DISTRICT AND GENERAL

A pure white groundhog was trapped near Ingersoll a few days ago.

Power has been turned on on the new hydro-electric line which extends from Chatham for over five miles into Dover township.

There was a light snowfall a few miles west of Calgary last week, and there have been touches of frost in other districts in the West.

The city council of Fredericton, N. B., has suppressed the mosquito pest by spreading kerosene oil on the ponds and pools about the city.

Although the year is only a little over half gone, nearly two dozen newspapers have gone out of business since the first of January in Ontario alone.

It is proposed in Petrolia to change the date of municipal nominations to the last Monday in November and the polling day to the first Monday in December.

The defendant in a division court case at Ottawa the other day is giving evidence stated that two of his daughters were working and the other was in the civil service.

Another number of Ontario towns have decided to hold their municipal elections the first week of December, in order to have them over before the Christmas activities begin.

It is stated at London that the coffers of the Ontario Government have been enriched to the extent of \$840 through convictions secured by Walter Bolton, license inspector for London and Middlesex county, in July.

Running unnoticed in front of her father's binder, Verna Fowler, 3 years old, daughter of William Fowler, Bayham farmer, was so badly injured that it was necessary to amputate her right leg between the knee and ankle.

Weighing 3,170 pounds, a steer, said to be the largest ever received in Winnipeg, arrived at the Union Stock Yards from Wainwright, Alberta. It was sold for \$250, the highest selling price of any steer in the local yards since the war.

The Grand Trunk International Limited was wrecked at Flint, Mich., on Thursday morning when it ran into a freight train which had failed to clear the main line when it took a siding. The passenger engine, tender and baggage car were hurled into the ditch. No one was injured.

The funeral of Mrs. Iva Mae Kemp, wife of H. R. Kemp, whose death occurred in St. Joseph's Hospital on Tuesday of last week after a lengthy illness, was held from the family residence in London to Woodland cemetery. Mrs. Kemp was a daughter of Mr. and Mrs. J. E. Campbell, of Ekfrid. She leaves her husband and two sons.

EATON-BLASHILL

A quiet wedding took place at 10:30 Saturday morning at Wortley Road Baptist parsonage, London, Rev. R. J. Murphy officiating, when Estella May Blashill, daughter of Mrs. W. R. MacDonald, of that city, became the bride of Lorne Eaton, of Ekfrid, son of Frederick Eaton. The bride, who was unmarried, was given in marriage by her uncle, H. C. Rennie.

Following an informal wedding breakfast at the home of Mr. and Mrs. Rennie, Mr. and Mrs. Eaton left on their honeymoon trip to Detroit and on their return will reside in Ekfrid.

DENNEY-HOWEY

A London marriage of local interest was solemnized at noon on Saturday, when Mrs. Harriette Mae Howe, only daughter of Mr. and Mrs. A. D. McCallum, Craig street, became the bride of Dr. Wilmer Lloyd Denney, son of Mr. and Mrs. A. J. Denney, of London. The ceremony was performed in the First Methodist church by Rev. E. W. Jewitt in the presence of a few intimate friends.

The bride has for the past four years been connected with the D. S. C. R., being a valuable member of the vocational staff of Westminster Hospital.

The groom is a graduate of the medical department of the University of Western Ontario. During the war he served overseas with the royal navy and later post-graduated in diseases of children in New York and Boston. While at Harvard he brought considerable credit to his alma mater by winning an open scholarship in competition with graduates from all America.

The happy couple left immediately after the ceremony on a motor trip through New York State, the bride traveling in a gray tweed outing suit with grey felt sport hat and gray shoes and stockings. On their return they will reside in Central avenue.

The bride is well known and popular in Glencoe and vicinity, being a native of Ekfrid township, and is a niece of Mrs. James Poole.

STOCK-JUDGING CONTEST

Middlesex Junior Farmers Defeat Elgin Opponents by 288 Points

Middlesex county junior farmers won an overwhelming victory over the Elgin county standard-bearers in the recent stock-judging contest. At a previous contest Elgin county won by 2 points. This defeat was wiped out by 285 points in the last contest, and the Middlesex county farmers are elated.

They are now looking forward to the big stock-judging contests to be held at the Canadian National Exhibition and confidently predict that the junior farmers of this county will romp off with the majority of prizes. Middlesex county's team rolled up a score of 4,585 points to Elgin's 4,300 points.

The individual scores of members of the winning team follow:—Stuart McDonald 486, Edward Mitchell 477, Diarmid McTaggart 474, Ross McTaggart 468, Ross Saddle 462, N. Keays 460, J. Murray Allen 445, W. L. Pack 445, Merton Maguire 438, Clifford Jones 430; total, 4,585.

MANY SPEEDERS FINED

Police Magistrate Morrison Has a Busy Week in Court

George Tilly, a provincial traffic officer, who is at present patrolling the Longwoods Road between Delaware and Wardville, laid a number of complaints under the Motor Vehicles Act before Police Magistrate Morrison the past week, convictions being registered in the following cases:

U. E. Kerr, Detroit, travelling at 47 miles per hour in contravention of sub-section 1 of section 11 of the Motor Vehicles Act, was fined \$10, with \$6.25 costs.

H. S. Parker, Ohio, travelling at 48 miles per hour, was fined \$10, with \$6.25 costs.

Wm. A. Steele, New Jersey, 43 miles per hour, paid \$5 with \$6.25 costs.

J. Salisbury, Schneetady, N. Y., 40 miles per hour, paid \$5 with \$6.25 costs.

Michael Ott, Ohio, 48 miles per hour, paid \$10 with \$6.25 costs.

Nelson Bakewell, Plummer, Mich., past an intersection at 35 miles per hour, paid \$5 with \$6.25 costs.

W. C. Smelt, Detroit, past an intersection at 38 miles per hour, paid \$5 with \$6.25 costs.

Thomas Ritchie, London, 43 miles per hour, paid \$10 with costs.

John Beattie, Glencoe, insufficient lights, was assessed \$2 and costs.

Shelby Oil Co. of Canada, London, charged with driving at an excessive rate of speed within the corporate limits of Glencoe, paid \$10 and costs.

The traffic officer pulled up alongside this chap, driving a truck, and told him he was travelling at 35 miles an hour. "I can go faster than that," he said, and "stepped on her," unaware that he had been halted by the traffic officer.

Eugene Thibodeau, of Windsor, charged with reckless driving at 55 miles with a maximum of 62 miles per hour, pleaded guilty to the offence and was assessed \$50 with \$4.85 costs. It will cost this chap \$1 per mile for "hitting her up."

Clarence Nixon, Glencoe, parking without lights, \$2 and costs.

Israel M. Cohen, London, passing intersection at Wardville at an excessive speed, \$5 and costs.

There are several others to hear from, having pleaded guilty, but the penalties are not yet received.

The case against Charles Willey for travelling without lights was withdrawn as it was shown that he had made an honest attempt to get his lights in operation.

The case against C. N. Larney, of Florence, for crossing an intersection at an excessive speed was dismissed, three witnesses having sworn that the brakes were applied before crossing the intersection.

DEATH OF DANIEL KING

Newbury, August 5.—Daniel King died on Tuesday, after a lingering illness of two or three years. He was one of the oldest residents of Moos township, and a life-long Oddfellow, being the oldest member of Mount Zion Lodge. He was buried on Thursday. The services were conducted by Rev. Mr. Carr, of West Lorne. The pallbearers were brother Oddfellows: W. Bayne, H. Fennell, C. Telfer, E. Woods, Charles Blain and Asa Winship. Interment took place at Camerton cemetery. Mr. King leaves a widow and three sons, Alexander C. on the homestead, and Fred and Frank in the States.

In the old days many a man killed himself trying to drink up his farm; now he can do the same thing in a day's time with one bottle of moonshine.

APPIN GARDEN PARTY

Usual Big Success of This Popular Annual Event

The annual garden party at Appin, which has been a feature of community activity for the past nine years, was held Wednesday night and was fully as successful as any of its predecessors. According to the returns at the gate over 2,000 persons attended, and fully 500 cars were parked on the grounds or in the nearby streets.

In the afternoon there was a lively game of baseball between the Appin and Ilderton baseball clubs. The Ilderton team won, the score standing 13 to 7. There was also a soft ball match between the girls of the Glencoe high school, which resulted in favor of the Glencoe team. There were games and races for the children in the afternoon and many prizes were distributed.

At the evening entertainment the chair was taken by Peter McArthur, who made a brief address of welcome. He called attention to the public spirit shown by the village of Appin in promoting these entertainments. The proceeds are all devoted to perfecting and maintaining the community park, in which the garden party was held. This park has an excellent baseball diamond, tennis courts, a bowling lawn, teeters for the children and flower beds set out. Every evening, when the weather is fair, scores of young people from the village and surrounding country assemble to play games and enjoy themselves. The park has become a community centre of the highest value and the speaker urged people who came from other communities to learn a lesson from the enterprise and public spirit of Appin.

The program was varied and well suited to the occasion. While the crowd was assembling there was music by the 7th Hussars Band, of London. Leroy Kenney, comedian, of Toronto, and Walter Edwards, comedian, also of Toronto, provided much mirth with characterization, song and story. There were acceptable recitations by Miss Brandon, of Hamilton. Miss McGregor, pianist, of Toronto, acted as accompanist. The Stratford Quartette pleased the audience with their various numbers.

Refreshment booths conducted by the Women's Institute had a large patronage.

BARN FIRE IN EKFRID

About half-past four o'clock yesterday morning the barn of Dan McKelvie, lot 20, gore of Ekfrid, was destroyed by fire, cause unknown. The barn contained the season's crop as far as harvested, one cow, two calves, two horses, about ninety hens, automobile and buggy, all of which were consumed. The loss will be in the neighborhood of \$3,000, with some insurance.

CAIRO STORE BURNED

Fire of unknown origin completely destroyed the store, stock and household contents of the Cairo store early Sunday morning, July 29. The family were all away at the time except the proprietor, who was awakened by the smoke. He endeavored to get down stairs but was forced back by the flames, and made his escape from the burning building through an upstairs window.

About \$300 in cash was also lost in the fire. There was \$700 insurance on the building, while the stock and contents were partially insured.

DONATIONS TO MEMORIAL HALL

Mrs. Mary McKee.....\$10.00
Mr. & Mrs. Frank Abbott..... 5.00
Mrs. Hill..... 5.00
Mrs. Barbara Sullivan..... 5.00
D. M. McKellar..... 5.00
R. J. Currie..... 3.00
R. Vause..... 5.00

The members of the I. O. D. E. wish to thank Miss Nellie Farrell and E. Smith for the lovely wicker trays, and John Munroe for the flag stand, and all who sent donations of cake, bread, cream and chickens for the opening of the Memorial Hall.

CHEERIO NOTES

On Tuesday, July 31, a very close and exciting game of soft ball took place on No. 17 school grounds between the Cheerio girls and the Kilmartin girls. The score was 14-12 in favor of the latter.

On the following Thursday evening a game was played at Tait's Corner between the Cheerio girls and the team of that district, the score being 43-6 in favor of the former.

Nobody gets married any more. They are united in bonds of holy matrimony.

MEMORIAL HALL OPENING

Splendid Building Just Completed by Women's Organization

An outstanding event in the history of Glencoe took place Friday afternoon when, with appropriate ceremony, the Memorial Hall erected by the Major-General McKee Chapter of the I. O. D. E. in memory of those from this district who lost their lives in the war, was opened. The exterior of the hall was decorated with flowers and flags, a huge banner being draped over the bronze memorial tablet which is inset beside the doorway. On the wide porch stood the officers of the chapter and the speakers of the day, prominent among the former being Mrs. Mary McKee, mother of Major-General McKee, Mrs. Fred Aldred, regent, Mrs. Wright, Miss Aldridge, Mrs. Oxlley, standard bearer, Mrs. W. A. Currie and Mrs. Knox. The Strathroy scout bugle band was present.

Music was provided by the Laugh-ton orchestra, following which Rev. T. J. Charlton, of St. Matthew's church, London, led the gathering in the Lord's Prayer. The scouts sounded the Last Post, while the hushed crowd saw Miss Catherine McMillan, head of the junior chapter, draw aside the banner from the memorial tablet. This gave the signal for Mrs. Aldred to hand the key to Mrs. McKee, who unlocked the door and formally declared the building open.

All who could find seats followed her into the building, and the meeting was addressed by the chairman, Mr. Charlton, who, after a musical selection by the orchestra and an address by Reeve Allan McPherson, called upon the speaker of the day, Rev. Major Canon Appleyard, M. C., of Woodstock, formerly of London, one time chaplain of the 31st battalion. The major, who is well known in Glencoe in connection with his work for the Navy League some years ago, was given a hearty reception. He spoke of the things such a memorial stood for—the 63,214 Canadian dead who lie in France, the suffering and sacrifice of those who lived to come back—but more particularly in a spirit of optimism of what we had gained in vision, of the casting aside of provincial prejudices and of co-operation in the empire.

The major's address was followed by a solo from Miss Ethel George, and after short speeches by Rev. R. F. Irwin, of Seaforth, Rev. W. Williams, of St. John's church, Glencoe, and J. G. Lethbridge, M. L. A., the meeting was brought to a close with the National Anthem.

The hall itself, built at a cost of \$7,000, is of red brick with wide verandah, entrance hall, kitchen and club rooms. The latter are to be used for the I. O. D. E. and army veteran activities, and also as a community centre. The two main rooms are provided with fireplaces and are separated by an archway permitting them to be thrown into one large assembly hall. There is a roomy basement with concrete floor, and this will probably be fitted up as a gymnasium.

At the close of the program a reception was held and light refreshments were served by the ladies.

KILLED BY MOTOR CAR

Wm. Haskell Victim of Accident at Lethbridge, Alberta

The Merlon Standard gives particulars of the death of William Haskell at Lethbridge, Alberta, as the result of being struck by an automobile on Saturday evening, July 7th. Mr. Haskell succumbed to his injuries after lying in a hospital in an unconscious condition for several days.

John P. Manderville, a farmer, driver of the car, was arrested on a charge of wanton driving, and released on furnishing bail to the amount of \$6,000 to appear for trial in eight days, but on the death of Haskell a warrant was issued for his arrest on a charge of manslaughter.

Manderville formerly lived in Euphemis township. Haskell was a former resident of Tilbury, and is a brother of Joseph and Jerry Haskell, of Merlon. He moved to the West in 1912. Two weeks prior to the accident the 23-year-old son of Mr. Haskell died, and now with the tragic death of the father, the family are grief-stricken. Deceased was a half-brother of Thomas Haggitt, of Glencoe, who had just completed arrangements to go and pay him a visit when word of the accident was received. Before moving to Tilbury Mr. Haskell resided in the township of Euphemis. He was born in the village of Newbury.

FOR SATURDAY NIGHT

The Junior I. O. D. E. will serve ice cream Saturday evening at the Memorial Hall.

Make a lion out of a man and he will make an ass out of himself.

Surpassing
all others in Delicacy and Fragrance.

"SALADA" TEA

SEALED PACKETS ONLY

EVERY LEAF PURE

HOME CANNED CORN IS GOOD EATING.

The Red Man set an illustrious example when he ate green corn. It is an enticing dish for which the majority awaits patiently or otherwise until it is ready to be served or until the first little white blisters appear. Those who await "otherwise" sometimes indulge in satisfying their early season appetites for this vegetable by purchasing the first ears that appear on the market. And what a disappointment it is when, with taste all set for a nice juicy ear of green corn, we bite into white kernels only to find them doughy and tasteless.

It may not be "elegant" to eat green corn from the cob, but it is the only way to get its full flavor and natural enjoyment. Our sympathy goes out to those with "store teeth" who must give up this pleasure. We regret that Mother Nature per-

The Gift Of The Gods

BY PEARL FOLEY.
(Copyright.)

CHAPTER XI.—(Cont'd.)

"Eh? What's that you say?" demanded Mrs. Ashton.

The beginning of David's speech had caused the old lady to flop rather heavily back into her chair, but the last words brought her up again like a rubber ball.

"Yes, mamma," began Grace.

"Quiet," snapped her mother. "This discussion requires brains, not sentiment. You say, David, that America has been fooled by him?"

"I said nothing of the kind, my dear aunt. You know as well as I that Uncle Sam isn't easily fooled."

"Very true, very true," said the rumormongering Strathmore. "Rowen Strathmore here—for the love of Annie I can't believe it—no, sir." She focused her eyes indignantly on David. "It's just some scheme you and that girl of mine have concocted between you."

"O mother!" protested Grace.

"Not another word. This isn't a matter of sentiment."

"It's no scheme, aunt. Young Strathmore has, as I said before, been appointed to the diplomatic service."

"If I'm Marvels never cease. Fish will be developing brains after awhile, as I always told Grace, if she could persuade him to stop the giggle, his brain might have a chance to grow."

"May I congratulate you then, aunt, on your future son-in-law before I leave for England?"

"Eh? What? Mercy, boy, have a care for my apoplectic tendency! I thought for a minute you were in earnest and going right now."

"You understood it right, aunt. I leave in the morning."

David found it harder work to convince his aunt than Grace of the necessity of his departure, but as for Grace, she showed no concern or regret at all. David was not a little disappointed over what he mentally termed infidelity to friendship, for somehow Grace was now the only plank in the masthead he had hoped might help to keep him afloat.

"Well, David," concluded his aunt, "it's the regret of my life you're Grace's first cousin. You're so like me as far as brains go that you might as well have a chance to grow."

"O, mother!" came from Grace. "Quiet!—David needs no apologies from me. This isn't sentiment. Well, David, as I've always said, money and brains are the staff of life, and you've got both. I'm as proud of you as if you were my own son."

David was touched in spite of himself by his aunt's reluctance to part with him. The light blue eyes were misty as she held his hand, and there was a wistful look in her voice as he enquired, "I suppose, David, we could never make a Yankee of you, but when I'm alone—"

"Alone? Why, aunt, what's come over you all? Besides I'm not alone. It should never have been invented."

"Alone is the word, David," persisted his aunt. "The American Government wants a diplomat it must be obeyed, and if the diplomat would do better work with a wife he must have one."

"Mother!" Grace made a step forward, but her mother waved her away. "This isn't a matter of sentiment—it's better business all round for two young people to be alone; besides I'm tired to death of this heathen country. I haven't given in, but the truth is I'm just dying for a sight of the Blue Mountains of Kentucky."

But Grace had her arms around her mother and smiles and tears mingled. David, while he rejoiced with them, felt miserably alone. A moment's look at Grace's self-denial wasn't a family spectre. He had taken only a few steps down the hall, however, when the door flew open. Throwing conventionality into Mrs. Grundy's lap, Grace ran after him and flinging her arms about his neck she kissed him on both cheeks. "David dear," she whispered, "I know why you're leaving. May God bless and help you!"

For answer David stooped and kissed her forehead.

As Grace re-entered the sitting-room she said softly, "Poor David!"

"What's that?" questioned her mother.

"Nothing, mother. I was just wishing everybody was happy like me. Poor David—"

"David unhappy?—nonsense! He has too much brains—no sentiment about him."

CHAPTER XII.

A surprising change came over Tu Hee after David had left her. She peered out between the curtains of her rickshaw until the big gates clanged to, shutting from her view the tall form standing rigid in the centre of the road. David's idea of a quiet, different Chinese maiden would have received a decided jolt could he have seen the sudden soft light in the blue eyes, heard the low laugh that rippled from between her parted lips, and the tattoo beat by her slipped feet.

These actions not giving sufficient vent to her feelings, she brought her hands together and bounced up and down like a gleeful child. Then all at once her face grew wistful, and she whispered low, as if afraid the breeze which swayed the curtains of the rickshaw, might overhear, "My English mandarin!" and with a happy sigh lay back among the cushions.

Poor Tu Hee! already a grim, cruel shadow was over her, which was to chase the smile of youth from her lips for many a day. So happy was she in her dreaming that she did not notice the lapse of time, did not awaken to the fact that the runners had covered enough distance to arrive at her door a dozen times over. It was the shrill, piercing call of a shriek owl that aroused her. Parting the curtains, she looked out. To her amazement she was no longer in her own grounds. Instead, trees and hills surrounded her. Indignation and fright mingled in her tones as she called out, "Where are you taking me? Stop, you have but a minute to explain!"

A voice which she knew only too well answered her. "Frightened? Shall I come in with you, little Tu Hee?"

With an effort Tu Hee forced herself to sit upright. She returned calmly the look of the bold eyes, but her nail shields cut into her flesh cruelly as she clenched her hands.

"What does this mean, Chu Sing? My uncle, as you know, does not allow me to travel at night."

"With an effort Tu Hee forced herself to sit upright. She returned calmly the look of the bold eyes, but her nail shields cut into her flesh cruelly as she clenched her hands."

"Where am I? Please tell me," Tu Hee's question in spite of herself was a frightened wail. Still the woman did not reply.

The woman rose and for answer gazed at her interlocutor in dumb, stupefied amazement.

"Where am I? Please tell me," Tu Hee's question in spite of herself was a frightened wail. Still the woman did not reply.

road. Her breath was now coming in dry, sobbing pants. Oh, if the gods would only let her die! Then the moon suddenly bathed the world in a silvery, dazzling glow and Tu Hee's wild eyes saw trees, clusters of them, but they were up the hill. Could she reach them in time? A wild barbaric yell told her she was seen. She dared not look around. Her strength was fast failing, but desperate fear, fear of something worse than death, gave impetus to her struggling limbs. Up, up, she stumbled, and then—it was a twisted tree root that was her undoing—her foot slipped. Physical pain mingled with her terror, and with a low groan she sank to the ground.

When Tu Hee opened her eyes the horrors of the night had not crept back into her mind. Darkness hid her surroundings from her and the softness of her bed betokened only luxury, safety, and home. Her head felt a little queer, and sleepily she turned to rest it more comfortably. A cry escaped her. Her ankle! As she raised herself on her elbow the whole horrible truth rushed over her, and in spite of the acute pain she started from the bed. Upon reaching the floor, she stumbled, and a chair overturned. Immediately the door opened, and Tu Hee's wide horror-stricken eyes fastened on the stream of light that crept in. Relief almost choked her as she saw a Chinese woman servant enter with a lamp.

"Toddling forward on her tiny feet, she set the lamp on a small teakwood table near the bed and then prostrated herself before the pale, frightened Tu Hee.

"Please get up," commanded Tu Hee in Chinese. "Tell me where I am."

The woman rose and for answer gazed at her interlocutor in dumb, stupefied amazement.

"Where am I? Please tell me," Tu Hee's question in spite of herself was a frightened wail. Still the woman did not reply.

Mr. Man—

You feel Lifebuoy's healthiness right down into the pores.

After Lifebuoy—you feel cleaner than you have ever felt before.

The delight and comfort of using Lifebuoy are famous around the world.

The odor vanishes quickly after use.

LIFEBUOY

HEALTH SOAP

When the door had closed, Tu Hee, as quickly as she was able, made her way to it. To her relief it was unlocked, but, and new-born hope turned to ice around her heart, another door confronted her. She turned the handle but the barrier did not give. She was a prisoner in Chu Sing's house.

IF

If you can toss a match into a clearing.

And never give a thought to put it out.

Or drop your cigarette butt without fearing

That flames may kindle in the leaves about.

If you can knock the ashes from your brier

Without a glance to see where they may fall.

And later find the forest all aflame

Where you have passed—with no one near to call.

If you can drive your auto through the working,

And cast your stogie stub into the slash.

Unmindful of the danger therein lurking,

Or homes or happiness that you may

If you can leave your campfire while 'tis glowing,

Nor think of industries that it may blight.

Or of the billion saplings in the growing

Turned into charcoal ere the coming night.

If you can start a fire beneath a brush pile

When the wind is roaring like a distant gun—

You surely should be jailed without a trial.

And labelled as a lunatic, my son.

The Storekeeper's Kind Offer.

— The old storekeeper at Roseland, British Columbia, didn't care a straw about Shakespeare. But, says Mr. Burghin in "Many Memories" just before I went away he had a very solemn talk with me.

"I've been a watchin' of you," he said, "and a hearin' of you yarn with them miners. When you do any work what do you do for a livin'?"

"Oh, I try to write books."

"That all? Why, I never heard tell of such foolishness!" He spat contemptuously at the harmless, necessary stove. "Don't you do nothin' else? Nothin' useful?"

"Yes. Lots of other things—for play."

"But, snakes alive, man, what I want to know is, what 'you do for a livin'?"

"Write stories."

"D'you mean to tell me people pays you for writin' them blamed lies?"

"Sometimes,

Shoes! Shoes! Shoes!

The Transcript

Published every Thursday morning from The Transcript Building, Main Street, Glencoe, Ontario. Subscription—in Canada, \$2.00 per year; in the United States and other foreign countries, \$2.50 per year.

Advertising.—The Transcript covers a wide section of territory in Western Ontario, and its readers are the leading farmers and townspeople. It is a first-class advertising medium. Rates on application.

Job Printing.—The Jobbing Department has superior equipment for turning out promptly books, pamphlets, circulars, posters, blank forms, programs, cards, envelopes, office and wedding stationery, etc.

A. E. Sutherland, Publisher.

We are sure Canadians everywhere will have only the sincerest sympathy and regret to express to the citizens of the neighboring republic in the passing away of President Harding whose life's history is one to be read with a feeling of admiration and respect.

Canada's cattle market is being rapidly transferred from the United States to Great Britain. Over 13,000 cattle were exported during June, and of that number 10,473 head were shipped to the British market and 1,785 to the United States. During June, 1922, approximately 600 cattle went overseas and 3,500 to United States points, indicating a striking reversal outlet this year. During the first six months of the present year the volume of exports has been particularly encouraging when compared with the same period of 1922. The total to date is 55,583 head, as compared with 19,867 last year. Of these amounts 30,029 and 4,185 respectively went overseas, and 23,559 and 12,795 respectively to the United States.

In about three years' time the Canadian National Railway may have ceased to be a burden on the pockets of the taxpayer, Sir Henry Thornton, chairman of the Government railways, declared in an interview at Montreal Monday. He added, however, the proviso that such would be the case if no unforeseen disaster struck Canada. Sir Henry explained that the different lines making up the Canadian Government system, formerly rivals and mostly weak, could not be co-ordinated and brought into harmony in a few months, but progress was being made. Net receipts were already improving greatly and showed signs of continuing to improve.

Those ladies of Glencoe to whose untiring devotion and persistent energy we are indebted for the splendid Memorial Hall which now graces our Main street are worthy of all praise. Such a building is not only a fitting memorial to the men who sacrificed all that was theirs for the honour of the Empire and the principles that safeguard the home, but it is in many ways a valued asset to the community. Let us give them the credit they deserve.

After all, what better memorial could be erected to our heroic dead than that the people should honour them by living the principles for which they sacrificed themselves. And the heroes were not only the soldiers on the battlefield, but are numbered in all walks of life, more notably the fathers and mothers of pioneer days.

Says the Financial Post:—The election results in Prince Edward Island indicate that, as elsewhere in Canada, there is a growing irritation against heavy taxes. It is difficult to reduce expenditures, but any government which wants to stay in power had better give the public evidence that it is at least trying to do so.

"When I went to Parliament," says Miss Agnes McPhail, M.P. for South Grey, "I had but a dozen grey hairs. Now I have tufts of grey at my temples caused by worry about what was best to do for the farmers and their wives." Cheer up, Aggie; you might have been running a small town newspaper!

CHAUTAUQUA STORY HOUR

Not the least interesting or valuable feature of the Chautauqua course now being presented in Glencoe is the story hour for children given every forenoon by Miss Edith McCune, known as the "Story Hour Girl." The value of the nature stories, designed to instill a love of nature and of the beautiful in the minds of the little ones, cannot be estimated. Then there is the part devoted to giving the children a clearer understanding of the great artists in literature, music and art, and the ethical program designed to teach kindness and contentment, with an hour also devoted to hero stories. These cannot fail to awaken a love of study and work, to develop self-confidence and decision and to stimulate a desire to work hard and attain success. From all accounts Chautauqua made a good selection when they secured Miss McCune for this excellent feature.

SUPPOSE A FARMER DID THIS

A car carrying a farm family of six comes roaring along one of the residential streets of London on a Sunday afternoon, about four or five o'clock. They have been dusting along at a pretty fair clip for some time—nothing on the road has passed them—no, sir, otherwise there would have been just one more tragedy added to the list.

The farmer pulls his car up beside a nice-looking home. "Well, this is a good-looking spot; guess we'll have our supper here. Come on, get the baskets and some of you youngsters hustle off and get a few bits of wood and we'll boil the kettle for some tea." A fence between the front and back yard is noticed, so a couple of boards are taken off that, and pretty soon there is a neat little fire, the kettle boils, and the feast is on.

"Looks like some onions just inside that fence—guess we better have some—don't see any person around." So some of the younger folk attend to the onion patch, while another climbs a cherry tree and helps himself, also breaking off a branch so that the rest who couldn't get to the tree could get in on the feast.

"Well, we'll have to get along out of here," remarks the farmer, looking at his watch. "We've got to make 57 miles by 6.30 or know the reason why." Come on, never mind the ashes from that fire, they're good for the lawn. Forget those old newspapers and banana peelings; that old salmon can will be good for the family cat—come on, let's beat it."

Wonder how long this would go on before a cop on a motorcycle would be on the premises, inviting the party to come on down to the police

station, where they could arrange surety for their appearance there next day on a charge of trespass and damage to property.

And yet that's just about what some city people do when they go about the country. A farmer's orchard is just the place for the stop for supper; the farmer is seldom consulted; if he has an attractive looking stream going through his property, that is apt to be the location. No effort is made to clean up after the meal, and if objection is made the farmer is an old grinch and a city-hater.

It has taken us a long time to learn that property in the country is private just as much as it is in the city.—London Advertiser.

A LONDON OLD BOY

J. S. Telfer, born in London on July 25, 1840, 83 years ago, has just celebrated his birthday in Regina, where he has lived for the past 10 years, serving as sergeant-at-arms of the Saskatchewan Provincial Assembly. He is a brother of John Telfer, a well-known and esteemed citizen of Newbury.

Mr. Telfer went to the great Canadian West during the operations consequent to the Riel rebellion, serving in the transport section under Gen. Middleton. The lure of the prairies claimed him and he did not return to the East.

A nephew of the veteran sergeant-at-arms, Walter Scott, became premier of Saskatchewan. He was born the year Mr. Telfer married. Mrs. Telfer, who is 75 years of age, and her husband celebrated their golden wedding some six years ago. They raised a family of eleven children, seven sons and four daughters.

Mr. Telfer bears his years with an air that denies their number or that he has borrowed 13 years beyond man's allotted span from time. The Regina Leader says: "Those who have often seen his tall, spare figure preceding Mr. Speaker so many times in the past 10 years will scarcely credit that J. S. Telfer, the sergeant-at-arms at the legislative building, is 83 years old. The weight of his years is little more to him than the weight of his mace which he deposits on the table of the House as a symbol of the authority of that august body."

GOOD FISHING IN RIDEAU LAKES

Even to glimpse the Rideau Lakes from the train en route from Toronto to Ottawa via the "National Way" is to be charmed with their beauty.

To visit these lakes in the fishing season is to become a devotee of them and to return again and again. The Big Rideau, the largest of the Rideau chain of lakes, a beautiful body of clear water, noted for the fineness of its gray trout and black bass is reached from Portland.

Opinicon, Indian, Benson and Clear Lakes afford excellent large-mouth bass fishing.

Smith's Falls is a popular centre for lake trout and bass fishing expeditions and offers the tourist excellent accommodation.

All these lakes abound with wild ducks in the fall.

Ask any agent of the Canadian National Railways for particulars.

Couldn't Even Turn Over in Bed

Pitiful plight of London woman—completely crippled for months—Dreco puts her on high road to recovery.

Picture the misery of Mrs. Minnie E. Hetherington, of 322 Eleanor St., London, smitten by the demon rheumatism just two weeks before the happy yuletide season and spending it on a bed of pain, so badly crippled that she couldn't even turn over, much less walk. Here is her story of her sufferings until her fortunate discovery of Dreco:

"Just before Christmas I caught a terrible cold that settled in my kidneys. My hands, feet and limbs became very sore and began to swell with rheumatism. Suffering agonies of pain, I took to my bed. The pain and stiffness were so severe that I couldn't even turn over. I was very nervous and couldn't sleep and had no appetite. Constipation also added to my sufferings and medicine gave me no relief. My daughter, however, heard of the wonderful relief other people were getting from Dreco and brought a bottle home to me. That was only a week and a half ago. Now I am able to walk, a thing I haven't done for two months. I am feeling like a new woman; my bowels are regular; I sleep soundly and have a good appetite. The pains in my limbs have almost gone, and I have the swing. I unhesitatingly recommend Dreco to anyone suffering as I did."

Dreco, the great blood purifier and regulator, goes to the very root of internal disorders and by making such important organs as kidneys, stomach, liver and bowels function properly, brings health and freedom from pain to the whole body.

Dreco is being specially introduced in Glencoe by P. E. Lumley, and is sold by a good druggist everywhere.

If you take a dollar and give it back, that's a stricken conscience. If you take a million and give it back, that's philanthropy.

A GOOD WINTER WHEAT

Farmers May Try Free a Well Tested Variety.

The O. A. C. No. 104 is a Proven Success—Other Experimental Tests Suggested—All Material Supplied Free of Charge—A Chance for Enterprising Farmers.

(Contributed by Ontario Department of Agriculture, Toronto.)

The market value of the winter wheat of Ontario amounts to over fifteen million dollars annually. It is, therefore, one of the most important of the money crops of the Province. The acreage of winter wheat during the past year has been about the same as the average annual acreage for the past forty years. There is not a county or district in Ontario in which winter wheat is not grown, although in New Ontario the average annual amount is not more than about 20,000 bushels. Owing to the comparative low price of winter wheat at present, strict attention should be given to economic methods and to large yields.

O. A. C. No. 104 a Carefully Chosen Cross.

The Dawson's Golden Chaff is still the variety most largely grown according to the December Bulletin of the Ontario Department of Agriculture for 1922. With the object of securing even a better variety, crosses have been made at the Ontario Agricultural College between the Dawson's Golden Chaff and some other varieties, such as, Tasmania Red, Crimean Red, Turkey Red, Buda Pesh, Imperial Amber, and Bulgarian. A new variety has been originated at the College by crossing the Dawson's Golden Chaff and the Bulgarian, and this is now known as the O. A. C. No. 104. In both the College and the co-operative tests this new variety has made an excellent record, surpassing the Dawson's Golden Chaff in both yield and quality of grain. It is a white wheat, and resembles the Bulgarian in possessing a white chaff and the Dawson's Golden Chaff in a beardless head. It is a vigorous grower, and has been less subject to winter-killing than the Dawson's Golden Chaff.

The Value of Using Good Seed.

It is also important to use seed of high quality. The results of six years' experiments at the College, show an average increase in yield of grain per acre of 6.8 bushels from large as compared with small seed, of 7.8 bushels from plump as compared with shrunken seed, and of 35.6 bushels from sound as compared with broken seed. Seed which was allowed to become thoroughly ripened before it was cut produced a greater yield of both grain and straw, and a heavier weight of grain per measured bushel than that produced from wheat which was cut at any one of four earlier stages of maturity. In each of two years when winter wheat was sown in the fields, germination tests of the grain were made. The following results show the average percentage of germination from each selection: Skin over germ, unbroken, 94; skin over germ, broken, 76; sprouts one-quarter inch long, 30; and sprouts one inch long, 18. Not only was the sprouted wheat low in germination but the plants produced were very uneven in size.

White Wheats vs. the Red Varieties.

White wheats as compared with red wheats yield more grain per acre, possess stronger straw, weigh a little less per measured bushel, are slightly softer in the grain, are more useful in the manufacture of shredded wheat and of pastry, and furnish a somewhat weaker flour for bread production.

Winter wheat which was grown on clover sod yielded much better than that which was grown on a clover sod, and the wheat was grown on land on which field peas were used as a green manure yielded 6.5 bushels of wheat per acre more than that grown on land on which buckwheat was used as a green manure.

Several Experimental Union Tests to Choose From.

In time for seeding this autumn, valuable material will be sent out from the College to those farmers residing in Ontario who wish to conduct experiments upon their own farms through the medium of the Experimental Union. The material will be supplied, free of charge, to those who wish to conduct the experiments and report the results in the early autumn of 1924. Any Ontario farmer may apply for the material for any one of the following seven experiments: (1) Three choice varieties of Winter Wheat (including O. A. C. No. 104); (2) One variety of Winter Rye and one of Winter Wheat; (3) Spring applications of five fertilizers with Winter Wheat; (4) Autumn and Spring applications of Nitrate of Soda and Common Salt with Winter Wheat; (5) Winter Emmer and Winter Barley; (6) Hairy Vetches and Winter Rye as fodder crops; (7) Mixtures of Winter Rye and Hairy Vetches for seed production.

The size of each plot is to be one rod wide by two rods long. Fertilizers will be sent by express for Experiment No. 4 this Autumn, and for Experiment Number 3 next Spring. All seed will be sent by mail except that for Number 4 which will accompany the fertilizers. The material will be sent out in the order in which the applications are received, and as long as the supply lasts.—C. A. Zavitz, O. A. C., Guelph.

"If you are going to do anything permanent for the average man, you must begin before he is a man. The chance of success lies in working with the boy, and not with the man."—The Roosevelt.

BURNS—In Glendale, California, on Monday, July 23, 1923, to Mr. and Mrs. T. W. Burns (nee Beesie McRae), a son—Benjamin William.

SIMPSON—On Monday, August 6, 1923, to Mr. and Mrs. Bert Simpson, Mossa, a son—stillborn.

Card of Thanks

Mrs. Maria King and family wish to thank the many friends and neighbors, Rev. Mr. Carr, of West Lorne, and the I. O. O. F., who so kindly assisted them in their recent and bereavement, also the ones who so kindly loaned their cars.

A Corrector of Pulmonary Trouble.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

BIBLE THOUGHT—FOR TODAY—

SAFETY OF THE PERFECT.—Behold, God will not cast away a perfect man, neither will he help the evil doers.—Job 8: 20.

TOWN AND VICINITY

My, O my, wasn't that just a deliciously refreshing rain!

John S. McAlpine has returned from Grimsby and has been engaged to manage the Co-operative Store.

Miss Walker, daughter of John A. Walker, Metcalfe, has been engaged to teach in her home school at Walkers.

Monday was civic holiday in Glencoe, and the day was civilly spent. There were no "doings" either in or out of town.

A Suddall reunion will be held on Frank Copeland's lawn on August 17. All relatives are invited to come and bring baskets.

While driving the cows home from pasture for milking, little Donald Nevin, of Napier, had his little toe completely cut off by a cow stepping on his foot.

The Dutton double male quartette, under the direction of Wm. Hollingshead, will assist the Glencoe Presbyterian choir at the morning service next Sunday.

Those who are addicted to that nefarious pest, hay fever, are putting in full time these days indulging in sneezing and other nasal athletics that go with the malady.

On Tuesday afternoon Evelyn Siddall entertained two little girls in honour of her tenth birthday. They were greatly entertained by Miss McCune, of the Chantauqua, after which refreshments were served.

Glencoe played Walkers a friendly game of baseball Thursday evening. Score, 9-7, in favor of Walkers. The return game will be played at Glencoe this (Thursday) evening at 6.30. Silver collection. Everybody come.

The annual reunion and picnic of the Clan McNeil was held at Port Stanley Wednesday, when descendants were present not only from West Elgin, but from Ekfrid, Mossa, Brooke and elsewhere. The day was pleasantly spent in various amusements.

James A. Mulligan, of St. Thomas, formerly of Wardsville, went to Cleveland on Monday of last week and on Friday morning underwent a second serious operation for removal of a goitre. He passed through the operation successfully.

Charles Scott, a well-known and esteemed citizen of Glencoe, was taken to St. Joseph's Hospital, London, last Wednesday, and a surgical operation was performed on Monday morning. His friends will be glad to learn that the operation is likely to prove successful.

Upwards of 160 relatives, descendants and friends of the late Joseph Welch and his wife, Mary Catharine Allan, met at Springbank Park, London, a few days ago for their annual family reunion. Guests were present from Petrolia, Sarnia, Niagara Falls, N. Y., Glencoe, Appin, West Lorne, Wallacetown, Crinan, Dutton and other places.

The annual farmers' picnic, to be held at the Weekes grove, south of Glencoe, on Wednesday, August 15th, is the next big attraction. Extensive preparation is being made, and we are given to understand that there will be something doing to instruct and amuse the people during every minute of the afternoon. Particulars will be found elsewhere in this paper and in posters and bills now in the hands of the printer.

No. 3 Wabash express westbound tied up traffic for several hours Friday afternoon when the locomotive, express car and baggage car left the rails and ran into the ditch about six miles west of Chatham, tearing up the track for a distance of about 300 feet. None of the passengers were injured. The train was an hour behind her schedule, and was traveling about 25 miles an hour when the accident occurred. The cause of the derailment is not known.

The multiplication of job-holders indicates that eventually all of us will get a living by collecting taxes from one another.

PERSONAL AND SOCIAL

—Mrs. Mary McRae is visiting relatives in Toronto.

—Miss Reta Christner, of London, is visiting friends in Glencoe.

—Mr. and Mrs. Archie Sinclair spent the week-end at Port Stanley.

—Calvin McAlpine, of Windsor, is holidaying at the home of his parents here.

—Miss Tena Marsh is visiting relatives and friends in London and Perth.

—Mrs. J. A. Munroe and children, of Streetsville, are visiting at F. E. Copeland's.

—Dr. Ward, of Toronto, was a recent visitor at the home of Mr. and Mrs. Huston.

—Mrs. D. B. McMaster, of Petrolia, visited her sister, Mrs. Geo. McGill, Appin, last week.

—Miss Helen M. Sutherland, of Toronto, is spending a month's holidays at her home here.

—Mrs. R. W. Oxley and daughter Miriam are spending the month of August at Muskoka.

—Wm. McCallum paid a short visit to his brother-in-law, J. E. Booth, Toronto, this week.

—Irene Sinclair and her brother Clifford, of London, are visiting their uncle, A. B. Sinclair.

—Miss Alma Branchflower, of West Lorne, is visiting at the home of Mr. and Mrs. C. G. Yorke.

—Mr. and Mrs. Jack McCracken motored to London and spent the holiday with relatives there.

—Mr. and Mrs. Archie McCallum, of London, spent a couple of days last week at Wm. McCallum's.

—Miss Lillian Westland, of London, spent the week-end with her cousin, Miss Tena Sutherland.

—Mrs. D. G. McEachren and Duncan McEachren, Jr., are visiting relatives at Williams, Minnesota.

—A. B. Gardiner, B. A., of Toronto, spent a day last week the guest of Miss Kate Gillies and brothers.

—Mr. and Mrs. E. D. Earle and daughters, of Toronto, spent the week-end with Mrs. Mary McRae.

—Miss Florence McArthur, of Weston, Manitoba, spent the week-end with her cousin, Mrs. Matt Knox.

—Mr. and Mrs. M. Rapley, of Strathroy, were Sunday visitors at the home of Mr. and Mrs. Wright.

—Miss Olive Carr, of Iona Station, and the Misses McCallum, of Toronto, are visiting at Geo. McCallum's.

—Mr. and Mrs. Calvert Reycraft spent the week-end with the former's cousins, Dr. and Mrs. Irwin, Ridgetown.

—Miss Elda Campbell is spending a couple of weeks near Watford, the guest of her cousin, Miss Margaret Foster.

—Mrs. (Dr.) McIntyre and daughters Kathleen and Jean are visiting the former's mother, Mrs. Charles, in London.

—Miss Erie Webster, of West Lorne, was the guest of her aunt, Miss Margaret Webster, for a few days this week.

—Mrs. Weir, of Galt, who has been visiting her sister, Mrs. Neil Graham, left on Sunday to visit relatives and friends in Dutton.

—Mr. and Mrs. Gordon Watterworth and family attended the annual Ripley reunion held at Government Park on Thursday.

—Mrs. J. A. McTaggart, of London, and Miss McBean, of Toronto, are visiting their aunts, Mrs. Tallamy and Mrs. A. W. McBean.

—Mr. and Mrs. Donald Campbell and family and Master Godora Gowie motored over and spent Sunday in Brooke and Watford.

—Mr. and Mrs. E. H. Howell and daughter Florence, of West Pittston, Pa., were guests of Mr. and Mrs. Dugald McIntyre, Appin, last week.

—Mrs. Fred Aldred and Master Harold Weekes are leaving for the West Thursday morning, where they intend making an extended visit.

—Misses McNeil and Lillian Campbell have returned home after visiting with their cousins, Rev. W. A. and Mrs. Leitch, at the manse, Kintyre.

—Mrs. Ed. Dunn and niece, Helen Timms, of Thorndale, have returned home after spending a couple of weeks with friends and relatives here.

—Mr. and Mrs. Dan McCallum and daughter Marie, of Royal Oak, Mich., have returned home after visiting at the home of Mr. and Mrs. Wm. McCallum.

—Miss Muriel Weekes visited with Miss Reta Christner, of London, while attending the shower given in honour of Miss Estella Blashill, a bride of Saturday last.

—Morley Farrell, of Detroit, spent Saturday with his parents here, leaving Sunday morning via C. P. R. to join the Grotto Band now playing a two-day engagement with the London Old Boys.

—Mrs. Bell and family left for their home in Weyburn, Sask., on Sunday. Mr. and Mrs. Joseph Grant accompanied them to Toronto and spent a few days at Niagara Falls and Buffalo.

—Mrs. W. A. Currie, sr., Mr. and Mrs. W. A. Currie, jr., and little son, and Dr. and Mrs. Joseph Grant are leaving Friday on a motor trip to Montreal where Mrs. Currie, jr., will take passage for England on a visit to her former home.

—Mr. and Mrs. McNabb, of Cleveland, Ohio, motored to Glencoe and spent a few days this week with Mrs. Mary D. McAlpine. Hazel, Donna and Sherman McAlpine accompanied them home and will spend a couple of weeks there.

SPECIAL NOTICES

Wedding cake boxes at The Transcript office.

Found — postage stamp album.—Transcript office.

Quantity of ice for sale. Apply to Alex. McNeil, Glencoe.

22c trade (not on account) and 20c cash for eggs, at Mayhew's.

House to rent from September 1st.—Mrs. W. A. Currie, Glencoe.

New milk cow and calf for sale.—T. J. Devlin, lot 17, con. 4, Ekfrid.

For sale—matched team heavy mares, 4 years old.—Geo. Wood, Route 4, Glencoe.

Call at Scott's shoe store and get quality shoes and rubbers at a moderate price for cash.

Upholstering, fine cabinet work, carpenter work, furniture finishing.—J. D. Brown, first floor north of Transcript office; phone 63.

For sale—1 corn binder; 1 cultivator, 13 tooth; 1 land packer; 1 two-furrow plow, riding; 1 one-furrow plow, riding; 1 buggy; 3 engines—1½, 2 and 6 h.p.; 1 windmill; 1 grinder, 10-inch.—D. M. McKellar.

Melbourne U.F.W.O. and community are having a basket picnic on Friday, August 17, on lot 2, one-quarter mile east of Melbourne on the Longwoods Road. The program will consist of music by the Dutton band, selections by the Harmonic quartette of London and addresses by prominent speakers. There will also be sports and games of all kinds.

Come and get real bargains. Our last Saturday Sale was such a success we have decided to continue it next Saturday.—D. Lamont.

Big Bargains for Saturday at Lamont's.—\$2.50 Overalls for \$1.95; \$1.50 Work Shirts for 95c; Men's Fine Sox, 75c pair, 3 pairs for \$1.00; Boy's Overalls, reg. price \$1.50 for \$1.15; Cottonade Pants for \$1.49; \$2.50 Khaki Pants for \$1.95; Boys' Tweed Pants, reg. \$2.25, for \$1.49. Men's Fine Shirts, Underwear, Trunks, Club Bags and Suit Cases all at reduced prices for Saturday.

MOSA COUNCIL

A meeting of Mosca council was held at Glencoe on July 21. Members all present.

Moved by Jas. Gilbert, seconded by J. A. Leitch, that J. C. Graham be paid \$30 for sheep killed by dogs; J. Babcock, \$2, for valuating sheep killed by dogs; C. N. R. Co. \$25, for drainage rental. Carried.

Moved by D. A. Mitchell, seconded by J. A. Leitch, that the Dominion Petroleum Co. be permitted to lay jerker lines across the road allowance opposite lot 6, con. 6. Carried.

Moved by James Gilbert, that the expenses of the election board for West Middlesex be paid—\$40.13. Carried. It was decided that the 15th of August be proclaimed as civic holiday in Mossa.

The council adjourned to meet at Newbury on August 18th at 1 o'clock afternoon.

C. C. McNAUGHTON, Clerk.

KILMARTIN

Recent visitors at the home of John McLaughlin were Miss Jessie McLaughlin and Miss Kate McIntyre, of Detroit, and Mr. and Mrs. Nevin McLaughlin, of Calgary.

Will Moore, of Walkerville, is spending a few days at his home here. Christina Leitch and Gwendolyn Campbell are visiting in London.

Mr. and Mrs. Thos. Moore and son Robert, of Walkerville, are holidaying at Mrs. Alex. D. McAlpine's.

Prudence Moore has returned home after spending a month in Walkerville.

Miss Mary Quick, of Glencoe, spent a few days last week the guest of Miss Mae Moore.

Mary Ellen Munroe, of Ford City, is holidaying with her grandparents, Mr. and Mrs. Neil Munroe.

Mrs. Joseph Seale and family, of Swift Current, are visiting at Alex. McLaughlin's.

Mr. and Mrs. Abbott, of London, spent over Sunday at Neil Munroe's.

Misses Johanna and Malcolmina Munroe, of Walkerville, are visiting at their home here.

Miss Isabel Miller, of Oil Springs, is visiting at D. N. Munroe's.

Mrs. Mac. Secord and family, of Toronto, spent a few days with friends here.

Mac Munroe has returned home to Windsor after spending a few days with his parents here.

Arrangements are being made for the annual congregational picnic in connection with Burns' church, Mossa, to be held on Labor Day.

Mrs. Willmott, of Detroit, is visiting her parents, Mr. and Mrs. Alex. Dewar.

Miss Sadie McCulloch, of Detroit, is visiting at Archie Burke's.

Mrs. Mitchell, of Detroit, and Miss Mary Robertson, of Chatham, are visiting friends here.

The Thriving City of Moncton, N.B.

Moncton, the headquarters of the Atlantic Region of the Canadian National Railways, was a point of much interest in the itinerary of the Canadian Weekly Press Association over the Canadian National Railways recently. This city, with a population of 16,000, is a thriving industrial and commercial centre. In the neighborhood of the city are oil and gas fields, in some of which exceedingly productive wells are in operation. At Moncton the famous "tidal bore" is seen at its best, the incoming wall of water being sometimes between four and five feet. The rise and fall of the tide there shows a difference of thirty feet between extreme high and extreme low. The photograph gives a general view of the city, showing the Canadian National Railways tracks elevated across one of the main thoroughfares.

To-day is McLAUGHLIN -BUICK day

McLAUGHLIN MOTOR CAR CO. LIMITED
ANNOUNCES for 1924
an entirely new and distinctive
line of Quality Motor Cars~

In beauty, design, speed and original mechanical features such as four wheel brakes, the 1924 McLaughlin-Buick models provide the most revolutionary advance in motor cars thus far contributed by the industry.

Soils and Crops

Address communications to Agronomist, 73 Adelaide St. West, Toronto

THE STORAGE OF FRUIT AND VEGETABLES.

The storage of fruit and vegetables for home and market must receive greater attention than it has hitherto been accorded. The amount of waste annually is very great. As a first step towards eliminating this, every farmer or household with sufficient land to grow vegetables, and perhaps fruit trees, should understand more about storing the crop. Some crops keep best in an atmosphere that has a high moisture content, whereas others require a low percentage of humidity. So it will be seen that there cannot be a condition to suit all vegetables and fruits in the same cellar or storage building. Apples, pears, potatoes, carrots, cabbage, and onions are dry bulb thermometer. Take the readings and check up on the chart which is supplied with it. A humidity ranging from 75 to 85 is satisfactory.

In case of squash and pumpkins, etc., any frost proof place which is dry is suitable—the top shelf of the pantry for instance, or shelves in the passage. Quality is often lowered by poor ventilation. Where crops are stored in large quantities ventilators should be open as much as possible to carry off gases and heat coming from a large bulk of any crop. When severe weather occurs close up the ventilators. Do not store a large volume of any crop while it is warm from the field unless you know that you can reduce the heat by proper ventilation. More attention must be paid to this when commercial storage is being done in the fall and our growers must help when asked to do so.

GREEN FEED AND ITS VALUE.

The utilization of green feed in some form is rapidly becoming recognized as the most economical method of stock feeding. Not only can more live stock be kept per acre, but it can be fed at proportionately less cost. For example, on the Experimental Farm, at Napton, fifty head of dairy cows were carried through the summer season on twenty-five acres of

pasture (twenty of which was very rough, poor pasture), by the aid of green feed from four acres. There was no appreciable decrease in the milk flow, other than the natural falling-off toward the end of lactation period; further, the cows were in good healthy condition in the fall.

Oats, peas and vetch, when sown together, make an excellent mixture for green feed for dairy cows, because it is rich in protein and carbohydrates. Green feed will do much to reduce the cost of rearing calves. Ten pounds of good oats, peas and vetch have approximately the equivalent in feeding value of three pounds of ground oats. In other words, if oats are worth \$37.60 per ton for feed, green feed from oats, peas and vetch would have a feeding value of \$11 per ton.

When green feed in the form of clover, rape and oats, peas and vetch is provided for our brood sows we are able to reduce the meal ration from six pounds per head per day to three pounds, which is a saving in mill feeds of three pounds per day, or 5 cents per sow per day. The following method is adopted for supplying green feed, for pigs:—A small area near the piggery is sown with common red clover and alsike, with a cover crop of oats. As the oats reach the milk stage they are cut and fed to pigs in pens. The clover will come on early in the following spring and be fit to pasture off by the middle of June. Two more small paddocks are sown with rape as early in May as the soil is fit to work. This is usually ready for pasturing from the first to the middle of July. A third paddock is sown to oats, peas and vetch. This is cut and fed to pigs in pen, being ready about the last of July. In this way there is provided a continuous supply of green feed for the brood sows and growing pigs throughout the greater part of the season. Oats, peas and vetch are mixed as follows: Banner oats, 1 1/2 bushels; Gold Vine peas, 8 bushels; vetch, 1/2 bushel; and sown at the rate of 3 bushels per acre. Rape is seeded at the rate of 8 pounds per acre, broadcast. Common red clover is seeded at the rate of 10 to 12 pounds and alsike at the rate of 2 to 3 pounds per acre. It is not a good plan to turn the pigs on the oats, peas and vetch, as there is too much waste from tramping. In feeding the rape, allow the pigs two or three hours per day at first; later they may be allowed full range of paddock. If the practice of growing green feed for pigs is once established, its value as an economical stock feed will soon become apparent.

Small Fruits, Roses and Iris

It is a great mistake to neglect the small fruits once they have finished bearing for the season.

If the strawberry bed is to remain the litter which was put down as a mulch and to keep the berries clean should be raked away from the plants into the alleys, and all runners cut off. Then both can be removed and burned. It is well also to cut off the old leaves, for in this way any diseased or insect-infested growth may be got rid of. Where there is no danger in doing so, the mulch, leaves and runners may be burned between the rows of plants. The plants may look a little sick following the scorching, but after the first good rain they will send forth new leaves most vigorously, and the ashes left between the rows will serve as manure.

When all rubbish has been cleared away or burned, the beds must be hoed to kill weed growth and loosen the soil. Weeds growing close to and among the plants must be pulled by hand. Hoeing should be continued throughout the season, so that the beds and plants will be free from weeds when frost puts a stop to garden activities for the season.

As a strawberry bed is past its prime when it has stood for three years, it is a good plan to make a fresh planting every year—or at least each alternate year—and in this way you will always have a bed in its prime.

CUTTING OUT RASPBERRY CANES.

As raspberry canes that have fruited die off naturally in the fall, it is better to cut them out now, and thus give the new canes a better chance. Cutting makes the new canes more clearly evident, and if there are more than five to each plant the weakest should be removed. If small they can be pulled up and will grow if transplanted in moist soil. The best young canes for forming new plantations are those that spring up between the rows some distance from the parent plants. After removing the old and surplus canes the ground should be hoed and kept clean during the remainder of the season.

Blackberries are cared for in much the same manner as raspberries, and currants—red and white—also gooseberries, are all the better for summer pruning, as they usually bear on spurs of the old wood. All side shoots, with the exception of any required to form new branches, are best cut back within

about five inches from the base; but do not touch the leaders. In winter or early spring all that has to be done is to cut the laterals to about one inch of the base, and shorten the leaders about one-half, according to their strength.

It is of the utmost importance that the bush-fruit plantation be kept quite clean during the season. Regular hoeing and the removal of weeds will encourage growth that is so essential for next season's crop.

Roses, especially those of the free-growing rambling varieties, greatly appreciate pruning after flowering. They are of the simplest possible culture and invariably thrive in any fairly good soil. All shoots of the previous year's growth are cut out, retaining only those of the current year, as it is on these shoots that the finest flowers are borne.

SOME OF THE FINEST CLIMBERS. During the past twenty years or so innumerable varieties, hybrids and sports of the type have been raised and introduced, the most notable being Dorothy Perkins. In addition to its being one of the most prolific bloomers of all climbing roses, Dorothy Perkins is most accommodating as to soil and position, thriving and flowering freely where others would fail.

Among other popular and really worthwhile varieties of this type, the following have qualities and beauty that place them in the front rank of valuable climbers: Crimson Rambler, rich rosy crimson; Flowering Fairfield, vivid scarlet, splendid for arches or pillars, very vigorous plant, blooms periodically during the summer; White Dorothy and Source of Gold.

Do you purpose increasing your stock of iris? If so, this is now the best season for dividing and replanting the clumps.

The flag or bearded iris—*Iris germanica*—has many forms, which make noble groups during spring, succeeding almost everywhere. Even when not in bloom there is charm in the silvery-toned leaves.

If adding to your list of varieties, by all means procure the roots as early as possible, as summer or early fall planting will result in flowers the first season.

Tibet is the loftiest region of its extent on the globe.

The Farm Water Supply.

In locating the farm home the first essential is a sufficient supply of pure water easily accessible. The origin of fresh water in the earth is usually traceable to the rainfall upon the surface. The earth's crust consists of many layers of varying thickness. These, when considered in connection with water supply, are divided into two classes: porous, or those that will allow water to percolate or flow; and impervious, or those that prevent the movement of water.

When a porous stratum overlies an impervious one there is the collection of the local rainfall from the immediate surrounding drainage basin. When a porous stratum underlies an impervious formation the water will be collected at the outcrop of the former, which may be at a great distance from the well. Should that point be at a higher elevation than the location of well, artesian or flowing water would be secured.

This overflow might have sufficient head to elevate the water into homes and barns. In the course of time underground streamlets and streams have formed, and fortunate is the person that locates one of these when digging for water. These streams usually flow along the surface of an impervious earth layer and frequently terminate in a spring on a hillside.

The source of our farm water supply is usually a well that penetrates the ordinary ground-water level or that taps an underground stream. Some are fortunate in locating near a spring, and others get their supply from a stream that flows through the farm. These sources are all good, provided that they are free from contamination. There are three types of wells in common use: the dug well for shallow depths; the driven well for earth formation; and the drilled well where the water bearing stratum is overlaid by rock or hardpan.

These wells should be protected from polluted surface water. For this reason the well should be located on rising ground, so that the surface water will flow away from it. Dug wells should be walled with water-tight material. If stone or brick is used, cement mortar should be used to seal the interspaces. Concrete makes a good, tight wall. Wells driven through clay are usually safe. Drilled wells should be lined with wrought-iron casing extending to the rock and driven into it to form a water-tight joint.

There are three methods in common use in conveying the water from the source of supply to the farm buildings. First, by gravity, when the source is higher than the buildings; second, by the use of an hydraulic ram, when there is an abundant supply of running water to operate it; third, by the use of a pump. In installing these last mentioned, galvanized iron pipe of sufficient size to meet the farm requirements should be used.

There are many types of pump on the market. For shallow wells the siphon pump with cylinder in the barrel may be used. For deeper wells the suction pump may be used if the cylinder is placed within 25 feet of the low water mark in the well. The single and double action pumps, with or without power, can be used to elevate water to the desired height.

When water has to be elevated the wind-mill is a cheap source of power. A gasoline engine will do the work at a very low cost, and pumping can be done while the engine is at other work.

Water from limestone formations is hard, and not satisfactory for washing. Rainwater, which is always soft, can be collected from the roofs and stored in cisterns for washing purposes.

The home and barns on every farm need water on tap wherever required, much more than does the city home; because the farm requires more water

per capita and the people on the farm have less time to carry water. It is estimated that the average farm family of 5, with 4 horses, 33 head of cattle, 50 sheep and 10 pigs, requires over 600 gallons of water per day.

In conclusion, then, the farm water supply should be adequate to meet the maximum requirements every day; it should be reasonable in cost, simple in construction, durable and easy to operate; it should be fresh, pure and cold at the taps, and it should be available for fire protection.

Swarm Control.

Natural swarming may be termed the bumblebee of beekeeping and to control it is the most difficult problem of the beekeeper. Natural swarming usually occurs during a honey flow, especially at the beginning and if the swarm is allowed to issue it may be lost or the honey crop reduced. In order to get the maximum crop of honey from a colony it is advisable to keep the working force of the colony together by using some method of swarm control.

Swarming is usually caused by overcrowding or congestion of the brood nest and any manipulation that will relieve this congestion will often prevent swarming. All colonies do not require the same treatment, and preparations for swarming may often be checked by applying the following manipulations: 1. By giving the queen more room for egg production. 2. By adding more supers for the storing of nectar. 3. By giving the colony more shade and ventilation. 4. By raising a few combs of brood from the brood nest to a super. 5. By destroying queen cells before they are far advanced.

The swarming fever may be so intense that some colonies will not respond to the above measures and may persist in their determination to swarm; with these more drastic measures must be applied. 1. Artificial swarming, in which the bees and queen are all shaken on to a full set of empty combs or full sheets of foundation. The brood is put into a super and placed on top of the colony above the honey supers. In the production of comb honey the brood is placed in another hive standing alongside of the original colony; in this case enough bees should be left in the old hive to take care of the brood. 2. Remove the old queen from the hive and destroy all queen cells. Ten days later again destroy all queen cells and introduce a young laying queen. 3. In localities where the honey flow is short and very heavy the removal of all the brood and bees from the brood chamber to a top super and leaving the queen on a full set of empty combs below will often stop swarming. These three manipulations should only be applied when larvae in queen cells are found.

It is a good plan to clip the queen's wings in the spring, especially in out-apiaries for should a swarm emerge between visits there is less likelihood of the swarm absconding. Should a swarm emerge with a clipped queen, she will be unable to fly and can be found on the ground at the entrance of the hive. The queen should be caged, the old hive moved to one side and a new hive put in its place while the swarm is in the air. The cage containing the queen is placed at the entrance of the new hive and when the swarm returns the queen is released. The supers from the parent colony are then placed over the swarm and the parent colony can be either placed on a new stand or left by the side of the swarm.—C. B. Gooderham, Dominion Apiculturist.

In the Province of Nova Scotia and the other eastern provinces almost half of the cost of educational and demonstration work in agriculture has been provided out of the Federal grant.

Home Education

"The Child's First School is the Family"—Frederick

Catalog and Booklet Fun—By Lydia Lion Roberts

There are all kinds of pamphlets, booklets and discursive matter printed nowadays to advise and show busy people about almost everything. A great many of these find their way to a housekeeper's door and are often glanced at carelessly and thrown away. This is a mistake if there are children in the home, for out of these booklets may come many lessons and some good times. A mother will find it worth while to watch the magazines and send for the most attractive of these, not only to learn about the newest and best ways of doing and buying things but to help the children learn about this big, unknown world.

When a rainy day, or a "what shall I do now?" time comes, the lucky mother brings out her group of booklets and gathers the children around her. Many a mother can explain about these things easier than tell a story, and this is the way she can use the booklets. It will start a lot of questions, all of which she cannot answer, but it will prove an interesting time. There are booklets telling of our parks, scenery, birds, woods, and the kind that tell how things are made. These are free for the effort of writing for them and give the children some idea of what is going on in their country. The pictures may be used for scrapbooks and clippings made of the most interesting facts told. It will make the children think about the bigger things of the world and want to know more about them.

As an illustration of the uses to which these booklets may be put, a few of the ways we have used them in our home may help other mothers. There came one mail one day a booklet describing a set of nature books, in which there were colored pictures of birds. The oldest boy of the family became interested in the many varieties of birds and decided to start a bird scrapbook. We sent for one booklet and he cut out the bird pictures, many of which were very beautiful.

THE CHILDREN'S HOUR

HOW YOUNG CANARY'S CONCEIT WAS CURED.

On a beautiful, sunny, golden day in June, a lovely, sunny, golden canary was floating and flirting and twirling in the magic summer air. He kept up a running ripple of happy twitterings. Occasionally he lighted on a purple thistle and burst into song. He sang beautifully, throwing his head back and pouring forth melody so lovely that all the birds far and near stopped in their work or play to listen to him.

Just out of sight but so placed that they could see him, two of his sisters sat and watched him with admiring eyes. "Isn't he wonderful?" they whispered. "Surely he's the handsomest, as well as the most gifted singer in all the world!"

"I do believe he knows how becoming that purple thistle is to him, and that's why he sits on it as he sings. It certainly sets off his yellow waistcoat, doesn't it, sister?"

But in their nest in a willow tree, by a dear little prattling brook, Mr. and Mrs. Canary were discussing the same young gentleman in quite a different way.

"My dear, I am really getting quite worried about 'Yellow Ball,' said his father. "Things cannot continue like this. He is getting so conceited that soon there will be no living with him." "Our son is so handsome," put in the mother wistfully.

"Yes, but we don't want his character ruined. That's the trouble with you women! You all spoil him; his sisters and his friends, every one of you, make such a fuss about him. I tell you his disposition is being ruined. Something must be done. He will become a useless member of society and will never get a dear little wife for himself as I have."

Have you ever seen a canary blush? They don't become rosy, just imagine how unbecoming it would be to their golden complexions! No, just a deeper shade of yellow darkens their cheeks. Well, Mrs. Canary blushed, and looked extremely pretty as she did so.

"Perhaps you are right, my love," she said. "What do you think we could do to overcome this fault in our son?"

"That is a matter I shall have to give my serious consideration," replied her husband. He flew off to a nearby bush and fluffing himself up into a yellow ball, sat and thought out a plan.

That evening, before the children had come home, he said to his wife: "Didn't I hear you say, my dear, that the children were going to a fancy kind of party at Mrs. Thrush's tomorrow? What kind of an affair is it to be?"

"Mrs. Thrush calls it a flower party," explained Mrs. Canary. "All the birds are going to be given the name of a flower—the flower they most resemble."

"Oh," said her husband, "that gives me an idea! Au revoir, my love, I'm off to see Mrs. Thrush for a few minutes," and away he flew.

tiful, and one of them had an interesting account of Audubon's life which was read carefully and added to the book.

Another time we sent for a catalogue describing different kinds of wood and giving a short history of the different trees and the way the wood was used. The children were much pleased with this and gathered woods of many kinds and uses and noted the differences.

The railroad folders are often illustrated artistically and we used these to help in geography lessons, as the pictures and descriptions of the train routes and scenery, besides the brief accounts of important landmarks helped geography seem more real and vivid to the children.

Almost all of these catalogues helped in school work as the children had interesting or odd bits of information to give to the class, and when making collections to go with the booklets, took these to school to show the teacher and the children. The teacher liked this and encouraged other children to bring outside illustrations to the lessons.

In the children's bookcase there is a special shelf for booklets and catalogues, and they are very useful for references and handy to pick up in idle moments and read. The tiny tot of the family likes to have a slight story woven around some of the illustrations in which a little girl or boy visits the various places pictured, and has mild adventures. The mechanical boy of the family writes for every booklet on machinery that he can get, and studies them to see the new ideas and inventions of the world, getting all the information possible to help him in his chosen work or hobby.

It really seems as if there is a catalogue or booklet to suit each one of the children, and if a child has a special talent or interest, it is wise to help by sending for every thing that will in any way broaden and enlighten.

Mrs. Canary, left in her dainty thistle-down nest, shook her head over the oddities of the masculine sex; but as she considered her husband the most wonderful being in the world, she wisely decided to say nothing and await developments.

The children themselves were very excited about the party. They talked about it in excited whispers when they were supposed to be going to sleep that night.

"Of course, 'Yellow Ball' will be chosen the very handsomest of all the flowers," said his sisters, "I wonder what is the very handsomest yellow blossom?"

The following day saw them start off for Mrs. Thrush's home in a nearby meadow, all bathed and preened and in a great flutter of gloe.

"Wait and see the result of this party, my dear," chuckled Mr. Canary to his wife. "I feel sure my plan will be successful."

A very quiet troop of birdlings returned from the party that evening and Yellow Ball departed to a shrub all alone in the greatest dejection. Mr. Canary called the girls to his side. "Well," he said, "come and tell us all about the party. Was it a success, and what flowers were you all called?"

"It wasn't a very successful party," said one of the little birds. "Sister was chosen a butter cup and I was a daffodil, and—er—we had a lovely feast, but—"

"But?" "Well, Father, you know we all thought Yellow Ball would be chosen the loveliest flower of all, but—but—he was decided to resemble nothing but a common dandelion, the most ordinary of all the yellow flowers. Wasn't it awful?"

"Awful," said their father, laughing. "do him a world of good, and teach him a much needed lesson, I hope."

"Wasn't my suggestion to Mrs. Thrush a fine idea?" he asked his little wife later.

"It was, indeed," she agreed. "But then, of course, every one of my wonderful husband's ideas are good," she added to herself.

But Yellow Ball was a changed bird from that day. Mrs. Thrush's party had certainly made him realize what a foolish fellow he had been.

"Well," he said to himself, "a dandelion may be a very commonplace flower, but anyway if I am like a dandelion in its sturdy happiness and cheeriness, I shall do very well in the world indeed."

Short courses in agriculture for men and in domestic science for women have been an important feature of extension work assisted by the Agricultural Instruction grant. Held either under local auspices or offered by the schools and colleges of agriculture, their aim has been to give instruction on improved methods and practices. Every branch of farming has been dealt with, from stock-judging to motor mechanics for men and from general housekeeping to the domestic arts for women, often accompanied by demonstration.

The Ontario Live Stock Improvement Train is reported to have had an attendance of about 700 at each stop. Some 30 bulls and 120 hogs were sold for breeding purposes.

The Worst Enemy of the Woodlot.

Fire is one of the worst enemies of the forest and the smaller woodlot, and every precaution should be taken to keep it out. It is especially dangerous at this time of the year when everything is so dry and there is little rain for weeks on end. In a few minutes through carelessness or the lack of a single precaution, the work of several years may be entirely wiped out.

Fire in the woodlot destroys the young growth up to ten and fifteen years of age. It burns up the humus and accumulated food of many years and robs the trees of moisture. It destroys the seed bed for new growth and, consequently, minimizes reproduction. On older trees it kills large areas of the cambium and opens the door for fungus and insect attack and necessitates the cutting of a high stump.

Where a small piece of woodland stands alone, there is little chance of fire. But where the danger from fire is imminent, either by proximity to larger forested areas, by the presence of grassy roadways or fields, or a railway right-of-way, some precautions should be taken.

Fire lines may be laid out consisting of a few feet of cultivated soil or a strip from which the brush and forest litter has been cleaned away. These should separate the woodlot from the source of danger and in case of fire will be a means of prevention or control.

Brush which has been allowed to accumulate during several cuttings is the owner's worst enemy in case of fire. This should be piled as cut and burned when snow is on the ground. Cattle or stock of any kind in the woodlot are a serious source of development. The damage inflicted is much the same in result as that caused by fire. The young growth is eaten down or destroyed, the ground is packed hard by their hoofs, roots are uncovered and injured and bark on larger trees rubbed and gnawed off. In the summer's heat at this time of the year, the dairyman or farmer with a woodlot is sorely tempted to give the cattle freedom therein if only for the cool of the trees. However, if it is found necessary to run cattle in the woodlot it would be preferable to fence off a section for this purpose. This would mean a part of the area would be able to reproduce naturally and enjoy a period of protection, after which the fenced and open parts might be exchanged for grazing.

The worst enemy of the woodlot, however, is often the man who owns it. By lack of good judgment he may have at the end of a few years a woodlot filled with old, crooked and misshapen trees. No thought of a future crop is given; the best trees are cut for fuel; the border is opened up; the trees are thrown by the wind; cattle are allowed to browse during the summer and fire is permitted to ravage the area with the result that in a few years a piece of woodland, which was capable of supplying the farm with fuel and occasional pieces of timber, as well perhaps, maple syrup, becomes a tangle of upturned stumps and scrubby growth.

Dairy Products — Imports Into Britain.

According to official statistics the imports of butter into the United Kingdom from Canada for the first five months of the year were 254 long hundredweight compared with 170 hundredweight for the same period last year. The United Kingdom imports of butter from Denmark this year were 984,000 hundredweight, from the United States 10,325 hundredweight, from the Argentine Republic 285,429 hundredweight, and from Australia 480,597 hundredweight, and from New Zealand 749,735 hundredweight.

The imports of cheese from Canada into the United Kingdom for the first five months of this year were 75,798 hundredweight, compared with 94,243 hundredweight last year. From the Netherlands, including Denmark, the United Kingdom imports of cheese this year were 95,070 hundredweight, from Australia 26,991 hundredweight, and from New Zealand 835,132 hundredweight.

About Garden Bugs.

After the garden crops are harvested it often pays to rake up the old stalks and burn them. This may destroy insect pests and fungus spores which would cause losses next year. If any weeds have developed seeds they can also be burned.

The term "wireworm" is applied to numerous forms of elongated wire-like creatures, the larvae or snappers or click beetles and the name was given to them on account of their firm texture, which is much different from that of most insect larvae.

It is a well-known fact that the ladybird beetles are very beneficial, and this is proven in many ways. One scientist records where these insects have eaten fifty to sixty aphids in a single day and there are several records where they have eaten a hundred in the same length of time.

Many prairie farmers this year are trying plots of corn for the first time, and much interest is being shown in this crop.

CANADA'S AUTO-MOBILES

If a country's elaborate purchases of automobiles is to be taken as an expression of economic well-being, as is frequently accepted, the outlook last year was optimistic in Canada, and the indications those of prosperity. The number of automobiles in Canada in 1922 increased over the previous year by 9.6 per cent. In 1921 there were 470,862 automobiles owned by Canadians and in the following year 516,307, an increase for the twelve months of 45,445.

The Province of Ontario led in the possession of cars with a total of 238,600, followed by Quebec with 69,324. Saskatchewan was third with 60,643, followed by Manitoba with 41,885 and Alberta with 40,367. British Columbia occupied fifth place with 33,880, the Maritime Provinces following, with Nova Scotia 16,029, New Brunswick 13,419, and Prince Edward Island 2,154.

There is approximately one automobile for every sixteen persons in Canada. The Province of Saskatchewan leads in the per capita ownership of automobiles with one car to every nine persons. Ontario is second with a car to every 12, and Manitoba and Alberta are bracketed equal with a car to every 14 of the population. British Columbia has a car to every 15 of its people. New Brunswick one to every 29, Nova Scotia one to every 32, Quebec one to every 33, and Prince Edward Island one to every 41.

Increase Over 1921 Figures.

The possession of automobiles is increasing in Canada, as indicated in the fact that in 1921 there was approximately one car throughout the country to every eighteen persons. Saskatchewan has reduced her figure from 134, British Columbia from 37, Alberta from 17, and Manitoba from 15. Ontario has effected a big reduction from her previous figure of 204 and Quebec halved her 1921 figure of 66. Even the Maritime Provinces show very substantial reductions, and in every province of the Dominion there are more cars in proportion to population than a year or so ago.

It will be at once noted that the majority of cars are owned in the Western provinces of the Dominion, or in the agricultural areas where large populous centres are few. This is an encouraging indication in a land where agriculture is the first and basic of all industries, as showing the modern trend in the life of the western farmer. The automobile has, in fact, revolutionized the daily life of the Western Canadian farmer, economizing his time and adding to his leisure and recreation.

Canada maintains her position among the countries of the world as second only to the United States in the per capita possession of automobiles. Her position in regard to the leading nation, too, is very favorable, the United States, according to figures procurable, having a car to every fourteen of her people against Canada's sixteen. Five States of the Union have a lower per capita figure than Saskatchewan, Canada's first province, and three have the same figure. Great Britain has approximately one car to every 85 people.

Demagnetizing Watches.

Very often an electrician or an engineer or even a visitor to an electric light plant discovers after a few days that his watch is losing half an hour a day or more from becoming magnetized by the dynamo. In the newer stations where the most modern machines are used there is not so much danger from these "starry" magnetic fields as there is around older types of machines.

The apparatus used by jewelers for correcting this trouble consists of an elliptical piece of soft iron with a hole in the center large enough to permit the watch to be inserted. Over the iron are wound a number of layers of fine insulated wire. Alternating current is sent through the wire, and if there is none handy an additional device known as a polarity changer must be used with direct current.

With very little trouble and no expense whatever any one may demagnetize his own watch by a simpler method. Take a heavy thread or a light string about two feet long and tie the ring of the watch to it. Hold the string by one end and turn the watch around until the string is twisted about fifty turns. Allow the string to unwind, and as the watch revolves pass it slowly back and forth about two inches above the field of a motor or dynamo not smaller than a quarter horse power while the machine is running.

Says Hohenzollern Princes Are Defrauding Republic.

The former Kaiser and the Hohenzollern Princes are not only avoiding paying income taxes, but the administrators of the Hohenzollern property are making big profits of billions of marks through secret sales of wood from the Hohenzollern forests, according to the Vorwaerts, which charges that the Hohenzollerns are defrauding the Republic. The charge is denied by the Finance Ministry. The Socialists, in their traditional fight against the dynasty, demand an investigation.

Prevents Dripping. A new far-pouring kettle has an adjustable spout to prevent dripping and the flow of its contents is controlled from the handle.

PLANES BARE HIDDEN PAST OF ENGLAND

AERIAL PHOTOS TRACE OLD ROMAN SITES

Pictures Taken at Six Thousand Feet Give Results for Research in Archaeology.

A new epoch in archaeology has been opened up with the use of airplanes for photographing ancient sites. This is the opinion of O. G. S. Crawford, archaeologist with the British Ordnance Survey, as a result of his inspection of snapshots taken for practice by the air force officer near Winchester.

Aerial photography has been used by the American expedition which is now working on the site of ancient Carthage, on the north coast of Africa, to plan a foundation line for the submerged mole which guarded the harbor of the Punic city destroyed by the Romans.

Discovery Made by Chance.

The discovery was made more or less accidentally when an airman who took photographs in the course of his military work found on them certain strange markings. On ploughed land these appeared as bands of lighter colored soil, forming a pattern of irregular squares and rectangles. The clue to the nature of these markings is indicated in the lines of Rudyard Kipling's "Puck's Song":

"See you the marks that show and fade
Like shadows on the downs?
Oh, those were the lines the flint-men made
To guard their wondrous towns.
"And see you after the rain the trace
Of ditch and mound and wall?
Oh, that was a legion's camping place
When Caesar sailed from Gaul."

When the photos were submitted to Mr. Crawford he was soon able to identify the mysterious markings on them as ancient British "lynchets," or field boundaries, which were formed during the Roman occupation of Britain and perhaps some centuries before. The ancient British system of agriculture was entirely different from that obtaining to-day, which is direct descended, with modifications, from the early Saxon system.

The Celtic system, as revealed by the airplane photos, was a network of small patches, rarely more than two to three acres in size. In many cases there could be seen upon the same section nearby mounds and hollows of the river valleys, which they cleared. When the Saxon invaders arrived they destroyed the upland Celtic villages, and when they settled down founded new villages along the line of the fertile river valleys, which they cleared, introducing from Germany a system of strip cultivation radically different from the older British system.

Ancient Ramparts Shown.

The airplane photos depicted pre-Roman hilltop camps actually in a new light, disclosing features which were wholly invisible from the ground. Within two camps photographed they revealed a faint inner ring within the outer ramparts, which appears unconnected with the rest, and older.

Mr. Crawford wonders whether these vestiges of neolithic works were not ancient when the outer camps were made. Little or nothing is known at present of the pre-bronze age of the inhabitants of Britain, almost all remains being connected with burial places, while of the living there is scarcely any trace, due to the fact that subsequent invaders obliterated the earlier settlements.

RUSSIAN TRADE SHIP IN LONDON HARBOR

The "Proletary," the first Russian trade ship sent to England, lying idle in London docks. Owing to the action of extremists amongst London dockers, she is unable to discharge her cargo, which includes four hundred tons of eggs.

SYMPTOMS OF DEBILITY

How to Tell Whether Your Blood Needs Revitalizing.

The symptoms of general debility vary according to the cause, but weakness is always present, a tendency to perspire and fatigue easily, ringing in the ears, sometimes black spots passing before the eyes, weak back, vertigo, wakefulness caused by inability to stop thinking and unrefreshing sleep. The cause of the trouble may be some drain on the system, or it may be mental or physical overwork, sometimes insufficient nutrition due to digestive disturbance.

If you have any or all of these symptoms try building up the blood with Dr. Williams' Pink Pills, and as the new blood courses through your veins there should be an increase in your appetite, a better digestion and soon a renewal of strength and vigor. You can get these pills through any dealer in medicine or by mail, postpaid, at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

"Glass Island"

During the imprisonment of Napoleon on the island of St. Helena, the British stationed garrisons on all of the out-of-the-way rocks in the South Atlantic Ocean within a circuit of hundreds of miles.

Among others, one named Tristan da Cunha was chosen as the residence of a company of British soldiers. Upon the death of Napoleon these precautionary measures were no longer necessary, and as the barren rock of Tristan does not lie in the path of vessels bound round the Cape, the garrison was taken off.

Among the soldiers, however, was one Glass, who had conceived the idea of settling on this desolate island after the manner of Robinson Crusoe.

Escaping to the mountains, he was left behind when his comrades sailed to the Cape.

He remained for three years in solitude, cultivating a little garden, and amusing himself by exploring the mountain fastnesses and hunting goats. At the end of this period an outward bound India-man, which had got out of her latitude, hove in sight, saw his signal, and bore him to the Cape.

There he remained long enough to earn an outfit for the novel life to which he intended to return. He married, engaged passages for himself and wife in a schooner bound for St. Helena, and was landed again at Tristan.

Sons and daughters were born, and with their aid he was able to extend his agricultural operations so as to have potatoes and mutton to sell to the now more frequent vessels.

The island eventually became a convenient calling-place for American whaling-vessels, and was also visited occasionally by homeward-bound India men.

The colony received accessions from the sailors of these vessels, and the newcomers in time became husbands to the old patriarch's daughters. His sons — he had eighteen children in all, but mostly girls — remained with him until they grew to man's estate, when several of them chose themselves wives from among the Portuguese inhabitants of the Cape of Good Hope, and settled for life under the rule of their father, who now styled himself Governor.

The hundredth child was born before the first death occurred in the colony. The island was now under the "government" of Glass' eldest son, and the population is nearly one hundred and fifty.

His Concern.

"Do you know, I believe this little rascal has swallowed one of my diamond studs!"

"Oh Heavens above!"

"Now he's gone and broken the lot."

The Last Straw.

Mr. Busman was exasperated with the telephone. Ten times that morning he had tried to get on to a number, and each time something had prevented him from speaking. Either it was "number engaged," or the person he wanted was out, or else he had been suddenly cut off. At last he got through.

"Hallo!" he said. "Is Mr. X—there?"

"Yes," replied a voice. "Do you want to speak to him?"

This was the last straw. Back came the reply, in icy tones: "Oh, no! Nothing of the sort. I merely rang up to hand him a cigar!"

As Usual.

Bits of broken news came down from the bird house on the pole and with it a volley of indignant bird chatter.

"Well, I've had my lesson," cried the feathered matron. "I'll never submit this place for the summer again. See the condition they've left it in! Why, they even sharpened their beaks on the woodwork!"

A caterpillar does not breathe through its mouth, but through the holes in the sides of its body.

"Whatsoever Things are Lovely"

God, lend me strength to sentinel
The portals of the mind,
To turn away dark thoughts of doubt
Which would admitance find;
Help me to open doors of faith
Till sunny is each room
Distrust, unwholesome hate, thrive not
Where love's sweet flowers bloom.

Against soul devastating foes
I oft the door can bar,
Can turn mine eyes from mire of earth
To glow of evening star.
The things that lovely are and pure,
If long the mind beholds,
Become our own—all, all is ours
Of beauty that enfolds.

The poets have done much for me
In helping thoughts to fly
From out the dungeon-deeps and see
"One boundless reach of sky."
They lead away from petty cares,
From sense of wrong and pain,
With songs of heroes, deathless loves
Soft sound of summer rain.

Great Poet, Father of all Lights!
From no one far away —
Teach Thou this longing soul of mine
Thy song from day to day.

—Maud Frazer Jackson

Earth Quivers Like a Jelly Ball, Says Scientist.

Prof. W. de Sitter of the University of Leyden, Paris, has found the earth does not rotate as a rigid body but quivers like a ball of stiff jelly. The quivers, he believes, make distances between points on the earth's surface vary erratically. That, he says, explains why time signals exchanged between observatories show discrepancies as great as several tenths of a second.

Similar quiverings are said to have been detected on the moon.

Whoever controls the motion picture industry controls the most powerful medium of influence over the public.—Mr. T. A. Edison.

LINIMENT

Mrs. J. W. Sampson Tells How Cuticura Healed Her Scalp

"I was troubled for years with a dry scalp and dandruff. There were small scales on my scalp and it itched and burned a great deal. My hair was very dry and lifeless, and fell out when I combed it. I began using Cuticura Soap and Ointment and after a few applications could see an improvement. I continued using them and in three months was healed."

Keep your skin clear by using Cuticura Soap, Ointment and Talcum for every-day toilet purposes. Touch simple and itching, if any, with Cuticura Ointment; bathe with Cuticura Soap and hot water. Dry and dust lightly with Cuticura Talcum, a powder of fascinating fragrance.

Sample Book Free by Mail. Address: "Cuticura, Limited, 544 St. Paul St., W., Montreal." Send every-day Soap, Ointment and Talcum. Talcum, 50¢. Cuticura Soap shaves without lather.

PUTS HEALTH AND VIM INTO WOMEN

So Says Mrs. MacPherson of Lydia E. Pinkham's Vegetable Compound

Brantford, Ontario.—"I was always tired and the least exertion would put me out for a day or two. I had a pressing pain on the top of my head, pain in the nape of my neck, and when I stooped over I could not get up without help, because of pain in my back. I did not sleep well and was nervous at the least noise. I keep house, but I was such a wreck that I could not sweep the floor nor wash the dishes without fainting down afterwards. A friend living near me told me what Lydia E. Pinkham's Vegetable Compound had done for her so I began to take it. With the first bottle I felt brighter and got so I could wash dishes and sweep without having to lie down. Later I became regular in my monthly terms. I have taken ten bottles all told and am now better. I can truly say that your wonderful medicine cannot be beaten for putting health and vim into a woman."—Mrs. JAMES H. MACPHERSON, 809 Greenwich St., Brantford, Ont.

If you are suffering from a displacement, irregularities, backache, or any other form of female weakness write to the Lydia E. Pinkham Medicine Co., Cobourg, Ontario, for Lydia E. Pinkham's Private Text-Book upon "All that is Peculiar to Women."

Mr. and Mrs. Nichols and little daughter, of Detroit, spent a few days in the village last week.

Mrs. Tom Foulds and Emerson and Jean, of St. Thomas, are visiting Mr. and Mrs. J. V. Foulds.

In Memoriam

In loving memory of Theodore Story, son of Mr. and Mrs. Albert Story, who passed away three years ago today—August 7, 1920:

Often we pause and think of you,
And think of how you died;
To think we could not say good-bye
Before you closed your eyes.

The sting was bitter, the blow severe,
To part with him we loved so dear;
The trail is hard but we'll not complain,
But trust in God we'll meet again.
—Father, Mother and Brother.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

NORTH EKFRID

Mr. and Mrs. Chester Thorncroft spent Sunday with friends at Melbourne.

Some men seem to wear a flock of chin whiskers for the purpose of advertising the fact that they chew tobacco.

UNVEILING MARTIN MEMORIAL

Above, C.P.R.S. "Empress of Scotland" arriving at Quebec. Below, F. L. Wanklyn of the C.P.R. addresses the gathering prior to the unveiling. Inset, the Memorial.

WHO was Abraham Martin? Had that question been asked one year ago probably not one Canadian in a hundred thousand would have been able to answer it. Today it is different. Most Canadians now know he was first King's pilot on the St. Lawrence river, and the first known Canadian of Scottish extraction—two claims to distinction either one of which might have made him famous. Latterly other things to his credit have come to be known, and they will be recorded in their due place.

In the meantime it is not remarkable how little Canadians know of Canada's history—as rich a bit of nation history as ever was crowded into a space of three hundred odd years. The high points of the splendid story some of us know fairly well, but the little byways and side-lights, so full of human interest, they lie in a deep obscurity from which they are being rescued one by one, at the patient digging of this or that person or institution actuated by a love of the heroic past and a realization of its value in building the national life of the future.

Abraham Martin was some figure of a man in his day although most of his just claims to fame seem to have been thrust upon him. It was hardly more than a matter of accident that the "Plains of Abraham" should come to be named after him, and yet that was plenty to set all good Canadians wondering who he was and what manner of life he led. Much digging in the archives of Quebec, and there are none more interesting or more faithfully kept, has brought out much information about the man and his times. He was born in France, his father being a Scot, which is probably why Jesuit writings of the times refer to him as "Abraham Martin, called the Scot." His father probably came from Perthshire and was one of the Scottish Guards of Louis XI. In 1614 Abraham brought his French wife to Canada and that he saw the actual founding of New France may be gathered from the fact that his name was on the list of the 31 white persons who lived in Canada from 1629 to 1632, and he was then known as a pilot. He later had ten children

from whom have come a vast number of descendants among whom are numbered some of Quebec's best families and leading citizens. Bishop Tache of St. Boniface is one of his descendants in direct line. Champlain gave Martin a deed to the farm land on the Plains of Abraham, and documents telling of him living there still exist. He apparently travelled greatly up and down the river for Cape Martin in the Gulf of St. Lawrence is also named after him.

All this was distinctive enough to justify the memorial which has been raised to Martin in the Harbor Square at Quebec. The handsome shaft of granite, designed by Henri Hébert and T. Roxburg Smith, was unveiled early in May by Hon. Athanasius David, Quebec's Provincial Treasurer and the event was marked by a gathering of notables including the Governor of Quebec, Sir Charles Fitzpatrick. Among those who spoke were F. L. Wanklyn, representing the Canadian Pacific Railway Company by whom the memorial was erected, Lieut.-Col. Alex. Fraser, A.D.C. to the Lieutenant Governor of Ontario, Lawrence Burpee, President of the Canadian Historical Society and Monseigneur Laflamme, Curé of the Basilica. The latter spoke as the successor of the first Curé of Quebec who was Martin's parish priest and who was afterwards martyred by the Iroquois. He read the baptismal certificate of Abraham Martin's first child who was also the first white child born in Canada. He also read the baptismal certificate of Martin's third child upon which appeared the name of Samuel de Champlain as godfather. The memorial has been set up by the Canadian Pacific in honor, not only of Abraham Martin but of the stout-hearted pilots who for over three hundred years have done so much to make the St. Lawrence River a safe and speedy route to and from Europe. That company uses the route more than any other, and the arrival at Quebec of the great liner "Empress of Scotland" on her first trip of the season with 731 passengers from Europe later in the day of the unveiling emphasizes what has been accomplished in the making of the St. Lawrence route a great highway for ocean borne commerce.

SOMETHING NEW

We have recently purchased a Plan Book Service containing several hundred Floor Plans and Colored Pictures of Farm Houses, Bungalows and Cottages, and can furnish Blue Prints for any of these for Two Dollars each.

If you are going to build, come and look them over. This service includes drawing plans from your own ideas at a very nominal sum.
