

be more accurately used instead of quality; the word substance might be used, or well-fleshed, with the addition of soft or firm handle if both properties have to be referred to.

The handle or touch of cattle is a subject on which great difference of taste exists; but it is certain that there are animals of the greatest merit, from the butcher's point of view, belonging to both the soft and firm handling sections. Frequently the same animal, whilst in a state of moderate condition, has a soft plant touch; but when it is made fat, either for the show yard or to send to the butcher, the handle becomes firm; and some of those who send breeding cattle to show feed them in such a way that the handle is harsh, and lacks the mellowness that is frequently desired. The animal is not always to blame for this, as in the hands of another feeder the handle might be quite different. In the same way, the natural feelings of the hair is altered, either by the mode of feeding or the mode of treating the animal; and cases frequently occur of an animal, when tended with the greatest care, and sent to a show, being pronounced harsh in the hair; whilst in a few weeks time, when left to a more natural state of things, the hair becomes soft and mossy, and all that can be desired.

There are few points which are so much desired in an animal—as a rich, mellow skin, and if mellow, the thicker the better; it is an index of real quality, and also of a hardy constitution with an aptitude to fatten; heavy milkers are often thin in the hide, but it is not so of necessity. Care in selection goes a long way in combining milk, hair, handle and quality.

TUESDAY, OCTOBER 27, 1884.

TAX EXEMPTIONS.
A strong agitation is now on foot in the upper provinces for legislation to take away from individuals or corporations the exemptions they at present enjoy from taxation. The movement is an excellent one and should meet with every encouragement. Tax exemptions may be included under three heads: exemptions of individuals in respect of income derivable from the Dominion, exemptions of churches and charitable institutions, and exemptions under special acts of the legislature passed for the encouragement of manufacturers or to secure some special benefit for some particular locality. The latter class of exemptions are not assailed and no good reason could be given for attacking them. As to the property of churches or charitable institutions it seems a difficult matter to deal with. The taxation in such cases would fall upon the members of the church or the supporters of the institution, and it might be well argued that when we exempt the church and tax the people it is the same as if we taxed both church and people. Nearly every body contributes in some way or other to the support of churches, and if we tax church property they will have to contribute just so much more, and thus what they would save on their tax bills they would have to add to their subscriptions. In the case of charitable institutions, pure and simple, they really relieve the general public directly of considerable taxation, and it is probably not unreasonable that they should not be taxed. Moreover, as by taxing churches and charitable institutions just so much more is added to the amount which has to be raised from contributors it will make their maintenance all the more difficult. Without, therefore, saying that churches and charitable institutions ought not to be taxed, we admit that a very good argument may be made against taxing them. There is a class of property belonging to churches and charitable institutions which ought to be taxed, namely, property which in a commercial sense comes into competition with other tax paying property. If a church or a society builds a house to rent there is no reason why it should have the advantage of being untaxed, and that its owners should be able to let it at so much less rent or make more profit out of the same rent than a neighboring tax paying proprietor can. This matter is one which the assessors in each particular locality can regulate for themselves and no legislation is needed to provide for it.

The remaining class of exemptions, that of Dominion officials, is indefensible upon any principle of fair play, even if it be legal. An argument may be made to show that the municipalities have not the power to assess these officers on their salaries, but none can be made to show that they ought not to have such a right. If persons residing in Fredericton and

receiving salaries from the Dominion Government were taxable, it would add about \$10,000 to the amount of income available for assessment. The reason why these officials are not taxed is that they already contribute to a superannuation fund; but that is for their own benefit, and although, as we have said, this under the peculiar wording of the Civil Service Act may afford a legal exemption, it is not an equitable one. The officers enjoy equal protection and benefits from municipal expenditure with the members of the Provincial Civil Service, but while the latter are taxed they are exempt. Mayor Fenety has given this subject considerable attention with a view to having a joint representation made to Parliament by all the city and town councils in Canada. It is a timely and judicious step.

SIR MOSES MONTEFIORE.

On Friday last an event occurred which was regarded with great interest by the whole Jewish world and by very many who have little sympathy with that race. A hundred years make a long time; and when a man enters upon his second century of existence the rarity of the occurrence makes it worthy of note. And this is all the more the case, when the individual, the century of whose birth is celebrated, is one whose long life has been devoted to good works, and upon whose head a hundred winters have snowed a white mantle of honor. Sir Moses is one of the grandest types of our race. Tall and stately in bearing, with a remarkably handsome face and hair and beard of spotless white, he carries his hundred years, so to speak, lightly. He was born in Leghorn on Oct. 24th, 1784, but was educated in London. He inherited a large fortune from his father, who amassed it in trade, and in early life he purchased a seat at the London Stock Exchange, where his operations were attended with great success. Probably the matrimonial alliance, afterwards formed between a brother of Sir Moses and the Rothschilds, contributed not a little to the prosperity and great influence enjoyed by the subject of this sketch. In 1827 Sir Moses came prominently into public notice through his efforts for the relief of the Jews in Palestine, nearly all of whom were in a condition of abject poverty. He went to Palestine, having first received extensive contributions, and set himself to work to relieve the distressed. He gave of his own means with a lavish hand, not only relieving all who came to him for assistance, but seeking out the needy and providing for their wants. His generosity was only limited by the calls upon it—none met with refusal. On his return to England he was greeted with the warmest expressions of approval, and, as a mark of approval, was named Sheriff of London and Middlesex, when he was also knighted by the Sovereign. Before returning from the east, he organized the Palestine Relief Fund, which he administered for many years and which is still in operation. He made several other voyages to the east; on one occasion successfully applying to the Sultan to prevent the practice of cruelty by the Turks towards the Jews; on another, interfering with the Car for a removal of some of the disabilities under which the Jews labored in Russia, following up this by a praiseworthy and not ineffective effort to induce the Russians Jews to ameliorate their own condition by giving closer attention to agriculture. Her Majesty signified her approval of his course in this matter, by conferring a baronetcy upon him. His visits to Palestine have all ways been greeted by great rejoicing by the people, and his hand has ever been open to the poor with whom he came in contact.

Sir Moses Montefiore married Judith Cohen, daughter of a wealthy London merchant. She died in 1862, and he built a college at Ramsgate in her memory. He lives in a fine old mansion near Ramsgate, and on the estate is a mill, which grinds all the wheat the farm can raise and the flour is given to the poor. It is the lodge keeper's duty to distribute this and also to see that none, who came to the gates for assistance, go away hungry or empty handed. Though so far past the ordinary age of men Sir Moses is remarkably vigorous. His faculties are almost unimpaired, although of course he shows some of the works of his great age; but he is far from being a burden either to himself or his friends. He is really a noble specimen of manhood to-day, giving good ground for the hope that he may live to see several more birthdays.

THE FUTURE FORCE.

Not many years ago people spoke and wrote as though the world had got pretty nearly to the length of its tether in the point of material progress, and there was not much else left to do but to stand still or make a more or less graceful retreat backwards towards primitive barbarism, Human invention had harnessed steam to carriages and made it the motive power of steamships; telegraphy had enabled people to converse from the most remote distances. Comparing what had been accomplished with what the people of only a generation previous had considered a marvelous development, it did seem as though the Ultima Thule of human invention had been reached, or at any rate could not be far away. But events have proved that so far this being the case, we have only just crossed the threshold of progress and that an almost limitless field lies ahead for exploration and occupation, a field practically as vast as the boundless sky from which Franklin drew down the great force of the future—electricity. Mr. Edison says that some one will solve the problem of turning heat directly into electricity. At present the conversion is somewhat of an involved and expensive operation. For application to mechanical use, except in telegraphy and where a low degree of force is required, it is necessary to convert fuel into heat, heat into steam, steam into motion and motion into electricity. Each of these processes is of itself simple enough, but they require an expensive plant, and at each step there is more or less waste. When the problem of converting heat directly into electricity is solved, it will follow that the great motive power will become more generally used and applied to purposes for which it cannot be used now for economical reasons. Mr. Edison thinks when this is accomplished electricity will be used in households, not only as an illuminator but as a motive power, bringing back the spinning wheel and the loom into the household. John Rae, in "Contemporary Socialism," says:—

THE DUNN CASE.

Most of our exchanges have made a sad muddle of the decision of Judge Fournier in the Dunn case, argued before him on demurrer in the Exchequer Court, some of them even going so far as to say that damages were assessed at \$25,000. This case is the well known Tibbits case arising out of certain payments made for stumpage on land in dispute between Quebec and New Brunswick a number of years ago. Dunn is the assignee of Tibbits's claim. The action is against the Dominion Government, but the real defendants are the Provincial Government. The case came before Judge Fournier on a demurrer, in which was involved the right of the plaintiff to file his Petition of Right, and the decision is simply that the court will entertain the petition. The merits of the case have not yet been argued; and even the decision of Judge Fournier is subject to appeal and will be appealed. The case is not concluded; the judgment in favor of the plaintiff being no more than a decision by Judge Fournier that the Exchequer Court will entertain the case. The ultimate decision, even if the demurrer be not overruled on appeal, may be against the plaintiff.

THE COMING OF PETER.

A cloud not much bigger than a man's hand is rising in Kent county. Mr. P. A. Landry, M. P., is to be feted; and the *Moniteur Acadian* expresses regret that it is probable the county may lose the services of its able representative. Mr. Landry is a good fellow; but we think that most people who know him will agree with us when we say that if the demonstration is intended to boom Mr. Landry for a judgeship it will not have very general sympathy. It is better to speak about objectionable things in plain English, while there is yet an opportunity to prevent them from being consummated. Mr. Landry made a painstaking Chief Commissioner of Public Works and is generally esteemed as an honorable man; but he has had little experience as a lawyer and ought not to be made a judge. While we believe that nationality ought not to be reckoned as a qualification for a judgeship, we at the same time would like to see a Frenchman upon the Supreme Court bench, if his learning and experience qualified him for the post. Everything ought to be done which can be done to cement in the closest alliance the French and English speaking residents of New Brunswick; and to appoint a gentleman to a high judicial post, who has had only the slightest experience at the bar, simply because he happens to have been born of French parents is wrong. The coming of Peter looks like a reality; and

the knowledge of the fact is said to be causing a great deal of worry to some of the party in St. John, who thought they had a first mortgage on the next vacancy on the bench.

NOTES AND COMMENTS.

The United States Immigration returns say that over 60,000 Canadians immigrated to that country in the year ending June 30, 1884. We would like to get at the truth of this exodus business, for we are quite sure that it is not true that people left Canada, to live in the United States, at the rate of 200 a day. But making a reasonable deduction from the Canadian contingent, we find that the immigration into the United States, during the year, totals up at 500,000. This is a falling crop of 100,000, from the previous year, is a remarkable showing. It means not only an acquisition of so many consumers and workers to the nation, but an addition of over, probably more than \$20,000,000 to the money in circulation in the country.

NEWS SUMMARY.

The finest sport in Ceylon is elk hunting on the hills, which are 5,000 to 7,000 feet above the sea level. The hounds are a mixed pack, comprising four or five couple of English fox hounds, three couple of mixed breed, and some "seizers," viz., a thoroughbred Scotch deerhound, a strong greyhound, perhaps a kangaroo hound, and crosses of these breeds with mastiff and bloodhound. After an elk has been found the run is very fast, and it is generally impossible to keep near up with the hounds. Occasionally one of these is snatched up by a leopard lurking on the hillside. When at last the elk comes to bay, it is generally in a strong flowing watercourse, and the seizers then rush in, aided by the hunting men, whose only weapon appears to be the knife, with which the quarry is stabbed as he faces his four legged foe. The elk weighs sometimes as much as 28 stone clear, and is a pleasant reward for a run which lasts usually two hours or more.

The weavers of Inverness have worked a beautiful Highland plaid for Mr. Gladstone, as a memorial of his recent progress through Scotland. It was forwarded to Hawarden with the following lines: This plaid will keep you warm, Willie; You'll catch no colds nor chills By wearing this memorial shawl.

From the weavers of Holm Mills. Capt. Kostowitz, the Russian aeronaut, is quite confident that he has solved the problem of steering a balloon which is being constructed at St. Petersburg. It is of the shape of a huge cigar, driven by a screw, but it is also provided with sails. The inventor calculates that his air ship will be able to make 160 miles an hour with an equipment of 16 men, 10,000 pounds ballast, and an engine of 50-horse power.

The whole balloon, with its attachments, will be 200 feet long and 80 feet high, and will probably make its first excursion from St. Petersburg in a few weeks.

He Kept a Director.

After the stranger had emptied a glass of beer he turned carelessly to the bar keeper and asked, "Got a good many students here in Austin at the University?" "Yes, there are students here from all parts of Texas." "Do you know if old man Keyworth, of Crosby county, has got a son here?" "I don't know for certain; but I'll look in my directory. I've got all their names; and, reaching under the bar, the saloonist brought out a slate, and, after a brief investigation, read out, "Bob Keyworth, nine dollars for drinks, five dollars for five cents for billiards, and five dollars cash loaned!"

A Careful Cashier.

Bank President—"You know our cashier ran away with \$400,000 of the bank's funds a week ago?" "Yes, and there are students here from all parts of Texas." "Do you know if old man Keyworth, of Crosby county, has got a son here?" "I don't know for certain; but I'll look in my directory. I've got all their names; and, reaching under the bar, the saloonist brought out a slate, and, after a brief investigation, read out, "Bob Keyworth, nine dollars for drinks, five dollars for five cents for billiards, and five dollars cash loaned!"

A Northern.

From the Philadelphia Times. An old Texan being asked by a stranger to describe a northern said, "I tell you what, a northern puts in the quickest work you ever saw. You see that lake down there (pointing to a beautiful lake about a mile distant), last spring, in the latter part of March, I was fishing in the afternoon; the sun was shining, and it was as warm almost as the middle of summer. The fish were 'umping up all over the lake, and they were biting splendidly. A shade came suddenly over the lake, and I thought I smelt a strange power. The whole scene presented a northern. I immediately turned away from the lake and looked toward the northwest, and I saw a small, dark cloud passing like lightning and it was as warm almost as the middle of summer. The fish were 'umping up all over the lake, and they were biting splendidly. A shade came suddenly over the lake, and I thought I smelt a strange power. The whole scene presented a northern. I immediately turned away from the lake and looked toward the northwest, and I saw a small, dark cloud passing like lightning and it was as warm almost as the middle of summer. The fish were 'umping up all over the lake, and they were biting splendidly. A shade came suddenly over the lake, and I thought I smelt a strange power. The whole scene presented a northern. I immediately turned away from the lake and looked toward the northwest, and I saw a small, dark cloud passing like lightning and it was as warm almost as the middle of summer. The fish were 'umping up all over the lake, and they were biting splendidly. A shade came suddenly over the lake, and I thought I smelt a strange power. The whole scene presented a northern. I immediately turned away from the lake and looked toward the northwest, and I saw a small, dark cloud passing like lightning and it was as warm almost as the middle of summer. The fish were 'umping up all over the lake, and they were biting splendidly. A shade came suddenly over the lake, and I thought I smelt a strange power. The whole scene presented a northern. WHAT CAN SHE DO?

By E. P. Roe.

(Continued.)

After prescribing remedies and a tonic, he said, "Let me know if I am needed again," and departed in rather ill humor. Meeting Arden's anxious, questioning face at the gate, he said gruffly, "I thought from what you said the girl was dying. Used up and a bad cold, that's all."

CHAPTER XXII.

A MYSTERY.

At Arden's request his mother called in the evening, and also Mrs. Groody, from the hotel. Hannibal met them, and stated the doctor's orders. Mrs. Allen and Laura did not feel equal to facing any one. Though the old servant was excessively polite, the callers felt rather slighted that they saw no member of the family. They went away a little chilled in consequence, and contented themselves thereafter by sending a few delicacies and inquiring how Edith was.

"If you have any self-respect at all," said Rose Lacey to her mother, "you will not go there again till you are invited. It's rather too great condescension for you to go at all, after what has happened."

Arden listened with a black look, and asked rather sharply, "Will you never learn to distinguish between Miss Edith and the others?"

"Yes," said Rose, dryly, "when she gives me a chance."

The doctor's view of Edith's case was correct. Her vigorous and elastic constitution soon rallied from the shock it had received. Hannibal had sent to the village for nutritious diet, which he knew so well how to prepare, and, after a few days, she was quite herself again. But with returning strength came also a sense of shame, anxiety and a tortuous dread of the future. The money accruing from her last sale of jewellery would not pay the debts resting on them now, and she could not hope to earn enough to pay the balance remaining, in addition to their support. Her mother suggested the mortgaging of her place. She at first repelled the idea, but at last entertained it reluctantly. There seemed no other resource. It would put off the evil day of utter want, and might give her time to learn something by which she could compete with trained workers.

Then there was the garden. Might not that and the orchard, in time, help them out of their troubles?

As the long hours of her convalescence passed, she sat at her window and scanned the little spot with a wistfulness that might have been given to one of Eden-like proportions. She was astonished to see how her strawberries had improved since she hoed them, but noted in dismay that both they and the rest of the garden were growing very weedy.

When the full knowledge of their poverty and danger dawned upon her, she felt that it would not be right for Malcolm to come any more. At the same time she could not explain things to him; so she sent a written request through the mail for his bill, telling him not to come any more. This action following the evening when Gus Elliot had surprised her in the garden, perplexed and rather nettled Malcolm, who was, to use his own expression, "a bit techy." Their money had grown so scarce that Edith could not pay the bill, and was ashamed to go to see him till there was some prospect of her doing so. Thus Malcolm, though disposed to be very friendly, was lost to her at this critical time, and her garden suffered accordingly. She and Hannibal had done what they could, but her late illness, and the great accession of duties resting on the old servant, had caused complete neglect in her little plantation of fruit and vegetables. Thus while all her crops were growing well and weeds were gaining on them, and even Edith knew that the vigor of evil was in them, and that unchecked, they would soon make a tangled swamp of that one little place of hope. She could not ask Hannibal to work there now, for he was overburdened already. Laura seemed so feeble and crushed that her strength was scarcely equal to taking care of her mother, and the few lighter duties of housework. Therefore, though the June sunshine rested on the little garden, and all nature seemed in the rapture of its early summer life, poor, practical Edith saw only the pestiferous weeds that threatened to destroy her one slender prospect of escape from envying difficulties. At last she turned away. To the sad and suffering, scenes most full of cheer and beauty often seem the most painful mockery.

She brooded over her affairs most of the day, dwelling specially on the suggestion of a mortgage. She felt extreme reluctance in perilling her home. Then again she said to herself, "It will at least give me time, and perhaps the place will be sold for debt, for we must live."

The next morning she slept late, her weary, overtaxed frame asserting its need. But she rose greatly refreshed, and it seemed that her strength had come back again. With returning vigor hopefulness revived. She felt some cessation of the weary, aching sorrow at her heart. The world is phosphorescent to the eyes of youth, and even engulfing waves of misfortune will sometimes gleam with sudden brightness.

The morning light also brought Edith a pleasant surprise, for, as she was dressing, her eyes eagerly sought the strawberry bed. She had been thinking, "If I continue to gain in this style, I will soon be able to attack the weeds."

Therefore instead of the helpless look, such as she gave yesterday, her glance had something venturesome and threatening in it. But the moment she opened the lattice, so that she could see, an exclamation came from her lips, and she threw

back the blinds, in order that there might be no mistake as to the wonder that startled her. What magic had transformed the little place since, in the twilight of the previous evening, she had given the last discouraged look in that direction? There was scarcely a weed to be seen in the strawberry bed. They had not only cut off, but raked away and here and there she could see a berry reddening in the morning sun. In addition, some of her most important vegetables and her prettiest flower border, had been cleaned and nicely dressed. A long row of Dan O'Rourke peas, that had commenced to sprout on the ground, was now hedged in by beans; and better still, thirty cedar poles stood tall and straight among her Lima beans, that had been vainly feeling round for a support the last few days. Her first impulse was to clap her hands with delight and exclaim: "How, in the name of wonder, could he do it all in a night? Oh, Malcolm, you are a canny Scotchman, but you put the 'black art' to very white uses."

She dressed in excited haste, meaning to question Hannibal, but, as she left her room, Laura met her, and said, in a tone of the deepest despondency, "Mother seems very ill. She has not felt like herself since that dreadful night, but we did not like to tell you, fearing it would put back your recovery."

The rift in the heavy clouds, through which the sun had gleamed for a moment, now closed, and a deeper gloom seemed to gather round them. In sudden revulsion Edith said, bitterly: "Are we to be persecuted to the end? Cannot the heavy hand of misfortune be lifted a moment?"

She found her mother suffering from a low, nervous fever, and quite delirious. Hannibal was at once despatched for the doctor, who, having examined Mrs. Allen's symptoms, shook his head, saying: "Nothing but good nursing will bring her through this."

Edith's heart sank like lead. What prospect was there for work now, even if Mrs. Groody gave it to her, as she promised? She saw nothing but the part of a weary watcher for several weeks. She hesitated no longer, but resolved to mortgage her place at once. Her mother must have delicacies and good attendance, and she must have time to extricate herself from the difficulties into which she had been brought by false steps at the beginning. Therefore she told Hannibal to give her an early lunch, after which she would walk to the village.

"You isn't able," said he earnestly. "Oh, yes I am," she replied; "better able than to stay at home and worry. I must have something settled, and my mind at rest, even for a little while, or I will go distracted." Then she added, "Did you see Malcolm here early this morning?"

"No, Miss Edith, he hasn't been here." "Go look at the garden."

He returned with eyes dilated in wonder, and asked quickly, "Miss Edith when was all that done?"

"Between dark last night and when I got up this morning. It seems like magic, don't it? But of course it is Malcolm's work. I only wish I could see him."

But Hannibal shook his head ominously and said with emphasis, "Dat little Scotchman couldn't scratch around like dat, even if de Debel was arter him. Taint his work."

"Why, whose else could it be?" asked Edith, sipping a strong cup of coffee, with which she was fortifying herself for the walk.

Hannibal only shook his head with a very troubled expression, but at last he ventured, "If 'tis a spook, I hope it won't do nothing worse to us."

Even across Edith's pale face a wan smile flitted at this solution of the mystery, and she said, "Why, Hannibal, you foolish old fellow. The idea of a ghost hoeing a strawberry bed and sticking in bean poles!"

But Hannibal's superstitious nature was deeply stirred. He had been under a severe strain himself of late, and the succession of sorrows and strange experiences was telling on him as well as others. He could not indulge in a nervous fever, like Mrs. Allen, but he had reached that stage when he could easily see visions, and tremble before the slightest vestige of the supernatural. So he replied a little doggedly:

"Spooks does a heap ob queer tings, Miss Edith. I'd tink it was Massa Allen, on'y I knows dat he neber hab a hoe in his hand all his life. I doesn't like it. I'd rather hab de weeds."

"O Hannibal, Hannibal! I couldn't believe it of you. I'll go and see Malcolm, just to satisfy you."

CHAPTER XXIII.

A DANGEROUS STEP.

Edith took the deed, and went first to Mr. Hard. There was both coldness and curiosity in his manner, but he could gather little from Edith's face through her thick veil.

She had a painful shrinking from meeting people again after what had happened, and this was greatly increased by the curious and significant looks he turned towards her as soon as it was surmised who she was.

Mr. Hard promptly declined to lend any money. He "Never did such things," he said.

"Where would I be apt to get it?" asked Edith, despondently. "I scarcely know. Money is scarce, and people don't like to lend it on country mortgages, especially where there may be trouble. Lawyer Keen might give you some information."

To his office Edith went, with slow, heavy steps, and presented her case. Mr. Keen was a red-faced, burly-looking man, hailing the traditional shrewdness of a village lawyer under a bluff, outspoken manner. He had a sort of good-

nature, which, though not leading him to help others who were in trouble, kept him from trying to get them into more trouble, and he quite prided himself on this. He heard Edith pearly through, and then interrupted her, saying: "Couldn't think of it, Miss. Widows, orphans, and churches, are institutions on which a fellow can never foreclose. I'll give you good advice, and won't charge you anything for it. You had better keep out of debt."
