

THE EVENING TIMES, ST. JOHN, N. B., SATURDAY, FEBRUARY 27, 1909

A Tablespoonful to Every Pail of Water.

Just think of the economy of ASEPITO! One tablespoonful to a pail of water is plenty. And there are 25 tablespoonfuls in a 5c. package.

It's simply *extravagance* to use Soap when ASEPITO does the washing for so little—and does it far better, too.

Just try ASEPITO next wash day. Discerning grocers sell it.

SOAP POWDER

A Mysterious Disappearance

By Gordon Holmes

A Great Detective Story

(Continued.)
They had been in the port three days, and on the morning would hand the yacht over to the crew's agents, those on board separating on their different routes. The Brownes went to Florence and Rome, and Memmore pretending to hold a pressing request to accompany them, cordially given by his prospective father-in-law.

This afternoon, Phyllis and he were leaving over the taffrail and discussing the point.
The young lady was slightly inclined to be angry. Her eyes roamed over the magnificent panorama of church-crowned hills and verdant valleys, with the picture of the city in front and the picturesque quays looking as though they had been specially decked for a painting by Claude Lorraine. But Phyllis paid heed to none of these things. She wanted her lover to come with her, and not to fly away to smoke-covered London.

"Business!" she cried, "it is always business that men think of. Of course I know that affairs must be attended to, but now that everything is settled and we are quite happy, it is too bad of you to run away immediately."

"But, dear—"
"There! Take your hand off my arm. You are not going to coax me into agreeing just because you received a letter this morning you go and upset all the arrangements."

"Phyllis, listen to me. I—"
"You shan't go. I think it is mean of you to insist upon it when I am so urgent."

"I am not insisting. You might at least help me to settle matters; otherwise they will get terribly mixed."

"And you will stay?"
"What else can I do when you ask me?"
"Oh, you darling!"

This little quarrel was very delightful, and made them feel ever so much more in love than before, but it did not help Memmore out of his difficulty.

"Let us see what Corbett really says," he remarked, mutely taking a letter from his pocket.

"Am I to look too?"
"Of course. I have no secrets from you, little woman."

Phyllis nestled up close to him. This time she did not object to his hand resting on her shoulder, and together they read the following letter:

"My Dear Bertie—At last I am able to write you definitely. The prospectors have struck it rich on our property, and I have sold two claims outright for \$50,000. With this nest-egg I am taking the girls to New York, and shall then start by the Dominion for your side of the pond. I am due in Liverpool on February 4, so look out for me. Yours ever,

"SYDNEY H. CORBETT."

Both gazed thoughtfully at the document for a few moments before Phyllis said:

"Does that mean we shall be rich, Bertie?"

"How companion emphasized the gratification of the plural pronoun by a squeeze."

"I hope so, sweet."

"That will be very nice, won't it? I will marry you even if you have to take a place in father's office, but it will be so much better if we haven't to explain to him that we are poor after all."

Memmore sighed. "It is not so bad as that in any case," he said. "This Spring-bok mine speculation will probably turn out well, but I look to Wyoming to yield the best and most permanent results."

"With a note to the housekeeper, Mrs. Robinson, and another to the hall-porter of the Universities Club, lest by any chance the Liverpool letter missed his friend, completed his task."

He laughed as he hurried from the post-office to the harbor.

"By Jove!" he said to himself, "won't old Robinson be surprised when she gets my letter telling her that another Mr. Corbett is coming from America, and that my name, concealed for family reasons, is Memmore. I guess that Sydney will feel a bit mixed up, too, until I tell him the whole yarn."

No wonder his housekeeper would fail to understand him.

Others, whose influence on his fortunes he little suspected, were already puzzled by the circumstances. Bruce, for instance, and White would be very glad if some occult power enabled them to read the seemingly trivial letters posted that day in Genoa.

Every person known to the reader, and not the least the visitor from the United States, was on the eye of a man whose object was the outcome of which no man could prophesy. As yet, one man only, Claude Bruce, had the slightest suspicion that affairs were approaching a crisis.

When Memmore reached the White Heather he found Lady Browne and Phyllis dressed for a drive before dinner. Sir William seized the opportunity to cross-examine his daughter's suitor as to his means. Phyllis was an only child, and her father did not propose that she should live in penury, whatever the financial position of her husband might be. He liked Memmore and had ascertained by private inquiries that his social position was good.

(To be Continued.)

Fashion Hint for Times Readers

Paris has unqualifiedly sanctioned the use of heavy English eyelid needlework with the sheerest nets—an entirely new departure. A blouse of tucked net is trimmed with straight bandings of heavy cotton lace, and just over the bust is a square enrichment of English eyelid embroidery. Rows of hand-embroidered dots, done with coarse mercerized cotton, bring out the effect of the lace, and though really quite simple in design this blouse appears to be quite elaborate. The neck is cut out in a small square in which is set a yoke of finer clinging lace. A touch of color is given by a silk piping at the edge of the square and by the silk buttons to which are applied medallions of lace.

NO MONOPOLY OF ANY WATER POWER

All Natural Resources Should be Public Utilities—Private Companies Should Not Control Any Water Power.

Ottawa, Feb. 26.—The recommendations unanimously passed by the international conference at Washington for the conservation of natural resources were presented to parliament today by Hon. Mr. Fisher. Members of the conference found that the waste of the natural resources of Canada, United States and Mexico was practically the same and starting from this common basis a unanimous agreement was reached as to their recommendations to the respective governments.

The active principle of the recommendations is that the country shall appoint a conservation commission and shall make an inventory of the resources which remain to be conserved. This work will be begun promptly in each country.

It is declared that timber, water, land, public health, power, fuel and other natural resources used as means of life and welfare, should be regarded as public utilities, in regard to which measures should be taken to prevent a monopoly and waste. It recommends a world's conference on conservation.

For public health steps should be taken to prevent the pollution by sewage of rivers and lakes and that preventive legislation be enacted for this end.

That forests require protection from fire; that forest reservations should be created; that fire conservators should be made; that forestry officers should be trained and educated to supply efficient men; that excisions on standing timber should be so regulated as to prevent destruction and encourage conservation; that both public and private-owned forests should be protected with equal effectiveness; that owners of land unsuitable for agriculture should be encouraged to reforest.

In regard to water, that for both irrigation and power development reasons there should be complete and concurrent development of streams and their sources; that every water power should be recognized as the highest and most necessary use of water for the development of inland navigation; that owing to the cheapness of water transportation there should be general plans for the development of inland waterways for water communication, and their retention when developed under exclusive public ownership and control.

The report makes a strong declaration against allowing any private monopoly of water power and declares that no rights to the use of water powers should hereafter be granted in perpetuity, but that each grant be conditional upon prompt development and the payment of proper compensation to the public for the rights acquired. A condition should also provide for the revision of the rates and compensation periodically.

The commission favors participation of the people in the development of water power to secure the fullest use of water available for irrigation.

The report also recommends the regulation of grazing on public lands and the subdivision of excessive holdings of agricultural or grazing lands, thereby preventing monopoly of government control of grazing or non-irrigable public lands, too dry for cultivation, is favored.

MEANING OF "SCAPEGOAT."

"The second precedent was that the government should be permitted to compel the correspondents and ignore the court's subpoena, which would have refused this charge. The third was that the same seven profitable loans might be construed into 14 misapplication counts to harm the bank."

"The first precedent to be established was that it was permissible to charge conspiracy so as to introduce evidence otherwise inadmissible, and that the accused might then be acquitted of the conspiracy charge although no other charge was made."

"In the enforced leisure which I am enjoying (I) I have looked up with some interest the meaning of 'scapegoat,' and I find in the standard dictionaries it is defined as follows:

"A goat upon the head of which Aaron, on the great day of atonement, symbolically laid the sins of the people, after which it was sent away in the wilderness."

"I do not believe the courts will do me a conscious wrong. I cannot believe that they intend to make me suffer beyond what I deserve."

"Born in New England, where a regard for law is the primary study of man, I am bound to hold to an abiding faith in the ultimate and final justice of our courts, and I court the opportunity to lay before the circuit court of appeals in impassioned way these two points:

"First—Can a man be sent to prison because he made \$20,000 for his bank?"

PURITY FLOUR

And Its Keeping Qualities

SOME people find it necessary to buy a considerable quantity of flour at one time—sufficient to last for a long period. Naturally they are anxious to procure a flour of the kind best adapted to lengthy storage.

There are two important reasons why PURITY FLOUR possesses these qualities. One is that it is made entirely from Manitoba Hard Wheat. The other lies in the fact that the careful milling necessary to produce "Purity" absolutely excludes all low-grade particles of the wheat berry. It's the high grade Manitoba Hard Wheat Flour that keeps—stands longest storage. That's "Purity."

"Purity" flour may cost a little more, but is more than worth the difference. Try it. Watch results both for quality and yield.

"More Bread and better Bread"

Mills at Winnipeg, Goderich, Brandon.

Standards of Beauty

From time immemorial the question of woman's beauty has been of interest. Every nation that ever existed has had some particular standard up to which its women tried to measure themselves. There have been as many different standards as there have been nations, and the standard of beauty is a thing that is not fixed, but varies with the times and the people. The standard of beauty is a thing that is not fixed, but varies with the times and the people.

The English beauty is a woman of extreme height and well-built. She needs not necessarily be thin, but her figure must be straight and her carriage impeccable. Her features must be of the classical, and, in fact, may be cold and even haughty in severity of line. The wealth of hair, the brilliancy of her eyes and the perfection of her lines are the beauty test for the Englishwoman.

A good figure, as the French mind is very different. The French beauty must be slim, with a close-fitting gown and curves of exaggerated fashion. She is most generally petite, plump and fair. Her vivacity is her chief charm.

Germany prefers a plump woman—not necessarily a fat woman, but one inclined to be stout. This roundness of figure and face suggests good health and practical housekeeping qualities.

The Dutch beauty is the German type carried to the extreme. The Irish standard prefers an enviable rosy complexion, abundance of hair and sunny features, with eyes of the heavens' own blue. Gay spirits and vivacity are welcome adjuncts.

The Japanese and the Chinese have a standard entirely different from other nations. They prefer a small, diminutive, silent woman, with timid, retiring ways and shy demeanor. Almond eyes and swarthy complexion in which there is no trace of rudeness, with straight black hair profusely adorned with flowers. Small fans and ornaments are sought for. A Japanese woman at home in her own country, in her dressing kimono and the picturesque surroundings, is indeed bewitching, while she is equally awkward attired in English, French or American clothes.

Swartness is the prevailing standard in India. The face and hair are generally partly veiled in a flowing white cloth. In Turkey obesity is admired and the stout woman, the absolutely fat woman, is considered beautiful. In the dark continent, the African beauty adorns her nose, and her ears with rings and pendants. Finely chiseled features are of no importance for the simple reason that they do not exist.

The American girl? In posters, paintings and illustrations she has been flung forth defiantly to all the world. There are many types—from the North, the South, the East and the West. Which is the prettier, is a mooted question. Every man, every woman, chooses his own. The French beauty must be slim, with a close-fitting gown and curves of exaggerated fashion. She is most generally petite, plump and fair. Her vivacity is her chief charm.

NOVA SCOTIA MEMBERS THINK CHATHAM'S CLAM IS A JOKE

They Cannot Understand Why Any Place in New Brunswick Except St. John Should Have a Look in for the Dominion Fair Grant—St. John's Chances Look Brighter.

Ottawa, Feb. 26.—The St. John delegates left for home this afternoon and were not so discouraged at the time of departure over the prospects of getting the \$50,000 grant. Other considerations have arisen which would indicate that the members may give great weight to the opinion of the minister of agriculture, who certainly wants the show to be held in the place that will reflect credit upon the province.

Nova Scotia members are humorous over the situation, saying that there was no thought there of any place but Halifax. Even Amherst, with all its prominence and success in exhibitions, did not pretend to be able to compete with a crowd as would go to the national show. Members from the western counties, Digby, Annapolis and Antigonish, are particularly interested in the outcome, because their people attend the St. John exhibitions. They maintain St. John is the only place that the selection of a small town will be a reflection upon Dr. Pugsley as a minister. Liberal members, they feel sure, will not take advantage of his generosity in leaving the choice to them and take the show from his city, which happens to be the most important place in the province.

Dr. Pugsley, however, having passed his word not to interfere, will not move an iota to influence the members but no matter how much the choice of a smaller place will injure him he will abide by their decision.

The ministers and members think he is entitled to great consideration in making the choice.

THERE WAS MARK ON DOWNIE'S NECK

Witnesses in the Downie Case Yesterday Afternoon Swore He Was Apparently Unconscious When Found and His Neck Bore Finger Marks

The hearing in the case of W. Herbert Downie was continued in the police court yesterday afternoon and after the evidence of several witnesses had been taken was adjourned until this morning.

In the afternoon four more witnesses were examined, and adjournment was made till 10.30 this morning. The teamster, Jeremiah McKeehan, was the first to be called. After returning from dinner he was taken to the factory, he went up stairs to the smoking room, and about 1 o'clock returned to the office for some papers. As he opened the door he saw a man on the floor and called to Shepherd and Holmsted, who were passing.

They rubbed Downie's hands and as he was returning to consciousness he said "the cash." Mr. Anderson came in soon afterwards, and Downie said to him that the cash was all gone. After Mr. Anderson had found that the money was really gone, he telephoned to police headquarters.

The witness went on to say that Downie claimed he had been choked but did not know by whom. He said he did not hear or see anything, but was caught up by the throat and pulled him, chest and all, backwards. At the time he was found Downie was lying in the chair and he was lifted out and placed on the floor with a cushion under his head.

Two of those who stood by helped Downie to get up and into his chair again. To Mr. Price the witness said that he saw some dark marks on Downie's throat about on a level with the top of the collar.

Benjamin Shepherd, was the next witness. He said he saw Downie in the enclosure by McKeehan. Downie was coming to get up and into his chair again. To Mr. Price the witness said that he saw some dark marks on Downie's throat about on a level with the top of the collar.

Harold Holmsted next took the stand and described the three marks on the left side of Downie's throat. Two of these were very distinct, of a purplish hue. The witness asked Downie if someone had choked him. He replied, "Yes, someone choked the life nearly out of me." Downie was apparently unconscious.

John Wood, who works in Simms' shipping room, was the last witness. He said that he saw Downie in the enclosure by McKeehan. Downie was coming to get up and into his chair again. To Mr. Price the witness said that he saw some dark marks on Downie's throat about on a level with the top of the collar.

As this was all the evidence offered, the prisoner was remanded until this morning.

BABY'S OWN TABLETS

WILL CURE YOUR BABY

If your little ones are subject to colic, indigestion, constipation, worms, simple fever, or the other minor ailments of childhood, give them Baby's Own Tablets and see how quickly the trouble will disappear. But better still, an occasional dose of Tablets given to well children will keep these troubles away. Mrs. Allan A. MacDonald, Indian River, N. B., says: "My baby suffered greatly from constipation and stomach trouble and Baby's Own Tablets cured him. I always keep the Tablets in the home now." Sold by the fine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Race bill, providing for local option by a majority instead of a two-thirds vote as heretofore, passed both bodies of the Arizona legislature.

The first of the meetings of the Men's Association of St. John, N. B., was held last night. The lecture room of the church was comfortably filled. A fine programme was carried out, after which no treatments were served with the younger members. The following took part in the entertainment: Messrs. Young, Brown and the Bonnell brothers, male quartette; Fred McKean, bass solo; Ken Hennessey, baritone solo; Fred McKean, tenor solo; Ed. Bonnell, bass solo. The next meeting will be on March 8. A good programme is being prepared.

THREE HUNDRED SECONDS LATER

Or Five Minutes After Taking a Little Diapiesin All Indigestion and Stomach Misery Vanishes.

Misery is the man or woman who suffers from indigestion and stomach misery. There are few diseases which create such misery, long drawn-out suffering, as indigestion. It punishes them before meals after meals and between meals they take it to bed with them. It is with them wherever they go, though indigestion is the simplest disease of all to cure.

Tell such afflicted ones, dear reader, of Diapiesin, a wonderful stomach purifier, a wonderful stomach medicine, no Belching or Gas or Eructations of Sour food, Debilitating Headache, Nausea, Water-brash and other symptoms of a sour, disordered stomach.

Papae's Diapiesin will digest anything you eat without the aid of the stomach. Diapiesin is a wonderful stomach medicine, no Belching or Gas or Eructations of Sour food, Debilitating Headache, Nausea, Water-brash and other symptoms of a sour, disordered stomach.

PERRY BACK IN POLICE RANKS

AND CAVANAUGH IS SUSPENDED

Chief Clark Sifts Evidence and Finds No Cause to Act Against Perry — He Suspends Cavanaugh for Three Days for Not Making His Report in Time

Policeman Ira D. Perry, who was under suspension during the investigation of charges preferred by Policeman Matthew Cavanaugh, was reinstated by Chief of Police Clark last night and at once resumed duty, while Patrolman Cavanaugh was suspended for three days.

In speaking of the matter last night, the chief said that under the evidence the only cause for him to place Perry in the ranks again, while he felt that he must suspend Cavanaugh for the period mentioned for neglect to report to him at the time of the occurrence what he did report on Feb. 20, nearly four months later.

The charges made by Cavanaugh were in substance as follows: While performing night duty on the Dock Point beat during the week of Oct. 26 with Perry, he said, he tried the door of the Braxley Drug Company building between 12 and 1 o'clock and found it locked; that the hour between 1 and 2 o'clock he spent in the Water street look-out and came out at 2:10 p. m. and met Perry in Dock street and asked the latter where he had been. The reply was that he had been in a place. Cavanaugh then said Perry took a pipe out of his pocket and offered it to him, but he returned it, saying that he did not want it; that Perry then took out another pipe and in the meantime one in a case fell out on the street; that Perry told him that he had found the Braxley Drug Company door open and had secured it with a spring lock.

On account of having looked up a policeman, Cavanaugh expected to leave for home at 3 o'clock. At 2:40 he telephoned to Sergeant Campbell, who ordered him to remain on duty and he again went on the beat at 3:10, going as far as the Red Rose tea building and seeing no sign of Perry. He stood in the doorway of Gilbert's shop, he said, and in about five minutes Perry came from the hall door of the O'Regan building opposite with something under his cape that looked like bottles. He said Perry went down Dock street almost at a run. Cavanaugh said he followed and saw the O'Regan building in Mill street, where he saw Perry with something under his cape like bottles, the chief said he could not see how, at night, judging from the relative position of the buildings, the location of the lights in the street, that Cavanaugh could be certain.

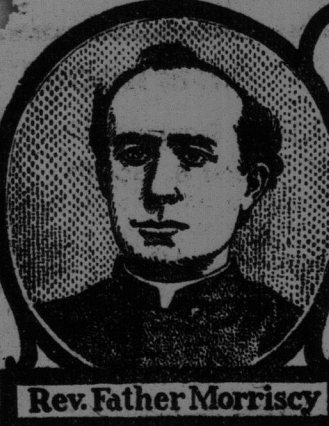

Perry resumed his uniform and went on duty in Brussels street last evening. Chief Clark said to a Telegraph reporter that he had no doubt Cavanaugh meant to do the correct thing, but he should have reported to him at once. Perry entered in the blotter at the time a report that he found the drug company building open; if Cavanaugh believed differently he should have said so at once. As to the statement of Cavanaugh that he saw Perry with something under his cape like bottles, the chief said he could not see how, at night, judging from the relative position of the buildings, the location of the lights in the street, that Cavanaugh could be certain.

Perry resumed his uniform and went on duty in Brussels street last evening. Chief Clark said to a Telegraph reporter that he had no doubt Cavanaugh meant to do the correct thing, but he should have reported to him at once. Perry entered in the blotter at the time a report that he found the drug company building open; if Cavanaugh believed differently he should have said so at once. As to the statement of Cavanaugh that he saw Perry with something under his cape like bottles, the chief said he could not see how, at night, judging from the relative position of the buildings, the location of the lights in the street, that Cavanaugh could be certain.

Rheumatism for Several Years—Now as well as Ever

647 Main St., St. John, N. B., Nov. 27, 1908.
Father Morrissey Medicine Co., Ltd.

Rev. Father Morrissey

Rheumatism cannot exist when the kidneys are in perfect working order for then they take out of the blood all the Uric Acid, which alone causes the Rheumatism.

Father Morrissey's "No. 7" Tablets

act directly on the kidneys, toning them up and helping them to clear the blood of the Uric Acid. If the Rheumatism is of long standing it may take some time to clear out all the poison, but almost from the first "No. 7" Tablets relieve the pain, and if used faithfully they rarely fail to cure.

Even if other remedies have done you no good, do not give up till you have tried Father Morrissey's "No. 7" Tablets.

50c. at your dealer's.

Father Morrissey Medicine Co., Ltd. Chatham, N. B.

ONE OF TORONTO'S GOOD LAWS

(Toronto Telegram.)

TORONTO'S ANTI-SPIITING BY-LAW.
In force five years.
Maximum penalty \$1 and costs, or three days.

Fines imposed under by-law, two (2).
Usual method of enforcement—handing a card to offender.

Soon the downtown streets of Toronto are to be decorated with a number of small signs warning people to refrain from spitting on the sidewalks.

They are blue enameled in sign with white letters and will be posted on the telegraph poles and hang across the sidewalk so that all can see them as they walk down the streets.

Always back in 1904, to be exact, on April 11th, the city passed a by-law to prevent spitting on the sidewalks, but except for a couple of cases this has not been enforced.

SMALL CARDS AT FIRST.

At first a number of small cards were printed and handed to the police of the city to pass out to people whom they caught spitting on the sidewalks. There were to be a warning for the first few times and after that the police were to take the names of the offenders and summon them to the police court.

His has not worked well, and the spit on the sidewalks still continues, so the city council has determined on a new way to try and stop the habit. There are these new signs have been submitted to the city engineer and passed by the council.

Three hundred of these have been ordered and are expected in a few days when they will be put up right.

TRYING SIGNS NOW.

"We are trying these signs first to see how they work down town," said Mr. Powell of the city engineer's department to the Telegram. "If they stop the spitting we shall order more and put them up all over the city."

"We have not put the fine on them, as it is so very nominal and would not be worth while."

PINE IS TRIFLING.

The fine for a fracture of this by-law is not to exceed \$1 and costs, or in default, three days. This fine is not much of a deterrent. In some American cities the penalty is \$50 and costs.

"CALLING" CARD.

The old card handed out by the police, and of which the police still have a large stock, is the calling card. It is a small card, and is the only one of its kind in the city.

On sidewalks, in street cars or in public buildings is against the law.

Please refrain from doing so.

A fine, or in default of payment imprisonment, is the penalty.

By order of the City Council.

W. A. Littlejohn, City Clerk.

WHAT REVERSE SIDE SAYS.

This is on one side of the card, and on the other is the text from the by-law and the warning of the penalty again. The sign is not mentioned.

TRACT FROM BY-LAW NO. 338.

No person shall spit upon any public sidewalk which is upon any highway, or in any passageway, stairway, entrance to any building used by the public, or in any room, hall or building to which the public resort, or in any street, or on other public conveyance, except into a proper receptacle.

PENALTY—A fine or in default of payment imprisonment.

By order of the City Council.

W. A. Littlejohn, City Clerk.

"REPUBLIC'S" RESCUE TOLD OF BY ONE WHO WAS ON SPOT

How the S. S. Baltic Searched Through Thick Fog for the Disabled Ship—Women and Children Saved by Brave Men—Some Thrilling Incidents of the Rescue—Passengers Saved in Semi-Nude State.

The following graphic account of the rescue of the S. S. Baltic was written by Henry L. Rosenfield of the Equitable Life Insurance Company. Mr. Rosenfield made the trip to New York on the Baltic and was an eye witness of the thrilling scene he describes. He was on the ship when the "Republic" was sighted and he saw the rescue of the passengers and crew of the disabled steamer "Republic" from one who was on the former ship and saw it all. He will give briefly some of the more striking incidents of what was unquestionably the most thrilling experience I have ever had as a passenger.

For those who believe in the "13" superstition let me give at the beginning some facts which must effectively dispel the belief that there is anything unlucky about the "13" combination. We left Euston Station, London, Wednesday, January 13, on track No. 13, and were out exactly 13 days from Liverpool to New York. Had we not left on January 13th, and had we not been on the "Republic" at the time of the accident when we received the now famous "C. Q. D." wireless, and counting down the minutes until the rescue would come, we could not have made the rescue so opportunely. While it is perfectly true that some other ship might have been along when the "Republic" was in danger, it is a fact that the "Baltic" by virtue of its size, comfort and splendid seamanship, was eminently fitted to be the one ship to perform this great work in such an emergency. So that in this particular instance the "13" was a very good fortune to over 1,000 men, women and children.

By reason of adverse weather conditions the "Baltic" was already two and a half days behind schedule when on Friday, January 22, at noon, we were overtaken by the "Republic" and the "Baltic" was forced to alter course to avoid collision. The "Republic" was in a very bad way, and the "Baltic" was forced to alter course to avoid collision. The "Republic" was in a very bad way, and the "Baltic" was forced to alter course to avoid collision.

At first the "Baltic" was in a very bad way, and the "Republic" was forced to alter course to avoid collision. The "Republic" was in a very bad way, and the "Baltic" was forced to alter course to avoid collision.

Whew!! What An Awful Breath

You've said that about others—are you sure that others can't say it about you? Maybe not every day but some days.

Constipation

even in a slight degree is bound to unsettle the stomach and cause foul gases to arise through the alimentary canals. Remember all the poisonous waste matter that should have been eliminated from your system is just lying there purifying—giving you not only a bad breath but laying you liable to a severe attack of sickness.

Nature's Remedy

REG. U. S. PAT. OFFICE

NR-TABLETS-NR

cures Constipation, keeps the bowels sweet and clean and settles the stomach. One can afford to get along without taking an occasional NR tablet—it will keep you in health.

SIR THOMAS SAYS

GOOD WORD FOR

ST. JOHN

President of the C. P. R. Dis-

cusses the Request for Run-

ning Rights to Halifax—

Better Facilities for Mail

Handling is Chief Motive.

Sparking of the efforts of the C. P. R. to obtain running rights over the I. O. R. to Halifax, Sir Thomas Shaughnessy, president of the company, who was in the city yesterday, told a Telegram reporter that Sir John would in any event remain the Atlantic terminus of the road, and that one of the principal reasons for seeking an extension is to afford better facilities for handling the mails.

When asked whether the request of the C. P. R. for running rights over the I. O. R. to Halifax, Sir Thomas Shaughnessy, president of the company, who was in the city yesterday, told a Telegram reporter that Sir John would in any event remain the Atlantic terminus of the road, and that one of the principal reasons for seeking an extension is to afford better facilities for handling the mails.

LATE LOCALS

Registrar Jones reports one marriage during the present week, also fifteen births—ten males, five females.
Battle line steamer Pandora, Captain start, arrived at London today from Hull for Harwick.

Archdeacon Raymond will speak at the Every Day Club tomorrow evening at 8.30 o'clock. Mr. Watson will speak at the four o'clock meeting in the afternoon.
J. Wendell McCosh will address the men's meeting in the W. C. T. U. hall, west side, tomorrow afternoon at 3.30 o'clock.

C. P. R. steamship Mount Temple, Captain Griffith, left Antwerp last Wednesday for this port with passengers and general cargo.
Mrs. Charles McCarthy was buried from 690 Main street at 8.45 this morning. Requiem high mass was sung at St. Peter's church by Rev. Father Maloney, and interment took place in the new Catholic cemetery. Relatives acted as pallbearers.

Owing to the unfavorable weather, the Y. M. C. A. sleighride and supper did not take place last Wednesday night. Arrangements have been made for next Monday night and the sleighs will leave the building at 6.45 p. m. weather permitting.

A woman was found about 7 o'clock last evening lying unconscious on the side of the road near Silver Falls. She was driven to the police station and Dr. Berryman summoned. She soon revived and walked to her home, near Brussels street. It was thought she had been drinking.

Basil Pappas has been reported by Night Detective Lucas for permitting George and Charles Pappas, minors, in his pool room on Friday. Pappas was reported on a previous occasion for harboring the same two minors and promised to stop. Pappas has leased the shop from Speardakes another week with whom the police experienced difficulty in the boy question.

The second week of special services in Main street Baptist church closed with a large attendance at a meeting last night. A very impressive service was preached by Rev. C. W. Townsend on the Atonement. Quite a number manifested their intention to live a Christian life and were received for church membership. Baptism will be administered at the close of the service tomorrow morning. The service will be continued next week.

The president of the C. P. R. St. Thomas Shaughnessy, was in an accident at Beattie's rocks, Sand Point, yesterday afternoon, when the engine of the train on which St. Thomas and Lady Shaughnessy and maid came from Montreal, left the rails. Little was known at the time of the accident, but it is believed that the engine and cars were replaced on the track.

The long drawn out case of the board of health vs. Robert Willis for shutting off the water in a house at 110 St. James street, thereby depriving W. A. Barnes, a tenant, of water for weeks, was to be taken up again in the police court, yesterday afternoon, but owing to the absence from the city of Willis, was postponed until Thursday afternoon next at 2.15 o'clock.

In the case of the Pringle Company vs. Ruben Perry, in chambers this morning Judge Forbes rendered judgment for the plaintiff for \$331.15. The trial of George A. Prince under the Speedy Trial Act will be conducted before his honor on Thursday. The charge is securing money under false pretences, and Dr. G. A. B. Addy may be one of the witnesses to bear out the claim of the defence that Prince is mentally unbalanced.

Quite a number of local hockey enthusiasts left for Moncton on the 12.40 train today to witness the first game for the Starr trophy between the Moncton Victorias and the Halifax Crescents, which takes place tonight. Manager E. W. Laine of the Queen's Rink, who was among the number, will try to arrange for the Moncton team to play an AHS. John team here shortly.

PERSONALS

Hon. Robert Maxwell, M. P. P., will be the speaker at the Thorne Lodge Gospel Temperance meeting tomorrow afternoon at 4 o'clock in the Haymarket Square Hall. St. Mary's orchestra will take part in musical programme.

W. H. Barnaby returned to the city on the Montreal train today.

Percey V. Thomson returned from Montreal today.

Miss M. Winslow returned to the city today on the Boston train.

F. S. Bonnell returned to the city on today's Boston train.

Charles McDonald, manager of the St. John Iron Works, was a passenger on the incoming Boston train this morning.

John A. Barry went to Moncton on the noon train.

Major S. B. Smith, and Major J. L. McAvity returned from Ottawa today, where they have been attending the annual meeting of the D. R. A.

SPECIAL SERVICES

The special evangelistic services conducted all week in Victoria street Baptist Church, by Rev. Mr. Beatty, who has been assisting the pastor, Rev. D. H. Nobles, resulted in several more conversions, and at tomorrow morning's service candidates will be baptized. Rev. Mr. Beatty will preach tomorrow. The subject of the morning will be: The revival at Carmel, and in the evening, The Opening of the Books.

A special evangelistic service will be held at 3.30 in the afternoon, the subject being The Three Hours of the Gospel, chemically illustrated. Services will be continued all next week.

DEATHS

PEER—In this city, on Feb. 26th, after a short illness, of tuberculosis, a wife of Charles Peer, aged 48 years, leaving her husband, three sons and one daughter to mourn the loss of a loving wife and mother.

Funeral Sunday at 2 o'clock, from her late residence, 229 Prince street, West End.

MARRIAGES

ARKKALIS-McCALLAM—At the Rectory, Musquash, Feb. 25th, by the Rev. J. R. Martin, Charles Lee Arkkalis, of Lepreau, to Miss Minnie Isabella McCallam, of St. John.

The steamer Concordia, for Glasgow, took away a cargo of 21,313 bushels of wheat and 8,435 bushels of barley. These cargoes are not included in the above 57 steamers.

A LIVELY DEMAND FOR LAND GRANTS

South African Veterans Have No Trouble in Disposing of Their Western Gift Lands

There is a great speculation in the land grants to South African veterans. A gentleman wrote not long ago from Manitoba asking for quotations here, saying that he could buy a scrip out there for \$25. In the Telegraph this morning one advertiser offered \$500 for scrip, and another \$800 and two others "invite correspondence." One local man asks \$700 for his scrip. It is said that after the grants were made some foolish fellows sold them out for a hundred dollars or less. A Kingston, Ont., despatch says:
"There is a lively business here in land grants to South African veterans, a large number of which have been received by members of 'A' and 'B' batteries, R. C. H. A. Western agents are said to be paying as high as \$1000 for the scrip, while local real estate men have bid them up as high as \$2 an acre or \$600 for the grant."

THE KINDERGARTENS

The attendance during February was not so large as usual on account of some very cold mornings early in the month, the prevalence of chickenpox, and the want of boots and rubbers. Some very destitute cases were brought to the attention of Brussels street kindergarten and with the assistance of Mrs. Hall were all looked after.

In each kindergarten the trades were taken up the first of the month—following the week-end come the carpenter, the blacksmith and the shoemaker.

The second week was devoted to St. Valentine. The children made valentines for their friends and, although the day is not so important as other red letter days, there is good reason for taking notice of St. Valentine's Day. Miss Foulson, the famous kindergarten, says: "We can show the children how to put a loving message into the gay mixture so attractive to children's eyes, and how to have all the pleasures of the pretty old customs without the use of the coarse comic."

The miner was the next subject and when the children begin to realize how many things the miner brings them their interest is keen. Froebel says: "The major principles of the labor plays are the dignity of labor and work." In the kindergarten the children are brought to know the world's greatest workers in their different spheres.

Miss McAvity gave the children of Waterloo street a valentine party which was enjoyed by all. The lunch of bread and milk is still being supplied to the little ones in Portland street, and the children of Brussels street were given a supper by Mrs. Sanders' Bible Class of Centenary church.

AUCTIONS

At Chubb's Corner today Auctioneer Lantulum sold at auction a leasehold lot with a 1 1/2 story house thereon, situated in Brooks ward, west end, to J. W. Lee for \$305.

Auctioneer P. L. Potts sold the interest of Sylvester Beliveau in a property situated at the north end for city and water taxes to H. J. Carson for \$115.

Auctioneer Potts also sold five shares of St. John Real Estate Company's stock par value \$100, for 10 per cent above par value.

Edward Brown, son of Walter Brown, Grand Bay, who lost both arms in a railway accident last November arrived in the city today and will leave for New York, shortly, to secure artificial limbs.
