## Halifax-St. John Vessel Sank Among the Breakers Off the Nova Scotia Coast, and Only Four of the 37 on Board Were Saved.

### The Ill-Fated Vessel Left St. John on Friday Morning, and Was to Have Called at Yarmouth, but Never Reached There—Hon. W. S. Fielding Was to Have Boarded Her at That Port—Small Boats Were Launched, but Were Dashed to Pieces by the Angry Breakers—Stories of Survivors.

Halifax, N. S., Nov. 10.—During one of the worst storms of the season the Yarmouth Steamship Company's sidewheel steamer City of Monticello foundered four miles off Chequocton Point this morning and sank among the breakers. The passengers and crew numbered 37, and all except four are dead. The vessel was captained by James E. Fleming, Halifax, third officer, James E. Fleming, Halifax, third officer, James E. Fleming, Halifax, third officer, James E. Fleming, Halifax, third officer.

Some of Those Lost.  
Among the lost are:  
Capt. Norman Smith of the steamer City of Monticello, quartermaster.  
James E. Fleming, Halifax, third officer.  
James E. Fleming, Halifax, third officer.

Washed Every One Into the Sea.  
Capt. Smith's boat had only a few yards from the City of Monticello when a big wave struck the steamer, sending her completely over on her side and washing everyone who was on her into the sea. Those below decks were caught in the torrents of water rushing up from the ship's bottom and pouring down her hatches and companion ways. The other boat was not seen after the steamer went over.

REID PARTY HAS BEEN SWAMPED  
IN NEWFOUNDLAND ELECTIONS  
Returns Received So Far Indicate That the Liberals Led by Mr. Bond, Have Triumphed by an Overwhelming Majority—Regret Expressed in Montreal.

St. John's, Nfld., Nov. 10.—The only election returns received to-day was from the Foggo district, where Mr. Earle, the Liberal candidate, defeated his Tory opponent, Mr. Cooke, by 292 votes. At the last election this district gave a Tory majority of 352. The Foggo district, for 20 consecutive years previous to this election, has returned a Tory candidate. The Bond Government now has seventeen members and the supporters of Mr. Morine one member.

## THE WHOLE RESPONSIBILITY IS ON SIR WILFRID LAURIER

Le Journal says the Premier's Capital Error Was That He Permitted to Keep Tarte and Did Not Listen to the Tide of Discord.

Montreal, Nov. 11.—(Special.)—The responsibility of the present situation is the heading of the leading article in the Journal, the French Conservative paper. After blaming the English press for a share of it, the article says: "In Ontario a dozen counties have turned their backs upon Sir Wilfrid because they hold that Tarte was a rebel and a lover of every-thing in Quebec, and a traitor to the Mother Country. For these reasons we do not hesitate to declare that if in August last, as a portion of the cabinet demanded, Sir Wilfrid Laurier had exacted the resignation of Tarte, these ten or twelve counties would have remained faithful, and also he might have lost a like number in Quebec, the situation would have been saved."

# CANADIANS ARE AGAIN BATTLING WITH BOERS

Col. Evans of the Mounted Rifles, Col. Lessard of the Dragoons and Lieut. Morrison of the Artillery Specially Mentioned by Roberts.

London, Nov. 10.—Lord Roberts, telegraphing from Johannesburg, under date of Nov. 8, gives an interesting report to the War Office. He says: "Gen. Knox states that he takes no credit for the very successful engagement of Nov. 6, which was due, in the first instance, to the determination of La Gulliere never to lose touch with the enemy, and secondly, to the able way in which De Laide handled the firing line after Lord Buller and Ross were wounded."

Col. Evans is Mentioned.  
Our casualties the first day were six killed and 27 wounded, chiefly of the Buffs, who fought splendidly. The next day the Boers tried to seize the firing position on the bank of the Komati, from which they were driven out on Nov. 6, but were prevented by Col. Evans, the Canadian mounted troops and two of the 6th Hussars, galloping two miles and setting it in the nick of time."

Also Col. Lessard.  
The rear on the return march was defended by Col. Lessard with the Canadian Dragoons and two Royal Canadian guns, under Lieut. Morrison. "South Africa says no Boer can be too high for the devoted gallantry these troops showed in keeping off the enemy from the last day of the campaign."

Canadians in a Hot Battle.  
In the afternoon an event unprecedented in this war occurred, when some 200 mounted Boers suddenly charged the rear guard to within 70 yards, when they were stopped by the Canadian Dragoons. During the fight 10 of the Canadians fell into the hands of the enemy, who treated them kindly and released them after removing their own dead and wounded, paying which operation the Canadians were compelled to do. The Boers were also obliged to see how heavily the Boers had suffered. "Our casualties were two killed and 27 wounded."

# GEN. BULLER AT SOUTHAMPTON

His Carriage Delayed With Flowers and He is Given a Freedom of the City.

Southampton, Nov. 10.—This city was in gala attire today, and thousands of visitors from London and elsewhere participated in the ceremony of conferring the freedom of the city on Gen. Buller. Gen. Buller's carriage was delayed with flowers.

He Answers His Critics.  
Replying to the criticism of the General exhibited great emotion, and answered his critics vigorously. He declared that when the history of the war was written it would be found that the British army in South Africa had confronted difficulties far greater than any army operating against an evenly civilized enemy had ever previously experienced. He cited the Boers' superior range of vision and familiarity with the Kaffir language and country.

A NEW BOER REPUBLIC.  
Burgers Said to Have Declined to Organize Another at Zoutpansberg.

London, Nov. 10.—A curious story has come from St. Petersburg to the effect that when President Kruger removed his capital to Mafeking a number of burghers who had been left in the north-west, and decided to start their own republic at Zoutpansberg. They held the necessary number of burghers to start their own republic. They held the necessary number of burghers to start their own republic.

The Oldest Voter Yet.  
Editor World: I see by today's World that Anton claims Mr. Robert Miller, aged 98, as the oldest voter in Canada. West Durham can go that two years before in Mr. George Smith of Clarke Township, who supported Mr. C. J. Thornton, Mr. Smith will be 100 years of age in May next. He has voted Conservative all his life, and on Wednesday failed to redeem West Durham.

Of Sombre Hue.  
This is the season when nature seems to vie with nature in its sombre adornments. The bright leaves have fallen, and the trees are bare. The sky is a leaden grey, and the ground is a dull brown. The air is cold and the wind is sharp. The sun is a pale yellow disk, and the moon is a thin crescent. The stars are few and far between, and the night is long and dark.

Gives Cheers for Mr. Bourassa  
Such Men as He Have a Role to Play at Ottawa—Not the Role of Sheep.

Montreal, Nov. 11.—(Special.)—The Liberals have already begun to feel their ax, and it appears that Hon. Mr. Tarte's friends will in their new organ, Le Debat, at the triumph of our friends, Bourassa, Meade and Angers. We demand that more vitality and courage than has been shown by the members of the old Ottawa, but not the role of so many sheep.

PIRATE BELLE, BROKE HER NECK AT LATONIA AND MICHAEL'S RIBS WERE FRACTURED.

ONLY ONE FAVORITE IN FRONT.

Magie Light, About Whom 100 to 1 Could Be Had, Won First Race at Aqueduct.

Cladman, Nov. 10—Jockey Michaels was last but at Latonia today by an accident, which caused the death of Hart, whose good ally, Pirate Belle, the accident happened in the fourth race just as the end was passing the first turn. Pirate Belle's leg snapped in two and she fell head first into the fence with the crown on her back. The fall broke her neck and crushed her skull. Jockey Michaels suffered a fracture of two ribs and was otherwise painfully hurt. Pirate Belle was one of the best fillies at the track. Jockey May rode three winners. Only one pronounced favorite on, Bobbi, winner of the handicap, was an equal first choice at the close with Celtic Bard and Woodruff, the trio closing at 4 to 1 each. Second choice secured the other four events as they were well played the books quit lower than. Weather cold. Track fast. Summaries:

ROUGH RIDERS CHAMPION Argonauts Beaten in Deciding Game. The They Looked Dangerous at One Stage.

VARSITY OUT OF 'COLLEGE RACE. Toronto Captures Junior Pennant, While London Beat Peterboro Intermediates.

The final games of the Ontario Rugby Union were settled on Saturday, the senior championship going to Ottawa's Argonauts, the junior to Toronto, the Brockville are champions of the Quebec Union, having gone thru the season without defeat and they will play the Rough Riders for the Ontario title at Rossdale on Nov. 24. There is yet one game to be played, the lead held by Argonauts and Varsity at Toronto next Saturday. If McGill wins, it will give Quebec the championship. On the other hand if McGill wins, they will be champions of the race. The following is the record in the three unions:

Table with columns for Union, Team, Wins, Losses, Points, and Goals. Includes Ontario, Quebec, and Intercollegiate sections.

Ottawa 20, Argonauts 12. Ottawa's Rough Riders are champions of the Ontario Rugby Union on Saturday at Rossdale by 20 to 12, the half-time tally being 10 to 6.

The game was one of the best that could be imagined. The weather was perfect, the players, but a little too cold for the spectators, a fact that doubtless kept many away, although the crowd that was present was a good one, being fully 2,500 on the ground. The game was played in a most interesting manner, with the best team not doing it, although there was little or no choice for both put up a wonderful display of skill, playing for all that was in it. The Ottawa were the lucky ones, as they were the only team who had a good wind behind them in the first half, while on changing the wind had driven away the Rough Riders' advantage. The game was never overbalanced, also, at one stage the game looked as if it were Argonauts' was. The Ottawa, however, were too tricky, and they outplayed the Rough Riders' head wind. The game was remarkable for its pretty play, the roughriders' footwork being particularly good. The game was well played, the Ottawa, at the start, were 2 to 1 favored, and Argonauts supporters took all in all. One of the features of the game was that "Billy" Marshall, who returned from London, and this proved to be a good line and he showed that he could play football as well as he could fight. He put up a fast game, and secured the only touch down for the Ottawa. The game was all round, fairly good, but on one or two occasions the referee let some funny rulings. Ottawa got 20 points, and Argonauts only one. The referee play, the Ottawa, was the only one who was not.

Results at 'Frisco. San Francisco, Cal., Nov. 10.—Barney Schuler, Ontario, had a good thing in the first race, taking the lead, when Jerry Hunt was his first start here at 40 to 1. Miss Jockey was favorite at 6 to 5, but Jerry Hunt led all the way, and leader out from nowhere at the end, and got the race. The third race, the Produce Exchange Stakes, also brought out a good field, the favorite, 3 to 2, led into the stretch, but Cannon started a long haul drive and landed the money by a length. He took the lead easily for the place. Cannon was off on favorite in the Canadian Handicap and won cleverly. The favorite, 3 to 2, led into the stretch, but Cannon started a long haul drive and landed the money by a length. He took the lead easily for the place. ELECTRIC LIGHTS THE BEST "Economy"

The Civic Delegation Got Their Eyes Opened While in the States— Toronto Beats Them All

FOR LIGHTING OF THE STREETS.

Contract Goes to Manager Weight for 1100 Lamps, and the Hydro-Carbon Lights Get a Show

The Board of Control disposed of the street lighting contract Saturday a maner that leaves no room for the possibility of the Council to-day referring the contract back for further consideration.

Electric Light the Thing. The Toronto Electric Light Co. will give 1100 or more lamps at \$74.825 per lamp per annum, with globe of clear glass, ground glass, alabaster plated or partly alabaster plated, as the city may choose, and if a reflector is found to be an advantage a reflector will also be used. The labor clause is included. This price is the same as under the present contract. This disposal of the high candle-power lights to the number virtually now in use in the city.

The Hydro-Carbon Lights. The second part of the contract goes to General Thayer's Hydro-Carbon Co., bearing the Cluett's Gas Company's gas, the lamps to be placed where the secretary of the Fire and Light Committee directs.

These hydro-carbon lamps are the same as those submitted to the city experts, and are to be approved by the secretary of the Fire and Light Committee, being not less than 80 candle-power, an amount of 25 candle-power gas lamps heretofore supplied by the Consumers' Gas Co. The hydro-carbon lamps are to have the approved reflector, and the contract price is \$31 per lamp for the first 1000 lamps and \$22 after that number. It is the understanding of the Board of Control that a clause will be put in the contract providing for the manufacture of all goods used in Toronto as far as practicable.

The Board of Control comes out of the business with credit, and the decision has certainly been accelerated by the investigation made into the hydro-carbon light by the delegation that visited the United States for the purpose.

The Delegation's Report. The report submitted yesterday by the delegation is an interesting document. One clause only which it contained invited discussion.

Ald. Spence criticized that part of the report which recommended a municipal ownership in view of the experience of the city of Philadelphia. He said that the municipal control in Philadelphia had been abandoned by a combined force of the companies and every man connected with it, and that the city of Philadelphia had been abandoned by the popular spirit. He said that the city of Philadelphia had been abandoned by the popular spirit.

The Report in Full. The full text of the report is as follows: Ald. Spence: Nov. 8th, 1900. In accordance with the authority conferred upon me by the Board of Control, I have the honor to report to you the result of my visit to Philadelphia, Pa., on the 29th and 30th of October, 1900.

Ald. Spence: I think we ought to take up this now. I am willing to renew the number of lights in the old contract without the labor clause and a minimum of 1000 lamps. The price of the 74.825 per lamp with a minimum of 1000 lamps.

Ald. Spence: Well, let us have your proposition. Ald. Spence: It is this: I am willing to renew the number of lights in the old contract without the labor clause and a minimum of 1000 lamps. The price of the 74.825 per lamp with a minimum of 1000 lamps.

Ald. Spence: I am not prepared to make a contract for one light more than 1000 for the first year. I am not prepared to make a contract for one light more than 1000 for the first year.

employees at work, and it is stated that the contract has been awarded exactly as the World said it would go a couple of weeks ago.

Respecting the lighting in different places visited by your delegation, so far as a small order would be concerned, the electric light service furnished in Philadelphia is equal in efficiency to that of Philadelphia, and superior, so far as the candle-power is concerned, to that of Boston, where the enclosed are lamp is used. A comparison of the prices is appended: Toronto, per light per year, open air, \$74.825.

Philadelphia, per light per year, open air, \$30.00. In both Boston and Philadelphia the lamps are of the same type, and the contract for the unsightly wooden poles which mar the appearance of the streets in Toronto is not included.

In most of the places where gas is used, the number of the number of the house on each street, opposite which the lamp was placed, is marked on the glass plate supporting the globe of the lamp, and at street intersections a glass sign bearing the number of the street is placed. These improvements could be easily made. These improvements were furnished by the city, and placed and maintained by the contractor. These signs were installed, cost 20 cents each.

Another feature also noted was in connection with the directions for installing the lamps. These boxes were attached to the lamp post, and directions for installing the lamp were written in white letters on rubber-covered boards. Your delegation recommended that something of a similar character be adopted in Toronto.

It is Done Quickly. Ald. Spence: Shall we take the contract up now? Ald. Sheppard: I think we ought to take it up now. I am willing to renew the number of lights in the old contract without the labor clause and a minimum of 1000 lamps.

Ald. Spence: Very well, then. I am prepared to make a recommendation to the Council in favor of recommending the renewal of the contract for one light more than 1000 for the first year. The price of the 74.825 per lamp with a minimum of 1000 lamps.

Ald. Spence: Well, let us have your proposition. Ald. Spence: It is this: I am willing to renew the number of lights in the old contract without the labor clause and a minimum of 1000 lamps. The price of the 74.825 per lamp with a minimum of 1000 lamps.

TRAIL AND LE ROI SMELTERS. Review of Development Work in Rossland and Camp—War Eagle, Centre-Star, Etc.

ASK FOR "National" (LONDON) An ale free from the faults of Lager and heavier brands of Ale and having the virtues of a pure beverage.

In its weekly review of Nov. 4, The Rossland Miner observes: The cessation of the work upon the Kootenay mines, and the discharge of few miners from the Le Roi itself, has caused a little comment. There is very little to the matter, as will be seen by referring to the facts which are submitted. It may be emphatically called the lull before the storm.

For, just as soon as the smelting arrangements of the B. A. C. are completed, the general manager, reports stated, there will be shipments not only from the Le Roi, but from all three of the subsidiary properties. This will mean the employment of many more men than are even now employed.

There has been a statement that this powerful corporation was about to build a refinery at Northport. This is contradicted by those concerned. The fact of the matter is that the length of the fuses of the smelting plant at Northport has been greatly prolonged in order that the fine dust, which, being dealt with in the quiet-making machines, is capable of producing \$2000 per annum, should be deposited. In addition to this, there are other reasons for the delay.

Contract Goes to Manager Weight for 1100 Lamps, and the Hydro-Carbon Lights Get a Show

employees at work, and it is stated that the contract has been awarded exactly as the World said it would go a couple of weeks ago.

The Board of Control disposed of the street lighting contract Saturday a maner that leaves no room for the possibility of the Council to-day referring the contract back for further consideration.

Respecting the lighting in different places visited by your delegation, so far as a small order would be concerned, the electric light service furnished in Philadelphia is equal in efficiency to that of Philadelphia, and superior, so far as the candle-power is concerned, to that of Boston, where the enclosed are lamp is used.

For, just as soon as the smelting arrangements of the B. A. C. are completed, the general manager, reports stated, there will be shipments not only from the Le Roi, but from all three of the subsidiary properties.

The second part of the contract goes to General Thayer's Hydro-Carbon Co., bearing the Cluett's Gas Company's gas, the lamps to be placed where the secretary of the Fire and Light Committee directs.

In most of the places where gas is used, the number of the number of the house on each street, opposite which the lamp was placed, is marked on the glass plate supporting the globe of the lamp, and at street intersections a glass sign bearing the number of the street is placed.

The Board of Control comes out of the business with credit, and the decision has certainly been accelerated by the investigation made into the hydro-carbon light by the delegation that visited the United States for the purpose.

The report submitted yesterday by the delegation is an interesting document. One clause only which it contained invited discussion.
