IMPORTATIONS D'ACIER

Export and Import Controls Bureau
Direction générale des contrôles à l'exportation et à
l'importation

USER GUIDE

1. Objectives:

In July 1986, the Canadian Import Tribunal (CIT) announced the results of an enquiry into the steel industry, commissioned by the Ministers of International Trade, Finance, National Revenue and Regional Industrial Expansion. The CIT determined that carbon steel products are being and are likely to be imported into Canada at such prices, in such quantities and under such conditions as to make it advisable to collect information with respect to the importation of such goods. As a result of this finding, carbon steel products were placed on the *Import Control List (ICL)* effective September 1, 1986. After an amendment to the *Export and Import Permits Act*, products of specialty steel were placed on the *ICL* on June 1, 1987.

The purpose of this publication is to report on the information gathered through the *Export and Import Permits Act*.

GUIDE DE L'USAGER

1. Objectifs:

En juillet 1986, le Tribunal canadien des importations (T.C.I.) annonçait les résultats d'une enquête relative à l'industrie de l'acier, qui avait été demandée par les ministres du commerce international, des Finances, du Revenu national et de l'Expansion industrielle régionale. Le T.C.I. a établi que les produits en acier ordinaire sont importés ou sont susceptibles d'être importés au Canada à des prix, en des quantités et à des conditions qui rendent opportunes la collecte de renseignements sur leur importation. En conséquence, les produits en acier ordinaire ont été inscrits sur la *Liste de marchandises d'importation contrôlée (LMIC)* à compter du 1^{er} septembre 1986. Et, à la suite d'une modification apportée à la *Loi sur les licences d'exportation et d'importation*, les produits en acier spécialisé ont été inscrits sur la *LMIC* le 1^{er} juin 1987.

La présente publication fait état des renseignements recueillis en vertu de la *Loi sur les licences d'exportation et d'importation*.

2. Coverage:

"Carbon steel products" means all steel products, both carbon and alloy, having carbon and certain alloy chemistries as defined in Chapters 72 and 73, Schedule 1 of the *Customs Tariff*, with the exception of specialty steels.

"Specialty steel product" include the following: stainless steel, alloy tool steel, high-speed steel and mold steel.

These statistics do not include steel shipments of a value for duty of \$5,000 or less, which enter Canada pursuant to General Import Permit No. 80 for carbon steel products and General Import Permit 81, for specialty steel products. The \$5,000 value for duty limit was established to minimize the disruption to small business.

The current month data includes all permits issued during the full calendar month. The date of entry of the permit is used for determining the calendar month in which the item is recorded.

3. Data Sources:

Data contained in the following tables is derived

2. Portée:

"Les produits en acier ordinaire" désigne tous les produits sidérurgiques, qu'ils soient alliés ou au carbone, ayant une composition chimique à base de carbone ou de certains alliages, tels que définis aux chapitres 72 et 73 de l'annexe 1 du *Tarif des douanes*, à l'exclusion des aciers spécialisés.

L'expression "produits en acier spécialisé" désigne notamment les produits suivants: l'acier inoxydable, l'acier à outils, l'acier rapide et l'acier à mouler.

Les statistiques ne tiennent pas compte des expéditions d'acier dont la valeur aux fins de douane est de 5 000 \$ ou moins et qui entrent au Canada en vertu de la Licence générale d'importation n° 80, pour les produits en acier ordinaire, et de la Licence générale d'importation n° 81, pour les produits en acier spécialisé. La valeur aux fins de douane de 5 000 \$ a été établie afin de ne pas compliquer la tâche des petites entreprises.

Les données mensuelles portent sur toutes les licences émises au cours d'un mois donné. La date de l'entrée de la licence détermine le mois civil au regard duquel les marchandises sont consignées.

3. Sources de données:

Les données qui figurent dans les tableaux suivants

from individual import permits issued under the authority of the *Export and Import Permits Act*.

4. Collection and processing of Data:

An import permit is required for each shipment of carbon or specialty steel with a value for duty in excess of \$5,000. These permits are issued by the Export and Import Controls Bureau of the Department of Foreign Affairs and International Trade or by certain designated Customs Brokers who have on-line computer facilities linked with the Bureau computer.

Import permits are normally issued with a validity period of 30 days around the date of arrival specified by importers (5 days prior to and 24 after).

Information provided by the importer on the application for an import permit is subject to certain quality control procedures.

Price range data have been established for each product listed in the following tables. These ranges are periodically reviewed and updated. Permits

sont tirées des licences d'importation individuelles émises en vertu de la *Loi sur les licences d'exportation et d'importation*.

4. Collecte et traitement des données:

Il est nécessaire d'obtenir une licence d'importation pour chacune des expéditions d'acier ordinaire ou d'acier spécialisé dont la valeur aux fins de douane dépasse 5 000 \$. Ces licences sont émises par la Direction générale des contrôles à l'exportation et à l'importation du Ministère des Affaires étrangères et du Commerce international ou par certains courtiers en douane désignés qui sont en liaison directe avec le système informatique de la Direction générale.

Les licences d'importation sont normalement valides pour une période de 30 jours, c'est-à-dire pendant les 5 jours précédant la date prévue de l'arrivée de l'expédition indiquée par l'importateur, ainsi que les 24 jours suivant cette date.

Les renseignements fournis par l'importateur sur la demande de licence d'importation sont soumis à certaines procédures de contrôle de la qualité.

Des données relatives à la fourchette des prix ont été établies pour chacun des produits figurant dans les tableaux suivants. Ces fourchettes sont régulièrement

with unit values that fall outside these ranges are investigated and appropriate adjustments are made, if required.

Reports are published on a monthly basis as soon as possible after the end of each month. Copies may be obtained from the Export and Import Controls Bureau of the Department of Foreign Affairs and International Trade, P.O. Box 481, Station "A", Ottawa, Ontario K1N 9K6, at an annual cost of \$600.00 + GST.

5. Data Limitations and Comparability with Other Sources:

Actual imports may exceed the quantity or value as set out in a permit by up to 5 percent. Where the shipment is less than the amount shown on the permit, the quantity and value recorded in these statistics will be those shown on the permit.

Users will note that the year-to-date column is subject to adjustment to reflect permit cancellations and other amendments from previous months' data. Such adjustments do not form a part of the current-month figures.

Unused permits which are returned for cancellation are deducted from the database and these adjustments are reflected in the year-to-date column.

revues et mises à jour. Si la valeur unitaire ne correspond pas à ces fourchettes, les données sur la licence doivent être vérifiées et, au besoin, modifiées.

Les rapports sont publiés peu après la fin de chaque mois. L'abonnement annuel coûte 600 \$ + TPS et peut être souscrit auprès de la Direction générale des contrôles à l'exportation et à l'importation du Ministère des Affaires étrangères et du Commerce international, C.P. 481, Succursale "A", Ottawa, Ontario K1N 9K6.

5. Échéances et comparaison avec d'autres sources:

La quantité ou la valeur des importations ne doit pas dépasser de plus de 5% la quantité ou la valeur de l'acier indiquée sur la licence. Et, lorsqu'elles sont inférieures à ce qui est indiqué sur la licence, la quantité et la valeur consignées dans ces statistiques seront celles figurant sur la licence.

Il est à noter que les données cumulatives peuvent être modifiées afin de refléter les annulations de licence ou d'autres modifications apportées aux données des mois précédents. De tels ajustements n'apparaissent pas dans les données du mois courant.

Les licences inutilisées qui sont retournées aux fins d'annulation sont retirées de la base de données et ces ajustements se reflètent dans les données cumulatives.

Users may find that data presented in this report may differ from other published statistics, because of the source, collection and processing of data as outlined above. Statistics published by Statistics Canada reflect actual import transactions and should be used whenever official trade statistics are required.

Les données présentées dans ce rapport peuvent différer d'autres statistiques publiées, pour des raisons qui tiennent à leurs sources, à leur collecte et à leur traitement. Les statistiques publiées par Statistique Canada correspondent aux importations réelles et doivent donc être utilisées chaque fois que des statistiques commerciales officielles sont exigées.

separately identified and totalled

convert to Metric Tons, divide each total by 1000.

AVIS AUX LECTEURS

Commençant avec le Rapport de Janvier 1985 sur les importations d'acier, les données sur les licences délivrées pour les aciers ordinaires et spéciaux sont listées numériquement par code du Système harmonisé et totalisées pour chaque pays. Les données sur les aciers ordinaires et sur les aciers spécialisés sont présentées séparément et totalisées par catégorie de produits. Pour convertir à Tonnes Métriques, diviser les totaux par 1000.

NOTE TO READERS

Beginning with the January 1989 Steel Import Report, permit issuance information for both carbon and specialty steel is listed numerically by Harmonized Tariff code and totalled for each country. Carbon and specialty steel information is separately identified and totalled steel information is separately identified and totalled by product categories. To convert to Metric Tons, divide each total by 1000.

AVIS AUX LECTEURS
