Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

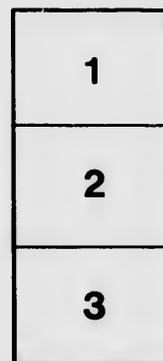

Harold Campbell Vaughan Memorial Library
Acadia University

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Harold Campbell Vaughan Memorial Library
Acadia University

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

A RAMBLE AND A REST.

LESS than a generation ago the Maritime Provinces of Canada were as far removed from the ordinary course of tourist travel as is the Island of Newfoundland to-day. Within a score of years, even, their beauties were unknown, save to those who were willing to sacrifice their comfort journey without the aid of rail-ways and rough it for hundreds of miles in what was then a land of forest and stream. The railway era had begun, but there was little more than a beginning. Here and there was a piece of road connecting two points which were then, and seemed destined to be, unimportant and slow of growth. Wide gaps separated the principal cities and a wider gap separated the provinces by the sea from the rest of the great Dominion. The most convenient way of reaching the east from Quebec or any point west of it was by a roundabout railway journey through the United States and thence by a sea voyage to St. John or Halifax. The tourist who wrote a book, and occasionally an article, found much to interest him. Then he went home and told the world what a quiet and curious country he had found on the shores down east. Under the most favourable circumstances, he had seen very little of it, but he knew more about it than most of his readers knew and his story, a burlesque though it might be, was an authority with the rest of the world. Since then the times have changed.

In the meantime, busy hands were at work in the provinces. The gaps were closing. The construction of the Intercolonial Railway had begun, and year by year the work was pushed forward until there appeared one of the most substantially constructed and best equipped lines in the world. To-day there are about 1,200 miles of Dominion Government rail-ways connecting the city of Quebec with the Maritime Provinces, while the numerous connections, under the control of private companies, aid in giving access to attractive places for summer travel not equaled on the continent of America.

In former years before the tourist had been informed of the possibilities of this country, the usual goal of summer journeying was the city of

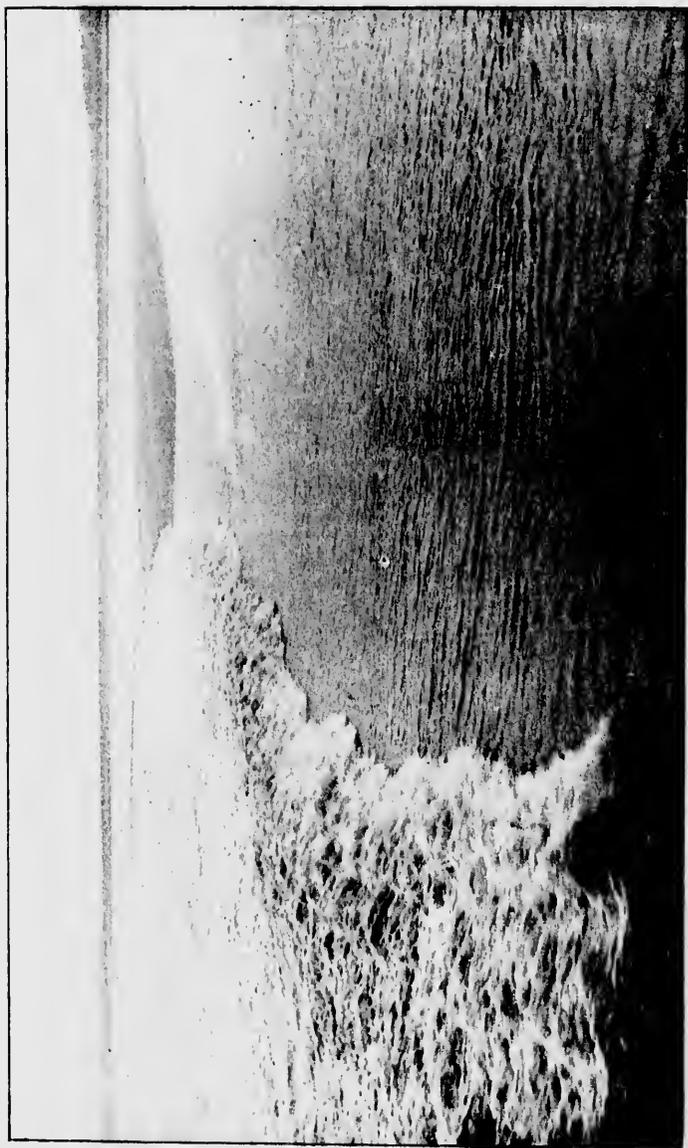

Hotel Frontenac, Quebec City— Intercolonial Railway of Canada

Quebec. Reaching that place their steps were retraced, and with good reason; for beyond it, to the south and east, the map showed nothing to tempt the pleasure-seeker any further. On the up-to-date map may be traced a line which stretches along the Lower St. Lawrence through the famed Metapedia Valley, skirting the equally famous Baie des Chaleurs and on through New Brunswick and Nova Scotia to the cities of St. John and Halifax. Arms reach out here and there, reaching to Point du Chêne, N.B., Pictou, N.S., and Sydney, Cape Breton. At Point du Chêne connection is made with the Charlottetown Steam Navigation Company for the "Garden of the Gulf," known as Prince Edward Island. This is the Intercolonial Railway of Canada, "The People's Railway." Built from a commercial point of view, the wonderful opportunities for the health and pleasure-seeker were never dreamed of in early days. Now it has become a great growing avenue of travel for those who seek rest and recreation in a glorious summer land.

Not that there ever is a crowd or a crush, such as the true pleasure-seeker or invalid aims to avoid. In the area of territory reached by this railway, there are so many places which attract that the traveller seeking the quiet in nature can always find a peaceful haven. It is a country of refreshment and rest for those who desire such, as well as a paradise for the fisherman and sportsman. One can enjoy the solitude of nature free from the intrusion of the crowd, and yet have all the privileges of the daily mails and the telegraph. And, withal, it is a part of the earth in which one may procure a maximum amount of pleasure with a minimum of outlay.

To the world-weary tourist who has been used to the confusion of the conventional summer resort, there may come a vision of this country—a country which lies by the sea and is tamed by cooling breezes from the ocean. It is a land where civilization has made its way, and yet not marred the beauty of nature. It is a country where the traveller will find much that is novel, much that will charm and much that will ever remain to him as a sweet remembrance of a pleasant clime.

It is wholly a matter of choice as to what point is chosen by the traveller for his entrance into this region which has so much in store for him. All roads lead to it; but, if coming from the west, after having seen the great cities and the vast resources of the Upper Provinces, he will begin at Quebec City, of which the name and fame have reached to every quarter of the globe.

Intercolonial Railway Passenger Station, St. John, N. B.

THE LOWER ST. LAWRENCE.

THE journey over the Intercolonial Railway begins at Lévis on the opposite side of the river from Quebec City, and for the next two hundred miles or so, the traveller passes through a purely French Canadian country. One after another the typical villages come into view with their low-lying buildings and quaint cottages, built to withstand the keenest cold of winter. In the midst of these looms up the church, usually a substantial edifice of stone, while here and there a large wayside cross, on some distant hill, stands out in bold relief against the sky. A quiet people are these habitants of the Lower St. Lawrence, simple in their tastes, primitive in their ways, having an ardent devotion to their mother tongue and mother church.

A drive of five miles from St. Paschal Station brings one to **Kamouraska**, a village beautifully situated on the shore of the St. Lawrence. It is located on a point which reaches seaward, and has a fine, well sheltered sand beach about half a mile in length. It has great natural advantages, and the bathing is especially good. A number of picturesque islands in the vicinity afford additional pleasures to boating parties.

Rivière du Loup is a summer resort of long established reputation. A long and somewhat hilly road leads from the station to what, though apparently a part of the village, is known as Fraserville. Beyond this again is the St. Lawrence, with its splendid privileges for bathing, boating, shooting and fishing, in the proper seasons. Most of the leading men of Canada, including the Governor General, spend portions of their summer here.

Steamers furnish opportunities for visiting the more notable watering places on the northern shore. Mention may be made of Murray Bay and Tadoussac, but by far the most wonderful sight for the tourist is the famed Saguenay River. It is one of the most remarkable of nature's works in a continent where natural wonders abound.

Six miles below Rivière du Loup is **Cacouna** Station. The name has a musical sound, but as seen from the cars there is little to attract the eye. The *Cacouna* of which the pleasure seeker is in search is about two miles distant, and is reached by an easy drive over the smooth highway that descends to the shore. Then this great watering place of the Lower St. Lawrence invites the stranger to tarry and rest. With the mountains on one side and an arm of the sea on the other the air is very pure. It is so

Head of King Street, St. John, N. B., on the Intercolonial Railway of Canada.

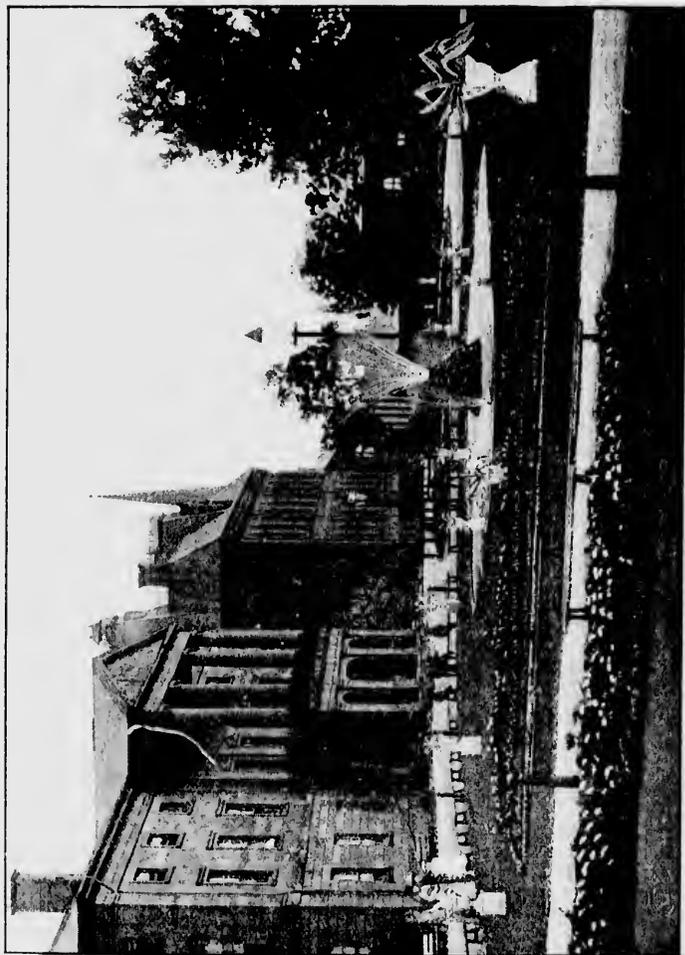

clear that one can scarcely believe the opposite shore is twenty-one miles away, but it is fully true in a straight line to the mouth of the Saguenay. So near do the distant hills seem that one might feel tempted to start for them with nothing more than a boat and a pair of oars.

A village on the low land by the shore with mountains separating it from the country beyond, confronted the engineers when they sought to locate the line of the Intercolonial at a point fifty-five miles below Rivière du Loup. It was **Bic**, then as now well termed "the Beautiful," an artist's paradise.

The mountains are around it, and it nestles at their feet amid a wealth of beautiful scenery. There is a harbour in which an ocean steamer may ride, a haven in which vessels may hide from the wrath of the storm-king. Romantic isles lie amid the waters, and crags of rugged beauty rear their heads around the bay. Pleasant beaches tempt the bather; placid waters invite the boatman; and beauty everywhere summons the idler from his resting place to drive or ramble in its midst.

Little Metis is situated on the shore of the St. Lawrence, at a point where the estuary begins to widen out so that the opposite shore is a faint line in the distance and much of the horizon is as level as upon the ocean. This gives the place more of the air of a seaside resort than many less favoured watering places, and the salt waves rolling in upon the sandy beach confirm the impression. The beach is about four miles long, hard, smooth and safe for bathers. The scenery is varied and attractive. One may drive for miles along the shore and enjoy the panorama and the sea breeze until weary. Inland are beautiful vales, and nooks, and brooks, and charming bits of landscape. Drives may be had at a small expense. One of these is to the Falls, seven miles away.

Leaving the St. Lawrence, the course of the traveller is south to the **Metapedia Valley**. Thousands are now familiar with it where hundreds had heard of it in other years. It has attractions for all. Those who seek the beautiful in Nature may here find it, while those who are disciples of Nimrod or Walton will find the days only too short, and the weeks passing away all too swiftly. The name Metapedia is said to denote musical waters, and the title is well deserved. Through the green valley it winds in graceful curves, singing the music of the waters as it runs. In thirty miles of its course it has 222 rapids, great and small, now swift and deep, now gently rippling over beds of shining gravel and golden sand. Here and there are the deeper pools in which lurk salmon of astounding size, for this is one of the salmon streams of which every fisherman has heard. For mile after mile the traveller watches the course of the river, so strangely pent in by the mountains on either hand, rising in every shape which

A View in Queen's Square Gardens, Charlottetown, P.E.I., reached by the Intercolonial Railway of Canada and its connections.

mountains can assume. Some are almost perfect cones, and others have such gentle slopes that one feels he would like to stroll leisurely upward to the summit, but the height, as a rule, is from six hundred to eight hundred feet. In some places in the Metapedia, the river, the highway and the railway crowd each other for a passage so narrow is the valley. Here Switzerland lives in miniature amid the mountains, while England and Scotland are around the lakes, streams and springy heather.

The heart of the Metapedia is seen at the village which bears the name of the river, at the junction of the Restigouche. It is a place of singular beauty, and the eye lingers lovingly on the beautiful panorama as it passes from the view and the train rushes onward to the boundary of New Brunswick. Here we catch sight of the River Restigouche, spanned by a beautiful and substantial railway bridge, over a thousand feet in length. The river is thickly dotted with low lying islands, rich with meadow land, their hues of green contrasting finely with the silver surface of the river. In truth this part of the road is a succession of bright pictures, a panorama wherein are shown some of nature's fairest scenes.

Campbellton, the first stopping place in New Brunswick, is a village with great possibilities. It is a summer resort, with every facility for salt water bathing, salt water fishing, and a good time generally. The situation is beautiful, because Campbellton lies at a point where a broad and beautiful river unites with the waters of a bay which has no rival in America.

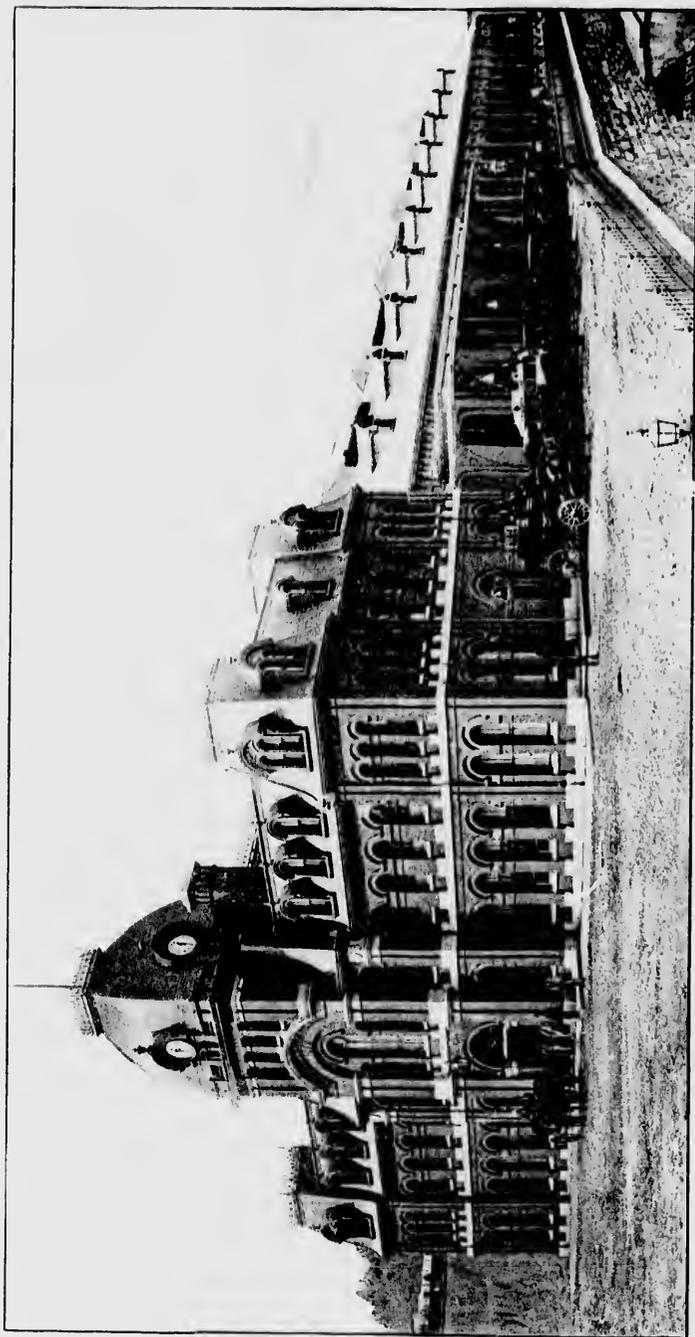

One of the fairest spots on the line of the Intercolonial is found at **Dalhousie**. Even when this place was not connected with the railroad, it attracted large numbers of visitors, and now that it is so easy of access it is one of the most popular of summer resorts. Its location at the mouth of the Restigouche, where the glorious Baie des Chaleurs begins, would in any event make the site one of unusual beauty. Fine beaches and water of moderate temperature tempt the bather. The sheltered position of the place gives it a freedom from raw winds, and fog that terror of so many tourists, is never known around this shore.

The **Baie des Chaleurs** is one of the most beautiful havens in America. Ninety miles long and from fifteen to twenty-five wide, there cannot be found in its waters either rock or other hindrance to the safe passage of the largest of ships. For many miles the Intercolonial Railway runs close to the shore, and few fairer sights are to be seen than the broad and beautiful expanse of water with its numerous little inlets on the New Brunswick side and the lofty and imposing mountains rising grandly on the shore of Quebec.

On a summer day, with a gentle breeze rippling the smooth surface of the water, the yachtman feels that he has at last found the object of his dream. There is no finer yachting bay on the North Atlantic coast.

A View in Queen's Square Gardens, Charlottetown, P. E. I., reached by the Intercolonial Railway of Canada and its connections.

Halifax Railway Station Interscholastic Railway of Canada.

BAIL DES CHALEURS TO GASPÉ BASIN.

THE land of Gaspé is out of the route of general travel, and is consequently out of the rut of the hackneyed excursion trips through Canada. It has not a promising look on the face of the map and the tourist who has not learned something about the country in advance will be very likely to seek his summer outing in parts of the land which seem more abundant in places and people. If he does so, he will miss very much that is of the rarely found and curious kind, much that can be found on no other part of the American continent.

To the weary and worn pilgrim from the busy world it is a pleasure, if not a luxury. From Croix Point to Port Daniel, the highway is like one long village street. It is settled from one end to the other, house after house cheer the sight, while the prospect everywhere is such as to appeal to the keenest senses of those who love the beauties of nature.

Truly a pleasant enough journey it is along this main street of the big peninsula in the summer day when one is free from the cares of business, and time is no cost. On the one hand is the sea, as calm at this season as it can be turbulent in the dark night of the spring and autumn. On its smooth surface, far and near, is an ever-changing panorama in which all kind of craft, from the tiny boat to the stately ship and ocean steamer have their places. Whether the way be along the Baies des Chaleurs, by the open waters of the Gulf or on the south shore of the Lower St. Lawrence, the waters are ever a source of delight to the eye, while the cool breezes gratefully temper the heat of the mid-summer sun. On the other hand rise the eternal hills, mountains overtopping mountains, some of them rising to a height of 1,000 feet, clad in the darker hues of ancient rock growth. There are places where the mountains rise but a narrow strip between their bases, and the sun, while again they are so far off that the sunshine on their foliage gives them varied and mellowed shades from the lightest to the deepest of green, while rocky cliffs stand stern and sombre in their native grandeur.

Carleton has been mentioned as an Acadian village, and it has remained almost wholly so since it was founded by the French who sought refuge here after the dispersion of their race in Acadia. More than nine-

Halifax Railway Station Intercolonial Railway of Canada.

A View in the Public Gardens, Halifax, N. S., on the Intercolonial Railway of Canada.

most of the residents are of Acadia descent, while French is the language spoken by all, and exclusively by many. The wealthiest land owner here, however, the proprietor of a fine old manor house, is not of that race. In recent years too, English residents of Ottawa, Montreal and Quebec, have spent their vacation here, and several typical summer cottages already dot the shore, while more are to be built. A prominent Ottawa physician sends patients here to enjoy an air that is not so strong as that further down the coast, while the bathing is all that can be desired. The water here is warmer than it is where there is a wider stretch of sea, and the beach is excellent. Along these shores occasional valuable finds of Gaspe people, in the form of various coloured pebbles and agates, are made.

Among the salmon rivers of note between the Restigouche and Gaspé basin are the Little Caspédia, Bonaventure, Grand and Little Pabos, Grand River, St John, York and Dartmouth, but these by no means exhaust the list. The Grand River may be taken as a sample stream, having a dozen pools within sixteen miles of its mouth. It is not a big river as might be inferred from the name, but it is a fine one, abounding in striking scenery and with crystal waters fed by springs which make the stream of almost icy coolness, even in the hottest days of summer.

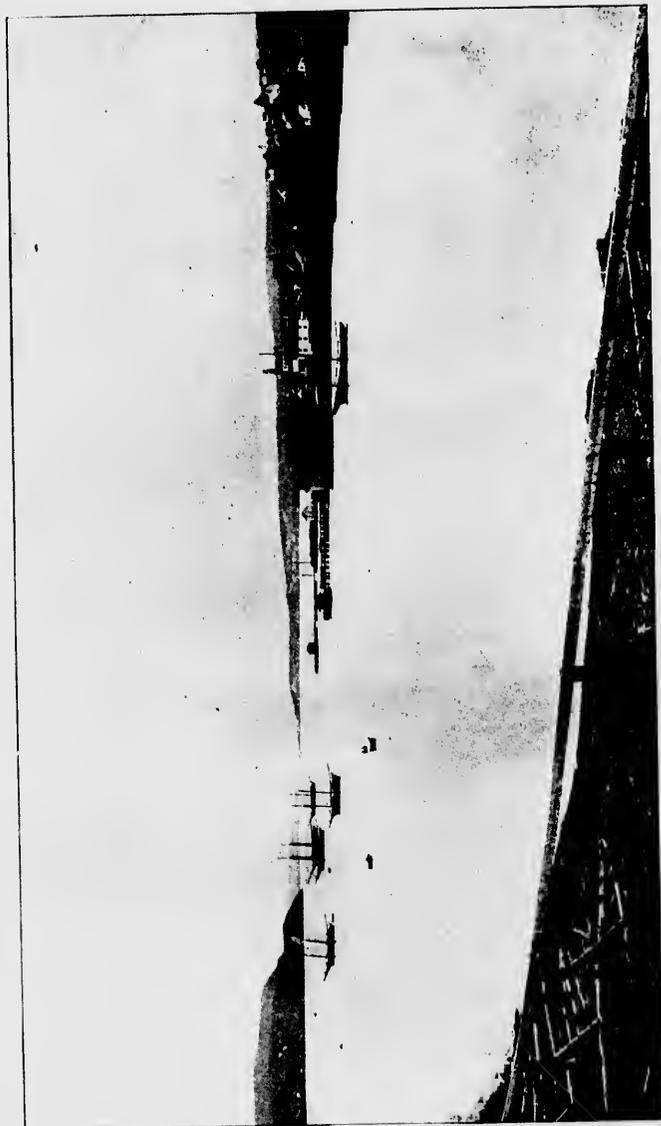

New Carlisle has much about it that is attractive. The average stranger is delighted to find that English is the language in the business community and that there is a regular arrangement of streets at right angles to the main street. Many of the modern houses, with their surroundings, are very tasteful in appearance, while there is a simple dignity about some of the older dwellings. One is more than ever impressed with an old manor house which appears to be of wood, when he is told that the wood is only a covering, and that not only are the main walls of stone but even the partitions are constructed in the same substantial old time fashion.

Not until one sees **Percé** can he have an adequate conception of the beauty of the scenery of the eastern end of the Gaspé Peninsula, and having once seen it, he realizes the difficulty of doing it even scanty justice by an attempt at verbal description. It is one of the places in regard to which language fails to convey to those at a distance a correct idea of what is revealed to the eye.

Whatever may be the thoughts of the stranger who lands at Percé before seeing the place, he can have but one feeling when he has seen it in the clear light of day. The term "clear" is not idly used in this connection. In the wonderful atmosphere of this part of the Gulf, the distinctness with which objects are presented to the view is surprising. In the

A View in the Public Gardens, Halifax, N.S., on the Intercolonial Railway of Canada.

Port Hawkesbury and Strait of Cansuau. Intercolonial Railway of Canada.

case of the **Percé Rock** it is almost startling. Seen from the shore, this singular natural monument stands out against the sea and the sky as sharply defined as if cut by the chisel of some Titanic sculptor. It looms in solemn grandeur as a revelation exceeding all that the fancy had been led to anticipate.

The walks and drives in the vicinity of this place are delightful, the chief of them is that to the mountain, which gives a good idea of the possibilities of this part of the world in respect to scenery. Up, up the hills one travels, until at last "La Table-à-Rolland," the summit of Mont Ste. Anne, is reached, at a height of nearly 1,300 feet above the sea.

The most convenient way to get from Percé to Gaspé is by water, but if one is fond of rugged scenery he can have it to his heart's content by taking the highway for a part of the distance, catching the steamer further along the coast. Though much of the journey will be out of sight of the water, the road will be around Mal Baie, as it is called in these days, though Morne Bay is the true title, derived from the abundance of codfish found there.

Gaspé Basin at morning, at evening, at all times, is a place of wonderful beauty, and dull must be the nature that is not inspired by the charm of the calm waters and the glorious landscape which appeals to one wherever the eye is turned. The stately hills rise in graceful dignity as a setting for this peaceful haven, and the pure bracing air is a tonic beyond the physician's art.

The town bearing the same name as this basin is finely situated on the heights overlooking that water, which is so securely sheltered by the hills that it seems the ideal of a place of shelter, whatever storms may rage. There is good hotel accommodation in the town, and the variety of pleasure excursions by land and water need only be limited by the time and inclination of the visitor. In whatever direction he goes will be found something he will be glad he did not miss.

No one who has time can afford to leave Gaspé, which is a place of refuge whither the weary and worn would flee for refreshment and rest and where he who is troubled by the din and distraction of the busy world may find a haven of perfect peace, without a closer examination of the surroundings than a steamer voyage can give. A visit to the Cape and to Ship Head will reveal a magnificent panorama of land and marine scenery.

View at Orange Lake, Bras d'Or Lake, C. B.—Intercolonial Railway of Canada.

BACK TO THE RAIL TRIP.

From Dalhousie the tourist returns to the main line of the Intercolonial via Dalhousie Junction, passing ideal spots such as Charlo, Jacquet River, Bathurst and Newcastle. From here on, until **Moncton** is reached, the railway passes through a country so far from the shore that none of the flourishing settlements are seen, and the traveller is apt to gain a poor idea of the country.

It may not be considered a compliment by a Monctonian, but to an American the city is perhaps more like those of his own country than almost any he will find in Canada. Its rapid growth in a few years, from a provincial hamlet to the hustling city of the present time, is also suggestive of the American idea.

The great spectacle of Moncton is its "hore," a most astonishing effect of the Bay of Fundy tides, which come tearing up the Petitcodiac River bed in an impetuous wall of water from four to eight feet in height; this is truly worthy of a stop for the express purpose of witnessing, and adding more to the already numerous phenomena of Fundy.

St. John, the commercial capital of New Brunswick, is one of the principal gateways to points on or reached by the Intercolonial Railway for tourist travel from Western Canada and the Atlantic Coast States, being the terminus of the Intercolonial and Canadian Pacific Railways, "All Rail Line" between St. John and Boston, and steamers of the International Steamship Company, and its varied industries are giving it a wealth of importance of which it scarcely dreamed in former years. Fine specimens of architecture are seen in the Intercolonial Depot, the Custom house, Post office, churches and numerous other buildings, public and private. Electric street cars furnish rapid transit. The wide straight streets cross each other at right angles and the location of the city is admirable in every respect. It is holding its own among the cities of Canada, and its growth is a healthy one.

Strangers, of whom increasing numbers visit this city every year, have a choice of several attractive drives. One of these is on the Marsh road, visiting the beautiful rural cemetery on the way. Another and very attractive drive is over the Suspension Bridge. A sail up the St. John River (the

View of Long Island, Little Bras d'Or. — Intercolonial Railway of Canada.

Hudson of New Brunswick) to the city of Fredericton, the capital of New Brunswick, is a trip that tourists should not fail to make.

A journey of about three hours is required from St. John to Moncton. The greater portion of the distance is through a well settled country, attractive in appearance.

Before continuing our trip further east over the Intercolonial, we will divert here and cross to Prince Edward Island, "The Garden of the Gulf."

From Moncton the Intercolonial Railway carries the traveller nineteen miles eastward to the landing of the Charlottetown Steam Navigation Company at Point du Chêne, where modern built steamers cross the Straits of Northumberland. We pass on the way the attractive town of Shediac, where bathing can actually be enjoyed in mild waters.

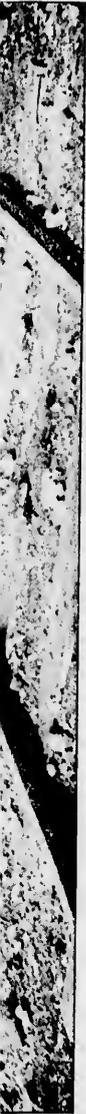

From Point du Chêne to Summerside it is thirty five miles of delightful sailing, and it is hard to imagine the nearly insuperable barrier that separates these two points in winter.

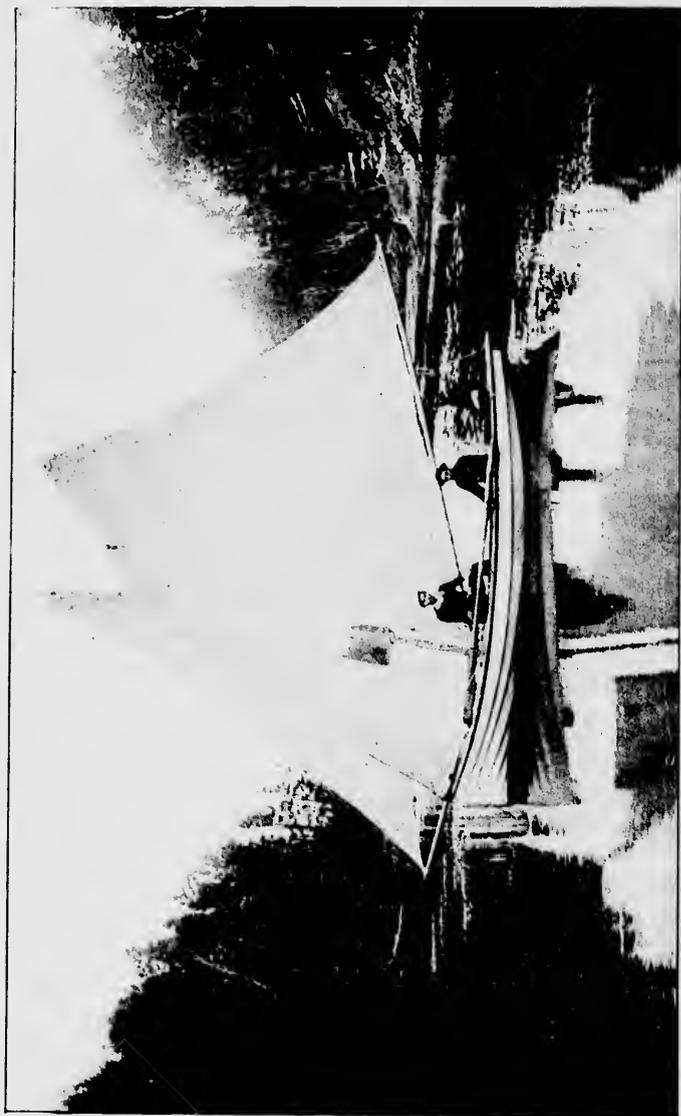

Summerside. As the steamer approaches the island, the first land sighted is the headland of Cape Egmont, in the far north, after which the course leads into Bedeque Bay and the busy ship-building town of Summerside. In this harbour lies the picturesque little island at the mouth of the Dunk River, which has been for several years quite a resort with its hotel and woody roads. Prince Edward Island is but three miles wide just here, the Bay of Richmond penetrating to that point on the other side. A little trip by rail to Tignish will reveal the quaint settlements inland and along shore of Scotch and Irish origin, and the pastoral beauties so characteristic of the whole island.

Charlottetown is the important city of the island, and is attractively and generously laid out. Its Public Squares, full of flowering plants and well arranged walks, are surrounded by substantial, not to say handsome buildings, that might do honour to a more important city. With all of its local attractions, Charlottetown offers a series of delightful land and water excursions and a host of fishing waters that are truly remarkable. The hills, though not high or abrupt, are gently undulating, and fresh with the glories of thrifty farm production, slope gently to the shores, where often the eye is caught by glorious patches of the bright orange and red of the red sandstone, and rise abruptly in places to a height of fifty or seventy five feet.

The possibilities for a roundabout route, taking in other attractions upon the return, are great. For one may, instead of retracing the route via Summerside and Point du Chêne back to Moncton, leave the island at

View of Long Island, Little Bras d'Or.—Intercolonial Railway of Canada.

Yacht Soiling near Sydney, C. B. - Intercolonial Railway of Canada.

Charlottetown, crossing, by steamer, to Pictou on the Nova Scotia shore of the mainland.

To reach Nova Scotia and Cape Breton one leaves Moncton by the Intercolonial, and is carried with a whirl southward through Memramcook and on to the great marshes of the same name. It is not too much to declare this great marsh land the most impressive on Canadian territory, if not on the continent. Near Memramcook station and on through Dorchester and Sackville to Ancher it reaches its full grandeur, the broad and simple plains broken here and there by the tidal river or the clustering haystacks.

From **Wentworth** the train begins a long climb of several miles up the slope of the Colequid Mountains, that line the northern shore with the picturesque bay of the same name. The outlook, which has been monotonous and limited, now opens into a landscape of irresistible beauty; one of quiet pastoral charm, as seen from a high mountain; stretching away for miles toward the strait, reaching its climax with the enthusiasm of the beholder near Folloigh Lake, a little eye set in its deep mountain socket, six hundred feet above the sea.

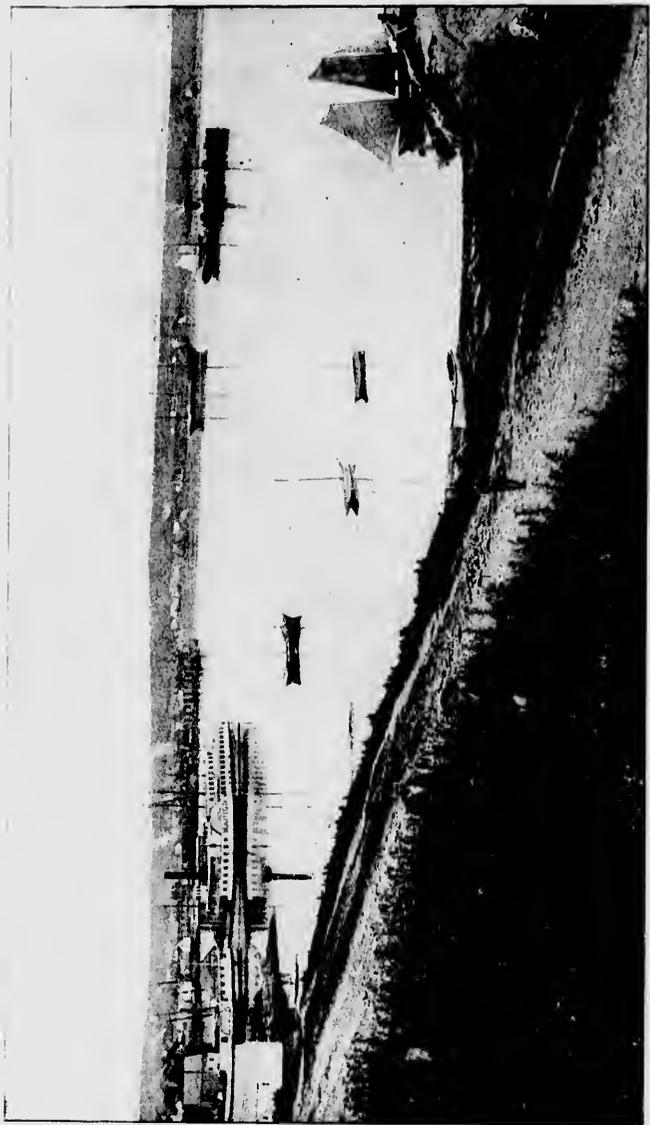

Truro, which is at the head of Colequid Bay, is a charming town; large, prosperous, aristocratic looking, in fact to Nova Scotia what Fredericton is to New Brunswick, the most attractive of its size. It possesses a remarkably pretty park and the most varied assortment of drives across mountain or marsh.

Halifax, like St. John, is another important gateway for tourist travel from Atlantic Coast States to points on or reached by the Intercolonial Railway. It is the terminus of the Intercolonial and Dominion Atlantic Railways and the Canada Atlantic and Plant Steamship Line.

It is a strong city in every way and has a great strength in a military point of view; it is strongly British in its manners, customs and sympathies; and it has strong attractions for visitors.

The seeker after a good view of the city and its surroundings may have the very best from the Citadel. It commands land and water for many miles. The arm, the basin, the harbour with its islands, the sea with its ships, the distant hills and forests, the city with its busy streets, all are presented to the eye in a beautiful and varied panorama.

From Halifax to **New Glasgow**, returning through Truro, the railway runs through a fine country, the most flourishing portion of which is not seen by the traveller. Large tracts of rich intervale and excellent upland combine to make it one of the finest farming districts in Nova Scotia.

• Sydney Harbour, C. B.—Intercolonial Railway of Canada.

From New Glasgow to **Antigonish** are stations whose names are either Scotch or Indian, little towns among fertile fields or along marshy streams; with now and then a glimpse across to the Antigonish Mountains. We are in the suggestively named townships of Maxwellton and Arrisaig.

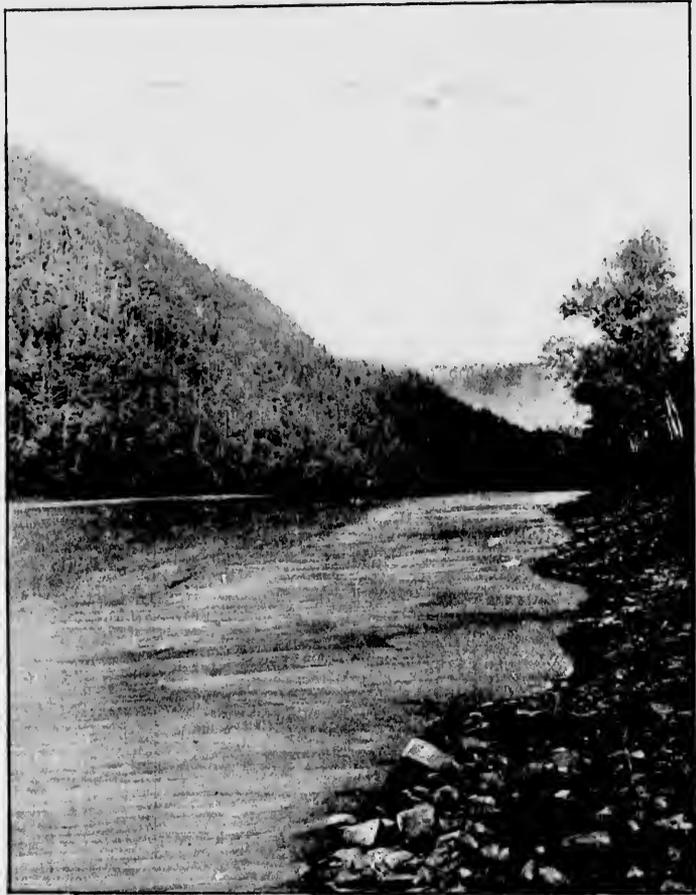

Beyond **Harbour au Bouche** the bristling head of Cape Porcupine looms up over the wilderness, a glimpse of the far-away George Bay is caught, then the train swings sharply to the right and with applied brakes we glide down into **Mulgrave** and cross by ferry the glorious Strait of Cansuau to the Ultima Thule of our travels and expectations, the fair island of **Cape Breton**.

Cape Breton is usually spoken of as an island, but it actually consists of a number of islands, while there are numbers of peninsulas, out of which even more islands could be made were there any occasion for the work. Water, fresh and salt, has been distributed very liberally in this part of the world, and it is to this that Cape Breton owes much of its charm as the paradise of the summer tourist.

The primitive simplicity which amused Charles Dudley Warner and other humorous writers is still to be found in many districts, but it is no longer a troublesome journey to reach even the mysterious **Baddeck** from any part of the continent. The Intercolonial system has opened up the land from the Strait of Cansuau to the Harbour of Sydney on the eastern shore. For much of the distance it runs along the borders of that wonderfully beautiful inland sea, the Bras d'Or, or of the rivers and bays that are tributary to it. The scenery is never tame, because it is ever varied, and there are places where the speed of the slowest train will seem but too fast to the lover of Nature's beauty.

On this coast, too, is a place quite famous ere the English flag waved in supremacy over Canada. It is **Louisbourg**, once one of the strongest fortified cities of the world, a city with walls of stone which made a circuit of two and a half miles, were thirty six feet high and of the thickness of forty feet at the base. For twenty five years the French had laboured upon it, and had expended upwards of thirty millions of livres or nearly six million dollars in completing its defences. It was called the Dunkirk of America. Garrisoned by the veterans of France, and with powerful batteries commanding every point, it bristled with most potent probe of war.

Every New Englander should visit Louisbourg and especially during the celebration in connection with the erection of a monument by the American Association of Colonial Wars this coming season, opening ceremonies on Monday, the 17th June next. The capture of Louisbourg by the indis-

Marshall's Gulch.—Intercolonial Railway of Canada.

ciplined New England farmer, commanded by William P. Phipps, a merchant ignorant of the art of war, was one of the most extraordinary events in the annals of history. The zealous crusaders set forth upon a task of the difficulties of which they had no conception, and they gained a triumph which should make their names as immortal as those of the "Noble six hundred." It was a feat without a parallel—a marvel among the most marvellous deeds which man has dared to do.

Restored to France by the peace of Aix la Chapelle, Louisbourg was again the stronghold of France on the Atlantic coast, and French veterans held Cape Breton, the key to the Gulf of St. Lawrence. The brief truce was soon broken, and then came the armies of England, and Wolfe sought and won his first laurels in the New World. Louisbourg fell once more and the knell of its glory was rung. The conquest of Canada achieved, the edict went forth that Louisbourg should be destroyed. The work of demolition was begun. The solid buildings, formed of stone brought from France, were torn to pieces; the walls were pulled down, and the batteries rendered useless for all time. It took two years to complete the destruction, and then the once proud citadel was in shapeless ruins. Years passed by; the stones were carried away; the dwellers along the coast; and the hand of time was left to finish the work of obliteration. Time has been more merciful than man; it has covered the gloomy ruin with a mantle of green and has healed the gaping wounds which once rendered ghastly the land that nature made so fair. The surges of the Atlantic sound mournfully upon the shore—the requiem of Louisbourg, the city made desolate.

The **Pictou** and **Oxford** branch of the Intercolonial extends from Pictou to Oxford Junction, a distance of 69 miles, may be made part of the route to Prince Edward Island or Cape Breton, or it may be utilized on the return journey. The road is finished with the same careful attention to details as is so noticeable on the main line, and it opens up a very important section of the country. By it access is had to Pugwash, Wallace, Tatamagouche, River John, and other places which have long had a prosperous existence and a more than local fame.

INSTRUCTIONS TO TICKET AGENTS.

Only Seasoning Tours can be extended, and other Tours made up from the List of State Trips over Connections herein and the Fares in Tourist Rate Memo. No. 303.

SUMMER TOURIST RATES, 1895.

Quote Fare Form 21 (last revised) when necessary for Ferry connections between Quilts and Quilts.

When Return Rates are given on the Return Tourist Form supplied, issue two Single Journey Forms at the Return Rate.

Tourist Forms are not to be used for local tours, but only in connection with through tours. When making up book, stamp each form and report each book separately.

For local return tours (round and returning same route) shown herein, use Summer Excursion Return Tickets.

Do not include under one ticket the tickets of two or more persons, but supply each person with a separate book.

Use blank Tourist Form 21 Blank to cover route for which you have not been furnished with regular single or return form.

Tourist Forms and Local Excursion Return Tickets can be issued between 1st June and 30th September, and are good for passage till 1st November, 1895.
