visitor at the home of E. A. white more. On Wednesday afternoon of last week a meeting of the Women's In-stitute was held, with a small attend-ance in consequence of a busy week in the community and farming dis-trict. The president, Mrs. Acheson, took charge and the programme car-ried out was interesting, opening and closing in the usual manner. Two very fine papers were sent in by, ladies unable to be present. "Things that make life worth while" was con-tributed by Mrs. Charles Abel, while Mrs. Hilson Warren's paper was on "Home-making and Management".

Plum Hollow, Feb. 24.—The Ladies' Aid of the Methodist Church met at the home of their pastor, Rev. T. F. Townsend, at Frankville on Thursday

Highly-Prized Poultry Meats.

Those who have been fortunate nough to eat the meat of a canvas back duck have had a rare treat. The canvasback dines largely upon wild celery growing in the southern marshes. While there is a fishy flavor to most of the wild ducks and other sea fowls, this can not be said of the

canvasback. The meat of the Indian Runne duck is of superior quality, being fine in the grain, juicy and of excellent

French epicures greatly appreciate the high quality of the fiesh of the Cayuga (a black duck), claiming the meat is of fine flavor. Notwithstand-

not in favor in our markets. Geese have been used as table poul

relish the fat, and often eat it on bread in place of butter. Among orthodox Jews it is used as a culinary fat in place of lard. The livers of geese are highly prized by European epicures.

the stomach, a condition frequently brought about by an excessive beet diet, turkey meat is invaluable. The nutritive qualities in turkey and beef are the same. Beef has a tendency to

stimulate the acid secretions of the stomach, and when there is an excess of acid, turkey meat counteracts the offects.

It is claimed turkey meat contains a greater percentage of proteid, or flesh-forming food than is found in beef. It is more easily digested, due to the fibre being shorter and yielding more rapdly to the digestive process. The flesh of the capon has the tenderness of a pullet but a better flavor, and gives a greater proportion of white meat from the fact that the tender parts of the body develop more than in ordinary fowl. The capon is anths at its best when a year or 15 m

No poultry meat excels, if any equals, that of a half-grown guinea, splat down the back, broiled and but-tered. It is meaty, tender and of splendid flavor. The guinea fow!

splendid flavor. The guines fowl really is a wild bird, and is an ex-cellent substitute for wild game, such as grouse, prairie chicken, quail, etc. --M. K. B.

Rubbish piles afford hiding places for rats, weasels, minks and other enemies, and should never be tolerated near the hen houses.

Parched corn is an old-time stimulant, but the hens like it just as much now as they did in our forefathers' days. It may be fed once or twice a

What the Gir Is Are Doing.

Vaccination for Poultry Diseases.

While it was only about three years ago that vaccination of poultry for which are the after-effects of colds. the control of disease was brought to 1880 to 1882, by Pasteur, in cases of fowl cholera. That was the first at-tempt to produce, by use of artificial cultures, immunity against a com-municable disease, and was the basis of all later work in this field, the valuable results of which, at the pres-ent day, are seen in the protective vaccination of so many diseases of animal life. Nothing more was heard of this practice until 1913, when a state in-stitution undertook an extensive re-search into a series of the most dead.

search into a series of the most deadly poultry scourges, which included roup with its allied diseases.

From then on thousands of fowls were submitted to laboratory tests field trials which eventually and proved that infections accompanying these diseases, and in this way the diseases themselves, could be controlled by vaccination. It was about 1921, eight years after these trials were started by veterinarians, that the Pussy Willow, Pussy Willow, laboratories first offered vaccination you try to hurry, dear? to the public, declaring it "offered much hope for the prevention and eradication of roup."

Subsequent experiments brought about the following conclusions: That avian mixed bacteria is non-poisonouz: that no immediate deaths resulted from vaccination: that it did not Pussy affect egg production, egg fertility,

AFTERNOON TEA

(By M. E. Colman) (By Olga Atkinson Gibson)

If afternoon tea is a regular func- And so I left my plough, tion, the tray should always be set in I left it in the furrow, advance, as a matter of course. As And searched for God. some people prefer lemon in their tea instead of cream, have on your tray a lemon cut in slices, stick the lemon with a few cloves before slicing, including a clove or two in most slices. The city mart, and found Him not.

Sandwighes are very popular for afternoon tea. They may be made before hand, arranged on plates, covered with a napkin wrung out in cold water and set in a cold place. A delicious Piquanot filling is made by mixing with catsup or chili sauce as much grated cheese as it will take up. These sandwiches are delicious I mingled with the worshippers toasted and served hot; when so doing, cut the bread a little thicker.

Ribbon sandwiches are very ornamental for an occasion. Cut two slices each of grahm and white bread at least half an inch thick; spread liberally with butter and press firmly together, alternating the graham and white slices, first laying at right angles to the surface to be sliced, alternate narrow strips of red and green sweet pepper. Trim off the crusts and slice thinly through the four slices. The regular flecks of bright red and green are very attractive.

Tiny Baking Powder Biscuit-the and savoury. If made and butterd in closely covered pan, one could never baked. A bit of jam or jelly may be inserted at the last minute, if you like.

When we come to cakes, suggestions are so numerous as to make choice tea cakes they should be delicate and dainty rather than heavy and rich.

' For rich small tea cakes, cream together one-third cup butter and onehalf cup sugar. Then add one and one-half teaspoonfuls of milk and two beaten egg-yolks. Beat well, add onehalf teaspoonful of vanilla and onethird teaspoon of mace, and fold in two egg whites stiffly beaten. Last, add three-fourths cup of pastry flour, one-half teaspoonful baking powder, and one-fourth teaspoon of salt measured and sifted together. Bake in small tins for twenty minutes or until done. These cakes are much like pound cakes and require no icing. The tops may be dipped in powdered or granulated sugar if desired.

THAT GARDEN O'MINE

That Garden O'Mine Is a dreary place now; The robin of summer has flown The wren does not sing From his perch on the bough In the silvery voice that I have known.

My heart cried out aloud for God; My very soul yearned mightily,

I scanned the brassy sky, I lifted up my hands to heaven: I sought Him in the throng upon He was not there.

I searched the palaces where Prince dwell

The place of Power and Wisdom's throne:

Deep in the silent forest glade I sought Him in the Hermit's cell;

Who sang His praise with solemn

chant In vast cathedrals dimly lit; Nor was His presence there.

As night drew on apace I came, Weary and ead, to my field again, And there, beside the abandoned plough.

Waiting for me.

TIPS TO HOUSEWIVES

First aid boxes are useful. The box when complete should contain some bandages, a package of sterile gauze.

another of cotton, a tiny bottle of iotinier the better-split, buttered, and dine with a safety cork, and a bottle served very het, are both attractive of hydrogen peroxide. There should be safety pins for the bandages and a the morning and heated quickly in a bit of oiled silk and a scrap of flannel for fomentation, a bottle of oil of discover that they were not freshly cloves in case of a toothache, and an ounce of essence of peppermint, a few dorps of which in hot water will relieve the acute pan of indigestion.

Fine linen, such as infants' clothing pocket handkerchiefs, etc., that have become yellow mya be whitened by boiling in strong suds made with yellow soap and milk and water-half milk and half water. Boil for a half hour, wash in ordinary suds, rinse in clear, hot water, then in cold blue

water. Pass on the magazines when the family has read them. There are plenty of institutions that will become them and much good will be done with little effort and no expense on your part.

White or colored silk stockings should be washed out quickly in warm water and a good white soap and rinsed in a clear water. Then put them in a coarse towel and wring them out as dry as possible before hanging up to dry. And do not hang them in the sun to dry. Neither should you iron them. The same recipe may be used for washing silk gloves.

There are two good ways to boll eggs. One is to place them in cold water and bring it to boil, not too quickly and not too slowly. The w is heat an earthen nitcher with boiling water, place the eggs in it and refill with boiling water. Wrap the pitcher with a towel or a piece of flannel or other fabric to aid in retention of the heat. At the end of fifteen minutes remove from the vessel.

THE ATHENS REPORTER.

SHELDON'S CORNERS

The annual meeting of the Plum Hollow cheese and butter factory was held on Wednesday evening, February 25th. Wright Berney was helping his brother, Mony Berney, move last week on the Holmes farm. Mr. Fred. Hayes returned from To-ronto last Tuesday after a week's visit, accompanied by his nephew, Harry Kerr. Although he is not in the best of health, he is moving this week to his residence in Athens. Vance Foley had his sawing done on Saturday last by his brother, Bryce Foley Mr. and Mrs, Levi Wilson were visiting their daughter, Mrs. Fred. Hollingsworth, on Sunday last. Elva Whitmore is still at her

CHARLESTON

Charleston, March 2.—The heavy wind last week blew down H. Web-ster's aerial wire, and they are un-able to listen in until it is repaired. Mr. and Mrs. P. Steacy, Warbur-ton, were week-end visitors with friends here. The Pentecostal people held an all-day meeting at J. Kelsey's on Sun-day.

an earthquake about nine o'clock on Saturday night. The vibrations last-ed about fifteen seconds. W. C. Taylor has purchased the Oak Leaf cheese factory, and held a milk meeting on Monday evening last which was largely offended Ma which was largely attended M. Taylor was owner and proprietor of the factory for about fourteen years when he sold it to J. A. Flood and moved to Brockville, where he enter-ed in the grocery business in 1915.

SOPERTON

Soperton, Feb. 19 .- Levi Raisin had the misfortune to find one of his tho-roughbred Ayrshire cows dead in the

bale in the morning. J. Earl took a load of relatives and friends to C. Wood's, Chantry, on Wodnesday when dancing was enjoyed.

G. Roddick is moving to S. Stevenson's farm and Mr. Stevenson is re-turning to his farm at Glen Elbe.

Mrs. W. Taber, Glen Elbe, and Mrs. A. W. Johnston, Athens, spent Tues-day with Mrs. C. E. Frye.

On Saturday afternoon Mrs. C. E. Frye entertained a score of ladies by giving a delightful afternoon tea in honor of Mrs. T. J. Frye, who, with Mr. Frye, will shortly take up resi-dence in Delta.

Woman's Realm

A ROAD TO POPULARITY.

An impromptu group of young people were gathered around a playerpiano one evening about a year ago, in the home of a prominent banker in the city of Montreal. The banker's daughter was seated at the instru-ment, and the others were alternately singing and dancing and generally making merry.

Presently the music and dancing ceased. There was a momentary lull. Someone suddenly suggested that Mary, one of the girls in the group and a member of Montreal's younger set, be requested to produce her violin, which she co-incidentally had with her, and play a few selections. After a little coaxing, Mary acquiesced and came forward. Under the soft glow of the drawing-room piano lamp she began to play.

She played beautifully. The bank-er's daughter accompanied her. She was asked to give several numbers. showing that her music was highly appreciated. There was one girl, however, who

although to all external appearances apparently enjoyed Mary's playing, inwardly was burning with envy-en vious because Mary was winning the admiration of the girls present and

not play some instrument or other, and naturally had nothing in common with the rest That evening there was one girl who

piano and violin both. "She would start the piano first," she half mutter-ad to herself. Then no longer would she be an outcast whenever a group of young people gathered together for a musical evening. It is not difficult to guess which girl this was.

To-day this girl is well on the way toward being an accomplished pianist. She has advanced sufficiently far to feel "quite at home" among other girl musicians.

A year ago she knew nothing about músic. To-day she is in her element when she hears Bach or Beethoven or

An odd little birthday gift, one that does not cost much over ten cents, is the shade or lamp pull. Button molds of the natural wood are used.

To make the square pull, two smallsquare molds for the bottom and top group and two of a little larger size for between are needed.

Paint them bright colors, using enamel or artist's tube paints. Water she was not. As a matter of fact, she colors may be used, but a coat of var was the only one present who could nish or shellac is then needed to pre vent dampness affecting the color. I enameled the square button molds a peacock blue and the silk cord on That evening there was one girl who went away from this luxurious bank er's home, resolved to learn to play the bination but still a bright touch of

color. Always knot one end of the cord o prevent its fraying out when work-

ing and to hold the lower molds. A twenty-four-inch cord is a good length. String on two flat molds and tie a knot down close, thus holding the molds closely together between end knot and the one just made. the

The two larger molds are then strung, and a knot tied down close on top of these two. Leave about three inches and tie a knot and string two small molds and tie a knot on top of

these. In making pulls of other de-Brahms being played or referred to. signs be sure to have good proportions

Brahms being played or referred to. As soon as she has taken a few more leasons she has taken a few more leasons she has taken a few more leasons she has taken a few more violin also. There is a moral to the above story, should be given the opportunity of learning to play some particular mus-fal intromet. When they are older, the yellow with alack and green. The black cord would go very well with tit therefore, they are not at a disadvan-tage when surrounded by musical texpende the decorative effect. Parents should necourage their chil-drem to take up music when young for a girl's living room and in the family intact than by "Music in the Home." ONE NIGHT OUT FUXES TUP

agreement; but it has also decided that the agreement applies only to the Canadian Pacific mileage existing in 1897.

While these provinces have thus apparently won a victory on points, they are in reality, in so far as the general effects go, in a worse position than be-fore they made the appeal. In practice the Crow's Nest rates had been applied to the whole Canadian Pacific mileage, and the Canadian National Railways have applied them too at competitive, points. But in 1897 the C.P.R. mileage was only about 7,300 miles, whereas it is now slightly over means that this mileage added since 1897 cannot claim the Crow's Nest rates.

On this point Chief Justice Anglin says: "It is obvious that the rates and tolls to be reduced, whether these actually charged, or those contained in the freight tariff, were rates and tolls between points actually in the Canadian Pacific Railway as then existing. There were-there could be -no rates or tolls in existence to or from points not then on the system; and there could be no reductions in non-existing rates and tolls."

The Prairie Provinces had rested their case on the contention that the Crow's Nest Pass Act was a special Act and could not be overridden by the Commission. The Supreme Court said: "That is good law." Counsel for these provinces admitted that, read by itself, the Crow's Nest agreement applied only to the 1897 mileage. But their counsel, in order to make

murder case the newspapers had freely stated that at the first trial there were nine for acquittal and three for

Engineer Norris and Engineer Bourne, both of whom are in the Perth Hospital.

News Agent E. Hanson, who suffered slight internal injuries, and Baggageman G. Anderson, who was also hurt, are also in Perth Hospital. Others members of the train vrews

suffered slight injuries, while several passengers also sustained bruises, none of which, according to the C.P.R. report, are believed serious.

A number of passengers who were proceeding to St. John, N.B., to enbark for Europe, were able to catcle the boat train at Montreal West, and continued on their way.

Tourists Leave Much Money Here.

Many estimates are made as to the mount of revenue derived from the tourist traffic. It is somewhat unusual, however, to receive a direct statement of expenditure by those who come to Canada for holiday purposes. The Natural Resources Intelligence Service of the Dept. of the Interior is receiving a large number of enquiries for information on cance routes, motor trips and holiday resorts from many residents of the United States. Among these is one in which the writer wants information concerning a cance trip in North-western Ontario he contemplates making this summer. He states that "one year, when we figured out, we found we had left \$3,700 in your good Province of Ontario, and I assure you it afforded us all great pleasure to do 50." This season promises to be an exceptionally active one for tourist business, especially among the areas where transportation is almost exclusively by canoe and portage.

COLLISION IN THE AIR AT CAMP BORDEN CAUSES DOUBLE FATALITY When two aircraft collided in flight at Camp Borden Air Station on Feb. 24, one of the planes fell, resulting in the instant death of Flying Officer R. H. Cross, of Toronto, shown above wearing uniform cap, and his instructor, Flight Lieut. J. L. M. White, D.F.C. The officer shown in flying helmet is Flying Officer A. L. Merfee, pilot of the other plane, who was able to make a safe landing by a feat of splendid coolnets. The plane shown is one of the two seater Avro machines.

LOSS OF WILLIAM **HENRY MONTGOMERY** the Human Race and Must Be

Was a School Teacher After Leaving Athens High School.

Frankville, Feb. 26.—The death oc-curred at Frankville on Tuesday, February 24, of a highly respected and widely known citizen in the per-son of William Henry Montgormery. The deceased had been stricken with paralysis only a few days before and had failed to show any improvement during the time up to his death. On Tuesday morning about 3.30 the end came. The whole community and sur-rounding country were in mourning. work. The one who had passed way was the great helper and advisor of the com-munity. He was a man slow to criti-cize, of weighty judgment and of a charitable nature and the district has lost one of its greatest intellects. The lost one of its greatest intellects. The deceased was much interested in pub-lic and political life. Being a staunch onservative, he took an active part in politics. The latter part of Mr. Montgom-

ry's life was spent at Frankville, where he was born in 1856, the son of the late Joseph Montgomery. He at-tended the Farmersville (Athens) High school and after graduating from that institution taught school in several parts of the district. Then he accented a position as customs officer several parts of the district. Then he accepted a position as customs officer at Brockville, and spent some years in the service of the government. He re-turned to the home of his boyhood to spend the remainder of his life in the service of the people with whom he n his days

service of the people with whom he began his days. The funeral left the home at 1 p.m. en Thursday and the service was con-ducted by the Rev. T. F. Townshend, of the Toledo Union church and inter-ment made in the cemetery blere. Some years ago the only daughter, Mrs. W. J. Plunkett, Porth, Onl., passed away. A sorrowing wife, one grandson, E. Cleon Plunkett, and family, Ottawa; four brothers, J. W. Montgomery, Frankville; Stewart Montgomery, Frankville; Rev. Edgar Montgomery, Tauton, Mass.: Herman Montgomery, Almonte, and one sis-ter, Mrs. H. Pierce, Smiths Falls, re-main to mourn the great loss. The pallbearers were the cousins of the deceased, Manford Montgomery, James Robb, George Robb, Edgar Robb, T. E. Lockwood and Morty E. Montgomery.

Robb, I. E. Lockwood and Morty E.
Montgomery.
Among the fioral offerings were sprays from Mr. and Mrs. H. A. Stewart, Brockville; Dr. W. H. Bourns and Mrs. Edgers, Frankville; Mr. and Mrs. L. Morris, Frankville; and Dr. H. A. Clark, M.P.P., Brockville.
Much sympathy is extended to the bereaved wife and sorrowing friends.

FAIRFIELD

Fairfield East, Feb. 25.-The auc ion sale of Claude Laforty was well attended, and many from Brockville were there. The stock and implements brought extra good prices in spite of the sale being held over for a day on account of the rains.

On Tuesday night the neighbors were entertained by Mr. and Mrs. C. Laforty, the evening being spent in games, music and dancing. The neigh-bors reported a splendid time and were grateful to their host and hostess for the entertainment. Miss Dora Barton, pianist, and Mr. Rowsome violinist, furnished the music.

W. H. Irwin and Mrs. Richard Pres on, of Soperton, are guests of Mr and Mrs. C. Laforty.

F. W. Moulds, Brockville, spent Monday and Tuesday as the guest of H E Pyke

C. A. Moulds made a business trip Brockville on Wednesday

THE ATHENS REPORTER

FEED AND CARE OF COWS TESTING SOME POINTS IN SUCCESSFUL DAIRYING. Dairy Cows Performs Double Duty In Supporting Herself and Producing Large Quantities of Food Stuff for

Variety tests were conducted at the Experimental Station for Southwestern Ontario on the following: Cabbage, celery, head lettuce, onions and tomatoes.

Celery .- Eighteen strains and varieties of celery were listed and four-teen breeding lots transferred from the Ontario Agricultural College. The conclusions reached were that in general the old strains of Paris Golden Self Blanching seem to be better adapted to muck soil conditions than the new strains except where celery is grown for summer market and immediate sale. The new, more vigorous strains seemed to mature quickly, and when well blanched must be sold or they be-come pithy and therefore inferior.

The strains that proved superior vere: Paris Golden Self-Blanching-Eberle; Paris Golden Self-Blanching, Midgeley; Paris Golden Self-Blanch-ing, Jerome B. Rice; Paris Golden Self-Blanching (new type), Vilmorin; East Blanching, Eberle. The last two strains mentioned seemed superior strains of the newer type. The first mentioned was good for summer cropping, the last as an easy blanching main crop celery.

Cabbage .- The new variety of cab-

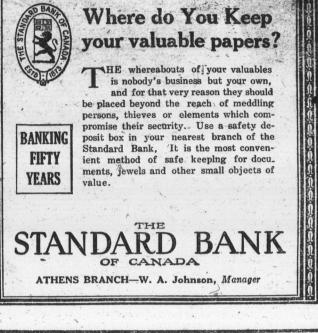

bage, namely Golden Acre, was test-ed against such standard varieties as Copenhagen, Early Express and Early Jersey Wakefield. It was found that the variety is a round head cabbage and cuts at approximately the same season as Jersey Wakefield. The plants mature very uniformly. How-ever, a considerable variation in the strains from different seed firms was shown and the variety seems to have a tendency to split quickly after producing a marketable head. A variety named Eberle's Wonderful did very well under our conditions

Corn .- Varieties of corn were tested as to season of ripening. Of the important varieties produced White Cory was nine days earlier than Golden Bantam, and Golden Bantam produced marketable cars seventeen days before either Stowell's Ever-green or Bantam Evergreen.

Head Lettuce.—In the head lettuce tests three varieties of the cabbage head type seemed well adapted for the district—namely, Iceberg, Non-pareil and New Yorker or Wonderful. The last mentioned proved to be a later strain of this type of lettuce. In the other head types the Way-ahead showed up well.

Onions Onions were tested on buck soil. Of the varieties tested out port Yellow Globe and Yellow Globe Danvers seem best adapted when early maturity and total yield Glob is considered, to the locality. A strain of Spanish onions, Riverside Sweet Spanish, did well for onions of this Under test at the Department type. Under test at the Department of Horticulture at the Ontario Agricultural College, a variety of set onions, Ebenezer, proved most successful in the production of good, early, mature onions.

Tomatoes .--- Some forty-five strains or varieties of tomatoes were tested out for adaptability for the district. Of the standard varieties good strains of Earliana seem best adapted to the district. However, one newer variety gives some promise and should be tested out extensively. The variety Wayahead produced early fruit of good color and smoothness. For main crop for canning purposes John Baer and Bonney Best showed up well although two varieties, name-ly Reeves' Seedling and New Red Head, gave excellent promise in this

(Contributed by Ontario Department of Agriculture, Toronto.) There is too much waste in many dairy stables through owners not giving the cow a chance to do her Tied up all winter long, any feed that she gets must be brought to her: it is the raw material with

which she works. The cow can not create milk out of nothing, so if the feed supplied is not sufficient for production then she will be as an idle machine in the factory, no production. Cows that are underfed never made any money for their owners,

and might better not exist. The successful dairyman treats his cow in a way that will insure health comfort and production. Some fail because they stop after providing just enough to give health and comfort.

Cared For Accordingly.

They should go all the way and pro-vide for production. The overhead is the same. Work the cow machine to capacity that she may give you a production that will pay for feed, labor and also give a good profit. A cow that yields 8,000 pounds of

milk in a year produces within that. period more food products than contained in the entire body of a fat bullock weighing 1,200 pounds. While the cow is producing the 8,000 pounds of milk she maintains her own body and she also supplies the substances for the growth of her unborn calf. Quite a heavy task and all the energy used in the life processes comes from the feeds that are supplied to her, she cannot create anything, her function is to convert vegetable feeds to flesh and milk. When food is not supplied in sufficient quantity the cow is helpless. And so we see so many poor emaciated, starved cows during the winter. All of which would be willing workers if their owners could see the point, and supply feed in abundance that the ani-mals could do the work of producing milk, butter fat and young. The successful dairy farmer

1. Uses cows of dairy type, temperament and breeding.

2. Treats his cows gently, keeps them contented, in comfortable quarters and follows a regular daily round of feeding, cleaning and milking: 3. Weighs and records the produc-tion of each individual, discards

those that fail after having a fair chance. 4. Feeds a clean, wholesome, well-

balanced ration during the winter and good grass and clover with grain as needed during the summer. 5. Gives the cow a six weeks' vaca-tion period with liberal feed allow-

ances between lactations. 6. Provides comfort at time of

calving, is prepared for milk fever, and mammitis. Feeds sparingly for and mammitis. Feeds sparingly for first few days and gradually brings up to full feed in two weeks' time. 7. Provides light, ventilation, clean

water and salt during period of stabling. 8. Protects his cows from the cold

winds of winter, the excess heat and flies of summer. Provides a shelter of trees or sheds near at hand. Uses the clovers, red, sweet and

9. Uses the clovers, red, sweet and alfalfa with corn silage to form the bulk of the ration. 10. Watches both ends of the ma-

chine, knows what goes in and what comes out. Values both and strikes a trial balance frequently. Asks the question, "Who is at fault? Why the loss?" or "Why the profit?" and has horse-sense to admit his fault, if he

What Dairymen Are Looking For.

Dairy farmers producing milk for the city trade depend largely on the half and half type of farmer-breeder for their supply of cows. These spe-cialists in milk production are the wideawake business type of men. They know feeds, cows and markets. When they go out to buy more cows up and down the country side roads, this is what they look for:--Cows with dairy temperament, feed capac-ity, well developed milk organs, con-

stitution, vigor, freedom from tuber-culosis, mastitis and abortion. Dairy temperament is indicated by

wedge-shaped conformation, freedom from marked coarseness, alertness, activity and bright eye. Feed capacity is indicated by a long

deep roomy middle, broad muzzle, strong jaw, and well-developed sali-

regard. A striking fact was brought out in these tests. Varieties showed much variation when procured from different sources. Most particularly in Bonny Best some strains showed

Breeding material was transferred from the College to the Experimental* Station and tests of the strains were made. Second generation crosses of cucumbers were grown both of pick-ling and slicing types and promising

form early strains will be found. The most extensive work was done, however, in tomatoes of the John Baer-Earliana cross, "Canadian." Some seven hundred plants of this variety were grown and individual records of each plant kept. Some thirty-five plant selections were made from the plants of best type. A care-ful consideration of earliness, yield, color and smoothness was made. These progeny lots will be tested in 1925. As an early variety the "Cana-dian" did exceedingly well. The ear-liest plants produced fruit as early as Earliana and the quality and yield were much superior. It is expected that in the new test lots more uni-

for mearly strains will be found. An experiment was conducted to determine the relative value of manure and commercial fertilizer in cucumber and melon growing and whether or not as good results could be obtained from the use of manure along the row or in the hill, as when manure was broadcasted. The results indicate that manure

is essential in the production of good crops, but that as good results may be obtained when manure is placed along the row or in the hill as where it is broadcasted with a very great saving of manure.

A Remarkable Receiving Set at a rea coable cost, that assures you clarity of tone, volume and distance.

Three vernier dials for selectivity and logging stations.

Handsome mahogany finished cabinet. 29 inches long and 12 inches high.

"A" and "B" Batteries.

2 sets of head phones.

Multiple plug with which four sets of phones may be used.

New Model N. E. Peanut Tubes, Antenna Wire, Ground and Lead-in Wire, Lightning Arrester and Insulators.

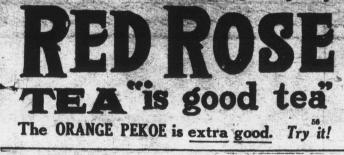

The consistent performance of this set is due to its careful construction, Bakelite panel, low loss condensers, tuned radio frequency coils, matched transformers and tested parts.

HEALTH EDUCATION BY DR. J. J. MIDDLETON Provincial Board of Health, Ontario. Dr. Middleton will be glad to answer questions on Public Health matters through this column. Address him at Spadina House, Spadina Crescent, Toronto.

Bed-wetting is not a disease; it is the first night until midnight, and

Bed-wetting is not a disease; it is simply the persistence of an infantile condition or habit. Most children at-tain control of the bladder by the end of the third year, but if they do not, the condition has become a habit. In order to effect a cure, the child must be taught to empty his bladder at the end of a week. When, In order to effect a cure, the child must be taught to empty his bladder at the end of a week. When, at regular intervals, and always be-fore the time the wetting usually oc-curs. The periods between the pass-ing of urine are gradually lengthened by patient and systematic training. The mechanism of urination soon acts under the child's control, and the "dry" habit is established. Directions for forming the "dry" habit are as follows:--

3. The diet should be bland; no tea, coffee or highly seasoned foods, nor should the child be allowed candy or

desserts between meals. 4. The child should empty its blad-

Strength of Woods.

Within the past year new knowledge regarding the effect of rate of growth on the strength of Canadian woods has been reached at the Forest Products Laboratories of Canada (Dominion Forestry Branch), Montreal. The fact that rate of growth exer cises an important influence on the mechanical properties of timber had been brought to light by previous research. It was known that in softwoods, such as pine and Spruce, slowly grown material tended to be stronger than that of very rapid growth and that in the so-called ring-porous hardwoods such as Ash and Oak, the re-

more rapid growth. Analysis of the results of many thousands of strength tests made at the Laboratories, has now enabled the No Money Made With Poor investigators to go a step further and to determine definitely the rates of growth at which maximum strength is developed in a number of the important commercial woods of Canada. This information finds practical application in a large number of uses of wood in which the strength of the material is a primary consideration.

The Shell. See what a lovely shell, Small and pure as a pearl, Lying close to my foot, Frail, but a work divine, Made so fairily well With delicate spire and whorl, How exquisitely minute, A miracle of design!

What is it? a learned man Could give it a clumsy name; Let him name it who can. The beauty would be the same.

The tiny cell is forlorn. Void of the little living will That made it stir on the shore Did he stand at the diamond door Of his house in a rainbow frill? Did he push, when he was uncurl'd, A golden foot or a fairy horn Thro' his dim water-world?

Slight, to be crush'd with a tap Of my finger nail on the sand, Small, but a work divine, Frail, but of force to withstand, Year upon year, the shock Of cataract seas that snap The three decker's oaken spine Athwart the ledges of rcck Here on the Breton strand! -Tennysor

HELP FOR TIRED NERVOUS PEOPLE

Found in the Use of Dr. Williams' Pink Pills

If you have any of these symptom you need the help of such a reliable tonic as Dr. Williams' Pink Pills Read what Mr. W. W. Francis, of Calgary, Alta., says of this tonic. "After

returning from overseas." writes Mr. Francis, "my whole system was in a badly run down condition. I became nervous, irritable, pale and lost weight. Of course I was given treatment and recommended many tonics some of which I took, but with no apparent result. At last I could not even sleep. My sister, who is in England, wrote and urged me to give Dr. Williams' Pink Pills a trial, and I can scarcely say how glad I am that I took her advice. My friends were surprised at my complete recovery, but I assured them it was due entirely to Dr. Williams' Pink Pills and I now always keep a box on hand in case of emer-

fair trial and they will not disappoint you. Sold by all dealers in medicine or sent by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Stock.

Breeders of live stock are facing problems to-day that require expert business-like handling.

The high cost of feed, labor and heavy overhead expenses are matters the average farmer find confronting him every day.

Successful farmers have always realized the value of good breedings in live stock. Testimonies from these men are easily obtained and should convince the most skeptical that the only way to beat the labor situation, cost of feed, etc., is to keep only those

JAN REIKKO FROM FINLAND

Jan Reikko, from Finland, is six feet tall, weighs about two-hundred and fifty pounds (rough estimate) and, it will be admitted, was a very picturesque figure as he stepped from the "Montlaurier" special train at Montreal. Winter will have no terrors for him. With a number of his fellow-country-men he was bound for the woods. Jan was not as wild as his bear-skin cap made him appear. A good natured fellow, of great strength and intelligence, he will no doubt prove one of the most valuable of immigrants to Canada during 1925.

Classified Advert

"The most picturesque village in England" is what Mary Ellen Chase calls Clovelly in an interesting description in the Wellspring. She says that Clovelly is situated on the North Devonshire coast, on a bay of the sea, and sheltered from the Atlantic winds and storms by great brown cliffs on either side. It is Hterally built upon the face of a rocky hill, and its one narrow street, the High Street, is well named, for it is made in the form of cobbled-stone steps, which mount from the sea to the summit of the hill. So narrow and precipitious is this street that no vehicles of any kind can be used in Clovelfy. Only patient, sure-footed donkeys go up and down, carrying panniers of fish or vegetables, and sometimes children or grown-ups, too, who take this easier way of mounting from sea to hill. These donkeys are part of the charm of Clovelly. Long-eared, shagsy, and patient, they climb up and down, down and up, for hours, driven by sturdy, brown-legged lads who are as sure-footed as they from long experience in climbing over stones. Then, their work over for a few moments, they sleep in the sunshine, dreamily flicking away the flies with their long ears and short, stubby tails.

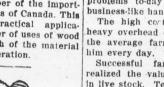

"My trouble began with red spots breaking out on my shoulders, neck and face. They itsed and burned causing me to scratch and irritate the affected parts. The erup-tions scaled over and my clothing aggravated them. My face was dis-figured, and the trouble kept getting
