

Engineer Chipman Advises Separate High-Pressure System For London

TORONTO EXPERT REPORTS ON CITY'S WATER SUPPLY; THERE IS AMPLE SPRING WATER FOR YEARS TO COME

Present Supply Will Suffice for 57,000 Persons if River Water Is Used for Fire Protection, Etc., and Meters Are Installed.

SEPARATE SYSTEM IS BEST FOR FIRE FIGHTING

Would Give a Pressure of 250 Pounds and Would Cost \$300,000

—By Taking in Kilworth, Cronyn and White Springs,

Supply Would Suffice for 75,000 People—Great Wastage Under Present Conditions.

To the Editor of The Advertiser:

Herewith I beg to inclose a copy of a letter sent by me to Willis Chipman, C. E., Toronto, and also a copy of his report, both of which will explain themselves. Yours truly,

J. W. LITTLE, Willis Chipman, Esq., C. E., Toronto, Ont.

Dear Sir:—Referring to our conversation last night over the telephone, I now beg to formally ask you to prepare a report on the London water supply. You are familiar with conditions here, and are aware of the many attempts that have been made to solve the question of the best method of increasing the supply.

As I have already informed you, at a meeting of the board of trade held about one week ago, I suggested a separate high pressure system for fire and other purposes, using river water only, and thus reserving the spring water for domestic purposes as far as possible. I am sending you copies of the newspaper containing a report of the board of trade meeting, and also clippings showing the criticisms that have appeared since.

Will you kindly include in your report an estimate of the cost of the high pressure system, as I have outlined it, giving separate figures for north and south branch plants, basing your estimates on the use of Niagara power (under Mr. Beck's scheme), and also on such power as is available at present. Please give your opinion as to the best location for the pumping station, also as to the effect of the use of meters, and whether raw river water should be used on the streets, and if sedimentation or filtration is necessary. I need not add that I want you to criticize the suggested plan very freely, point out any defects you may find in it, and suggest any changes you may think desirable.

If, in your opinion, there is any better way of increasing our water supply, please let us have the details, as my desire is not to carry any particular scheme, but to find out if possible what is the best thing to be done under the circumstances.

Kindly send me your bill on completion of your report at 1111, Kent at once. Yours truly, J. W. LITTLE, London, April 27, 1907.

Mr. Chipman's Reply.

Toronto, May 17, 1907. J. W. Little, Esq., London, Ont.: Dear Sir:—Your letter of April 27 requesting me to submit a report on the London water supply problem, with the accompanying newspaper containing articles respecting the same, were duly received. I now beg to submit my opinions and estimates for your consideration.

Report of 1903. In my former report I suggested schemes for increasing the supply were discussed, three of which I recommended, the consideration of the board, viz.: 1. Increasing the supply one-fourth by metering 70 per cent of the services.

2. Construct an independent system for fire service, hoists, railway uses, street sprinkling, etc.

3. Filter the Thames water and pump same into the existing mains. Additional distribution mains would be necessary in each scheme, and a new conduit from reservoir to the city in the first scheme.

I favored the first scheme, believing that the existing supply would prove sufficient for a population of over 50,000 people. As to first cost and operating expenses there was little difference in the three propositions.

I reported adversely on the surface streams, including Crow Creek, Ox-Bow Creek, etc., as I believed the water in either branch of the Thames above the city superior in quality to any of them.

Surface Streams.

To secure water from the drainage area of these small brooks by a system of underdrainage would prove an expensive undertaking, and the results cannot be determined in advance.

At the time I made my report there was but little data available, and there is little more now, but from a personal inspection on the ground I then concluded that when it became necessary to purify an impure water for domestic uses it would be safer and cheaper to take the water necessary to supplement the Springbank supply, from the Thames above the city.

I further reported that in my opinion about half a million gallons of spring water could be collected between Byron and Kilworth, and less than one

million from all of the springs above Komoka bridge.

To develop a large hydraulic pumping power on the river near Kilworth with an auxiliary steam plant would prove an expensive undertaking.

For the small amount of water required to supplement the Springbank supply, I believe electric power or even gasoline would be much cheaper than the hydraulic steam power. This scheme would also involve another main from the reservoir to the city, and another engine at Springbank. I consider this scheme altogether too large, and the quality of the water such that filtration might be necessary.

Fire Service.

Since 1903 several serious conflagrations have demonstrated the necessity of better fire protection in the congested districts of cities and towns, as well as the importance of fire proof construction. In the Baltimore fire of February, 1904, and in the Toronto fire of April following, the losses were estimated in millions of dollars.

As a result of their losses the present requirements of the fire underwriters are quite different from those of 1903. In the independent fire system, described in my 1903 report, only 100 pounds pressure was to be provided at the hydrants, with a pumping capacity of eight million gallons per day.

The underwriters now demand a pressure of 200 pounds at the hydrants, and pumps of much larger capacity. This represents pipes of greater thickness than formerly calculated upon, and doubling the power of the pumping machinery. Furthermore, my estimate of \$170,000 in 1903 for an independent low-pressure fire system would probably now be increased to \$200,000, owing to the advanced cost of labor and materials.

By my original scheme steam fire engines were to be employed to give any increased pressure desired at any point.

High-Pressure System.

The high-pressure fire system has been evolved from the fireboat system, adopted a few years ago at Philadelphia, Milwaukee, Cleveland, Buffalo, New York, and other places. In 1903 there was not what is known as a high-pressure fire system in Canada or the United States. The first important use of the kind was installed at Philadelphia, the supply being taken from the waterfront. The Baltimore and Toronto fires came at an opportune time for the underwriters to urge upon municipalities with inefficient fire protection the advisability of erecting a high-pressure system, inasmuch as they have two complete systems in operation, and several more in course of construction. In Canada, Toronto and Winnipeg are now installing high-pressure systems that may be completed in 1907.

London Fire Pressure.

A standard fire stream, as defined by the underwriters, requires 200 gallons per minute through a 1 1/8-inch, plain nozzle, with 50 pounds' pressure at the hydrant when running.

In London the pressure at the central fire station decreased from over 80 pounds when the works were completed in 1873 to 60 pounds in 1903, owing to the increased consumption. The pressure is now quite too low for proper fire protection by attaching hose to the hydrants, and the mains in many parts of the city are not of sufficient size to convey the requisite water to supply steam fire engines.

To materially increase the pressure in the existing pipe system, by erecting a pumping station on the conduit line from reservoir, old services, and plumbing, and cannot be thought of.

To improve your fire protection (which is now entirely inadequate), three schemes may be considered: 1. Lay an additional large main from the reservoir to the city, several larger mains in the city, and pump from the mains with steam fire engines as at present, in which case another pump (Continued on page five.)

JAPANESE AGAIN ROUSED

Tokio, May 30. — The Asahi this morning in its leader, emphasizes, in carefully-guarded words, its opinion of the absence of sincerity on the part of the San Francisco municipal officials to protect the treaty rights of Japanese residents, and insists on the necessity of approaching the Washington Government with a demand that decided measures be taken to exterminate the source of persecution against Japanese citizens.

Points Made by Engineer Chipman.

The present spring water supply is 3,800,000 gallons per day in dry weather, and the average daily consumption 90 gallons per consumer.

By metering 50 per cent of the services and installing a separate high-pressure fire-fighting system, which may be drawn upon for street watering, industrial, and other purposes, a saving of 1,100,000 gallons daily will be effected.

The present Springbank supply would then be ample for 57,000 people, and there would be no need of securing additional water for eight or nine years.

When more water is needed, the springs between Byron and Kilworth, which may be made to flow by gravity to the pump-house at Springbank, will supply 8,000 people.

The Cronyn-White springs on the North Branch will supply 10,000 people.

A total population of 75,000 may therefore be supplied by spring water at a reasonable cost, if meters be adopted, and river water used for fire-fighting, street watering, and industrial purposes.

At present 800,000 gallons per day of spring water are wasted through the carelessness of householders and through leaky plumbing fixtures.

A separate high-pressure system for fire protection in the congested district of the city, using river water, would cost \$300,000, and would furnish a pressure of 250 pounds at the pump-house, as required by the fire underwriters.

A larger percentage of the cost of this system should be borne by the owners of property in the section benefited than by the outlying districts.

Fire protection can be best given in the congested business district by an independent high-pressure system.

The cost of meters would be \$15 each, and the annual charge, including interest depreciation, repairs, and reading, would be \$2 per year each. The water saved, if sold at 6 cents per thousand gallons would pay the annual charges for the entire meter system.

SAYING FAREWELL TO IRISH BILL CITY IS RIDDEN OF UNDESIRABLES

The Obsequies Being Performed Today in British Cabinet Meeting.

London, May 29.—The situation resulting from the rejection of Mr. Birrell's Irish council bill by the Dublin convention continues to be the uppermost topic of discussion in political circles in the United Kingdom. As forecasted in these dispatches, the measure is in its death throes, and it is believed in authoritative quarters that as a result of the prolonged cabinet meeting today, Premier Campbell-Bannerman will formally perform the obsequies on it.

Bound up with the fate of Mr. Birrell's bill is the future of Sir Anthony Patrick MacDonnell, under secretary to the lord lieutenant of Ireland, whom the Nationalists consider responsible for the fulfillment of many of the government's Irish promises, and whom they are determined to oust from office by every means in their power. It is an open secret on the other hand, that Sir Anthony is extremely anxious to retire, and it is practically certain that he has tendered his resignation. It is known also that the Government is anxious to retain the services of the under secretary, and it is thought probable that he will yield to ministerial pressure for the present, and only retire when things have quieted down. He will then receive an important appointment in India.

The Irish Reform Association, of which Lord Dunsany is president, is the latest organization to criticize adversely this unhappy bill. At a meeting of the association held today, a resolution was passed declaring that the measure ignores legislative functions altogether, that it did not take into account the question of financial relations or precedent, and that it was generally absolutely inadequate.

SETTLES FOR \$15,000

"Lady Flo" Waives All Claim to Delaval Beresford's Estate.

El Paso, Texas, May 30. — Flora Wolff, commonly called "Lady Flo," a negress who set up a claim against the estate of Lord Delaval Beresford as his common law wife, yesterday accepted \$15,000 devised to her by the will of Lord Beresford, and an additional \$5,000 and waived all claims to the estate. She certified that she was never, either in law or in fact, the wife of Lord Beresford.

BIG BAIL DEMANDED

Stephens Must Furnish \$5,000 or Remain in Jail.

[Special to The Advertiser.] St. Thomas, May 30. — In the case of Murray Stephens, Washburn engineer charged with manslaughter in connection with the collision with a C. P. R. train last August, resulting in two deaths, Police Magistrate Hunt this morning fixed the amount of bail at \$5,000. It is likely Stephens will remain in jail.

UNIQUE SERVICE AT CONFERENCE IN HONOR OF VETERAN CLERGY

Marked Fiftieth Anniversary of Their Ministry—The First Draft of Stations.

[Special to The Advertiser.] Goderich, May 29.—The ministerial session of the London Conference opened this morning at 9 o'clock.

The president of the conference, Rev. David Rogers, presided.

The secretary of the transfer committee reported that Rev. George F. Salton, Ph.D., Rev. James Charlton, and Rev. John Lawrence had been duly transferred into this conference.

The number of ministers now in the conference roll totals 259—about half of whom are present.

The president nominated the following as members of a committee on conference realignments: Dr. Gundy, S. Bond, George Jackson, S. J. Allin, J. H. Locke, E. Medd, A. G. Harris, W. Kettlevell, T. J. Snowden.

Rev. Dr. Langford, of Stratford, who has been in the ministry for 50 years, made application for a superannuated relation, which was granted.

Rev. Dr. Thomas Griffith, of St. Thomas, also requested superannuation for one year.

Rev. H. E. Kellington, B.A., resigned his position as an ordained minister, owing to ill-health.

Admitted to Conference.

The following made application for admission into the conference from other churches: Rev. J. E. Cook, from M. E. Church in the United States; Rev. H. Watson, from the Baptist Church; J. H. Mundy, M.A., from the United Brethren.

Conference recommended the ordinand continued on page eight.

CAR SHORTAGE MAY BOOST COAL PRICES

At Present, However, London Dealers Have a Plentiful Supply.

Coal prices in Montreal and other places are soaring.

Lack of shipping facilities. It is claimed, is curtailing the supplies, though there is an abundance of coal at the mines.

In London the dealers have a plentiful supply, but they claim that if the car shortage keeps up a serious scarcity is quite possible.

In some places consumers are laying in large stores of both hard and soft coal for next season, fearing that the shortage of cars will affect prices then.

BRIGHT OUTLOOK FOR WESTERN CROP

Dr. Saunders Wires That Conditions Not as Bad as Has Been Reported.

[Special to The Advertiser.] Ottawa, May 30.—A telegram received this morning from Dr. Saunders, director of experimental farms, indicates that the crop prospects of the west are not as bad as have been reported. Dr. Saunders, who is now making a tour of the west, and will go as far as the coast, telegraphs as follows: "Indian Head, Sask., May 29, 1907.—Have seen crop from east of Winnipeg to Indian Head, Sask. Season very backward; some farmers still sowing. Very little now going in, mostly oats and barley. Most of the wheat now two to three weeks in ground is well up, germination strong, and even young plants are two to four inches high, with strongly-developed roots. Weather favorable. Growth very rapid, with still fully one hundred days and more of growing season. In Saskatchewan, wheat in Manitoba probably less in area than last year. Saskatchewan, more of oats, and barley largely increased area. (Signed) Wm. Saunders."

MOVING TO TORONTO

Sovereign Bank Head Office To Be Transferred From Montreal.

Montreal, May 29.—The offices of the general manager and chief executive officials of the Sovereign Bank of Canada will in future be stationed in Toronto instead of in Montreal. Since the organization of the bank these offices have always been in Montreal, owing principally to the very large connection Mr. Duncan M. Stewart had in this city. Mr. Jemmett, the new general manager, has favored Toronto, and a suite of offices has already been secured in the Manning Arcade, in King street west, immediately adjoining the building in which the bank's main Toronto office is situated. By having his office in Toronto, Mr. Jemmett will be in close touch all the time with Mr. A. E. Jarvis, the new president, who is taking a very active interest in the affairs of the bank. The offices of the chief inspector and superintendent of branches will also move to the general manager.

HON. MR. SIFTON BACK

Ottawa, May 29.—Hon. Clifford Sifton returned this morning from England, where his name was connected with the proposed fast Atlantic and Pacific service.

HON. MR. EMMERSON ON THE STAND

Strongly Denies the Charges of Immorality, NEVER EJECTED FROM A HOTEL.

Tells of Visiting Old Friends at St. Lawrence Hall—Defense Counsel Cross-Examines.

[Special to The Advertiser.] Fredericton, N. B., May 29. — Hon. Mr. Emmerson was called to the stand in the Gleason libel case this morning and told his version of the St. Lawrence Hall episode. He went to the hotel at 7:30 to look for a friend, a Mr. Peters. This was in June, 1906. In glancing over the register he noticed the name of the wife of a constituent, and a friend of hers. He went to their room, and not having had supper, invited them out to a restaurant with him.

They had supper together at the Oxford, and he afterwards returned to the hotel with them. Their room was in the front of the building, and his in the rear of the building. After bidding them good-bye he returned to his room, smoked for a while, then retired and fell asleep.

Aroused by Ladies.

He did not know how long he had been asleep, when he was aroused by a knock at his door, and, opening it, found the ladies there. He first dressed himself and then admitted them. One was very much agitated, and stated that they had been insulted by a porter and were bound to leave the hotel. He tried to quiet them, but did not have much success. The lady whom he had known since girlhood was not anxious to leave at that hour. He inquired into the trouble, and learned from one of the porters that there was no occasion for the lady to leave. The porter partly apologized for the conduct of another porter.

He finally told the ladies that if they were determined to leave he would accompany them, as he could not allow them to go out alone at that hour. They finally left and went elsewhere.

Witness left next morning for Ottawa, being joined at the Windsor street station by Hon. Mr. Lemieux.

One of the ladies was a woman of irreproachable character, whom he had known since childhood, and he believed both women were of the highest respectability.

He had been attending closing exercises at Acadia College some days before and left Dorchester accompanied by his mother, sister and daughter. At Montreal he was joined by another lady who accompanied them in his private car. At Lewis another lady and her mother joined the party and at Moncton he was joined by another lady. The Lewis ladies and the Moncton lady left at Montreal, while the rest of the party went on to Ottawa. It was the 10th of June he returned to Montreal.

Cross-Examined.

Mr. Hazen, before beginning cross-examination, showed Mr. Emmerson his signature on register, which he recognized. He was assigned room 137.

Under cross-examination Mr. Emmerson stated the Moncton lady mentioned was Mrs. Geo. C. Allen, wife of the general baggage agent of the I.C.N.R. Mrs. Bouthinier, who got on at Lewis, was a friend of Mrs. Allen. He could not say he heard the ladies while on the car say that they were to stop at St. Lawrence Hall upon arrival at Montreal. When he saw the names of Mrs. Allen and Mrs. Bouthinier on the register he went to their room accompanied by a bell boy. It was 10:30 when they returned to the hotel from the restaurant. It was midnight when he left the hotel with the ladies. He denied that the porter came to the ladies' room when he was there and found it in darkness, or that they had been ordered to make less noise or they would be ejected. He gave one of the ladies money to pay his bill because he wished to finish dressing. He did not know that one of the ladies was a friend of his. They went to the Albion after leaving the St. Lawrence Hotel, where they were assigned rooms without registering.

WOODS' FAIR

Catholic Prayer Books, 50c, Special

For this week we are showing an especially fine line of Catholic Prayer Books at 50c each. They are fine value. Call and see them. Another line of Prayer Books, with white coverings and gold lettering; regular price 50c. Special price this week..... 35c

10c Notepaper 7c Quire

We are offering this week a special line of Note Paper, extra special, cream or blue shade, with envelopes, to match, regular 10c a quire. Special price, while it lasts, 24 sheets..... 7c Envelopes (25)..... 7c

Paper Napkins and Doilies

New patterns of Paper Table Napkins just in. Special price to introduce them. A dozen..... 5c Paper Doilies, assorted lace designs. Price, a dozen..... 5c and 10c

Big values in Books—19c each. Cloth-bound books, suitable for library or gifts, and some of the titles are of such books as Pilgrim's Progress, David Copperfield, Three Men in a Boat, Scottish Chiefs, Darkness and Daylight, Lorna Doone. Special price for this week 19c each. Ask to see them. Special line of latest copyright books just received.

J. M. THOMSON.

Advertiser Patterns

DESIGNED BY MARTHA DEAN.

A PRETTY GUIMPE DRESS 4173.

A pretty style for the tub frock has the dress portion laid in side pleats, and belted loosely in long-waisted manner. The waist and skirt are all in one and finished with a bertha, yoke and sleeve caps all in one. The dress is to be worn with a separate guimpe of some sheer tub fabric, and which may be as elaborate or simple as desired. The model has a smart style, which many of the frocks lack, and is recommended as exceedingly attractive upon the small girl. The dress calls for 2 1/2 yards of 36-inch material in the medium size and the guimpe 1 yard of 18-inch material.

4173—Seven sizes, 3 to 9 years.

The price of this pattern is 10 cents.

PATTERN DEPARTMENT OF THE ADVERTISER.

Please send the above-mentioned pattern, as per directions given below, to:

Name.....

Street Address.....

Town.....

Province.....

Measurement: Bust..... Waist.....

Age (if child's or misses' pattern).....

CAUTION.—Be careful to inclose above illustration and send size of pattern wanted. When the pattern is bust measure you need only mark, 32, 34, or whatever it may be. When in waist measure, 22, 24, 26, or whatever it may be. If a skirt, give waist and length measure. When misses' or child's pattern, write only the figure, representing the age. It is not necessary to write "inches" or "years." Patterns cannot reach you in less than one week from the date of order. The price of each pattern is 10 cents in cash or in postage stamps.

Address.....

PATTERN DEPARTMENT, ADVERTISER, LONDON, ONT.

Feather Beds, Pillows and Mattresses renovated and sterilized; also manufacture of Mattresses, Feather Pillows, Cushions and Spring Beds, Brass and Iron Beds, 35. Stoves, Furniture, Camp Beds, at the Advertiser Bed, Pillow and Mattress Cleaning Factory, J. F. HUNT & SONS, 595 Richmond Street. Phone 597.

THEY ARE A POWERFUL NERVE-DRUG. They cause derangement of the nervous system, and nervous debility once engendered is difficult to deal with. There are many testimonials as to the efficacy of Farmacia's Vegetable Pills in treating this disorder, showing that they never fail to produce good results. By giving proper tone to the digestive organs, they restore equilibrium to the nerve centers.

Railroad detectives at Chickasha, searching for lost tools taken by shopmen, found that one employee had hauled away a locomotive cab and attached it to his house for use as a kitchen.

A SURE CURE FOR HEADACHE.—Billion headache to which men are more subject than women, become so acute in some subjects that they are utterly prostrated. The stomach refuses food, and there is a constant and distressing effort to free the stomach from bile which has become unduly secreted there. Farmacia's Vegetable Pills are a speedy alternative, and in neutralizing the effects of the irritating bile, relieve the pressure on the nerves which causes the headache. Try them.

DOCTORS ELECT

List of New Officials of the Ontario Medical Association.

Toronto, May 29.—The Ontario Medical Association today elected the following officers:

President—Ingersoll Olmstead, Hamilton.

First Vice-President—M. J. Hamilton, Toronto.

Second Vice-President—D. E. Munnell, Kingston.

Third Vice-President—C. E. Casagrain, Windsor.

Fourth Vice-President—T. S. L. Smellie, Port William.

Charles P. Lask was elected secretary, S. Johnston assistant secretary, and K. Fenton treasurer.

A resolution was passed strongly in favor of the establishment of an institution to which incriminations may be committed by legal process.

Mr. Justice W. R. Riddell most strongly supported the establishment of such a special institution in the Province and under public control. He considered that the time has come when drastic measures might well be adopted.

REJECTS FINE OFFER.

Windsor, Ont., May 29.—William M. Cameron, who is visiting his father, Donald Cameron, has refused an offer to go to the Yukon and take charge of the mining interests of the Guggenheimers. Mr. Cameron is engaged by one of the largest mining firms on the Rand, South Africa, and is paid a large salary as an expert engineer. The offer he received to go to the Yukon was for more money than he is paid in South Africa.

Eczema Is Baby's Enemy

CAUSING KEEN DISTRESS FROM THE DREADFUL ITCHING—SOMETIMES LASTS FOR YEARS.

The first indication of eczema is a red, pimply, or blister-like eruption. The points run together, making a moistened patch, which "weeps" at first, and then dries into a crust. The intense itching of eczema of the face and scalp is very hard for the little one to bear, and the result is scratching until free bleeding takes place, and recovery is further retarded. Besides the suffering from the distressing itching, the child is restless and sleepless.

When left to itself eczema runs on indefinitely, covering the body with sores, but fortunately there is positive cure in the use of Dr. Chase's Ointment, a preparation which, by its marvelous soothing and healing powers, brings quick relief from itching and heals up the sores.

Dr. Chase's Ointment has proven especially successful in the cure of baby eczema, as well as in the prevention of this torturing disease, when used for chafing and skin irritation, in which eczema finds its beginnings; 60 cents a box, at all dealers, or Edmanston, Bates & Co., Toronto.

FOR OUR READERS

To Prove That Hyomei Will Cure Catarrh, Every Reader of The Advertiser Can Have Special Guarantee.

If there is any doubt in your mind as to the power of Hy-o-mei, the medicated air treatment, to cure all catarrhal troubles, the remarkable offer made by W. T. Strong should expel that doubt. Mr. Strong will give a personal guarantee with every dollar out of Hy-o-mei he sells, to refund the money unless it gives satisfaction. Mr. Strong takes all the risk of cure, and no reader of The Advertiser can afford to suffer longer with catarrh when an offer like this is made.

With every Hy-o-mei outfit is a neat pocket inhaler, and Hy-o-mei breathed through this inhaler, reaches the most remote air-cells of the nose, throat and lungs, destroying all catarrhal germs, and soothing and healing the irritated mucous membrane.

Hy-o-mei really gives you a health-giving climate in your own home, so that when you breathe its medicated air, your nose, throat and lungs will be filled with air like that on the mountains high above the sea level, where grow balsamic trees and plants, which purify the air with their volatile, antiseptic fragrance so healing to the respiratory organs.

You will notice relief and benefit from the first use of Hy-o-mei, and it will not take many days' treatment to convince you that in this remedy you have found a complete and lasting cure for all catarrhal troubles.

50-C-W-Y-W

MONUMENTS VALUE AS EDUCATORS

Mrs. F. G. Leonard's Interesting Paper at Daughters of Empire Gathering.

At the annual meeting of the Daughters of the Empire, held in Toronto, Mrs. F. G. Leonard, regent of the London chapter, read a paper on "Monuments as Educators." The paper was given by special request, and it will prove of particular interest to Londoners at present, when a move is on foot by the Daughters of the Empire to erect a monument to the soldiers from this city and district who lost their lives in the South African war. It was as follows:

It has been said that a man's first duty is to his country, and no proverb ever expressed a truth in finer or simpler language. No man is worthy of being called a citizen of any land, unless he is willing to do his part toward making his nation the greatest and his people the finest in the world.

The child is father to the man, and if the right principles are instilled into the minds of the youth of our country, we will, later on, have citizens who will be ever ready to bear their share of their country's work as they should. If the child is taught that it is his sacred duty to reverence his elders, to uphold his country's honor and to strive to make her a queen among nations, we will have men in time to come who will take a firm stand for what is right, who will discountenance graft and patronage, the two great modern evils, and who, when the necessity arises will be prepared to give their lives for their country, as becomes good patriots.

To produce this the youth must be educated with these points always before him. The word "education" is derived from the Latin, meaning to lead or bring, and as we lead and bring up our children along the proper lines, so we will be educating and developing citizens who will in days to come place our glorious Canada in the vanguard of the nations.

Nations have risen again and again and flourished great and triumphant for a time, only to fall to the ground in the end as did the idol with feet of clay. Of Carthage, that great African world center, the city of Hannibal and Hasdrubal, Rome's great rival in war and trade, nothing remains but a heap of drifted ruins. Greece exists only as a buffer between Europe and the Turkish Empire. Egypt, Rome, Assyria, Babylon and Spain, as known of old, have vanished, and if they exist at all are but shadows of their former greatness.

And why? Simply because, with power and wealth came indolence, and indulgence and a corruption of personal and national morals which destroys and eats away the corner stone of the foundations on which a nation's greatness rests. And the world's history is a record of the rise and fall of nations, and the cities which have laughed and scoffed at captive kings are now sacked and pillaged by the descendants of those same kings. These evils came largely because the people neglected to instill into the minds of their children the principles which have contributed so much to the country's greatness. They neglected to teach them, to bring them up with the idea that their first duty was to their country and that they were all guardians of their country's honor. And if our Canada, our Empire, is to escape the kindred fate of these nations, we must have contributed so much to the country's greatness. They neglected to teach them, to bring them up with the idea that their first duty was to their country and that they were all guardians of their country's honor. And if our Canada, our Empire, is to escape the kindred fate of these nations, we must have contributed so much to the country's greatness. They neglected to teach them, to bring them up with the idea that their first duty was to their country and that they were all guardians of their country's honor.

But how is this to be accomplished? What is the best way to teach our children these great truths? Undoubtedly the study of the glorious history of our country, and of the path of duty to this end. The examples of those who have been weighed and found not wanting on the battlefield, in the council or in the everyday existence of the average citizen, must be and are a splendid incentive to others.

What better means can we have of impressing these examples upon our children and children's children, than by erecting monuments to commemorate our great soldiers, our heroes and our statesmen. Canada is as yet a young country, but the pages of history are bright with tales of gallant deeds, heroic sacrifices and of paths of duty leading to glory and the grave. Look at Champlain, La Salle, Simcoe, and those other numberless heroes, who have laid the foundations of a nation in a primeval forest, and we see the same spirit which today in the hearts of their descendants is building for us an Empire in what, only a few years ago, was called the Great Lone Land.

The early history of Canada is crimson with blood, blood of the aborigine in his hopeless struggle against the white man; blood of the French and English on opposite sides, striving for the mastery in this highest of all continents, and blood of these two fighting side by side to preserve our country for the meteor flag of England, no longer French and English, but united Canadians. Heroes such as Frontenac and DuRoi, Wolfe and Montcalm, Brock and de Salaberry, Tecumseh and Fitzgibbon and the other nameless but not less meritorious, have furnished us with examples of loyalty and gallantry which should never be forgotten.

And in that great struggle, not altogether bloodless, of our forefathers has made Canada the brightest jewel in the crown of empire, there were men who served their country no less faithfully and valiantly than the warriors. The names of Baldwin and Lafontaine, of the martyred McGee, of Howe and Wiley, of Macdonald and Brown, of Macdonald and Carleton, should be known to the road of the present day politician, and should stimulate him to strive against those evils which, if not resisted, will inevitably destroy.

Turning from the lightning of war and the thunder of politics to our peaceful everyday existence, we find men and women who have proven themselves citizens no less heroic than those of Sparta and Carthage. On Wellington street in Ottawa there is a statue of Sir Galahad, that splendid knight, servant of old, an appropriate figure, placed to remind us of the young man who sacrificed his life in the icy river

Packed at the Oven's Mouth

We do things right at the Mooney bakery. Crackers are packed piping hot from the ovens. The moisture-proof paper and air-tight tins retain all the freshness and crispness, no matter where or when you buy them.

MOONEY'S PERFECTION

CREAM Sodas

MOONEY BISCUIT CANDY CO. ST. CATHARINES, CANADA

matter where or when you buy them.

They come to your table just as inviting and delicious as though you ate them at the ovens in the bakery. At all grocers in air-tight packages.

GROCCERS DIVIDED ON PICNIC MATTER

One Section Will Go to Toronto, While the Other Will Go to Niagara Falls.

The Retail Grocers' Association of London, at a largely-attended meeting held last night, decided to hold the annual excursion to Toronto this year, and to go via the C. P. R. The fare will be \$2.35 for the round trip.

A committee, composed of Messrs. Shaw, McCormick, Drake and Ryan, was named to complete the arrangements with the railway, and in conjunction with the executive committee of the association, to decide upon the date.

It is altogether likely the picnic will be held on a Wednesday in July.

It was reported that certain firms which have formed an association of their own had been approached with a kindred fare, and they had decided to join with the Toronto picnic association and go to Toronto on picnic day, but that they had refused.

The firms referred to, it was stated, intend going to Niagara Falls again this year.

The committee appointed to wait on No. 2 Committee of the city council for the purpose of having licenses for pushcart men abolished, reported that the pushcart business, owing to the fact that the districts in which it can be carried on have been greatly curtailed, will probably die a natural death in London. It was decided, however, to name a committee to draw up a revised district in which pushcarts should be allowed to operate, and to submit it as a suggestion to No. 3 committee.

Messrs. Lea, Ryan and Donaghy were named a committee to purchase a suitable present for President Harry Tanahan, who was married to an estimable young lady of Wyoming on Tuesday last.

A Pure Castile Soap.

It is not generally known that Castile Soaps are made in Canada—nor are many aware of what Castile Soap is made. Olive Oil, in its pure state, is the principal ingredient, and this oil is widely known for its curative and healing properties, and containing natural sulphur it has also an antiseptic value. For these reasons, Castile Soap is looked upon as the purest and best form in which soap can be produced.

A Canadian company has been formed, who already have their goods introduced on the market for the manufacture of Castile Soap. In addition to toilet soaps they have put out a Castile laundry soap, which has become recognized as the best wherever it has been given a trial, for all laundry and household purposes. Any one who needs the best and appreciates a good soap cannot afford to overlook the above facts. These soaps are put at a price within reach of all, as the laundry soap is 5 cents a cake, and the toilet, 5 and 10 cents a cake. Ask your grocer or druggist for it, until you get it. Ask for the soaps by name "Olive Oil" laundry soap, and the "Berlin" Castile toilet soap.

The man who brags usually has a lot to say about the things he is going to do. What he has done is far less important.

Mrs. Winslow's Soothing Syrup has been used for over THIRTY YEARS by MILLIONS OF MOTHERS for their CHILDREN WHILE TEething with PERFECT SUCCESS. IT SOOTHES THE CHILD, SOFTENS THE GUMS, ALLAYS ALL PAIN, CURES COLIC, and is the best remedy for DIARRHEA. Sold by druggists in every part of the world. Be sure and ask for "Mrs. Winslow's."

TAKES TO GOOD WORK

How Duchess of Marlborough Seeks to Forget Marital Troubles.

New York, May 29.—Yesterday's cable dispatch from London, telling that the Duchess of Marlborough had been instrumental in fitting up a home near the Euston Square railway station for the benefit of the wives and children of poor prisoners is an additional fact tending to show that in her marital sorrows the duchess—"Our cheery" as her friends and sympathizers here call her—has turned for solace to the work of bringing joy to others.

The merest mention of the duchess brings to the mind of New Yorkers the recollection of that wedding of hers in St. Thomas' Church in the autumn of 1861. Little more than a decade has gone by in which Consuelo Vanderbilt's wedded experience has not exactly followed the primrose lane of a number of international marriages.

When Marlborough came over here to take back the daughter of a Vanderbilt as a bride, she brought with her R. Harding Milward, who had been the solicitor for the young duke's house for years. The old barrister's business was to arrange the marriage settlement for his client. He was a typical gentleman of the old English school. In many ways he was nearer to the young scion of the house of Churchill than any living man, and yet, when the invitations to the wedding reception, held at Mrs. Vanderbilt's house at Seventy-second street and Madison avenue, were sent out, Mr. Milward did not get one. Mrs. Vanderbilt herself had sent out the invitations, and the old gentleman did not believe that the omission was accidental.

On the wedding morn he was breakfasting at the Waldorf and, of course, the wedding was the subject discussed. Mr. Milward spoke rather feelingly of the slight he had suffered. Asked to explain it, he smilingly said: "I am only an English lawyer, and, of course, cannot be considered in Mrs. Vanderbilt's set. My clients at home are only the heads of some of the oldest nobility in England. But it is all right. This is Mrs. Vanderbilt's time. There will be another day, and I would not be at all surprised if in the future the most welcome visitor at Blenheim Castle would be Mr. W. K. Vanderbilt." and Mr. Milward very significantly emphasized the "Mr." and the duke has been more happy to see his father-in-law than Mrs. Vanderbilt, because it is the former who has held the money bag.

Special—\$295—Special

For the next 30 days only we will set, a beautiful French Burt Upright Piano, 7 1/2 octaves, 2 pedals, colonial style, all improvements, at \$295, payable \$6 per month. Other dealers in London will ask you \$375 for a piano as good as this one. Weinman & Co., 217 Dundas, corner Clarendon.

HEART TROUBLE CURED

In the rush, hurry and worry of modern times, we overlook the heart. Is it any wonder then that there comes a breakdown of this wonderful little engine, when such a continued strain is placed upon it day after day. There are many forms of heart trouble and the slightest derangement of this important organ is extremely dangerous. To strengthen the weak heart it is necessary to use a remedy that will act upon the heart time, restore and revitalize it and at the same time tone up and invigorate the nervous system, we have such a combination in MILBURN'S HEART AND NERVE PILLS.

Mrs. Ella Dingman, Morgantown, Ont., writes of her experience with them: "It is with the greatest of pleasure that I recommend Milburn's Heart and Nerve Pills. I was troubled for a long time with my heart, I had weak and dizzy spells, could not rest at night, and I would have to sit up in bed the greater part of some nights, and it was absolutely impossible for me to lie on my left side. At last I got a box of Milburn's Heart and Nerve Pills and they did me so much good I got another box and they effected a complete cure. I have not been troubled with my heart since."

Price 50 cents per box or 3 boxes for \$7.25 all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

LONDON, THURSDAY, MAY 30.

AUSTRALIA, CANADA AND THE
CONFERENCE.

Lieutenant-Colonel A. M. Smith, of
this city, is a Conservative, but not a
Chamberlainite. A student of econom-
ics, who has written from time to time
on questions of trade and currency, he
has closely observed commercial con-
ditions in the mother country and
Canada, and is convinced that Great
Britain will never furnish the ground-
work of an imperial preferential
scheme by imposing taxes on food. In
a letter to the press, he ex-
presses the hope that the British peo-
ple will not judge Canadians by the
unreasonable attitude of Premier
Deakin of Australia. Col. Smith adds:

"Canada claims and exercises the
right to make her tariff to suit her
own ideas, and she agrees that
Great Britain has the same right.
Now why should not Great Britain be
allowed to exercise that right
without constant nagging from cer-
tain of the colonies? If England
should commence to worry us by
constantly requesting that we change
our fiscal policy to suit her interests
what would we think?"

"When the present Canadian pre-
ferential tariff was introduced there
was no pretence that it was intro-
duced for the benefit of England; it
was simply carrying out the policy
of the Canadian Government. Any
benefit to England was considered
right and proper, especially as En-
gland was taking everything we could
send her free of duty. The idea of
asking more, when all had already
been given, never entered our heads."

"England can do no wrong for Can-
ada in the matter of tariff without
imposing the hated food taxes which
her people will not tolerate. Canada
can do no more for England in the
same matter except at the expense
of the Canadian manufacturer. To
increase the preference by raising
the tariff against foreigners taxes
not benefit Great Britain in the least
and Canada is not likely to lower the
tariff in any case."

"The same of unreasonableness
was reached when it was proposed
that some of the colonies should get
something out of the revenue taxes
already imposed on the colonies. The
British people in the shape of duties
on tobacco, wines, tea, etc."

If the British people choose to re-
verse their fiscal system, and to tax
foreign foodstuffs for the benefit of
colonial producers, the colonies will
be disposed to increase the margin of the
British preference, though the manu-
facturing interests will fight against
any such reduction in the duties
on British goods. The course the British
people will take, however, is their
own concern, and any pressure from
the colonies could be an unwarranted
interference, which would be resented
by British free traders, who are at
present the great majority of the nation.
As Col. Smith says, we Cana-
dians would be incensed if Great Britain
should worry us by constantly re-
questing us to change our fiscal policy.
For the same reason, the British peo-
ple had reason to take offense at the
attitude of Premier Deakin and his
Australian colleagues, Sir William Lyne,
The Australian statesmen were guilty of
downright impertinence in their pub-
lic criticisms of the British Govern-
ment after the conference, and de-
served the rebuke of the under secre-
tary of state for the colonies, who re-
minded them that the laws of hospi-
tality were binding upon the guests of
the nation. Canadians will be judged
by the conduct of their Premier, which
was faultlessly correct.

AN IMPERIAL PROJECT.

Not the least important result of Sir
Wilfrid Laurier's visit to London is
his success in inducing the Imperial
Conference to endorse the project of
fast Atlantic and Pacific steamship
lines, which, with the two great Cana-
dian transcontinental railways, will
form a complete all-British steamship
and rail route between Great Britain,
through Canada, and the far east and
Australia, as direct and speedy as it
is possible to make it. There are many
evidences in support of the argument
that Canada requires a fast ocean
steamship system, both east and west.
Not merely in anticipation of problem-
atic needs of the distant future, but
for the actual requirements of today.
The great transportation interests of
this country are calling for increased
facilities by land and sea. The over-
sea trade of the Dominion for the last
twelve months was nearly \$100,000,000
greater than for the previous year,
which itself was a record-breaker, and
the experience of the business world
is that increased freight means in-
creased passenger travel. Shippers and
agents generally, on both sides of the

Atlantic, largely engaged in handling
passengers and freight, are unanimous
in the opinion that a fast system such
as the Canadian Premier is promoting,
is justified under existing conditions,
and Earl Grey, the Governor-General,
now on a visit to England, is strongly
supporting Sir Wilfrid's views and
using his influence to help in carrying
them to a successful issue.

Towards the cost of carrying out
this scheme, Sir Wilfrid Laurier has
expressed his readiness to ask the Do-
minion Parliament to vote one million
dollars a year as Canada's contribu-
tion. At the present time all that the
Dominion pays in the way of assistance
to steamship lines is about \$400,000 per
annum as direct subsidies, or as pay-
ment for mail carrying to vessels ply-
ing between Canada and British ports,
and \$187,900 annually to the Cana-
dian-Australia line. But the wonderful ex-
pansion of Canadian trade which has
made necessary the building of a sec-
ond transcontinental railway has also
shown the need of increasing present
transportation facilities between Cana-
da, the mother country, and the
Australasian colonies, and in thus
bringing the matter before the imperial
and colonial representatives assembled
in London, Sir Wilfrid has performed
a service to Canada and the Empire.

What has rendered a better service
on the Pacific particularly desirable is
the fact that, owing to the failure of
the United States Congress at its last
session to pass a ship subsidy bill,
which was followed by the withdrawal
by the Oceanic Steamship Company of
the steamers on which the United
States mails have been transported
direct from San Francisco to New Zea-
land and Australia, the entire mail-
carrying business of the North Amer-
ican continent to the antipodes is now
in Canadian hands. To hold this, and
to make competition the more difficult,
if not impossible, faster steamers will
be needed. As regards the Atlantic,
by putting on a 20-knot service, as pro-
posed, a day at least will be saved in
time by passengers bound for Britain,
while Canadian mails will be landed in
the old country with equal saving of
time—no mean considerations in these
days of rush and hurry.

TO CONTROL UTILITIES.

The State of New York is about to
put to the test a plan for regulating
all public utilities, with the exception
of telephones, the working of which
will be watched with interest every-
where.

According to a bill which recently
passed the Legislature on the recom-
mendation of Governor Hughes, the
direction of these public services will
be vested in two commissions, one of
which will have jurisdiction over
Greater New York, and the other over
the counties outside the big city. It
will be the duty of these commissions
to investigate the affairs of the various
corporations and to regulate them in
the public interest. Not only will they
control the issue of stock, but will as-
certain the actual amount of money
invested, and from the receipts over-
above the cost of maintenance and re-
asonable dividends, will determine the
fares and charges the public should
be called upon to pay. The commis-
sions will practically manage these
utilities, as their powers include au-
thority to order, and to see that the
order is obeyed, such changes or im-
provements in the service of the rail-
way, electric light, gas, express and
other corporations, as to them seems
best.

This law, in empowering the commis-
sioners to command obedience to their
demands, is in advance of any legisla-
tion yet passed by the state. Of
course, it was with anything but a
good grace that the corporations re-
ceived the measure. They regarded it
as an unwarranted interference with
their concerns. They did not object to
commissions investigating their af-
fairs, and making public their discov-
eries, but to allow their capitalization
or expenditure to be affected, they con-
tended, was going too far. The com-
missions will get to work at once, and
it will be interesting to watch develop-
ments.

Every citizen of London should read
Engineer Chipman's report on the water
problem, published in this issue.

The prosecution in the Emerson libel
case is trying to discover who wrote the
offensive article. Thereby may hang a
tale.

"No more cold weather in sight," says
the Toronto Observatory man. But he has
been short-sighted on more than one oc-
casion.

"Mind your own business" is a whole-
some rule, which Australia's representa-
tives at the Imperial Conference over-
looked.

Professor Wiggins, of Ottawa, has been
heard from again, and attributes the cold
weather to the existence of two moons.
But late diners have noticed the phenom-
enon in all sorts of weather.

To put it mildly, Hon. W. J. Hanna
showed downright cheek in some of his
utterances at Forest last night. He coolly
declared that not one cent of revenue
would have been collected from the Cobalt
district but for the business methods of
the Whitney Government. There would
have been no Cobalt but for the enterprise
of the Rose Government, and Mr. Hanna
has no right to say that the same Govern-
ment would not have made the wealth of
the district contribute to the public coffers.
His statements are damaging to his rep-
utation as a public man.

IN SEASON.

(Chicago News.)

"Boss!" shouted the big cook from the
kitchen, "we have a lot of scraps out here
that ain't working."
"Lots of scraps, eh?" replied the proprie-
tor of the Shovel-down luncheon room.
"Mix them all together, add a little fry
tabasco sauce, and then put a sign out
side, 'Central American Pudding Today.'"

A HINT IN THE HAIR.

(Kansas City Star.)

Society is very strict in Japan about the
little matters of hairdressing, and we be-
lieve the woman who would neglect to
abide by the prevailing custom. Not alone
in the better classes, but among the poorer
people as well, the eligible young woman,
the widow who wishes to marry again and
the widow who doesn't, may always be dis-
tinguished by the way in which they dress
their hair.

EUCHRED.

(Harper's Weekly.)

Mrs. Crawford—Why was your husband
more angry than usual when he came
home so late?
Mrs. Crawford—You see, dear, I woke up
before he had time to set the clock back.

ENGLAND'S BEAUTY.

(London Daily Graphic.)

In the next week or two England will be
beyond all question the most beautiful
country in Europe. From one end of it to
the other there is a consensus of opinion
that orchards never showed such promise
of fruit.

THE STILE.

(Isabel Frye.)

We both walked slowly over the yellow
grass.
Beneath the sunset glow
And then he climbed the stile I did not
pass.
And then we said good-bye.

He paused one moment; I leaned on the
stile
And faced the hazy lane;
But neither of us spoke until we both
Just said good-bye.

And I went homeward to our quiet farm.
And he went on his way;
And he has never crossed that field again.
From that time to this day.

I wonder if he ever gives a thought
To what he left behind—
And I start sometimes, dreaming that I
hear
A footstep in the wind.

If he had said but one regretful word,
Or I had shed a tear,
He would not go alone about the world,
Nor I sit lonely here.

Alas! Our hearts were full of angry pride,
And love was choked in strife;
And so the stile, beyond the yellow grass,
Stands straight across our life.

EXPLAINED.

(Punch.)

"Why is Jones graving a beard?"
"Oh, I believe his wife made him a pres-
ent of some ties."

RULE WORKING BOTH WAYS.

(Washington Herald.)

An English judge expresses the opinion
that husbands should have a legal right to
inspect and revise their wives' visiting lists.
The women, probably would be glad to
acquiesce, provided they were granted the
same privilege in respect to their husbands'
visiting lists.

FREELY GRANTED.

(Edmonton Bulletin.)

Eastern newspapers should show a little
generosity in giving as much publicity to
the salubrity of Alberta's climate as they
have done to the unwelcome rigor of the
present season.

NOT THAT WAY.

(Chicago Record-Herald.)

"Have you ever been in jail before?" de-
manded the judge.
"No, your honor, honestly, never."
"Of course you haven't honestly. Few
men get there that way."

HOW LONDON HANDLES
GRATERS.

(Boston Herald.)

A useful object lesson in the proper treat-
ment of "graters" is furnished by London.
At West Ham, one of the poorer districts
of the English capital, nine out of the ten
members of the board of guardians have
been convicted of receiving bribes from
contractors and employees. The sums in-
volved were not large—\$500 accepted from a
doctor to insure his getting a certain medi-
cal appointment represents the largest
amount. But justice has followed with as
much swiftness and severity as though
thousands of dollars had been stolen. The
chief offenders have been sentenced to
the hard labor, the most drastic form of
criminal punishment, for two years. But
perhaps the most significant feature of the
incident is that these dishonest officials
were pronounced socialists.

SUGGESTING A CHEAPER VISION.

(Megdonford Blatter.)

Wife—Karl, when I go to the Riviera I
will dream of you every night.
Husband—I would rather you stayed here
and dreamed of the Riviera.

THE BRITISH WORKMAN.

(Sheffield Daily Telegraph.)

Despite protection on one side and
socialism on the other side, neither in
France nor Germany is the workman so
free, contented or well paid as the Eng-
lishman.

WOMEN'S CHANCE IN LITERA-
TURE.

(The Academy.)

The world is waiting for the woman
author, who need not be great, but only
natural and downright, to reveal to it (as
a male world) the true inwardness of a
woman's nature, her feelings towards other
women, what attracts her in men, and
what repels, how she really feels when she
is kissed by a man, and how she feels
when she is not kissed, and a thousand
other things which a man author can only
guess at, and in no case can expound
Here, surely, is a chance for a woman
writer.

TO HUDSON BAY.

(Toronto Globe.)

It will be to the utter discredit of the
present Ontario Government if the Ontario
and Transcontinental Railway is not completed
to Hudson Bay long before any other rail-
way reaches it from any direction. There
is a widespread and perhaps well-founded
impression that the construction of the
great section now under contract is proceeding
much more slowly than is at all necessary.
Reasonable rapidity of construction will
not add materially to the cost of the main
line, and the branches can wait. The first
great objective is Hudson Bay, and there
is no reason why the route to it should
not be completely located within the next
few months. A year from next fall at the
latest should see the whole line under con-
tract.

INFERNO CAPTURES
WOODBINE FEATURE

Seagram's Horse Winner of
King Edward Gold Cup—
Was Strong Favorite.

Toronto, May 29.—The King Edward
Hotel gold cup, with \$1,500 added, was
the feature at the Woodbine today. It
was won by Seagram's Inferno, with
Lotus Eater second and Tourne-
me third. Inferno was the favorite. The
results:

First race, Gimcrack purse, 4-year-
olds and up, selling, 3/4-mile—Belle of
Jessamine, 104 (Lloyd), 4 to 1, 7 to 5 and
3 to 5; 1:11 (Clifton Porge, 102 (Gaugel), 3
to 1, even and 1 to 2; 2: Raibert, 118
(McCarthy), 2 to 1, 7 to 10 and out, 3.
Time, 1:13 1-5. Cocksure, Margaret C.
Jack Zerbeville, Dr. Mack ran. Paul
Clifford, Beguile and Confessor scratch-
ed.

Second race, Landowne purse, for
2-year-olds, foaled in Canada, 4 1/2 fur-
longs—Cannie Maid, 118 (Nicol), 5 to 2,
3 to 5 and out, 1; Out of Step, 115 (Mc-
Daniel), 5 to 2, 7 to 10, 1 to 4; 2: Raw-
ney, 115 (Kinn), 2 to 1, 3 to 5 and 2 to 1,
3. Time, 1:06 4-5. Beware, Puff, Andrew
Summers ran.

Third race, Beaufort Purse, 3-year-
olds and up, \$400 added, 1 1/16 miles—
Minnie Adams, 107 (Nicol), 3 to 5 and
1 to 2 and out, 1; Lotus Eater, 112 (Diggs), 3 to 1, 1 to 3 and out,
(Lloyd), 6 to 1, 6 to 5, and 2 to 5, 3.
Time, 1:47 3-5. Factotum ran. Lund-
hurst scratched.

Fourth race, King Edward Hotel
Gold Cup, 3-year-olds and up, \$1,500
added, 1 1/4 miles—Inferno, 126 (Mc-
Daniel), 9 to 20 and out, 1; Lotus Eater,
122 (Diggs), 3 to 1, 1 to 3 and out,
(Lloyd), 6 to 1, 6 to 5, and 2 to 5, 3.
Time, 1:47 3-5. Factotum ran. Lund-
hurst scratched.

Fifth race, Stanley Barracks Cup,
hunters' steeplechase, \$500 added, 2 1/2
miles—Brierly, 108 (Kerry), 2 to 3, 2 to 3,
3 to 5; 1:10 (Phillips), 10 to 1, 6 to 5
and out, 2. Time, 5:45. Only two fin-
ished. J. R. Laughrey, Minnie
Adams, Main Chance scratched.

Sixth race, Chester Purse, 3-year-
olds and up, maidens, mile — Willie
Green, 97 (Lloyd), 4 to 5, 1 to 3 and
out, 1; Headley, 105 (Bland), 7 to 2,
out, 1; 2: Amberley, 105 (McDaniel),
10 to 1, 4 to 1 and 8 to 5, 3.
Time, 1:45. Alvise, Model, Stoney
Lee, Arthur Rosenfield, Prytanis, Royal
Jig, Russell A. ran. Autumn King
scratched.

Seventh race, Gimcrack Purse,
selling, for 3-year-olds and up, 6 fur-
longs—Pinefang, 83 (Goulding), 6 to 1,
2 to 1 and 4 to 5, 1; Ballot Box, 111
(Lloyd), 20 to 1, 8 to 1, 3 to 1, 2;
Court Martial, 103 (A. Martin), 4 to 1, 7
to 5 and 7 to 10, 3. Time, 1:14. Su-
zanne, Rocomora, No Trump, Asterisk,
Foxmeade ran. Annie Berry, Cloten,
Gabrielle scratched.

Eighth race, Gimcrack Purse,
selling, for 3-year-olds and up, 6 fur-
longs—Pinefang, 83 (Goulding), 6 to 1,
2 to 1 and 4 to 5, 1; Ballot Box, 111
(Lloyd), 20 to 1, 8 to 1, 3 to 1, 2;
Court Martial, 103 (A. Martin), 4 to 1, 7
to 5 and 7 to 10, 3. Time, 1:14. Su-
zanne, Rocomora, No Trump, Asterisk,
Foxmeade ran. Annie Berry, Cloten,
Gabrielle scratched.

LACROSSE.

STRATHROY-PETROLEA SERIES.

Strathroy, May 29.—W. T. Rapley
and M. Briderick, managers of the
Strathroy and Petrolea teams, re-
spective, have finally agreed to a
schedule of matches to be played by
these two teams this summer.
The list comprises eight games, four
of which will be played here and four
at the Oil Town. They will commence
at the Oil Town, and this will give all
an opportunity to witness the playing.
The dates decided upon are:

June 3—Strathroy at Petrolea.
June 17—Petrolea at Strathroy.
June 24—Strathroy at Petrolea.
June 15—Petrolea at Strathroy.
July 29—Strathroy at Petrolea.
Aug. 13—Petrolea at Strathroy.
Aug. 26—Strathroy at Petrolea.
Sept. 9—Petrolea at Strathroy.

BASEBALL.

ST. JOHN'S TEAM REORGANIZED.

Strathroy, May 29.—A large number
of baseball enthusiasts met at the Al-
bion Hotel tonight and reorganized St.
John's team for the coming
season. From the enthusiasm mani-
fested at the meeting it is evident that
Strathroy will have as good a team as
it has had in former years.

The following officers were elected:
Honorary president, R. S. P. Robin-
son; president, R. E. Freely; vice-
president, Mr. Rapley; manager, H.
Statham; assistant manager, Grant
Newton; captain, Bert Collins; execu-
tive, E. Collins, H. Collins and E.
Dean; patrons, J. A. Newton, J. A.
Alexander, J. Avery, D. C. Ross, M. P.
P., and F. D. Folks.

MCALDER SUNDRIES SPENCER.

Chicago, May 29.—Manager Mc-
Alcer, of the St. Louis American
League team, today suspended Catcher
Spencer indefinitely for failure to
obey the training rules of the club.
The player was sent back to St.
Louis.

LAWN BOWLING.

PETROLEA DEFEATS WATFORD.

Petrolea, May 29.—Two rinks of Petrolea
bowlers visited Watford and won by the
following scores:

Taylor,	Petrolea,	Rev. G. W. Arnold,	Petrolea,
McKercher,	Rev. G. W. Arnold,	W. J. Caldwell,	Rev. G. W. Arnold,
Forbes,	W. J. Caldwell,	Van Valkenburg,	W. J. Caldwell,
Anderson,	Van Valkenburg,	J. W. Patterson,	W. J. Caldwell,
R. Stapleford,	J. W. Patterson,	R. A. Bryan,	A. E. Mellish,

J. Jack,	E. A. Mellish,	E. A. Mellish,	E. A. Mellish,

Total, 44 to 12. Total, 55 to 12.

Paris pays for foreign countries \$25-
000,000 a year for coal. There is a pro-
ject on foot of saving at least \$4,000-
000 of this by conveying electric power
for light, heat and motor purposes from
the River Rhone, by damming it near
the falls of Bellegarde, and thus se-
curing a fall of 65 meters high, which
would mean 100,000-horsepower.

wool, 50 inches.....**\$1.40, \$1.65, \$1.80**

Kingsmill's All-Wool Batiste

Cream ground, broken checks, green overcheck, navy overcheck, mauve overcheck, marine blue overcheck; very cool; a perfect washing material; will give satisfaction in wear; 40 inches wide.....**45c**

A Repeat in Solid Checks

Navy and white, black and white, turquoise and white. Price.....**45c**

Special Offering Light Gray Tweeds

44 inches wide.....**39c**

A Fine Range of New Textures in Shepherd's Checks

Three sizes—small, medium, large, 42 to 56 inches wide. Prices.....**60c, 70c, 75c, \$1, \$1.25, \$1.50**

Kingsmill's Black Dress Goods

EVERYTHING NEW AND DESIRABLE. FRENCH MADE. ALL WOOL.

Black silk warp henrietta, black henrietta twill cashmere, black silk warp armures, black silk and wool crepe de chine, black crispines, black albatross, black taffeta, black poplin de soie, black eolienues, black rosana, black voiles, black panama, black nun's veiling, black venetian, black serge, black cheviot, black homespun, black vicuna, black chiffon broadcloth, black broadcloth, black boxcloth, black luster, black sicilain. Ranging in width 42 to 54 inches. Prices from

25c to \$2.25

No Advance in Prices this Season at Kingsmill's, Although Fabrics Have Advanced From Twenty to Forty Per Cent.

DUAL SYSTEM

RECOMMENDED

Continued from page one

ing engine should also be installed at Springbank.

2. Install a low-pressure fire service system in the congested district, using steam fire engines as before.

3. Install a high-pressure fire service system in the congested district, using steam fire engines as at present in the residential parts of the city.

A few large mains should also be laid in the two latter schemes, to give a better fire supply in the domestic service system.

The last-mentioned scheme will doubtless effect a greater reduction in fire premiums than either of the other two, but the first cost will be higher.

On the small plans which accompany this report I have shown two high-pressure systems:

1. Pumping station on North Branch near Wellington street.

2. Pumping station on South Branch near Rectory street.

The final decisions as to which of the foregoing should be adopted should depend upon the results of analyses and bacteriological examinations of the streams.

Should it ever become necessary to supplement the supply from Springbank, by filtering river water, the pumping plant for this domestic supply may be located at the high-pressure station, in which case a new main would be required to convey the filtered water to the city pipe system. Filtered water might eventually be used in the high-pressure system.

If the high-pressure system be adopted, one of the three proposed pumping units might be slowly operated for the constant demands, or two smaller auxiliary units installed for this service.

Owing to the length of the force mains from the pumping stations to Dundas street, the friction in a 16-inch pipe conveying 5,000 gallons per minute would amount to 100 pounds; that is, it would be necessary to maintain a pressure of 100 pounds higher on the machinery than at the hydrants at Dundas and Richmond streets. With a 20-inch main the loss in friction would be 40 pounds, and I therefore recommend a 20-inch main.

Cost of High-Pressure System.

I estimate the cost of either of the two mentioned schemes as follows:

Sedimentation basin or reservoir from which to pump.....\$25,000
Pumphouse.....20,000
Four boilers, 250-horsepower each.....20,000
Four pumping units, 2,000,000 gallons each.....55,000

Pipe System.....\$120,000

11,000 feet of 20-inch pipe at 340 pounds to the foot.....

1,200 feet of 16-inch pipe at 230 pounds to the foot.....

7,800 feet of 12-inch pipe at 135 pounds to the foot.....

10,000 feet of 10-inch pipe at 100 pounds to the foot.....

10,000 feet of 8-inch pipe at 65 pounds to the foot.....

40,000 feet—3,240 tons at \$35—\$116,500

150 special hydrants at \$100.....15,000

Special castings and gate valves.....7,100

Trenching, pipe-laying, etc.....25,000

Extra for replacing pavements.....6,000

Cost of mains and hydrants.....\$180,000

Pumping station.....120,000

Total.....\$300,000

Extensions to the system on unpaved streets will cost from \$3 to \$4 per lineal foot, and on paved streets from \$4 to \$5 per lineal foot.

The foregoing estimate is based upon the assumption that a pressure of 250 pounds is to be carried at the pumphouse.

With lower pressures the estimates would be reduced approximately as follows:

With 250 pounds' pressure at pumphouse.....\$300,000

With 200 pounds' pressure at pumphouse.....265,000

With 150 pounds' pressure at pumphouse.....230,000

At the fire hydrants the pressure will be about 50 pounds less than at the pumping station.

In my opinion a larger percentage of the high-pressure system should be by the owners of properties benefited than by the city.

Although I have estimated upon a steam plant, electric motors would be much cheaper, if approved of by the underwriters. Their sanction would doubtless depend largely upon the location of the power lines from the source of electric energy to the pumphouse. In my opinion, however, one of the pumping units should be steam driven.

Standpipe.

A water tower, standpipe, or elevated tank would equalize the ordinary daily pressure in the high-pressure fire system, but it would introduce an element of weakness, owing to the fact that it would be necessary to cut it off during fires, either by hand power or electric power. A tower 100 feet in height would give a pressure of 43 pounds only at the base, and this height is now seldom exceeded. Furthermore, I believe a pressure of 100 pounds desirable for hoists, manufacturing purposes, etc.

I doubt if the underwriters would permit a standpipe in connection with the fire service system, and I cannot recommend it.

River Water.

Although the quality of the river water is such that it cannot be used for domestic purposes without filtration following sedimentation, it may be used for fire service, street sprinkling, washing pavements, hoists, liveries, sewer flushings, certain factories, railway locomotives, and many other purposes.

Raw water, far more impure than the River Thames, is in use in many places for street sprinkling and other purposes. It is odorless, and the proposed settling basin will remove the greater part of the coarser suspended matter. You need not anticipate foul odors or other dangers arising from the distribution of microbes, as none will exist. I would suggest that the standpipe in the vicinity of the river on either branch, be sprinkled this season by raw river water, as an object lesson to the citizens.

The results of a few analyses of the river water will be found in my 1903 report.

I then recommended that a series of chemical analyses and of bacteriological examinations be made to extend over some time, to determine the relative purity of the two branches of the river. If this recommendation had been carried out, the results would now have been of the greatest value and assistance.

Ordinary Fire Supply.

Outside the high-pressure fire system the domestic pipe system must be depended upon for fire protection.

The water supplied daily from the high-pressure system would increase the pressure in the domestic system a few pounds, and the amount saved by means would effect a greater increase, but it must be borne in mind that the city will increase in population, thus increasing the draught from this system.

Several large mains should be laid, principally upon east and west streets, to improve the distribution system, as the proportion of four-inch and six-inch pipes is now altogether too high. For fire protection to isolated factories and large buildings scattered through the city at points not to be reached by the high-pressure system, you must rely upon steam fire engines taking water from fire hydrants on the domestic system.

It may be desirable to lay a second main from the reservoir to the city, but this is not now necessary. This duplicate main would increase the pressure, give a greater volume for fires, and permit repairs to be made in the existing main when necessary. It would cost from \$30,000 to \$100,000, according to its size.

The additions to the domestic system now required would cost approximately \$50,000, but it is not necessary to lay all these mains in one season.

Saving in Water.

The quantity of water that may be supplied by the high-pressure system for municipal, commercial and manufacturing purposes can only be estimated.

In 1903, from data given me by the superintendent and the city engineer, I estimated the maximum daily summer consumption as follows:

	Gallons.
Dwellings, offices, shops, stores, factories, hotels, etc.	2,600,000
Lawns (summer only)	750,000
Street sprinkling (summer only)	350,000
City and public buildings	100,000
Railways	500,000
Leakage from mains and services	300,000
Total	4,000,000

Since 1903 the number of services has increased nearly 20 per cent, but the supply to the railways has been cut off.

Part of the water supplied for street washing and sprinkling, factories, hoists, lawns, city buildings, etc., may be taken from the fire supply system. The superintendent of the waterworks system can, I doubt, closely estimate the amount, but in my opinion, it will be found to be not less than 500,000 gallons per day during the summer months, and about half this in the winter.

The pumping records for 1906 show that 3,800,000 imperial gallons was the daily yield of the Springbank supply in the driest part of the season. About 42,000 people now take water from the waterworks system, which represents a consumption of about 30 gallons per consumer, for all purposes.

It has been proven beyond question that in residences of the better class, fitted with all modern plumbing fixtures, the average daily consumption in Canadian and United States cities does not exceed 30 gallons per capita.

I have proven it to my own satisfaction, not only in my own residence, but hundreds of others during the last two years. This would give 1,260,000 as the maximum London supply to householders, to which must be added the supply necessary for offices, shops, stores, factories, hotels, etc., probably amounting to 500,000 gallons, making a total of 1,760,000 gallons for the citizens. Probably 500,000 gallons would now represent the water used by the city, which gives a total actually used of about 2,300,000 gallons per day. This leaves 1,500,000 gallons unaccounted for.

In 1903 I allowed 300,000 gallons as the daily leakage from mains, but to be absolutely safe, I will now take it as 700,000 gallons, which would leave 800,000 gallons per day as the amount of water wasted daily through the carelessness of householders, and through leaky plumbing fixtures. If this could be prevented, the consumption per consumer would be reduced from 30 gallons to about 21 gallons for all purposes, city uses included. The present supply would then be ample for 33,000 people. If 50 per cent of the services be metered, the saving would probably be about 600,000 gallons, in which case the supply would be ample for 50,000 population.

During recent years the landlords in the larger cities, where the water waste was excessive, have discovered that it is much cheaper to check the leakage than to expend large sums in laying larger mains, in erecting additional machinery, and in increasing the supply.

Meters.

There is only one practicable way of stopping the unnecessary waste of water, and that is by the adoption of meters. If every service pipe in London were metered, the consumption would be decreased by about 800,000 gallons per day. At first all the large consumers should be metered, then services to the small factories, hotels and liveries. In the second season dwellings with lawns should be metered, of fire buildings, etc. By the end of the third year about 6,000 meters should be set. With 50 per cent of the services metered probably three-fourths of the controllable and preventable waste would be checked.

The cost of meters set will now average \$15 per service, and the annual charges, repairs, interest, depreciation and cost of reading meters will be less than \$2 per service. The water saved if sold at 6 cents per thousand gallons would pay the annual charges for the entire meter system, and you now have a market ready to take all that you can thus save.

Prejudice and ignorance should no longer be permitted to delay the general adoption of the meter system in the city of London. If there be any place in Canada where meters should be adopted, that place is London.

Your supply is limited, and therefore valuable. It is insufficient for the present maximum daily demand in the summer season, yet a large percentage is now allowed to run to waste after being pumped into the reservoir.

Meters will effectually stop waste, if a reasonable tariff be adopted, but in London it might be advisable for the first year or so to collect the revenue on the flat-rate basis, if a certain specified amount of water were not exceeded by each consumer, the meters acting only as silent inspectors to detect waste and warn innocent offenders.

Spring Water.

The quantity of water yielded by the

springs at Springbank was estimated as 4,338,000 imperial gallons per day in 1903 by the waterworks superintendent, and in my report of that year I stated that in a dry season the minimum yield might not exceed 4,000,000 gallons. This included all the water now collected at Springbank. I am now informed, however, that the minimum is 3,800,000 gallons.

The combined yield of the five or six springs between Byron and Kilworth has been variously estimated from 500,000 gallons per day to 1,000,000 gallons per day. To collect this water, erect the necessary pumping station or stations, and construct a force main to Springbank would cost from \$50,000 to \$85,000 without any allowance for land and water taken. A gravity main would cost materially less, but the operating expenses would be less.

The dry weather yield of the springs on the north branch at Cronyn's and White's has been estimated as 750,000 gallons per day. To collect this water from the city would cost about \$50,000, and in addition a pumping station must be erected which would cost, with machinery, \$20,000 additional, or a total of \$70,000, exclusive of land and water rights.

From the foregoing it would appear that the cost of adding the springs between Byron and the springs on the north branch would be at the rate of over \$100,000 per million gallons secured, and in addition all the water must be pumped.

By expending this sum on meters, the same results will be effected, at less cost, and your waterworks system will then be placed on a business basis.

The springs mentioned may be added as required, before your present supply is overdrawn.

Filtration.

Eventually it may be necessary to take water from the Thames to supplement the supply from springs. Water far more impure than the Thames above London is today being used for domestic purposes by several cities in the United States, without filtration, but until the population of the city approaches 70,000 the citizens may be supplied by spring water exclusively. If river water be used, as any time, the Springbank supply should, of course, be retained, the proportion of river water increasing with the population year by year.

Surveys, Etc.

Before acquiring any of the springs between Byron and those along the North Branch, careful detailed surveys should be completed, and thorough tests made to demonstrate beyond a doubt the exact quantity available from each source. This work should be proceeded with at as early a date as convenient.

Valuation should also be made on the lands and waters desired, or options obtained. At present there is no definite data to lay before a designing engineer, all estimates of cost being guesses, which is not a business way of solving a business problem. The board has a yearly surplus and can well afford to make all surveys and examinations required, and a definite scheme with complete plans and estimates submitted for the approval of the ratepayers.

The meter system is definite, you know in advance what they will cost, and the water saved will insure a supply while the surveys, plans, etc., are under way for an additional supply from springs.

Population.

In 1883 the population of the city was given as 20,305, but this did not include the population of East London, South London and West London, which were annexed in 1885, 1890 and 1898 respectively.

Upon the assumption that the three suburbs annexed increased in population at the same rate as the city, the population of the area now included in the city was about 29,600 in 1883, instead of 20,305 as above given.

From 1883 to 1903 the population increased to 39,365, that is it increased by one-third in 20 years, or only about one and one-half per cent per annum. Since 1903 the rate of increase slightly exceeds three per cent.

I am inclined to believe that the probable increase in the future will be between 3 per cent and 4 per cent, if so, the population of the city would be 60,000 in nine years, and 70,000 in seventeen years.

Engineers as a rule allow five persons for each service pipe, but in London there are four people to each service pipe.

vice or each building, a remarkably small number.

Conclusions.

1. The present supply is 3,800,000 gallons per day, and is barely sufficient for the city's requirements. Average daily consumption, 90 gallons per consumer.

2. The installation of 6,000 meters will effect a saving of about 800,000 gallons per day. The supply would then be sufficient for 50,000 people at 76 gallons per consumer. By metering all of the services the supply would be sufficient for 53,000 people.

3. About 500,000 gallons now supplied by the domestic service may be taken from the proposed independent fire pressure system. This would bring the necessary Springbank supply down to 65 gallons per consumer, and it would then be ample for 57,000 people.

4. The saving effected by the meters and by the high pressure system together will defer for eight or nine years the time for securing an additional supply.

5. The springs between Byron and Kilworth, and in this vicinity, will supply 8,000 people, and the Cronyn-White springs 10,000 people, if the services be metered.

6. A total population of 75,000 may therefore be supplied by spring water at a reasonable cost, if meters be adopted and river water used for certain purposes.

7. The filtration of the Thames water can only be postponed by the adoption of the scheme recommended, or by the discovery of some source of supply not as yet investigated.

8. Fire protection can be best given in the congested business district by an independent high pressure system.

Recommendations.

1. Gradually set meters until 50 per cent of the services are metered, at a first cost of about \$90,000. The total annual expenditure will be less than \$2 per meter, which will be entirely offset by the saving in the cost of pumping.

2. Install a high pressure fire protection system at a cost of \$300,000, the annual charges being \$25,000, this cost to be adjusted between the city and the parties directly benefited.

3. Lay additional distribution mains in the domestic system at a cost of about \$50,000.

4. Survey and measure all available springs and determine the quality of the river water before deciding upon the source from which to draw an additional supply.

The interest on the estimated cost of the different schemes that have been presented to the citizens from time to time for increasing the supply would more than meet the expense of these surveys and investigations.

Respectfully submitted,

WILLIS CHIPMAN,

Civil and Sanitary Engineer.

How Zam-Buk Saved

A Girl's Arm

The great healing and antiseptic power of Zam-Buk, the favorite household balm and salve, is well illustrated by the following occurrence. Miss Saddington, of Huntsville, Ont., is the subject, and she says: "I had a scalded arm which 'went the wrong way,' and began to swell very badly. The pain from it was terrible and when I went to the doctor he said it was blood poisoning. For ten months I was very bad with it. I tried all sorts of remedies, but could not get ease, so say nothing of cure."

"One day in the house of a friend Zam-Buk was recommended to me. On my friend's recommendation I applied some Zam-Buk that same night. To my delight when I awakened next morning my arm was much better. I therefore continued with the treatment regularly. In three weeks the arm was quite well, and I have never felt any trace of pain from it since. It is now some months since it was cured, so that it is evident the cure is permanent."

"Since that time my friend's husband cut his arm. The wound also turned to blood poisoning. Zam-Buk was applied, and in his case also completely cured."

Zam-Buk is just as effective when used for cuts, burns, sores, skin eruptions, pimples, boils, bad leg, varicose ulcers, eczema, etc. Just put it on to that cut, or scratch, or blister, or sore and note how quickly it takes out the soreness and heals! All druggists and stores sell at 50 cents a box, or from Zam-Buk Company, Toronto, for price 2 boxes for \$2.50. There is nothing just as good.

The Asiatic ports of Russia are at the present time free from customs duties.

It is estimated that society women at season just coming to an end. Very Newport and other fashionable summer resorts in the east were robbed of over \$300,000 worth of jewels in the cover their property.

SUNSHINE FURNACE

NOT SHAKING. JUST A GENTLE ROCKING OF THE LEVER.

Shaking is a hard, back-breaking exercise, peculiar to common furnaces, while you can stand erect at the Sunshine—and moving the lever, to and fro, about half the length of your arm, a few times, is mere play. A child can easily do it.

Grates of the Sunshine are in two sections—right and left. By gently rocking the lever, a few times, the ashes are released from the right. Repeat the operation on the left and the ashes from that side drop into the ash-pan, too. You couldn't wish for anything easier than the Sunshine Method.

When this lever is not in use it can be disconnected from the grates and the opening capped. But when connected it fills up the opening so snugly that no dust from the falling ashes can escape.

Every detail is thought of on the "Sunshine"—that's what makes it the best.

If your local dealer does not handle the "Sunshine," write direct to us for FREE BOOKLET.

SAD SEQUEL TO LAKE TRAGEDY

Four Sailors of the Golspie Reduced to Mere Trunks of Men.

Detroit, May 29.—The Detroit Free Press says: For four unfortunate mariners of the great lakes, reduced to mere trunks of men in the hospital at the Canadian Sault, the opening of the season of navigation brings only somber reminders.

Every one of the four has lost both his legs. Of the eight hands which the four should have—stewy, skillful hands for all tasks aboard ship in past seasons—scarcely a sound member remains. Only the stubs of fingers, in some cases only the stubs of hands, are left to them.

These are four of the survivors of the wreck of the Golspie on the Michigan coast, Lake Superior, late last fall. Few more frightful tragedies are recorded in the history of the navigation of the great lakes. A fifth unfortunate there was, but with both legs and both arms amputated, death came to prevent him from continuing longer a burden to others and to himself. These five, separated from the remainder of the crew, wandered in the intense cold of the Canadian wilderness until the frost almost devoured their tissues. Indians sent word of their plight and cared for them until rescue came.

They had no claim on the Canadian Sault, other than the claim which misfortune has on the generous. They were strangers, and their port of call was far distant, but the Sault took them in and has cheerfully borne for six months the burden of caring for them. Indeed, their helplessness has been an appeal which has overshadowed all other appeals to the philan-

thropy of the warm-hearted people of that good town, so closely allied to Michigan. By subscriptions, benefit entertainments of various sorts and other devices, through which even those of the smallest means may contribute to the comfort of the necessitous, between four and five thousand dollars has been raised for this quartet of frightfully maimed victims of the elements.

Among civilized peoples all over the world, and among some peoples not accorded a place among the civilized, to accord help to shipwrecked and distressed mariners is regarded as one of the greatest of virtues. When has there been a response to this humane prompting more worthy of grateful recognition and remembrance than this which the residents of the Canadian Sault have made?

LOOKS LIKE MORE WAR

Guatemalans Entrench and Mexico Moves Troops to the Frontier.

Mexico City, May 29.—El Diario La Tarde, in its last edition this evening, prints a special message from the border town of Tuxtla Gutierrez, which says that Guatemalan troops are throwing up entrenchments and mounting artillery opposite the town of Cocha. This information cannot at this time be officially confirmed, the government knowing nothing of the incident. The special message follows:

"Tuxtla Gutierrez: We have just received in this city a message from Tapachula which says: 'The Guatemalan forces are actively throwing up entrenchments and constructing fortifications on the line opposite Cocha. Pieces of artillery are being brought from the center of the republic of Guatemala and mounted. The 25th Infantry has arrived here and Mexican troops are daily arriving and being placed along the border.'

KAISER'S ARMIES NOT MISUSED

Minister Tells Britishers Germany Is Once and Always for Peace.

Berlin, May 29.—Speaking tonight at a public banquet, given in honor of the visiting British journalists, Herr Muehlenberg, under-secretary of state, referred to the mistaken impression of Germany's intentions conveyed by many foreign newspapers, which he deplored.

Regarding the tale that Germany is threatening or imperiling the peace of the world, he said:

"The German army is a war engine, with a suspicious eye, as a war engine destined one day to be let loose and spread disturbance and terror over the world. It is true that Germany has a great and gallant army, of which we are justly proud, but can anybody prove that this army, since the establishment of the empire, has been misused, that we have frivolously risked the lives of our sons?"

Regarding the German navy, Herr Muehlenberg remarked:

"I read statements, especially from your country, that we conceal our programme, cast a veil over our ultimate aims. I am at a loss to understand this. Our programme is open to the world. The terms of our naval law of 1900 cannot be violated by the executive."

"It gives, definitely and clearly, the programme of the intended strength of our navy. When compared with that of the British navy there cannot be a doubt left in the mind of an unprejudiced observer that our navy is intended only for the protection of our shores and sea-going trade. We strive for nothing else, but for this we strive with all the rights of every great, progressive and honorable nation."

DOUGLAS DISMISSED

Was Used By Crown and, Therefore, Not Liable for Prosecution.

Orangeville, May 29.—The famous Orangeville case came to a sudden termination today when County Crown Attorney McKay announced that he had no evidence to put in against Douglas, accused of administering drugs, causing the death of the late Lizzie Wells. He was accordingly at once dismissed.

McKay read a lengthy typewritten statement giving reasons for abandoning the case against Douglas, the principal contention being, however, that he had been used as a crown witness and could not be proceeded against, having claimed and been promised protection under the Canada evidence act.

METHODISTS HAVE A HERESY CASE

Professor Workman's Orthodoxy Questioned by Principal Shaw.

Montreal, May 30.—The Montreal Conference of the Methodist Church, which opens at Gananogue, Ont., this decision will be called upon to give a referred to the mistaken impression of Germany's intentions conveyed by many foreign newspapers, which he deplored.

The Rev. Dr. Workman, who is the professor of Old Testament exegesis and literature in the Wesleyan College, stands for critical views of Scripture and for historical methods of interpreting Scripture. That was perfectly well known before he came to Montreal, and it is understood that he regarded his appointment as being made for the purpose of representing such views and of interpreting the Scriptures in accordance with what he maintains are the approved principles of exegesis. Recently, however, at a meeting of the governors of the college, the question was raised as to whether Dr. Workman really was teaching the doctrines of the Methodist Church to the young men studying at the college for the ministry.

Some Doubtful Views. Dr. Shaw, the principal of the college, replied at considerable length to the question, reading a document in which he alleged that Dr. Workman denied the doctrine of inherited depravity, the doctrine of the Trinity, and the doctrine of the atonement, as involving any expiatory element in the death of Christ. Further, he asserted that Dr. Workman denied the virgin birth of Christ, and rejected the genuineness and history of the fourth Gospel, and some other points of doctrine.

Having heard and discussed Principal Shaw's statement, the governors, by a vote of 9 out of 13, decided to inquire into the doctrinal attitude of Dr. Workman, and a committee of six, of which Principal Shaw was a member,

was organized to find out, in a friendly way, if possible, exactly what Dr. Workman's views are.

Libel Is Charged. Immediately after this, Principal Shaw received a complaint from Dr. Workman, charging him with libel. This charge was brought before a committee, appointed for that purpose, and after a session lasting for two and a half days, during which Dr. Workman gave lengthy evidence, the court rendered the following judgment:

"The said defendant (Principal Shaw) had reason to believe that the statements made by him were true at the time he made them, and we believe that in his position as principal of the college it was his duty to call the attention of the governors to the fact. We, therefore, find that the said charges are not sustained, and the defendant is not guilty."

Dr. Workman has since announced that he will appeal from this decision before the Montreal Conference, on this ground, among others, that at no time, and to no person, and in no period of his life, did he ever deny any one of those New Testament doctrines, but, on the contrary, has always believed and taught them as Scripturally as he was capable.

Don't bother knocking down a man of straw. Take him home and feed him to the cow.

Some exclusive London clubs purvey

ginger ale that vies in delicate crispness with York Springs Dry Ginger Ale, but does not equal it in purity nor excel it in flavor, pungency and aroma. Try it with Rye or Scotch, or straight, or with a dash of lemon juice—simply fine! Your club, favorite bar or merchant can procure it for you. Demand it by name.

York Springs Dry Ginger Ale, is better—yet costs no more.

PHYSICALLY EXHAUSTED?

You're out of joint with everything—lacking in courage—no nerve—scarcely on speaking terms with yourself. Such low spirits are pitiable. Your brain is fogged, vitality exhausted till your nerve-racked body has gone all to the bad. FERROZONE is what you need.

FERROZONE IS A BODY-BUILDER, A VITALIZER, A NUTRITIVE TONIC.

It's by making flesh and blood, by infusing iron and oxygen into the system that FERROZONE helps. It repairs the weak spots, instills energy, vim and endurance into worn-out organs—makes you feel like new. Why not use this grand restorative? It lifts you from the old, brings new resilience and buoyancy of spirits to the depressed. Be vigorous, manly, ruddy-colored, cast aside weakness and enter into that happy life that follows the use of FERROZONE.

Ferrozone is sold everywhere in 50c boxes, or six for \$2.50. By mail from N. O. Polace & Co., Hartford, Conn., U. S. A., and Kingston, Ont.

If one seeks speed in turf events he should hie himself to the professional races. For genuine, unadulterated fun, however, the matinee races are the best ever.

When it is considered that the matinee association, which was formed solely to promote amateur trotting and pacing events in this vicinity, only demands \$5 as a season's entrance fee, it is not hard to understand why such great interest is taken by local horsemen in the matches, and why the entry list is so large. Not but that the knights of the wagon would not pay more, but then the sum demanded seems so reasonable that no man possessed of a good horse could keep out of the game. The entrance fee entitles the member to the use of one of the association's track wagons and other accommodations.

Had certain of the horses yesterday not broken on the stretch it is hard to say just how the contests would have resulted. It is certain, however, that there will be a decided shifting about very shortly. Several of the horses showed class higher than the one in which they were entered, and as a consequence it is expected that they will receive a boost at the next meet.

The City League teams are scheduled to hook up as follows on Saturday: Perrins vs. Stars, McClarys vs. Rockets. If the Bakers win out, the Satellites will drop into last position, while the McClarys can reach the top of the ladder by handing the Rockets a lime. On the other hand, if the Stars trim the Perrin crew, and the tinware people lose out to the Rockets, Graham's bunch will jump into second position, while McClarys will slide down a notch.

In the other end of the city there are ties for stellar and cellar positions, and it behooves the Ramblers to trim the Wortmans on Saturday, if they would keep near the top. The Orions and Stars are slated for the first contest, and if the former finish to the good it will mean that they will go up to the top round, providing the Ramblers lose out to the foundrymen. If the Ramblers and Orions both win out the positions of the teams will remain unchanged.

The following item doesn't exactly apply to London as a whole, but then it sounds familiar, and would come pretty near the mark if it applied to ball game head of turf events:

Of course, you continue to gobble your lunch and beat it for the open cars to be in line for the first race. And some fine day you won't care whether you get to the track or not, and this will be when a C. P. R. train reaches the level crossing about the same moment as your open car. Race week the best you get is the worst, for after escaping the horrors of two level crossings you are permitted to go up against the cold, unsympathetic bookbaker. —Toronto Telegram.

At least six Canadian wheelmen will start in the annual roadrace of the Detroit Wheelmen's Club to be held today at Belle Isle, and from the appearance of the handicaps allotted, it is quite apparent that our brother athletes across the border have a healthy respect for the Canadian speedsters. The entries number in all about 100, and the largest handicap allotted a Canadian wheelman is four minutes. The limit men will receive a start of ten minutes. The Canadians entered and their handicaps are as follows: Fred R. McCarthy, Stratford, 1 minute; David Elzerman, Mitchell, 1 minute; W. Norton, Toronto, 3 minutes; W. J. Rogers, Toronto, 4 minutes; H. J. McDonald, Toronto, 4 minutes; and A. Harris, Hamilton, 4 minutes.

It was announced to The Advertiser this morning that at least four more events will be added to the large number already slated for the monster meet to be held in this city on July 1. The added events, which were placed on the programme at the express wish of the West End and Central branches of the Toronto Y. M. C. A., will be open to all-comers, and will include: Running broad jump, pole vault, throwing the hammer, and running high jump. This news will be welcome, indeed, to local athletes, as well as to the Toronto boys, inasmuch as there are a number of excellent athletes in those lines about the city. The Western University alone can supply a large entry list for the hammer throw and the running broad jump, while the pole vault should also bring out a big field of locals. In the running high jump London, is not so well fixed, and unless some dark horses develop, it is probable that the event will go to an outsider.

All arrangements have practically been made for the Marathon from St. Thomas, and several of the boys, including the famous Billy Amos, will make the course either on Monday or Tuesday. It has been decided to start the contest from the Columbia House, which is directly opposite the city hall, on the main thoroughfare of St. Thomas, Talbot street.

Beyond doubt the Dominion Day meet will eclipse anything of the kind ever held in the west, and the entry list will in all probability include over one hundred names. Already a number of entries have been received, and those in charge of the affair daily get communications from all parts of the Dominion, and even from American cities, inquiring as to prizes, events, etc. Locally, the people have not as yet thoroughly awakened to the greatness of the meet, but it is only a matter of time when everybody will be as enthusiastic over the affair as the veriest youngster entered in the school races.

SECOND SERIES SCHOOL LEAGUE

Schedule Commences on Saturday Next and Ends on June 22.

The schedule for the second half of the School League series is as follows: Saturday, June 1.—St. George's vs. Rectory, Dr. Bryant; Victoria vs. West London, J. Kirkwood; Talbot vs. Lorne, Mr. Quant; Simcoe vs. Colborne, Mr. Copeland.

Tuesday, June 4.—St. George's vs. Princess, J. H. W. McRoberts; Rectory vs. West London, W. J. Snelgrove; Colborne vs. Talbot, Mr. Campbell; Simcoe vs. Victoria, J. T. Parkinson.

Thursday, June 6.—Victoria vs. St. George's, W. B. Wyatt; Lorne vs. Simcoe, M. A. Althouse; Talbot vs. Rectory, E. Wyatt; Colborne vs. Princess, Inspector Edwards.

Saturday, June 8.—West London vs. St. George's, W. B. Wyatt; Lorne vs. Rectory, C. Brown; Princess vs. Victoria, Mr. McVicar; Simcoe vs. Talbot, J. T. Parkinson.

Tuesday, June 11.—St. George's vs. Simcoe, C. M. R. Graham; West London vs. Lorne, Dr. Bryant; Colborne vs. Victoria, Inspector Edwards; Rectory vs. Princess, W. J. Snelgrove.

Saturday, June 15.—Colborne vs. St. George's, Dr. Bryant; Lorne vs. Princess, Mr. Campbell; Simcoe vs. West London, J. Kirkwood; Victoria vs. Talbot, J. T. Parkinson.

Tuesday, June 18.—Talbot vs. West London, Mr. Copeland; Rectory vs. Colborne, C. M. R. Graham; Victoria vs. Lorne, M. A. Althouse; Princess vs. Simcoe, Inspector Edwards.

Friday, June 21.—Talbot vs. St. George's, B. Beal; West London vs. Princess at St. George's ground, W. J. Snelgrove; Victoria vs. Rectory, J. W. H. McRoberts; Colborne vs. Lorne, M. A. Althouse.

Saturday, June 22.—Lorne vs. St. George's, C. M. R. Graham; Princess vs. Talbot, Mr. Campbell; West London vs. Colborne, Mr. McVicar; Simcoe vs. Rectory, Mr. Copeland.

Saturday contests will begin at 10 a.m., and other games will be played at 2 p.m. The games will be played at the grounds of the teams first mentioned.

MATINEE ROAD DRIVERS PROVIDE GOOD SPORT AT QUEEN'S PARK

First Races of the Season—Four Events—Two Were Won in Straight Heats.

The first of the Road Drivers' Association matinees was held at Queen's Park yesterday afternoon, and to say that any one of the events was superior to the others on the card would be doing an injustice.

As a matter of fact each and every event was splendidly contested, and although the majority of the horses and many of the drivers had never faced a starter before, there was more genuine sport attendant on the races than is oftentimes the case at professional meets.

Fourteen horses started in the different classes, and the fun waxed fast and furious.

Class V. Best Race.

Possibly the best race on the programme from a spectators' standpoint was class V, which required four heats to decide the winner. Next in point of interest must be placed Class III, which was won by George McCormick's great little horse Skiddoo.

As was to be expected in a green field, breaks were as numerous on the back stretches as were scores at the post.

Two of the most popular victories of the day were those of Dr. Hughson's Rolo Rex and Mr. McCormick's Skiddoo, neither of these horsesmen having taken a contest all last season. However, all of the winners were accorded generous applause from the fair gallery of spectators, and interest was rife at all stages.

Class No. II. brought together Perfection, Pearl Carter and Dr. Jack, and it just took two heats to decide the winner, the horses finishing in the order named in both heats. To the unprejudiced onlooker it appeared that the drivers in this contest were slightly "backward about coming forward," and the time should have been several seconds faster.

Divided the Heats.

J. A. Brownlee's game little Dolly Red came under the wire a nose in front in the first heat of Class III, but was obliged to lower her colors to Skiddoo in the third and fourth heat.

Pandora taking the second heat, Dr. Hughson, who drove the winner of Class IV, Rolo Rex, created some little amusement by his original methods of coaching his horse on the home stretch.

"Nice little Rolo Rex," he would yell, "Beat 'em down, old Rolo. Don't let them beat us, Rex, old boy. One more foot! There, we've got 'em!" And Rolo Rex did win out, two straight, thereby taking the race.

The last bout on the programme consisted entirely of green horses, and it certainly taxed Starter Bert Wilcox's powers to the utmost to get the bunch away evenly.

Miss Bessie, piloted by her owner, Dr. Tennent, raked off first honors by taking the first and fourth heats, and the victory was a most deserved and splendidly matched one for the horses were exception of Quick Lunch, who persisted in breaking at the most critical moments.

Successful Season Promised.

If yesterday's events can be taken as a criterion, the matinee season promises to be the most successful in years.

Mr. Bert Wilcox did excellent service as starter, and his efforts gave all around satisfaction.

Summary.

Class I.—

WILLIAM FLEMING, Former Star Shortstop with the "Satellites."

Fleming, or "Billy," as he is familiarly known—broke into London City League company about five years ago, and has been identified with "Billy" Graham's group of diamond artists for several years. This year the popular little shortstop is playing with the crack Wellingtons, of Toronto City League fame, and he is making good with a vengeance.

Since the opening of the local season Fleming has made a London visit, and during his stay played two games with his old team mates.

Besides being one of the best players ever turned out in this city, "Billy" is most popular, and he has the best wishes of the local players and fans in his new field of endeavor.

ATHLETICS.

RELAY RACE JUNE 23.

Toronto, May 29.—The West End Y. M. C. A. has secured the date of June 23 for its attempt to lower the Central Y. M. C. A.'s Hamilton to Toronto relay time. Tommy Longboat and Meadows, the five-mile crack, will be in the team of nine men.

Pearl Carter, W. E. Robinson ... 2
Dr. Jack, Tennent & Barnes ... 3
Time, 1:21, 1:20 1/4.

Billy Wilkes, Garfield McCormick ... 2 2 2 2
Quick Lunch, F. Myers ... 5 5 4 4
Time, 1:23, 1:25 1/2, 1:24 1/2, 1:23 1/4.

New York, May 29.—In winning the Pocantico stakes today at Belmont Park, Zambesi equaled the track record for the mile and a sixteenth, 1:45. The Keene colt ran practically unbacked at 6 to 1, most of the money going on Dinna Ken, who won the Carleton stakes last Saturday, at Gravesend, though Arcite, the southern horse, had some support.

Ken got off first, but Miller sent Zambesi to the fore at the quarter, and won easily. Summaries:

First race, 6 furlongs, main course—Adoration, 110 (Miller), 12 to 5 and 4 to 1; Pretension, 126 (Muggrave), 11 to 6 and 4 to 5; Smiling Tom, 96 (Lowe), 9 to 2 and 7 to 5. Time, 1:13 3/5. Sir Taddington and Royal Onyx also ran.

Second race, 5 furlongs, straight—Colin, 110 (Miller), 6 to 5 and 3 to 1; Bar None, 110 (Koerner), 10 to 1 and 4 to 1; Harcourt, 110 (Shilling), 20 to 1 and 8 to 1. Time, 1:01. Spring Heel, Royal Lady, Lord Stanhope, Ace High, King Cobalt, Rock Cress, Bolando, Donnell, James E. Brady, Beggarman, Glorious Betsy, Filbert, Six O'Clock, Dixon Belle, Sequence, Firmament, Tom Shaw, Whidden, Joe Nealon, Wuerzburger, Norrilt, Faran O'Earl, and Fashion also ran.

Third race, selling, 6 furlongs, straight—Beggarmaid, 89 (E. Dugan), 8 to 1 and 3 to 1; Rosemount, 109 (Radtke), 8 to 1 and 3 to 1; 2; Woodwith, 104 (Liebert), 20 to 1 and 8 to 1. Time, 1:14. El Dorado, Ace High, Royal Lady, Lord Stanhope, The Wrestler, Herman, Pontoon, Berkeley, Acrobat, Jersey Lady, Lee Harrison II, Rio Grande, Pass Him Out and Loyal also ran.

Fourth race, Pocantico stakes, 1 1/16 miles—Zambesi, 118 (Miller), 6 to 1 and 3 to 1; Arcite, 126 (Troxler), 5 to 2 and 3 to 1; Dinna Ken, 123 (Koerner), 7 to 10 and 1 to 4. Time, 1:45.

Fifth race, selling, 7 furlongs, main course—Ontario, 115 (Shilling), 20 to 1 and 8 to 1; 1; Topsy Robinson, 113 (Miller), 3 to 1 and 6 to 5; 2; John Smulski, 114 (Troxler), 8 to 1 and 3 to 1. Time, 1:27. Battle Axe, Azora, Water Pansy, Prince Ching, Charlie Thompson, Ocean Spray, Commune, Cobleskill, Royal Ban, Savable, Flyaway, Master Lester, God Julia, Gratton and Umbrella also ran.

Sixth race, 1 mile—Lady Alicia, 96 (Preston), 7 to 1 and 6 to 5; 1; Mintoria, 96 (Brusell), 13 to 10 and out; 2; Orange and Blue, 110 (Miller), even and out. Time, 1:41. State three others.

CRICKET ASSOCIATION TO BOOM CRICKET

Matter of Encouraging Old English Game in Canada Under Consideration.

Toronto, May 29.—The Canadian Cricket Association and the special committee appointed by that body, will hold meetings in the course of the next two weeks and the question of forming district associations throughout Canada, will be discussed. The Canadian Cricket Association has taken up the matter in earnest, with a view to encouraging the game, more particularly in the rural districts. Mr. W. McCaffrey, chairman of the committee, has sent out a letter to every important center in Canada urging the formation of district responses, but as yet no responses have been received. When these come in a representative meeting of cricketers from all parts of the Dominion will be held in Toronto. Mr. McCaffrey does not entertain any hope that much can be done this season, and stated this morning that the committee was laying its plans for next year.

The Canadian Cricket Association is at present simply composed of representatives of individual clubs. Toronto is the cricket center of the Dominion and it practically controls the association. Interest in the game is increasing, both here and elsewhere. Mr. McCaffrey stated this morning that the number of clubs was on the increase, there being between 25 and 30 in the city now.

MILLER NAMES TEAM FOR AUSTRALIAN TRIP

John C. Miller, of Orillia, president of the C. L. A. last year, has succeeded in getting together a team to accompany him to Australia. He an-

nounced at Toronto yesterday that the following lacrosse players would go: R. J. Ahrens, Orillia; Walter Atton, Toronto Junction; Lou Campbell, Bradford; J. M. Kearns, Arthur; Hanley, Stratford; Tom Hanley, Midland; Harry Campin, Toronto Junction; Frank Grace, Ampror; Jack Curran, Orillia; Fred Coombs, Bradford; Paddy Ramore, Fergus; Gordon MacDonald, Port Arthur; Victor Graham, Bradford; Robert Gilbert, Toronto Junction.

Besides these players, Dan Hogarth, of Port Arthur, and W. J. Findley, of Winnipeg, who has played several years on Vancouver and New Westminster teams, will accompany the team.

The team will play the Checkers of Beaverton at Orillia on Saturday. They will be tendered a banquet by the citizens at the Orillia House on Monday night. The team will leave on Tuesday, June 4, for Port Arthur.

THE OAR.

TOWNS TO ROW WEBB. London, May 29.—An Australian dispatch says Charles Towns will row Webb, of New Zealand, for the sculling championship on the Paramatta on Aug. 3.

George Towns handed over the championship to his brother Charles on April 8, having defeated Durnan on March 2 of this year. Webb immediately challenged Charles Towns.

YACHTING.

GETS NEW YORK SKIPPER. Rochester, N. Y., May 29.—Addison G. Hanan, of New York, was selected by the Rochester Yacht Club as skipper of the new yacht Seneca for the Canada cup races next August.

This means that Rochester has abandoned the idea of defending the trophy with home talent. L. G. Mabbett, of Rochester, defended the cup successfully in 1905, but he had such a close call that the task of defending the Fisher cup was assigned last year to Commodore Christie. He failed. Consequently, Rochester has gone back to New York for help.

HANNA AT MT. FOREST

With Armstrong and Montgomery Addresses Conservative Rally.

Forest, May 29.—Provincial Secretary Hanna, J. E. Armstrong, M. P., and Hugh Montgomery, M. P. P., were the principal speakers at a Conservative rally held here today. Mr. Hanna devoted his time largely to an effort to prove that the Conservatives had redeemed all promises made when in opposition. He also referred at some length to the Whitney rural school policy, incidentally admitting that the Government had blundered in the matter of compulsory salaries for teachers. He claimed that the present educational system was an improvement on that of the Ross Government.

Mr. Hanna was preceded by Mr. Montgomery, who defended the mining policy of the Government.

Mr. Armstrong's address, as might have been expected, consisted of a wholesale condemnation of the Dominion Government. In his anxiety to denounce the Laurier administration, he rather overdid it, much to the amusement of many of his hearers, by declaring that the Liberals had not passed a single measure of national benefit since entering into power.

BARRED FROM RUSS BOATS.

St. Petersburg, May 30.—Instructions have been issued, through the Russian consulate in London, to the Russian steamship lines to refuse passages to the Social Democrats, members of the Lower House of Parliament, who have been holding a congress at the British capital.

THINK DEATH ACCIDENTAL

Friends of Dr. James Gray Do Not Believe He Suicided.

The wife of the late Dr. James Gray, of Rochester, New York, whose death occurred suddenly, had been visiting in this city with her father, Mr. Frank Jarvis, of South London. Accompanied by her sister, Mrs. Owens, of Elmwood Avenue, she left for Rochester yesterday.

A dispatch from Rochester says that the friends of the deceased doctor do not believe he took his own life, but that instead his death was caused by an overdose of sleeping powders, a box of which was found in his bedroom.

EMPIRE DAY EXERCISES

Presentation of Prizes by Daughters of the Empire Yesterday.

Empire Day was celebrated in a very pleasing manner at Princes Avenue school yesterday, when Mrs. Barty, on behalf of the Endygar Kipling Chapter of the Imperial Order of the Daughters of the Empire, presented a number of prizes.

An Grade VI A., for patriotic essays, the prize-winners were: Sterling Love and Reginald Sabornie.

In Grade VI B.—Marion Higgins.

In Grade V., for patriotic recitations—L. Carl Edmunds; 2, Joan Rowat.

In Grade III., for exemplary conduct—Minnie Beaton.

In Grade II. A.—Lola Graham and Norman Winegardner.

In Grade II. B.—Arnet Bancet and Donald Fraser.

AN EFFICACIOUS PRESCRIPTION FROM THE PHYSICIAN OF SOULS

Christ's Invitation to the Sick Presented by Rev. Dr. Wharton.

There was the usual large attendance at the Jubilee Rink last night, when Rev. Dr. Wharton conducted another of the series of evangelistic services which are being held there with such great success. The choir, which is steadily increasing in numbers, rendered some splendid music, while Dr. Lau, the director, sang in his usual pleasing manner.

Before beginning his sermon Dr. Wharton took occasion to speak of the importance of and great benefit which would arise from all persons present spreading the message received at the meeting among their friends. "Take the bread and pass it around," he said, "and see what good that will be for us," said Dr. Wharton.

"If one should ask me to give them a portion of Scripture which would set forth in a few words the way of salvation, I think I would turn to the tenth chapter of Romans," said Dr. Wharton, who then read this chapter and went on to say:

"Every Christian here tonight, having believed in the power of Christ to save, may rest assured that no charge can be laid against him. All our sins have been charged up to Christ."

All Need Salvation.

"It is a great thing when a preacher and his congregation can start together fully agreed, and I am sure that I can safely say here tonight that we are all wanting to be saved, and to ask you to consider tonight the following words of our Saviour: 'Look unto me and be saved, all the ends of the earth.' I want to tell you that when that voice arises up within us, inquiring about our soul's salvation, it is very hard to quiet it without giving it a satisfactory answer.

The Christian Doctor.

"I do not know of a better blessing in any community than a Christian physician. I would not let an infidel doctor attend to my dog if he was ill.

"Oh, when I come to die, let me have at my bedside a Christian physician, who can pray with me, and who understands that I have a soul, which is either to be lost forever, or to gain everlasting life and happiness."

Dr. Wharton then went on to speak of the great opportunity which is before us of preaching salvation to many a poor, suffering being, whose life is perhaps ebbing away, and whose soul is about to drift out into an eternity of everlasting darkness—to be lost forever. Often the persons lying on a bed of sickness have had time to think and consider the great matter of their soul's salvation, which makes it a very opportune time to tell them of God's great way of salvation. In this connection, Dr. Wharton told of Dr. Howard Kelly, of Baltimore, who is admitted to be one of America's greatest doctors. He would not treat a patient without first kneeling down by the bedside and praying God to help him in his treatment.

"God deliver us from these young upstart physicians, who think that because they can cut a man up that they have discovered that he has no soul. I am sure that if we could cut this class of doctors up we would find very little soul," said the evangelist.

A Powerful Prescription.

"Look unto me and be saved." I can hear someone say that is so simple. I wish to say to such a one that Jesus took into consideration when arranging his great method of salvation, that little children and children had to be saved. Look! Just look! But let us see what there is in this look. Let us

SPLENDID OUTING FOR THE NURSES

Staffs of Victoria and St. Joseph's Guests of Dr. John D. Wilson at Dorchester.

The nurses of Victoria and St. Joseph's hospitals were yesterday treated to a picnic at Dorchester, by Dr. John D. Wilson, and the affair proved a most delightful one. There were about 100 nurses present, and in addition a number of gentlemen, including Drs. Wilson, Niven, Danforth, McQuaid, Blackwell, McGuffin, W. J. Stevenson, H. A. Stevenson, Messrs. T. J. Murphy, J. M. Daly, Geo. B. Harris, S. S. Searson, Frank Love, B. C. McCann, Ald. Gillean and Superintendent Heard, of Victoria Hospital.

At two o'clock the party left the Grand Trunk depot in special car, and upon arrival at Dorchester, at once set in to have a good time. A baseball match was played between the nurses of St. Joseph's and Victoria, which was won by the latter; a number of athletic events, including a tug-of-war, which was declared a tie; boating on the river, and some fishing.

Every event was keenly contested, and the afternoon proved one of great enjoyment for all. The following are the results of the different events: 100 yards race—Miss Archer; 2, Miss MacAulay; 3, Miss MacVicar; Hurdle race—Miss Archer; 2, Miss Traynor; 3, Miss MacAulay. Throwing the baseball—Miss MacAulay won, but Miss Henry and Miss Archer made splendid throws.

Egg and spoon race—Miss Sinclair; 2, Miss Roche; 3, Miss MacVicar.

Lovers' race—1, Miss Archer and Mr. McCann; 2, Miss MacVicar and Mr. Searson; 3, Miss Traynor and Mr. Harris.

Two boat races on the river then attracted the attention of the visitors.

A VERY GRATEFUL FEELING.

Nothing freshens one so much as to clear the nostrils and air passages with the vapor of Catarrhzone. It drives away catarrh, cures colds, removes hoarseness, keeps out disease germs. Isn't Catarrhzone what you need? Get it today.

find out if there is not a great deal in this look."

To illustrate the thought which he was about to suggest, Dr. Wharton asked the audience to picture with him a child looking to its father for its daily bread, and in its helplessness depending on him for its all. "Does not the child's looking to the father mean a great deal to that child?" asked the speaker, who continued to show that we, poor, weak mortals, must look to Christ for strength to fight the hard battles of life and come out victorious; for strength to bear life's burdens, and for courage to meet death. "And when we cry to Christ for help," said he, "he bends low, and says, 'Look to me.'"

Life for a Look.

"There is life for a look at the crucified one. Then, my friend, look, and be saved."

"Oh, but the devil does suggest so many troubles in the way of our accepting salvation. Satan is fortified by the audience to picture with him a child looking to its father for its daily bread, and in its helplessness depending on him for its all. 'Does not the child's looking to the father mean a great deal to that child?' asked the speaker, who continued to show that we, poor, weak mortals, must look to Christ for strength to fight the hard battles of life and come out victorious; for strength to bear life's burdens, and for courage to meet death. 'And when we cry to Christ for help,' said he, 'he bends low, and says, 'Look to me.'"

"Some ask, 'Why look to Christ for salvation?' We must look to Christ for salvation because there is no other to whom we can look. I have heard it said that procrastination was loss of time, and I would like to say that procrastination is loss of souls.

Only One Way.

"How often we hear these brothers-in-law, strutting around, saying: 'My brother's wife prays and goes to church, and I pay.' Others say that their wives pray and they expect that a wife can pray for both. My dear friend, your wife cannot save you, and, more than that, you cannot save yourself. So many say 'I am not so bad. I am no great sinner.' I do not see what you are doing trying to save yourselves and trusting in your own power instead of in Christ's. There is only one way to be saved, and that is through Christ.

"Look unto me and be ye saved all the ends of the earth, can be interpreted in two ways," said Mr. Wharton, who explained that it might be interpreted that all parts and all peoples of the earth would be saved by looking to him, or that those who have sunk so far down in sin that they are outcasts and are known as the 'ends of the earth,' could be saved.

At the "After-Meeting."

At the close of the meeting, Dr. Wharton called on all who had relatives, either sons and daughters, brothers and sisters, husbands or wives, or any friends whom they knew were not saved, and wished to have them prayed for, to come up to the front during the singing of the old Gospel hymn, "Just as I Am." The ladies were asked to take the space to the right side, and the men to the left. As the audience rose to sing, many mothers, fathers, brothers and sisters, gathered about the evangelist. The invitation was then made broader, and any little children who wished to have a father or a mother prayed for were asked to come to the front. At last an invitation was extended to all who felt that they needed the help of the Saviour in any matter, even their own soul's salvation, to come forward. By this time a very large number had gathered at the front, and Dr. Wharton engaged with them in a silent prayer, after which Mrs. Thornley offered a prayer, and the meeting was brought to a close with the singing of the familiar hymn, "Almost Persuaded."

The first event was won by Miss Hagar, while Miss MacVicar carried off honors in the second race.

The event of the day was then witnessed in it was the baseball match between the nurses of Victoria and St. Joseph's.

Ald. Gillean umpired, and while he appeared in mortal dread of being mobbed, he managed to keep his eye on the game and gave no decisions which could be construed into a casus belli by either side.

The teams were composed of the following young ladies: Victoria—Miss Darville, captain; Misses Archer, MacVicar, Gilmour, Large, Armstrong, Macaulay, Sinclair and Arlson.

St. Joseph's—Miss Henry, captain; Misses Butler, Woolson, Lenahan, Traynor, Baye, Kenny, Roche and Raycroft.

The Victoria girls put up a strong game and won out, but the St. Joseph nine had nothing to feel ashamed of, and Mr. Frank Love coached for the former side, and Mr. McCann for the latter.

Thus the game sounded like an auction sale for a while, but the young ladies made the most of the acres of advice hurled at them.

When the smoke of battle cleared away after five innings, the score stood 4 to 7 in favor of Victoria.

A tug-of-war was then brought on, the teams being composed as follows: Victoria—Miss Sinclair, captain; Misses Reynolds, Uren, Darville, Armstrong, Pringle, Macaulay, Large and Wilson.

St. Joseph's—Miss Henry, captain; Misses Baye, Hobbs, Traynor, Woolson, Lenahan, Kenny and Durkin.

Each side had a pull which would put that of a ward politician to shame, and the result was the contest was declared a draw by Referee McCann.

Refreshments were then served under the supervision of Mrs. Horner, after which there were some songs by Mr. J. M. Daly and others.

At a seasonable hour the party returned to London, tired out, but feeling that each and every one had had a most enjoyable time.

MANGLED BY EXPRESS.

Hamilton, May 29.—W. G. Lemmo, a piano agent employed by George W. Carey, of Hamilton, was instantly killed at Hagersville this morning by being struck by an M. C. R. express. He tried to cross the tracks in front of the incoming train, and was struck and thrown about thirty yards. His body was terribly mangled. Deceased's home was in Grimsby, but he had been employed in Hamilton for about four years, and owned considerable property here.

LET FOREIGNERS IN.

St. Petersburg, May 29.—The commission under the presidency of the minister of commerce, which has been considering the future of the Russian half of the Island of Saghalien, has decided in favor of permitting foreigners, with the ministers of commerce, finance and agriculture, to exploit the mineral wealth in that part of the empire.

Notice to the Public.
