SAINT ANDREWS, NEW BRUNSWICK, THURSDAY MORNING, APRIL 27, 1843.

[17s. 6d. sent by Mail

### Arrival of the Britannia!

TWENTY FOUR DAYS LATER FROM EUROPE.

The Mail by the Steamer Britannia arrived at Halifax on Monday the 17th inst. in a passage of 13 days; and received here on Friday by the Steamer Herald. The Britannia brought 63 passengers, 21 of whom were for Halifax.

Our London dates are to the 3d, and Liverpool to the 4th inst. The commercial news is more cheering than any we have received for a long time. In every department of trade the aspect was most encouraging. Willmer and Smith's European Times of the 4th says—"A better feeling pervades the manufacturing and the commercial classes than has been apparent for a long time. An opinion is prevalent that our dark night will be succeeded by a fine dawn and a brilliant noon day."

[From Willmer & Smith's European Times.]

**Parliamentary.**—The last two or three weeks present nothing strikingly interesting to Americans, with the exception of the debate in the House of Commons on the Ashburton treaty. That debate, notwithstanding the ability with which it was marked on the part of the mover, Lord Palmerston, and the brilliant rejoinder of Sir Robert Peel, fell lifeless on the house and on the country. Regarded as a mere personal display—analyzing the points in dispute from their origin to their final settlement, sprinkled with bitterly sarcastic sneers at the nobleman who carried the negotiation to a successful termination, and showing where he erred by a departure from the usual tortuous windings of diplomacy—the speech of Lord Palmerston was extremely happy. But the practical style in which Peel met the question, pointed out its difficulties, and the paramount necessity that existed for destroying a moral volcano, which threatened at every moment to explode, and involve two powerful nations, more immediately connected with each other by language and consanguinity than any two nations in the world, in the horrors of war, told irresistibly. Besides, he clearly demonstrated that the terms were more advantageous than the Dutchman's award gave his predecessors.

Dr. Robert Southey died at his residence, Keswick, on Tuesday March 21.

In the House of Commons last night, Sir R. Peel stated in a reply to a question from Lord John Russell, that he had received despatches from Mr. Fox with a copy of the President's Message and the communication of Mr. Webster, and that he would lay them before the House. The Government had not given any instructions to Lord Ashburton that modified Lord Aberdeen's Despatch of December, 1841—by its principles they were determined to adhere.

The Thames Tunnel was opened on Saturday, the 25th ult. It has cost nearly three quarters of a million of money.

In the Prerogative Court, a few days back, three codicils to the will of the late Marquis of Hertford, one of them leaving \$10,000 U. S. bank stock to Mr. Wilson Crocker, were declared invalid.

The shock of an earthquake was experienced at Liverpool, on the morning of the 17th ult. Persons were awakened out of their sleep by the shaking of their beds and houses. Similar symptoms were experienced at the same time at Manchester, Preston, Kendal, various parts of the North of England, the Isle of Man, and Wales. The shock was also felt in Guernsey.

The Council of the Anti-Corn-Law League have given the manager of Drury-lane theatre £500 for the use of the theatre during the five Wednesdays in Lent, making a rent of £100 for each night. The attendance at the theatre on the nights of these meetings has been immense, and the speeches in favor of free trade very effective.

The Right or Visit.—Sir Robert Peel stated in the House of Commons, that the Government had not given any instructions to Lord Ashburton that modified Lord Aberdeen's despatch of December, 1841—by its principle he has determined to adhere.

The custom duties at Liverpool for two days of last week amount to £50,000!

A contagious complaint is now very prevalent in the metropolis, which is very severely felt by the police and others exposed to the weather, particularly during the night. It attacks first the mucous membranes of the stomach and lungs, and produces generally debility, accompanied with great depression of strength and numbness of the limbs.

His Majesty the King of Hanover is expected to arrive on a visit to England about the middle of May.

Anticipation.—Mr. O'Connell, it appears, has announced the erection of a building, which is to serve as the Irish houses of parliament, after the repeal.

The Portuguese Government obstinately refuse to ratify the Commercial Treaty with Great Britain.

The Duke of Manchester died at Rome on the 18th of March.

### From Charles Willmer's News Letter, April 4th.

STATE OF TRADE.

The decided improvement which has lately manifested itself in the trade of this country, will be viewed with satisfaction by our American friends, as from their intimate connexion with us, a corresponding effect is certain of being produced upon their own interests. The firmness which has characterized this improvement entirely diverts it of any feature which might lead us to attribute it to a mere momentary cause, and to view it as one of those bright gleams of prosperity which might naturally be expected occasionally to visit us, even if our commercial interests were fast crumbling to decay. Such, we rejoice to say, is not the case; and we have no hesitation in attributing the present fortunate event to causes natural in their operation, and lasting in their effects.

**Manchester.**—The Manchester market for goods has been in a very healthy state throughout the month, and a large business done, especially in the plain fabrics adapted for India and China.

**Junction of the Atlantic and Pacific Oceans.**—A London paper, in an article, showing the practicability of a ship canal across the Isthmus of Panama, at a cost of a million and a half sterling, proceeds to ask the question—Would it pay? which it thus answers:—Ten per cent interest on a million and a half would amount to £150,000 per annum. Add to this, £25,000 for annual expenses on the canal—£175,000. The saving to the merchants and ship owners of Europe and America, trading on the west coast of America, to Australasia, Oceania, and Eastern Asia, would be very great. A month at the least would be gained on the voyage; diminishing to that extent the wages of mariners, the expense of provisions, the interest on capital. The wear and tear of the ships would be less; the expense of insurance would be diminished. All these advantages would be cheaply purchased by canal dues of 10s per ton. At this rate, the passage of 350,000 tons of shipping along the canal annually, would yield the sum of £175,000.

**The Health of Her Majesty.**—Her Majesty continues to be in the enjoyment of excellent health; and notwithstanding the proximity of the event which is looked forward to with so much interest, Her Majesty and Prince Albert are daily to be seen walking in the gardens at Buckingham Palace as early as eight o'clock in the morning. The Prince of Wales and the Princess Royal are also in the enjoyment of robust health, but during the prevalence of the present cold, easterly winds their royal highnesses are not allowed to out, and the picture gallery is appropriated to them, as the place of their infantine exercises and sports, instead of the open grounds of the palace. Their royal highnesses have to be dressed and on parade every morning by nine o'clock. Both Her Majesty and the Prince are remarkable for their early hours.

**Her Majesty's Visit to Ireland.**—Active preparations are making in Ireland for the reception of Her Majesty and Prince Albert, whose visit is now announced to be about the 14th of August, when they depart from Windsor Castle. The Royal yacht, the Albert and Victoria, is in such a state of forwardness, as to leave no doubt of her being launched towards the end of the next month, when she is to be towed round to Woolwich Dock-yard to complete her internal decorations and fittings, which are to be upon a scale of magnificence admitting of no comparison since the discovery of steam navigation. Already orders have been given for three regiments which are to mount guard on the Royal persons, and to afford escorts on Her Majesty's route, to hold themselves in readiness to proceed to Dublin in the first instance, Prince Albert's Hussars (the 11th) are to embark forthwith, and the 33d from Edinburgh, the 72d Highlanders, and a battalion of the Guards, are the infantry regiments spoken of as being selected for this distinguished service. In fact every thing promises a sojourn of no ordinary éclat in the Emerald Isle, which is expected to extend to three weeks, and to include the Giant's Causeway in the north, and the Lakes of Killarney in the south, to that the Royal party will take nearly the whole circuit of the island before re-embarking.

We noticed in our last number that the trials of the Chartist were proceeding at Lancaster when we went to press. On the 8th day the proceedings closed. The verdict of the Jury affirmed two counts of the indictment—the fourth, which charged the prisoners with tumultuously and unlawfully assembling, and forcing peaceable subjects to leave their occupations; and the fifth, which alleged intentment to disaffection, to hatred of the laws, and to combine in producing a cessation of labour. Fifteen prisoners, including Baistrow, Thos. Cooper, and Leech were found guilty on both those counts; sixteen, including O'Conner, W. Hill and Harney, on the fifth count; twenty-one, including William Scholfield, the Chartist preacher, and Richard Pilling, (who is said to have boasted that he originated the strike in the

Manchester district,) were acquitted; and seven including the younger Scholfield, had been acquitted by consent in the course of the proceedings.

We gave, in our last number, the first day's proceedings on the trial of M'Naughten, for the murder of Mr. Drummond. On the second day, the prisoner was acquitted on the ground of insanity. He will be confined in a lunatic asylum during the remainder of his life. Lord Brougham stated recently, on his own authority, that M'Naughten had been four or five times to Sir Robert Peel's house to ascertain his person, that he twice prepared to fire at him, facts which nowhere appeared in the reports of the trial.

Some anonymous donor has presented to the Bishop of London £5000, to be expended in building a church in London.

**The Looked for Comet.**—Astronomers in various parts of Europe have been sorely puzzled of late to account for a certain ill-mitted phenomena in the heavens. The late disturbances of the atmosphere, and globe are accounted for by the supposition that "an enormous comet," as Sir John Herschell calls it, in a letter to the Times, dated Collingwood March 19th, is a present passing through our system, and is not far from its perihelion.

**SCOTLAND.**—Great preparations are making in Scotland for the new session of Nonconformist from the Established Church. Members of the body are perambulating the country, giving lectures and canvassing for support for the "free Presbyterian Church." The project, in which Dr. Calmer takes the lead and an active part, is to create a general fund by subscription, which is to be distributed in allowances for the support of the several churches and their ministers; an arrangement intended to protect the poorer congregations from the hostility of the upper classes. Dr. Chalmers announced at a lecture in Glasgow, that, in his capacity of convener of the financial committee, he should, at the first general assembly, support an equal distribution of the funds. He also mentioned the sacrifices which several ministers had made.

**IRELAND.**—Illicit distillation is greatly on the increase in Ireland since the act of last session, laying an additional duty on whiskey.

The Irish papers contain a letter addressed by Mr. O'Connell says, "I saw with great surprise, in the last Pilot, a paragraph which you certainly took from some other newspaper, headed 'O'Connell and Dickens,' and purporting to be a quotation from an alleged letter of mine to the editor of a Maryland newspaper, published at Baltimore, and called 'The Liberator Advocate.' The thing is, from beginning to end, a gross lie. I never wrote a letter to that newspaper; nor am I in the habit of corresponding with the editors of American newspapers. I have seen, indeed, with great contempt, but without much surprise, in several American newspapers, letters deliberately published under my signature, given to the American public as genuine documents—all, of course, being forgeries, but published by the editors as if perfectly genuine." After some severe remarks about what he calls the "outrageous rascality" of a portion of the United States Press, Mr. O'Connell, speaking of Dickens, says, "Perhaps it is right that I should add, that few people admire more the writings of Dickens, or read them with a deeper interest than I do. I am greatly pleased with his American Notes." "They give me, I think, a clearer idea of every day life in America than I ever entertained before." And his chapter containing the advertisements respecting negro slavery, the most brilliant declamation or the most declaration of the most splendid eloquence. That chapter shows out the hideous features of the system far better than any dissertation on its evils could possibly produce them—odious and disgusting to the public eye."

**FRANCE.**—The French are extending their possessions in Polynesia, without much care of the aboriginal governments, which as may be imagined, is not viewed without distrust by England. In France, the power of M. Guizot seems to be now perfectly consolidated; and a better feeling exists between that country and our own than has of late years been manifested.

**CHINA.**—The monthly Overland Mail has brought intelligence from Bombay to the 2d of February. Intelligence has come to hand that the pacific relations with the Chinese Government had been threatened with serious disturbance. Sir Henry Pottinger, while he was still at Amoy, on board the steam frigate Queen, issued a Proclamation in English & Chinese, dated 23 Novbr., declaring that he had since his arrival at Amoy, learned with extreme horror and regret that many more than 100 British subjects, who had been wrecked the ship Nerubudda and brig Annam, on the coast of the island of Formosa, had recently been put to death by the Chinese authorities there, who alleged that this cold blooded act

had been perpetrated by order of the Emperor. He had obtained positive proof, he says, that those commands were drawn from his Imperial Majesty by the gross and merciless misrepresentations of the local authorities in Formosa; who, with the object of personal aggrandizement, basely and falsely reported to the Cabinet at Peking that both the ship Nerubudda, and subsequently the brig Ann, had gone to that island with hostile intentions: an assertion not more lying & false than manifestly absurd, since neither of those vessels had fighting men on board of them.

Sir Henry goes on to say, that he was resolved to demand from the Emperor that the local authorities should be degraded and cordigly punished, and that their property should be confiscated, and the proceeds handed over to the officers of the British Government for the relief and support of the families of those who had been thus mercifully put to death. A threat of renewed hostilities was held out in case the demand should not be complied with.

**NEW AERIAL STEAM CARRIAGE.**

Willmer and Smith's European Times, in a supplement, has two engravings of an immense machine which is to navigate the air, by the aid of steam and the assistance or rather resistance of the atmosphere. It is furnished with two enormous wings, which will however, be motionless, like those of a bird balancing itself in the air, this when spread will be 150 feet long and 30 feet wide, across the middle is suspended the car which contains the steam engine, (weighing, water included, about 600 lbs.) which answers to the body of the bird—the entire weight of the carriage, passengers, cargo, and all appliances, is estimated at 3000 lbs. To the middle of the wings is also attached a tail of 50 feet long, which can be raised or lowered so as to control the flight as to elevation, beneath which is a vertical rudder, which has the same office as to horizontal direction—a vertical oscillation. The steam engine drives lateral oscillation. The steam engine drives two sets of vanes or propellers, six in each set like the sails of a windmill, and 20 feet in diameter: one of those is placed on each side of the root of the tail—their offices is to keep up the velocity sufficient to raise it in the air, and to continue its elevation and propel it along the steam engine comes in motion. Perhaps the above description will give some idea of this invention, which is no joke, for a Bill has been introduced into Parliament to incorporate a joint stock company to carry out its principle. Several of the periodicals too, which we have seen, speak convincingly of the success of the project. So we beg our readers not to be frightened if they should see a strange bird pass over their heads some fine day, of extraordinary dimensions, and in a steaming perspiration, as they will now be able to determine its species.

**St. John, April 18.**

**The New Mayor.**—It will be a matter of general congratulation to our citizens that to-day our city receives a new mayor in the person of Lauchlan Donaldson, Esq., whose conduct while filling that honorable situation on a former occasion, gave such general satisfaction, and leads to the belief, that from this day, a new and brighter era in our civic affairs commences, which it is hoped will end in restoring them to some sort of order. If any man can effect reform, we believe it to be Mr. Donaldson, whose business habits, energetic energy, and steady perseverance, will enable him to overcome the numerous difficulties which now beset our city. We look forward with hope and confidence to a general change in conducting the public business and we feel assured that the lowest city officials, instead of being allowed as heretofore to ride over the citizens, literally, as well as figuratively, will be taught to know their proper places, and be kept there.

By the Act for amending the City Charter which passed last week, it is not now necessary for the newly appointed Mayor to proceed to Fredericton, for the purpose of taking the usual Oath of Office. Mr. Donaldson's Commission has been sent down, with a Deed of feoffment in his hand, and he will take the Oath this day at 12 o'clock in the Council Chamber, at which time the newly elected Aldermen and Assistant Aldermen will also be sworn in.—*New Brunswick.*

We understand, that the announcement in the Courier, that no duties would be collected at the Treasury on eggs, cheese, plaster, &c. from Nova Scotia, is a mistake. There is no authority which can release the Treasurer from his obligation to collect these duties, except a repeal of the law. We hear, however, that it has been proposed to evade the present law, by entering plaster, as unwrought stone—eggs as unhatched poultry—cheese as fresh vegetables, &c.—but we cannot say how those tricks will be received by Her Majesty's officers. The Law is positive and they must enforce it; at the same time, it must add one more to the numerous complaints against the revenue Law of 1843, that it holds out premiums to immortality, perjury and fraud.—*Ed.*

**Flight of the Treasurer of Mississippi.**—Yesterday, Mr. Galloway, the Secretary of State, and several others from Jackson, arrived in our city, with the Governors proclamation, offering \$1000 reward for the apprehension of Graves, if taken out of the State; \$5000 if caught in Mississippi. It appears that he made his escape on Sunday evening just before dark, though guarded by five men. He asked them to let him take a nap with his wife, and the guard permitted; but after they had thought he had slept long enough, and went to wake him up, they found a lady in the blankets, and the Treasurer of the State of Mississippi on his way to Texas, or parts unknown.—*Vicksburg Sentinel.*

**Remarkable Phenomenon.—A Cross on the Moon.**—The editor of the Philadelphia Enquirer has a letter from an officer of the U. S. Army, (a man of undoubted veracity and good character,) in which there is an extraordinary account of a Cross appearing on the Moon on the 14th February, and seen from Fort Leavenworth Missouri. At 3 A. M. the Moon, which had been obscured by a cloud for some hours, burst forth of a deep red colour, with a black cross of equal proportions over the face, but not extending beyond the rim: while on the two sides small pieces of rainbow were visible.

After continuing in this way for about an hour, the color of the moon changed to its ordinary hue, and the cross became of a silvery white, with the edges extending beyond the rim, and touching the rainbows.

It continued so for half an hour, and heavy clouds then intervening, obscured the moon, which set unseen. This phenomenon was seen by the hospital attendants, who were up at that hour—some of them very intelligent men, by the guard and sentinels post, and by several citizens of Weston, a little town five miles off. The next morning the Sun rose, accompanied by two Sun Dogs, as they are commonly called, nearly equal in brilliance to the sun, and resembling two other Suns. This latter scene was witnessed by numbers.—*[N. Y. Sun.]*

This same singular appearance was witnessed by a teamster on the road from Wisconsin to Augusta, and described by him in language very similar to the above.

**Peace between Mexico and Texas.**—Galveston papers to the 30th ult. have been received at New York.

The most important items of news is of the arrival of Judge Robinson with overtures from Mexico. Judge R. was among the prisoners captured under Gen. Wolf at San Antonio, and was released for the purpose of bearing the proposals of Mexico to the Government of Texas. They are—

1st. It is proposed that Texas should acknowledge the sovereignty of Mexico.

2d. A general act of amnesty to be passed for past acts in Texas.

3d. Texas to form an independent department of Mexico.

4th. Texas to be represented in the general Congress.

5th. Texas to institute or originate all local laws, rules and regulations.

6th. No Mexican troops under any pretext whatever to be stationed in Texas.

**To Old Bachelors.**—We have been quite amused by a piece of poetry which we find in the Ploughman, written by "Josephine Ann Maria Putnam," who wishes to add another name to the four we have here given. She says that she is "almost fifteen," but it makes her melancholy when she considers that she may be called "an old maid!" She says—

"If all men were Adam and I young Eve,  
There might be a Paradise here."  
She thinks if she could get married it would make "a fuss" in the village of Sherburne, where she resides. The last verse is equal to anything in Goethe's Faust.

What a splendid appearance old Adam did make.  
When walking to church with his dear,  
A new married couple without any cake  
And a Serpent to bite up the rear!

We wish "Josephine Ann Maria Putnam" could find a husband—perhaps some old bachelor will address her a letter and make an error.—*Harper's Bulletin.*

The Rev. Dr. Jarvis, of Middletown, Connecticut, is preparing for the press, a work on the Chronology of the Bible, in which he designs, among other things, to show that, were Mr. Miller's views of the meaning of the prophetic writers correct, the world would have been burnt up several years ago, as he had placed the death of Christ exactly five years too late!

# SUMMARY OF NEWS

(From *Wilder & Smith's European Times*)  
*Liverpool, April 4.*

**NEW AERIAL STEAM CARRIAGE.**  
 The new invention is thus spoken of by the Editor of the *Newton's Journal of Arts and Sciences*, "one of the most scientific periodicals in England."

It is much to be regretted that men of letters connected with the periodical press, to whom the public naturally look with confidence for information upon all subjects of novelty, should generally betray such extreme ignorance of the elementary principles of science, and even of the established laws of nature, as to give countenance to any absurd scheme that may arise, and present to the world, with vaunting pretensions, projects the most visionary and fallacious.

Under this designation, we have long felt satisfied that the proposed aerial machine must be classed, we have seen, with no small degree of astonishment, not only that many intelligent and highly-respectable persons have been induced to listen coolly to this wild project, but also that Parliament has condescended to entertain a bill for forming a joint-stock company, to carry this wonderful chimera into active existence.

We have delayed the publication of the present number of our journal in order to inspect and give a report of the specification of this invention which has been just enrolled; and to discover, if possible, some new feature which might give considerable plausibility to the project, but no such feature is there developed. Time and space will not allow us to detail the full particulars of this proposed machine, we say proposed, because no such machine has yet been made, or is, as we think likely to be constructed, when its elements are understood by persons of common sense.

The apparatus consists of a car, containing the goods, passengers, engine, fuel, &c.; to which a rectangular frame, made of wood or bamboo cane, and covered with canvas, or oiled silk, is attached. This frame, or body, on either side of the car, in a similar manner to the outstretched wings of a bird, but with the difference, that the frame is immovable. Behind the wings are two vertical fin-wheels, furnished with old-style vanes, which are intended to propel the apparatus through the air. These wheels receive motion through bands and pulleys, from a steam or other engine, contained in the car. To an axis at the stern of the car, a triangular frame is attached, resembling the tail of a bird, which is also covered with canvas or oiled silk. This may be expanded or contracted at pleasure, and is moved up or down for the purpose of causing the machine to ascend or descend. Beneath the tail is a rudder, for directing the course of the machine to the right or to the left, and to facilitate the steering, a sail is stretched between two masts which rise from the car.

The amount of canvas or oiled silk necessary for covering the machine, is stated to be equal to one square foot for each half lb. weight, the whole apparatus being about 3,000 lbs., and the area of surface spread out to support it, 4,500 square feet in the wings, and 1,505 in the tail—making altogether, 6,000 square feet. The engine is proposed to be of from 25 to 30 horse power. It is stated in the specification that on launching the machine into the air, an elevated situation must be selected, and the machine allowed to run some distance down an inclined plane for which purpose vertical wheels are attached to the bottom of the car or boat. When the machine has thus acquired a momentum, the rotary fin-wheels are put in action to raise it into the air and propel it; the rudder appended to the car is then used for regulating its course.

In concluding our hasty remarks on this invention, we would remind our readers that many projects of a like character have been promulgated to the world by enthusiastic projectors, all of which have fallen to the ground (we use a figure of speech, for they have never risen) from the fact of having overlooked the laws of matter, and misestimated the powers of mechanism in imitating the functions of animal life.

Any person wishing to see a plate of the Aerial Steam Carriage, can do so by calling at the Standard Office.

**The Comet.**—The tail of the comet, as what is alleged to be a comet, was distinctly visible here on Sunday, and partially on Monday evening last. The train of light extended from the extremity of the western horizon half way across the heavens towards the S. E., but we cannot find, on a good authority, that the nucleus has yet been seen, and it is believed by many eminent astronomers to be only a peculiar vivid manifestation of the zodiacal light. A short time will, however, decide this point. — *Plymouth Times*, April 1.

*Liverpool, April 4.*  
 The acquittal of the assassin McNaughton has produced an extraordinary sensation in Westminster Hall and the House of Lords. On Monday last, the Lord Chancellor, (Lynn), and the three ex-Lord Chancellors, (Brougham, Cottenham and Campbell), delivered their sentiments, at considerable length, upon the trial, the evidence and the result. They all lamented that the prisoner was acquitted, and they agreed that Chief Justice Eyre who tried him, committed a serious mistake, not only in stopping the case without hearing the Solicitor General's reply, but in admitting evidence which he should have rejected. — *Liverpool Mail*.

**The Mark-lane Express** of Monday contains a challenge from 5 farmers in the county of Hereford, who are "prepared to offer a bet of £100 that they will find twenty as good, nay, better English farmers than can be found in the Lowlands, or any to other Scottish counties and men who can make as much, or more

money of their farms than the latter can, if subject to English payments."

**Canada Corn Trade.**—In the House of Commons on the 23d ult. Mr. Ewart asked whether, under the intended measure, foreign corn, imported from any part of the world into Canada, could on paying the thrice-shilling duty be exported thence to this country free, like United States corn? Mr. Gladstone supposed that Mr. Ewart made the common mistake of thinking that the law regards foreign produce imported into colonies and re-exported thence as colonial produce, which it is not the case. But raw materials, brought into the colonies, manufactured there, and then imported into this country, were considered as articles of colonial produce, inasmuch as all manufactured articles were considered as the produce of the countries where they were manufactured. Mr. Ewart wished to know whether flour was considered as a manufactured article?—Mr. Gladstone said that it was. In reply to Lord John Russell, Mr. Gladstone said that it was the intention of Government to introduce a bill on the subject after Easter.

A report is very current in distinguished circles that Miss Countess Bardett is at length about to bestow her hand in marriage, and Lord Wiltshire, the eldest son of the Marquis of Winchester, and Colonel of a dragoon regiment, is mentioned as the favoured suitor. Lord Charles Wellesley will, we also hear, shortly lead to the altar Lady Mary Cecil the accomplished daughter of the Marquis of Salisbury.

The Queen of the French has suggested to fourteen ladies, at the head of whom are the royal princesses and the Countess of Montalivet, the pleasing task of getting up a quantity of works in embroidery of various sorts, to be sold for the benefit of the sufferers of Guadeloupe. "Those works when finished are to be exposed in the gallery of the Palais Royal, on the first floor, and will be afterwards sold. Ladies appointed by her Majesty will preside at the different stalls, and the sale it is supposed, will commence on the 15th of next month."

The Commerce announces that orders have been given to the engineers charged with the direction of the works of the Fortifications of Paris to redouble activity in forwarding the construction of the fifteen detached forts, at which upwards of 200,000 civil and military workmen are now employed. Five of those forts will shortly be completed, namely, those of Mont Valerien, of the East at St. Denis, Romainville, Noisy le Sec, and Charenton. The two thirds of four others are finished, namely Rosny-Neigeant-sur-Marne, Ivry and Issy.

**Cape of Good Hope.**—Cape of Good Hope papers have been received at the North and South American Consulate, to 25th January, a week later than those previously received. At the date of the last accounts, Colonel Hare was constructing rails to cross the Orange River, in his expedition against the Anglo-Dutch rebels. The Boers appear to have made an effort to induce a simultaneous attack on the colony by the 'Caffre' tribes on the border; and for that purpose they had spread reports that they had defeated the troops sent against them. The Galkas are said to have fallen into the snare; the covert symptom being, that they had commenced their usual course of predatory warfare by stealing cattle from the border-farms; but the depredations of the natives on the frontier are a standing grievance.

The courts-martial held on Colonel Palmer for the surrender of Ginnel, and on Captain Anderson, Troup, Boyd, Eyre, and Walker, have terminated in the acquittal of those officers from the charge brought against them for certain acts during the last campaign in Afghanistan. The investigation into the conduct of General Shelton and Major Pottinger was still going forward.

Nothing certain appears to have been known of the state of affairs at Cabul.

The intelligence from Scinde is to the effect that the Auncers' doubtful policy and intriguing conduct had during some weeks kept up the irritation of war and peace, have been influenced by the presence of Major Outram, with whom they are all personally acquainted, to enter into terms, which will it is expected, establish a system of good intelligence between them and the Government of India.

The alteration of the Indian Government directed towards its finances. The extra company added last year to each Indian regiment has been ordered to be abolished, and the men are to be absorbed into the army, whereby a diminution of 18,000 men will be effected, and a consequent saving of expenditure will be effected.

For many months the crime of murder has been of almost nightly occurrence in Paris and its neighborhood. The *National* says:—"The capital has become for some time past the theatre of audacious murders. The forest of Bondy is more secure than the first city of the civilized world. An unfortunate operative, who was late on his return home, was taken up bathed in blood in the Rue de Bondois, and shortly afterwards expired. Is it possible that the police, with a million of secret money service cannot at least protect the lives of the citizens?"

**Relief for the sufferers by the Earthquake in Antigua.**—In the House of Commons on the 17th March, in answer to a question by Mr. Mackinnon as to the probable conduct of Government with reference to the late disastrous earthquake in the West Indies, (especially Antigua), Lord Stanley stated that ministers had not yet come to any conclusion; but that if any assistance should be

asked, it would be, not in the shape of a grant, but of a loan, to enable the colony to sustain its credit at the present crisis.

## THE STANDARD.

St. Andrews, Thursday, April 27, 1843.

**FIRST APRIL MAIL.**  
 The English Mail we are happy to notice, brings gratifying intelligence. Trade and Manufactures in Great Britain, are decidedly improved, the commercial intelligence is very cheering, a large fleet of vessels have sailed for this Province, and we may now look forward with some degree of confidence, to a gradual improvement of business generally. On our first and second pages, we have made copious extracts from *Wilmier & Smiths European Times*, *Liverpool*, and papers received from P. L. Simmonds Esq. of London.

Lieut. Col. Estcourt, and Mr. Featherston-ham, Commissioners for running the Boundary Line in accordance with the Treaty of Washington, were passengers in the *Britannia*, and proceeded in her to Boston. It is understood to be now satisfactorily ascertained that the Property and Income Tax will actually produce the large and unexpected amount of £6,000,000, so vastly has the income of the country increased since the time of the former Income and Property Tax.

**Commercial Summary.**—Since our last there has been an extraordinary influx of vessels from almost every part of the world, as a glance at our voluminous shipping list will at once make apparent. No less than five New York packet ships, and two steamers have arrived. The President's Message at the close of the session has come to hand, relative to the right of visit, and embodying his view of the eighth article of the Ashburton treaty. This subject has already formed a prominent topic in the newspapers. After the strong and decided tone which Sir Robert Peel on the first night of the session adopted on this question, it is hardly likely that he will recede. But his views will probably be known in the course of a day or two, when some member, to afford him an opportunity for explanation, will ask him whether he has received or seen the message. It is hardly worth while to speculate upon the nature of his answer. Every one believes he will maintain, whatever be the consequence, the position he first assumed.

Business during the last fortnight has sensibly improved. The cotton market has been extremely buoyant, with improving prices. The sales for the week ending the 31st March were 56,000 bags—nearly 10,000 per day. On Saturday, however, the demand sensibly decreased, in consequence of the accounts brought by the Great Western respecting the prolific magnitude of the last crop. On that day, and yesterday (Monday), the sales were about 8,000 bags collectively, prices have receded nearly an eighth of a farthing per pound. A better feeling, however, prevails the manufacturing and the commercial classes than has been apparent for a long time. An opinion is prevalent that our dark night will be succeeded by a fine dawn and a brilliant noon day.

**EMIGRATION.**—The most remarkable falling off in foreign emigration, as compared with that of previous years, has taken place this season. Probably, not more than one-fourth of the usual number have gone out.

The Spring Term of the Court of *Oyer and Terminer* for this County, was opened on Tuesday afternoon. His Honor Judge CARTER addressed the Grand Jury. In consequence of our absence from Town, we regret that we are unable to give a sketch of His Honor's charge.

Forty-one cases were for trial 7 of which have been disposed of. There was only one criminal case, of a young man having burnt a barn at L'Etang.

The Citizens of Quebec and Montreal have presented congratulatory addresses to Sir Charles Metcalfe, upon his arrival in Canada. They are not of a party or political character, but merely an expression of good feeling towards His Excellency.

A friend at St. George writes us the following account of a

**MELANCHOLY ACCIDENT.**—A melancholy accident took place on Adams' Island, on Thursday afternoon last. Mr. Daniel Jordan was boiling tar to put on his boat which was within a few rods of his house, and having gone towards the boat, his wife came out and called to him that the tar was on fire, she was returning to the house when Mr. Jordans sister fearing the tar might set the place on fire, took the pot with the blazing tar off the fire, ran to the door to throw it out, and melancholy to relate, dashed it directly upon her sister-in-law, who she could not see for the flames. Mrs. Jordan's clothes took fire immediately, and together with the tar burned her in such a shocking manner, that she expired in a few hours. She was quite a young woman, only married about 2 years. Thus in a short time was an infant child deprived of a fond mother, and kind husband of an affectionate wife.

The recently discovered Comet was creating much attention throughout Europe.

**NEW ADVERTISEMENTS.**—We beg to direct attention, to several new advertisements in our columns this day.

**A Ruse.**—The *Montreal Courier* says:—We are authorised to say that the Seat of Government is forthwith to be removed to "a place called Ramasuki." The Attorney General West made this a *sine qua non* with Sir Charles Metcalfe, threatening him with his wrath and resignation should he dare to refuse this trifling favor to his (Mr. Metcalfe's) Constituents. Sir Charles of course "knuckled down," and we hereby inform the people of "Ramasuki" of the important fact in order that they may prepare a wigwag for the Governor General and his Suite.

**More Earthquakes!**—Island reported to have sunk in the sea!—A note on the slate in Keeler's Reading Rooms of advices from Bermuda to the 24th inst. states that "the passengers by the steamer *Madway* report that on the 22nd of March, at half past three o'clock, A.M. when near Cuba, on their way from Jamaica to St. Thomas two very severe shocks of an earthquake were experienced in an interval of ten minutes."

Who confirms the statement that a shock was felt at Jamaica on the 7th ult. and gives intelligence of another on the 12th. It was reported at Kingston, Jam. on the 15th ult. that the *Great Cymans Island* had disappeared by one of the recent convulsions of nature! — *Halifax Post*

**The Bible for the Blind.**—Portions of the Bible, embracing the Gospels and Psalms were printed in raised letters for the blind several years since. The entire Bible for their use has been recently completed, under the superintendence of Dr. Howe, of Boston. It will soon be ready for publication. Two pages of this Bible, and one of the moulds in which the stereotypic plate for a page of the work was cast, may be seen in the Pictorial and Commercial Reading Room. The work was printed by Geo. A. Curtis, Esq. proprietor of the New England Type and Stereotypic Foundry, Boston. — *Pictorial Farmer*.

Ploughs were in operation at Pictou, on the 18th instant.

**INSTALLATION.**—On Tuesday last, at noon, the recently appointed Mayor of this City, Lauchlan Donaldson, Esq., and the newly elected Aldermen and Assistants presented themselves at the Council Chamber, and having taken the Oath of Office, which were administered by His Honor the Recorder, entered upon the government of the city. His Worship the Mayor, immediately after in a lucid speech, remarking upon the difficulties under which the Corporation laboured, and expressing his hope that, ere long, matters would be placed in a train for adjustment. To this end, he promised his undivided attention to his official duties, and solicited from his fellow-citizens their aid and co-operation in the arduous undertaking.

**SUDDEN DEATH.**—Mrs. Margaret Anthony, wife of Mr. Wm. Anthony, of Red Head, lost her life during the night of the 15th inst. by falling into a small stream near her dwelling, whither she had gone for water after the rest of the family had retired to bed. A Coroner's inquest was held on the body on Monday last, and a verdict of Accidental Death by drowning returned by the Jury.

**H.M. Steamer Megara**, 36 days from England for Jamaica, was wrecked at Bare Bush Key, on the 3d ult. The Crew with the exception of a boy who was missing, saved by boats of vessels in Old Harbour.

It was reported at Jamaica on the 15th ult. that the *Great Cymans Island* had disappeared during the recent earthquake in the West Indies. The report is not generally believed.

The *St. John Mirror* of Saturday last, says:—"We announced to our subscribers, more than once during the last few weeks, that unless they would immediately pay up their subscriptions we should be under the necessity of discontinuing the publication of the *Mirror*. In consequence of their not having done so, we have now to state, with reluctance, that this is the last number we shall issue."

We regret to learn that the *Victoria Coach*, which for several years has afforded so much accommodation to travellers between this City and the Eastern Counties of the Province, &c. has ceased running on the route. We learn the Coach runs now between the Bend of Petitcodiac and Amherst, N. S. in connexion with the Mail Coach—*Observer*.

Why are not the Stores closed at 8 o'clock, as agreed upon by the Merchants a few weeks ago?—And why pay the person who rings the Bell at 9 instead of 8 o'clock, when he does so to suit a few only?

## GOVERNMENT APPOINTMENTS

Lemuel Allen Wilnot, Esq. having been appointed provisionally a Member of the Executive Council, attended this day and took the Oath before His Excellency the Lieut. Governor. WM. F. ODELL.

Secretary's Office, 17th April, 1843.  
 Charles R. Hatheway and Hugh Morrison appointed Commissioners for superintending the cutting a Sewer parallel to the Harbour of St. Andrews for which the sum of £200 was re-appropriated in the year 1842, and remains unexpended.

Wm. Garnet and Peter Smith appointed Commissioners to superintend the improvement of the Harbour of St. Andrews, for which the sum of £270 was appropriated in 1842, and remains unexpended.

By Order of the Lieutenant Governor in Council.

WM. F. ODELL.  
 Secretary's Office, 11th April, 1843.  
 The provisional appointment of John Pen-dlebury, as Keeper of the Light House at Indian Point, Saint Andrews, made on the 21st of October last is confirmed.

By Order of the Lieutenant Governor in Council.

WM. F. ODELL.

Secretary's Office, 17th April, 1843.  
 Passengers.—In the *Britannia* from Liverpool for Halifax: Mr. Wiggins and Lady Miss Northwick; Mrs. Boyle, 2 Misses Foley; Meses. Mignowitz, Hegan, G. A. Gardiner, John Gillies, George Little, Kidston, Watson, Lord Duncan, Bouring, E. Billing, Bell, Geo. Young and White.

Garden and Field Seeds!

The Subscriber has received from the  
New England Seed Store,  
Boston, his usual sup-  
ply of

GARDEN AND FIELD SEEDS.

Of last years growth and the best quality,  
which he will dispose of low for Cash. As  
this old established House from which he re-  
ceived these Seeds, is well known in this  
Province, and having been supplied from the  
same Establishment for upwards of 22 years,  
the Seeds invariably proving of the best  
description and fresh, any further notice is  
deemed unnecessary. The Seeds which he  
imported last year gave very general satisfac-  
tion.

SAMUEL GETTY.
