very much better for the larger class of ships. Within the last two months several small craft, varying from 150 to 200 tons register, and of light draft of water, which enables them to go direct to the port of discharge, have been purchased for the Australian trade at full prices. This prosperous state of things, we believe, will continue for 12 months—or it may be somewhat longer—when, perhaps, it is not too much to expect, some means will have been found for freeing a large number of those ships that are now lying unoccupied and incapable, at the various Australian ports, amounting, by the last returns, to 20) sail, equal to about 110,000 tons, and which, when freed, will return upon our market about the same time the large fleet of colonial ships now in the course of construction will have found their way here, and which bear a proportion of five to three over those built in 1852, and five to four 1851.

PROPOSED MAIL LINE BETWEEN THE UNITED STATES AND THE WEST INDIES.—An arrangement is about to be effected between England and the United States for a regular mail between the United States and the West Indies generally, and points on the coast of Mexico and northern coast of South America, at which the British mail-ships touch. To the British West Indies, the United States single rate of letter postage, which must be prepaid on letters sent from, and collected on letters received in, the United States, will be ten cents where the distance from the mailing-office is under two thousand five hundred miles, and twenty cents where the distance exceeds two thousand five hundred miles. To the West Indies, not British, Mexico and South America, the British postage of twenty-four cents the single rate, also required to be prepaid, will be added to the ten or twenty cents United States' rate according to distance above.

PROPOSED TELEGRAPH BETWEEN GREAT BRITAIN AND THE UNITED STATES.—A project has been formed for constructing a submarine telegraph between Great Britain and the United States. It is proposed to commence at the most northerly point of Scotland, run thence to the Orkney Islands, and thence by short water lines to the Shetland and Ferroc. Thence, a water line of 200 to 300 miles conducts the telegraph to Iceland; from the eastern coast of Iceland another submarine line conveys it to Kiops Bay, on the eastern coast of Greenland; it then crosses Greenland to Julian's Hope, on the western coast of that continent, in 60 deg. 42 min., and is conducted thence by a water line of about 50 miles, across Davis Straits to Byron's Bay, on the coast of Labrador. From this point, the line is to be extended to Quebec. The entire length of the line is approximately estimated at 2500 miles, and the submarine portions of it at from 1400 to 1600 miles. The peculiar advantage of the line being divided into submarine portions is, that, if a fracture should at any time occur, the defective part could be very readily discovered, and repaired promptly and at a comparatively trifling expense. From the Shetland Islands it is proposed to carry a branch to Bergen, in Norway, connecting it there with a line to Christiania, Stockholm, Gottenburg, and Copenhagen; from Stockholm a line may easily cross the Gulf of Bothnia to St. Petersburg. The whole expense of this great international work is estimated considerably below £500,000.

RETIRING PENSIONS OF MINISTERS OF STATE.—Considerable curiosity is entertained as to the retiring allowances of ministers, and very little is generally known on the subject. It may be interesting, then, briefly to state the substance of the Act of Parliament which regulates these pensions or allowances. The statute (4th and 5th Wm. IV., cap. 23) was passed in 1834, and is entitled 'An Act to alter, amend, and consolidate the laws for regulating the pensions, compensations, and allowances made to persons in respect of their having held civil offices in His Majesty's service.'

Table with columns: Office, Salary, Pension. Lists salaries and pensions for various government offices.

THE NEW PREMIER.—George Hamilton Gordon, Earl of Aberdeen, was born in 1784 (consequently, he is 68 years old); was Secretary of State, and Foreign Affairs, in the Wellington Ministry, and for the Colonies in 1834-5; was appointed Foreign Secretary in September, 1841, resigned July 1846. He has also borne the character of a shrewd cautious Scotchman, and diplomatist, and was characterized by the late Louis Philippe as 'that excellent Aberdeen.' He came forward after a long silence, to oppose the Papal aggression bill.

period of service amounts to ten years; although he may not have served five years in such highest class, he may have the pension for such highest class, if he have served in it not less than three years; and in cases where his services in any class do not entitle him to the pension of that class, he may have a pension of not more than £1000, if his aggregate services in that or any inferior classes or departments of the public service shall amount to ten years. Always provided the full amount of pensions does not exist at that time.

THE NEWS FROM NEW SOUTH WALES, VICTORIA, and S. W. AUSTRALIA respectively, describes the unprecedented prosperity of the Australian colonies. At Van Diemen's Land, however, the legislative and executive authorities have come to a standstill, and a public vote has been asked to be sent to the assistance of Sir William Denison. The production of gold at the various diggings, especially in Victoria, continues upon an immense scale. The weekly produce from the Victoria diggings alone is computed at 80,000 ounces at the lowest average, whilst well-informed persons estimate the yield at not less than 150,000 ounces weekly. It is beyond all doubt, that more than ten millions sterling have been sent from Victoria alone.

IRELAND.—STATE OF THE WEST.—A Tuam paper, in the course of some comments upon the recent census returns, says:—'In Leitrim, nearly one-third of the population has disappeared. From Roscommon 80,000 have been swept away, and from Sligo upwards of 25,000; thus making a terrible total loss of the population as authenticated by the present census, to amount to 240,000. If the diminution were to cease even here, we might expect to see rebels snatched at a future date from this there is not the slightest probability. My note, short as it is the interval which has elapsed since the returns of the present census were handed in, a rapid and fearful tide of emigration has rolled on, and is still rolling on—carrying away, every week, several thousands from Mayo, Roscommon, and Galway. Instead of showing any anxiety about the result, or any wish to arrest the progressive march of emigration, the landlords of Connaught seem inexorably bent upon further clearance and consolidation.'

LATER FROM CALIFORNIA!—The Illinois brings China dates to the 31st of Oct., received at San Francisco. The rebels in the provinces were still giving trouble. The capture by them of several towns is officially confirmed, but their success is wholly attributed to the incapacity and remissness of the local authorities. The conduct of the operations was very different from that which was practiced in other parts of the country. The rebels had gained several advantages; and were preparing to make a clean sweep of the insurgents. Prates were committing outrages at Ningpong, and other points. A battle had taken place between the pirates fleet and a Portuguese force sent to capture them. The pirates finally escaped by putting to sea in a storm. The steamship Tennessee arrived at Panama on the 30th, with 2,200,000 in gold dust and 300 passengers. Members of the Imperial family are to be called French princes, who become of right Senators at the age of 18, and take their seats also as members of the Council of State.

EMIGRATION TO AUSTRALIA.—The tide of emigration from Europe to the arid regions of Australia does not relax in the least. From the United States and South America vessels laden with passengers are taking their departure every week, and the number of natives of the State going out is every day increasing. The emigration from California is very great—the reports from the mines offering to them better returns than they had been receiving on the mountains and valleys of the golden land they are leaving. Such a large influx of American citizens to one of the British Colonies presents a new and peculiar feature in the composition of Colonial society; and if political matters do not run smoothly, Jonathan will be disposed to 'whittle' out a new form of government, somewhat after the model of that under which he had lived at home.

NEW BRUNSWICK.—A dangerous epidemic, commencing as a severe cold, and ending in inflammation, has recently carried off four young men of the 72d Highland Regiment—now in the garrison. Their funerals, two at a time, have been the most solemn processions which have for a long time been witnessed in Fredericton.—Fred. Reporter.

NEWFOUNDLAND.—We learn by the return of Mr. Haines, that the proper authorities in St. John's Newfoundland, are making the necessary arrangements to have the province advantageously represented at the world's Fair in New York. The Seal Fishery in all its stages will be exhibited; an Esquimaux family is to be sent to the Crystal Palace; and the splendid Ornithological and Mineralogical specimens, so profusely produced by the golden land they are leaving, will be sent to the great Gotham to swell the catalogue of curiosities.

THE ROMAN CATHOLICS have 8 Representatives in the Assembly, and 5 Councillors in the Executive and Legislative Councils—two Merchants in the Colonies and the Colonies; 75 12th offices of emolument are distributed among 93 of that Denomination; who annually receive in salaries, £18,020 sterling.

THE Wesleyans have two Representatives in the Assembly; 15 offices in the Government, and receive £236 in salaries. The Presbyterians are represented in the Assembly and Councils, they have 6 offices of emolument, receiving as salaries, £780 sterling.

THE Congregationalists have one Representative in the Assembly, but have one the Surveyor General, in the Councils. Eight of them enjoy 10 offices, and receive £1,500 sterling a year as salaries.

THE Newfoundlanders noticing the efforts to break down the contemplated London and Canadian Line, which proposed to make St. John's a port of call, say:—'At present it would appear this part of the project has but little chance of success.—The United Company have beyond doubt formidable wealth and influence in expense to any distasteful speculation; but from what we can gather thus far, the Londoners are sufficiently backed and fortified, by the same elements of strength, to make them very sanguine as to the issue.'

NO CATHOLICISM is so useful to children as their parents' example at home. It is the brightest privilege that God has bestowed on the human race. It is the fountain of all true religion. It is the fountain of all true morality. It is the fountain of all true piety. It is the fountain of all true holiness. It is the fountain of all true happiness.

PROSPECTIVE LABOURS OF THE LEGISLATIVE SESSION.—We pretend not to know what public measures are to be brought forward, either by the administration, or independently, by individual members, in the approaching Session of the Legislature; but we do know that there are certain measures of reform, so obviously necessary to ensure the general well-being and prosperity of the country, that their adoption cannot now be much longer delayed.

With increased enlightenment, there is being widely diffused among the people such a spirit of independence, self-respect, and self-reliance, as, when fully aroused and called into action, will compel any Government, however constituted, to respect the wishes of the people, and tremble at their discontents.

Amongst the measures to which we allude, the most prominent and essential are,— 1st. The Abolition of the Land Monopoly.—So long as this monopoly shall continue to exist, the condition of the streets and in their houses alike, throughout the long dark nights of winter, in the midst of surrounding obscurity.

The Rev. Mr. MURRAY, of Curwenhall, will (D. V.) deliver a LECTURE in the Temperance Hall, on Wednesday evening next, on THE EVILS OF THE LAQUOR TRAFFIC, to commence at 8 o'clock.

TO THE EDITOR OF HASZARD'S GAZETTE. Covehead, 2d Feb. 1853.

Sir: Having, unhesitatingly, as it would appear, given insertion in your last number, at the request of David Lawson, Esq., J. P., to a letter, addressed by His Excellency the Lieutenant Governor, to the Hon. the Colonial Secretary, in which my conduct, with reference to certain charges preferred by me against Mr. Lawson, is reflected upon with some severity; by Mr. Lawson, in his next number, my reply to the Executive Council, and endorsed, in that letter, by His Excellency.

I do not expect, or expect, that the public should regard my reply as a complete vindication of my conduct; but I am persuaded that it will induce them to suspend their judgment until they shall have been enabled to decide, on the best grounds, to which of the parties concerned, misconduct is justly imputable.

Your obedient servant, DAVID HIGGINS. Covehead, 2d Feb. 1853.

Sir: I have the honor to acknowledge the receipt, from your Office, of a Copy of a Letter, of date 8th December, 1852, addressed to you by His Excellency the Lieutenant Governor, in which you are directed to intimate to me, that the Committee of the Executive Council, appointed to investigate certain charges, brought by me, against Mr. Lawson, a Magistrate of Queen's County, have reported the said charges to be unfounded, frivolous, and vexatious; that the Lieut. Governor has read the depositions of the witnesses examined, and fully concurs in the Report of the Committee; and that His Excellency "expects I will, without delay, retract the accusations contained in my Memorial, and express my regret at having made them."

In answer to this intimation, for His Excellency's information, I beg to say, that, so far from having discovered, since I preferred the charges, that, with respect to them, I had been acting under some strange delusions and misapprehensions, as His Excellency seems to believe I had been; and being now prepared to retract my accusations, and express my regret at having made them; I feel that, in justice to myself, I must again repeat, in the language of my letter to His Excellency which accompanied my Memorial, that "the statement has been carefully drawn up, and with the most conscientious adherence to truth; and, in every particular, it can be fully substantiated, upon oath, by individuals of unimpeachable character and respectability."

I have not been furnished with a copy of the Report; and I am wholly at a loss to determine upon what evidence the Committee were enabled to report to His Excellency, "that the charges are unfounded, frivolous, and vexatious;" for, so far as I heard the evidence, it was, in my opinion, fully corroborative of the general truth, character, and bearing of the charges set forth in my Memorial; and all that could be elicited from it, in Mr. Lawson's favor, was an error—certainly not of much importance—respecting the number of bodies, for the interment of which Mr. Lawson had improperly claimed and received an allowance from the Government, and in consequence of that allowance, this error I myself had discovered, and I pointed it out to the Committee before they had heard any evidence respecting it.

I, therefore, now, not only upon public grounds, and with a view to such a decision, touching the charge preferred, by me, against Mr. Lawson, as the interests of the public and the credit of the Government appear to require; but out of regard to my own character, sake leave, through you, most respectfully, but, at the same time, most urgently, to entreat His Excellency to be pleased to direct that a full and impartial investigation of all the facts involved in these charges and in the enquiry which has already been made concerning them, shall be entered upon, without delay, before an open Court, or Commission of Enquiry, so constituted that it shall be impossible reasonably to suspect any of its members of being unduly biased, either in favor of, or against, either of the parties, between whom they shall be bound to judge, according to the laws of evidence, from the testimonies adduced before them; and before such a Court or Commission, I pledge my integrity, that I will fully establish every charge which I have preferred against Mr. Lawson, so in my Memorial to His Excellency set forth, and as herein before stated, with the exception of the error above referred to.

STATEMENT in the matter of the Sale of the Cargo, &c., of the wrecked Schooner Brothers, of New Brunswick:— 1st. David Lawson, Esquire, acted in the business both as a Justice of the Peace and as a Broker, contrary to law.

2d. The sale was advertised to take place on the 29th October, 1851; and he (Mr. Lawson) made it on the 18th—five days before it ought to have been made.

good and their own, by contracting their angry passions and putting aside their personal prejudices in the performance of their public task. When this fails to be the case—when the Press fails to purge itself of its vices and its weakness, it has become comparatively powerless."

GAS COMPANY.—The Provisional Committee of this Company are taking active measures to have the Town lighted with Gas, early next autumn. A very eligible piece of ground has been selected as a site for the works, in the eastern part of the Town.

The services of a competent engineer have been engaged; and by the Mail which will leave Charlottetown, on Thursday next, orders will be forwarded for all the principal machinery, to main pipes, &c., which, before shipment, will undergo inspection by the engineer, who will proceed to England for that purpose, and to select the smaller fittings.

The engineer, it is expected, will be here, early in April, to make plans of the works and contract for their erection; in order that they may be progressing during his absence.

Thus, every step has been taken to ensure our having the benefit of Gas Light early in October next; and we, therefore, heartily congratulate our fellow-townsmen upon the cheering prospect of the illumination which will then invest them, in the streets and in their houses alike, throughout the long dark nights of winter, in the midst of surrounding obscurity.

need to the owner of the wreck (a tree on which is hereafter enclosed), he has charged £100 for the actual expense was only from £10 to £20. Each body, that is in all from £8 to £12. And for (2) Justice's Fees, he has charged On each body per day, (2 days); in all £7, although only one day, viz. on the 3rd, he was in the presence of the Justice's Fees, Mr. Cooke being there has been paid nothing for his services.

5th. He (Mr. Lawson) in the said Account has also charged Duty as paid on Salt, although the salt is not used as an article from day to day.

N. B.—It was only lately that Mr. Higgins failed to procure a Copy of Mr. Lawson's "Avalanche;" otherwise this statement would have laid before His Excellency at an earlier period.

6th. The inaccuracy of Mr. Lawson's Bill of the interment of the four bodies, found on the wreck, will be evident on a reference to the paying Affidavit.

Further, with respect to other dead bodies of wrecked seamen.— 7th. For one body, found by Cornelius H. B. on the 4th day, for which he applied Affidavit for the grave, for £1 Mr. Lawson charged and received £2 from the Government.

8th. For the interment of one body, found by Angus M'Hellen—Colin fund, grave dug by him for them for 15s. Mr. Lawson charged the Government, and been allowed £2.

9th. For one body, found by Martin Power—interment; coffin, 10s.; grave, 8s. 15s.—Mr. Lawson has charged the Government been allowed.

10th. For another body, buried and coffin &c. James Shaw, for which services he received £3 the Treasury, Mr. Lawson gave another Certificate, for the same services, to H. Palm the American Consul, from whom the Government must therefore.

N. B.—In all that he did with respect to 1 bodies, Mr. Higgins acted in pursuance of that which he had received from the Governor's will reference thereto.

DAVID HIGGINS. In the 4th Charge, the number of bodies allowed made to Mr. Lawson, by the Gov for the interment of them, are incorrectly stated number was three, and not four; and the all in every case, was £1, 10s. and not £2 per.

I beg leave to enclose, herewith, for the information of His Excellency, the Affidavit of Curwenhall, which I think, will fully establish fact set forth in the 2d of the foregoing; and likewise, for the same purpose, two Affidavits of my own,—the first having reference to the day on which the Survey of Cargo and Materials of the Brothers, &c. was performed, without distinction between the same and imperishable property, took place the second being intended to establish correctness of the copy of Mr. Lawson's Bill sent in with my Memorial; but, to the effect of which, as a copy, I was not allowed before the Committee, as I wished to do. To these Affidavits, I beg to add, most fully, yet most particularly, to call His Excellency's attention; as also to the fact, though I applied, to the Honorable the General, for Subpoenas for individuals named in some of the charges set forth in my Memorial; but, as I was not allowed before the Committee, as I wished to do. To these Affidavits, I beg to add, most fully, yet most particularly, to call His Excellency's attention; as also to the fact, though I applied, to the Honorable the General, for Subpoenas for individuals named in some of the charges set forth in my Memorial; but, as I was not allowed before the Committee, as I wished to do.

It will, no doubt, appear to His Excellency that I ought, some time since, to have an answer to the intimation conveyed through your Office; and I, therefore, respectfully to explain why I did not retract my accusations, and express my regret at having made them; I feel that, in justice to myself, I must again repeat, in the language of my letter to His Excellency which accompanied my Memorial, that "the statement has been carefully drawn up, and with the most conscientious adherence to truth; and, in every particular, it can be fully substantiated, upon oath, by individuals of unimpeachable character and respectability."

I have not been furnished with a copy of the Report; and I am wholly at a loss to determine upon what evidence the Committee were enabled to report to His Excellency, "that the charges are unfounded, frivolous, and vexatious;" for, so far as I heard the evidence, it was, in my opinion, fully corroborative of the general truth, character, and bearing of the charges set forth in my Memorial; and all that could be elicited from it, in Mr. Lawson's favor, was an error—certainly not of much importance—respecting the number of bodies, for the interment of which Mr. Lawson had improperly claimed and received an allowance from the Government, and in consequence of that allowance, this error I myself had discovered, and I pointed it out to the Committee before they had heard any evidence respecting it.

QUALIFICATIONS OF A GOOD T. TO THE EDITOR OF HASZARD'S GAZETTE. In my last communication, on the only ritual and religious Education, connected with education, I endeavored to shew former is most valuable, because the knowledge only true God, as it is in Christ Jesus, for Eternity, because it is the crowning tree of knowledge, which will bear fruit light, and love, and glory. All other without that, is, at the best, but as the of a matter, giving a deceitful and empty and empty the blackness of darkness is. Now if it be our duty, with reference to the rise of our generation, to educate the knowledge of the true God, it is not to be obtained by the instrumentality of what is called a school character, or erect a standard of culture, there are some beauties in his and features in his character, which, if looked well in a few pieces of moral plain, found to look quite so fine any other, and calling the qualification of a Teacher, we truly be able to avoid this extravagance; service is simple, and the duty known, it is so difficult in my distinctly, what this is. ward to the owner of the wreck (a true copy of which is herewith enclosed), he has charged for the burying of four bodies, 37s. 6d. each, in all £15 10s., although the actual expense was only from 15s. to 25s. each body, that is in all from £5 to £12 10s. And for (2) coffins' Fees, he has charged One Guinea each per day, (2 days); in all £7, although David Higgins, Esq., who was one of the three Justices, (Mr. Lawson himself and Mr. Cooke being the others) has been paid nothing for his services.

5th. He (Mr. Lawson) in the said Account Book, has also charged Duty as paid on Salt, although Salt is one of the articles exempted from duty in the Revenue Act.

6th. It was only lately that Mr. Higgins was able to procure a Copy of Mr. Lawson's "Account Book;" otherwise this statement would have been laid before His Excellency at an earlier period.

7th. For one body, found by Cornelius Higgins, and John M'Anby, for which they applied the coffin, and the grave, for £1, Mr. Lawson has charged and received £3 from the Government.

8th. For the interment of one body, found by Alex. and Angus M'Neil—coffin found, grave dug, and buried by them for 15s.—Mr. Lawson has charged the Government, and been allowed £2.

9th. For one body, found by Martin Power—Expenses of interment: coffin, 10s.; grave, 5s.; in all, 15s.—Mr. Lawson has charged the Government, and been allowed £2.

10th. For another body, buried and coffin made by James Shaw, for which services he received 30s. from the Treasury, Mr. Lawson gave another person a Certificate, for the same services, to H. Palmer, Esq., the American Consul, from whom he received payment therefor.

N. B.—In all that he did with respect to the dead bodies, Mr. Higgins acted in pursuance of the advice which he had received from the Coroner's Office, with reference thereto.

1st Sept., 1852. DAVID HIGGINS. In the 4th Charge, the number of bodies, and the allowance made to Mr. Lawson, by the Government, for the interment of them, are incorrectly stated. The number was three, and not four; and the allowance, in every case, was £1 10s., and not £3 per body.

I beg leave to enclose, herewith, for the information of His Excellency, the Affidavit of Mr. Gurney, which, I think, will fully establish the fact set forth in the 2d of the foregoing charges; and likewise, for the same purpose, I enclose two Affidavits of my own—the first having reference to the day on which the Survey of the Cargo and Materials of the Brothers, and the Sale thereof, without distinction between perishable and imperishable property, took place; and the second being intended to establish the correctness of the copy of Mr. Lawson's Account, sent in with my Memorial; but, to the Hon. Secy. of which, as a copy, I was not allowed to refer before the Committee, as I wished to do.

To those Affidavits, it is my wish most respectfully, yet most particularly, to call His Excellency's attention; as also to the fact that, although I applied to the Honorable the Attorney General, for Subpoena for individuals whom I wished to be examined, by the Committee, with reference to some of the charges set forth in my Memorial, they were not granted.

It should have been and methods of teaching that are approved. It must have a living end to its instruction must speak to intellect, heart to heart, and the master must be able to give in the school an impression of himself. If it is necessary that we should secure children that they stay home, unless it is necessary to form character, it is not sufficient to teach children the mere mechanical attainment of writing and reading, without ever calling into exercise their higher faculties, feelings, and affections, which after all constitute the value and character, in which the usefulness in this world and the hopes of another, of every mortal being must be founded; the master must be well versed in the theory of religion, and the competent to give in the school, not that classical learning is essential, but that simple knowledge of religion is indispensable, and the simple work of a teacher may be accomplished without these.

But it is desirable, that he who would teach the young mind should be well versed in the theory of religion, and that classical learning is essential, but that simple knowledge of religion is indispensable, and the simple work of a teacher may be accomplished without these.

He should be a lover of children. There are some who have a kind of constitutional aversion to the work of teaching children, and who cannot be induced to feel a proper interest in, or love to them. Hence, whatever other qualifications such an individual may possess, however well informed in religious matters, and however competent he may be, in every other account, this want of love for children, this disinclination to serve them, and this utter indifference about them, is a fatal disability. He only who holds them in a proper light, who sees in them objects demanding his loving attention and attachment, and whose natural inclinations lead him to take an interest in, and feel an affectionate regard for them, he only is properly qualified and prepared to be useful to them.

He should be prepared to make sacrifices. There is a sense in which the labours in question are sources of pleasure; and in which they may be engaged in as means of intellectual a recreation; but in general the duties of the school require and demand that he who performs them should be prepared to make sacrifices of his time, of his health, and of his pocket.

He should be patient and persevering. Sometimes the levities and headstrongness of children may be tiresome and trying; sometimes their dulness or obstinacy may prove very provoking; and sometimes the littleness of their improvement may be discouraging. He therefore, who would be useful to them, must be patient, and constant in his endeavours—must not be easily provoked to wrath—not given to caprice and passion—not soon angry—not prone to be discouraged by trifles—not subject to fluctuation, and given to change—not soon depressed in spirit—not soon weary and faint in his mind; but he must bear with patience—he must exercise patience and labour, and not faint, and as the husbandman hath long patience in waiting for the fruits of the earth, so our Father who is in heaven, hath great patience and long-suffering towards us; so should we, in the work in question, be patient and hope to the end. He, therefore, who has a general knowledge of religion and the Scriptures—who is a lover of the interests of children, who is prepared and reconciled to the making of sacrifices—whose character and conduct are moral and correct, and who is patient and persevering in the discharge of his station; he has, (we humbly trust to the pleasure) all the qualifications required for the honorable and successful discharge of all the essential obligations, for imparting to the rising generation an intellectual, moral, and a religious Education.

Your obedient servant, DAVID HIGGINS. THE FREE EDUCATION AND THE SMALL DEBTS ACTS.—The Royal Gazette of the 31st ult., contains notices of His Majesty's Assent to these two Acts, given on the 25th Dec., 1852.

On the 27th ult., John Lawson, Esq., delivered an excellent Lecture on "Banking," and which, being practical, called forth a very animated discussion. On last Thursday, the Hon. Charles Hensley read an admirable paper on "Glimpses of Ancient History," and confined himself to "Egypt," giving its early history, and tracing it to more remote times, and entered somewhat minutely into the character, habits, customs, and manners of its population. This, so far, has been the Lecture of the season, and filled the Hall full to overflowing. During the discussion, the foundation of a Public Library was mooted, and which will be one of the many contemplated improvements for Charlotte-town—to be accomplished hereafter.

The Hon. the President announced that the following gentlemen would lecture in order—Next Thursday, the Rev. James Narroony, on "Self-Poison;" On the 17th ult., Dr. M'Kenzie, of the Medical Staff, on "The Influence of the Solar Rays upon Creation;"—with some observations on "The Daguerotype and other Photogenic processes." The above is a very desirable property, and well worthy the attention of parties wishing to purchase.

PROSPECTUS OF THE CHARLOTTETOWN Gas Company. PROVISIONAL COMMITTEE: Hon. DANIEL BERRAN, Chairman; Hon. Charles Young, Hon. W. W. Lord, Hon. Charles Hensley, Hon. Joseph Pope, Hon. Francis Langens, Hon. William H. Hensley, Esq., Mr. James Anderson, Henry Haszard, Esq., Hon. George Birnie, Mr. George Beer, James D. Haszard, Esq., George DeBliss, Esq.

THE superiority and advantages of Gas over every other method yet discovered for lighting Towns, are so self-evident and so universally acknowledged, that it would be superfluous to dilate on the subject; and it is only surprising that, while every Town and Village in Great Britain, and almost every Town in the neighbouring Provinces, are lighted by Gas, that the Capital of Prince Edward Island should be still in darkness.

To enable the Company to commence operations at once, and on the most advantageous terms, it has been resolved that a deposit of £1 5s. per share be paid on the allocation of shares, and that no further call be made, till the Act of Incorporation be obtained, and each shareholder shall be payable by such instalments, and at such intervals, as the Directors may judge most convenient for the Shareholders and the requirements of the Company.
