The French newspapers assert that this telegram throws valuable light upon the condition of the Czar's spirits, and the newspapers add that it proves his brain is not haunted by grave considerations after talking with Emperor William of Germany at Wies-

GLOOMY SPECTACLE. London, Oct. 23 .- A Madrid dispatch to the Standard says: "The Queen Regent presided at a council of ministers today. Senator Canovas, the Premier, gave a complete sketch, which was gloomy enough, of home

and colonial affairs. "The loss of men in the colonial wars has proved disastrous to husbandry, as proved by the marked decrease in export. Spain will be compelled to largely import breadstuffs. Only patriotism prevents the latent discontent from breaking out. A presentiment impels the nation to show cohesion and a haughty determination with a view to avoiding international complications, and the possible intervention of the United States."

The gloomiest feature of the situation the Prime Minister dreaded is the difficulty which the Government finds in obtaining a loan of 1,000,000,000 pesetas to defray the expenses of the war in Cuba and the Philippine Islands, and to strengthen the finance of the country.

Wild Scenes in the Chicago Wheat Pit.

Millions of Bushels Dumped on the Market.

December Option Dropped Five Cents-The Decline is Universal.

Chicago, Oct. 23.-About 5 cents a bushel was clipped off the price of wheat yesterday. December, which closed on Wednesday at 75 1-4c finished yesterday at 70 1-2c. It is not often that the price was such a sensationally sudden collapse. Stop-loss orders were in the hands of every commission man who had customers long of wheat, and when a decline came early in the day it caught the most of them. It was practially impossible to follow exactly the stoploss orders at any given figure, and

the result was an almost unanimous rush to sell. The closing fifteen minutes on Change were marked by scenes of almost unparalleled excitement. In that brief period the price of December option, which had been tumbling around 73 1-4c to 73 3-8c in an uncertain fashion for some time, fell to 70 1-4c, the low point of the day. Most of the late decline occurrred in a space of five minutes.

Garden, who is one of the sureties | Sales up to 1 o'clock aggregated 11,-000,000 bushels. Prices were all lower, following the weakness abroad. The early selling was for European account. Commission houses sold freely on stop-loss orders. Under this weight of offerings prices were broken sharply to 80c for December, representing decline of 2 1-8c from Wednesday night's close. At midday a partial recovery resulted from the introduction

of new blood on the buying side. WENT DOWN WITH A RUSH. In the afternoon a sensational drop in prices startled the whole trade and completely demoralized the wheat pit. Prices just slid down the scale 1-4c to 1-2c at a time, selling off nearly 4c in half an hour. It was a tremendous break. Chicago, Oct. 23.-It was a crazy narket in wheat today again. Decem ber, which closed yesterday at i0 1-2c. opened with sales generally 2c a bushel higher, but with business varying in different parts of the pit all the way from 72c to 72 5-8c. After the first rush quotations quickly chopped from 72 1-2c down a full cent in a straight line to 72 1-2c. Then prices whirled upward a cent back to 72 1-20 December. Here the market hesitated a moment, and then bounded still higher, touching 73c at 10:15 a.m., a gain of 2 1-2c a bushel within threequarters of an hour.

London, Oct. 23.—At the Baltic today cargo wheat was dull and 1s lover; but later the market was steadier, with no business demand. On Mark Lane, English wheat was sold at 2s decline, and foreign wheat was quoted at 1s up to 2s lower, Trade was quiet.

LUMBER GOES UP. Simultaneously with the rise in wheat the price of lumber has gone up, but the actual cause is yet unknown. There has not been a greater demand for common stock lumber for many years than at present. Prices have jumped from \$1 to \$1 50 per thousand and are still rising. Local firms are holding out for stiff figures.

CONCESSION TO MERCHANTS. The Postoffice Department has made a concession to merchants, etc., who send out printed catalogues, by which they will be permitted to inclose or der lists in such catalogues. Heretofore when such printed forms or order lists were included the catalogues were liable to a higher rate of postage. They can now go at the same rate as the catalogue, namely, 1 cent for four ounces. The department has decided to put a stop to the practice of inclosing hand-bills programmes, show advertisements etc., in newspapers sent to subscribers. BILLIARDS. Chicago, Oct. 22.-The Brunswick-Balk-Collender Company has made the following offer for an international billiard tournament: A purse of \$7,500 for prizes, to be contested for in two six-night tournaments, one at New York city and one at Chicago, at 14 or 18-inch balk line, one shot in balk, anchor barred, 600 points each game. It is stipulated that at least two or three leading American players, Ives, Shaeffer and Slosson, shall take part in the tournament, and that two of the leading French players shall also enter, but the tournament is not restricted to those four entries. In case this proposition does not meet with the responses hoped for, they will make another offer to American proessionals only. They will give \$5,000 prizes for two tournaments, one at New York city and one at Chicago, provided that no less than two of the three leading players—Ives, Schaeffer and Slosson—take part, and also that no less than five players in all compete in each tournament.

\$10,000 FOR A PITCHER. The biggest piece of news in the baseball world is the sale of Breitenstein, the left-handed pitcher of the St. Louis team, to Cincinnati, for \$10,-000. Undoubtedly a good price was paid, but it is almost a certainty that John T. Bush paid no such sum. Breitenstein's work last year did not justify the price. Many think his period of usefulness is rapidly drawing to a close.

Sam Thompson, the great outfielder, of the Philadelphia club, says: "It looks to me as thought there was a good deal of truth in the rumor that the Baltimore team is to be transferred to New York. The people of Baltimore are tired of championship ball. New York is the key to the situation. With a good team in New York everybody seems to play the fastest kind of ball; with a poor team there, it makes a difference in every

LIGHT-WEIGHT CHAMPIONSHIP. The next big pugilistic event will be the Lavigne-Everhardt match, in New York, on Tuesday. The men are to fight 25 rounds at 128 pounds. Both have been training hard. Lavigne is unquestionably the light. weight champion of England and America. Everhardt boxed him to a draw the last time the pair met, but Lavigne was weak and totally unfit for a hard fight. Lavigne is the only fighter of French extraction who has chieved such a degree of notoriety in the ring. La Blanche, the Marine, is of French origin, but he was never regarded as a first-class man.

SWIMMING. WORLD'S PLUNGING RECORD

BEATEN. The annual competition for the amaeur plunging championship of England was decided at the Lewisham Baths the other evening, and resulted in a win for W. Allason, of the Otetr Club, with a record plunge for a minute (the time limit) of 73 feet 4 inches. Without lifting his head Allason cotinued moving, and covered 80 feet 81-2 nches before completing his plunge. This constitutes a world's record. The previous best, without time limit, was 75 feet 7 inches, by G. A. Blake, Lewisham Swimming Club, on Oct. 10, 1888.

Major W. Taylor, of Bootle, the winner last year, gained second prize in the championship with a plunge of 69 feet 7 inches, and H. A. Wilson, of Surbiton (winner in 1892), the third prize, with a plunge of 68 feet 1 inch. Ten of the thirteen competitors gained standard certificates by beating 52 feet.

MANITOBA WHEAT.

This Year's Standards - Relieving the Elevators-\$1 01 Paid at Qu'Appelle. Winnipeg, Oct. 23.-The rival milling companies here are covering their losses on wheat by raising the price Owing to the continued advance in flour, city bakers have in-creased the price of bread to 7 cents

pounds. This was decided by the graim standards board yesterday. General Superintendent Whyte, of the Canadian Pacific Railway, states that by the and of the week the company will have relieved the pressure of the wheat at country points. The elevators which are most needed are being reved first. At present the company is ipping about twice as much wheat as it receives each day. Farmers, Mr. Whyte says, are jubilant over the high prices. He expects that the prices will be still higher after lake navigation closes, as the present large shipments from America to Europe will then have to be discontinued. Yesterday at Qu'Appelle \$1 01 a bushel was paid for wheat. This high price was a record-breaker, and was the result of millers' competition for

The day after they left the camp the Baron, Lieut. Budick, seven sail-ors and two servants started up the mountain. Several bushmen met them on the way, and joined the expedition, but as they were without arms no particular attention was paid to them. The Baron was in the lead all the way, and as he neared the top of the mountain a bushman, who appeared to be a chief, was seen by the party. As he appeared two shots were fired lower down the mountain. The shots seemed to be a signal for Bushmen from a score of places at once rushed out, and the Baron was struck on the neck with a tomahawk, while a crowd of bushmen attacked the rest of the party with clubs. The native who had cut down the baron was promptly shot by a sailor. Lieut. Budick also put his revolver to

Lieut. Budick also put his revolver to good use. One sailor had to protect himself with a tomahawk he had wrested from a native. The other sailors were well armed and the bushmen finally had to retreat to the woods, many of them wounded. It was thought the baron would recover, but he gradually sank after he had walked back to the camp, and died in three hours. Midshipman Armand De Beufort was cut to death, and three sailors and a native guide were also killed. Six sailors and one were also killed. Six sailors and one guide were wounded. The news was sent to Capt. Maulock, of the Albatross, and a relief party were sent, and safe return made to the ship.

WINDSOR'S BAD WATER.

Drs. Clarke and Eilis Say It Is Unfit to Lrink.

Windsor, Oct. 23 .- The water commissioners have received another proof that the water they are supplying to the people is not fit to drink. The Provincial Board of Health ordered the city to remove the intake above Walkerville and to put in a filter. The commissioners sent to Dr. Ellis, Toronto, and Dr. J. E. Clark, of Detroit, for analysis, samples tak-en from a Windsor penstock and the which a pin stuck through a seed ball Walkerville intake, and one of filtered water. Dr. Ellis declared the Walkerville water good, the Windsor water of doubtful purity and the of the basswood tree is sustained in filtered water excellent

Dr. Clark said the Windsor water was unfit for drinking in the present condition, the Walkerville water of poor quality, and the filtered sample of good appearance and practically Dr. Casgrain, chairman of the com-

missioners, says the board will take nmediate steps to put in a filtering plant at the present intake. It would ost about \$40,000, and the people will be asked to vote on it as soon as possible. The other recommendation of the Provincial Board-that the intake be removed from Walkerville-is, apparently to be ignored, as the commissioners do not think it necessary ..

Melbern, Ohio, Oct. 23 .- While hunting coon two miles north of here last night Frank and Isaac Halter came near being killed by a panther. The dogs had treed the animal, and the boys, thinking a coon had been lodged, approached the tree. The infuriated brute sprang from branches and landed upon Isaac's shoulders.

A terrible battle followed, and but for the dogs young Halter would have been killed. Frank succeeded in crushing the panther's skull. Isaac was horribly clawed. The animal measured 5 feet 7 inches in length and weighed 126 pounds.

New York, Oct. 23.—North Dakota courts will decide whether love or hypnotism impelled George J. Cawood to get married last December. At the time he thought it was love. Now he

says it was hypnotism. George is the son of the late John-ston Cawood, a furniture dealer, who left considerable property. The young man's mother lives in an old-fashioned house at No. 520 East One Hundred and Sixtieth street. George lived with her until two years ago, when it was thought he was becoming too much attached to Mrs. John H. Cawood, widow of a cousin, who was clerk in the Hamilton Bank. George was then sent to school at Pierpont Manor, on the Hudson.

The elder Mrs. Cawood had no objec tions to the pretty cousin, but as the latter was 36 years old, she thought her age would be against a happy union with her youthful son. Young Cawood, at school, according to his story, played football, studied hard, and had driven all thoughts of his cousin from his head, when one day she appeared on the scene.

"It was like a dream." he is said to have told his mother afterward. "She was run over by a yard engine, and it through me and compel me to do any-thing she willed. I would have gone thing she willed. I would have gone through fire and water for one smile

The boy and the woman took a train for Montreal, where they were married next day at the office of the American consul general. George's mother was notified by telegraph, and this was the first she knew of the wedding. The couple did not get along well together, and last April they separated. George went to Fargo, N. D., his wife to Fishkill. Whether George was influenced by hypnotism or love may be uncertain; Mrs. Cawood, how-

ever, was certainly acting through marriage. "As for the hypnotism." said Volney wood, who related the circumstances in the case yesterday, "that may be hard to prove in court, but I have no

doubt it existed."

Wheat still talks.

Li Hung Chang arrived home at Pekin on Wednesday, and has since been kept busy telling his friends of the big times he had in Canada with Sir Henry Joly and the Toronto policemen.

The Eighty Club have resolved to entertain Premier Laurier to one of their famous dinners when he visits the British metropolis. It is not now probable that public business will permit of Mr. Laurier making his visit before next year.

I'me increase in the price of wheat has been a perfect bonanza for the ocean ship-owners. Last summer they had difficulty in getting 2 cents a bushel for carrying grain across the Atlantic; now they can get more than they can carry at 11 cents per bushel ment of the day is is head. to London.

The Ontario Conservative convention, to be held in Toronto next week, is not a convention at all, but a caubeen selected, not by the rank and file of the party, but by Sir Charles Tupper himself.

The councils of the adjoining municipalities of Ekfrid and Mosa are to be asked to make a grant to uphold a public library and reading room in Glencoe. The councilors should have no hesitation to do so. A good central library, open to town and country people alike, is a great boon in any constituency, and the most effective way to provide it is by the cooperation of the municipalities inter-

There is much rejoicing in Chicago. The total registration of voters is found to be 383,515. This outnumbers the New York city registration by 52. 335. Chicago can hardly contain itself. This is the first occasion on which Chicago has beaten the metropolitan city in registration. But wait until Greater New York, with is 3,500,000 inhabitants, is an accomplished fact! Then Chicago may take in Milwaukee and Kalamazoo, and still be short in the total count.

In New York, the caretakers of the animals in the Central Park prophesy that the ensuing winter will be long and cold. The prairie dogs and rats are as sagacious as ground hogs, and they expect a severe winter. They have left their homes in the marshes and along the lakes and among the rocks, and are now arranging new quarters under the animal houses in the Zoo, where they will be warm and away from the winter's storms.

Mr. Stead, of the Review of Reviews, referring to his confinement in jail as a result of his social revelations, says he thoroughly enjoyed himself. He got rid of bores, and he was able to do good work. But Mr. Stead was treated as a "first-class misdemeanant." If he had been sent down as a vagrant or as a common drunk, he would have a less glowing account of the "good times" that came from imprisonment. Those who have experienced it say that the fare of a 30-day prisoner in an English fail is starvation itself. It is not every prisoner who can pay 12s a week for board and lodging, as Mr. Stead says he did while in Holloway

Petroleum has been produced, or at least imitated, by Prof. Sadtler, of the United States. He gave a statement of how he acomplished this remarkable experiment in a recent address befor the American Pharmaceutical Association. Lineed oil was subjected to destructive distillation, under pressure, and various products identical with certain petroleum hydro-carbons were produced. This discovery bears directly upon the theories commonly held regarding the origin of "coal oil." Two theories are entertained: One is that petroleum is of vegetable origin. Mayhap it is part of both, but Prof. Sadtler's results certainly tend to confirm the view of those who have held that it is produced from vegetable matter of a long past age. Oil men will find in the new experiment much that will interest them.

Another is a bill against undesirable immigrants, designed to keep consumptives out of the colony. The captain of a ship landing a passenger afflicted with lung disease is to be heavily fined. An additional fine is to be imposed if he allows a sound passenger to room with a sick one, and he is held responsible if lung disease de-

If the last-cited measure becomes law a ship captain will have to carry an expert medical man to "sound" every passenger before he takes him just as much a right to protect its constituents against injury by the importation of new-comers as a private citizen has to protect his household against the incursion of those who jeopardy. The delegates have ment with regard to shooting at Rondeau, which provide, among other things, that no steam launch or sailboat of any description is allowed to enter the Rondeau harbor, and that each individual sportsman is only entitled to shoot 150 of the water fow! amonly called duck. Our contemporary asserts that these regulations aim a much-needed blow at pot hunters, who until recently have almost entirely monopolized the shooting at the Eau, utilizing launches and sailboats to cover the whole ground. Constantly emphasizing the Canadian winter, by exaggerated pictorial representations of its rigors has done Canada immense harm in the past. Why should Canadians-including the Montrealersnot aid the settlement of our vacan by getting up summer carni vals, instead of carnivals and ice palace bombardments? Let us. for change, bring to the notice of the world the fact that we have delightful spring, summer and fall weather, Californian cities advertise their salubriousness by annual floral festivals. Canadian cities should do the same.

To Be Investigated.

Though expressing the conviction hat the substance discovered in Alcause it burns, is not the genuine article, the Director of Mines has ordered that the find be fully investigated and reported on by Dr. Coleman, an expert. The commercial value of the mineral will thus be ascertained. If it is not coal, but can be used as a substitute for that article, its discovery is most fortunate.

"The first number of a new paper too often accompanied with a loud shout about 'filling a long felt want. about 'distinguished contributors' and one future for a paper issued into the world in that way unless it changes hands, and that is to die. Any man fit to conduct a paper knows that a successful paper is a growth, and cannot be made in a year or ten years. "Knoxonian" might have further, and said that every real journalist is too much occupied with his work to waste time in shouting. That is left to the fakirs of the profession, whose stock in trade consists of boasts of what they can do, are going to do, and have done. The real journalist does not disgust his readers with "shop talk"; he takes them to be people of sense and discretion, does his work conscientiously and lets it speak for him. The Red Man Making Good Progress in Mixed Farming-Those Who Competed for Honors-Notes,

Yesterday was typical Indian summer weather-just the kind suitable to the desires of the managers and members of the Oneida Agricultural Society, who held their fall fair on the reserve, and though it was practically the first day, when a big rush is not expected, a paying crowd was on the ground to take in the sights. The Indian directors demonstrated that they are just as well versed in the art of managing a first-class fair as their or less energetic and disinterested in forefathers were in the business of bringing down large game and scalping their enemies, for everything was ing further to be done when the show opened. For this praise is due the president: Smith Antoine treasurer. J. T. Schuyler, secretary; Peter Antoine and Isaiah Sickles, auditors. For the exhibits in all lines were of splendid quality. In the "Palace," arranged tastefully, were pies, Indian corn-bread and fancy cake that made a party of bicyclists from London feel even more hungry than before entering. The roots, grain fruit, and various other classes occupied all the space at command, and were admired by the visitors during

Bominion Deficit,

The Country's Balance-Sheet for the Year to June 30.

Heavy Increase in the Public Debt of

Ottawa, Oct. 23.-The annual financial statement showing the results of the operations of the Dominion for the year ending June 30, 1896, has been prepared by the Finance Department. covers the last fiscal year of the tate Conservative regime, and is marked by another deficit. From 1878 to 1893 the Conservative party raised a clamor throughout the country over three deficits in Mr. Mackenzie's time, totalling \$4,489,000, and many were the gibes thrown across the floor of Parthis account. Mr. Foster has, however, outdone Sir Richard in deficits, which for the years 1894, 1895 and 1896 total \$5,728,000. The deficit for the financial year just closed was \$363,481, and the increase of debt \$5,528,831. The total net debt on June 30, 1895, was \$252,999,000, and on June 30, 1896, it was \$258,528,304. When the Liberals went out of office in 1878 they left the net debt at \$140,000,000; when they returned they found an addition of \$118,000,-000. Since Mr. Foster declared to Par-liament four years ago that there was no need for adding further to the pubiic debt the sum of \$17,000,000 has been added.

The revenue on account of consolidated fund for the year was \$36,617,484, and the expenditure \$36,980,966. A comparative statement of the revenue for the year and for 1895 is as follows:

| Customs | \$17,640,463 | \$19,833,962 | 1 |
|----------------------|--------------|--------------|-----|
| Excise | 7,805,952 | 7,926,005 | t |
| Postoffice | 2,792,789 | 2,964,014 | 1 |
| Public works (in- | | | 1 |
| cluding railways) | 3,592,297 | 3,594,078 | 1 |
| Miscellaneous | 2,098,306 | 2,299,424 | |
| | | | 1 |
| Totals | | \$36,617,484 | 1 |
| Expenditure | \$38,009,341 | \$36,980,966 | 1 |
| On annital aggoritht | 4 240 838 | 4 614 540 | 1 1 |

The expenditure on capital account was divided as follows: Public works, railways and canals, \$2,699,817; Dominion lands, \$82,309; railway subsidies, \$834,745; militia, \$997,668.

The revenue for the first three months of the fiscal year current endto \$8,846,000, compared with \$8,610,000 for the same period last year. The increase is derived from customs and excise. The expenditure for the same period was \$4 662 350 The correspondents of the "surplus" of \$4,184,000, and editorials were usually written calling attention to the financial prosperity due to a wise administration. No such comparison is, of course, possible, for the expenditure is not all in for the three months. A comparison can be made, however, with the stated expenditure for the same period last year, when it was \$5,537,627, so that the first quarter of the new Administration shows a reduction of \$875,000. During the" .. 33 yv duction of expenditure of \$875,000. During the same period the net debt was reduced from \$258,528,000 to \$254,665,000, a reduction of \$3,863,000. The expenditure on capital account was \$320,581 three months, against \$742,351 for the first quarter last year. new Administration starts out well.

Distress in the Back-Disturbed Sleep-Cured by Two Boxes of Dodd's Kidney Pills.

Berlin, Oct. 19 .- There has occurred aere another instance of the wisdom of using Dodd's Kidney Pills in any case of suspected kidney trouble, promptly, at the outset. This was in the case of Mr. A. E. Fergusson, who on being interviewed, said: "I had been suffering for some time with distress in the back, nervousness and disturbed sleep. By reading in the paper one day the particulars of a case very much like my own, I decided to Dodd's Kidney Pills, and procured one box. Being helped by the first few doses I continued taking until I had used two boxes, with the happy result

of a perfect cure." SLEEPLESSNESS is due to nervous excitement. The delicately constituted, the financier, the business man, and those whose occupation neman, and those whose occupation necessitates great mental strain or worry, all suffer less or more from it. Montreal, Oct. 23.—The official report of the Grand Trunk Railway Company for the half year ending June 30, 1896, which was received at the Montreal offices of the company yesterday, shows gross receipts for the Montreal offices of the company yesterday, shows gross receipts for the first half of the present year £1,707,-539, as compared with £1,653,092 for the first six months of 1895. The net revenue deficiency for the half year ending June 30, 1895, was £94,083, and the operations of the half year have thus resulted in an improvement of £12,021.

The working expenses for the half year amounted to £1,218,244, or 71.34 per cent of the gross receipts, compared with £1,171,072, or 70.84 per cent in the corresponding period, an increase of £47,172, in amount and 0.50 per cent of the gross receipts, mainly attributable to the larger train mileage run. The cost of the repairs of engines, workshops, etc., has increased by £7,189, rendered necessary by the enforced economies of former half the enforced economies of former half years referred to in previous reports.

PRAISE FOR MR. HAYS. The president, at the request of his colleagues, again visited Canada, and the United States in the spring of this year, and had the advantage of personally conferring with Mr. Hays and the executive officers on important matters affecting the interests of the company. He inspected various sections of the system, and also attended meetings of the Joint Traffic Association in New York.
"In view of the continued business depression in Canada, as well as in the United States, which has been intensified by the elections in both intensified by the elections in both countries, a return to normal operations of railways could hardly have been expected, but the board have confidence that, with the removal of these disturbing influences, the Grand Trunk Railway is in as good a position to avail itself of any improvement as any of the trunk lines.

During the progress of the fire Alfred Beaumann, foreman of Engine Company 39, while standing on an extension of the burning building assisting two companions in getting a hose along the second floor, was caught in a back draught and forced into the flames. When his body was rescued it was burned to a crisp. Three firemen who tried to rescue Beaumann were badly burned. Woodstock, Oct. 23. — Yesterday morning fire destroyed the annex of the Arlington Hotel here, a brick structure. At one time the conflagration looked serious, many frame buildings being in the locality, but the firemen succeeded in confining the flames to the annex. The proprietor estimates the damage at \$600.

POTATOES

Not Nearly So Plentiful This Year as in Chicago, Oct. 23 .- Orange Judd Farmer tomorrow will say: A smaller acreage and a decreased rate of yield are resulting in a decidedly smaller and more manageable crop of pota-toes in the United States. The amount available for market is by no means as burdensome as was the crushing crop of 1895. The crop now being harvested is

placed by this authority at 245,480,000 bushels, a decrease of more than 50. 000,000 bushels, or 17 1-2 per cent, compared with a year ago. The total area harvested approximates 2.865,000 which in turn is 10 1-2 per cent short of last year.

Assessment System. Mutual Principle. THE MUTUAL RESERVE IS AL-WAYS PROMPT.

Hamilton, Oct. 14, 1896. The Mutual Reserve Fund Life Association, cor. Duane and Broadway, New York, N. Y.:

Dear Sirs,—I have just received from Mr. E. S. Miller a check for \$1,800, the balance in full due under policy No. 1,337, issued by the Provincial Provident Institution to my late husband, Mr. Henry H. Douglas, and I wish to express my thorough appreciation of the courteous and generous treatment I have received in the setlement of this claim. As soon as the death occurred you were good enough to advance me \$200 to meet funeral and other expenses. This was quite unexpected, and is the more highly appreciated because of it being a purely voluntary act on the part of the com pany. The balance of the claim has been paid long before due, and I have been put to no unnecessary trouble or expense in completing proofs. I thank you heartily, and shall always have a good word for the Mutual Reserve.

Yours very truly,
(S.) MRS. ALICE E. DOUGLAS. Orangeville, Ont., Oct. 16, 1896.

The Mutual Reserve Fund Life Association, cor. Duane and Broadway, New York, N. Y.: Dear Sirs,-I have to thank you for eck just received from Mr. E. S. iller for One Thousand (\$1,000), in full payment of claim under pol-icy No. 14,166, carried by Mrs. Mary J. Hicks, deceased. Payment of claim has been made long before due, and your manner of settlement has been prompt, business-like and satisfactory

in every sense of the word.

Wishing the Mutual Reserve the success it so well deserves, Yours very truly,

Speeches in Support of the Movement.

A meeting of the members of the London Clerical Association, Lay-Workers' Association and Huron College Missionary society was held in Huron College convocation hall last night for the purpose of forming a missionary association. Very Rev. Dean Innes occupied the chair, and among those present were Revs. Proost Watkins, Canon Richardson, Archdeacon Davis, G. B. Sage, J. H. Moorhouse, W. L. Armitage, W. F. Brownlee, Prof. Burgess and Canon Smith; Messrs. Harrison, Crawford, Hart, Rhoder, Kennedy, Pope, McWhinney, the students of the college and others, including a number of ladies. The meeting was opened with a hymn and prayer led by Canon Richardson. Mr. E. B. Smith was appointed secretary pro tem., and read the report of the joint committee, which recommended that a branch of the Canadian Church Missionary Society be formed in accordance with the constitution there-of. Prof. Harrison gave a detailed account of the steps which led to the meeting, and spoke of the strong desire in many hearts to have a missionary of their own in the foreign field.

Mr. Walter Crawford also spoke of the noble work done by the Church Missionary Society in all parts of the world, and urged the formation of a

Archdeacon Davis, as one of the trustees of the C. C. M. A., expressed his reasons for joining the society. He found that it did not in any way conflict with the Domestic and Foreign Missionary Society of Canada, but, on the contrary, it was recognized by that society and approved by the House of Bishops. All subscriptions are credited on the books of the D. and F. M. S.

Rev. Canon Richardson also spoke in favor of the sending of their own missionary, who would be under the protection of the Church Missionary Society. He alluded to the missionary work of Trinity and Wycliffe Coffeges and the blessings resulting therefrom He heartily approved of the formation of a society in connection with Huron College and having the co-operation of the lay workers as well as of the Clerical Association.

The report of the committee having been adopted, the following office-bearers were appointed: Honorary president, Rev. Provost Watkins, M.A.; president, Rev. Provost Watkins, M.A., president, Prof. F. T. Harrison, Phm. D.; secretary, Rev. G. B. Sage, B.A., B.D.; treasurer, Walter Crawford; editorial secretary, Harold Sutton; association secretary, E. B. Smith.

The following were named as local with power to add to their number: The officers, the clergy present, Messrs. Cronyn, T. H. Luscobe, C. H. Ar-Cronyn, T. H. Luscombe, C. H. Armitage, Judge W. Elliot, A. K. H. Pope, T. H. Farr, G. F. Jewell. On motion it was carried that the ame of the association be the Huron

Branch of the C. C. M. A. The dean expressed his hearty sympathy with the movement. At first he had doubted the propriety of establishing a branch here, but when he found that it had the approval of the bishops and did not conflict with the Domestic and Foreign Missionary Society, he had changed his views in that regard. The dean bore strong testimony to the excellent work of the society for the propagation of the Gospel in this country and elsewhere, and felt that the work of the different societies did not conflict. It was pointed out that four students of the college are now preparing for the foreign field, and there would be no tack of men if the means are forthcoming. After the provost, Rev. G. B. Sage, W. F. Brownlee and others had spoken words of encouragement, the usual thanks were tendered to the chairman and speakers, and the meeting adjourned

with a hymn and the benediction. CONGRATULATIONS

Accompanied by a Handsome Gift Mr. John A. Croden, the Recipient.

A pleasant event took place at the residence of Mr. John A. Croden, 281 Hill street, on Wednesday evening, when the staff of the R. S. Williams & Sons (Limited) gathered to congratulate him on his appointment to the responsible position of representative of their pipe organ department in Ontario, and to welcome Mr. J. W. Belcher to the position lately held by Mr. J. A. Croden, as manager of the London branch. The evening was spent in songs, social converse and games, during which the gathering was raked to come to order, when Mr. W. E. Collins stepped forward, and read the following congratulatory address, while Mr. Belcher made the presentation of a beautiful sterling silver and out glass writing service: "To John A. Croden,-We are met together with mingled feelings of pleasure and regret that you are about to sever your connections with use, in the capacity of manager, which you have so long and ably filled, with credit to yourself, and profit to the business. But these feelings of regret are in a measure lost sight of because of your future, which | close contests. looks so bright and hopeful. company, in their good judgment, have seen fit to call you to a more lucrative and larger sphere of labor. Having need of a good representative for their growing pipe organ trade, they have cast their eye over their large list of employes for a suitable person, and from the large army have selected you for the position, and we naturally feel proud that such a distinguished honor has been conferred on one of us. We will watch your upward progress with much interest, as we feel sure that while you are doing well for yourself, you will also bring great advancement to the house, with which we are connected. We cannot allow this occasion to pass without in a more tangible way demonstrating our appreciation of your uniform kindness in the past, and desire you, therefore, to accept this token of our

regard."
Mr. Croden was completely taken by surprise, but in his usual happy manner made a neat reply, thanking them for their kind expressions of appreciation and good wishes for the future. The gathering broke up at a late hour, and all agreed that Mr. Croden was a genuine entertainer, and his charming wife an ideal hostess.

*No score returned. At the conclusion of the match con siderable interest was created by the formal presentation to Major Hemming, the first winner thereof, of the handsome silver trophy presented to the club by Mr. John Labatt. The match for this trophy for the present year is now in progress, and is nearly approaching the stage of "semi-finals." It has already produced some

THE OCTOBER HANDICAP. The October handicap matches for silver button will begin on the 26th inst., and close on Nov. 4. Additional interest attaches to it from the fact that upon its results depend the winning of the cup presented by the captain, Mr. G. T. Brown, the contest for that prize at present resting in a tie between two of the play

of Old London.

Formed in Toronto.

St. Louis, Mo., Oct. 23.—The Republican this morning says: "A stupendous deal, involving a radical change in the proprietorship and system of operation of one of the most extensive in the world. city railway properties in the world, has been practically completed. An American syndicate has, it is said, secured control of the famous under-ground railways system of London, England. The syndicate was formed in Toronto, Ont., and Ross Mackenzie is at the head of it. Capitalists from New York, Philadelphia and other cities are also interested, and one of the heaviest investors is said to be a well-known St. Louis man whose name for the present is withheld. The precise amount of money called for in order to capture the British prize has not been ascertained."

Toronto, Oct. 22.—The story from St. Louis of a syndicate being formed to secure the franchise of an under-ground railway in London, England, was shown to Superintendent Gunn, of the Toronto Street Railway Company. He professed to know nothing of such a syndicate, and as the president of the company, Mr. William

Mackenzie, is on his way to England, nothing definite can be learned. For some time the rumor has been current that Mr. Mackenzie was negotiating for the franchise of an electric road in London, and his present trip across the ocean is believed to be in connection with the project. He is already interested in the Birmingham, England, Street Railway Company. The name Ross Mackenzie is evidently a misnomer for Ross and Mac-kenzie, both of whom are street rail-

Miss Fay Puzzles Another Large Audience-Will Return on Wednesday Evening Next.

The interest in Anna Eva Fay seems to grow by what it feeds on. Last night, her closing performance, the audience filled the Grand in every part, and was more mystified than ever. It has been the popular theory that Miss Fay secured duplicates of written questions by means of sympathetic paper passed around by her agents; that the duplicates were handed to her; and that she was enabled to read them unobserved, under the white sheet drawn over her head and body. Last night she dispensed with the sheet, and seated on a chair in the middle of the platform, in plain view of everybody, repeated correctly about 30 queries, written by people in the audience. If the above theory be true, her act can only be explained by attributing to her marvelous powers of

memory.
Dr. Niven, Mr. E. N. Hunt and Mr. the cabinet manifestations, and declared that Miss Fay was securely tied. Contrary to custom, they were permitted to release her hands after the exhibtion, and they found no broken or untied knots.

Miss Fay has an open date on Wednesday next, and will play a return engagement on that night.

What becomes of the American horses which are exported to Great Britain? The London Field says that there are almost as many American horses drawing cabs as there are

American tourists riding in them. For a long time past great numbers of American horses have been found in jobmasters' yards in that city, and it is during the last twelve months 200 American horses have been sold in London alone every week. They ere put to some kind of work, but, Pays the Field, "it is a great difficulty in tracing them." A certain number of them find their way into the hands omnibus proprietors, a great number still are absorbed in tram work; bmasters take some; but when these destinations are taken into account there is still an enormous number unaccounted for.

The Dairy Market. LINDSAY.

Lindsay, Ont., Oct. 22.-The dast 17 factories were represented, and offered 1,588 boxes of cheese; sales, 450 sell off the board. After some dis- ent. cussion it was agreed that the buyers be allowed 1 lb per box for shrinkage on all cheese shipped before Nov. 10. CANADIAN CHEESE TRADE.

Montreal, Oct. 23.-With the present ead of upward of 100,000 boxes over last year the Canadian cheese trade makes a good promise of leaving last season's business in the rear by a handsome margin. The year 1894 has heretofore stood as the cheese season par excellence with a record of exports of 1,726,058 boxes. If, however, the present rate of exports hold, which considering the rapidly increasing prices in the British markets it is more than likely, to do, even this pre-vious record will be excelled. It is hard to realize by the mere mention of the figures what 1,279,000 boxes of cheese really means. Placing the boxes in which these cheese were shipped side by side and reckoning the average diameter of each as sixteen inches, they would reach over a distance of 322 miles, a trifle more than twice the distance from this city to Quebec. Again, reckoning each cheese at 70 pounds, which is about the average, you have a total of 89,530,000 pounds, sufficient to give every soul in Canada, the United States and in Canada, the United States and informed that the London election Mexico one pound each and still have trial will be held at the Court House enough left to pass around in Central on Dec. 17, opening at 1 o'clock. America The largest shipment so far this

season on any one vessel was taken out on October 3 by the Allan Line steamship Montevidean, and was landed at London. This cargo amounted to 41,316 boxes, and was hay be stated in this connection that this vessel also holds the record for the largest cheese shipment ever sent out of this, and very likely, any other port. It consisted of 59,208 boxes, and left Montreal on September 28, 1892. On Aug. 24 the Montevidean sailed from this port for London with upwards of 30,000 boxes. Of this amoun the G. T. R. were shippers of 19.686

The prices this year up to within the past three weeks were far from satisfactory. In May and June, when the first shipments were sent out, the prices realized nearly 2 cents lower han at corresponding dates last year. Since that time, however, the market has gradually strengthened, and at the moment the prices for both eastern and western cheese is close onto 2 cents per pound higher than in October, 1895. This in a great measure will even up the low prices of the

Mrs. Kelly Meets Death While Collecting Money for Church.

Street-An Inquest to be Heid.

Found dead, peacefully reposing on gent street, just east of Adelaide, was the body of Mrs. John Kelly, one of known colored ladies of the city of two corresponding secretaries. It was London. News reached Coroner Flock about 5 o'clock this morning that the body of a dead woman was lying on buting \$25 be entitled to send one delethe side of the road, opposite Ferguson's brickyard. She was exceptionally the W. M. S. well clothed. Her dress and face were covered with the white frost, and she appeared to have fallen and had not had sufficient strength to raise her arms. Her jacket was buttoned, and

on the lapel of her coat was placed her collection book. In her pocket was found a small amount of money, and these articles were taken charge of by the coroner and Constable Northgreaves, who went to the scene.
An inquest has been called for at 7 cause of death and it will be held at Maitland streets.

The body was removed to her late home by the undertakers and placed upon a snow white bier.
Mrs. Kelly was a fine-looking woman and her friends say that two weeks ago she weighed 228 pounds. Her daughter Bertha was seen this afternoon, and said that her mother

had in all probability dropped dead. She had been afflicted with heart trouble for some time. Miss Bertha said her mother left the house about 10 a.m. yesterday to continue her collections for the new Zion Church. She was an enthusiastic church worker, and had left the distant places until the last. It was while returning from one of these that she is supposed to

have dropped dead. The father, Cornelius Butler, a former resident of Simcoe street, dropped dead about seven years ago and it is only about two months ago that her sister, Mrs. D. Clark, of Detroit, expired in a similar manner. Mrs. Kelly leaves a husband and two daughters, Bertha and Carrie.
Deceased was a member of Calanthe Lodge, in connection with the Oddfellows, and was also connected with the order of the Good Samaritan. She

Another Medical Missionary and Teacher for China.

At the third day's session of the managers of the Women's Missionary Society of Canada, in Brampton, the consideration of the case of Mrs. Large, returned missionary from Japan, occupied the whole of this morning's session and a great part of the

afternoon. Miss Cartmell and Miss Robertson, returned missionaries from Japan, both stated that the work there was suffering through Mrs. Large's absence, the former stating that she was worth two or three ordinary missionaries.

Mrs. Kendry and others protested against Mrs. Large being held here as a kind of hostage for the good behavior of two or three men who were not in harmony with the general executive. Finally, the following motion was carried: "Whereas, the General Society has communicated to this board its judgment that the time for Mrs. Large's return to Japan has not yet arrived, and whereas memorials from Japan and from two of our branches are urging in strong terms the advisability of Mrs. Large's immediate return, and whereas this board has never received from any of its agents any other but the most flattering testimonials of Mrs. Large's work, we desire to express our most serious embarrassment in the present situation of affairs, and that, inasmuch as we have no disciplinary power to act in the appointment without the con-

church.' A committee was appointed to wait on the general executive, and the whole question left to the discretion of the executive of the woman's board until the next board meeting. ent city was that Sabbath morning, with its pretty houses, shaded by trees, just turning green; its clear air, full of the grave, dilating harmony of the church bells; its quiet streets, thronged with men and women, both sexes dressed with a magnificence modern Broadway beaus and belles have nothing to compare with. What staid, dignified men in three-cornered hats and embroidered velvet coats and long plush vests! What buckles and wigs, and lace ruffles, and gold snuff wigs, and lace ruffles, and gold snuff boxes! What beautiful women in brocade and taffetas, in hoops and high heels, and gauze hats! Here and there a black-robed dominie, here and there a splendidly-dressed British offi-cer, in scarlet and white, and gold epaulettes and silver embroideries! New York has always been a highly

picturesque city, but never more so than in the restless days of A. D. 1775. Katherine and Hyde and Bram were together; Joris and Lysbet were slowly following them. They were none of them speaking much, nor thinking much, but all were very hap-py and full of content. Suddenly, the peaceful atmosphere was troubled by the startling clamor of a trumpet. It was a note so distinct from the music warning, that every one stood still. A second blast was accompanied by the rider came down Broadway like one on a message of life and death, and made no pause until he had very nearly reached Maiden Lane.

At that point a tall, muscular man seized the horse by the bridle, and asked-"What news?" "Great news! Great news! There as been a battle-a massacre at Lexngton-a running fight from Concord to Boston! Stay me not!" But as he shook the bridle free, he threw a hand the affair at Lexington, to the in-

quirer. Who then thought of church, though the church bells were ringing? The crowd gathered around the man with the handbill, and in ominous silence listened to the tidings of the massacre at Lexington, the destruction of stores at Concord, the quick gathering of the militia from the hills and dales around Reading and Roxbury, the retreat of the British under their harrassing fire, until, worn out and disorganized, they had found a refuge in Boston. "And this is the postscript at the last mo-ment," added the reader—"Men are pouring in from all the country sides; Putnam left his plow in the furrow, and rode day and night to the gound; Heath, also, is with him."

Joris was white and stern in his emotion; Bram stood by the reader with a face as bright as a bridegroom's; Hyde's lips were drawn tight and his eyes flashing with true military flame. 'Father," he said, "take mother and

Katherine to church; Bram and I will stay here-for I can see there is some "God help us! Yes, I will go to Him first," and taking his wife and daughter he passed with them out of the Hyde turned to the reader, who stood with bent brows, and the paper

"To the mayor's residence. He has the keys of the room in which the arms are kept." The news spread, no one knew how but men poured out from the churches and the houses on their route; and Willet's force was soon nearly a thousand strong. The tumult, the tread, the animus of the gathering was felt in that part of the city even where it could not be heard. Joris could not endure the suspense, and the service did him very little good. About 2 register. o'clock, as he was walking restlessly about the house, Bram and Hyde re-

turned together. "Well?" he asked. "There were five hundred stand of arms in the City Hall, and I swear that we have taken them all. A man called Willet led us—a hero, quick of thought, prompt and daring, a true

RODE TO DEATH. Providence, R. I., Oct. 22.-Charles Carr, a bicyclist, was instantly killed at East Greenwich as the result of a cart, and two of them passed over his body, crushing him to death. PRESIDENT CLEVELAND AT

PRINCETON. Princeton, N. J., Oct. 22.-The Philadelphia city troops escorted President Cleveland through the university grounds to Alexander Hall, where were assembled delegates representing institutions of learning all over the world, to participate in and witness the exercises of the sequi-centennial anniversary day of Princeton College. President Paten made the formal anouncement that what was formerly the College of New Jersey would hereafter be known as Princeton University. Degrees were conferred upon 65 men elected for that honor. Next came the address by the President of the United States. At its conclusion the entire assembly rose and sang "My Country, "Tis of Thee."

Rules for the Governing of Local Vendors.

Mr. Bell to be Appointed Inspector of Foods.

No Reduction in the License Fees - Dr. Hutchinson's Report of the Buffalo Convention.

The local Board of Health met in the old committee room last night, their business being the regulation of the important matter of milk peddling and inspection. Dr. Cl. T. Campbell, chairman, seated himself at the head of the table, those around him being, Messrs. Jas. Bowman, John Christie, John Heaman, Robert White, Dr. Hutchinson (medical health officer), and Inspector Bell.

Dr. Campbell explained that the meeting had been called to receive and consider the report of the special committee, appointed to draft a set of bylaws regulating the inspection of milk, and other matters relating to milk vendors. The committee-Mr. James Bowman and Dr. Campbellsubmitted the following report:

Your committee beg to report that we have delayed completing our la-bors awaiting the publication of certain regulations, which we understood were about to be issued by the Pro-vincial Board of Health. We find, however, that those regulations referred more exclusively to the inspection of animals and the testing for tuberculosis. While fully recognizing the advantages that would accrue from the application of the tuberculin test to every cow whose milk is sold in the city, yet we are of the opinion that for the present it would be sufficient to make a careful general in-spection of the herds accompanied by this specific test in all suspected cases. We have also considered the suggestions offered by the milkmen. We are of the opinion that no change can be made in the license fee, inasmuch as the statute limits it to the amount at present charged. Their proposition to have duplicate samples of milk taken in every case, it appears to us, would involve considerable trouble in its practical application; and the advantages gained thereby can be more easily obtained by the regu-

Every milk dealer shall be entitled to receive from the inspector the report on his milk as soon as the same has been made by the health of-ficer; if dissatisfied therewith he may enter a protest, in which cases the inspector shall, at a suitable opportunity, obtain samples of his milk and submit the same to the Dominion analyst. The dealer shall deposit with

6. When the health officer has doubts as to the health of any animals inspected, he shall report the same to the chairman of the Board of Health, who may thereupon send a veterinary surgeon to examine such animal in the manner prescribed in the regulations of the Provincial Board of Health, and report the result of such examination

to the chairman of the board. 7. Semi-annually the inspector and health officer shall report to the Board of Health the results of their inspec-tion of milk and dairies, classing the according to condition. shall report first those cases in which from any cause licenses should be withheld, or the dealer prosecuted. All others shall be arranged in three classes as to dairies, A. B and C; and three classes as to milk, 1. 2 and 3. In classes B and C will be entered those cases of lesser degree of perfection. Class 1 shall embrace all samples of milk bearing 5

percent and more of butter fat; class 2 from 4 to 5 per cent, and class 3 from 3 to 4 per cent.

Ten years ago the number of working boards of health could be counted on the fingers, while now there were 800 efficient boards. As a result of the stringent methods employed by the Buffalo Board of Health, the death-rate had been greatly reduced. Previous to the year 1891 the death-rate was about 20 in the thousand; in 1891 it was 23.48, but in 1895 it had been reduced to 13.95. He was pleased to say that as far as a good system of dairy and milk inspection went to-ward the lessening of sickness and the death-rate, London had been the first city or municipality in Canada—and city or municipality in Canada—and he believed it to be the first city in America—to adopt a regular and efficient system. These was not much danger of contracting consumption through eating the fiesh of a cow discussed with the regularies if the most eased with tuberculosis, if the meat were properly cooked. In Buffalo the animals were examined by a Government inspector at the claughter house and if condemned as unfit for food they were consigned to the rendering works. Consumption had been placed upon the list of infectious diseases by many of the State boards of health. A paper had been read by Dr. Wood-burn, of Cleveland, showing that ty-phoid fever during the last three years Typhoid fever was a water-born disease, and to a supply of pure water they must look to stamp out the disand discussed at the convention, dis-seminating a great deal of valuable knowledge concerning the best methods of preserving the public health.

CATCH QUESTIONS. Very simple questions will some-times find wise men napping. If a goose weighs ten pounds and half its own weight, what is the weight of the goose? Who has not been tempted to reply on the instant, "Fifteen pounds"? The correct answer being, of course,

twenty pounds. The following catches are even simpler, yet many have been puzzled by How many days would it take to cut up a piece of cloth 50 yards long, one yard being cut off every day? A snail climbing up a pole 20 feet high, ascends 5 feet every day, and slips down 4 feet every night. How long will the snail take to reach the top of the post? It is scarcely necessary to point out that the answer to the first question

is not 50 days, but 49; and to the second, not 20 days, but 16-since the snail, who gains one foot each day top of the pole and there remains.

An Aching Back.

The kidneys cannot talk, and the only way they have of letting us know when they are sick is by making our backs ache. It it is only a little ache the kidneys are only a little sick. If it is a big peace-destroying, nerve-racking ache the kidneys are more than a little sick. In either case it just be attended to at once.

Doan's Kidney Pills act directly on the kidneys, make them strong and healthy, stop aching backs in every case. Here is a sample case. Mr. Charles M. Allen, 412 Richmond street, London, Bank of Comnerce Building says:

"I have been ailing for the past eight months with kidney troubles. I had severe pain across the back and between the shoulders, neuralgic pains across my eyes, so much so that I thought something was the matter with my eyes that would com-pel the use of spectacles. I felt unnaturally tired and weak all the time, seemed to have no ambition, my head felt heavy and my sleep was poor; I did not rest; sometimes I could not sleep one hour all night. The urine was red-colored and unnatural in flow,

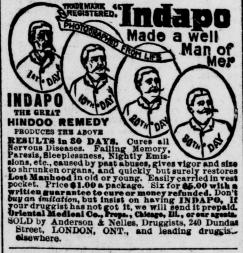

and I had scarcely any appetite. I felt really miserable day in and day out. "The one box of Doan's Kidney Pills, which I got at Strong's drug store gave immediate relief from all depressing troubles. I am now free from all of the errible symptoms which afflicted me. I feel plendid, have vigorous health, have gained four pounds in weight, and am certain that no other remedy could have produced the effect which Doan's Kidney Pills have in my case, for I had previously tried almost every other semedy on the list.

The Ladies' Aid of the First Congregational Church raised \$50 by a unique method last night. They held "Birthday Party" in the schoolroom of the church, to which no admission fee was charged, but each was expected to give a cent for every year of his or her age, on the assurance of absolute secrecy. Rev. J. W. Pedley, who presided, introduced a fine programme. Solos were given by Miss Aggie Templeton, Miss Jean McLeod, Mr. Frank Firth, Mr. E. J. Forsythe, and Mr. W. Brock; instrumentals by Miss Lily Holt, Mrs. Chap-

and Miss Strongman. Refreshments were added. "FAUST" AT THE GRAND TO-

NIGHT. The production of Goethe's "Faust." with which John Griffith, the young Canadian actor, will open his engagement at the Grand Opera House this evening, is familiar to local theater-goers. Not so with his prewas operating a lathe on Wednesday, sentation of "Richard III.," which is when a piece of steel flew out and the bill for Saturday night. Mr. John Griffith is a young actor who believes that "what is worth doing is worth doing well," and he has spared no pains or expense to excel all previous crooked-back tyrant, Mr. Griffith has displayed great daring, and in a measure broken down the barriers of tradition, giving an original conception of the character, and introducing some new and startling ideas in the way of "business." "Richard III." has always been the most acted piece, and the most popular of the immortal bard's many plays, and, as has been ductors report that quite frequently they have thouble with passengers between Glencoe and London with a stage, and the closet."
