumphs they had won for him over his enemies.

Ašur-bani-pal probably reigned till 625 B.C.; but of his later years the royal records do not speak. It is impossible to assign with certainty a reason for this silence. Possibly the kingdom, which had been shaken to its foundations by the revolt of Šamaš-šum-ukin during these years, showed signs of its approaching end. It is certain, at any rate, that the Medes, whom Ašur-bani-pal had earlier in his reign defeated, again showed signs of activity (see PERSIA); and it is probable that during his reign the wild hordes of the Scythians descended from the N. and the N.E., slaying and plundering and carrying all before them. The question whether the empire of Assyria declined only under Ašur-bani-pal's successors, or had already become disintegrated before his death, is one that cannot be answered with certainty.

Turning from foreign politics to the internal condition of Assyria during the reign of Ašur-bani-pal, we find the

11. Policy and buildings, etc.

country superficially, at least, prosperous. Though the constant wars of Ašur-bani-pal must have been a great drain on the manhood of the nation, his almost unvarying success resulted in a great accumulation of wealth—the spoil of the conquered cities. Not only did his generals carry off the gold and silver, and anything else of value that was portable; not only did they drive to Assyria the flocks and herds of the whole country; the population itself they deported. It was the Assyrian policy (see above, § 1) to weaken the patriotic feeling of the conquered races in this way, and so to lessen the chances of revolt. A secondary object of the conquerors, however, had reference to Assyria herself, for huge bands of captives were brought back in chains to replenish the labouring population at home. Many of these wretches found their way into the possession of private owners; but the majority of them were retained as slaves by the king himself, who, like his predecessors, sought to gratify his desire for splendour and to perpetuate his name by the erection of huge buildings in the capital. The most important of these buildings of Ašur-bani-pal was his own palace, which he built to the north of that of his grandfather Sennacherib—the remains exist at the present day in the mound of Kuyunjik opposite the modern town of Mosul. The walls of its chambers he lined with sculptures in relief, representing his own exploits on the field of battle and in the chase, in which the details are most carefully and elaborately carved, while the designs themselves mark the acme of Assyrian art. Ašur-bani-pal restored the palace of Sennacherib, strengthened the fortifications of Nineveh, and built

ASYLUM

or restored various temples throughout Assyria and Babylonia.

It was the custom of the classical historians to represent Asur-bani-pal as of an effeminate and luxurious disposition, spending his life at Nineveh in idleness and dissipation. The Assyrian records have dissipated this illusion. Though it is probable that many of his campaigns were conducted by his generals, the king's personal valour in the field and in the hunt is undoubted. His skill as an administrator is testified by his organisation of the immense territory acquired in his victorious campaigns. His palaces and buildings, even to this day, bear witness to his love for art and architecture. It is for none of these things, however, that his memory is honoured above that of other kings of Assyria. He was the first of his nation to make a systematic and universal study and collection of his country's literature, and it is to the library he collected in his palace that we owe the greater part of our knowledge of Babylonian and Assyrian literature and language.

L. W. K.

ASYLUM, a sanctuary, within whose precincts those who take refuge may not be harmed without sacrilege.

1. General principle. In early times, holy places, as the homes or haunts of the gods, extended over everything in them the protection of their own inviolability. Wild animals, and sometimes even domestic animals which strayed into them, shared this protection with debtors, fugitive slaves, and criminals, as well as the victims of unjust pursuit or violence. Manslayers sought refuge in them from the sword of the avenging kinsmen, and the right of asylum had an especial importance among those peoples in which the primitive law of blood vengeance was most persistently maintained.¹ The right of asylum was possessed by different sanctuaries in various degrees, depending on prescription, the holiness of the place, and other circumstances; it sometimes extended to an entire city, or even to a mark beyond its walls. Even within the same sanctuary it was, of course, a greater sacrilege to drag the suppliant away from the altar or from the image of the god, or to slay him there, than merely to violate the sacred precincts. In later times the abuse of these privileges led to legal regulation and restriction (cp. e.g., *Fac. Ann.* 36-64, 114).

In Israel the oldest law (Ex. 21:12-14) recognises the right of asylum, but denies its protection to the murderer with malice aforethought: 'from beside my altar thou shalt take him to die.' Doubtless every altar of Yahweh (Ex. 20:24 f.) was an asylum; but not all were equally venerated, nor would the village high-place protect the suppliant as securely as the more famous sanctuaries. The only historical instances in the O.T. in which men who fear for their lives take refuge at God's altar are those of Adonijah (1 K. 1:50-53) and Joab (1 K. 2:28-34; on the text cp. G and Kto.). Adonijah was persuaded to leave the asylum; Joab, by Solomon's orders, was slain at the very altar.

When the drastic reforms of Josiah (621 B.C.) destroyed and desecrated all the old holy places of

Yahweh in his kingdom except the temple in Jerusalem, one of the necessary measures of the reform laws was to provide a substitute for the asyla thus abolished; since it was obviously impossible that manslayers from the remote parts of the land should escape to Jerusalem. Accordingly, six cities of refuge are appointed—three E. of the Jordan (Dt. 4:41-43),² three W. of it (Dt. 19:2 f.)—with eventual provision for three more, in Philistia, Phoenicia, and Carle-Syria (Dt. 19:2-10). The distinction between manslaughter and murder is clearly defined and illustrated, the case is

¹ So, e.g., in Greece; while in Rome, where blood vengeance was early abolished by law, the right of asylum was almost exclusively reserved for slaves.

² These verses are out of place, and probably secondary; see Dt. 1:1, LXXON, § 26.

ASYNCRITUS

tried at the place where the offence was committed, and if the verdict be murder the elders of the city in whose territory the defendant resides are empowered to take him from the asylum and deliver him to the next kinsman of the murdered man, as the natural executor of the sentence.¹

The post-exilic law also (Nu. 35:9 ff., cp. Josh. 20:2-9) appoints six cities of refuge (27:2-9), and defines the

4. In P. crimes in substantially the same way; but it differs radically from the Deuteronomic legislation in providing (1) that the manslayer shall be brought from his asylum to be tried before the 'congregation' (*edah*)—i.e., the religious community of the post-exilic Jerusalem (Nu. 35:124 f.)—and (2) that at the death of the high priest the manslayer may without peril return to his home and estates (17:25-28).² Further, it is explicitly forbidden to compound the crime by taking a bloodwite, or to allow the homicide upon payment of a fine to leave the city of refuge before the death of the high priest.

The cities designated are, E. of the Jordan, Bezer, Ramoth in Gilead, and Golan in Bashan (Dt. 4:41-43; Josh. 20:8); W. of the Jordan, Kedesh in Galilee, Shechem, and Hebron (Josh. 20:7).

The last three were all venerable sanctuaries, older, indeed, than the Israhelie invasion, and were probably chosen not only on account of their location, but also because they were already asyla of established sanctity. It may be assumed that this was the case also with the cities of refuge E. of the Jordan, of which, with the exception of Ramoth, we know little. Jewish scholars, with some plausibility, maintain that, besides those, all the other Levitical cities, of which there were forty-four, many of them seats of ancient sanctuaries, possessed the right of asylum in a lower degree.³ Whether this system was ever actually introduced in its whole extent is doubtful. Neither in the brief years between Josiah's reform and the fall of the Judæan kingdom nor after the restoration did Judah possess more than a small part of the territory contemplated by these laws.

In the Greek period, and later (under Roman rule) many Hellenistic cities in Syria enjoyed the privileges of

6. Parallels. Asylums. Not to speak of the famous sanctuary of Apollo and Artemis at Daphne, near Antioch, where the Jewish high priest, Onias, is said to have taken refuge (2 Macc. 1:1 ff., cp. Strabo, vi. 26), the title *ἀστυ* appears on coins of Caesarea, Pannias, Diocæsarea (Sepphoris) in Galilee, Ptolemais (Acra), Dora (Dora), Scythopolis (Bethshean), Gadara and Abila in the Decapolis, and others. According to Josephus (*Ant.* xii. 2), this character was conferred on Jerusalem by Demetrius I.; but 1 Macc. 10:11 knows nothing of it. cp. ASHTORETH, ASMERATH.

There is no recent and adequate work on this subject. *The Law of Asylum in Israel*, by A. P. Bissell (Leipzig, 1882) is a laboured attempt to prove that the laws must all have originated in the age of Moses. See also S. Oldenburg, *Die biblischen Asyle in talmudischem Gewande*, 1895; and compare Stengel, art. 'Asylum' in *Paulys-Wissensch. Realencycl. der class. Altertumswiss.* On the wide diffusion of the fundamental conception of asylums, and on its possible origin, see J. G. Frazer's article on 'The Origin of Totemism and Exogamy' in *Fort. Rev.*, April 1899.

G. F. M.

ASYNCRITUS (ΑΣΥΝΚΡΙΤΟΣ [Tl.], -ΥΝΚ. [Wh]) is one of five who, with 'the brethren that are with them,' are saluted in Rom. 16:14. They seem to have been Christian heads of households, or perhaps class leaders of some sort.

Asynritus figures in the list of the 'seventy disciples' by the

¹ In all these particulars there is a striking and instructive resemblance to the Athenian code of Draco (24 B.C.).

² In this provision it is evident that the sojourn in the city of refuge is regarded as a species of exile, a punishment which was removed by a general amnesty at the ascension of the new high priest, the real sovereign. Accordingly, in the Mishna, and in Jewish jurisprudence generally, residence in the city of refuge is called *galuth*, 'exile,' cp. e.g. *Shabbath*, 51.

³ See Maimonides, *Tal. Haza'ni*, Hilkoth Rozeah, ch. 8.

ATAD

Pseudo-Dorotheus as bishop of 'Urania', and in that of the Pseudo-Hippolytus as bishop of 'Hycama' (doubtless the preferable reading). In the great Greek *Menaea* he is commemorated along with Hierodion and Agabus on 8th April.

ATAD (אָטאַד), Gen 50:14. See ABEL-MIZRAIM.

ATAR (אַטאַר [A]), 1 Esd 5:28 RV = Ezra 2:42, ATER, 2.

ATARAH (אַטאַרָה, 'crown'; אַטאַרָה [BI.], אַטַרָה [A]), second wife of Jerahmeel (1 Ch 2:26). In genealogical phraseology this signifies that the clan occupied a new region (cp Caleb's wife Ephrath, and see AZURAH, CALIM, and presumably, like Caleb, it moved farther N., in which case we may compare Atarah with Atroth-Beth-Joan, mentioned along with Bethlehem, etc., in 1 Ch. 2:55).

ATARGATIS, TEMPLE OF (τὸ Ἀτεργάτιον [AV]), 2 Macc 12:26, cp 1 Macc 5:47. In the walled enclosure of this trans-Jordanic temple the Ammonites and Arabians defeated by Judas the Maccabee, after throwing away their arms, took refuge (see ASHTEROTH § 1). It was in 104 B.C., the year after the re-dedication of the temple at Jerusalem, which had animated the foes of the church nation to a deadly persecution (1 Macc 5:2). Judas had already acted with the severity of the old Israelish law of war, dealing with the trans-Jordanic towns and the heathen part of their peoples as Joshua had dealt with Jericho (1 Macc 5:22; cp Josh 6:4-11), but with the added zeal against idolatry justified by Dt 7:12. Naturally, this champion of monotheism, like his successor Jonathan at Ashdod (1 Macc 10:18), had no scruple in violating the temple precincts. The unarmed multitude he slew (2 Macc 1), and the temple-buildings, with all the objects polluted by idolatry, he burned (1 Macc 1).

Atargatis (אַטאַרְגַּאֲטִיס; cp Vogt, *Syr. cent.* n. 3; also אַטַרְגַּאֲטִיס; cp *DDIG* [52] 1647 f.), to whom the temple belonged, is in *The Samaritan Commentary* (n. on 1 Macc. 5:26) identified with Astarte. This is a natural error, for Carnaim is no doubt Ashteroth Karnaim, so called from the addition of the town to the worship of various forms of Ashteroth or Astarte. We know, however, that these deities were different; for at Ascalon there were temples of Astarte and of Atargatis (Perketo) side by side. All that is true is that the first part of the name Atargatis (אַטַרְגַּאֲטִיס) is the Aramaic equivalent of the Phoenician and Hebrew אַתַּרְגַּאֲטִיס without the fem. ending (see PHOENICIA); but the religious significance of this Atar ('Attar for 'Athar) is profoundly modified by its union with 'Athe (usually written אַתַּה or אַתַּה), a Pahlavene divinity whose name is well attested, and occurs in many proper names. Atargatis is, in fact, that form of Astarte which has absorbed into itself the characteristics of another deity called 'Athe (cp Ashtor-Karnaim in the inscription of Meshan). Lucian, in his *De Dea Syria*, has left us a minute account of the temple and worship of the Syrian goddess (who was no doubt Atargatis) at Hierapolis (Mabug), which illustrates the Jewish hatred of it.

The connection of this 'omnipotent and all-producing goddess' (Apollonius) with sacred life-giving waters has been studied by Prof. W. R. Smith (*RMS* [172] 175). See also Prof. W. Wright, *TSAI* 4:43 f.; Baethgen, *Beitr.* 68 ff. 256 f.; Boudissin, art. 'Atargatis', in Herzog-Platt, *RE* vol. i. (who notices the different forms under which the goddess was represented); Puchstein, *ZfA* 42:1; Roscher, *Lex. s.v.* 'Astarte', 4 (a). T. K. C.

ATAROTH (אַטַרֹת, 'crowns' or 'wreaths', cp Is. 28:1 Zech. 6:14, etc.; אַטַרֹתָם [BM.]).

1. 1 Ch. 2:54. See ATROTH-BETH-JOAN.

2. **Ataroth Addar** (אַטַרֹת אַדָּר, Josh. 16:5, אַטַרֹתֶיךָ אַדָּר [B], אַר. κ. ἀδάρ [A], אַר. ἀδάρ [L.]; 18:11, AV Ataroth Adar, ἀτὰρῶν ἀδάρ [B], אַר. ἀδָּר [A], אַר. ἀδָּר [L.], called also simply ATAROTH, Josh. 16:2, ἀτὰρῶν [B], where χ is all that is left of אַרֹת, perhaps the present Atar on the high road from

1 The oldest centre of the worship of 'Athe is thought by Hommel (*OSB* I, 1897, p. 81) to have been the E. of Asia Minor, whence the cult spread to W. Asia Minor and N. Syria.

ATHALIAH

Jerusalem to Bethel, 3½ m. S. of Bethel, and 6 m. of the upper Beth-horon (see GUERIN, *Judee*, 367; but on the other side Robinson, 2:314). As it is a Ben-jamite locality, we might plausibly identify ATHAR with the Benjaminite Ben-jamite ADAR, AKD [2] 1.

3. An unknown site (אֶתְרָה, Josh. 16:7, אַטַרֹתָם [B] between Jomah and Naarah, on the north-eastern frontier of the territory of Ephraim).

4. A city of Gad (אֶתְרָה, Nu 32:14, אַטַרֹת [A] 14, אַטַרֹתָם [B] 14), mentioned in the inscription of Meshan (7:11, אֶתְרָה) as reconquered by him, along with a 'land of Gad'. The name survives as that of a mountain, and a ruined site 'Athar, at the top of the Wady Zerka Main, 10 m. E. of the Dead Sea (Frutkin, *Mon.*, 272-276). The OS (ms. 2145), אַטַרֹתֶיךָ (Jer. 8:17) wrongly identify with no 1, presumably confusing Jomah with Jom, whom tradition associates with Ashteroth-Karnaim. See ATROTH-SIOPHAN. G. A. S.

ATER (אַטַר, § 60, אַטַר [BA]), 'left-handed' ? cp Judg 3:15 Heb., and the Lat. name Scaevola).

1. The Blue Ater of Hizziah (אֶתְרָה, אֶתְרָה [B], אֶתְרָה [A]), a family in the great post-exilic list (see EZRA, ii. § 9, § 8.6, Ezra 2:16 (אֶתְרָה [B], אֶתְרָה [A]), Neh. 7:21 (אֶתְרָה [B], אֶתְרָה [A]), 1 Esd. 5:15 (אֶתְרָה [B], אֶתְרָה [A]), Aterozias, RV Ater of Hizziah, ATER HIZKIAH, AV ATER HIZKIAH (אֶתְרָה, אֶתְרָה [B]), appears also among the signatories to the covenant (see EZRA, i. § 75, Neh. 10:17 [B] (אֶתְרָה [B]), אֶתְרָה [A], אֶתְרָה [B]).

2. The Blue Ater (וִּינִי אֶתְרָה [B], וִּינִי אֶתְרָה [A]), a family of doorkeepers in the great post-exilic list (see EZRA, ii. § 9) (אֶתְרָה [B], Ezra 2:42 (וִּינִי אֶתְרָה [A]) = Neh. 7:45 (וִּינִי אֶתְרָה [B]), אֶתְרָה [B] = 1 Esd. 5:28, JATAL, RV ATAR (om. B), אֶתְרָה [A] אֶתְרָה [B]).

ATERGATIS (τὸ Ἀτεργάτιον [VA]), 2 Macc. 12:26 RV, AV ATARGATIS.

ATETA (אַתְתָּה [A]), 1 Esd. 5:28 RV = Ezra 2:42, HATHA.

ATHACH (אַתַּח, 'inn' ? [Ges.]; נֹחַד [B], נֹחַדָּה [TR], אֹחַדָּה [A], נֹחַדָּה [B]), one of the 11 of Judah to which David sent a portion of the Amalekite spoil (1 S. 30:30). According to Wellhausen, Driver, and Budde, it is the ATHER (7:21) of Josh. 15:42 (אֹחַדָּה [B], אֹחַדָּה [A], 17:17 (אֹחַדָּה [B], אֹחַדָּה [A]), 18:17 (אֹחַדָּה [B], אֹחַדָּה [A]), these scholars decline to decide which of the variants is correct, though Budde retains אֹחַדָּה in the text of 1 S. The root, נֹחַד, and נֹחַדָּה of certain MSS may, however, point to a various reading Noh. Guerin visited a place called *Nubi*, near *Kharas*, and W. of the *Kh. Kila* (Kellah), which, he thinks, may be meant by נֹחַדָּה (*Judee*, 3:19). That there must have been several places called Noh is generally admitted. Klostermann suggests אֹחַדָּה (Josh. 11:21), a place near Hebron (Hebron follows), and the question arises whether Noh itself may not be a shortened form of Anab (see Noh). In Josh. 11:21 אֹחַדָּה gives *ava, jath* = אֹחַדָּה, out of which both אֹחַדָּה [7:21] and אֹחַדָּה [17:17] may perhaps have arisen by the loss of one letter and the transposition and slight corruption of other letters. It so happens that there are to-day two Anabs S. of Hebron called the great and little. These may represent the Anaboth or Grape-towns. T. K. C.

ATHAIAH (אַתַּיָּה, § 30, meaning obscure; cp Gray, *HPV* 297: אֹחַדָּה [B], אֹחַדָּה [A], אֹחַדָּה [B], אֹחַדָּה [B], in list of Judahite inhabitants of Jerusalem (see EZRA, ii. § 5 [B], § 15 [1] [A], Neh. 11:4, 1 Ch. 9:44, UTHAI (אֹחַדָּה) [BA], אֹחַדָּה [L.]), where different links are given between him and Peretz.

ATHALIAH (אַתַּלְיָה, § 30, 52; 'Yahwé is great'; cp with Che., Ass. *etella*, 'great, high,' also 'lord,' used of gods and kings [Del. *Ass. HV* 11 B, 5:7]), 1. (אֹחַדָּה [BA]), but אֹחַדָּה [A] vid in 2 K. 11:11), daughter of Achaz and Jezebel, and wife of Jehoram,

3 Paul's failure. An explanation of the disappointing effect of Paul's teaching must be sought in the position of the Jewish colony in Athens, and not solely in exaggerated commonplace on Athenian character.

¹ Quotations might be multiplied to illustrate Athenian hospitality (Arist. *Et.* 1.7.2; cf. Thuc. 1.7, *φειλοποιοῦν*; Ar. *Ec.* 1.2.1, *ἐν τῇ Κεφαλαίᾳ πόλει* = 'Capenians'; Demosth. *Id.* 1.2.1, *ἐν τῇ Μυρραίνῃ πόλει* = 'Myrrinaeans').

continuing the words ἀπὸ τῆς πόλεως τοῦ κυρίου (Ps. 118.20); this might have belonged to the entrance of a synagogue. The Hellenic belief ἀπαλὸν θάνατον οὐκ ἔστι ἀναστασις was not, in Athens, reduced by the powerful solvent of Judaism. Hence, the moment the apostle uttered the words 'raised from the dead' his audience revolved. Elsewhere his difficulties centred round another point – whether Jesus was the Messiah or not. In Athens, where Jewish thought had no hold, the idea of the resurrection of the body was unfamiliar – least so to the Stoics, although it would be an anachronism to quote here the remarkable approach made by such Stoics as Seneca to Christian modes of thought. Little wonder, then, that Paul's work at Athens was a comparative failure, and that he felt it to be so (Acts 17.34; 1 Cor. 2.1). His visit to the city was a mistake; and perhaps it was from the first due to accident. In the hurried departure from Berea (Acts 17.10 ff.), there would be little time for making plans or for choosing modes of transport, and the apostle's abode in Athens seems to have been largely, if not entirely, due to the necessity he was under of waiting for his companions (Acts 17.15 f.).

W. J. W.

ATHLAI (ἄθλαι = ἄθλῳ, § 39.52, ATHALAI, q.7.), in list of those with foreign wives (see EZRA, I. § 5, end), EZRA 10.28 (ἀθλαί [B], μ [N], ἀθλαί [V], ἀθλαί [L]; cf. HEB. 1.11) = 1 Esd. 9.29. AMATHLIS, RV EMATHLIS (ἐμαθλῖς [B], αθλῖς [V], ἀθλαί [L]).

ATIPHA (ἀτεφα [BA]), 1 Esd. 5.32 = Ezra 2.54, HATHIPHA.

ATONE, ATONEMENT (כִּפֶּה, כִּפּוּר, ἄθλασμα; NT καταλλαγή). The expression 'to atone' (כִּפֶּה) generally describes the effect of the sacrifices in removing guilt. The pure religious idea of atonement, however, as W. K. Smith remarks (*OTL* 439) is to be found in the Prophets (and, surely, in Ps. 51); see also 1.2.2 [1] 7 [1] 1 [1]; also, with כִּפּוּר in 65 [78] 79d. There it has no relation to 'atoning', and we cannot fail to see the appropriateness of this scholar's explanation of כִּפּוּר as meaning primarily 'to wipe out.' This is in accordance with Syriac usage; but the only OT passage in which the sense of 'wipe out' is possible is in 1s. 28.18, where the reading is much disputed (Houbigant, Lowth, Du [but not De], Che [read כִּפּוּר instead of כִּפּוּר]), and where it is at any rate open to us to obtain the sense 'wiped out' indirectly from the common reading ('covered over'; cp Gen. 6.14). The usual view is that a propitiation is expressed by *kippur* metaphorically, as a 'covering' (cp Ar. *kafara*; cf. i. stem *kafat*, in ii. *kapar*), as when Jacob, fearing Esau's anger, says, 'I will *cover* his face with a present' (cp Gen. 29.16 Job 9.24). The Hebrew usage of the word is well set forth by Driver, *Deut.* 4.25, 4.39. W. K. Smith's note in *OTL* 438-440 also deserves attention; but *OTL* 438, etc., should here be compared.

In the NT 'atonement' is given by AV for καταλλαγή, Rom. 5.11; but RV, with a proper regard to consistency, substitutes 'reconciliation'; cp 2 Cor. 5.18 f., 'the ministry, the word, of reconciliation.' Elsewhere καταλλαγή occurs in Rom. 5.10 f., 11.15; cp Col. 1.14; it is hardly one of S's words, being found only in 2 Macc. 5.25. See further, ATONEMENT, DAY OF, MIRACULOUS, RANSOM, SACRIFICE; and cp WKS, *Rel. Sem.* 437, 320, 437, etc.; also We, *CH* 335 f.

See also Rischl, *Die christl. Lehre von d. Rechtfertigung u. d. Veröhnung*, ii.; Weiss, *Bibl. Theol.* of NT 1.190-192, 200-216; Dale, *The Doctrine of the Atonement*; Wilson, *Holiness Lectures on the Atonement* (1899). The semi-popular literature is extensive.

ATONEMENT, DAY OF (יום הכִּפּוּרִים; later, יום הכִּפּוּר; in Talmud יוֹמָא רַבָּא, 'the great day,' יוֹמָא, 'the day,' and יוֹמָא רַבָּא, 'the great fast'; cp Acts 27.9, Η ΝΗΕΥΤΑ, 'the only fast enjoined by the law').

The law relating to this day (Lev. 16), which as it now stands connects with the story of Nadab and

1. Analysis of law. Abihu in Lev. 10.1-7, is not in its present form a homogeneous unity.¹ This is

evident, not only from the duplicate verses 6 and 11, and from peculiarities of the arrangement, but also from the contents of the law.

The chapter as a whole treats of two quite distinct subjects: viz. (a) the warning of the high priest that he is to enter the Holy of Holies not at pleasure, but only under certain specified precautions; (2) the ordering of a yearly Day of Atonement, for which an exact ritual is prescribed. It is contained in 775-1-4 612-14 146, and belongs to P₂; 2 is itself composite, (a) 775-22 144 give complete directions for the annual observance of a day of fasting and humiliation, on which the sanctuary and people are to be cleansed by 'the priest who shall be anointed' (cp 7.12). *I.e.*, the high priest of the time; the atonement is supposed by the Lawgiver to be carried out in accordance with the ritual (which, originally, immediately preceded it) of Lev. 9, and with the law of the sin-offering laid down in Num. 15.24. On criminal grounds this law also must be held to belong to P₂. (b) 775-57-10, 14-28, on the other hand, by which the quite peculiar ritual of the Day of Atonement is prescribed, are the work of a much later hand.

Why and when these various portions of the present law were combined into one are questions that will be discussed elsewhere (see LEVITICS, § 6 f., and HENKEL, 111); the important fact, gained from critical analysis, is that the Day of Atonement, as far as its ceremonies are described in Lev. 16, is of comparatively recent origin, and the result of a very interesting development.

This conclusion is supported by a variety of considerations. (a) That the pre-exilic worship knew of

2. Stages of development. no such day as is described in Lev. 16 is evident, not only from the absence of all mention of it (an omission which cannot

be accidental, the other high days being referred to), but also from the fact that consciousness of sin and sense of need of a propitiation, which are the necessary conditions of such an institution, first became prominent in the time of Ezekiel (see FRANKS, § 111). (b) The earliest trace of public days of fasting and humiliation in the exile period appears in Zech. 7.35 8.19; the four yearly fasts there mentioned were commemorative of the national calamities at the fall of Jerusalem, and appear to have been still observed in post-exilic times.

Ezekiel, in this as in other respects the forerunner of the priestly law, had enjoined two atonement-days (the first day of the first month and the first of the seventh, Ezk. 45.2). A young bullock as a sin-offering was to be brought, and with its blood were to be smeared the posts of the house, the four corners of the altar, and the posts of the gate of the inner court – 'so shall ye make atonement for the house'; together with this, certain sin-offerings for priest and people are enjoined for the passover-day (Ezk. 45.22).

(c) When we turn to the detailed account of the reading of the law in Neh. 8 f., we find mentioned a joyous celebration on the first day of the seventh month, and a celebration of the Feast of Tabernacles on the fifteenth, without any reference to a Day of Atonement on the tenth.² On the twenty-fourth day, on the other hand, a general fast with confession of sin was held, by no means in accordance with the ritual of Lev. 16.14-28. This makes it clear that what stood in the Law-book used by Ezra (P₂) was not the Levitical ritual (Lev. 16.14-28), but only a precept of a yearly fast-day with sabbatic rest—in other words, the precept laid down in Lev. 16.29-31.

The change from the tenth to the twenty-fourth at the first celebration is intelligible enough on the assumption that the fast-day was not at first so prominent in the Law-book as it afterwards became (Lev. 16.14-28).

Even in the still later list of high days in Lev. 23.34 and Num. 29.7 we do not find any reference to the specific ritual of Lev. 16.14-28; the tenth day of the

¹ See Benzinger's study, *Z. f. d. l. u. v. 6.1* and cp Stade, *CH* 2.255, and LEVITICS, § 2.

² The text of Ezk. 1.20 should be emended in accordance with *Q* and *W*, *יָמֵינוּ* *יָמֵינוּ*.

³ Cp Reuss, *Lev. d. d. l. u. v. 6.1*, 500 f. (Holzinger, *Heb.* 759, note, etc.).

ATONEMENT, DAY OF

seventh month is simply marked by fasting, sabbath rest, and the usual sin offerings. The Day of Atonement described in Lev. 16 must have been the result of a long process of development, and the pericope formed by Lev. 16: 1-34 must belong to the very latest portions of P. The precept in Ex. 30: 10, of course, is a still later addition to the ritual, enjoining that the oil of the sin-offering should also be applied to the altar of incense.

It is a significant fact that, as the later text proves (see above, § 1), the Day of Atonement became the most important in the religious year; Jewish feeling, in the later age inevitably led to this. Now as to the meaning of the law. The terms of Lev. 16 permit no uncertainty. The law has reference to the thorough purification of the people and sanctuary. The sin offerings throughout the year have left many unknown or 'secret' sins; and since the people, the land, and, above all, the sanctuary are rendered impure by sin (Lev. 15: 19-20; Lev. 15: 15 of Lev. 16: 16), there was a danger that the sacrificial services might lose their efficacy and even that Yahwe might desert his devoted sanctuary. This was the reason for the institution of the Day of Atonement: that the Israelites might annually make a complete atonement for all sin, and that the sanctuary might be cleansed (Lev. 16: 10). The leading idea of the entire Priestly Law found here its best expression. The Day of Atonement quickened, on the one hand, the people's sense of sin and dread of Yahwe's avenging holiness, and, on the other hand, their assurance of reconciliation and of their renewed holiness. This holiness was guaranteed by their religious system, the efficacy of which, marred by sin, was again restored by this solemnity of expiation. It is the key-stone of the whole system, the last consequence of the principle, 'Ye shall be [ceremonially] holy, for I am holy.'

If we turn to the ritual, we can without difficulty discover its fundamental ideas. The high priest, after bathing, puts on plain white linen garments instead of his elaborate vestments, for he is to appear as a humble suppliant before the Holy One whom only the pure may approach. Of course, before he can make atonement for the people he must first do so for himself and for his 'house'—i.e., for the entire priesthood. On entering the Holy of Holies he is to envelop in a cloud of holy incense-smoke the place of God's personal presence, lest he die. The ritual of blood-sprinkling, as far as it is peculiar to this day, is only an elaboration, required by the extreme closeness of the approach to God, of the usual procedure in sacrificial offerings. The conception has been explained by Robertson Smith¹ as an inheritance from primitive ideas about sacrifice. See SACRIFICIAL, § 22.

The Day of Atonement has been called by Delitzsch the Good Friday of the Law. This can hardly be maintained with regard to its earlier period. Good Friday was not instituted to restore the impaired ceremonial holiness of the community; it had from the first a reference to the individual and to spiritual religion. It was otherwise with the *Yom Kippurim*, even if its institutors were not personally opposed to the supplementing and counteracting agency of teachers of a milder religion. We will not deny that the poetic prayers composed for the 'great day' during the Dispersion touch the Christian deeply from their extraordinary spiritual depth and their sense of individual religion. These prayers, however, are no evidence of the spirit of the original institution. It is not necessary to dwell on the Azazel-ritual. The ritual of the Day of Atonement has grown (this can be shown by literary analysis as well as by archaeological con-

siderations),² and the Azazel-ritual is the latest portion of it. We might perhaps suppose that those who continued Ezra's work were not up to his level; but when we look at Lev. 16: 9-11, which is the earliest part of the law (cp. 17: 1), we still find in it provisions opposed in tendency to the pure religion of the greatest prophets and psalmists. The procedure with the blood may be archaeologically explained so as to minimise the shock which it causes us; it may also be spiritualised, so as to assume a totally new appearance; but it is, as has been stated, out of harmony with that prophetic religion which is restated in Ps. 10: 50, 1. It is also in this part of the law that we find an expression which, when correctly explained, condenses the unspiritual elements of the law into a nutshell. It is the expression *sabbath sabbathon*, which may well be more ancient than the day to which it is applied. RV renders Lev. 16: 1 thus: 'It is a sabbath of solemn rest unto you, and ye shall afflict your souls; it is a statute for ever.' Jastrow (*Amos*, *Leviticus*, *Thes.*, I: 12 ff., 198) has made it probable that *sabbath* and *sabbathon* answer the latter more exactly³ than the former, to the Babylonian ceremonial term *sabbatum*, which means a day of propitiation with reference to the *divi necati* of the kings. If so, the terms *sabbath* and *sabbathon*, which are derived from *šabû* 'to rest', imply that by the usages on the day to which these terms are applied, rest is given to an angry God.⁴ The expression 'to afflict the soul' (*anna nenschu*), used in the same verse, is not less archaic in spirit, even if much later in use;⁵ it was adopted by late theologians as a synonym of the old word *qaz*, 'to fast.' This, too, implies an unspiritual doctrine, viz., that by denying the body certain generally desired goods the mind of a deity can be influenced by his worshipper.

To examine the full force of the ceremonies of the Day of Atonement, archaeologically viewed, is not our purpose. Our purpose is to emphasise their strictly propitiatory character. That same character belonged, according to the Jewish liturgy, to the ritual of New Year's Day (*Kislev-Sukkah*). It was believed, through the influence of Babylonian mythology, that the fate of man was decreed on New Year's Day (the festival of Creation), and that on the Day of Atonement the decree was 'sealed.' No wonder that the nine days which intervened between the first day of the seventh month (New Year's Day) and the tenth (the Day of Atonement) were regarded by the Jews as penitential days. Precisely when this view of New Year's Day as the Day of Destiny began to be taken, we know not. Probably it began among the Jews of the Eastern Dispersion. It gives a new force, however, (1) to the collocation of *Yom Kippurim* and *Kislev-Sukkah* in the same month, and (2) to the designation of both days (see Lev. 23: 34) as *sabbathon*. To what extent, if at all, the ritual of these days is a revival of primitive custom, is of course. It is quite possible that in primitive times Israelish ritual, at any rate in certain places, approxi-

¹ The literary analysis of Lev. 16 is passed over in *SBOT* (Heb.; 1911); in the article 'Day of Atonement' in Hastings, *Rel. Lore* (1922), the omission has been supplied from Benzinger. Driver's moderating remarks, however, do not affect the position taken up by Stade and Benzinger, who are both fully awake to the incompleteness of merely literary analysis of ancient laws. The determinative word in *SBOT* is also to be observed in the Leviticus in Kautzsch's new translation (*HS*). Cp. FRIEDLÄNDER.

² *Sabbath*, acc. to Jastrow, 'is the distinctively Hebrew name given to a particular *sabbathon*' (cp. *et.*, 249 f.). *Sabbathon* (Ebd. *sabbathon*); the terminations correspond (Jastrow, 192).

³ The most common term for 'propitiation' was *nakh libbi* (lit. 'to soothe the heart'), *qam* (cp. *qam*, 'day') may have the sense of 'day of propitiation' (Jastrow, 192).

⁴ It occurs in Is. 58: 3-5 to Ps. 30: 11, also in Lev. 16: 11-23: 32 Nu. 29: 7. That the historical Isaiah, in disparaging fasts, does not use the phrase (Is. 1: 11, but cp. 58) is significant.

⁵ See *KB 314 f.* (Marduk comes at Zagmuk, the beginning of the year, 'to destroy the life of his life'; cp. Kautzsch on 'Jewish New Year' in *Rel. Sem.*, and Jensen, *Kosmos*, 84, 26, 235).

ATROTH

leg. rit. iii. Diss. viii. 1. H. Hoffmann in *Berliner's Magazin* (76), 1771; Ailer, *Z. A. F. W.* 3 (1784), 238; Stadel, *Gl. d. A. 1784*, 238; Scholtz, *OL. 1784*, 1367; 238; 1784; Ederstrom, *The Temple* (74), 263-288; Driver, 'Atonement Day at' in *Hastings*, 1911, 201; and 'Leviticus' in *3rd ed.* (1891); D. on Levi, and Nowack's and Benzinger's *Archaeologies*.

§§ 1-3 L. R.; §§ 4-8 F. K. C.

ATROTH (Nu. 32:35 AV). See **ATROTH-SHOPHAN**.

ATROTH BETH JOAB (עֲרֹת בֵּית יוֹאָב) 'crowns of the house of Joab': אֲרֹתֵי בֵּית יוֹאָב [B], א. א. יוֹבָאב [A], אֲרֹתֵי בֵּית יוֹאָב [L], an unknown locality, mentioned in 1 Ch. 2:54 along with Bethlehem and Netophah, in a Calebite connection; its people were sons of Salma b. Hur b. Caleb (see **JABEZ**). Salma was the 'father' of Beth-lehem, the burial-place of Joab's father ZERUJAH [2:1]. Meyer (*Ebr.* 147) suggests a connection with the valley of CHARASHIM.

ATROTH-SHOPHAN AV **ATROTH**, **SHOPHAN** (עֲרֹת שׁוֹפָן; עֲרֹת שׁוֹפָן [B], אֲרֹתֵי שׁוֹפָן [F], עֲרֹתֵי שׁוֹפָן [L], Eus. 214:54), a town of Gad (Nu. 32:35); perhaps one of the two localities in Moab still called **Atroth**. See **ATROTH**, 4.

ATTAI (אֲטָי), perhaps abbrev. of **ATHATHI**.

1. Son of the Egyptian Jarhi b. the dau. hier of Sheshai the Jerahmeelite; his son was Nathan; 1 Ch. 2:35; 2 Sam. 17:1; 1 Ch. 2:35; 2 Sam. 17:1. See **JARHI**, **JERAMELITE**.

2. One of David's warriors; 1 Ch. 12:11 (אֲטָי [B], אֲטָי [L]). See **DAVID**, § 11, α, iii.

3. Son of Rehobai; 2 Ch. 11:20 (אֲטָי [B], אֲטָי [L]).

ATTALIA (אֲטָלְיָה) [A] Ti. WHI]. A town on the coast of Pamphylia, founded by Attalus Philadelphus, king of Pergamum, for the Syrian and Egyptian trade, which it shared with Perga. There has been some discussion about the site, as Strabo (p. 667), enumerating from west to east, mentions Olbia, the river Catarrhactes, and then Attalia; from which it would seem that Attalia must be the modern *Latta*, Ptolemy, however, is more exact; he puts it west of the Catarrhactes. Thus, it is equivalent to the modern *Adana*, which is still a port with considerable trade. The town has a picturesque appearance, being perched on the long line of cliffs created by the calcareous deposits of the Catarrhactes, which pours over them in torrents to the sea. The remains are almost entirely Roman. The apostle Paul passed through the town on his return from his 'first missionary tour' in the interior (Acts 11:25). It is still a bishopric. [See **PERGA**, and Ramsay, *Hist. Geogr. of Asia Minor*, 420.] W. J. W.

ATTALUS (ΑΤΤΑΛΟΣ) [AV]. Three kings of Pergamum bore this name; but we are here concerned with the last two—Attalus II., Philadelphus, 159-138 B.C., and his nephew Attalus III., Philometor, 138-133 B.C. The Pergamene kings were all allies of Rome, and the last made the Roman people his heir (see **ASIA**). In 1 Mace. 15:22 we read that 'Lucius, consul of the Romans,' wrote letters in favour of the Jews to Ptolemy, Attalus, Ariarathes, and others. Attalus II. is probably meant; but, as the date of the letters falls in 139-138 B.C., it is possible that they were sent to his successor, Attalus III. was the son of Eumenes by Stratonice, the daughter of Ariarathes, king of Cappadocia, who was a close ally of the Romans, sharing the fate of Ptolemy Licinius in the war with the Pergamene pretender Aristonicus, 130 B.C. Josephus (*Ant.* xiv. 10:22) quotes a Pergamene decree in favour of the Jews about the time of Hyrcanus. W. J. W.

ATTHARATES (ΑΤΘΑΡΑΤΗΣ) [B], ΑΤΘΑΡΑΤΗΣ [A], ΑΘΑΡΑΤΗΣ [L], 1 Esd. 9:49 = Neh. 8:9, **TIRSHATHA**.

ATTHARIAS (ΑΤΘΑΡΙΑΣ) [B], 1 Esd. 5:40, RV = Ezra 2:65, **TIRSHATHA**.

ATTIRE For Ezek. 23:15 (עֲרִירִים, *ʿēḇīrīm*) see **TURBAN**; for Jer. 23:22 (עֲרִירִים, *ʿēḇīrīm*) see **GIRDLE**; for Prov. 7:10 (עֲרִירִים, *ʿēḇīrīm*) see **DRESS**, § 1:14.

1 After **AT** we may assume a separate place-name **Ataroth**; see **ATHATH**.

AVIM, AVIMS, AVITES

ATTUS (ΑΥΤΟΥΣ) [AL], 1 Esd. 8:29, RV = Ezra 8:29, **ATTUS**, 1.

AUGIA (ΑΥΓΙΑ) [BAL], 1 Esd. 5:6, **NOTIN** Ezra 2:61 = Neh. 7:63. See **BARZILLAI**, 3.

AUGURY (one who practises augury, RV Lev. 19:26; Deut. 18:14; 2 K. 21:6, AV 'observer of times,' עֲרֹתֵי). See **DIVINATION**, § 2 (2).

AUGUSTUS (ΑΥΓΟΥΣΤΟΣ) [Ti. WHI], an honourific title bestowed upon Octavian (27 B.C.), and from him handed on to his successors. It is applied to him, along with the title of **CAESAR** (12:3), in 1 K. 2:1 F.V. For his reign, in as far as it concerns Jewish history, see **HERODIAN FAMILY**, 1, and **ISRAEL**; and for the difficulties raised by 1 K. 2:1 with regard to the census, see **CHRONOLOGY**, § 3:1.

In Acts 25:15 the AV 'Augustus' for **σεβαστός** should rather be, as in RV, simply 'the emperor,' or, as in RV⁶⁸, 'the Augustus.' The reference is to Nero (see **CAESAR**). For 'Augustus's hand,' or rather (as in RV) 'the Augustus's hand' (Acts 27:1 σπειρης Σεβαστού), see **ARMY**, § 10.

AURANUS (ΑΥΡΑΝΟΥ) [V], cp **AVARAN**, leader of the Assassins in Jerusalem in the time of Lysimachus (2 Mace. 14:1).

AUTEAS (ΑΥΤΑΙΔ) [B], 1 Esd. 9:43 = Neh. 8:7, **HODIAM**, 2.

AUTHORITIES (ΕΞΟΥΧΙΑΙ) 1 Pet. 3:22. See **ANGELS**, §§ 1, 9.

AVA (אָוָּ), 2 K. 17:4 AV; RV **AVVA**.

AVARAN (ΑΥΡΑΝ) [AV], 1 Mace. 2:5. See **ELEAZAR**, 7; **MACCABLES**, 1, § 3; cp **AURANUS**.

AVEN (אָוֶן) [B], 1 Esd. 10:3, **MA**, 5, but **הַלְיוֹי פֹּלְעֹשֶׁת** [BAL] in 1 Esd. 10:3, 1. In Ezek. 30:17 the reference is doubtless to the Egyptian Heliopolis (see **ON**).

2. In Hos. 10:3 (F.V. 'the high places of Aven') Targ. Jon. has **בֵּתֵי**, Bethel, which explanation is given by all ancient and most modern interpreters; but, in consideration of the well-attested use of **אָוֶן** (*aven*) in the sense of 'false worship,' 'idolatry' (see, e.g., Hos. 12:12 [11]), it is a question (1) whether we should not render with G. A. Smith, 'Destroyed are the high places of idolatry, the sin of Israel,' and (2) whether, when we have regard to the parallel passage Am. 7:6, and to the probably not infrequent occurrence of glosses in the MT of the prophetic writings (see, e.g., Mic. 1:5), the words **בֵּתֵי** should not be either omitted or printed in a different type as an editorial insertion. The passage, as Wellhausen remarks, gains greatly by this omission. Ag's reading, *exalta idola*, favours the view here taken of **אָוֶן**. Ibn Ezra paraphrases **בֵּתֵי** 'the high places of the Baals.'

3. In Am. 1:5 Maundrell (1667), Grove, W. A. Wright, and G. A. Smith (with Hitzig) are inclined, in company with **ON**, to identify the 'plain (or broad valley)' of Aven' (**BEKATH-AVEN**; so AV⁹⁸) with the great plain between Lebanon and Antilibanus (the so-called *Be'ka'*), in which the famous temple of the Syrian Heliopolis (Baalbec) was situated. The vocalisation **אָוֶן** will then imply a play on the name—not On, but Aven. This, however, is a far-fetched supposition. On (=Egyptian *Awn*) represents the secular, not the religious, name of the Egyptian Heliopolis (see **BEKATH-AVEN**, 4). It is very doubtful, moreover, whether the second Heliopolis (Baalbec) was an Aramaean city in the time of Amos, and it is a plausible view of Wellhausen that **אָוֶן**, 'false worship,' has been substituted for the name of some god. Cp Winckler, *AT Unter-such.* 183, n.

AVENGER (אָוֶן), Nu. 35:12. See **GOEL**.

AVIM, AVIMS, AVITES. See **AVIM**.

AVITH

AVITH (אִי־ת), in 1 Ch. Kt. מִי־ת; רֶעוּאִי־מ [BADEL], the city of Hadad I., king of Edom, Gen. 36:15 1 Ch. 1:40 (רֶעוּאִי־מ [A], עִי־ת [L]). G's reading of the Hebrew must have been אִי־ת, Gittaim, which is clearly correct. The city of the next king had a name of similar meaning (Masrekah). See GITEAIM. T. K. C.

AVVA, וִו־אָ (אִי־וָ or אִי־וָ; Vg. *Avva*); 2 K. 17:24 (אִי־וָ [B], אִי־וָ [L], RV; also *Ivvah*, AV *Ivau*, אִי־וָ omitted or only represented in corrupt form in G; Vg. *Avva*, 2 K. 18:34 (אִי־וָ [A]; not in G^m), 19:13 (אִי־וָ [B], אִי־וָ [A], om. L) = Is. 37:33 (אִי־וָ [B], אִי־וָ [A], om. L) = Is. 37:33 (אִי־וָ [B], אִי־וָ [A], om. L). In the latter group of passages the punctuation implies an exegetical mistake (see commentators on Is. 37:33); the name throughout should be Avva or Avvah, and it used to be thought that the city referred to the same as that from which the king of Assyria brought colonists to the 'cities of Samaria' (2 K. 17:24). It is clear, however (W. *1st International*, 101 f.), that 2 K. 17:24 has been interpolated by some one who supposed *SEPHARVAIM* [q.v.] in 2 K. 18:34 19:13 to be the Babylonian city of that name. It is only in the speeches of Sennacherib's envoys that Avva has a right of existence; 'Avva or 'Avvah, however, is surely a corruption of 'Azah (אִי־ז), 'Gaza.' Tiglath-pileser, when he conquered Gaza in 734 B.C., appears to have introduced the cultus of Aser (W. *GBI*, 228, 333). 'Where, then, are the gods of Sennacherib and of Gaza?' (So Che. *Exp. Times*, June 1899.) T. K. C.

AVVIM (אִי־מ), so RV; AV *AVIM*, *AVIMS*, *AVITES* [*Avvites*, RV]. 1. According to Dt. 2:21, the Avvim inhabited the Philistine coast 'as far as Gaza' before they were 'destroyed' by the Caphtorim—i.e., the Philistines. The same late writer, in whom the antiquary's interest is prominent, states that the Avvim dwelt in villages or settlements (אִי־מ); see HAZOR; G and Vg., however, read אִי־מ, 'the Hivites' (or *evaiot* [BAFL]; *Hivites*). In Josh. 13:20 (an editorial insertion which expands the simple statement of JE in 1:1) we find the Avvim again introduced, and described (if RV is right) as belonging to the S. of Philistia; probably, however, 'on the south' belongs to the whole region defined in 1:1 2:3. Here G and Vg. once more read 'the Hivites.' Sir G. Grove (in Smith's *DB*) suggests that the Avvim may be identical with the Hivites (cp G Vg. above); but the latter name is uniformly found in the singular (אִי־מ). The word might, to a Hebrew ear, mean, yet probably does not mean, 'ruins' (cp *hiv*). Not improbably it is a mutilated form of אִי־מ, 'Arabians' (Che. *Exp. Times*, June 1899). The Avvim (so-called) were Beduin who had begun to adopt a settled life.

2. אִי־מ, with def. art., 'the ruins' (אִי־מ [B], אִי־מ [A], Vg. *Avva*), an unidentified place in Benjamin (Josh. 18:23). It is mentioned in immediate connection with Bethel and Pithul, and on this a count has been conjectured by Knobel to be the same as Ai.

3. In Josh. 15:20 Gt reads 'Avvim' for 'Hiv'. See *Hiv* (1). 4. The people of Avva (q.v.), 2 K. 17:31. G again of *evaiot* [BAFL] (there is a second rendering, *avvites* in L); Vg. *Hivites*. T. K. C.

AWL (אִי־ל), lit. 'borer'; אִי־ל [BAFL]. An instrument for boring, mentioned in the description of the 'law of slavery' (Ex. 21:6 Dt. 15:17). It probably resembled the Egyptian boring instruments depicted in Kito (a.r.), or those more recently discovered by Bliss at Tell el Hesi (see *A Mount of Many Cities*, 81). Such instruments were used by workers in leather (see Eiman, *Life in Ancient Egypt*, 450 f.). Cp SLAVI RV.

AWNING (אִי־נ), cp Gen. 8:13, Ezek. 27:1 RV, correcting the punctuation (אִי־נ, AV 'that which covered thee'). Cp DRESS, § 1 (4).

1 Cp Kun. *Rev.*, 117-118, Mey. *GA* 1:217 (§ 179).

AYEPHIM

AXE. From the rude stone chisels and hatchets ('celts') of palæolithic man, bronze and iron axe, hatchet, tomahawk, and adze were gradually developed. Various early forms of these implements (needed alike in war and in peace) are found in our museums of Egyptian and Babylonian antiquities: the monuments also give ample evidence of their existence. See HANNUCRATES and WEAPONS.

Of the OT words for 'axe,' three at least may be nearly synonymous:

1. אִי־ז, *axen* (*axen*); Dt. 19:5 (אִי־ז); 20:9 (אִי־ז); 1 K. 6:7 (אִי־ז); 18:10 (אִי־ז); 18:11 (אִי־ז). The word is used three in the Sibam inscription (ll. 24, in the sense of a quarryman's or miner's pick. On 2 S. 12:31 2 K. 6:5, 1 p. Iron, § 2.

2. אִי־ז, *axen*, *axen* (*axen*); Jmlg. 2:4 1 S. 7:4 1 S. 13:20 f. Jer. 4:22), perhaps specially used for felling trees; if so, it would have a heavier head than the *axen*.

3. אִי־ז, *axen*, *axen* (*axen*); Ps. 7:10; in Tg. Jer. 4:22 for Heb. אִי־ז. RV gives 'hatchet,' apparently to suggest a diminutive *axen*. G, Sym., Pesh., however, read, not אִי־ז, 'its carved work,' but אִי־ז, 'its gates.' The rather improbable word אִי־ז should perhaps be אִי־ז 'knife' (Che. *P. 12*), and in the light of the Tg. we should emend אִי־ז to אִי־ז 'two-edged' (Herz, Che. 12, 'with two-edged axe').

Somewhat different from these, and probably adze-shaped, is:

4. אִי־ז, *axen*, *axen* (*axen*); BBAQ, reading אִי־ז, *axen* in Jer. 10:4 (1 S. 4:1) (*axen*, *axen*), and by emendation of the text in Is. 10:33 (Dobin) and Zech. 11:12 (see FOREST). Kimhi understands something lighter than the *axen*, or *axen*. In Jer. 10:4 *axen* is a tool suitable for fashioning or carving wood.

Two other words are doubtful.

5. אִי־ז, in Ezek. 26:9, LV 'axe,' an insecure rendering. The text is possibly corrupt (see Co.; *taís machairas* [BAQ], *taís machairas* [BAQ]).

6. אִי־ז, 2 S. 12:31 (אִי־ז) [A] 1 Ch. 20:3 אִי־ז, which Berth. and Kittel conform to Sam. The text, however, perhaps needs more extensive emendation. Che. reads אִי־ז, a marginal correction of the אִי־ז (after אִי־ז) which he found its way into the text (*Exp. Times*, 1899, p. 253). See SAM.

Of the N1 names the *axen* of Mt. 3:10 Lk. 3:9 is the woodman's axe; but Rev. 20:4 (*axen*, *axen*); 1 p. G 1 K. 5:18 refers to the axe of the headman (*axen*).

Axes were among the emblems of high rank in Egypt and at Mycenae (see the axe figured in Erman, *Egypt*, 73; Schliemann, *Mycenae*, 252). In the OT it is rather the mace that is the favourite emblem of sovereign power (see ROD). There is, however, a sarcastic passage in Bar. 6:15 which suggests that the axe could be an emblem of divinity; and we may perhaps illustrate it by Frazer's learned note on Paus. x. 11. The double-headed axe is characteristic of so-called Hittite sculptures. The Labrandean Zeus of Caria also is represented on coins as carrying a double-headed axe (*labrus* = axe in Lydian; Plut. *Quaest. Græc.* 45). There appears on the coins of Tenedos a similar axe, which, being generally accompanied by a cluster of grapes, may be a symbol of the worship of Dionysus. Cp also Ohnefalsch-Richter, *Kleinasien*, 1:257. Of course, the bow and the sword, not the axe, are the emblems of Yahwé, though in Ezek. 9:2 the supernatural agents of Yahwé carry mauls (or like weapons). See BATTLE-AXE.

AYEPHIM (אִי־פ), the rendering of RV^m in 2 S. 16:14, where the text has, 'and the king and all the people' that were with him came weary.' So G, אִי־פ [B], אִי־פ [A]. The name of

1 אִי־פ as it stands does not make sense. For proposed emendations see Che. (*SROP*, Isaiah, Heb.), Dobin, 16, Ki.

2 'With a terrible crash' (אִי־פ) is only a conjectural rendering of M^t.

3 Perhaps, however, the axe was depicted as a survival of the time, before the introduction of coined money, when it may have been the unit of barter (Kilgeway, *Origin of Metallic Currency*, etc., 317 f.). Perhaps too the 'longue' (אִי־פ) of gold in Jer. 7:21 was in the shape of an axe; see *Exp. Times*, Nov. 1897, p. 61.

AYYAH

some place seems to be required by the context. If Ayyephim be indeed a place-name, the locality it indicates remains unidentified. On the other hand, it may be a corruption of the place-name may have dropped out. Cp. We. *in loc.*; **Ἰ** αὐτὸς παρά τὸν Ἰορδάνην.

G. A. S.

AYYAH (אֵיָיָה [BA, Gl.], 1 Ch. 7:28† RV¹⁹⁰⁸ = AV GAZA [q.v., 2]. See AL, 1.

AZAEI (αζαει [BA], 1 Esd. 9:14 = Ezra 10:15, ASAPH, 4.

AZAELOS (αζαηλος [B]), 1 Esd. 9:14 = Ezra 10:41, RV AZARIEL, 5.

AZAL, or rather RV AZEL (אֶזֶל; ἄζωδ [BNT], αζαηλ [AL]), the point to which the cleft of the mountain is to reach when Yahweh descends upon the Mt. of Olives in battle (Zech. 14:4). This place, presumably situated near Jerusalem, is often identified with the equally obscure ΒΕΛΗΛΕΙ. Kohler, Wright, and others (after Vg. Symm.) with less probability, take αζαηλ to be an adverbial expression, 'very near, hard by' (cp. Olsh. § 1676; but see also König, § 330 f. [7]). Clermont-Ganneau thinks of the Wady Asil, a little valley on the right of the 'Am el-Lôz, in the Wady en-Nar (PI FQu., 1871, p. 101).

AZALIAH (אֶזֶלְיָה, εὐσελίου [AL], father of Shaphan the secretary, 2 K. 22; ἑλίου [B] = 2 Ch. 34 [αζαηλ] [BA]).

AZANIAH (אֶזְנָן, § 32, 'Yahweh weighs,' cp. Jaazaniah; αζανηλ [BA], נחל [N], αζανί [L], a Levite signatory to the covenant (see EZRA, i. § 7), Neh. 10:6 [1].

AZAPTION (αζαφειωθ [B]), 1 Esd. 5:13, AV = Ezra 2:55 RV, HASSOPHELETH [q.v., 1].

AZARA, RV ASARA (αζαρα [BA]), a family of NETHINIM mentioned after PHINEAS (= P Haseiah) in the great post-exilic list (see EZRA, ii. § 6), 1 Esd. 5:1†. Unmentioned in 1 Esd. 12:10 Neh. 7:51.

AZARAEI (αζαρηλ [BA]), Neh. 12:36, AV, RV AZARIEL, 4.

AZARAIAS, 1. AV SARAIAS, 1 Esd. 8:1 (αζαραίος [B], αραίος [AL]) = Ezra 7:1, SERAIAH, 7.

2. AV AZARIAS (2 Esd. 11); see AZARIM, 3.

AZAREEL, or rather, as in RV, Azarel (אֶזְרִיֵּל, § 28; 'God helps'; εζρηλ [AL], cp. AZRIEL).

1. One of David's warriors (1 Ch. 12:6; αζρηλ [B], ελρηλ [AL]; αρα [L], see DAVID, § 11, a. iii).

2. One of the sons of Heman (see LAVI, 1 Ch. 25:18 (αζαρα [B], αζρηλ [L]; cp. UZZIEL).

3. A Danite 'prince' under David (1 Ch. 27:22; αζαραηλ [B], αζρηλ [L]). See DAVID, § 11, c. i.

4. A priest in list of inhabitants of Jerusalem (see EZRA, ii. § 5 [A], § 15 [1] a), Neh. 11:13 (αζρηλ [BNT]); in the procession at the dedication of the wall (see EZRA, ii. § 13 g), Neh. 12:36, AV AZARAEI (αζρηλ [BNT], αζρηλ [N⁶⁴ p. superscr.]).

5. In list of those with foreign wives (see EZRA, i. § 5, end), Ezra 10:41 (αζρηλ [B], αραηλ [N]) = 1 Esd. 9:14 (EZRIL, RV EZRIEL, εζρηλ [BA], αραηλ [L]), apparently repeated as AZARIELS (αζαραηλ [AL], ας [B], om. L).

AZARIAH (אֶזְרִיָּה, §§ 28 84 [or אֶזְרִיָּה; in nos. 1, 2, 6, 7, 8, 13, 15, 19, 20; cp. Baer on 1 Ch. 23:8], 'Yahweh helps'; cp. ELEAZAR, AZRIEL; αζαριας [BAL], 1. b. Zadok; priest, temp. Solomon, 1 K. 4:2 (αζαρηλ [B]). See BEN-HUR.

2. Chief priest, temp. Uziah (2 Ch. 26:17-20).

3. Chief priest, temp. Hezekiah (2 Ch. 31:10-11).

In 1 Ch. 6:14 (5:15-16) the name of Azariah is borne by the twelfth, the fourteenth, and the twentieth in descent from Aaron in the line of Eleazar (2 Ch. 31:13 αζαρια [B]); of the fourteenth it is said that he 'executed the priest's office in the house that Solomon built in Jerusalem' (1 Ch. 6:10 f. [5:9 f.]). Omissions and transpositions allowed for, the three Azariahs in this series may be held to be identical with nos. 1, 2, and 3 above; at

AZAZEL

the same time, it is difficult to suppose that the Hilkiah of 1 Ch. 6:11 f. (5:9 f.) should be distinguished from the Hilkiah of 1 Ch. 9:11 and 1 Esd. 7:1 (αρειον [B]); if we identify these, Azariah 13 was a contemporary of Josiah, not of Hezekiah. This name appears also as Azarias, Azaraias, Azien, Azarias, and Ezias.

4. Expounder of law (see EZRA, ii. § 13 f.; cp. i. § 8; ii. § 19 [L], § 15 [1] c), Neh. 8:7 (om. BBA), 1 Esd. 9:48 (AZARIAS), and signatory to the covenant (see EZRA, i. § 7), Neh. 10:2 [1] (αζαρια [BNT aL], αζαριας [N⁶⁴]). See also Neh. 3:23 (αζαρια [BBA]), 24 (βηθαζαρηλ [BA], οίκον ας. [L]). He is apparently the EZRA of Neh. 12:1 f.

5. A Kohathite Levite (1 Ch. 6:36 [21], αζαρια [B]), cp. 2 Ch. 29:12, 29:19. In 1 Ch. 6:44 [6] his place is taken by Uziah, 2.

6. b. Nathan, supervisor of Solomon's twelve prefects (1 K. 4:5). Probably he had to see that the contributions of the different departments were punctually furnished. His father was most likely the well-known prophet who in 2 S. 12:1 is called simply Nathan (so Ew., We., Klo.). Others (e.g., Balh) made Azariah Solomon's nephew; cp. 2 S. 14 (αρεηλ [BNT]). See, however, Z. 10:1.

7. A son of King Ithobashaph, twice enumerated (as Azariah and Azariah) in 2 Ch. 21:2, but omitted in 2 Ch. 22:1.

8. A son of Jehoram, king of Judah in 2 Ch. 22:6 (αρεηλ [BNT]); but it is clear from 2 K. 8:26, as well as from 2 Ch. 22:1, that AZAZIAH [2] is meant. In 2 Ch. 21:17 he is called JUDAH AZAZ (q.v., 3).

9. King of Judah; otherwise known as UZZIAH (q.v., 1).

10. One of the 'three children,' companions of Daniel; otherwise called ANANIAS (q.v.) (Dan. 1:7 11:19 Song of Three Children, 7, 66 [2], Theod. Dan. 3:88, AZARIAS, 7).

11. A Judahite, son of Etham, 1 Ch. 2:8 (αζαρια [B], αζαρια [A]).

12. A Jerahmeelite, 1 Ch. 2:38 f. (αζαρια [B]).

13. b. Obed, a prophet of Judah, whose prophecy to King Asa is recorded in 2 Ch. 15:1-8. The prophecy is attributed to Obed in 7:8.

14. Son of Jeroham; one of the captains who were associated with Jehoiada in deposing Athaliah (2 Ch. 23:1).

15. Son of Obed; another of the captains associated with Jehoiada (2 Ch. 23:1; cp. 1 Ch. 2:38 f.).

16. Son of Hoshai; an opponent of Jeremiah, Jer. 43:2 (αζαριας [N⁶⁴]). Cp. JAANANIAH, 1.

17. Leader (see EZRA, ii. § 8 c) in the great post-exilic list (Ez. ii. 9), Neh. 7:7 (αζαρια [BNT], αρα [AL] = Ezra 2:2, SERAIAH; see EZRA (αραϊας [BA], αραϊας [AL]).

18. In procession at dedication of wall (see EZRA, ii. § 13 g), Neh. 12:33, αζαριας [BNT] (see Baer), cp. (1).

19. An Ephraimite, temp. Ahaz, who took part in restoring the captives of Judah, 2 Ch. 28:12 (αρεηλ [B]).

20. b. JHALLELEI, a Merarite Levite, 2 Ch. 29:12 (αζαριας [BA]).

AZARIAS (αζαριας [BAL]), the Greek form of AZARIAH.

1. 1 Esd. 9:21 = Ezra 10:21, UZZIAH, 3.

2. In list of Ezra's supporters (1 Esd. 9:43), wanting in 1 Neh. 8:4; see Be. *ad loc.*

3. 1 Esd. 9:13 = Neh. 8:7, AZARIEL (A).

4. RV AZARAIAS (2 Esd. 11), b. Hilkiah; see AZARIAH (3).

5. The name assumed by the angel RAFAEL [q.v.] when accompanying Tobit (Tob. 5:12 6:13 7:8 9:2).

6. A captain in the army of Judas the Maccabee, 1 Macc. 5:18 5:60 (in 7:56 αζαριας [AN]).

7. Song of Three Children, 65 (2 Theod. Dan. 3:88; see AZARIAH (10)).

AZARU (αζαρου [B]), 1 Esd. 5:15 RV; AV AZURAN.

AZAZ (אֶזֶז, αζαζ [BA]; but L gives αζαζ = i.e., Joazaz; cp. Azaziah, a Reubenite name (1 Ch. 5:8†).

AZAZEL (אֶזְרִיָּה, 1. Of the two goats set apart for the great Day of Atonement (see ATONEMENT, DAY

OF), one was chosen by lot for a sin-offering for Yahweh, the other for 'Azazel

practice. (Lev. 16:8-10). After the sin-offering had

been made in behalf of the people, the high priest was

to lay both hands upon the head of the goat for 'Azazel,

and confess over it all the sins of the Israelites (cp. the

confession of sin in Mishna, Yoma 6:2), laying them on

its head and sending it out into the wilderness to Azazel

(7:21 f.). The meaning of this act, which is further

described in the Targum of pseudo-Jonathan, is clear.

The goat symbolically bears away the sins of the people.

Something analogous is found in Lev. 14:4 f., where, for

the purification of the leper, one bird is to be killed, and

the other, charged with the disease is to be let loose.

1 AV renders 'scapegoat.' For the renderings in 2, see col.

305, note 7.

into the open field. Cp also Zech. 5:5 ff., where sin is carried away bodily into the land of Shinar.¹

The meaning of Azazel is much disputed; it is, of course, a subject closely connected with the inquiry into the origin of the custom. It is at least certain that, as Azazel receives one goat while Yahweh receives the other, both must be personal beings.

2. Who was Azazel?

The theory of the Jewish interpreters (Eg. ps. Jon., Kashi, Kirsh; cp Ibn Ezra's references to current views), that Azazel is a place in the wilderness, is inadmissible; and equally so are the views of Ap., Symm., Jer., AV, that it means the goat itself (*τράγος ἀφαιρούμενος* and *ἀφαιρούμενος, capre emissarius*, 'the scape-goat'), and of Merx in Schenkel's *Bib. Lex.* 1:256, and others, that it is an abstract term, a 'complete removal or dismissal' (from *ἀφαιρέω*), a view probably taken by B.²

It seems most natural to connect the belief in question with the demonology and angelology which developed so largely in the post-exilic age (*Ezech.* 6:7-8; 10:10-14). One group of interpreters, on this view, take Azazel as a prominent member of the class of *se'irim*, or demons of the field and the desert, to whom sacrifices were offered in post-exilic times (Lev. 17:7; see SATYR, § 2), to whom possibly all the sins of the people with their evil effects were symbolically sent every year (so, with various modifications, Ew., Di., Dr. [*Ezech.*], Now., Benz.). We need not, however (with the first three scholars), regard the conception as a primitive one, or as having been taken over by the religion of Yahweh from an earlier stage; and least of all is there any imitation of the symbolic vengeance taken by the Egyptians on Set-Typhon³ (see Briggsch, *Keltig. u. Mythol. d. alt. Äg.* 710). On the other hand, Cheyne ('The Date and Origin of the Ritual of Azazel' in *Z. f. d. l. T.* 15:151-156 [1885]) considers it to have been one of the objects of the ritual 'to do away with the evils of *se'irim* by substituting a personal angel for the crowd of impersonal and dangerous *se'irim*'.⁴ His arguments for this very attractive view are (a) the form of the name (deliberately altered from *azazel*, 'God strengthens'; cp *azazel*, 1 Ch. 15:21), which seems to be akin to that of the other names of angels; and (b) more especially the passages of the Book of Enoch referring to Azazel as a leader of the evil angels (Gen. 6:1-24). 'Azazel is therefore of literary not of popular origin; he is due to the same school of speculative students of Scripture to which we owe the other names of angels, good and evil, in the later literature.' In any case, we must admit that the old interpreters who identified Azazel with Satan⁵ had some plausibility on their side (Orig. c. *Cels.* 6:395; Iren. *Her.* 1:12, followed by Spencer, Hengstenberg, Kalisch, and Volck). We may at least venture to say with Reuss⁶ that 'the conception of Azazel lies on the way which led later to that of the devil.' For Azazel is certainly described as in some sense a being hostile to God.

I. B.

It is strange that so many modern critics should have failed to comprehend the ritual of the scapegoat, and have rejected with much positiveness the only natural explanation of the name Azazel, so that it has become a kind of dogma that *azazel* is not from *azazel*, but either a weakened form of *azazel*, meaning 'averruncus,' or 'porro aliens,' or 'amotio' (Ol., Merx, Stade, Kautsch-Ges., Volck);⁷ or else a broken plural of difficult interpretation.

3. Recent criticism.

¹ For extra-biblical parallels, see below, § 3; also Ew. *Ant.* 158; WRS, *Rel. Sem.* 2:422 (and for an Assyriological explanation of the reference to the wilderness, see RITUAL, § 10).

² Cp, however, below, note 7.

³ This view has left a trace in Smith, *DB* 1:297, but has received no sanction from Di. or Dr., whose names are mentioned. Against it see Diestel, *Z. f. d. l. T.* 1:159 ff.

⁴ Prof. G. F. Moore suggests a reference to Nachmanides on Lev. 16:8.

⁵ The Rabbinic identification of Satan with Samael as 'chief of the Satans' (*Midr. R.* on Dt. 11:3) may here be chronicled.

⁶ *Gesch. der Schriften des A.T.* 2:501.

⁷ Some critics refer to *azazel* as having initiated the theory of an abstract formation. Certainly in Lev. 16:10 *azazel* renders *ἁφαιρέσει* *εἰς τὴν ἀνομιαν*; and in 16:26, *εἰς ἀφαιρέσει*. What the

(perhaps some particular class of unfriendly demons; see Steiner in Schenkel, *Bib. Lex.* 5:390, and Bochart). The truth is that the old derivation of Azazel from *azazel*, 'to be strong' (see 1g. ps. Jon., Saadia), needed to assume a new form in order to commend itself.

The explanation of the name as *azazel* (which was retracted by Diestel its author) implies an un-Hebraic mode of formation, says Di., and the names of angels compounded with *azazel* belong to the later Jewish theology. The former objection is not absolutely decisive; the name *Abiel* in *Jubilees* seems to be *azazel* (see Aben Ezra). Still, there is no necessity to follow Diestel; the later Jews could form names correctly, and the explanation offered above, which, with the connected theory, may claim to be virtually a new one, is not open to Di.'s objection. Di.'s second objection points the way to the true reason why modern scholars have often given such far-fetched and improbable (however learnedly justified) etymologies. They felt that a name formed on the analogy of Michael and Gabriel must be late; but their theory compelled them to suppose that Azazel was early, and that the name Azazel in *Ezech.* (like Babel and Babelon, Delitzsch ventures to add) was simply borrowed from the OT.² Thus the light thrown on the name by the Book of Enoch was missed. Nor was sufficient use made of the Mishna treatise called *Yoma*, with its strange but not imaginary details, although the description comes from a time not very far removed from that of the later portions of the priestly code. Nor did critics give heed enough to the facts of comparative folklore, which illustrate certain details in the *Yoma*.

The more we study the Priestly Code, the more we are struck by the combination of firmness and laxity which its compilers display. They are firmness itself as regards the essential principles of the Law,³ but very compliant to minor popular superstitions. Nothing, therefore, can be more probable than that the legal authorities to whom the later portions of Lev. 16 are due gave their sanction to a custom which it had perhaps been found impossible to root out, on condition of its being regulated and modified by themselves. Assuming this to have been the case, we can explain the name Azazel, and even account for the pelling, which has struck many scholars as inconsistent with the etymology *azazel*. From the point of view here adopted—viz., that the priestly code is not Mosiac, but a combination of diverse elements due to many different persons in the exilic and the post-exilic periods, and framed in a statesmanlike, compromising spirit—there can be no doubt that the view here mentioned is correct. There is no uncertainty as to the meaning of the name Azazel, and very little as to the origin and significance of the rite.

To supplement the account of the present writer's theory given above, it may be said that, like Diestel formerly, he opposes the widely received view that Azazel was a *κακοδαίμων* to whom the sin of the people and the resulting excommunications were sent, and that the belief goes back to pre-exilic times.

The first part of this view was that of Benzinger (*Arch.* 478) in 1894; it is, however, scarcely tenable. The sultan of the *jinu*, to whom the *se'irim* propitiated by the Jews in post-exilic times correspond (see SATYR, § 2), has no personal name; he and his subjects are impersonal. If Azazel were a demon we should hear of him in other parts of Leviticus. Nor is it likely that even a later legislator would have adopted Azazel as an evil demon.

translator means by this, however, *ἀφαιρούμενος* (so Theodoret, *Quaest.* 22 in Lev.). In short, he agrees with Ap., Symm., Jer. in deriving the name from *azazel* and *azazel*. This gives the right interpretation of *ἀφαιρούμενος* (BAFL), which answers to Azazel in 16:10, *averruncus*, i. e. 'this view of the facts, is not the equivalent of B's term, as w. (*Int.* 363) supposes.

¹ Del. is not happy in his explanation, 'Defier of God.' He traces the name to Arabic mythology; 'azzel is used of a horse which successfully resists its rider (*ZKH* 1:182 [30]); but König is no more successful—'fortis decedens' is his rendering (*Lehgeb.* 2:4, 417).

² So Driver (*Expositor*, 1884, b. p. 215). In Hastings' *DB* (art. 'Azazel') no very definite conclusion is reached; but reference is duly made to the too generally neglected analogies of other popular religions.

³ Kalisch rightly says that, 'although Azazel and his goat are a stain on the Levitical legislation, they do not taint the main principle of Judaism—God's absolute sovereignty' (*Leviticus*, 2:204).

probable that strange appeal, 'I charge you, O ye daughters of Jerusalem, by the fairy-hosts and by the tree-spirits.'⁵ In such a poem the name of Yahwe could not be lightly used; all the world, however, knew of the supernatural beings who haunted thickets and sometimes inhabited trees, and like the *jun* to-day, were sometimes friendly to man, sometimes unfriendly.⁶ The substitution appears to have produced an effect; at least, the Chronicler, in the third century, represents the custom of sacrificing to the *gōrām* as puse-exile (2 Ch. 11.15). Certainly, too, we may infer from the details respecting the *gōrām* (the dismissed goat) in *Yoma* that the popularity of the institution was great. The cries, 'Take (them) away and get out,'⁷ reported by the *Gomana* on *Yoma* 64, show how intensely the lower class (Babylonians they are disparagingly called) beheld in the removal of their sins by the goat. See also *hṣ. Barn.* 7; *Tertull. adv. Marc.* 37; *adv. Jud.* 14; *Just. c. Trach.* 40. That the 'goat for *Azazel*' was really pushed over the precipice (*Yoma*, 61, we have no reason to doubt, is instructive

directions in Lev. 16 could not bring himself to put down all that actually happened. What we read is that Aaron was to confess all the sins of the Israelites (there is great emphasis on 'all') over the goat, and to send him away in the charge of a certain man into a solitary land (מִן־הָאֲדָמָה עַד־הַיָּם *v. 21 f.*). This is explained in Tg. ps.-Jon., 'and shall send him away by a man prepared from the preceding year, to take him into a rocky desert which is Beth-hadîrê' (see above). In compensation for this, it is Leviticus that gives us one detail not preserved in *Yômid*. In *v. 10* it is said that the goat for Azazel is to be presented alive before Yahwê, that atoning rites may be performed over him (וְהָיָה חַיָּם לְפָנָיו); which recalls the direction about the 'living bird' (see § 1) that forms a parallel to the scapegoat in the law of cleansing the leper (Lev. 14 6 f.).

¹ Another form of the name may have been Uzziel (cp Tg. ps., Jon. on Gen. 6, 4 with *Enoch* ii). The form *Uzael* also is found.

⁴ See WRS, *Rel. Sem* (20418, 422, 468).

5 Cant. 2735, צִבְצִיבִּית וְצִבְצִיבִּית. The change in the pointing

is very slight; it should be π . The usual explanation is very fanciful (see Budde). The sacred trees (especially the locust-
 one) and the tree *Arbutus*.

or (arab-trees) are still revered in Palestine as being possessed.
 * See WRS, *Rel. Sem.* 2: 121-133; Ballensperger, *PEFQu.*
St., July '93, p. 204 ff. Some of the *jinn* are believed to be
 dangerous to newly married people. Don't play with love, says
 the passage (Cant. 2.7).—for fear of the *jinn*.

the passage (Ch. 7) - for fear of the jinn.

To resume and to supplement: the usages described in *Yema* are a combination of a primitive sacrifice to the demons of untitled or (especially) mountainous country with a superstitious custom still widely prevalent, according to which evils of all kinds were thought to be got rid of by the device of hiding them on some animal, which was thereupon driven away from the community like the scapegoat (see Lall, *Fortnightly Review*, 1872, p. 131; Fraser, *Golden Bough*, 219, 223; F. Knight, *Howe's Two Peoples* [Ed., 221 f.]). Such customs, as Fraser points out, tend to become periodic, like the rite of the scapegoat. See, further, APOSTOLUS, DAY OF.

AZAZIAH אֶזְזִיָּאֵל, § 29, 'Yahwē is strong,' or 'strengthens', *oz[ē] hac* [138ALD].

1. A Levite musician, temp. David (see I Chr. 15:21).
2. An Ephraimite, temp. David (I Chr. 27:1).
3. A Levite, temp. Hezekiah (2 Chr. 35:13; Oš⁹95 [A]).

AZBUK (MEET), AZABOY [N], X [B], AZBOYX [V].

AZEKAH (עֶזְקָה, אֶזְקָה [EzQah], a town in the
 husband of Deborah, 15:15.

AZEI (1.8), Zech 145 KV=AV, AZAL, q.v.

AZEM (אֶזֶם), Josh. 15:29 AV, RV EZEM.

AZETAS (ΑΖΗΤΑΣ [BA], om. 1), a family in the great post-exilic list (see EZRA, ii. § 6, § 8 c) in 1 Esd. 515, but not in 1 Esd. 216 = Neh. 7 21; perhaps the name owes its presence to some mistake (Mrv. *Ent.* 155 n.).

398

AZIA

AZIA (אֲזַיָּה [B]). 1 Esd. 5:31 = AV Ezra 2:49, UZZA, 2.

AZIEI (אֲזִיעִי [B]). In the genealogy of Ezra, see AZARIAH, 3.

AZIEL (אֲזִיֶּל [B]). 1 Ch. 15:20. See JAAZIEL.

AZIZA (אֲזִיזָה [B]). § 83; 'strong'; אֲזִיזָה [B]. אֲזִיזָה [A] in list of those with foreign wives (Ezra, i. § 5, end), Ezra 10:27. 1 Esd. 10:28; SAKOLIS, RV ZAKOLIS (Σακολίς [B]), Σακολίς [A], אֲזִיזָה [L]).

AZMAVETH (אֲזַמְבֶּת [B]). perhaps 'Death is strong' [cp Cant 8:6], a possible name for a hero [see AZIMOTH, and cp Gray, *III*, 231]; acc. to Kittel the ending should be *-muth* or *-muth* [SOT 1 Ch. 1:20], om. BA. אֲזַמְבֶּת [B]. אֲזַמְבֶּת [L]. A Benjamite place near Geba (Neh. 12:20), usually identified with *el-Hizmah*, a village 4 m. NE. of Jerus. in between Jeba and 'Anat (ZDP² 2185; *PRF* Mem. 30).

The line Azmaveth occurs in the great post-exilic list (see Ezra, ii. § 9), Ezra 2:24 (אֲזַמְבֶּת [B]). אֲזַמְבֶּת [A]. אֲזַמְבֶּת [L]. Neh. 7:28 (אֲזַמְבֶּת [B]). אֲזַמְבֶּת [A]. אֲזַמְבֶּת [L]. BETHAZMAVETH (בֵּית אֲזַמְבֶּת [B]). 1 Esd. 5:18, RV BETHASMAVETH, which is preferable to AV BETHSAMOS (Βαθασμων [B]), Βαθασμων [A]).

AZMAVETH (אֲזַמְבֶּת [B]). see above; אֲזַמְבֶּת [B]. אֲזַמְבֶּת [L].

1. One of David's thirty mighty men, 2 S. 23:31 (אֲזַמְבֶּת [B]), אֲזַמְבֶּת [B]. אֲזַמְבֶּת [A]. אֲזַמְבֶּת [L]. 1 Ch. 11:13 (אֲזַמְבֶּת [B]), אֲזַמְבֶּת [A]. אֲזַמְבֶּת [L]. 1 Ch. 11:13 (אֲזַמְבֶּת [B]), אֲזַמְבֶּת [A]. אֲזַמְבֶּת [L]. being both miswritten for אֲזַמְבֶּת [We. Dr.]. Azmaveth, the 'father' of JAZIEL and PELETH, 2 (1 Ch. 12:1; אֲזַמְבֶּת [B]), two of David's warriors, may, however, be the place-name; cp above. See DAVID, § 11 (2) f.

2. b. Jehoshaphat or Jashb; a descendant of Saul in a genealogy of BENJAMIN (§ 9, ii. [B]), 1 Ch. 8:30 (אֲזַמְבֶּת [B]). אֲזַמְבֶּת [L].

3. b. Adiel, one of David's over-seers (1 Ch. 27:35). See DAVID, § 11 (C) f.

AZMON (אֲזַמּוֹן [B]). an unidentified site, marking the western portion of the southern frontier of Judah before the point where 'it went out at the brook of Egypt' (Josh 15:4; Nu. 34:15). S has אֲזַמּוֹן [B]. אֲזַמּוֹן [A]. אֲזַמּוֹן [L]. S has אֲזַמּוֹן [B]. אֲזַמּוֹן [A]. אֲזַמּוֹן [L]. Targ. has אֲזַמּוֹן, on which last precarious reading Trumbull bases his identification of Azmon with 'Ain el-Kasme in the W. Kasme. With Azmon cp Ezem (אֲזַמּוֹן).

AZNOTH-TABOR (אֲזַנּוֹת תְּבוֹר [B]). i.e., 'ears, or outliers, of Tabor'—§ 99; cp UZZA-SHEERAH, a landmark of Naphtali, doubtless near Mt. Tabor, Josh. 19:34 (אֲזַנּוֹת תְּבוֹר [B]). אֲזַנּוֹת תְּבוֹר [A]. אֲזַנּוֹת תְּבוֹר [L]. According to *Onom.*, אֲזַנּוֹת תְּבוֹר (OS² 224, 88) lay near Diocesarea or Sepphoris; cp CUSLOTH-TABOR, and see TABOR.

AZOR (אֲזֹר [Ti. WH]). Mt. 1:13; see GENEALOGIES, ii. § 2.

AZOTUS (אֲזֹטוֹס [Ti. WH]). Jos. *Ant.* xii. 112, ΕΖΑC [ed. Niese]. ΑΖΑC ΑΖΑΡΑ, the 'mount' to which Bacchides pursued the Jews in the battle (Apr. 161 B.C.) in which Judas the Maccabee lost his life (1 Macc. 9:15), is unknown. Michaelis has very plausibly conjectured that the expression may be due to a mistranslation of the Heb. אֲזֹתוֹת (cp ASUMOTU-PIGATU), meaning the slopes where the hill country of Judah descends into the Shephelah. Ewald (*Gesch.* 422, n. 2) compares Aṣrā W. of Bir ez-Zet, a small hill.

2. The Azotus (אֲזֹטוֹס [Ti. WH]) of Acts 8:40 1 Macc. 4:15 5:63 10:77 f. 84 11:4 14:14 16:10 Judith 2:28 is ASHDOD [q.v.]. Some (including Buhl, p. 180) also identify with Ashdod the Azotus of 1 Macc. 9:15.

AZRIEL (אֲזַרְיֶל [B]). 2 perhaps 'help of God.' § 29).

1 On the vocalisation and S's readings cp HAZARMAVETH.

2 אֲזַרְיֶל is an Aram. pronunciation (cp אֲזַרְיֶל), and it is noteworthy that here, contrarily to its usual practice, S prefers the Hebrew vocalisation (cp Kittel, *SOT* ad loc.).

AZZUR

1. One of the chiefs of Manassebeyond-Jordan, 1 Ch. 5:24 (אֲזַזְרָה [B]). אֲזַזְרָה [A]. אֲזַזְרָה [L].

2. A Naphthalite, 1 Ch. 27:17 (אֲזַזְרָה [B]); but some Hebrew MSS have UZZUR, a reading supported by S (אֲזַזְרָה).

3. Father of Seraiah [2], Jer. 36:16 (אֲזַזְרָה [B]). אֲזַזְרָה [A]. אֲזַזְרָה [L].

AZRIKAM (אֲזַרְיָקָם [B]). אֲזַרְיָקָם [A].

1. Levite, in list of Judahite inhabitants of Jerusalem (Ezra, ii. § 5 [L], § 15 [1a]). Neh. 11:15 (אֲזַרְיָקָם [B]). אֲזַרְיָקָם [A]. אֲזַרְיָקָם [L]. אֲזַרְיָקָם [B]. אֲזַרְיָקָם [A]. אֲזַרְיָקָם [L]. 1 Ch. 9:24 (אֲזַרְיָקָם [B]). אֲזַרְיָקָם [A]. אֲזַרְיָקָם [L]. 1 Ch. 9:24 (אֲזַרְיָקָם [B]). אֲזַרְיָקָם [A]. אֲזַרְיָקָם [L].

2. A descendant of Zemibabel, 1 Ch. 3:23 (אֲזַרְיָקָם [B]). אֲזַרְיָקָם [A]. אֲזַרְיָקָם [L].

3. Descendant of Saul in a genealogy of BENJAMIN (§ 9, ii. [B]), 1 Ch. 8:38 (אֲזַרְיָקָם [B]). אֲזַרְיָקָם [A]. אֲזַרְיָקָם [L]. 1 Ch. 9:44 (אֲזַרְיָקָם [B]). אֲזַרְיָקָם [A]. אֲזַרְיָקָם [L].

4. 'Ruler of the house' under Ahaz, 2 Ch. 28:7 (אֲזַרְיָקָם [B]). אֲזַרְיָקָם [A]. אֲזַרְיָקָם [L].

AZUBAH (אֲזֻבָּה [B]). 'forsaken'; אֲזֻבָּה [B].

1. Wife of CALEB [q.v.] in 1 Ch. 2:13 f. (אֲזֻבָּה [B]). אֲזֻבָּה [A]. אֲזֻבָּה [L]. The names in this passage are as peculiar as the constructions. Kittel (*SOT*) renders an emended text thus: 'And Caleb b. Hezron took Azubah (deserted one) to wife, and begat Jernoth (tent-curtains); and these are her sons, Jeshur (uprightness), Shobab (backsliding), and Ardun.' As to the names of these sons, Jeshur may be read Jeshur (Yahwe is right), and Shobab Jashub (one who turns to God), and Ardun Ornan (Sopra). But S can hardly be thus used of God in spite of Dt. 32:1 Ps. 119:17, and Ornan, or (1 Ch. 3:21 MT) Arnan, has a suspicious aspect. Hence Klostermann (*Gesch.* 115) takes it to be a record of a shortlived colony of Calebites, founded on the spot where there had been a pastoral settlement. The renders 'Caleb b. Hezron made the deserted one—the woman of tent-curtains—to bear children, namely, Upright, and Backslider, and Destruction' (reading אֲזֻבָּה אֲזֻבָּה, and אֲזֻבָּה). The colonists began well, but 'left the paths of uprightness' (Pr. 2:13), and were given up to 'destruction' (S. Sheol, Pr. 15:11). Wellhausen also (*Die Gen.* 33 f.) notices the symbolic character of the names; אֲזֻבָּה, according to him, = אֲזֻבָּה, Jeshuran; אֲזֻבָּה (so he reads) is a tent-dwelling woman; אֲזֻבָּה, the desert region inhabited at first by the Calebites.

2. Mother of Jehoshaphat, 1 K. 22:42 (אֲזֻבָּה [B]). אֲזֻבָּה [A]. אֲזֻבָּה [L].

AZUR (אֲזֹר [B]). Jer. 28:1 Ezek. 11:1 AV; RV better AZUR [q.v., 1 f.].

AZURAN, RV AZARU, RV^{mg} Azuru (ΑΖΑΡΟΥ [B]). אֲזֻרָה [A], om. L), family in the great post-exilic list (see Ezra, ii. § 9, § 8 c), in 1 Esd. 5:15, but not in 1 Esd. 2:16—Neh. 7:21; probably identical with AZUR, 2 (Neh. 10:17 [13]). Note in each case the occurrence of the preceding names, Adin, Ater, and Hezekiah.

AZZAH, AV GAZA (גִּזָּה [B]). גִּזָּה [A]. אֲזַזָּה [L]). 1 Ch. 7:28 RV. Many Hebrew MSS here read גִּזָּה (Ayyah; cp G⁶), a reading recommended by the context. The place was apparently N. of Shechem. See GAZA.

AZZAN (אֲזָן [B]). 'gifted with strength'; אֲזָן [B]. father of PAUTHIEL, 2 (Nu. 34:26 f.).

AZZUR (אֲזֹר [B]). in 2, 'helped [by God]'; see NAMES, § 56, and cp AZURI of ASHDOD.

1. Father of Hananiah, the prophet, of Gileon, Jer. 28:1 (S. ch. 35:1) (אֲזֹר [B]). AV AZUR.

2. Father of IAAZANIAH [4], Ezek. 11:1 (אֲזֹר [B]). אֲזֹר [A]. אֲזֹר [L]. אֲזֹר [B]. אֲזֹר [A]. אֲזֹר [L].

3. One of the signatories to the covenant (see Ezra, i. § 7); Neh. 10:17 (אֲזֹר [B]). אֲזֹר [A]. AV AZURAN; perhaps also a Gibeonite?

B

BAAL ¹ (𐤁𐤏𐤋): ♂ often 𐤁𐤏𐤋𐤁𐤏, indicating that the reader is to substitute **BAAL**; the substitute has found its way into the text in 1 K.

1. Meaning of name: In *Gen. 25*, as the corresponding **BAAL** has in the Heb. text of Jer. 3:24 and elsewhere; see Dr. *MBP* 1 Phil. hist.

local numina. *KL* 1881) is a word common to all the Semitic languages, which primarily signifies *owner, proprietor, possessor*. It is used, for example, of the owner of a house, a field, cattle, and the like; the freeholders of a city are its *ba'anim*. In a secondary sense *ba'* means *husband*; but it is not used of the relation of a master to his slave or of a superior to his inferior; nor is it synonymous with the Heb. and Phoen. *adon*, Syr. *mar*, Arab. *rab*, in the general sense of *lord, master*. When a divine being (*el*) is called *ba'al* it is not as the lord of the worshipper, but as the proprietor and inhabitant of some place or district, or the possessor of some distinctive character or attribute, and therefore a complement is always required. Each of the multitude of local Baals is distinguished by the name of his own place. There was a Baal of Tyre, a Baal of Sidon, a Baal of Hama, a Baal of Tarsus, a Baal of the Lebanon, and a Baal of Mt. Hermon; a Baal of Byblos, and so on.² We know that in some cases the Baal of a place had a proper name: the Baal of Tyre was Melkart; in Southern Arabia Dhū Samāwi was the Baal of Bākir, 'Athtar of Gumdū, and so on. In other cases the local Baal was distinguished in some other way. The god of Shechem was Baal-berith (perhaps as presiding over an alliance; but see **BAAL-BERITH**); Baalzebul (to whom was ascribed control of flies; cp **BAALZEBUB**) had a celebrated oracle at Ekron; a *παλαρμας, κολπαρος κώσαν* (Baal-markos), is known from inscriptions found near Beirut; a *𐤁𐤏𐤋𐤁𐤏* (*annator*?) in Cyprus, and so on. In Baal-gad and Baal-zephon the second element seems to be the name of a god (see **FORTUNE, BAAL-ZEPHON**). On Baal-hammon and Baal-shamem see below § 3 f. There is nothing in these peculiar forms to shake the general conclusion that Baal is primarily the title of a god as inhabitant or as owner of a place.

There were thus innumerable Baals—as many as there were towns (Jer. 2:28 II 13), sanctuaries, natural objects, or qualities which had a religious significance for the worshippers. Accordingly, we frequently find in the OT the plural, Baalim, the Baals, which we must interpret not, as many still do,³ of the multitude of idols, or of local differentiations of one god, but of originally distinct local numina. The Baals of different places were doubtless of diverse character; but in general they were regarded as the authors of the fertility of the soil and the increase of the flocks (Hos. 2:12), and were worshipped by agricultural festivals and offerings of the bounty of nature (Hos. 2:13). An interesting survival of this conception is the Talmudic phrase, field of the baal, place of the baal, and the Arab *ba'* for land fertilised, not by rain, but by subterranean waters (cp *Gen. 1:10*, *Gen. 2:10*). Proper names of persons such as Hannibal (favour of Baal), Baalrubal (help of P), Baal-yatan (Baal has given), Shama-baal (Baal be crs), compared with similar Yahwé names, Hananiah, Azariah, Jonathan, Shemaiah, show that Phoenician parents acknowledged in the gift

of children the goodness of Baal, as Israelite parents that of Yahwe.

That Baal was primarily a sun-god was for a long time almost a dogma among scholars,⁴ and is still often repeated. This doctrine is connected with theories of the origin of religion which are now almost universally abandoned.

The worship of the heavenly bodies is not the beginning of religion. Moreover, there was not, as this theory assumes, one god Baal, worshipped under different forms and names by the Semitic peoples, but a multitude of local Baals, each the inhabitant of his own place, the protector and benefactor of those who worshipped him there. Even in the astro-theology of the Babylonians the star of Bel was not the sun—it was the planet Jupiter. There is no intimation in the OT that any of the Canaanite Baals were sun-gods, or that the worship of the sun (Shamash), of which we have ample evidence, both early and late, was connected with that of the Baals; in 2 K. 23:34 the cults are treated as distinct.

The *hammanim* (𐤁𐤏𐤋𐤁𐤏), included in the inventory of places of idolatrous worship with *mayasbas* and *colobas* (Ez. 6:4 and elsewhere), have indeed, since

3. Baal-hammon. Rashi, being connected with the late biblical and Mishnaic *hamma* (𐤁𐤏𐤋), 'sun,' and explained as *sun images* (RV), sun pillars;⁵ and it has further been conjectured that the *hammanim* belonged specifically to the cultus of Baal-hammon, whose name occurs innumerable times in Punic inscriptions,⁶ and is commonly explained 'the glowing Baal'—i.e., the Sun.⁷ This translation, however, can hardly be right; the article would be expected; according to all analogy, *hammon* should be a genitive. The deity which dwells in the sun-pillars would be formally possible; but with the direct connection of Baal-hammon with the sun, one of the chief arguments for interpreting *hammanim* to mean 'sun-pillars' falls to the ground. In this state of the case we cannot be sure that Baal-hammon was a solar deity; and if fresh evidence should prove that he was, it would be unwarrantable to infer that the Baals universally bore the same character.

Another Baal, whose cultus was more widely diffused than that of Baal-hammon—in later times he rose above all the local Baals, and perhaps in many places supplanted them—was Baal-shamem, whose name we must interpret, not 'Lord of Heaven,' but 'The god who dwells in the heaven,' to whom the heavens belong.⁸ Philo of Byblos identifies Baal-shamem (*𐤁𐤏𐤋𐤁𐤏𐤍*) with the Sun (*𐤁𐤏𐤋𐤁𐤏*; see *Orig. Hist. Gr.* 3:505 f.); Macrobius says that the god of Heliopolis was at once Jupiter and Sol (*Sat. I* 23); a Palmyrene bilingual (Vog., no. 16) seems to give *𐤁𐤏𐤋𐤁𐤏* for *𐤁𐤏𐤋𐤁𐤏*, but the reading is not quite certain. The Greeks and the Hellenised Syrians identify Baal-shamem with Zeus (e.g., *Ζ. μεγιστος κεραιριος*), which is better in accord with the obvious significance of the name.⁹

When the Israelites invaded Western Palestine and

¹ See, for example, Creuzer, *Symb. u. Myth.* 2:413; Movers, *Phön.* 1:100 f.

² It is singular that this interpretation did not suggest itself to any of the ancient translators. See further, *MAGGENA*, § 6.

³ In Phoenician also El-hammon.

⁴ In a Palmyrene inscription a *hamman* is dedicated to the sun; De Vogüé, no. 123 a.

⁵ The name is equivalent to Dhū Samāwi in Southern Arabia.

⁶ Baal-shamem in Dan. 12:11 (perverted by Jewish wit to Šikkus Šamem, 'the appalling abomination') was probably a Roman Jupiter (see *AMERICANIST*, 3:1).

¹ See WRS, *Rel. Sem.* 2:92 ff.

² Cp in the OT Baal-hazor, Baal-meon, Baal-peor, Baal-tamar, and the like.

³ For example, Baalzebul.

BAAL

passed over from a nomadic to an agricultural line, they

learned from the older inhabitants not only how to plough and sow and reap, but also the religious rites which were a part of

Canaanite agriculture—the worship of the Baals who gave the increase of the land, the festivals of the husbandman's year. At first, probably, this worship of the Baals of the land went side by side with that of Yahwe, the God of their nomadic fathers. When Israel came into full possession of Canaan, however, Yahwe himself became the Baal of the land. Names like Jerubbaal (Judges), Ishbaal (son of Saul), Baal-pair (son of David), prove that Israelites in whom the national spirit was strongest had no scruple in calling Yahwe their Baal. The worship on the high places was worship of Yahwe in name, its rites were those of the old Baal cult. The prophets of the eighth century, especially Hosea, denounced this religion as pure heathenism. In whose name it is practiced is to them unimportant; it is not the name but the character of God that makes the difference between the religion of Israel and that of the heathen.

In the preceding century Elijah had roused the spirit of national Yahwism in revolt against the introduction of the worship of the Syrian Baal (Melkart) by Ahab, and Jehu had stamped out with sanguinary thoroughness the foreign religion; but this conflict was of a character wholly different from that in which the prophets of the eighth century engaged with the Canaanite Baal-religion practiced in Yahwe's name. In the seventh century, with the introduction of Assyrian cults, there was a marked reversion to the kindred Old Israelite and Canaanite religions, which provoked the violent measures of Josiah, but was only temporarily checked by them as we see from Jeremiah and Ezekiel.

With the cultus of the Baals in Canaan we are acquainted chiefly through the description which the prophets give of the Baal-worship of Yahwe. The places of worship were on the hill tops, under the evergreen trees; they were marked by pillars, statues, *herms*, *menhir*s. Images were not always, perhaps seldom, present: an image required a shrine or temple. At the altars on the high places, offerings of the fruits of the land and the increase of the flocks were made; beside them fornication was licensed—nay, consecrated. The Baals had their priests (CH. MARIM, q. v.) and prophets. At the great contest on Carmel they leap upon the altar, and cry, and gash themselves with knives after their manner. We may supplement these scanty notices by descriptions of Phœnician worship, especially of the Syrian Baal, Melkart, and of the Punic 'Kronos,' in Greek authors. See, further, HIGH PLACES, IDOLATRY, and, with reference to human sacrifices, MURDER.

Literature. See, further, HIGH PLACES, IDOLATRY, and, with reference to human sacrifices, MURDER. 'Baal,' *PRÉ* (3); Pictet-Mann, *Phœnizier*, 1820, 182 ff.; Baethgen, *Beitr. z. semit. Religionsgesch.*; F. Meyer, art. 'Baal' in Roscher, *Lexikon der Griech. u. Röm. Myth.*, 1867 ff. W. R. S.—G. E. M.

BAAL (בַּעַל, 'Lord'; עֲבָדָה, 1 Ch. 8:35).

1. In a genealogy of REUBEN: 1 Ch. 5:5 (וְהָאֵל [B], בַּעַל [A], בַּאֵל [1]).

2. In a genealogy of BENJAMIN (q. v., § 9, ii. β); 1 Ch. 8:30 (בַּאֲלֵאֵלִי, i. e. בַּאֵלִי וְהָאֵל [B], בַּאֵל [A] וְהָאֵל [1]). It is more probable that 'Yf, followed by some ancestor of (S), dropped Ner (נֶר) in 1 Ch. 8 than that it has been added elsewhere (so S. R. O.). The conjecture (We. *TBS* 31 n.) that Baal and Nadab are to be read together as a compound name is thus unsupported; it is also unnecessary, since Melch

1 Punic temple inscriptions defining the dues of the priests for various kinds of sacrifice (so-called Tariffs of Marseilles and Carthage) show that both the animals offered and the classes of sacrifice were closely similar to those of the Hebrew laws.

BAALE JUDAH

(בַּעַל) likewise occurs (1 Ch. 8:35) alone as a proper name. See NAMES, § 42.

BAAL (בַּעַל), 1 Ch. 4:11. See BAALATH-BEER.

BAA'AH (בַּעַת, § 96). 1. See KIRJATH-JEARIM.

2. A city in the Negeb of Judah, Josh. 15:2 (בַּאֲלָה [B], בַּאֲלָה [A], [1]). In Josh. 19: the name is written BAA'AH (בַּעַת; בַּאֲלָה [B], בַּעַת [A], [1]), and the place is assigned to Simeon. In 1 Ch. 4:11 it appears as BAA'AH (בַּעַת, אֲבֵלָה [B], בַּאֲלָה [A], בַּאֲלָה [1]). The reading is uncertain and the site unknown.

3. Mt. Baalah, a landmark on the boundary of Judah between Shikketon and Jalmeeh, Josh. 15:2 (בַּאֲלָה [B], בַּאֲלָה [A], [1]). The site is unknown, unless with Clermont-Ganneau (*Kirjath*, p. 902) we should read בַּעַת for בַּעַת, and identify the 'river of the Baal' with the Nahr Khlam (see JAMNUT, 1). More than one river in Palestine, doubtless, was dedicated to Baal.

BAALATH. See KIRJATH-JEARIM.

BAALATH-BEER (בַּעַת בֵּירָה, Josh. 19:8 בַּאֲלָתִי בֵּירָה [B], בַּאֲלָתִי בֵּירָה [A], בַּאֲלָתִי בֵּירָה [1]) or **Baal** (1 Ch. 4:11), also called BAA'AH of the South (בַּעַת הַיָּמָי, Josh. 19:8) or KAMATH of the South (1 S. 30:7 בַּאֲלָתִי [B], בַּאֲלָתִי [A], [1]); perhaps the same as the Bealoth (בַּעַלֹת, בַּאֲלָתִי [B], בַּאֲלָתִי [A], [1]) of Josh. 15:2 (and 1 K. 16:3; see A. O. R. M.), an unidentified site in the Negeb, probably its most southern part of Judah. The name implies that it had a well and was a seat of Baal-worship.

BAAL-BERITH (בַּעַל בְּרִית, [protecting] Baal of the covenant, 1 form of the Canaanitish Baal worshipped at Shechem (Judg. 9:4), called B. Berith (בַּעַל בְּרִית, 'God of the covenant') in Judg. 9:46 K.V.).

It has in Judg. 9:4 בַּאֲלֵבֶרֶת [B], בַּאֲלֵבֶרֶת [A], בַּאֲלֵבֶרֶת [1]; in 1 S. 30:7 בַּאֲלֵבֶרֶת [B], בַּאֲלֵבֶרֶת [A], בַּאֲלֵבֶרֶת [1]; in 1 S. 31:1 בַּאֲלֵבֶרֶת [B], בַּאֲלֵבֶרֶת [A], בַּאֲלֵבֶרֶת [1].

The covenant intended was probably that between Shechem and some neighbouring Canaanitish towns, which were originally independent, but were at length brought under Israelitish supremacy (Ew., Kue., We.). Of the rival views—viz., (a) that the covenant was between Baal and his worshippers (Baethgen, Sayce in Smith's *Diss.*), and (b) that it was between the Canaanitish and the Israelitish inhabitants of Shechem (Ew., Ki.)—the former gives an undue extension to a specially Israelitish idea, and the latter misconceives the relation of the Israelites with Shechem to the Canaanites. Gen. 14:13 cannot possibly establish the former (Baethgen), nor can the name of Gaal's father, or the speech of GAI (q. v.) in Judg. 9:23, be used to support the theory of an influential Israelitish element in the population of Shechem. Any Israelites who might be dwelling in Shechem would be simply sojourners or protected strangers, and not parties to a covenant. The temple of Baal-berith had a treasury from which the citizens made a contribution to Abimelech (Judg. 9:4). It was there that Gaal first came forward as a leader of the rebellion (9:27), and within its precinct the inhabitants of the tower of Shechem (the 'acropolis,' We.) found a temporary refuge from Abimelech at the close of the revolt (9:46). The dictionarist editor mistakenly accuses the Israelites of apostatising to Baal-berith after Gideon's death (Judg. 8:33; see Moore's note).

T. K. C.

BAALE JUDAH. See KIRJATH-JEARIM.

1 'Or may not Baal-berith, El-berith, simply mean "God of the community" (cp. COVENANT, § 5)? The original story probably gave the name of the god of Shechem' (Prof. N. Schmidt).

BAAL-PERAZIM

BAAL-GAD (בַּלְגָּד, 'Lot] of Good Fortune', cp Gadubal 'Gad Bal' Hoffmann, *Leber eine*, phon. *Leber*, 27), **BAALGAD** [BL], and through corruption **BAALGADAI** [BAL], 'in the valley of Lebanon, under Mt. Hermon', is thus mentioned in Joshua (11:7, 12:1; 13: 1a) as [BL], **BAALGAD** AL, *baalgad* [L], as marking the northern limit of Joshua's conquests. Though Sayce and others identify it with Baalbek because it is described as in the *gebirge* of Lebanon, it is much more probably the BAAL HERMON of 1 Ch. 5:6 (cp also the 'mount Baal hermon' of Judg. 3: 1, now known as *Ramath*; see C. N. R. A. § 7 f., and D. A. N.,

BAAL-HAMON (בַּחַמּוֹן בְּנֵזֶר, ΒΑΧΛΑΜΩΝ [B], ΒΕΕΛΛ. [S], ΒΕΛΛ. [V]), a place where, according to a marriage song of no historical authority (ant. 814), Solomon had a vineyard which he entrusted to keepers. Some (e.g., Del., Oettl) have identified it with the Baalhamon of Judith 8, which seems to have been not far from Dothan. It is obvious, however, that some well known place is meant, and the references to N. Israelish scenery elsewhere in the Song of Songs give some weight to Gratz's conjecture that for 'Baal-hamon' we should read 'Baal hermon' (Judg. 3: 4 Ch. 5: 20). If Soer (Bibl.³⁶ 334) is right, Baal-hermon and Baal-gad are the same, and are to be sought at the mod. Halseyā (see, however, C. S. ARA. Phil. 1914) on the insurmountable on both sides of the valley vines and other fruit-trees are still cultivated. Most probably, however, 'in Baal-hamon' is due to a corrupt repetition of 'to Solomon.' Bickell is right in omitting it. T. K. C.

BAAL-HANAN (בַּלְחָנָן), § 42. 'Baal has been gracious'; cp. Johanan, Ph. חֲנָנִי, and the well-known 'Hannibal,' also Ass. *Baithanana*, *cf.* I. qn.

1. Ben Achbor; one of the kings of Laban, according to Gen. 36:38. (𐤁𐤏𐤁𐤏𐤕𐤁𐤏 [A], 𐤁𐤏𐤁𐤏𐤕𐤁𐤏 [D], 𐤁𐤏𐤁𐤏𐤕𐤁𐤏 [E], 𐤁𐤏𐤁𐤏𐤕𐤁𐤏 [I], 𐤁𐤏𐤁𐤏𐤕𐤁𐤏 [Ch 1.49], 𐤁𐤏𐤁𐤏𐤕𐤁𐤏 [B], 𐤁𐤏𐤁𐤏𐤕𐤁𐤏 [A], 𐤁𐤏𐤁𐤏𐤕𐤁𐤏 [L]). Strangely enough, the name of his city or district is not given. Moreover, the scribe's error 𐤁𐤏𐤁𐤏 (Hebrews) for 𐤁𐤏𐤁𐤏 (since) in 1 S. 11:1 (see Bul. *S/O/T*) suggests that 𐤁𐤏𐤁𐤏 𐤁𐤏 Achbor) in Gen. 36:38 may be a variant to 𐤁𐤏𐤁𐤏 𐤁𐤏 in 1 S. 11:1. Now, as Haddad II, an important king, (probably) the founder of a dynasty, has no father's name given, it seems likely that Baal-hanani is the lost father's name; and thus the text should run, 'And Saul died, and Haddad, ben Baal-hanani, reigned in his stead' (so Marq. *Found.* to f.; see, however, Bul. [n.]). See EDOM, § 4. HADAD.

2. A Gederite; according to the Chronicler, super-
intendant of olives and sycamores in the Shephērah of
Judah in the time of David; 1 Ch. 27:28 βαλανας [B],
βαλλανα [A], βαλααναν [L]. See DAVID, § 11 c.

BAAL-HAZOR (בַּעַל הָעֶזֶר), §§ 93, 96), 2 S. 1323.
See HAZOR, 2.

BAAL-HERMON (בַּעַל הֶרְמוֹן; § 93, Βαλῆριον [B*], Βαδελειον [B^{ab}], ΒΑΔΑ ΕΡΜΩΝ [A], 1 Ch. 523; see BAAL-GAD, BAAL-HAMON, and, especially, CUSARIA PHILIPPI.

BAALI (בָּאָלִי), Hos. 2:16 EV; mg. rightly 'my lord' AV, RV 'my master.' See HOSIA, § 6.

BAALIM (בָּאִלִּים), Judg. 21. See BAML, § 1.

BAALIS (בְּאִילִים; BEA[ε]ICA [BN⁺ΔQ], BENCCA [N⁺] ΒΑΑΛΙC [Q^{neg}], cp Sw, *ad loc.*; Jos. *Ant.* x, 93; § 164, ΒΑΑΛΙΜΟC – i.e., בְּאִילִים as some Heb. MSS read), king of the Ammonites, the prime mover in the murder of Gedaliah (Jer. 40 [47]₁₄; cp 41₁₀). The name is interesting as an etymological problem. Some render 'Son of exaltation,' on the precarious supposition that in this name and a few others ב stands for ב (see

¹ Through confusion of λ, α, and δ in the uncial writing.

BROKAR); while Baethgen (*Hebr. zur Sem. Rel. Genh.*, 11) compares the Ptolemaean $\alpha\pi\pi\alpha\gamma\epsilon$ / $\alpha\pi\gamma$ (no. 1272) / $\alpha\pi\gamma\alpha$ (no. 50) and renders 'husband of Isis' (still more preposterous derivation). See AMMON, § 8. W. R. S.

BAAL-MEON (פֶּתַח בַּיִת *phethach bayit*, Nu 32 & Ezek. 25, 1 + Ch. 38), otherwise **Beth-baal-meon** (Ezek. 13 (7)), **Beth-meon** (Jer. 48, 1) or **Beon** (22 Nu 32, 1)

[illegible]

The place is assigned in Numbers, Joshua, and Chronicles to the Reubenites. It is twice mentioned, once as Beth had meon and once as Bar meon, in the inscription of Mesha (1. 16-20), from which we learn that it was Moabite before the time of Omri and became so again under Mesha. It was Moabite also in the time of Jeremiah (Jer. 48. 3), and in that of Ezekiel, who names it with Beth jeshimeh and Karnaithan as 'the glory of the country' (Ezek. 25.6). It is represented by the modern Ma'in, in the W. Zerk M'dm on the Moabite plateau, 2800 ft. above sea-level, 5 m. SW. from Maundah. There are extensive ruins (*Rev. t. vi. 177*).

It may probably be identified with the Maccabean BEAN [7.7]. The *Orientalist* (18.332, 191) quotes the Reubenite city under the forms *βανν*, *Βανν*, *πανά* τοῦ Ἀουοπαίου.

BAAL-PEOR תַּבַּעַבְיָה בַּעַל־פְּעֹר (BACALPEOR ΘΙΝΑΡΚΙΤ),

or, rather, the *Bad of Per* (see RV¹⁸ No. 250; see B&M, § 1), the Moabite god to whose cult I have already alluded, while in Shattim (No. 12, II, D¹ 1, Ps. 106) and three in later writings abbreviated to *YHWH* (13, 24). The name occurs in Hos. 12.4 as *y h w h* (2.10.1) in abbreviation, it would seem, for *YHWH* and *YHWH* (see B&M-Prog.). The nature of the worship of this god is unknown, although it is not improbable that it was a local cult of Chemosh (Gray, *HA* 131). For the old speculations based mostly upon previous etymologies, see Seldin, *De Div Syria*. See, further, 14.9, and cp. Bandman, *Studien*, 22, 3; B&M, *B&M*, 14.7, 201, and *De Num.* ad loc., *De 1 Sam.* ad loc.

BAAL PERAZIM (בְּאֵלֵינוֹרָה, § 84), a place mentioned in connection with a battle between David and the Philistines in the valley of Rephaim (רֶפְאִים), hard by Jerusalem, אֲשֶׁר הָיוּ (ἐπ' αὐτῷ) διακοπῶν [BAV.]; 1 Ch. II: 11 *bis* (φασαφρασιον . . . διακοπῆ φασιν [B], φαλασθ' φασιν . . . διακοπῆ φασιν [S], βαλ' φασιν . . . διακοπῆ φασασιν [A], βαλ' φασασιν *bis* [1]). According to the narrator, the name was so called because David had said, 'Yahwé has broken through my foes before me as at a breaking through of water,' Baal-perazim (*i. e.*, 'Lord of acts of breaking through') being regarded as a title of the God of Israel. The same event seems to be referred to in Is. 28: 21, where the place is called Mt. Perazim (ἄρος ἀσέδω [BSV.]), ὡς ὅτε διακόπτω [Aq. in Q^{ms}], ἐν τῷ ὄρει τῶν διακοπῶν [Sym. Theod. in Q^{ms}]. This form of the name suggests the most complete explanation of David's question, 'Shall I go up against the Philistines?' (7: 19). He asks whether he shall come upon the Philistines from the chain of hills which bounds the valley of Rephaim on the east (in 7: 20 read, 'And David came from Baal-perazim,' with G and Klo.); he starts, he it remembered, from Jerusalem (see DAVID), § 71. On the next occasion he did not 'go up' (on the hills), but came upon his foes from the rear (7: 20). In spite of this narrative, which is written from the later Israelitish point of view, the name Baal-perazim must have existed long before David. It is analogous to KIMMON-PEREZ, which means 'Kimmion (Kinnai) of Perez,' and belonged properly to some point in the chain of hills referred to, which was specially honoured

¹ ἐπαυω cannot = עָנָה, being preceded in 71. 20a by ἐκ τῶν.

BAALSAMUS

by Canaanitish Baal worshippers. David, however, beyond doubt took Baal as synonymous with Yahweh; the name gave him a happy omen, and received a fresh significance from his victory. Whether 'Perazim' was originally a name descriptive of the physical appearance of the hills E. of the valley of Rephaim, or whether it had some accidental origin, cannot be determined.

BAALSAMUS (BAACAMOC [BA]) 1 Is. 9:11 RV - Neh. 8:1 MAY-ELIL 15

BAAL-SHALISHA, RV Baal-Shalishah, (שָׁלִישׁ בְּאֵל) BAITHA [ע] [BA] (B* A* [as sa A]). BHOCAAC

CA [1.], in Ephraim, evidently near Gittai (2 K. 1:22), doubtless identical with the *Bethsalit* and BAITH CAPICAD of Jer. and Eus. (OS 107 n. 23990, 15 R. in N. of Theopolis (Ladd)). These conditions seem to be met by *Kh. Salita*, which is exactly 13 Eng. m. on about 14 R. m. from Laddi (P. 1:22, 76, p. 68). Four miles farther on is the village Kh. Kelt, Thulth, with which Baal-shalisha is now identified by Conder (P. 1:22, 251). In illustration of 2 K. 1:22 the Lalmud (Sukh. 12a) states that nowhere did the fruits of the earth open so quickly as at Baal-shalisha. See SITA THA, 1 AND OR, and cp. ZEPHON.

BAAL-TAMAR (בְּאֵל תָּמָר) 2 K. 1:22 'Baal of the Palm,' §§ 97, 104 BAA THAMAR [BA], an unidentified locality in the neighbourhood of Gilbeah, where the Israelites put themselves in array against the Benjamites (Judg. 20:1). Some think of 'the Palm of Deborah' (Judg. 4:1), which, however, was too remote (Moore), Eus. (OS 238 75) speaks of a Beth-tamar near Gilbeah.

BAALZEBUB (בְּאֵל זֵבֻב) EN TW [EN TH A 1. 2, BA 1: 606; ΔΙΑ ΤΟΥ. 1. 2. C.] BAA WYIAN [BA], taking Zebul or WYIA is the name of the god; so Jos. (Ant. 15: 2), a god of Ekron, whose oracle was consulted by

Amaziah king of Israel in his last illness (2 K. 12:7, 606). The name is commonly explained 'lord of flies'. True, there is no Semitic analogy for this; but Pausanias (vin. 267; cp. J. G. Frazer's note on v. 111) tells us of a *Zēlō d'apūtor* who drove away dangerous swarms of flies from Olympia, and Clement of Alexandria attests the cultus of the same god in Elis (Protr. 2:38); and we may, if we will, interpret the title 'a god who sends as well as removes a plague of flies' (so Baudissin), which lifts the god up a little. Let us, however, look farther.

Benold (*Catalogue*, K. 3500) thought that in an Assyrian inscription of the 12th cent. B.C. he had met with Baal-zabul as the name of one of the gods of the Eblir-nāri (on which see E. R. § 1), in which case Baal-zabul was a widely known divine name, adopted for the god of Ekron. The restoration of the final syllable -bi, however, is admittedly quite uncertain, and the reading Baal-sapuna (see BAAL-ZEPHON, 1) seems much more probable. Winckler, therefore, suggests that Zebub might be some very ancient name of a locality in Ekron² (no longer to be explained etymologically), on the analogy of Baal-Sidon, Baal-Hermon, Baal-Lebanon. No such locality, however, is known, and Ekron, not any locality in Ekron, was the territory of the Baal. It is, therefore, more probable that Baal-zabul, 'lord of flies' (which occurs only in a 'very late' narrative, one which has a pronounced dialectic tendency,³ is a contemptuous euphonic Jewish modification of the true name, which was probably Baal-zabul, 'lord of the

¹ Wi. *CT* 1:22, 225; Hommel, *ATF* 196, 255. Halévy has made a similar mistake (see next note).

² Halévy (*Rev. sem.* 123) thought that he had proved this, but in *Am. Tals.* 174, 16, to which he refers for an Ekronite Zebul, the right reading is Sapuna.

³ Kuenen, *Ond.* 1:409 (§ 25, n. 3).

BAAL-ZEPHON

high house' (cp. 1 K. 8:1, and Schrader's note in *OT*). This is a title such as any god with a fine temple might bear, and was probably not confined to the god of Ekron in the Panamun inscription of Zephah, 1:22, the god Kakkil bears the title *בֵּית שָׁפֹן*, 'lord of the house'. The second part of it strongly reminds us of *בֵּית שָׁפֹן*, the 'high house' of the god Manah (see BABYLON, § 8). 'High house' (*zēbul*) would at the same time refer to the dwelling-place of the gods on the *שָׁפֹן* or 'mountain of assembly' in the far north (see CONGRUATION, MOR. ST. OF). There is some reason to think that the Phoenicians knew of such a dwelling place. The conception is implied in the divine name Baal-Zaphon, 'Lord of the north' (see BAAL-ZEPHON), and in the Elegy on the king of Tyre (1:22, 2812 ff.), and the Semitised Philistines also probably knew of it. At any rate, the late Hebrew narrative, or, if we will, an early scribble, may have presented the application of such a title as 'Lord of the high house' (which suggested to him either Solomon's temple [1:22, 1 K. 8:1] or the heavenly dwelling of Yahweh [1:22, 1:26, 1:28, 1:28, 1:28]) to the Ekronite god, and changed it to 'Lord of flies', Baal-zabul. See BETHZEPHON. This explanation throws light on three proper names, JEZEBEL, ZEPHON, and ZEPHON, also on 1:26, 1:28, 1:28. The same term *zēbul* could be applied to the mansion of the moon in the sky (Hab. 3:1, We.) 1 K. 8:1.

BAAL-ZEPHON (בְּאֵל זֵפֹן), or, no doubt more accurately, Baal-Zaphon (בְּאֵל זָפֹן).

The name of a Phoenician god, formed like Baal-Gad, Baal-Hermon, and meaning 'Baal of the north'. Though not mentioned in *OT*, it is important as enabling us to account for certain ancient Israelitish proper names (ZEPHON, ZEPHON, ZEPHON), and also for the enigmatical reference to a mountain abode of the Elohim, situated 'in the recesses of the north' (1:22, 1:22; see CONGRUATION, MOR. ST. OF). The latter conception was evidently believed by Ezekiel (28:17) to be familiar to the Phoenicians, and is clearly connected with the divine name in question, which describes and designates 'the Baal whose throne is on the sacred mountain of the gods in the north' (Baethg. Beitr. 23:261). The Assyrian inscriptions contain several references to this god. A text of Esar-haddon speaks of Baal-sapuna as one of the 'gods of Eblir-nāri' (see E. R. 1:2, and more than one mountain-district may have borne the name of Baal-Zaphon). The chief seat of the god, however, must have been in the cradle of Mount Lebanon. Elsewhere (CORR. § 3) other texts are referred to in which Baal-sapuna is described as rich in copper, which appears to have been the case with Lebanon. Altogether we cannot be wrong in identifying Baal-Zaphon with Baal-Lebanon, 'the Baal of Lebanon'. The relation of this national deity of the Phoenicians to the Baal-Zaphon of Goshen requires separate consideration (see 2). On the question whether Baal-Zaphon was known under another of his names in Philistia, and even perhaps among the Israelites, see BETHZEPHON, § 2.

² *Βαλζεφών*, so most MSS, but many MSS *Βαλζεφών*; Vg. *Baalzephon* (*zephon* in Jer. OS; Targ. *זֵפֹן*, cp. Syr. *Be'el Sēphūn*; Arab. Walton, 'Safūn, the idol,' *safūn at-fāghāh*), a place near the point where the Israelites crossed the Red Sea, and opposite their encampment (Ex. 11:9 Nu. 33:7). The name is usually understood to point to a national Phoenician god of the

¹ This is akin to the theory of Movers, who makes Baal-zēbul ('Lord of the heavenly dwelling') originally a name of Saturn, a theory which lacks evidence.

² Targum-palestine III. (K. R. n. 267) speaks first of the mountains of Lebanon and then of the land of Baal-sapuna as far as the mountains of Amman.

³ E.g. *AF* 7:10, perhaps 1. This form also seems to be Hexaplaric (see the Bohemian version; the older Sabinic text has *mp* for *ph*).

BAANA

same name, but the Egyptians who mention a goddess Ba'dat-sapuna as worshipped at Memphis¹ connect this cultus, very significantly, with that of *Sapho*, a local god of Western Goshen (see *Griffith*, s. § 2). This divinity was, therefore, evidently not a Phoenician deity, her domain, at any rate, was either in or near the region of Goshen. Consequently the Ba'd whom this local Ba'dat or Belus implies was not also the Phoenician Ba'd Zephon, though whether he had an independent origin or not, cannot as yet be determined. Take most of the local names of Goshen, Ba'd Zephon (or rather see 14) — Ba'd Zaphon) is clearly Semitic.²

The honour accorded by the Egyptians to the consort of Ba'd Zephon, no doubt proves the importance of that town of Goshen. It is difficult, however, at present, to determine the situation of the place (see *Levy*, s. § 6). The expression 'before Ba'd Zephon, *near against it*' obscured in Nu 33:7 f. need not signify 'eastward of,' which in ordinary Hebrew would be the most natural meaning; it seems rather to indicate here some point not yet touched on the N. (for S. 2).

Such identifications as that with Hieropolis (Hierak, Ahiak (Neh. 10), etc.) had to be given up even before the situation of Goshen and Hieropolis was determined by Nool's excavations. For the value of more modern theories (Brugsch, *Ägypten*; Ebers, on the 'Mak' mountain, SW of Suez, Nakhle, on Lake Timsah, near Sheikh en-Nadih; see *Levy*, s. § 2).

1. *BAANA* (בַּנְיָה), probably = *BAANAH* [below]. *BAANA* [BA'NA].

1. b. Abihud (or perhaps better Abihudai; see *Abihud*, s. § 2). Solomonic priest in the temple of Jeruzal, 1 K. 1:2 (Ba'na [B], *azbana* [L]).

2. b. Hushai, prefect in Acher; 1 K. 1:3 (Ba'na [B], *Barana* [L]). His father, Hushai, is not in the well-known canon of David (2 S. 15:37). Cp. *Abihud*, s. § 2.

3. Father of Zibadai [L]; 1 K. 1:3 (Ba'na [L]).

4. 1 Esd. 5:8. Neh. 7:7, *BAANAH*, s. § 2.

5. *BAANAH* (בַּנְיָה), cp. Nabataean *בַּנְיָה* [2 S. 2:34].

6. *BAANA* [BA'NA].

1. b. Rimmon, a Beerothite, one of the murderers of Ishbosheth, 2 S. 2:17 (Ba'na [L], and in 11 Ba'na [L], *ba'na* [L]).

2. Father of one of David's horses, 2 S. 2:21 (Ba'na [L], *ba'na* [L]).

3. A leader (see *Levy*, s. § 2) in the great post-exilic list (2 Ch. 35:1, 2; 1 Esd. 2:2; *BAANAH* [B], *ba'na* [L]).

4. Signatory to the covenant (see *Ezra*, s. § 7); Neh. 10:27 (28) (om. L).

5. *BAANI* (בַּאנִי) [BA'NI], 1 Esd. 9:34 = *Ezra* 10:44.

6. *BAANIAS* (בַּאנִיָּא) [BA'NI], 1 Esd. 9:35, *AV* = *Ezra* 10:25, *BAANAH*, 7.

7. *BAARA* (בַּאֲרָה), a 'wife' of SHAHARIM (q.v.), in genealogy of BENAMIN (s. § 9, 3), 1 Ch. 8:3 (BAARA [B], *BAARA* [L]).

8. *BAASEIAH* (בַּאֲסֵיָּהּ), no doubt a textual error for *בַּאֲסֵיָּהּ*, see *MAASTAH*, a Gershonite Levite; 1 Ch. 6:4 (25) (BAACA [B], *BAACIA* [L], *BAACIA* [L]).

9. *BAASHA* (בַּאֲשָׁה) or *בַּאֲשָׁה*, § 51 [cp. Ba. on 2 Ch. 16:1]. *BAACA* [BA'LI]; Jos. *Ant.* viii. 12 v. *BACANHC*; *EUSEB.* *BA'LI* occurs on the monolith inscription of

1. *Salt*, 41, rev. 1; cp. *WMM*, *As. u. Eur.* 315. The reading *Ba'li* (so Gosselin, Brugsch, etc.) is incorrect.

2. What Ba'd Zephon (at any rate the Ba'd Zephon of Goshen) signifies, is disputed. 'Watch-tower' (q.v.) it certainly does not mean. Gesenius (after Ebers), compared the Gk. *Topos* (originally a wind god), who was identified by the Greeks with the Egyptian *Sop*, *Sop* (Ebers, § 13), on the basis of the later confusion with the giant *Topos*. Quite inadmissible. Nor can the equation be supported by the informatic assertion that

1. 'Top' was a name of 'Sop' (cp. Renan, *Lib. Lett.* for 1873, p. 114). A much more reasonable explanation is 'master of the north', *Le.*, 'north point': Ba'd-Zephon was indeed near the north end of the Gulf. Others (e.g., Ebers) explain Zaphon as 'the north wind', this wind being important for the sailors on the Red Sea, who would make their orisons at the sanctuary of BA'LI-Zephon. In the name Ba'd-sapuna on Hamathitic territory (Dig. phil. III.), Hommel, *Mon.* 111, 255, *WMM*, *As. u. Eur.* 315. See also *ZAPHON*.

BABY, TOWER OF

Shalmaneser II is the name of an Assyrian king [1 K. 17:30, 20; *Schr.* A 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100]. The Assyrian king of Israel in succession to Nabal, whom he conspired against and slew at the Philistine town of Gath, afterwards killing all the rest of Jeroboam's family (1 K. 15:27 f.). The fact that the Philistines were able to resume war against Israel leads to the supposition that there had been a military revolution in which Baasha, one of Nabal's generals, was the leader (cp. *1 K. 15:27 f.*). This reign was marked by his energetic operations against Assyria (1 K. 15:27 f.). By building Ramoth (1 K. 15:27) Baasha had endeavored to shut off Jerusalem from intercourse with the outer world, and Assyria was saved only by the purchase and of Benhadad (cp. § 2), who had aided Israel under Nabal (cp. § 2). We know but little of his acts, or of his might (1 K. 15:27, 1 K. 16:1). He was one of the few kings who died a natural death. He was buried at Tadmor, which was still the royal residence (1 K. 15:27), having been made such by Jeroboam (see *Jerusalem*). Baasha was the head of the second dynasty, which was extinguished a later time by Zimri, in accordance with the word of Yahweh which he spoke against Baasha by Jehu the prophet (see *Jehu*, 2. b. *Humam*). The fate of the house of Baasha is Amos, as also that of Jeroboam (cp. *Nabal*, is referred to by later writers; cp. 1 K. 21:22, 2 K. 9:2). See *ISRAEL*, § 29, *CHRONICLES*, § 8, and, for his date, about 880 B.C., *CHRONICLES*, § 32.

1. *BABEL*, TOWER OF (Gen. 11:1-9). The story of the tower (Gen. 11:1-9) when its location had been filled up, is to this effect: 'All mankind had still one language, and kept together. On

one of their nomadic journeys they found a spot which suggested the adoption of a settled life; it was the plain of Shinar. Having no building material, they devised the plan of baking clay into bricks, and using bitumen for cement. They were the first city builders. Their design, however, was to build, not only a city, but also a stupendously high tower which should be at once a monument of their strength and a centre or rallying point that would prevent them ever being dispersed. Uneasy at their newly awakened activity, Yahweh came down to take a nearer view of the buildings, and then returned (to his lofty mountain abode, Ezek. 28:14) to take counsel with the sons of Elohim. This, he said, is but the beginning of human ambition; nothing will soon be too hard for man to do. Come, let us go down (together), and bring their speech into confusion. Hence arose the present variety of languages and the dispersion of mankind, and hence the name of the well-known city called Babylon.

This naive narrative, which is Yahwistic, probably comes from the same writer as the story of Paradise.¹

Both narratives present the same childlike curiosity about causes, the same strongly anthropomorphic and in some sense polytheistic conception of the divine nature (cp. 7, 6 f. with

2. *General* character.

1. We (*Held*, 1. 6.) suggests that *בָּבֶל* may be a contraction for *בָּבֶלְבֶּל*. Similar contractions are seen in the Phoen. *בָּבֶלְבֶּל* and *בָּבֶלְבֶּל* (from the Hebrew *בָּבֶלְבֶּל*). So is possibly a divine name and seems to recur in the names *Abishai*, *Amishai* (cp. *Anasai*) etc.; see *JERUSALEM*. It may also be the same as the god *בָּבֶל* mentioned in a S. Arab. inscription (cp. 7, 10 (29)). Its identification with a Palm deity *בָּבֶל* is open to question.

2. Cp. the tradition referred to in Jer. 41:9 (*ES* omits the name).

3. On the name (*בָּבֶל*), see *BABYLON*, § 1, and below, col. 411, 4, and § 6.

4. According to the non-critical view, the survivors of the Deluge made their way from the mountain on which the ark had rested to the land of Shinar (so *Sachs*, *Orig. Mon.* 155). The Deluge-story, however, makes Shem, Ham, and Japheth themselves the progenitors of the different sections of mankind, and has thus no need of the Tower-story. Even if such a narrative had been introduced into the Deluge-story, how could 'Shem, Ham, and Japheth' be called 'all the earth' (11:1)? See *We*, *CH* 11; but cp. *Stade*, *ZATW* 14 270 ff. [94].

BABEL, TOWER OF

§ 22); both, therefore, have in all ages given occasion to the enemy to blaspheme. Plado (*De Confusione Linguarum*) thought that, to avoid 'the most supposing impiety,' the anthropomorphisms must be interpreted allegorically. It we are not prepared to follow him in this, we must once more apply the mythological key (see ADAM AND EVE, § 4).

It is perhaps the second *extant* chapter in the mythic chronicle of the first family that we have before us: the passage which originally linked the story of the Tower to that of Paradise has been lost (see NARRATIVE). It is clear, however, that the first men had not gone far from Paradise: they are still on their journeys 'in the east' when this ambitious project occurs to them (see CHRONOLOGY, § 13).

The narrative may be regarded in two aspects. While explaining how the city of Babylon, with its

3. Origin of diverse tongues.

gigantic terrace-temples, came to be built (see § 1), it accounts for the division of men into different nations, separated in abode and speech. Not to be able to understand one's neighbour seemed to the primitive men a curse (cp Dt. 28.49 for 513). It is not improbable that there was an ancient N. Semitic myth which explained how this curse arose. It is said that there are many such myths elsewhere,¹ and some of them (e.g., that reported by Livingstone from Lake Ngami, and that mentioned in the Bengal Census Report for 1872 to mention only two of the best attested) have a certain similarity to the Hebrew story. It is credible, therefore, that the N. Semites ascribed the curse of many languages to the attempt to erect a tower by which men might climb up 'above the stars of God' and 'sit on the mountain of assembly' and 'make themselves like the Most High' (Is. 14.14).

The old myth, like that which seems to underlie the story of Sodom (77), said nothing as to where the

4. Origin of Babylon.

town to which the tower belonged lay. When, however, through some devastating storm, one of the chief temple-towers of Babylon (see BABYLONIA, § 27) fell in remote days into disrepair, wandering Aramæan tribes may have marked it, and, connecting it with the 'babel' of foreign tongues in Babylon, may have localised the myth at the ruined temple-tower. 'Babel', they would have exclaimed, 'it was here that God confounded men's speech, and the proofs of it are the ruined tower and the name of Babel.'

It is remarkable that the polytheistic element in the old myth should have been so imperfectly removed.

5. Character of myth.

Even the writer who adopted and retold the story was still far off from the later transcendental monotheism. The changes which he introduced consisted in omissions rather than in insertions. Yahwé still has to come down to inquire; he still has to communicate the result to the inferior divine beings, and bring them with him to execute judgment; but, though he needs society, as ruler Yahwé stands alone: there is no trial of great gods, as in Babylon. It is also worth mentioning that the narrator's idea of civilisation is essentially a worthy one. No city can be built, according to these early men, without a religious sanction. Thus, as another myth appears to have said, is at once the beginner of forms of worship

and the father of Cain the city-builder (see CAIN, § 1). On the other hand, the idea that God grudges man the strength which comes from men, and tears human ambition, is obviously one of the 'beggarly elements' of ethnic religion from which Jewish religion had yet to disengage itself.

We have seen that there was not improbably an old N. Semitic myth of the interrupted building of a tower

6. OT form not Babylonian.

to account for the dispersion of the nations. Should such a myth one day be discovered in Babylonia,² it will certainly disappoint many persons by not mentioning the 'confusion of languages,' nor giving Babylon as the scene of the events, (1) because the Ass. *balulu* means 'tumble,' not 'confundere,' and (2) because the city of Babylon was regarded as of divine origin, and its name *Babel* was explained as *Bab-ili*, 'the gate of God,' or 'of the gods' (cp BABYLON, § 1). The latter reason is decisive also against the theory³ that the Sabylline story of the Tower of Babel and the cognate one of *Abdônus*⁴ rest on Babylonian authority. That two of the reporters of the story give the polytheistic of *theoi* proves nothing, for the plural was sufficiently suggested by the Hebrew narrative (7: 7). The non-biblical features of their version, though in one point (the object ascribed to the builders) probably an accurate reconstruction of the earliest myth, are of no authority, being clearly derived from the imaginative Jewish Haggada,⁵ which is responsible also for the part assigned by later writers to Nimrod (Jos. *Ant.* 1.12; cp Dante, *Inf.* 31.70-80).

Where was the tower referred to in the Hebrew

7. Site of tower.

narrative? Few scholars have declared this problem insoluble; but almost all have missed what seems the most natural answer. Benjamin of Tudela, who travelled about A.D. 1160, supposed it to be the mound called by the Arabs *Birs Nimrod*, which, he says, is made of bricks called *al-asfar*.⁶ This agrees with the Mishnah (*Ber. rabba*, par. xxxviii), and is probably implied in the strange gloss of Qm. 18.10a. In the sixteenth century Balbi and Ralph Fitch, and in the seventeenth John Cartwright, gave descriptions of the 'Tower of Babel' which are plainly suggested by the huge mass of brickwork, 6 or 7 m. W. of Bagdad, known as Tell Nimrud or 'Akarkuf' (see Del. *Tour.* 2.83; Peters, *Asyria*, 1. 383/4). Pietro della Valle in the eighteenth century perceived the great mound near Hillah called *Babel*, which, however, as Kussan has shown, represents the famous hanging gardens (see *Expositor*, §§ 483). In the nineteenth, C. J. Rich and Ker Porter revived the Birs Nimrud theory, and most scholars have followed them, largely influenced by Nebuchadnezzar's Borsippa inscription. No one has put this view so plausibly as J. P. Peters, in an article which appeared since this article was written (*JBL*, 1896, p. 103). The statements of the king are no doubt well adapted to illustrate the disrepair into which (see § 4) the tower originally intended must have fallen, even though they do not, as Oppert once thought, describe the 'confusion of tongues.' Let us pause upon them for a moment. They tell us that the temple-tower (*zikkuratu*) of Borsippa had 'fallen into decay since remote days,' and indeed that it had never been quite completed by its original builder. 'Rain and storm had thrown down its wall; the kiln-bricks of its covering had split; the bricks of its chamber were in heaps of rubble.' 'To restore it,' says Nebuchadnezzar, 'the great Lord Marduk impelled my mind.'

Borsippa, however, is not the place we should naturally go to for the tower. Babylon, and Babylon alone (which was always distinguished from Borsippa) must cover the site. The late Jewish tradition is of no value whatever: it grew up, probably, during the Exile, when Nebuchadnezzar's restoration of the 'temple of the

¹ See *EBD*, art. Babel, Tower of (Sayce), and cp Loken, *Die Traditionen*, 118-22.

² In a Babylonian hymn we find the god Bel identified with 'the great mountain whose top reaches to heaven' (Giesken, *Kosmos*, 218).

³ In the original myth there was no hyperbole. In the localised myth, however, the description 'whose top reacheth unto heaven' seems paralleled to a phrase in Dt. 1.28, and to similar descriptions of Egyptian obelisks (see Briggs, *Light under the Pharos*, 110) and Assyrian and Babylonian temple-towers (so Eglath-pileser: 'its temple-towers I raised to heaven,' Del. *Is.* *III* 162; and Hammurabi: '(the temple) whose top is high as heaven he built,' *KB* iii. 4, 126).

⁴ A popular etymology would connect *Babel* with *Abau*, *babel* much more easily than with Heb. *batal* (see Olshausen, *Lehrb.* § 189 a), as Bu. supposed in 1881 (*Ureisch.* 35). Onkelos on Gen. 11.9 gives *šāšā* for the *šāš* of MT.

⁵ The story as it stands is not, as Stade (*ZATW*, 1895, p. 157) and Gunkel (*Nb. 149*) hold, of course, on the ground of the supposed discovery in *TSR* 1.5 102 b, *KT* 1.29 b; cp Sayce, *HB. Lect.* 400) have held, Babylonian.

⁶ Gruppe, *Die griech. Kultur in Syrien*, 68; *ZATW* 9.154 181; *StA. ZATW* 15.157 161 168.

⁷ *Carm. Schilb.* 307 ff.; Jos. *Ant.* 1.43; Syme, *Chron. ed. Bland.* 21; *Enc. Chron.* ed. Schwanke, 1. c. Cp Bloch, *Die Quellen des J. Josephus*, 54 f. 170; Freudenthal, *Hebräer Studien* 128.

⁸ See *Isidore* 10.10.26 (Charles, *Isidore* 6.28 1.). The Arabic *ayyuran* comes through Aram. from Ass. *ayyuru*, 'kiln-bricks' (often); both words are used collectively.

⁹ For Sir H. Rawlinson's view, which differs from the views mentioned above, see G. Smith's *Chaldean Genesis*, edited by Sayce, 171.

BABI

BABYLON

seven lights of heaven and earth' was recent. In the *zikkurat* of the great temple E-sagila (see BABYLON, §§ 4, 5), represented, according to Hommel, by Tell 'Amran, we have the true tower of Babel. Nebuchadnezzar himself speaks of this tower in the Borsippa inscription. 'E-temen-an-ki,' he says, 'the *zikkurat* of Babylon, I restored and finished.' An account of this building has been given from a Babylonian tablet by the late George Smith. He tells us that 'the whole height of this tower above its foundation was 35,500, or 300 feet, exactly equal to the breadth of the base; and, as the foundation was most probably raised above the level of the ground, it would give a height of over 300 feet above the plain for this grandest of Babylonian temples.'¹ What vicissitudes this *zikkurat*, or its predecessor, passed through in early times, who shall say?

T. K. C.

BABI (Babī [A], 1 Esd. 5: 2; Ezra 5: 1, 6; 6: 1).

BABYLON. The word בָּבֶל (GAL BABYLON).

Babel, designating the city which, in course of time,

1. **Name, etc.** became the capital of the country known as Babylonia, is the Hebrew form of the native Bē-bēl ('gate of God,' or 'Gate of the gods'). The Accadian or Sumerian name, Ka-dingira, is a translation of the Semite Babylonia. Of the other names of the city, 'Em tu, 'Seat of life,' and B, or B, ka (translated 'house' or 'hollow') are among the best known. The existence of these various names is probably due to the incorporation, as the city grew, of outlying villages and districts. Among the places which seem to have been regarded, in later times, as a part of the city, may be mentioned Su-anna (a name sometimes apparently interchanged with that of Babylon itself); Te, which, though it had, like Babylon, a *palace*, or district of its own, is nevertheless described as being 'within Babylon'; and Suppattum and Latamm, apparently names of plantations ultimately included in the city.

The date of the foundation of Babylon is still uncertain. Its association in Gen. 10: 10 with Erech, Akkad, and Calneh implies that according to Hebrew tradition it was at least as old as those cities, and confirmation of this is to be found in the bilingual Creation-story (see CREATION, § 16 d), where it is mentioned as coeval with Erech and Nippur, two primeval cities, the latter of which has been proved by the excavations to date back to prehistoric times.

No detailed history of the rise of the city has yet come to light. Agum or Agum-kak (time about 1550 B.C.) speaks of the glorious shrines of Marduk and Zippatium, in the temple E-sagila,

2. **History.** which he restored with great splendour. About 862 B.C. Tukulti-Ninip, king of Assyria, took the city, slaying the inhabitants, and carrying a vast amount of spoil (including the property and dues of the great temple E-sagila) back with him to Assyria. Sennacherib, however, went farther than his predecessor. He says that, after having spoiled the city at least once, he devoted it to utter destruction. The temples, palaces, and city-walls were overthrown. The debris having been cast into the canal Arakhtu, that waterway was still further dammed up, and a flood in consequence ravaged the country. Esarhaddon, when he came to the throne, began the rebuilding of the city, restoring the temples with much splendour; and the work of beautifying them was continued by Samsu-šum-ukin and Asurbanipal, his sons, the former as king of Assyria, and the latter as his suzerain. Later, Nabopolassar continued the work; but it was left for his son Nebuchadnezzar to bring the city to the very height of its glory. Later still, Cyrus held his court at Babylon (Su-anna), where vassal kings brought him tribute and paid him homage. The siege of the place and the destruction of its walls by

Darius Hystaspis were the beginning of its decay. Xerxes is said (Herod. 1: 183) to have plundered the temple of Belus of the golden statue that Darius had not dared to remove, and Arrian (3: 6) states that he destroyed the temple itself on his return from Greece. He relates also that Alexander wished to restore this celebrated line, but renounced the idea, as it would have taken ten thousand men more than two months to remove the rubbish alone. Be this as it may, Antiochus Soter, in an inscription found at Birs-Nimrad, mentions having restored the temple E-sagila (the temple of Belus), showing that some attempt was made, notwithstanding Alexander's abandonment of the task in despair, to bring order into the chaotic mass of ruin to which it had apparently been reduced. The people of the great city had, in all probability, by this time almost entirely migrated to Seleucia, on the Tigris; but the temple services were continued as late as the third decade B.C., and probably even into the Christian era. The temple was still standing in 127 B.C. (reign of the Khazendad king Hyaspines), and had a congregation, who worshipped the god Marduk in combination with Ann, this twofold godhead being, apparently, called Anna-Bel. A small tablet, dated '270th year, Arsaces, king of kings,' records the borrowing by two priests of E-sagila (the temple of the goddess Gula at Babylon) of a certain sum of silver from the treasury of the temple of Bel. This date, which is regarded as Arsacidan, shows that certain temples, including the tower of Belus, remained, with their priesthood and services, as late as the year 20 B.C. (*Pale. Or. Record*, 4: 133).

Further north, about 50 miles south of Baghdad, on the east bank of the Euphrates, lie the ruins still identified by tradition as those of Babylon. These

3. **Ruins.** remains consist of a series of extensive, irregularly-shaped mounds covering, from north to south, a distance of about 5 miles. Babel, the northernmost ruin, has, according to Am-south, a square superficies of 120,000 ft., and a height of 64 ft. The next in order is the Mujellibeh, of about the same superficies and a height of 23 ft. After this come two mounds close together, the *Isar* or 'palace,' and that called 'Amur-ubim' to the south of it. These two together have a superficies of 104,000 ft., and a height of 66 ft., or with the *Isar*, or stone monument, 113 ft. Most of these two mounds is enclosed within an irregular triangle formed by two lines of ramparts and the river, the area being about 8 miles' (1000 ft.). Other remains, including two parallel lines of rampart, are scattered about, and there are the remains of an embankment on the river side. On the W. bank are the ruins of a palace said to be that of Neriglissar.

According to Herodotus (1: 178-179), the city formed a vast square, 480 stades (55½ miles) in circumference.

4. **Greek descriptions.** Around the city was a large ditch of running water, and beyond that a great rampart 200 cubits high and 50 broad, there being on it room enough for a four horse chariot to pass, and even to turn, in addition to space sufficient for 50 chariots facing each other. The top, therefore, would seem to have resembled a kind of street. The wall was pierced by a hundred gateways closed with heavy gates. On reaching the Euphrates, which Herodotus says divided the city, it was met by walls which lined the banks of the stream. The streets were arranged at right angles. Where those which ran down to the Euphrates met the river-wall, there were gateways allowing access to the river. On each bank of the Euphrates,

¹ A confirmation of this occurs in the tablet Ba. 2.5.14, 6, which is dated in the year of Ashurbanipal (Alexander's 1st year), and refers to the removal of silver and gold from the temple of E-sagila (so to be read, according to the Accadian dialect), 'for the clearing away of the dust (rubbish) of E-sagila' (Oppen in the *Comptes rendus de l'Acad. des Inscriptions et belles Lettres*, 1893, pp. 414-415).

¹ See Sayce, *Hitt. Lett.*, App. ii.; but cf. Jensen, *Kosmos*, 492 ff.

THE SITE OF BABYLON

Compiled mainly from surveys by Jones, Selby, Bewsher, and Collingwood, 1845-65, with corrections to 1885 (published by the India Office). Small additions, etc., from Kiepert's 'Rumensfelder der Umgegend von Babylon' in *Zschr. d. Gesellsch. f. Ethnologie zu Berlin*.

BABYLON

were certain fortified buildings, the royal palace being on one side, and the temple of Belus on the other. The latter was a tower in stages, with an exterior winding ascent leading from stage to stage, and about half-way up a resting-place for the visitor. The top was surrounded by a spacious chapel, containing a richly covered bed and a golden table. None passed the night there, according to the priests, except a woman of the country whom the god had specially chosen. Lower down was another chapel containing a seated statue of Zeus (Bel-Marduk) and a large table, both of solid gold. Outside were two altars, one of them of gold; and it was here that the golden statue that was carried away by Xerxes formerly stood. Herodotus speaks also of the large reservoir, constructed, he says, by Queen Nitocris, and of the embankments and the bridge that she made, the last being a series of piers of stone built in the river, connected by wooden drawbridges which were withdrawn at night. Nitocris caused to be erected, over the most frequented gate of the city, the tomb which she afterwards occupied; but this, he says, was removed by Darius, who thought that it was a pity that the gate should remain unused, and coveted the treasure that she was supposed to have placed there, which he failed to find. The houses of the city, according to Herodotus, were three and four stories high. He does not mention the hanging gardens.

Ctesias (cp. Diod. Siculus, 27) makes the circuit of the city only 300 stades (11 m. 800 yds.). It lay on both sides of the Euphrates, which was crossed by a bridge at its narrowest point. The bridge was similar to that described by Herodotus, and measured 5 stades (3032 ft.) in length and 30 ft. in breadth. At each end was a royal palace, that on the E. being 1/2 more splendid. There was a part called the twofold royal city, which was surrounded by three walls, the outmost having a circuit of 7 m. The height of the middle wall, which was circular, was 300 ft.; that of its towers, 420 ft. The innermost wall, however, was even higher. The walls of the second enclosure and those of the third were faced with coloured bricks, enamelled with various designs. Among them were representations of Semiramis and Nimus slaying the leopard and the lion. The two palaces were joined by a tunnel under the river as well as by a bridge. Diodorus mentions the square lake, and describes the temple of Belus, which, he says, had a statue of Zeus (Bel-Marduk) 40 ft. high, and statues of Hera and Rhea (probably Zorpanium see SECCORI-BEROTI) and the goddess Damkina. He describes the famous hanging gardens, which were square, and measured 400 ft. each way, rising in terraces, and provided with earth enough to accommodate trees of great size. (For other Greek accounts, see (1) Arrian, *Anab.* 7.251, and Plut. *Al.* 7.4; (2) Diod. Sic. 27.10, Curt. Ruf. 5.124-35; (3) Strab. 16.15; (4) Diod. 19.100, 7 and Plut. *Demetr.* 7; (5) Philostr. *Vit. Apoll.* 125; to which may be added (6) Bérössus in Jos. *Ant.* x. 111, c. 19, 119f., and Euseb. *Præp. Ev.* 9.407 c. d).

The best native account of the glories of Babylon is probably that of the well-known king Nebuchadnezzar (KB 3b 20 ff.)—a ruler to whom the city owed much—who, indeed, may be said to have practically rebuilt it. The most important edifice to him was the temple of Belus (E-sagila, later called E-saggil or E-sangil), and with this he begins, speaking first of the shrine of Marduk, the wall of which he covered with massive gold, lapis-lazuli, and white limestone. He refers to the two gates of the temple, and the place of the assembly, where the oracles were declared, and gives details of the work done upon them. It was apparently a part of this temple that he calls E-temen-anak-ki, 'the temple of the foundation of heaven and earth,' and describes as the 'tower of Babylon' (*zikkurat Babilin*), stating that he 'raised its head' in burnt brick and lapis-lazuli

BABYLON

(cp. BABEL, Tower of, § 7). After referring to various other shrines and temples, he speaks of Ingur-Bel and Nimitti-Bel, the two great ramparts of the city, built, or rather, rebuilt, by his father Nabopolassar, who, however, had not been able to finish them. Nebuchadnezzar goes on to describe what he and his father had done on these defences: the digging and bricking of the moat, the banking of the banks of the Euphrates, the improvement of the roadway called As-ban-Sabe, the elevation of which Nebuchadnezzar raised 'from the shining gate to the roadway called E-tar-sakipat-tebis-a,' and so on. In consequence of the raising of this street, the great city gates of the walls Ingur-Bel and Nimitti-Bel had to be made higher. They were at the same time decorated with lapis-lazuli and figures of bulls and serpents, provided with doors of cedar covered with bronze. Then, to strengthen the city still further, Nebuchadnezzar built, 4000 cubits beyond Ingur-Bel, another wall (with doors of cedar covered with bronze, surrounded with a ditch). To make the approach of an enemy to the city still more difficult, he surrounded the district with 'great waters' like unto the sea. After this he turned his attention to the royal palace, a structure which reached from the great wall Ingur-Bel to the canal of the rising sun, called Labalhegalla, and from the bank of the Euphrates to the street As-ban-Sabe. It had been constructed, he says, by his father Nabopolassar; but its foundations had been weakened by a flood and by the raising of the street. This edifice Nebuchadnezzar placed in good repair, and adorned with gold, silver, precious stones, and every token of magnificence, after rearing it high 'as the wooded hills.' Other constructions that he made were a wall 400 cubits long (apparently intended to serve as an additional defence to a part of the outer wall) called Nimitti-Bel, and, between the two walls, a structure of brick, surmounted with a great edifice, destined for his royal seat. This palace, which joined that of his father, was erected in fifteen days. After adorning it with gold, silver, costly woods, and lapis lazuli, he built two great walls around it, one of them being constructed of stone.

There is a substantial agreement between this description and the description of the Greek writers. E-sagila,

6. Native and Greek accounts.

'the high-headed temple,' is the temple of Belus; the palace constructed in fifteen days is that referred to by Josephus as having been built in the same short period (*Ant.* x. 111). Nebuchadnezzar does not refer to the reservoir mentioned by the Greeks; but we may recognise it in the 'great waters, like the mass of the seas,' which he carried round the district, and designed for the same purpose—namely, defence against hostile attack. The walls, Nimitti-Bel and Ingur-Bel, are the outer and inner walls respectively, and the latter may be that which, according to Herodotus (above, § 4), ran along the banks of the river. The hanging gardens are not referred to by Nebuchadnezzar, and it is therefore very doubtful, notwithstanding the statement of Ctesias, whether this king built them. Such erections were not uncommon in Assyria, and it is even possible that they were due to the initiative of a king of that country. In the palace of Asur-bani-pal at Kuyunjik, which was discovered and excavated by Rassam, was a room the bas-reliefs of which were devoted to scenes illustrating that king's Babylonian war, one of which shows a garden laid out on a slope, and continued above on a structure of vaulted brickwork, an arrangement fairly in accord with the description of the Babylonian hanging gardens given by Diodorus and Pliny; and it is noteworthy that the latter attributes them to a Syrian (Assyrian) king who reigned at Babylon, and built them to gratify a wife whom he loved greatly. This bas-relief was regarded by Sir Henry Rawlinson and George Smith as representing the hanging gardens at Babylon, and a neighbouring sculpture, which shows a series of fortified walls,

BABYLON

three or more, as well as a palace, probably represents the walls of the city as they were in the time of Ashurbanipal and his brother Šamaš-šum-ukin, with whom he waged war. The palace has columns supported on the backs of lions.

A few additional details concerning the city are given by some of the many contract-tablets found on the spot. The city gates, some of the canals, and the streets and roadways seem to have been named after the gods.

7. Details from the contract-tablets.

We read of the gates of Zagaga, Ninip, and Šamaš, and of the canal Nar Baniṭum. Others of the canals received the names of the cities to which they flowed (e.g., the Borsippa canal, and the old Cuthah canal). The tablets confirm the statement of Q. Curtius that the houses of the city did not fill all the space enclosed by the walls, the greater part of the ground being apparently fields, gardens, and plantations of date-palms and other trees, sufficient to furnish all the provisions that the city needed in event of siege. There is no mention, in the native records, of a bridge across the Euphrates, such as is described by the Greeks; but a contract-tablet of the time of Darius seems to refer to a bridge of boats. There is no confirmation of the statement that there was a tunnel under the river.

There have been various conjectures as to the identification of the different ruins on the site of Babylon. Rich thought that the hanging gardens were represented by the mound known as Babil, and this is the opinion of Rassam, who found there 'four exquisitely-built wells of red granite in the S. portion of the mound.' They are supplied with water from the Euphrates, which flows about a mile away, and their depth is about 140 ft. Originally, he thinks, they were

about 50 or 60 ft. higher. Rassam regards Mujellibeh as representing the palace begun by Nabopolassar and finished by Nebuchadnezzar in fifteen days. Remains of enamelled tiles of various colours and designs are found, he says, only on that spot. The Kasr he takes to be the remains of the Temple of Ištar, though he frankly admits that there are many difficulties in the way of this identification. As the latest opinions carefully formed by one who has frequently been on the spot, they will probably be considered to possess a special value.

The two queens, Semiramis and Nitocris, to whom so many of the wonders of ancient Babylon are attributed, are not mentioned on the native monuments of the Babylonians, as far as we are at present acquainted with them.¹ In all probability, the explanation of this difficulty is that they suggested the erection of the works in question, and the reigning ruler (probably their husbands) carried them out. Only careful exploration of the sites can decide satisfactorily the real nature of each ruin—by whom it was built, or rebuilt, or restored—and the changes that it underwent in the course of ages. The discovery of the wells at Babil seems to place the nature of that ruin beyond doubt, though Oppert (*Comptes Rendus*, 1868, p. 420) thinks that its distance from the other remains is too great, in view of the fact that Alexander, when suffering from a mortal illness, was carried from the castle to the baths and the hanging gardens (Plut. *Alex.* ch. 76; Arrian. *Exp. Al.* 7.25). Much more may be expected from the German explorations.

There is a thorough article on the history and the topography of the city of Babylon in Pauly-Wissowa's *Realenc. der class. Alterthumswiss.* ii. ('96). On the Babylon of the NT see PETER, EPISTLES OF, § 7, and cp ROME.

Bibliography (§ 71).

The country of Babylonia, called by classical writers Βαβυλωνία, takes its name from that of its principal city BABYLON (q.v., § 1). In the OT the city and the country are not sharply distinguished; both are frequently included under the

Hebrew בבל. In other passages the country is termed שִׁנְאָר, Shinar (see SHINAR), while in post-exilic times the whole nation are referred to as כְּשִׁדִּים, 'Chaldeans,' and the country as אֶרֶץ כְּשִׁדִּים, 'the land of the Chaldeans' (see CHALDEA). Among the Babylonians themselves there was no single name for the whole country until the third Babylonian dynasty (eighteenth to twelfth century B.C.), when the Kassite designation of a portion of the country as Karchumash was extended and adopted in the royal inscriptions as a general name for the country—a use of the term that was retained throughout the whole period of the nation's history. The whole of Babylonia could also be expressed by the double title Šumer and Akkad, which the Babylonians adopted from the previous non-Semitic inhabitants of the land, Akkad designating the northern half of the country and Šumer the southern half. The use of the former name was extended in the Neo-Babylonian period, and the word in such phrases as 'the king of Akkad' and 'the army of Akkad' was employed to designate the whole country. The terms *kibrat arba'im*, 'the four quarters,' and *kišatu*, 'the world,' which occur in the royal titles *šar kibrat arba'im*, 'king

of the four quarters,' and *šar kišati*, 'king of the world,' were employed to express extensions of the Babylonian empire beyond the natural limits of the country (cp MESOPOTAMIA).

The natural features that bound the country of Babylonia are the Persian Gulf on the S., the Arabian desert on the W., and the Tigris on the E., while the limit from Assyria on the N. may be placed roughly at the line where the slightly elevated plain to the N. changes to the alluvial level.

At the present day Babylonia in the S. differs considerably in size and conformation from the ancient aspect of the country. The soil carried down by the Tigris and the Euphrates is considerable, and the alluvium so formed at the head of the Persian Gulf increases to-day at the rate of about a mile in seventy years; moreover, it is thought by some that the rate of formation was considerably more rapid in ancient times. Thus in the early period of Babylonian history the Persian Gulf extended some 120 to 130 miles farther north than it extends at present, the Tigris and the Euphrates each entering the sea at a separate mouth. The country was thus protected on the S. by the sea, and on the W. by the desert which, using a few feet above the plain of Babylonia, approached within thirty

¹ On Sammuramat the wife of Ramman-nirari (or Addu-nirari) III., see ASSYRIA, § 12. Apparently the only queen who reigned in her own right was Azaga-Bau or Ištar-Bau, in whose reign (c. 1000 B.C.) the country was similar to those belonging to the time of Sargon of Achaë and his son were conquered. She belongs to a very early period.

The principal cities of the country were situated in two groups: one in the north; the other in the south, nearer the sea. The southernmost city was

3. Cities. nearer the sea. The south-eastmost city was Eridu, the modern Abu-Shahrain, situated on the Euphrates not far from the ancient coast-line of the Persian Gulf. To the W. of Abu-Shahrain the mound of Mukayyar marks the site of the ancient city of Ur (see UR). Between the Tigris and the Euphrates to the NW. of Ur stood Larsam or Larsa, the modern Senkerah, and to the W. of Larsam the city of Erech, the remains of which are buried under the mounds of Warka. To the E. of Warka, on the E. bank of the Shatt-el-Hid, the mounds of Telloh¹ represent the city of Sirpurla, or Lagas (as it was known in the later period of its history); the two cities, Isin and Mari, the sites of which have not yet been identified with certainty, complete the list of the principal cities in the S. Mesopotamia. The S. Mesopotamia of the

The N. group of cities consists of Balyion, situated on the Euphrates, near the modern town of Ullah (see BALLYON); Borsippa, marked by the mound of Birs-Nimrûl, not far from Babylon, on the SW.; Uthah, the modern Tell-İbrahim (see UTHAH), to the N. of Babylon; Sippar, the modern Abu-Hablah; the city of Kis, still nearer the metropolis; and Nippur, the modern Niffer (the southernmost city of the group), to the N. of the Shatt-en-Nil. The site of the city of Agadê, which was in the northern half of the country, probably not far from Babylon, has not been satisfactorily identified.

The present state of the country differs considerably from that presented by it in ancient times. All

4. Natural resources. ancient writers describe Babylonia as exceedingly fertile and producing enormous quantities of grain ; but at the present day long neglect of cultivation has rendered the greater part of it an arid waste, varied in the neighbourhood of the rivers by large tracts of marsh land. There are still visible throughout the country embankments and trenches which mark the courses of ancient canals, by which the former dwellers in the land regulated their abundant water-supply, which was not allowed to swell the areas covered by the swamps, but was utilised for the systematic irrigation of the country. The whole land, in fact, was formerly intersected by a network of canals, and to the systematic irrigation of its alluvial soil may be traced the secret of Babylonia's former fertility.

The principal products of the country were wheat and dates. The former gave an enormous return. The latter supplied the Babylonians with wine, vinegar, and a species of flour for baking; from the sap of the date tree was obtained palm-sugar; ropes were made from its fibrous bark, and its wood furnished a light but tough building material. Wine was also obtained from the seed of the sesame plant; and barley, millet, and vetches were grown in large quantities. In addition to the palm, the cypress was common; poplars, acacias, and pomegranates grew in the neighbourhood of the streams; but the cultivation of the vine, and of oranges, apples, and pears, was artificial. The enormous reeds which abound in the swamps were used by the Babylonians for the construction of huts and light boats and for facing round the fields.

The domestic animals of the Babylonians were camels, horses, oxen, sheep, goats, and dogs; while the lion, the wild ox, the wild boar, and the jackal were the principal wild animals found in the country; gazelles and hares were not uncommon; a great variety of birds

¹ Perhaps = Tell L3b.

haunted the marshes and the plains; and fish, principally barbel and carp, were abundant in the rivers.

The language spoken by both the Babylonians and the Assyrians is usually referred to as 'Assyrian'. It

5. Language, etc. belongs to the northern group of the Semitic languages, claiming a closer relationship to Phœnician, Hebrew (see III BRILW LANG. AGEL, SYRIAC, and the other ARAMIC dialects (see ARAMIC LANG. AGEL), than to the more southern group, which comprises the Sabœan or Hamaïritic, the Arabic, and the Ethiopic tongues. But while in its nominal and verbal formations it exhibits the Semitic idea of inflection from roots, and while those roots themselves are found in the other Semitic languages, it has been subjected to a stronger foreign influence and has assimilated, to an extent that is not met with in any other of the Semitic languages, a considerable body of non-Semitic words and expressions. The influence exerted by the previous inhabitants of Babylonia upon their Semitic conquerors was indelible, and throughout their whole literature, especially in their mythological and religious compositions, words of non-Semitic origin are constantly met with.

The language possessed the vowel sounds $\bar{a}, \bar{e}, \bar{i}, \bar{u}, \bar{o}, \bar{u}$ and the consonantal sounds $b, g, d, z, \bar{b}, m, n, s, p, \bar{s}, k, r, \bar{s}$, and t , representing the

[illegible]

The existence of the *e* sound in Assyrian has been questioned, and it is true that the signs containing *e* and *i* are constantly interchanged; but that the *e* sound was used, at least for a certain period, may be regarded as practically certain, for not only is it required to explain certain vowel-changes which occur, but it is also vouched for by the Greek and Hebrew forms of certain Babylonian words, and by the occurrence of some of the signs in the syllabary, the existence of which is more naturally explained by the supposition that they contain the vowel *e*, than by the assumption that they are merely duplicates for certain other signs which undoubtedly contain the vowel *i*. The pronunciation of the consonants is in the main the same as that of the equivalent consonants in Hebrew. With regard to the pronunciation of the consonants *k, g, d, k, p, and t*, it is possible that in Assyrian, as in Hebrew and Aramaic, they were pronounced as spirants when coming between two vowel sounds; in writing, however, no distinction is indicated. It may be noted, that, while the Assyrians made no distinction in their pronunciation of *k* and *g*, the Babylonians pronounced the latter as *g*; that among the later Babylonians, *t* and *m* appears to have been pronounced as *n*; and that the pronunciation of *š* by the Assyrians gradually approximated to *š*. The Semitic sounds represented by the Hebrew consonants *א, ב, ג, ד, ה, ו, ז, ח, ט, י, ק, ל, מ, נ, ס, ע, פ, צ, ת* and *ש* are not distinguished in the Assyrian syllabary, as will be apparent from the following examples given in transliteration, the equivalent roots in Hebrew or Arabic being added in parentheses: *akālu*, 'to eat' (אָכַל); *aliku*, 'to go' (אָלַק); *elēshu*, 'to be alive' (עָלַם); *elēru*, 'to cross' (עָבַר); *erēbu*, 'to enter' (עָרַב); *alēdu*, 'to bear' (אָלַד); and *enēku*, 'to suck' (אָנַק). That these sounds were not distinguished is due to the fact that the Babylonians did not originate their own system of writing, but borrowed the system they found in use among the earlier inhabitants of the country.

This method of writing has been termed 'cuneiform,' since the wedge (Latin *cuneus*) forms the basis of the written character in the later periods.

7. **Writing.** written character in the later periods of its development. Each character or sign, in fact, consists of a single wedge, or is made up of different kinds of wedges in various combinations, the wedges of most common occurrence being the upright wedge , the horizontal wedge , and the arrow head , while the sloping wedges , , and occur in several characters. The characters are written from left to right, and, except in some poetical compositions, no space is necessarily left between the words; every line, however, with one or two isolated exceptions, ends with a complete word. The following Assyrian signs will serve to illustrate some of the methods of combination adopted in the formation of the later characters: , , , , , , , , , , , , , , , , , . In the earliest forms

of the writing, however, there is no trace of the wedge; the characters consist of straight lines. This is due to the fact that cuneiform was merely a descendant of a system of picture-writing.

In the case of many of the characters which occur in the most ancient inscriptions it is still possible to recognise the original pictures which underlie them. For example the sign for 'heaven,' 'god,' 'high,' is a star with eight points, or possibly a circle intersected by four diameters; the sign for 'sun' is a rough circle representing the sun's disk; the sign for 'ox' is the head of an ox with horns; the sign for 'grain' is an ear of corn.

All the characters, however, did not descend from pictures. Some were formed artificially by combination. Thus the sign for 'water' when placed within that for 'mouth' gave a new sign with the meaning 'to drink'; the sign for food placed within the sign for 'mouth' gave a sign with the meaning 'to eat'; the sign for 'wild-ox' was formed by placing the sign for 'mountain' within that for 'ox'; while other signs were formed by writing a character two or three times. Moreover, it is possible that the artificial formation of characters was customary to a considerable extent. According to a theory recently put forward by Heltzsch, certain strokes and combinations of strokes to be traced in the oldest forms of many of the characters had a meaning inherent in themselves, and formed the motive on the basis of which the signs containing them were developed. This question, however, is one on which it is impossible to form a conclusion until more of the inscriptions of the earliest period, recently discovered, have been published.

In the later forms which the characters assumed the original lines gave way to wedges from the fact that the scribes employed extensively soft clay instead of stone as a material on which to write. A line formed by a single pressure of the style naturally assumed the form of a wedge, while the increased clearness and uniformity which resulted secured for the wedge its final adoption. In addition to the changes which occurred in the forms of the characters, there was a development in their signification. Originally representing complete words or ideas, they were gradually employed to express the sounds of the words they represented apart from their meaning; and thus were developed their syllabic values.

The Babylonians adopted this method of writing from the non-Semitic race (see below, §§ 43-71 d) whom they found in possession of the country, and they adapted the system to their own idiom.

To characters or groups of characters representing Sumerian words they assigned the Semitic words which were equivalent to them in meaning; they also employed the signs phonetically, the syllables they represented consisting either of a vowel and a consonant (simple syllables) e.g., *ba, bi, bu*—or of a vowel between two consonants (compound syllables) e.g., *mat, kit, lul*. The system was further complicated by the fact that the majority of signs were polyphonous, that is to say, they had more than one syllabic value and could be used as ideograms for more than one word. A sign, therefore, might be used in one of three ways: as a syllable in a word written phonetically, or as an ideogram for a complete word, or as one sign in a group of two or more signs which together formed an ideogram for a complete word.

That this mixed method of ideographic and phonetic writing was often found ambiguous is attested by the methods which the Babylonians took to simplify it. (1) One of these methods consisted in adding to a word what has been termed its *determinative*, a sign attached to a word to indicate the class of thing to which it refers. Thus a special sign was placed before male proper names, another before female proper names; the sign for 'god' was placed before the names of deities; the sign for 'country' regularly preceded the names of countries; similar determinatives were used before the names of cities, mountains, rivers, tribes, professions, woods, plants, stones, garments, vessels, certain animals, the names of the months, stars, etc., while in a few classes the determinative is placed after the word, as in the case of places, birds, fish, etc. A determinative was never pronounced; it was designed only as a guide to the reader, indicating the character of the word it accompanied. (2) Another aid to the reader consisted in adding to an ideogram what has been termed its *phonetic complement*—that is to say, the final syllable of the word for which it is intended. By this means the reader is not only assisted in assigning the correct word to the ideogram, but also, in the case of verbs, is enabled to detect with greater ease the stem and tense intended by the writer. Even with this assistance, the writing, with its list of more than five hundred characters, was necessarily complicated. The use of ideograms was never entirely given up, and, although in the Neo-Babylonian period simple syllables were employed in preference to compound syllables, the Assyrians and Babylonians never attained the further development of an alphabet.

The decipherment of the Assyrian and Babylonian inscriptions resulted from the labours of scholars who had previously devoted themselves to the interpretation of the cuneiform inscriptions in old Persian.

From the sixth to the fourth century B.C. the Persians made

¹ *Die Entstehung des ältesten Schriftsystems* (Leipzig, 1897).

use for their inscriptions of a character which they had borrowed originally from the Babylonians. Other nations of W. Asia, such as the Sumerians and the people dwelling around Lake Van, borrowed from Babylon the idea of cuneiform writing, in some cases making use of the Babylonian characters, in others modifying them to a greater or less extent. The changes introduced by the Persians when they borrowed the idea of writing by means of wedges were considerable, for, instead of employing a sign of several hundred characters representing syllables and complete words, they confined themselves to thirty-nine, each of which represented a single alphabetic value. Of the various systems of cuneiform writing, therefore, the Persian was by far the simplest. The Achaemenian kings who ruled in Persia at this period numbered among their subjects the peoples of Susa and Babylonia, these countries having by conquest been added to their empire. When, therefore, they set up an inscription recording their campaigns or building operations, they added by the side of the Persian text, Susian and Babylonian translations inscribed in the cuneiform characters employed by these two nations. There are thus engraved on the palaces and rocks of Persia trilingual inscriptions in the old Persian, Susian, and Babylonian characters, and it will be obvious that as soon as one of these three characters could be read the way would be opened for the decipherment of the other two. Of the three the Persian, with its comparatively small number of signs, is (as we have said) the simplest, and it was therefore natural that it was the first to attract the serious attention of scholars.

Grotefend, in a paper published in 1802, supplied the key to a correct method of decipherment. Taking two short inscriptions in the old Persian character which Niebuhr had copied at Persepolis, he submitted them to an analysis.

The inscriptions, he found, coincided throughout, with the exception of certain groups of characters, which, he conjectured, might represent proper names. On this assumption each inscription contained two proper names, the name of the king who set it up, and, it might be supposed, that of his father. But the name which occurred first in one inscription was the name which stood second in the other—that is to say, the three different groups of characters must represent the names of three monarchs following one another in direct succession. From the fact that the inscriptions were found in the ruins of Persepolis it might be concluded that their writers were Persian kings; and when he applied, by way of experiment, the three names Hystaspes, Darius, and Xerxes, he found that they fitted the characters admirably. On his further deciphering the name of Cyrus he obtained correct values for more than a quarter of the alphabet.

Of the forty Persian signs, of which one is merely a diagonal stroke employed for dividing the words from one another, Grotefend's first alphabet included thirty. He subsequently suggested values for thirty-five characters; but he did not improve upon his original alphabet. He correctly identified *a, u, d, p, f, r, s*, and *z*; his values *kh, dh, th* were practically correct; and his *z* was not far off the correct value *b*. About 1222 St. Martin took up the investigation, working at the decipherment for the next ten years, but without much result; he identified *t* and *r*, however, and for the vowel *i*, which had been read as *u* by Grotefend, he gave the improved reading *y*. The characters for *m* and *n* were identified by Rask in 1826, and Burnouf in his memoir, published ten years later, identified *k, h, and z*, while his readings *g* and *gh* for two other characters were great improvements on the suggestions of Grotefend and St. Martin. In the same year Lassen produced his first alphabet, improvements on which he published in 1830 and 1844, in a few cases making use of the suggestions of Jaquet and Beer which had been published soon after the appearance of his first alphabet. He suggested correct readings for at least ten characters, and improved readings of some others. This final alphabet did not contain many incorrect identifications.

The scholar who did most, however, for the decipherment of the cuneiform inscriptions was the late Sir Henry Rawlinson. He first turned his attention to the subject in 1835, when stationed at Kirmanshah, on the western frontier of Persia. At that time he had only heard of Grotefend's discovery;

he had not seen a copy of his alphabet, and did not even know on what inscriptions it had been based. Thus he began the work of decipherment from the beginning. For his first analysis he took two short inscriptions similar to those used for the purpose by Grotefend, which yielded him the names of Hystaspes, Darius, and Xerxes. During the next year he had increased his list of names by the correct identification of Arsames, Ariamnes, Teispes, Achemenes, and Persia. It was not until the autumn of 1836 that he first had an opportunity of seeing the works of Grotefend and St. Martin. Then he perceived that his own alphabet, based as it was on longer inscriptions, was far in advance of the results obtained by them. In 1837 he copied the greater part of the long inscription at Behistun, containing the annals of Darius, and forwarded a translation of the first two paragraphs to the Royal Asiatic Society; but next summer, while at Teheran, he heard that Burnouf's publication had meanwhile anticipated many of his improvements. In the autumn of 1838 he obtained the published copies of the Persepolitan inscriptions, and with the help of the allied languages of Sanskrit and Zend, analysed every word in the inscriptions that had up to that time been copied. He then found that Lassen's alphabet confirmed most of his own conclusions; but he obtained assistance from it in the case of only one character.

BABYLONIA

It will thus be seen that Rawlinson worked out the characters of the Persian alphabet for himself independently of his predecessors and contemporaries; but it was not on this achievement that he himself based his title to originality. He justly claims that, whereas his predecessors had succeeded only in reading a few proper names and royal titles, he had been the first to present to the world a correct grammatical translation of over two hundred lines of cuneiform writing. This translation was in the hands of the Royal Asiatic Society, and was being prepared for publication in 1839, when his duties in Afghanistan put an end to his studies for some years. It was not until 1845 that he found leisure to complete the work, in which year he published his memoir containing a complete translation of the whole Persian text of the Behistun inscription.¹

Now that he had completed the decipherment of the old Persian cuneiform inscriptions, Rawlinson turned his attention to the Babylonian cuneiform. A comparison of the third column of the Behistun inscription with the now known Persian text occurring in the first column was the starting-point of his studies, and in 1851 he published the text and translation of the Babylonian part of this inscription, at the same time demonstrating the fact that the Babylonian characters were polyphonous. The historical inscriptions on cylinders, slabs, and stelai that had been found in Assyria and Babylonia meanwhile afforded ample material for study, and other workers lent their aid in the decipherment. In the years 1849-1852 Hincks contributed papers to the Royal Irish Academy. His most important discovery was the determination of the syllabic nature of Babylonian writing. Subsequently Rawlinson, Hincks, Norris, and Oppert, while devoting themselves to the further interpretation of the historical inscriptions, classified the principal grammatical rules of the language, and so brought the work of decipherment to an end.

The earliest explorers of Babylonia did not undertake systematic excavation. They devoted themselves to surveying and describing the ruins that were still visible upon the surface. The most valuable memoirs on the subject are those on the site of Babylon compiled by Rich, who from 1808 till 1821 was the Hon. East India Company's resident at Bagdad. Systematic excavations were first undertaken in Babylonia during the years 1849-55, under the direction of Sir Henry Rawlinson assisted by Loftus and Taylor.

In 1854 Rawlinson excavated at Birs Nimrud near the Euphrates a few miles SW. of Hillah, a mound that marks the site of a great zikkurat erected by Nebuchadnezzar II. within the boundaries of the ancient city of Borsippa. Here, in addition to tracing the plan of the building, he found five cylinders recording Nebuchadnezzar's building operations. He also successfully excavated the mounds Kasr and Babil, to the N. of Hillah, within the site of ancient Babylon; and during the same period excavations were conducted at the mound of Niffer to the SE. of Hillah, marking the site of the ancient city of Nippur, and in S. Babylonia at the mounds of Warka, the site of Erech, Senkerah, the site of Larsa, and Mukayyar the site of Ur. While Rawlinson was carrying on these extensive excavations, the French furnished an expedition which was placed under the direction of Fresnel and Oppert, and during the years 1851-54 did valuable service, especially in surveying and describing the site of the ancient city of Babylon. In 1873 the Trustees of the British Museum again undertook systematic excavations, which were continued down to the year 1883 under the direction of their agent H. Rassam. Excavations were undertaken in the neighbourhood of Hillah, at Tell-Ibrahim, the site of the ancient city of Cuthah, and at Abu-Habbah, the site of Sippar, where exceedingly rich finds of tablets and cylinders were made. The various expeditions of George Smith and E. A. Wallis Budge resulted in the recovery of many Babylonian inscriptions. The French have obtained rich finds of sculptures and inscriptions of the early period at Tellah, in consequence of the exertions of the Sarren, who, since his appointment as French vice-consul at Bassorah (*Basra*) in 1877, has devoted himself to the thorough excavation of the mounds that mark the site of the ancient city of Sippara. The most recent excavations are those of the Americans at Niffer, which were begun in 1888; they were ably conducted by Haynes, and have only recently been discontinued.

With the exception of those at Tellah, the mounds of Babylonia, unlike those of ASSYRIA (*q.v.*, § 10), do not yield many sculptures or reliefs; but the excavations have enabled us to trace the history of the brick-built

BABYLONIA

palaces and temples, while the finds—comprise votive tablets of stone and inscribed alabaster vases, building-inscriptions upon cylinders, and thousands of inscribed clay tablets, many of which are of great literary, historical, and scientific interest.

As the soil of Babylonia is alluvial, it is entirely without metals, and even without stone, both of which had to be imported from other countries.

15. Building.

This scarcity of stone had a considerable influence on the character of Babylonian architecture. The difficulties of transport prohibited its adoption as a building material except to a very small extent, and as excellent clay was obtainable throughout the whole of Babylonia, all the temples and palaces as well as private dwellings were composed throughout of brick. The bricks were of two kinds, baked and unbaked. The former, though merely dried in the sun, formed a serviceable building-material, and in some cases entire buildings are composed of them. The usual practice, however, was to build the greater part of the structure of sun-dried bricks, and then to face it with bricks dried in the kiln, the thin layer of harder material on the surface protecting the whole structure from rain and flood and change of temperature. Buildings of unbaked brick were often strengthened by thick layers of matting composed of reeds, while the interior structure of faced walls was in some cases strengthened at intervals by courses of baked brick. The bricks themselves vary considerably in size. Many of them were stamped with the name of the king for whose use they were made, which lends considerable aid in settling the date and history of many structures. For binding the bricks together two kinds of cement were employed, the one consisting of bitumen, the other of plain clay or mud, in some cases intermixed with chopped straw. The latter was used the more extensively, bitumen being employed only where there was special need of strength, as at the base of a building where injury from rain was to be feared (see BITUMEN). Conduits of baked bricks were employed for carrying off the water from the larger buildings (see also BRICK, § 4).

The principal building with the Babylonians was the *zikkuratu* or temple, consisting of a lofty structure

16. Temples.

rising in huge stages one above the other, composed for the most part of solid brick and ascended by a staircase on the outside; the image of the god to whom it was dedicated was placed in the shrine at the top. The remains of these temple-towers at the present day are covered by huge mounds of earth and debris, and thus it is difficult to trace their plan and estimate their original dimensions. The larger ones, however, have been examined at different times. That at Warka, which at the present day rises more than a hundred feet above the plain, measures some two hundred feet square at its base, and consisted of at least two stories. The temple at Mukayyar is built on a platform raised about twenty feet above the plain; it is in the form of a parallelogram, the sides measuring 108 ft. and 133 ft., and the angles pointing to the cardinal points. Only two stories are at present traceable, of which the lower one is strengthened by buttresses. The upper story does not rise from the centre of the lower, but is built rather at one end. There are said to have been trees on it, at the beginning of the century, of the chamber or shrine which may have originally contained the image of the god. The zikkurat at Nippur is of a somewhat similar construction. It is built in the form of a parallelogram, on the NW. edge of a large platform, the four corners also pointing to the four cardinal points. In this temple three stages have been traced, and it is not probable that there were more. In the later Babylonian period the number of stages was increased, as in the temple of Bel or Marduk at Babylonia, and that of Nabû at Borsippa, both of which were finally rebuilt with great magnificence by Nebuchadnezzar II. (see BABYLON, NEBUCHAD-

¹ See *J.R.A.S.* 10.

REZZAR). Rising on their platforms high above the houses of the city and the surrounding plain, these ancient temples must have been impressive, though in the early period they were entirely without ornament or colour.

The remains of but few Babylonian palaces have been unearthed, that at Telloh being the one belonging to the early period that has been most systematically excavated, while the finest example of the later period is the palace of Nebuchadnezzar at Babylon with its hanging gardens (see BABYLON, § 5.7.1). Of the domestic architecture of the Babylonians not many remains have been recovered.

The site from which the most examples of early Babylonian art have been obtained is Telloh, where

18. Art. excavations have afforded evidence of an art so highly developed that its origin must be set back at least 2000 years before the consolidation of the Semite kingdom of Babylonia (see below, § 5.4). Large seated statues, of diorite, of Ur-Tam and Gudea, carved in the round, stone slabs and plates sculptured in relief, small figures and carvings in marble, stone, ivory, and bronze, bronze and silver vessels, cylinder seals, and ornaments of various kinds attest the skill of these early Sumerian artists, who were the teachers of the Semites by whom they were eventually displaced.

At a later period the Babylonians ornamented the interior of their palaces and houses by covering the backwork with plaster, on which they painted; or they coated the walls with enameled bricks. The development of sculpture, however, unlike that of Assyria, was hampered by the lack of material in which to work, and it is not surprising that the carvings that have come down to us never approach the level attained by the reliefs of the later Assyrian kings.

Of the many thousands of Babylonian and Assyrian inscriptions that have been recovered only a small proportion can be classified as literature in the strict sense of the term. Perhaps

19. Literature. the largest section of the inscriptions consists of the contract tablets, which throw an interesting light on the social and commercial life of the people, but in no single instance can be regarded as of literary value.¹ Similarly the many texts of a magical and astrological nature (see below, § 3.3.7), tablets containing forecasts and omens, tablets prescribing offerings and ceremonies to be performed before the gods (§ 3.0), can hardly take rank as literature, though their classification and study is leading to a more accurate knowledge of Babylonian religion and belief; while the great body of letters and despatches dealing with both public and private affairs, written as most of them are in a terse, abbreviated style, are worthy of study from a philological rather than a literary standpoint.²

When all these deductions have been made, however, there remains a considerable number of texts on the basis of which the Babylonians and Assyrians may justly lay claim to the possession of a literature consisting of both poetry and prose. The principal examples

20. Poetry. of Babylonian poetry are presented by the legends,³ the majority of which are written throughout in metre, by mythological and religious compositions and penitential psalms, many of which are composed in Sumerian with interlinear Assyrian translations, and by the many prayers, hymns, incantations, and litanies

which occur on tablets by themselves, or are preserved in the ritual texts interspersed with directions for the performance of ceremonies.⁴ It has long been recognised that Babylonian poetical compositions, like those of the Hebrews, are written in a rough metre consisting of verse and half-verse, the Babylonian scribes frequently emphasising the central division of the verse in the compositions they copied by writing its two halves in separate columns. More recently it has been pointed out⁵ that in many compositions, in addition to this central division, each verse is divided by a definite number of accented syllables or rhythmical beats.

The feet or divisions so formed do not contain a fixed number of syllables, but consist of a single word or of not more than two or three short words closely connected with each other, such as prepositions and the substantives to which they are attached, words joined by the construct state, etc., the metre in some tablets being indicated by blank spaces left by the scribe. The commonest metre is that consisting of four divisions, in which the two halves of the verse are each subdivided; but this, in many texts, especially in some of the prayers, is interrupted at irregular intervals by a line of only three feet.

In many of the legends, moreover, the single verses are combined both by sense and by rhythm into strophes consisting of four or two lines each.

The best examples of Assyrian and Babylonian prose are the longer historical inscriptions belonging to the later periods. This class of inscription demands a more detailed treatment.

21. Historical inscriptions. Apart from its literary value, it is the principal source of our knowledge of the history of the Babylonians and Assyrians themselves, and supplements and supports in many particulars the biblical narrative of the relations of Israel and Judah to their more powerful neighbours.

Unlike all other classes of inscriptions, which were written with a style on tablets made of clay, the historical inscriptions assume a variety of forms. The shortest form consists merely of a king's name and titles, which are stamped or inscribed on bricks built into the structure of a temple or palace which he had erected or restored. In some cases the actual stamps that were used for this purpose have been recovered. Similar short inscriptions were engraved during the old Babylonian period on door-sockets of stone. Another class of short inscription records the dedication of temples on their erection or when they have been rebuilt; these are frequently written on clay cones fashioned in the form of pegs or nails, which may very possibly have had a phallic significance. The cones of Gudea and Ur-Bau are those most frequently met with, while clay cones of different shapes were engraved by Msh-Babbar, patesi of Isan, Sin-gasid, Kudur-Mabug and other early Babylonian kings; cones of bronze, ornamented with the figure of a god clasping the thicker end, have also been found at Telloh. Dedicatory inscriptions were also written on circular stones, perforated through the centre; when these are small they are usually described as 'mace-heads'; but the use to which the larger ones were put has not been ascertained. The 'mace-heads' of Sargon I., Manishtush, and Naram-Sin are good examples of the former class. Small square tablets of diorite, but more commonly larger oblong tablets of limestone inscribed on both sides, were employed for votive inscriptions; those of Rim-Aku and of his wife, of Hammu-rabi and of Samsu-iluna, are particularly fine examples of this class of inscription. In the later Babylonian period, when such a votive inscription of an early Babylonian king was found in the ruins or ancient archives of a temple, a pious Babylonian would frequently have an accurate copy of it made in clay.

BABYLONIA

which he placed as an offering in one of the temples in Babylon. Several archaic inscriptions have thus been preserved in Neo-Babylonian copies. The famous stone tablet recording the endowment of the temple of the Sun-god at Sippar by Nabopolassar, which was found in a clay collar with the sculptured portion protected by clay shields provided for it by Nabopolassar nearly three hundred years after it was engraved, is unique.

Clay vases and bowls were employed by some of the Assyrian kings for recording their building operations, the inscriptions running in parallel lines round the outside, while vases of alabaster which were presented to the temples frequently bore the name and titles of the king who dedicated them. Inscriptions on statues are not frequently met with in the later periods of Babylonian and Assyrian history, the short inscriptions on the statues of Ashurnasir-pal, the longer inscription on the seated figure of Shalmaneser II., and those on the two large figures of the god Nebo, being the principal examples; at Tell-oh, however, long inscriptions of the non-Semitic kings Gudea and Ur-Bin are found engraved on their statues of diorite. Slabs of stone, marble, and alabaster were employed for longer historical inscriptions. These were sometimes treated as tablets and engraved on both sides, as in the memorial tablets of Rammam-nari I.; but more frequently they were intended as monuments, and set up in the palaces of the kings who made them; parts of many are decorated with sculpture, and in some instances with portraits in relief of the king whose deeds they record. The later Assyrian kings also engraved their records on the colossal winged bulls and lions that flanked the entrances to their palaces, and by the side of, and even upon, the bas-reliefs which lined their walls. In some places on the borders of Assyria, as in the district of Lebanon and at the source of the Tigris, inscriptions to record the farthest point reached by some military expedition were engraved in the living rock.

Clay, however, was the material most extensively employed, and for the longer historical inscriptions

22. Clay prisms, etc. some form of prism or cylinder was found to offer the greatest amount of surface in the most compact form; the two earliest prisms that have been discovered are those of Gudea, each of which contains about two thousand lines of writing.

The annals of several of the Assyrian kings also were inscribed on clay prisms, good examples of which are the four eight-sided prisms¹ of Tiglath-pileser I. (see ASSYRIA, § 22), the famous six-sided Taylor prism² of Sennacherib, which contains an account of his siege of Jerusalem (see SENECAHERIB), the six-sided prism³ of Esarhaddon (q.v.), and the fine ten-sided prism⁴ of Ashurnasir-pal.

Small barrel-cylinders were employed by some of the Assyrian kings, including Sargon, Esarhaddon, Ashurnasir-pal, and Sinsariskun, and larger ones, containing accounts of his first three campaigns, by Sennacherib. Barrel-cylinders, however, are principally associated with the later Babylonian kings. Most of them contain accounts of the building operations of NERICHADREZZAR II. (q.v.) and Nabonidus. The two finest barrel-cylinders that have been recovered are those of Cyrus (see below, § 62), describing his taking of Babylon (539 B.C.), and of Antiochus-Soter (280-270 B.C.), recording his rebuilding of the temple of E-zida in Borsippa.

Large clay tablets with one, two, or three columns of writing on each side were employed for long historical inscriptions. Among the best examples are the tablets of Tiglath-pileser III., which were found in the SE. palace at Nimrud, the tablet of Esarhaddon inscribed with his genealogy and an account of his building operations, the tablet giving an account of Ashurnasir-pal's accession to the throne of Assyria, and of the installation of his brother as viceroy of Babylon, and those recording Ashurnasir-pal's conquests in Arabia and Elam, his campaigns in Egypt, and the embassy of Gyges, king of Lydia.

The Assyrians and Babylonians themselves were ardent students of their own literature, compiling catalogues of their principal literary com-

23. Research. positions, and writing explanatory tablets and commentaries on many of the more difficult texts. Their language itself and their method of writing

BABYLONIA

were studied in detail, archaic forms of characters being collected into lists and traced back to the pictures from which they originally sprang. Syllabaries giving the values of the characters in Sumerian and then Assyrian names and meanings, were compiled. Collections of grammatical paradigms for every class of tablet were made for the use of beginners; examples of verbal formations were collected and classified; and explanatory lists of ideographs were made, arranged in some instances according to the forms of the characters with which they began or ended, in others according to the meanings or roots of their Assyrian equivalents. Perhaps the most interesting of the grammatical lists are the lists of synonymous words, which served the purpose of a modern dictionary.

The most notable scientific achievements of the Babylonians were their knowledge of astronomy and their method of reckoning time.

24. Astronomy.

These two achievements are to a great extent connected with each other, for it was owing to their astronomical knowledge that the Babylonians were enabled to form a calendar. From the earliest times, in fact, the Babylonians divided the year into months, partly of thirty and partly of twenty-nine days, and by means of intercalary months they brought their lunar and then solar year into harmony with each other. Their achievements in astronomy are the more remarkable as their knowledge of mathematics was not extraordinary; though we possess tablets containing correct calculations of square and cube roots, most of their calculations, even in the later astronomical tablets, are based principally on addition and subtraction.

Herodotus and other ancient writers concur in tracing to Babylonia the origin of the science of astronomy, as known to the ancient nations of Europe and W. Asia. In more recent times some scholars have asserted, with less probability, that Indian and Chinese astronomers also obtained their knowledge, in the first instance, from Babylonia. That the Babylonians themselves took astronomical observations from the earliest periods of their history is attested by general tradition; and, though the forms this tradition assumed sometimes exhibit extraordinary exaggeration, as in the calculations referred to by Pliny, according to one of which the Babylonians possessed records of astronomical calculations for 490,000 years, and according to another for 720,000 years, there is not sufficient reason for rejecting the tradition as having no substratum of truth, and it is not improbable that the Babylonians, even before the era of Sargon I., were watching the stars and laying the foundations of the science. The first observations naturally belonged rather to the practice of astrology and can hardly be reckoned as scientific, and it is not until the later periods of Assyrian and Babylonian history that we meet with tablets containing astronomical as opposed to astrological observations.

The Assyrians made their observations from specially constructed observatories, which were 'not improbably connected with the temples; the observatory was termed a *bit lamatti*, or 'house of observation'; and we possess the reports of the astronomers sent from these observatories to the king recording successful and unsuccessful observations of the moon, the unsuccessful observation of an expected eclipse, the date of the vernal equinox, etc. The astronomers, as a rule, sign their names in the reports, and from this source we know that there were important astronomical schools at Asur, Nineveh, and Arbēla in the seventh and eighth centuries B.C.; the many fragments of tablets containing lists of stars, observations, and calendars, which date from the same period, are, however, of an astrological rather than a scientific character.

Although we first meet with astronomical inscriptions on Assyrian tablets, it is probable that the Assyrians derived their knowledge originally from Babylonia, and we may see an indication of this origin in a fragment of

an Assyrian commentary referring to an astronomical inscription which had been brought to Assyria from the ancient city of Agade. At a later period there were important schools of astronomy in Babylonia, at Sippar, Borsippa, and Uruk, but it is from inscriptions obtained from the site of the first of these three cities alone that our knowledge of Babylonian astronomy is principally derived. Excavations undertaken at Abi-Bablah, the site of Sippar, resulted in the discovery of many fragments of astronomical tablets (belonging principally to the Seleucid and Arsacid eras) written in the later cursive Babylonian; and these, though in but few instances unbroken, have sufficed to vindicate the scientific character of Babylonian astronomy. Though the Babylonians may have had no correct conception of the solar system, they had, at least in the later period of their history, arrived at the conclusion that the movements of the heavenly bodies were governed by laws and were amenable to calculation; and from the tablets we gather that they both observed and calculated the time of the appearance of the new moon, and the periodical occurrence of lunar and solar eclipses, that they noted the courses of the planets, and that they included in their observations certain of the principal constellations and fixed stars.

As in all primitive religions, the gods of Babylonia were in their origin personifications of the forces of nature. The various phenomena of the world were not regarded as the result of natural laws. They were explained as due to the arbitrary action of mysterious beings of more than human power. The tempest with its thunder and lightning was mysterious — it must therefore be the work of a god; the light of the sun is the gift of the god, to whose unwearying exertion its movements in heaven are due; heaven itself is a realm as solid as the earth on which men walk; and each must be controlled by its own peculiar deity. In fact, Babylonian religion was a worship of nature in all its parts, each part the province of a deity, friendly or hostile to man, subject to human passions, and, like man, endowed with the powers of thought and speech. Many of the gods resembled mankind in having human bodies; some resembled animals; and others were monsters, partly man and partly beast. They differed from man in the possession of superhuman powers; but no one deity was all-powerful. The authority, even of the greater gods, was specialised, and beneath them were a host of demons endowed with various qualities, but of more narrowly limited influence.

Such is the general character of the Babylonian pantheon regarded as a whole; but it was not in the mass that the Babylonians themselves worshipped their gods, and this fact serves to explain the varying theology presented by the Babylonian religious texts. Every city, for example, had its own special god (cp § 68), who was not only the god of that city but also, for its inhabitants, the greatest of the gods; so too in the temple of any god a worshipper could address him in terms of the highest praise, and ascribe to him the loftiest attributes, without in any way violating the canons of his creed, and with no danger of raising the jealousy or wrath of other deities. In fact, in the Babylonian system, there was no accurately determined hierarchy, and the rank and order of the various deities was not strictly defined, but varied at different periods and in the different cities throughout the land. The tolerant nature of the Babylonian deities and the elasticity of their character explain the ease with which foreign deities were adopted and assimilated by the pantheon, while the origin of this elasticity may be traced back to the mixture of races from which the Babylonian nation sprang.

In spite of the varying nature of the Babylonian pantheon, it is still possible to sketch the general character and attributes of the principal Babylonian

deities. At the head of the pantheon, from the earliest period, stood a powerful triad consisting of Anu, the god of heaven, Bel, the god of the earth, and Ea, the god of the abyss and of hidden knowledge. Next in order comes a second triad, comprising the two chief light gods and the god of the atmosphere: i.e., Sun, the Moon-god, Samaš, the Sun-god, and Ninurta, the god of storm, thunder and lightning, clouds and rain. All of these gods had their own cities, which were especially devoted to their worship. Thus the worship of Anu was centred at Erek, that of Bel at Nippur, and that of Ea at Uruk; the oldest seat of the worship of Sun was Ur, though in Harran also there was an important temple of the Moon-god; and the cities of Larsa and Sippar were the principal centres of the Sun-god's worship. The city-god of Babylon was Marduk, whose importance in the pantheon increased as that city became the capital of the country, until in process of time he came to be identified with Bel, 'the lord' *par excellence*. The nearness of Borsippa to the capital explains the close connection of Nabu, its city-god, with Marduk, whose attendant and minister he is represented to have been.

The god Ninkil, whose name is read by some as Adur, was of solar origin; the fire-god, who plays an important part in the magical beliefs and ceremonies of the Babylonians, was Ninsin; and the god of battle was Nergal, the centre of whose worship was at Cuthah. The Babylonian goddesses were in most cases of minor importance — they were overshadowed by the male deities with whom they were connected, and the principal function of each was to become the mother of other gods. In some cases their very names betray their secondary importance, as in that of Anatu, the spouse of Anu, and that of Belit, the spouse of Bel. The spouse of Ea was Damkina; Ningal was the lady of the Moon-god, Ai of Samaš, Sala of Ninurta, Tasmetu of Nabu, Gula of Ninkil, and Laz of Nergal.

The relationships of the gods to one another are not accurately determined, in some cases contradictory traditions having been handed down; Sin, Samaš, and Ninkil, however, were regarded as the children of Bel, though Samaš also passed as the son of Sin and Ningal, Marduk as the son of Ea, and Nabu the son of Marduk.

On a different plane from the other goddesses stands Ishtar, one of the most powerful deities in the pantheon. She appears in two distinct characters, under which she assumes different titles, and is credited with different genealogies. As the goddess of love she was hailed as Ammattu, the daughter of Sin and Ningal, and was worshipped at Agade and at Sippar of Ammattu; as the goddess of war she was termed Belit-ilani, the daughter of Anu and Anatu, and the chief seat of her worship was the temple of E-sana at Erek; it was here that the unchaste rites, referred to by Herodotus as having been paid to the goddess Mylitta, with whom Ishtar is to be identified, were performed. Her name was connected in legend with Dumuzi or Tammuz, her youthful lover, on whose death, it is related, she descended to the lower world to recover him.

The conception of the Babylonian deities as actual personalities endowed with the bodies and swayed by the passions of mankind, and related to one another by human bonds of kindred, was not inconsistent with the other and more abstract side of their character which underlay and was to a great extent the origin of the human attributes with which they were credited. Thus, the return of Tammuz and Ishtar to earth was the mythological conception of the yearly return of spring. Moreover, as each force in nature varies in its action at different seasons, so each of its manifestations may be connected with a separate deity. The attributes of several gods can thus be traced to a solar origin. Whilst Samaš represented the sun in general, special manifestations of his power were connected with other deities; Nergal, the god of war, for example, represents

BABYLONIA

the sun's destructive heat in summer and at noon-day. Nimb the sun on the horizon at sunrise and sunset, and Marduk, the special friend of man, its temperate lord in the morning and in spring. The apex of the heavens at night also plays a considerable part in the origin of the gods of Babylonia. Thus each of the planets was connected with one of the greater gods; the fixed stars represented lesser deities, and Bel and Ea, though ruling the earth and the abyss, also had astrological characters in virtue of which they divided with Anu the control of the sky.

The worship of their deities by the Babylonians was attended by a complicated system of ritual and ceremony.

27. Temples.

It formed one of the most important aspects of the national life, and, as their temples were the largest of their buildings, so the priests were the most powerful class in the community. In each city the largest and most important temple was that devoted to the city-god. Thus the chief temple at Babylon was Es-agila, the centre of the worship of Marduk, the great temple at Borsippa was Ezida, the temple of Nabu; the principal temple at Sippar was E-kur, the centre of Bel's worship; and Eshlul the temple of the Moon god at Harran, E-harra the temple of Samas both at Sippar and at Larsa, and Eanna the temple of Ishtar at Erech, were the principal temples in each of these cities. Situated on a lofty platform and rising stage upon stage, these zigzags or temple-towers dominated the surrounding houses, and were more imposing than the royal palaces themselves. At the summit of each the image of the god rested in his shrine, and around its base clustered the temple offices and the dwellings of the priests. To each temple was attached a trained and organised priesthood, devoted exclusively to the worship of its god, and preserving its own ritual and body of tradition. The temples were under the direct patronage of the kings, who aided themselves on the rebuilding and restoration of their fabrics as much as on the successful issue of their campaigns, while the priesthoods were supported by regular and appointed offerings in addition to the revenues they drew from the lands and property with which the temples were endowed. The

28. Priests.

influence of the priests upon the people was exerted from many sides, for not only were they the god's representatives, whose services were required for any act of worship or intercession, but they also regulated and controlled all departments of civil life. They represented the learned section of the nation, and in all probability the scribes belonged entirely to the priestly class. They composed and preserved the national records, and although some of the later Assyrian kings collected libraries in their palaces, this was probably accomplished only with the co-operation of the priesthood and by drawing on the collections of tablets preserved in the great temples throughout the country.

A still more powerful influence was exerted by the priests on the common people in connection with their social life and commercial transactions, inasmuch as the administration of the law was in their hands.

The religious functions discharged by the priesthood were twofold. On the one hand, they carried out the regular sacrifices and services of the temple to which they were attached; on the other, they were always at the service of any one who wished to present an offering or make intercession in his own behalf. In their former capacity they celebrated regular feasts in every month as well as the great festivals of the year, such as the New Year; in the latter their ministrations were more personal, and consisted in introducing the individual suppliant into the presence of the deity and performing for him the necessary rites.

29. Claims of religion.

Every Babylonian had his own god and goddess, to whose worship he dedicated himself. They, in return, were his patrons and protectors. When any misfortune happened to

BABYLONIA

him it was a sure sign that his god and goddess were angry and had removed from him their countenance and protection, and in such a predicament he would have recourse to the temple of one of the greater gods, whose influence he would invoke for his restoration to the favour of his patron deities. The protection of his god and goddess were necessary to preserve a man from the spiritual dangers that surrounded him, for he believed that on every side were evil gods, spirits, demons, and spectres, who were waiting for any opportunity he might give them to injure him. Any sickness or misfortune, in fact, he regarded as due to a spell cast upon him which had its origin in one of several causes. It might be the result of an act of sin or impurity committed by him with or without his own knowledge; or it was the work of an evil spirit or demon; or, finally, it was due to the machinations of a sorcerer or sorceress. Whatever its cause, his only hope of recovery lay in recourse to the priests, through whom he could approach one of the gods.

From the carvings on Babylonian cylinder-seals we know the attitude that the suppliant must assume when

30 Religious observances.

led into the presence of the god. He is represented as standing with both hands raised before him, or, with one hand raised, he is being led forward by the priest, who grasps the other. The penitential psalms and incantations preserved on tablets from the library of Asur-bani-pal indicate the general character of the petitions he must make, consisting of invocations of the deity addressed, confessions of sin, and prayers for assistance, recited partly by the priest and partly by the suppliant himself. Many tablets record the offerings that must be made before the gods, comprising oxen, sheep, lambs, birds, fish, bread, dates, butter, honey, oil, date-wine, sesame wine, pieces of precious woods, gold, jewels, and precious stones, plants, herbs, and flowers. Many magical rites and ceremonies were performed by the priests, such as the knotting and unknotting of coloured threads, the burning of small images made of a variety of substances, including bronze, clay, bitumen, plaster, wood, and honey, to the accompaniment of incantations; the throwing into a bright fire of certain substances, such as a fleece, a goat-skin, a piece of wool, certain seeds or a pod of garlic, a special form of words being recited by the priest as he performed the rite; the dropping of certain substances into oil and the pouring out of libations. Such ceremonies and rites were not regarded as symbolical, but were supposed to be sufficient in themselves to secure the suppliant's release from the spell or ban to which his sufferings or misfortunes were due.

The prediction of future events also plays an important part in the religion of the Babylonians and Assyrians.

31. Augury.

So far from being carried on in secret and by a few isolated soothsayers, augury was practised as a science by a large and organised body of the priesthood under the direct control and patronage of the king. This being the case, it is not surprising that a considerable portion of the native literature deals with the subject of omens and forecasts. Almost every event of common life was regarded by the pious Babylonian as perhaps a favourable or unfavourable sign requiring the interpretation of an expert, and necessitating a journey to the temple. Those whose duty it was to furnish the interpretation of such an event did not necessarily pretend to second sight or rely on a vision or any divine communication; their answer was based on their own knowledge, acquired by special training and study. In the course of time all events and the consequences said to result from them had been written down; the tablets on which they were inscribed had been divided into classes according to the subjects of their contents; and many were collected into series. Thus an important temple would contain a small library dealing with the subject, requiring to be mastered by

the novice and always a hand for the consultation of the augurs themselves. Many of these tablets have been preserved, and it is to them that we owe our knowledge of this important department of Babylonian religion.

The text of an omen tablet consists of short sentences, each of which generally occupies one line of the tablet.

32. Omen tablets.

The construction of the sentence is invariably the same, and may be rendered by the following formula: "When (or if) such and so is the case, such and such an event will happen." There are, therefore, two ways in which we may classify an omen: either by its protasis or its apodosis.

Regarded from the latter point of view, all omens may be roughly divided into those that relate to public affairs and those that relate to the fortunes of an individual. Thus certain occurrences may be looked upon as foretelling the death of the king or the future condition of the country, whether there will be a plentiful harvest or a famine, whether there will be war or peace, and if war, in what quarter it may be expected. Those which relate to private affairs, on the other hand, concern themselves with the health, sickness, or death of a man or of his wife or child, or foretell the stability or destruction of his house. Some few tablets indeed relate to special classes, such as those which foretell accidents that may happen to women during pregnancy; but in the majority of omen texts the apodosis is couched in general terms, and the same phrases regularly recur. In fact, the events foretold are not very many, and may generally be classed under the headings of death and life, sickness and health, famine and plenty, war and peace; the predictions are cast in a vague form, and details, such as the place or manner of a man's death, are but rarely specified.

In the protasis, on the other hand, we find an almost bewildering variety of subjects, with hardly, however, of a rough classification. What is perhaps the largest section centres round the phenomena of human birth, the predictions being based on the manner of delivery and on the appearance of the child; and not only were misshapen and the births of monstrosities regarded as of peculiar import, but variations in the appearance of normal offspring also formed the basis of prediction.

Different parts of the body of a newly-born child are dealt with independently, and to be grasped correctly the significance of every part must have required a long course of training and study of the tablets. The state of the eyes or the hair, the position and size of the ears, mouth, hands and feet, the resemblance of the face to that of certain animals, were all carefully considered. The parturition of animals also was made a special study, the appearance of the offspring of lions, oxen, horses, and other animals, the colour of their hair and the number and position of their limbs, being regarded as significant. Omens were drawn from the appearance of the various parts of the body of an adult, male or female, especially in sickness. The state and colour of the eyes, the ears, and the hair, the state of the heart, the lungs, the buttocks, and other members of the body, the resemblance of the head to that of a bird or beast, the condition of the urine, etc.; with a view to predictions, studies were also made of the actions of a man, such as that of eating, and certain other of his natural functions. Another large class of omens were drawn from the appearance of animals, such as the colour of the horns of oxen and the direction in which they move, while the actions of certain animals (pigs, horses, etc.) were likewise studied. If a man is walking and wishes to know the future he must notice the direction in which an animal moves round him, and he must note if a lion, or a livera, or a bird crosses his path. If he sees a snake at the entrance of a gate or at the doors of a temple, or dogs and calves as he is going out of a door, he must visit the augur for an interpretation. The appearance of animals, snakes, or scorpions in a man's house, or in a palace or a temple, was of significance, while the sting of a scorpion was a warning of various events, different results following from stings on different toes. The appearance and flight of birds were exhaustively treated, and a man was wise if he did not disregard the flappings of a bird's wing and did not fail to observe the direction in which it flew should it flutter round his head. Another class of omens laid stress on the locality of certain events; those occurring in cities and streets received a treatment different from that of occurrences in the fields and open country. Predictions were made from the state of a house, its walls, etc., and even from the state of the furniture which it contained. The time of the events or observations was in some instances considered important, and in these cases the month and day were specially noted.

As omens were taken from so many common objects and occurrences, it was natural that dreams and visions should be regarded as indications of

33. Dreams. Future prosperity or misfortune, and that the objects or animals a man might behold in a dream had each a different signification. Thus, if he beheld in his dream certain people or seemed to be fighting with a relation, such as his father or grandfather, the visions had a special meaning, while the fact that the person he fought with was alive or dead at the time was also of importance. Appearances of spirits and demons in a house were indications of the future. In the majority of omens the conditions on which they were based were chance occurrences and events; it was, however, possible to obtain information as to the future by artificial means, such as by observing the entrails of victims, by kindling fire on an altar and noting the direction in which the smoke rose, or by observing the flickering of the flame of a lamp.

With omens it is difficult to say how far the facts on which the predictions were based were merely signs of prosperity or misfortune which would come in any case, and how far they

34. Astrology.

were regarded as in themselves the actual cause of such prosperity or misfortune. In the case of astrological forecasts, however, which are closely connected with the omens, it seems probable that the latter conception predominated. The astrological phenomena that are mentioned were not merely passive indications of the future, but active forces influencing the lives and fortunes of the individual and the state. The practice of astrology was based principally on observations of the sun and moon and stars, their relative positions at different times, and the various combinations presented by them. Another large body of forecasts was based on eclipses of the sun and moon, the results varying with the time of the eclipse, the appearance of the sun and moon during the eclipse, and the direction in which the shadow travels. Forecasts were based also on the appearance of meteors and shooting stars, on observations of lightning, clouds, and rain, on the direction of the wind, on the various directions in which a cloud may travel, and on the colour and shape of clouds and their resemblance to animals, fishes, ships, etc. As in the case of the omen tablets, the Babylonians possessed a great body of astrological literature; observations and forecasts in course of time were collected, grouped, and classified; and large works upon the subject were copied out on consecutive tablets for the training and use of the astrologers. Many tablets belonging to these larger works have come down to us; there are also preserved in the British Museum small oblong tablets containing the answers of astrologers who had been consulted as to the future, as well as their reports on recent astrological observations and the interpretation to be set on them.

Around the figures of their gods the Babylonians wove tales and legends, which, originating in remote antiquity,

35. Mythology. were handed down through countless generations, being added to and modified by the hands through which they passed. They were collected and arranged during the later periods of Assyrian and Babylonian history, and it is in these comparatively recent forms that they are preserved in the literature that has come down to us. It is true that the tablets containing the legends of Adapa and of the goddess Eriškugal were found at Tell el-Amarna and date from the fifteenth century B.C.; but not one of the tablets containing the other legends is earlier than the seventh century B.C. The antiquity of the legends themselves, however, is amply attested by the divergent forms which in some cases the same legend assumes, as related on different tablets belonging to the later Assyrian and Babylonian periods, or referred to in the works of classical writers. An additional interest attaches to two sections of the legendary literature of Babylon from their close resemblance to the narrative of the early part of

BABYLONIA

Genesis, relating to the creation and the deluge. Whether we are to trace the ultimate origin of both the Babylonian and the Hebrew versions of these legends to the previous non-Semitic inhabitants of Babylonia need not concern us here. The contents of these legends and their relation to the Hebrew narratives will also be more conveniently treated elsewhere (see *Expository Bulletin*, *CAVITIES*, *EXODUS*, *NOAH*). The legends of the creation and the epic of Gogmagor are certainly the most famous portions of Babylonian mythology, but they form only a part of the legends and beliefs that were current in the various cities of Babylonia. It is to these, which have come down to us on the tablets, that we must turn for a study of subject and treatment.

The first descent into Hades is one of the best preserved of these legends. It contains a description of the lower world, and records how at each of the gates that lead thence the goddess is stripped of a portion of her apparel until she enters naked into the realm of Adapa, and how she is forbidden there but is eventually brought back to earth to put an end to the troubles of men and animals that had followed the departure of the goddess of love. The Plague god was a prominent figure in Babylonian mythology, the legends describing in detail the ravages he caused among the cities of the land. Two of our legends may be mentioned briefly: that of the Zis theft of the destiny tablets, and the legend of Adapa and the South wind. In the former, Zis is recorded to have dealt with the tablets to his mortal and, although the other gods would not venture against him, he was eventually captured by Sinas the Sun god in his net. The legend of Adapa relates how Adapa, the son of Ea, was fishing one day in the sea for his father's household when the South wind blew and dashed him under; how in anger he caught the South wind, and broke her wings; and how he came to heaven into the presence of Anu, who summoned him thither on finding that the South wind had ceased to blow. In many of the legends animals and birds

36. Legends.

endowed with thought and speech are introduced: as in the legend of Etana's flight to heaven with the eagle, the legend of the Eagle, the Serpent and the Sun god, the legend of the Fox, the legend of the Horse and the Ox, and the legend of the Calf. Not only do gods, heroes, and animals figure in the mythology of Babylonia, but also ancient kings, whose actual existence is attested by the remains of their buildings and inscriptions, were raised to the level of heroes or demi-gods in the popular imagination, and their names became centres round which in the course of ages legends have clustered. The most famous of these is the legend of the birth of Sargon of Agade, who is said to have been of lowly origin; his father he knew not, and his mother set him floating on the Euphrates in a chest of reeds smeared with bitumen; but Akki the irrigator rescued him, and while he was serving as gardener to his benefactor, the goddess Ishtar loved him. Eventually she invested him with the rule of the kingdom, Naram-Sin the son of Sargon, Dungi king of Ur, Nebuchadnezzar I., and other ancient kings, figure in the legendary literature.

The data available for the settlement of Babylonian chronology vary for each of the three periods (see below).

37. Chronology: § 40 into which the history of the country may be divided. In the first period a single date has been fixed for us by a reference in one of the cylinders of Nabonidus, from which we infer that Sargon I. lived about 3750 B.C. When Nabonidus states that 3200 years have elapsed since Sargon laid down an inscription which he himself found, he is naturally giving only an approximate estimate of the period during which it had lain buried. There is no reason, however, for doubting the general accuracy of the statement, for the Babylonians were careful compilers of their records, and Nabonidus

BABYLONIA

had access to sources of information which have not come down to us. This one date, therefore, gives us a fixed point in the early history of the country. In settling the chronology between and after this point we do not yet know what extent of documents preserved to us the history of Babylonia, who places in the earliest period back to a year 3000 before the Christ. Similarly a tablet from Kuyuk containing the names of the kings of Babylonia from the time of the descent of the goddess of love to the time of the descent of the goddess of love, but on a fragmentary basis. In settling the chronology of this period, we have, in fact, to rely back upon the internal and external evidence of documents, and the internal evidence of documents themselves. The internal evidence consists primarily of the royal inscriptions, continued by the inscriptions of the kings, and the inscriptions of the kings, which are the most valuable of the kings, so much as to be a great deal. Good examples of the use of such evidence are afforded by some of the inscriptions of the kings and princes of Sargon's line, for example, by the inscriptions of Ishme-dunir, in which he calls himself the son of Akkad, and of Adargal, who styles himself the son of Ur-Nina, or that of Entem, in which he is called the son of Enlil-nasir, and the descendant of Ur-Nina, or the great-socket of Enlil-nasir. From which we learn that Entem was his father, or the great-socket of Enlil-nasir, or the great-socket of Enlil-nasir. The external evidence afforded by an inscription is obtained partly by a study of the general style of the writing, the forms of the characters, etc.; partly by accurately noting its relative position with regard to other inscriptions near which it may happen to be found, the different depths at which inscriptions are incised in some cases giving a rough idea of their comparative ages. It must be admitted, however, that the evidence to be obtained both from pigraphy and from systematic excavation is in its nature extremely uncertain and liable to various interpretations. Such evidence is of service when lending its weight to that obtained from other and independent sources; but when it is without such support it cannot be regarded as indicating more than a general probability.

For the chronology of the second period we have the genealogies to be obtained from the historical inscriptions, as well as the chronological notices which occur in some of them. From the latter

38. Second period. occur in some of them. From the latter source, for example, we gather that Hammurabi lived some 700 years after Hammurabi, that Sargassu-Burassu lived about 800 years before Nabonidus, and that Marduk-nadin-ahhe defeated Tiglath-pileser I. 418 years before Sennacherib conquered Babylon (see ASSYRIA, § 20). Our principal source of information, however, lies in the chronological documents of the Babylonians themselves. (1) One of the most important of these is the 'List of Kings,' a list of the names of the kings of Babylonia from about 2300 to 625 B.C., in which the kings are divided into dynasties, the length of each reign and the total length of each dynasty being added; a smaller list of kings contains the names of the kings of the first two dynasties. (2) From the document known as the 'Babylonian Chronicle' we obtain a record of events in Babylonia and Assyria from the early part of Nabonassar's reign (about 745 B.C.) to 600 B.C., the first year of the reign of Samsu-Adad, and this information is supplemented by (3) the 'Prophetic Canon' (see CHRONOLOGY, § 24 ff.), which also begins with the reign of Nabonassar. The fragment of a second Babylonian chronicle refers to kings of the first, fifth, sixth, and seventh dynasties, while part of a third chronicle supplements the narrative

BABYLONIA

of the 'Synchronic History' for certain portions of the third dynasty. Finally, (4) the 'Synchronic History' (see ASSYRIA, § 21, leg.) itself connects the history of Babylonia with that of Assyria, with certain breaks, from about 1480 to 810 B.C.

For the third period of the history the succession of the kings is known from the Ptolemaic Canon, which, in addition to the names of the kings, gives the lengths of their respective reigns; and the information so obtained is controlled by the many Babylonian contract tablets which have been found dated according to their regnal years.

39. Third period.

The history of Babylonia falls naturally into three main periods. The first period comprises the history of the country from the earliest times down to the consolidation of its various elements into a single empire ruled by Semitic kings with their capital at Babylon. The second period begins with the first dynasty of Babylon, to whose greatest king, Hammurabi, was principally due the consolidation of the Babylonian empire, and extends to the fall of the power of Assyria, whose later kings included Babylonia in their dominions. The third period comprises the history of the Neo-Babylonian empire.

The length of the first period can only be approximately determined, for it reaches back into remote antiquity; the second period deals with the history of some seventeen hundred years, extending from about 2300 to 625 B.C.; the third period is by far the shortest of the three, for it contains the history of an empire which lasted for less than a hundred years, from Nabopolassar's accession to the throne of Babylon in 625 B.C. to the capture of the city by Cyrus, king of Persia, in 538 B.C.

During the first period the name of Babylon is not known. The country is under the successive domination of the more ancient cities of the land until the Semite element eventually predominates. During the second period Babylon holds her place as the centre of the country in spite of the influx of Kassite and Chaldean tribes and the opposition of Assyria. In the third period the magnificence of Babylon became one of the wonders of the ancient world.

In treating the earliest period of the history of the country we are, to a great extent, groping in the dark.

41. Earliest period.

Our principal sources of information are the archaic inscriptions found on many of the sites of the old Babylonian cities, and these have been considerably increased by recent excavations. In order, then, to understand clearly the problems they present, it will be necessary to proceed gradually from the points that may be regarded as definitely fixed into the regions where conjecture still holds her own. As the earliest date that can be regarded as settled is that of Sargon I., it necessarily forms the basis or starting-point from which to reconstruct the history of the period.

Nabonidus, the last king of Babylon, on a clay cylinder found at Abu-Habbah records the fact that while restoring the temple of the Sun-god in that city he came upon the foundation-stone of Naram-Sin, the son of Sargon, which for 3200 years no king that went before him had seen. As the cylinder of Nabonidus was inscribed about the year 550 B.C., we conclude that Naram-Sin lived about 3750 B.C., and Sargon his father about 3800 B.C.

During the French expedition to Mesopotamia (1851-1854) Oppert found in Babylon an alabaster vase inscribed in archaic characters with the name of Naram-Sin, to which was added the title 'king of the four quarters.' The vase, which was lost in the waters of the Tigris on 23rd May 1855, formed the only remains of this king that were recovered until the American expedition in 1888.

¹ K 3194 J

BABYLONIA

Of Sargon, however, two inscriptions were known, the one on the cylinder in the possession of M. de Clerq, the other on a mace-head in the British Museum. Some doubt was thrown on the identification of this king with the Sargon of Nabonidus; for, whilst the name of the latter was written Sargina, that of the former was Sargani-Sin. Such an abbreviation, however, was not unusual in the names of many of the early kings, and the identity of the two names is now put beyond a doubt by the discovery at Sippar of inscriptions of Sargani-Sin in the same stratum which held bricks stamped with the name of Naram-Sin.

That the empire over which Sargon ruled was extensive is attested by the legends that at a later period gathered round his name (see above, § 36). His name and that of Naram-Sin occur in an astrological tablet,¹ in which expeditions against Phoenicia, Elam, etc., made by these two kings during certain lunar phases and astrological conditions, are recounted; and, although it would be rash to regard such statements as historical on the authority of this tablet alone, they at least bear witness to the permanent hold which the name of Sargon had attained in the popular imagination. In a cylinder² of Nabonidus found at Mukayyar (I'r) the title 'king of Babylon' is ascribed to both Sargon and Naram-Sin, but it is probable that the city of Agade, not Babylon, formed the centre of their empire, as 'king of Agade' is the title by which Sargon invariably describes himself. The site of this city has not been identified; but it is probably to be sought in Northern Babylonia.

Both Sargon and Naram-Sin were Semites, and the extent of their empire shows the progress which the Semite invaders were making towards the final subjugation of the country.

The name of another king who was probably of Semite origin is Urukma, possibly to be read as Urukma, and from the fact that his inscriptions were found at Nippur near those of Sargon, which they closely resemble in character, it may be assumed that he belonged to about the same period. His name has been found on alabaster vases which he dedicated and placed in the great temple at Eridu; the vases, he states, formed part of the spoil captured on a successful expedition against Elam and Elamite to the E. of Babylonia. Moreover, Manishtush, whose name occurs on a mace-head preserved in the British Museum, must also be assigned to about the same period.

In addition to the empire established by Sargon, there is not lacking evidence of the existence at this time of other Semite kings and principalities. The inhabitants of Lulubi spoke a Semite dialect, as is evidenced by the inscription engraved on the face of the rock at Ser-i-pul, a place on the frontier between Kurdistan and Turkey. The inscription accompanies and explains a relief representing the goddess Nini granting victory over his foes to Annabum, king of Lulubi, and from the archaic forms of the characters the work must be assigned to a period not later than that of Sargon. It is also probable that the inhabitants of Gutti, a district to the NE. of Babylonia, were Semites; for an archaic inscription of a king of Gutti, which was found at Sippar, is written in Semitic Babylonian. This, we may assume, was carried to Sippar as spoil from the land of Gutti, though it is also possible that the stone containing the inscription was a gift of the king of Gutti to the temple at Sippar, the inscription being composed, not in the king's own language, but in the Semite dialect of Sippar.

Still, whilst a few of the inscriptions of this early period are undoubtedly Semitic and may be adduced as evidence of the first settlements of the Semites in Babylonia, the majority of the inscriptions that have come down to us are written in a non-Semitic tongue (to which the late Sir H. Rawlinson gave the name Accadian), now generally known as Sumerian.³ These inscriptions

¹ K 3194 J

² K 3194 J

³ For many years a controversy has raged around the character, and even the existence, of this language. The theory put forward by Halévy that Sumerian was not a

BABYLONIA

have been found in the mounds which mark the sites of the ancient cities of the Euphrat, and were the work of the previous inhabitants of the country whom the invading Semites eventually displaced. One of the most important of their ancient cities is to-day represented by the mounds known as Telleh, situated to the N. of Mukdavar and E. of Warka, on the E. bank of the Sudd el-Hind. These mounds mark the site of a city called by the kings and governors who ruled there Sirpula, but known at a later time as Lagas. The excavations that were begun on this site by De Sarzeu in 1877 have resulted in a rich harvest of inscriptions on statues, cylinders, cones, tablets, bricks, etc., from which it is possible to trace the history of the city throughout a long period. Its earlier rulers called themselves 'kings,' the later ones bearing the title of patesis, which is equivalent to the Assyrian issakku. The word patesis, whilst implying that the ruler is the representative of the national god, indicates the possession of a power less supreme than that attaching to the word lugal (esen, sumu, 'king'), and it has been ingeniously suggested that the change in title was in consequence of an actual change in the fortunes of the city, the rule of the patesis being held to mark the subjection of their city to another power. The manner in which the succession of the various kings and patesis was determined has been already referred to (see above, § 371); the following is a brief description of their history based on those results.

The oldest king of Sripurā known to us is, in all probability, Urukama. After an interval, the length of which is unknown, we find Uru-Ni, the thirteenth, and, as he gives to another, his father nor grandfather, the title of king, it is not unreasonable to conclude that he was the originator of a new

44. Rulers of Sirpurla or Lagash.

several generations. Ur-Nina was succeeded by his son Akkai, who, like both the titles, king and priest, and it was in the reign of Eadlimgamag that the first recorded success in the title of king against the ruler of Eadlimgamag is mentioned. It is during the reign of Eadlimgamag, however, that we find the first record of any extensive military operations undertaken by the inhabitants of Sipurka. To his reign belongs the famous stele of the ruler, carved by command of his victory over the ruler of the kingdom of Ur-Nina. Ur-Nina himself, whose son Entana and grandson Enurata succeeded him, continued the succession. After a second interval comes Ur-Nina, from whom the throne passes through his daughter to his son-in-law Nannimgamag. After a third but shorter interval there followed Gindia, who conducted a successful campaign against Eblai, but, like his predecessors, devoted most of his energies to building operations. He was succeeded by his son Ur-Ningirish; and finally there must be placed a second Akkai, and either before or after him Eakani, whose son Ghalalana may possibly have succeeded him on the throne.

The monumental inscriptions of these old kings and patesis of Sirpula are, with the exception of one of

45. Their inscriptions.

45. Their inscriptions. Ur-Bur and several of Gudea, comparatively short, and are generally concerned with the erection of buildings and temples in the city, an object to which both kings and patests without exception devoted themselves. The thousands of clay tablets, however, which have been discovered dating from this period, the high point of development attained in their sculpture and carving in relief, the elaborate but solid construction of their temples and palaces, are all evidence of a highly developed civilisation, and the question at once arises

46. Their date.

46. Their date. as to what date must be assigned for the rise of the kingdom of Sumeria. Additional interest is lent to the way in which this question may be answered by the fact that even the earliest inscriptions and engravings that language but merely a calligraphic method of writing invented by the Semite Babylonians; these facts was for years stoutly defended by its adherents; it has now, however, given way before the results of recent excavations. The thousands of archaic tablets found at Tellah and elsewhere are written entirely in Sumerian by a people who both in their inscriptions and in their art exhibit no traces of Semitic origin. The existence of Sumerian as the language of these early inhabitants of Babylonia is now generally admitted. See also below, § 47, p. 10.

BABYLONIA

have been discovered cannot have been the work of a barbarous race, but demand the assumption that at least one thousand years, during which they gradually attained their high level of civilization and culture, had passed.

It will be obvious that, as the date of Sargon I. is already fixed, the simple way of answering the question of assigning a date to the earlier kings of Supulki is to determine the relation in which they stood to Sargon I. Until recently it was impossible to come to any definite conclusion, though it was generally held that the archaic forms of characters on the inscriptions of the kings of Supulki favoured the theory which assigned to them an early date. The excavations at Nippur, however, have now yielded sufficient data to supply a more complete answer.

In the same stratum as the inscriptions of Sargon and Alu-sar-ud, and not far from them, was found a fragment of a vase inscribed with the name of Entem, patet of Surpula, who is said to have presented the vase to En-hilla or Bel, the god of Nippur. It would be rash to conclude from this fact alone that Entem was the contemporary of Sargon I, though it may be held to indicate that approximately the same date may be assigned to Sargon and the earlier patet of Surpula. Excavations, however, were subsequently extended below the level at which the records of Sargon had been found, and traces of a still more ancient civilisation were disclosed. An altar with a small enclosure or embankment it, two immense vases of clay standing at short intervals from each other, probably on an inclined plane leading up to the altar, and a massive building with an ancient arch, were the principal architectural remains discovered. However, there were also found inscriptions which, though occurring at a higher level and mixed with the inscriptions of Sargon, are probably to be assigned to a pre-Sargonic period. As the majority of these are broken into small fragments, it is not unlikely that they were intentionally broken and scattered by some subsequent invader of the country. Gate sockets and blocks of diorite, however, were not broken, and so were made use of by subsequent kings. Thus both Sargon I. and Bu-Sin II. used for their own inscriptions the blocks which already bore the rough inscription of Lagal-ki-gul-en-bi, one of the kings of this early period. The characters in these early inscriptions, especially on the vases of Lagal-zi-gisgi, the most powerful of these early kings, bear a striking resemblance to those employed in the inscriptions of the earliest kings of Surpula (Ur-ka-ga, Ur-Nin, and Ur-duga-nagun), sharing with them certain peculiarities of form which are not met with elsewhere. The conclusion that they date from about the same period is therefore, not unwarranted; and, as this period must be placed before Sargon I., we are justified in assuming to Ur-ka-ga a date not later than c. 2300 B.C.

47. Before
Sargon.

To trace in detail the history of the predecessors of Sargon I, whose existence was not suspected until the lowest strata beneath the temple of Ekur at Nippur had been sifted, is a task that requires some ingenuity. Our only source of information is afforded by the fragmentary inscriptions themselves; but, as many of these are duplicates, it is possible to reconstruct their original text. The earliest rulers of Babylonia, such as Ensi-gisara, are found in conflict with the city of Kish and spoil from Kish was from time to time placed as an offering in the temple at Nippur. Sometimes Kish was victorious, and then the king of Kish, as in the case of Ur-Ninsinidda, was a competitor to the temple at Nippur in his own island. The ultimate superiority of Kish, however, was secured by its alliance with the powerful city of Isin, for Ensal-zaggisi, son of Uruk, patesit of Isin, on coming to the throne, extended his sway over the whole of Babylonia. He has left us a record of his achievements in a long inscription carved

BABYLONIA

on more than a hundred vases, which he deposited in Nippur. Though he especially favoured his own city of Isban, Erech was probably his capital, while Ur, Larsa, and Nippur were important centres. Lugal-zaggisi's empire did not long survive him, and the lead in Babylonian politics passed to the city of Sirpurla. E-dugira-nagin's conquest of Isban, however, was not followed up by his successors on the throne; and the hegemony passed once more to the north, this time to Sargon of Agade, who had all Babylonia under his sway, the rulers of Sirpurla exchanging the title of king for that of patesi in consequence of their subjection to him. Such may be taken as a general sketch of the course of Babylonian history up to the time of Sargon I.

It is impossible to say to what race or nationality Lugal-zaggisi and the earlier kings belonged, though we may mention the theory of Hilprecht, who sees in their successes against the cities of Babylonia the earliest Semitic invasions of the country; regarding Kis as their first military outpost, and Isban, which he is probably wrong in identifying with Harran, as their military base. Another patesi of Isban who may be placed in this early period is Mul-Babbar (in Semitic, Amel-Samir), whose inscription on three clay cones is preserved in the British Museum.

After the fall of Sargon's empire, the first city that appears to have gained a considerable supremacy throughout Babylonia is Ur. Under Lugal-kigub-urdu Ur had already risen to some importance; but the city had been included in Sargon's kingdom, and it was not until nearly a thousand

48. Ur. *circa 2800.* years after his death that it again recovered its position. Only two of her kings at this later period are known to us, Ur-gur and Dungi. In addition to their title 'king of Ur,' both style themselves kings of Sumer and Akkad, a title implying that many cities throughout both southern and northern Babylonia had tendered their submission and acknowledged allegiance to them. The monuments themselves bear witness that this title was no empty boast, but had its foundation in a real supremacy.

A seal cylinder in the British Museum bears a dedication to Ur-gur, 'the mighty hero, king of Ur,' by a patesi of the city of Isban-Sin, 'his servant,' while there is evidence that the later patesis of Sirpurla were subject to Ur, the Louvre possessing a fragment of a statue dedicated to the goddess Inan by Gialalama, 'son of Lulani, patesi of Sirpurla,' for the life of Dungi, 'the mighty king, king of Ur, king of Sumer and Akkad'; an inscription with a similar purpose of the time of Ur-Ningirsu, Gudea's son and successor, is preserved in the British Museum. That Ur-gur was a great builder is attested by the many short inscriptions on bricks recovered from the ruins of the buildings which he either founded or restored. From these we gather that he built the great temple of the Moon-god in Ur, while in Erech he erected a temple to Ninā, the goddess Enlil. On a brick from a tomb discovered by Loftus at Senkerch, the ancient Larsa, is recorded the fact that Ur-gur built a temple to the Sun-god there, and bricks found at Nippur record his rebuilding of the great temple of E-kur in that city. Excavations at the latter place show that this temple was larger than any of its predecessors; buildings that had been standing since the time of Narām-Sin he razed to the ground in order to erect his huge platform of sun-dried bricks, in the NW. corner of which he built a huge zikkurrata (temple tower) of at least three stories. Ur-gur thus appears to have erected or rebuilt temples in most of the principal cities of Babylonia; in his zeal for religion, however, he did not neglect to strengthen his own capital, for we have evidence that he erected, or at any rate rebuilt, the city-wall of Ur. His son and successor Dungi, 'king of Ur, king of Sumer and Akkad,' king of the four quarters, carried on the work of temple-building to which his father had devoted himself, and restored the temple of Ištar in Erech. An interesting clay tablet in the British Museum contains a copy of an old inscription that once stood in a temple at Cuthah. The copy was made in the later Babylonian period by a scribe named Belshallit, and the archaic inscription, which his care has rescued from oblivion, records the erection by Dungi of a temple to the god Nergal in the city of Cuthah.

With Dungi our knowledge of the city of Ur and its supremacy comes to an end for a time. Whether

49. Isin. Dungi's successors retained for long their hold over the rest of Babylonia, or speedily sank into a position of dependence to some other city, we have no means of telling. When we once more

BABYLONIA

come across inscriptions we see that the lead in Sumer and Akkad has passed into the hands of the kings of Isin.

At present we possess inscriptions of four kings of Isin: Ur-Ninib, Libit-Ištar, Bur-Sin I., and Išme-Dagani. In the case of each of them, before their chief title 'king of Isin' is given special mention is made of Nippur, Ur, Eridu, and Erech as lying under their sway. The order in which these cities are mentioned is significant. The fact that Nippur heads the list proves that Ur sank greatly in importance after the days when she held the lead in Sumer and Akkad. A fifth king of Isin, named Išbīgira, is known to us; the only evidence of his existence, however, is the occurrence of his name and title on a fragment of a clay tablet in the British Museum. The rule in Babylonia now passes once more to the city of Ur, which retains its old supremacy. Išme-Dagani was the last king of Isin who retained the title of 'king of Sumer and Akkad,' and held together the confederation of Babylonian cities which that name implies; we find his son erecting a temple for the life of Gungunu, king of Ur, as a token of homage. Under Gungunu began the second dynasty of Ur, to which the kings Bur-Sin II., Ine-Sin, and Gungib-Sin belong. The many inscriptions on clay tablets that have been recovered, dated in the reigns of these three kings, testify to the great commercial prosperity of Babylonia at this time. The rise of the city of Larsa followed

50. 2nd Dyn. of Ur. *circa 2400.* The kings of the former city held Ur as a dependency, and appear to have extended their rule still farther afield, for they assume also the title 'king of Sumer and Akkad.' The two principal kings of Larsa were Nūr-Rammān and his son Sin-iddina.

circa 2300. Both erected temples in Ur, and the latter founded also, after meeting with success in the field, turned his attention to the internal improvement of his territory. He rebuilt on a larger scale the wall of Larsa, and by cutting a canal obtained for that city a constant supply of water.

Sin-iddina does not mention the name of the enemy his victory over whom he records. It has been suggested, however, with great probability,

52. Elam. that it was Elam whom he repulsed. This must have been the period of the Elamite invasion to which Asur-bāni-pāl refers. On taking the city of Susa, about 650 B.C., Asur-bāni-pāl relates that he recovered the image of the goddess Nanā, which the Elamite Kudur-Nanhundī had carried off from Erech 1635 years before—i.e., about 2285 B.C. Though Sin-iddina repulsed the Elamites, he did not check them for long. A few years later we find them under the leadership of Kudur-Mabug, son of Smti-silbak, again invading Babylonia. This time they met with more success and obtained a permanent footing in the south. Kudur-Mabug was not king of Elam. He styles himself 'prince of the Western land'; that is to say, he was ruler of the tract of land lying on the W. frontier of Elam. From this position he invaded the country, and, having established himself as king of S. Babylonia, he erected a temple in Ur to the Moon-god in gratitude for his success. His son, Rim-aku, succeeded him and attempted to consolidate his kingdom, restoring and rebuilding Ur and extending his influence over Erech, Larsa, and other cities; his usual titles were 'exalter of Ur, king of Larsa, king of Sumer and Akkad.' It is a period of much interest for the Biblical student (see CHETORI-LOMLER).

During the second dynasty of Ur the city of Babylon had enjoyed a position of independence, with her own

53. Babylon. kings and system of government; but her influence does not appear to have extended beyond the limits of the city. It was not until the reign of Hammurabi, the contemporary of Sin-iddina

and Rim-Aku, that she attained the position of importance in Babylonia which she held without interruption for nearly two thousand years. The dynasty to which Hammurabi belongs was called by the native historians the 'Dynasty of Babylon,' and, as far as we

circa 2400. at present know, forms the limit to which they traced back the existence, or at any rate the independence, of their city.

The dynasty was founded about 2400 B.C. by Sumu-abi, who was succeeded by Sumu-ili and Zabani his son. It is possible that on Zabani's death a usurper, Iuimuru, attempted to ascend the throne; but his rule cannot have been for long, as scribes of contract tablets do not give him the title of king, and his name is omitted from the list of kings of Dynasty I., Zabani's

BABYLONIA

son, Apil-Sin, being stated to have directly succeeded his father. Of the reign of Apil-Sin's son, Sin-imbullit, we know nothing, his only claim to remembrance being that he was the father of Hammu-rabi.

It is difficult to determine accurately the position occupied by Babylon when Hammu-rabi ascended the throne. That she was already beginning to extend her sway over the districts in her immediate neighbourhood we may conclude from a reference on a cylinder of Nabonidas, who states that the temples of the Sun-god and of the goddess Ammutu at Sippar had been falling into decay 'since the time of Zabum'; the phrase implies that Zabum had at any rate rebuilt these temples, and must, therefore, have included Sippar within his sphere of influence. We may regard it as certain, however, that the authority of the city had not penetrated into southern Babylonia.

On Hammu-rabi's accession he first devoted himself to the internal improvement of his territory. In the past both Babylon and Sippar had suffered from floods, and the recurrence of these he sought to diminish by erecting dams and cutting canals. One inscription of his, written both in Sumerian and in Semitic Babylonian on clay cylinders in the British Museum, reads as follows:—

Hammu-rabi, the mighty king, king of Babylon, king of the four quarters, the founder of the Land, the king whose deeds unto the heart of Šamaš and Marduk are well-pleasing, am I. The summit of the wall of Sippar like a great mountain with earth I raised. With a swamp I surrounded it. The canal of Sippar to Sippar I dug out and a wall of safety I erected for it. Hammu-rabi, the founder of the Land, the king whose deeds unto the heart of Šamaš and Marduk are well-pleasing, am I. Sippar and Babylon in a peaceful habitation I caused to dwell continuously. Hammu-rabi, the darling of Šamaš, the beloved of Marduk, am I. That which from days of old no king for his king had built, for Šamaš my lord gloriously have I accomplished.

In addition to his works at Sippar we learn from another inscription that he cut the 'Hammu-rabi canal' on both sides of which he sowed corn-fields. He erected a granary in Babylon, in which he stored grain for use in years of famine or scarcity. The inscription recording the erection of the granary has perished; but we possess a copy of it in clay, made in the Neo-Babylonian period by Rimut-Gula, and deposited in Babylon in the temple E-šzida. Hammu-rabi's works of improvement, however, were not confined to Sippar and Babylon. As he extended his authority throughout the country, he introduced the same enlightened methods, rebuilding the temples of the gods in the various cities, conciliating the inhabitants, and out of scattered principalities forming a single and organic kingdom, with its metropolis at Babylon. The principal enemy to Babylonian independence at this period was Elam; but after a series of campaigns Hammu-rabi signally defeated her, and effectually hindered her advances to the S. and W., after which he was again at liberty to devote himself to the material improvement of his people. Hammu-rabi was not the first king of Babylonia to form a great empire out of scattered elements. Lugal-zaggisi and Sargon I. had already made this achievement, and it is not unlikely that their empires considerably exceeded that of Hammu-rabi in extent. Hammu-rabi's work, however, is distinguished from theirs by its permanence. Whilst Isban and Agadé soon sank back into comparative obscurity, Babylon remained the chief town of the kingdom throughout the whole course of its history.

Hammu-rabi was succeeded by his son Samsu-iluna, the other kings of the first dynasty being Eišum, Ammi-saduna, Ammi-zaduna, and Samsu-ditana, who follow one another in direct succession. Samsu-iluna continued his father's work of irrigation, and we know from two inscriptions that he built many temples to the gods. Of his successors, however, we possess few inscriptions, though many contracts, dated in the reign of each of the kings of this dynasty, have been found which throw an interesting light on the private and social sides of Babylonian life at this period.

The second dynasty consists of eleven kings—

55. His successors.

circa 2230.

BABYLONIA

Huma-ilu, Itti-ilu-nibi, Dunki-ilīšu, Iš-ki-bal, and his brother Šu-ussu, Gul-kešar and his son Kirgal-dara-maš, and his grandson A-dara-kalama, A-ku-ur-ul-ana, Melam-matati, and Ea-ganil. Of this dynasty we know nothing, though it has been conjectured with some probability that it was during this period that the Kassites first invaded Babylonia. Descending from the mountainous territory on the borders of Media and Elam, they overran the country and took possession of the cities; and at the beginning of the third dynasty we find them firmly seated on the throne. So far as we know, they were never ejected by force, but were absorbed in process of time by the Semitic element of the nation, which gradually recovered its predominance.

There were thirty-six kings of the third dynasty; but only the names of the kings at the beginning and of those at the end of the dynasty have been preserved in the Babylonian list of kings.

Other sources of information, however, now become available; the 'Synchronic History' gives a résumé of the relations between Babylonia and Assyria, which during the early part of the third Babylonian dynasty attained its independence (cp. ASSYRIA, § 25); the account furnished by the 'Synchronic History' is supplemented by the mutilated text of a somewhat similar Babylonian chronicle; the official correspondence between Babylonia and Egypt during a small part of this period is preserved on some of the tablets found at Tell el-Amarna; and, finally, inscriptions of several of the kings themselves have been recovered, as well as contract-tablets dated in their reigns.

The first king of the dynasty was Gudiš, who was succeeded by Agum-šar, Gudiš, Ušši, Adu-neur, and Ušši-šar. Here the gap occurs in the list of kings; and it is probably at some point in this gap that we must place Agum, who is known to us from a long inscription, a copy of which in Neo-Assyrian characters was preserved in the library of Ashur-bani-pal; from it we learn that he recovered and restored to the temple of E-šzida in Babylon certain images of Marduk and of the goddess Zarpanitu, which had been carried off to the land of Hani.

A later place in the same gap must be assigned to Kallimma-Sin (or Kadashman-Bel; cp. KANDIZON, ZA 15 265 f.), four of whose letters are in the Amarna series; this correspondence serves to indicate the intimate relations between Egypt and Babylonia at this period, both the sister and daughter of Kallimma-Sin being among the princesses of western Asia whom the king of Egypt married. The order of the other kings, whose names have been recovered and must be placed within the same gap in the list of kings, has not yet been ascertained.

It has recently been suggested, for example, that Šagašalti-Bariš, the son of Kudur-Bel, should be placed before Kara-indaš, though a later date is possible; moreover, Kurigalzu I., the son of Kadashman-Harbe, is usually placed after and not before Kara-indaš, though a suggestion has lately been made to the contrary. According to the 'Synchronic History' Kara-indaš was a contemporary of the Assyrian king, Ashur-bel-nišu, between whom and Ashur-nalili at least two kings, Puzur-Ašur and Ashur-nadin-ahē, occupied the throne of Assyria; from the same document we know that between Kara-indaš and Kara-hadaš, the contemporary of Ashur-nalili, at least one king, Burma-Bariš, occupied the throne of Babylonia; yet on the similar Babylonian chronicle Kara-indaš is mentioned as the son-in-law of Ashur-nalili, and the father of Kara-hadaš. It is possible to reconcile these two accounts only on the supposition that the Kara-indaš of the 'Synchronic History' is not to be identified with the son-in-law of Ashur-nalili. On this assumption, and at the same time admitting that certain places in the order of succession are not definitely ascertained, we are still able to summarise the chief events of the period. Kara-indaš is the first Babylonian king mentioned in the 'Synchronic History', where he is said to have formed a treaty with Ashur-bel-nišu, king of Assyria; similar friendly relations with the northern kingdom were probably maintained by Kurigalzu I. and his father Kadashman-Harbe. Burma-Bariš, the son of Kurigalzu I., formed a fresh treaty with Assyria concerning the frontier between the two kingdoms, and built a temple to the Sun-god at Larsa, as we learn from a brick that has been recovered from its ruins. Ashur-nalili, who succeeded Ashur-nadin-ahē on the throne of Assyria, strengthened the ties between his kingdom and

56. 2nd Dyn. Uru-Azag.

circa 2090.

57. 3rd Dyn.

BABYLONIA

Babylonia by marrying his daughter Mulallijāt-Šeria to a king of Babylonia, who bore the name of Kara-indaš; and when his grandson, Kara-bardas, the son of Kara-indaš, succeeded to the throne of Babylon, the relations between the two countries were still more cordial. The Kassite troops, however, possibly jealous of Assyrian influence, slew Kara-bardas and set *circa 1400*, the usurper Nazi-bugas on the throne. The death of Kara-bardas led to the invasion of Babylonia by Asurnihalli, who avenged his grandson by slaying Nazi-bugas, and putting Kurigalzu II., a son of Burna-buriš, the former king of Babylon, in his place. Kurigalzu II. was ambitious to extend the boundary of his kingdom; and with this end in view he undertook a campaign against Elam, the capital of which he conquered and sacked, as we learn from an inscription on an agate tablet which was found at Nippur. On undertaking hostilities against Assyria, however, he was defeated by Bel-nirari, and was forced to accept the terms offered the two kingdoms. By the latter with regard to the boundary between the two kingdoms. The next defeat by the Assyrians which the Babylonians sustained was in the reign of Nazi-maruttas, the son of Kurigalzu II., when Ramman-nirari inflicted a signal defeat on the Babylonian forces and extended the Assyrian boundary still farther southward. Kadašman-Turgu, whose name was also written Kadašman-Bel, the son of Nazi-maruttas, succeeded his father on the throne, and was in turn succeeded by his son, whose name, occurring in a broken inscription from Nippur, may probably be restored [Kadašman]-Buriš. The Babylonian List of Kings furnishes the names of the last kings of the dynasty. Of Isam-meš . . . we know nothing, and of Šagašalti-Šuriaš only the fact that he dedicated an object to Bel and placed it in the temple at Nippur. Šagašalti-Šuriaš was succeeded by his son Bibe, and the names of the next three occupants of the throne are Bel-Sum-iddina, Kadašman-Ḫarbe, and Ramman-Sum-iddina. We do not know the relations between Babylonia and Assyria during the early part of this period; but it is probable that the last three kings acknowledged the supremacy of Assyria. Tokal-e-Ninib, king of Assyria, to whom Ramman-nirari III. assumed the title 'king of Sumir and Akkad', invaded Babylonia, captured Babylon, and for seven years maintained his hold upon the country. On the death of Ramman-Sum-iddina, however, the Babylonian nobles placed his son Kašman-Sum-ur on the throne, and, proclaiming him king, threw off the Assyrian yoke. Subsequently, during the reign of Ramman-Sum-ur, the Assyrians suffered a crushing defeat; and although Ramman-Sum-ur, on following up his victory by an invasion of Assyria, was repulsed by Ninib-pal-Ešara, he recovered a considerable portion of Babylonian territory. During the reigns of Meli-šihu, and of his son, Marduk-pal-iddina, the Assyrians made no attempt to wipe out the reverse they had sustained. On the accession of Zamama-Sum-iddina, however, *circa 1155*, Assur-dan crossed the frontier and recaptured several Babylonian cities. Zamama-Sum-iddina reigned only one year, and was succeeded by Bel-Sum-iddina II., the last king of the Kassite dynasty. Under this king the country suffered attacks from Elam, and the discontent and misery which followed the defeats sustained by the Babylonians brought about the fall of the dynasty.

The fourth dynasty is called the dynasty of Pašē; who its founder was we do not know, though an early place in it must be assigned to Nebuchadnezzar I. In one of the two monuments that we possess of this king he styles himself 'the Sun of his land, who makes his people prosperous, the protector of boundaries'; and it is certain that to a great extent he restored the fallen fortunes of the kingdom. He successfully prosecuted campaigns against Elam on the east, he conquered the Lulubi on the north, and even marched victoriously *circa 1130* into Syria. Against Assyria, however, he did not meet with similar success.

On Nelchadrezzar's crossing the frontier, Assur-reš-išā, king of Assyria, marched against him, and Nelchadrezzar, who was not then prepared to meet an army of the Assyrians, burnt what engines of war he had with him, in order to facilitate his retreat. He soon returned with reinforcements; but Assur-reš-išā, who had also strengthened his army, defeated him, plundered his camp, and carried off forty of his chariots. A king who reigned early in the dynasty and may possibly have succeeded Nelchadrezzar is Bel-nān-apin, whose name is known from a 'boundary stone' dated in the fourth year of his reign. Under Marduk-nādin-ahē Assyria and Babylonia were again in conflict. It is probable that this king enjoyed a temporary success against Tiglath-pileser I., during which he carried off from the city of Sala which are mentioned by Sennacherib in his inscription on the rock at Bavian. This campaign is not mentioned in the 'Synchronisms History', though in the beginning of the account of the campaign there mentioned, which ended disastrously for Babylonia, the two kings, it is said, set their chariots in battle array 'a second time' (see Assyria, § 25). This second cam-

BABYLONIA

paign consisted of a series of successes for Tiglath-pileser, who, after defeating Marduk-nādin-ahē in Akkad, captured Babylon itself and other important cities in the northern half of the kingdom. Assur-bēl-kala, Tiglath-pileser's successor on the throne of Assyria, changed his father's policy and formed treaties with the Babylonian king, Marduk-šapik-zēr-māni.¹ On this *circa 1100*, sure origin, was raised to the throne of Babylon, and Assur-bēl-kala, in pursuance of his policy, allied himself to the new king by a marriage with his daughter. Only the beginnings of the names borne by the last three kings of the dynasty are preserved in the List of Kings.

The fifth dynasty was called the dynasty of the 'Sea-land,' and was a short one, consisting of only three kings, Simmaš-šihu, Ea-mukin-zēr, and

59. 5th Dyn. Kassi-nadin-ahī. It is not improbable that the Chaldean tribes, who are not actually mentioned in the inscriptions before the time of Assur-nāsr-pal and Shalmaneser II., were even at this early period making their influence felt, overrunning southern Babylonia and spreading themselves throughout the country; and the fact that at a later time we find them especially connected with the district termed the 'Sea-land' in S. Babylonia lends colour to the suggestion that the dynasty of the Sea-land was of Chaldean origin.

Of the three kings of the dynasty Ea-mukin-zēr reigned but a few months; the other two kings, who occupied the throne for longer periods, are mentioned by Nabu-aplu-iddina in connection with the fortunes of the temple of the Sun-god at Sippar. At the time of Simmaš-šihu this temple was in ruins in consequence of the troubles and disturbances in Akkad, the powerful tribes of the Sutu having previously invaded the country, laying the temple in ruins and breaking up the sculptures. Simmaš-šihu partially restored the structure of the temple, and placed it in charge of a priest for whose maintenance he appointed regular offerings. In the violent death of Simmaš-šihu, of which we learn from the fragment of a Babylonian Chronicle, and in the shortness of the reign of Ea-mukin-zēr, we may probably see additional indications of the disturbed state of the country at this time. Under Kassi-nadin-ahī the general distress was increased by a famine, in consequence of which the regular offerings for the temple of Samas at Sippar ceased.

The first king of the sixth dynasty was Eulbar-šakin-šum, and on his accession to the throne E-kur-Sum-ušahš, the priest whom Simmaš-šihu had placed in charge of the temple at Sippar, complained to the king that the offerings had ceased. On hearing the state of the temple's resources Eulbar-šakin-šum increased the regular offerings and endowed the temple with certain property situated in Babylonia. The sixth dynasty consisted of only three kings, Eulbar-šakin-šum being succeeded by Ninib-kadurri-ur and Šilani-šakamma; it was termed the dynasty of the House of Bazi, and each of the three kings on a fragment of a chronicle is termed a 'son of Bazi.'

From this point onwards for nearly a hundred years there is a gap in our knowledge of Babylonian history. After the dynasty of the House of Bazi an **61. Gap.** Elamite occupied the throne for six years; *circa 1005*, but his name is not known, nor are the circumstances that attended his accession. He did not perpetuate his hold upon the country; for on his death the rule 'gain passed to native Babylonians, the kings of the eighth dynasty, which was the second to bear the title 'the dynasty of Babylonia.'

The names of the early kings of the dynasty are not preserved, though Šurir, a Babylonian king whom Assur-nāsr-pal mentions as having destroyed a city which he himself rebuilt, is probably to be placed in this period. The first king of this dynasty of whose reign details are known is Šamaš-mudammik, who *circa 910*, king of Assyria. Against Nabu-Sum-iškun, his successor on the throne, Ramman-nirari scored *circa 900*, another victory, several Babylonian cities falling into his hands, though we subsequently find him on good terms with Assyria and allying himself to Nabu-Sum-iškun, or possibly his successor, each monarch marrying the other's daughter. *circa 880*, Nabu-aplu-iddina is the next king who is known to have ruled in Babylonia, and though he added the people of Suti against Assur-nāsr-pal, his relations with Shalmaneser II. were of a friendly nature. He is the king who restored and endowed so richly the temple of Šamaš at Sippar, digging in the ruins of former structures till he found the ancient image of the god. He restored and redecored the shrine, and with much ceremony established the ritual and offerings for the god, placing them under the direction of Nabu-nādin-šum, the

¹ The name has also been read Marduk-šapik-kullat.

BABYLONIA

son of the former priest E-kur-Sin-ušabši. Marduk-Siniddina succeeded his father on the throne; but his brother *circa 850*. Marduk-šar-kadān headed a revolt against him, and compelled him to call in the aid of Shalmaneser of Assyria, who defeated the rebels and restored the land to order. Shalmaneser's son and successor, Šamši-Ramman II., was not on the same terms of friendship with Babylon. He directed an expedition against that country and plundered many cities before meeting with serious opposition. Marduk-šar-kadān, the Babylonian king, had meanwhile collected his forces, which included bands from Elam, Chaldea, and other districts; and the two armies met near the city of Dūr-Papsukal. Marduk-šar-kadān was totally defeated; 5000 of his troops were slain; 2000 more were captured; and rich booty, including 1000 talents of war, fell into the hands of the Assyrians. Ramman-nirari III., the successor of Šamši-Ramman, also subjugated a considerable portion of Babylonia, carrying away to Assyria Ban-abiddina, the Babylonian king, together with the treasures of his palace.

Here the record of the 'Synchronic History' ceases, and there follows another gap, of about fifty years, in our knowledge of the history of the country.

The next king of Babylon whose name is known is Nabu-Sin-škan, the first name which occurs after the break in the List of Kings. His successor was Nabu-nassar, the Nabonassar of the Ptolemaic Canon; and with this

63. Nabonassar.

king our knowledge of the Babylonian succession becomes fuller, as, in addition to the evidence afforded by the List of Kings, the information contained in the Babylonian Chronicle and the Ptolemaic Canon becomes available. In the third year of Nabonassar's reign, Tiglath-pileser III. ascended the throne of Assyria; and one of his first acts was an invasion of Babylonia, during which he overran the northern districts and captured several cities, carrying away many of their inhabitants. The distress in the country due to the inroads of the Assyrians was aggravated during this reign by internal dissension: Sippar repudiated Nabonassar's authority, and the revolt was subdued only after a siege of the city.

The Babylonian Chronicle tells us that after a reign of fourteen years Nabonassar died in his palace at Babylon, and was succeeded by his son Nadimr, the

733. Nadios of the Ptolemaic Canon, who is to be identified with Nabu-nadin-zēr of the list of kings. The eighth dynasty ended with the country in confusion. Nabu-nadin-zēr, after a reign of only two years, was slain in a revolt by his son Nabu-šum-ukan or Sum-ukan, 731. who had hitherto held the position of governor of a province. After his accession the dynasty soon came to an end. He had not enjoyed his position for more than a month when the kingdom again changed hands and Ukiu-zēr ascended the throne.

From the fall of the eighth dynasty until the rise of the Neo-Babylonian empire Babylonia was overshadowed by the power of Assyria, the kings of the latter country frequently ruling both at Nineveh and at Babylon. Ukiu-zēr had reigned only three years when Tiglath-pileser again invaded Babylonia, took him captive, and ascended the throne of Babylon, where he ruled under the name of

729. Pulu (see TIGLATH-PILESER). On his death, which occurred two years later, he was succeeded in Assyria by Shalmaneser IV., who, according to the Babylonian Chronicle, also succeeded him on the throne of Babylon, though in the List of Kings Pulu is succeeded by Ululai. The two accounts can be reconciled

727. by the supposition that Ululai was the name assumed by Shalmaneser as king of Babylon (see SHALMANESER). Shalmaneser died after a reign of five years, and, while Sargon held the throne, Merodach-baladan, a Chaldean from southern Babylonia, freed Babylonia for a time from Assyrian control. He sided with Ummanigaš, king of Elam, in his struggle with Assyria; but ten years later was himself captured by Sargon after being besieged in the city of Ikbi-Bel (see MERODACH-BALADAN, 709. SARGON). Sargon then ascended the throne of Babylon, which he held until his death in 705.

BABYLONIA

According to the Ptolemaic Canon, the next two years were a period of interregnum, though the List of Kings assigns the throne to Sennacherib. However this may be, we know that in 703 Marduk-zaku-šum proclaimed himself king; but he had reigned for only one month

703. when he was murdered by Merodach-baladan, who had escaped from Assyria. Merodach-baladan thus once more found himself king in Babylon, but Sennacherib marched against him, defeated him, and caused him to seek safety by hiding himself in the Babylonian swamps. After plundering Babylon and the neighbouring cities, Sennacherib returned to

702. Assyria, leaving the kingdom in the charge of Bel-ibni, a young native Babylonian who had been brought up at the Assyrian court. On the death of Merodach-baladan, shortly afterwards, a rising headed by Šuzub, another Chaldean, brought Sennacherib again into the country. Bel-ibni also must have displeased the king; for, after defeating Šuzub, Sennacherib carried Bel-ibni and his nobles to Assyria, leaving his own son Ašur-nadin-šum upon the

700. throne. Sennacherib next planned an expedition against the Chaldeans whom Merodach-baladan had settled at Nagitu, on the Elamite shore of the Persian Gulf, whence they were able in safety to foment insurrections and plan revolt. Sennacherib determined to stamp out this disaffection, transported his troops in ships across the Persian Gulf. Disembarking at the mouth of the Eulens, they routed the Chaldeans and their allies, and returned with much booty and many captives to the Babylonian coast. Meanwhile Šuzub, who had previously escaped Sennacherib's pursuit, collected his forces and with the help of Elam captured Babylon and placed himself upon the throne.

He is to be identified with the Nergal-šuzub 694. of the Babylonian Chronicle and the List of Kings. He, however, ruled for only one year. Sennacherib, on his return from the Persian Gulf, defeated his army and sent him in chains to Nineveh. Turning his forces against Elam, he plundered a considerable portion of the country, and was stopped in his advance into the interior only by the setting in of winter. In his absence a rebel bearing the name

692. of Šuzub—the Mušezib-Marduk of the Chronicle and the List of Kings—seized the throne of Babylon. Allying his forces with those of Elam, he attempted to oppose Sennacherib in the field; but the combined armies were defeated at Habile. Next year Sennacherib returned to Babylonia, captured the city of Babylon, and deported Mušezib-Marduk and his family to Assyria. According to the Babylonian

689. Chronicle and the Ptolemaic Canon, there now occurred a second interregnum, though the List of Kings credits Sennacherib with the control of Babylonia.

On Sennacherib's murder in 681 his son Esarhaddon 681. was proclaimed king of Assyria. He succeeded to the rule of Babylonia also, though a son of Merodach-baladan made an attempt to gain the throne. He came to Babylon and personally superintended the restoration of the city, rebuilding the temples and the walls, and placing new images in the shrines of the gods. During his reign Babylon enjoyed a season of unusual prosperity, and was free from the internal feuds and dissensions from which she had been suffering.

On Esarhaddon's death the throne of Babylon passed 669. to his son Šamaš-šum-ukin, his elder son, Ašur-bani-pal, having already been installed on the Assyrian throne during his father's lifetime. For some years the two brothers were on friendly terms, and when Urtaku and the Elamites, with the aid of some discontented Babylonian chiefs, invaded the country, Ašur-bani-pal assisted his brother in repelling their attack. During all this time Šamaš-šum-ukin acknowledged the supremacy of Assyria and acquiesced in his brother's active control of the internal affairs of both kingdoms.

BABYLONIA

At length, however, he wearied of this state of dependence, and seizing an opportunity, organised a general rising against Assyria among the neighbouring tribes and nations who had hitherto owned her supremacy. He bought the support of Ummanigash, king of Elam, contracted an alliance with Arabia, and at the same time enlisted the services of smaller chiefs. Though one half of the Arabian army was defeated by the Assyrians, the other half effected a junction with the Elamites. This powerful combination, however, was neutralised by the revolt of Tammartu, the son of Ummanigash, the king of Elam. In fact, the dissensions in the Elamite camp proved of great service to Asur-luni-pal, who completely crushed the confederation that Samas-sum-ukin had brought against him (see ASSUR-RAST-PAL, § 7). Samas-sum-ukin himself was besieged in Babylon, and, on the capture of the city, he set fire to his palace and perished in the flames. According to the List of Kings, he was succeeded by Kandakum, the

Kmeladanos of the Ptolemaic Canon; but this king is probably to be identified with Asur-luni-pal himself, who, on this supposition, like Tiglath-pileser III. and Shalmaneser IV., ruled Assyria and Babylonia under different names. The last years of his reign are wrapped in obscurity; but on his death the throne was

secured by Nabopolassar, who was destined to raise the fortunes of his country and to

found an empire, which, though it lasted for less than one hundred years, eclipsed by its magnificence any previous period in the varied history of the nation. Nabopolassar, in fact, was the founder of the Neo-Babylonian empire.

During the early part of Nabopolassar's reign Asur-luni-pal's successors on the throne of Assyria did not relinquish their hold upon the southern kingdom. They retained their authority for some time over a great part of the country (see ASSYRIA, § 33.). Though we do not possess historical documents relating to this period, we may conclude that Nabopolassar during all these years was strengthening his kingdom and seeking any opportunity of freeing at least a part of it from the Assyrian yoke, and it is not improbable that conflicts between the Assyrian and Babylonian forces were constantly occurring. Towards the end of his reign he found the opportunity for which he was waiting in the invasion of Assyria by the Medes. He allied himself with the invaders by marrying Nebuchadrezzar, his eldest son, to the daughter of Cyaxares, and on the fall of Nineveh had a share in the partition of the kingdom. While N. Assyria and her subject provinces on the N. and NW. fell to the Medes, S. Assyria and the remaining provinces of the empire were added to the territory of Babylon.

Before Nabopolassar could regard these acquisitions of territory as secure, he had first to reckon with the power of Egypt. Necho II., the son and successor of Psammetichus I., soon after his accession to the throne had set himself to accomplish the conquest of Syria. In 608, therefore, he had crossed the frontier of Egypt and begun his march northwards along the Mediterranean coast. Vainly opposed by JOSHIAH (*q.v.*), he pressed forward and subdued the whole tract of country between the Mediterranean and the Euphrates. For three years he retained his hold on Syria, and it was only after the fall of Nineveh that Nabopolassar successfully disputed his possession of the country. Nabopolassar did not himself head the expedition against the Egyptians, for he was now old; but he placed the troops under the command of Nebuchadrezzar his son. The two armies met at Carchemish, where a decisive battle took place. Necho was utterly defeated; thousands of his troops were slain; and Nebuchadrezzar pressed after his flying army up to the very borders of Egypt.

While Nebuchadrezzar was still absent on this expedition Nabopolassar died. His son, therefore, returned to Babylon and was duly installed as king in his

BABYLONIA

stead. It is probable that during the early part of his reign Nebuchadrezzar consolidated his rule in Syria and on the Mediterranean coast by yearly expeditions in those regions.

66. Nebuchadrezzar. After a few years, however, the country showed signs of repudiating Babylonian control. Nebuchadrezzar returned to the coast to suppress the rising. For some years things remained quiet; but soon after the accession of Apries (see EGYPT, § 69) to the throne of Egypt the ferment revived. After a siege of a year and a half Jerusalem fell (see JERUSALEM).

Tyre, the siege of which also Nebuchadrezzar undertook, held out for thirteen years, 585-572 (see PUNICIA). Built on an island, it was practically impregnable from the land, while the blockade instituted by the Babylonians did not prevent the entry of supplies by water. More successful were Nebuchadrezzar's campaigns against Egypt. We do not possess his own account of them; but an Egyptian inscription records that on one of them (undertaken against Apries) he forced his way through the country as far as Syene, the modern Assuan, on the borders of Ethiopia; and it is not improbable that the country was subject to Babylonia during the first few years of the reign of Amasis II., who succeeded Apries on the Egyptian throne (see EGYPT, § 69). Nebuchadrezzar's hold upon Egypt cannot, however, have been permanent; a fragment of one of his own inscriptions mentions his sending an expedition to Egypt in his thirty-seventh year.

During his reign the relations between Babylonia and Media were of a friendly nature, as was not unnatural from the close alliance that had been established between the two kingdoms before the fall of Nineveh. In a war between Media and Lydia, some twenty years later, the Babylonians did not take part; but, when an eclipse of the sun on the 25th of May in the year 585 put an end to a battle between the Lydians and Medes, Nebuchadrezzar, in conjunction with the king of Cilicia, used his influence to reconcile the combatants and bring the war to a close.

While constantly engaged in extending and solidifying his empire, Nebuchadrezzar did not neglect the internal improvement of his kingdom. He rebuilt the cities and temples throughout the country, and in particular devoted himself to the enlargement of Babylon, completing its walls and rebuilding its temples with such magnificence that the city became famous throughout the world (see NEBUCHADREZZAR, BABYLON). Nebuchadrezzar died after reigning forty-three years, and was succeeded by his son Amel-Marduk, mentioned as ENLIL-MERODACH (*q.v.*) in 2 K. 561. 25-27 *ff.* Of this king we possess no inscription, though contracts dated in his reign have been found.

He was assassinated after a reign of two years in a revolt led by Neriglissar, his brother-in-law, who succeeded him upon the throne (see NERGAL-SUAREZER).

His inscriptions that have been recovered are concerned merely with his building operations. He was succeeded by his son Labasi-Marduk, who, after reigning nine months, was murdered by his nobles. Nahu-na'id or Nabonidus, the son of Nabu-balatsu-ikhi, was placed upon the throne.

Nabonidus was a ruler more energetic than his immediate predecessors on the throne. He devoted himself to rebuilding the ancient temples throughout the kingdom, and dug in their foundations until he found the ancient inscriptions of the kings who had first founded or subsequently restored them. In his own inscriptions recording his building operations he recounts his finding of several such inscriptions, and, as he mentions the number of years that had passed since they had been buried by their writers, his evidence with regard to the settlement of Babylonian chronology is invaluable.

68. Nabonidus. throughout the kingdom, and dug in their foundations until he found the ancient inscriptions of the kings who had first founded or subsequently restored them. In his own inscriptions recording his building operations he recounts his finding of several such inscriptions, and, as he mentions the number of years that had passed since they had been buried by their writers, his evidence with regard to the settlement of Babylonian chronology is invaluable.

BABYLONIA

Nabonidus, however, in spite of his zeal for rebuilding the temples of the gods, incurred the hatred of the priesthood by his attempt to centralise Babylonian religion. Although the rise of Babylon to the position of the principal city of the land had been reflected in the importance of Marduk in the Babylonian pantheon, the religion of the country had never radically changed its character. It had always remained a body of local worships, each deity retaining his own separate centre of ritual. Nabonidus set himself to centralise all these worships in Babylon. He removed the images of the gods from their shrines in the various cities throughout the country and transported them to the capital. By this act he brought down upon himself the resentment of the priests, who formed the most powerful section of the community, and they, by the support they gave to Cyrus on his capture of Babylon, considerably aided the Persian conquest of the country.

Cyrus, who had previously conquered the Medes, imprisoning Astyages and sacking Ecbatana, next turned his attention to the conquest of Babylon. The Babylonian army was commanded by Bel-shar-usur (Belshazzar), the son of Nabonidus; but it did not offer an effective opposition to the Persian forces. After suffering a defeat at Opis on the Tigris, it was broken. Cyrus marched on and entered Sippar without further fighting, and Nabonidus fled. Babylon itself was taken two days later, and Nabonidus fell into the hands of the conqueror (cp CYRUS, § 2). In restoring order to the country, Cyrus adopted the wise policy of conciliating the conquered. He restored to their shrines the images of the gods which Nabonidus had removed. The policy he acquired by this act is reflected in the inscription on his cylinder recording his taking of the city, which was probably composed at his orders by the official scribes of Babylon. Although naturally couched in flattering terms, it bears ample witness to the pacific policy of Cyrus, who therein allows himself to be represented as the vindicator and champion of Marduk, the principal deity of his conquered foe:

"He (i.e. Marduk) sought out a righteous prince after his own heart, whom he might take by the hand; Cyrus, king of Ansan, he called by his name, for empire over the whole world he proclaimed his title. The land of Katur, the whole of the tribal borders, he forced into submission at his feet; as for the men whom he had delivered into his hands, with justice and righteousness did he care for them. Marduk the great lord, the protector of his people, beheld his upright deeds and his righteous heart with joy. To his city of Babylon he commanded him to go, he made him take the road to Babylon; like a friend and helper he went by his side. His wide-spreading host, the number of which, like the waters of a river, cannot be numbered, girls with their weapons advance at his side. Without contest and battle he made him enter into Babylon his city; Babylon was spared from tribulation. Nabonidus, the king that did not fear him, he delivered into his hand. All the people of Babylon, the whole of Sumer and Akkad, princes and governors beneath him bowed down, they kissed his feet, they rejoiced in his kingdom, bright was their countenance. To the lord, who through his strength raises the dead to life and from destruction and misery had spared all, joyfully they paid homage, they revered his name." Other passages in the cylinder refer to the zeal displayed by Cyrus for Marduk and the other Babylonian gods. "When into Babylon I entered favourably, with exultation and shouts of joy in the palace of the princes I took up a lordly dwelling, Marduk the great lord [inlaid] the great heart of the sons of Babylon to me and daily do I care for his worship. . . . And the gods of Sumer and Akkad, which Nabonidus to the anger of the gods had brought into Babylon, at the word of Marduk the great lord one and all in their own shrines did I cause to take up the habitation of their heart's delight. May all the gods whom I have brought into their own cities pray daily before Bel and Nabû for the lengthening of my days, let them speak the word for my good fortune, and unto Marduk my lord let them say: 'May Cyrus the king that feareth thee and Cambyses his son [have prospered].'"

With the capture of Babylon by Cyrus the history of the Babylonians as an independent nation comes to an end. The country never regained her independence, but remained a province subject to the powers which succeeded one another in the rule of W. Asia. Under Cambyses, indeed, and still more under Darius Hystaspis, discontent be-

BACA

came very prevalent in Babylonia. Soon after the accession of Darius a certain Nadintu-Bel put himself at the head of a revolt, declaring himself to be Nabuchadrezzar, the son of Nabonidus, the last king of Babylon. Darius stamped out the rebellion and executed Nadintu-Bel. A few years later he quelled a second rebellion headed by Arabu, who was captured and crucified, and during the reign of Xerxes a similar rising proved equally unsuccessful. These rebellions were the last struggles of the national spirit to reassert itself. They met with no response among the general body of the people, who were content to serve their foreign masters. Babylonia, in fact, remained subject to the Persians until the conquests of Alexander brought her under Greek control, which she exchanged only for the Ptolemaic supremacy.

(a) For the history of Babylonia, see the works by Tiele, Pommel, Deitzsch, and Winckler cited under ASSYRIA. For the early period these histories may be supplemented

by reference to the inscriptions which are being published in E. de Sarre's *Documents en Chaldée* (1894, etc.), *The Babylonian Expedition of the University of Pennsylvania* (1890, etc.), edited by Hilprecht, and *Cuneiform Texts from Babylonian Tablets, etc.* in the *British Museum* (1876, etc.). Among English histories reference may be made to George Smith's *Babylonia* (S.P.K. 1877) and G. Rawlinson's *Five Great Monarchies of the Eastern World*, vols. i. and ii. (1871). In Schröter's *K.B.*, vol. iii, translations of many of the historical inscriptions of Babylonia are given, while the same author's *C.B.* describes the principal points in the O.T. which are illustrated by the monuments. For other works dealing with the inscriptions of Babylonia, the bibliographies mentioned in the article ASSYRIA (§ 34) may be consulted.

(b) On the religion of the Babylonians we have as yet only one student's handbook, *Jastrow's Religion of Assyria and Babylonia* (reviewed by D. G. Lyon, *New World*, March, 1899). Sayce's *Hebrew Lectures* (for 1889) on the same subject are less systematic. On the cosmology of Babylonia, Jensen's *Kosmologie der Babylonier* is still the most complete authority; but editions of religious texts must be consulted by the advanced student.

(c) With regard to books for the study of the language, the first dictionary to appear was N. triss's *Assyrian Dictionary* (1867-72), which he did not live to complete. In his *Alphabetisches Verzeichnis der Assyrischen und Akkadischen Wörter* (1876), Strassmaier published an immense collection of material, which has been used in subsequent dictionaries; among these may be mentioned Delitzsch's *Assyrisch u. Wörterbuch* (1887, etc.; unfinished), the same author's *Assyrisches Handwörterbuch* (96), Muss-Arnolt's *Concise Dictionary of the Assyrian Language* (1894, etc., in progress), and Meissner's *Supplementum zum Assyrischen Wörterbuch* (1898); Brünnow's *Classified List of Cuneiform Ideographs*, 1889 (*Indices*, 1897), contains a full list of ideographs with their values. The best Assyrian grammar is Delitzsch's *Assy. Gram.* (1889; transl. by Kennedy).

(d) The existence of the Sumerian language, which for long was disputed, is now generally acknowledged; but a grammar of the language has yet to be written; it should be noted that the views on Sumerian which Delitzsch expressed in his *Assy. Gram.* he has since completely changed. A list of the Sumerian values of the cuneiform signs is given by Brünnow in his *Classified List*, while Weissbach's *Die sumerische Frage* (98) may be consulted for the history of the controversy.

L. W. K.

BABYLONIANS (בְּבִי כְּכָל; יְיָוִי בָּבְלוֹנוֹס [BAQ], Ez. 23:15 [BA om. B&B], 17 [-ONOC, B], 23; in Aram. בְּבִי כְּכָל. בָּבְלוֹנוֹס [BAT], Ezra 4:9), in every case the land, not the city, is referred to: cp especially Ez. 23:15, 'the Babylonians, the land of whose nativity is Chaldaea.'

BABYLONISH GARMENT, RV Babylonish Mantle (מִלְבָּשֵׁת בָּבְלוֹנִי, lit. 'mantle of Shinar,' so RV¹⁸⁸⁵), Josh. 7:21. See MANTLE.

BACA. VALLEY OF (בְּקַעַת הַבְּכָה, § 103), or Valley of Weeping (RV, ὁ ἐν τῇ κοιλάδι τοῦ κλαυθῶνος [B&R], εἰς τὴν κοιλάδα τ. κ. [S¹⁸⁸⁵ VI]; cp Ag. Vg. Pesh.), mentioned only in Ps. 84:7. For the meaning given above cp the Wady of Weeping (وادي البكا) found by Burckhardt near Sinai. The name is frequently explained 'Balsam vale' (so RV¹⁸⁸⁵); but cp Cheyne, who reads בְּכִים (cp B here and at Judg. 25), and supposes a play on the name Beka'im. The pl. בְּכָהִים occurs in 2 Sam. 5:22 ff. (= 1 Ch. 11:14 f.), apparently

BACCHIDES

as the name of a spot (see REPHAIM, VALLEY OF) where there were Bacc-trees. David took his stand there to wait for Yahwe's signal to attack the Philistines.¹ (2 S. 5:24) speaks of it as a 'grove,' meaning an Asherah; there is no mention of trees in G. On the meaning of Bacc-trees see McHERRY.

BACCHIDES (ΒΑΚΧΙΔΗΣ, also ΒΑΧ[Ι]ΔΗΣ; ΒΑΡΑΚΥ, [1 Mac. 7:8, A]. KAKY, [ib. 7: 12, A]. BAKYX, [ib. 9:1, N^o. A]), the chief general of DEMETRIUS I. [7: v, 1], who was sent to Judaea to enforce the claims of Alcimus to the priesthood (1 Mac. 7:8 ff.). Almost immediately after the death of NICANOR, he was sent again with Alcimus, and inflicted a severe defeat on the Maccabean party at Elasa,² who lost their leader Judas (chap. 9, 10; 10:1). Judaea suffered heavily at the hands of Bacchides; nor did any real advantage accrue when Jonathan took up the leadership (9:32 ff.). The capital and other important strongholds remained in the hands of Bacchides, who was engaged in fortifying them until the death of Alcimus (159 B.C.), when he returned to Demetrius (9:57). At the end of two years the opponents of the Maccabean party (whose hands had become strengthened) agreed to betray Jonathan and his followers to Bacchides. This piece of treachery was discovered and avenged (9:58 ff.). Bacchides set out against Judaea (158 B.C.) and besieged Beth-basi, but met with ill success everywhere, until at last he was only too glad to accept Jonathan's overtures of peace (9:68). The Jewish captives of the former wars were restored, and the Maccabees had rest for four or five years.

BACCHURUS (ΒΑΚΧΟΥΡΟΣ [BA]. BAKXOYP [L], ZAG. 10:18), singer in list of those with foreign wives (see EZRA, i. § 5, end), 1 Esd. 9:24; but not in Ezra 10:24 [MT EV G^{ra}], though G^{ra} adds BAKXOYP.

BACCHUS (*Liber*), the equivalent of the Greek Dionysus (so RV^{mg}. ΔΙΟΝΥΣΟΣ [AV]), is mentioned in 2 Mac. 6:7, where it is said that on the occasion of the birthday of Antiochus Epiphanes (175-164) the unhappy Jews were compelled to attend the feast of Bacchus (ΔΙΟΝΥΣΙΑ; RV^{mg}. 'feast of Dionysia') wearing the ivy-wreath (κισσός), the peculiar emblem of the god. A few years later Nicom (the general of Demetrius) threatened to pull down the temple and supplant it by one dedicated to Bacchus unless Judas was handed over to him (ib. 14:33, ΔΙΟΝΥΣΟΣ [A]). The worship of Bacchus seems to have been introduced first by the Ptolemies, of which family he was the patron-god, and according to 3 Mac. 2:29 several years previously the Jews in Alexandria had been branded by Ptolemy Philopator (222-204) with the sign of the ivy; the object of this obviously being forcibly to identify the unwilling Jews with the detested worship of Bacchus. See CUTTINGS OF THE FLESH, § 6. His worship would be specially abhorrent to pious Jews, since one of the greatest of the Dionysian festivals fell in the month Elaphebolion (March-April), thus synchronising closely with the passover. In course of time the Hellenising Jews and Greek residents were more attracted by the cult, and when Jerusalem became a Roman colony (Aelia Capitolina) we find Dionysus with his thyrsus and panther figuring upon the coins as one of the patron gods.³

The worship of Dionysus flourished at Caesarea, at Damascus, and in the Haurân. He was the special patron of Scythopolis, and from him the town Dionysia (Soada) received its name. Dionysus, however, soon became identified with the Nabataean deity Dusares (the Baal, the god of heaven, and of wine). The

¹ In v. 24 emend צָרָה to צָרָה (συνσεισμός [L] for συν. σεισμός [BA]), 'when thou hearest the sound of a stormy wind in the top of the Bacc-trees.' It is in the tempest that Yahwe goes out against the Philistines.

² Doubtless an error for ADASA.

³ See Madden, *Coins of the Jews*, 1881, p. 252 f.

BADGERS' SKINS

Dionysiac character which the latter presents is not native; it is directly due to the northern influence.¹ The priest of Dionysia (see above) calls himself the priest of Dusares, and on the coins of Bostra the latter appears with the Dionysian emblem of the wine-press. Figures of the vine and wine-cup are still found upon the lintels in many of the villages in the Haurân. Although the worship of Yahwe had little in common with that of Bacchus (*nequaquam congruentibus institutis*, Tacit. Hist. 5:5), classical writers, observing the musical and joyful nature of their ceremonial rites, now and then fell into the error of naming Bacchus a Jewish god that had been worshipped by the earliest patriarchs (cp e.g. Plut. Sympos. 14:6).

For the various mythological forms of Bacchus, see Ency. Brit.⁹ s.v. 'Dionysus'; and Koschier, s.v.

BACENOR occurs in an uncertain passage, 2 Mac. 12:15, Δωδεκαθροῦ δὲ τῶν τῶν βακχόπορος [VA]. It is doubtful whether it is the name of a captain or the cognomen of a company or division in the army of Judas. See DISTURERS.

BACHRITES, THE (בְּכָרִית; Nu 26:35, G^{ra} [5:30] om.). See BECHER.

BADGER, ROCK (בֶּדֶק), Lev. 11:5 RV^{mg}; 1 V CONEY.

BADGERS' SKINS, RV SEALSKINS (עֹרֵת הַחֲזִירִים, עֹרֵת חֲזִירִים, ΔΕΡΜΑΤΑ ΥΑΚΙΝΘΙΝΑ [ιανθινα, Aq., Sym., Ezek. 16:10] [BAL]; Ex. 25:5 26:14 35:7:23 36:19 [BAL om.] 39:34 Nu. 46:8 [δερματίων υακινθίνων] 10-12 14:25 Ez. 16:10), are mentioned as the fourth or outermost covering of the tabernacle (next above the 'rams' skins dyed red'), and as outer wrappings for the ark and different vessels of the tabernacle during journeys. In Ezekiel's figurative description of Yahwe's adorning of Israel as a beautiful maiden, shoes of this material are included. As to the meaning of *tabas* there have been many opinions: five chief views may be indicated.

(1) The ancient versions with one consent understood a colour: G^{ra} Syr. Chald. Vg. render 'blue' or 'violet,' Ar. Samar. 'black' or 'dark.' This view, which has been strongly maintained by Bochart, rests, however, on no philological ground, and is refuted by the syntax of the Hebrew words.² Apart from the versions, all Hebrew tradition is in favour of the view that *tabas* is an animal.

(2) In the discussion on this animal in the Talmud (*Shabb. c. 2, fol. 28*) the opinion prevails that it is a species of *חֲזִיר* (prob. = 'ferret'), a description which would roughly suit the *badger*; and the claim of this animal has been supported (by Ges. and others) by comparison with late Lat. *Taxus* or *tavo* (Ital. *tasso*, Fr. *taisson*) and Germ. *Dachs*.³ The common badger, *Meles taxus*, found throughout Europe and Northern Asia, reaches its southernmost limits in Palestine, where it is common in the hilly and woody parts of the country. It is, however, improbable that the reference is to the skins of these animals. They would be difficult to procure either in Egypt or in the desert, and there is no evidence of their being used in those regions for such a purpose.⁴

¹ For the god Dusares (Δουσαρης, on Nah, inser. אֲדַסַרִּי; see ZDMG 14:465, 471), Baethg. *Reitr.* 92 ff., WRS, *Kins.* 292 ff., and We. *Heid.* 248 ff. The name means 'possessor (du) of אֲדַסַרִּי'. The latter is often taken to be equivalent to 'Sarah,' in which case Dusares is equivalent to Abraham—a hazardous theory.

² עֹרֵת חֲזִירִים is obviously gen. after חֲזִירִים—i.e., equivalent to עֹרֵת חֲזִירִים, in the phrase for 'rams' skins dyed red.'

³ Philological explanations involving roots common to the Aryan and Semitic languages are, however, notoriously precarious.

⁴ How little value attaches to the opinion of the Rabbis may be gathered from another view, strongly supported in the Talmud, that the *חֲזִיר* was a kind of unicorn which specially appeared to Moses for this purpose, and immediately afterwards disappeared (Bochart, i. 230).

BAITERUS

BAITERUS (ΒΑΙΤΗΡΟΣ [BA]), 1 Esd. 5:17 RV, AV METEERUS; see GIBBAR.

BAJITH, RV BAYITH (בַּיִת, 'the temple'; text of $\mathfrak{S}$ differs), is taken in 1 V of Is. 15:2 as the name of a place, the article being neglected (cp AIN, 2). It is perhaps more defensible to render the stichus containing the word thus: "They go up to the temple, Dibon (goes up) to the high places to weep" (so Ges, and formerly Che). The temple referred to might be the Bethlamoth of the inscription of Mesha (L 26; cp BAYOTH-BAM), בַּיִת and בֵּית, however, are so easily confounded (see, e.g., Is. 10:2 Kt.) that it is still better to read בַּתְּרֵן בֵּית, 'the daughter (= people) of Dibon is gone up,' with Duhm and Cheyne (SNOT).

BAKBAKKAR (בַּקְבָּקָר, form strange, probably corrupt; BAKAB [B], BAKB. [AL]; Pesh. has בַּקְבָּקָר, which in 77:812, etc., Heb. יִרְחֵם, Jeroham), a Levite in list of inhabitants of Jerusalem (see EZRA, ii, § 5 [A], § 15 [1] a), 1 Ch 9:15; not in Neh. 11:16, but perhaps transposed to 7:17 (where MT and $\mathfrak{S}$ read BAKBUKIAH [7:17], though $\mathfrak{S}$ omits, $\mathfrak{S}$ = βακβιας).

BAKBUK (בַּקְבֻק, § 38, 71, 'pitcher'; but see below), BAKBUK [AL]. The line Bakkuk, a family of Nethinim in the great post-exilic list (see EZRA, ii, § 50, Ezra 2:51 (βακβουκ [1]), BAKB. [B] = Neh. 7:51 (βακβουκ [B], βακβουκ [8]) = 1 Esd. 5:17 (ακωφ [B], ακοιμ¹ [A]; 1 V, AAV). The name can hardly be Hebrew. It may be corrupted from Assyr. Habbakuka, a plant name (see HABBAKUK).

BAKBUKIAH (בַּקְבֻקִּיָּה, § 38, 'pitcher of Yahuwē') for else = bakkuk, $\mathfrak{S}$ being probably a simple affirmative (Hastrow, *IBL* 13:127). cp BAKBUK: BAKBAKIAH [N = om. sup. 1], BAKB. [B] = Neh. 7:51 (βακβουκ [B], βακβουκ [8]) = 1 Esd. 5:17 (ακωφ [B], ακοιμ¹ [A]; 1 V, AAV). The name can hardly be Hebrew. It may be corrupted from Assyr. Habbakuka, a plant name (see HABBAKUK).

BAKEMEATS. In his dream Pharaoh's chief baker carried on his head 'three baskets of white bread' (1. Baking, modern scholars; AV 'three white baskets'), in the uppermost of which were 'all manner of bakemeats for Pharaoh,' literally, as we read in the margin of AV, 'meat [food] of Pharaoh, the work of a baker' (40:17). The best commentary on these verses is the representation of the royal bakery on the tomb of Ramses III. at Thebes, which has been reproduced by Wilkinson (*Enc. Eg.*, 1878, 1:179), and more recently by Erman (*Enc. Eg.*, 1911). The process of making the ordinary household supply is described under BREAD; here it is proposed to bring together the scattered notices in Scripture regarding other products of the baker's skill. In this connection, it is interesting to note the remarkable variety of shapes assumed by the bread and pastry in the representation referred to. Additional varieties are collected by Erman from other sources and represented on the same page. If we turn the Hebrew court bakers (1 S. 8:13) were able to imitate those of Egypt we do not know.

There is certainly no lack of names for different species of bakemeats in the OT; but it is now impossible to identify them (cp BREAD). Thus we can only conjecture, although with a fair amount of certainty, that the cake named *kikkar* (קִיקָר, AV 1 Cp ARKUN, 2. It is possible, however, that BA omit the name (L has βακβουκ), since ακωφ, etc. may be a duplicate of HAKUBIA (7:17).

BAKEMEATS

'morsel,' RV 'loaf'), 1 S. 2:36, must have been round, like a Scottish 'bannock'; which, from the context, must hold good also of the barley-cake (סֻסֵּי) of Tiele's dream (Judg 7:17). The *nikkadim* (נִקְקָדִים, possibly from נָקַד, to prick) may have been thin cakes pricked over like a modern biscuit or dotted over with the seed of some condiment (see 'dew'). They were part of the present which the wife of Jeroboam I took to the prophet Ahijah (1 K 14:1), and are rendered by 1 V cracknels, for which the American revisers prefer to read 'cakes'. Still, judging from etymology, we may consider the *halia* (חָלִיָּה, the cake which so frequently occurs in the sacrificial ritual, as having been perforated (חָלַה, to pierce) like a modern Passover cake. It was made of the finest flour (חֲלִיָּה). Mention is made of another kind of sacrificial cakes, apparently of foreign origin, which the women of Jerusalem kneaded and baked in connection with the idolatrous worship of the 'QUEEN OF HEAVEN' (1 K 14:1), Jer. 7:18 41:19. $\mathfrak{S}$ merely transliterates the Heb. word (חֲלִיָּה, χαλῖνας [BA 14]; χαλῖνας [N], χαλῖνας [Q] in Jer. 41:19), and the exegetical tradition varies. That these *halia* were some kind of bakemeats is clear from the kneading of the dough in their preparation (7:18). It is generally thought that they may have resembled the *selamti* (σέλμτι), cakes shaped like the full moon, which were offered in Athens to Artemis, the moon-goddess, at the time of full moon (see especially Kue's essay 'De meliceth des hemels,' translated in Bu's edition of his *Gesammelte Abh.* 208, and the comm. of Gail and of Giesebrecht in loc.). A similar custom is said to have prevailed in the worship of the Arabian goddess Al-'Uzza (We. *Ar. Heil.* 38 f., 2nd ed. 41 f.).

With regard to what may be called the pastry of the Hebrews, all that can be said with any degree of certainty is that a more delicate relish was imparted to **3. Pastry**, the preparation of certain kinds of bakemeats in three ways. (1) The dough was baked in olive oil. Thus the taste of the manna is said in one passage (Nu. 11:9 JE) to be like the taste of 'cakes baked with oil' (RV¹⁰⁸, בִּרְצֵף, בִּרְצֵף), generally understood of some dainty cooked in oil (but 1 V 'like the taste of fresh oil'). (2) The dough was prepared by being mixed with oil and then bread. This mode of preparation was extensively used in the ritual of P; see, for example, Lev. 24:5, where a distinction is made between cakes 'mingled (מִצֵּה) — see מִצֵּה in BDB 1:11) with oil' and cakes merely 'anointed (מִצֵּה) with oil.' (3) In the passage parallel to that quoted above (1), viz., Ex. 16:31 [1], the taste of the manna is likened to 'wafers (מִצֵּה, for which see BREAD) made with honey.' From this passage, from the prohibition of honey in the ritual (Lev. 23:1), and from the post-biblical use of the verbal stem מִצֵּה (MIS), we learn that honey (*defat*) — no doubt both the product of the bee and the artificial grape-syrup (the modern *mis*; see HONEY) — was used in the preparation of certain kinds of bakemeats. $\mathfrak{S}$ BAK in both the passages discussed (Nu. 11:8 Ex. 16:31) renders by ἐγκρίσι, which, according to Atheniens (in Di. on Ex. 16:31) denoted 'a bakemeat made with oil and honey.' Saadia's word here is *kafif* (*pastill dulciant*), a species of confection still made in Syria. Landberg (*Proverbes et Dictons*, 125) defines it as 'a flaky paste (*pitte verte feuilletée*) made with walnut and sugar and, in spring, with cream'. Some sort of dainty confection is evidently intended by the obscure *libibeth* (לִּיבֵיֶת, 2 S. 13:68 107; EV 'cakes') which Tamar baked for Amnon.³ If the etymology

¹ For Josh. 9:5, the only other passage where נִקְקָדִים occurs (EV 'mouldy'), see Di. in loc.

² The curious in these matters are referred to Landberg's book for a detailed list of modern Arab confections, 125 126; cp Wetz. *ZDMG* 11:517.

³ On the reading in 7:9 see COOKING UTENSILS, § 5 (i.).

BALAAM

from 22° (heart) were more secure, we might conclude that the tit bit in question was heart-shaped.

In Ex. 27.17 we find among the trade products of Tyre a substance called *ḥammān* (27:1) which, according to the Targum, was a 'kind of conf. non'; so *Ḥammān*. The meaning is quite uncertain, and probably the text is corrupt (Cf. would not 22:1, wān; so *Ḥammān*). For the frequently mentioned *ḥammān* or grape-cake, see *Levrit*, § 5; and for the use of condiments in cooking, see *Food and Sweets*, A. R. S. K.

BAKING. See BREAD, § 2; OVEN.

BAKING PAN (תבנית), Lev. 25 7. See COOKING UTENSILS, § 7.

BALAAM (בִּלְעָם), etymology uncertain; Winckler's Bel-'am [G/122] seems improbable, perhaps Elu-him-

1. Two accounts. *name* (Am. Talm.) and see *HEBAST*, *RELA*, *NICOLAUS*; *ΒΑΛΑΑΜ* [*BAL*]; *Joseph* (*ΒΑΛΑΜΟΣ*), b. *Beor*; a soothsayer or prophet whom *BALAK*, king of Moab, made anxious by Israel's victory over the Amorites, summon¹ to curse his enemies. Instead of doing so, *Balaam* bore himself as the prophetic mouthpiece of Yahwē, whom he acknowledged as his God (Nu 22:1), and by the spirit of Elohim (21:1) foretold the future glory of Israel. No wonder that a prophet of Judah, writing probably in the dark and idolatrous days of Manasseh, recalled the history of *Balaam*, when he would remind his ungrateful countrymen of Yahwē's "beneficent deeds" (Mic 6:5). *Balaam's* character has long been regarded as an enigma, and from Bishop Butler's time onwards many subtle solutions have been offered. The enigma, however, is mainly produced by the combination of two traditions, belonging to different periods, and it is the duty of the critic to distinguish, as far as possible, the two traditions which, though one in spirit, present a palpable difference in details.

According to J. Balak, king of Moab, dismayed by the number of his new and unwelcome neighbors, called Balaam from the land of the *lûnē Ammon*² to curse Israel. Balaam protested that he could not, for all the royal treasure, go beyond Yahwē's word,³ but he saddled his ass and set out.⁴ On the road, the angel of Yahwe, invisible to Balaam, but visible to the beast he rode, stopped his way with a drawn sword. Yahwe endowed the ass with speech, and at last opened the prophet's eyes to the apparition, and, had it not been for the fear which held the animal back, Balaam would have paid for his rashness with his life. Still, he received permission to go, and was only warned to report Yahwē's oracle faithfully.

The Lohist has no occasion for these marvels. In his account, Balaam, who is an Aramean of *Pittok* (7.23) on the Euphrates (or perhaps rather a N. Arabian of Rehoboth by the river of Musri), did not yield to Balak's repeated solicitations till God (Elohim) appeared in a dream and told him to go with the Moabite ambassadors.

From this point it is not possible to separate the E and J documents with full confidence. In what follows we have four great prophecies concerning Israel's future, besides three short oracles on the destruction of the Amalekites, the Kenites, and the Assyrians. Probably the first two of the four great prophecies come to us in their present form from the hand of the Elohist.⁴

¹ The word 'confection' here used in the RVmg. refers everywhere else in EV to perfumes or spices (Ex. 30.35, RV 'perfume'; 1 Ch. 9.30, AV 'ointment, RV 'confection'; Eccles. 38.8); cp the 'confectionaries' or perfume-compounders of 1 S. 8.13.

² 2256; read 722 for 222 with Di. after Sam. Pesh. Vg., and some Heb. MSS. For a third view, however, see *Perrine*.

³ Nu. 22 (9-21) belongs to E. The reason why Balaam went is not told in the extant portions of J.

⁴ The English version of the passage — and, however, has — made some reference to Moab, and must, therefore, have contained more than is now given in chap. 23.

while the last two are derived from the narrative of the Yabwist.

Balaam prepares for his work rather than the freedom of a sorcerer than in accordance with the spiritual law as

2. Oracles
1 and 2 [E]

altars, seven oxen, seven rams, (cp. BERSHEVAH), 'Barnoth Ioni, the scene of the sacrifices was no ordinary high place,' but (probably) one of those high hills where huge dolmens still suggest pre-natal communion with God, and, as we learn, it commanded a view of at least 'the utmost part' of the Israelish encampment. This was important, for a curse must be uttered in sight of those upon whom it is to fall (cp. 23:14). When Balaam returns to Balak and his princes after meeting God, he can but break forth into jubilant praise of Israel, 'thou art inviolable. The people has a destiny of its own which parts it from the surrounding nations. The Israele hosts N. of Arnon are the token of a nightmar multitude unborn. All individual life loses itself in the sense of Israel's greatness. Happy is he who dies in Ishurim, and, dying, knows that his people is immortal.'¹ In vain Balak changes the scene's place of outlook. As Balaam beholds all Israel from the top of Pisgah,² he receives a divine oracle which confirms and transcends the former blessing: 'God, says Balaam, is not a man: he does not change his mind. Nor can trouble touch Israel, for Yahweh himself reigns in their midst; and the people fit we may trust (the reader's) greet this divine king with exultant shout. With the strength of a wild-ox, they fling their foes to the ground. No magic arts avail in Israel's case; even now all has been decided, and one can but cry 'What has God done!' Take a lion, Israel rises up to devour the prey.

Again sacrificial rites are performed, and again Balaam has to disavow the king (see *Psalm*). The third *3. Creation* prophecy (1), together with some striking

3. Oracles

3 and 4 [J]

on the numbers and prowess of Israel, but adds a touch of parody to its well-watered and trustful land, and surprises us by a delicate mention of the kindly power, as distinct from the reign of Yahweh. The king of Israel is more described as raised even above Achez, 6:31. Still more definite is the fourth prophecy (7:1-6). The scar is boldly put in spirit the rise of David, and charts the victories which are to crush Moab and subdue Edom.

The basis of the story of Balaram is evidently a patriotic legend, which, as we now have it, presupposes a

4. Origin
of story.

(Nu 22:14; cp 2 Pt. 2:6), has a lugly primitive flavour.⁵ Still, this story, though we deal with someone with a psychological skill into the surrounding narrative, is a a decoration derived from folklore, and the narrative as a whole is designed to accentuate the selflessness of the jealous and rebellious feelings in the Ammonite and Edomite neighbours of Israel. Ammon, and Edom

¹ It is Balak, not Balaam, who sacrifices; 'Balak and Balaam' in Nu. 23.2 should evidently be omitted (as in BHS).

² This is certainly E's meaning in Nu. 23:15a. The second part of v. 13, which limits Balaam's range of vision to 'the utmost part of the people', must be due to a redactor. Its object is to harmonise v. 13a [E] with 24:2(f), which tells us that Balaam is *now* taking his first complete view of the people of Israel. In reality, however, v. 13b destroys the progress which E intended from 2:41 to 23:13. Since a limited view of Israel had not resulted in the utterance of a curse, Balak decided it necessary to try the effect of the wider outlook from Pisgah.

³ Cheyne, however, reads מִן־הַכֶּלֶב , 'and the glory of the king is among them.'

⁴ It is doubtful, however, whether Nu. 2322-23 is not a Vah-wastic fragment (see Baron, *Tripitaka Tradition*, 228, and ep Di's note). According to Cheyne, 2322 occurs both in 70, 21 d and

⁵ Cf. the Babylonian beast-stories, the speaking horse in *Hom. II. 19.404*, and the speaking serpent in *Genesis*.

BALAAM

were older as nations, but Israel alone had secured permanent foothold W. of Jordan and for a time reduced the oldest nationalities to vassalage. The story of Balaam points out that Yahweh had ordained those privileges of Israel long before. The Moabitish king and the Ammonitish, Aradiah¹ or Ammonian sooth-sayer had sworn to turn aside the irreversible decree, and Yahweh had turned the very means they took into the instrument by which he announced the triumphs and the unique destiny of his people.

It is much harder to fix the date and origin of the poems. We can scarcely attribute them without reserve to J and E, for the points of contact between the prophecies (especially 23:23 and 24:3) suggest that an ancient poem has been expanded and changed in diverse ways. The kernel of the poem may go back to the early days of the kingdom, even it may be to those of Solomon. The national fortune is painted in glowing colours, and the historical references stop short at David, who was the only king to conquer both Moab and Edom. On the other hand, the clear sense of Israel's separateness from the nations (23:23) had not arisen, so far as is known, before the time of the literary prophets, and the phraseology does not permit us to place the poems, as we now have them, earlier.

The appendix (24:23-24), at any rate, is generally admitted to be comparatively modern (note the exagg. generation respecting the Amalekites). The structure shows that the oracles are from one hand (cp 24:28, end, with v. 24, end). The writer was quite familiar with the Assyrian power, and speaks of the deportation of the Kenites by the Assyrians. He speaks of the Kenites, rather than more famous peoples, because he considers them to be like the Amalekites, cp 1 S. 15:6 within Balaam's horizon. He also (if the text of 24:24 be correct) predicts that Assyria in its turn will be destroyed by ships from CHITIM (24:24). Was he thinking of the Persian empire (Assyria-Persia, *Frattini*), and its overthrow by Alexander the Great (cp 1 Mac. 1:1)? The theory has been widely accepted, and much controversy as to the limits of prophecy has grown out of it. It seems bolder than the evidence as a whole warrants (see Dr. 1), and it has lately been pointed out that 'they shall afflict' (22:1, 24) is a misreading which has arisen out of the loss of an ethnic name in v. 24. Analogy requires that the last of the three little oracles in 22:22-24 should begin thus:

6. The appendix.

And he saw . . . and began his oracle, and said, Alas who will live (survive) of . . . And the discoveries of the Tell of Zenjirli enable us to restore the missing name, which was, not 'Samuel' (שמואל), as many MSS and some editions), but 'Sham'al.' Then in v. 24 we may continue:

And there shall be ships from the direction of Cyprus, And Assyria shall afflict him (22), and Eber shall afflict him, And he too (shall come) to destruction.²

The kingdom of Sham'al in NW. Syria was not so very far from Balaam's native place Pethor. (The poet, at any rate, placed Pethor in Aram.) That it was destroyed by Assyrians and peoples from the other side of the Euphrates (= Eber), and plundered by shipmen from Cyprus, was probably within the recollection of the author, who is, therefore, not to be regarded as post-

¹ See above, § 1, second paragraph. Cp Gen. 36:32, and see FELA (2), MIZRAIM.

² The importance of this correction will appear if we compare the alternative explanation of Hommel (*UW* 245/1), which produces the following most unnatural and unworthy distich:

'Jackals (שׁוֹר) shall come from the north

And wild cats (שׁוֹר) from the coast of Kittim.'

where 'jackals' and 'wild cats' are figurative expressions for wild invaders, and Kittim is, Hommel says, 'the familiar term for the Hittites (var. chittim).' See ASSURUM, ENKUR.

BALANCE

exile. Assyria may have been no longer at the height of its prosperity, but was still a towering power.

We have passing notices of Balaam in Josh 24:16 (13) and in Dt 23:4 f., cp Neh 13:1 f., see AMMON (11 S. § 3).

7. Allusions to Balaam. In Dt 23:4 f., as in 1, he is an Aramaean from Mesopotamia, hired to curse Israel, but Yahweh turned his curse into a blessing.

The Priestly Writer represents Balaam in a much more unfavourable light, Nu 31:16-25 Josh 13:22 (cp Nu 25:1-18). He is a sorcerer, at whose instigation the Midianite women seduced the Israelites into sensual idolatry, and he died in the battle between the Israelites and the Midianites. Jos. (*Int*) is also dwell at great length on the corrupting advice of Balaam, given in the first instance (cp Rev. 2:14) to Balak, and in Rabbinical literature Balaam is the type of false teachers (*1. Hek. 5:10*; cp Rev 1:1) and sorcerers. Cp also 2 Pet 2:15 Jude 11. For Arabic parallels to the efficacy of Balaam's oracles, see Goldziher, *Abhandl. zur arab. Philologie*, 26 ff.

³ Cp Phoen. בַּעֲלֵמֶס, 'B. hath weighed out.'

⁴ Cp the deprecation of unfair weights (שָׁקָל, lit. 'stones') in Lev. 19:35 Prov. 11:1 Mic. 6:11.

BALASAMUS

cross beams turning upon a pin. An arm on either side ended in a hook to which the article to be weighed was attached in loops (cp Wlk. *Im. Ag.* 2246, fig. 115, 3d, see BAL). Small ones of a particularly ingenious nature, as well as hand-scales, are found (Wlk. 1, 3, fig. 95). Above the pole is sometimes placed the figure of a baboon representing both the regulator of measures. The steelyard (in Egypt) does not seem to have been known until the Roman period.

BALASAMUS (ΒΑΛΑΣΑΜΟΣ [BAL]), 1 Esd 10:1, Neh. 8:1. **MASTIC**, 15.

BALD LOCUST (צָדִיד ATTAKHI [HAFL.]) The *afani* is apparently a species of edible locust or a locust in a particular stage of growth. See further LOCUST, 2.

BALDNESS. See CHITTEN, § 1, HAIR.

BALM (בַּיִשׁ or בַּיִשׁ; PHTNH [pit. AFI] PITHNH [1] once) cp Ezek. 27:17. **MASTIC**, 15. **AG. resin**

1. OT Sori. Gen. 37:25, 13:11, for 8:22, 10:11, 51:8, Ezek. 27:17, a valuable product of Palestine, the identification of which has given much trouble. The rendering, 'balm,' is an unfortunate inheritance from Coverdale's Bible (see *New Eng. Dict.* s.v.). Our best look first at the Hebrew name בַּיִשׁ (*sori*). The Arabic *darra* or *dirra* is identical with it, and since the word means to 'drip' or 'bleed,' the product referred to must be *resinous*, but it need not be *aromatic*. From the OT notices we learn that *sori* (EV 'balm') was found abundantly in Gilead, that it was in early times exported thence to Egypt (Gen. 37:25), was sufficiently prized to form an appropriate gift to a lord of that country (Jer. 41:19), was applied as a remedy for violent pain (Jer. 8:1, 2), and was among the chief products of Palestine that were brought into the Syrian market (Ez. 27:17).

Next, we must point out that the modern commercial name 'balm of Gilead' has, like the botanical specific name *vitelladenia*, no foundation but the hypothesis that the substance so designated is the OT 'sori of Gilead'; and that from the earliest times resins and turpentine have been used in medicine, as stimulants and as antiseptics for wounds, and as counter-irritants for pain. The *sori* (EV 'balm') of Jer. 8:22, 46:11 is clearly a local product in Gilead; its association with *myrr* (EV 'myrrh') in Gen. 37:25, 13:11 proves that it was a valuable article of commerce.

It has been shown elsewhere (BALSAM) that the so-called 'balsam of Mecca,' produced by the *Balsamodendron Opobalsamum*, is most probably not the 'sori of Gilead' but the Hebrew *mor*, which EV mistakenly renders 'myrrh' (see BALSAM, MYRRH). *Sori* (EV 'balm'), then, must be something else.

(1) Arabic usage is in favour of the rendering of RV: Gen. 37:25 etc., **MASTIC**—i.e., the resin yielded by the mastic tree, *Pistacia Lentiscus*.

This tree is a native of the Mediterranean shores, and is found in Portugal, Morocco, and the Canaries (Flückiger and Hanbury's *Pharmacog.*, 1914). According to Tristram (*NHB* 162), it is extremely common in all the Mediterranean countries, especially on the African coasts and in the Greek islands, where it overruns a whole district for many miles. Tristram states, also, that it is indigenous in all parts of Palestine, though, according to Post (Hastings, *BD* 2:162), it is not now to be found E. of the Jordan. The mastic of commerce is mainly derived from the Isle of Sicily. Down to the seventeenth century mastic was an ingredient of many medicines. Unlike most resins, it readily softens with moderate heat, even that of the mouth.

As the Arabic word *darra* (or *dirra*) is used mainly of this tree and its products, we are not rash in concluding that a substance of this kind is intended in the biblical passages, though it seems unnecessary to limit בַּיִשׁ *sori* to the resin of *P. Lentiscus*; it may include the resins of the *terebinth* (*P. terebinthus*) and *Stipho pine* (*Pinus halepensis*; see AST). The former yields 'Chian

¹ The Syriac *partor* must be a loan-word from Arabic (Eg. *Mith.* 1234).

BALSAM

turpentine,' which has recently been brought into notice as an alleged remedy for cancer. According to Tristram (*op. cit.* 400), the terebinth is not now tapped for turpentine in Palestine, where the inhabitants seem to be ignorant of its commercial value. There is abundant evidence of the medicinal use of these resins in antiquity (see Movers, *Phon.* III. iii. 1223).

(2) *Pistacia agelaea*, called *zakkum* by the Arabs (Tristram, *op. cit.* 65), yields an oil prepared by the Arabs of Jericho and sold in large quantities to the pilgrims as 'balm of Gilead'. This, however, was the *masaka* of Greek writers, and clearly, therefore, distinguished by them from *Balsamum* or *myrrh*. It is merely a modern substitute.

(3) Lastly must be mentioned Lagarde's view that *σπιθαμή* (*sori*) is *styracis*. There is great probability in this identification of the words, for *styr* is employed in several instances to designate *styracis* (*styr*); but evidence is wanting to connect *styr* with the substance *styracis*, which seems to have been called *styracis* (*styracis*). See further STYRACIS.

W. L. G. - N. M.

BALSAM (ΒΑΣΑΜ), 1 Esd 10:1, Neh. 8:1.

1. OT Sori. Gen. 37:25, 13:11, for 8:22, 10:11, 51:8, Ezek. 27:17, a valuable product of Palestine, the identification of which has given much trouble. The rendering, 'balm,' is an unfortunate inheritance from Coverdale's Bible (see *New Eng. Dict.* s.v.). Our best look first at the Hebrew name בַּיִשׁ (*sori*). The Arabic *darra* or *dirra* is identical with it, and since the word means to 'drip' or 'bleed,' the product referred to must be *resinous*, but it need not be *aromatic*. From the OT notices we learn that *sori* (EV 'balm') was found abundantly in Gilead, that it was in early times exported thence to Egypt (Gen. 37:25), was sufficiently prized to form an appropriate gift to a lord of that country (Jer. 41:19), was applied as a remedy for violent pain (Jer. 8:1, 2), and was among the chief products of Palestine that were brought into the Syrian market (Ez. 27:17).

Next, we must point out that the modern commercial name 'balm of Gilead' has, like the botanical specific name *vitelladenia*, no foundation but the hypothesis that the substance so designated is the OT 'sori of Gilead'; and that from the earliest times resins and turpentine have been used in medicine, as stimulants and as antiseptics for wounds, and as counter-irritants for pain. ¹ Curiously enough, Ar. *basima* has the contrary sense of 'leathering' (see Lag. *Leb.* 143); but *basim* denotes the balsam tree.

² Heb. does not possess the verb.

³ See STYRACIS. *styracis* is the word used in 1 K. 19:10, 23 (Queen of Sheba's visit to Solomon).

BALSAM

to Judea. 'In former times it was cultivated only in two or three gardens, both of them royal; one of them was no more than twenty years in extent, and the other less. The emperor Vespasian and Titus had this shrub exhibited at Rome; . . . it bears a much stronger resemblance to the vine than to the stem; here Phry seems to borrow from Tragus resemblance to that of [vine] and it is an evergreen. . . . At the present day it is cultivated by the local authorities, and the plants were never known to be more numerous. They never exceed a couple of palms in height.

Josephus makes several references to the balsam. He says (Ant. viii, 16) that the first roots of balsam (*ἀρωματίζον*) were brought to Palestine by the queen of Sheba. In 70 A.D. he gives an idea of the site of Pompey's camp (at Jericho), he says it is where that balsam (*ἀρωματίζον*) which is of all magnets (*μαγνῆται*) the chief grows, and describes how the juice (*σύν*) is obtained (Ant. xiv, 44). Again, when speaking of the district around Jericho assigned to Cleopatra, he speaks of the preciousness of this plant, which grows there alone (Ant. vi, 42). Lastly, in a second reference to Pompey, he says that the region of Jericho bears the balsam tree (*ἀρωματίζον*), whose stems (*σύν*) were cut with sharp stones, upon which the juice 'drops down like tears' (Ant. i, 46).

Tragus, an author of the time of Augustus, is reproduced by Justin (96 d). He describes the closely shut in valley in which grows the balsam (*ἀρωματίζον*); the name of the place is Jericho (Hierichus). 'In that valley is a wood, notable alike for its fertility and its pleasantness, being adorned with a palm grove and opobalsamum. The opobalsamum trees have a form like pine trees (*πυρρα*), except that they are less tall (*ὀρθίζοντες*), and are cultivated after the manner of vineyards. These at a certain time of the year sweat balsam.'

It is remarkable that the Greek and the Roman writers dwell so constantly on the preciousness of the balsam tree of Jericho. Some of them, at any rate

3. Balsam in Arabia.

(e.g., Strabo, Pausanias, Diodorus), were not unaware that the plant grew on the coasts of Arabia; and Josephus, in his legendary style, actually attributes to importation from Arabia its presence in Palestine (Ant. viii, 65). No doubt this is substantially correct. Prosper Alpinus (*De Balstima*, 1502) and Veslingius (*Opobalsami Triductus*, 1613) long ago investigated the subject. In the time of the former, balsam plants were brought to Cairo from Arabia; Alpinus himself (*op. cit.* 94) apparently possessed a living specimen. The Arabic writer 'Abdallatif (d. 1231) also speaks of the balsam tree as in Egypt in 'Um Shems ('Fountain of the Sun'). i.e., in the gardens of Mataniya, close to Helipolis. 'It was about a cubit high, and had two barks: the outer red and fine, the inner green and thick. When the latter was macerated in the mouth, it left an only taste, and an aromatic odour. Incisions were made in the barks, and the amount of balsam oil obtained formed a tenth part of all the liquid collected.' The first balsam tree cultivated in Egypt died in 1615; but two were alive in 1612. This was the only place in Egypt where the balsam tree would grow. We can well understand, therefore, that the neighbourhood of Jericho was the only habitat of the tree in Palestine.

It would, however, be unreasonable to suppose that the needs of the luxurious class in Palestine in pre-

4 Probably OT *môr* EV myrrh.

Roman times were altogether supplied from Jericho. The precious magnet derived from the balsam tree, not less than the costly frankincense, was doubtless always one of the chief articles brought by Arabian caravans. The tree that produces the so-called 'balsam of Mecca' is the *Balsamodendron Opobalsamum*. This tree, as Schweinfurth reports,¹ averages above 15 ft. in height, possesses a yellow papery exfoliating bark, and produces thin, grayish black twigs, from the ends of which a small quantity of balsam exudes. 'It is widely distributed over the coast territory of Arabia the adjacent islands, and S. Nubia'; but 'the balsam is collected only in the valleys near Mecca.' It is thus described by Dymock (*Pharmacopoeia Ind.* 1, 17): 'Balsam of Mecca, when freshly imported into Bombay, is a greenish turbid

Journal, April 1894, p. 297.

BAN

fluid of syrupy consistence, having a very grateful odour, something like oil of rosemary.' Jewish tradition seems to have held that Mecca balsam is what the OT writers call *gôr*—whence the rendering 'balm' of AV and RV (text); but the tradition was unpaginated long ago by Bockart (*Hebr.* i, 281), and does not agree with the use of the Arabic cognate word *darâ* mastic; see BALM, 1). Schweinfurth holds that the OT name for Mecca balsam was not *gôr* (EV balm, perhaps really mastic; see BALM, 1), nor *basem* (see above, § 1), but *môr* (see MYRRH). Certainly *môr* was like Mecca balsam strongly aromatic and also a *liquid* substance (Ex. 30:24 Cant. 2:13), whilst the OT references do not necessarily imply that *gôr* was aromatic. It is not unlikely that both *basem* (§ 1) and *môr* mean Mecca balsam. (Cp. *Kere Balaṭṭar* for Mar. Apr. 1896, p. 80c.) See MYRRH. S. M. W. L. I. D. I. K. C.

BALSAM TREES (בָּלְשָׁם; RV⁹⁸ 2 S. 5:24 1 Ch. 1:14 Ps. 84:6). See MYRRH.

BALTHASAR, RV Balthasar (ΒΑΛΤΑΨΑΡ [BAQT]). Bar. 1:1 f. See BALTHAZAR.

BAMAH (בָּמָה; Ez. 20:29). See HIGH PLACES, § 5.

BAMOTH (בְּמֹת; βαμωθ [BAUT], a station of the Israelites between NAHALEH (נָחַל) and 'the glen' (עֵין) which is in the field [placem] of Moab, [by] the summit of [the] Pisgah, etc.' (Nu. 21:9). Ens. (188 191 22) describes it as 'on the Arnon' (like Nahaliet), which must be wrong. See BAMOTH BAAL.

BAMOTH BAAL (בְּמֹת בָּעַל; i.e., 'the high places of Baal') lay in the Moabite territory (see Nu. 22:41, RV; εἰς τὴν τοῦ ΒΑΛΛ [BAUT], to the north of the Arnon, and was assigned to Reuben (Josh. 13:17; ΒΑΜΩΝ ΒΑΛΛ [B], ΒΑΜΩΘ Β [M]). The order of enumeration in Nu. 21:16 f., where it is called simply BAYOTH, leads to the supposition (so D.) that it must have lain somewhere on or near the Jebel 'Atarus, on the south side of the Wady Zerka Ma'in (cp. Is. 15:2 'the high places'). Conder (*Heb. and Moab.* 144) and G. A. Smith (*HB* 502), however, find the Bamoth in the dolmens immediately north of el-Masluayeh, near the Wady Jiddid. The Beth Bamoth of the Moabite stone is perhaps the same place (cp. BAYOTH); but this whole region is thickly strewn with the remains of ancient altars and other religious monuments (Conder, *op. cit.* 140 ff.). The name Bamoth-baal is suggested also by Nu. 21:28, where the בָּמֹת בָּעַל (EV 'high places of the high places of Arnon')—but see G—are mentioned in parallelism with Ar of Moab. G. A. S.

BAN, RV⁹⁸ BANAN (BAN [A], BAENAN [B]). 1 Esd. 5:37 = Ezra 2:69, TORJAM, 2

BAN (בָּן), to BAN (בָּרַן).

renders by ἀνάθω, ἀνάθω, ἀναθωσάμενος, and in a few instances ἀνάθω and other words denoting destruction; ἀναθωσάμενος and more rarely ἀναθωσάμενος, once, 1 Esd. 9:4, ἀνεπαρ, ἐξολοθίσαι, and in a few instances other verbs denoting 'kill' in 'de-roy'. Vg. has *anathema*, *consecratio*, et. i. *exco.* *consecr.* *consecr.*, etc. AV translates *curse*, *utterly destroy*, *accursed thing*, etc.; RV, *devote*, *utterly destroy*, *accursed thing*.

The root *BAW* in Hebrew denotes devoting anything to Yahweh by destroying it; *hārem* is any person or thing thus devoted. The root is found in a similar sense in all the Semitic languages, of sacred things which men are partly or wholly forbidden to use. It is especially common in Arabic; e.g., the sacred territory of Mecca and Medina is *haram*, and the *haram* (harem) is ground forbidden to all men other than the master and his eunuchs. It may be noted that the exclusive use of the root in the strong sense of devoting by destroying is characteristic of Hebrew (and of the dialect spoken by the Moabites; see §§ 3 f.), and that in other languages *hārem* bears a meaning more nearly approaching *ḥārem* (ḥārem), קָדֵשׁ (consecrated).

(a) idols are *herem* in themselves. In Dt. 7:25 the Israelites are ordered to burn all heathen idols and not to bring them into their houses. The idols

2. Law of Herem.

are *herem*, and make those who keep them *herem*. (b) Public *herem*. The Israelites or their rulers are ordered to treat as *herem* in certain circumstances, guilty citizens or obvious enemies. In Ex. 22:19-20 [Book of the Covenant, 1:] any one sacrificing to any deity other than Yahweh is to be made *herem*. So in substance Dt. 18:9-11, though the term *herem* does not occur till 2:16. In Dt. 13:12-14 [12:] any idolatrous Israelite city is to be made *herem*; all living things are to be killed and all its spoil is to be burnt. So far, in (a) as in (b), the *herem* is something abominable in itself and distasteful to God. Its destruction is a religious duty, and an acceptable service to Yahweh. Similarly, in Dt. 20:16-17 all Canaanite cities are to be made *herem*, that they may not seduce Israel to idolatry. In Dt. 20:13-14, if any distant city refuses to surrender when summoned, all the males are to be slain, and all other persons and things may be taken as spoil. The term '*herem*' is not used in that paragraph, and is perhaps not applicable to it. (c) We gather from certain passages that individuals might devote some possession to destruction as a kind of service to Yahweh, and that also is called *herem* (see Vow). In a section of P concerning vows, Lev. 27, two verses (23 f.) deal with this individual *herem*. Other vows may be redeemed; but individual (like public) *herem* must be destroyed; it may not be sold or redeemed; it is most holy (*kadosh kodashim*) unto Yahweh. Among the objects which an individual may make *herem*, men are specially mentioned; they must be put to death. It is startling to find such a provision in one of the latest strata of the Pentateuch. Possibly only criminals could be made *herem*; or the text may be fragmentary. Cp Dillmann and Kalisch on Lev. 27:28-29.

In Josh. 6:24 we have a provision that metal *herem* (obviously because indestructible) is to be put into the treasury of the sanctuary. By an extension of this principle, Nu. 18:14 (P) and Ez. 11:20 ordain that *herem* shall be the property of the priests.

Herem is met with in Hebrew literature in all periods. The sweeping statements that all Canaanite cities E.

3. Practice.

and W. of the Jordan were made *herem* are late generalisations; but Nu. 21:2 (DE) and Judg. 1:7 (J), though otherwise discrepant, agree that the city on whose site Hormah was built was made *herem*. Other instances of *herem* are Jahesh-gilead (Judg. 21:6 f.), Jericho (rebuilt, forbidden under supernatural penalty, Josh. 6:26 f.), the Amalekites (1 S. 15), and the children of Ham at Gedor (1 Ch. 4:41). Similar cases in regard to which, however, the term *herem* is not used, are Gibeon and Benjamin (Judg. 20) and Saul's attempt to execute Jonathan (1 S. 14:24-26). On the Moabite stone (L. 16 f.) Mesha' says that he made the whole Israelite populace of Nebo *herem* to Ahterahemosh. The prophets speak of Israel or Yahweh making *herem* of enemies (Is. 31:2 etc.) or of enemies' property (Mic. 4:13), or, conversely, of the heathen (Jer. 25:9), or Yahweh (Is. 13:3), making *herem* of Israel. In the later literature the root *herem* often only means exterminate (2 Ch. 20:23). The old meaning, however, was not quite forgotten, and in Ezra 10:8, if any Jew failed to obey Ezra's summons to Jerusalem, his property was to be made *herem* and he himself excommunicated. In post-biblical Hebrew *herem* came to mean excommunication as well as property set apart for the priests and the temple (Levy and Brown's Dictionary, s.v.; S. Mandl, *Der Rann*, 1908, pp. 24-51). See, further, EXCOMMUNICATIO.

The character of *herem*, the diffusion of the root in a similar sense throughout Semitic languages, and its use in the Hebrew sense by the Moabites, show that it was an ancient Semitic institution belonging to Israel in common with its kinsmen. Stade (*Hebr.* I. 490) holds

that a Semitic people besieging a city vowed to make it

4. Origin and parallels.

herem to their god in order to secure his aid. Moreover, the idea of *herem* as the use of the root in allied languages shows, was kindred to that of sanctity and uncleanness. Take these, it was contagious (Lev. 11:38, §§ 2, 14); the possessor of *herem* became *herem* (Dt. 7:6 Josh. 6:17, Acham). Old legislation, as we have seen, converts the bribe to a vend. deity into a legitimate penalty. The various degrees of severity are not important in relation to the principle.

Herem has something in common with taboos, especially in its fatal effect on its possessor, e.g., in New Zealand tabooed food is fatal to any one who eats it (Frazer, *Golden Bough*, vol. ii, 'Taboos'), but it is not so closely allied to taboos as the idea of uncleanness (§ 22, WRS, *Rel. Sem.* 12, 450 ff.). The Arab *herem* often assimilates to *herem*, e.g., clothes used at the circuit of the Kaaba are *herim*, and may not be worn or sold. Cp also the Roman ceremony of *devotio*, by which an enemy was devoted to destruction as an offering to the infernal gods (Preller, *Rom. Myth.* 124, 469). The instance of Kurba and the Amphictyonic council, in which the cultivation of land laid under a curse was made the pretext for a holy war, may also be compared with the case of Jericho. W. H. B.

BANAIAS (BANAIAE [BA]), 1 Esd. 9:25 = Ezra 10:43, BANAIAM, 10.

BAND 1. In the sense of a troop or company of men, soldiers, etc. (see ARMY, § 3).

The rendering of *bagappim*, בָּגָפִים (prop. wings, cp *Bdg. agappim*, Ez. 12:14, etc.; *goshal*, 777, 1 K. 11:24 AV, 1 K. 8:26, etc.; *havil*, 778 (prop. force), 1 S. 10:6 AV Ezra 8:22; *mag' shel*, 777, Gen. 32:7 [AV 1000000, comp. see MENASHEM]; a *band*, 778, 1 Ch. 12:1 AV Job 1:17; 'by bands', Ps. 30:27, represents a participle בָּגָפִים, 'dividing (troops)'. In this sense the common Gr. word is στρατός (cp Mt. 27:7 Mk. 1:16, etc.), 'cohort' (so RV, Acts 10:4).

2. In the sense of a ribbon.

So *habbith*, בִּבְתִּי, Ex. 28:8, RV 'cunningly woven band'; AV 'curious girdle'.

3. Finally, to denote anything that connects or encloses, the following words (also rendered 'bands,' etc.) are employed.

Yabeh, 728, Judg. 15:4, cp Aram. 728, 1 Qm. 1:53 (11220); *yabbel*, 727, Ps. 119:61 (RV Comes, q.v.), and cp. *Zeck*, 11714, where 'bands' (ing. 'binders' or 'union') is the name of one of the prophet's slaves; *yababbith*, 72275, 1 Esd. 10:43 and Ps. 73:4 (RVing. 'prongs' doubtful); *metah*, 7272, Lev. 26:13 Ez. 34:27, RV 'bars' (VARIANT, § 4); *misar*, 7273, Job 39:5 Ps. 24, *mis'cheth*, 72272, Job 38:14, of the 'bands' of Orion; see STARS, § 36; *yabboth*, 7227, Job 39:10, elsewhere (in plur.) rendered 'cords,' 'ropes,' etc.

BANI (בָּנִי, §§ 5, 52; cp Palm and Nab. 22, probably shortened from BANAIAM, 'Yah hath built up'; cp Gen. 30; Dt. 25:9 Ruth 1:1, and see Haupt, *Proc. Am. Or. Soc.*, Ap. 22 [192]; BAN[ע] [BNM], -ai [L], -aia [BL], -aiar [NM], BAN[ע] [BNM] is a frequently occurring name (chiefly post-exilic), and in some cases it is difficult to separate the persons bearing it; there is often confusion between it, the parallel names BANAI and BANAI [q.v.], and the noun *Ben* (בֶּן). See MEY *Entsch.* 142.

1. A Gadite, one of David's 'thirty', 2 S. 23:34 (*trig. galadai* [BL], cf. *galad* [A], cf. *galadai* [L]); 1 Ch. 11:38, one which see HAVON. Cp DAVYD, § 10 (iii).

A family of *Ben Bani* occurs in the great post-exilic list (see EZRA, n. §§ 9-81), Ezra 2:10 (*galadai* [L], cf. [A] Neh. 7:1, 2 (*trig. [BNM]*, *trig. [L]*) AV Ezra 11:1 (*trig.* 11:12); and various members of it are enumerated in Ezra 10:9 (*galadai* [BNM]) 1 Esd. 9:3 (*galadai* [BNM]) Ezra 10:10 (*galadai* [BNM]) Ezra 10:11 (*galadai* [BNM]) Ezra 10:12 (*galadai* [BNM]) Ezra 10:13 (*galadai* [BNM]) Ezra 10:14 (*galadai* [BNM]) Ezra 10:15 (*galadai* [BNM]) Ezra 10:16 (*galadai* [BNM]) Ezra 10:17 (*galadai* [BNM]) Ezra 10:18 (*galadai* [BNM]) Ezra 10:19 (*galadai* [BNM]) Ezra 10:20 (*galadai* [BNM]) Ezra 10:21 (*galadai* [BNM]) Ezra 10:22 (*galadai* [BNM]) Ezra 10:23 (*galadai* [BNM]) Ezra 10:24 (*galadai* [BNM]) Ezra 10:25 (*galadai* [BNM]) Ezra 10:26 (*galadai* [BNM]) Ezra 10:27 (*galadai* [BNM]) Ezra 10:28 (*galadai* [BNM]) Ezra 10:29 (*galadai* [BNM]) Ezra 10:30 (*galadai* [BNM]) Ezra 10:31 (*galadai* [BNM]) Ezra 10:32 (*galadai* [BNM]) Ezra 10:33 (*galadai* [BNM]) Ezra 10:34 (*galadai* [BNM]) Ezra 10:35 (*galadai* [BNM]) Ezra 10:36 (*galadai* [BNM]) Ezra 10:37 (*galadai* [BNM]) Ezra 10:38 (*galadai* [BNM]) Ezra 10:39 (*galadai* [BNM]) Ezra 10:40 (*galadai* [BNM]) Ezra 10:41 (*galadai* [BNM]) Ezra 10:42 (*galadai* [BNM]) Ezra 10:43 (*galadai* [BNM]) Ezra 10:44 (*galadai* [BNM]) Ezra 10:45 (*galadai* [BNM]) Ezra 10:46 (*galadai* [BNM]) Ezra 10:47 (*galadai* [BNM]) Ezra 10:48 (*galadai* [BNM]) Ezra 10:49 (*galadai* [BNM]) Ezra 10:50 (*galadai* [BNM]) Ezra 10:51 (*galadai* [BNM]) Ezra 10:52 (*galadai* [BNM]) Ezra 10:53 (*galadai* [BNM]) Ezra 10:54 (*galadai* [BNM]) Ezra 10:55 (*galadai* [BNM]) Ezra 10:56 (*galadai* [BNM]) Ezra 10:57 (*galadai* [BNM]) Ezra 10:58 (*galadai* [BNM]) Ezra 10:59 (*galadai* [BNM]) Ezra 10:60 (*galadai* [BNM]) Ezra 10:61 (*galadai* [BNM]) Ezra 10:62 (*galadai* [BNM]) Ezra 10:63 (*galadai* [BNM]) Ezra 10:64 (*galadai* [BNM]) Ezra 10:65 (*galadai* [BNM]) Ezra 10:66 (*galadai* [BNM]) Ezra 10:67 (*galadai* [BNM]) Ezra 10:68 (*galadai* [BNM]) Ezra 10:69 (*galadai* [BNM]) Ezra 10:70 (*galadai* [BNM]) Ezra 10:71 (*galadai* [BNM]) Ezra 10:72 (*galadai* [BNM]) Ezra 10:73 (*galadai* [BNM]) Ezra 10:74 (*galadai* [BNM]) Ezra 10:75 (*galadai* [BNM]) Ezra 10:76 (*galadai* [BNM]) Ezra 10:77 (*galadai* [BNM]) Ezra 10:78 (*galadai* [BNM]) Ezra 10:79 (*galadai* [BNM]) Ezra 10:80 (*galadai* [BNM]) Ezra 10:81 (*galadai* [BNM]) Ezra 10:82 (*galadai* [BNM]) Ezra 10:83 (*galadai* [BNM]) Ezra 10:84 (*galadai* [BNM]) Ezra 10:85 (*galadai* [BNM]) Ezra 10:86 (*galadai* [BNM]) Ezra 10:87 (*galadai* [BNM]) Ezra 10:88 (*galadai* [BNM]) Ezra 10:89 (*galadai* [BNM]) Ezra 10:90 (*galadai* [BNM]) Ezra 10:91 (*galadai* [BNM]) Ezra 10:92 (*galadai* [BNM]) Ezra 10:93 (*galadai* [BNM]) Ezra 10:94 (*galadai* [BNM]) Ezra 10:95 (*galadai* [BNM]) Ezra 10:96 (*galadai* [BNM]) Ezra 10:97 (*galadai* [BNM]) Ezra 10:98 (*galadai* [BNM]) Ezra 10:99 (*galadai* [BNM]) Ezra 10:100 (*galadai* [BNM])

BANID

BANID [L.] = MT 22:22, EV BANI and BISSI (1 Esd. 9:34 (EV BANNUS, FIHAL; Bannus, Ednalet [B], B., Ednalet [V], Bannus, kai von Bannus [L]). It is plausible, however, to correct Bani into BISSI or perhaps BISSI in 7:34 (cp 2:14). The family is also referred to on important occasions in Neh. 3:17 and 10:13 (Bannus [L]), and as in Ezra's caravan (see Ezra, i, § 2, ii, § 15 (1) d), 1 Esd. 8:25, AV BANI, RV BANNUS (Bannus [L], -v. a7- [A]). Ezra 8:13 (v. a7- [A]) where Bani should be restored in MF (see *loc. cit.*).

3. One of the exponents of the Law (Neh. 8:7; see Ezra, ii, § 13; cp i, § 8, ii, § 16 (1) 15 (1) c) who officiated at the constitution of the 'congregation' (9:4 f.; see Ezra, ii, § 12, § 13 [L]). In 9:4 (Bani Kadmiel; Bannus, v. a7- [A]) the name is repeated, possibly by an error (cp Ryssel); Ginz, after Pesh., reads Binni for the second Bani. In 9:5 Bannus has simply Bannus. Cp also Ezra 2:40 (and Kadmiel of the children of Hodaviah) Neh. 7:43 with 1 Esd. 8:20 (Kadmiel and Bannus [A]). In Neh. 11:22, Uzzi (5) b. Bani (Bannus [A]), Bannus [L] is called overseer of the Levites at Jerusalem.

4. Signatory to the covenant (see Ezra, i, § 7; Neh. 10:14 f.; Bannus [L]; v. a7- [A]; cp Bannus, i, § 1. A Merarite; 1 Ch. 6:31 [A]).

5. A Judahite; 1 Ch. 9:4 Kt. (Bannus omit).

BANID, RV Banias (Bannetac [B], i.e., BANI (q. 7, 2 [end])).

BANISHMENT. On various forms of temporary or permanent exclusion from the community as a consequence of crime or ceremonial disqualification, see BAN, § 3; CLEAN AND UNCLEAN, § 15 f.; SYNAGOGUE; EXCOMMUNICATION.

In 2 S. 14:14 allusion is made to Absalom in the word בָּנִי (EV 'banished'), elsewhere usually rendered 'outcast' ('outcasts' or 'dispersed of Israel'); see *Interpretations*, § 1. The nature of the punishment threatened in Ezra 7:24 (בָּנִי RV 'rooting out' [B], בָּנִי [L]) was already obscure to the editor of 1 Esd. (8:24; בָּנִי [B], אֲרִימָה [L]). Ezra 10:8 ('separated [B]) from the congregation of the captivity') may give an explanation of the phrase.

BANK. For בָּנִי, בָּנִי, in 2 S. 20:15 2 K. 19:32 is 37 in AV (elsewhere EV always MOUNT) and χάρμα in Lk. 19:41 (AV TRENCH, RV PALISADE) see *FORIFICATION*.

BANK (BANKA, Lk. 19:41 EV), **BANKER** (BANKA, Mt. 25:27 RV). See *TRADE AND COMMERCE*.

BANNAIA (BANNAIYC [A]), 1 Esd. 9:33 AV = Ezra 10:33, ZABAD, 5.

BANNAS (BANNOY [BA]), 1 Esd. 5:26 RV = Ezra 2:40, BANI, 3.

BANNEAS (BANNAIAC [BA]), 1 Esd. 9:26 RV = Ezra 10:25, BENAIH, 7.

BANNER (D), בָּנִי, בָּנִי. See *ENSIGNS*, § 1, a, b, c.

BANNUS (BANNOYC [BA]), 1 Esd. 9:34 = Ezra 10:38, BANI, 2.

BANQUET, Banqueting House. See *MEALS*.

BANUAS (BANNOY [BA]), 1 Esd. 5:26, apparently a misprint for Bannus (so RV). See *BANI* (3).

BAPTISM (BAPTICMA, BAPTIZEIN). Among the permanent witnesses to the birth of Christianity

1. **Origin.** out of Judaism is the primary institution of the Christian Church, the rite of baptism. With the Jews the bathing of the whole body in pure cold water—if possible, in a running stream—was a recognised means of restoration from a state of ceremonial uncleanness. Passages like Num. 19:17, 31:10, also Is. 1:6 Zech. 13:1, and especially Ezek. 36:24 f., may be compared. The pouring of water on the hands—a symbolic representation, perhaps, of baptism in a running stream—was a Pharisaic precaution insisted on before every meal (cp Mk. 7:3 Lk. 11:38). The Gentile, whose whole life had been ceremonially unclean, was required to submit to baptism among other conditions of his reception as a Jewish proselyte (Schürer, *Gal. 2:260 f.*; 3rd ed. 3:129). See *PROSELYTISM*, § 5.

The connection between Jewish and Christian baptism

BAPTISM

is strikingly illustrated by the regulations prescribed for the latter in the *Didache*, to be noticed presently; but, the ceremonial baptisms of Judaism, though they lie behind Christian baptism and exert an influence on its history, are not its immediate antecedent. The Jewish baptisms were the outcome of the Jewish distinction between clean and unclean—a distinction which was done away by Christianity (cp *WASHINGTONS*). Christian baptism is a purification, not from ceremonial, but from moral impurity. The historical link is found in the baptism of John in the river Jordan. John adapted the familiar ceremony of baptism to a moral purpose: his was 'a baptism of repentance for the remission of sins,' a purification of the nation from that moral uncleanness of which ceremonial uncleanness was properly typical. It was by means of this development of its true significance that baptism was rescued from mere formalism, and prepared to become the initiatory rite of the new Christian society.

As Jesus' work took up John's, and as he himself had chosen to be baptized by John, it was natural that his first preaching of repentance should be coupled, like John's, with a baptism. It is significant, however, that he did not perform the rite himself; only his disciples did so (Jn. 1:7 f.). Christian baptism was not yet instituted; and when it came it was to add a spiritual element which John's baptism lacked. Meanwhile Jesus was indicating by his own action, and by his defence of the action of his disciples, that the frequent Pharisaic baptisms—the ceremonial washing of the hands, and the 'baptisms' of vessels and dishes (Mk. 7:4)—had no permanent claim on the conscience; and certain of his words are directly explained by one of the Evangelists as repealing altogether the ceremonial distinction of clean and unclean, and as 'cleansing all meats' (Mk. 7:19). Only when the whole purport of Jewish baptism was annulled was the way clear for the institution of the Christian rite, one of the essential principles of which was that it should be performed once for all, with no possibility of repetition.

On the day of Pentecost Peter answers the inquiries of the multitude in words which, whilst they recall the baptism of John, indicate the fuller significance of Christian baptism: 'Repent ye, and be baptized, each one of you, in the name of Jesus Christ for the remission of your sins, and ye shall receive the gift of the Holy Spirit' (Acts 2:38). About three thousand were thereupon added by baptism to the original band of believers. It is expressly stated that at Samaria, as the result of Philip's preaching, both men and women were baptized 'in the name of the Lord Jesus'; but the gift of the Holy Spirit did not follow until the arrival of Peter and John from Jerusalem (8:12-17). The ennuh after Philip's instructions asks for baptism; and 'they came down both together into the water' (8:38). Saul is baptized by Ananias at Damascus (9:18). When Peter preached to Cornelius and his friends the Holy Spirit fell on all that heard the word; whereupon the apostle 'commanded them to be baptized in the name of Jesus Christ' (10:48). Special stress is laid on this incident as the first occasion of the baptism of Gentiles as such (10:45 11:18). It was justified by the apostle on the ground of the previous gift of the Holy Spirit, which was the baptism promised by Christ in contradistinction to John's baptism (11:16 f.).

Baptism was thus recognised as the door of admission into the Christian Church for Jews and Gentiles alike, and certain disciples of the Baptist whom Paul found at Ephesus were baptized afresh 'in the name of the Lord Jesus' (19:5). Of Lydia, the purple seller of Thyatira, found by Paul at Philippi, we read that she 'was baptized, and her household' (16:15); and of the Philippian gaoler, that he was baptized, 'he and all his straightway'—i.e., in the middle of the night (16:33). At Corinth a few of the earliest converts were baptized by Paul himself—Crispus, Gaius, and the household of

BAPTISM

Stephanas; but the apostle's language shows that this was quite exceptional (1 Cor. 14-17). In 1 Cor. 15:20 Paul mentions a custom, apparently prevailing in Corinth, of vicarious baptism in behalf of the dead. He neither commends nor rebukes it, and it would seem to have soon died out.¹

The earliest notice of the method of baptism is perhaps that which is found in the *Didaché*, and, as we have already said, it illustrates the recognition of a connection between the Jewish and the Christian baptisms. The *Didaché*, here as elsewhere, is strongly anti-Judaic in its tone, and at the same time shows the influence of Jewish practices upon the community which it represents. The Mishna draws six distinctions in the kinds of water available for various purificatory purposes (*Mikva'oth* 1:1-8, quoted by Schürer, 240-251), and in certain cases it insists upon the full stream of running water, in which the whole body can be immersed. The *Didaché* (chap. 7) recognises 'living water'—i.e., the running stream—'other water,' 'cold,' and 'warm'; and finally allows a triple pouring, where a sufficiency of any water for immersion cannot be had; but, though it indicates a preference in the order here given, it admits the validity of baptism under any of these conditions.

It is sometimes urged that, because βαπτίζειν means 'to dip,' Christian baptism must originally have been by immersion. In the NT, however, as in classical writers, the usual word for 'to dip' is βάπτω (Lk. 16:24 Jn. 13:26). βαπτίζειν had a wider usage, and could be used even of a mere ceremonial handwashing, as we see from Lk. 11:38, 'he marvelled that he had not first washed (ἐβαπτίσθη) before dinner.' Already the partial ablution would seem to have been regarded as symbolical of the whole. It is difficult to suppose that the 3000 converts on the day of Pentecost could all have been baptized by immersion. Such a method is indeed presupposed as the ideal, at any rate, in Paul's words about death, burial, and resurrection in baptism (Rom. 6:3 f.); but pouring water on the head was in any case symbolical of immersion, and tantamount to it for ritual purposes.

(a) *In the Name.* not 'into the name.' Although ἐν is the preposition most frequently used, we find ἐν in

3. Formula. Acts 2:38; and the interchangeability of the two prepositions in late Greek may be plentifully illustrated from the NT. Moreover, the expression is a Hebraism; cp ἐν ὀνόματι κυρίου Mt. 21:9 (= Ps. 118:26 ὁ κύριος); so in the baptismal formula of Mt. 28:19 the Syr. version has ܐܢܝܢ (Lat. *in nomine*).

(b) *In the name of Jesus Christ, or of the Lord Jesus.* The former expression is used in Acts 2:38; 10:48; the latter in Acts 8:16; 19:5; cp also Acts 22:16, 'Arise and be baptized and wash away thy sins, calling on his name.' From these passages, and from Paul's words in 1 Cor. 1:13 ('Was Paul crucified for you, or were ye baptized in the name of Paul?'), it is natural to conclude that baptism was administered in the earliest times—in the name of Jesus Christ, or in that of the Lord Jesus. This view is confirmed by the fact that the earliest forms of the baptismal confession appear to have been single—not triple, as was the later creed. When Philip's baptism of the eunuch appeared to have been abruptly narrated, the confession was inserted in the simple form, 'I believe that Jesus Christ is the Son of God' (Acts

¹ Tertullian (*Res. 48 c. Marc.* 510) assumes that the custom was current in Paul's time, but is wrongly cited as attesting it for his own day. Chrysostom (*ad Ro.* 8) says that Marcionites practised it; and Epiphanius (*Haer.* 286) had heard of a tradition that the Corinthians had done the same. This is very weak evidence for a second-century custom, and it is most probable that if the practice was found it was due to the passage in Paul's Epistle, and cannot be regarded as independent testimony to the existence of the custom among primitive Christians.

The difficulties in which Commentators who reject the obvious meaning of the words find themselves involved may be seen at length in Stanley's *Corinthians* (ad loc.).

BAPTISM

8:37); and the formula 'Jesus is Lord' appears soon to have become a stereotyped confession of Christian faith (cp Ro. 10:9; 1 Cor. 12; Phil. 2:11); moreover the 'question and answer' (ἐπερωτήματα) connected with baptism in 1 Pet. 3:21 would appear to represent only the central section of the later creed.

On the other hand, we have in Mt. 28:19 the full formula, 'in the name of the Father and of the Son and of the Holy Ghost.' We have no synoptic parallel at this point; and thus, from a documentary point of view, we must regard this evidence as posterior to that of Paul's Epistles and of Acts.

The apparent contradiction was felt by Cyprian, who suggested (*Ep. 73:17 f.*) that in baptizing Jews the apostles may have been contented with the one name of the Lord Jesus Christ, as they already believed in the Father; whilst in baptizing Gentiles they used the full formula, which was given (as he points out) with the command to 'make disciples of all the nations, or "Gentiles." This explanation, however, breaks down in face of Acts 10:45-48, the opening of the door to the Gentiles.

Three explanations deserve consideration: (1) that in Acts we have merely a compendious statement—i.e., that as a matter of fact all the persons there spoken of were baptized in the threefold name, though for brevity's sake they are simply said to have been baptized in the single name; (2) that Matthew does indeed report exactly the words uttered by Jesus, but that those words were not regarded as prescribing an actual formula to be used on every occasion, and that the spirit of them was fulfilled by baptism in the name of the Lord Jesus; (3) that Matthew does not here report the *ipsissima verba* of Jesus, but transfers to him the familiar language of the Church of the evangelist's own time and locality.

The first of these explanations cannot be regarded as satisfactory in the absence of any historical evidence of the employment of the threefold formula in the earliest times. A decision between the second and the third would involve an inquiry into the usage of the evangelist in other parts of his Gospel, and belongs to the discussion of the synoptic problem; but in favour of the third it may be stated that the language of the First Gospel where it does not exactly reproduce an earlier document, shows traces of modifications of a later kind.

It has been argued that when Paul (Acts 19:2 f.) in answer to the statement of the Ephesian disciples of the Baptist, 'We have not so much as heard of this be a Holy Spirit' (τὴν πνεύμα ἁγίου ἔσται), said, 'Unto what, then, were ye baptized?' he presupposed the use of the longer formula which expressly named the Holy Spirit. The statement can hardly mean, however, that they had never even heard of a Holy Spirit, for disciples of the Baptist could scarcely so speak (Mk. 1:8); it must refer to the special gift of the Holy Spirit which Christians were to receive. Accordingly, Paul's question simply implies that Christian baptism could scarcely have been given without some instruction as to this gift which was to follow it. In any case, it would be exceedingly strange that at this point Lk. should not have referred to the threefold formula, had it been in use, instead of simply saying, 'When they heard it, they were baptized in the name of the Lord Jesus' (Acts 19:5).

The threefold formula is attested by the *Didaché* (chap. 7), both in express words and by the mention of the alternative practice of triple effusion; but, as the *Didaché* shows elsewhere its dependence on Matthew, this is not independent evidence.

Justin Martyr (chap. 153), in describing baptism to his then readers, gives the full formula in a paraphrastic form (*1 Apol.* 161), 'in the name of God, Father of the Universe and Ruler, and of our Saviour Jesus Christ, and of the Holy Spirit.' Such a paraphrase was necessary to make the meaning clear to those for whom he wrote.

We find the full formula again in Tertullian some

forty years later (*De Bapt.* 13, *Adv. Prax.* 26); and when the First Gospel was widely known it was certain to prevail. Exceptions are found which perhaps point to an old practice dying out (Cyprian (*Ep.* 73) and the Apostolic Canons (ii. 50) combat the shorter formula, thereby attesting its use in certain quarters. The ordinance of *Can. Apost.* 50 runs: 'If any bishop or presbyter fulfil not three baptisms of one initiation (*ἑνὶ βάπτισματι μίας ἀρχῆς*), but one baptism which is given (*ἵνα*) into the death of the Lord, let him be deposed'. This was the formula of the followers of Eusebius (Soer. 524), 'for they baptize not into the Trinity, but into the death of Christ' (for other references see Usener, *Relig. Untersuch.*, 1889, 1184); they accordingly used single immersion only.

No statement is found in the NT as to the age at which baptism might be administered. Circumcision,

4. Age. which Paul regards as fulfilled in Christian baptism (see below, § 5), enrolled the Jewish boy in the covenant of his fathers on the eighth day after birth, so that there could be no doubt that young children were truly members of the holy people. Thus, if children had been excluded from baptism when whole families were won to Christianity, we should almost certainly have had some record of the protest which would have been raised against what must have seemed so inconsistent a limitation to the membership of the new 'Israel of God'. It seems reasonable to suppose, therefore, that where 'households' are spoken of as being baptized (Acts 16:15, 18:8; 1 Cor. 1:16), there must have been, at least in some cases, instances of the baptism of infants. That Paul could speak of the children of a believing husband, or of a believing wife, as 'they' is an indication in the same direction.

Paul, as we might expect, sees in baptism the means by which the individual is admitted to his place in the one body, of which he thus becomes a member; 'For as the body is one and hath many members, but all the members,

5. Interpretation. many though they be, are one body, so also is the Christ; for indeed by one Spirit (*ἐν ἑνὶ πνεύματι*) we all were baptized into one body—whether Jews or Gentiles, whether bond-men or free' (1 Cor. 12:13 f.). Baptism was thus the fundamental witness of Christian unity (Eph. 4:5, 'one baptism'); and in both the passages here referred to it is emphasised as such in view of the variety of spiritual gifts. A parable of Christian baptism might be found in the cloud and the sea through which all the Israelites had alike passed; 'they were all baptized into Moses in the cloud and in the sea' (1 Cor. 10:2).

In Rom. 6:3 f. Paul regards baptism as effecting a union with the death of Christ: 'we were baptized into his death.' It was a kind of burial of the former self, with a view to a resurrection and a new life. The same conception recurs in Col. 2:12 f., where it is immediately preceded by the thought that it corresponds in a certain way to the circumcision of the old covenant. It is 'the putting off'—totally, not merely partially and symbolically—of the whole 'body of the flesh'; and so it is the fulfilment of the old rite: it is 'the circumcision of the Christ'.

In Gal. 3:26 f. Paul further speaks of baptism as involving a kind of identification with the person of Christ, so that the divine sonship becomes ours in him; 'For ye are all sons of God, through faith (or 'the faith') in Christ Jesus; for as many of you as were baptized into Christ put on (or 'clothed yourselves with') Christ'. The old distinctions between Jew and Gentile, male and female, 'for ye all are one [person] in Christ Jesus' (*ἓς ἐστὶν ἐν Χρ.* 1:1).

Eph. 5:26 speaks of Christ as 'cleansing the Church by the washing' (*ἀπολύει τὴν ἐκκλησίαν τὴν ἑαυτοῦ*), probably not 'liver' [in C 402 is *ἀπολύει τὴν ἐκκλησίαν* is 22—Cant. 1:6—Eccles. 34:25; so Aquila renders *ἁγιάζει* in

Ps. 60:10 108:10] of water with the word' (*ἐν ῥήματι*). This last expression finds its interpretation in the *ῥήμα*, or formula of faith, to which we have already referred— which, whether as the confession in the mouth of the baptized or as the baptismal formula on the lips of the baptizer, transformed the process of ablution into the rite of Christian baptism. With this passage we may compare Tit. 3:5. He saved us through the washing of regeneration and renewal of the Holy Spirit' (*διὰ τοῦ ἁγίου πνεύματος καὶ ἀνακαίνωσιν π. ἁγ.*).

This last passage reminds us of the teaching of Jn. 3. The relation of that chapter to the sacrament of baptism is exactly parallel to that of chap. 6 to the sacrament of the eucharist (see FRUITFULNESS). We are secure in saying that the evangelist's interpretation of the significance of baptism must have followed the line of Jesus' conversation with Nicodemus as there related. That a Gentile, or even a Jew who had been neglectful of the Rabbinical discipline of ablutions, should need to begin entirely anew in the religious life, to be 'born again of water and the Spirit' as a condition of entry into 'the kingdom of God, would seem natural. The marvel and the stumbling-block was that this should be required of those who, like this 'teacher of Israel' had been strictest in their ceremonial purity. Marvel not that I said unto thee: ye must be born again'.

Jn. then, recognises, with Paul, the universal character of the initial rite; whilst at the same time the narrative touches the radical nature of the change in the individual soul.

J. A. R.

BAPTISMS (ΒΑΠΤΙΣΜΟΙ, Mk. 7, etc., RV¹⁹⁰², EV WASHINGS (*q.v.*)).

BARABBAS (ΒΑΡΑΒΒΑΣ [Vi. W11] § 48), the name of the prisoner whom, in accordance with a Passover custom, Pilate released at the demand of the Jews while condemning Jesus to death (so Mt. 27:15-20 Mk. 15:6-15 Lk. 23:17-25 Jn. 18:40 f.).

More precisely than Mt., who simply calls him a 'notable' (*ἐπίσημον*) prisoner, and Jn., who calls him a robber, Mk. describes him as lying

1. Story. bound with them that had made insurrection (*μετὰ τῶν στασιαστῶν δεδιδυμένος*), men who in the insurrection had committed murder. As Mk. has not previously referred to these insurgents, it seems all the more probable that he is borrowing verbatim from another source, although about this particular insurrection we are in as complete ignorance as about the Galileans mentioned in Lk. 13:1. Lk. (23:19), who follows Mk., adds that the insurrection had occurred in Jerusalem, but says nothing about any fellow-prisoners with Barabbas; and thus leaves the impression that Barabbas personally had committed murder. Mk. is entitled to the preference, not only on this point but also when he represents the Jews as having demanded the release of a prisoner on their own initiative, as against the less probable view that Pilate offered them this of his own accord.

Reference is sometimes made to the analogy of the Roman Festina; but of these all that Livy (v. 13) says—and that only with reference to their first celebration—is that during those days such as were bound (*vincula*) were relieved of their chains (*vincula*), and such was the religious awe inspired by the proceedings that no one dared afterwards to rebid (*revocare*) the recipients of the divine favour. Thus he says nothing about release from prison; and his contemporary Dion. Halicarn. (129 f. 100f.) on the authority of the Annals of a certain Piso, who himself had been censor, while he does indeed speak of such release, limits it to the case of slaves who had been laid under arrest by their masters (*ἀδελφῶν μὲν τῶν θεράποντων, οὐδὲν πρὸς τοὺς ἐκ τῶν δεσποτῶν ἐξόναι διασώζονται*).

Those who find some difficulty in accepting the narrative as it stands may perhaps find themselves better able to explain its origin on the lines indicated by W. Brandt, by whom every detail has been discussed with great care (*Evangelische Geschichte*, 1893, pp. 94-105). Brandt takes the kernel of the story to be that a certain prisoner who had been arrested in connection with some insurrection, but against whom no

BARACHEL

crime or at least no grave crime could be proved, was released on the application of the people, who intervened in his behalf because he was the son of a Rabban (see below, § 2). The incident, even although it was not simultaneous with the condemnation of Jesus, gave occasion in Christian circles for the drawing of this contrast: the son of the rabban was interceded for and released, Jesus was condemned. In the course of transmission by oral tradition the statement of this contrast might gradually, without any conscious departure from historical truth, have led to the assumption that the two things occurred at the same time and on the same occasion. Finally, the liberation of a seditious prisoner in any case a somewhat surprising occurrence seemed explicable only on the assumption of some standing custom to account for it: this assumption must presumably have arisen elsewhere than in Palestine.

The above theory presupposes that *Barababas* stands for *Bar* אבא 'son of the father' etc., here, of the

2. Name. rabbinical 'master'. (It was not till afterwards that *Bar* began to come into use as a proper name [of rabbi], explained by Dalman [*Gram.* 121] as an abbreviation, like *Bar* אבא in the time of Jesus it was a title of honour [Mt. 23a].)

Jerome, indeed, in his commentary on Mt. 27 said that in the Gospel of the Hebrews *Barababas* (i.e. *Bar* אבא) *Barababas* is explained as 'son of their teacher' (*Bar* אבא *magister* *eorum*), where *eorum* apparently implies an etymology similar to that found in a solution of a Venice MS in WH App. 16b-viz, that *Barababas* only another form for *Barababae*; see Winer, *Gram.* 9 § 5, n. 70 means 'son of our father'. In that case we must (with S. R. L.) write *Barababae*, taking the second element as being 'teacher', and assume that *Barababae* was explained as אבא אבא 'our teacher', or אבא אבא 'their teacher'. The meaning, however, is not essentially changed by this, as אבא אבא (אבא) is, like אבא, a title of honour for a great teacher.

The most remarkable fact in connection with the name of Barababas is that Origen knew MSS. and did not absolutely reject them, in which Mt. 27:16 is read 'Jesus' (Ιησοῦς) before 'Barababas' (a reading still extant in some cursives, is well as in the Armenian version, Syr. sin., and partly also in Syr. hr.). Whether the Gospel of the Hebrews, referred to by Jerome, also had this reading is uncertain (see WH). In this reading 'Barababas' would be only an addition made for the sake of distinction, as in Simon Bar Jona, but not yet with the full force of a proper name.

Some support for it might perhaps be found in the fact that the first mention of the name in Mk. is preceded by ὁ λεγόμενος. The meaning would then be 'He was, for distinction's sake (though it was not his proper name), was called Barababas.' Only, in that case, in Mt. the λεγόμενος (here without the article), since it is followed, on the reading at present in question, by Ιησοῦς Barababae, would simply mean 'whose name was Jesus Barababas'; and it may be so in Mk. also. In any case it is remarkable that in all the MSS. in question Barababas should have the name Ιησοῦς exclusively in Mt. and the only in two verses, while Mt. 27:16 and 28 simply gave τὸν Βαραββᾶν, τὸν δὲ Ιησοῦν as an antithesis. Thus we may be tolerably certain that the name Jesus as given to Barababas has arisen merely from mistake.

A fairly obvious explanation would be the conjecture of Tregelles, that a very early transcriber had 'per incantum' repeated the last two letters of *Barab* and that these were at a later date taken for the familiar abbreviation of the name of Jesus. If this theory be adopted we must assume further that a later copyist inserted also in 27:16 the name Ιησοῦς, which he had found in 27:15; but it is specially interesting to observe that in the Latin translation of Origen the word Jesus stands in 27:17 but not in 27:16 also. Cp Zahn, *Gesch. des NT Kanons*, 269f-700.

BARACHEL (ברכאל), 'God blesses,' § 28; ΒΑΡΑΧΙΛΑ [BNA], the father of Job's friend Elihu (Job 32:6).

BARACHIAH (ברכיה, ברכיהו), Zech. 1:17, 11, reading of AV ed. 1611, and some other old editions. See BERICHAH (4).

BARACHIAS, RV Barachiah (ΒΑΡΑΧΙΑC [Ti WH]), Mt. 23:35. See ZACHARIAS.

BARJESUS

BARAK (ברק, 'lightning,' § 66, cp Sab. ברק Palm. ברק, Psa. 134:3 [the surname of Hamileai], and the Ass. divine names *Kammon-barika* and *Uddil barika* [Del. *Ass. Hitt.* 187], b. Abinoam [Judg. 1:514; Barak [BL], ΒΑΡΑΧ [V]]. See DUBOIS.

BARBARIAN (Βαρβαρος), primarily, one who speaks in an unintelligible manner, i.e. a foreigner (cp 2:207), in which sense it is employed by Paul in 1 Cor. 14:11 Acts 28:2. This usage was not restricted to the Greeks alone; it is met with among the Romans (cp Ovid, *Trist.* v. 10-17), and according to Herod. 2:15 among the Egyptians. In agreement with this, the people of Melita, who perhaps spoke some Phoenician dialect, are called 'barbarians' (Acts 28:14), and C uses βαρβαρος to render the *gōs* of Ps. 111:1, a people 'of strange tongue' (Targ. ארמא ברבא).² The not uncommon *ΒΑΡΒΑΡΕC καὶ βαρβαροί*, accordingly, includes the whole world (cp Rom. 1:14 also Jos. *Ant.* xi. 71) and the similar 'Barbarian, Scythian, Col. 3:11; see HELLINISM, § 2.

The use of βαρβαρος became so customary that the term was used actually in referring to the speakers in their own people; cp Philo, *De Mos.* § 5, and Jos. (*Ant.* pref. § 1), who applies the designation 'upper barbarians' to his countrymen beyond the Euphrates.³ At a later date the word gets the meaning 'rueful,' 'savage,' etc. (cp Ch. *Interp.* 10-11, 'immans ac barbari consuetudo'), in which sense it occurs in 2 Mac. 2:21 4:25 1:2 and in the G of Lx 21:36 [31] (for Mt. 23:35, 'brutal').

BARBER (ברב, ברב), Ass. *gubdun*, Lx 5:14. See BLAIR.

BARIAH (בריה, ΒΑΡΙΑ [B], ΒΕΡΙΑ [M]), a descendant of Zerubbabel (1 Ch. 3).

BARJESUS, the Jewish sorcerer and false prophet in the train of the proconsul Sergius Paulus at Paphos, in Cyprus, who (Acts 13:6-12) withstood the preaching of Paul, and was punished with temporary blindness.

At the outset the names present great difficulties. In 13:6 his name (*Barjusa*) is expressly said to have been

1. Names. Barjusa (*Barjusa*), and such a compound 'son of a father named Jesus' can quite easily have been a proper name (cp Barababae, Barabae, Bartholomew). In 13:8, however, he is abruptly called 'Elymas the sorcerer, for so is his name by interpretation' (Ελμας ὁ μάγος, οὗτος γὰρ ἑρμηνεύεται τὸ ἐννοῦν αὐτοῦ). A translation has relevance only when it is a translation into the language of the readers; in any other case it would be incumbent on the author to state what foreign language he is translating into.

(a) This being assumed, we must take it that 'the sorcerer' (ὁ μάγος) is the translation 'Elymas' (Ελμας), in that case, would be the word translated. Accordingly, the name has been identified with the Arabic *'alim*, which occurs in the Koran (7:106 [100] 26:33 and 36 [1 and 2]) as an adjective following the noun *sāhir* which denotes a sorcerer, and has thus been taken to mean 'wise, shrewd.' Less appropriate is the derivation from Aram. אלים or אלים, meaning 'strong.' Equate μάγος, however, etymologically, with Ελμας as we

¹ Del. (*Ass. Hitt.*) explains Ass. *barbaru* 'jackal.'

² Akin to this are the expressions οἱ ἔθνη (1 Cor. 5:12, 13) and τα ἔθνη (like the Heb. עַמִּים, see GENTILES, § 1) to denote the outside the Christian world. Cp the Talm. use of אֲדָמִים.

³ Similarly, the Jews frequently employed אֲרָמִים, Syr. *arāmāyā*, i.e. 'Aramæan,' in the sense of 'barbarian,' and so the Syr. translations of the NT, under their influence, return the term to translate *ΒΑΡΒΑΡΕC*, *ἔθνη*, etc. In process of time it was felt that a word which was used in the NT to designate 'heathen' could hardly be borne by a Christian people, and the old name was modified into *arāmāyā*; cp. Nö. *ZDMG* 26:113, Wright, *Comp. Gram.* 15.

may, it still has to be explained how Barjesus came suddenly to be called by the other name, Elymas. The only way in which a plausible explanation could be reached would be if Elymas (in the sense indicated) could be taken as a title or cognomen assumed by Barjesus—a foreign tongue being used to heighten still further the prestige which he sought to acquire by it. It is not as a title, however, that the author employs it. On the contrary, he gives the word without the definite article, and expressly adds that the word which he is translating was the actual name (*ὄνομα*) of the hearer.

(b) It was quite sound method, therefore, to take Barjesus for the name translated, and Elymas for the translation.

Even Pesh., in v. 8, for *Εἰσαὶς δὲ μαγὸς* arbitrarily has 'this sorcerer Barshuma' (so Pesh. reads for *Βαρισαῦς* in v. 6; see below, (d)), whose name, being interpreted, means Elymas. Klostermann (*Probleme im Apostelwerk*, 1885, pp. 21-23), however, is able to support this view only on three assumptions, each one of which is bolder than the other. We must read, he holds, not *Εἰσαὶς*, but *Εἰσαῖος*; secondly, we must read, not *Βαρισαῦς*, but *Βαρισαῖος*, or, to be exact, the Latin *Barisaius*; and, in the third place, the *ⲓⲛⲓⲛⲓⲛ* so transcribed (whether we derive it etymologically from the root *ⲓⲛⲓ*, or, with more probability, from the root *ⲓⲛⲓⲛ* which underlies *ⲓⲛⲓⲛⲓ*) means 'son of preparedness' or 'son of finess,' and thus, by the same Hebrewism as we find in the name Barababais (*ⲓⲛⲓⲛⲓ*), *Barisaius*, *Barisaius*.

a. As to the first of these assumptions, it has to be noted that the reading *Εἰσαῖος* is met with only in Lucifer of Calabria (ob. 171), and even there not as *Elymas* but as *Elymas*; D has *Εἰσαῖος*, which, indeed, we cannot explain, but which, from its ending, is clearly intended to be taken as a proper name; *Barisaius* is found only in Lucifer, one Vg. MS, and two Latin MSS, in which in many places is found the markedly divergent text of A in which Blass takes to be Luke's earliest draft (see Acts, § 7).

B. Next, as regards the second assumption, *Barisaius* is found only in *Barisaius*, only in the Latin translation of D; *Barisaius* is rather, according to the one MS known to us, *Barisaius* only in Lucifer. The corrector of D has restored *Barisaius*, which, as a restorative, fits his reading *Barisaius* for *Barisaius*, but, in spite of *Barisaius*, is found also in AHEP and the Greek margin of the Philoxenian; R, Vg., Copt., Armenian, and the Philoxenian version as well as 'nonnulli' know to Rome, read *Barisaius*—that is to say, the simple Hebrew form without a Greek termination. On this Jerome (on the Hebrew name in Acts; *Opera*, ed. Vallarsi, 302) remarks, 'nonnulli . . . sic corrupte legunt' himself declaring the right reading to be *Barion* or *Barion*, for which, by very daring etymologising from the Hebrew, he obtains the meanings *re deficiens*, *in malis*, or *in rebus*. Perhaps, however, even Jerome's aversion to *Barisaius* rests upon the very obvious idiomatic consideration put forward by Bede in the eighth century, 'non convenit hominem sagittosum et magum nomen Jesu, id est, salvatoris, appellari quem e contrario Paulus (v. 10) filium diaboli nunciat.' The form *Barion* in Jerome can readily be accounted for as merely a clerical error for *Barjesus*, or as arising out of the Greek abbreviation *ΒΙΥ* which is met with in the oldest MSS along with the more frequently occurring *ΒΙΥ* for *ΒΙΟΥ*. The explanation in the case of the reader as preferred by Klostermann is much less easy. On this account, in spite of their weak attestation, one might be inclined to regard them as the true ones; but all the authorities for the reading *Barisaius* have the word, not in v. 8 instead of *Εἰσαῖος*, but as an interpolation after *Βαρισαῖος* in v. 6, 'quod interpretatur paratus.' This addition is met with elsewhere only in E, in the form *δὲ μεταρραπνεύει Εἰσαῖος* rendered in the Latin of this MS: 'quod interpretatur Elymas.' It is evident that in neither case have we more than a late attempt to obviate the impression that Elymas, first introduced in v. 8, was the name of another person. Blass, on the other hand, regards the added words as part of Luke's earliest draft. He sees, however, that Luke could not have written at the same time in v. 8 'for this is his name' (v. 8) and 'for this is his name' (v. 8) and 'for this is his name' (v. 8); and, accordingly, he rejects these words from Luke's earliest draft. For this he has not a single authority; and how can he explain Luke's having, after all, introduced the words into his second transcript, having cut those in v. 6 instead? Are we really to believe that with his own eyes Luke changed his good and thoroughly intelligible first text into a positively misleading after-text? (Cp. Acts, § 17 (c)).

It is, however, the addition 'quod interpretatur paratus' at the end of v. 6 to be regarded as a late interpolation, Lucifer of Calabria, who has it, in open transcription; but it is more inferential adaptation to the idiom of the word *paratus*. What etymology he was following when he preferred *paratus* (one naturally introduced) the form *Barisaius* is matter of indifference. In ancient times, as the *Barisaius* text abundantly shows, people made out Hebrew cognomina in a most reckless way.

γ. Klostermann's proposed etymology, *Barisaius*, rests upon a very weak foundation, as no such word as *paratus* (A. 15. 10) can be shown to exist (the proper name *paratus*, in v. 10, 17 has no importance in this connection), and the root *paratus* which is used in Syriac frequently for *paratus*, *paratus*, *paratus*, as also for *paratus*, *paratus*, *paratus*, in compounds, is never used for *paratus*. Besides, as we have said, the codex has not *Barisaius* but *Barisaius*. Above all, however, Klostermann's hypothesis remains untenable as long as one is unprepared to accept the further assumption that *δὲ μαγὸς* after *Εἰσαῖος* (or *Εἰσαῖος*) in v. 8 is a mere gloss to be deleted; for *δὲ μαγὸς* necessarily leads to the assumption dealt with under (a). This had no doubt already been perceived by the scribe of H, who wrote *δὲ μαγὸς* (the great) for *δὲ μαγὸς*, and so also by Lucifer, if the *aditio* *paratus* (of Tilius) is right in attributing the reading *magus* to him (the only MS of Lucifer at present known has *magus*). If Lucifer really wrote *magus*, this increases the suspicion that the other variants in Lucifer are in like manner arbitrary and unauthorised alterations of the text.

(c) In order to make out Elymas to be a translation of the name of the sorcerer, stress has been laid on the remarkable Peshitta rendering *Barshuma* for *Βαρισαῖος*.

Already, in the seventeenth century, we find Castell (*De Hebræo s. v. 22*) and Lightfoot (*Hor. Hebr. ad loc.*) interpreting *Βαρισαῖος* as *filius vulnaris*, and deriving Elymas from the Arabic *alima doluit* (22). Over and above the reasons to the contrary that have already been urged under (b), however, it has to be observed (see above) that a translation into Arabic would explain nothing to the readers; it would it self require to be explained.

A somewhat different turn is given to the matter by Payne Smith (*Theol. Mag.*, 1838). Barshuma was in the first instance given in v. 8 as a rendering of Elymas, and only later introduced by copyists also into v. 6 in substitution for Barisaius in the erroneous belief that it was the man's proper name. But the Peshitta in its arbitrary change of text in v. 8 (see above (b), *ad init.*) says precisely the opposite, that Barshuma was the proper name, and Elymas the translation. It must, therefore, from the outset have held Barshuma to be a reproduction of the proper name Barisaius. Thus Barshuma probably means merely 'son of the name'; and 'the name' is most easily to be accounted for as a substitute for 'Jesus' from the feeling of reverence which we have already heard expressing itself in Bede (see above (b) β), a reverence similar to that shown by the Jews when they said 'the name' instead of 'Yahweh.'

(d) Van Manen, contrariwise (*Paulus I.*, Leyden, 1890, pp. 98 f. 147), holds Elymas to be the proper name, and interprets Barjesus in the Hebrew sense as meaning 'son of Jesus'—i.e., 'follower of Jesus.'

In this he assumes that the primary document here made use of by the author of Acts did not refer to the man as a Jew, or as a sorcerer, or as a false prophet; that it simply contained the information that at Ephesus Paul came into opposition with one of the older and very conservative disciples of Jesus, and got the better of him with Sergius Paulus. This hypothesis admittedly departs so widely from the text of Acts that it is impossible to count on thereby.

(e) Dahan (*Gram.*, 129, n. 1 [194]) proposes a purely Greek explanation.

Εἰσαῖος (so accented) be regarded as a contraction from *Εἰσαῖος* (on these contractions see N. 15, § 10, *ad init.*). In *Εἰσαῖος* the Apocryphal and NT, indeed, the *Εἰσαῖος* are always *Εἰσαῖος*, *Εἰσαῖος*; but with the Greeks the forms are as invariably *Εἰσαῖος*, *Εἰσαῖος*; so in John 2 to Jewish 10; 1 Mac. 6:1 has *Εἰσαῖος*.

Philologically this derivation is the simplest of all; but it contributes nothing towards the solution of the riddle.

The failure of all the attempts enumerated above renders inevitable the suggestion that here the author of Acts has amalgamated two sources, one of which called the man Barjesus while the other called him Elymas.

2. Different sources?

Klostermann, in order to explain the peculiar distribution of the names in v. 6, 8, seeks the aid of this hypothesis in addition to the hypotheses already referred to (above (b), beg.). The addition, *οὗτος γὰρ ὁ ὄνομα* *μαγὸς* *εἰσαῖος* (for so is his name translated), however, would in any case be a very unskillful way of amalgamating the two sources unless *δὲ μαγὸς* (sorcerer), as suggested above, be deleted as a gloss.

Still, if once it is agreed to assume two sources, a further and larger question arises: the question, namely, whether the addition itself be substantially right—that is to say, whether the one name be really a translation of the other. Nay, more; it is even conceivable that the two names do not denote the same person; that accounts relating to

1. See Nestle, in private letter to the present writer.

BARJESUS

two different persons have been transferred to a single person. This inference is suggested also by the epithets applied, for, though it is not altogether inconceivable that a 'sorcerer' (μάγος) should be a 'false prophet' (ψευδοπροφήτης), the two ideas are widely different.

Of the critics mentioned in Acts, § 11, who discuss our present passage with reference to the distinction of sources, only Spitta and B. Weiss regard 136-12 as all of one piece; Ullrich and Hilgenfeld are convinced of the opposite, but make no definite suggestions as to separation of the portions; Sonf and Jüngst deliver 7: 6 f. from a written source, 7: 7-12 from the pen of the redactor or from oral tradition. Jüngst further attributes to the redactor the word μάγος in 7: 6. Yet not even so are all the difficulties cleared up.

How far the narrative as a whole is to be accepted as historical becomes a serious question as soon as it has been traced to more than one source; but its credibility has been doubted even by Spitta, B. Weiss, and others, who defend its unity.

3. Credibility of Narrative.

As regards the miracle in particular, one is not only surprised by its suddenness, but is also at a loss to see its moral justification. On the other hand, a misunderstanding would account for it readily enough. A sorcerer, a false prophet, may, any Jew (Acts 28: 27) is, in the judgment of the Christian, spiritually blind, and this is what Paul and Barnabas proved of Barjesus in their disputation with him. In being handed down by tradition this thought could easily undergo such a change as would lead to the representation that physical blindness had been brought on as a punishment by the words of Paul. On the other hand, one would expect the blindness, if it is to be regarded as merited, to be permanent, or, at least, would expect to be told of some reason for its subsequent removal, as, for example, that the sorcerer had ceased to withstand Paul and Barnabas, or even had become a convert to Christianity. It is very noticeable that the narrator shows but little interest in the subsequent history of the man. The conversion of the proconsul (not his existence; see Acts, § 13 *ad fin.*) also is doubtful to many.

All the more does it now become incumbent to enquire whether the narrative reveals in any measure the tendencies discerned elsewhere in Acts.

(a) In the first place, and generally, it is clear that it has a place in the parallelism between Peter and Paul (Acts, § 4), in respect alike of the miracle of chastisement, the confutation of a sorcerer, and the conversion of a high Roman officer (cp. Acts 5: 1-10; 8: 18-24; 10: 1-2). It is also in harmony with that other tendency of Acts, to represent the Roman authority as friendly, and the Jews as hostile to Christianity (Acts, § 5 (1); § 4 *ad init.*); compare very specially the Jewish exorcists in close relation to sorcery, Acts 19: 13-16).

(b) A conjecture of wider scope connects itself with what is said of Simon Magus (see SIMON MAGUS). If Paul was the person originally intended in the story of Simon, then in Acts 8: 24 we find attributed to him the one deed which used to be flung in his teeth by his Judaistic adversaries—that, by his great collections made in Macedonia and Achaia, he had sought to purchase at the hands of the original apostles that recognition of his equality with them which they had so persistently withheld. The romance of Simon Magus, however, of which we still possess large portions (see SIMON MAGUS), had for its main contents something different, viz., that the sorcerer had spread his false doctrines everywhere and supplanted them by miracles, but in one city after another was vanquished in dispute and excelled in miracle by Peter. Thus, apart from the repetition of the occurrence in many cities, we are

¹ See for example, Hilgenfeld, *ZWT*, 1868, pp. 365-67; 176; Weiss-Oberbeck on Acts 136-12; Lipsius, *Quellen der rom. w. u. d. Trinitas*, 1872, pp. 28, 32, also *HTZ*, 1876, p. 73; Holtzmann, *ZWT*, 1885, p. 4, 1; and very specially Krenkel, *Josephus u. Lukas* 180-100 [104]. Lipsius afterwards withdrew his earlier view; see *Apokryphen*, 17. ges. u. 11 (187), p. 32; cp. § 1, n. 2.

BARJESUS

told of Barjesus in Acts 136-12 exactly what is told in the romance about Simon (that is, Paul), and of Paul exactly what is told in the romance about Peter. Hence the belief that in 136-12 we can discover the same purpose on the part of the author as we discover in 8: 18-24. He was acquainted with the unfriendly allegation about Paul, did not believe it, and wished to set forth another view. In the two passages, however, the method is not the same. In 8: 18-24 it is shown that Paul could not possibly have been the infamous sorcerer, inasmuch as Simon the sorcerer was a Samaritan and was quelled by Peter indeed, but before the conversion of Paul. In 136-12, on the other hand, it is shown that it was Paul himself who victoriously met a sorcerer of this kind. One of the reasons for this divergence is seen in the desire, already noted, to establish a close parallelism between Paul and Peter. It is believed possible also to explain on the same lines why in Acts 136-12 the scene is laid in Cyprus, with a Jew in the *entourage* of a high Roman officer as one of the *dramatis personae*. To Cyprus, according to Josephus (*J. Ant.* x. 7, §§ 141-143), belonged the Jewish sorcerer Simon, who, at the instance of Felix of Judaea, procurator (*i.e.*, highest Roman officer), had induced Drusilla to quit her husband, King Azizus of Emesa, and marry Felix. The purpose of the narrator would have been sufficiently served had he been able to say that the sorcerer in question—Simon, to wit, under whose name the Judaists imputed to Paul so much that was shameful, had been met and vanquished by Paul himself. That, however, was impossible; the tale had already been related of Peter. Accordingly (so it is supposed) the narrator found it necessary to give another name to the sorcerer worsted by Paul.

(c) His choice of the names Barjesus and Elymas is still unaccounted for. There is, therefore, a motive for our attributing a historical character to a certain other sorcerer, Barjesus (or Elymas), as well as to a Samaritan sorcerer named Simon. Although it is not easy to believe that Peter met the Samaritan Simon, there is no reason for assuming that Paul did not meet Barjesus. Indeed, it can easily be conceded that in Acts 136-12, just as in Acts 8: 24, the author was not consciously giving a false complexion to what he had heard. He believed himself able to offer a material correction. He assumed, that is to say, that what the Judaists were in the habit of relating of Simon the sorcerer, while really intending Paul and his opposition to the 'true' Gospel, rested in actual fact upon a mistaken identification with this Barjesus (or Elymas), and that the latter was vanquished not by Peter but by Paul. It is less easy to suppose that Cyprus was given by tradition as the scene of the occurrence. Even without any tradition, the name could be suggested by Josephus's mention of the native place of the Jewish sorcerer, and the name of Paphos would naturally present itself from the fact that the Roman proconsul had his residence there.

(d) The hypothesis has received developments to a point where we have to depend on less clear indications. If the accusations in Acts against Simon and Barjesus had originally been brought against Paul, what is said of the intimate relations of Barjesus with Sergius Paulus would belong to the same class. Now, in Acts 24: 26, it is said that Felix offered sent for Paul and commended with him. It is assumed that the Judaists had gone so far as to allege that Paul had purchased the friendship of Felix with money, or even, perhaps, to insinuate that he had been negotiator between Drusilla and Felix. It is to meet those accusations (so it is assumed) that the writer of Acts alludes to bribery by Paul as merely a hope on the part of Felix, and informs us that Paul had stirred Felix's conscience by a solemn 'remonstrance' with him about his sinful marriage (24: 26).

(e) There are two more explicit indications that what we now read about Barjesus was originally told of Paul. *Εχθρός* 'enemy', the epithet applied by Paul to Bar-

BAR-JONA

Jesus (13.6), is, with or without the substantive *ἀνθρώπος*, the standing designation for Simon (that is, Paul) in the pseudo-Clementine Homilies and Recognitions. The name, 'enemy of righteousness,' fits Paul and his doctrine of the abrogation of the Mosaic law through Christ (Rom. 10.4) all the more because his Judaistic opponents in Corinth came forward as 'servants of righteousness,' that is, men of strict observance of the law (2 Cor. 11.5). In that case, the temporary blinding of Barnabas will represent what befel Paul at his conversion; even the expressions *μὴ βλέπων* (without sight) and *χειραγωγούμενος* (leading by the hand) in 9.8 f. have their parallels in 13.11. Here, then, unless the whole hypothesis under consideration be rejected, we may say, with reasonable probability, that the blindness of Paul at his conversion (whether historical or not is immaterial) was originally represented by the Judaisers as a divine visitation for his hostility to the 'true' (that is, the legal) gospel, and that it was simply passed on by the author of Acts to Barnabas the Jew.

Whatever else be the result of what has been said in the present section, one thing at least is clear: it is impossible to reach a definite conclusion unless the tendency of the author is taken into account.

According to the *περὶ τοῦ Βαρνάβου*—a legendary work composed by a Cyprian about 488—Barnabas opposed the work of Barnabas when, along with Mark (Acts 15.39), Barnabas visited Cyprus for a second time. He withstood him in various ways at his entrance into the cities where he desired to preach, and at last stirred up the Jews to burn him at the stake at Salamis. (Cp Lipsius, *Apokr. Ap. Gesch.* ii. 2, pp. 283-286, 278-297.) P. W. S.

BAR-JONA. RV Bar-Jonah, the patronymic of Simon Peter (Mt. 16.17) *Βαρ Ἰωνᾶ* [Ti. VII]. See PL 11.18.

Jonah is a Gr. contraction of *ἰωνάνης* (cp Jn. 1.42 *Σίμων ὁ υἱὸς Ἰωνᾶ*) [Ti. 2. 2. v. *Ἰωνᾶ*] [WH]; 21.16 *Σ. Ἰωνᾶν* [Ti. 2. *Ἰωνᾶν*] [WH]; L'Év. etc. present *ἰωνά*; see Var. Bib.), which corresponds to an Aram. *בִּרְיֹנָה* cp B. Talm. *Hull.* 133 a, *Dalm. Jud. Pal. Aram.* 142 n. 9, and see JOANNA.

BARKOS (בִּרְקֹס). § 82. *Βερκωκ* [L.]. The B'ne Barkos, a family of NETUNIM in the great post-exilic list (see EZRA ii. § 9), EZRA 2.51 (*Βαρκωκ* [B.], -*κωκ* [A]) = Neh. 7.55 (*Βαρκωκ* [B.N.A.], -*κωκ* [A]) = 1 Esd. 5.32, CHABRUS, RV BARCHUS (*Βαρχωκ* [B.], *Βαρχωκ* [A]). The NETUNIM (*נְתֻנִים*) were mainly of foreign origin, and the name Barkos seems to be Aramaic and to signify 'son of the God Kōs or Kaus.' The name of this god occurs in many theophorous proper names among the Northern Semites; we have Kaus-halak as king of Edom on an Assyrian inscription (Schr. *ATZ.* 150), Kōsuatnan (*קִסְוַתְנַן*) in Euting's *Nabat. Inser.* n. 12 l. 1, and a variety of Semitic names on Greek inscriptions from Egypt containing the same element (*Rev. Archéol.*, Feb. 1870, p. 109 ff.). Cp also the Edomite Kostobaros (Jos. *Ant.* xv. 79). Names designating the worshipper as son of his god are common in Aramaic—e.g., the biblical BENHADAD (probably), the Palmyrene *בִּנְיָן* 'son of Nelo' (cp BARNABAS, § 1), *בְּנֵי בִרְשֵׁת* 'sons of the son of the Sun-god,' the Syrian Bar-bi-Smūn, 'son of the lord of heaven,' Barlāhā, 'son of God,' etc. W. R. S.

BARLEY (שֵׁעֶרִים, *שֵׁעֶרִים*, *קֶמֶחַ*, *קֶמֶחַ* [B.A.], Ex. 9.31 Lev. 27.6 Dt. 8.8 Judg. 7.1, etc.) was in biblical times one of the most characteristic products of Palestine (Dt. 8.), regarded as one of the necessities of life (Joel 1.11). It comes second in the series of grains

[*κασιόβραρος* may perhaps be a scribal error for *κασιόβραρος*—i.e., *שֵׁעֶרִים*], which finds a striking parallel in the name Kaus-gabri, an Edomite king mentioned on an inscription of Esar-haddon (cp Schr. *loc.*).

The less common singular form is used for the growing crop. The name, which Helber has in common with Aramaic, but not with Arabic, is derived from a root meaning 'to be rough' or 'bristling.'

BARNABAS

mentioned in Ez. (49) as ingredients to be used in bread-making—wheat, barley, beans, lentils, millet, and spelt (cp BREAD). It may be inferred from a variety of passages, such as Ru. 2.17 Ju. 6.913, that barley was, even during the times when it was cultivated along with wheat, the staple food of the poorer class (cp FOOT). Such a reference as that in 1 K. 4.28 (58) shows us how largely it was used to feed horses and cattle.¹ It may also be gathered from the part played by the barley-cake in the dream of the Midianite, overheard by Gideon (Judg. 7.6), where it stands as a type of the Israelite peasant army, that as in other countries, so in Palestine, the cultivation of barley preceded that of wheat, and was the earliest stage in the transition from a nomadic to an agricultural life.² (Cp PL. *AN* xviii. 72, 'antiquissimum in cibus hordeum'.) This is, on the whole, more probable than the view of Jos. (*Ant.* 6.4), which has been very generally accepted, that barley-cake represented the *gableness* of Gideon's three hundred, and we are entitled to conclude that there was a time when barley was the staple food of all classes among the Israelites. The fact referred to in Ex. 9.11 f., that in Egypt barley ripens some time earlier than wheat, is supported by the testimony of Pliny (*HN* xviii. 106) as well as of modern writers (see references in Di. *ad loc.*).

In the single case in which the use of barley is prescribed in an offering under the ritual law (see JEATOT xv.

2. Ritual. ORDEAL OF, § 2), it is somewhat difficult to determine the reason. Some (e.g., Bahr, *Symbolik*, 2.445) have regarded it as expressive of the sordid nature of the alleged offence and the humiliation of the accused³ (a wife suspected of adultery). A reason which has recently found more acceptance is that in the case of a simple appeal to God for a judicial decision a less valuable offering was sufficient than was requisite when a suppliant besought God for the bestowal or continuance of his divine grace⁴ (Di. on Nu. 5.11, etc.). The prohibition to mingle oil or frankincense with the offering will, of course, receive a similar explanation.

Two-rowed barley (*Hordeum distichon*), which may be presumed to be the feral form, is a native of W. Asia.

3. Variety. It may have been cultivated by Semitic races; but it is not represented on Egyptian monuments. The kind most frequently cultivated in antiquity was six-rowed barley (*Hordeum hexastichon*). This occurs on the most ancient Egyptian monuments and on the coins of Mithradates six centuries B.C. It was no doubt derived by cultivation from the two-rowed kind (cp De Candolle, *Orig.* 294-297, and authorities quoted there).

The word 'gerah' (Ex. 39.1) is defined by Rabbinical writers as equal to sixteen barley-corns⁵; but see WEIGHTS AND MEASURES.

N. M.—W. T. F. D.

BARN (בִּרְנָה), Hag. 2.9; see AGRICULTURE, § 10. Also for Job 39.12 (בִּרְנָה) and (AV BARNFLOOR) 2 K. 6.27, RV correctly 'threshing floor.'

BARNABAS (ΒΑΡΝΑΒΑΣ [Ti. VII]; § 48), otherwise JOSEPH (or JOSI).

According to the author of Acts (13.6), the name Barnabas (= *νῖος παρακλησεως*) is derived from the Aram. *בִּרְנָה* (son) and the same root as the Heb. *בִּרְנָה*, *פְּרוֹשָׁה* 'the duty of *פָּרוֹשָׁה* (address, exhortation)', according to 1 Cor. 14.3, and also according to 1 Th. 5.15, being one of the duties of the *פְּרוֹשָׁה*. When one

1. Name. duty of *פָּרוֹשָׁה* (address, exhortation), according to 1 Cor. 14.3, and also according to 1 Th. 5.15, being one of the duties of the *פְּרוֹשָׁה*. When one

¹ So in the *Physiognos* (Land, *Ant.*, Ser. 4.1.1, etc. 1.3.1.3.3, 27) barley is called the 'food of cattle as opposed to wheat the food of man.

² Cp, especially, the parallel cited by Budde (*ATZ.* 188) from Radloff's *Aus Sibirien*, 1.129. Cp also Mose on the passage.

³ It is noteworthy that barley formed part of the price paid by Hosea to redeem his adulterous wife (Hos. 3.2); but this may be a mere coincidence.

⁴ See, especially, the full discussion by Nowack (*Th. 2. 240 ff.*), who agrees with Dalmann's view, and points out that the offering in question is neither a sin-offering nor a guilt-offering in the ritualistic sense.

BARNABAS

closely examined, however, this etymology is not without its difficulties. It combines words from two different languages, and moreover fails to account for the form *παρ*. Klostermann (*Prob. im Apostelst.*, 1833, pp. 8-14) seeks to derive the meaning *παρ* from the Aram. *ܦܪܐܢܐ*, *filius quidam*, but finds in it no further reference than to the satisfaction which Barnabas owed to the apostles by becoming a convert to Christianity. Dalman's etymology (*Gram. d. jud.-paläst. Aramäisch*, 1894, p. 142), which makes *παρ* a rendering of *ܦܪܐܢܐ*, this last being an abbreviation (not elsewhere met with) of a proper name *ܦܪܐܢܐ* or *ܦܪܐܢܐ*, takes us very far from the form to be explained. Deissmann comes nearer the sound when (*Bibelstudien*, 175-178 175); *Neue Bibelstudien*, 15-17 (197)) he compares the Barnabas (225) of a Palmyrene inscription of the year 114 A.D. (see Le Voté, *La Syrie Centrale* no. 73), and the Semitic *ܦܪܐܢܐ* (son of Nebo) on a North Syrian inscription of the third or fourth century A.D. In 18.401, as also in *ܦܪܐܢܐ* (son of Nebo), Nebo is transliterated into Greek with a instead of *e*, and the termination *-ne* may possibly have been substituted for *-nos* with the view of disguising the name of the heathen divinity. (For examples of such a custom, see Winer, *Gram. d. N. T. in Griech. Sprachlehre*, § 5.274.) On this theory, the rendering *παρ* is merely a piece of popular etymology. Nestle (*Bibl. saec.*, 1896, p. 19 f.) is inclined to take the Syr. *ܦܪܐܢܐ*, which signifies *παρ*, as the starting-point of the etymological interpretation; but he refrains from explaining more minutely the structure of the form.

If Joseph really did first receive the surname of Barnabas from the apostles, this seems to have been on account of his distinction as a speaker. In this respect, however, the author of Acts (13.16 14.12) invariably subordinates him at least to Paul. Many Jews, with a view to their dealings with Greeks and Romans, assumed in addition to their Jewish name a Greek (or Latin) or at least Greek-sounding surname (e.g., Acts 13.25 14.19 Col. 4.11, and *Ἰακώβος* = 23); and it may at least be asked whether this cannot perhaps have been the case with Barnabas also (see N. VIII. § 48.84).

According to the Epistle to the Galatians (our primary source), Barnabas was a companion of Paul in his missionary journeys for at least some time before the council of Jerusalem. In the council he joined

Paul in supporting the immunity of Gentile Christians from the Mosaic Law (Gal. 2.14), which makes it all the more surprising that he afterwards retreated from the position he had taken long before, that a Jewish Christian was at liberty to eat at the same table with a brother Gentile freed from the law (Gal. 2.14). As in the case of Peter, so also in that of Barnabas, the reproach of hypocrisy hurled at both by Paul on this account may safely be toned down into one of inconsistency (see COUNCIL OF JERUSALEM, § 3). In point of fact, Barnabas had shaken off the Mosaic Law; but he had never thought out all the bearings of the step so fully as to be able to vindicate it when the venerable and sacred duty of observing the whole law was so authoritatively pressed upon him. From this date it was, of course, no longer possible for him to work along with Paul on the same lines; and thus the dispute at Antioch more than sufficiently explains why the two separated. The mention of Barnabas in 1 Cor. 9.6 only proves that at that time also he was a prominent missionary, and that he held to the Pauline principle of supporting himself by his own labour; it is no evidence that he was personally known to the Corinthians, or that he had again become one of the companions of Paul.

In the Acts of the Apostles the separation of Barnabas from Paul is explained as due not to a difference on a matter of principle, but to a personal question. Barnabas wished to take John Mark, a near relation of his, according to Col. 4.10, as companion on a second journey planned by Paul and himself; but Paul objected, because on a previous occasion (Acts 13.13) Mark had left them in the lurch

¹ In *Die Worte Jesu*, 2 (192), Deissmann comes to the Deissmann's view, which is also fully defended by G. H. Gress, *Die Worte Jesu*, 1 (1904), p. 112 f. Cf. also Arnold Meyer, *Jesu Muttersprache*, 47 f. (1907).

BARNABAS

(Acts 15.36-39). Even if this be accepted as a historical explanation (and we have no means of controlling it), it cannot be said to have been the chief one (see above, § 2), as to which Acts (see Acts, § 4.6) is scrupulously silent. In virtue of the intermediate position, — as between Pauline and Jewish Christianity — which was held, as we have seen, by Barnabas, he is admirably fitted for a mediating rôle in Acts. Although a native of Cyprus, he is regarded as a member of the church of Jerusalem (11.6 f.); on the sale of his estate, see COUNCIL OF JERUSALEM, § 4.53; it is he who negotiates Paul's admission to that church (13.27); it is on that church's commission that he imparts the church which had been founded by dispersed Christians at Antioch in Syria (11.22-24); it is he who fetches Paul to Antioch from Tarsus and introduces him to his field of work (11.25 f.), and he also is the apostles' travelling companion when the collection for the poor Christians there is being brought to Jerusalem (11.30 12.25); as in this case, so also in the so-called first missionary journey, undertaken along with Paul through Cyprus and the south of Asia Minor, his name is placed first, at least till 13.7, and then again in 14.14 and even 15.22-23. All this is not easy to reconcile with Paul's well-known independence as shown in his letters; but the journey in Acts 11.30 12.25 must also on other grounds be pronounced unhistorical (see COUNCIL OF JERUSALEM, § 3), and the rest of what is related in Acts 11 is inconsistent with the order *τῆς Συρίας καὶ τῆς Κιλικίας* in Gal. 1.21, as is the rest of what we read in Acts 9 with Gal. 1.15-20 (cp Acts, § 4), and, for the doubtfulness of the contents of Acts 13 f., and the probability of a Barnabas source there, §§ 13 and 101. But, although the object of the narrative in Acts is inconsistent with history in as far as it seeks to suggest that the missionary activity of Paul among the Gentiles was no departure from the views of the primitive church, — that on the contrary it was authorised and even set on foot by it, — we may without hesitation accept as historical (see Acts, § 4) not only the co-operation of Barnabas with Paul shortly before and at the Council at Jerusalem, which is vouched for by the Epistle to the Galatians, but also the part which he took in the first missionary journey (Acts 13 f.), and even perhaps in Paul's introduction to Jerusalem (of course according to Gal. 1.15 f.) at his first visit to that city three years after his conversion. We may also accept in all probability the second journey of Barnabas to Cyprus in company with Mark (Acts 15.39). From this point his name disappears from the NT.

Our later notices of him are of little value. According to Clem. Al. (*Strom.*, n. 20, § 116, cp Eus. *HE*

4. Later notices. n. 14), he was one of the Seventy of Lk. 10.1; in the frankly anti-Pauline *Clem. Homilies* (n. 6-19), which date from the end of the second or the beginning of the third century — or rather, in the sources from which these Homilies were drawn — he was a personal disciple of Jesus, Palestinian by origin, but Alexandrian by residence, a strict adherent of the law; according to *Hom.* 1.8, n. 4, Clement meets him in Alexandria, but in *Clem. Recogn.* (17) the meeting was in Rome. According to this presumably earlier (but none the less unhistorical) representation, he proclaimed the gospel in Rome even during the lifetime of Jesus, and tarried there before Peter. In *Hom.* 1.7 this statement is made only of some person who is left unnamed, and later means were found for the complete suppression of such tradition, so full of danger to the authority of Peter and his alleged successors. From the fifth century onwards its place was taken by the statement that Barnabas was founder and bishop of the Church of Mdun — a statement, however, accompanied by the clause "after he had been the first to preach the gospel in Rome." It was upon this tradition that the archbishops of Mdun afterwards based their claims to metropolitan authority over the

whole of Northern and part of Central Italy. In the interests of Roman supremacy (which had originally been helped by it), the allegation was violently disputed by Rom in theologians of the eighteenth century.

In complete independence of the Roman and Arabian tradition, there arose, after 411 A.D., the legend that Barnabas had been the missionary to his native island of Cyprus, and had suffered martyrdom at Salamis where he was buried. On this plea the Cyprian Church, between 485 and 488 A.D., obtained from the Emperor Zeno its independence of the Patriarchate of Antioch. The implied assumption is that Barnabas was an apostle in the full sense of the word.

Ecclesiastical writers often substitute him for Barsabbas (Acts 1:23; cp BARSABAS, § 2), perhaps on account of the name Joseph, common to both (the Salitic and Philoxenian versions have, on the other hand, Joses in both cases, and there are isolated authorities for Barnabas alone), but perhaps in order to bring him nearer the apostolic circle. This object is effected in a more pronounced way by *Clem. Recogn.* (1:6), which identifies him with Matthias (Acts 1:26). There is an isolated notice in the (monistic) *Actas Petri Perfectionis* to the effect that Barnabas was sent along with Timothy to Macedonia before Paul's journey to Spain. Cp. Lipsius, *Apok. Ap. gesch.* II, 2, pp. 270-340 (especially 310, 260, 373).

Tertullian's claim of the authorship of the Epistle to the Hebrews for Barnabas is quite inadmissible. It is difficult to attribute to a born Levite (Acts 1:16) such grave errors about the temple (or tabernacle) as occur in Heb. 9:1 f. 7:27; or to any member of the primitive church of Jerusalem any such declaration as that in Heb. 2:4, that he had first received the gospel at second hand through hearers of Jesus. Nor is such an origin consistent with the thoroughly Alexandrian character of the Epistle. Even, however, if we must refrain from basing any argument on the statements about Barnabas in Acts 4:36, we are still confronted by a decisive fact: the man who at a critical moment was so much subject to the Mosiac law (Gal. 2:14), could not have spoken of its abolition and even of its carnal character, as the writer of the Epistle to the Hebrews speaks in 7:12-18:16. Doubtless the Epistle to the Hebrews was attributed to Barnabas because it was supposed that the λόγος τῆς παρακλήσεως of Heb. 13:22 could only have come from the λόγος παρακλήσεως of Acts 1:30.

That Barnabas should have written the anonymous epistle which since the time of Clement of Alexandria has borne his name, and on that account has been included among the writings of the 'apostolic fathers,' is still more inconceivable than his authorship of the Epistle to the Hebrews. It goes far beyond Paul in its assertion of freedom from the law. As to its date, see under ACTS (§ 19).

P. W. S.

BARODIS (Βαρωδεις [BAV]), a group or children of Solomon's servants (see NECHIMIAH), in the great post-exilic list (EZRA, II, §§ 9-8 c. 15:1-17), one of the eight inserted in 1 Esd. 5:34 (om. G¹) after Pochereth-hazzebam of 1 Esd. 2:57 = Neh. 7:59.

BARREL (ῥῶ γάρβα [BAL]; 1 K. 17:12-14:16-18:33). See COOKING UTENSILS, § 2, POTTERY.

BARRICADE (בִּרְיָדָה), 1 S. 17:22 RV¹⁸⁸⁶. See CAMP, § 1.

BARSABAS or **BARSABBAS** (§§ 48, 72). The etymology is doubtful. Βαρσαβας has been derived

1. **Name.** from בָּר (son) and שָׁבַע or שָׁבַי ('Sheba'), which, however, as far as we know, is always the name of a country, never of a person), from בָּר and שָׁבַע (= 'warrior'; cp Nu. 21:15), or from בָּר and שָׁבַי ('old man's son'). Βαρσαβας (Ti. WH) the better attested form of the name suggests a child of the

Sabbath. Dahman (*Gram. d. jud.-paläst. Aramäisch*, 1894 p. 443) instances analogies to show that שָׁבַע or שָׁבַי could by contraction become שָׁבַ, though שָׁבַע שָׁבַ is what we should more naturally expect in such a case.

2. **Joseph Barsabbas**, so named Justus (Τοῖστος [Ti. WH]), was nominated, though not chosen, for the

vacancy in the apostolate caused by the death of Judas. The account of the election in Acts 1:15-26 could not be held to be historical if we regarded the number twelve for the original apostolate as having been fixed, and invested with special dignity, only after the controversy as to Paul's equality in privilege with the apostles of Jerusalem. But even were we to set aside the allusion to the δώδεκα in 1 Cor. 15:5, as being unparalleled elsewhere in the Pauline writings, we should still be at a loss to explain why Paul never vigorously protested against an innovation if innovation it was, so arbitrary and so derogatory to his own position. Occasion enough for doing so presented itself in Gal. 2 and 2 Cor. 10-13. We must, accordingly, ascribe to Jesus himself the choice of twelve of his disciples who stood in peculiarly close relations to their Master. But in that case it was very natural that these should seek to keep up their number—that of the twelve tribes of Israel.

Whether the election was in Jerusalem is more open to question. On the arrest of Jesus all the disciples, according to Mk. 14:50 Mt. 26:56, had taken to flight, and that they should have returned to Jerusalem so soon is not likely. The view of Lk. and Jn., according to which they are present in Jerusalem on the day of the resurrection of Jesus (and remain there), cannot be reconciled with what we are told by Mk. and Mt.; the explanation is that the third and fourth evangelists found the statement of the first and second in credible. According to this last, Jesus, in Jerusalem, through the women, sends the disciples, who are also in Jerusalem, to Galilee, in order that he may there show himself to them. The kernel of historical fact, however, is not in Lk. and Jn. have it, but the reverse: namely, that the apostles were not in Jerusalem at all, but in Galilee, and thus in Galilee received the manifestations of their risen Lord. It may even be questioned whether they were again in Jerusalem and able to come forward publicly and unopposed so early as at the following Pentecost (see GILLES, SPIRITUAL).

In a still higher degree must the discourse of Peter in Acts 1:16-22 be regarded as entirely the work of the author (see ACTS, § 14).

Instead of Τωσθ in Acts 1:23, there is some (though inferior) authority for Τωσθ, a reading due perhaps to a conjecture that the 'brethren of Jesus' named in Mk. 6:3 were of the number of the Twelve; the same conjecture, if in Acts 1:23 the reading Τωσθ be retained, appears to find support in the fact that in Mt. 13:55 the brother of Jesus in question is called, not as in Mk. 6:3 Τωσθ, but according to the best MSs Τωσθ. The assumption, however, is quite inadmissible (see CLOPPAS, §§ 4, 5).

According to Papias (Eus. *H.E.* III, 39:6), Justus Barsabbas drank deadly poison with impunity. From the fifth century onwards he is named as one of the seventy of Lk. 10:1; in the list of these preserved in *Chron. Pasch.* (Bonn ed. i. 400) he is identified with Thaddaeus = Lebbaeus; in that of Pseudo-Dorotheus (*ib.* II, 128), with Jesus Justus (Col. 4:11), to whom the see of Eleutheropolis is assigned. In the *Pseudo-Pasch.* attributed to Irenaeus, but really dating from the 5th or 6th cent., 'Barsabbas et Justus,' in another redaction 'Barsabbas Justus,' and in a third ὁ Βαρσαβας Τοῖστος, are enumerated among servants of Nero who, converted by Paul, are cast into prison and condemned to death by the emperor, but afterwards released after an appearance of the risen Paul to the latter. The identification of this Justus with the biblical Barsabbas seems to have

BARTACUS

been made at a comparatively late date. (See Lipsius, *Apok. Ap. gesch.* 1, 201-3, 24, n. 194-96, 190, 191, 281 f.)

2. Another Barsabars called Judas appears in Acts 15:12-14, along with Silas, as a prominent member of the early church in Jerusalem, and as a *πρωτοπρεσβυτερος* (Tl. 15:12).

3. Judas, *φύστης* that is to say, as a man endowed with the gift of *παρολλαγής* (see BARNABAS, § 1). The mission ascribed to him—that of conveying the decree of the council of Jerusalem—cannot, of course, be more historical than the decree itself (see COTTELL, *OF THE SACRED*, § 101).

BARTACUS (ΒΑΡΤΑΚΟΥ [BA], ΒΑΖΑΚΟΥ [L], *BAZAKOS* [Vg]), father of Apollon, a companion of Dorcas (1 Esd 1:96). His title or epithet *τῷ θαυμαστῷ* is obscure. Jos. (*Ant.* vi, 35) gives it as *τῷ θαυμαστῷ*, which may possibly be for *μαθησάτω* (old Pers. *mathrāta* (simply 'coloured'), and, at any rate, is hardly a misunderstanding of the *τῷ θαυμαστῷ* in 1 Esd (RV 'the illustrious B.'), which is not a very natural epithet. The form given by Josephus, Βαρτεζακός (cp Syr. ܒܪܬܝܐܝܬܐ), seems nearest to the original name, which was probably Artakizak. Out of this 'Bartacus' may have arisen in this way: the MS had βαζακός, and over the first four letters was written *απα*—a correction which the scribe misunderstood (so Marti, *Ev. 65*).

BARTHOLOMEW (ΒΑΡΘΟΛΟΜΑΙΟΣ [Tl. WH]) is enumerated in Mt. 10:3 Mk. 3:13 Lk. 9:12 Acts 1:13 (see APOSTLES, § 1) as one of the twelve apostles of Jesus.

1. In NT. The second portion of the name represents the OT proper name vocalised by MT as *בְּרֹחַמִּי* (*brochami*; for the variants see TALMUD). In Josephus (*Ant.* ix, 1 § 5) the name *Tholomaios* (*tholomaios*) occurs as borne by a robber chief. It is not necessary to derive from Ptolemy (*Πτολεμαῖος*); the *θ* instead of *τ* is against this, though the second *ο* for *ε* presents no difficulty (Winer, *§ 52*). Bartholomew may have been either a genuine proper name like Barnabas, Bargesus, etc., or a mere addition to the real proper name of the bearer, given for the sake of distinction, like Simon Bar-jona (cp BARNABAS, § 2); on the latter supposition we do not know the true name of Bartholomew. It is the merest conjecture that identifies him with Nathanael (see NATHANIEL). If we neglect this conjecture the NT has nothing further to tell us about Bartholomew.

Ecclesiastical tradition makes him a missionary to the most widely separated countries, and attributes to him a variety of martyrdoms. The oldest writer from whom we have 2. Post-biblical accounts of him is Eusebius (*HE* v, 103), who represents him as having preached in India (in those days a very wide geographical expression, including, for example, Arabia Felix), and as having left behind him there the Gospel according to Matthew in Hebrew; but Lipsius (*Apok. Ap. gesch.* ii, 254-108; cp *Ergänz.-heft*, 110/2, 189-191), from the closely related character of the tradition regarding him and Matthew, assigns an earlier date to a tradition that the shores of the Black Sea were the scene of the labours of both, although this tradition is found only in authors later than Eusebius. According to other accounts, he preached the Gospel among the Cypriots, or (with Thomas) in Armenia, or (with Philip) in Phrygia, and, after the death of Philip, in Lycania. In the lists of the apostles his name is always coupled with that of Philip—a fact which makes it all the more remarkable that in this group of legends he is expressly designated as one of the 'seventy' disciples of Lk. 10:1. On the other hand, the Parthian legend which gives Mesopotamia and Persia as the field of his labours, identifies him with Nathanael. A heretical Gospel of Bartholomew is mentioned by Jerome in his preface to Mt.

P. W. S.

BARTIMÆUS (ΒΑΡΤΙΜΑΙΟΣ [Tl. WH]); on the account see below, § 2, end), the name of the blind beggar whom (according to Mk. 10:46-51)

1. Story. Jesus healed as he was leaving Jericho for Jerusalem. The parallel narratives of Mt. and Lk. show various discrepancies in points of detail. According to Lk. 18:35-43 the healing happened as Jesus was entering, not when he was leaving, Jericho, and according

BARTIMÆUS

to Mt. 20:29-34 two blind men were healed. It might perhaps be suggested that each of the two evangelists, or at least Mt., was thinking of some occurrence other than that recorded in Mk.; but, as against this, the very close coincidence with the text of Mk. shows clearly that both are dealing with the story which is associated in Mk. with the name of Bartimæus.

As regards this particular class of miracle, our judgment on which must depend on our doctrine of miracles in general, so much at least may be remarked, that in speaking to the disciples of John (Mt. 11:5—Lk. 7:22) of his giving sight to the blind, and other similar wonders, Jesus meant to be understood in a spiritual, not in a physical, sense. Otherwise the closing words, 'and to the poor the gospel is preached,' would have no force; for no proof of supernatural physical power is involved in this crowning instance. It is plain, however, that the evangelists understood his words in a physical sense. For in Mt. there is recorded, before the account of the message to John, not only the healing of a leper (8:1-4) and of a lame man (9:1-8), as in Lk., but also the bringing to life of Laimis's daughter (9:18-26), which Lk. records after that message (Lk. 8:40-56), the healing of a *καυχῶς* (9:42), which Mk. does not record at all and which Lk. relates, like the raising of Laimis's daughter, after the message to John (11:14), and, above all, the healing of two blind men (12:13-15), which does not appear in the parallel narratives. It thus appears that, in the first gospel, instances of all five classes of miracle are recorded as having occurred before Jesus appears to them (if we may disregard the consideration that in Mt. 9:12, *καυχῶς* is used in the sense of dumb; while Jesus in the message to John uses it in the sense of deaf). Lk., on the other hand, in whose narrative the message to John is preceded only by the raising of the widow's son at Naim (7:11-17), in addition to the healing of a leper and a lame man (5:12-26) relates in 7:22 that Jesus wrought upon many persons in the presence of the disciples of John the miracles to which he was immediately afterwards to appeal. Of these miracles we have no indication in the other evangelists. The conclusion is that the words 'to the poor the gospel is preached' cannot have been the addition of these evangelists or of any of their predecessors. The words destroy the physical-supernatural interpretation which the evangelists seek to put upon the preceding clauses. They are the authentic words of Jesus himself, and they prove that he did not claim to be a healer of the physically blind.

Some of the critics who argue that the evangelists have misapprehended Jesus's words do not deny the historicity of the story of Bartimæus. They point out that, in Mk's narrative at least, Bartimæus, 'casting away his garment, sprang up and came to Jesus' (and thus cannot have been completely blind); also that the event helps to render intelligible the popular enthusiasm at the entry of Jesus into Jerusalem immediately afterwards. They account for the divergence of Lk. by pointing out that for the story of Zacchæus a great concourse of people before the entry of Jesus into Jericho is required, and that the evangelist erroneously believed this to have been due to the healing of the blind man. Mt's divergence they account for by supposing that he had fused together the story of Bartimæus and that of the blind man, recorded in Mk. 8:22-26, which he had previously passed over. Finally, they appeal to the express mention of the name of the person healed—a rare thing in the gospels—as guaranteeing a genuine reminiscence.

This last argument would, of course, lose its validity should the name prove to be no real name 2. Name but merely a description.

According to Payne Smith's *Thes. Syr.* 588, 1461-2, the Syrian lexicographers Bar 'Mi (circa 885 A.D.) and Elias of Anbar (circa 922) interpret *Timæus* as meaning blind (*ἄμαρτος*); similarly, *Bar 'Mi*, ed. Lag. ii, 176-35; *Bar 'Mi*, ed. Lag. ii, 176-35; and Jerome (*Ab. 60*) even gives the corrected form 'Bartimæus' (*ἄμαρτος*) and adds: 'quod et ipsum corrupte quidam Bartimæum legunt.' The reading *Bar 'Mi*, however, has no support except in *Bar 'Mi* (circa 885 A.D.) who found in two Greek MSS. 'Sanctus Bar 'Mi' and the interpretation

1. The reading is suspicious for the very reason that it depends on that of the Syrian translation, which could not render *ὁ υἱὸς Τιμαίου Βαρτιμαῖος* otherwise than by the awkward and meaningless repetition of *τῷ*. It accordingly left *ὁ υἱὸς* untranslated, thus making *Timæus* the blind man's own name, and designating him *τῷ τῷ τῷ* (so in Syr. sin. and nearly so in Syr. hr.; cp Land, *Anec.* 4141: *ܬܝܡܐܝܘܫ ܒܪ ܬܝܡܐܝܘܫ*). This might be held to indicate that the combination *ὁ υἱὸς Τιμαίου Βαρτιμαῖος* cannot be due to the evangelist, who habitually translates the Greek translation of an Aramaic expression by *ὁ υἱὸς* (Lk. 7:11-34) or *ὁ υἱὸς μεθρηνηνομένου* (Lk. 15:22-34). Thus *ὁ υἱὸς Τιμαίου* is the marginal note of some very ancient reader.

BARUCH

'blind' cannot be established. Hitzig, who upholds it, has only inferred an Aramaic ܕܠܡܐ , 'to be blind,' as being the intermediary step between the Syr. ܕܠܡܐ and the Arabic ʿumya in the meaning (in Merx's *Lexicon*, 1: 67 f., and *Klassisch-fachliche* 1: 104 f., 2: 3 f. 6 f.) but the inference is not sound. It would appear, to us, that the ancient interpretation 'blind' was hit upon simply because *religio* stood near. Neumann (*Stud. Bib.* 1: 57) without expressing any view as to the etymology, gives ܕܠܡܐ as the original form. This rests, however, only on the writing of the name in some MSS of the Vet. Lat. with r instead of r , and the termination -a instead of -e , to which, however, the unanimous testimony of the Greek MSS is surely to be preferred (only D has δλαρηγοϛ). Thus the most likely rendering of the name would be ' ܕܠܡܐ , 'son of the uncle in.'

As explaining this interpretation, Volkmar still regarded the name as only a description of his role, not the story. One who is blind, MK means, is the church. One of the Gentile world; what whole Gentile world is freed from an individual man, but that the that is, by the preaching of his gospel (*Matth. 23: 12; Mk. 9: 1, 42; 50: 9, 15; 7: 17 f.; Luc. 11: 17; 12: 10; 13: 16*). But in the sight of Christianity, Judaism, as well as heathenism, is blind, whose healing is described in an earlier chapter (*Mk. 8: 22-6*). The text, however, supplies in *Luc. 11: 17; 12: 10*. The in the one place the Jews, in the other the Gentiles, are intended in fact, as Bartholomäus uses, the words 'son of David' and 'Rabbi', Volk, are only himself, if considered to pronounce him not a Gentile in the full sense of the word, but a proselyte—thereby, however, destroying his own position, which is that the two he does take to better express the deliverance by the gospel of the whole of humanity from spiritual blindness.

We are shut up, then, to the conclusion that Bartimaeus is a proper name like Barnabas, Barjesus, and the like, and it is a matter of indifference whether the second element be the appellative 'רמא, 'raman,' or the personal name רמא (Levy, *Neuhebr. Wörterb.* 2 154),¹ or the place-name רמא (ib. 166), or the second part of the Syriac place-name רמא (Thes. Syr. 406, 1462), and whether any or all of the last three forms admit of being traced to a Jewish Aramaic root רמא, 'to close up' (Syr. 224).

Bartimaeus remains a proper name, also, if the second part of it is supposed to be the Greek name *Timotheos* (found, e.g., in when he called Bartimaeus *ἰσχυρὸς θεός*). Such a blending, hard, it is not impossible, is unlikely. On the other hand, if the name is supposed to be a Semitic derivation this would naturally be *Barthanaos*, as in *Marthanaos*, *Zaccharias*, and so forth. But just as, on the analogy of the very common Greek termination *-moēs*, the accepted pronunciation of Ephraim and Simeon was *Ephraimōs* and *Simeonōs* (Rom. 10. 4 Cor. 10), although in name under consideration on the penultimate, so conceivably the even without supposing it to be etymologically derived from the Greek.

For the philology see, especially, Nestle, *Handb. u. Mitt.*, 1883, pp. 8-9, and for the subject in general, Keim, *Gesch. des N. u. A.*, 3: 51-54 (h. f. 561-64).

BARUCH (בִּרְכָּיָה, 'blessed [of God]'; ΒΑΡΧΥ [ΒΑΡΧΑ]; ΒΑΡΟΥΧ[ος] [Jos.], son of Neriah and brother of SERAJAH (Jer. 41), one of Jeremiah's most faithful friends in the upper class of the citizens of Jerusalem (cp. Jos. Ant. x 91, εἰς ἐπιστάτην σφόδρα οὐκίστα). We hear of Baruch first in 604 B.C. as the scribe who committed to writing the prophecies delivered by his master up to that date, and then in 603 B.C. (1) as the fearless reader of those prophecies before the people, the princes, and the king (Jer. 36). After the roll from which he read had been burned, Baruch wrote down the substance of the former roll afresh—a fact not without significance for the criticism of the Book of JEREMIAH (q.v.). In 587 B.C., it was to Baruch that Jeremiah when in prison committed the deeds of the land which he purchased from his cousin Hananiah at Anathoth (3212), and after the fall of Jerusalem it was this faithful scribe who was charged

¹ This personal name יִשְׁרָאֵל, however, is not certainly made out, for, according to Dahmen (*Zh. d. Lit.-Blatt.*, 1895, p. 257 f., and *Agram. u. n. d. s. v. Wörterbuch*, 1898, p. 162), in the sole proof-text cited, the reading in the first edition is יִשְׂרָאֵל which he explains from יִשְׂרָאֵל.

BARUCH, BOOK OF

with having induced Jeremiah to dissuade his countrymen from seeking a refuge in Egypt (13:1). The disciple appears to have been similar in character to his master. In the language of strong emotion he complained of the troubles which had come upon him, and of the wandering life which he was forced to lead: "Seekest thou great things for thyself? (*i.e.*, the leadership of a new and better Israel?) 'Seek them not' was the answer; for still worse troubles are in prospect, but Barnab's own life will be spared (45:15; cp 12:10). We may be thankful for this brief record of Barnab's inner life. Its genuineness has been too hastily doubted; the date given in 15 is, of course, too early to suit the contents, and must be interpolated; but the prophecy itself is altogether in character with Jeremiah.

[illegible]

BARUCH, Book of, a short book which in the LXX is placed immediately after Jeremiah, and is reckoned by the Roman Catholic Church as one of the so-called deuterocanonical writings.

Its contents may be summarised as follows:—
(Chap. I-2.) The book is said to have been written

1. Contents. by Baruch the son of Neriah at Babylon in the fifth year, at the time when Jerusalem was burned by the Chaldeans.

(Chap. I-3.) Balaam reads his book in the presence of Jehoahaz (i.e., Jehoachin), the son of Jehoikim, king of Judah, and in the presence of the other Jewish exiles who dwell at Babylon by the river Sid (2005 [?]). After mourning and fasting, they send money to Jerusalem to the priest Jehoikim (Ἰωακίμ), the son of Ilikiah, commanding him to offer sacrifices in behalf of Nubuhodonosor (Nebuchadrezzar) king of Babylon and his son Belsazzar, in order that Israel may find mercy. At the same time, the Jewish exiles send the following book which is to be read publicly on feast days in the Temple (Chaps. 1-38.) This section is a confession of sin, put into the mouth of Israel and accompanied by prayers that God will at length pardon his people whom he has so justly punished. Special stress is laid upon the sin which the people committed in refusing to serve the king of Babylon, notwithstanding the solemn injunctions of the prophets.

(Chaps. 39-50.) Now follows a discourse addressed to the Israelites dispersed among the Gentiles. It begins by showing that the calamities of the people are due to their having forsaken God, the only source of wisdom, and then proceeds to console them with promises of restoration—Jerusalem will be gloriously re-established for ever and ever, and the oppressors of Israel are to be humbled to the dust.

It will be seen that the book is very far from presenting the appearance of an organic unity. After the heading of chap. 1, 'These are the words of the book which Barisch wrote,' etc., we might expect the book itself to follow immediately; but, instead of this, we have a long account of the effect produced upon the people by the reading of the book. Nor are we clearly informed whether 'the book' sent

BARUCH, BOOK OF

by the Jewish exiles to Jerusalem (1.14), which they cite at full length in the following section (1.15-3.7), is or is not identical with 'the book' written by Baruch. Moreover, the historical situation described in the narrative (1.1-14) does not agree very well with the subsequent portion, since the narrative assumes the continued existence of the temple, whereas 2.26 implies its destruction. Finally, the discourse which occupies all the latter half of the book begins quite abruptly and stands in no definite relation to what precedes; it presupposes, indeed, the dispersion of Israel; but to Baruch and to the special circumstances of the *Babylonian* captivity there is no allusion.

To these general considerations may be added several difficulties of detail. The date given in 1 is so obviously worded that several modern commentators (e.g., Ewald and Kneucker) have felt obliged to emend the text. Even if the omission of the 14th year be explained, we still have to decide whether 'the 14th year' means the 14th year of Jeremiah's captivity or the 14th year after the burning of Jerusalem; and to both views there are serious objections. Chap. 15 disturbs the series, and if it be genuine must originally have stood in some other place.

Though the Book of Baruch never formed part of the Hebrew Canon (for which reason Jerome excluded it

3. Origin. from his Latin translation of the Bible), it was regarded as authentic by many of the Christian fathers, from the second century onwards. Sometimes, owing to the place which it occupies in the LXX, it is cited as a part of Jeremiah. Even in quite recent times, it has been maintained by Roman Catholic theologians that the book is a translation of a genuine work of the well-known Baruch, the friend and secretary of the prophet Jeremiah. All competent critics, however, have long ago concluded that it dates from a very much later period, and belongs to the large class of Jewish books which were put forth under false names. Its origin and history remain, however, in some respects obscure. That 1.1-3.8 and 3.9-5.9 are by different authors is generally acknowledged; both in substance and in style there is a marked contrast, the language of the former section being simple and full of Hebraisms, while that of the latter is highly rhetorical. The dates of the various parts, however, and the question whether the whole or any part was originally written in Hebrew are matters about which critics differ.

Ewald ascribed the first half (1.1-3.8) to a Jew living in Babylonia or Persia under one of the latter Achaemenian kings, and regarded the rest of the book as having been written soon after the capture of Jerusalem by Ptolemy Soter (320 B.C.); 4.12 Ewald explained as a reference to the deportation of Jews to Alexandria. Very few critics, however, are now in favour of so early a date. Kneucker thinks that the work, in its original form, was composed in the reign of Domitian, and consisted of only the heading (*i.e.*, 1.1-2 in part, 3), and the discourse contained in 3.9-5.9; the confession of sin (1.15-3.8) was, according to Kneucker, probably written a little earlier (in any case after the year 73 of our era) as an independent work, and was subsequently inserted into the Book of Baruch by a scribe, who himself composed 1.4-14. Schürer, on the contrary, whilst admitting that the middle of chap. 1 does not harmonise very well with what precedes and follows, thinks it on the whole probable that all the first half of the book (1.1-3.8) is by the same author, whom he places soon after the destruction of Jerusalem (70 A.D.), the second half being by a different hand but of about the same period.

With regard to the original language, Ewald, Kneucker, and others believe the whole to be a translation from the Hebrew, whilst Bertholdt, Havernick, and Nöldeke regard the Greek as the primitive text. Fritzsche, Hilgenfeld, Renss, and Schürer maintain the theory of a primitive Hebrew text in the case of the first half only. In favour of this hypothesis, it may be mentioned that on the margin of

BARZILLAI

the Syro-Hexaplar text of Baruch there are three notes by a scribe stating that certain words in 1.17 and 2.1 are 'not found in the Hebrew' (cp. *Apocrypha*, § 6 (1)).

As to the question of historical credibility, it is obvious that if, with the majority of critics, we ascribe the book to the Roman period, its value as a record of facts is reduced to nothing. Whether,

4. Historical value. for example, the statements about Baruch's residence in Babylon, the river 2.65, and the priest Jehoiakim are based upon any really ancient tradition it is impossible for us to decide. The author of the first half borrows largely from Jeremiah and from Daniel; in the second half we find in many reminiscences of Job and of the latter part of Isaiah; and it may be that sources now lost also were employed. It is particularly important to observe that the closing passage (1.6-5.9) bears a striking resemblance to one of the pieces in the so-called 'Psalms of Solomon' (Ps. 11—see the edition of Kyle and James, pp. lxxv, lxxvi.), which probably date from about the middle of the first century B.C. Since there is every reason to believe that the Psalms of Solomon were originally composed in Hebrew (cp. *Apocrypha*, § 83), the close verbal agreement seems to indicate that the author of this part of Baruch used the Psalms of Solomon in their present Greek form.

The most important of the MSS containing the Greek text of Baruch are B, A, and the Marcianus (Q). In B this book is missing. Fritzsche's edition of the *Apocrypha*

5. Texts and comm. (*Libri apocryphi veteris testamenti graeci*, 1770) does not accurately represent the B text of Baruch; but trustworthy information about this MS may be obtained from S. J. S. *Syllabus*, iii, in the preparation of which the photographic reproduction of B was used.

The ancient versions are: (1) the old Latin, contained in the editions of the Vg.; (2) another Latin version, first published at Rome in 1628 by Joseph Maria Cato Tommasi; (3) the Old Syriac, edited by Paul de Lagarde in his *Libri veteris testamenti apocryphi syriaci*, 1871, from a MS in the British Museum, Add. 17.1.5; (4) the Syro-Hexaplar, *i.e.*, the Syriac translation of Origen's Hexaplaric text, contained in the Codex Ambrosianus, which was reproduced in photo-lithography by Ceriani in 1871; (5) the Ethiopic, a much altered form of the text—ed. by Dillmann (Berlin 1904) in the 5th vol. of his *Verus Testamentum, Ethiopicum*; (6) the Armenian, of which the first edition is contained in the Armenian Bible published at Venice in 1805; (7) the Coptic, edited by Brugsch in ZÄN, xii.

Of modern commentaries the most valuable are those of Fritzsche (in *Kurzer Handb.*, 1851), Reisch (*Erklärung des Buchs Baruch*, 1853), Ewald (*Uebersetzung des alten Bundes*, 2d ed., 1867-68), Kneucker (*Das Buch Baruch*, 1879), and Gifford (in Wace's *Apocrypha*, 1892). The best general account of the book will be found in Schürer (*GH*, 1886-90, ii, pp. 721-726, ET). The reader may consult also Bertholdt (*Einleitung*, 1812-19, pt. iv.), Havernick (*De libro Baruchi commentatio critica*, 1853), Hitzig (in *ZWT* 3.26-27), Hilgenfeld (*ibid.*, 5.199-201, 22.137-454, 23.412-422), Nöldeke (*Altliche Lit.*, 1878, p. 214 n.), Reuss (*Gesch. d. heiligen Schriften ATs*, 2d ed., 1890), and the article on this book in Smith's *DB*, 2d ed., 1893, an article valuable chiefly on account of the additions made by Prof. Kyle.

In many MSS and printed editions the apocryphal *Epistle of Jeremiah* is appended to Baruch, and it is reckoned in the Vg. as the sixth chapter of the book.

6. Appendices. The Book of Baruch is not to be confounded with the *Apocalypse of Baruch* (see *Apocrypha*, § 57). The work known as 'The Rest of the words of Baruch,' extant in Greek, Ethiopic, and Armenian, seems to be a Christian imitation of the Apocalypse of Baruch. We possess, moreover, a third apocalypse of Baruch extant in Greek and in Slavonic, and a fourth extant only in Ethiopic. The Greek text of the former has been published by James in his *Apocrypha, necdota*, second series [97] (*Texts and Studies*, vol. 5, no. 1), where some information will be found also about the Ethiopic apocalypse (iii).

A. A. H.

BARZILLAI (בַּרְזַי; Βαρζελλ[αί]) [BNAI.]. The meaning can scarcely be 'iron,' for such a name would be without a parallel. According to Nestle (*ZDPV* 1897; cp. Kampfmeyer, *ib.* 9), the name is Aramaic ('son of —?'); but the latter part of it is still obscure.

1. A wealthy Gileadite of Rogellim, who befriended David in his flight from Absalom at Mahanaim (2 S. 17.27). He refused David's offer to live at the court at Jerusalem, but entrusted to him his son CHIMHAM

BASALOTH

(9.7; 2 S. 19.37 ff.). David on his death recommended the sons of Barzillai to Solomon (1 K. 2.7).
 2. A Gileadite (see (3)), Ezr. 2.61 ḥ (ḥapṣā'āle) [B], -ā'āle [AD].
 Neh. 7.61 ḥ (ā'āle) [AD]. 1 Esd. 5.37 ḥ (ḥapṣā'āle) [B], -ā'āle [AD].
 3. A man who married one of the daughters of (2) and changed his name to Barzillai.¹ In post-exilic times the line Barzillai were among those deposed from the priesthood because they were unable to prove their pedigree. In 1 Esd. 5.38 the original name of the founder of the family is said to have been JAMAS, AV. JAMAS (ḥapṣā'āle) [B], ḥapṣā'āle [AD]. Jaz. Jabbat (cp. Jos. Ant. vi. 84; ḥapṣā'āle). Ezr. 2.61 ḥ (ḥapṣā'āle) [B], ḥapṣā'āle [AD]. Neh. 7.61 ḥ (ḥapṣā'āle) [AD], and so 1 Esd. 5.38 (ḥapṣā'āle). The same passage gives ALGIA as the name of his wife.
 4. A man of Abel-neholai (not far, therefore, from Gilead), whose son ABRAHAM (9.7) also has been thought to bear an Aramaic name (2 S. 21.4).

BASALOTH (בסאלות) [V]. 1 Esd. 5.31 = Ezr. 2.52. BAZULUTH, 9.7.

BASCAMA (באכאמא) [ANV]; באכא. Jos. Ant. vi. 61, an unknown place, in Gilead, where Jonathan the Maccabee was put to death by Trypho (1 Macc. 13.21). Finner's identification (ZDP¹ 12.43) with *Bell. Buzuk* on the W. Golanāye (to the E. of the extreme N. of Lake Tiberias) is precarious (see Buhl, *Pal.* 241). Equally unsubstantiated is the identification with BAZEK, i.
