Who has kept up in the hurry with me." "Hark, in the midst of the long afternoon
When you're a little bit weary,
How all the meadows keep sweetly in tune,
Toiling, and prattling and cheery,
What do you say," said the Work To Be Shall we be comrades till setting of sun?"

Great is our heritage of hope, and great
The obligation of our civic fate.
Fling forth the triplecolored flag to dare
The bright untraveled highways of the air.
Blow the undaunted bugles, blow, and yet
Let not the boast betray us to forget.
For there are high adventures for this hour—
Journeys to test the sinews of our power.
For we must parry—as the years increase—
The hazards of success, the risks of peace! ber that I ever had a mother. I'm just a ed me adrift is the only relative I remember.

What need we, then, to guard and keep us whole? What do we need to prop the state? What do we need to prop the state;
We need
The fine audacities of honest deed;
The homely old intrigues of soul;
The swift temerities that take the part
Of outcast Right—the wisdom of the heart;
Brave hopes that mammon never can detain.
Nor sully with his gainless clutch for gain. fortable. Every trip now I look out for somebody—just pick 'em out, you know, an' keep a watchful eye on 'em. It makes the ride a little more pleasant for them, you know, an' I guess it does me some good too. An' besides, it helps to pass away the time."

The stranger looked at the boy with a new

The boy whistled as he sped along. "The new general manager," he murmu

Then followed hours of the hardest work section of all when we pass Ketorah. They've the boy had ever known. He was the manager's right hand man, his messenger, his lieutenant, his devoted aid, his faithful clerk. "Yes," said the quiet man as he drew a Through all these scenes of suffering and toil the boy never faltered. The old woman got him to rest, but he shook his bandages at her and hurried back to the side of the quiet man. boy, as he studied the stranger's appearance.
"I'm something of a railroad man," was The quiet man was a man of steel, who, with one arm dangling by his side, gave his aid, gave his orders, and sent his despatches and kept an ever watchful eye on all that

was done.

And then when night's shades had fallen "Well," he said, "I guess you're a freight and a merciful coolness had come with the setting of the sun, and the second relief train was about to leave and the track repairers "A good guess," he said, and laughed again. Then he added, "I suppose you are glad to spend your vacations with your

"Well, my lad," he said with a dry sob,
"we have done what we could, please God."
He looked at the lad. "You have found me boy out of the streets. An aunt that turna hard master," he said.

"Didn't I hear you call one of the pas-sengers grandma?" inquired the quiet man. "Yes," replied the boy. "I called her that because she looked like the kind of "Come," said the quiet man, "we can go now." He leaned on Jack's shoulder as they walked toward the train. He was tired and faint. "And remember," he added, with a grandma a boy would like tomave. I've had my eye on her ever since she came little smile, "that vacation is indefinitely aboard at Berwick. She knows I'm looking postponed." "All right, sir," said Jack. out for her an' it makes her feel more com-

Colonel Parson's Great Ride. THE FEAT WAS SUCH THAT GENERAL MEADE

Colonel E. Bloss Parsons, of New York, was brevetted general for distinguished sermodesty forbade the use of that title when he returned to civilian life. Not only did he perform the only authentic feat of decapi-tation during the Civil War, but he was the hero of a remarkable ride. A few days before the battle of Gettysburg was fought "So you get no vacations?" said the stranger. "All work and no play must make Jack Manning a dull boy." General Meade had an important message to send to General Harding, one hundred miles distant. As the route was through a country swarming with rebels, the message was written on tissue paper, that it might be swallowed in case the carrier was captured. suitable messenger. He summoned General Davis to headquarters.

laid off. This is my last trip."

"Your last trip?" cohoed the stranger.
Scarcely had the words left his lips when General, who is the hardest rider as well as the most trustworthy man in the service?" the car gave a sudden lurch and careened. asked Meade.

High arose a chorus of shrill shricks and the It was six o'clock on a Monday night when When the train boy got back his dazed General Meade gave the young officer his instructions. He was to ride with all haste senses he found himself crawling up the to General Harding's headquarters and rebank of the ditch. There was a bump on turn at once with an answer. his head, a cut across his ear, and one of

The messenger retired. Two hundred miles were to be covered. The roads were heavy and they led through the enemy's Exactly at noon the following day Colonel

Parsons entered General Meade's tent. The latter's face grew purple with rage and he ripped out a string of oaths.
"Is this the way you obey orders?" he thundered. "What are you hanging around camp for? You ought to be with General

Harding by this time."

"I have just returned from General Hard-"You lie!" exclaimed the exasperated

camper-out does not have to wear a particular sort of coat or trousers or shoes. Just lug along two of the old suits in the garret and two suits of medium-weight underwear-wool, for that handles moisture better. Conand the wrecking crew were at work, the quiet man turned to the boy and gripped his and necessary cooking utensils and dishes. Strange she should know more about it than you, but it's true. You know best what you want in the way of rod and tackle.

Do not permit a pistol in camp, but, if accustomed to firearms, a breech-loading shot-"You are just my style," said Jack a little gun may come in handy. Pack the duffle in an old trunk or well built box, and keep it there. A comfortable bed is made from fir tips, and in building this thrust the stick downward and toward the head of the bed. sier does not apply to camping parties. One kindred spirit is enough. There is nothing like woods life to bring out the rough edges of one's nature, particularly when it rains and the flies instead of the fish are doing all the biting. And beside a tyro will find it no snap to cook for four or five healthy boys.

> There is increasing interest in the use of petroleum as fuel, both in locomotives and on steamboats. It has been discovered that, after the finer oils have been extracted from petroleum, the residue, which is two-thirds of the original bulk, makes a liquid fuel containing twice the heating power of coal. A ten of this liquid will produce as much steam as two tens of coal and fills only a third of the space. Furthermore, it stores much more advantageously than any other kind of fuel. One-fourth of the fleets of Italy, France and Russia use liquid fuel exclusively. The Dutch are beginning to utilize petroleum on their warships, while Germany is secretly testing its merits. Liquid fuel is also burned to the entire exclusion of coal in locomotive and steamships. A fleet of forty steam

and in South Africa. Russia uses oil almost burning nothing but liquid fuel is operated between London and Borneo, a distance of 10,000 miles, with the most satisfactory results. In the United States the railroads of the far West are beginning to use petroleum. The Southern Californian Railroad burns practically nothing else. With the discoveris no reason why oil fuel should not be used exclusively in locomotives. One point very much in its favor is that the change from coal to oil can be made with very small ex-

The most refreshing bath in summer is the cold plunge, but some constitutions cannot stand it. A warm "tub" with a sponge bath of cold water to follow is a modification adapted to less robust constitutions. To warm or tepid water is best. It is always gard to the kind most helpful, says the Evening Star. Healthy people may take a tepid bath (one in which the temperature aries from 82 to 90 deg.) twice a daynever risk it for more than five minutes betowels. Bath towels are seldom large enough. They can scarcely be too large, and and dry it at once. If the bath leaves the that bathing should be eschewed, but that

youth by the exploit of Dr. Henry S. Tanner, who fasted from June 28, 1880, until the 7th of the next August, a period of forty days.

The experiment was conducted in New York city under the charge of a committee of physicians, and in response to a challenge of Dr. William A. Hammond, who offered a thousnonth. Dr. Tanner lost ten and a half what grayer during his fast; but he apparently suffered no injury, for now, at the age of the city of Denver, Col., to a fasting contest. Six men are to drink beer only, and he is to drink water. The brewers have agreed to the contest and Dr. Tanner intends to get along on water longer than the most tenacious one of the six can on beer. The question as to the food properties of beer is probably involved in the contest.

If this be so, the n has a wonderful record, and should be the best risks in the province. The trouble is that other towns have had similar records, in a century, and certainly risks that were In many towns where the fire alarms have cords of the past in this matter of fire A thorough fire protection service should be naugurated and maintained, and every pos-That the town to-day is in a state of unreadiness to fight a big fire is apparent to every citizen. A splendid water pressure, an ade-quate supply and a fire building with a ction, if the men to man the works are wanting. The brigade drill and an efficient alarm are factors in fire fighting that must not be undervalued if the safety

—The Labor Gazette published by the government at Ottawa in referring to the dairy industry of the maritime provinces, says:

While the home churn is still extensively used, the patronage of butter and cheese factories has steadily increased. These factories not only supply the export trade, but to a large extent the home market as well.

The annual Sunday school picnic in concentration with St. James' church, will take place on Wednesday next, August 14th. Teams to convey the children and others interested in church work, will leave the church at one o'clock sharp for the grounds of Mr. Bernard Spurr, West Paradise. Dairying in P. E. I. is comparatively a new industry. It is developing fast, however, and is giving encouragement to farmers. In Nova Scotia the progress is not quite as satisfactory. Although some of the creameries are doing good work, many are lagging thehind. This is to be repretted. There is behind. This is to be regretted. There is no question as to dairying being one of the most profitable branches of farming. Since 1893 the government has been giving substantial aid to the dairy business. The coyoud the experimental stage. There can be tion of things, and that is the farmers are not keeping the most profitable cows. The farmer who expects good returns from his cows must remember that it costs as much to feed a poor cow as one which will give 4000 or 5000 bls. of milk.

-With the advent of motor carriages and kindred inventions the wise ones predicted the speedy passing of the horse. The European market for horse meat was expected to regulate the prices obtainable for carriage and draft horses. The racing stable was conceded a certain special value among the processing of the true greater that here greater than the contract of the true g conceded a certain special value among the patrons of the turf events that have grown so popular of recent years. However, the actual conditions of to-day do not at all point to the supplanting of the horse for the purpose of either pleasure, ordinary business or hard work. The bicycle and the motor carriage have been branded as fads, and the horse to-day stands higher in the general

is estimated at fifty million bushels, and a is commissioned to secure twenty thousand men from outside the province to aid the local harvesters. The Canadian Northwest is making tremendous strides in this grain growing industry, and its fertile plains are destined to be the great granary of the world. flour have risen, and as the grain belt has been enlarged so its present extent may be

been enlarged so its present extent may be multiplied many times without exhausting the areas that lie ready for the hand of the cultivator.

—From semi-official sources it is learned that the government will issue the census bulletin, giving the population of Canada, bulletin, giving the population of Canada, not later than August 15th. The long deof any great increase over the returns of this year will record merely a nominal in-crease in population. Were it otherwise, The census bureau have now been over fou months at work, and it would seem that securing and compiling the required inform-

W. A. KINNEY.

by coming in contact with a bridge.

—A meeting of the Paradise Agricultural Society will be held in the sohool house at Paradise on Friday, the 9th inst., at 3 o'clock p.m. A full attendance is requested.

—Miss Etta May Elliott, of Clarence, who the past year was a member of the "A" class at Plotou Academy, has successfully passed her examinations, making an aggregate of 1421.

—The Bridgetown Baptist Sunday school will have their annual outing next Monday, the steamer Marina having been engaged to run an excursion to Digby. Price of tickets within reach of all.

—Mr. Rankine, of St. John, is now a working partner with Mr. Avard Anderson in the conduct of the livery business recently purchased from Mr. E. O. Kinney. Both members of the firm were formerly members of the St. John police force.

—The Truro Board of Trade has appointed its president to interview the premier and the government of P. E. Island and decided that a memorial be sent the New Brunswick government urging the establishment of the Maritime Agricultural College at Truro.

—The suggestion of a neighboring town, in regard to turning the hose into the river bridge, might be a good one for us to adopt here. A thorough cleaning of this sort now and again would certainly make the bridge a much more pleasant and healthful medium of travel.

—On account of his health, O. D. Harris of the Glasgow House, Wolfville, well known here, has sold out his large dry goods business to his business manager, J. E. Heales, and his brother-in-law, W. B. Bishop who is now travelling for the Montreal house of Greenshields & Co.

—The South Shore Railway project is be-ginning to take definite shape. A charter has been granted to William Mackenzie, D. D. Mann, of Toronto, and Roderick J. Mac-kenzie, of Winnipeg, under the name of the Halifax and South Western Railway com-pany, to construct a line of railway from Halifax to Yarmouth.

—The DeAlva company which played here two nights last week gave a street parade consisting of one man and a donkey, aug-mented by about a dozen small boys. The exhibition consisted in beating and prodding the donkey to see him kick, a truly edifying spectacle. The attention of the S. P. C. A. should be directed to them.

horse to-day stands higher in the general estimation than ever before. The horse markets indicate that higher prices are being paid for the trotter, the runner, the high actor and the common horse of all breeds and types than ever before, and remarkable receipts and uniform prices are recorded. The horse has risen equal to the occasion, and has reached the beginning of an era of the greatest prosperity ever known.

—Wheat is the great staple export of the farmers of Manitoba and the Northwest, and this season an unprecedented harvest is just ready for cutting. The Manikoba crop alone is estimated at fifty million bushels, and a business or to establish a local company.

—The Annapolis county horses made a poor showing at the Kentville races laset poor showing at the Kentville

League Shooting. Through some oversight, the league shooting was not published as the separate matches were shot by No. 1 and No. 4 teams of the 69th Regiment at the Paradise Range this season. Below is a summary of the five matches. Since previous matches, the targets have been changed, so that good scoring is very much harder than heretofore.

MISS A. CHUTE'S

### Practical Talks and Plain Precepts for Farmers.

Edited for the Farmer readers of the MONITOR by an Anna polis Valley Agriculturist

The Horse.

kind which, in our opinion and that of the best authorities, are best for the average general purpose farmer of this valley.

The slow ox has had his day probably on our farms. One reason of his decline is the introduction of more modern methods and of want of time caused by the ever multiplying work of the farmer in keeping up with the times. Another reason is that the modern farms, cleared of stumps, stones, etc., allows of cultivation by the fast moving horse.

A least the farm horses of the valley value of a carriage horse would not affect the

can afford to keep several horses, it is possi-ble to have a speedy, light horse, kept a mare. If you do not wish to invest the only for driving purposes, but for the gener-money, breed the best mare you have to the ality we must look for something which will combine atrength and weight, to a certain if you wish to breed up, you cannot make

The first step, perhaps, towards improvement would be the introduction by the government of horses which in the opinion of good authorities would be best to use upon the best of our native mares.

True, steps have already been taken in that line, but we, in the valley, are not much the richer yes. The market for horses is improving every year, and we may look for good prices if we breed intelligently—breed what the people want. For our own farmers the best general, all-purpose horse seems to be, not the heavy Clyde or Percheron, but a horse of from 1200 to 1300 lbs., blocky and especially low set for orchard work, and one withal which can at least reach a ten-milean-hour gait. The draughts are too heavy and cumbersome, while the hackney is too long legged. We append an article of considerable merit, from the pen of an Ont. breeder, who speaks of the profit in breeding.

Horse Breeding.

kets at a time when every available mare in the country was being bred—in many cases to any horse that came along if he was only cheap enough—and consequently the country was full of an inferior class of horses, for which, under the new conditions, there was no market. This condition of affairs affected every branch of the horse-breeding in dustry to such an extent that horse breeding was in some sections entirely suspended;

was in some sections entirely suspended;

Next should be prominent but not coarse, for the day of the horse-breeding in dustry to such an extent that horse breeding in head. Deep eyes indicate a bad disposition.

Next should be reall set on aboulders ricely in disposition. Next should be reall set on aboulders ricely in dinners which a navy might decline to was in some sections entirely suspended; though during all this time a strictly first-class horse of either the carriage, saddle or

BREED HORSES THAT THE MARKET DEMANDS.

But what is the condition of affairs now? A demand for good horses has sprung up, and we are not prepared to meet it. Now, before we begin breeding again let us look around and see what brought on the last depression; next, let us find what classes of horses are in demand, and likely to be in defeated and stop the fermentation of the stable does be a prefect received. eral classes of horses which I do not believe will ever be replaced by machines or automobiles or any other agency. The gentlesouth side of the building, so that the direct man's carriage horse, the saddle horse and rays of the sun may fall direct upon the aniheavy draught horse are horses for which mal and floor, less dark, damp and gloomy there will be a demand as long as there are dungeons for our stables. Sunlight is men in the world. A very important point almost instant destroyer of disease germs. is the selection of one of the marketable Sweep the stable overhead frequently, one breed, and there is enough study in one ces with moleture apparent in them. Use breed for any farmer if he wishes to put his absorbents in abundance and in addition to

NEIGHBORS SHOULD BREED THE SAME CLASS OF HORSES.

In making a selection several things should be considered. You must have love for the work you undertake if you would make a success of it; so if you do not like a draught horse and cannot cultivate a liking for him, don't expect to make a success of breeding that class. The same holds good in other classes. A very good plan is, if there is any one in your locality making a success of any of one marketable class of horses, to breed the same class, as the more animals of one class there are produced in a section the better will be the market for that class, as it will attract buyers that would not go to the section if only one or two horses of their will attract buyers that would not go to the section if only one or two horses of their kind could be found there. Another adhered and the section is the found there and the section is the found there are section in the section in the section is the section in the section is the section in the section in the section in the section is the section in the section in the section in the section is the section in the section in the section in the section in the section is the section in the section in the section in the section in the section is the section in the section in the section in the section in the section is the section in the section in the section in the section in the section is the section in the section in the section in the section in the section is the section in the section in the section in the section is the section in the section in the section in the section in the section is the section in the section in the section in the section is the section in the section is the section in the section is the section in kind could be found there. Another advantage would be that better sires could be bright, as few individual farmers can afford to pay the price of a first-class sire, and most men who buy a stallion for other people buy as cheap a horse as they can, as they give the owner better returns for the money invested. Having made our choice let us learn as much about it as we can then fix in our as much about it as we can, then fix in our upon the milk to the detriment of the one as much about it as we can, then fix in our mind an ideal horse, and get the best mare you can afford. If you cannot ray a high price for a mare you need not be discouraged, but select the mare best suited to the class of your choice. If you are fortunate enough to own more than one, breed them to the best horse you can get. Do not think that because your mare is not good that a poor horse is good enough. If your mare is good enough to breed a foal, the best horse you can get is none too good. Another mis-take often made is to breed to any horse that happens to come along your line at a low fee. Now, first-class horses cannot go into every farm lane and serve at any fee that may offer. Select your horse, then go to meet and the farmer who sows without any assurant terms of the server way. him if he does not come your way.

FOR THE FARMS.

Libelieve that for the average farmer, the draught horse is the most profitable to breed.

In the first place a draught brood mare is good crop from a fertile soil at first, but

more suitable for farm work and can be suc-This is a subject which is taken up with cossfully worked on the farm when carrying

ault in a better class of horses.

You can, fix in your mind the ideal horse and
For some of our more wealthy farmers who go to work on business principles to produce

degree, with ease and freedom of movement.

The present state of things, wherein we have all conditions and mixtures, has been brought about by employing on our mares breed her to the best horse you can get, and any size that happened to come along—the continue on in this way, and you will in time cheaper and more worthless the better.

years ago. They have now been cleared or the surplus stock which was forced upon them by the introduction of electricity and the general use of the bicycle. These inventions threw thousands of horses on the markets at a time when every available mare in kets at a time when every available mare in the content of the cont

class horse of either the carriage, saddle or draught type, could be raised and sold at a profit. During this season of depression many serviceable horses were slaughtered throughout the country, and many of the the throughout the country, and many of the throughout the country, and a good, long, well sprung rib, giving the country were cold for expect to the difficulty known as a 'cold.'"

second helpings, but these were mostly small boys with a determination to excell.

Very literally we ate to live, and we ate with the sense that, if we did not eat hugely, the dreadful red curtains which were drawn der, and a good, long, well sprung rib, giving a common patients' death beds might be on the best mares were sold for export, or for city work, as they were the only horses on the farms that could be sold at any price, and the general cry was that horses would never the general cry was the general cry Farmers' Institute.

Farm Sanitation.

Good sanitation demands a better stable mand for all time. We must also consider floor by a perfect removal of the liquids and what other motive power is likely to come in solids each few hours, said John Gould in competition with the horse. There are sev. an address before the Vermont Dairymen's classes of horses. I say one, because few, if whitewash the walls twice a year and have any, farmers will make a success of more than a dry stable. Do not have pools and crevithe usual absorbents have some land plaster NEIGHBORS SHOULD BREED THE SAME CLASS Get a few loads of road dust or dry clay

Good Farmers and Good Farming.

him if he does not come your way.

THE DRAUGHT HORSE THE MOST PROFITABLE work for his capable neighbor than for so

their crops soon become poorer and poorer, until they have to quit farming. The good farmer grows good crops at first and better ones afterwards. He finds that it is far easter to maintain the productive capacity of the farm than to attempt to restore it. It does not pay to exhaust its fertilty and then attempt to restore it by commercial fertilizers.
Only the least exhaustive products should be sold, and although he may be at first obliged to sell grain and hay, he will soon send off his supply in the form of wool, meat, or butreluctance, inasmuch as it is impossible to lay down fixed rules for breeding or conformation best suited for our farmers, and be it remembered that whenever horses are discussed in this column they will be of the kind which, in our opinion and that of the remembered that whenever horses are discussed in this column that of the remembered that whenever horses are discussed in this column they will be of the kind which, in our opinion and that of the remembered that whenever horses are discussed in this column they will be of the kind which, in our opinion and that of the remembers are kind which is taken up with an any of the other classes, as heavy work on the farm has a tendency to make fine young carriage horses clumsy, and they cannot be sold from the plow for nearly their real values while the remembers however here. posited to its credit, and it will soon reply, "no funds." I know of many farmers who worked hard from daybreak to dark and ye died poor, because they wrought to a disad-vantage. Every farmer should devote some time each day to reading and reflection, and then there would be less failures in farming. The farmer should raise his children in an times. Another reason is that the modern farms, cleared of stumps, stones, etc., allows of cultivation by the fast moving horse.

A look at the farm horses of the valley will easily convince one of the necessity of improvement in the breeding. It is possible that our farmers will soon awaken to the fact that the present hap haven decaying the property of the prope ble that our farmers will soon awaken to the fact that the present hap-hazard, go-as-you-please sort of cattle breeding will not give as much profit as breeding intelligently along certain well-defined lines, and let us hope the awakening will be followed by a carried-out determination to improve our live stock. If this is done we hope that, here as in P. E. I., the breeding of suitable farm horses will receive more attention.

We do not undertake here to say what the proper type of horse for the farmer should be, but hope that we may glean from theory and practice some general ideas which may be shaken together, digested, and finally result in a better class of horses.

Aborse to do your own work, but rather try solve them to bree that will a city cater, and you will have a horse that will do your own work for a year or two, and will then to may went when he leaves to and prove them-selves acapable, or even more so, than he has been. How often we see a young man left a good home by father, and in a few years he is either in debt or has given up the farm, saying there is nothing to be made at it. Now, if that man's father had allowed him to go forward and do the work while he was yet alive, so that he could advise him and help him, things would have been different, and he, instead of having to quit the farm, might have proven himself a good farmer. There should be in all farmers' homes a small library of suitable books, and these should be carefully studied, and when he wishes to try anything new to him, it appears to show you mind the ideal horse and gathering all the information you can, fix in your mind the ideal horse and gathering all the information you can, fix in your mind the ideal horse and gathering all the information you can, fix in your mind the ideal horse. should be on a small scale, and if successful he should increase it gradually. A good farmer has worked himself up gradually,

and he still has to study and experiment t

Ribs of beef have at last qualified for ad mission to the somewhat exclusive pages of

the British Pharmacopœia.

Beef has for centuries been accorded th very heartiest respect of the English people, but only as a meat for strong men. Nowa-

tient with the best beef and mutton, rejuver The horse markets of the world today are wastly different from what they were a few years ago. They have now been cleared of length, and coming close up to hips. be short and straight with strong cords run- ate, as it were, his impoverished blood, and

around patients' death beds might be on the scene in our case. The writer was daily guilty of gluttonous excess, but the thought of his wife and children nerved him to the crime. Parental love dictated the nasty orgie, but the writer felt that if a coroner's jury did bring in a verdict of "Died from over-feeding," the world would recognize the purity of his motive. The beef treatment has enabled the doctors to take up arms actively now against this dread disease. They still hover round a patient with their solemn

faces and their prying stethoscopes, and take their fees. Cod liver oil has gone by the board-except in very special cases—and the treatmen of phthisis is comprised in the above pre scription. There is nothing very learned or scientific about it, and really it would seen as if an intelligent man might have thought cure phthisis-the awful complaint still laughs at the faculty and sweeps its thousands into the grave every year. But if the sufferer be not too weak and the disease not too far advanced, the above prescription will enable him to live on for years in compara tive comfort. All Harley street cannot offer

more just yet. You Prevent Hay Fever, or Cure it.

of Satan and the powers of darkness, can b or satan and the powers of carriess, can be carried forward only by a divine energy. He that would fight successfully the great conflict of life must, first of all, recognize his dependence upon a higher power. He must place himself under the shadow of the Almighty. He must call mightly on Him who by the gift of the Spirit, can change the nature of the soul and transform it into His own image.

-You will find that the mere resolve to be useless, and the honest desire to help other people, will, in the quickest and deli-catest ways, improve yourself.—Ruskin.

And yet, the recompense, the recompense
is there.

Lake Theoremse Manue -John Trotwood Moore.

Hygienists and physicians alike pre the therapeutic nature of water, ranking it far above any drug in materia medica in its actual remedial value. Scarcely any up to-date physician fails to give it a prominent place in his practice.

Water is not nly a mere mechanical

onveyor of poisons out and foods in. It is powerful vital stimulant, a divinely apointed agent which nature uses in her heal-"Water drinking," says the editor of a

medical journal, "is an internal bath. It dilutes the fluids of the body in which the keep up, and more so, to keep on growing body by diluting the medium in which it lives. By the free use of water, the move-ment of the mass of liquid in which the living elements of the human body perform their work is quickened and the stream of ife runs clear and pure.

"To the great thinning of the blood which follows copious water drinking is due the remarkably increased activity of the kidneys,

skin and bowels which it produces.

"In rheumatism, cold water is useful as a means of diluting the blood so it can dissolve and carry out of the body a larger amount of uric acid and allied substances. As a

he exercise, baths and other means employed o reduce obesity; it dissolves and car out of the system the broken down material made by the treatment.

To increase the volume of the blood and

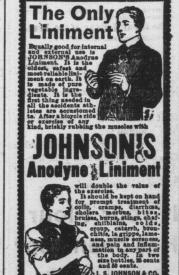

introduce permanently a larger proportion of water, a small quantity should be taken at frequent intervals. The amount taken during the day may sum up several pints, but the quantity taken at any one time should not exceed four to six ounces. This quantity may be taken every hour or hour and a half to advantage. The temperature of the water should ordinarily be about 70 degrees F. Very cold water is indicated aly in fevers, constipation and hypopepsia The quantity must depend on the effect that it may be taken with advantage. In evers, a glass may be taken every hour. glasses of cold water should be taken in the orning on arising and as much more on

retiring.
"Chronic biliousness," continues our autoxemia (poisoning), resulting from the pu-trefaction of food in the alimentary canal,

healthy, hearty and happy we ought to drink freely of that non intoxicating but exhilar ating beverage known as "Adam's ale."

rest.
Salt water bathing imparts to the dullest orbs a wonderful brilliancy. This bath is a fine tonic for falling lashes and stinted eye brows.
Grandmamma's old time remedy of cam-

phor water for inflamed and weary eyes has been adopted by an authority on toilet mat-ters. The proportion she gives are: Cam-phor water—not spirits of camphor—two ounces; borax, two grains. Hood's Sarsaparilla builds up a broken down system. It begins its work right, that is on the blood.

lerbaroot Powder cures Catarrh. Sore Throat, cops Headache and relieves Asthma.

The Household.

The cans, pails, dippers-in short, every

utensil that comes in contact with the milk, should not only be thoroughly washed, but they should be immersed in boiling water for several minutes. The seams and joints in all utensils should be filled with as these small receptacles form excellent breeding places for all kinds of germs. To many these precautions may seem unneces-sary, but they are not, for analyses show that milk put into cans that have been treat-ed in this manner contains a much smaller number of bacteria per cubic centimetre than does milk from the same lot put into cans washed in the usual way; and it will remain sweet from six to twelve hours longer. In many communities the same cans in which milk is taken to the factory are used in carrying home sour milk and whey. While this is a custom that should not be encouraged, it cannot always be avoided, but when practiced it is doubly important that the cans should be thoroughly boiled before they are again used for milk. Milk is often taken to the factory in cans covered with a green coating inside the neck and along the seams; such cans are alive with destructive organisms, and to have them in such a condition shows unpardonable neglect. Milk put into such a receptacle for a single moment, besides its mixing at the factory with other milk is sure to infect the whole lot, often re-

That a husband of long standing cares a great deal about the daily attire of his wife. and funny, in a lawsuit some years ago. The aggrieved husband, writing to the father of his wife says: 'You would bless yourself if you were to see the figure Henrietta makes of work. But we can't afford to have clerks you were to see the figure Henrietta makes of herself in the morning, generally till beween two and three o'clock. It consists of an old plaid dressing gown, extremely dirty, and with several holes burned in it. In this disgusting costume she came to breakfast one morning when my heather Bahart on the pay roll as a day laborer.'

"So I quit. Somehow things don't seem to happen in real life the way they do it in print." one morning when my brother Robert was | print

with me. She does not often wear the gowns you had the kindness to give her, her favorite dress being an old red gown not remarkably clean, which is my aversion.' This with other annoyances, combined to make it impossible to live with her.

There are some fashions so sensible and so indicative of refinement and right feeling that no one can help approving of them. Such a fashion is that one now popular, of making dresses especially dainty and becoming for home wear. To find the mistress of the house arrayed in one of these pretty gowns it is by no means essential that they be expensive), stands for a good deal more than the single fact that she is in the fashion, it presupposes a well ordered house, cleanliness, which means health and happiness, and a laudable desire to be admired by her husband and children.

The effect upon manners alone is worth far more than the control of the control of

clusion that there would not, and was rewarded by the loving child, who put his little

Druggists who desire to keep flies away this summer." rom the soda fountain and serving counter, sponge the marble over with a liquid made of one ounce each of oil of pennyroyal and oil of sassafras dissolved in one pint of alco-hol. By putting a little of this mixture in an atomizer, such, for example, as is used for cologne, and spraying it about an invalida bed, a dining table (over the linen before the food is put on,) etc., equal relief can be had in the home from flies.

Last summer a paragraph went the rounds advocating spraying "oil of lavender in a lit-tle water" as an anti-fly remedy. Neither it nor the oils mentioned above can be put with water. Alcohol is needed, and the oils of penneyroyal and sassafras are much superior to lavender as a fly driver .- Gentle-

Remedy for Burns.

from equal parts of linseed oil and lime water. This mixture should always be in one's hurts and their remedies that is tacked on the door or cover of the medicine closet. These directions of the right thing to do in emergency cases should be very plainly written or printed in large type, and always kept in one place. The bottles and boxes containing the remedies should be plainly labelled, and the nurse-maid or servant wit whom the children are sometimes left should be instructed in their intelligent use. The remedy for burns referred to is called Carron oil, after the furnaces where it was first used for dressing burns. This mixture can be prepared at home.

Joker's Corner.

The policeman had given his testimony, which was unqualified to the fact of the old was a mingled expression of indignation and determination on his countenance. He tes-tified flatly, to the surprise of the court, that the old man was sober when he came home.

"You say that Mr. - was sober whe

he came home?"
"Yes, sir."

" No. sir." "Did you put him to bed?"

"And he was perfectly sober?" "Yes, sir."
"What did he say when you put him to

"He said, 'Good-night.'"

"Anything else?"
"Yes, sir." "What was it? Tell us exactly what he said, every word."
"He said as how I was to wake him and

call him early, for he was to be the queen of

The old man was fined. It Didn't Help Him. "Yes," he said, "I've quit, and I want milk is sure to infect the whole lot, often resulting in much inconvenience and pecuniary loss. Where the cans are taken home empty it is advisable to wash them at the factory where steam can be used in sterilizing them. It should not be necessary for the creamery management to employ an extra man to do this work; a wash box and steam jet can be provided, and the farmer be permitted to wash his own cans. When this is done the cans should be closely covered with a canvas to keep out the dirt.

"Yes," he said, "I've quit, and I want to say that I think these stories of the way meet do say that I think these atories of the way the said, "I've quit, and I want to say that I think these atories of the way meet do say that I think these atories of the way to say that I think these atories of the way to say that I think these atories of the way to say that I think these atories of the way to say that I think these atories of the way to say that I think these atories of the way to say that I think these atories of the way to say that I think these atories of the way to say that I think these atories of the way to say that I think these atories of the way to say that I think these atories of the way to say that I think these atories of the way to say that I think these atories of the way to say that I think these atories of the way to say that I think these atories of the way to say that I think these atories of the way to say that I think these atories of the way to say that I think these atories of the way.
