

WALSH'S MANA-ZEIN

(Extra.)

CHARLOTTETOWN, PRINCE EDWARD ISLAND, THURSDAY, JULY 1, 1852.

ROAD TO HEALTH!

WALSH'S PILLS.

DERED LIVER AND BAD DIGESTION
in Mr. R. W. Kirby, Chemist, T. Front
Street, dated 6th June, 1851.

WALSH'S PILLS
I have tried the highest on our side
for some years. A country, to whom I
write, desires me to let you know the
particulars of my case. I have been
troubled for years with a disordered
liver, the liver complaint, however, the
gall, and the inflammation set in so
severely, that I was unable to bear up
under it; and I was obliged to go to
bed, and to try your Pills, and the
result was, that I had great relief
from them, and although I had only
taken three boxes, the gall, and the
inflammation, I could have most you
share, from the severity of the attack,
and the quickness of your Pills.

MAIL.

By the Steamer Ruse from Pictou yesterday, we received our files of Colonial and American papers. The general news is not of striking importance, but the news of a local nature is highly encouraging to us, as holding out a prospect of our being immediately brought into communication with Quebec, Miramichi and Shediac. Every facility of this nature most inevitably tend to the development of our resources, and the bringing us out of our hitherto comparative obscurity. We refer our readers to the extract from the *International Journal*, which appears below.

SUPREME COURT.

The Term promises to be a busy one; there have been several trials already, and many indications are before the Grand Jury and more we understand are in readiness. George R. Young, Esq. who came over on a special retainer for that purpose, proffered Bills of Indictment against Messrs. Duncan McLean and John Inge for libel, which were ignored by the Grand Jury. In this we think they have acted rightly. If the members of the Administration are aggrieved let the Attorney General file his information. If Mr. Coles considers himself personally injured, his remedy is a private action. We are glad that the Grand Inquest of the county has not suffered itself to be used as a political cat's-paw. The cases of White vs. White, O'Neil vs. Deumpey, and Weatherly vs. McQueen, and Coles vs. McQueen, are all of importance, as respects the principles of Law involved in each, and shall be adverted to in our next.

ELECTRIC TELEGRAPH.

The following is an extract from a letter, addressed by F. N. GARDNER, Esq. to the Hon. CHARLES YOUNG, and dated London, June 11, 1852, which will show that little time is being lost in making the necessary preparations for connecting this island by Telegraph with the neighbouring continent.

Mr. N. will be contracted with me to connect Cape Ray and East Point next Spring; and he is now making the Cap-Tormentine Cable, which will be with you within six weeks. —*Legal Gazette.*

THE ST. LAWRENCE STEAMER—NEW ARRANGE-

The noble project of placing a steamer on the St. Lawrence originated with Major Norton, the efficient United States Consul at Pictou, Nova Scotia, and through his efforts Provincial Grants, towards this project, were obtained from the Nova Scotia, New Brunswick, and Prince Edward Island Legislatures. While the project of this movement has been in New York, completing his arrangements, Captain Arthur Sleigh, late of the British army, a gentleman of great wealth, and an extensive land owner in Prince Edward Island, made overtures to the Major, which have been accepted; the proprietorship has changed hands, and the line will go into operation on a more extended plan than was at first contemplated. Captain Sleigh has purchased the beautiful steamer *Albatross*, now in New York, and she will leave immediately for Quebec, touching at Halifax, Pictou, Charlottetown, Shediac, Miramichi, and Gaspe. It is said to be the intention of the proprietor to put another boat on the route as soon as she can be obtained.

Thus, through the efforts of Major Norton alone, this spirited enterprise, so important to the Colonies, has been projected; and under the new arrangement, it will be placed upon a footing of permanent success. No man in the Colonies has a deeper interest at stake than Captain Sleigh. His estate on Pictou Island is 100,000 acres of land equal for agricultural purposes to any part of British North America, and is intersected with bays and rivers, embracing "mill privileges," and shipping facilities of great importance to the prosperous commercial progress of that colony. And more than all, we know the proprietor to be imbued with unconquerable enterprise, and that hearty spirit of ambition for the prosperity of his adopted country, which has long been wanted to stimulate trade and commerce throughout the British Colonial possessions, and secure to that people a permanent prosperity, derived from their own abundant resources.

The submarine telegraph connecting England and Ireland has been completed. It is extended from Holyhead to Howth; the cable weighs 110 tons, is 80 miles long, and was submerged in 18 hours, being the greatest exploit yet in connection with submarine dynamos.

The telegraph wire has at length been stretched across the strait of Canso, thus completing the last link in the communication between Sydney, C. B., and Yarmouth. Mr. Alex. McKay left here this morning for Antigonish, the Straights and Sydney, for the purpose of opening offices and setting them in working order at these places.

The contract for building the new Barracks at Port Needham has been taken by Messrs. Peters and Baylock, of Quebec. The buildings consist of officers' quarters and soldiers' barracks—the former 320, and the latter 410 feet in length, each to be 50 to 60 feet in width, and three stories high; the exterior to be of brick, with granite dressings, and roofed with Welsh slate; the whole to be completed in four years.

A despatch from Sir John Pakington, dated May 27th 1852, says that the Home Government intends to despatch as soon as possible, a small force of steamers or other small vessels, to enforce the proper observance on the part of the American, of the Fishing regulations on our coast.

We learn from the *Fredericton Lyralist* that Her Majesty has vetoed the liquor law passed at the last session of the New Brunswick Legislature, on the ground that it is incompatible with British freedom.

ENGLAND ON THE AFRICAN COAST.

After having broken down her markets in Portugal, the West and East Indies &c., England compelled to seek for new outlets for her products, is now engaged in getting control of the West Coast of Africa with a view to monopolizing the profitable trade with the savages of that extensive region. She already has possession of the mouth of every important river on the Coast of Guinea, as for instance, the Niger, the Calibary, the Benue, the Cameroons. This has been obtained in a very quiet way, without exciting the suspicions of any of her competitors in the world's commerce. She has made treaties with the native chieftains along the coast, and has bought from these potentates the abdications into her hands of their peculiar privileges and prerogatives, of course in every case paying them only a trifle. In these treaties the negro kings say that English traders may trade with their people free of duties, that they will make no war without the assent of the English resident agent,

that they will follow his directions in all respects, and not negotiate with any other power except with the consent of England. Thus the most complete control of the country and of its trade is gained. This will have the advantage of stopping the slave trade and keeping the African tribes on the coast from fighting each other to the neglect of every more useful occupation. The French, however, view the movement with great jealousy, and regard their possessions in that quarter as endangered by its success. It would be no great calamity to them or Africa, if they were to lose those possessions altogether.

THE LATE COLONEL PEARCE.

This much lamented officer in his last will bequeathed a pension to the widow of every soldier who should fall under his command; a shilling each per day to all disabled soldiers of his corps, and left the means of purchasing commissions for five of his most deserving sergeants, in 7th Regt. —*Zust. African.*

NINEVEH.

Among the latest discoveries at Nineveh, one coffin was found containing the body of a lady of the royal house; many of her garments were entire; also the gold studs which fastened her vest. The most singular discovery, however, was a mask of thin gold pressed upon the face, so as to assume and retain the features of the deceased. The coffin was found in the Manna Laya mountains, (Sandwich Islands,) was ascertained to be 500 feet high, and its diameter supposed to be over 100 feet. It filled up ravines, destroyed forests, and with ruthless impetuosity was making onward to the ocean, some 50 or 60 miles distant, leaving nought but ruin and death in its train.

IMPORTANT FROM THE ARCTIC OCEAN.

The following is an extract from a letter dated Hong Kong, March 29— There have been here no less than thirty-seven whalers from the Arctic sea. It may interest you to know that they almost all believe that Sir John Franklin is safe, and that he has got through the ice barrier inner waters, where he will not be reached until a mild season arrives; which they say the present will be.—Most of these have now departed. They say Franklin will not suffer for want of food. They give strange accounts of the Eskimoes, extracting from the Arctic to the American continent and back again, carrying their boats, made of skin and whalebone, over the ice, and launching them into the open sea. They all confirm the fact, that the whales found in Behring's Straits and in Baffin's Bay are the same species, proving the existence of a passage, for a whole of the Arctic species they say, has never been seen to the south of 22 degrees of latitude; that they cannot have doubled either the Cape of Good Hope or Cape Horn, and the whole is under the necessity of making his presence known by coming to the surface to blow.

HOUSE OF COMMONS, June 1.—MR. PEEL.

The right hon. gentleman, Sir John Pakington, had referred to Canada and the other Provinces of British North America. He (Mr. Peel) must remind the House, there had been recent changes in the colonial constitutions of North America, which were not without their least the British army, a gentleman of great wealth, and an extensive land owner in Prince Edward Island, made overtures to the Major, which have been accepted; the proprietorship has changed hands, and the line will go into operation on a more extended plan than was at first contemplated. Captain Sleigh has purchased the beautiful steamer *Albatross*, now in New York, and she will leave immediately for Quebec, touching at Halifax, Pictou, Charlottetown, Shediac, Miramichi, and Gaspe. It is said to be the intention of the proprietor to put another boat on the route as soon as she can be obtained.

AUSTRALIA.

A fortnight later in date, have been received the Valparaiso. Accounts from Sydney are to the 22d February, and they describe a steady yield of gold, although owing to the shortness of the season, the quantity of gold obtained is not so large as might have been anticipated. The amounts brought by the escort and mail was 10,099 ounces for the week ending 14th February, and 5385 ounces for that ending 21st February, the total value being about £50,000. The largest sums obtained at present were from Bradwood, and an instance is mentioned of a single individual getting 130 ounces in one day. Sofala and Meers were the next places in point of importance, while from the Turon and Ophir districts the contributions were altogether insignificant. The abundance of the waters at these localities was expected soon to take place, and the belief was, that large results would then be reported. The price of gold had recovered, and had touched 67s. 2d. per ounce, but there was subsequently a reaction to 65s. 6d., the banks having ceased to make advances. Among the recent departures of shipping had been Regina, with 10,226 ounces of gold, and the Wanderer, with 30,398 ounces, the total value being about £100,000. Up to the latest date the aggregate shipped from Sydney amounted to £819,933. The aggregate from Port Phillip is not stated. There appears to have been nothing new in the general course of trade. The latest dates received from London were to the 14th November, by the *Bride*, which arrived at Port Phillip (Victoria) in 73 days. From the later colony the statements are rather unsatisfactory. The amount total of water rendered it scarcely possible to work with any advantage at the Mount Alexander mines, and in the absence of general success, the most serious outrages were becoming frequent. The demand for protection on the part of the well-disposed seems to have been urgent, but the Government, instead of meeting it by sending a small but well-organized band of constables, at any cost, are described as having irritated the people by doing nothing, except suffering an impression to get abroad, that they were disposed to rely upon an expected arrival of soldiers. The receipts by the last escort from Mount Alexander had been 10,099 ounces. Notices from Auckland state, that the discovery of gold in New Zealand had been contradicted. The report had arisen only from undue importance having been attached to some vague statements of the natives.

UNITED STATES.

A child four years old, daughter of Jeremiah Myers at South Boston, died in consequence of swallowing the stone of a prize worth some months before. It lodged near the left lung, which was found mortified.—*Id.*

Some of the Boston Ship owners have sent a challenge to those of Great Britain, to decide which of the parties can obtain the highest rate of speed from the same cubic feet capacity of model, the winning party to receive £10,000.

WHALES.

The Nantucket Mirror says there is some prospect of a return of the scenes of the early period of whaling, when vessels were fitted out for a few days or weeks to capture whales on the coast. About a week since, there were seen from Siasconnet, several having been taken from Martha's Vineyard, and five have been caught off Martha's Vineyard, Long Island.

OSTEAS.

It is estimated that the quantity of oysters now planted in the waters of New Haven harbor, is 600,000 bushels. Estimating 300 oysters to the bushel, would give one hundred million of oysters.—These oysters are for the early fall trade, and are said to be in enormous quantities imported and opened there during the winter months.

CINCINNATI, June 16.

Great excitement is existing in the upper part of the city, caused by the discovery of 12 human bodies in a shanty on the road to Walnut Hill, purporting to be used for a laboratory, by Dr. Davis. It is supposed his business has been the arranging of skeletons for colleges, and that the bodies had been procured for that purpose. The Doctor has been arrested and held for trial.

TO THE REV. MERVICK LALLY.

We, the undersigned Inhabitants of Georgetown and its Vicinity, of various denominations, having learned that you are on the eve of leaving this community, which has been the scene of your ministrations during these seven years last past, beg leave to approach you with the expression of esteem and regard with which your gentlemanly character and bearing have impressed us since your arrival here, and above all, your truly Christian principles in cultivating and cementing the bonds of brotherly love and charity between all members of the community. Your philanthropic and disinterested zeal in encouraging education for all, without carrying the slightest obtrusion to the religious convictions of any one, we highly appreciate. It is with regret, we see leaving the community, a Clergyman, possessing in no eminent a degree, these estimable qualities. We can assure your Reverence, when your Sacred calling removes you far from us, we will long cherish the recollection of your meek, charitable and peaceful demeanour during your sojourn here. We desire, Reverend Sir, that you will be kind enough to convey to your amiable Lady, expressions alike characteristic of our appreciation of her unassuming, mild and charitable disposition whilst among us. Accept, Reverend Sir, the assurance of our best wishes for your
