

CHIGNECTO POST AND BORDERER

SACKVILLE, N. B. MARCH 6, 1890.

Trade with the West Indies.

Mr. James A. Vanwart one of the principal promoters of the steamship line plying between St. John and the West Indies, who went on their steamer Portia on her initial trip, gives more than an encouraging account of the trip, financially and commercially. The steamer now running on the route is proving to be a first class vessel in every particular; comparatively capacious in carrying power and having accommodation for 50 passengers. As a sea going boat she has no equal sailing from St. John. It is a well established fact that the people of the West Indies are essentially British in sentiment and habit and are professedly anxious for closer trade relations with the Dominion and will doubtless give to the new line their hearty support. St. John merchants it appears are hardly known there except in the case of a few of the more extensive establishments. The most glowing description is given by those who had taken this trip of the Islands as a market for the surplus products of these provinces and Ontario. They need nearly all we produce and if our men can quote favorable rates they will readily trade; being as a rule wealthy they will pay the cash. Mr. Vanwart says that the question as to what we could quote for at is frequently asked, also about lumber and potatoes. The various Islands in the route of the Portia require large quantities of the products which herefore on account of the lack of efficient methods of transportation have been obtained from the United States, though the lumber originally came from Canada. Cattle are in great demand and buyers will guarantee that no loss will follow a test shipment of beef or mutton. The militia at the different posts consume a large quantity of mutton and sheep readily bring \$8 to \$10 on the foot.

In return the Islands can supply us with the usual goods of the West Indies and since Demerara has been found capable of producing bananas a profitable fruit trade may be the outcome.

On the whole the advent of this bill of transport will give to our farmers and merchants an opening for the superfluous products and while hay and other goods are low they may be shipped at a profit.

A BILL will shortly be introduced into the British Parliament to amend a law that has long been in force in that country. It proposes to remove some of the disabilities of the Roman Catholics in England. It will if passed make them eligible for the position of Lord Chancellor of England and also Irish Lord Lieutenant. The position they would then be debared from occupying would be as sovereign ruler.

THE JAMAICA exhibition to be opened on January 27, 1891, will afford enterprising manufacturers and merchants of Canada an opportunity of making a bid for that market and extending a knowledge of the Dominion and her commercial capabilities. The exhibition will be one of all classes of products of the soil, manufactures, and arts, spices, and educational exhibits. In view of the opening of direct steamship lines to that port from Canada and in view of the importance of increasing the sale of our products in that direction it is hoped that our manufacturers will take advantage of this exhibition and be represented.

It is earnestly hoped that the conference now going on at Washington between British, Canadian, United States and Russian representatives will settle for all time those questions which have been the subject of much hard feeling between the different nations. Among the subjects to be considered is the proper compensation of Canadian seafarers for injuries done to them in 1886 and a detaching of the Russian Minister with reference to the views of his government in reference to protecting the seals during their breeding season. The success of the recent negotiations concerning the Extension Treaty is indicative that a settlement will be reached to favorable to all.

WHAT MUST certainly appear strange to persons living outside of the Dominion has been brought to light by a French Canadian of Montreal. It appears that it is not definitely decided who the real discoverer and first explorer was. In a petition presented to the Minister of Education of Ontario asking that the National flag be hoisted above the different schools in that province on memorial anniversaries, the following was given as an appropriate occasion: 5th April 1492 Canada discovered by St. Sebastian. It now inspires that the French children of Quebec are taught that Jacques Cartier was the discoverer and the scholars in other parts of the Dominion that the Cabots were the first to explore the country.

THE RECENT outrages committed upon their prisoners by the Russian Government in Siberia has had the effect of arousing throughout the entire world a feeling of indignation and regret, that a country possessing the perfected social and court system that Russia does should be guilty of such gross outrages against humane sentiment and civilization. Men, women and children, regardless of their previous position or circumstances of existence are bundled together in one common hole and subjected to the hardest treatment conceivable by their captors. There are fewer cases more revolting in the world's political history than that which has been given to the public in which a lady of high social position, refused to comply with the unnatural demands of a person governor was flogged nearly to death and committed suicide to cover her remorse. The clubs of London and several governments have already sent protests against these indignities to Russian prisoners.

Maritime Matters.
