STRENGTH IN VIRTUE THE FEATURE  
OF THE FORENOON — OTHER  
TRADING WAS PROFESSIONAL —  
PRICES KEPT FIRM — LONDON  
MARKETS FIRM BUT NARROW

Montreal, Feb. 20.

The lull in public interest in markets everywhere has for the second time of late turned the bulls' attention to mines. A week ago all except War Eagle got some promotion, to-day Virtue monopolized the attention and the advances. Business opened with the sale of 10,000 shares at 70, an advance of 2 points on the last sale of yesterday and continued through another 18 transactions each a little higher price than its predecessor. The immediate occasion of this phenomenal strength in Virtue was the report of the mining engineer, Mr. Obalski, the inspector of mines for the province, who has just returned from his inspection of the Cumberland with the best of reports. Price advanced to-day to 78, making this an advance of 10 points on the previous closing price and the total number of shares handled this forenoon was 45,750.

Of other mining stocks Montreal-London at 26 stands where it was, while Payne at 122 registered a gain of 1½.

War Eagle at 155 was also 1 point higher, and Republic on the sale of a broken lot sold ½ lower at 97.

The market was wide in having various stocks offered, but trading was light, owing to want of public interest. There was no weakness, however.

Canadian Pacific at 99½ was ¼ higher. Duluth preferred at 16½ was ½ higher, while the common stock advanced ½.

Twin City was at 63½, ½ point higher than the previous actual price.

Montreal Street at 294 was 1 lower than the price of a broken lot on Saturday.

The broken lots of Gas and Dominion Coal preferred secured advances of 1 and 2 points on these stocks' former quota-

tions, while a very small parcel of Rich. & Ont. going at 113 suffered a little recession.

The 96 price for Halifax Railway show neither advance nor recession.

The 104 for Dominion Cotton is unchanged.

Hochelaga Bank at 185 kept firm also on former value.

A London special cable of yesterday is to the effect that London markets report an almost complete absence of outside public dealing, and movements in the market have been for the most part professional. Traders were said to have bid up prices with a view to unloading before Wednesday, the first day of the settlement. This, with the enormous increase of loan expansion seen in the last bank statement is having an influence retrospective on the public buying. It is thought that money rates will ere long go higher.

### MR. OBALSKI ENTERTAINED AT THE MONTREAL CLUB.

At the Montreal Club this afternoon the return of Mr. Obalski, inspector of mines for the province, was celebrated by a friend, "uncheon party of several gentlemen interested in the Virtue Mining property. There were Senator Forget, Messrs. A. Wilson, G. Smithers, J. R. Meeker, R. Forget, C. E. Gault, Col. Henshaw and the guest, Mr. Obalski.

His report more than confirms the previous report given by Mr. Thurston. Mr. Obalski maintains there is gold in great abundance in the property. The getting of this is not a matter of days, but will take a considerable time since development work and output for dividends will go hand in hand. The luncheon was of all the more agreeable a character as the report of the property was so good and as the market advance of the stock to-day indicated large public interest in the mine.

It is said that the Virtue will be a very great mine, perhaps greater than any other.

### STRAWS.

Of currency notes issued by the Dominion Government on January 31, the total was \$26,175,996, as against \$26,398,805 on Dec. 31, and \$24,433,124 on Jan. 31, 1899.

**MONTREAL MINING EXCHANGE.**

VIRTUE IS ACTIVE AND BOOMS — SLOCAN STOCKS NEGLECTED — WINNIPEG CLOSES DOWN.

Montreal, Feb. 20.  
There was a reawakening of the old-time activity on Change to-day, Virtue leading in point of strength and activity. The whole tone of the market was benefited by the brisk demand for Virtue.

The Winnipeg is closed down pending consolidation with Brandon and Golden Crown, sales were made in the former at 10c, 2000 shares changing hands.

Virtue had on an old-time boom, starting at 71, and selling up to 76. The stock closed last night at 70, the first sale to-day being made at an advance of 1 per cent, and rising rapidly closed strong and in good demand, over 20,000 were sold. The closing quotations being 75½ to 73.

Jr. Obalski, who was sent out to report on the Cumberland in the interest of the shareholders, returned to the city this morning. He more than confirms the previous reports, and judging from what he says, the mine is a valuable bonanza.

Payne remains strong, but not quite so active as yesterday and sold at 121 for 1400 shares.

Republic was firmer, selling at 98 for the stock, and for broken lots. It was offered at the close at 100. The demand for this stock is not so lively, no doubt, on account of the dividend being made quarterly, but we advise its purchase on any further recession.

The Slocan stocks were more or less neglected in the scramble for Virtue. Slocan Sovereign sold at 32. Noble Five was firmer without any sales being made, the quotations being 15 asked and 8 offered.

There was a fractional recession in Deer Trail Cons., 1000 shares sold at 9½ and 1000 at 9 cents.

The remaining stocks closed steady. Montreal London sold at 26½, Golden Star was offered at 20, 19 being bid.

Shipments have commenced from the North Star. This should have a good effect upon the stock; it will soon be a regular dividend payer.

**MORNING SALES.**

# NEW YORK EXCHANGE.

**DULL MARKET DUE TO LIQUIDATION**  
**N. & W. ACTIVE ON REPORT OF**  
**PENN. HAVING GOT CONTROL**  
**— THIRD AV. BROKE, THEN RALLIED**  
**ON BUYING SUPPOSED TO BE**  
**KEENE'S — LITTLE PUBLIC IN-**  
**TEREST IN LONDON KEEPS LON-**  
**DON BUYING AT A MINIMUM.**

Now York, Feb. 20.  
 The London markets are decidedly cheerful. Americans moderately active at advances of  $\frac{1}{2}$  and with advancing tendency. Reason for the buoyancy is, of course, the news from Africa which continues to be of a favorable nature.

There was a persistent report in the House of Commons last night that Gen. French had been successful in surrounding Cronje.

Gen. Buller has occupied an important strategic position on south side of Tugela and the Boers are believed to be retiring from Cape Colony across Orange River.

In short, the situation, as far as can be ascertained, from the meagre despatches which are being published, is more favorable to British than at any time since outbreak of war.

All the papers have references to the story that Mr. Keene is now interested in Third Avenue, and Mr. Keene practically admits in his interview that he took over a portion of Mr. Hart's holdings. It is now believed that the financing of the floating debt will be done by the issue of some \$25,000,000 of bonds.

Supposing that they are 5 p.c. bonds, this will mean \$1,250,000 fixed charges.

Considering the earnings of the road, the establishment of such a charge ahead of the stock makes dividend on the common stock very problematical.

The tendency toward improvement in Con. Tobacco is due to a report from St. Louis that an advance of 1c per pound in the price of plug tobacco will be made shortly.

The newspapers report that it will be made to-day.

The short interest in Sugar continues large and is almost wholly responsible for the comparative strength of the stock. It is said that the dividend on 10,000 shares was offered yesterday for 1 $\frac{1}{4}$  p.c.

The market continues narrow and professional, and the temper of the room is rather bearish, owing to the utter absence of outside speculation.

New York (noon), Feb. 20.  
 The market opened at moderate advances over our closings and with a slight increase in activity.

London houses were moderate buyers of international stocks, and there was some disposition on part of traders to cover. However, the advance was short-lived.

Liquidation made its appearance and the market soon became heavy and rather dull.

The most active stocks were N. & W. com. and Third Avenue. The buying of N. & W. com. was called good and was said to be based on a story from Philadelphia to the effect that the Pennsylvania had acquired control. It is further said that Pennsylvania sought to acquire control of the soft coal carrying roads in the south.

This, of course, would be practically accomplished by getting control of the C. & O. and N. & W..

Third Avenue opened lower, but held its own for a while, transactions being rather light. It broke violently in the first half hour, swing to vigorous selling by a

room trader. The break was followed by a sharp rally of 5 points caused by buying by Taylor and J. S. Bach & Co and Wells, Hernck and Hicks.

The Room believes that the buying orders came from Mr. Keene. These brokers are supposed to have bought in the neighborhood of 10 to 12,000 shares at 96. The fact that so large a block could be bought at that figure made a bad impression on Floor.

O. & W. was traded in to a larger extent than for some time, the largest buyer being an operator who occasionally takes very large lines.

A. S. W. showed strength in the expectation of the stockholders' meeting to vote to retire a certain portion of the preferred stock.

T. C. I. enjoyed an advance on a statement published by N. Y. Sun to the effect that the directors were contemplating new issue of some \$3,000,000 of com. stock, the proceeds to be applied to the payment of the back dividends of preferred. The retirement of preferred and the elimination of the floating debt.

At the moment the market is less active and somewhat heavy.

## MINING NEWS.

### THE WAR EAGLE LEGISLATION — DEALINGS ON THE EXCHANGES.

Sir Hibbert Tupper has gone west to look after the interests of the James Cooper Manufacturing Company in the law suit with the War Eagle Company. Messrs. Foster, Martin & Lemieux, represent the Montreal company, and Sir Hibbert acts as counsel.

There are two suits in the litigation. In that of the War Eagle Company against the James Cooper Manufacturing Company, limited, the plaintiffs claim to have lost some \$116,000 through operating machinery supplied to them by defendants, and which they used continuously for a year, but now claim to be defective, and which they propose to replace at the cost of \$48,000. There is also a suit in which the James Cooper Company, limited, claim damages to the extent of \$150,000 for the action of the War Eagle Company, in attempting to make a scapegoat of them for the failure of the mine to realize the sanguine expectations of the directors. The statements of the mine directors as to the condition and prospects of the property are claimed as evidence that the machinery was regarded as efficient, and it is further alleged that it was capable of hoisting the ore as fast as it could be got rid of. The price of the machinery in question was to be \$12,500, while that with which it is to be replaced is given as \$18,000. A great many matters in regard to the mine are expected to be brought out when the suits come to trial.

### DEVELOPMENT IN SUMMIT CAMP

Summit Camp, Boundary District, Feb. 10.—In a resume of the past week's operations in the great Summit district the most important fact to be chronicled is that the connection between the east drift from the bottom of the Oro Denoro shaft and the No. 2 tunnel has been completed. The importance of the successful completion of this work to the systematic development of the property cannot be underestimated, as in addition to giving perfect ventilation to the mine, it has opened up an area of stoping ground over 400 feet long, with an average back of 100 feet.

The first chute of ore encountered in the tunnel was 66 feet in an easterly and westerly direction, and on Tuesday last a machine was put to work driving on the ore on alternate days to the north and south in order that some idea of the extent of the ore body might be determined. At this writing the ore has been followed for a distance of 30 feet in a northerly and southerly direction, and the showing is grand, the drifts are all solid, ore, and the miners at work are breaking

down between 80 and 40 tons of ore every 24 hours.

Ross Thompson, the managing director of the company, was in camp for two days during the week, and expresses himself as being highly pleased with the appearance of the mine, and imparted the welcome information that small daily shipments from the Oro Denoro will be started within the next thirty days, or as soon as a spur of the Canadian Pacific railway is constructed to the ore dumps. The construction of this spur will save the company two dollars per ton in transportation charges. However, for some time the shipments from the mine will be small, as it is the intention of the company only to ship such ore as is taken out in the course of ordinary development and stoping will not be actively pushed until the mine is equipped with additional and adequate machinery.

The big ore body on the 250-foot level of the B.C. mine was cut for a distance of 67 feet, and from the first 40 feet, 215 tons of ore were shipped to the Trail smelter as the ore came from the mine.

The B.C. management has several thousand tons of ore to ship, which were extracted in the development of the mine and good naturally complain that the Canadian Pacific Railway at present does not furnish cars in as sufficiently large numbers as could be utilized. Again, it is an ill-wind that blows nobody good, and while the abrupt closing down of the War Eagle and Centre Star mines at Rossland has caused much sorrow there, the cars that were used in transporting their ores, can now be used to the advantage of the B.C. and other mines in the Boundary district that are anxious to begin shipments.

At the B.C. mine preparations for work on a large scale are being made, and the mine buildings already up, and others in course of construction constitute a small town. A new office is being put up, and as soon as completed work will be started on a large house, to be used as sleeping quarters for the miners. The shaft house is also to be re-arranged, and added to and made ready for the reception of the big compressor, hoisting and pumping plant that is to be installed there.

Like the Oro Denoro, the B.C. is suffering from a deficiency of power and annoying delays have occurred in the shipment of their new plant. The hoist has arrived and is safely under cover, the big 100 horse power boilers are on route, but it is unknown if the new compressor has as yet left the manufacturers' hands.

Notwithstanding the scarcity of ore cars and inadequate machinery the B.C. is making a record and is daily sending out between 60 and 70 tons of high grade ore to the Trail smelter.

James Cunningham, one of the old timers in the Summit camp, is developing the Treadwell, a claim lying about three-eighths of a mile to the north and east of the Oro Denoro. In an adit run for 15 feet on the vein he has an excellent showing of the characteristic ore of the district. The ore body at this opening is about four feet wide, half of which is solid massive iron and copper sulphides. The vein is strong, large and well defined. It is as far as present development indicates a contact with a porphyry hanging and a granite foot wall. The vein is easily traceable, and ore has been found in place in a 25-foot shaft, about 300 feet to the north of the tunnel mouth.

Word has been received here that in the early spring systematic mining development will be started on the Emma, which adjoins the Oro Denoro on the north, and which from surface indications has the same vein as the latter property. The Emma is owned by the millionaire contractors and street railway magnates, Messrs. Mann & Blackerbie of Montreal. Both of these men are financially able to thoroughly and quickly develop the Emma,

which from its enormous surface indications, and from the results obtained in a shaft, 100 feet deep, is one of the best undeveloped properties in the northwest.

Scarcity of steel has been given for the reason of the delay in completing the spur of the Canadian Pacific into Phoenix. As soon as the road is completed through the Bull Dog tunnel it is announced that the steel will be torn from the switch backs and sent forward to complete the Phoenix extension. This work will be undertaken during the present week and the two miles of track yet to be laid should be put down before the end of the present month.

The little town of Denoro, the future mining town of the Summit camp, is growing rapidly. At present it consists of a few prospectors' cabins, a hotel and saloon, and a general store. Lots are being quickly purchased, and already the townsite company state that over 40 lots have been sold in the districts alone. Wood choppers are at work clearing the streets and lots, and in one or two cases lot owners have commenced building. A sawmill there would make money, as the lumber has all to be hauled for a distance of three miles and the price is higher than ever known in British Columbia. Rough lumber, wet and unseasoned, bringing \$18 per thousand, tongue and groove, rustic and ship lap bring comparatively good figures.

### OLIVE MINE MILL CAPACITY TO BE SHORTLY INCREASED.

The recent mill run of ore from the days on the Olive mine returned \$8 to the ton in free milling gold in the 25 stamp mill. This was deemed satisfactory, and Mr. Preston left immediately for Chicago, where he is ordering an additional 75 stamps, thus bringing the capacity up to the 100 stamps. The Olive is coming to the front, and will help out the gold production for 1900 very largely.

Mr. Preston took to Duluth a gold briquette from 22 days' run of the Olive mill, valued at \$9,000.—Rat Portage Miner.

### ANACONDA CONSOLIDATED.

Work continues in the tunnel, which is now close to 100 feet. Small stringers of copper ore have been met with, but none of these have been followed, and it is the intention to first work through to the first of the three parallel leads opened by shafts, from which good values in gold and copper were obtained. This lead is about 120 feet distant, and the other two will be intersected at 100 and 200 feet further in. The depth from the surface will be 250, 300 and 350 feet respectively, and it is reasonably expected that the ore will be much richer than that found in the open cuts and shafts. Two months' supplies are packed out, and nine men will be put on as soon as the sale of stock replenishes the treasury.

### EVENING.

At the bottom of the 50-foot shaft a crosscut was made on the excellent showing at that depth. The hoisting was so expensive that it has been decided to abandon sinking for the time being. At the east side of the claim the ground is broken by benches and cliffs, and the vein outcrops at the foot of the lowermost cliff. Here a tunnel, when it is run in on the showing will gain a depth of about 200 feet in a very short distance. Work upon this tunnel has been started, and it will be run to the shaft, a distance of about 250 feet, and an raise will be made to connect the shaft.

# CHICAGO MARKET.

WHEAT AND CORN ON LIQUIDATION  
BY LONGS CLOSED WEAK — PROVISIONS OPENED WEAK, BUT CLOSED STRONG.

Chicago, Feb. 20.

Liverpool opened  $\frac{1}{4}$  higher; demand moderate; prices steady. March opened  $5\frac{1}{2}$  May,  $5\frac{3}{4}$  July  $5\frac{3}{4}$ . Closed March 5-10, May  $5\frac{3}{4}$ , July  $5\frac{3}{4}$ .

Paris wheat 5 lower; flour unchanged. New York opening was  $\frac{1}{2}$  lower and lost  $\frac{1}{2}$  cent, and is now weak.

Chicago—After opening easier,  $\frac{1}{2}$  lower, on account of Liverpool not responding to our advance of yesterday, and lower on second cable later in the day, sold at  $67\frac{1}{4}$ , but good buying at that price had the effect of advancing the price to  $68\frac{1}{4}$ .

See no good in wheat as long as export demand so dull. Europe does not respond to our advances which are taken advantage of by other export countries.

Minneapolis wires: "There is a slight increase in movement of wheat from country points. Farmers show more disposition to dispose of storage tickets.

Corn opened at last night closing, but on the advance the country were big sellers. Patten sold July corn early, now selling May. Looks as if Cudahy selling little to break market; try hold steady around 85.

Oats, dull, and weak at  $\frac{1}{2}$  loss from last night's closing.

Provisions opened nearly 10 cents lower on big receipts and inactive now at an advance of 5 cents from the lowest situation is stronger to-day than any time this season, and hogs at highest price and demand is very good.

Primary receipts:

Last week receipts 966,806, shipments 266,059.

Last year receipts 564,068, shipments, 180,191.

Four ports last year 192,994, shipments 281,188.

Exports flour last year 79,171 barrels. N. W. Cars—Minn., 192, Duluth 280.

Last week 1,077. Last year 479.

Hogs to-day 38,000; to-morrow, 86,000.

Car lots wheat estimates 80 receipts 70, contract 0, shipments 51,500.

Car lots corn estimates 750, receipts 758, contract 2, shipments 262,882.

Car lots oats estimates 325, receipts 287, contract 84, shipments none.
