General Evans, as will be seen by the late news from Spain, is dead. This event will likely break up the British legion.

PAPINEAU and a bit of his tail, are, it is stated, to leave for Quebec in the beginning of next week, to attend their parliamentary duties.

The report that the Hon. Mr. DEBARTHEZ will be raised to the Speakership of the Legislative Council, gains ground, says the *Mirror*.

We are glad to see **Dr. BARRETT's** Lectures attended by a large and evidently gratified audience. After his introductory lecture, the requisite number of pupils was immediately obtained, and every night since has seen an increase.

Phrenology in **Dr. BARRETT's** hands, is a totally different thing from what it was in **Dr. PARNELL's**, who lectured here on the subject some time ago.

"Alexander's Every Body's Album," the third number of which, for 1886, is before us, to be properly appreciated, requires to be seen, for its pages are studded all over with comical engravings from **MEADOWS, CAUENHEIM, and others** of the same school.

It is stated that **ANDROSS**, the ornithologist, whose arrival at New York we noticed the other day, has brought with him a great number of Sky-larks, Robins, and other English songsters, unknown in America. He is to proceed to the Southern States, for the purpose of procuring some specimens to complete the fourth and last volume of his great work.

The treasury of **Rio Janeiro** was robbed in July last of about two millions of dollars.

The following deserves the attention of parents—

The *Trenton Independent Gazette* describes a case of insanity in that town, in the person of a lad of fourteen years of age, occasioned by a habit of occasionally standing on his head, as he has been termed—thus inducing an undue fulness of the blood vessels in that region, and producing such a pressure on the brain as to interrupt its proper functions."

By the steamer **Canada**, which arrived yesterday afternoon, we received the *Quebec Mercury* of the preceding evening, from which we give the ship news, &c. The *Canada* had 15 cabin, and 140 steerage passengers on board, and two schooners and Mr. GEORGE'S diagonal barge in tow. She brought the surveying schooner *Guilard*, Commander **BARFIELD**, as well as a Chaplain.

To Philadelphia.

Sir,—Having submitted to the judgment of the public, my views of the nature, extent, and tendency, of the pretensions of the Anglican Church in these colonies, I shall conclude my inquiry with such documentary evidence, consisting from her own authority, as may come to my hands.

The first document, on which I propose to make a few comments, is the circular letter of the present Bishop of Quebec, dated 6th December, 1827. As this document must, no doubt, be accessible to "Parliament," it is, in the first place, to be produced in full. Though this circular is eminently distinguished by the "sacred in mode," it lacks nothing of the "fortiter in re." It is notably inconsistent, and enjoins upon the clergy of the diocese, a united and unshaken adherence to the claim of paramount and exclusive privilege.

It is clearly intimated in this manifesto, that the good Bishop (whom I most sincerely believe him to be) was of opinion that his church was entitled "to be supported in the decided character of an establishment"—that he held it unjustifiable "to make any voluntary surrender of his authority, or to consent to any division of the prerogative of the episcopate, or to any other measure, which would be in any degree derogatory to the claims of the church, as the established religion of the country." He avowed his persuasion, that the Church of England "has been declared and constituted and provided for, as the religion of the State."

That this claim is most absolutely exclusive, will appear from the Bishop's reasoning in support of it, in which he asserts, that every Christian State must have "some form of established or privileged religion, which the Government must recognize and identify with itself."

He goes on to demonstrate, that according to his view of the just construction of the Act of union, the Church of Scotland, as an establishment, is circumscribed "within the bounds of that kingdom," and that in every other part of the empire, her ministers and members are on the footing of Dissenters. He concludes that the powers and privileges of an Establishment Church belong only to the Protestant Church of England.

He reasons that—"the Act of 31st Geo. III. cap. 31, makes provision for a Protestant Clergy, as distinguished from the Clergy of the Church of Rome, and proceeds to point out the Clergy of the Church of England—"That as part of the same plan adopted in the Act, a certain number of Bishops were created, and a Bishop sent out, in 1793, whose Diocese was constituted a portion of the Metropolitan Province of Canterbury, with which its Bishop is connected 'in the same manner' as our Bishop within that Province in England."

That in connection with this claim to a right of episcopacy, the Bishop of the Church of England, according to the Act of union, was constituted a portion of the Metropolitan Province of Canterbury, with which its Bishop is connected 'in the same manner' as our Bishop within that Province in England. That in connection with this claim to a right of episcopacy, the Bishop of the Church of England, according to the Act of union, was constituted a portion of the Metropolitan Province of Canterbury, with which its Bishop is connected 'in the same manner' as our Bishop within that Province in England.

It is evident in connection with all this, it would appear to be quite surprising, or, at least, to be regarded otherwise than as the natural and necessary consequence of the order of things established in the Country, that the University in Upper Canada, while it attends the uncontroverted and unconditional benefits of Education, should be allowed to be governed, and conducted by members of the Church of England.—"That the Roman, according to the fairest computation which can be made of what they are likely to yield, will be far from constituting an immoderate portion of such a body of Clergy of the Church of England, as the wants of the people of the said colony seem to require."

Any one who will read this explicit and pretty strong statement of the claim of the branch of the Anglican Church in Canada, to the exclusive rights and privileges of an Establishment Church—"according to the establishment of the Church of England," that it is not desired to place her upon an equal or even similar footing.

I beg that you may be particularly remarking, that the Bishop regards it, as "the natural and obvious consequence of the order of things established in the country," according to his view of that order, as above exposed, "that the University in Upper Canada should be governed and conducted by members of the Church of England." He appeals to the constitution of the Scotch Universities, as sanctioning this claim:—"In the Scotch Universities, by the Act of Union, all Professors, &c. must subscribe to the national oaths of faith, and conform to the established religion of the country."

Does the Bishop contend, that as the Anglo-Canadian Church is in the Diocese of Canterbury, she has the guarantee of His Majesty's coronation oath, for the security and perpetuation, in all time coming, of her privileges?

So long as she refuses to relax her exclusive grasp on the reserved lands—so long as she continues to bear the title of the Established Church—so long as we have her unrequited proof of her adherence to the claims of paramount and exclusive privilege, as afforded by the recent enactment of rotaries in Upper Canada, and the exclusive appropriation of lands, voted by Parliament, or granted by the Provincial Government, for her support, will she suffer with the utmost assurance, whatever professions of protestation may be really made by advocates, more zealous than discreet, to the contrary, that there is no relinquishment, no real or material abatement in the amount of her pretensions.

I am well persuaded, to adopt the language of the Bishop in this circular, that they have made, and that they will make no voluntary surrender, nor, so far as in them lies, allow of any division of means, or sanction any abatement in the amount of privileges claimed by them. Involuntary or extorted concessions are not entitled to any praise, deserve no gratitude, and it is evidence of liberality on their part, that they should consent to concessions that they have not voluntarily made.

The Bishop states, in his circular, that "there are no civil or political distinctions in Canada, founded upon those which distinguish the Church of England from the Church of Rome." The treaty with France secured, at the time of the conquest, more toleration—a legal establishment to the Catholic Church. And it would have been somewhat anomalous, to say the least, to have imposed upon Protestant Dissenters any disabilities, civil or political, which were not extended to the members of the Church of England.

The second document, on which I propose to make a few comments, is the circular letter of the present Bishop of Quebec, dated 6th December, 1827. As this document must, no doubt, be accessible to "Parliament," it is, in the first place, to be produced in full. Though this circular is eminently distinguished by the "sacred in mode," it lacks nothing of the "fortiter in re." It is notably inconsistent, and enjoins upon the clergy of the diocese, a united and unshaken adherence to the claim of paramount and exclusive privilege.

It is clearly intimated in this manifesto, that the good Bishop (whom I most sincerely believe him to be) was of opinion that his church was entitled "to be supported in the decided character of an establishment"—that he held it unjustifiable "to make any voluntary surrender of his authority, or to consent to any division of the prerogative of the episcopate, or to any other measure, which would be in any degree derogatory to the claims of the church, as the established religion of the country." He avowed his persuasion, that the Church of England "has been declared and constituted and provided for, as the religion of the State."

That this claim is most absolutely exclusive, will appear from the Bishop's reasoning in support of it, in which he asserts, that every Christian State must have "some form of established or privileged religion, which the Government must recognize and identify with itself."

He goes on to demonstrate, that according to his view of the just construction of the Act of union, the Church of Scotland, as an establishment, is circumscribed "within the bounds of that kingdom," and that in every other part of the empire, her ministers and members are on the footing of Dissenters. He concludes that the powers and privileges of an Establishment Church belong only to the Protestant Church of England.

He reasons that—"the Act of 31st Geo. III. cap. 31, makes provision for a Protestant Clergy, as distinguished from the Clergy of the Church of Rome, and proceeds to point out the Clergy of the Church of England—"That as part of the same plan adopted in the Act, a certain number of Bishops were created, and a Bishop sent out, in 1793, whose Diocese was constituted a portion of the Metropolitan Province of Canterbury, with which its Bishop is connected 'in the same manner' as our Bishop within that Province in England."

That in connection with this claim to a right of episcopacy, the Bishop of the Church of England, according to the Act of union, was constituted a portion of the Metropolitan Province of Canterbury, with which its Bishop is connected 'in the same manner' as our Bishop within that Province in England. That in connection with this claim to a right of episcopacy, the Bishop of the Church of England, according to the Act of union, was constituted a portion of the Metropolitan Province of Canterbury, with which its Bishop is connected 'in the same manner' as our Bishop within that Province in England.

whole population—quoting, in support of this opinion, the authority of **Dr. PALLET**. Here, at once, we find an essential difference, or rather contrast, in the views of the two parties. Here we find the exclusive claim renounced and discredited. At the period of its publication, let it be remembered, all the leading denominations of Christianity in the Colony, had advanced claims to a participation in the Reserved Lands: and it will be seen that the Scotch Clergy actually pleaded in favor of the equal rights of all sects, and accused in the most explicit and emphatic terms, the narrow and sectarian views avowed on the part of the Anglican Church, in the Bishop's extracts. These extracts will demonstrate to "PHILANTHROPS" and the public, that if the liberality of "ANGLOS" be latitudinarianism, it is fully sanctioned by the spirit of the Protestant religion in 1825, and the example and authority of its signers; and in every objection of the Prospect, are only a legitimate and strictly logical deduction from those of its prototype signers, and sanctioned by ministers of his brethren—the whole number of Scotch ministers at that date settled in the Colony.

At an auction sale of Groceries yesterday were sold—40 chests Company's Trunk Tea, at 2s. 6d., and 49 chests Free Trade do, at 2s. 6d., 2s. 6d., 3s. 1s. 2s. 2d., Muscovado Sugar brown to fine yellow, at 5s., 5s. 3d., and 6 lbs. very dark, at 5s. 5d. per cwt.

From Monday's evening edition of the *New York Journal of Commerce*, we learn that on that day Flour had further advanced, common brands of Western selling freely at \$9.25 to \$9.37, and some holders demanding \$9.50.

MONTREAL MARKETS, Sept. 16, 1886.—Since our last, business generally has become more active and some important public sales are advertised for next week. In the price of Flour there has been an advance of fully 5¢ per bushel, and about 9000 bbls. having changed hands at 40s. Wheat continues in request for the United States; but we have not heard of any important transactions: there is little U. S. Canada in the market. The Lower Canada country merchants have no contract for the new crop, and appear indisposed even to name a price. The advices from England noticing an improvement in the price of Ashes, appear to have given a fresh impulse to the market, and sales have been made to some extent at 37s. 6d., and for large shipping orders 38s. is demanded; Peas are not brisk, and prices a shade lower than have been accepted—sales at 38s. 6d. Provision are every day becoming drier—*Meat Park*, of which there is but little here, is selling by the few barrels at \$30, and the other qualities in proportion. *West India* Produce is without change; at a public sale of Sugars on Thursday, full prices were obtained. At auction, *Teasels* Tea (30 chests) has brought 2s. 6d., 2s. 6d., and about 180 chests were afterwards closed by private sale at 2s. 6d. In Exchange no alteration.

The advices received yesterday from New York are up to Tuesday evening. In the Flour market, there was no change; good brands of Western were held at \$9.50, Ashes 56¢, and \$7.75. Money was more plentiful, although by some stocks were lower, caused partly, it was said, by the failure of a house in Philadelphia, who were large buyers.

GEORGETOWN (N.C.) MARKET, SEPT. 12.
Flour—As far as we have been able to ascertain, there have been no arrivals by boats, since our last report; we are obliged, therefore, still to quote the prices nominally at \$8; that is, for fresh ground out of the West; new wheat Flour would still bring \$9.75. The transactions from stores are very limited, as purchasers seem unwilling to buy at the present high prices.

ALEXANDRIA MARKET, SEPT. 10.
Flour—Yesterday the current price of Flour, from wagons, was \$8.65 to \$8.70. **GAIN.**—We make no alteration in our quotations for the current price of Flour; that is, for fresh ground out of the West; new wheat Flour would still bring \$9.75. The transactions from stores are very limited, as purchasers seem unwilling to buy at the present high prices.

Upper Canada.
We were much pleased lately by witnessing a specimen of coarse earthenware, manufactured by our enterprising townsmen Mr. HERRING, who has been exhibiting the best articles in his description we ever saw either in Canada or elsewhere; and we are convinced that the proprietors only want proper encouragement, to enable them to make their wares more extensive, and to sell them in the commerce of the Canada.—*Press. Oct. Herald.*

The steamer *Dolphin* that plies between this village and the head of the St. Lawrence, met with a slight accident on Monday evening, some part of her machinery having given way. The *Brookville* takes her place until she is again able to resume her regular trips, which will probably be in the course of three or four days.—*Id.*

Small Pox.—There have been three or four cases of this disease in this city within the last few days. The attention of the Board of Health, having been called to the subject by a letter from Dr. Widener, a meeting of that Board was held yesterday at the Mayor's Office. Present, the Mayor, Aldermen, Dr. Widener, and Dr. Sayer, and several members of the Board of Health, and a number of gentlemen of the press, who were requested, Drs. Widener, King, Gaynes and Talfer were present. After taking separate readings of these resolutions, the Board of Health ordered—"That public notification should be made by the Mayor, of the existence of some cases of Small Pox in the City, advising heads of families generally, to avail themselves of the advantages of vaccination; and announcing that the poor might be vaccinated gratis at the General Hospital, any morning between the hours of 9 and 12, on the premises of the Board of Health ordered—That public notification should be made by the Mayor, of the existence of some cases of Small Pox in the City, advising heads of families generally, to avail themselves of the advantages of vaccination; and announcing that the poor might be vaccinated gratis at the General Hospital, any morning between the hours of 9 and 12, on the premises of the Board of Health ordered—That public notification should be made by the Mayor, of the existence of some cases of Small Pox in the City, advising heads of families generally, to avail themselves of the advantages of vaccination; and announcing that the poor might be vaccinated gratis at the General Hospital, any morning between the hours of 9 and 12, on the premises of the Board of Health ordered—That public notification should be made by the Mayor, of the existence of some cases of Small Pox in the City, advising heads of families generally, to avail themselves of the advantages of vaccination; and announcing that the poor might be vaccinated gratis at the General Hospital, any morning between the hours of 9 and 12, on the premises of the Board of Health ordered—That public notification should be made by the Mayor, of the existence of some cases of Small Pox in the City, advising heads of families generally, to avail themselves of the advantages of vaccination; and announcing that the poor might be vaccinated gratis at the General Hospital, any morning between the hours of 9 and 12, on the premises of the Board of Health ordered—That public notification should be made by the Mayor, of the existence of some cases of Small Pox in the City, advising heads of families generally, to avail themselves of the advantages of vaccination; and announcing that the poor might be vaccinated gratis at the General Hospital, any morning between the hours of 9 and 12, on the premises of the Board of Health ordered—That public notification should be made by the Mayor, of the existence of some cases of Small Pox in the City, advising heads of families generally, to avail themselves of the advantages of vaccination; and announcing that the poor might be vaccinated gratis at the General Hospital, any morning between the hours of 9 and 12, on the premises of the Board of Health ordered—That public notification should be made by the Mayor, of the existence of some cases of Small Pox in the City, advising heads of families generally, to avail themselves of the advantages of vaccination; and announcing that the poor might be vaccinated gratis at the General Hospital, any morning between the hours of 9 and 12, on the premises of the Board of Health ordered—That public notification should be made by the Mayor, of the existence of some cases of Small Pox in the City, advising heads of families generally, to avail themselves of the advantages of vaccination; and announcing that the poor might be vaccinated gratis at the General Hospital, any morning between the hours of 9 and 12, on the premises of the Board of Health ordered—That public notification should be made by the Mayor, of the existence of some cases of Small Pox in the City, advising heads of families generally, to avail themselves of the advantages of vaccination; and announcing that the poor might be vaccinated gratis at the General Hospital, any morning between the hours of 9 and 12, on the premises of the Board of Health ordered—That public notification should be made by the Mayor, of the existence of some cases of Small Pox in the City, advising heads of families generally, to avail themselves of the advantages of vaccination; and announcing that the poor might be vaccinated gratis at the General Hospital, any morning between the hours of 9 and 12, on the premises of the Board of Health ordered—That public notification should be made by the Mayor, of the existence of some cases of Small Pox in the City, advising heads of families generally, to avail themselves of the advantages of vaccination; and announcing that the poor might be vaccinated gratis at the General Hospital, any morning between the hours of 9 and 12, on the premises of the Board of Health ordered—That public notification should be made by the Mayor, of the existence of some cases of Small Pox in the City, advising heads of families generally, to avail themselves of the advantages of vaccination; and announcing that the poor might be vaccinated gratis at the General Hospital, any morning between the hours of 9 and 12, on the premises of the Board of Health ordered—That public notification should be made by the Mayor, of the existence of some cases of Small Pox in the City, advising heads of families generally, to avail themselves of the advantages of vaccination;
