guages of the Bay of Fundy, to which is added thirty-seven feet which is

one foot below Neap tides, as stated in the Charts and sailing directions. The tides of the Bay of Fundy, however, afterwards descended nearly 8 feet below the zero of the gauges which does not effect our calculations.

It will be seen by the data and elevations on the annexed diagram that the surface of the marshes ranges from 90 to 93 feet above datum, or from three feet to six above the summit water in the proposed canal; and therefore no damage can arise to the hay-producing marshes by damming the rivers to the height proposed.—High spring tides of Bay of Fundy rise considerably above the highest of these elevations. Spring tides at Bay Verte rise to 73 feet above datum.

But on the other hand, damming the rivers will prevent the tides, and therefore the sedimentary matter held

in solution, covering the bogs and lakes, and consequently put an end to all further marsh-making by such means. However, it is doubtful considering the great elevation of the bogs above tide water, if the tide water will rise sufficiently to cover them.

drained. I believe it would not. Not so however as regards the lakes; the levels and soundings of the lakes clearly prove that the beds of the lakes are several feet below Spring-titles of the Bay of Fundy consequently a large extent of lake and probably some of the low-bogs are capable, by means of tide canals

which could not be done if the rivers are permanently dammed, as proposed. Indeed all the waters that all the rivers afford will be required to feed the projected ship canal in dry weather.

Yours, &c.,

#### THE ELECTION.

Before we issue our next number the Electors of Westmorland will be decided at the Polls the question of Sectarian Schools. What decision may be made we do not pretend to predict; it is exceedingly doubtful the electors fully realize the importance of the question submitted. We view the continuance of a Kell-Hatheway Government as no importance to the country, except so far as it is pledged to carry out the Free School System. The government is to be upset it seems, but is the aim and ambition of a designing political ring composed of men who are willing to sell themselves to the Roman Catholic party effect this object. Separate Schools will be the price of the Catholic support. It is attempted to alarm the electors by the cry of "Godless schools"; a cry used by dishonest ignorant men to catch the votes of those who, too indolent to inform themselves or too weak to think for themselves, are ready when a charge of irreligion is made to vote in such manner as to relieve themselves of any such imputation. We propose to inquire into a charge which is freely used against our school system and to test its truthfulness. We schools, we will define for the poses of this article, are those in which only secular education is given. Sectarian schools are those in which religious dogmas as well as secular learning are taught. The "Godless" means having no reference for God, impiety, wicked, sinful, having no belief in a God, as it is applied to schools where education is imparted, it charges the system as impious, wicked and atheistical. It is on this ground that the Catholics are yoked against the Protestants. Education is that pertaining to the present world, relating to the needs of life, making provision for the support of life, the preservation of health, the temporal prospering of men, of States, &c., or to the spiritual, not ecclesiastical. Reading, writing, arithmetic, keeping, land surveying, astronomy, geology, chemistry—in fact whole range of the sciences study themselves is according to view wicked and atheistical! It is there that could be more intelligently and absurdly false! That is all. These same branches, reading, writing, &c., when taught by themselves, are Godless, impious, and wicked, become exceedingly proper orthodox when taught in the school with ecclesiastical lessons. The difficulties of the multiplication table or the intricacies of fractions are horribly impious unaided by the presence of the cross! What is atheistical? An Orthodox—Treat! as mystically and expeditiously performed feat at lodgerman! Without any more space in exposing this palpably false, it might be that the term Godless merely is the absence of religious instruction, and is not intended as an

approbrious epithet. The fiery speeches of Catholic gentlemen at the St. John Mass Meeting; the instructions given to the French in this County; and the articles in the *Evening* all point out the fact that the Catholics consider it (as one of their speakers expressed it) born of Hell. But admitting it at the term "Godless" has this mild meaning, who perpetrate its use? Who associate it with the most bitter invectives against the School Act? Who endeavor to stir up the religious element in the community by the cry of "Godless Schools"? The enemies of the School Act! Denunciations cannot be too severe against those who use this whining, hypocritical cant!

#### Nomination Day.

The proceedings opened very quietly. The speeches of the Candidates were listened to with attention, by the large crowd present. No bitterness was shown between Messrs. Chapman and Humphrey and Mr. Edward A. Welsh looked down almost jovially upon both. The principals having had their fight in a very amicable manner, their seconds respectively went into the fray with great fury. Their minds were not satisfied with the mild justice done by the Candidates. After the matter-of-fact, Mr. McQueen, M. P. P., finished, the stern Presbyterian logic of Mr. Robinson and the oily rhetoric of Mr. Landry, M. P. P., were listened to.

Mr. Hanington M. P. P., and Mr. A. J. Hickman at once claimed the attention of the Electors. Side by side they addressed the electors; but their eloquent remarks were drowned in the shouts and noise and tumult of a multitude, one-half of whom, was determined to hear Hanington, the other Hickman. Mr. P. Doherty swung himself out of a window above and also addressed the electors on the copies of the day, adding slightly to the noise. A gentleman of the bruiser profession then appeared behind the orators in his shirt sleeves and with arms akimbo a la Sayers, announced his intention to see "fair play." He swung his arms about and winked at those nearest as much as to say that it would not be wholesome for any one to interrupt the fair play and harmony of the debate. A clash was made or the platform and the flow of eloquence momentarily ceased. Orators, by the cry of "Godless schools"; a cry used by dishonest ignorant men to catch the votes of those who, too indolent to inform themselves or too weak to think for themselves, are ready when a charge of irreligion is made to vote in such manner as to relieve themselves of any such imputation. #### Nomination Day.

TUESDAY, FEBRUARY 20, 1912.

Robert A. Chapman, was nominated by Gideon Palmer, Richard Lowerson, Joseph Cook, William Turner and others.

Mr. Humphrey, nominated by George Buck.

Mr. Welch, by Jacob Allen.

Mr. Alexander Robinson, by Thomas Baird.

The usual formalities having been gone through with, the Candidates commenced speaking outside of the Court House, a crowd of several hundred Electors having gathered.

Mr. Chapman, on opening, referred to the cause of his opposition to the Government. They were put in office on a platform of Reform and Retrenchment. Officers were to be abolished; expenditures curtailed. What have they done? They sent out useless and expensive delegations. One to Ottawa and one to Halifax and Chertown. They found the Government they went to see would have nothing to do with them; they had no power to act. Would not a few postage stamps have answered every purpose? No! because a corrupt Government depended upon these little jobs for bare existence. It has never made the least move to lessen expenses. After the pledges it has made, is not this sufficient to condemn them? Their action with reference to the River du Loup Railway should deprive them of the confidence of the people. They have given 10,000 acres of land per mile, to the Company; equal to 1,600,000 acres of the best timbered lands of the Province. They need not select them next the Railway, but have liberty to lay them off anywhere.

Is it not the Government, has built a lot of fine bridges on the North Shore. But are a few to be built there to the detriment of the service of the rest of the Province? How were these bridges built? Were they let to the lowest tender? Were they given out honestly and fairly? No. They were mere pieces of jobbery to perpetuate the rule of a corrupt government. It came before the people as an opponent of the Government; and now it is a mere subterfuge—a side issue—his enemies were trying to defeat him by diverting peoples minds from the real issue.

An attempt has been made to stir up Sectarian strife; to arouse a feeling between the Catholics and Protestants. He had been hounded through the County as an enemy of Protestant institutions, and a friend to Separate Schools. What does this cry mean? He was a Protestant as he had always been. He asked yesterday a brother of one of the Candidates, at Sackville, what was the meaning of all this hue and cry. ALBERT RAILWAY meeting took place on Tuesday at Hopewell Cape. It was large and enthusiastic. General resolutions passed that if English contractors did not commence work at once (ought to have commenced in Sept. last) the County would take measures to prevent subsidy lapsing. Claims of Albert Railway Co. and Mr. McHenry fully recognized. It is expected that English contractors will soon commence operations. If they do not the tender of Mr. N. Smart to build a narrow Gauge Road for \$14,500 will be accepted.

Who rules this County—2,600 English or 1,400 French? For twenty years the French have ruled the County of Westmorland: they have defeated every candidate opposed by the priests. Electors—it is for you to decide on Saturday next whether French rule shall continue or not.

A letter written by a Canadian gentleman resident of Scarborough, 70 years of age, furnishes some interesting information with reference to a family of remarkable longevity. There are nine persons in all, the family of one man, and their combined ages sum up 705 years. They are all living in Ontario save one, who is in Scotland. The eldest is 89 years of age, the youngest 70 years; and there are twins 72 years old. The ages run as follows:—89, 87, 79, 77, 75, 74, twins 72, 70. This is one proof of the healthiness of Ontario.

An extraordinary elopement took place at Bradford on Monday. A gay Lithuanian, a machinist by trade, captivated the hearts of two young damsels, and not being able to decide between them, determined to take them both to the land of "love and liberty." The worthies trio left there early on Saturday for Buffalo.

An enterprising burglar stole a ton of coal from a cellar in Newport, R. I., one night recently, the man of the house fearing to interfere lest he should get a dose of cold lead.

MANGANESE.—The "Truro Sun" reports the discovery of manganese near that village. Specimens have been sent to England.

The "Edinburgh Review" relates an anecdote of M. de Sainte-Buve, the popular French writer, who died last November in Paris. He once fought a duel. When the principals took their positions it was raining hard. Sainte-Buve had his pistol in one hand, and with the other hand he held up his umbrella. The seconds protested. "I have no objection to being killed," said he; "but as to being wet—no!"

A poor negro who was smitten by small-pox in Flint, Mich., was thrust into a railway car going South. Admitting to the conductor that he had the small-pox, he was put off the train to perish in the cold. He set out for the village of Holly, but was driven away by an officer at the muzzle of a loaded pistol. Sick, starving and freezing, he made his way to Pontiac, where he was graciously permitted to die in an old shed. That is the way they leave in Michigan of discouraging the small box.

"TRUTH STRANGER THAN FICTION."—We are informed that there is a widow woman now living in town, who in her younger days resided in Nova Scotia, where her father kept a light-house. One day during a violent gale a vessel was driven on shore, and out of her entire crew, a young lad alone was saved. Her father took charge of and adopted him as his son, and in due course of time he fell in love with the daughter. A lover's quarrel occurred as it oftentimes will during courtships, and he feeling considerably vexed, went away to sea. The family moved to Gloucester, and the daughter married one of our fishermen who was lost on Georges. Two years after this event, who should arrive in town but her first lover, whom she had not heard from since he went away. He learned that she was in town, and after renewing the acquaintance, they were married. Being tired of going to sea, he followed fishing and last season was among those who lost their lives on these treacherous fishing grounds.—Cape Ann Advertiser.

A woman and two boys were poisoned at Tracadie, P. E. I., last week, by drinking from a bottle found on the roadside, which was supposed to contain brandy.

The London Times was the first paper that took pay for marriage advertisements. Mr. Walter agreed to give the fees to his wife for pocket money, and at her death she gave the right to her daughter. When the right was repurchased, a few years ago, by the present proprietor of the paper, it was assessed at \$20,000 a year.

Wm. H. Cook, Tweed's favourite, who fled to Europe a few weeks ago, has, it appears, forged checks on a bank for \$18,000. There are five indictments against Comolly, and five new indictments against Tweed, two charges of forgery in the third degree, one grand larceny and one larceny.

A lady school-teacher in Omaha, having an inordinate dread of the smallpox, sent home a little girl because she said her mother was sick and had marks on her face. The next day the girl presented herself at the school-house, with her finger in her mouth, and her little bonnet swinging by the strings, and said to the teacher: "Miss—, we've got a little baby at our house; but mother told me to tell you that it isn't catchin'." The teacher said she was very glad, and told her pupil to take her seat.

We have known in our day a great many people of either sex, who were dissatisfied with their noses, which were either too small or too large or too much turned up, or snub, or in some way not to the taste of the involuntary wearers. Science, it seems, has come to the relief of such sufferers. Alexander Ross of High Holborn, London, advertises a Nose Machine by which the soft cartilage of the nose may be pressed into any desired shape, simply by waving the instrument an hour daily for a short time. "These have been old maids and equally old bachelors, with pug noses, who always slept with the organ bandaged down, in the fond hope of securing a graceful droop; and for the convenience of such unfashionably made-up people, Mr. Alex. Ross's machine will be positively invaluable.
