

The Colonist.

FRIDAY, JANUARY 13, 1893.

CONVICTED.

The Times, last evening, accuses us of stating what is not true with respect to the Mayor's statements regarding the city loans.

Another matter that he would refer to in regard to some debentures. Two loans were sanctioned by the ratepayers, one to erect a market building and the other to purchase a site.

The reader will observe the rates of interest, with the single exception which was named, are not given.

The conclusion to which Mr. Beaven led his hearers by the suppression of the truth was that the city was the gainer of \$132 on every hundred dollars worth of debentures which were sold.

In the next comparison he makes he is almost equally dishonest—we had nearly written dishonest. He introduced his statement by a flourish of the oratorical trumpet.

Our readers now see that we have proved every statement we made from the Times' own report. We have shown that Mr. Beaven did suppress the truth in a most shameless way.

The Times owes us a humble apology. For its own credit sake it should retract what it has said.

's now the victim of misplaced confidence. If he has not been deceived he has acted the part of a bully and bravo for Mr. Beaven.

A PECULIAR CASE.

The jokes that are made at the expense of the lawyers as a class, are unending. They are represented as caring for nothing but their fees and their costs, and the jokers are never tired of manufacturing witticisms, the object of which is to create the impression that if once a piece of property gets into the hands of the lawyers, they will be sure to take out of it all that is worth taking.

But what the conventional satirist would have us believe is impossible has actually taken place in the Province of New Brunswick. The Parks cotton mill was saved from going into liquidation two or three years ago by the action of Judge Palmer, of the Equity court.

Under this old law the Council could order that an improvement should be made, say in the James Bay district, without saying to the property-owners that or any other part of the city as much as "by your leave"; and whether he was benefited by the improvement or not, every taxpayer in the city would be forced to pay towards that improvement.

Then all improvements having to be paid for out of the general revenue of the city, either very few improvements would be made or taxation would become exceedingly high.

Under the Local Improvement law, whenever a locality needs an improvement, and a majority of the inhabitants make up their minds to have it, there will be no difficulty in obtaining it.

Under the Local Improvement law, whenever a locality needs an improvement, and a majority of the inhabitants make up their minds to have it, there will be no difficulty in obtaining it.

It might be supposed that in British Columbia in proportion to its population paid so much more than any of the other provinces it would be favorably considered when appropriations for public works come to be distributed.

The Times found itself perplexed yesterday. It saw only too clearly that it had completely proved our position from its own report of Mr. Beaven's speech.

advantage of his predecessors. We left nothing to be supplied. But it would not do to say nothing, so search was made through the papers, and in a passage in which the Mayor was discussing quite another subject, namely, the proposed consolidation of the debt, a sentence was found in which rates of interest were named, and it was cut out and made to do duty as exculpatory evidence.

THE LOCAL IMPROVEMENT LAW.

The Local Improvement Law, although it has been for some months in operation, seems to be little understood. Many appear to think it a compulsory law, and that under it the citizens will be compelled to pay for improvements whether they want them or not.

This is quite a mistaken view, both of the principle of the law and its mode of operation. It is not a compulsory law, and it is optional with the majority of the property owners of any street or block whether it shall be applied to the locality or not.

Under this old law the Council could order that an improvement should be made, say in the James Bay district, without saying to the property-owners that or any other part of the city as much as "by your leave"; and whether he was benefited by the improvement or not, every taxpayer in the city would be forced to pay towards that improvement.

SIR JOHN THOMPSON'S SPEECH.

When it became known that Sir John Thompson intended to speak at the Toronto Board of Trade banquet...

Much was being said about the appeal to the Dominion Government with respect to the Manitoba school question...

But serious questions were ahead of them—questions which concerned not only the Cabinet but the citizens at large...

Of course it was not expected that the Leader of the Government would go into detail on such a subject...

On the trade question Sir John Thompson said enough to lead his hearers to believe that changes are contemplated...

Turning to the question of trade, Sir John said that he treated them to a policy which would make the people to the south of them the best of neighbors...

Nothing is said of the impression which Sir John Thompson's speech made on his hearers, but it can hardly be failed to be favorable...

ate men of all parties. We, however, will not have to wait long to hear what men of both parties and all shades of opinion...

THE SCOLLING POLICY.

Americans in neither the East nor the West approve of the attitude which President Harrison has soon taken towards Canadian railways...

The account that we now obtain to the west via the Grand Trunk and the Canadian Pacific, are of estimable advantage to the people of New England...

There is no doubt that the results which the Herald points out would follow the "retaliation" policy which President Harrison favors...

We do not deprecate the way in which Mr. McCarthy is treated by the Empire because we agree with him...

On the subject of the Canadian Pacific, we have to state that the Canadian railway system being made to contribute to the growth and prosperity of the Dominion...

As the Herald expresses the opinions of thousands of business men in the New England States, it is not likely that Mr. Harrison will incur their enmity and injure the prospects of his party...

WRONG AND IMPOLITIC.

Mr. Dalton McCarthy does not wholly approve of the policy of the present Government, and he has more than once expressed his disapproval in language which cannot be mistaken...

It appears to us that the attitude and the language of the Empire are very far indeed from what they ought to be. It is neither right nor politic for the organ of the party to treat Mr. McCarthy with severity...

Nothing is said of the impression which Sir John Thompson's speech made on his hearers, but it can hardly be failed to be favorable.

or that if a member of it acts as his judgment and his conscience dictate to be set upon by the party newspapers and published as far as they can punish him for taking the course that seems to him right.

THE CHILDREN WHO WASTE. The children do not study and are only irritated and disheartened by being deprived of the exercise in the open air and the play which are their due.

THE BOARD BREAKS UP. Closing Ceremonies in the Municipal Council Chamber—Mutual Admiration Proceedings.

Predictions of a Water Famine if Something Substantial is Not Done. The final meeting of the Board of Aldermen elected for the year of grace 1892, was held yesterday afternoon...

Why then should not the members of the Conservative party treat Mr. Dalton McCarthy with kindness and consideration. He is an able man, and he is by temperament a man of high character and high energy.

The annual reports of the various departments were received and taken as read. A letter was received from the Albin Iron Works, referring to previous correspondence...

Mr. DALTON MCCARTHY. He is an able man, and he is by temperament a man of high character and high energy. He is not more popular with the Republicans of St. Paul than it is with the members of that party in Boston.

On the subject of the Canadian Pacific, we have to state that the Canadian railway system being made to contribute to the growth and prosperity of the Dominion...

The Colonist. FRIDAY, JANUARY 13, 1893. WANTED, A PROGRESSIVE COUNCIL.

Victoria, perhaps more than any other city in the Dominion, needs a progressive Mayor and an intelligent and enterprising City Council.

Situated as it is and with such a salubrious and, at the same time, delightful climate, Victoria would, if it had a good city government, be the ideal residential city to thousands of both Canadians and United States citizens.

Victoria should be such a city as this for the sake of those who live in it now. If it were only for the comfort, the convenience and the health of its present inhabitants its affairs ought to be conducted on enlightened principles.

Some of the accusers would have money to spend and are willing to spend it in glad to live in it, merely as an investment, spend money in making it healthy and attractive.

Victoria wants many improvements, and its progress and prosperity require that it should have those improvements; but it will never get them if its affairs are placed in the hands of men who do not know what the requirements of a good residential city are, and who exhaust their energies and strain their intellects, such as they are, in studying how effectively they can starve the different departments of the city government.

A HEARTLESS ACT. When the Omard steamer Umbria was disabled and drifting at the mercy of the winds and waves, the Gallia, of the same line, saw her and came within signalling distance.

OPPOSED TO SCOLDING.

The United States Government has been lately paying a great deal of attention to Canada and its affairs. It is not doing this in a pleasant and friendly way.

This policy, (the policy of fairness and reason) which is the disposition of our own people, has been interfered with by the American press.

Some of the accusers would have money to spend and are willing to spend it in glad to live in it, merely as an investment, spend money in making it healthy and attractive.

Victoria wants many improvements, and its progress and prosperity require that it should have those improvements; but it will never get them if its affairs are placed in the hands of men who do not know what the requirements of a good residential city are, and who exhaust their energies and strain their intellects, such as they are, in studying how effectively they can starve the different departments of the city government.

When the Omard steamer Umbria was disabled and drifting at the mercy of the winds and waves, the Gallia, of the same line, saw her and came within signalling distance.
