Forty Years Ago.

Opening of Christ Church, Athens, November 13th, 1884.

(From the Brockville Recorder, Nov. 14th, 1884)

of worshippers assembled each Sabbath in the Baptist Church, Farmers ville. They were under the ministration of the Rev. Mr. Bridge, an English clergyman, connected with the Reformed Episcopal Church, of which Bishop Ussher was the head in Canada. The reverend gentleman in a short time attached himself to the Church of England, and when the parish of Leeds and Lansdowne was divided he resigned, the Rev. R. N. Jones succeeding to the incumbency of Lansdowne and Farmersville. The advent of the new pastor brought new life with it, and the little body of communicants gradually assumed larger proportions until to-day the membership numbers over a hundred with a flourishing Sunday School of thirty scholars. The Rev. Mr. Jones was one of those disseminators of the gospel whose zeal and earnestness tended to imbue his little flock with enthusiasm, and through his efforts a movement took place having for its object the erection of a House of God. Consequently a year ago

Mrs. Jones, and Messrs. Moles and last June the corner-stone was laid and immediately after the work was commenced, which culminated on Thursday (November 13), in the opening, with impressive services, of a handsome edifice built upon land generously donated by Mr. S. A. Taplin, of Farmersville, a member of another congregation. The pretty little church stands on the slope of a hill, commanding a view of the fine rolling country for which this section is noted, while away to the southward the waters of the beautiful Charleston Lake dance and sparkle in the aunshine. The building is of brick, 78 feet in length, the main portion length being 42 and the chancel 36 feet and the width 46 feet. The spire is 114 feet high, slender and grace.

"At the evening service the church was again crowded, the schoir sang "Jesus, Lover of My Soul," after which Rev. Mr. Wright read the evening service, Rev. G. J. Low read the first lesson, and Rev. Mr. Codd the second lesson. "O Lord of Heaven and Earth and Sea" was then sung. The Rev. Mr. Crawford took his text from 2nd Chap. of St. John, part of the 16th verse and 21st chapter of St. Matthew, part of the 13th verse. The reverend gentleman preached in his usual excellent manner. At the offertory, Miss Mills sang that pathetic aria, "Eve's Lamentation," from King.

"The Farmersville brass band, under the leadership of Mr. H. Kincaid. and immediately after the work was is 114 feet high, slender and grace-ful, while a starling along the roof will add beauty to the edifice. The stained glass windows are of hand-some and rich design, the work of Mr. Horwood, Prescott.

"The interior of the church strike one as being finely arranged. The seating capacity is 300 with the latest improved bench pews. The chanest improved bench pews. The chan-cel is handsome, the woodwork being of ash in tasteful design. Altogether the tout ensemble of the edifice reflects credit on the congregation and the village of Farmersville. The understand, approaches

"Thursday morning dawned with lowering clouds, but they had no ef-fect on the earnest workers who had been preparing for some days for the opening of Christ Church for public worship. From an early hour the people began to arrive until 10 o'clock the auditorium contained upwards of 600 while a large number were unable to gain admittance. At half-past ten the choir sang that beautiful processional hymn, "Onward, Christian cessional hymn, "Onward, Christian Soldiers," the clergy marching from the vestry to the main entrance and thence up the aisle to the chancel where they ranged themselves on either side. They were the Rev. R. N. Jones, incumbent; Rural Dean Nesbitt, Smiths Falls; Rural Dean Grout, Lyn; Revs. E. P. Crawford, G. J. Low, Brockville; Osborne, Frankville; Codd, Lyndhurst; Wright, Newboro; Fidler, Lombardy; Redcliffe, Maberly, and Coleman, North Augusta. The reading of morning prayer was proceeded with, the hymn "Blessed City, Heavenly Salem," being, after which Rev. Rural Dean Nesbitt read the commandments, the rethe vestry to the main entrance

read the commandments, the responses being choral. "The Rev. Mr. Jones regretted the fact of the absence of the Lord Bishop of Ontario, resulting from pressure of duties at this time of year. His Lordship would be with them, how-ever, at no distant day.

"Rural Dean Grout preached the opening sermon, which was eloquent-ly delivered. In the course of his reopening sermon, which was eloquently delivered. In the course of his remarks he congratulated the congregation on the occasion which had brought them together. Not only the willing workers who had erected this handsome edifice for the worship of God, but all churchmen throughout the diocese were to be congratulated. It was a day of rejoicing to those inside and outside the parish. When he had visited Farmersville a few years ago he never dreamed that it was in the bounds of possibility that a beautiful church, so admirably adapted to the wants of the congregation, would be opened this day. But it was erected by busy hands, aided by willing hearts. He urged upon his hearers to desist not from their efforts until every dollar of the debt which remained on the edifice be paid. The congregation, by their liberality and self-denial had provided a place of worship not only for themselves but for their children's children, and he must once more congratulate the members upon the fruits of their labors. The reverend gentleman antone on the death of the congregation on the death of the congregation of the debt which remained on the edifice be paid. The congregation, by their liberality and self-denial had provided a place of worship not only for themselves but for their children's children, and he must once more congratulate the members upon the fruits of their labors. The reverend gentleman antone of the death of the congregation on Monday is the very dollar of the debt which remained on the edifice be paid. The congregation, by their liberality and self-denial had provided a place of worship not only for themselves but for their children's children, and he must once more congratulate the members upon the fruits of their labors. The reverend gentleman antone of the death of the

"Some four years ago a little band imadverted in eloquent terms to the improved intelligence of the religious bodies of the present day which believed that the House of God could not be too beautiful for the worship

not be too beautiful for the worship of that Great Being.
"During the offertory, Miss J. Florence Mills, of Iroquois, a distinguished pupil of Dr. Couture, Montreal, sang Beethoven's "The Heavens Declare His Glory" in a masterly man-

Notes.

"Mr. F. Pierce was the contractor, and Mr. O. E. Liston the architect. "Mr. A. E. Donovan presented handsome communion service.

"The ladies of the congregation worked early and late and by their strenuous efforts did much towards

the success of the day.

"The Rev. G. J. Low, of Brockville, lectured in the afternoon, and was listened to in rapt attention by a

large congregation.
"The basement of the church is finely adapted for Sunday School, entertainments, etc. Over 600 partook of an excellent dinner and tea within its precincts.
"Christ Church possesses a very

Ross.
"At the evening service the church

preached in his usual excellent manner. At the offertory, Miss Mills sang that pathetic aria, "Eve's Lamentation," from King.

"The Farmersville brass band, under the leadership of Mr. H. Kincaid, are to be congratulated on the success they achieved during the day. Their services had been offered gratuitously, and the merited enconjums uitously, and the merited enconium passed upon their playing were well

"Considering the fact that the congregation of Christ Church is a small one, it is doubly to their credit that the debt of their fine edifice is nearly wiped out, only about \$300 remaining unpaid. Very few places in the Dominion could boast of such a flourishing state of affairs. We are in possession of the names of the donors but space will not permit of their

publication.
"In the evening the debt was all provided for—subscriptions, \$753; dinner, \$200; offertory, over \$50."

PLUM HOLLOW

Plum Hollow, Oct. 23.-The memorial service held for Lindon Talbot on Sunday last was well attended.

The Ladies' Aid meeting was held

on Thursday last at the home of Mrs. Wiltse. John Stewart has sold his farm to moving to Athens.

Mr. and Mrs. C. Chant spent Satur-

day at New boyne.
Charles Wiltse has returned to his home in Michigan after a visit with

his brother, J. R. Wiltse.

A number from here attended the temperance mass meeting at Athens on Sunday night.

Mrs. Orm. Jackson and son, Ford, were recent Delta visitors. Mr. and Mrs. Jacob Chapman spent Wednesday at L. E. Chapman's, Hard

Mr. and Mrs. J. W. Leahy and children, of Brownville, N.Y., were weekend visitors at W. B. Newsome's. W. T. Yates leaves shortly to take up residence in Athens.

Interscholasti c Rugby

On Sat. Oct. 25th, Athens H. S. Rugby Team journed to Smiths Falls to meet the Collegiate Team there in a Rugby game. The day was exceedingly warm and the boys seemed eager for the fray.

The first quarter decidedly belonged to Athens, the local boys gaining yards continuously until the opposing team were fighting on the defensive, dangerously near their goal line. Towards the end of the quarter, Captain Layng called for a kick which should have given Athens 1 point. but the play was blocked by a Smiths Falls player who got through the Athens line. From that time on the play seemed more even until the close of half time.

On the beginning of the third quarter Smiths Falls gained one point by a kick. After this the game seemed to go more and more against our boys until the close when the score stood 11-1 in favour of Smiths Falls. The boys came home some what disappointed but hope to regain the lead.

The line-up of the teams was:-Athens, -Snap, Hanna; Insides, Fair, Hollingsworth; Middles, Mainse, Tennant; R. wing, Holmes; L. wing, Johnston; flying wing, McFadden; quarter back, Layng; halves, Beale, Russel; full back, Foxton.

Smiths Falls,-Snap, McCoon; insides Hilfoil, Clark; middles, Henniger, Preson; wings, Cohen, Silver; flying wing, Earl; quarter back, Parsons, halves, Babcock, Demeul; full back, Moffat.

Fortieth Anniversary.

The fortieth anniversary of the openng of Christ Church, Athens on Nov. 13 promises to be a historic event. All the former rectors who are living have signified their intention of being present namely, the Rev. R. B. Patterson, now rector of Woodbridge, who was rector of Christ Church from 1904 to I911; Rev. W. G. Swayne, L.Th. now rector of Bath and Earnestown, who was rector of Athens from 1911 to 1918; and the Rev. Geo. Code M.A., rector of Newboyne and Lombardy who was here 1918 to 1920.

The Rev. R. N. Jones who was rector forty years ago, from 1882 to 1889 has sinced passed to his great reward, but we hope his widow, Mrs. Jones of Arthur Watts, of Addison, who has taken possession. Mr. Stewart is W.o. Whight, who was rector from 1889 Win. Wright, who was rector from 1889 to 1904, will be represented by his son, Rev. James deP. Wright M.A. B.D., rector of St. Luke's Church, Kingston. The anniversary services on Nov. 13th will be as follows;

11:00 a.m. Holy Communion 12:00 a.m. Anniversary Dinner. 3.00 p.m. Addresses from visiting

clergy. 5.30 p.m. Anniversary Supper. 7.30 p.m. Anniversary Service.

NOTICE

In view of the unpleasant rumors circulating, relating to the bakery or Elgin St., at present occupied by Lewis Stevens, the writer wishes to inform the Public that Mr. Stevens rented the said property from me for a term of Maitland was once more plunged into gloom on Monday when it became known that Mrs. Hiram, Lemon had Stevens and myself the property would have been vacated on the expiration of lease. I have therefore been presented with an opportunity and have again leased these premisses to Mr. A. Hagan of Gananoque, who will take possession on the 15th day of December

At about one a.m, on Thursday morning fire from an unknown origin broke out at the home of William Cross about one half mile from Athens. The barn and stables were completely destroyed with the season's crop and a very valuable race horse belonging to Mr. Nelson Cross.

Mrs. M. Mackey, of Kemptville,
spent the week-end with P. Spero.

Mrs. Hany Selleck returned to Great Bend, N. Y., after having spent the past week with friends here.

WILL TEACH WOMEN THE ART OF SHOPPING

Most husbands and fathers would agree that women are natural born shoppers and that they don't need to

be taught—it's a gift.

The point is, however, that many of them do need to be taught intelligent buying so they can get the value of the dollars they spend. For this reason, New York University has added a course in buying,

and Miss Elizabeth Dyer has been

made instructor.

Miss Dyer is a Vassar graduate whose desire to do social service took her to a department store. Her educational work among the girl clerks and her experiences there gave her such a wide knowledge of selling that

Fortieth Anniversary.

The fortieth anniversary of the opening of Christ Church, Athens on Nov. 13 promises to be a historic event. All the former rectors who are living have signified their intention of being present namely, the Rev. R. B. Patterson, now rector of Woodbridge, who was rector of Christ Church from 1904 to I911; Rev. W. G. Swayne, L.Th. now rector of Bath and Earnestown, who was rector of Athens from 1911 to 1918: and the Rev. Geo. Code M.A., rector of Newboyne and Lombardy who was here 1918 to 1920.

The Rev. R. N. Jones who was rector sinced passed to his great reward, but John Stewart has sold his farm to we hope his widow, Mrs Jones of Arthur Watts, of Addison, who has Brighton will be present. The Rev. Win. Wright, who was rector from 1889 to 1904, will be represented by his son, Rev. James deP. Wright M.A. B.D., rector of St. Luke's Church, Kingston. The anniversary services on Nov. 13th will be as follows;

11:00 a.m. Holy Communion 12:00 a.m. Anniversary Dinner. 3.00 p.m. Addresses from visiting

clergy. 5.30 p.m. Anniversary Supper. 7.30 p.m. Anniversary Service.

NOTICE

In view of the unpleasant rumor circulating, relating to the bakery on Elgin St., at present occupied by Lewis Stevens, the writer wishes to inform the Public that Mr. Stevens rented the said property from me for a term of one year only from December 14th 1923. Due to reasons well known to both Mr. Stevens and myself the property would have been vacated on the expiration of lease. I have therefore been presented with an opportunity and have again leased these premisses to Mr. A. Hagan of Gananoque, who will take possession on the 15th day of December

L. M. Scott

At about one a.m, on Thursday At about one a.m. on Indisawa morning fire from an unknown origin broke out at the home of William Cross about one half mile from Athens. The barn and stables were completely destroyed with the season's crop and a very valuable race horse belonging to Mr. Nelson Cross.

FAIRFIELD

Fairfield, Oct. 20.—Mr. and Mrs. orace Glazier spent Sunday with rs. Ira Billings at Fairview.

WILL TEACH WOMEN THE ART OF SHOPPING

Most husbands and fathers would gree that women are natural born shoppers and that they don't need to be taught—it's a gift.

The point is, however, that many of them do need to be taught intelligent buying so they can get the value of the dollars they spend. For this reason, New York Uni-

versity has added a course in buying. and Miss Elizabeth Dyer has been made instructor. Miss Dyer is a Vassar graduate.

whose desire to do social service took her to a department store. Her educational work among the girl clerks and her experiences there gave her such a wide knowledge of selling that she decided to make retailing he

One of her tasks is to arrange for actual store experience in the big New York department stores for students of the university.

IMPROVEMENTS TO ELGIN TOWN HALL BROUGHT TO CLOSE

What's New in That Village and Its Vicinity.

PROHIBITION GATHERINGS

Few Centres in the Surrounding District Left Unvisited by "Dry" Forces.

Elgin, Oct. 21.-The town hall which has been undergoing improvements, is now completed.

Mr. and Mrs. Carman Blair, Metcalfe, were week-end guests of her father, S. M. Halladay. Mr. and Mrs. J. Jennock are mov-

ing into H. Coon's house, recently vacated by Mr. and Mrs. J. S. Smith. Miss Gladys Soper suffered an attack of appendicitis last week, but has sufficiently recovered to return to the Athens High School. Master Joseph Sullivan was able to

return home on Sunday from St. Vincent de Paul Hospital, Brockville, where he underwent an operation for appendicitis several days ago.

Mrs. A. L. Campbell has gone to a
Kingston hospital to undergo an peration.

On Sunday evening G. F. Warren and J. B. Pinkerton held a plebis-cite meeting at California Church. A goodly number from here went over. The same programme was lis-tened to with much interest here in the Methodist church on Sunday evening. Both gentlemen proved themselves able platform speakers. Miss Muriel Powers is visiting friends in Watertown, N. Y.

Beatrice and the Rose

BY HONORE WILLSIE.

PART II.

Beatrice at any other time would you see it! Come Grandfather!' have noticed Grandfather Edgren's engrossed with her own work that all aglow with the yellow of the sun even her father's scolding voice fell shine and the flutter of dragon-fly on unhearing ears. Each morning she wings, and all adrone with honeybees. rose a long hour before breakfast, and Over in the far corner, near the locust was out in the fragrant dewiness of trees, they paused, the old man with her garden almost as soon as the flowers spread their petals to catch the the girl with a sigh of great content. level rays of the rooted, slipped and sorted and threw from the other plants, grew the rose, away, now clipping with pruning a thing of such fragile perfection that shears, now wielding her trowel, now one trembled lest the butterfly which walking back and forth with thought-

It was on the fourth morning after Grandfather Edgren had sent his letter that Beatrice came in to breakfast late, her face flushed, her heavy hair time was. tumbled, her eyes wide with a new joy.
"Grandfather!" she cried.

the garden an hour ago!"

Beatrice made no answer, but her locust trees. lip trembled and the joyful look faded a little. She drank her coffee in silence, then waited for Grandfather long pause. In the years among her Edgren to finish his breakfast. Her flowers, she seemed to have absorbed Edgren to finish his breakfast. Her flowers, she seemed to have absorbed much of their sweetness and charm,

As soon as the sound of his footsteps died away, Beatrice leaned toward the eager-eyed old man.

"It has bloomed, grandfather!" she "What " cried Grandfather Edgren, "I thought it was not due for another

week!"
"So did I at first," replied Beatrice,
"but I knew it would be several days early when I looked at it on Sunday, and since that I've been trying to keep you away from it, to surprise you." The old man rose.

"And is it," he said with trembling pagerness, "is it as-

"Grandfather!" she cried.
"For heaven's sake, Beatrice," interdid not hear the click of the garden rupted her father, "can't you come to gate nor the sound of footsteps on the your meals on time? You've been up bricked walk. These sounded briskly long enough—I heard you at work in at first, then hesitated, then moved slowly across the garden toward the

Half-way to the trees, the young man stopped. Beatrice was worth sort of way, then tramped from the and it was small wonder that the heart of the young man stopped and then went on with unaccustomed rapidity. The slender girl, with masses of waving dark hair above the longlashed gray eyes, with a mouth like a curled rose leaf and a chin that held the suspicion of a dimple-truly she was as lovely a thing as the rose over

At length the young man moved forward. Grandfather Edgren gave a start, and held out a welcoming hand. He knew that the answer to his letter

"I came," said the young man, after he had been introduced to Beatrice, "to see your flowers and to—" His eyes fell upon the rose, and with a half-articulated expression of wonder he bent above it. "Tell me," he cried, "what variety of rose is this?"

"Well, I haven't named it yet," answered Beatrice, blushing a little. "I've been working over it for two years, and it only bloomed this morn-

"Well, not really by myself. I've flected in Beatrice's own glowing eyes. had grandfather's help, and the view from the pasture gate, and the flowers themselves are an insuitation."

"Beatrice," he said, "your father is the most surprised man in three counterments of the most surprised man in three counterments."

"Beatrice," he said, "your father is the most surprised man in three counterments." themselves are an inspiration."

"Why, the place is full of new varlety," he exclaimed, and he hurried to the other, with a tender little smile dawning at the corner of his kind old Then he turned to Grandfather Edgren, who was following in an ecstasy of delight. "Why, this is marvelous! Your daughter is a genius. She has a week of study." fortune right here in the garden. This rose alone is worth the price of the entire farm!"

The old man shook his head. "She doesn't care for the money; but I wanted to see if all her work

"Worth while!" cried the young man. "Is the work of a painter or a sculptor worth while?"

Grandfather Edgren's eyes filled.

Beatrice was still standing by her rose when the young man returned to her. As she looked slowly up into his brown eyes, something only half hidden in their adoring depths made her own eyes waver, and a strange warmth that she had never known before entered her heart. She turned again to

the rose. "Isn't it wonderful," she said, "when one has dreamed of a thing for years to have it come to you more perfect than you had dared to hope?"

"Yes," said the young man, but his eyes were still on Beatrice, and not on the rose.

He was holding in bravely, was the young man, considering the tide that AND THE WORST IS YET TO COME

About the House

MIDDY TIES.

daughter's new middy ties, quite un-suspicious of their humble origin. When I decided that fifty cents each was more than I could afford to pay for the ties displayed in the stores, turned hopefully to my rag bag and unearthed some odds and ends of silk of before-the-war quality which made up beautifully into middy ties. I used an old tie for a pattern and, where piecing was necessary, the seam was made where it would be concealed by the middy collar.

The remnants of long-discarded foulard dress made a lovely tie with large white polka dots on a navy biue background. Another tie cut from an old roman stripe silk scarf adds a gay bit of color to a white middy blouse. Then there was the old china silk

walst, worn in the sleeves and cree-colored from much laundering, which seemed to offer possibilities. This fur-nished material which, with the aid of

"And it seems stranger still," she hurried on, "when one has gone on blindly, year after year."

"Yes," repeated the young man.
The tide was rising fast.
"Will you come and see the syringas?" asked Beatrice.
But it was useless for her to parry,

are the most marvelous flower in the garden? You are—but I must not go

Beatrice nodded.

"Grandfather's bees suggested it to me, long ago, and I got books, and—" of summer flowers, all about them.

"But," the young man interrupted, "this is a wonderful thing! I never Edgren's cane on the bricked walk. saw so exquisite a rose—and you have saw so exquisite a rose—and you have worked it out by yourself!"

His face was flushed and tremulous, and lighted with a joy that was re-yard:

ties. He can hardly believe it! He'll The young man looked about the be in from the field in a minute." Something in the two faces before him made him pause. He looked from one dawning at the corner of his kind old mouth. "You'll stay and make us a little visit, won't you, my boy There are enough flowers here to make a

The young man turned to Beatrice "Shall I stay?" he asked slowly. Beatrice did not look up.
"Yes," she answered softly, with a

rose tint creeping down to her throat. (The End.)

Gardening In Canada for Amateurs

Not more than ten per cent, of the bedding plants we buy in the spring and early summer are raised from seed. Most of them are cuttings from old plants that have been taken in from garden beds or boxes the previous fall. There is no reason why anvone who has a sunny window in a room where the temperature will not drop below 45 degrees during the winter cannot repeat particularly at-tractive plants in the garden another year. Geraniums, coleus, petunias, periwinkle or variegated vinca, and salvia can all be saved over the win-ter and made to serve the double purpose of providing a winter window garden, and a supply of bedding plants for next season.

The first step in the saving over process is that of taking up and potting the plants. This is usually a "potting down" process. That is, the size of both the foliage and the root system of the plant is deliberately reduced. The plant should be removed from the bed or box when the soil is comparatively dry. The earth clinging to the root system will shake off fairly readily and it is then possible to cut back the roots so as to leave a good compact ball, the size of which will depend in every case upon the size of the plant. The pot to be used should be a new or at least well scrubbed-ungalwanized earthenware flower int, unpainted: If a new pot is used, soak it for half an hour at least in clear water before planting in it. In size the pot should just take the root ball comfortable when it has 214 to 3 ins of earth in the bottom, will allow an inch of earth between the roots and the side of the not, and will allow for the covering of the roots with from an inch to an inch and a half of

The plants should be firmly set the earth being packed tightly around it with the fineers. The pot should not be filled full to the very ten. As inch or vim left above the soil will permit watering without making a mess of the surrounding territory in the living room.

The top of the plant will have re quire attention. It should be drasti-cally out back so that there will be tem until it has again started to espand. It is not wise to cut back to the extent of leaving mere bare sticks. Leaves have the distinct function of recessing fool for the of the Pant If there is n part left containing clorophyl, that is the matter which gives the distinct green coloring to all vegetation, the then will have a struggle to hold on to life. The cuttier back should be envelode done bearing in mind that for the common varieties of Ledding ters belances from 4 to 6 inches of stalk and leaf growth.

Bring Indoors by Degrees

The soil mixture to be used it pot ting should be 1-3 good garden barn, 1-3 steirp sand and leaf mound (1), and 1/3 and 1 and 1-3 old, well rotted The addition of a conful o manure. The addition of a confut of fertilizer bone nucal to a pailful of the relature will ampely the plants with nearlshapent late on in the winter rad in the early spring. If a mixture of this kind is read to at will do not need to give a state of any particle between the confusion of the winter.

Tooled and grown along until planting out time comes.

A considerable number of the gar-den annuals may be populated. ing-out time comes. den annuals may be perpetuated in exactly the same way. The profes-sional greenhouse men invariably grow their winter supply of carna-tions, antirrhinium and calendula from cuttings and for the amateur, winter bloom may be secured by taking up and potting verbenas, zinias, asters, stocks and ageratum as well as the plants better known as house plants, that have already been named. None of the last mentioned group except ageratum should be "potted down" but allowed to re-tain as much as possible of their root systems. Asters and stocks should be cut back so that the new growth thrown out will be sure to produce good flowers.

The successful keeping of the plants in the house is merely a matter of watering and sunshine. shine is the prime essential for plants from which flowers are expected, therefore the window garden must be carefully selected and it pays to make adequate preparation for the health, and well-being of these plants which are to be kept over.

Bottom Heat Fatal

If no other arrangement is possible every pot taken into the house should be supplied with a saucer. If it is possible to have a metal tray—two or three inches deep—the saucers are unnecessary and success is more likely. The tray should be filled with cinders or small gravel. For the window garden in a living room one should get a few pounds of finely broken marble, sold as poultry grit. When the flowers are watered the tray should be dampened but not filled, so that water stands nore than half an inch deep in the bottom.

Never place plant in doors directly wer a radiator unless a sheet of asbestos cloth covers the shelf to keep down the heat. Bottom heat is almost sure to be fatal to most of the common house plants, and even when the roots are protected from such heat and prevented from drying out, the heat rising directly around the plants is none too good for them. The temperature near a radia or or heater of any kind is likely to vary more and more rapidly than in a remote part of the room. This is bad for the plants, for although bedding or house plants will stand for the plants. for changes of temperature between 40 and 90 degrees, the nearer they can be kept to 70 the better they will thrive.

When plants are taken in for the winter they should be inspected carefully for parasites and thoroughly disinfected so as to start clean. In spite of all the care that can be exercised one is more than likely to have some sort of post put in an ap-pearance before the winter is over, so it is not worth while to go looking for trouble by carrying in a miscellaneous supply of thrips and mealy bug

A NATIONAL ASSET

As the greatest transportation company in the world, the Canadian Pacific Railway has mainteined a national service in the Trans-Canada Limited which is second to none and Limited which is second to none and on the conclusion of the summer schedule of this crack train has transferred the equipment to the Vancover Express, which leaves Toronto every night at 10.10 p.m. on its trip across the continent, via Winnineg. Calgary, Banff, Lake Louise, the spiral funnel, Sicamous and parts of the Canadian Pacific Rockies famous throughout the world, on its way to Vancouver, where the travellers are unanimous in their praise of the service of the Vancouver Hotel. The Canadian Pacific also operates a steamship service to Victoria, the Mecca for winter tourists.

Treatment

Not only does the Vancouver Express carry tourists, and standard sleepers, but it also carries a carr partment-observation car complete is itself, while a parlor car is added from Revelstoke to Vancouver.

Added to this national service is a feature service from Toronto to Mon treal via the Lake Shore Line, which has been entirely reballaster with crushed rock and celaid with 100pound rails, insuring a maximum of comfort for travellers at night as well as an absence of dust in day-Trains leave Toronto Station at 9.00 a.m. daily, 10.10 p.m daily. Arriving at Windsor Scation. the traveller has the benefit of im-mediate facilities in the women's rest room, lunch room and barber shep, which cannot be duplicated in any other station in Mentreal. An added convenience is offered those who wish to travel to Montreal from North Toronto, in the 9,45 p.m. train, daily except Samulays, from Youge

VERMIN IN LIVE STOCK

Much Injury Done by Lice to Farm Animals

Vermin Multiply Rapidly—Treatment for Cattle, Horse and Hog Lice The Louse a Robber of Profits-Soft Bacon.

(Contributed by Ontario Department of Agriculture, Toronto.)

Thousands of dollars are lost each year by stock owners neglecting to take the necessary measures to destroy the lice that infest the stock. Millions of these busy little insects make life a misery to the animal, and they also make the animals a source of loss to the owner. The keeping of live stock as a medium of support for lice never made any money for the farmer. It is unprofitable. Many people neglect, for reasons best known to themselves, to apply the simple remedies that destroy vermin and prevent losses on live stock operations. Lice Multiply Rapidly.

Lice multiply Rapidly.

Lice multiply most rapidly in dry, cold weather, and are found in greatest abundance on long-haired, old and poorly cared for stock during March and April. Spring rains tend to reduce the numbers of vermin on animals that are exposed to the weather, and the lice become less numerous as the season progresses. numerous as the season progresses. A few seem to survive the summer and show their presence in the late autumn or early winter when their progeny have increased to millions, and bring torment to the unfortunate animals that support them. Rub and animals that support them. Rub and scratch is the practice, until the hair is off and the louse is either crushed or pushed further along. Bare patches are noticed on side of neck, breast, head and back, wherever the animal has been able to reacherydeness transparent. evidence of vigorous attempts at re-lief from the tiny tormentors. Ani-mals that are tied and not free to rub themselves have a harder lot than those running free.

Treatment for Cattle Lice. All animals should be given a good grooming with brush and curry comb to remove scurf, loose hair, and any vermin that may be off guard, then apply the following:

Soft soap ... l quart
Hard soap ¼ pound
Coal oil l pint
Water 2 quarts

Water 2 quarts

Mix the quantities of soap and coal oil together first, then add the two quarts of boiling water. This will make an emulsion if thoroughly mixed, to which a gallon of warm water must be added before applying to the animals. An ordinary stable brush is a good instrument with which to apply the emulsion. Care should be taken to saturate the skin over the entire body. Repeat the treatment in ten days; another brood will be up and doing by that time. Sheep dips prepared by reliable manufacturing chemists are available and very useful in destroying cattle lice. There are three species of lice attacking are three species of lice attacking cattle, viz: the long-nosed louse, the short-nosed louse, and the biting louse. Herds that are regularly groomed during the winter suffer but

little from lice. Treatment for Horse Lice.

If the weather is warm enough so that it is safe to wash a horse, the that it is safe to wash a horse, the kerosene emulsion given for cattle is very effective. If the weather is cold, the animal can be given a good grooming, and then either sodium fluoride or pyrethrum powder should be well dusted on the skin, and the horse blanketed. Raw linseed oil can be brushed into the hair quite easily and with good effect. A good easily and with good effect. A good brush and oil are death to the mites. Any treatment given should be repeated in ten days, since the powers of multiplication are wonderful. There are two kinds of lice infesting horse, the biting and the

Treatment for Pig Lice.

Raw linseed cil applied with a to all parts of the body very effective. The formulae for kerosene emulsion can also be used to advantage. An oil rub, always accessible for the use of swine, will do cessible for the use of swine, will do much to keep the vermin down. The practice of having a machine oil can handy at feeding time and giving each pig a squirt along the back once a week is a good one. It will make conditions unhealthy for a pig louse. The pig louse, "Hapmatoninus suis." The plg louse, "Haematopinus suis," is a big one, almost as long as its name, and can easily be seen.

Do not let the louse rob you of your season's profits, and do not let it annoy your animals. A little soapy or greasy material will stop its breathing for all time. Why not get after the louse to-day?—L. Stevenson, Director of Extension, O. A. College, Guelph.

Soft Bacon.

Experimental work at the Ontario Agricultural College has proven that spft bacon comes from pigs that have been fed heavily during early life on fattening feeds while enclosed in pens or yards so small as to prevent proper exercise for the animals. proper exercise for the animals. O. A. C. experiments have also proven that pigs grown to 125 pounds weight on mixed feeds well balanced with skim milk (2½ nounds milk to 1 pound of meal), or tankage up to 10 per cent. in the ration may be turnished on corn or bariey and still produce a firm, high quality product. Dairy by-products tend to offset the trouble arising from lack of exercise, but both exercise and skimmilk are hetter than either alone.—Dept. of Extension, O. A. College, Guelph.

ANIMAL TEMPERATURES

Interesting Figures Relating to Farm Live Stock

Horses Are Relatively Cold-blooded -Poultry Have Highest Temperature—High Temperatures Indicate Fever - Wintering Bees - Select Sires to Give Balance.

(Contributed by Ontario Department of Agriculture, Toronto.)

The temperatures of domestic animals are of interest, in that each class has a normal temperature range of its own Horses

The horse in health will have a temperature not lower than 99.5°, or higher than 101.3°. There are exceptions, of course, to all rules, and a few animals may be normal at higher or lower temperatures than those given. Cattle.

The normal temperature range for cattle is 100.4° to 103.1°, which covers the case pretty well. When a bovine animal's temperature goes above 103.1° it can be considered above normal, and that there is some disturbance within. Sheep and Swine.

Sheep to be considered normal Sheep to be considered normal give a temperature reading between 102.2° to 104.5°. The pig's normal temperature can be looked for between 100.4° and 104°. Some individuals run high and others low, but all are steady within two degrees during period of health. Poultry.

Poultry have very high normal temperatures, 106.7° to 108.5°. Such temperatures as enjoyed by poultry in health could not be endured by any other of our domestic animals for more than a few days.

High Temperatures Indicate Fever. Any deviation from the normal temperature is taken as a source of information regarding the state of health of our domestic snimals. High temperatures indicate feverish condition, while sub-normal temperatures indicate decline and weakening of the individual to a point of grave danger. Exercise raises the temperature, and rest lowers it, hence we get higher readings in the evening than in the morning.—L. Stevenson, Dept. of Extension, O. A. College Cuelph.

Every Colony Should Have a Queen —Have Enough Bees—Keep In a Naturally Protected Place.

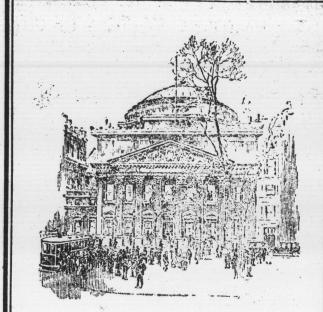

Every spring beekeepers find from 5% to 50% of their colonies have died during the winter, or are very weak. There is no reason why the winter loss should be higher than 2% or 3%, provided the beekeeper will prepare and pack the bees pro-perly. So says Prof. Eric Millen of the Ontario Agricultural College. Every Colony Should Have a Queen,

The first step is to make sure every colony has a queen. As it is too late to requeen now, queenless colonics should be united with those having a queen. Place a sheet of newspaper on top of a strong queenright colony, and place the brood-chamber of the queenless colony on top. Leave them for a week, and then shake the bees into the lower broodchamber and remove the upper broodchamber. It is taken for grant-ed that no American foulbrood exists in the apiary. Otherwise, colonies should not be united, but rather de-stroy the queenless colonies and combs, if diseased. Have Sufficient Bees

The next step is to see that each colony has sufficient bees to cover at least three frames on both sides, if examined on a cold morning when the bees are clustered. This will insure enough bees to come through the winter, provided the stores and pro-tection are adequate. A very important factor of wintering is the question of od. Many beekeepers give every colony ten or fifteen pounds of sugar syrup made in the proportion of 2½ of sugar to one of water, and fed in an inverted feeder over the broad frames. This is deeper. over the brood frames. This is done in many cases regardless of the amount of stores the colony has. Every colony should have at least 45 pounds of food to ensure successful wintering, and an opportunity to increase in strength in the spring. Keep In a Naturally Protected Place

Bees should be kept in a naturally protected place for winter, or a board fence should be erected around the apiary to form a wind protection. Colonies may be packed singly, two in a case, four in a case, or in any other way desired by the beekeeper. Three or four inches of packing should be placed all around the colony, and not less than eight inches on top. Dry leaves, planer shavings or cork chips make satisfactory packing material. If the beekeeper will see that his colonies are put away for winter in good condition, the winter loss will be negligible.

Select Sires to Give Balance. If the dairy herd is made up of low testers and poor producers, a bull from good producing and high testing ancestry should be chosen. If the females are too leggy, select a male that is compact and close to the ground. If the sow is rough in the shoulder and short in the side, select a boar with compact, well-muscled shoulder and with length and scale.

Victory Bond Interest

When your interest coupons become due, or when you receive cheques for interest on registered bonds, deposit them in a Save ings Account in the Bank of Montreal. The money you receive on your investment in bonds will then earn interest for you.

THE ART OF IDLING.

The perfect holidy is enjoyed only by those who understand the art of idling. And to be able to do absolutely nothing with exquisite thoroughness is a gift, says wisely "The Daily Mail".

To lie lazing in the long grass, the murmur of bubbling water in your ears, the hum of insects and the of birds lulling you to sleep, is the essence of idleness itself, To be drowsily aware of farm folk at work in the distance puts the finishing touch to perfect bliss.

To know that many tasks are awaiting your immediate attention and to have resolved to let them wait is to have the passport to Olympus. For idleness in its sublimest form demands that there shall be some work which we have left undone.

The person who invented was simply taking a page cures' from Mother Nature's book. All young things sleep—and ear—their time away, and when the wise old dame so ordained it she knew what she was about.

For rest and sleep twin mothers of forgetfulness, are essential to man's existence. The greater the amount of work be performs the more does he need them. To include in idleness occasionally is just plain, sober common sense. Unless hours are given up to this one can-not do work worth while.

THE LAND OF BEGINNING AGAIN I wish that there was some wonderful

Called the Land of Beginning Again, Where all our mistakes and all our heartaches

And all our poor selfish grief Could be dropped like a shabby old coat at the door. And never put on again.

I wish we would come on it all unaware, Like the hunter who finds a lost trail:

And I wish that the one whom cur blindness had done The greatest injustice of all Could be at the gates, like an old friend that waits,

For the comrade he's gladdest to hail. We would find all the things we intended to do -

But forgotten and remembered--too

Little praises unspoken, little promises broken, And all of the thousand and one Little duties neglected t hat might

have perfected The day for one less fortunate.

It wouldn't be possible not to be In the Land of Beginning Again; And the ones we misjudged and the ones whom we grudged Their moments of victory here,

Would find in the grasp of our loving handclap More than penitent lips could explain.

So I wish that there were some wonderful place Called the Land of Beginning Again Where all our mistakes and all our

heart-aches And all of our poor selfish grief Could be dropped like a shabby old

a stove burned red, if a little vine-gar or fat fried from salt pork is added to the water used to dissolve the blacking, it will adhere.

Fruit stains may be removed from table linen, white cotton, etc., by washing in warm chlorine water.
Fruit stains may also be removed by the following process: Rub the spot on each side with hard soap; then lay on a thick mixture of starch and cold water, and rub it well into the spot; then expose to the sun and

air.

To remove chocolate and coffee stains, apply a mixture of gycerine and yolk of egg, and wash off in warm water. While still damp, iron on the reverse side with a moderately hot iron; or wash in very hot water and soap and expose to sulphur fumes. To do this burn some sulphur on a small shovel and hold so that the vapor will be diffused over the stain.

To remove grass stains, wet the stained part with alcohol and rub

well.

Flewers do not like music (celally "jazz." It has been observed recently that when placed with the blossoms facing the music of a on it, cornations, Easter littles and Attachen plants will in a few hours turn away, so that the backs of the blos ones are toward the band.

BOY HAS MIRROR VISION

Sam Tiana, of Fairmont, W.Va. eads and writes backwards. teacher has to use a mirror in reading ritz. He continued:

"From my observation the beautiful women of to-day are not included in the ranks of the rich—or very fe wof them are. They are too pampered, take too little exercise, cat and drink far too much, and the habit of having their own way—this applies r to American women—has given to their faces a peculiar peevish pout that is not at all conductive to the boy's writing. Instinct has taught the youth, who is in the fourth grade of the public school, to

DO DRIVERS SPEED TO AVOID 'CHANGE?'

Automobile drivers speed at 25 to 30 miles an hour in crowded traffic because they cannot slow down their ears to two or three miles an hour. Lack of flexibility in engines frequently prompts drivers to ignore safety rules, according to A. B. C. Hardy, President of Olds Motor Works, and a member of the Traffic Planning and Safety Committee of the National Automobile Chamber of Commerce.

"We have tried to discourage the reckless driver through laws carrying fines and pail penalties and have endeavored to encourage and instruct him by means of educational cam-paigns," said Mr. Hardy. "Both these measures have been necessary and have shown results, but automo-bile engineers and manufacturers can further help make reckless drivers careful by giving them no mechanical excuses for excessive speed in traffic.

"Cars in the high-priced field have this required flexibility, but many of the lower priced cars, which are in the majority, stall or start to 'buck' when throttled down too low. As a result driving in slow traffic requires constant shifting of gears, and frequently drivers speed up and inquently drivers speed up and en-deavor to pass a group of slow moving vehicles with heavy traffic com-

Efficient Farming

the sould are the standard of through careless or improper storage, the greater part of the crop is lost by ot or injured by wilting.
In general, the main requirements

for the storage of most vegetables are somewhat similar. Protection from frost is essential, yet the temperature must not be high enough to permit growth. From thirty-three to thirtyeight degrees, Fahrenheit, may be considered as the extreme range. Ventilation is necessary, especially during the first week or so of storage. Soon after harvest, all classes of roots lose a certain amount of moisture by evaporation, or, as it is commonly known, sweating. If an adequate circulation of air has not been provided for this, moisture will condense and form wet places, thus making favorable situations for the growth of moulds and other forms of plant life that may, directly or indirectly, cause rotting. If, on the other hand, too much ventilation is given during dry weather. excessive evaporation is encouraged with a consequent wilting of the vege tables. During cold weather, the ventilation must be controlled to avoid freezing. Light should be excluded as it not only promotes growth but depreciates the keeping and eating qualities of the vegetables.

Broken, bruised or diseased specimens should not be stored with healthy ones, as they will invariably rot first and, in so doing, generate heat, which will help spread infection that may cause serious loss before it is detected.

The above, although constituting the general principles for winter storage. do not meet the requirements for all classes of vegetables, as the different kinds will not keep equally well under the same conditions. Accordingly the common vegetables may be grouped, as to their storage requirements, as

Horse-radish, parsnip and salsify are not injured by freezing and may be left in the ground until early spring. It is, however, practically impossible to dig them out of the frozen ground during the winter and, for this reason, other methods of storage are preferable. Of these, pitting is prob-ably the most satisfactory. When cold straw to a depth of six or eight inches. the straw should be covered with four roots are not likely to freeze, but if yearly use of paper. they do, they will not thaw again until late in the spring as the straw and earth act as an insulator. This class of vegetables may also be stored in a good, cool cellar, if space is available.

Potatoes, turnips, beets and carrots sufficiently heavy to prevent frost injury, but, as a general rule, the best storage place is a well ventilated, yet frost-preof, cellar. Small quantities may be kept in good condition by being may be kept in good

Choir-Boys and Their Punishments.

The restless choir-boy is often the best singer, as the inhumanly well-be-haved youngster is often devoid of one of my neighbors strongly urged initiative, musical or otherwise. The me to try Dr. Williams' Pink Pills, and writer well remembers the choir-mas- I decided to do so. In the course of a ter of his own chorister days who, to few weeks I could feel an improvehis sorrow, sat immediately behind him in the choir-stalls. This gentleman had a difficulty of speech which the trouble were gone, and I could prevented him from pronouncing the again do my housework, feeling like word "ears" as it deserves. This must a new person. Three years have passhave been a sore trial to him, for the word was constantly on his lips. At the slightest return of the trouble, so frequent intervals during the services, all events, the boy sitting in front lief brought by this medicine is perof him would hear a loud stage-whisper, angrily tuned, saying: "I'll box You can get the pills from your your years with a book." It became druggist, or by mail at 50 cents a box a famous phrase among the boys—and from The Dr. Williams Medicine Co., sometimes it was translated, painfully Brockville, Ont. for them, into action. But even this, surely, was a less embarrassing punishment for a choir-boy than that devised by a clergyman who, in the course of his sermon, stepped from the course of his sermon, stepped from the pulpit, drew forth from the choir an next with 37 millions, and Britain offending youth, took him into the pulpit and stood him in the face of the United States had a population two of the sermon. That was indeed a penalty.

HEALTH EDUCATION

BY DR. J. J. MIDDLETON Provincial Board of Health, Ontarie

D. Middleton will be glad to answer questions on Public Health m ters through this column. Address him at Spadies House, Spadies ent, Toronto

Minneapolis has a very low infant death rate as compared with many cities of similar size in the United States. An investigation conducted by the Women's Community Council of that city made a study of child welfare and found some very interesting facts. The children whose histories were taken were of the kindergarten stage. The kindergarten child is one who is just below the age when it can go to school. Generally the age of this class ranges from five to seven, and this was the kind of child studied. Of this group of children, more than half had been breast feed until they were more than seven months of age. Less than four per cent. had been exclusively bottle-fed. It is obviously a fact that breast feeding is the vogue in Minneapolis, and is one reason for their low baby death rate.

On making inquirles into the habits of the kindergartners, it was found that one of the worst habits was the unregulated use of candy and sweets. One-third of the mothers reported that they allowed their children to eat candy and sweets as they pleased.

More than a fourth drank tea or coffee at home and one-fifth of the children were not allowed candy or sweets. The habits, and especially the eating habits of many of the children, were

SCARCITY OF WOOD CAUSES DEMAND FO COAL IN NEWBORO

Supply Received is Rapidly Purchased by Residents.

NEWS NOTES OF VILLAGE

Death of Mrs. Fred Adrain Comes as Severe Blow to Friends.

Newboro, Oct. 20.—W. S. Bilton received a carload of coal over the C. N. R. last week and it was not enough to supply the demand to his customers in this vicinity. Mr. Bilton has received several cars this year, but the scarcity of wood in this section has compelled nearly everyone to use coal and his sales are greatly increased and his sales are greatly increased over other years. He expects more coal in the near future.

Five Thousand Dollars

How would you like to wake up some morning and find you were the winner of \$5,000? Some person is going to get it. Why not you? The family Herald and Weekly Star of Montreal are offering Ten Thousand Dollars in cash prizes to those who make the best estimates of the total number of votes to be polled at the next Federal Election. There were 3,119,306 polled out of a total of 4,435,310 in 1921. The next election is not far away. How many will vote? It costs nothing to make an estimate if you are a subscriber to that great weekly for 1925. The Family Herald has a wonderful program this season. It is admitted to be the best family and farm paper on this Continent. A very handsome art calender is also given to each subscriber. It is the biggest Two Dollars worth ever offered in Canada. Write for a sample copy or leave your subscription at this office. You will never regret it.

FINE EFFORT MADE HALL IMPROVEMENT

Co-operation of Two Elgin Organizations Most Successful.

NEWS OF THE DISTRICT O. T. A. Was Carried at Bishop's Mills by Vete of

131 to 18. Elgin, Oct. 24.—The joint committee formed last spring of members of the Elgin Women's Institute and the Elgin Athletic Association for the purpose of working toward the re-building of the Town Hall, recently paid to the township treasurer the second half of \$1,200 guaranteed by said committee to the building fund. lowards this sum substantial donations were received from the Memorial Club and the St. Columbanus Club of Elgin, as well as donations, total-ling \$87, from absent Elginites and

A pure-bred Holstein calf, donated by H. H. Ripley, and a mattress given by H. H. Ripiey, and a mattress given by A. L. Campbell, on which tickets were sold, both added goodly sums to the treasury. The balance was raised by the committee, and by the two organizations which it represents. In addition to its assistance to

wards the building fund the commit-tee is furnishing the stage of the hall with scenery, and with two hand-painted drop curtains. Blinds for the windows, folding dinings-tables, suf-ficient for accommodating 200 people, and dishes are also being provided. Solid ask seats for 112 sittings have olid oak seats for 112 sittings have een donated by the Athletic Associa-

The committee is now planning for the formal opening of the hall on the evening of November 4th. This opening will take the form of a banquet to which the public are cordially invited.

Athens Leeds County, Onta Thursday, October 30th 1924 5 Cents Per Copy

Forty Years Ago.

Opening of Christ Church, Athens, November 13th, 1884.

(From the Brockville Recorder, Nov. 14th, 1884)

of worshippers assembled each Sabbath in the Baptist Church, Farmersville. They were under the minis tration of the Rev. Mr. Bridge, an English clergyman, connected with the Reformed Episcopal Church, of which Bishop Ussher was the head in Canada. The reverend gentleman in a short time attached himself to the Church of England, and when the parish of Leeds and Lansdowne was divided he resigned, the Rev. R. N. Jones succeeding to the incumbency of Lansdowne and Farmersville. The advent of the new pastor brought new life with it, and the little body of communicants gradually assumed larger proportions until to-day the membership numbers over a hundred with a flourishing Sunday School of thirty scholars. The Rev. Mr. Jones was one of those disseminators of the gospel whose zeal and earnestness tended to imbue his little flock with enthusiasm, and through his efforts a movement took place having for its object the erection of a House of God. Consequently a year ago and immediately after the work was commenced, which culminated on Thursday (November 13), in the opening, with impressive services, of a handsome edifice built upon land generously donated by Mr. S. A. Taptin, of Farmersville, a member of another congregation. The pretty little church stands on the slope of a hill, commanding a 'view of the fine rolling country for which this section is noted, while away to the southward the waters of the-beautiful Charleston Lake dance and sparkle in the last June the corner-stone was laid the waters of the beautiful Charleston Lake dance and sparkle in the sunshine. The building is of brick, 78 feet in length, the main portion length being 42 and the chancel 36 feet and the width 46 feet. The spire is 114 feet high, slender and graceful, while a starling along the roof will add beauty to the edifice. The stained glass windows are of handsome and rich design, the work of Mr. Horwood, Prescott.

"The interior of the church strikes

"The interior of the church strikes one as being finely arranged. The seating capacity is 300 with the latest improved bench pews. The chancel is handsome, the woodwork being of ash in tasteful design. Altogether the tout ensemble of the edifice reducts endir on the congregation and flects credit on the congregation and the village of Farmersville. The cost, we understand, approaches

"Thursday morning dawned with lowering clouds, but they had no effect on the earnest workers who had been preparing for some days for the opening of Christ Church for public worship. From an early hour the worship. From an early hour the people began to arrive until 10 o'clock worship. From an early hour the people began to arrive until 10 o'clock the auditorium contained upwards of 600 while a large number were unable to gain admittance. At half-past ten the choir sang that beautiful processional hymn, "Onward, Christian Soldiers," the clergy marching from the vestry to the main entrance and thence up the aisle to the chancel where they ranged themselves on either side. They were the Rev. R. N. Jones, incumbent; Rural Dean Grout, Lyn; Revs. E. P. Crawford, G. J. Low, Brockville; Osborne, Frankville; Codd, Lyndhurst; Wright, Newboro; Fidler, Lombardy; Redcliffe, Maberly, and Coleman, North Augusta. The reading of morning prayer was proceeded with, the hymn "Blessed City, Heavenly Salem," being, after which Rev. Rural Dean Nesbitt read the commandments, the reread the commandments, the responses being choral.

"The Rev. Mr. Jones regretted the fact of the absence of the Lord Bishop of Ontario, resulting from pressure of duties at this time of year. His Lordship would be with them, however, at no distant day.

"Rural Dean Grout preached the opening sermon, which was eloquently delivered. In the course of his remarks he congratulated the congregation on the occasion which had brought them together. Not only the willing workers who had erected this hondsome edition for the workers. handsome edifice for the worship of God, but all churchmen throughout the diocese were to be congratulated. It was a day of rejoicing to those inside and outside the parish. When he had visited Farmersville a few years ago he never dreamed that it was in the bounds of possibility that a beautiful church, so admirably adapted to the wants of the congregation, would be opened this day. But it was erected by busy hands, aided by willing hearts. He urged upon his hearers to desist not from their efforts until every dollar of the debt which remained on the edifice be paid. The congregation, by their liberality and self-denial had provided a place of worship not only for themselves but for their children's children, and he must once more congratulate the members upon the fruits of their labors. The reverend gentleman answer was a day of rejoicing to those in the work who had was a day at the answer. In the function of the debt which remained on the edifice be paid. The congregation, by their liberality and self-denial had provided a place of worship not only for themselves but for their children's children, and he must once more congratulate the members upon the fruits of their labors. The reverend gentleman answers will an and was once more plunged in the dead way after a short illness, of pneumonia. Mrs. Lemon, who was beloved by all who knew her. The funeral, which was held on Sunday, was very largely attended and much sympathy is felt for the sorrow ing family.

Forty Years Ago.

Opening of Christ Church, Athens, November 13th, 1884.

(From the Brockville Recorder, Nov. 14th, 1884)

"Some four years ago a little band | imadverted in eloquent terms to the of worshippers assembled each Sabbath in the Baptist Church, Farmersville. They were under the minisville. They were under the minis-tration of the Rev. Mr. Bridge, an of that Great Being. English clergyman, connected with the Reformed Episcopal Church, of which Bishop Ussher was the head in Canada. The reverend gentleman in a short time attached himself to the ner. Church of England, and when the parish of Leeds and Lansdowne was divided he resigned, the Rev. R. N. Jones succeeding to the incumbency of Lansdowne and Farmersville. The advent of the new pastor brought new life with it, and the little body of communicants gradually assumed larger proportions until to-day the membership numbers over a hundred with a flourishing Sunday School of thirty scholars. The Rev. Mr. Jones was one of those disseminators of the gospel whose zeal and earnestness tended to imbue his little flock with enthusiasm, and through his efforts a movement took place having for its object the erection of a House of God. Consequently a year ago last June the corner-stone was laid and immediately after the work was commenced, which culminated on Thursday (November 13), in the opening, with impressive services, of a handsome edifice built upon land generously donated by Mr. S. A. Taplin, of Farmersville, a member of another congregation. The pretty little church stands on the slope of a hill, commanding a 'view of the fine rolling country for which this section is noted, while away to the southward the waters of the-beautiful Charleston Lake dance and sparkle in the sunshine. The building is of brick, last June the corner-stone was laid the waters of the beautiful Charleston Lake dance and sparkle in the sunshine. The building is of brick, 78 feet in length, the main portion length being 42 and the chancel 36 feet and the width 46 feet. The spire is 114 feet high, slender and graceful, while a starling along the roof will add beauty to the edifice. The stained glass windows are of handsome and rich design, the work of Mr. Horwood, Prescott.

"The interior of the church strikes he as being finely arranged. The one as being finely arranged. The seating capacity is 300 with the latest improved bench pews. The chancel is handsome, the woodwork being of ash in tasteful design. Altogether the tout ensemble of the edifice restate to the course and flects credit on the congregation and the village of Farmersville. The cost, we understand, approaches

"Thursday morning dawned with "Thursday morning dawned with lowering clouds, but they had no effect on the earnest workers who had here provided for—subscriptions, \$753; dinner, \$200; offertory, over \$50." been preparing for some days for the opening of Christ Church for public worship. being the 20th anniversary of their marriage.

On Monday evening last about 20 friends from here and Brockville met at the home of Mr. and Mrs. D. A. Johnston, Tin Cap, to celebrate the anniversary of their marriage. The evening was pleasantly spent in games and music until midnight when dainty refreshments were served and the gathering broke up by singing "Blest be the Tie that Binds", and wishing Mr. and Mrs. Johnston as many more years of health and happiness.

Fairfield East, Oct. 22.—On October 17 the F.P.E.A. held its first meeting of the season. All members were on hand, and a very enjoyable, night was spent. The business programme occupied a long session and was at last disposed of, when various games and midnight supper were enjoyed by all. The meeting closed with the singing of "God Save The King." The next meeting will be held at the home of the Senior Member.

JELLYBY

Jellyby, Oct. 20.—Miss Verna Ellis is spending a few days at the home of Mr. and Mrs. George Tackaberry, Spring Valley.

Mr. and Mrs. Harvey Knowles, of Merrickville, spent Wednesday at the home of Mr. and Mrs. Gordon Ken

home of Mr. and Mrs. Goldon Actinedy.

WILL TEACH WOMEN THE ART OF SHOPPING

Most husbands and fathers would agree that women are natural born shoppers and that they don't need to be taught—it's a gift.

the taught—it's a gift.

The point is, however, that many of them do need to be taught intelligent buying so they can get the value of the dollars they speud.

For this reason, New York Uni-

versity has added a course in buying, and Miss Elizabeth Dyer has been made instructor.

Miss Dyer is a Vassar graduate, whose desire to do social service took her to a department store. Her edu-cational work among the girl clerks and her experiences there gave her such a wide knowledge of selling that she decided to make retailing her

One of her tasks is to arrange netual store experience in the big New York department stores for students of the university.

shears, now wielding her trowel, now one trembled lest the butterfly which walking back and forth with thought-It was on the fourth morning after rose's evanescent purity of coloring Grandfather Edgren had sent his letter that Beatrice came in to breakfast garden roses of all the gardens since late, her face flushed, her heavy hair time was.

"Wait!" cried Beatrice. "Wait till

They hastened out in to the glory

The two stood so absorbed in the beauty of the lovely thing that they did not hear the click of the garden rupted her father, "can't you come to gate nor the sound of footsteps on the your meals on time? You've been up bricked walk. These sounded briskly long enough—I heard you at work in at first, then hesitated, then moved slowly across the garden toward the locust trees.

a little. She drank her coffee in silman stopped. Beatrice was worth a Half-way to the trees, the young sort of way, then tramped from the room.

The sort of way, then tramped from the room.

The sort of the young man stopped and the young ma steps died away, Beatrice leaned to-ward the eager-eyed old man.

The slender girl, with masses of waving dark hair above the longthen went on with unaccustomed ralashed gray eyes, with a mouth like curled rose leaf and a chin that held the suspicion of a dimple—truly she was as lovely a thing as the rose over which she bent.

At length the young man moved forward. Grandfather Edgren gave a start, and held out a welcoming hand. He knew that the answer to his letter had come

"The old man rose.

"And is it," he said with trembling gerness, "is it as—"

"I came," said the young man, after he had been introduced to Beatrice, "to see your flowers and to—" His eyes fell upon the rose, and with a half-articulated expression of wonder he bent above it. "Tell me," he cried,

what variety of rose is this?" "Well, I haven't named it yet," inswered Beatrice, blushing a little. "I've been working over it for two years, and it only bloomed this morn-

"You don't mean that this is a new variety which you yourself have bred?"

Beatrice nodded.

had grandfather's help, and the view from the pasture gate, and the flowers hemselves are an inspiration." The young man looked about the

"Why, the place is full of new war iety," he exclaimed, and he hurried from one gorgeous bed to another. Then he turned to Grandfather Edgren, who was following in an ecstasy of delight. "Why, this is marvelous! Your daughter is a genius. She has a fortune right here in the garden. This rose alone is worth the price of the entire farm!"

The old man shook his head. "She doesn't care for the money; but I wanted to see if all her work was worth while."
"Worth while!" cried the young

den in their adoring depths made her For Sore Feet—Minard's Liniment. own eyes waver, and a strange warmth that she had never known before entered her heart. She turned again to

"Isn't it wonderful," she said, "wher one has dreamed of a thing for years, one has dreamed of a thing for years, to have it come to you more perfect than you had dared to hope?"

"Yes," said the young man, but his

eyes were still on Beatrice, and not on the rose.

He was holding in bravely, was the young man, considering the tide that was rising.

MIDDY TIES.

daughter's new middy ties, quite un-suspicious of their humble origin. When I decided that fifty cents each was more than I could afford to pay for the ties displayed in the stores, turned hopefully to my rag bag and unearthed some odds and ends of silk of before-the-war quality which made up beautifully into middy ties. I used an old tie for a pattern and, where piecing was necessary, the seam was made where it would be concealed by the middy collar.

The remnants of long-discarded foulard dress made a lovely tie with large white polka dots on a navy blue background. Another tie cut from an old roman stripe silk scarf adds a gay bit of color to a white middy blouse.

Then they was an china silk the street worn in the sleeves and cream colored from much laundering, which seemed to offer possibilities. This furnished material which with the side of the street with the side of the street which with the side of the street was a street with the side of the street which with the side of the street was a street which with the side of the street was a street was a street was a street was a street which with the side of the street was a str nished material which, with the aid of

"And it seems stranger still," she hurried on, "when one has gone on so blindly, year after year."

"Yes," repeated the young man. The tide was rising fast. "Will you come and see the syringas?" asked Beatrice. But it was useless for her to parry

for the flood-tide was sweeping in.
"The rose and all are marvelous," he said, "but don't you know that you are the most marvelous flower in the garden? You are—but I must not go on, must I?"

The man and the girl stood looking at each other in the June sunlight, with robins and bluebirds, bees and butterflies, scent of summer air, bloom

The sleeve is smart in wrist length, Beatrice nodded.

"Grandfather's bees suggested it to butterfiles, scent of summer air, bloom of summer flowers, all about them.

"But," the young man interrupted, "this is a wonderful thing! I never saw so exquisite a rese—and you have the face was flushed and tremulous, and popular and very comfortable in the short length of the small view. This Pattern is cut in 6 Sizes: 34, 36, 38, 40, 42 and 44 inches bust measures are saw so exquisite a rese—and you have saw so exquisite a rese—and you have

"Beatrice," he said, "your father is the most surprised man in three counties. He can hardly believe it! He'll be in from the field in a minute." Something in the two faces before him made him pause. He looked from one to the other, with a tender little smile dawning at the corner of his kind old mouth. "You'll stay and make us a little visit, won't you, my boy There are enough flowers here to make a week of study."

The young man turned to Beatrice. "Shall I stay?" he asked slowly. Beatrice did not look up. "Yes," she answered softly, with a rose tint creeping down to her throat.

(The End.)

"Worth while!" cried the young man. "Is the work of a painter or a sculptor worth while?"

Grandfather Edgren's eyes filled.
"I wish her mother were here," he said. "I'm going to find her father. I've told him again and again that the Edgrens would come to something, some time! He'll see things differently now."

Beatrice was still standing by her rose when the young man returned to her. As she looked slowly up into his brown eyes, something only half hid-

C. G. Young, Editor and Proprietor

Gardening In Canada for Amateurs

Not more than ten per cent, of the bedding plants we buy in the spring and early summer are raised from seed. Most of them are cuttings from old plants that have been taken in from garden beds or boxes the previous fall. There is no reason why anyone who has a sunny window in a room where the temperature will not drop below 45 degrees during the winter cannot repeat particularly attractive plants in the garden another year. Geraniums, coleus, petunias, periwinkle or variegated vinca, and salvia can all be saved over the win-ter and made to serve the double purpose of providing a winter window garden, and a supply of bedding plants for next season.

The first step in the saving over process is that of taking up and potting the plants. This is usually a "potting down" process. That is, the size of both the foliage and the root system of the plant is deliberately reduced. The plant should be ately reduced. The plant should be removed from the bed or box when the soil is comparatively dry. The shake off fairly readily and it is then possible to cut back the roots so as to leave a good compact ball, the size of which will depend in every case upon the size of the plant. The pot to be used should be a new -or at least well scrubbed-ungalvanized earthenware flower pot, unpainted. If a new not is used, soak it for half an hour at least in clear water before planting in it. In size not should just take the root ball comfortable when it has 21/2 to 3 ins. of earth in the bottom, will allow an inch of earth between the roots and the side of the pot, and will allow for the covering of the roots with from an inch to an inch and a half of

The plents should be firmly set the earth being packed tightly around it with the fingers. The not should not be filled full to the very ten. As rim left above the soil will permit watering without making of the surrounding territory in the living room.

The top of the plant will now re quire attention. It should be drawnicut back so that there will be small demand made on the root sypand. It is not wise to cut back to the extent of leaving mere bare sticks. Leaves have the distinct function of transmitter food for the growth of the ulast. If there is no part left containing clorophyl, that is the matter which gives the distinct green coloring to all vegetation, the plant will have a sirriggle to hold or to life. The centiley back should by equality dand bearing in mad the for the common varieties of Ledding tem belonees from 4 to 6 inches of stell and leaf growth.

Bring Indoors by Degrees

The soil mixture to be used in pot tine soil infixure to be used it porting should be 1-3 good gardon learn.

1-3 sburp sand and leaf mound (45 and 42) and 1-3 old, well rotted manage. The addition of a capful of and (2) and 1-3 old, well rotted manure. The addition of a conful of fertilizer hone meal to a pailful of the mixture will supply the plants with nourishment late on in the winter and in the early staring. If a mixture of this kinds is used, there will be to need to after the plants any artificial fertilizer darger justing.

Winter.

The plants should be set in a way to tered place out of he r and left to an until the first threats of fews place the evening air. I also to he place directly from our best into a heat room. As much as possible according them to indoor conditions gradually. An enclosed porch or light shed window is a good place for them at first. After a week or so they may be brought into a cool point and later moved into a gramy window in a moved into a surmy window in a warm room. They may look rather dismal for the first few weeks indoors but they will soon begin to respond to the renewed warmth and sudshine, and by February should be filling the window with both flowers

The Athens Reporter and foliage. It is when they reach this stage that they become the source of a supply of new plants by providing hosts of cuttings to be rooted and grown along until planting-out time comes.

A considerable number of the garden annuals may be perpetuated in exactly the same way. The professional greenhouse men invariably grow their winter supply of carnations, antirrhinium and calendula from cuttings and for the amateur, winter bloom may be secured by taking up and potting verbenas, zinias, asters, stocks and ageratum as well as the plants better known as house plants, that have already been named. None of the last mentioned group except ageratum should "potted down" but allowed to retain as much as possible of their root systems. Asters and stocks should be cut back so that the new growth thrown out will be sure to produce good flowers.

The successful keeping of the plants in the house is merely a matter of watering and sunshine. Sunshine is the prime essential for plants from which flowers are expected, therefore the window garden must be expected. carefully selected and it pays to make adequate preparation for the health and well-being of these plants which are to be kept over.

Bottom Heat Fatal

If no other arrangement is pos-sible every pot taken into the house should be supplied with a saucer. If it is possible to have a metal tray two or three inches deep—the saucers are unnecessary and success is more likely. The tray should be filled with cinders or small gravel. For the window garden in a living

Never place plant in doors directly over a radiator unless a sheet of as-bestos cloth covers the shelf to keep down the heat. Bottom heat is almost sure to be fat: I to most of the common house plants, and even when the roots are protected from such heat and prevented from drying out, the heat rising directly around the plants is none too good for them. The temperature near a radia or or heater of any kind is likely to vary more and more rapidly than in a remote part of the room. This is bad for the plants, for although bedding or house plants will stand for changes of temperature between 40 and 90 degrees, the nearer they can be kept to 70 the better they

When plants are taken in for the winter they should be inspected carefully for parasites, and thoroughly disinfected so as to start clean. In spite of all the care that can be exercised one is more than likely to have some sort of post put in an appearance before the winter is over, so it is not worth while to go looking for trouble by carrying in a miscellane-ous supply of thrips and mealy bug

A NATIONAL ASSET

As the greatest transportation company in the world, the Canadian Pacific Railway has maintained a national service in the Trans-Canada Limited which is second to none and on the conclusion of the summer schedule of this crack train has transferred the equipment to the Vancover Express, which leaves Toronto every night at 10.10 p.m. on its trip across the continent, via Winnipeg, Calgary, Banff, Lake Louise, the spiral tunnel, Sicamous and parts of the Canadian Pacific Rockies famous throughout the world, on its way to Vancouver, where the travellers ar unanimous in their praise of the serhas again started to ex-cent wise to cut back to steamship service to Victoria, the Mecea for winter tourists.

Not only does the Vancouver Express carry tourists and standard sleepers, but it also carries a compartment-observation car complete in itself, while a parlor car is added from Revelsioke to Vancouver.

Added to this national service is feature service from Toronto to Mon-treal via the Lake Shore Line, which has been entirely reballaster with rushed rock and relaid with 100pound rails, insuring a maximum of comfort for travellers at night as well as an absence of dust in day-time. Trains leave Toronto Union Station at 9.00 a.m. daily, 10.10 p .m daily. Arriving at Windsor Station, the traveller has the benefit of im mediate facilities in the women's rest room, lunch room and barber shop, which cannot be duplicated in sny other station in Montreal, added convenience is offered convenience is offered these who wish to fravel to Montreal from North Toronto, in the 6.45 p.m. train, daily except Saturdays, from Yougo

to the year reservations and supply you vite say information very reserve. They are fally qualified to fier a "second to none" service to he profite.

Clean in Soapsuds

If you use the old fashioned iron dean them occasionally by washing in clean soapsuds. This will keep them smooth.

Substantial Breakfast

On a very warm day physicians say it is advisable to eat a substantial breakfast and make luncheon a very light affair.

VERMIN IN LIVE STOCK

Much Injury Done by Lice to Farm Animals

Vermin Multiply Rapidly—Tree for Cattle, Horse and Hog Lice-The Louse a Robber of Profits-

(Contributed by Ontario Department of Agriculture, Toronto.)

Thousands of dollars are lost each year by stock owners neglecting to take the necessary measures to de stroy the lice that infest the stock. Millions of these busy little insects make life a misery to the animal, and they also make the animals a source of loss to the owner. The keeping of live stock as a medium of support of live stock as a medium of support for lice never made any money for the farmer. It is unprofitable. Many people neglect, for reasons best known to themselves, to apply the simple remedies that destroy vermin and prevent losses on live stock operations. Lice Multiply Rapidly.

Lice multiply most rapidly in dry, cold weather, and are found in greatest abundance on long-haired, old and poorly cared for stock during March and April. Spring rains tend to reduce the numbers of vermin on animals that are exposed to the weather, and the lice become less numerous as the season progresses A few seem to survive the summer and show their presence in the late autumn or early winter when their For the window garden in a living room one should get a few pounds of finely broken marble, sold as poultry grit. When the flowers are watered the tray should be dampenwatered the tray should be dampenwatered the tray should be dampenwatered to the unfortunate animals that support them. Rub and scratch is the practice, until the hair is off and the-louse is either crushed or pushed further along. Bare patches are noticed on side of neck, breast, head and back, wherever the breast, head and back, wherever the animal has been able to reach— evidence of vigorous attempts at relief from the tiny tormentors. Ani-mals that are tied and not free to rub themselves have a harder lot than those running free. Treatment for Cattle Lice

All animals should be given a cood grooming with brush and curry. comb to remove scurf, loose hair, and any vermin that may be off guard, then apply the following:

Soft soap ... 1 quart
Hard soap ½ pound
Coal oil ... 1 pint
Water ... 2 quarts

Mix the quantities of soap and coal oil together first, then add the two quarts of boiling water. This will make an emulsion if thoroughly mixed, to which a gallon of warm water must be added before applying to the must be added before applying to the animals. An ordinary stable brush is a good instrument with which to apply the emulsion. Care should be taken to saturate the skin over the entire body. Repeat the treatment in ten days; another brood will be up and doing by that time. Sheep dips prepared by reliable manufacturing chemists are available and very useful in destroying cattle lice. There are three species of lice attacking cattle, viz: the long-nosed louse, the short-nosed louse, and the biting louse. Herds that are regularly groomed during the winter suffer but little from lice.

Treatment for Horse Lice.

If the weather is warm enough so that it is safe to wash a horse, the kerosene emulsion given for cattle is kerosene emulsion given for cattle is very effective. If the weather is cold, the animal can be given a good grooming, and then either sodium fluoride or pyrethrum powder should be well dusted on the skin, and the horse blanketed. Raw linseed oil can be brushed into the hair quite easily and with good effect. A good prush and oil are death to the mites. Any treatment given should be repeated in ten days, since the powers peated in ten days, since the powers of multiplication are wonderful. There are two kinds of lice infesting the horse, the biting and the systemics. suctorial.

Treatment for Pig Lice.

Raw linseed oil applied with a brush to all parts of the body is very effective. The formulae for kerosene emulsion can also be used to advantage. An oil rub, always accessible for the use of swine, will do much to keep the vermin down. The practice of having a machine oil can handy at feeding time and giving each pig a squirt along the back once a week is a good one. It will make conditions unhealthy for a pig louse The pig louse, "Haematopinus suis," is a big one, almost as long as its name, and can easily be seen.

Do not let the louse rob you of

your season's profits, and do not let it annoy your animals. A little soapy or greasy material will stop its breathing for all time. Why not get after the louse to-day?—L. Stevenson, Director of Extension, O. A. College, Guelph.

Soft Bacon.

Experimental work at the Ontario Agricultural College has proven that ofe bacon comes from pigs that have been fed heavily during early life on fattening feeds while enclosed in pens or yards so small as to prevent proper exercise for the animals. O. A. C. experiments have also proven that pigs. that pigs grown to 125 pounds weight on mixed feeds well balanced with skim milk (2½ pounds milk to 1 pound of meal), or tankage up to 10 per cent. in the ration may be furnished on corn or bariey and still produce a firm, high quality product.
Dairy by-products tend to offset the
trouble arising from lack of exercise, but both exercise and skimmilk are better than either alone.—Dept. Extension, O. A. College, Guelph.

INIMAL TEMPERATURES

Interesting Figures Relating to Farm Live Stock

Are Relatively Cold-blooded -Poultry Have Highest Tempera re—High Temperatures Indicate Fever — Wintering Bees — Select Sires to Give Balance.

ributed by Ontario Department of Agriculture, Toronto.)

e temperatures of domestic aniare of interest, in that each has a normal temperature of its own.

horse in health will have a ture not lower than 99.5°, or or than 101.3°. There are exs, of course, to all rules, and w animals may be normal at gher or lower temperatures than

The normal temperature range for cattle is 100.4° to 103.1°, which covbrs the case pretty well. When a bovine animal's temperature goes above 103.1° it can be considered above normal, and that there is some disturbance within. Sheep and Swine.

Sheep to be considered normal give a temperature reading between 102.2° to 104.5°. The pig's normal temperature can be looked for between 100.4° and 104°. Some individuals run high and others low, but all are steady within two degrees during period of health. Poultry.

Poultry have very high normal temperatures, 106.7° to 108.5°. Such temperatures as enjoyed by poultry in health could not be endured by any other of our domestic animals for more than a few days.

High Temperatures Indicate Fever. Any deviation from the normal temperature is taken as a source of information regarding the state of health of our domestic animals. High temperatures indicate feverish condi-tion, while sub-normal temperatures indicate decline and weakening of the individual to a point of grave danger. Exercise raises the temperature, and rest lowers it, hence we get higher readings in the evening than in the morning.—L. Stevenson, Dept. of Extension, O. A. College, Quelph.

WINTERING B......

Every Colony Should Have a Queen -Have Enough Bees-Keep In a Naturally Protected Place.

Every spring beekeepers find from 5% to 50% of their colonies have died during the winter, or are very weak. There is no reason why the winter loss should be higher than 2% or 3%, provided the beekeeper will prepare and pack the bees pro-perly. So says Prof. Eric Millen of the Ontario Agricultural College. Every Colony Should Have a Queen.

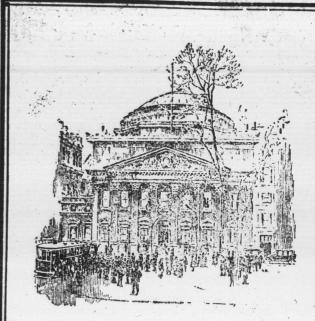

The first step is to make sure every colony has a queen. As it is too late to requeen now, queenless colonies should be united with those having a queen. Place a sheet of newspaper on top of a strong queenright colony, and place the brood-chamber of the queenless colony on top. Leave them for a week, and then shake the bees into the lower broodchamber and remove the upper broodchamber. It is taken for grantbroadenamer. It is taken for state of that no American foulbrood exists in the apiary. Otherwise, colonies should not be united, but rather destroy the queenless colonies and combs, if diseased. Have Sufficient Bees.

The next step is to see that each colony has sufficient bees to cover at least three frames on both sides, if examined on a cold morning when the bees are clustered. This will insure enough bees to come through the winter, provided the stores and pro-tection are adequate. A very im-portant factor of wintering is the question of food. Many beekeepers give every colony ten or fifteen pounds of sugar syrup made in the proportion of 2½ of sugar to one of water, and fed in an inverted feeder over the brood frames. This is done over the brood frames. This is done
in many cases regardless of the
amount of stores the colony has.
Every colony should have at least 45 pounds of food to ensure successful wintering, and an opportunity to increase in strength in the spring.

Keep In a Naturally Protected Place. Bees should be kept in a naturally protected place for winter, or a board fence should be erected around the apiary to form a wind protection. Colonies may be packed singly, two in a case, four in a case, or in any other way desired by the beekeeper Three or four inches of packing should be placed all around the colony, and not less than eight inches on top. Dry leaves, planer shavings or cork chips make satisfactory packing material. If the beekeeper will see that his colonies are put away for winter in good condition. the winter loss will be negligible.

Select Sires to Give Balance.

If the dairy herd is made up of low testers and poor producers, a bull from good producing and high testing ancestry should be chosen. If the females are too leggy, select a male that is compact and close to the ground. If the sow is rough in the shoulder and short in the side, select a boar with compact, well-muscled shoulder and with length and scale.

Victory Bond Interest

When your interest coupons become due, or when you receive cheques for interest on registered bonds, deposit them in a Savings Account in the Bank of Montreal. The money you receive on your investment in bonds will then earn interest for you.

"Mother Williams" of Broadway

(1) "Mother Williams" with her New York friends, and (2) at the Canadian Pacific Windsor Station.

OF course you have visited New York, and if you have been to New York you have been to Times Square; but while you were there did you notice the neat little old lady who was net-ing as sales agent for the "Billboard" outside the Putnam Build ing? If not you are not in the business because everyone show business knows show business because everyone in the show business knows "Mother Williams." Likewise the police, for it is known to all of them that "Mother Williams" is on speaking terms with Commissionsr Richard Enright, and more than one "cop" indebted to the old lady—she is seventy-two years old—for her intercession with the commissioner on their behalf. behalf.

The candles she burns at the "Church of Mother Divine" for her proteges are innumerable. Many a heartsick girl has been stopped by "Mother Williams" and sent on her way with enough money to tide her over until the long sought for ever-

and sent on her way with enough money to tide her over until the long-sought-for-engagement was secured, and the same is applicable to actors, for on more than one occasion she has been seen to "slip them change." Nor has she cause to regret it, for with her it is always "just a little loan until you sign up." Today she probably knows and is known by more producers and actors than any other woman in the country, for few, if any on Broadway, ever pass without a word of greeting for "Mother Williams" and a "God bless you" from her.

Her kind old Irish heart will respond to every tale of suffering for "Mother Williams" knows. Mary Bridget Ann Williams was born in Toronto seventy-two years ago, the daughter of a prominent real estate man. At the age of eight she lost her mother, after whose decease she accompanied her father on a tour of Europe that included a stay in Ireland and a four year visit to London. Returning to Montreal, Miss Williams later became a well-known and successful teacher of music, and

PORTLAND, Earl Bolton

Efficient Farming

eight degrees, Fahrenheit, may be considered as the extreme range. tilation is necessary, especially during the first week or so of storage. Soon after harvest, all classes of roots lose a certain amount of moisture by evaporation, or, as it is commonly known, sweating. If an adequate circulation of air has not been provided for this, moisture will condense and form wet places, thus making favorable situafor the growth of moulds and other forms of plant life that may, directly or indirectly, cause rotting. If, on the other hand, too much ventilation is given during dry weather, excessive evaporation is encouraged with a consequent wilting of the vegetables. During cold weather, the ventilation must be controlled to avoid qualities of the vegetables.

Broken, bruised or diseased specimens should not be stored with healthy ones, as they will invariably rot first and, in so doing, generate heat, which will help spread infection that may cause serious loss before it is detected

The above, although constituting the general principles for winter storage do not meet the requirements for all classes of vegetables, as the different kinds will not keep equally well under the same conditions. Accordingly the common vegetables may be grouped, as to their storage requirements, as

Horse-radish, parsnip and salsify are not injured by freezing and may left in the ground until early It is, however, practically impossible to dig them out of the frozen preferable. Of these, pitting is probare placed in a neat, conical pile on a After the roots have stopped sweating, After the roots have stopped sweating, the straw should be covered with four may be purchased, cut to the required width and length, and are easily fasor more of the crop is to be stored in tened together by pieces of galvanized one pit, ventilation shafts should be provided. In a pit of this nature, the in the long run are cheaper than the roots are not likely to freeze, but if yearly use of paper. they do, they will not thaw again until late in the spring as the straw and earth act as an insulator. This class of vegetables may also be stored in a good, cool cellar, if space is available.

Potatoes, turnips, beets and carrots all require similar storage conditions. They may be satisfactorily stored in well-constructed pits, with a covering sufficiently heavy to prevent frost inone of simplicity itself, is a problem fifteen in Nova Scotia, seventeen in Nova Scotia, seventeen in the evening to avoid disfury, but, as a general rule, the best of no little importance, for here rests New Brunswick, thirty-five in Quebec, turbance. storage place is a well ventilated, yet the harvest, much or little, for the seven in Ontario, twenty in Saskat frost-proof, cellar. Small quantities season's toil. may be kept in good condition by being

comparatively low, yet above freezing. Celery is probably the most difficult Colorly is probably the most difficult of all vegetables to keep throughout on range as long as possible and given fattening foods, such as corn, for a period of two or more months, gradually enteresting the amount till turkeys show prospects of getting fat by marking and the late in the fall, into moist when the fall into moist by carefully watering the son time. If the tops are wet, rotting will soon start. In order top revent moisture condensing on the leaves, adequate ventilation is necessary, but care must be taken to prevent moisture condensing on the leaves, adequate ventilation is necessary, but care must be taken to prevent freezing, as celery will not keep well if it has been frozen in storage.

WINTED INJURY AND ITS PREof all vegetables to keep throughout

Winter injury may take two forms mersed in water.

THE STORAGE OF VEGETABLES. in practically all plants: top injury The successful winter storage of vegetables, although quite simple, is often unattained, chiefly as a result of improper care or neglect. Every at tention may be given to growing and harvesting, and a desirable result obtained, yet it frequently happens that, through careless or improper storage, the greater part of the crop is lost by rot or injured by wilting.

In general, the main requirements for the storage of most vegetables are somewhat similar. Protection from frost is essential, yet the temperature must not be high enough to permit growth. From thirty-three to thirty-eight degrees, Fahrenheit, may be considered to surprove in the successful winter storage of most vegetables are similar. Small fruits, such as raspberries, eight degrees, Fahrenheit, may be considered to injury may be tand root injury may be largely controlled, in those plants procommunity purely rural, there is a fine formunity purely rural, there is a fine farm and put the proceeds in Government five per cent. bonds, I should be better off."

ANALYSIS.

HOW SOULS ARE LOST: THE FATH-ER'S GRIEF, 11-16.

HOW SOULS ARE FOUND, THE FATH-ER'S JOY, 17-24.

INTRODUCTION—Jesus, from the benning of his ministry, sought speally to reclaim the erring and the st. Instead of avoiding the tax-therer and the sinner, he sought eir company and even visited their mes. It was not for Jesus to wait till the lapsed came to him. He made his business to take the initiative.

ANALYSIS.

no longer worthy of the name of son. So Jesus describes the beginning of repentance in a convicted sinner.

V. 20. Meantime, what about his father is waiting broken-hearted for his boy to come door, and peering down the road to see if he is not returning. One day he sees him, and with a heart full of pity he rushes out, and clasps the son to his heart, and kisses him.

Vs. 21-24. The lost son has not

to his heart, and kisses him.

Vs. 21-24. The lost son has not dreamed of a reception like this. He expected his father to shut the door in his face or at least to impose hard terms upon him. He tells his father what a vile wretch he has been, and no more worthy to be treated as a son. But will the father turn him away, or send him off among the servants? No, for the boy's coming back shows that his heart is changed, and this being so, all can be forgiven.

his heart is changed, and this being so, all can be forgiven.

So Jesus describes the love of God to penitent sinners who return to him. Men do not know the love of God, and Men do not know the love of God, and how he yearns for the sinner to come back. Had they known it, could they have upbraided Jesus for going after the outcast and the lost? Surely they could not. The purpose of the parable, therefore, is to show the difference between God and the harsh and narrow Pharisees of the day. Jesus must go after the outcast, for there is joy in heaven when sinners repent. We are to think of God as like the father in the parable. The sins of men are a tragedy to him, and the redemption of their souls is precious.

KEEPING A FARM OFFICE

BY DALE R. VAN HORN.

A farmer who recently bought nine letter-file. One of these can be bought head of purebred hogs by mail, said to for as low as \$5 or \$6 and is certainly

Cabbages, although not injured by a light freezing, are usually of better quality if untouched by frost after harvest. Dry air and temperatures are light per light pe Usually it is necessary to pump up the tube only two or three times and he greatest number of times in my country.

County, and nive in Northern Untario, all in Temiskaming county, namely at whether it is wheat, corn, dairy cattle, whether it is wheat, corn, dairy cattle. October Chant.

Spring's a slim green lady Fathered in the town, Autumn is a farmer's lassie With her hair down!

Scarlet is high homespun,

Bare her brown young feet,

And her lips are stained with berries

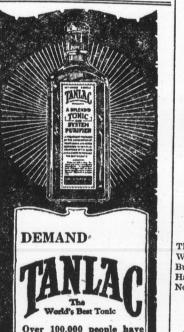

She has golden eyes to lure you, Sleepy, slow and warm. And her briar-tattered jacket Bares a white soft arm

Blue smoke from the leaf fires Dims the frosty air-If you crush her close and kiss her She will never care.

She's no prim and proper Lady of the town, Autumn is a farmer's lassie With her hair down!

-Kathryn Worth

Minneapolis has a very low infant death rate as compared with many cities of similar size in the United States. An investigation conducted by the Women's Community Council of that city made a study of child welfare and found some very interesting facts. The children whose histories were taken were of the kindergarten stage. The kindergarten child is one who is just below the age when it can go to school. Generally the age of this class ranges from five to seven, and this was the kind of child studied. Of this group of children, more than half had been breast fed until they were more than seven months of age. Less than four per cent, had been exclusively bottle-fed. It is obviously a fact that breast feeding is the vogue in Minneapolis, and is one reason for their low baby death rate.

On making inquiries into the habits of the kindergartners, it was found that one of the worst habits was the unregulated use of candy and sweets. One-third of the mothers reported that they allowed their children to eat candy and sweets as they pleased. More than a fourth drank tea or coffee at home and one-fifth of the children did not get enough milk. Only ten per cent, reported that children did not get enough milk. Only ten per cent, reported that children did not get enough milk. Only ten per cent, reported that children did not get enough milk. Rhymes on Rings.

While some old customs are dying out, others are being revived. Among the latter is that of engraving mottoes and proverbs on lovers' rings. Rings thus engraved were formerly called "posy rings," and some of the inscriptions were very quaint.

For instance, how would the follow ing appeal to the "modern miss": "My love is fixt, I will not range,

I like my choice too well to change." Among the many other mottoes which adorned the rings of old-time lovers were:

"In thee, my choice, I do rejoice," "This and the giver are thine forever,"
"Of all the rest I love thee best," 'God for me appointed thee," "I joy in thee, joy thou in me." and "Providence divine hath made thee mine.'

Fulfilment.

We cannot kindle when we will The fire that in the heart resides, The spirit bloweth and is still, In mystery our soul abides: But tasks in hours of insight willed Can be through hours of gloom fulfilled.

Shortly before noon on Saturday last the ringing of the fire bell startled the citizens, who soon learned that the barn of Frank Johnston, on Church street, had caught fire from a fire he had in his garden, burning leaves and refuse. Many willing hands were soon at hand, also the chemical engine, but having been noticed in time it was soon put out without the use of the engine. The fire was in the roof of the frame structure and would have meant a disastrous affair if it had not been noticed in time.

FINE EFFORT MADE BY COMMITTEE FOR

Co-operation of Two Elgin Organizations Most Successful.

THE DISTRICT OF O, T. A. Was Carried at Bishop's Mills by Vets of

131 to 18. Elgin, Oct. 24.—The joint commit-tee formed last spring of members of the Elgin Women's Institute and the Elgin Athletic Association for the purpose of working toward the re-building of the Town Hall, recently paid to the township treasurer the second half of \$1,200 guaranteed by said committee to the building fund. Towards this sum substantial dona-tions were received from the Moral tions were received from the Memorial Club and the St. Columbanus Club of Elgin, as well as donations, total-ling \$87, from absent Elginites and friends

friends.

A pure-bred Holstein calf, donated by H. H. Ripley, and a mattress given by A. L. Campbell, on which tickets were sold, both added goodly sums to the treasury. The balance waraised by the committee, and by the two organizations which it represents. In addition to its assistance towards the building fund the committee is furnishing the stage of the hall with scenery, and with two handpainted drop curtains. Blinds for the windows, folding dinings-tables, suf-

painted drop curtains. Blinds for the windows, folding dinings-tables, sufficient for accommodating 200 people, and dishes are also being provided. Solid oak seats for 112 sittings have been donated by the Athletic Association.

The committee is now planning for the committee is now planning for the formal opening of the hall on the evening of November 4th. This open-ing will take the form of a banquet to which the public are cordially in-vited.
