The copy filmed here has been reproduced thanks to the generosity of:

D. B. Weldon Library
University of Western Ontario

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

D. B. Weldon Library
University of Western Ontario

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

SHOWING THE NUMBER OF DAYS BETWEEN
ANY TWO DATES ;

ALSO

*Showing the number of Days from any Day
throughout the year to 31st of December,
the usual period to which Interest
is calculated.*

In the following Table are marked in three columns for every month—1. Each separate date throughout the year ; 2. The progressive number of each date ; 3. The number of days from each date to December 31. The mode of using the Table will be seen from the following examples :—

Example 1.—To ascertain the number of days between any two dates in the same year—for instance, between March 3 and November 9,

Look for March 3, opposite which will be found
in the second or progressive column, . . . 62 days
Then look for November 9, opposite which will
be found, 313 days

The difference is the number of days between
the two dates, 251 days

Example 2.—To ascertain the number of days between any given date in one year to any date in the following year—for instance, between September 7 and July 4,

Look opposite September 7 for the number of days to December 31,	115 days.
Then look for July 4, opposite which will be found in the second column,	185 “

These added together are the number of days between the two dates, 300 days.

Example 3.—To ascertain the date on which a bill payable at a given number of days falls due—as, for instance, a bill payable at 60 days' sight from April 7,

Look for April 7, opposite which will be found in the second column,	97 days.
Add the time the bill has to run (including the 3 days of grace),	63 “

These amount to 160 days.

Then look for this number (160) in the second column, and the corresponding date, June 9, is the day on which the bill falls due.

Example 4.—To ascertain the number of days from June 16 to December 31, look opposite June 16 in third column, and the number of days will be found to be 198.

Note.—In leap year one day more must be added in each case, if the 29th of February comes between the two dates.

TABLE.—Continued.
