THE invention of the paper collar was of positive benefit to the world, furnishing as it did, a neat, clean, and most economical art cle of apparel. But it never did answer all the purposes for which it was designed, owing to the irail nature of the material. The problem has been to make a cloth collar as cheap as paper that would last longer and could be made always fresh and bright. The new "44" collar, now upon the market, fills these requirements per ectly. It is made entirely of cloth, three thicknesses being used; its closely resembles the finest linen that it might be sold anywhere follinen: and, no matter how much it may be soil ed, it can be cleaned and made as bright as every by the application of a damp sponge or cloth.
