THAT MONTREAL SENSATION .- MONings against the aged real estate owner for obtaining money under false

A singular circumstance occurred at Doherty creek last week. An old lady, Mrs. Wilkinson, aged 86 years, became somewhat demented of late, occasionally wandered about the house at night, and on Wednesday morning was missed from her bed. On search being made she was found in a chest dead. She had removed the contents (a quantity of bed clothes) from the chest and got in, the chest standing down and shut her in, where she died

Canada's Credit Abroad.

Those Canadians who are proud of their coontry and who desire to see it stand well in the money markets of the world, will be pleased to hear that the new Canadian 32 per cent. Govern-ment stock, which was placed up in the London market a few months ago at 91, on the 11th inst. reached the high figure of 96, with the promise of attaining even a higher figure. This is a very satisfactory showing and speaks volumes for the estimation in which Canada is held by investors, who have not been deterred by the vigorous efforts that were made this year in certain quarters to decry her credit. It is evident that Canadian 31 per cent. stock will be at par before any very great laspe of time and that in the near future we may expect to float a 3 per cent, stock at a better price than was obtained for the 31 per cent. a few months ago. Indeed, considering the manner in which the Dominion has always met its obligations and the present tendency towards cheap money, there is no reason to doubt that Canadian 3 per cents. extend to him their liberal patronage so long may stand at per before many years

have elasped. In this connexion it is worthy of note that the price of Canadian Gov't stock is higher than that of any nation on the Continent of Europe.—
