

The World's Home Magazine for Women Edited by LAURA E. McCULLY, B.A.

Duchess of Marlboro Has a New Charity

Has Furnished Two Residences in London for the Wives and Children of Convicts.

LONDON, Aug. 5.—The Daily Mirror publishes a story of the benefactions of the Duchess of Marlboro in behalf of the wives and children of convicts.

The duchess, it says, has taken two houses in London, which are being comfortably and tastefully furnished. One will be for the wives of prisoners serving sentences and the other for the wives of men who will be taught laundry work and plain sewing.

The duchess goes there every day, and it is stated, to complete her work she is giving up her visit to America this year.

To Live Happily After All.

COBURG, Duchy of Coburg, Germany, Aug. 5.—The relations between the Grand Duke Cyril of Russia and his wife (the divorced Grand Duchess Victoria of Hesse), which recently were reported to be about to end in a divorce, have entered upon a happier stage. She has consented to renounce her title of grand duchess, and an imperial Russian decree has been issued bestowing on her the title of imperial highness, Grand Duke Cyril has gone to St. Petersburg to see Emperor Nicholas, and on his return here a reconciliation will take place.

Mistakes of Learners in Tennis.

Consulting with a really scientific player, the editor elicited the following points: If you want to play tennis well, as in everything else, you must take the time to do so. You must not expect to become a champion in a few weeks or even a few seasons of practice. The no game is more entrancing or seemingly more simple at start, yet none is more difficult to play with an expert, or more full of the "tricks of the trade."

WHAT TO WEAR

The rule of the black hat is becoming a positive tyranny. Considering the heat of the summer, it is really too bad that society in general should have to turn out on best occasions in sable-plumed headgear. Yet so it is, and little brighter trimming breaks the effect of the really fashionable black hat.

One Girl and a Sorority.

A great deal of attention has lately been called in the papers to the case of the young girl at Chicago University whose colored blood was alleged to be the cause of her sudden expulsion from a sorority there and her ostracism in society.

PERSONAL

The Argonaut Rowing Club held its regular fortnightly dance in the clubhouse last night. Despite the fact of its being the Civic Holiday, involving excursions out of town, the dance was well attended as usual, and the committee's cool night proved ideal for dancing.

VAUDEVILLE POPULAR BIG CROWDS AT SHEA'S

A Varied Entertainment Which Was Much Enjoyed by the Holiday Audiences.

At both of the performances at Shea's yesterday there were many who were glad enough to stand during the entire two hours of entertainment. The theatre presented a bright and varied bill of the season.

Buckner, the trick bicyclist, does some thrilling stunts in the way of balancing and jumping up and down stairs and over recumbent figures. One of his best is the ride down a ladder placed at a steep angle and perilously near the footlights.

There is a change in the system of announcing the "turns," each of which is now lettered in the program and so indicated from the stage.

CAPT. CALLAGHAN'S STUNT.

Balloon Ascension and Parachute Drop at Scarborough Beach.

Scarboro Beach attracted a fair share of holiday pleasure seekers, the park being crowded afternoon and evening. There were two high grade free specialties in the afternoon. Capt. Thomas Callaghan, a Toronto boy who won distinction in the Boer war, receiving the distinguished service order for bravery in scouting, made a balloon ascension and parachute drop, according to program.

Among those present were: Mrs. McCutcheon, Mrs. Edmund Phillips, Miss Luttrell, Miss Forgnette, Miss Irene Brown, Miss Flo Phelan, Miss Helen Prowse, Miss Jessie Fulton, Miss Omara Winslow, Miss Elsie Taylor, Miss Muriel Bohme, Miss Freda Taylor, Mr. McCutcheon, Capt. J. C. and Mrs. Farquhar, Mrs. William Taylor, Mrs. McCurdy and the Misses Farquhar, Mr. Farquhar, Jr., J. W. Bang, W. S. Talmage, W. M. Taylor, J. G. Merrick, Messrs. Shepley, O'Sullivan, Hunter, James, Thompson, C. Toms, H. Toms, Dodds, Riddy, Wright, McKay, Balfour, McCutcheon, Stewart, H. T. Thompson, Robertson, Smith, Dudley, W. Haight, A. Haight, Pate, McLaughlin, Leane and Macdonald.

The many friends of Dr. Clare A. Langmaid will be pleased to learn that he was successful at the recent examination for the triple qualification of the Royal College of Physicians and Surgeons, having passed with honor distinction. Dr. and Mrs. Langmaid are leaving Edinburgh and London to spend some time on the continent, especially at Germany, Paris and Rome.

Mrs. M. J. O'Leary of 43 Macpherson-avenue and children are visiting in Muskoka.

Miss Margaret Higgins, McCaulstreet, is spending her vacation at Uneedarest Hotel, Muskoka.

Miss Kathleen Dunthie, Williamstreet, is staying at Uneedarest Hotel, Muskoka.

Mr. and Mrs. W. J. Gunn of Kingston were guests at the Rossin House over the holiday.

The Misses Nevin and Messrs. Cade and Harry Howe of Windsor are at the Rossin House.

Miss Muriel Douglas of Owen Sound is in the city staying at the Rossin.

Misses Annie Daley, Mary E. Murphy, Maud Lafey, Bridie Cassall, Kathryn Heegon, Sarah Grimes and Joseph Emmerick of Chicago are in the city, guests at the Rossin House en route to Quebec on a tour given by The Chicago Examiner for the most popular school teachers in Chicago. Several more are yet to follow.

Mr. and Mrs. E. G. Garden of St. Louis, Mo., are at the Queen's Hotel.

Senator D. McMillon of Alexandria was in town over the holiday.

Crown Attorney J. R. Murphy of Cayuga, accompanied by his wife and son, is at the Queen's on the Civic Holiday.

Mr. and Mrs. Thomas Tait and Miss Winnifred Tait of Melbourne, Ont., are registered at the Queen's.

Mr. and Mrs. A. Will and Dr. and Mrs. Harry Webb of Syracuse, New York, who are on an auto tour through Canada, were at the Queen's yesterday.

J. Ross Geddes and daughter of Sarnia are guests at the Queen's.

Earthquake Recorded. ALBANY, N.Y., Aug. 5.—The seismograph at the state museum registered earthquake shocks beginning at 1:50 o'clock this morning and continuing 10 minutes.

Woman Drops Dead. MAXWELL, Aug. 5.—Miss Mary Madden, daughter of the late James Madden, dropped dead today. She was about 20 years of age.

Riddance Sale of Other Shoes

Once upon a time there lived a man who had not worn SLATER SHOES. It was many years ago and he was a very peculiar man.

There is wisdom in our folly.

Quality will tell. Perhaps this is one of the most peculiar shoe sales ever told of.

Months ago the Slater Shoe factory was so busy that they could not and would not guarantee delivery of summer shoes in quantities sufficient for our trade.

We made a mistake. The regular patrons of this store will not buy a shoe unless it has stamped on it the Sign of the Slate.

OUT THEY GO!

Factory cost in most cases, and at less than cost in some lines. We can't afford to lose all we put into these Shoes, but I am going to lose what I must lose as quick as I can.

Here are some of the Shoes, some of the makers, and prices at which we sell, coupled with the price which other dealers sell these shoes at:

- 2000 pairs Men's Boots (made by Packard of Brocton, McPherson, King, Tetrault, Hart Shoe Co., and others), in patent colt, box calf, velvet calf, vic kid, and other leathers; other stores' prices \$3.50, \$4.00 and \$5.00. Our price \$2.50. \$3.00 and \$3.50. A clearing at \$1.95
- 600 pairs Men's Calf and Kid Stock (made by Packard, King, Cauthier, etc.), kid or calf leather-lined; other stores' price \$5.00. Our price \$3.45
- 120 pairs Men's Oxfords (made by C. H. Alden of Boston, Packard of Brocton, Tetrault Shoe Co., and others), tan and black, kid patent colt and calf, worth up to \$5.00, none less than \$4.00. Our price \$2.95
- 300 pairs Men's High-grade Tan Russian Calf and Vic Kid, extra good stock and color. Sold, none better, in all stores in town at \$5.00. A clearing at \$2.95

Sale starts Tuesday afternoon! Six good shoe salesmen wanted for the Riddance Sale.

Charles C. Cummings, President Charles C. Cummings, L'mited.

The Slater Shoe Store 117 Yonge Street, Toronto

CONSPIRACY BY GOVERNMENT?

Standard Oil Co. Say Repeated Attacks Are Not Accidental.

NEW YORK, Aug. 5.—John D. Archbold, vice-president of the Standard Oil Company, today made a statement in which he declared that the company was not given an opportunity to be heard or to submit data in the preparation of the report prepared by the commissioner of corporations, Smith, and made public.

Mr. Archbold in his statement said that the report of Commissioner Smith marks another coincidence in the utterances of different departments of the government which have occurred so frequently as to rob them of even the appearance of being accidental.

Big Turn Out for Muskoka on Civic Holiday.

The Canadian Northern "Lake Shore Express" had nearly three hundred people for Muskoka on Saturday, and the four-thirty train in as many more going north. People are now educated to the fact that they can reach the lakes more easily and at a much earlier hour by taking the Canadian Northern Ontario.

LEGS CRUSHED BY ENGINE.

Sutherland Black Probably Fatally Injured at Allandale.

Sutherland Black, a young man who for the past two years has been in the employ of McLeod & Sons, 699 Spadina-avenue, met with an accident which may prove fatal.

He left Toronto Saturday about 11.30 p.m., to spend Sunday at Gravenhurst. When the train reached Allandale, the young man got off to take a walk around the station, and while crossing the tracks was run down by an engine.

Both his legs were badly crushed and one had to be amputated. While the doctors have hopes of saving the other, his condition is regarded as very serious.

The young man was taken to the hospital at Barrie. His home is at Ayr, and he has been living in Toronto for a couple of years.

The English magazines have been printing some very strange poetry recently, but the following lines in The Saturday by Mgr. Vaughan deserve a place all by themselves as a Sinfonia Domestica:

- I. A Boy, A maid, A blabby Glade, VI. Them-Graves-stones two, Beneath The yew.
- II. A lover's Walk, Delightful Talk, VII. A Trumpet's Sound, Spread o'er The mound.
- III. A glance, A kiss, Supreme bliss, VIII. Both soar Above, Where all Is love.
- IV. A fading Ring, Bell-Ding! Ding, Ding!

Without Alcohol. A Strong Tonic, A Body Builder, A Blood Purifier, A Great Alterative, A Doctor's Medicine, Ayer's Sarsaparilla. Without Alcohol, Without Alcohol, Without Alcohol, Without Alcohol, Without Alcohol. We have no secrets! We publish the formulae of all our preparations.

The Toronto World CHILDREN'S HUMANE LEAGUE

Owing to yesterday being a civic holiday, the results of the competition have been deferred till to-morrow morning, when they will be announced as usual.

I wish to become a member of The Toronto World Humane League.

U.S. CRICKETERS LEAD 1ST INNINGS 207-120

Hill's 56 Best Score of Day—Three of Visitors Wickets Down in Second for 10 Runs.

The United States team has a considerable lead over the representative Canadian XI as a result of the first day of the international match at Rosedale, but the game is by no means lost. The visitors batted first and made the splendid score of 207.

The batting honors of the day easily belong to Hill, who played patiently throughout the Canadian's venture for nearly half the total, giving only one chance and that a hard one in the slips after he reached the half century. Hill stayed with him for nine, and then Terry joined for some fast scoring. Cregar and Vetterlein bled off the last of the Canadian wickets going down for the addition of only two runs. His first ball broke into Terry's off stump. Evans played well and on attempting to lift one, another off break sent the captain to the pavilion. Next Heighington followed and one ball dismissed him. Whittaker came out and played the sixth ball of the over. Hill scored two of Cregar, and Whittaker and Hamilton were then bowled by LeRoy. It was drizzling rain, but not sufficient to stop play. Wooley, batting left handed, and LeRoy, batting right handed, did so with confidence, stopping the dry rot. He took kindly to the medium breaks that were coming in to him and made nine of the eleven before Patton, who had replaced the corpulent Cregar, clean bowled him. Cregar, however, contributed considerably, and he was nicely caught in long field. Gauden seemed at home in the trundling, but he himself got out just when the wickets were coming fastest. Black last man started scoring rapidly, his 17 including two fours and a six over the grandstand. LeRoy took Hill's balls for the tenth wicket. Both sides fielded well. The wicketkeeping of Dorman being brilliant and sure.

The light was still bad at 5.37 when the Quakers started their second venture. They could do nothing with Hamilton and Black, the latter clean bowling three before time, and if they could keep up the good work, the winning margin would be turned into a well-earned victory.

Play will recommence at 11 a.m. today. The U.S. team were banqueted by the Canadian Cricket Association last night at the Albany Club.

United States—First Innings: H. Hill, b. LeRoy, 56; Cregar, b. LeRoy, 38; W. L. Pearson, c. and b. Shearer, 35; J. P. Dorman, c. and b. Wooley, 28; F. Dorman, c. and b. Wooley, 25; G. B. Dixon, c. W. S. MOULTON'S FREE GOLD

Rich Placer Mines on the Little Big Horn Predicted to Yield More Than 150 Million Dollars Which Would Mean \$50 Per Share for Every Share of Stock Bought To-day at 10 Cents.

NOTE THIS FACT

Free Gold Runs \$1.10 per Cubic Yard at the Grass Roots. First of a Series of Mammoth Dredges to be Installed at the Earliest Possible Moment. Work Now Actually in Progress

IMMENSE POSSIBILITIES

Klondike Richness Without the Drawbacks.

Imagine, if you can, a broad valley hemmed in by rugged mountains, thro' which ripples and flows a silvery stream, ever widening its way to the northward; darting downward through the basin-like formation, now bending, now leaping, finally rushing straight toward and through a narrow opening, or "break" that ages ago was a barrier holding the waters in check, then plunging recklessly down a fall of 80 feet to the level below. This stream is the Little Big Horn.

In the broad valley above this break, or broken dyke, are 500 acres of gold on sands—placer mines—owned by the Gold Standard Mining, Milling & Improvement Company. Men who are to-day the active and leading spirits of the company have prospectured and examined every foot of these lands. To all intents and purposes rough miners, mining freely with the "old timers," who still find profit in panning, these men have by practical knowledge and untiring labor secured by location or purchase absolute control of 25 claims, representing 500 acres of placer, that shows almost phenomenal values in free gold and still greater values in "rusty" gold.

Think of 500 acres of sand, gravel and small boulder formation which has been penetrated 25 feet without striking bed rock, and which has yielded by assay at this point \$9 in free gold per cubic yard. Estimating the average depths above the dyke at only 30 ft., which is about one-half the estimate of competent mining men, there would be 24,000,000 cubic yards of these golden sands. Our assays show a general average of \$6.48 in gold per cubic yard at a depth of only 6 feet, or a valuation of more than one hundred fifty-five millions of dollars. Of this amount, one-sixth is estimated as free gold, and the remainder rusty gold, which it is our intention to secure by cyaniding.

Think of scooping up dirt at random, any place, every place, at the surface, on 500 acres of placer ground, and securing values that average \$10 per cubic yard in free gold—then you can imagine some of the possibilities of the Little Big Horn Placers. Add to this the fact that every particle of free gold is a nugget, and that operations near bed rock must disclose untold richness, and you have the secret we have so jealously guarded during eight long, weary years of prospecting, planning and experimenting. You can understand why we have tried to take out these values without the assistance of outside capital and refused flattery of fers from speculators who wished to secure the property. But we have gone the limit of our capital just at a time when the harvest is in sight. With our present facilities we can only disturb a small area. With a series of dredges as proposed we can handle thousands of tons of dirt at a saving in cost and a consequently larger profit. We ask you to join with us in this great dredging enterprise to the limit of your means, believing that every dollar invested will bring rich returns.

I HAVE PERSONALLY SEEN AND EXAMINED EVERY CLAIM ON THE GOLD STANDARD PROPERTIES.

As a dealer in stocks and bonds and doing a general brokerage business, I have taken charge of the sale of stock in many companies, variously located in Colorado, Arizona, Nevada and Costa Rica, Central America. Without being at all egotistical, I can say that nearly all of the companies I have consented to represent in this and other countries, have been considered very successful. This is perhaps due to the fact that I have always been my custom to make thorough personal examination of the property of any company before agreeing to place the stock on the market as I have always felt that there are too many "GOOD" things to sell without trying to sell them first. I have never sold stock in any company without first seeing the property and proving it. Therefore a trip to the property of the Gold Standard Mining, Milling and Improvement Company had to be made when I found that the men who had quietly secured these rich placer lands would not let anyone else as their agent. Having been firmly convinced of the richness of the ground, I made the journey to the Little Big Horn Placers and camped on the property four weeks. This, for a man of 55, is no small undertaking, but I personally examined every claim on the property, and I am personally recommending Gold Standard stock to my business associates should be convincing proof that I consider it a worthy enterprise.

I consider that no investment opportunity carries with it more promise than does stock in the Gold Standard Mining, Milling and Improvement Company, not only in the securing of paying values at the surface, but the immense possibilities of free gold and rusty gold, and the fact that the Gold Standard stock to my business associates should be convincing proof that I consider it a worthy enterprise.

This Mammoth Dredge is capable of handling from 30,000 to 75,000 cubic yards of placer per month. This will be the first of a series of Big Gold Ships which we intend to instal, and it will be sent to the Gold Standard property at the earliest possible moment. This type of dredge handles more gold-bearing gravel in a day than 1500 men can in the ordinary way, and is efficient at depths of 60 feet or more.

A NOTED AUTHORITY SAYS:

"The underlying reason for the general success of Gold Dredging is that, by the use of sound, expert judgment, the value of a property can be ascertained to a practical certainty before any money is spent, other than that for prospecting."

While our estimates are based on surface values, viz.: \$1.10 Free Gold per cubic yard, the history of placer mining, and our own experience on the property, goes to prove that, at greater depths, there will probably be many times \$1.10 of free gold per cubic yrd, and thus our highest estimates are likely to be many times multiplied.

CO-OPERATE WITH US

In an Investment Opportunity That Comes But Once in a Lifetime.

Every big business is the direct result of combination of capital devoted to a single purpose, and mining is no exception. The Gold Standard Mining, Milling and Improvement Company is a combination of capital and brains of investors. Now that everything is in readiness, and every visible chance for failure has been removed, we invite outside capital to assist in pushing the work of actual gold recovery. Our object in selling stock is to quickly secure the needed funds for hastening dredging operations. Dredging for gold is not to be classed with the ordinary mining venture—it is a strictly legitimate business proposition built along industrial lines. It is a dredging industry and the harvest is gold nuggets in the dredging process. The actual properties that have been carefully selected, carefully prospected, and which we know show much better values than many other propositions that are paying big dividends monthly. Co-operation is the only quick way to develop a big property, and the Gold Standard Company is merely asking the co-operation of a limited number to aid in the quick removal of gold values that are practically within grasp. You can be a part owner of Gold Standard Mining property, and every dollar you invest will earn as much for you as any other dollar invested by anyone else.

Property of the Company

Consists of twenty-five placer claims, of 500 acres, unencumbered; Ditching and other Permanent work for Hydraulic Purposes; Dynamos, Engines, quarters for men and machinery. Last, but not least, our new invention for separating magnetic iron sand from placer dirt, which is fully described in our large prospectus. This machine has been perfected and built for the special purpose mentioned at no cost to the stockholders, but is a part of the assets. It is the invention of President Griffiths and the Company, and will likely prove a dividend-payer in itself, from sales to other dredging companies. The necessity of such a machine is obvious when it is known that the magnetic iron sand is removed from the placer dirt, which is fully described in our large prospectus. This machine has been perfected and built for the special purpose mentioned at no cost to the stockholders, but is a part of the assets. It is the invention of President Griffiths and the Company, and will likely prove a dividend-payer in itself, from sales to other dredging companies.

GAPABLE AND EFFICIENT MANAGEMENT

The officers of the Gold Standard Mining, Milling and Improvement Company were much selected so much on account of the prominence in commercial enterprises as for their loyalty and fidelity to any enterprise which they undertake. All are strong, capable business men, and every one of them has a reputation that will be an investigation.

OUR OFFICERS

- D. A. GRIFFITHS, President, Chicago. References: Mr. Henry Bosch, Pres. Henry Bosch Company, Chicago; John G. Shedd, Pres. Marshfield Field Company, Chicago.
- C. F. MACGREGGOR, Vice-President, Kansas City, Mo. References: New England National Bank, Kansas City; and Mayor Beardsley of Kansas City.
- M. L. HUTCHINSON, Secretary and Treasurer, Chicago. References: W. S. Cameron, Cameron & Mattison, Chicago; Mr. Herbert Hercock, of the American Trust and Saving Bank, Chicago.

BOARD OF DIRECTORS

Map of Gold Standard Placer Claims along the Little Big Horn River in Yellowstone National Park, Wyoming, showing basin of deep gold-bearing gravel and silt washed from the mountains, and the water-worn out where the river drops 80 feet below its upper formations. This basin was probably a lake of considerable depth.

RUSSIAN GENERAL SHOT HIS ASSASSINS ESCAPE

Ex-Governor of Odessa Murdered in Main Thorofare of Caucasian Town.

PLATIGORSK, Caucasus, Aug. 5.—General Karakozoff, ex-governor-general of Odessa, was shot and instantly killed in the centre of the town this morning. The assassins escaped. While Gen. Karakozoff was governor-general of Odessa he took severe measures to repress disturbances. He was succeeded by Gen. Kaulbars on Oct. 24, 1905.

Possibilities of Hydraulic Mining.

It is a well-established geological fact that in recent times, probably post-glacial, there was a change in the drainage channels in British Columbia, and as a result the former river channels are the present waterways. Most of the gold in the rich placer diggings came from these old river channels thru concentration by the present streams and as they are low grade they can be best mined by hydraulic mining. In the Yukon territory, north of British Columbia, near the City of Dawson, the famous White Channel deposit is estimated to contain between \$60,000,000 and \$100,000,000 in gold, but it will cost several millions of dollars to convey water to it for washing purposes; this being done by strong American mining companies. The gold nuggets in the rich shallow creek deposits vary in appearance in the different creeks of a single region, and it is possible for one with experience to tell with a certainty from what creeks they were taken. The nuggets are generally angular and large, but they become smaller and smoother as they descend the stream, owing to the increased wearing they receive. The gold found in gravel that is worked by hydraulic means is generally so fine that mercury is required to collect it. Gravel carrying 6 to 7 cents per cubic yard cannot be profitably worked at the present time in British Columbia unless provided with railroad facilities. Gravel containing 10 cents per cubic yard can be worked at a small profit; the average value of hydraulic gravel in the Cariboo region is about \$900 from a single pan of gravel in the Cariboo region, the gravel being situated on bed rock, and the succeeding pans averaged from \$300 to \$400. This of course is exceptional, but it is an occasional pan of this value that keeps up the excitement of the prospector.—From Mines and Minerals for August.

HAWK'S MILLS DESTROYED

Loss About \$7500—May Be Work of Incendary.

Fire last night destroyed Hawk's lumber mills on Patton-road, and together with the buildings, most of the lumber in the yard was burned. The alarm was given about 10.15, and at that time the whole structure was a mass of flames. The brigade answered promptly and the men got to work quickly, but the fire had already made too much progress. Two steamers answered the call, but only one was used, and the pressure did not seem to be very good. The total loss on the building was amount to about \$6000, with no insurance. The origin of the fire is unknown, but it is thought to be incendiary.

GLYCERINE, NEGLECTED AGENT.

The Medical World thus calls attention to a very common but not fully appreciated remedy—glycerine. It is a very valuable agent in many ailments. It is especially useful in cases of indigestion, constipation, and other ailments. It is easily absorbed and its action is quick. It is a valuable agent in many ailments. It is especially useful in cases of indigestion, constipation, and other ailments. It is easily absorbed and its action is quick. It is a valuable agent in many ailments. NEW VICE-CONSULATE

Mexico Will Establish One at Winnipeg.

WINNIPEG, Aug. 5.—(Special.)—Errique C. Creel, the Mexican ambassador to Washington, arrived in Winnipeg to-day on an official visit from his government, to investigate immigration, commercial and agricultural conditions. He announced that a vice-consulate will be established shortly in Winnipeg.

Death of J. H. Lubar.

J. Harry Lubar, leader of Lubar's Orchestra, died on Monday evening of a lengthy illness of cancer of the stomach. He was a member of the Woodmen of the World, the Orange Order and Orange Young Britons. His wife, four sons and two daughters survive him. The funeral will take place on Wednesday.

Was Tired of Life.

FREDERICTON, N. B., Aug. 5.—(Special.)—With the excuse that he was "tired of life," Escheliah Estabrook, one of the oldest residents of Marysville, was found this morning with his throat cut in three places. He is 87 years old and a prominent man. His wife died several years ago and lately he has been melancholy. These are but a few hints from

SAVING MONEY
 The wisdom of saving money must be apparent to any person who gives the subject any thought.
 A little money saved enables you to take advantage of opportunities for making more money; to buy a lot, to make the first payment on a home, to start in business for yourself. The opportunities come to the man with Capital. Saving the small sums is the creation of Capital.
 There is but one certain, safe way to accumulate money, and that is to save it. Thus, and thus alone, can the foundation of wealth be firmly laid. Those who earn and spend are puny. Those who earn and save are real. Let few who gain a competence and place themselves in a position to grasp life's opportunities, by spending less than they earn and saving the surplus.
 Economy is the road to wealth. Deposit your savings with the

CANADA PERMANENT MORTGAGE CORPORATION

CANADIANS ARE HEAVY AT MONTREAL MARKET
 Sharp Slump Follows Inactivity at New York and Prices Close at the Lowest.

World Office, Monday Evening, Aug. 5. There was no Toronto stock market today. At Montreal prices for interlisted issues were, if anything, slightly lower than at the close of last week. The Montreal market showed nothing more than a certain amount of desultory liquidation. The strange part of the operations in this market yesterday was a rise in Dominion Steel, but this issue has been highly gully for some months. The present one will probably pass without notice. Wall-street continued to liquidate its issues to-day, and toward the close a sharp slump in values occurred. The financial situation, both local and foreign, shows no change or stagnation, more than anything else, faces the Toronto market at its opening to-morrow.

London market was closed to-day.
 Pittsburg report that U. S. Steel will take over the Midland Steel Company, involving about \$15,000,000.
 The railroads are still paying \$38 per ton for higher class of steel rails.
 Business sentiment is more conservative, but nothing in the crop outlook to cause pessimism.
 General Manager McNeill of the Canadian Pacific reports extraordinary growth in the past two years in the western territory.

On Wall Street.
 Charles Head & Co. to R. R. Bondgard: Practically all considerations other than the sensational reaction of Judge Landis against the Standard Oil Company were left out of account in the course of the first week of July, when the market opened at violent declines, ranging from 1 to 1 1/2 points in some cases. From the early declines there were further recoveries. The selling, for the most part, was professional, and transactions for the first four hours of business were below even the nominal record of last Friday. After an interval of unsettled weakness, and new low prices were made. In the final dealings the selling pressure continued, and the market closed weak at the lowest prices of the day.

Ennis & Stoppard wired to J. L. Mitchell: The market opened lower, and continued to decline with fitful rallies. Discouraging features were the fine imposed on the Standard Oil Company, the financial affairs of the continent, and activity of the bears. An improvement in American shares. The market seems to be enduring the strain of recent unfavorable influences without serious loss in price. Under his supervision the evidence of weakness in to-day's trading, unless it is reflected in the heavy tone of metal and iron issues.

Henry Clews: The present outlook in the stock market is for moderate activity. In the absence of unfavorable developments, private reports of the railroads, but the general drift of prices promises to be downwards until the resumption of the market, when the commodity markets has gone far enough to warrant recovery. The pendulum has started to swing in the opposite direction, and the swing has evidently not yet been arrested.

PARIS, Aug. 5.—The Paris bourse has entered distinctly on the dead season. Small investors do not occupy themselves with their money during the vacations; and this stops for the most part all dealings of a great credit banks in the stock market. This year speculation has been kept so low while on an awkward period of settlement is being waited for, but predict manoeuvres for the coming months. But it is not quite certain that liquidation is finished; and with the slightest uncertain prospects of recovery for America and Germany, not to speak of other quarters, it is probable there will be little doing for several weeks.

Subscription Books
 Close Next Saturday

The offering of 5 per cent. 30-year gold bonds of the Porto Rico Railways Co., Limited, at 92 1/2-1, with 50 per cent. stock bonus, closes next Saturday, subscriptions having been received in good quantity from Canada, England and the United States.
 The Company has a Canadian charter, and is controlled by Canadians, with an experienced directorate and capable management. Its electric railway and electric lighting business has been in successful operation for years. Completion of construction work now under way will greatly increase its present large earnings.
 Net earnings for the first six months of 1907 were \$66,715.23, being an increase of \$21,684.57, or 47 per cent. over the same period last year.
 We recommend the investment as safe and likely to prove very profitable.

The French market is being tempted. The strong stand taken by the Bank of France last year is not encouraging to them. It is thought the bank will persist in its policy of refusing to discount such bills, and that it will not again open a "foreign portfolio" for the benefit of English investors in case of need.
 The first week of July finally closed up these London accounts. They were profitable to the bank of France, besides enabling it to keep down its discount rate. But politicians and financiers were commonly against the measure; and after it had its full effect, the bank gave sufficient notice of its future policy by raising its discount rate from 3 to 3 1/2 per cent.

FALL IN FOREIGN STOCKS.
 London on the Week's Break in Consols and Other Issues.
 NEW YORK, Aug. 5.—The Evening Post's London financial cable is as follows:
 Altho such an explanation may not sound scientific, there can be little doubt that the continued weakness of consols at the new low level largely results from their "unfashionableness" and from extreme unpopularity into which their reaction for some time past has brought them. This is true, even the "slump" this week was immediately due to heavy selling by the financial community.
 It is believed that these sales are partly in connection with the financial panic in Alexandria, and partly with fiscal reticence of the Government, and raising the great dam; but the fundamental fact, is that the sales have come upon a market which absolutely gilt-edged stocks may be had at a price to yield 3 1/2 per cent., where consols, even at the present very low quotation, do not yield 3. A really strong recovery in consols is considered impossible, unless generally easy money were to be poured upon the market.

New York Stocks.
 Marshall, Spader & Co., King Edward Hotel, reported the following fluctuations on the New York market to-day:
 Open High Low Close

Marshall, Spader & Co. wired J. G. Beatty: While the effect of the recent court decisions, and continued activity in these departments of the state and federal government may wear away for a time in effect on the securities market at home, we think foreign operators will regard these developments more critically to the disadvantage of an investment demand in American shares. The market seems to be enduring the strain of recent unfavorable influences without serious loss in price. Under his supervision the evidence of weakness in to-day's trading, unless it is reflected in the heavy tone of metal and iron issues.

Ennis & Stoppard wired to J. L. Mitchell: The market opened lower, and continued to decline with fitful rallies. Discouraging features were the fine imposed on the Standard Oil Company, the financial affairs of the continent, and activity of the bears. An improvement in American shares. The market seems to be enduring the strain of recent unfavorable influences without serious loss in price. Under his supervision the evidence of weakness in to-day's trading, unless it is reflected in the heavy tone of metal and iron issues.

Henry Clews: The present outlook in the stock market is for moderate activity. In the absence of unfavorable developments, private reports of the railroads, but the general drift of prices promises to be downwards until the resumption of the market, when the commodity markets has gone far enough to warrant recovery. The pendulum has started to swing in the opposite direction, and the swing has evidently not yet been arrested.

PARIS, Aug. 5.—The Paris bourse has entered distinctly on the dead season. EARL GREY WILL REVIEW CHILDREN AT THE FAIR

Feature of First Week—Great List of Attractions in Amusement Fields.
 Besides the Canadian historical pictures that are to be exhibited in the art gallery at the exhibition, arrangements have been made for the loan of some valuable paintings by Hogarth, Claude, Salvator-Rosa, Wouwermans, Morland, Turner and Teniers. These are part of probably the most valuable collection of pictures by the old masters in Canada. Mr. E. G. Temple, director of art at the Guild Hall, London, cables that he has arranged to lend a number of exceptionally high-class paintings.

When Earl Grey is here to open the exhibition he will take the opportunity on Friday day, which is Wednesday, Aug. 7, to review the various boys' brigades in the city, and the executive will give prizes for the best drilled companies. Entries, which are due to close to-day for horses, live stock, fine arts, natural history and women and children's work, have been coming in very freely during the last few days. As a matter of fact, some unexplained reason horse owners are invariably dilatory in forwarding their entries. However, sufficient has been received to warrant the expectation that the show will in every respect be up to the usual high standard. Cattle coming in finely, as do also sheep and swine, and there is a certainty that the entire exhibition of live stock will be of a superior to that of previous years.

Entries in Women's Department.
 The entries for women's and children's work up to-date, and considerably more numerous than the average. It might be mentioned in connection that the changes made in the prize list, warrant the expectation of a more than usually interesting exhibit in every section of the show.

At present moment, with luck, the Terrible might make about 18 knots. A year or so ago she was doing as much as 22; and so with other propeller might be expected to make 18 knots or so. The principles of economy have, however, been applied, and all her other repairs. Her boilers, for instance, are now growing old, and consequently need more frequent repairs than might otherwise obtain. They have not had them, however; and it is not surprising for work of this sort. As a result, not only a third of her boilers will hold water properly, but the explanation of what the Terrible would be expected to do in case of war would be interesting.

TO TEACH INDIA TO FARM.

With a "farm diploma" in his pocket, A. E. Parr has just left the Iowa State Agricultural College at Ames, Iowa, to accept appointment by the British Government as director of agriculture and animal husbandry in British India, with headquarters in Calcutta.
 For this top-notch education in agriculture, Mr. Parr was to be paid a salary of \$10,000 a year. His position will require him to spend the last few years of his life in thirty-nine experimental stations, where he will be expected to advance his new ideas on the raising of crops, and the selection of farm products.
 Under his supervision the great class is perhaps the most conspicuous one which has come to the institution during the year, and the graduates from Ames are being sought by every state in the union, and by several foreign states.
 Some of the young men have already made their plans to serve at the head of departments in state agricultural colleges or to take charge of experimental stations which are becoming so important in the activities of the states.
 Iowa leads in excellence of training in animal industry and soil culture, and it is to the "good seed" and "good breed" gospel which this institution is preaching through the state, by means of special train jaunts and visits to farmers' institutes that is keeping Iowa in the front rank of food producers.
 Parr has left for England, where he will visit his parents before taking up his duties in British India. His father is a leading farmer in Ashley, Staffordshire, England.

HELD UP FUNERAL FOR 45c.

There was a funeral at the Jewish Institute, Hoboken, yesterday. Michael Burns, No. 225 Madison-street, was passing, and the undertaker called the door, but he was not at the house, which he did, says the New York World.
 "Say! What's this?" asked Burns, and he was told that his father had died. "You promised me half a dollar, and this said affair doesn't go on until I get it," he said.
 He had held up the funeral for the forty-five cents. Recorder Lavery fined Burns \$2 for disorderly conduct. He had not the money, so he went to jail.
 Fatal Riot Over Ten Cents.
 NEW YORK, Aug. 5.—A negro died to-day as the result of race riots which started yesterday over a ten-cent bet on a ball game.

THE POINTED BULLET.

With reference to the pointed bullet, which has been discussed in connection with the record Bisley score, W. B. Taylor points out that over half a century ago a pointed bullet was introduced by Gen. Jacobs, who, according to Fremantle, in his "Book of the Rifle," succeeded in obtaining considerable accuracy in hitting a target at 2000 yards.
 Spanish War Hero Drowns.
 ARKLOW, Ireland, Aug. 5.—Thomas Myler, who claimed that he hoisted the Stars and Stripes at Santiago de Cuba during the Spanish-American war, was drowned off Courtown yesterday, while practicing for an attempt to swim the channel.
