Mr Wilfrid Laurier and Hon. Chas. Fitzpatrick Grants All the Parties Conferes On Sunday-Gouin Would Withdraw Opposition, But the Other Dis sidents Want Parent's Head At Once-Parent Will Mang On.

Ottawa, Feb. 13.-While the utmost secrecy is maintained by com-mon consent of the parties interest-ed as to the result of the Federal interference in the Quebec Cabinet smash, enough has leaked out to in-dicate that Premier Parent holds the winning cards

the winning cards. There were conferences yesterday in the office of the Minister of Justice, at which the dissidents met Sir Wilfrid Laurier and Hon. Charles Fitzpatrick. Mr. Parent arrived on Saturday morning, accompanied by his Cabinet adherent, Mr. Archambault. On Sunday morning Messrs. Gouin and Weir, two of the resigned Ministers, came to the capital. They were given a hearing by Sir Wilfrid and bound to maintain silence outside as to its purport. There were conferences vesterday in side as to its purport.

Gouin Would Return.

It appears, however, that the offer was made by Mr. Gouin to withdraw his opposition, if not to recall draw his opposition, if not to recall his resignation, on condition of Mr. Parent's retirement after the session of the Provincial Legislature. To this the dissidents demurred. They maintained that the situation demanded Mr. Parent's immediate retirement, and nothing short of it would suit them and their friends. The chief advocate in the Federal councils at Ottawa is Rodolphe Lemieux, Solicitor-General. But Mr. Parent's staunch champion is his law

ieux, Solicitor-General. But Mr. Parent's staunch champion is his law partner, Mr. Fitzpatrick, and the influence of the Minister of Justice, with the Prime Minister, seems to greatly outweigh that of the Solicitor-General. Thus has the disaffection at Quebec spread to the Federal capital so that Ottawa is at present the true storm centre.

Parent Will Haug On.

Moreover, Mr. Fitzpatrick's advo-cacy of Premier Parent's cause has been so effective here that Mr. Parent is making no secret of his deter-mination to hang on to office and fight out the emeute to a finish with his opponents.

The part that the Minister of Inland Revenue is playing in the case is evidently that of a negotiator, pure and simple. It his services and influence are being exceed in favor of one side or the other he is artful enough concealing his hand.

Yesterday morning Mr. Brodeur took train for the east, and spent Sunday quietly at St. Hillaire, well out of the wrangle.

Mr. Parent is the guest of his brother-in-law, Mr. Gendron, M. P. P., Hull, and will remain over till this afternoon to attend the funeral of the late John MacLaren, son of David MacLaren, vice-president of the Bank of Ottawa.

CHURCH AND STATE.

New French Cabinet Closely United On

Paris Fey 13 -- Premier Rouvier's ministry is still alive and even appears to be more firmly established.

Debates in the Chamber and discussions in the press have shown that of three reforms the ministry has strongly united of all is the vote for the separation of church and state

The other two reforms—that is to say, the income tax and workmen's pensions—present almost insolvable difficulties. For workingmen's punsions the necessary funds do not exist. As to the income tax, it is fear ed the taxpayers will be discontented.
On the other hand, the separation
of church and state will not cost a

cent and will even save money. That is why separation comes first.

It is almost certain there will be a majority of votes for this bill but we must not conceal the fact that with it we are entering into a period of interminable debates. This is the greatest event of the pass week.

ROSS WILL GO TO BAHAMAS.

Will Land Opposition in the House His Return

Toronto, Feb. 13.—Ex-Premier Ross will leave for the Bahamas, shortly,

will leave for the Bahamas shortly, probably Monday or Tuesday of next week. He said last night he had not quite decided on the date.

It is his intention to be away several weeks, and he may not be back for the opening of the session. On his return he will take his place as leader of the Opposition.

The Brockville Recorder, the organ of G. P. Graham, says: "Ere long Mr. Ress will be invited to a place in the Senate, and it goes without saying that the appointment would be very popular among all classes."

The early retirement of Mr. Ross is regarded by his followers as a certainty. He will probably lead the Opposition for one session only. In the event of his going to the Senate Mr. Graham or A. G. MacKay will we in his for promotion. The party will not be satisfied with one of the pid leaders.

Herbert S. Clements, M. P. and Government Engineer Visit Tilbury to Fix Location.

Work of Great Importance to Surrounding Municipalities—Large Delegation Present.

Special to The Planet.

Tilbury, Feb. 11.-H. S. Clements, M. P., accompanied by an engineer from the Public Works Department at Ottawa, visited Tilbury yesterday, and accompanied by Reeve Crawford and a number of business men, visited the site of the proposed new wharf on the River Thames to talk over a location.

They we're joined by a number of farmers and others to the number of about fifty, and several suggestions were made and the matter was gone into most thoroughly.

This agitation was started by the Village Council some weeks ago, and was backed by petitions from the municipal councils of several adjoining townships to the Public Works Department, with the result that at the present time there are excellent prospects of success, the measure also having the active support of Mr. Clements and A. H. Clarke, M. P. for S th Essex. The dock would give splendid facil-

ities for the importation of all kinds of lumber by water and assure the establishment of a badly needed planing factory and other important industries for Tilbury.

FOR \$11,000

County Will Pay City That Amount for Its Interest in Harrison Hall.

But City Wants \$12,500-Joint Committees Meet and Discuss the Matter.

At a joint meeting of the committees from the City and County Councils, held Saturday afternoon, the County Council offered to purchase the City's interests in Harrison Hall for \$11,000.

This arrangement was arrived at after much consideration. There were present at the meeting, Warden Vester and County Commissioners Ross, Haggart, Chinnick and O'Brien; Mayor Cowan and Ald. Marshall, Austin, Bell and Westman. After the meeting opened, Ald. Marshall suggested that the committee retire and fix on the amount they will sell for. They decided to ask \$12,500. The members of the County committee then retired and decided that they would not pay more than \$10,000.

The members of the City committee saw clearly thay could not take \$10,000. They regarded their interest in the building worth \$15,000, but, as they wanted the money to put in another building right away, they were willing to make a sacrifice and sell out for \$12,500.

Mr. Ross explained that the Coun-

out for \$12,500.

Mr. Ross explained that the County did not wish to buy, but they would compromise and offer the city \$11,000. This was agreed to by all of the County Councillors present.

It was decided to present the affer at to-night's City Council meeting, and if it is accepted the Warden will call a meeting of the County Council to consider and close the matter.

Can's Creation of a Joint Commission of Masters and Workmon Chosen By Themselves to Investigate the Camos of Discontent Mas Good Effect-Strike Situation in Warsaw Still Serious-Police Make a Threat.

St. Petersburg, Feb. 13.-The anticipated renewal of trouble among the workmen yesterday was not realized. Neither strikers nor students made the slightest attempt to demonstrate, and throughout the day monstrate, and throughout the day the city presented a normal appear-ance. The Emperor's creation of a joint commission of masters and workmen chosen by themselves to in-vestigate the causes of discontent vestigate the causes of discontent among the laborers has made an ex-ceedingly good impression, being con-sidered definite evidence of the Gov-ernment's purpose to compel some of the rapacious masters who have paid starvation wages to do justice to their employes.

The Imperial decree ordering the formation of the committee, reposes the presidency of the body in Senator Chidlovski and instructs the committee to ascertain immediately the causes of discontent of St Petersburg workmen and devise mea-sures to prevent such discontent in the future. The committee consists of representatives of Government departments, the various industries and the workmen. The president is and the workmen. The president is authorized to report in person to the Emperor and determine the number and mode of selection of the com-

mittee.
At the Mali Theatre last night, a active again Theatre last hight, a scene was created by cries of "Down with the autocracy!" and personal abuse of the Emperor. The demonstrators were ejected from the theatre. The police continue to make arrests. M. Souverin, in the course of a sarcastic editorial article in The Novoe Vremya, suggests that the best egress from the present trouble, is to invite an American syndicator to come in and take over the Government, "as Americans make the come of the north present "" best managers of big enterprises.'

The Strike in Warsaw. Warsaw, Feb. 13.—Baron Von Nolken, chief of the police of Warsaw, who had just returned from a conference with Governor-General Tchertkoff of the Province of Warsaw yesterday gave the following details regarding the state of affairs in this district.

this district.

"The strike continues in all of the big factories." To morrow the manufacturers are coming to me to discuss the situation, and Tuesday I purpose seeing some representatives of the strikers.

"Unless the strikers return to work, the police will even all these living."

"Unless the strikers return to work, the police will expel all those living outside of the Warsaw district. If they will not work they must go home. The men have no money, and it seems impossible that the strike can continue much longer. Our task is one of great difficulty. We are fighting not an economic, but a political movement, having its origin in St. Petersburg.

St. Petersburg.

"The worst troubles, however, probably are over. Small disturbances may break out here and there, but not on such a scale as the earlier riots here.'

Czar Grews Wise

St. Petersburg, Feb. 13.-The news that the Emperor has endorsed scheme for the revival of the Zemsky Zabor has spread through the city and created intense satisfaction among the Liberal classes. The newspapers this morning were filled with articles descriptive of this ancient Russian institution. The gen-eral verdict is that the Emperor has succeeded in shaking off reactionary influences and now proceeds in good faith to summon the Zemsky Zabori He will rally to his support the Liberals, and perhaps arouse a wave of genuine enthusiasm.

research view of Independence Farty On the Emperor-King.

Vienna, Feb. 13.—Francis Kossuth, the leader of the Independence party in the Hungarian Parliament, was received yesterday morning by the Emperor-King and discussed for an hour with him the Hungarian political situation and Cabinet crisis. Owing to the sweeping victory at the polls on Jan. 26 the Opposition now controls the Lower House.

Herr Kossuth has declared that it is now impossible to govern Hungary without the help of the united Opposition party or against its wishes. He expressed fully the views of himself and his party. The Emperor listened attentively, but did not make any reply affecting the situation.

Herr Kossuth's interview with the Emperor is regarded in Austria and Hungary as an historical event hecause, it is believed, it will actually lead to closer relations between the House of Hapsburg and those Hungarians who have been opposed to the existing double form of Government.

A FREE TRADE PECULIARITY.

One of the peculiar effects of the free trade habit upon the human brain, points out the Hamilton Spectator, is that the victim, while able to recognize the fact that a certain policy would be an exceedingly good thing for the country, that policy should be discouraged, because it is contrary to the teachings of the apostles of free trade. Then we find such free trade journals as the Toronto Globe admitting that it would be a good thing for Canada if all Danadian wheat were milled in this country and none of it milled in the United States, and we have the same Globe rejecting the only good plan whereby that desirable condition of things can be brought about-a prohibitive export duty.

The Globe professes to think that, inasmuch as we have the wheat and the water power, and the steam and water transportation, the American miller ought to see the advantage of milling in this country, and come over here. But the American miller has his mill already erected, and if he can get the peculiar wheat of Canada without paying duty on it, he will never think of removing his mill. Refuse to give him the wheat, and he will come. It is very simple. The only possible damage that could be wrought by this imposition of an export duty on No. 1 hard, would be to the reputation of the free trade prophets and the feelings of the Canadian free traders.

In the United States things are different. While some Canadians hesitate to grasp the good thing they see before them, there is nothing of that sort to be found in the United States. Over there, as here, they see that the milling of wheat is a good thing for the country in which the milling is done, and they immediately proceed to accept that good thing.

The following, from the Buffalo Enquirer, is a sample of American

An editorial writer of the New York Times, after visiting the various cities of the chain of great lakes about 18 years ago, picked out Buffalo for special comment, predicting among other 'things that this city would be a great milling center,

While the growth of Buffalo along that line has not been as rapid as it should have been, still events of the past few months would indicate that the era of milling development is just beginning, and a decision by the attorney-general of the United States, recently announced, will hasten the wave toward the beach of full development.

According to the decision, Canadian wheat can be shipped into the United States, made into flour in this country and the flour exported, with a payment of only one per cent, of the duties on the imported grain. That is, the full duties on the grain are paid when it is brought into the country, and when the flour is shipped out a rebate of 99 per cent. is allowed.

Europe. The wheat collected from to acorns.

A healthy appetite and common sense are excellent guides to follow in matters of diet, and a mixed diet of grains, fruits and meats is undeutself of the development of the elevators, the grain can be handled most economically. Buffalo is close to bituminous coal fields, as well as Niagara Falls power, and here is the grains for the wills that natural location for the mills that are to make the vast products of the Canadian wheat fields into flour. And, encouraged by the liberal customs privileges noted above, the millers will establish plants here.

The start of this work has been seen in the construction of the mill of the Washburn-Crosby Company. Others will follow, until Buffalo's prominence in this regard becomes the highest, and another of the ke markable predictions of eighteen years ago will be fulfilled.

During the brief interregnum be tween the resignation of Mr. Ross and the installation of Mr. Whitney's government all the portraits of Mr. Ross in the parliament buildings were removed by the officials and some person posted a caricature of the late premier in one of the washrooms. That is mighty small business, but quite in keeping with the reputation of a large number of the Ross "army of officials."

THEORIES ABOUT FOOD

Also a Few Facts on the Same Sub

We hear much nowadays about health foods and hygienic living, about vegetarianism and many other, fads along the same line. Restaurants may be found in the

large cities where no meat, pastry or coffee is served and the food crank is in his glory, and arguments and theories galore, advanced to prove that meat was never intended for, human stomachs, and almost make us believe that our sturdy ancestors who lived four score years in robust health on roast beef, pork and mutton must have been grossly ignorant of the

Our forefathers had other things to do than formulate theories about Buffalo is a natural gateway for the food they ate. A warm welcome was extended to any kind from bacon to acorns.

Dr. Julius Remmson on this sub-Dr. Julius Remmson on this subject says: Nervous persons, people
run down in health and of low
vitality should eat meat and plenty
of it. If the digestion is too feeble
at first it may be easily corrected
by the regular use of Stuart's Dyspepsia Tablets after each meal. Two
of these excellent tablets taken after
dinner will digest several thousand
grains of meat eggs or other animal
food in three hours, and no matter
how weak the stomach may be, no
trouble will be experienced if a regular practice is made of using Stuart's Dyspepsia Tablets, because they
supply the pepsin and diastase necessary to perfect digestion, and every
form of indigestion will be overcome
by their use.

Thet larm class of records who come

ressary to perfect digestion, and every form of indigestion will be overcome by their use.

That large class of people who come under the head of nervous dyspeptics should eat plenty of meat and insure its proper digestion, by the daily use of a safe, harmless digestive medicine like Stuart's Dyspepsia Tablets composed of the natural digestive princeples, pepsin, distasse, fruit acids, and salts, which actually perform the work of digestion. Cheap cathartic medicines, masquerading under the name of dyspepsia cures are useless for indigestion as they have absolutely no effect upon the actual digestion of food.

Dyspepsia in all its many forms is simply a failure of the atomach to digest food, and the sensible way to solve the riddle and cure the dyspepsia is to make daily use at meal time of a preparation like Stuart's Dyspepsia Tablets, which is endorsed by the medical profession and known to contain active digestive principles, all druggists sell Stuart's Dyspepsia Tablets at 50 cents for full treatment.

PRETTY PEGGY.

Andrew Robson, who, as Miss Corcoran's leading man, appears as David Garrick at the Grand to-night, needs no introduction to the public, for he has held a position of high prominence for a number of years. His best remembered work, for the reaction the way his procest recent his best remembered work, for the reason that T was his most recent, has been done in the past four seasons, during which time he has starred at the head of his own company—the first two seasons in "The Royal Box," followed by "Richard Gazvel," for a like period, and in both of these plays he was eminently successful. Mr. Robson is unquestionably the best selection that could possibly have been made for the part of Garrick, for, aside from the fact that he is a most excellent actor, and is recog-

for, aside from the fact that he is a most excellent actor, and is recognized by play-goers as such, his greafest successes in the past have been in similar characters.

Few dramatic productions have been accorded the universal and enthusiastic praise of the public and critics that was given "Pretty Peggy" during its two remarkably successful runs of last season and the season before in New York City. Opening at the Herald Square Theatre on March 23, the play made an instantancous and most emphatic "hit." It was presented nightly to audiences taneous and most emphatic "hit." It was presented nightly to audiences that filled every seat, until well into the summer when the engagement ended—not because there was a sign of waning flaterest on the part of the public, but in order to give the star and company a few weeks vacation during the heated term. At the beginning of last season the second New York engagement opened, this time at the Madison Square Theatre, and continued until October, 31, making one of the longest and certainly one of the most successful runs on record. "Pretty Peggy" was then presented for two months in Chicago, and later in other principal Eastern theatrical centres during the remainder of the season. remainder of the season.

As it was she escaped without sustaining any serious in-

It is a wonder that there are not more serious accidents in this way. Children, arter four o'clock, are in the habit of riding on bobs up and down King street. The practice is a dangerous one and should be stopped. If the parents cannot control their children the by law prohibiting chilchildren the by-law prohibiting children from jumping on bobs should be strictly enforced. Besides the danger to the little ones, the practice is a great source of annoyance to teamsters.

One Advantage of England's Fogs.
"Should scientists succeed in finding GRAND OPERA HOUSE ways and means for dispelling the foggy condition of England's atmosphere MONDAY, FEB. 18 I am afraid that country will lose more than it gains," said a weaver. "One of the reasons why English weavers pro-BAXTER present duce fabrics of finer and softer finish

than American weavers from the same quality of cotton and other yarn is because of the damp condition of the atmosphere in that country at all times. ANDREW ROBSON AND SPLENDID COMPANY IN "It is a well known fact that yarn kept continually and uniformly damp will spin finer and softer than that dry-

ing out in the process of weaving. Thousands of dollars have been spent by our weavers in appliances to keep their shops uniformly humid, but thus far without success. The fine quality of panama bats, for instance, if the straw were not kept damp while the process of weaving is on, could not be produced. The straw is not worked under water, as many suppose, but is kept uniformly damp by being worked in the early morning hours when a heavy dew is falling."

He Wanted That Wine General Sir E. Hamley is cited a the authority for a good anecdote about Bismarck. Hamley was sitting close to the chancellor at luncheon, with the old Emperor William not far off.

Bismarck, talking rather loudly, described the old monarch as being generous, but very forgetful. Hamley got nervous, as he thought the emperor would hear. "For instance," continued day, and he asked me what he could do for me. I said, Give me a dozen of that Tokay you have in your cellars, and he said he would. "But," added Bismarck, raising his voice still higher, "he hasn't done it." Here Hamley hastily broke in. "I beg your parder but I am really afraid the emperor wi hear you." "I want him to hear me! near you." "Want him to hear me: roared Bismarck. "That's just what I want." And a smile broke over the face of his imperial master.—"Fifty Years of Fleet Street."

What is a Backache? IT IS NATURE'S WARNING TO WOMEN

iseases of Woman's Organism Cured and Consequent Pain Stopped by Lydia E. Pinkham's Vogetable Compound

"It seems as though my back would break." Women utter these words over and over again, but continue to drag along and suffer with aches in the small of the back, pain low down in the side, "bearing down" pains, nervousness and no ambition for any task.

Chey do not realize that the back is They do not realize that the back is the mainspring of woman's organism, and quickly indicates by aching a diseased condition of the womb or kidneys, and that the aches and pains will continue until the cause is removed.

Lydia R. Pinkham's Vegetable Compound for twenty years has been the one and only effective remedy in such cases. It speedily cures all womb and tidney disorders and restores the female organs to a healthy condition.

Dear Mrs. Pinkham:

I suffered a long time with ovarian trouble, having intense pains in the back and abdomen and very sick headaches every month. I was tired and nervous all the time and life looked very dreary to me and I had no desire to live until I began to take Lydia E. Pinkham's Vegetable Compound and to get some relief. My recovery was slow but the was sure, and I have never regretted the money spent for the Compound as it brought me to good health.

ORIENTAL PEOPLE.

Passing us occasionally, going to Jerusalem with butter and eggs and little jars of leben that showed their thick, creamy throats as they were held up to us, were small companies of women in single file. As one blue procession went by the leader called to us: "Why should you ride and we walk? Why is your lot better than ours?" Given the opportunity for leisurely argument, we could not by any philosophy have made satisfactory answer. We could only admit the fact as they saw it and reognize the universal world plaint of discontent.

They carry themselves, these won en, like figures on an antique frieze. As they stride along, holding in sure bal-ance on their heads their jars and baskets of homely produce, they tread the stony paths with the grace and large-ness of action that we of the occident have grown to regard as belonging only to the age of Praxiteles. The men are also admirable in the

simplicity of their gestures, the big lines of their attitudes, the swing of their draperies. I saw a youth fling his mantle over his shoulder and fold it about him exactly in the manner of the classic Greek sculptural in his finely unconscious pose. God save the day when these sons of Canaan clothe their limbs in our ungainly garments!

OPEN AIR TREATMENT.

Reasons For Its Good Results In Cases of Consumption.

The advantages of the open air treatment for consumptives may be briefly summarized: The patient exposed continuously to fresh air gains in appetite, assimilates his food better, sleeps more soundly and awakens more refreshed. Free exposure to air is the best antipyretic. Sweating at night, formerly so common a symptom, usually ceases. Colds are practically unknown among patients leading an open air life. Secondary infection, on account of the comparative freedom of the air from micro organisms, is much less likely to occur. Tolerance of out side air is very quickly established, and no one who has tried the open air life will willingly go back to the former conditions of stuffiness. I have never seen any one made worse by exposure to fresh air. Even during a thick London fog patients get on better lying in bed on a balcony or in rooms with windows wide open and a good fire burning than when attempts are made to shut out the fog by keeping the windows shut.—Dr. H. W. G. Mackenzie

RELIGIOUS TATTOOING.

A Custom That Is In Vogue In One Part of Italy.

In the "vanity" section of a museum at Florence there is an interesting col-lection of blocks used for what is called "religious tattooing" among Italian peasants of the district inclosed between the Abruzzi, Umbria and the Adriatic. Peasants in these parts at work with

shirt sleeves rolled up display a Christian symbol of some sort or a text tattooed in blue ink on their brown skin. This has been imprinted on the occasion of some special festival.

A wooden block is pressed upon the tightly drawn skin to mark the outlines of the design. This is then punc-tured, and a blue ink is rubbed into the wounds, which usually heal in about twenty-four hours. The custom, which is essentially Christian, is in commemoration of the branding of St. Francis, who founded a monastery close to Loretto.—London Telegraph.

The Gentleman.

"The true gentleman," said Cardinal Newman, "carefully avoids whatever may cause a jar or joit in the minds of those with whom he is cast-all clashing of opinion, all collision of feeling-his great concern being to make every one at his ease and at home. He guards against unreasonable allusions or topics which may irritate. He never speaks of himself except when compelled, never defends himself by a mere renion, all collision of feeling never defends himself by a mere re-tort. He is scrupulous in imputing mo-tives to those who interfere with him and interprets everything for the best. He is never mean or little in his dis-putes, hever takes an unfair advantage, never mistakes personalities or sharp sayings for arguments."

Their Only Chance.

A party of soldiers was taken to the shooting range for the first time.

The men first fired at a target 500 yards away, and not one hit it. They were next tried at a target 200 yards away, and still every one missed. They were at last tried at one just 100 yards away, but no one hit it.

"Attention!" thundered the drill sergeant. "Fix bayonets! Charge! It's your only chance!"

Need Never Reproach Himself.
"What word did her father send after he had found out about your elope-

ment?"

"Oh, he wrote me a very kind letter, saying he was glad we'd taken that course, as it relieved him of the necessity of giving his consent and having it on his mind all the rest of his life."

"Have you congratulated our hostess on her birthday?"
"No." answered Miss Cayenne; "I have condoled with her."

The Crop That Was Raised by Meis-soniet's Clever Gardener.

Meissonier, like many other celebri-ties, had a passon for gardening. His gardener, an accomplished botanist knew to perfection the seeds of every plant, and his master had often tried

in vain to throw him off his guard.

"This time I have him," the artist re marked to a party of friends at the dinner table. And he showed them a packet containing the dried roe of a herring. He then sent for the garden-

"Do you know this seed?" Meissonier inquired.

The gardener carefully scrutinized the grains.

"Why not?" he said at last. "They are the seeds of the 'Polpus finsamus,' a very rare tropical plant."

"How long will they be coming up?"

Meissonier asked, with a chuckle of sup pressed exultation.
"About a fortnight," was the reply.

Two weeks later the guests were again assembled at Meissonier's table, and after dinner the gardener was an "M. Meissonier," the man said, "the

"Ah, you surprise me!" the artist exclaimed as he rose and led the way into the garden to examine the botan

If the amiable foreigner, says London Tit-Bits, is driven to the verge of distraction by our vagaries in pronouncing words ending in "ough," and cannot for the life of him see why, if "cough" spells "kof," "though" should not be "thof" and "sough" "sof," what must he think of our phonetic eccentricities in the pronunciation of place-names, which is such a sore puzzle even to ourselves.

why, for instance, in the name of all that's reasonable should he have to say Amesbury when we write and mean Almondesbury; and, when we are in Lancashire, inquire the way to Oost'n when it is Ulverstone was want? These are mysteries which are wet even revealed over revealed to the same than the same are mysteries which are

If you chance to be in Suffolk, and want to find your way to Waldring-field, near Ipswich, you must avoid at any cost pronouncing the wor'd as it is written. You will be looked on as a freek or a foreigneed but see as it is written. You will be looked on as a freak or a foreigner, but esk for Wunneri'l, and you will be seek on your way rejoicing. Little Urswick is a place unknown to thousands of Lancashte
folk who are familiar enough with
the village of that name; but call it Lilosick and their faces will brightand their faces will bright-en at once with intelligence. Ponte-fract is not unrecognizable to the southerner even as Pomfret; but why should Keighley be known locally as Keethley and not as Keeley, which is the obvious rendering?

But the north country has no mo-

nopoly of odd pronunciations. Go to Devonshire and ask for Brithembot-tom; the odds are you will be told there is no such place. Brimbottom they know right well, and that is the place you really want. Thurles combe, by a similar or worse perversion, becomes Drizzlecum, which version, becomes Prizzlecum, which may, or may not, be a tribute to the dampness of its climate. There is in Gloucestershire a village called Churcadown, which for some inexplicable reason is always spoken locally as Chosen. The good people of Churchdown appreciate the joke as much as anybody, and tell you how, when the trains were asked to

Congresbury, in Somersetshire, is known far and wide as Coomsbury, and—shades of our Norman anvestors!—Hurstmoncaaux in Sussex has long degenerated into Horsemounces. St. Osyth is a name that ought not to present any lingual difficulty, but its favorite form in the district seems to be Toosy; and, while the educated man has long while the educated man has long been reconciled to call Greenwich "Grinnidge," there are many who still persist (and they are right, though it sounds strange to the ear) in pronouncing the name as it is smalled

Chemondiston, in Suffolk, has been cut down to the more convenient Chimston; and Sandiacre, a smalt fown in Derbyshire, is Senjilker to those who know what they ought to say. Welsh names are a source of unfailing confusion to the Englishman, whose tongue refuses point blank to grapple with them; and yet some of them at least have been made simple enough, such as Rhidbaxton, in Pembrokeshire, which as Ribson is simplicity itself. In Hertfordshire the formidable Sawbridgeworth has been reduced to the handy compass of Sapser; but what shall we say of Woodmancote, which to the good people of Gloucestershire is often known as Uddenmukat? Chelmondiston, in Suffolk, has been

Martin Harvey's Joke.

Martin Harvey, the young English actor who vaulted into fame by his impersonation of Sydney Carton in "The Only Way," is an ardent devotee of Henry Irving, but he carefully eschews the mannerisms of that great English tragedian. Outside of his work as a member of the theatrical profession Mr. Harvey's chief hobby is painting and sketching. He is considered a clever painter and also has some knowledge of sculpture. He is very fond of dogs and rarely is without one of his pets beside him when off the stage. When in London Mr. Harvey lives in a beautiful house in St. John's Wood. His holidays he spends at the seaside. During one of his visits to the ocean he boarded at a small hotel, where he did not fare to his liking. On going away he took his revenge on the landlady in a fashion of his own. His hostess as he was leaving asked him to write in her testimonial book. He complied. His entry comprised just four words—"I quote the raven." As the landlady had never read Edgar Allan Poe's poem, she was not "on," as we say in America. But guests who followed Harvey were.

Capt. Ian Hegg.

An interesting figure in the group of young officers decorated for brilliant service with the Argunga expedition on the Niger last year, says. The Star, is Capt. Ian Graham Hogg of the 4th Hussars, who has been on special work in Southern Nigeria for some time. This promising officer is the second son of the late Mr. Quintin Hogg, and his gallantry won him troop rank in the Boer war four years ago, when he was only 25. In the Cape he showed his faculty for organizing, and was for some time commandant at Wellington, while in the hot fields where his duty led him he earned four clasps for his medal.

"Why do you need a horn?" asked the wagon. "I have no use for one." "Yes," replied the automobile, "but then you have a tongue."

The service in the evening was especially good. Rev. Mr. McCosh preached an able sermon on Ohristian Endurance, which was heartily appreciated.

The vested choir, which is so popular with all of Chatham's music lovers, was composed of 47 voices last evening and the music rendered was very inspiring. The choir is improving every day and would be a credit to any church. Miss Olive Richards, soprano, sang a solo, "The Plains of Peace," Miss Richards has a well developed soprano voice and her splendid rendition of this solo was much appreciated by the large congregation.

McCOIG DENIES IT.

To the Editor of The Planet: Dear Sir,-In your issues of 10th and 11th inst. you give a great deal of prominence to the report of the appointment of Col. Martin to the Governorship of the County Jail, emphasizing by glaring headlines the fact that Col. Martin is my uncle and insinuating that the appointment was my doing.

was my doing.

You have done this without the slightest inquiry from me, and so far as I know you have only your imagination for your facts. If you had inquired you would have learned that the appointment was a complete surprise to me, and that I was not commetted with it in any way or form, and knew nothing of it whatever. I never, wrote or interceded with any person whatever, in Col. Martin's behalf, and had not the remotest thing to do with his appointment. Had I felt inclined to do so. I would have done it publicly and would not have been ashamed of it, as Col. Martin is a reputable citizen and a man who would have filled the position honorably and efficiently, and has to his credit many years of active and clean party servee, and if I had recommended h.m. a gelative, it would not have been establishing a new precedent in Kent, as the older electors will well remember.

member,
However, I did not do so, and I
will be one of the first when the
House meets to ask for all the facts
in connection with his appointment
to be made public, if not sooner done,
and I can tell you now that those to be made public, if not sooner done, and I can tell you now that those facts, in so far as my actions are concerned, will show that I did not speak to the Sheriff about the appointment, but when I was informed that Myles McCarron's name had been sent down by the Sheriff as his momination, I felt that the north end of the riding was only receiving justice in getting the appointment, and from that day to the present I have done what I could to secure his appointment, and to act in harmony with the Sheriff's desiré, and when Mr. Thos. Mulvey, the assistant Provincial Secretary, called me up over the long distance phone and asked me if the Sheriff's nomination was satisfactory to me, I told him it was entirely satisfactory, and I wished entirely satisfactory, and I wished the appointment made as soon as pos-

the appointment made as soon as possible.

That is the only official that I spoke to or communicated with in any way whatever, and again on the 4th inst., I called Mr. Mulvey up and asked him why Mr. McCarron had not received his appointment. He assured me that Mr. McCarron would receive his appointment not later than the following Tuesday and that I could rest easy, and that was the last I heard about it until my return from Ingersoll on Friday list. These are the facts. The more it is investigated the better it will satisfy me, and I only hope that the Conservative press will be fact, enough and just enough to bease drawing references without knowing

drawing references without knowing the facts, and to withhold their risin-uations until they themselves have got in touch with the truth. Thanking you for your valuable

space, I remain, Yours Sincerely, A. B. McCOIG.

IN MEMORIAM

On Tuesday last, at his late resi dence, John N. Crow, one of Chatham's oldest and most respected residents, passed away.

Deceased was born in Dover Township 71 years ago, but resided most of his life in Raleigh, where he was a very successful farmer. Mr. Crow had been ailing for the past 27 years, and about three months ago was confined to his bed.

A widow, two daughters and two sons are left to mourn his departure. They are, Mrs. Longden, and Della and George at home, and Fred, of

The pall-bearers were six friends of deceased, and were, Fred Wood, W. R. Baxter, W. J. Wilson, John Dillon, John McCorvie and Eli Hazlett. The funeral service was ponducted by Rev. Mr. Hoyt.

The North of England seems to be a fertile soil for large families, for sign 1797 we read of a Cumberland man and his wife, accompanied by 30 of their children, all attending the christening of the 31st child, and in carlier years another north countryman, Thomas Greenhill, applied to the then Duke of Norfolk, Earl Marshal, for an augmentation to his coat-of-arms on the singular ground that he was "the seventh son and thirty-mith child of one father and mother."

If a man's family be considered as including all his descendants, that of Peter Smith, who flourished in New Jersey in the seventeenth century, is entitled to a high place of honor, for at a recent annual gathering of Pet-er's progeny no fewer than 7,000 met and dined together under the apple trees in the orchard attached to the ancestral homestead.

kind of work, and a green man is no more difficult to teach than is a green girl, but when it is possible it is always better to hire a man that has had some experience in housework. Sometimes an aged man can be secured for very low wages. He may be slow in his movements, and yet because of his ex perience he will accomplish a great amount of work. Sometimes there is a poor man who has tried and failed to get the employment he desires, but who will take anything he can get. One such did the main part of the work in a three story and basement house, including the washing, for a family of three ladies and one young man. Man is especially valuable at the house cleaning period. The ease with which he takes down bedsteads and puts them up again, the swiftness with which he carries mattresses to the yard and the common sense way in which he beats and suns them appeal to any careful housewife, as does also the man's thorough beating of the rugs and carpets, his polishing of the wir dows, no matter how difficult they are

to reach or how heavy to lift.

A woman house cleaner, no matter how willing she may be, could not compete with such a man, for physically she is not strong enough to do what is denominated heavy work, and when she makes an attempt at heavy work the usual result is unsatisfactory. Men do not mind the taking down of stoves or carrying coal to the top of a house, whereas such work to the ordinary serving woman brings severely sharp

Pain Across the Kidneys For Three Years.

Suffered Great Agony. Could Not Stoop or Bend.

Mo disease is so quiet and stealthy in its approach as kidney disease. That is why it is so dangerous. It may become deep-scatted before you realize the danger. It is therefore of great importance to recognize the early warning symptoms, because in its early stage kidney disease is easily curable. Pain or dull sche in the back is one of the first signs. So save bladder pains, bearing-down pains, smarting sensation when urinating, frequent or suppressed urination, and gravel or sediment in the urine, etc. You cannot be well if your kidneys are not performing their functions, properly. In all ordinary cases of any derangement of the kidneys, a few doses of DOAN'S KIDNEY PILLS

DOAN'S KIDNEY PILLS

will put the patient right; in old or chronic cases, the treatment should be persisted in.

Mr. Michael A. McInnis, Woodbine, Marion Bridge, N.S., tells of his experience: "For the last three years I suffered great agony with pain across my kidneys, and was so bad that I could not stoop or bend. I consulted and had several doctors treat me, but I got none the better. On the advice of a friend I procured a box of that valuable lifegiving remedy, Doan's Kidney Pills, and to my surprise and benefit I immediately became better. In my opinion Doan's Kidney Pills have no equal as a cure for any form of Kidney disease.

AMERICAN BEAUTY CAKE.

through the rose tube of a pastry bag. Baked in layers and put together with white icing, when sliced this cake is as pretty as a flower.

Four cupfuls of flour, sifted twice, and then measured; two level tenspoonfuls of baking powder mixed in the flour, which must then be sifted the third time; two and a half cupfuls of surgar, one level cupful of butter six sugar, one level cupful of butter, six drops of red fruit coloring, the whites of eight eggs, one teaspoonful of va-nilla extract. Cream the butter and sugar together until as light and foamy as whipped cream; drop the fruit col-oring, one drop at a time, and beat it through and through the butter and through and through the butter and sugar; froth the whites until they will not slide from the dish when inverted, sift the flour into a mixing bowl and make the usual "well" or opening in the center. First work in the creamed butter and sugar and vanilla, working the flour down from the sides, adding milk, a little at a time, until all th flour is mixed in lightly. Then cut the whites in with the side of the spoon, through and through, by bringing the spoon up from the bottom sidewise. This folds the whites in the batter. Mix very lightly when putting in the whites.

Bake in a deep pan, filling it two-thirds full. Have the heat of the oven moderate, and when the cake takes on a golden tinge lay a thick paper over the top of the pan. When the cake leaves the sides and pipe it is done, and not until them. This is decidedly the best test. A look into the over will show when the cake has slightly peeled away from the sides of the pan.

Baked in layer tins, the cake should be watched and as soon as done taken from the oven. A deep brown crust on the bottom detracts from the dainty appearance of layer cake when sliced. Put the American Beauty cakes to-

gether with white icing and apply a thick, smooth coat of white icing over the top and sides. Emboss with pink icing. This cake originated in my kitchen with an expert pastry cook of twenty years' experience.—Mrs. G. T. D. in Table Talk.

THE ROOT OF NEURALGIC HEAD-ACHE.

Is an irritable condition of the nerves caused by cold. Relief comes quickly from Nerviline, the great pain reliever of to-day. "I consider Nerviline a magical remedy for neuralgia," writes Mrs. B. G. Harris, of Baltimore. But I never worry if Nerviline is in the house. A few applications never yet failed to kill the pain. I can also recommend Nerviline for stiffness, rheumatism and mascular pains." In use nearly fifty years; tryNerviline yourself. years; try Nerviline yourself.

Ghosts would frighten many people who are not afraid of germs. Yet the germ is a real danger. If this microscopic animalism could be magnified to a size in proportion to its deadliness it would show like a giant python, or fire breathing dragon. The one fact to remember is that the germ is powerless to harm the body when the blood is pare. It is far easier to keep the germ out than to drive it out after it obtains a hold in the system. Dr. Pierce's Golden Medical Discovery is the most powerful and perfect of blood purifying medicines. It increases the quantity as well as the quality of the blood, and enables the body to resist disease, or to throw it off if disease has obtained a footing in some weak organ. Wherever the digestion is impared, the nutrition of the body is diminished, for the blood is made from the food which is eaten, and half digested food cannot supply the body with blood in quantity and quality adequate to its needs. For this condition there is no remedy equal to "Golden Medical Discovery." It sures ninety-eight out of every hundred persons who give it a fair trial. When there is constination It sures ninety-eight out of every hundred persons who give it a fair trial. When there is constitution Dr. Pierce's Pleasant Pellets will promptly and permanently cure.

Some people deserve a lot of credit and others demand cash.

MESSRS. C. RICHARDS & CO.

Gents, — After suffering for seven years with inflammatory rheamatism so bad that I was eleven monthe confined to my room, and for two years could not dress myself without help, your agent gave me a bottle of MINARD'S LINIMENT in May, 1897, and asked me to try it, which I did, and was so well pleased with the results, I procured more. Five bottles completely cured me, and I have had no return of the pain for eighteen months. The above facts are well known to everybody in this village and neighborhood.

Yours gratefully.

WON HIM A FORTUNE.

Genin Got Barnum to Advertise Him All Over the Country.

When Jenny Lind, the great Swedishinger, visited America in 1848 she not only won a fortune for herself, but made two men wealthy as well. One of them was Barnum, the showman. It was Barnum who brought her to America. He ventured all that he could raise in advertising the wonder ful woman, and his successful manage-ment of her tour in this country lifted Barnum to grand business success.

But there was another man who got rich without having anything to do with the management of the Jenny Lind concert tour. It was Genin, the New York hatter. His name and business were advertised by Barnum wherever the Jenny Lind concerts were advertised, and it didn't cost Genin one penny for all of the advertising that Barnum did for him.

There was no hall in New York big mough to accommodate the crowds which attended the first concert in this country, so Castle Garden was fitted up for the purpose, and the seats were sold at auction. Now, Genin was an unknown hatter, although he was a good one. He went to the auction sale of seats at Castle Garden and outbid everybody. He ran up the price of the first ticket until some of his friends thought he was going crazy and tried to induce him to desist. But Genin was not crazy by any means. He kept on bidding until he finally got the first ticket for \$750. He had outbid the richest men in New York.

The next day and every day afterward for many months it was an nounced that "Genin, the New York hatter, had paid \$750 for the first Jenny Lind ticket."

And wherever Barnum advertised his concert he advertised that fact to show what a great attraction he was touring with. As a consequence Genin's hats were in demand all over this country, and he became enormously rich.

COURTSHIP IN FRANCE

Levenaking Begins After the Wed-ding Bells Have Rung.

The word "courtship" has no equiva-lent in the French tongue, because the thing itself does not exist. Stolen tete-a-tetes, even furtive kisses, may, of course, be indulged in, but only under a modified chaperonage, the half shut eye of parents or guardians. No young French lady would be permitted. for instance, to undertake a cycling expedition with her future husband. Still less could she take train with him for the purpose of visiting relations in the country were the journey of half an hour's duration only. Lovemaking begins with the honeymoon.

For centuries, alike in the humblest as well as the highest ranks, matrimonial settlements have kept family possessions together in France-and riched village notaries!

No sooner was serfdom abolished than the peasants followed bourgeois example, dowering their daughters and securing the interest of their sons by law. In provincial archives exist many of these documents, the rustic bride's portion consisting of furniture, clothes, money and sometimes cattle or a bit of land. The archives of the Aube contain the marriage contract of a skilled day laborer (manouvrier) and a widow whose property was double that of his own. The deed secured him joint enjoyment and ownership. I cannot here, of course, enter into the in-tricacles of the French marriage laws. There is the regime dotal, which safe guards the dowry of the wife. There is the regime de la communaute, which makes wedlock strictly a partnership as far as income and earnings are concerned. And there are minute regula-tions as to the provision for children and widows. The latter are always sacrificed to the former.-Cornhill.

One of Them For the Company A well known comedian celebrated for his eccentricities boarded a street car the other day and duly paid fare upon demand. After riding a block or so farther he produced another nick-el and tendered the same to the passing conductor.
The honest conductor refused the

proffered coin, while the actor vehemently protested his desire to pay his

fare.
"You have given me your fare already," argued the man in uniform.
"I know," responded the comedian, "but this is for the company."

Every one laughed excepting the discomfited conductor, who had omitted

to register the first collection.

Your Dear Old Mother.

Young man, did you ever put your arms around your dear old mother, who has loved and cared for you, and tell her that you love her and are gitteful for the tears she has shed and the prayers she has offered for you? She may think that you love her without your assuring her that you do, but it costs you but little effort to tell her, and your words may bring more joy and sunshine to her heart than you ever dreamed of.—Exchange.

ST. MARY'S CHURCH BURNS.

For the Second Time Knox Presbyterian Is Destroyes

St. Mary's, Feb. 13.-About nine o'clock yesterday morning fire broke out in the basement of Knox Pres-byterian Church, contiguous to the furnace, and, despite the efforts of the brigade, the building was com-

pletely destroyed.

This is the second time this church has been destroyed by fire since its erection. The last fire was about thirteen years ago. The present loss, including a new pipe organ, which had only been installed a few weeks ago, will probably reach twenty thousand dollars, insurance \$7,000 on building, and \$1,600 on organ.

The water from the tank had fermed a heavy coat of ice upon the rails which derailed the first engine, causing the second engine, two baggage cars and mail carto pile up. The engineer of the first engine was killed. From all parts of Oklahoma and Indian Territory come accounts of suffering as the result of the sudden northern storm, which beaccounts of sufering as the result of the sudden northern storm, which began Saturday. The Territory is covered with a coat of ice and snow. Cattlemen say that range stock will suffer the greatest loss in years. In Northern Texas the worst blilzard in 10 years with the thermometer at zero and below prevails. The severe weather will inflict hundreds of dollars in loss to cattlemen. The poor in cities are suffering severely.

Sanday's Big Snewsterm.

Sanday's Big Saewsterm,

Toronto, Feb. 13.—Ontario was again in the throes of Boreas yesterday, when a severe snowstorm blew in from the southwest. The storm was a general one, and extended west to Windsor and into the United States and north to Georgian Bay. The observatory reported the storm to be general throughout Ontario, with a fall at Buffalo about the same as at Toronto—about eight inches. In New England they had rain instead of snow. The highest temperature yesterday was 33, one degree above freezing, and the outlook for westerly winds, turning very much colder, which will last for several days. The snowstorm extended to Quebec, and the storm signals were displayed in the Maritime Pro-Sanday's Big Suewsterm. were displayed in the Maritime Pro-vinces, where gales are expected. Nova Scotia is to be visited with

Fortunately, the snow did not fall heavily for any continued length of time, and both the C.P.R. and G.T. R. found no great difficulty in keep-ing their lines open.

SHOT AT POLISH BISHOP

Stranger Fired Two Revelver Shets At.

Bishop Kamiuski of Buffale. Buffalo, Feb. 13.-An attempt to assassinate Bishop Kaminski of the Independent Catholic Church (Polish), was made Saturday night. Two re-volver shots were fired at the bishop

was made Saturday night. Iwo revolver shots were fired at the bishop at close range, but he escaped uninjured. The would-be assassin escaped and no arrests has been made. A stranger called at Bishop Kaminski's house late Saturday evening. He asked for the bishop, who at once went to the door. The stranger asked for money, and without waiting for a reply pointed a pistol at the bishop'e head and fired. The bullet struck the door casing.

Bishop Kaminski hastily retreated to his studio, followed by the stranger, who fired a second shot before the revolver was knocked from his hand by another occupant of the house and escaped.

The secession of Bishop Kaminski's Church engendered much bitter feeling among the Poles on the east side.

INTERNATIONAL PARMERS' AID.

Finn Mosts With Favor in Austria,

Rome, Feb. 13.—Austrai and France have given their adherence to the International Agricultural Institute, proposed to the King of Italy recently by David Lubin of Sacramento, Cal., and warmly welcomed by the King.

The plan is to hold a conference here on May 5 to consider the formation of an international body which will collect and furnish reliable statistics of crops and labor in all parts of the world, promote measures for the control of diseases of plants and animals, guide immigration movements, exercise influence in the furtherance of fural co-operation and the development of agricultural insurance and agrarian credit and otherwise and asimulation of the statement of the insurance and agrarian credit and otherwise aid agricultural interests.
The Emperor Joseph and President
Loubet warmly congratulated Mr.
Lubin on the initiation of the move

Welshmen For Canada London, Feb. 13 -(C.A.P.)-Much London, Feb. 13—(C.A.P.)—Much uneasiness is created in tin plate trade circles of Llanelly, owing to the determined efforts being made to establish the industry in Canada. Isducements are offered several well known Welsh manufacturers to open works in Toronto. Canada at present is one of the best customers of tin plate. A most notable feature is that the Sheffield cutlery trade exports to Canada in January were double those of January, 1904.
