is a misfortune; for people are deluded with the idea that those things only can be good or useful which dost money. But remem-ber that pure water, fresh air and susifi homes, kept free from damp-ness, will secure you from many héavy bills of the doctors and give you health and vigor which no money can pro-cure. It is a well established fact that the people who live much in the sun are usually stronger and more healthy than those whose occupations deprive them of sun-light. And certainly there is nothing strange in the result, since the same law applies with equal force to nearly every animate thing in nature. It is quite easy to arrange an isolated dwelling so that every room may be flooded with sunlight sometime in the day, and it is possible that many town houses could be so built as to admit more light than they now receive.

Catarrh-A New Treatment.

Catarh-A New Treatment. Perhaps the mostextraordinary success that has been achieved in modern science has been attained by the Dixon reatment for catarh. Out of 2000 patients treated during the past six months, fully ninety per cent, have been cured of the studbors malady. This is none the less stabiling when it is remembered that, not five persent of the patients presenting themselves to the regular practitioner are benefitted, while the patient presenting a cure at all. Starting with the claim now generally believed by the most scientific men that the disease is due to the presence of living para-sites in the fissues. Mr. Dixon at once adapted his cure to them exited in a cure at shed, the catarrh is practical y cured shed, the catarrh is practical y cured

plished, the catarrh is practical y cured, and the permanency is unquestioned, as tures effected by him four years ago are cures still. No one else has ever attempted to cure ca-tarrh inthis manner, and no other treatment has ever cured ratarrh. The application of the remedy is simple andcar be done at home, and the present season of the year is the most favorable for a speedy and permanent cure, the m. jority of cases being cured at one treat-ment. Sufferers should correspond with Messers, A. H Dixen & Son, 306 King struct west, Toronto, Canada, and enclose stamp for their treatise on catarrh. - Montreal Star. 36

EXPERIENCE. " Calvert, Texas

May 3, 1882. "I wish to express my appreciation of the valuable qualities of

Ayer's Cherry Pectoral

as a cough remedy. "While with Churchill's army, just before the battle of Vicksburg, I contracted a se-were cold, which terminated in a dangerous cough. I found no relief till on our march we came to a country store, where, on asking for some remedy, I was urged to try AYEB'S

CHERRY PECTORAL. "I did so, and was rapidly cured. Since then I have kept the PECTORAL constantly by me, for family use, and I have found it to be an invaluable remedy for throat and lung diseases. J. W. WHITLEY."

Thousands of testimonials certify to the prompt cure of all bronchial and lung affections, by the use of AVER'S CHERRY PECTORAL. Being very palatable, the youngest children take it readily.

Righ License.

Philadelphia Record: Brewers in Kansas and Iowa moving to test the constitution and Iowa moving to test the constitution-ality of the prohibitory laws in those states. Already there is practical nullifi-cation of the laws in every large city or town, and the lawyers have thus far been the only gainers. In Illinois, where a high license law is in force, the liquor traffic is becoming reduced in quantity, while yielding a larger revenue in the state than ever before. Between the prac-tically free saloon system of Pennsylvania and the senseless fanaticism of Iowa and Kansas the high license system of Illinois stands as an exemplar of a sound public policy on the liquor question.

On Free Tickets. From the Detriot Free Press. It must be admitted that newspaper men

get many free tickets. Yet there seems to be existent some people who deem it a great favor to give a twenty five cent

ticket for a \$5 notice. A couple of ladies came up to the Free Press office within the past year and wrote out a very flatter-ing notice of some amateur affair that was to take place under the auspices of the something-or-other society. It is usual to something or other society. It is usual to leave a couple of complimentaries on such occasions, but the lady put down one, which the other lady evidently thought was a pretty generous deal. "You will send a reporter, I suppose," said the first lady. Before the overwhelmed-with-gratitude editor could reply the other lady ourtly said: 'Oh, if you've left a ticket you may be sure a reporter will come." you may be sure a reporter will come." Perhaps those ladies will be surprised to know that there was no terrific struggle

among the boys for the possession of that ticket.

Do You Mind this Now?
