UPPER CANADA COLLEGE,

TORONTO.

FOUNDED 1829.

THE College was founded in 1829 by Sir John Colborne (Lord Seaton) after the model of the great Public Schools of England, and continues to be carried on with special regard to the ideal aimed at in those institutions. It is situated in Deer Park, a suburb of Toronto, about a mile from the city limits. It is built upon a gravel soil facing the south and is about 3 miles from the lake front. The lawns and park cover an area of 30 acres. The landscape scenery around the College is the finest about Toronto; from the windows of the College the country may be seen for miles around; to the north may be seen the Oak Ridges, 25 miles distant; to the east the Scarborough Heights; to the west the hills of Caledon; and to the south, overlooking the city and the island, the broad expanse of Lake Ontario.

School Buildings—The school building is in the form of an E, the main part facing the south and the wings running to the north. The foundation is of brown Credit Valley stone for about six feet above the ground line; the upper structure is of brick. The class rooms are spacious and well lighted; each bed-room is furnished for one or two boys; and the whole building throughout is heated by steam, and ventilated by large exhaust fans driven by electric motors at the base of tall ventilating shafts. The system of lighting is the Edison Incandescent Electric Light generated by large dynamos; the all-night lighting in the halls is kept going by storage batteries. The hot-water system is supplied by rain-water tanks of 60,000 gallons capacity; the drinking water is supplied either from the large well sunk to a depth of over 100 feet, or from the city water system. The plumbing is of the most modern description, and the drainage is perfect.

Steam Laundry—The steam Laundry is fitted up with the most approved appliances. It is for the exclusive use of the College. In this way the possibility of infection is avoided.

The Library—A carefully selected library and a reading room are open to the pupils. The library is added to each year. It is expected that novels brought back by the boys will be submitted to the House-masters,

The Laboratory is well furnished with apparatus and chemicals, for the teaching of Physics and Chemistry. Adjoining the laboratory is the lecture-room built in the form of an amphitheatre. A carefully devised system of mechanical ventilation keeps the air in these rooms always fresh. Models and charts of the highest excellence are provided for the teaching of botany and physiology.

Gymnasium—The gymnasium is a lofty building 80 feet long and 40 feet wide. It is fitted with the necessary appliances for teaching the new Physical Drill; regular instruction is given in light and heavy Gymnastics, Calisthenics and Military Drill. Physical culture is under the supervision of the College Physician, who examines the boys from time to time as to their fitness to undergo gymnastic training. The instructor is always in attendance when the gymnasium is opened.

The Rink—Adjoining the Gymnasium is a large Covered Rink, used for drill in summer, and skating and hockey in winter.

Swimming Bath—The Swimming Bath is made of concrete cement, 6 feet deep at one end and 3 feet at the other. This room is fitted up with dressing rooms and two shower baths supplied with hot and cold water. An instructor will be in attendance when the boys use the bath and every boy will be taught how to swim. As the bath is heated by steam coils it will be kept open winter as well as summer.

The Museum—The Natural History collection of the school consists of plants and skeletons of animals. There are also fossils and other specimens illustrating the Geology of the Dominion. The Geological specimens were given to the College by the director of the geological survey of Canada.

School Games—Much attention is paid to the physical development of the boys. Physical training forms part of the regular school routine, and all boys who are not hindered by weak health are expected to take part in school games. The part of the grounds set apart for this purpose covers over 20 acres. The boys will be divided into sets for cricket and football, according to their proficiency. There are several lawn tennis courts, and a $\frac{1}{4}$ mile race track for bicycling and running is just constructed. For winter sports there is a large covered skating rink, and several out-door ones.

Examinations—There are two Annual Examinations of the whole College, one in unseen subjects held just before the Christmas Holidays, and the General Promotion Examinations held immediately before the Midsummer Holidays. The boys who fail at the Promotion Examinations, in any or all of the subjects, may be re-examined at the opening of the College in September if it is desired.

Scholarship—"FREDERICK WILLIAM MASON SCHOLARSHIP," of the value of \$25, founded by J. Herbert Mason, Esq., awarded to the Upper Sixth Form boy who ranks highest in general proficiency in all subjects of examination at

Junior Matriculation, Toronto University, but who does not win a University Scholarship.

Exhibitions—Ten exhibitions, open to candidates from any school in Ontario, are annually competed for; one in each of the Departments of Classics, Mathematics, Modern Languages, Science, and in General Proficiency in the Fourth and Fifth Forms respectively. The holder of an exhibition is entitled to free tuition for the year next ensuing the winning of the same. The Examiners for Exhibitions are unconnected with the College.

Medals—1. HIS EXCELLENCY THE GOVERNOR-GENERAL'S MEDAL.—This Medal is awarded annually to the boy who ranks first in General Proficiency at the leaving examination of the *Sixth Form*. It carries with it the rank of "Head Boy" for the year.

2. THE J. HERBERT MASON MEDALS (Gold and Silver).—These Medals are awarded annually to the two boys, members of the upper school, who are considered by the masters and pupils to possess in the highest degree the following characteristics: "Cheerful submission to authority; self-respect and independence of character; readiness to forgive offence; desire to conciliate the differences of others; and, above all, moral courage and unflinching truthfulness." It is through the liberality of Mr. Mason, who donated to the College Board \$1,000, that these medals are annually offered for competition.

Prizes—I. SIXTH FORM PRIZES (awarded at the Leaving Examination each year)—1. *The Classical Prize* to the boy who ranks first in Latin and Greek. 2. *The Mathematical Prize*. 3. *The Modern Language Prize* for proficiency in English, French, German, History and Geography.

II. J. ROSS ROBERTSON PRIZES.—Books to the value of \$150 are annually presented to the College by J. Ross Robertson, Esq., to be awarded in each form of the College for proficiency in Canadian History and Geography. No boy will be allowed to take two prizes in the same school—that is, he may take it once in the lower, once in the middle, and once in the upper school, and to be eligible for the prize in the upper school he must be a pupil of the college for at least a year.

III. THE HOWLAND PRIZE.—Given by W. H. Howland, Esq., late Mayor of Toronto, to the pupil (who must be the son of an old College boy) who ranks highest in his form.

IV. THE GRAHAM PRIZES.—These prizes given by D. Graham, Esq., of Montreal, are awarded to the boys who rank highest in their respective schools (Upper, Middle and Lower School) for a knowledge of Bible history.

V. THE WILLIAMSON PRIZES.—Presented by W. Williamson, Esq., for a knowledge of the use of Globes, \$15 and \$10 in books.

Course of Instruction—The College Class-rooms can accommodate about 300 pupils; already over 8,000 of the youth of the Province have received their education in whole or in part within its walls. The number in each

class is strictly limited in order that the pupils may enjoy as far as possible the combined advantage of private tuition and public school education.

The School is divided into—

- (1) THE UPPER SCHOOL, comprising the
Upper Sixth Form (Senior Leaving or Honor Matriculation Classes).
Lower Sixth Form (Junior Leaving or Pass Matriculation Classes).
Fifth Form.
- (2) THE MIDDLE SCHOOL, comprising the
Fourth Form, Upper Modern and Upper Commercial Forms.
Third, Lower Modern and Lower Commercial Forms.
- (3) THE LOWER SCHOOL, comprising the
Second Form.
First Form.

The course of instruction consists of :—

I. The Classical Department :

In this course the College is divided into Six Forms or Grades, and the regular curriculum extends over a period of six years, though by steady application and hard study some boys are able to pass through the Six Forms in five or even four years. The full curriculum embraces an extended course in Biblical knowledge; Latin, Greek; Arithmetic, Algebra, Euclid, Trigonometry; French, German, English Grammar, Literature and Composition; History and Geography, both ancient and modern; Chemistry; Physiology, Physics, Botany; Freehand Drawing, Music, Gymnastics, Fencing, Drill Exercises and Swimming.

To complete the Classical Course the following subjects must be taken :— Latin, Mathematics, English History, Geography, and one of the following groups: (a) Greek, (b) French and German, (c) French and one of the Natural Sciences, (d) German and one of the Natural Sciences.

Pupils may enter at any time, and at any period of the course; the best time to enter, however, is at the commencement of the session in September, when the classes are organized for the year.

II. The Modern or Science Department :

This course includes French, German; English Grammar, Literature and Composition; Modern History and Geography; Arithmetic, Algebra, Geometry, Trigonometry; Physiology, Botany, Physics and Chemistry (Theoretical and Practical); Drawing (the Primary Course of the Government Art School Curriculum); Vocal Music; Gymnastics, Fencing, Military Drill and Swimming.

To complete the Modern Course the following subjects must be taken :— Mathematics, English History, and Geography, Natural Sciences, Botany, Physics and Chemistry, and either French or German; both are recommended.

To enter this department the pupil must have passed through the First and Second Forms of the Classical Course, or must have passed the High School Entrance Examination.—

It extends over a period of three years, and is a preparatory training for the School of Practical Science.

III. The Commercial Department :

The design of this Department is to afford boys intended for business a thorough grounding in the English and Mathematical subjects of the Classical Department, together with French and German, and at the same time to give them an efficient training in *Book-keeping* in all its phases possible, and a general knowledge of the routine of *Banking, Store-keeping, Shipping, Insurance, Business Correspondence*, and the *handling* of Commercial paper of all kinds. *Shorthand* will be carried up to the point of efficiency as to speed, and *Type-writing* as practically applied in turning out commercial documents, will also be taught. The complete course will extend over a period of two years, and an effort is made in this Department to combine all the advantages of a practical business education with the mental culture of a classical course. The course is similar to the one prescribed by the College of Preceptors, England, and adopted by the London Chamber of Commerce. The qualifications for admission to this Department are the same as those required of boys entering the Modern Course, viz :

- (1) Having "passed out" of the Second Form.
- (2) Having passed successfully the High School Entrance Examination, or the equivalent of these.

To complete this course the following subjects must be taken : Arithmetic, Algebra, Practical Geometry, Linear Perspective, English and Literature, History and Geography, Book-keeping (single and double entry), Banking, Commercial Law, Business Usages, Indexing and Precise Writing, French or German.

IV. The Musical Department :

This Department includes a training in Vocal and Instrumental Music ; Harmony and Counterpoint. Arrangements have been made for instruction on the Piano, Violin, Violoncello, Flute and Piccolo, Cornet and other brass instruments. It is fully expected that an Organ will be placed in the public hall before the close of the session.

In the Theoretical Department pupils can have their choice of the English or German School of Theory and Composition, which will comprise the following subjects :—

- 1st year—Harmony.
- 2nd year—Harmony, Counterpoint, beginning of Canon and Fugue.
- 3rd year—Harmony, Counterpoint, Canon and Fugue, Form and Composition.

Pupils desiring the English course will go to the Musical Director, Mr. Walter H. Robinson, and text books chosen from the following list will be used:—Cumming's Rudiments, Stainer's Primer on Harmony and Composition, Ousley's Harmony and Form, Prout's Counterpoint, Instrumentation and Fugue, Banister's Harmony and Counterpoint, Bridge's Counterpoint (Simple and Double), Richter's Counterpoint, Higgs' Canon and Fugue, Bouavia Hunt's History of Music.

Pupils desiring the German course will go to Mr. W. O. Forsyth, and the text books will be

Vol. I.—Harmony.

Vol. II.—Counterpoint (Simple and Double).

Vol. III.—Canon and Fugue.

Vol. IV.—Musical Form, by Dr. S. Jadassohn, the famous German composer and Theorist.

Books for reference: Richter's Harmony, Counterpoint, Canon and Fugue.

V. *The Art Department:*

In this Department will be taken up the subjects of the Advanced Art Course, and of the Mechanical Course in the work prescribed for Government Art Schools.

The pupils of the Musical and Art Department must take some of the subjects of the Classical, Modern or Commercial Departments—to be selected by the Principal and Masters—so as to employ fully the time of the pupil and to make the work equivalent to the work in the other departments.

Entrance Qualification—The qualification for admission into the First or Lowest Form is the possession of a fair knowledge of English, Reading, Spelling, Writing, and the first Four Rules of Arithmetic. Pupils ought to enter the First Form at about ten or eleven years of age, though they may be received at an earlier age, if qualified, as systematic early training is very important.

Applicants for admission to the Higher Forms are subjected, if necessary, to an examination corresponding to the form for which their previous general studies may have fitted them. If above fourteen years of age, they are required to present a certificate of good moral character from the Head Master of the school last attended by them.

THE BOARDERS

Occupy the houses of the College building, and are under the immediate supervision of the Principal and the Dean of Residence. In each house there are from 25 to 35 boys, presided over by a resident Master. The system adopted is that of single or double bed rooms, furnished in a substantial home-like manner. The bedsteads are made of iron, furnished with steel woven spring mattresses; all the beds are furnished with the finest quality of horse hair mattresses made especially for the College. The health and comfort of the boys are looked after by an experienced matron. There are spacious and comfortable quarters, isolated from the rest of the boys' rooms for sick boys who will be under the immediate care of the matron. All the boarders except the senior boys prepare their work in the presence of the study masters, whose duty it is to supervise and direct the boys in their studies. Boys in the Sixth Forms, as a rule, are allowed to prepare their work in their own rooms.

On Sunday, all boarders, whose guardians do not object to it on religious grounds, attend Divine Service in the Hall immediately after breakfast. The Service consists of the reading of passages of Scripture, the prescribed course of Prayers, and chanting of Psalms, and singing of selected Hymns by the school choir.

From the Hall the boys go to Sunday School, being divided for this purpose according to the Church or Religious Denomination to which they belong.

From the Sunday Schools the boys go to Church, attending the Churches in the neighborhood that belong to their own Denomination. In each case they are accompanied by one of the House Masters.

In the evening the boys that have invitations to friends in the neighborhood are allowed to accept them, returning to the House punctually by half-past nine, when the Evening Service of the School is held.

For the convenience of boarders living at a distance, it has been arranged that they may remain in residence during the vacation at Christmas and Easter; but a special charge of four dollars and a half per week will be made in each case.

The boarding house is conducted as an integral part of the institution, and the charges are as low as is compatible with the liberal style in which the establishment is conducted—profit not being the object, but the supplying of

a need felt by the country at large ; namely, a well managed boarding house, in which, while the boys enjoy all the advantages of the educational system of Upper Canada College, their parents may feel confident that the moral, physical and æsthetic culture of their sons is a subject of serious attention.

Every boarder is required to bring with him a certificate of good conduct from the Master or Tutor under whom he has been previously educated. The enumeration of the contents of his wardrobe is to be given to the Matron. *One month's notice is expected before the removal of any pupil.*

A limited number of Day Pupils residing at a distance from the College may have the privilege of lunching at mid-day in the College Boarding House on paying \$9.00 per term.

MILITARY DRILL.

A Drill Association is organized among the various forms of the school ; boys over 14 years of age, who are qualified physically for the work, may join the Rifle Company—a uniformed infantry company formed in accordance with the regulations of the Militia Department of Canada, and under the supervision of the Deputy-Adjutant General of Militia. The cultivation of an erect bearing, of a spirit of proper subordination to authority, and of a manly *esprit de corps* is the design of this department. The uniform, which each member purchases for himself, consists of a dark blue shell jacket trimmed with white ; trousers same material ; Forage cap with College badge. The company is furnished, free of charge, with belts, bayonets and the Peabody rifle. The armory will be fitted up with racks for rifles, and lockers for clothing ; if possible a bugle band will be organized among the boys belonging to the company.
