SCOTT, WALTER—Assiniboia, W.
TAYLOR, GEO.—Leeds.

Chairman:—H. GERVAIS—Montreal, St. James.

House of Commons Debates

FIRST SESSION—TENTH PARLIAMENT

HOUSE OF COMMONS.

WEDNESDAY, January 11, 1905.

To-day being the first day of the meeting of the first session of the Tenth Parliament for the despatch of business.—Thomas Barnard Flint, Esquire, LL.D., D.C.L., Clerk of the House of Commons, and Lieut.-Col. Henry Robert Smith, Serjeant-at-Arms, commissioners appointed by Dedimus Potestatem for administering the oath to members of the House of Commons, all attending and according to their duty, Henri G. LaMothe, Esquire, Clerk of the Crown in Chancery, delivered to the said Thomas Barnard Flint, Esquire, a Roll containing a list of the names of such members as had been returned to serve in this parliament.

The aforesaid commissioners did administer the oath to the members who were present, which being done, and the members having subscribed the roll containing the oath, they repaired to their seats.

The Clerk of the House said: I have the honour to inform the House that I have received the following communication from the Secretary of His Excellency the Governor General:

Ottawa, December 28, 1904.

Sir,—I am directed by His Excellency the Governor General to inform you that the Chief Justice of Canada, in his capacity as Deputy Governor, will proceed to the Senate Chamber to open the session of the Dominion parliament on Wednesday, the 11th proximo at 3 o'clock p.m.

I have the honour to be, sir,
Your obedient servant,
(Sgd.) J. HANBURY-WILLIAMS, Colonel.
Gov. Gen.'s Secretary.

The Clerk of the House of Commons.

A message was delivered by Ernest John Chambers, Esquire, Gentleman Usher of the Black Rod:

Gentlemen of the House of Commons:

His Honour the Deputy of His Excellency the Governor desires the immediate attendance of this honourable House in the Chamber of the honourable the Senate.

Accordingly the House went up to the Senate, when the Speaker of the Senate said:

Honourable Gentlemen of the Senate:

Gentlemen of the House of Commons:

I have it in command to let you know that His Excellency the Governor General does not see fit to declare the causes of his summoning the present parliament of Canada until the Speaker of the House of Commons shall have been chosen according to law; but, to-morrow, at the hour of three o'clock in the afternoon, His Excellency will declare the causes of his calling this parliament.

And the House being returned.

ELECTION OF SPEAKER.

Rt. Hon. Sir WILFRID LAURIER (Prime Minister). Mr. Flint, the first duty which devolves on this House at the opening of this new parliament is to at once proceed to the election of a Speaker. I need hardly remark that the position of Speaker of this House, under our parliamentary system of government, is second to none, is, in fact, equal to the highest in the gift of either the Crown or the people. In the first place, the Speaker of the House of Commons is the channel of communication between the House and the Crown; he is the mouthpiece of this assembly; and, in the olden time, in the earlier parts of the history of the motherland, when the relations of the Crown and parliament were not as clear and as well defined as they are at the present moment, this part of the duties of the Speaker was of paramount importance. But we live in calmer and happier days, and the duties which the Speaker performs in this line are, we may say, only perfunctory. But, on the other hand, the duties which the Speaker has to perform as presiding officer of this House have increased importance. These duties require special qualifications which it is not always easy to find combined in the same person. In the first place, it is expected of him who fills this chair that he shall be of a mind at once judicial and fair, that both sides of the House and all parties may expect at his hand a uniform and fair treatment. It is expected of him also that he shall be well versed in parliamentary law. I have to submit to the House that in our judgment, and I believe in the judgment of all, Mr. Robert Franklin Sutherland, member for the north riding of Essex, is well qualified in all

these respects to fill the office of Speaker. The members of the present House who were his colleagues in the last parliament will agree with us, I believe, that we can fairly trust that in his hands the good traditions of the House of Commons as they have come to us from the motherland, as we endeavour to maintain them in this country, will be well preserved. I, therefore, beg to move, seconded by Sir William Mulock :

That Robert Franklin Sutherland, Esquire, member representing the electoral district of the north riding of the County of Essex, do take the Chair of this House as Speaker.

Hon. GEORGE E. FOSTER (North Toronto). No one can find fault with the definition of the duties of the Speaker as laid down by my right hon. friend who has made the motion (Sir Wilfrid Laurier). The prime duty of the selection rests, of course, upon my right hon. friend (Sir Wilfrid Laurier), and I have no doubt that he has exercised his best judgment in selecting for the position a gentleman who fulfils his high definitions and ideals of this most important office. Personally, I have not had the pleasure of the acquaintance of the hon. gentleman who has been proposed, but I have been told by my colleagues on this side of the House that they consider him to be a gentleman who, by his independence and from their knowledge of him, will be one who will maintain the high traditions which have so long obtained, and which we trust will for ever obtain in this chamber. Under these circumstances, and with these ideals of the hon. gentleman, I can only say that this side of the House will give every reasonable support to the Speaker who has been selected, and hold up his hands in every way, so long as he carries out the high duties of that office, as I have no doubt he now intends to do.

Sir WILFRID LAURIER. Hear, hear.

Mr. FOSTER. The discipline and the dignity of this chamber are in the hands of His Majesty's loyal opposition in common with the gentlemen on the other side of the House, and we are as anxious to have them maintained as they are.

The motion being put to the House,

The Clerk of the House (Mr. T. B. Flint) declared the motion carried in the affirmative nemini contradicente; and Robert Franklin Sutherland, Esquire, member for the north riding of Essex, duly elected to the Chair of the House.

Mr. Sutherland was conducted from his seat in the House to the Speaker's chair by Sir Wilfrid Laurier and Sir William Mulock.

Hon. ROBERT FRANKLIN SUTHERLAND (Speaker-elect). Gentlemen of the House of Commons, I desire to express to you my sincere thanks for the honour you have conferred on me by electing me to the high position of Speaker to preside over your deliberations. No one can appreciate more highly than do I the honour of this selection. No one, on the other hand, can be more diffident than myself as to my capacity to discharge the duties of the office. At the outset I am very inexperienced, as you are aware, but I trust that that inexperience will in itself be met by your cordial feeling towards me, and that for a time at least I shall be permitted to occupy this position with kindness from both sides of the House. With your aid and co-operation I feel well assured that we will be able to vindicate our rights and privileges according to our established rules and usages, preserve that freedom of speech which is at the foundation of liberty, and at the same time maintain the dignity and decorum of such an assemblage as this. I need hardly say that I enter upon the duties of the office with a full desire to be impartial as between the two sides of the House.

May I be permitted, without at all desiring to suggest to the House that my knowledge of the language enables me to make a speech therein, to attempt to say a few words in French :

(Translation.) Hon. gentlemen, the French language being more familiar to a large number of members of this House, as also to a considerable number of electors in the constituency which I have the honour to represent here, I am glad to be able to tender to you in that language my sincere and grateful acknowledgments for the honour which has just been conferred upon me. Let me add that, with your co-operation and the aid of my English speaking friends, I will endeavour to discharge the duties of that exalted function with all the zeal and devotedness within my power.

The Serjeant-at-Arms then placed the Mace on the Table of the House.

On motion of Sir Wilfrid Laurier, House adjourned at 3.30 p.m.

HOUSE OF COMMONS.

THURSDAY, January 12, 1905.

The SPEAKER took the Chair at Three o'clock.

Mr. Speaker communicated to the House the following letter which he had received :—

Office of the Governor General's Secretary, Canada.

Ottawa, January 11, 1905.

Sir,—I have the honour to inform you that His Excellency the Governor General will proceed to the Senate Chamber, to formally open the first session of the tenth paliament of the

Dominion of Canada, on Thursday, the 12th instant, at 3 o'clock p.m.

I have the honour to be, sir,
Your obedient servant,
J. HANBURY-WILLIAMS, colonel,
Governor General's Secretary.

The Honourable
The Speaker of the House of Commons.

A message was delivered by Ernest John Chambers, Esq., Gentleman Usher of the Black Rod :

Mr. SPEAKER,--I am commanded to inform you that His Excellency the Governor General desires and awaits the attendance of your honourable House in the Senate Chamber.

Accordingly the House went up to the Senate Chamber.

Then the Hon. Robert Franklin Sutherland, Speaker elect, said :

The House of Commons has elected me their Speaker, though I am but little able to fulfil the important duties thus assigned to me. If, in the performance of those duties, I should at any time fall into error, I pray that the fault may be imputed to me, and not to the Commons, whose servant I am, and who, through me, the better to enable them to discharge their duty to their King and country, humbly claim all their undoubted rights and privileges, especially that they may have freedom of speech in their debates, access to Your Excellency's person at all seasonable times, and that their proceedings may receive from your Excellency the most favourable consideration.

The hon. the Speaker of the Senate then said :

I am commanded by His Excellency the Governor General to declare to you that he freely confides in the duty and attachment of the House of Commons to His Majesty's person and government, and, not doubting that their proceedings will be conducted with wisdom, temperance and prudence, he grants and upon all occasions will recognize and allow their constitutional privileges.

I am commanded also to assure you that the Commons shall have access to His Excellency upon all seasonable occasions, and that their proceedings, as well as your words and actions, will constantly receive from him the most favourable construction.

Then His Excellency the Governor General, was pleased to open parliament by a speech from the Throne.

And the House being returned to the Commons Chamber.

Mr. SPEAKER. I have the honour to state that the House, having attended on His Excellency the Governor General in the Senate Chamber, I informed His Excellency that the choice of Speaker had fallen on me, and, in your names, and on your behalf, I made the usual claim for your privileges, which His Excellency was pleased to confirm to you.

FIRST READING.

Bill (No. 1) respecting the Administration of Oaths of Office.—Rt. Hon. Sir Wilfrid Laurier (Prime Minister).

1½

THE SPEECH FROM THE THRONE.

Mr. SPEAKER. I have the honour to inform the House that when the House did attend His Excellency the Governor General this day in the Senate Chamber, His Excellency was pleased to make a speech to both Houses of parliament. To prevent mistakes, I have obtained a copy, which is as follows :

Honourable Gentlemen of the Senate :

Gentlemen of the House of Commons :

I desire on this occasion to asure you how sensible I am of the great honour conferred on me by the King, in appointing me to the distinguished position of Governor General.

My pleasure in being called upon to represent His Majesty in the Dominion has been heightened by the cordial welcome I have received on all sides and from all classes.

This favoured land, with its vast resources and improving facilities for transportation, is attracting people on an ever ascending scale, not only from the United Kingdom, but also from the United States and from many other countries.

As the opportunities for settlement under the advantageous conditions which exist are better known, this Dominion will become the home of an increasing number of happy and contented people, whose character and prosperity will add strength to the great empire of which you are so important a part.

It is gratifying to note that the trade of the Dominion, which in recent years has so steadily increased, is not diminishing, the aggregate trade for the last fiscal year being the largest on record. The revenue for the past six months is also greater than for the corresponding period of the preceding year.

On the invitation of the President of the United States, my government has joined in the formation of an international commission composed of three representatives from each country to investigate and report upon the conditions and uses of the waters adjacent to the boundary line between the United States and Canada, and to make such recommendations for improvements and regulations as shall best subserve the interest of navigation in said waters.

The rapid growth in the population of the Northwest Territories during the past two years justifies the wisdom of conferring on these territories provincial autonomy. A bill for that purpose will be submitted for your consideration.

The surveys necessary for the location of the line of the National Transcontinental Canadian Railway are being vigorously prosecuted, and it is confidently believed that tenders for the

construction of several sections may be invited during the coming season.

The display of Canadian products made last year at the St. Louis Exhibition proved such a marked success in attracting emigrants to the western prairies, that it is proposed to accept the invitation of the government of Belgium to send samples of our products and manufactures, to the exhibition to be shortly held at Liège.

Gentlemen of the House of Commons :

The accounts of the last year will be laid before you. It will be satisfactory to you to learn that the expenditure has been less than the revenue, leaving a surplus over all charges.

The estimates for the coming year will be submitted at an early date ; they have been prepared with a due regard for economy consistent with the development of the resources of the Dominion.

Honourable Gentlemen of the Senate :

Gentlemen of the House of Commons :

I invite your best attention to the subjects I have mentioned and invoke the Divine blessing on your deliberations.

Right Hon. Sir WILFRID LAURIER moved :

That the speech of His Excellency the Governor General to both Houses of Parliament of the Dominion of Canada, be taken into consideration on Monday next.

Motion agreed to.

SELECT STANDING COMMITTEES.

Sir WILFRID LAURIER moved :

That select standing committees of this House for the present session be appointed for the following purposes :—1. On Privileges and Elections. 2. On Expiring Laws. 3. On Railways, Canals and Telegraph Lines. 4. On Miscellaneous Private Bills. 5. On Standing Orders. 6. On Printing. 7. On Public Accounts. 8. On Banking and Commerce. 9. On Agriculture and Colonization,—which said committees shall severally be empowered to examine and inquire into all such matters and things as may be referred to them by the House ; and to report from time to time their observations and opinions thereon ; with power to send for persons, papers and records.

Motion agreed to.

Sir WILFRID LAURIER moved :

That a special committee of five members be appointed to prepare and report with all convenient speed a list of members to form the select standing committees ordered by this House this day, such select committee to be composed of the following members :—Sir Wilfrid Laurier, Mr. Foster, Sir William Mulock, Mr. Hyman and Mr. Haggart.

Motion agreed to.

The SPEAKER.

REPORT PRESENTED.

Report of the Joint Librarians of parliament—Mr. Speaker.

ADJOURNMENT TO MONDAY.

Sir WILFRID LAURIER moved the adjournment of the House.

Hon. GEO. E. FOSTER (North Toronto). Are we to meet to-morrow, or not until Monday ?

Sir WILFRID LAURIER. We should meet to-morrow, but I suppose there is not much object in doing so.

Hon. JOHN HAGGART. Why not adjourn until Monday ?

Sir WILFRID LAURIER. I did not move that because I wanted to see what were the wishes of my hon. friends on the other side of the House. I did not move that the address be taken up to-morrow, because Friday is a rather inconvenient day, as many members wish to get away. I move that the House when it adjourns to-day, stand adjourned until Monday next.

Mr. FOSTER. Before the motion is put, will my right hon friend inform the House, or myself particularly, when he expects the Minister of Finance to be in his seat ?

Sir WILFRID LAURIER. I do not expect the Minister of Finance to be in his seat until the end of the month.

Motion agreed to, and House adjourned at 3.45 p.m.

HOUSE OF COMMONS.

MONDAY, January 16, 1905.

The SPEAKER took the Chair at Three o'clock.

INTERNAL ECONOMY COMMISSION.

Right Hon. Sir WILFRID LAURIER (Prime Minister) delivered a message from His Excellency the Governor General.

Mr. SPEAKER read the message, which was as follows :

The Governor General transmits to the House of Commons an approved Minute of Council appointing the Honourable William Stevens Fielding, Minister of Finance, the Honourable Louis Philippe Brodeur, Minister of Inland Revenue, the Honourable Charles Smith Hyman, Acting Minister of Public Works, and the Honourable Henry Robert Emmerson, Minister of Railways and Canals, to act with the Speaker of the House of Commons as commissioners for the purposes and under the provisions of the 13th Chapter of the Revised Statutes of Canada, intituled 'An Act respecting the House of Commons.'

FIRST READINGS.

Bill (No. 2) to amend the Railway Act of 1903.—Mr. E. A. Lancaster.

Bill (No. 3) to amend the Act respecting Certificates to Masters and Mates of Ships. —Mr. E. A. Lancaster.

Bill (No. 4) to amend the Railway Act of 1903.—Mr. W. F. Maclean.

CONTROVERTED ELECTION—LISGAR.

Mr. SPEAKER. I have the honour to inform the House that I have received from the registrar of the Supreme Court of Canada a judgment of the said court in the matter of the appeal from the Lower Court respecting the controverted election for the electoral district of Lisgar, declaring that the said petition had abated consequent upon the dissolution of the parliament to which the respondent in the said case had been elected.

ADDRESS IN ANSWER TO HIS EXCELLENCY'S SPEECH.

The House proceeded to the consideration of His Excellency's speech at the opening of the session.

Mr. E. M. MACDONALD (Pictou). Mr. Speaker, permit me, before proceeding to discuss the motion which I am about to make, to extend to you my congratulations, and I may say also the congratulations of this House, upon your elevation to the honourable position of first commoner of this Dominion of Canada; and the evident expressions of satisfaction and confidence in your appointment which have come from all quarters indicate the belief that you will fill that honourable position with honour to yourself and in keeping with the manner in which the distinguished men who have gone before you have filled it in previous parliaments. I desire, Mr. Speaker, to move that an humble address be presented to His Excellency in reply to the speech with which he has been pleased to open this session of parliament; and, I may be permitted first to express to the right hon. gentleman who leads this House my appreciation of the high honour he has paid to me in committing to me the task of making this motion. You will also permit me to say that I believe that honour is not one intended for myself personally, but rather for that famous and historic county which I have the honour to represent, and which to-day for the first time in a great many years has seen fit to extend its confidence to the distinguished gentleman who leads this House. Permit me also, sir, to ask from this House that consideration which always in the past has been freely extended to hon. gentlemen who venture to address it for the first time, as I am doing to-day.

Coming to the address, Mr. Speaker, I am sure that this House and this country generally, will reciprocate, His Excellency's expression of satisfaction upon his appointment as Governor General of Canada. The expressions upon public questions and the evident intelligent appreciation of the importance and greatness of this country, which have marked the utterances of His Excellency both in the mother country and since he has come to Canada, have warranted the cordial welcome with which he has already been received, and bespeak an equal reception from all classes of our people and from all parts of the country when His Excellency visits them in the performance of the duties of his office.

Let me say at once that it is evident the speech with which this parliament has been opened is one optimistic in every line. It indicates the happening in Canada of a number of new events. First, we have the advent of a new Governor General. Then the speech announces the inauguration of a new railway. Next in order we have the announcement of the creation of a new province and the coming into Canada of a new and large population, in fact, the general tone of the speech is essentially cheerful as befits the declaration of a government and a people who have confidence in themselves, who appreciate the vastness and greatness of the resources of the country, and who are full of self reliance and of hope in the future as being teeming with promise.

Let me say at the start that I do not propose to weary the House with any figures regarding trade returns, because these can easily be obtained from the blue-books, but, it must be eminently satisfactory to know that the trade increases which have characterized every step of our career during the past eight years show no signs of diminution but rather of continued steady improvement. Those among us who have been frightened by the bogey of an adverse balance of trade will be glad to hear that in the month of December last, the exports of Canada exceeded by two million dollars the exports during the same month of the previous year, and the additional fact that our revenue shows continual growth must of course be a matter of the greatest possible satisfaction to all. Then, with regard to surpluses, it would indeed be a great disappointment if the speech from the Throne did not, as it has done during the past eight years, announce an increase in that respect also. All signs point to the fact that the Canadian people are weary of discussions on theories of political economy. For a great number of years some hon. gentlemen have fancied that there was some virtue in the assertion of this or that or the other theory of political economy, but the business people of Canada have come to accept the idea that the making of a tariff is a business proposition and calls for dealing with conditions and not theories, and, as a consequence the tariff requires to be adjusted

practically so as to suit the needs and interests of the country from time to time. By a large majority the Canadian people, not so long ago, gave evidence in a manner so marked, so decidedly expressed, that no one can gainsay it of their confidence in the ability of this government to deal with the question of the tariff along the lines I have indicated.

Another item of great interest to our people is the announcement in the speech of the appointment of a commission to act with one similarly appointed by the United States government with regard to the preservation of the rivers and other waterways which are common to the two great countries. That is a declaration which I am sure, in this land of mountain and the lake, and this land of rushing rivers, this land in which our immense water-powers and waterways are destined to fill so important a place is one which will be welcomed by the House; and the labours of that commission which was originated by an Act of Congress passed in 1902, will no doubt be watched throughout this country with deep interest and I am confident will result in good to both nations. No one will gainsay the statement that Canadians generally regard the maintenance of friendly relations with the great English speaking people to the south of us as of prime importance, and without exception hope that the time will never come when those friendly relations may in anyway be impaired or unsettled; but while that is the case, and while we are prepared to discuss with them such matters of common interest as I have mentioned, I am sure that we all cordially endorse the declaration of the right hon. the First Minister that we will send no more delegations to Washington just now, to look for trade favours. We have now reached that stage when we have become self-reliant and confident in our own resources and great future. We have implicit reliance in the capabilities of Canada, and while prepared to favourably consider any proposition in the interests of both countries, looking towards an improvement in our trade relations, we do not feel disposed to-day to send any more delegations on the question of reciprocity.

The policy announced in the speech of granting provincial autonomy for the Northwest Territories marks an important epoch in our history. It is thirty-four years ago since the province of Manitoba was admitted into confederation and given all those rights, and that status in the federation which is enjoyed by every province in the Dominion, and at this moment it may be opportune to indulge in a retrospective glance and recall some of the advances and developments that have occurred since confederation. Thirty-eight years ago when confederation was established it embraced but four provinces and covered a territory stretching between Lake Superior and the sea. Each one of these provinces was then imbued mainly by local prejudices and limited by provincial aspirations. Each one was unacquainted with the other. There was no common tie save that of the constitution which bound them together. Our total trade then amounted to but one hundred and thirty one million dollars. Our railway mileage was but two thousand miles and our postal revenue but one million dollars. Our bank deposits amounted to but thirty-eight million dollars, and our people generally had but a limited appreciation of the resources and possibilities then awaiting development. Our outlook was purely provincial and the aspirations and ideas of our people were almost exclusively limited by the boundaries of the provinces in which they lived. It is but just to bear tribute to the foresight of that great statesman who presided at the inception of Canada's birth and who watched over this country when in her swaddling clothes. We can all, irrespective of party, regard him as one who did great things for Canada and whose name will always be embalmed in the history of this Dominion. In 1870, when the Northwest was a seething mass of rebellion and discontent, the Territories were brought into confederation. In 1871, British Columbia entered the union. In 1873 the little island of Prince Edward followed her example and in 1875 the Northwest was placed under the jurisdiction of a lieutenant governor. Then in 1880 all the British possessions in North America were placed under the Dominion of our federal parliament with the exception of Newfoundland. Then followed the construction of the Canadian Pacific Railway, which bound all the provinces together and gave to the eastern provinces a common interest in the western heritage, and gave birth to that newer patriotism which has shown such rapid development in the last few years. Following the building of this railway, came new settlements. From all portions of the habitable globe came settlers into this new country, so that no less than three hundred and twenty-four thousand eight hundred and ninety-eight people during the past four years have gone into this new land—a number exceeding the population of some of our provinces and equalling that of others. When we stop to consider the fact also, that during the past four years 94,791 homesteads have been taken up in that country, we can form some conception of the rapidity of its growth. In those western territories, which are to be given provincial autonomy, there exists a country which exceeds in extent the countries of France, Germany and Italy taken together. This is indeed a precious heritage, this great Northwest land, which to-day forms part of our territory and in which we are about to inaugurate a system of government which will place that country on an equal footing with the other provinces in confederation. Realizing the advantages which Canada offers to new settlers, we have men from all lands and every clime taking up homesteads in that vast territory, where they will enjoy constitutional rights and privileges from

which they are debarred in lands from which they come.

The making of this new province, or these new provinces, as the case may be will establish a continuous line of provinces from sea to sea, and will, to a certain extent, round off confederation. As a result of this growth which I have but roughly outlined, a great change has been coming over Canada. Our outlook has widened during the thirty-eight years that have gone. We have ceased to view matters from a provincial or narrow point of view; our outlook has become a Dominion, a continental one. And, especially during the last eight years has this development gone on in so remarkable a degree that I may be pardoned for referring to it. One of the advantages of this marked advance of the last eight years is that old race and creed issues have been forgotten, and from sea to sea men do not now stop to consider those things, but we realize in a way we never did before that we are Canadians one and all. There is coming to Canada, but more particularly to young Canada, a realization of the great resources and extent of our country which was not present with us even a few years ago. When we recall that, in Canada we have an area that is more than one-third of the whole British empire, and as that idea has permeated the whole life of our people, there has grown a patriotic pride and a feeling of interest in and devotion to our country which, in other nations and in other times, it has required the stern teaching of war to evoke. And our pride in our institutions, in our literature, in our rapid growth in national life, has been enhanced by our faith in our country's resources, and by a realization of the fact that during the past eight years our trade increase has exceeded that of every other country in the history of the world. I have already given some figures showing our position at the time of confederation. To-day, our railway mileage exceeds 20,000 miles; our postal revenue is over $6,000,000 a year; the deposits in our banks instead of being $38,000,000, as they were thirty-eight years ago, are close upon $600,000,000. Once these facts are realized, we contemplate the position of Canada with growing exultation and pride. We realize that here in Canada, we have all the elements by which we may become the great flour, paper, cheese, butter and provision producer, as well as the great woodenware manufacturing centre of the world. These natural conditions are beginning to be appreciated, and are certain of early exploitation. But our outlook widening, as it has been on the federal and continental side, looks also toward the imperial field; and I am proud to say that I believe there is not in Canada any desire for any other future than in connection with the great empire to which we belong. At the same time, we should remember that he who would artificially or unnaturally hasten the solution of the problem of our future relations to the empire may create the worst stumbling block in the way of reaching the end which he desires to see attained. There are those who are accustomed to say that Canada has done nothing towards paying her debt of gratitude to the empire. I think they forget the efforts that have been put forth by Canada, and the help that has been rendered by Canada in constructing already one great transcontinental line and preparing for the immediate construction of another. The first of these already has been, and both of them must be, tremendous factors in binding the empire together, whether in peace or in war. In addition to that, Canada has shown herself, by her attitude at the time of the South African war, to be ready to stand by the empire in the hour of national necessity. We are going on with the inception of a Canadian navy—a small navy it may be, but we are moving along the proper line by arranging that when Canada spends her money on behalf of the empire she shall oversee that expenditure. It may be true—it is true—that Canada must make some sacrifices in order that the problem of the empire may be solved. Those of us who believe in imperial connection and the future of the empire are ready that these sacrifices should be made. At the same time, Canada's interests must be guarded, and there must be corresponding sacrifices in every other part of the empire, in order that a harmonious and a successful future may be assured.

The next paragraph of the address to which I will refer announces that satisfactory progress has been made in carrying out the policy of a national transcontinental railway which was approved by parliament two years ago and reaffirmed last session.

I am sure that hon. gentlemen opposite appreciate to-day, perhaps more even than they did in the past, the great importance to Canada of carrying to a successful issue the construction of this great railway. It is only fair to say that, although some of these hon. gentlemen, at the inception of this proposition, were disposed to combat the idea that the new Transcontinental Railway was necessary, at the conclusion of the discussion of that question, they frankly admitted that it was a good thing to have the new railway. But they interjected into the discussion a proposition which was utterly opposed to all the traditions of their party, when they suggested the government ownership and operation of that railway. To-day, I am sure, they will join with us in the satisfaction we all feel in learning that a great many of the difficulties that were expected in the inauguration of this enterprise are rapidly disappearing. Thus, we were told that the country through which the railway is to pass between Quebec and Winnipeg was a country of muskeg and stunted poplar. I am

advised upon authority which I deem to be the very best, that the investigations made by the surveyors who have gone through that country justify entirely different conclusions. The reports indicate the existence there of splendid pine forests, fertile agricultural lands, mineral fields of a great variety and richness, and a most important factor under modern conditions—water-powers of the greatest value. In a few weeks, I am advised, almost every foot of the line from Winnipeg to Moncton will be covered by surveying parties. Already a great portion of that territory has been traversed and the route for the railway ascertained. We were told that the eastern section of this railway was one which should not be built;—whatever advantage there might be in building the other portion of the Transcontinental Railway this eastern portion should not be undertaken. I am sure that, on reflection, hon. gentlemen who represent the western portion of Canada, animated as we know them to be quite as much as we who come from other portions of the Dominion, with a desire to make this a self-contained country, would not for one moment hesitate to declare that it will never do for our National Railway to be cut off for six months of the year from a connection through our own country with our own seaports; and I am sure that they will hear with satisfaction the information which I am in a position to say, is authentic, that the engineers who have been making the surveys from Quebec to Moncton have found not the slightest difficulty thus far in locating the line. The grades and other features are such as to assure the construction and operation of the line in that section under the most advantageous conditions. I am sure that the announcement will be received with satisfaction that the surveys are being vigorously prosecuted, and that it is believed that tenders for the construction of several sections may be invited during the present season. Because, as the days roll on, it will be found in the years to come, that this Transcontinental Railway will open up for us a new empire to the north, and that in ten or perhaps twenty years hence this parliament will be occupied in legislating for the inauguration of a new province in that northern country, the addition of another entity to this federation to which we belong.

The announcement that the government propose to send exhibits of our products to the exposition which is to be held in Belgium, is one which I am sure, in view of the success which has attended in the past the efforts of the Agricultural Department in that direction, will be received by the whole House with satisfaction. I did not have the opportunity, except from studying the various reports which have been made in regard to the great exhibition in St. Louis, of judging of the character of the Canadian exhibit, but I believe I am in the judgment of the House in saying that Canada did well there, that her exhibits were well set forth, and that the educative result of the efforts which were put forth on behalf of Canada, more than warrants the expenditure that has been made, and has given great satisfaction to those Canadians who visited that exhibition. I am sure that in the exhibition which will be held in the Low Countries, among a class of people to whom Canada should look with deep interest for immigration, a similar success will attend the efforts of the Agricultural Department, as has marked their efforts in the various other expositions where Canada has been represented.

Now, Mr. Speaker, I do not propose to detain the House at any great length. But before I conclude, I would like to be permitted to recall one or two facts to the memory of the House. Sir, thirty-eight years ago there came to this House, in the first parliament of Canada, from the province from which I have the honour to come, seventeen out of the eighteen members who then represented Nova Scotia in this parliament, who objected that Nova Scotia had not been treated fairly in laying down the terms of confederation. Only one gentleman came from Nova Scotia who took the opposite view. That gentleman has played a great part in the history of Canada; he was prominent among hon. gentlemen opposite, and at one time he was their leader, as premier of this country. We have sent to this parliament in the intervening time other hon. gentlemen who have led our friends on the other side of the House, one of whom filled with distinction the important post of premier of this country; and we have also given our friends on the other side another hon. gentleman who has led them in opposition. But to-day we come to this parliament from Nova Scotia, animated by very much higher and nobler motives; we come here eighteeen strong, united behind the hon. gentlemen who fill the distinguished posts of Minister of Finance and Minister of Militia and Defence of this country; we come here unanimously supporting the greatest colonial statesman in the empire. We come here to support him who, for sixteen years, has led the great party to which we belong, who found it to some extent disorganized, but who has bound it together with the strongest ties of sentiment and patriotism, and have made it the greatest party Canada has yet seen; we come as followers of the right hon. gentleman who during the eight years he has been Prime Minister, has splendidly equipped the ship of state and guided her so magnificently along the glorious way she has gone, and to whom has once more been committed the direction of her destinies. Sir, animated by these feelings, we come to this House to support the right hon. gentleman in his pol-

icy of Canada first, Canada last, and Canada for ever. Those of us who have witnessed the improved conditions in the province by the sea, from which I come, during these latter years, join hands with those who come from the province by the sea on the other side of the continent, where there is a similar absence of a dissenting voice, and unanimously we offer our devotion to the great leader of our party. Mr. Speaker, in this, the first utterance which I have the opportunity of making in this House, I desire to be understood as speaking without prejudice and without partisanship, as speaking with a sincere desire that all of us, whether we come from the east or from the west or from any part of Canada, and whatever our party affiliations are may be animated during the time we sit in this House by a desire to do all we can towards building up this great heritage of ours so that those who come after us may feel that we have done our part in creating those conditions which will enable it to take its rightful place among the greatest nations of the world. Sir, I beg to move that a humble address be presented to His Excellency the Governor General in reply to the speech from the Throne.

Mr. GEORGE PARENT (Montmorency). (Translation.) Mr. Speaker, for so many years past has modesty been the theme in opening such a speech as this, that I am rather at a loss to find some new turn for expressing my own feelings in this regard; and if I glance over those 'humble preliminaries' referred to by the academician whose words I quote incorrectly, it is that I realize my inability to adequately describe my own present state of mind. Fortunately for me, my part consists merely in seconding the proposal made by the hon. member for Pictou. His fine speech is a plea in favour of young men, a plea which should be of especial benefit to me, since it has elicited from amongst you a spirit of indulgence equally flattering to him, though required only as regards myself.

Indeed, you will have to be specially indulgent, if you do not wish to feel too painfully the lack of that power of oratory wielded by my predecessor in this House. For, if, on account of the merits of the policy I defended, and through the efforts of devoted supporters, I succeeded in capturing the county of Montmorency over the Hon. T. C. Casgrain, I did not succeed in wresting from him the secret of his eloquence.

Sir, for the young man who reverently knocks at the door of the temple of politics, desirous of grasping the principles that rule the art of statesmanship, it is only natural that the present condition of our country should appear unexceptionably good, and that not only the future, but the present, as well, should seem bright. Is not Canada, from east to west, washed, as it were, by a Pactolous, on whose shores untold of prosperity has settled, without there being any sign of approaching trouble ?

Of course, we should be thankful to Providence for these benefactions, but have we not the right, as a people, to congratulate ourselves, and is it not also our duty to thank those whose duty it was to make good use of the heavenly treasures and who have so thoroughly fulfilled their task?

That feeling of national pride finds a fit opportunity of asserting itself when the Canadian people is called upon, as it is to-day, to extend a most hearty welcome to the new representative of His Majesty King Edward VII. His Excellency the Governor General has lived in a British colony familiar with all the evils of bloody warfare and still prostrate under its terrible bereavements; while Canada rejoices in offering to Lord Grey the comforting spectacle of a happy people, all sections of which breathe the same spirit of loyalty and devotedness to the British crown, of a people proud and jealous of its freedom, no doubt, but equally proud of a state of dependency heretofore rendered agreeable through the noble spirit of its sovereign. Like his predecessor, Lord Minto, of whose sojourn here we have such a happy remembrance, Lord Grey will live peacefully here. Rideau Hall will be, in the course of his busy life, a place of rest, wherein he may witness the normal though vigorous growth of a nation capable of taking care of itself, but knowing also where to find a protector.

I shall not dilate, Mr. Speaker, over the unequivocal signs of this growth of the Canadian nation. However, as the outcome of the fray, I am the unworthy representative of a county, which not only borders on the St. Lawrence, but partly protrudes, as it were, into its channel. My constituents are largely navigators, and I would be amiss to my duty did I not communicate to the present government the message from Montmorency, a message of gratitude for the efforts made by this government towards improving the navigation of the river through the increase in the number of buoys and lights, and for its noble attempt at establishing winter navigation; a message also of prayer that the government may not stop half way, but that the insurance companies be deprived of all pretext for exacting any unjust extra charge, and that the difficult, responsible and trying conditions under which our sturdy pilots labour be improved. It is admitted, I think, that our industries cannot prosper, nor our trade increase, unless the government give to these questions their constant attention.

Sir, the speech from the Throne announces the conferring of provincial autonomy on the Northwest Territories. That is a very serious departure, which, to my mind, has a two-fold importance.

In itself, it is a question pregnant with consequences, on account of the difficulties which its settlement will give rise to, the

conflicts of opinion which its discussion will set forth, the principles of toleration and equal rights which should be sanctioned thereby.

It has been stated that 'Experience is a physician called in too late'; and I may not be wrong in thinking that the experience acquired of late years in the province of Manitoba has been of that kind. The young men of my generation, undoubtedly, have not wholly realized the painful ordeal which our country was made to undergo at a time when the cry of race and religion prevented the quiet discussion of the question of separate schools and of the use of the French language. We were not in the heat of that battle, wherein galling epithets and hateful words were most dangerous missiles; we did not smell the powder of that fanatical warfare. But its rumblings reached our ears; we heard its echo. It may be that owing to our lack of experience, we have taken a somewhat exaggerated view of the situation; but we could not help trembling at the sight of the turmoil into which that bitter struggle of uncompromising principles might have led our country, made up of various elements, had not the present government had the happy thought of negotiating a truce which will be some day final peace, let us hope. That result was effected, on the one hand, through the advice given to the Catholic minority from a quarter familiar to them, Rome, and, on the other hand, through the gentle promptings of diplomacy, whereby the Protestant majority were induced to take a stand making concessions easier all the time.

The young men of my age are witnesses to-day, as it were, of the aftermath only of the storm; but that hurricane of prejudice has left on its train enough ruins, it has hurled too violently one against the others the sons of beautiful France and those of noble England, born on Canadian soil to live side by side, it has caused too much pain, brought about too many quarrels; in a word, it has done too much harm to the Canadian nation for us not to concern ourselves with its possible recurrence. I am confident that the present government, in constituting these new provinces of the Dominion, will foresee all the consequences of the setting in motion of the administrative and legislative machinery which they intend to install, and will thus prevent the crisis, the terrible effects of which have been set forth by recent events.

But if I consider from another standpoint the conferring of provincial autonomy on the Territories, I cannot but rejoice at the thought of that fine page we are about to add to the history of Canada.

The entrance of a new province into the fold of the Dominion is always greeted with a hearty welcome. If that great and beautiful Northwest has reached manhood, so to speak, if it is mature for the grave function of self government, let, in the first place, all the other provinces offer their warmest congratulations, and let the country as a whole rejoice as well. For the birth of a new province within the Dominion is not merely an indication of our prosperity, is not only a vindication of the manner in which public affairs have been managed since 1896. It is, besides, a step forward, made by Canada, and above all it is the certain pledge that our dream of becoming a great nation will soon be carried out. The gap which almost separates the extreme west from the east of Canada is thereby filled; our country becomes almost homogeneous and one stride more is taken in our country's noble and rapid progress towards its great destiny.

Sir, if I may be allowed to express a hope, let it be this: when self government will have been conferred on western Canada, self government which we love so much because it is akin to liberty, when the majority of that country will be left to manage its affairs, may they turn their eyes towards the province, one of whose humble representatives I am here, and whence so many courageous missionaries have gone to these distant lands; may they not close their eyes to the examples of toleration and good will which our legislators give in their dealings with the minority; may the breezes from our mountains when gently passing over the wheat fields of Assiniboia and Alberta bring with them their perfume of kindliness and generosity.

If I feel at ease in thus greeting these provinces whose advent is announced in the speech from the Throne, it is because I recall the measures taken beforehand by the government on their behalf. The older provinces have extended a helping hand to that younger sister and to ensure her growth and normal development, the construction of a great railway is now ensured.

Now, Sir, it is not my intention to deal at any length with the advantages offered by the Grand Trunk Pacific scheme. All that could be said on that subject has, or at any rate, should have been said, and to agree with me, one need only recall the innumerable speeches delivered in the course of the recent electoral contest. If, nevertheless, I make a passing reference to this gigantic undertaking, if I recall the dream of general prosperity which its carrying out will suggest for the country as a whole, if I corroborate the gratitude of my western brethren with my own humble congratulations, it is because I already can see the heavy wheat trains steaming towards my native city, crossing the river at Quebec, over that marvellous bridge, whose construction was, in my childhood, so often represented to me as impossible; and in the completion of that bridge I recognize the reward due to the constant efforts, to the unrelenting, unceasing labour of which I was the witness in my father's home. And should such words seem presumptuous, please be indulgent towards a son who is the witness

as well of attacks of all sorts directed against his father.

Sir, unskilled as I am at dealing with political problems, having only my good will to offer for my country's service, I have not the right to claim your attention any longer; and as I must admit, I feel a certain fright at the mere sound of my voice in this House, I long, as you will understand, to resume my seat. My last thought, that which has inspired me a courage which seemed to fail me at times, and one which you will greet most warmly, is, as you surmise, for the man whom all here respect and admire, towards him who not only has won the esteem and love of his fellow countrymen of all parties, of all creeds, of all races, but who has set his striking individuality in such brilliant light, that from the banks of the Thames and from those of the Seine, rays of his glory are reflected on the Canadian home land.

My last thought, which is one of gratitude, goes to my representative, the right hon. Prime Minister, at whose feet I lay the homage of the most enthusiastic love of the Canadian youth. Of course, my testimony will not have much weight when compared with the almost unanimous acclamations which, from the maritime provinces to British Columbia, have hailed his name, a name which on the battle field was worth a flag. My testimony appears still more insignificant, if we recall the anguish shown throughout the country when, in the course of the last parliament, a terrible disease and out of which it was terribly sought to take advantage, struck the idol of the Canadian people. And lastly, my testimony would dwindle into nothingness when compared with the feelings of joy which harkened his return to health, had it not to touch the heart of the greatest amongst us, that feature of almost filial feeling, independent of noisy manifestations, that feature of inward reverence which makes of my words the sincere, though imperfect echo of the very feelings of the whole Canadian nation.

I second the motion.

Hon. G. E. FOSTER (North Toronto). Mr. Speaker, I think I shall be entirely within my rights if I ask the kindly indulgence of the House usually accorded to a new member on first rising to address this august assembly. It is not often that it falls to the lot of a new member to follow and in some degree to criticise the speeches of the new members who ordinarily move and second the reply to the address. Such, however, is my position to-day. In the first place, I congratulate very heartily the hon. gentlemen who have moved and seconded the address, in their maiden efforts in this House. The hon. gentleman who represents the county of Pictou (Mr. Macdonald) displayed an admirable confidence and a flow of words eloquent and copious, and his ideas, if they do not altogether run current with mine, certainly commended themselves to the attention of this House. Unfortunately, I was not able to follow as closely the remarks made by the hon. gentleman (Mr. Parent) who seconded the address, but if I have a proper understanding, both of these speeches were exceedingly optimistic in their trend and eulogistic in their purpose. The country obtained a due share of the remarks, and attention of these hon. gentlemen and my right hon. friend who leads the House (Sir Wilfrid Laurier) was not bereft of a becoming share, as well in their regards and their attentions. In both these respects the country is pleased to have the congratulations, my right hon. friend is pleased to have these renewed expressions of fidelity, and we on this side of the House have no fault to find with either. I, speaking for this side of the House, may at the outset say that we heartily agree with the hon. gentlemen who have spoken, in extending our warm congratulations to the distinguished gentleman who is our new Governor General. We welcome him as we have welcomed all Governors General to this Dominion of Canada. We welcome him especially as one of a long line of ancestors who have done grand service for the extension and government of this great empire to which we all belong, and I do not think even in this age with all the rights and privileges of self-government, that the over-seas dominions have and possess, and intend to maintain, that the field is at all closed for the exertion of similar influences, not of extension or of conquest, but of organization of development and the knitting together of all parts of the empire. Who does not know that the Canada of to-day exercises a very large influence on the policies and the tendencies of government in the British empire? Though no expression of opinion may be made in this House, though no expression of opinion may be officially tendered in anyway, yet there is the attentive heed paid to what are the tendencies and thoughts and wishes of the great dependencies beyond the seas, which have their influence in determining policies and in determining the trend and action of the British government itself. Is it not equally true that distinguished men, members of the empire, coming from the mother islands to the dependencies and over-seas dominions such as this, have also a very strong part to play and to fulfil in so knitting together, in so carrying out the idea of co-operation of sentiment and of effort, that this great, but yet to a large extent, unorganized world-wide empire may become more firmly and securely united than it is at the present time? So that our Governor General, welcomed here for himself and for his ancestry, is welcomed here also by us for the work which he has to do, and which we will welcome and co-operate with him in doing.

In reference to the speeches, we may say that the statements which have been made by the two hon. gentlemen who have moved and seconded the address, could be characterized

under three or four heads—we are here; the country is behind us; the country is prosperous. We do not find fault with that assertion. On this side of the House we stand to assert and to maintain that with equal strength and power with hon. gentlemen opposite. We may be pardoned, however, if we may have ideas differing from those hon. gentlemen opposite as to the reasons why this country is prosperous at the present time. When we take the great interests of this country and look at them separately, even though briefly, we may be pardoned the expression that though there is great prosperity in this country, it is quite possible that there might be still greater prosperity, and we are not of that kind, at least, who in these respects think it is best to let well enough alone. We never can be so prosperous in this country but that we must hope and aspire to still greater prosperity. Take, for instance, the great lumbering industries of this country; I do not think that hon. members opposite will maintain that the lumbering interests of this country from the Atlantic to the Pacific are in a very buoyant and prosperous condition at the present time. I think representations have been made to hon. gentlemen opposite as to the reasons why this great industry is not so prosperous as it might be. In this year of grace the mills and productive power in the lumber interests of this country are doing only part time where they might be doing more time, and the reason is not far to seek. It is because of the unequal and unfair competition which is imposed upon this industry from the country south of us. This then is the condition of one of the important industries or interests in this country which might be better than it is if the government had taken the proper steps to moderate that competition and bring it down to a fairer and sounder basis as between us and our neighbours to the south of us. Take again, the mineral interests of this country. They are great; they are important, but is it or is it not a fact that any single line of policy of hon. gentlemen opposite has contributed to make the mineral industries of this country more prosperous than they would otherwise have been ? Is there to-day a single thing which goes into the products of the miner which is got by him at less cost than in 1896? On the other hand, has the market for the minerals which are produced been widened or extended? With respect to that second great branch of the interest and industries of this country, the mineral or mining interests, things certainly have worked out in their own way, and no great claim can be made of their having been extraordinarily helped by hon. gentlemen opposite through any line of their policy.

Take again the great agricultural interests. They are prosperous in a part of our Dominion most certainly ; in other parts of our Dominion they are not so prosperous. The centre of agricultural prosperity to-day is to be found in the great Northwest ; in that land so lately opened, so richly endowed and so full of promise for the future.

Take the remaining great interest of Canada, the industrial interests of the country. Although these are to a certain extent prosperous, one seeks in vain for any very strong reason why they should have enjoyed that prosperity from any help or aid which has been given to them by hon. gentlemen opposite through their policy. Yes, the country is prosperous, but who laid the foundation of that prosperity ? One of my hon. friends who has spoken to us to-day declared that the Canadian Pacific Railway and the Canadian Northern were the great harbingers of the prosperity of the west. The prosperity of the west is due, outside of that country's own intrinsic richness, outside of its own great productive capacity and extent, to two things : It is due to the opening up and the proving up of that country. If hon. gentlemen go back in their minds to 1897, when they came into power actively, they will find that every system of transport into and out of that Northwest which exists to-day was at that time existent in the Northwest. By whose policy ? By whose action? If there has been any expansion of any transport system it has been by extension only, by extension in carrying out the system which was laid down, made possible, made existent under the guidance and by the aid of the Liberal-Conservative party of this country. The great Northwest had not only been opened up, but it has been proved up. There was the experimental stage. Time was necessary in order to prove to the world that however rich that country might be, and however broad its acres, its productivity was likely to be permanent and to be built up upon broad foundations. It was necessary to prove to the world the uniform and permanent productive power of that country ; that required a period of experimentation, and for eight, or ten, or twelve years the pioneers of that great Northwest country were busily engaged in that work of experimentation. The frosts had to be combated and studied, the conditions of climate had to be given attention to, the methods of cultivation, which were different in that country from those in the countries to the east, had to be studied and carefully noted, and through year after year of failure and experimentation in the course of ten or twelve years, proof has been given to the world, not only of the productivity of that country, but of its permanent and uniform productivity. These two things done; the permanent productivity of the country proved to the world and its transport system opened up, then prosperity began to show itself. Then people came into that country ; then production increased ten, twenty, one hundred, a thousand-fold ; and by men who wish to reason soundly or to come to just conclusions, these things must be taken into account. The chronicler has given us a brief and interest-

ing history of this Dominion of Canada for thirty-eight years. Did it occur to him in his self-jubilation that of that thirty-eight years twenty-five years were under the guidance of a Liberal-Conservative government and a Liberal-Conservative policy? Thus, though the country is prosperous—and we admit that prosperity, and maintain it, and rejoice in it—we must not come to the illiberal conclusion that that prosperity is to be attributed to the hon. gentlemen opposite, who came into power in 1896.

Another note is that the population is increasing. We are glad of that. The population is increasing by virtue of immigration, the attraction of those without; and population is also increasing by virtue of retention, that is, attraction of the people who are born within the country and who are kept within the country. There was no possibility of these two forces working to their full extent until that period of opening up and of proving up of the country was gone through with, so that confidence would be given, so that the productive power would become known and would be strong to draw people from abroad, and also to keep in this country its own sons, rather than have them go to foreign countries. These are things which we should bear in mind when we come to give reasons for the great progress and the great prosperity of this country. That hon. gentlemen opposite have done what in them lay in order to take advantage of these conditions and have, to the extent of their ability and in good faith, striven in order that this prosperity might have its constant and unchecked growth is to their credit, and we give them full credit for it, but it is quite another thing to make the policy which has been in force for eight or ten short years in this country the father and sponsor and creator of all the prosperity in this great, broad Dominion. But I can read in the smiling face of my hon. friend opposite, and in the smiling faces of the mover and seconder of the address the great idea that the country has endorsed them; that it has wiped out and condoned all their sins of the past, that it has given them a full mandate for the future. Well, whatever comfort there is in that let hon. gentlemen take it, let them enjoy it to the full. But sometimes it is possible that a great victory may cost too much, and may in the end prove too expensive—too expensive for the party itself and for the country as well. A victory gained by fair and reasonable argumnt, upon a representation of policies and principles, is a victory which is enduring; but a victory which is to be ascribed to other influences than these, may be, as I have said, too expensive and too costly.

The opposition had some things to contend with in the last election. It is strange, but it is absolutely true, I think, that prosperity tends to dull the critical faculty; and a government which goes to a country in a time of prosperity slips through with less of its sins of commission and omission scrutinized than it does under different and less auspicious circumstances; and hon. gentlemen opposite, in gauging their victory, must give a little credit for their fortunate escape to the prosperity of the country and the dulling of the critical faculty which results from that prosperity.

There are some things, though, that have been injected into the late contest and that have contributed to the late victory, which are not quite so pleasant to contemplate. I do not think that ever before in the history of this country was there a hard and fast co-partnership made between a government and an immense and widely extended corporation. Whether that is to the interest of the country, whether in the long run it be even to the interest of the corporation itself, is something which is well worth considering. In this last election an immense corporation actually adopted the party flag and the party shibboleths, and set itself with untiring and relentless force to elect the government through whom it proposed to get, and by whom it was promised one of the greatest and richest franchises that have ever been given to a corporation. Whether that is indicative of good conditions in the present, or of sound conditions in the future, or not, is a thing which I think may be well open to doubt, and which may well be given serious consideration. But I know from personal experience, as does almost every man sitting on either side of this House, that one of the most relentless forces against which His Majesty's loyal opposition had to strive in the last election, was the untiring, immense and widely extended influence and power of the corporation with which the government had allied itself. In every consituency where their power was felt, the suffrage was made to aid their purposes, the suffrage of their employees was thrown strongly, by all the influence that could be brought to bear, for the government and against the opposition—and generally for what purpose? For the immense franchises and gain and profit which promised to come to them if the government were sustained and the opposition were defeated.

Outside of that, am I right or wrong, Mr. Speaker, in saying—and I leave it to the country to decide—that there probably never was in the history of this country an election in which the argument of the material was more profusely and relentlessly used than in this last election. I acknowledge that it is a difficult thing in a young and growing country to entirely eliminate from the electorate the discussion and consideration of public works; but there is certainly a sane and decent limit by which this ought to be bounded; but in this last election, from one end of this country to the other, it did seem as if the great argument, the great consideration, the great point brought before the electorate was the dangled bribe of public works promised by the candidate

and endorsed of course by the letter or the word of mouth of the minister out of whose department the public work had to emanate. Everywhere this was so. My hon. friend said: Here is a solid Nova Scotia.

Some hon. MEMBERS. Hear, hear.

Mr. FOSTER. In Heaven's name, why should it not be solid, if in one county alone sixty-six appropriations for public works were sent down and held up as the price of its support ? My right hon. friend possibly may recall the circumstances of a devoted follower of his, brought out under his own wing, launched upon his constituency by my right hon. friend himself at a great public gathering, who on a post-card—of larger size than usual, of course—went into an elaborate calculation of how many dollars per minute, per hour, per week, per month and per year he had got for his constituents during the short three years that he had sat in parliament; and after having spread this over the large-sized postcard, he declared : 'And this is only the first fruit, this is just the budding promise of what I will do for you if you send me back to support the government.' But is it not rather sad and rather bemeaning, that in this great country all decency in that respect should be thrown to the winds, and from the Prime Minister down to the latest acquisition to the cabinet we should have a crusade based on promises of public works? Why send a member of the opposition, who can do nothing for you? Send a supporter of the government; here is his promise, and here is the endorsement of the minister. Well, sir, I am not going to follow out what influence that has upon a country. It is not an ennobling influence; it does not raise the morals of public life. It may be treated with the light laugh and even the sneer by the practical politician; but I tell you that we shall reap the fruits in future years in a deadening of the public conscience and a decline of public morality in this country.

What else has been interjected into this contest? How brave these gentlemen were in that time, long, long ago, when they believed in theories. Now my hon. friend says the Liberal party has discarded theories. Very true, very true; but the time was, in the memory of men sitting on either side of this House, when hon. gentlemen opposite had theories. One of the theories my right hon. friend held then, and held very strongly, was that there should be no partnership between provincial governments and the Dominion government—that provincial affairs were provincial and should be kept by themselves, that Dominion affairs were for the Dominion and should be kept for themselves, and that the joining of the two only led to corruption and a lower public life. Yet to-day, in this broad Dominion, who has been a greater sinner in this respect than the right hon. gentleman opposite. In all the elections which have taken place, since this government has been in office, the patronage and the power of the Dominion government have been joined with every possible provincial government for a common end, with of course the full and perfect understanding that in the time of trial these provincial governments would in like manner come to the rescue of the federal administration. A Liberal of the old English school ! How often have we heard my right hon. friend use that phrase ? A Liberal of the old English school, standing in Liberal shoes and yet allowing what my right hon. friend allowed to be done in the province of Quebec in order to destroy the Liberal-Conservative party in the provincial election! In the pursuance of such tactics. long before the Quebec provincial parliament should have finished its legal existence, advantage was taken of the result of the Dominion elections and the consequent disorganization of the Conservative party in that province, to spring a dissolution on the people and put out of the way that strongest safeguard of our constitution and the political freedom of our people—a fair, reasonable, virile opposition. No English Liberal of the old Liberal school would, I am sure, have countenanced any such course. A similar course was followed in the province of Ontario. In that province the people in 1898, 1902, and since, have refused to give their endorsation to the provincial government and are to-day trying to rid themselves of a government they have denounced, which represents but a minority of the people, and has been 'in articulo mortis' for the last five years. Seeing the dire straits into which that government has fallen, the right hon. gentleman, I understand, has come to its rescue, and is about to invoke the organization and power of this government in its behalf, and has sent around to the leading men of the party the watchword 'save the Ontario government.' These partnerships are demoralizing, they do not tell for pure politics and honest administration ; and my hon. friend was badly advised when he saw fit to lend the power and patronage of this government to aid the local administration.

But there are still worse things being done. I do not know how well founded are the stories that are being told, but I do think that they merit the attention of this parliament; and I hope that at the proper time they will, if they have any foundation, be pressed to the very end, and that this parliament will do its duty. There are strange stories floating of the manipulation of the voters' lists in Manitoba, the Northwest and the Yukon. There are strange stories told of the doings of the enumerators in the far Yukon, where, I believe, the enumerators had to be hunted among the mountains in order that electors might obtain the lists which they had concealed about

them and which they refused to make public so as to prevent the voters from exercising their rights. There are circumstances and things still worse than any I have mentioned, and if they be true, I hope that they will be placed before this House and thoroughly ventilated. The bogus ballot boxes we will not discuss to-day. They are, however, but the outcome of a long series of malpractices which have developed into a political mechanism, the invention of fertile brains, in order to manipulate elections and prevent at the last moment the free expression of the people's will.

My hon. friend made an appeal for cordiality and good feeling and for the repression of race and creed issues. No one would join him more heartily in that appeal than myself. Have we not arrived at a stage in our existence as a people when we ought to be more manly, when we ought to have higher ideals and scorn to appeal to racial and creed issues and prejudices ? My hon. friend will join me in the expression of that wish, but is it not a fact that he owes the election to this House of some of his supporters to these very racial and creed cries ?

Some hon. MEMBERS. No, no.

Mr. FOSTER. We, I am sure, not only on this side but on that, deplore the absence from this House of my hon. friend from Montmorency (Mr. Casgrain). He was a public man who did credit to his province and this parliament, and the fact that he is not in his seat to-day is not because his policy was not approved of by his constituency, not because his character was unworthy of their confidence, but because of race and creed cries which were raised against him.

Some hon. MEMBER. No, no.

Mr. FOSTER. Some hon. gentleman on the opposite side says 'no, no.' Well, I cite this case as an example which is indicative of a sentiment which in my humble way I am trying to show is not to the benefit of this country. Let us admit that this course was followed without the knowledge of the leaders of the party ; yet I submit that he does a public service to this country who brings out of the byeways and the lanes into full public notice political trickery of this kind. I believe that my hon. friend has, by a dexterous use of judgeships and senatorships, secured to himself an organizer in the province of Quebec. That gentleman is a senator, whose name I shall not mention here. But I believe that in the county of Montmagny there is a newspaper which is certainly controlled, if not owned, by that gentleman. What do I find published in that paper as an advice for the electors of that county ? Let me read the following which was published in it and sent broadcast to the electorate :

(Translation.)

Electors and fellow-countrymen of Montmagny, be on your guard !

In their 'mandement' their lordships the bishops say that it is our duty to vote for a man who is able to defend both our religious and national interests. Now, can you, in conscience, vote for a man like Harry Price, a mere clerk in his brother's employ, who does not speak French, an English-speaking protestant, holding the French Canadians in contempt ? Let us be spirited men. The Price concern import men from Great Britain to occupy the most important places in their offices. Why not do like them, chiefly when we are called upon to elect a member, and the fate of the Laurier government is at stake ?

Once more, let us be on our guard, and shame on the cowards and those who crouch on all fours before money, drink and the crusts of bread thrown by Price, the candidate.

Hurrah for Laurier !

Hurrah for Lavergne.

Some hon. MEMBERS. Hear, hear.

Mr. FOSTER. Is there any need for an appeal like that in any county in any part of this Dominion of Canada? And was it with the knowledge of the Senatorial organizer of the elections in the district of Quebec? Was it known to my right hon. friend, and if it had not been known to either of these gentlemen, would it have been allowed ? Surely then, I am doing a public service in calling their attention to the fact that this was the kind of thing that was done to swell the majority of my right hon. friend. But something more. Here are interrogations in le Courrier :

(Translation.)

Do you speak English ? Such is the Conservative formula, this year.

October 27, 1904.

Does Mr. Price require from his followers that they should take the test, denounce the sacrifice of the mass and anathematize the Blessed Virgin and the Pope ?

Why was a question like that asked ? Was it in order to forward the trade policy of hon. gentlemen opposite ? Was it to carry the Grand Trunk Pacific ? And does my right hon. friend regard it as a lofty, noble canvass ? Is this the kind of thing that will join the people of Canada in bonds of amity and will make them a people whose sole aim in public affairs shall be the good of their country ? Is this the kind of appeal that will lead to the wide and proper toleration of every creed and every race among our people ?

(Translation.)

Is it true, Mr. Price, that you have promised the fanatics of Ontario, Sam. Hughes, Dr. Sproule, Mr. Barker, &c., that you would deliver over to them the splendid and patriotic county of Montmagny, with its population, all French-speaking and deeply Catholic?

October 31, 1904.

Who are these terrible monsters whose names have been invoked in order to swell

the majority of my right hon. friend ? And is he proud of a majority swelled by appeals of this kind ? And here is another extract :

(Translation.)

TO THE ELECTORS OF THE COUNTY OF MONTMAGNY.

The 'Courrier de Montmagny,' October 31, 1904.

Up to now I have been the Liberal candidate.

Was not that glory enough for one man to be the Liberal candidate ? It appears not.

(Translation.)

To-day, at the request of a large number of Conservatives, I become the nationalist candidate, that is to say, I take the field as the champion of French and Catholic Canada, and of its right to a fair representation at Ottawa. I am a Liberal, but before all, I am against imperialism, militarism and against Quebec being crushed under the heel of the Tories.

They will try to buy your votes, my friends, but think of your old flag, think of our dear province, remember our ancestors and our religion. The motto of Quebec is :

'I remember'

Do ye remember !

ARMAND LAVERGNE.

Now, I leave that as a side thought for my hon. friend, and I ask him does he approve of that method of canvass, and does he think that is one of the things that will bind this country together, will promote high public political ideas ? Taking all these things into consideration, there are some points, which serve, may be, to diminish the apparent value of the great victory of the third of November.

But, I have been too long upon these details, and I now wish to come to the speech. The speech from the Throne itself —well there is not much to come to in this speech. It seems to have sprung from barren and unfruitful soil. It looks to me like either the product of utter exhaustion—due, I suppose, to the great efforts of the election —or the product of a proud and superior carelessness, as though the hon. gentlemen opposite had earned a holiday and a good time, without thinking very much about the country. But there is one thing in the speech and that is the autonomy of the Northwest. We are not permitted to know what this measure will be. But it is a measure that has long been asked for by the people of the Northwest, a measure that has been supported by His Majesty's loyal opposition in the late parliament, as it is in this House, but which has been consistently and persistently denied by my right hon. friend and the government which he leads. In this speech, we have a promise of autonomy for the Northwest. Was that a late pre-election repentance? Was the letter that my right hon. friend wrote on the eve of the election promising that something should be done to this end wrung from him by the fear of antagonizing votes? Whatever the reason, there was a promise, and this time there is the fulfilment so far as the speech from the Throne goes. I hope that my right hon. friend, in bringing down this measure, will give to the new province a geographical area that will be sufficient. For myself, I am opposed to dividing this country up into small provinces with their burden of judical and administrative officers, duties and expenses. I hope also there will be no stinginess with reference to the resources with which the new province shall be endowed. I think it would be a mistake if it were left to come to this parliament year after year voicing its demands for means to meet what must be great expenses, and increasing expenses as the development of the province proceeds. I hope the powers to be given to that province will be so definite, so clear and so full that the measure will be satisfactory to the sturdy pioneers who are to make that province great, and will avoid grievances and recriminations of every sort. We have no jealousy of the great west. There is no rivalry between the west and the east. The east bought the patrimony of that country, the money of the east paid for it The brawn and brain of the east pioneered that great country and to-day our sons, our brothers and our fathers are the dominant race of the province that is to be. Every power which can be given to them should be given to enable them to lay the foundations of a province with an almost illimitable future and one that will justify the confidence which we had in it when we made it a part of this great Dominion, a confidence which every succeeding year has increased.

There is a further mild allusion made—no, there is no allusion made to that old-time indispensable market to the south of us. What has happened hon. gentlemen opposite? Have they discarded some more of their theories ? I know that it is impossible for heated steel always to retain its initial heat, but one would never have thought that that ardent party which called for commercial union, which vociferated its demands for unrestricted reciprocity, which reiterated its adhesion to the idea that the market to the south of us and its reciprocal enjoyment was worth more to us than the markets of all the world besides, should have lost all its intrinsic heat and warmth. Yet to-day the only paragraph we have in the speech that touches the country to the south of us, is that somewhat obscure one in which it is stated that an International Commission composed of three representatives from each country will be appointed

To investigate and report upon the conditions and uses of the waters adjacent to the boundary line between the United States and Canada.

What that may mean I do not know, but we will have to possess ourselves in patience until we find out the meaning of the clause. But for ever and for ever, it would seem, the old flag which was nailed to the top of the mast by my hon. friend, and of which he said that it would float there un-

til victory came or death to the gallant defenders, has now come down, the flag has been furled, and there is now only the mildest of all allusions to international arrangements between the United States and Canada. Well, sir, there are many things for which we would feel less like forgiving hon. gentlemen than for abandoning these theories and allowing them to drift into oblivion.

Nothing is said in the speech with reference to a commission to investigate the state of trade and to give us information with reference to tariff changes. I am not sure, but I think at the last session of parliament the Prime Minister promised a commission upon that important matter. Has that been given the go-by as well? Or is it of so little importance that it cannot claim a place in the speech from the Throne? There is an allusion to the trade of 1904 as being up to the high water mark. That is a pleasant assertion, we are glad to hear [redacted] There is another allusion which is not quite so pleasant, it is that for the last six months the revenue of the country is greater than that of the preceding six months. Now that may mean something which is not to the benefit of this country. The volume of trade is one thing, the currents of trade are quite a different thing, and should be looked after quite as much as the volume of trade. Now if this is correct—and I think it is correct—that from 1896 to 1903 the imports from Great Britain have increased seventy-eight per cent while the imports from the United States have increased about 140 per cent, there is food for reflection. If we are importing more heavily, and if the revenue for the last six months is increasing over the preceding six months, it is proof positive that we are importing more heavily, it may be true the bulk of our imports is from the United States and consists of goods which, in a great many lines, ought to be made in this country itself, employing Canadian labour and building up Canadian business. I hope my right hon. friend has not forgotten the promise of a commission, and that we shall hear later in the session that something at least is going to be done with reference to the tariff and its incidence upon the great commercial interests of this country.

There is no allusion either to a fast line service. Has that also evaporated? Are my hon. friends, for another year in addition to the previous years, compelled to apologize for not having a fast service, an adequate service between the old country and Canada? Is it a mere pretense? Are they lacking in spirit, or has there been any fair, reasonable and continued effort to realize that great boon for this country? Eight years ago, under conditions the most favourable, a contract was prepared with the co-operation of Great Britain herself, she giving a large amount of the subvention under which, if it had been carried out, we should to-day have a fast line of steamers running between the old country and the ports of this country, and we should have our mails and our passenger traffic, and a large amount of our freight traffic, going by this line, and we should have in addition the prestige, the almost incalculable prestige, which would accrue to Canada from the establishment of such an adequate service.

No mention is made of the Intercolonial Railway. Now I had fully expected some mention would have been made of that. My right hon. friend, speaking I think in Toronto during the progress of the last election, declared that the Intercolonial had been a loss to this country from the earliest time, and he expected it would always be a loss. He was not quite correct in his figures and facts. Facts are not always a strong point with my hon. friend, I know. It was not quite true that the two sides of the account never were brought close together. It is on the other hand quite true that for years, under other management, there was a surplus and not a deficit between the current accounts of the Intercolonial. But the point I am making is this: My right hon. friend told the people of this country that it was a loss, a dead loss, a burden on this country; and the reason was, not the fault of the men who managed the road, but the vicious system under which it was managed. Now will you look at that for a moment? A powerful government, a powerful premier acknowledging in the face of this country that a million of deficit, nearly—that much this year, if I correctly remember the figures—must be loaded upon the taxpayers of this country, in these years of prosperity, all because a vicious system is allowed to dominate in the management of the Intercolonial. Well, sir, the power to remedy that vicious system is in the hands of my right hon. friend, the statement that it is a vicious system came from his own lips; and the fact is before us that for all these years a vicious system has prevailed, under a weak ministry, and there is no proposition for a remedy. Why should that be in this country? It is not fair to the taxpayers of this country, it is not fair to the department itself, nor to the provinces through whose territory the road passes. And all this in years of progress, when almost every great railway in the United States, and almost every great railway in Canada, is showing by their returns, growing net receipts over and above all expenses, that, too, along with a capital and expenditure on the Intercolonial in the last five years greater than during any preceding five years since the Intercolonial was constructed. Surely some action should be taken to right that great wrong, and to delete that vicious system of management from one of the great departments of our country.

I had expected, too, that something would have been said in the speech with reference to the auditing and controlling of the accounts of this great Dominion. I will touch upon that point very briefly. It is quite possible

that the circumstances of this country have outgrown the limited form of audit which we provided years ago. It is true that one of the most able and one of the most capable officers that this country has ever had, not a political friend of this side of the House but appointed by hon. gentlemen opposite, after years of experience, has come to the conclusion, and has told ministers and told parliament that he was unable properly to perform his duties because of the inadequacy of the Act under which he was working. Now can there be anything more important than a proper supervision of the expenditures of this country—all of course within the lines of ministerial responsibility ? But within those lines can there be anything more important than having proper control, adequate and thoroughly competent, in order that the old and faithful officers of this parliament and country may see to it that moneys are paid only when they are voted, and that moneys are not paid when they have not been earned.

One point more I will touch upon, and that is with reference to the defence of this great country of ours. We have been told of our wonderful progress. We know our great resources, we have infinite faith in the future of this country. Are we doing what we ought to do in order to put this country in a fair state of defence against eventualities which lie all about us? Have we in this country to-day, with our six millions of people, with our million of happy homes, with all the strong material resources at our disposal, have we taken reasonable and proper precautions even for keeping for this country its inestimable possessions, and defending them if need be against any enemy who may come ?

Is there to-day in this country one single port of entry which has guns sufficient to guard it against the marauding gunboat of an enemy? Are there in this country enough rifles to be put into the hands of the strong and adaptable men who are willing to fight for the defence of their country, but who cannot if they have no weapons? Have we to-day in this country, if difficulties should arise, any facilities for manufacturing what would be necessary in the form of ammunition and the implements of warfare necessary for a fair and reasonable defence? Now, it is living in a fool's paradise, surely, if we do not as sensible men, knowing and feeling the worth of our country, knowing the virtue, the ability and the power of our citizens as individuals, place this country in some reasonable form for proper defence and the maintenance of its self-respect as well. I think it is time for this parliament to give this great question full and serious consideration. No one more heartily subscribes than myself to the idea that Canada has not been recreant in the building up of an important and strong part of this empire. Every step we have taken in our Dominion, every material development, every mile of our railways, every step that we have taken in material progress, has been a step towards strengthening the empire. We have been doing our duty in this respect and in this direction, but I think it is well to consider the question if the time has not come when something more can be done in order to maintain that sense of security, that proper feeling of self-respect which a country like this owes to itself, a country of so many homes and of such rich resources.

Mr. Speaker, I apologize to you and the members of this House, as a new, untried and untrained member, for the length of time I have taken and for my halting speech. By and by, I promise you that when I get more accustomed to the atmosphere of this House, and when I find my bearings a little more, I will probably be in a better shape to voice my ideas more pointedly and may be a little more pungently than I have this afternoon.

Rt. Hon. Sir WILFRID LAURIER (Prime Minister). Mr. Speaker, it is with more than usual pleasure that I join my voice with the voice of my hon. friend who has just spoken (Mr. Foster) on behalf of the opposition, to offer my congratulations and the congratulations of this side of the House to the two new colleagues of ours who have presented the address to be submitted by the House to His Excellency the Governor General in answer to the speech with which he has opened this parliament. When my hon. friend from Pictou (Mr. Macdonald) rose to address this House he was not altogether a stranger among us, for, though it was the first time he had spoken on the floor of this parliament, his reputation had preceded him in it, a reputation earned by him in the legislature of a province which, during one hundred years or more, has produced many able men to do service for the state, and which during one hundred years or more has been a bulwark in the cause of Liberal principles, and whose record reached its culmination in the last struggle, in which my hon. friend bore no small a part in the redemption of the hitherto unredeemable county of Pictou. But whilst the reputation of my hon. friend from Pictou has preceded him in this House, it is obvious from the age of my hon. friend from Montmorency (Mr. Parent) that his reputation could not have preceded him. The surprise is that one so young should have achieved a victory so signal as he did. But my hon. friend is a worthy son of a worthy sire, and he has proved once more that blood always tells. Now, perhaps I may be permitted also to offer my very sincere congratulations to the young member for North Toronto (Mr. Foster). I am free to say, however, to my hon. friend and to the House that if the electors of North Toronto, or a majority of them, had been true patriots—patriots in the true sense of the word—they would not have elected my hon. friend, but they would have elected my esteemed friend the present mayor of Toronto (Mr. Urqu-

hart). Toronto is a very peculiar city. It is endowed with many gifts, but it has a fatal defect. It is an intellectual city, it is a cultured city, it is a most hospitable city, as I know myself personally. In matters literary, in matters military, in matters municipal, Toronto can always be depended upon to use wise discernment. In matters literary, in matters military, in matters municipal, Toronto always knows a good man and a good thing when she sees it or him, but in matters political the vision of Toronto is deformed. In matters political Toronto is always wrong, and that is why my hon. friend has been elected for North Toronto.

But, Sir, if North Toronto is to be represented on the floor of this House by one belonging to the Liberal-Conservative party so called, for my part I am quite satisfied and happy to see once more my hon. friend (Mr. Foster) upon the floor of this House, where, even on this side we can hope to have some benefit of his experience and talents. But I must say to my hon. friend (Mr. Foster) that I was much disappointed after hearing him—for I am an old friend of my hon. friend—and will he be much surprised if I tell him that during the last four years when I looked on the vacant seat he used to adorn and which he again occupies, I often thought of him and I thought that he would profit by the time he was out of this House. I hoped that he would reflect and would change the tenor of his ways, his manner, his methods and his principles I am sorry to say after hearing him to-day that these four years that might have been years of profitable reflection have been absolutely lost on my hon. friend. He is a real Bourbon, he has learned nothing and forgotten nothing, and the speech he has delivered to-day is exactly the speech we heard from himself in the old parliament between 1896 and 1900. He has spoken of the prosperity of the country. My hon. friend (Mr. Foster) who is strong on facts, —much stronger than I am,—had to admit that, he had to admit prosperity. We are told that if the country is prosperous it is due to the policy of the Conservative party. How often have we heard that speech from his lips from 1896 to 1900 ? Then I have only to say to him, it may be I will not dispute that point with him. I will say to him and to those behind him that if the prosperity of the country is attributable to the policy of the Liberal Conservative party it is no wonder the country would not again give control of its affairs into the hands of the Conservative party and restore the conditions existing prior to 1896, because then that policy meant ruin and now it means prosperity at our hands.

My hon. friend (Mr. Foster) is evidently smarting under the defeat of his party. I shall not discuss at present the methods of the opposition and of the government. I will simply say a word or two as to the observations he has made. If, as he says, the Liberal party has won such a signal victory as that which it won on the third of November, owing to their alliance with a great corporation, which brought its influence to bear wherever there were employees of that corporation, and secured the votes of these employees for the government, it seems to me that he gauged the Liberal party by the Conservative party, and that he was still thinking of the old alliance as between the Canadian Pacific Railway and the Conservative party. But, Sir, if my hon. friend will look about him he will find that the greatest victory which was won by the Liberal party in the last elections was won in the two extremities of Canada, in Nova Scotia and in British Columbia, and how many employees of the Grand Trunk are there in British Columbia and Nova Scotia ?

My hon. friend went a little further and opened a subject that I am very glad he mentioned as it will give me an opportunity once for all to dispel—I will not say wilful error—but an error as to the influences which have been brought to the Liberal party the victory which we have won in Quebec. My hon. friend (Mr. Foster) says that the defeat of Mr. Casgrain who is a personal friend of mine, was due to appeals to racial and religious prejudice, and in support of that, he cited from a newspaper called the Courier de Montmagny. But, Sir, the Courier de Montmagny was not published in the constituency of my hon. friend Mr. Casgrain, but in the constituency of my hon. friend Mr. Lavergne, and I have only this to say—and I should not have to tell him this, because I presume from the extract which he read a moment ago, that he is a constant reader of the 'Courrier de Montmagny,' and if he is a constant reader of that journal he knows that it is not a very firm and staunch supporter of the present government, that it might almost be called a kicker in the traces of the Liberal party. My hon. friend will find if he will look at it with care some articles addressed to myself personally, taking me to task because I did not administer the party according to the views of the 'Courrier de Montmagny.' Therefore, I have only this to say, that it is altogether too late in the day to charge against the Liberal party in Quebec any appeal to race or religion. We have never won by these methods and we do not propose to win by them, and as one swallow does not make a summer so one newspaper in a country does not make a policy of a party. I shall not say more on this subject, but if my hon. friend chooses to discuss it at greater length I will be happy to go through it with him. At the present time, I have only to say that he has no cause to make the accusation which he made.

I shall now come more particularly to the speech from the Throne. My hon. friend (Mr. Foster) said there was not much in it. I thought that that which was a demerit in

the eyes of my hon. friend would be a merit in the eyes of every one ; it has the merit of being concise and to the point. I believe my hon. friend rather rejoices in high and loud redundant sentences, and that the mere clatter of syllables has some charm for his ears, especially when the syllables fall from his own tongue. I remember a time when the speech was not so concise. In the olden days, it was rather prone to conceal the paucity of material under a verbosity of expression. My hon. friend (Mr. Foster) should have realized that the people will not be fed upon words and wind, but prefer a bill of fare reduced to a single course if there is some substance in it. There is not much legislation in the speech because we do not propose to introduce much legislation. There is only one great measure which it is proposed to introduce and that is a Bill granting autonomy to the western territories. We think the time has come when the western territories should have full partnership in confederation, when we should admit them as members of the Canadian family as full provinces. My hon. friend alluded to the fact that for two or three years there has been an appeal from the territories for full autonomy. Some two years ago we received delegations and requests from the legislature and in some instances from the people also, to have the territories at once admitted as full provinces, but we represented to the people and to the legislature that the time was scarcely opportune to have this introduced, that we could not be very far from a general election and that at that time the representation of the territories in this House was small while after a general election there would be a larger representation. They had only four members in the last parliament, they have now ten and I think the wisdom of our judgment has now been justified. It is true that we found some doubting Thomases in the territories who thought that we would not implement our promises, but there is to-day in the speech from the Throne an indication and the certainty that on this occasion as on every occasion this government fulfils its pledges and carries out its promises. My hon friend (Mr. Foster) does not know the character of the legislation which we are about to introduce. I am sure my hon. friend does not expect that we shall tell him at this time the principal features of the Bill. We are working on it now ; it is far advanced, but in respect to three or four salient features we thought it better to wait for the representations of the Northwest government and also the advice of our friends on the floor of this House.

There is another suggestion in the speech upon which my hon. friend requires some information. He has not fully apprehended what is meant by our statement with regard to the commission which we have appointed to deal with the waterways between the United States and Canada. I am very glad to give my hon. friend and the House the information to which they are entitled on this point. It is within the knowledge of everybody that along a very great part of the boundary between Canada and the United States is the water system of the St. Lawrence. Now, I am sure that every one will admit that it is to the interest of Canada as well as the United States that the surface of the water should be kept at as high a level as possible. Some few years ago, when it was rumoured that the state of Illinois intended to connect the waters of Lake Michigan with the waters of the Mississippi river by means of a canal, there was an apprehension expressed, not only in this country but in the United States, that that work might have the effect of lowering the level of the waters of Lake Michigan and adjacent waters. As the event turned out, this fear was groundless, as the volume of water taken away by the canal is not sufficient to materially affect the level of the lakes. But if similar works were to be undertaken right and left, if the waters of Lake Erie and our system of waterways generally were to be tapped at different points, it is possible that the volume of water removed from the lakes would be so great that the level might be appreciably lowered. That is not all. In sections of the country where the boundary is not water, but land, there are streams and large rivers which have their sources in one country and which flow into the other. Complaint has been made by the United States that Canadians have constructed some works upon rivers which have their sources in Canada and which flow into the United States, and that these works affect the flow of the waters in their country. We also have made complaints to the United States that Americans have constructed upon some rivers, the St. John river, for instance, works which affect the flow of the waters in our country. It is, therefore, to the mutual interest and advantage of both countries to have this question properly investigated with the view of having concurrent legislation if such should be found necessary. From olden times it has been a principle of Roman law, which has been adopted by most civilized nations, that the riparian owner of any stream has the right to use the water of that stream for his own benefit, provided he does not impair the flow of the water beyond the boundary of his property. This is a principle of law which dominates in almost every country; but it is not possible to have this principle followed and carried out when the works are in one country and the boundary of the property is in another country. For these reasons we have thought it advisable to respond to the invitation of the United States to have this question investigated. We have agreed to a commission to be composed of six members, three to represent the government of the United

States and three to represent the government of Canada. The instructions to the commission shall be laid on the table at an early day ; but in the meantime, to give all the information to my hon. friend to which he is entitled, I may mention the names of the commissioners who are to represent the government of Canada—Mr. Maybee, K.C., an eminent lawyer of the city of Toronto; Mr. Louis Coste, of the Department of Public Works, an eminent hydraulic engineer, and Mr. King, the chief geographer of the Department of the Interior. These gentlemen are to represent Canada at the conference, and we have reason to hope that they will bring in a report which will be satisfactory. I may say that this commission has no power to decide anything. It is not to lay down the basis of a treaty. It is simply to study the conditions and to report whether it is possible to devise remedies to meet an existing evil.

My hon. friend has entered into a discussion of questions which I do not think it advisable for me to discuss at this moment. He has referred, for instance, to the defence of the country. This is a matter which may engage discussion later on, when my hon. friend the Minister of Militia and Defence is in his seat. As to the question of the tariff and the question of the Audit Act, I can only say to my hon. friend that at this moment I do not propose to discuss these questions. They will be dealt with fully, and to his satisfaction, I hope—though perhaps this is too much to expect—when the Minister of Finance is in his seat. Unfortunately, he has been obliged to go to Europe for domestic reasons.

I may say, Mr. Speaker, that we do not propose this session to have any very serious or important legislation beyond the Act with reference to the Northwest Territories. I agree to everything that has been said by my hon. friend as to the importance of that measure, though I would not subscribe to all his contentions. We propose, if possible, to have a short session. We have not been blessed with a short session for a long time. We have had a session of seven months and another session of five months; but I think, if my hon. friend will make a bargain with me, to make an effort to stop the flow of eloquence on both sides of the House, to keep within bounds, we may hope to see summer in the country, or spring by the time the sugar flows.

Mr. FOSTER. I will go to the sugaring-up with you.

Sir WILFRID LAURIER. We meet at this time under a combination of happy auspices. We have not only a new parliament, but a new Governor General. It has become a trite observation that Canada has been exceptionally fortunate in the character of those who have been entrusted with the high prerogative of representing the Crown in this the first of all the British dominions beyond the seas. Our present Governor General has been received with perhaps more favour than any of his predecessors, and there is cause for this. His Excellency has the good fortune to bear a name dear to all the friends of liberty and constitutional government in every part of the empire, and especially in Canada. The illustrious name of Grey recalls the name of the great man whose persistent energy wrung from unwilling peers and a reluctant king the measure of reform which changed the face of England, which averted a revolution, and which transferred the government from a class to the nation. The name of Grey also recalls to the people of this country the illustrious names of Durham and Elgin—the name of the man whose bold genius conceived and designed the policy which has revolutionized the colonial system of England by transferring the government of Canada from the hands of a grasping oligarchy to the people themselves ; and the name of the man whose strong courage carried that policy to a successful issue. Therefore, I say we meet under a combination of happy circumstances, and there is reason to hope and expect that the illustrious name of Grey will be associated with still further blessings to the people of Canada.

Mr. W. F. MACLEAN (South York). Mr. Speaker, it is not my intention to continue the line of banter which has more or less characterized the preceding speeches. I intend just for a few moments to ask the attention of the House to some incidents of the recent election in this country. If there is one thing that may be taken as a lesson to us from that election, it is this—that in it there disappeared, especially in my own province of Ontario—a province which I am glad to say did not send a majority in favour of the present government, as was stated by the hon. member for Pictou (Mr. Macdonald)—a number of gentlemen who forgot why they had been sent to parliament. They had forgotten what representative institutions in this country mean. They had forgotten that they were sent here to represent the people. They thought they were sent here to represent the interests of great corporations, and their constituents found them out, and they have disappeared from the public life of this country.

Without presuming to give any advice to the new men in this House, I would say to them, no matter on what side they may be, that more and more is it becoming incumbent on the representatives of the people to give some concern to the interests of the people rather than the interests of corporations. Only the other day I met a very worthy friend of mine who occupied a seat in this House in the last parliament, who came from Ontario, and supported hon. gen-

tlemen opposite. I said to him: My good friend, you made a very good impression in this House, but you devoted too much of your time to standing well with your party here, and as far as I could gather there was a good cabinet timber in you; but you forgot just one thing—that you should have devoted your time in this House rather to cultivating your constituency than to promoting your standing in your own party. Had you done so, you would not have come to grief. Well, he replied, I have learned the lesson, but learned it too late.

. It is fitting on an occasion of this kind to review for a moment the trend of parliamentary institutions in this country. There was a statement made in the 'Saturday Review,' an English publication, only a few weeks ago, in dealing with the conditions in England, which applies equally well to Canada. The remark was this, that parliament, and especially the House of Commons, was growing more and more into a mere electoral college for the re-election of a cabinet which was to conduct public affairs and introduce and carry any legislation that was to be carried. It is becoming more and more evident every day, I regret to say, that the House of Commons, whether in England or Canada, is becoming simply an electoral college for the purpose of choosing a cabinet to conduct the affairs of this country. If that is the case, is it not more incumbent on us to see that we choose for that cabinet men of the highest standing, men who have some grasp of the new and progressive ideas which are animating the people? But in that we have up to the present failed. We do not select the best men, but we rather select men who represent the provinces and the interests of great corporations. Parliament is becoming the instrument of great corporations rather than the instrument of the people to realize their wishes. Parliament does not represent the opinions of the people. There are new questions before the people, and the people are thinking about them; but I am sorry to say that the views of these people are not voiced in this parliament. In the United States the same condition exists. There they have great economic problems, great problems of transportation to deal with, and the men appointed to deal with them are not dealing with them in the interests of the people. Take the question of transportation. We have often discussed that question, but what have our discussions amounted to? More and more have the powers of the corporation increased, more and more have the grievances of the public increased in corresponding ratio, and yet parliament seems to be powerless to apply a remedy. Parliament pays too much attention to the interests of the corporations and not enough to the grievances of the people. I take it to be my duty in this parliament, as I considered it to be my duty in the last, to keep prominent the fact that parliament is an instrument whereby the grievances of the public may be remedied, and to urge upon the government to give their attention to those grievances. There is no mention in the speech from the Throne of any intention to deal with the transportation question, yet that question is more of a grievance to-day than it ever was, and more in need of some official regulations by which the great corporations will be compelled to treat the public fairly. For fifty years we have had the Grand Trunk Railway running along the lake towns of Lake Ontario, yet the people are so disappointed that they are asking the Canadian Pacific Railway to build a rival line. Surely the Railway Commission ought to be able to do something to regulate their grievances, and give the people reasonable transportation, rather than compel them to incur the expenditure involved in maintaining a rival line. Even then the grievances will not be remedied, because there will be a merger. A great question such as that should receive more attention from this parliament, but apparently the whole attention of parliament is rather given to increasing the power of the corporations and placing the people more under their rule. Instead of freeing the people, we are giving the Grand Trunk Railway greater power, in spite of the fact that that company is exercising greater tyranny in Ontario and Quebec than it ever did before. Under the statutes of this country it is bound to carry the people from Toronto to Montreal for two cents a mile. When I put a question twice last session concerning this matter, the Minister of Justice was out of his place. There can be no doubt whatever as to the existence of the law, but that law is not enforced. We are paying immense sums for the maintenance of a Department of Justice and a Department of Railways, but it is the corporations and not the people who are benefiting by the expenditure. We are told that it is not the duty of either of these departments to remedy these wrongs, and the remedy is left to private citizens. We are referred to the Railway Commission, but the government will take no action itself. Take the telephone corporation, one of the worst monopolies which could exist, and which could be brought to book in five minutes by a letter from the government. But the government instead have done their best to strengthen that monopoly. The government could say to these gentlemen: Unless that contract between it and the big railways is repealed, we will have to step in. On Saturday night, speaking in South Ontario, I told the people that if the Hon. Mr. Dryden had been true to his constituents he would have told the Bell monopoly that if they did not remedy the grievance which existed in that constituency he and his government would repeal the legislation under which that monopoly worked in

Ontario. There are a hundred ways of putting an end to monopolies if we have men enough in office willing to do it, but neither the government nor the Liberal party are prepared to do anything. Neither will take the requisite steps to secure to the people travelling between Montreal and Toronto the two-cent rate to which they are entitled. These monopolies are the curse of parliament and the country. From time to time we have the doctrine laid down that parliament ought not to interfere. But I contend that it is the duty of parliament to regulate every one of these corporations, and give a warning to any corporation which is not treating the public fairly, that it must mend its ways or we will wipe it out of existence. Instead, however, of giving these corporations a warning, we give them additional concessions every time they ask for them, and the public are told to go into the courts and recover their rights if they can, but that they need expect no assistance from the Minister of Justice or the Minister of Railways.

There is another point to which attention has been called of late, and which is well worthy of attention, and that is that in the United States, whose institutions we sometimes think but little of, they have what is known as the grand jury, which is possessed of powers of inquiry at important stages. In this country it was left to a private citizen to investigate the shameful ballot-box frauds that were attempted in the recent election. We were told that the Minister of Justice was active in the matter but still it was left to a private citizen to expose the crime that had been attempted. Had we had a grand jury system as in the United States, the Crown Attorney could have issued a warrant and an investigation could have been held. And the same with other scandals in the recent election. But, as things are, there is no promise of an investigation there is no likelihood of the air being cleared through the action of any one identified with the government.

Returning for a moment to the position of railway corporations and their influence, we find that the greatest evil prevailing in the United States to-day in connection with railroading is the granting of discriminating rates in favour of certain corporations. There are great trusts in the United States, and these have been built up by railroad discriminations. The people of the United States are trying in some way to stop these discriminations. The plan that they have adopted is that of establishing a court such as our Railway Commission. But this plan has not succeeded. The president has been forced to take up the question. iBut the public there see more and more clearly that the only substantial cure is in government ownership of the railways. And that, I believe, is equally true of this country. It is true that hon. gentlemen opposite say they do not believe in government ownership. But government ownership is the new principle of this century of which the right hon. Prime Minister professes to be the exponent. He has not read aright the sentiment of the country if he thinks that government ownership is not the only cure of the grievances arising from the operation of railways in this country and in the United States. But, instead of proposing government ownership, the right hon. gentleman leaves us in doubt. As the hon, member for North Toronto (Mr. Foster) has pointed out, we are entitled to an explanation in regard to our state-owned railway, the Intercolonial. Is the rumour true that that railway is to be given over to the Grand Trunk ? We know that it is true that when the opportunity presented itself recently to couple up the Canada Atlantic with our state-owned road, the government failed to improve that opportunity, thereby injuring the interests of the people and of the people's railway. The government had the opportunity of strengthening the Intercolonial, but apparently their policy is to let that road run down and turn it over to the Grand Trunk Pacific. Such a policy is not in line, I believe, with the demand of the times. The people see that there is no cure for the transportation problems of this country except in government ownership. And if gentlemen opposite think they have a mandate from the people to destroy government ownership, I venture to tell them that they are mistaken. There is a party in this country, a national, a growing party, a party favoured by the young men of Canada, which holds that the best thing that could happen to this country would be the nationalization of the Grand Trunk Pacific. And the agitation to nationalize that railway at an early stage of its career will go on. The carrying out of that policy will give hope of relief to the people, and especially to the people of Ontario and Quebec. The grievances of these people against the Grand Trunk to-day are worse than ever they were. The grievances of Toronto and Montreal, the grievances of the manufacturers and the shippers and other people who live along that line are constantly increasing, and the feeling of these people is that state-ownership of that great railway is the only cure for those grievances.

Reference has been made to the promise of increased autonomy to the Northwest. It is high time that this idea should be carried out. I hope that the measure will be a wide one, and one that will allow for the growth and development of that country. But when we speak of increased autonomy for the Northwest, I think there is something to be said of the need of greater autonomy for the Dominion. The time has come when the bounds of our powers as a country should be widened. I am not afraid of the future and of the problems it will present for solution. I am not afraid to say that Canada should be more autonomous than she is to-day. I am not afraid to say that

the time will come when the Governor General will disappear, and Canada will be an independent state under the Crown of Great Britain, and when the parliament of Canada will make the constitution of Canada, instead of that constitution being made on the other side of the water. I am not afraid to say that I hope to see the day when our own Supreme Court will be the court of final appeal. I am not afraid to say that I hope to see the day when Canada will make her own commercial treaties under the British Crown. Nor am I afraid to say that questions like this should claim some of the time of members of this House. Mention has been made here to-day of our imperial relations, and I believe a proposal will be brought before this House dealing with that subject. My ideas are changed somewhat from what I see in the press. The trend of public thought, as I read the signs of the times is in the direction of establishing a British empire made up of free and independent states under the Crown of England and working, not through a great imperial council, but through negotiations betwen the governments of these free and independent states. Therefore, it becomes more and more necessary that the governments chosen by these electoral colleges that, I am sorry to say, parliaments are becoming, should be men of the highest character, men of the most progressive ideas, men who fairly and truly represent the people. The great thing in parliamentary life is to concentrate and devote oneself to carrying into effect the views of the people who send us here, keeping their interests in view and giving effect to new and progressive ideas. In the thirty-eight years of confederation we have made great progress. But there is greater progress to be made, there are new ideas in the minds of our people to be carried into effect. There are visions to be realized; some of these visions are almost facts to-day. I trust that the new members, especially the younger men among them, will devote some of their time and their consideration to these newer questions, and especially the question of regulating the rights and powers of the corporations that have been chartered in this country.

Now, every citizen must be struck with the great progress that Canada has made. Every citizen of this country will be glad to know that our banks are becoming more and more successful, and that nearly all of them are looking forward to increasing their capital. Bank after bank is now increasing its capital, bank after bank is in a position to say that its reserve fund is almost equal to its paid-up stock. I believe that the great prosperity of the banks of the Dominion is attributable to their management. But if the banks are developing their capital and are increasing their profits, as I believe they are, has not the time come when this nation ought to share in the great prosperity attending the banks, and that the issue of national notes should be increased at least in the same proportion as the banks are prosperous and are increasing their capital? It is true that the government took power two years ago to increase the issue of national notes and take over the $5 and $10 bill circulation. To my mind I think the sentiment of Canada to-day is in favour of $5 and $10 notes being national notes, and of no others passing current in this country. That would help to uphold our currency and our banking system, it would help to uphold it in the United States where they throw discredit on our bank bills. I believe the time has come when the government, and I mean especially the Minister of Finance (Hon. Mr. Fielding), ought to form some advance policy in regard to that subject; and I trust when the Minister of Finance returns he will be able to give us some information in regard to it.

The right hon. gentleman to-day paid a great tribute to the new Governor General, and said that his ancestors had been identified with bringing about a change of government in England from a class government to a government by the people. The same thing ought to be done in this country to-day. We have not any longer a government of the people as we ought to have. We have to-day a government of corporations, aided and abetted by the Liberal party, and there is an outcry among the people against it; and the right hon. gentleman, with the great majority he has behind him, will be neglectful of his duty, will be recreant to Liberal principles, and recreant to these examples he has held up to us of what Liberals have done in the old country, if he does not try in some way to recover the rights of the people, to compel a respect for their rights on the part of this new oligarchy that has sprung up in this country, by which I mean a government by corporations. The people are crying out for their rights. To-day the press of Canada is not free. There was a time when there was hardly a corporation owned newspaper in this Canada; to-day corporations own most of the newspapers of this country, or at least control them and use them in order to paralyse public opinion in their own interest. Let any man who is a close observer look into the inner history of these newspapers and he will be more than surprised to learn that the press, supposed to be the guardians of the people, has passed under the control of great corporations. And there is this singular thing about it, that every one, or nearly every one, of those newspapers which have passed under the control of corporations are outspoken in their support of hon. gentlemen opposite. But whether the press is identified with one party or the other, this intimacy between the press and the corporations, this intimacy between the corporations and the public men of this country, is causing the people a considerable amount of alarm.

Mr. LOGAN. The hon. gentleman means the Tory press, does he not ?

Mr. MACLEAN. The hon. gentleman can tell us more about that later on. I believe he has filed a declaration in connection with his election that will bring that out, he says he is possessed of the facts. Now, Mr. Speaker, I have only this to say, that I intend throughout this session, on every reasonable occasion, and within the decorum of the House, always to press upon the House the need of giving more attention to the grievances of the public instead of devoting so much of our attention to the aggrandizement of corporations. There are public grievances, they are evident to us all, and we have a great duty to assist the people in some way to recover their rights. I am sorry that the Minister of Justice (Hon. Mr. Fitzpatrick) thinks it is not his duty to enforce the law unless its violation has been pointed out to him. He resembles the Attorney General of Ontario, Mr. Gibson, in his conception of his duty about enforcing the law. We have a Minister of Railways, yet there seems to be no endeavour on his part or on the part of the Minister of Justice to get things in order. We have a Railway Commission to-day, and it is almost broken down. Why is not the vacancy on that commission filled ? Why is not that commission running ? There has been no reference made to it to-day. That matter may be discussed later on altogether different lines. But the fact is that to-day that Railway Commission that was to do so much is not performing its duty, it is still without a chief ; and the people all through the west, as well as the people in my own constituency, are very much concerned about that Railway Commission. Why has it not its full quota of commissioners, and why are its judgments not being rendered ? The Minister of Justice and the Minister of Railways should have had that commission in running order immediately after the resignation of Mr. Blair. For some reason it is not in running order. An explanation, I hope, will be given later on. But it all comes down to this, that there is no movement on the part of the government or any of its members to do anything to rectify public wrongs; their efforts seem all to be directed towards strengthening the corporations in their tyranny over the public interests. Now, Mr. Speaker, the people are well aware that parliament is to-day fully seized of the power to remove every grievance that exists. For every legal wrong there is a legal remedy, and parliament is the instrumentality for accomplishing that end. As I said before, it is my intention this session, and as long as I hold a seat in parliament, to direct the attention of the House to these grievances; I should try in some way to get the members of this House to come back to the basic principle of representation, to convince them that we are here to rectify grievances, to rectify the wrongs of the people, especially when those grievances and those wrongs are greater than any constitutional grievances, that we have suffered from in the past. True they may be economical grievances, but an economic and physical grievance stands in as much need of rectification as any other. The Liberal party pride themselves on having done much to remove constitutional grievances, but the economic grievances of the people have never received their attention. They have theories for dealing with the trade question, and we have heard it stated here to-day that their theories have been abandoned. As with trade, so in regard to the other things I have mentioned here to-day, you cannot deal with them theoretically, you must deal with them by legislation, not in the interests of a selected class but in the interests of the whole people.

Motion agreed to.

Rt. Hon. Sir WILFRID LAURIER (Prime Minister) moved :

That the said address be engrossed and presented to His Excellency the Governor General by such members of this House as are of the Honourable the Privy Council.

Motion agreed to.

SUPPLY.

Hon. WM. PATERSON (Minister of Customs) moved :

That this House will on Tuesday next go into committee of the whole to consider of a supply to be granted to His Majesty.

Motion agreed to.

WAYS AND MEANS.

Hon. WM. PATERSON (Minister of Customs) moved :

That this House will on Tuesday next go into a committee of the whole to consider of the ways and means for raising a supply to be granted to His Majesty.

Motion agreed to.

CHAIRMAN OF THE COMMITTEE OF THE WHOLE.

Rt. Hon. Sir WILFRID LAURIER (Prime Minister) moved :

That Charles Marcil, Esquire, member for the electoral district of Bonaventure be appointed chairman of the committees of the whole House.

Motion agreed to.

REPORTS PRESENTED.

Public Accounts of Canada for the year ending June 30, 1904.—Hon. Mr. Paterson.

Trade and Navigation Tables for the Dominion of Canada for the fiscal year ending June 30, 1904.—Hon. Mr. Paterson.

Report of the Census, 1901, vol. 2, relating to natural products.—Hon. Mr. Fisher.

Report of the Department of Inland Revenue for the year ending June 30, 1904 : 1, excise; 2, weights and measures, gas and electric light.—Mr. Brodeur.

The Civil Service List of Canada.—Rt. Hon. Sir Wilfrid Laurier.

ADJOURNMENT—BUSINESS OF THE HOUSE.

Rt. Hon. Sir WILFRID LAURIER moved the adjournment of the House.

Mr. FOSTER. Before that motion is carried, I was going to ask my right hon. friend as to the state of these different reports. Probably the answer has already come down with reference to our mutual friend's report, although I think the Auditor General's Report has not yet appeared. Is it supposable that it will be ready in a short time ?

Sir WILFRID LAURIER. The Auditor General's Report has not to be laid on the table immediately on the assembling of the House. He has fourteen days in which to lay his report before the House. I have not a great deal of information, but I can hardly hope that the report of the Auditor General will be laid down inside of that day.

Mr. FOSTER. I suppose my right hon. friend is hardly able to say at what period the real Bill of the session will be ready for us.

Sir WILFRID LAURIER. Yes, I think I may say that the Bill will be presented at an early day, but I observed from the proceedings which have taken place in caucus recently that we are to have the leader of the opposition again with us, and I think it will be proper to wait until the new leader of the opposition is seated. It is an important measure.

Mr. FOSTER. I hope my right hon. friend will not abate any of his diligence in waiting for the new leader of the opposition. He will soon be here. I would not like my right hon. friend to have that excuse for delaying an important measure of that kind. What important business will be taken up to-morrow ?

Sir WILFRID LAURIER. To-morrow, on the motion for the adjournment, I propose to give my hon. friend from South York (Mr. W. F. Maclean) the information he has sought for in regard to the filling of that vacancy on the commission.

Mr. FOSTER. Is that all ?

Sir WILFRID LAURIER. Yes, that is all for to-morrow.

Motion agreed to, and House adjourned at 6.05 p.m.

Sir WILFRID LAURIER.

HOUSE OF COMMONS.

TUESDAY, January 17, 1905.

The SPEAKER took the Chair at Three o'clock.

FIRST READING.

Bill (No. 5) respecting Census and Statistics.—Mr. Fisher.

INSPECTION AND SALE OF SEEDS.

Hon. SYDNEY FISHER (Minister of Agriculture) moved that the House go into Committee of the Whole to consider the following proposed resolution :

Resolved, That it is expedient to pass an Act respecting the inspection and sale of seeds of cereals, grasses, clovers, or forage plants, sold for the purpose of seeding, containing the seeds of certain weeds ; establishing a standard of timothy, red clover, and alsike seeds, marked No. 1, or otherwise designated as being of first quality ; providing for the examination of such seeds, and providing penalties for contraventions of the Act.

Mr. FOSTER. It would be well if the hon. gentleman would explain briefly what he proposes to do. That will at least give the appearance of some business being before the House.

Mr. FISHER. For the benefit of the new member opposite, I shall be happy to repeat the explanation which I gave in the former parliament. This bill has been called for by reason of certain information obtained as a result of a careful investigation into the business of selling seeds to our farmers. The intention is to control and regulate that business in the view of securing pure seed. This result cannot be obtained under the ordinary methods of trade, and therefore it is not possible for the purchaser at present to judge the quality of the seeds he is buying. It has therefore been found advisable to establish a standard and prevent the selling of any seeds which contain the seeds of certain varieties of weeds. Some years ago my attention as minister was drawn to the quality of the seeds sold and to the great admixture which they contain of the seeds of bad weeds. Owing to this admixture the growth of certain kinds of weeds was promoted in localities where formerly such weeds were unknown. I caused an investigation to be made, and was startled by the results. It was shown clearly that a large proportion of the seeds sold to the farmers of Canada did contain a considerable admixture of the seeds of noxious weeds ; and in the majority of cases the farmer was not only not sowing what he thought he was, but was actually sowing the seeds of plants injurious to the crop he hoped to raise. The last parliament, in view of the facts disclosed, decided that some restriction or control should be exercised over the sale of seeds, and the prin-

ciple of a bill, such as the one I propose to introduce, was adopted on two different occasions. Owing, however, to the pressure of other business, these Bills did not become law; but I hope that in introducing the present measure at this early day of the session, it will become law before this session prorogues. The provisions of the Bill are not as stringent as many think advisable, but I do not wish to proceed too rapidly. There having been practically no supervision hitherto, I think that this measure will be a great step in advance and sufficient for the present, and will, I hope, lead to the complete elimination of the spreading of weeds in Canada through the seed purchased by our farmers. Briefly, the Bill provides for the absolute prohibition of the sale of seeds which contain certain well known widely spread weeds, and it provides further for a standard of seed which shall be sold as No. 1 or of extra quality. It provides further for the imposition of penalties to be imposed for contravention of the Act.

There are some details which, I think, it unnecessary to go into at this stage, but which I shall be glad to explain and discuss when the Bill is before the Committee of the Whole, as is the usual course. I am glad to say that, on former occasions, when the Bill was discussed, the principle of it was endorsed by gentlemen of all shades of political opinion in the House. It is true that some of the provisions were considered to be too stringent, and some to be difficult of enforcement. I have taken advantage of the discussion which took place and of the representations which have been made by members on both sides of the House, and have, to a certain slight extent, modified the former Bills; and I am now proposing what I believe to be a thoroughly practical and workable measure and one which will accomplish the object sought, so far as it can be accomplished at one step by legislation.

Mr. W. F. MACLEAN. Will the hon. gentleman (Mr. Fisher) please tell us from what quarter the opposition to the Bill mainly came?

Mr. FISHER. I would not like to say there was any real opposition to the Bill. There was criticism of the details, and there were objections on the part of some dealers in seeds who represented that they could not carry on their business under certain provisions of the Bill that was formerly introduced. It was also thought possible that there would be danger of hardship on the part of the people who, in good faith, sold seeds at second or third hand. I think that, in the Bill which I am now proposing, I have to a large extent met these objections. But I must say frankly that if this Bill did not interfere with some of the practices of the seed trade of to-day, the Bill would be useless and unnecessary. It is because interference with the practices of some of those engaged in the seed trade is necessary that I feel I must introduce the Bill.

Motion agreed to, and the House went into committee on the resolution.

Mr. FISHER moved the adoption of the resolution.

Mr. W. F. MACLEAN. I have taken some interest in this Bill in previous sessions. This is the third consecutive year when the matter has come before us. It is incumbent upon the minister to have the legislation passed and put in force. It is hardly worth while to take up the time of the House session after session with a discussion which ends in nothing. No object is to be gained by merely affirming a given principle three years in succession.

Mr. FISHER. I hope, with the co-operation of hon. members on both sides to carry out my purpose this session and make this Bill law. I shall be disappointed indeed if this cannot be effected. Of course, as I say, I can only do this with the co-operation of the members of the House, my hon. friend (Mr. W. F. Maclean) included.

Resolution reported.

REPORTS PRESENTED.

The King's Regulations and Orders for the Militia of Canada.—Sir Wilfrid Laurier.

Report of the Department of Labour for the year ending June 30, 1904.—Sir Wilfrid Laurier.

Report of the Postmaster General for the year ending June 30, 1904.—Sir Wilfrid Laurier.

Ordinances of the Yukon Territory for the year 1904.—Sir Wilfrid Laurier.

Statement in pursuance of sec. 17 of the Civil Service Insurance Act, for the year ending June 30, 1904.—Hon. Mr. Paterson.

Report of the Commissioner of the Dominion Police for the year 1904.—Hon. Mr. Fitzpatrick.

ADJOURNMENT—CHAIRMANSHIP OF THE RAILWAY COMMISSION.

Right Hon. Sir WILFRID LAURIER (Prime Minister). I stated yesterday to my hon. friend from South York (Mr. Maclean) that I would make a statement with reference to the filling of the vacancy caused by the resignation of Hon. Mr. Blair of the chairmanship of the Railway Commission. My hon. friend made some remarks yesterday on what he seemed to consider the negligence of the government on leaving that vacancy unfilled. I feel sure that when I have laid before the House the circumstances and shown why the position has not yet been filled, he will agree with me that the government is not in any way to blame. I am aware that some serious in-

convenience has resulted from the fact that the Commission is now composed of only two members. A good deal of the business of the Commission has been discharged by the present members, Messrs. Bernier and Mills. But, unfortunately, on some very important questions, especially on some relating to the city of Toronto, the Commissioners do not agree. Inconvenience has been occasioned to certain citizens of Toronto owing to the fact that no decision of the questions on which there is a difference of opinion between the members of the Commission can be reached. The government is aware that such an important position should be filled at the earliest moment. After the resignation of Mr. Blair, as soon as the government could be assembled in Ottawa—the resignation having taken place during the election—the government sought to find some person who would be suitable for the position. They came to the conclusion that it would be well to offer the chairmanship of the Commission to an eminent member of the Supreme Court, a gentleman who, I believe, is qualified in every respect to discharge the important duties which would devolve upon him. However, we were told by the gentleman in question that it was not possible for him to contemplate the acceptance of this position at that moment or for some weeks, as he believed it would not be in accordance with the duties he is now performing to leave his present position at this time. He was engaged, in the consideration of several cases which had been heard by him and by the court in the previous term, and if he accepted our offer at the moment, the cases which he had heard could not be disposed of, and great inconvenience to suitors would result. But as the gentleman informed us he could not properly consider our application till after the first week of February, we thought it only fair and right to wait until the first week of February before we approached him again, when we hope that our offer will be accepted. I beg to move that the House do now adjourn.

RESIGNATION OF MR. BLAIR.

Mr. W. F. MACLEAN. I thought in connection with this matter the right hon. the Prime Minister (Sir Wilfrid Laurier) would have made some explanation to the House and to the country of the resignation of the late chairman of the Railway Commission. It was a very sudden resignation, and took place in the midst of a political fight, and requires, as I think, an explanation to the country. In fact, the organs of hon. gentlemen opposite from the 'Globe' down to the Montreal 'Witness' are on record as demanding an explanation of that circumstance; and I trusted that the explanation would be forthcoming to-day. Probably later on in the session, and in connection with the appointment of a successor to the late chairman of the Railway Commission, we will have that explanation. It is certainly due to the country, it is certainly due to the right hon. gentleman and his friends to make that statement at the present moment. But I will wait for what is to come; certainly an explanation ought to be forthcoming, and probably will be forthcoming. As to the statement of the right hon. gentleman in seeking elsewhere and in another court for a man competent to fill the position, he is not going to work in the right way. He is robbing Peter to pay Paul, he is unmanning the Supreme Court to man the Railway Commission, which is not good policy. I do not think that it is good policy to shift the highest judicial officers from one court to another, not that I lack confidence in the competence of any member of the Supreme Court to be chairman of the Railway Commission. But it is evident now that the Railway Commission is to remain unmanned for at last three weeks more, although the great commercial interests, the great railway interests are inconvenienced by the present condition of affairs. It also follows from what the right hon. gentleman said, that the Supreme Court will then for a long period remain unmanned, without its full quota of members to enable it to discharge the duties that we expect from it. So that on the whole the explanation made here to-day is in no wise satisfactory, and I trust that a much better explanation in several directions will be offered at a very early day.

Hon. GEO. E. FOSTER. There is another point which has been raised with regard to which the right hon. gentleman might give us some information. It has been stated in the newspapers that some cases relating to the Northwest, for instance, which were heard by three commissioners before the resignation of Mr. Blair, will have to be reheard, and that there is no provision in the Act, no method by which these cases, having once been heard before the resignation of the chairman, can be adjudged by the remainder of the commission, or by the commission when it is filled by the appointment of another and third person. That of course would lead to a great deal of delay and a great deal of hardship. If that is so, something must be wrong with the Act; if it is not so, why, of course the public will be relieved of the apprehension which has been, I think, rather widespread.

Sir WILFRID LAURIER. I am afraid the statement which has been made by my hon. friend (Mr. Foster) is only too true, and that the applications which were heard by three commissioners, but which were not disposed of when Mr. Blair resigned, may have to be heard again. A new commissioner must be appointed, and, of course, before these cases are disposed of he must hear the parties for himself. That rule applies in all courts under similar circumstances. One of the reasons why the gentleman we applied to refused to take the place on the

commission vacated by Mr. Blair was that he had already heard several cases in the Supreme Court, which would have to be reheard if he suddenly resigned his position. We thought it was inevitable that some parties should suffer, and that it was better that the cases he heard should be disposed of, so that no one might be inconvenienced by the change of officers. I do not agree with my hon. friend (Mr. W. F. Maclean) that in offering the position to a judge of the Supreme Court we were robbing Peter to pay Paul. I think nothing could be more in accordance with the good administration of justice, and a proper administration of the Commission, than to select a gentleman such as we have selected, who has experience not only in legal matters but also experience to a large extent in railway matters. When the time comes to make the appointment, as it will come within a short period, I think the selection will meet the approval of even our hypercritical friends on the other side of the House. I am sorry also that I cannot gratify the—what shall I say ?—the rather fastidious curiosity of my hon. friend with regard to the manner of Mr. Blair's resignation. He expected me to give him information upon that. I may say to my hon. friend, and perhaps it is notorious to him, that I was not consulted with regard to that resignation, and I am at a loss to give him any explanation of it. But since we are in the way of making confessions, I rather expected that my hon. friend would be in a position to give us some information himself, because I have read a good deal of what I supposed to be information in a certain newspaper with which my hon. friend is connected. But if the hon. gentleman was only speaking from hearsay, that is another thing. If he has any information he can give it to us; for my part I have none.

Mr. MACLEAN. The House will pardon me a moment. The hon. gentleman's friends are in possession of a great deal of evidence. The Toronto 'Globe,' the Montreal 'Herald,' Senator Dandurand—if I may mention the name of a member of the other House—have offered explanations of that resignation, and in connection with their explanations, have occurred the names of cabinet ministers in this House, and very serious charges in connection with this matter. I think, therefore, it is incumbent on the right hon. gentleman, who is the custodian, the guardian of the honour of this House, and the guardian of the honour of the highest judicial office, at least the highest paid judicial office in this country, to defend the occupant of that office and to protect the honour of the office. It is up to him to make a statement, not to me.

Sir WILFRID LAURIER. Mr. Speaker, I have only to say that I have never heard any charges made against any member, or against any minister.

An hon. MEMBER. This is the time and place to make them.

Hon. CHARLES FITZPATRICK (Minister of Justice). Yes, come on now.

Sir WILFRID LAURIER. Nobody has come forward.

Mr. FITZPATRICK. Come right on.

BUSINESS OF THE HOUSE.

Mr. FOSTER. May we know what important business will be taken up to-morrow ?

Sir WILFRID LAURIER. To-morrow is not a government day, it is a private member's day.

Mr. FOSTER. May I ask the hon. gentleman if he proposes to lay the estimates on the table of the House very soon ? We are very anxious to get to work.

Sir WILFRID LAURIER. Not more anxious than I am. To-morrow I will be able to gratify my hon. friend's desire for work ; to-morrow the estimates will be brought down.

Motion agreed to, and House adjourned at 3.35 p.m.

HOUSE OF COMMONS.

WEDNESDAY, January 18, 1905.

The SPEAKER took the Chair at Three o'clock.

MESSAGE FROM THE GOVERNOR GENERAL—MAIN ESTIMATES.

Rt. Hon. Sir WILFRID LAURIER (Prime Minister) delivered a message from the Governor General.

Mr. SPEAKER read the message as follows :

GREY.

Government House,
Ottawa, January 18, 1905.

The Governor General transmits to the House of Commons estimates of sums required for the service of the Dominion for the year ending June 30, 1906, and in accordance with the provisions of the B. N. A., 1867, the Governor General recommends these estimates to the House of Commons.

Hon. WILLIAM PATERSON (Minister of Customs) moved that the message of His Excellency and the estimates be referred to the Committee of Supply.

Motion agreed to.

FIRST READING.

Bill (No. 6) to amend the Steamboat Inspection Act, 1898—Mr. L. G. McCarthy—by Mr. A. Johnston.

QUESTION.

FREE TRANSPORTATION OF HAY ON I.C.R.

Mr. KEMP—by Mr. Foster—asked :

Did the government, previous to the third day of November, 1904, give instructions permitting hay to be transported over the Intercolonial Railway free of freight charges ? If so, at what date were such instructions given ?

Hon. H. R. EMMERSON (Minister of Railways and Canals). Instructions were given on October 6, 1904, permitting certain municipalities, under certain conditions, to have hay carried free over the Intercolonial Railway.

PAY OF THE NORTHWEST MOUNTED POLICE.

Sir WILFRID LAURIER moved that on Friday next the House go into Committee of the Whole to consider the following proposed resolution :

1. That it is expedient to provide that the pay of the commissioner and other members of the Northwest Mounted Police shall not exceed the amounts following :—

Commissioner of police, per annum	$3,000 00
Assistant commissioners, per annum	2,000 00
Superintendents, per annum	1,800 00
Inspectors, per annum	1,400 00
Surgeons and assistant surgeons, per annum	1,800 00
Veterinary surgeons, per annum	1,400 00
Four staff sergeants, per diem	2 00
Other staff sergeants, per diem	1 75
Other non-commissioned officers, per diem	1 25
Constables, per diem	1 00
Special constables and scouts, per diem	1 50
Buglers under 18 years of age, per diem	0 50
Working pay to artisans, per diem	0 75

2. That the Governor in Council may authorize extra pay and allowances to be paid to members of the force serving in the Yukon Territory or the unorganized portions of the Northwest Territories.

He said : This resolution has been submitted to His Excellency the Governor General, and he approves the same and commends it to the attention of the House.

Motion agreed to.

ADJOURNMENT—BUSINESS OF THE HOUSE.

Sir WILFRID LAURIER moved the adjournment of the House.

Mr. FOSTER. I suppose that to-morrow we shall take up the estimates.

Sir WILFRID LAURIER. To-morrow is not a government day. But I suppose the business in the hands of private members can hardly be ready for consideration. In that case, we shall take up the estimates, considering first the civil service.

Motion agreed to, and House adjourned at 3.15 p.m.

Sir WILLIAM MULOCK.

HOUSE OF COMMONS.

THURSDAY, January 19, 1905.

The SPEAKER took the Chair at Three o'clock.

QUESTIONS.

RAILWAY STATION IN CHARLOTTETOWN.

Mr. A. MARTIN asked :

1. Has the government decided on a site for the proposed railway station in Charlottetown, Prince Edward Island ? If so, where is it to be placed ?

2. If a site has not been decided upon, is the Minister of Railways going to the province to decide as to the proper site, and when ?

3. If a site has been decided upon, are tenders for construction to be called for, and when ?

Hon. H. R. EMMERSON (Minister of Railways and Canals) :

1. No.
2. Yes, at the earliest opportunity offering.
3. Answered by number one.

VOTERS' LISTS FOR MANITOBA CONSTITUENCIES.

Mr. W. J. ROCHE asked :

Where were the voters' lists for the respective constituencies of Marquette, Selkirk, Macdonald, Portage la Prairie, Provencher, Dauphin, Lisgar, Souris, Brandon and Winnipeg printed ?

Right Hon. Sir WILFRID LAURIER (Prime Minister):

Voters' lists for the constituencies of Marquette, Selkirk, Macdonald, Portage la Prairie, Provencher, Dauphin, Lisgar, Souris, Brandon and Winnipeg were printed by the King's Printer for Canada, at Ottawa, and his imprint is upon all he printed.

SELECT STANDING COMMITTEES.

Mr. HYMAN. Mr. Speaker, I have the honour to present the report of the special committee appointed to prepare and report with all convenient speed, lists of members to compose the select standing committees ordered by this House on Thursday, the twelfth instant, as follows:—

No. 1.—ON PRIVILEGES AND ELECTIONS.

Messieurs

Alcorn,	Lapointe,
Barker,	Laurence,
Belcourt,	Lavergne (Montmagny),
Bennett,	Lemieux,
Bergeron,	Lennox,
Boyce,	Lewis,
Broder,	Logan,
Bureau,	Macdonald,
Carvell,	McCarthy (Simcoe),
Clarke (Essex),	McColl,
Dubeau,	McIsaac,
Dugas,	Monk,
Emmerson,	Mulock (Sir William),
Fitzpatrick,	Northrup,

Geoffrion,
German,
Gervais,
Grant,
Guthrie,
Haggart,
Hall,
Lancaster,
Piché,
Porter,
Pringle,
Rivet,
Sifton,
Stockton,
Tisdale,
Ward.—44.

No. 2.—ON EXPIRING LAWS.

Messieurs

Archambault,
Avery,
Barr,
Black,
Bland,
Bourbonnais,
Boyer,
Carney,
Chisholm,
Copp,
Dubeau,
Ethier,
Finlayson,
Gauvreau,
Herron,
Jackson (Elgin),
Lamont,
McCool,
Martin (Queen's, P.E.I),
Mayrand,
Morin,
Paquet,
Parent,
Seagram,
Talbot (Bellechasse),
Turgeon,
Wilson (Russell).—27.

And that the Quorum of the said Committee do consist of Seven Members.

No. 3.—ON RAILWAYS, CANALS AND TELEGRAPH LINES.

Messieurs

Adamson,
Alcorn,
Ames,
Archambault,
Armstrong,
Avery,
Barker,
Barr,
Beauparlant,
Béland,
Belcourt,
Bennett,
Bergeron,
Bickerdike,
Blain,
Bland,
Bole,
Borden (Sir Frederick),
Bourassa,
Bourbonnais,
Boyer,
Brabazon,
Broder,
Brodeur,
Brown,
Bruneau,
Bureau,
Burrows,
Caldwell,
Calvert,
Campbell,
Carvell,
Chisholm,
Christie,
Clare,
Clarke (Essex),
Clarke (Toronto),
Clements,
Cochrane,
Cockshutt,
Conmee,
Laurier (L'Assomption),
Lavergne,
(Drum. & Arth.),
Lavergne
(Montmagny),
Law,
Lefurgey,
Lemieux,
Lennox,
Léonard,
Lewis,
Logan,
Loggie,
Macdonald,
Macdonell,
MacLaren,
Maclean
(Lunenburg),
Maclean (York, S.),
McCarthy
(Calgary),
McCarthy
(Simcoe,)
McColl,
McCool,
McIntyre,
McIsaac,
McKenzie
(C. Breton, N.),
McLean
(Queen's, P.E.I.),
McLennan,
Marcile (Bagot),
Marcil
(Bonaventure),
Martin
(Queen's, P.E.I.),
Mayrand,
Miller,
Monk,
Morin,
Copp,
Costigan,
Crawford,
Crocket,
Daniel,
Delisle,
Derbyshire,
Desjardins,
Dubeau,
Dugas,
Dyment,
Elson,
Emmerson,
Ethier,
Fielding,
Finlay,
Finlayson,
Fitzpatrick,
Forget,
Fortier,
Foster,
Fowler,
Gallery,
Galliher,
Ganong,
Gauvreau,
Geoffrion,
German,
Gervais,
Girard,
Gladu,
Gordon,
Grant,
Greenway,
Gunn,
Guthrie,
Haggart,
Hall,
Harty,
Henderson,
Herron,
Hughes,
(King's, P.E.I.),
Hughes (Victoria),
Hunt,
Hyman,
Ingram,
Jackson (Selkirk),
Johnston
(Cape Breton, S.),
Johnston
(Lambton),
Kemp,
Kennedy,
Lake,
Lalor,
Lamont,
Lancaster,
Lanctot,
Lapointe,
Laurence,
Mulock
(Sir William),
Northrup,
Oliver,
Osler,
Parmelee,
Paquet,
Parent,
Perley,
Piché,
Porter,
Power,
Préfontaine,
Pringle,
Proulx,
Ratz,
Reid (Grenville),
Riley,
Rivet,
Roche (Halifax),
Roche (Marquette),
Ross (Rimouski),
Ross
(Yale-Cariboo),
Rousseau,
Savoie,
Schell (Glengarry),
Schell (Oxford),
Scott,
Sifton,
Sinclair,
Sloan,
Smith (Nanaimo),
Sproule,
Staples,
Stewart,
Stockton,
Sutherland
(Oxford),
Talbot
(Bellechasse),
Talbot
(Strathcona),
Telford,
Thompson,
Tisdale,
Tobin,
Turgeon,
Turriff,
Walsh,
Ward,
Watson,
White,
Wilmot,
Wilson
(Len'x & Adding.),
Wilson (Russell),
Worthington,
Wright (Muskoka),
Wright (Renfrew),
Zimmerman.—186.

And that the Quorum of said Committee do do consist of Twenty-five Members.

No. 4.—ON MISCELLANEOUS PRIVATE BILLS.

Messieurs :

Alcorn,
Ames,
Avery,
Béland,
Belcourt,
Bennett,
Hunt,
Jackson (Elgin),
Jackson (Selkirk),
Kennedy,
Lake,
Lalor,

Black,
Bole,
Bourbonnais,
Boyce,
Brabazon,
Broder,
Brodeur,
Bruneau,
Caldwell,
Calvert,
Chisholm,
Christie,
Clements,
Cochrane,
Conmee,
Crawford,
Crocket,
Cyr,
Daniel,
Desjardins,
Dugas,
Dyment,
Elson,
Ethier,
Fitzpatrick,
Galliher,
Gauvreau,
Girard,
Gladu,
Gordon,
Greenway,
Gunn,
Guthrie,
Harty,
Hughes (King's, P.E.I.),
Lavergne (Drummond & Arth.),
LeBlanc,
Lemieux,
Logan,
Macdonell,
Maclean (Lunenburg),
Maclean (York S.),
McCool,
McIsaac,
McLean (Queen's, P.E.I.),
Martin (Queen's, P.E.I.),
Martin (Wellington),
Meigs,
Monk,
Morin,
Farent,
Power,
Pringle,
Proulx,
Ross (Yale-Cariboo),
Schaffner,
Schell (Glengarry),
Scott,
Sloan,
Talbot (Bellechasse),
Thompson,
Tobin,
Turgeon,
Turriff,
Walsh,
White,
Worthington—79.

And that the quorum of the said committee do consist of Ten members.

No. 5.—ON STANDING ORDERS.

Messieurs :

Black,
Brabazon,
Brown,
Calvert,
Chisholm,
Clare,
Clements,
Copp,
Demers (St. John),
Finlay,
Finlayson,
Fortier,
Gallery,
Galliher,
Grant,
Guthrie,
Hall,
Hughes (Victoria),
Ingram,
Lake,
Lamont,
Lancaster,
Laurier (L'Assomption),
Lavergne (Drummond & Arth.),
Lavergne (Montmagny),
Law,
Lefurgey,
Maclean (Lunenburg),
Macpherson,
McCarthy (Calgary),
McIntyre,
McIsaac,
Marcile (Bagot),
Martin (Wellington),
Meigs,
Morin,
Reid (Restigouche),
Roche (Halifax),
Roche (Marquette),
Ross (Rimouski),
Smith (Nanaimo),
Staples,
Stewart,
Thompson,
Turgeon,
White,
Wilmot,
Wilson (Lennox & Addington),
Wright (Muskoka),
Wright (Renfrew)—50.

And that the quorum of the said committee do consist of Seven members.

No. 6.—ON PRINTING.

Messieurs

Bennett,
Bergeron,
Clarke (Toronto),
Cyr,
Dyment,
Gervais,
Henderson,
Hughes (Victoria),
Johnston (Cape Breton, South),
Johnston (Lambton),
Lavergne (Drummond & Arth.),
Maclean (York,South),
McColl,
Marcil (Bonaventure),
Oliver,
Parmelee,
Piché,
Préfontaine,
Roche (Marquette),
Ross (Yale-Caribou),
Scott,
Sutherland (Oxford),
Taylor,
Tisdale.—24.

Mr. HYMAN.

No. 7.—ON PUBLIC ACCOUNTS.

Messieurs :

Adamson,
Ames,
Barker,
Belcourt,
Bennett,
Bergeron,
Bickerdike,
Blain,
Borden (Sir Frederick),
Burrows,
Campbell,
Carney,
Cash,
Clare,
Clark (Essex),
Clarke (Toronto),
Cochrane,
Cockshutt,
Costigan,
Daniel,
Demers (St. John),
Desjardins,
Emmerson,
Fielding,
Fitzpatrick,
Foster,
Fowler,
Geoffrion,
German,
Greenway,
Haggart,
Henderson,
Hughes (King's, P.E.I.),
Hughes (Victoria),
Hyman,
Jackson (Selkirk),
Kemp,
Kennedy,
Lancaster,
Lapointe,
Laurence,
Laurier (L'Assomption),
Law,
LeBlanc,
Lennox,
Léonard,
Loggie,
Macdonald,
McColl,
McIsaac,
McKenzie (Bruce),
McKenzie (Cape Breton, North),
Monk,
Northrup,
Oliver,
Piché,
Pickup,
Porter,
Pringle,
Reid (Restigouche),
Riley,
Rivet,
Roche (Halifax),
Savoie,
Scott,
Sifton,
Sinclair,
Sloan,
Smith (Wentworth),
Sproule,
Stewart,
Taylor,
Ward,
Wilson (Lennox & Addington),
Zimmerman.—75.

And that the quorum of the said committee do consist of Twenty-one members.

No. 8.—ON BANKING AND COMMERCE.

Messieurs :

Adamson,
Ames,
Archambault,
Armstrong,
Avery,
Barker,
Barr,
Beauparlant,
Béland,
Belcourt,
Bennett,
Bergeron,
Bickerdike,
Blain,
Bole,
Borden (Sir Frederick),
Bourassa,

Wilson (Len'x & Adding.),
Wilson (Russell),
Worthington,
Wright (Muskoka),
Wright (Renfrew).—122.

And that the Quorum of said Committee do consist of Twelve members.

INSPECTION AND SALE OF SEEDS.

Resolution respecting the inspection and sale of seeds was read the first and second time and agreed to.

Hon. SYDNEY FISHER (Minister of Agriculture) moved for leave to introduce Bill (No. 7) respecting the inspection and sale of seeds.

Motion agreed to, and Bill read the first time.

SUPPLY—STEAMSHIP COMMUNICATION BETWEEN CANADA AND MEXICO.

Hon. WM. PATERSON (Minister of Customs) moved that the House go into Committee of Supply.

Hon. GEO. E. FOSTER. Before the House goes into Committee of Supply, there are two points upon which I would like to have information, if convenient to the ministers. I noticed in newspapers of a

late date a statement that the proposed steamship communication, with mutual subsidies I suppose, between Canada and Mexico, had run up against some difficulty. The minister who has had that matter in charge is in his place, and I would like to know how it stands at present.

Sir WM. MULOCK (Postmaster General). Last spring the Mexican government agreed with the Canadian government to grant a subsidy of $50,000 in gold towards establishing two lines of steamers between Canada and Mexico, one on the Pacific ocean and the other on the Atlantic. The Canadian government, in pursuance of that understanding, asked and obtained a vote from this parliament of $50,000 last session, and the Mexican government did the same. I understand that the Department of Trade and Commerce invited tenders for both services, and received tenders; but the tenders were quite in excess of the total sum of $100,000 gold voted by the two governments.

Mr. FOSTER. Were they monthly services?

Sir WM. MULOCK. Yes, monthly sailings. Negotiations I think, were entered into by the tenderers for the Pacific service—speaking from memory, I think the names were Weir & Co., of Glasgow—with a view of making some modifications in the specifications and details. A representative of that company, after consulting with the Minister of Trade and Commerce, left him, expressing his intention of proceeding to Mexico and presenting some request to the Mexican government. I am not aware if he has yet had this interview with the Mexican government. But when I was in Mexico in the month of December last, the Mexican government informed me that they were much disappointed at the amount of money demanded for the service on the Pacific; and without explaining to me what they had definitely in view, they did suggest that the proposition for completing that contract should stand over for a short time until Sir Weetman Pearson, a very eminent engineer, a man who is carrying on very large works in Mexico for the government, should reach Mexico, and then the government of that country would discuss the subject with him with a view to proceeding with the matter. They have no desire to withdraw from it, but they seem to think that perhaps they could make some arrangements through him that would be helpful to the scheme in view. But they expressed a willingness to grant at their approaching Congress another subsidy of $50,000 in gold, if we would do the same, for the establishment of a line on the Atlantic. That would mean that the Mexican government would contribute $100,000 in gold and we would contribute $100,000 in gold, by which we would get at least a monthly sailing on the Atlantic and on the Pacific. Therefore, as I understand it, there is nothing now in the way of our completing an arrangement for the Atlantic if we can get it within the subsidy; and the Mexican government think they will be able to arrange for the completion of a similar service on the Pacific. I think we may hopefully regard the prospects and that we may have both services in operation within a reasonable time.

ARBITRATION BETWEEN GOVERNMENT AND GRAND TRUNK RAILWAY COMPANY.

Mr. FOSTER. I do not happen to understand it myself, and on asking some of my fellow members I find them to be quite as much in the dark with reference to the subject as I am, but we see frequent references in the papers to an arbitration taking place between the Dominion Government Railways and the Grand Trunk Railway Company. Under what authority is that arbitration proceeding, and will the results, in so far as the evidence is concerned, be presented to the House when the arbitration is finished? Is it by commission or by virtue of the agreements themselves between the two parties?

Hon. H. R. EMMERSON (Minister of Railways and Canals). The arbitration in question is being held by agreement between the government and the Grand Trunk Railway Company. The question was submitted mutually to the arbitration of three gentlemen. This occurred in 1903—I think in the fall of 1903—and the arbitration has been continuing, but the question as to submitting the evidence to this House has not been considered by myself; it has not come before me at all yet. It is sub judice at the present time.

Mr. FOSTER. Then as I understand it this is something that has taken place by virtue of the action of this government?

Mr. EMMERSON. Yes.

Mr. HAGGART. I understand that there was a difference or dispute between the Intercolonial Railway and the Grand Trunk Railway Company as to the carrying out of the contract entered into between the Intercolonial Railway and the Grand Trunk Railway. I understand that the government entered an action in reference to it. Is this arbitration being conducted by a committee or parties appointed by the Exchequer Court, or by any other court, for the purpose of taking evidence instead of leaving the question to the courts to decide?

Hon. CHAS. FITZPATRICK (Minister of Justice). This is an arbitration in respect of differences that have arisen between the Grand Trunk Railway Company and the government under diverse contracts entered into at different times. One of them was

entered into in 1879 in connection with the purchase of the line of railway from Rivière du Loup to Point Lévis, and another has arisen out of the purchase of the extension of the line from Lévis to St. Hyacinthe. The contracts themselves provided for a reference to arbitrators of any disputes that might arise under the contracts. There has been no action entered by the Crown, but the Crown has had claims against the Grand Trunk Railway arising out of what they claim to be the non-fulfilment by the company of these contracts. I am speaking from memory but I think it would be better that I should bring down the references.

Mr. FOSTER. Yes.

Mr. FITZPATRICK. That would be more satisfactory because this occurred two years ago and I cannot recollect the particular terms of the references.

Mr. BARKER. I think that last session the hon. Minister of Justice did bring down several papers relating to these arbitrations.

Mr. FITZPATRICK. I do not remember.

Mr. BARKER. Or perhaps the right hon. First Minister did, and in these papers I think there was a very considerable claim made by the government in respect to the diversion by the Grand Trunk Railway Company of traffic that ought to have been given by the Grand Trunk Railway Company to the Intercolonial Railway.

Mr. FITZPATRICK. They arose out of the agreements in connection with the purchase of the Drummond County Railway.

PURCHASE OF THE CANADA ATLANTIC RAILWAY.

Hon. JOHN HAGGART. I notice by the papers the alleged purchase by the Grand Trunk Railway Company of the Canada Atlantic Railway. I wish to know whether the government are parties to that contract, or if they have entered into any arrangement with the Grand Trunk Railway Company for running Intercolonial Railway trains over that part of the Canada Atlantic Railway which has been purchased by the Grand Trunk Railway, or whether this is a transaction entirely between the Grand Trunk Railway Company and the Canada Atlantic Railway Company?

Sir WILFRID LAURIER (Prime Minister). As far as we know it is entirely between the Grand Trunk Railway Company and the Canada Atlantic Railway. The government has nothing to do with it.

Motion agreed to and House went into Committee of Supply.

Charges of management, $241,400.

Mr. FOSTER. If the hon. minister would be kind enough to leave item No. 1 as I should like to have the hon. the Minister of Finance (Mr. Fielding) here when it is taken up, and allow us to go on with No. 2, we may get through with that.

Mr. DEPUTY SPEAKER. Item No. 1 stands.

Civil government—Governor General's Secretary's office, salaries, $11,450.

Mr. FOSTER. What changes are there?

Hon. WM. PATERSON (Minister of Customs). There is an increase of $200.

Mr. FOSTER. Where is that?

Mr. PATERSON. Page eleven, I think.

Mr. DEPUTY SPEAKER. Page eight.

Mr. FOSTER. I have the page, but I have not the names of the parties who are receiving the increases or the reasons why the increases are granted.

Mr. HAGGART. I would suggest that instead of passing them en bloc we follow the course we always pursue and pass every item separately.

Mr. PATERSON. There are four statutory increases. Does the hon. gentleman want to know the names?

Mr. FOSTER. Yes, we are very anxious to have all the information.

Mr. PATERSON. The names have not been asked for before and the officer has not therefore asked for them but he can do so. These are four of the clerks who are employed there and who are getting statutory increases.

Mr. FOSTER. $50 each?

Mr. PATERSON. Yes.

Mr. FOSTER. To which they are entitled?

Mr. PATERSON. To which they are entitled.

Mr. FOSTER. Has there been a report from the chief of the branch on the matter?

Mr. PATERSON. The Governor General's secretary applied for the increases.

Clerical and other assistance, $2,000.

Mr. FOSTER. There is an increase of $100 in this and we should like to have some explanation of it.

Mr. PATERSON. My opinion is that some of the officers who are paid out of contingencies are getting an increase.

Mr. FOSTER. I do not want to be at all unreasonable but every department in asking for supplies should at least give a schedule of the changes in the votes so that the minister who has the estimates in charge will be able to give information.

Mr. PATERSON. I have no doubt that where a minister is at the head of the department that will be done.

Mr. FOSTER. Sometimes even the somewhat irresponsible departments have to be curbed a little.

Printing and stationery, $1,200; sundries, $12,000.

Mr. FOSTER. How much of the vote for sundries was spent last year?

Mr. PATERSON. I cannot tell that.

Mr. FOSTER. That is also a piece of information which sometimes is very valuable, for a department may perhaps be running along with $2,000 or $3,000 more in the estimates than they are using and this is a great temptation to extravagance.

Privy Council office—salaries, &c., $34,800.

Sir WILFRID LAURIER. I shall read a list of the officers who come under this vote. There is no explanation to give as to the chief clerk.

Mr. FOSTER. The same chief clerk Mr. McGee?

Sir WILFRID LAURIER. Yes, the same, Mr. McGee. The assistant clerk, Mr. Boudreau, who is also acting as my chief private secretary receives a statutory increase of $50. The Clerk of the Crown in Chancery, Mr. Lamothe, I think is at the maximum of his class, $2,500. There are two chief clerks who receive statutory increases of $50 each. They are Mr. Bennetts, an old employee, and Mr. Foley, who acts as assistant to the Clerk of the Crown in Chancery. There are two first-class clerks at $1,500. There is here a decrease of $350 owing to the fact that an entire change has been made. The chief clerks last year were Mr. Lelièvre, who has been transferred to the Senate, and I think Mr. Foley who has been promoted, and instead of giving the salaries that were paid last year we give $1,500 which is about the minimun. Of the second-class clerks two are at the maximum so there is no increase in their case but the other seven second-class clerks receive the statutory increase, and it is the same with the junior classes. The allowance for the private secretaries is the same. There are two messengers instead of four. It would appear that there is to be some economy here, but I am sorry to say I do not deserve any credit for that as there is no change in reality. I must say that I am not yet up to all the mysteries of the Civil Service Act, but I understand from Mr. McGee that the two junior messengers whom we have are not permanent and cannot be paid out of the general fund, but have to be paid out of the contingent fund so that although there is a decrease of $1,000 in this vote there is an increase of $1,000 in the contingencies. The Auditor General would not pay these officials out of the vote for last year.

Mr. FOSTER. The right hon. gentleman (Sir Wilfrid Laurier) has explained that these increases have been statutory increases. Is it the rule now that all clerks get their regular statutory increases if their duties have been reasonably well performed, until they reach their maximum?

Sir WILFRID LAURIER. I can only say that in my own department we have given statutory increases to all except one man whom we thought did not deserve the increase. The others who were satisfactory have received them.

Mr. FOSTER. That is in the right hon. gentleman's own department?

Sir WILFRID LAURIER. Yes.

Contingencies, clerical and other assistance, notwithstanding anything to the contrary in the Civil Service Act, $4,000.

Mr. BARKER. What is covered in this case by that expression 'notwithstanding anything in the Civil Service Act.'

Sir WILFRID LAURIER. This is to cover expenditures which have been going on for the last 15 years. Perhaps my hon. friend will remember that there is some clerical work being done in the Privy Council Department by parties who do not come technically within the rules of the Civil Service Act and they have not been disturbed.

Department of Justice—salaries, $41,415.

Mr. FOSTER. There is an increase of $400 in the item for chief clerks, but there are four chief clerks.

Mr. FITZPATRICK. There are four chief clerks of whom two, Mr. Power and Mr. Fraser have got even beyond the maximum of their class, they are paid $2,800 under a special vote which I obtained a couple of years ago so that so far as these are concerned, there is no statutory increase. The other two Messrs. Hecker and Gisborne received the statutory increase. The statutory increases in my department are always granted upon the report of the deputy head of the department.

Mr. FOSTER. As to satisfactory service?

Mr. FITZPATRICK. Yes.

Nine first-class clerks, $14,975.

Mr. FITZPATRICK. These are Messrs. Leslie, Coté, Chisholm, Narraway, Clarke, Lane, Pownall, Mullin and Verret, each of whom receives the usual statutory increase of $50 except Mr. Leslie, who receives $25, which will bring him to the maximum of his class.

Five second-class clerks, $6,650.

Mr. FITZPATRICK. These are Messrs. Creighton, Burpee, Harris, Belanger and Miss Armstrong, who each receive $50 increase except Mr. Creighton, who gets $25, which will bring him up to the maximum of his class.

Three junior second-class clerks, $2,637.50.

Mr. FITZPATRICK. These are the same as before, except that each receives the statutory increase of $50.

Mr. FOSTER. Each of two, because the increase is only $100.

Mr. FITZPATRICK. That must be a mistake.

Allowance for private secretary to the minister, $600.

Mr. FITZPATRICK. That is the usual amount.

Allowance for private secretary to the Solicitor General, $600.

Mr. FOSTER. Who is the minister of that department ?

Mr. FITZPATRICK. The Minister of Justice is supposed to be the minister, but since the appointment of a Solicitor General, he has always been considered entitled to a private secretary.

Mr. FOSTER. So that the minister really has two.

Mr. FITZPATRICK. No, one private secretary to the Solicitor General and one to the minister.

Mr. FOSTER. Who is the Solicitor General now ?

Mr. FITZPATRICK. The Hon. Mr. Lemieux.

Two messengers, $1,340.

Mr. FITZPATRICK. These are Messrs. Morse and Picken, with the usual statutory increase of $50 each.

Department of Justice, contingencies—clerical and other assistance, $2,500.

Mr. FITZPATRICK. This is to provide for payment of extra clerks and messengers and for copying or other work which may be required in emergencies, such as press of work, vacations and sickness of the regular staff, &c. The amount expended in 1903-4 was $1,953.26.

Department of Justice, contingencies—printing and stationery, $4,200.

Mr. FITZPATRICK. This is to cover stationery, printing and binding of statutes, books, forms, &c., used by the department. The amount expended in 1903-4 was $6,-117.49.

Mr. FOSTER. How does the minister defend the expenditure of more than the vote ?

Mr. FITZPATRICK. That I cannot explain.

Mr. FOSTER. Where did you get the money ?

Mr. FITZPATRICK. My hon. friend can explain how it was got in the old days.

Mr. FOSTER. We have a new regime now. Will the minister make a note of that ?

Mr. FITZPATRICK. I will.

Department of Justice, contingencies—sundries, $5,700.

Mr. FOSTER. What of that was expended ?

Mr. FITZPATRICK. The principal payments are for travelling expenses, telegrams, postage, newspapers, telephone messages, cab-hire and other petty expenses. The amount expended in 1903-04 was $5,-136.32.

Mr. FOSTER. May be you cribbed a little of that.

Department of the Secretary of State—two chief clerks, $4,500.

Mr. FOSTER. Is one of these at the maximum ?

Mr. PATERSON. Yes, and the other has the statutory increase.

Seven first-class clerks, $12,650.

Mr. FOSTER. There must have been some changes here ?

Mr. PATERSON. Yes, one of the first-class has been promoted to a chief clerkship.

Mr. FOSTER. How did the vacancy come in the chief clerkship ?

Mr. PATERSON. By the retirement of Mr. Audet, the keeper of the records, who was superannuated.

Mr. FOSTER. At what age ?

Mr. PATERSON. Over 60.

Mr. FOSTER. Was he in good health or how came it that he was superannuated ?

Mr. PATERSON. He asked for superannuation some time ago on account of ill-health.

Mr. FOSTER. And a first-class clerk was put into the vacancy ?

Mr. PATERSON. Yes, and of course at a lower salary.

Mr. FOSTER. Who was the first-class clerk ?

Mr. PATERSON. Mr. Colson.

Eight second-class clerks, $11,225.

Mr. FOSTER. What are these ?

Mr. PATERSON. The promotion of course left a vacancy to which a second-class clerk went up at a lower salary.

Mr. FOSTER. Who was promoted ?

Mr. PATERSON. Mr. Roy.

Mr. FOSTER. What is the practice of this department as regards statutory in-

creases ? Are they given on the recommendation of the deputy ?

Mr. PATERSON. Yes. All who were entitled to the increase were granted it.

Seven junior second-class clerks, $6,500.

Mr. FOSTER. There is one clerk less here.

Mr. PATERSON. We are able to dispense with one.

Mr. FOSTER. That is a good example.

Contingencies, Secretary of State's Department—clerical assistance, $2,655.

Mr. FOSTER. We are not out of the woods yet. Here comes an increase.

Mr. PATERSON. That is caused by the appointment of an extra clerk who gets $600 with the statutory increase, and there has been one clerk dropped.

Mr. FOSTER. Is this just for the year, or will it be permanent ?

Mr. PATERSON. It will probably continue.

Mr. FOSTER. It is paid under Civil Service Rules ?

Mr. PATERSON. Yes, he has passed the examination.

Board of Civil Service Examiners and other expenses under the Civil Service Act, including $400 for the secretary and $150 for a clerk, all of which sums may be paid notwithstanding anything in the Civil Service Act, $3,000.

Mr. FOSTER. Who are the examiners now ?

Mr. PATERSON. There has been no change in ten years.

Mr. FOSTER. How many applicants are now on the list ?

Mr. PATERSON. I am told there were 900 applicants this year for examination.

Mr. FOSTER. Did they all get through ?

Mr. PATERSON. I cannot say. The examiners' report will show that.

Mr. BERGERON. I happened to go through the Library and found there an interesting book called the 'Royal Tour in Canada', in 1901, describing the tour of their Royal Highnesses, the Duke and Duchess of Cornwall and York, by Mr. Joseph Pope, C.M.G. I asked for a French copy, but there was none to be had. I suppose that books of that kind are sent around to different libraries. I was anxious to have a French copy——

Mr. FITZPATRICK. Not understanding English ?

Mr. BERGERON. Not altogether for that reason. I found that the work had been translated into French a couple of years ago, but the French edition is not yet printed. Why has not this been done and the book put in form so that it may be sent around to the different libraries, as has been done with the English copy ?

Mr. PATERSON. The Printing Bureau had so much to do with the voters' lists and other work that this work was held over, but the intention is to have it done as soon as possible.

Department of Public Printing and Stationery—salaries, $40,700.

Mr. BARKER. Are you creating another second-class clerk ?

Mr. PATERSON. Yes.

Mr. BARKER. Have you followed the procedure prescribed by the Act ?

Mr. PATERSON. Yes.

Mr. BARKER. Has the deputy minister reported on the necessity of this clerkship ?

Mr. PATERSON. Yes.

Mr. BARKER. And has that report been approved by the minister ?

Mr. PATERSON. Undoubtedly.

Mr. FOSTER. There is an increase in the item of junior second-class clerks.

Mr. PATERSON. One messenger has been made a junior clerk.

Mr. FOSTER. Then it is proposed to do with one messenger less ?

Mr. PATERSON. Yes.

Department of Public Printing, &c.—cleaning, $2,500.

Mr. FOSTER. There is an increase. What has happened that they require so much more cleaning up ?

Mr. PATERSON. It is not that there is more cleaning up required, but that there has been an increase in the pay given to the charwomen of from 50 cents to 75 cents a day.

Mr. FOSTER. Was the increase made just before the elections ?

Mr. PATERSON. It was a general advance. It was not confined to this department.

Mr. FOSTER. I think it looks suspicious to see a large increase just before the elections.

Mr. PATERSON. It was about six months ago.

Mr. FOSTER. Just about the time preparations for the elections were being made.

Mr. PATERSON. The next is the Department of the Interior, but we cannot go on with that, as the minister (Mr. Sifton) is not here.

Mr. FOSTER. When is the minister expected to be home ?

Mr. PATERSON. About the 28th, I am told.

Office of the Auditor General—salaries, $51,787.50.

Mr. BERGERON. There is an increase here.

Mr. PATERSON. Provision is made for an additional chief clerk.

Mr. BARKER. I suppose that this chief clerk was added in the regular way ?

Mr. PATERSON. I have no doubt that the Auditor General would see to it that it was done in the regular way.

Mr. FOSTER. What is the meaning of the change ?

Mr. PATERSON. I will give the hon. gentleman (Mr. Foster) the explanation that the Auditor General has given me. There is provision for an additional chief clerk, that is the one we are discussing now. He is expected to do work in connection with payments for the transcontinental railway. We need to have an additional officer in connection with the auditing of those accounts. There is also provision for eleven third-class clerks, who are not, however, to be new employees, they are now temporary, and are not to have their pay increased. Those eleven are in the service now, but he thinks it would be more desirable to place them upon the permanent list.

Mr. FOSTER. But that explanation requires a modification, because you see that the eleven third-class clerks are to cost at first $6,050 ; there is a reduction of only $4,000 in clerical and other assistance. Now are those third-class clerks ? They must be, when they are put in the clerical list, or they must be getting a larger salary than they did last year. Have you the names of those ?

Mr. PATERSON. No.

Mr. FOSTER. I think probably you had better let that stand and get full information.

Mr. PATERSON. He told me he would be here, but he is not.

Mr. FOSTER. I suppose we are to conclude that all this great interest in auditing is due to the Grand Trunk Pacific ?

Mr. PATERSON. No, not entirely.

Mr. FOSTER. Who is to be the new chief clerk ?

Mr. PATERSON. The Auditor General has full power to appoint him. I have given all the information the auditor seemed to think was necessary.

Mr. FOSTER. I think this item had better stand.

Mr. PATERSON. Then we will take Northwest Mounted Police.

Item allowed to stand.

Office of the Comptroller of the Northwest Mounted Police — salaries and contingencies, $16,225.

Mr. FOSTER. The same comptroller ?

Sir WILFRID LAURIER. The same comptroller, Mr. Fred. White. The chief clerk is the same, first-class clerk is the same—there are no changes except in the statutory increases.

Department of Finance and Treasury Board—salaries, $57,865.

Mr. FOSTER. Is Mr. Courtney the deputy minister yet ?

Mr. PATERSON. Yes.

Mr. FOSTER. I understood that he was expressing a desire to be relieved.

Mr. PATERSON. He is still deputy minister.

Mr. FOSTER. There was some one who went in there and went out again.

Mr. PATERSON. There was a Mr. Ross who was in there for a time. There are five chief clerks; two increases, I suppose they are statutory increases.

Mr. FOSTER. Who are the chief clerks now ?

Mr. PATERSON. Mr. Fowler, Mr. Fraser, Mr. Boville, Mr. Treadwell and Mr. Low.

Mr. FOSTER. There is an increase of $600 in first-class clerks— what is the explanation ?

Mr. PATERSON. I have not an explanation before me that is satisfactory to myself. The department is satisfied there is no increase asked for except the statutory increase. But I cannot explain that now, we will get it for you later.

Mr. FOSTER. Better let it stand. I am sure it is not the fault of the Minister of Finance, it is the fault of the minister who is in charge. Then there are two messengers, showing an increase of $100. Clerical and other assistance, notwithstanding anything in the Civil Service Act, $5,000. What is done with that ?

Mr. PATERSON. These two messengers have not passed their civil service examination.

Mr. FOSTER. I think we had better let that stand, as the minister has not an explanation.

Item allowed to stand.

Department of Customs—salaries, $67,385.

Mr. FOSTER. Who is the assistant commissioner ?

Mr. PATERSON. Mr. Bain. Three chief clerks, one at $2,250, one at $2,050 and one at $2,000. They are statutory increases.

Mr. FOSTER. What is the policy of the hon. minister in his department as to statutory increases ?

Mr. PATERSON. Statutory increases are given to all this year. They have all been very deserving, and all who are not at the maximum have been given their statutory increases.

Eight first-class clerks, two at $1,900, one at $1,700, one at $1,600, four at $1,550, $13,300.

Mr. PATERSON. Messrs. Saunders, Bliss, Watson, Bristol, Gleeson and Frost.

Fifteen second-class clerks, three at $1,500 one at $1,450, three at $1,350, two at $1,300, three at $1,250, three at $1,200, $19,950.

Mr. FOSTER. Here is a large increase in high class clerks.

Mr. PATERSON. These are the second-class clerks. This is to provide for statutory increases to Messrs. Ackers, Campbell, Grafton, Roper and Rorke, $50 each. Then there are statutory increases from the first of January to three clerks, Messrs. Russell, Courtney and Dunlevie, of $25 each. There is a statutory increase of $50 to Mr. Lafontaine, and in addition there is $25 to cover a short estimate for this clerk in 1904-5. His salary was estimated in 1904-5 for an increase from the 1st of January, while the increase actually took place from the 1st of July. The salaries of the remaining two old clerks, Messrs. Goodspeed and Telford, were estimated in 1904-5 at $1,250 in error, as their salaries were only $1,200, so that the statutory increases for 1905-6 are provided by leaving the estimates for their salaries the same as they were in 1904-5. All the clerks in this class are to receive their statutory increases. Then I am making provision for four additional second-class clerks, three at $1,200 and one at $1,250, making an increase of $4,850.

Mr. BARKER. Did Mr. McDougald report the necessity for that additional number of second-class clerks ?

Mr. PATERSON. Yes, Mr. McDougald prepared this himself.

Mr. BARKER. I mean did Mr. McDougald make a formal report under the statute? Did he make a formal report that the department needed four additional second-class clerks ?

Mr. PATERSON. I do not know whether he put it in writing or not, but he made a full report. He prepared this himself.

Mr. BARKER. The hon. gentleman knows what the statute says. There may be no steps taken without his report.

Mr. PATERSON. He prepares these recommendations in his own writing, and brings them in.

Mr. FOSTER. That does not make any difference.

Mr. PATERSON.

Mr. HAGGART. There is more than that required. You require not only the report of the deputy head, but the approval of Council, before you can bring that estimate down.

Mr. PATERSON. It is prepared by the deputy head and approved by Council.

Mr. HAGGART. Has that been done ?

Mr. PATERSON. Certainly ; these estimates have to pass Council.

Mr. HAGGART. But the hon. minister knows better than that. First of all, before your estimates are prepared you have to get the consent of Council to the addition, and you must have the report of the deputy head saying that this addition is required. Has that been done ? And what is the report ?

Mr. BARKER. Section 19 of the Act relating to the civil service is this :

A second-class clerkship shall only be created by Order in Council passed on the report of the deputy head, concurred in by the head of the department, setting forth the reasons for creating the office, and after the salary has been voted by parliament.

Mr. PATERSON. After the salary is voted by parliament that will be done.

Mr. BARKER. Yes, but I understood the hon. minister to say that the offices had been created and the men appointed.

Mr. PATERSON. No. The deputy recommends this.

Mr. BARKER. Do I understand that Mr. McDougald, the deputy, has not reported recommending this increase ?

Mr. PATERSON. Yes, he has recommended it for submission, and what the hon. gentleman is reading now as being required after the salaries are voted will be complied with. That provision of the law is to be complied with after the salaries are voted.

Mr. BARKER. I asked the hon. gentleman a few moments ago whether Mr. McDougald had reported in favour of these increases, and I understood the hon. minister to say that he had. Now it turns out that he has not.

Mr. PATERSON. Certainly he has. He prepared the estimates.

Mr. FOSTER. Now, Mr. Chairman——

Mr. PATERSON. We had all this debated last year.

Mr. FOSTER. There may have been many things up last year which will be up again. The hon. minister himself was up last year many times, and I apprehend that before he is through on the 1st of May he will be up many times again. But the hon. minister is asking for a certain amount of money. He says that certain formulas

have been complied with, and that if you will give us the money we will proceed and put on the clerks. That is all very good, but the representatives hold the purse strings, and when he comes to have them unloosened to the extent of four second-class clerks, the hon. minister has to give some reasonable reason why four second-class clerks are necessary.

Mr. PATERSON. Certainly.

Mr. FOSTER. Why are they necessary ?

Mr. PATERSON. That is right, there is no doubt ; but that is not the point that my hon. friend (Mr. Barker) was examining. I may say in a general way that owing to the provisions of what is known familiarly as the Dumping Clause Act, and the regulations that we have had to make, and the steps we have had to take, in order to ensure compliance with the law, additions to the staff have been necessitated. We feel sure that we cannot get along with less than this number if the work is to be done efficiently, as no doubt it is desired to be done. Therefore, we propose to transfer, if the committee sanctions this expenditure that we are asking for, from the outside staff of the Board of Customs four officers. The Board of Customs is connected with and is paid for out of the outside vote, the reason being because the work which is done here now in Ottawa in the central office is really outside work that used to be done at the ports in days gone by. But when it was thought desirable to get out a statement of exports and imports and of the general trade and commerce of the country once a month, and it could only be accomplished by bringing those who were engaged in the work of the outside ports to Ottawa and having all the information furnished here, it was decided to make that change. Therefore, there are men in the office who are well qualified for the inside service for the checking of invoices and so on, and that work will now be done more thoroughly than heretofore, and it has been thought desirable to bring some of the gentlemen who have had experience in dealing with these matters from the outside to the inside service.

Mr. FOSTER. These four men you propose to transfer ?

Mr. PATERSON. Yes ; they have been engaged in this work for some time past. They have been engaged here doing the work, but they have been paid out of the vote for outside work. As this work may properly be considered to be inside work, I think it would be more regular that we should ask that they be placed on the permanent list in the inside service, and that they should be paid from the inside vote, and therefore we come before parliament with this vote. The gentlemen we propose to transfer from the outside staff of the Board of Customs and whose salaries we propose shall be paid from the vote of the inside service are Messrs. Heintz, McCaffrey, Richards and Ross. Mr. Heintz entered the service in Winnipeg in June, 1882. Mr. McCaffrey entered the service at Montreal in September, 1884. Mr. Richards entered the service at Fredericton in 1878, and Mr. Ross at Rossland in July, 1898. As I was explaining to the hon. gentleman, we established the statistical branch here. These gentlemen had been engaged in compiling the statistics at the various ports I have mentioned. When we transferred all of this work to the statistical office at Ottawa we brought here the officers who were doing the work at these different ports, as they were not required at the ports, and having had large experience, we have assigned them to important work in the check department.

Mr. FOSTER. What salaries do they receive ?

Mr. PATERSON. Mr. Heintz, and Mr. McCaffrey receive $1,200, Mr. Richards $1,200, and Mr. Ross $1,250.

Mr. FOSTER. Do they start here with the same salary as they had outside ?

Mr. PATERSON. I think they do. Coming into the inside service they will get the statutory increase, which does not apply to the outside service.

Mr. FOSTER. What kind of work is imposed on them by the dumping clause ? Are they dumping up in Winnipeg ?

Mr. PATERSON. No. It has always been the law of Canada since confederation, that the duties should be levied upon the value of the articles in the country of export at the time of export. It is our duty to see that that is done. An improvement, as I consider it, was made a few years ago. The old system was that a person buying goods from a foreign country and importing them had to have affixed to the invoice a certificate made by the party from whom he purchased the goods, certifying that the price given was correct. The seller might sell the goods at from ten to twenty per cent below the current market price to the Canadian customer, and that being a bona fide transaction between himself and the buyer he could quite honestly attach the certificate because it was correct as to the transaction between the two individuals, and we of course never questioned the right of a man to sell his goods at any price he chose, but the law imposes on the department the duty of saying that the duty must be levied upon the value of the goods as sold in the country of export. Therefore that certificate was changed and it was required that the exporter should certify that the prices mentioned were the prices at which the goods were sold in the country of export, and if there was any variation in that regard it was noted in the

margin. That helped us a good deal to secure the duties that were required under the law better than they had been secured before that time. But, when parliament adopted as additional taxation 50 per cent of the amount of cutting if you allow that expression, it became even more important than before that we should secure all information that would not harass trade, but would enable us to carry out the law as it was intended. We have therefore required under the new regulations more than one invoice. Hitherto two copies of the invoice came to this country. The merchant kept one himself and the law required that one should be furnished the customs and should be left at the port of entry. The entry was all that reached the department here. The entry would be scrutinized by the check department, and if they thought from anything in the descriptions that the local officer had not been able to ascertain the correct value for duty, the port had to be written to to forward the invoice, which then had to be examined here by the check clerk, and if it was found that an error had been made the importer would be written to.

Mr. FOSTER. An error in what way ?

Mr. PATERSON. For instance if the port officer had allowed articles to pass at a certain value which was an honest value as between buyer and seller but was not the value required by law on which the duty should be paid. When an error of this kind was discovered, a call would be made upon the importer who had made the entry in good faith to amend the entry and pay the difference. That entailed time and a good deal of irritation on the part of merchants because when an error occurred at a distant point, a good deal of time was lost in correspondence and by the time the demand was made for the additional duty, the merchant might have marked the goods and sold them, allowing for duty at the lower rate. We therefore thought that it was desirable to ask for two copies of the invoice. This of course caused a little irritation at the time as all customs changes do, but I myself thought that this change was required long ago. One copy of the invoice is kept at the port of entry as before, but the other copy comes to the central office, so that day by day we have the entries to scrutinize, whereas previously we had to write to the port for each individual entry when required. If any failure to appreciate the requirements of the law on the part of the local collector is discovered we can notify him quickly, and in this way we have done away with a great deal of the irritation that was caused by asking a man to amend an entry perhaps two weeks after it was made. In order to do this we have required additional help and the staff has been increased in that way. I think that parliament will see that the trade and commerce of the country and the revenue warrant us in asking this additional help.

Mr. PATERSON.

Mr. FOSTER. But you will require people in the places of those whom you have transferred to Ottawa, Mr. Heintz for instance who was transferred from Winnipeg.

Mr. PATERSON. No. Before the statistical branch was established four or five years ago, Mr. Heintz was engaged in compiling these statistics at Winnipeg. Now they are compiled here, his work is done here, and we brought him from Winnipeg here to do the same work. Now, that we have taken him from the statistical branch and placed him in the check department, we have had to fill his place in the statistical department. We consider that the checking branch is more important inasmuch as revenue is involved in its work, and we desire to have experienced men in it ; we can better place the new men in the statistical department.

Mr. FOSTER. That is the point I wish to make, that you have filled their places. Suppose that goods are brought in say at Shelburne, in Nova Scotia. One invoice is displayed there, the local officer passes upon it and collects the duty. Then a duplicate of the invoice and the entry is sent to Ottawa. All this supposes two things, that the local man in Shelburne shall have a knowledge of the current sale prices, say in Austria or Birmingham, or wherever the goods are bought. The difficulty seems to be how he is to know whether the prices that are on the invoice are simply the dealing prices between the seller and the buyer or the current prices at which the goods are sold in the market where they are bought. Does the local man, in Shelburne, or Guysboro', or anywhere else in this country, have a sufficient knowledge to adjudicate in a matter of that kind ? If so, how does he get it ? I suppose that here in Ottawa you are better armed and equipped ; the men here do know. Have they an ubiquitous intuition as to the current prices of the goods in the country from which they are imported ? There must be a great deal of haphazard in the matter, and delay and dissatisfaction. After all, does not the hon. gentleman find a great deal of difficulty of getting at these current prices, and what machinery has he for doing it ?

Mr. PATERSON. There is difficulty, of course, even in our larger offices, where our regular appraisers are very well posted. The way the matter is attended to is this : One of our new regulations, which I omitted to mention before, is the one that was complained of a little in Great Britain. English merchants, who are accustomed to free trade and who are not hampered with any customs regulations, did not seem to see the necessity of it. Under the new system, if there is any change in the price, we not only require the exporter to note it on the margin of the certificate, but we have double columns in which we require him to

enter the price at which the goods are sold in the country of export and the price at which they are sold to the Canadian importer. They said: What is the use of filling out the second column when the prices are the same ? Our reason for that is this : Hitherto they had to make a declaration that there was no change in the prices. That was apt sometimes to be performed in a perfunctory manner by a careless house, which would put its stamp on the declaration ; but greater care is likely to be exercised when the price of each item has to be entered in two columns, and the exporter has to make a declaration that these entries are true and correct. If he puts down prices that are not correct, he is, of course, liable to all the penalties under the customs law, which are very severe. So that all the collectors now have invoices with these double columns, in which are entered opposite each item the price at which the goods are sold in the country of export, and the price at which they are sold to the Canadian consumer. Where there is a difference between the two, the collector adds the difference to the duty, but not exceeding fifty per cent of the duty on the article. I do not think it is a hardship. I think the English merchants who expressed some vexation with it, have realized that our regulations must be general in their nature, and that exceptions cannot be made in favour of one country over another. I think the department has succeeded in establishing pretty safe checks, which, when the system is understood and in practice for a time, will be found not to be harassing at all, either to exporter or importer. The collector relies necessarily on the invoice being bona fide in the first place. Our staff, I may say, has been increased, for we have thought it necessary to establish, in the country to the south of us, special agents, whose duty it is to ascertain and to put forward to the department here, the values of all leading articles. We have these agents at New York, Chicago, Boston, Seattle and Cleveland. These cities are their headquarters, but they cover the whole country among them. What is called the cutting of prices is more in vogue on the other side of the line than in England. The information in regard to leading lines is coming to us daily, and is sent by circular to the different local officers. This, in a general way, is, I think, the information the hon. gentleman wants. That we are deceived sometimes is possible; it is impossible that it can be otherwise; but we have taken all the precautions that we thought necessary. If any one passes a wrong entry, either designedly or in error, the matter does not end with the passing of the entry. There is no limit to the time that we can follow the importers for the duty itself; but we can follow them for three years for the penalties, which in the extreme amount to the forfeiture of the goods. Therefore, people will be careful, at any rate, houses with a reputation and standing, both importers and exporters, to make proper entries.

Mr. FOSTER. All this makes me very reflective. I could not help thinking, when I was following the hon. minister's, I must say, clear and thorough explanation, how many of his old lessons he must have had to put behind him.

Mr. PATERSON. I have learned something.

Mr. FOSTER. He who has sat at the feet, not of Gamaliel, but of Sir Richard Cartwright, who in some matters is far ahead of Gamaliel, who has heard him talk of the virtues of free trade and how delightful and necessary it was that you should buy in the cheapest market and sell in the dearest—after all you have done, by one-sided preferential trade and the like, to encourage colonial and imperial favouritism and goodwill to each other, you absolutely make it impossible that an Englishman should sell to a poor Canadian at a lower price than to a German. If he wants to give a Canadian a good bargain, you prevent him. You will not let him sell to a Canadian at a cent less than to one of his own fellow-Englishmen or to a foreigner. What a large amount of conversion must have been going on in the mind of the hon. gentleman to cause him to adopt any such policy.

Mr. PATERSON. There has been no conversion because under our policy, if you can suppose an English merchant selling to a Canadian at less than he does to others, we simply charge an extra tariff and give a portion of the benefit to the treasury. But if the hon. gentleman had his way, he would double the duty against the Englishman and make it impossible for him to sell to us at all. We only collect an extra duty when the English merchants are able to sell at a lower rate. The duty of 30 per cent might become a duty of 35 per cent, but the hon. gentleman would make it fifty per cent. With us when the prices are so cheap, instead of the consumer getting the whole benefit, the treasury gets a portion and we are able to reduce taxation in another direction.

Mr. FOSTER. You will be a pretty good protectionist shortly.

Department of Customs—junior second-class clerks, one at $1,100, one at $1,050, three at $1,000, one at $950, five at $900, six at $850, two at $800, $17,300.

Mr. BARKER. I wish to call the attention of the minister again to the statute with reference to this item. The minister knows it is not a new question. We have had it up during several sessions, and I have not yet been able to convince the hon. gentleman or any of his colleagues that

they ought to comply with the statute regarding these increases. I presume that the Civil Service Act was passed with some definite object. The clear intent of the statute was to put the responsibility for these increases upon, not the minister, but the permanent heads of the departments, as being the ones who know to what extent such increases are necessary. The permanent head of the department is required to make a report, that report has to be approved by the minister himself, then parliament votes the money; and after all that is done, an Order in Council is passed creating the new clerkship. If you take section 15 of the Act, you cannot have any doubt as to the intention of parliament. Section 15 relates to the chief clerkships, and all the other sections follow in the same words, though not divided in the same way. That section provides that a new clerkship in any department shall only be created by Order in Council, to be passed after certain procedure has been followed. Three things must first be done. The deputy head must first report that such an officer is necessary for the proper performance of the public business in the department interested and must state the reasons on which he has arrived at that conclusion. That surely does not mean that the deputy or permanent head of the department must simply look at the item and not express any dissent. He is expected to make a formal report to the minister giving the reasons for the increase. That being done, the minister must approve of his report or it can go no further. Having given his approval, the money must be voted by parliament, but what does the minister do? He reverses all that. He first comes to parliament and asks for a vote. But how ridiculous would it not be for parliament to vote the money and then have the permanent head refuse to take the responsibility of recommending that the extra clerks are essential to the working of the department. The procedure required by the Act is however reversed, and we are told that because the deputy minister has seen the item and has not objected to it, that is a sufficient compliance with the Act. Surely the minister will not pretend that that is a compliance with the statute. I would like the Minister of Justice to say whether he thinks it is? Here we have a $12,000 increase in these two items in the Customs Department, and we are entitled to ask the Minister of Justice whether the Minister of Customs has complied with the law?

Mr. FITZPATRICK. This question was up for consideration several times during the previous session, being raised by my hon. friend from Hamilton (Mr. Barker). At the time, it appeared to me that the statute was perfectly clear? As I understand it, in the first place, the minister comes to parliament for a money vote to enable him to create a clerkship, of whatever class it may be. If parliament approves the suggestion of the minister and supplies the money, it is upon the condition that the deputy head—the permanent head, as my hon. friend calls him—shall make his report, and that report, confirmed by Council will be the justification for the minister to apply the money voted by parliament. This, it seems to me, is the clear meaning of the section. But, at the time the point was raised, in view of the argument put forward by my hon. friend, I thought it well to consult the deputy Minister of Justice, who has been in charge of the department for many years—ever since 1890 or 1891, I think. And he told me that this was the practise that had been invariably followed.

Mr. BARKER. But it does not follow that it is right.

Mr. FITZPATRICK. And the deputy minister, excellent lawyer that he is, says that the section does not admit of any doubt, in his opinion.

Mr. FOSTER. What is the meaning of the seven new clerks?

Mr. PATERSON. That is the transfer of seven clerks from the outside staff of the Customs to the inside staff, at the following salaries: 1 at $1,050; 2 at $1,000; 2 at $900 and 2 at $850.

Mr. FOSTER. And you have diminished the number of third-class clerks by four. Where have they disappeared to?

Mr. PATERSON. One, Mme. Jolivet, has been transferred to Quebec; two have been promoted to junior seconds, and one clerkship for which a vote was taken last year was not filled.

Mr. FOSTER. Who was promoted?

Mr. PATERSON. Let me give the increases as summarized for me by the accountant;—Statutory increases, $425; additional clerks by transfer, $6,550, total $6,975. In addition we are providing for the promotion of Miss Sixsmith and Miss Mason from third clerkships to junior second class, at the minimum salary of $800 each, vice provision in old estimates for salary of R. Telford, $950, who was promoted, and R. H. Moir, at $825, transferred to the outside service.

Four third-class clerks, one at $675, one at $635, one at $575, and one at $550, $2,435.

Mr. FOSTER. Are there any increases here?

Mr. PATERSON. Four statutory increases: Miss Low, Miss Burt, Miss Cram and Mr. F. Lessard.

Allowance for private secretaries and assistants, $600.

Mr. FOSTER. More than one. What kind of arrangement is this?

Mr. PATERSON. Miss Dawes and Miss Cram are assistants to the private secretary.

Mr. FOSTER. Has the minister no private secretary? And, if so, where is his salary?

Mr. PATERSON. He is assistant commissioner, and does any private secretary duties that I require, but takes no part of the allowance.

Mr. FOSTER. The hon. gentleman divides the allowance of $600.

Mr. PATERSON. Not the whole of it. Miss Dawes gets $150 and Miss Cram $100. The balance is not used.

Mr. FOSTER. Then the hon. minister had better strike out the balance. That $150 laying around may be a great temptation—

Mr. PATERSON. This covers a period ending eighteen months from now, and I may need it by that time.

Department of Inland Revenue—seven first class clerks—one assistant accountant at $1,900, one assistant secretary at $1,900, one at $1,850, one at $1,750, one at $1,700, and two at $1,600, $13,500.

Hon. L. P. BRODEUR (Minister of Inland Revenue). There is an increase here of $250, which is to pay statutory increases to five first-class clerks.

Mr. FOSTER. What is the policy adopted as to statutory increases?

Mr. BRODEUR. They are given to all those who have reached the maximum of their class.

Mr. FOSTER. You have one less senior second-class clerk, how is that?

Mr. BRODEUR. I increased the number of junior second-class clerks. There was no one there last year.

Mr. FOSTER. You had a vote that you did not utilize?

Mr. BRODEUR. Yes.

Mr. FOSTER. Is $800 the minimum of a junior second-class?

Mr. BRODEUR. Yes.

Mr. FOSTER. These are statutory increases—four at $900 and three at $800.

Mr. BRODEUR. Two have reached the maximum of their class, Mr. Chateauvert and Mr. Gervais.

Mr. FOSTER. The difference is $350, you are making an increase in the item to that extent. You have only four clerks to get the statutory increase, which would only make $200.

Mr. BRODEUR. Mr. Gervais is a new appointment in the third class. He was in the temporary service, and instead of coming in at the lowest salary of the class, we give him $700 in virtue of the law passed two years ago that those who were in the civil service as temporary clerks were entitled to come in as third-class clerks at the salary they were receiving as temporary clerks.

Mr. FOSTER. Up to the limit?

Mr. BRODEUR. Up to the limit, $700.

Mr. FOSTER. In printing and stationery, what regulation is there as to the price you have to pay?

Mr. BRODEUR. The stationery department fix the price themselves.

Mr. FOSTER. Do they attempt to make any profit for the department, or do they make their prices at cost?

Mr. BRODEUR. I never inquired whether the Printing and Stationery Department are making money out of it, perhaps they do.

Office of the Auditor General—salaries, $51,787.50; contingencies, $10,200.

Mr. PATERSON. The hon. gentleman asked a question with regard to this department—the Auditor General has now come in.

Mr. FOSTER. Who is proposed to be made the new chief clerk?

Mr. PATERSON. The Auditor General says he can't say anything about it until he gets the money.

Mr. BARKER. That is not at all inconsistent with the statute. Mr. McDougall has probably made a formal report recommending this. That is what the other gentleman should have done.

Mr. PATERSON. Three juniors are made second-class clerks.

Mr. FOSTER. What is the reason for making them second-class clerks? Do they become spryer? Have they been at the maximum of their class?

Mr. PATERSON. They passed the examination, and the auditor thought they were entitled to the promotion.

Mr. FOSTER. Another point we wanted to know was, why are eleven first-class clerks necessary, all new? Then as to the disparity between the amount dropped off from clerical and other assistance and the sum put in here for first-class clerks, if they are simply transfers.

Mr. PATERSON. While the Auditor General is asking for the eleven to be placed on the permanent list they are now in the employ of the department and have been paid out of the vote for clerical assistance and contingencies. He now makes them permanent. The question asked is: why the amount for clerical and other assistance is not reduced by the amount involved by the transfer of the eleven to the permanent list. While the Auditor General quite recognizes

that he has not been able to reduce his estimate for clerical assistance, because he anticipates that he will require more help in that direction, and in fact, he would like the committee to understand that even with what he is asking for now it may be possible that he will have to ask parliament to sanction a larger amount for the payment of other officers, but he will feel himself in a better position to know how he stands in that respect when the supplementary estimates are brought down, because the interval will give him probably six weeks time during which he will more fully appreciate the duties which will be entailed upon him by the new Bill.

Mr. FOSTER. How long have these transferees been in the employ of the department ?

Mr. PATERSON. From two to four years.

Mr. FOSTER. Are they going in as first-class clerks at the same salaries as they are getting ?

Mr. PATERSON. Yes, barring the statutory increase.

Mr. BERGERON. Has the government surrendered to the demand which the Auditor General has been making for some time?

Mr. PATERSON. No.

Mr. FITZPATRICK. Mutual concessions.

Mr. PATERSON. The government certainly want to give him all the help he requires.

Mr. FITZPATRICK. All the help he wants.

Mr. FOSTER. I have no objection at all to the Auditor General's office being thoroughly equipped. The Auditor General has a very important work to do, and I imagine that hon. gentlemen opposite are troublesome enough to make his office more burdensome than it used to be, but any amount of help we can give him here that will enable him to search out the expenditures of hon. gentlemen opposite we are willing to give.

Department of Agriculture, deputy head, $3,800.

Mr. FOSTER. Here is an increase.

Mr. FISHER. That is the statutory increase.

Mr. FOSTER. Who is the deputy head ?

Mr. FISHER. Mr. O'Halloran.

Mr. BERGERON. Is that the maximum?

Mr. FISHER. No.

Six chief clerks, two at $2,500, one at $2,412.50, one at $2,300, one at $1,962.50, $13,625.

Mr. FISHER. There has been a misprint in omission of one clerk at $1,950, the insertion of which will make the total right. If my hon. friend (Mr. Foster) will look at the item he will see that the printed line only shows the salaries of five, whereas there are six and that the printer has left out one at $1,950. The amount however is included in the total of $13,625.

Eight first-class clerks : four at $1,900, one at $1,750, one at $1,650, one at $1,600, one at $1,525, $14,125.

Mr. BERGERON. There is one added.

Mr. FISHER. There was a necessity for a technical officer in the copyright department. There was no clerk except the chief clerk who could undertake the work. The chief clerk has been in ill-health, he has been absent a good deal, and I felt it necessary to appoint a technical officer.

Mr. BERGERON. Is that a new appointment ?

Mr. FISHER. Yes.

Mr. FOSTER. Who has been appointed ?

Mr. FISHER. Mr. Ritchie.

Mr. FOSTER. Where from ?

Mr. FISHER. Toronto.

Mr. BERGERON. He was not in the service before ?

Mr. FISHER. He was not in the service, but he had been doing work in my department in another capacity and was recommended by the deputy minister for this position.

Mr. FOSTER. What is his work ?

Mr. FISHER. He is in the copyright branch under the chief clerk.

Mr. FOSTER. Is he a lawyer ?

Mr. FISHER. He is a lawyer by profession.

Fifteen second-class clerks : one at $1,500, two at $1,450, two at $1,400, four at $1,350, three at $1,300, one at $1,287.50, two at $1,275, $20, 337.50.

Mr. FISHER. These are all the same excepting statutory increases.

Mr. FOSTER. Does the hon. minister give statutory increases to all deserving clerks ?

Mr. FISHER. To all those who have no report against them.

Twenty-five second-class clerks : eleven at $1,100, one at $1,050, two at $950, seven at $900, two at $887.50, two at $850, $24,825.

Mr. FOSTER. Statutory ?

Mr. FISHER. Statutory increases only.

Three third-class clerks : one at $667.50, one at $600, one at $550, $1,817.50.

Mr. BERGERON. Same reason ?

Mr. FISHER. Yes.

Department of Agriculture, contingencies—clerical and other assistance, $11,000.

Mr. FOSTER. How much of it was spent last year ?

Mr. FISHER. $10,992.50.

Printing and stationery, $4,500.

Mr. FOSTER. Was that pretty well spent too ?

Mr. FISHER. I think about ; I have not the exact figures.

Sundries, $3,250.

Mr. FOSTER. Was any part of that 'sundries' spent in trying to find out the lost members of the Free Christian Baptist Church in New Brunswick ?

Mr. FISHER. No.

Mr. FOSTER. It should have been.

Mr. FISHER. There is another vote for that.

Mr. FOSTER. There never was a greater outrage perpetrated than that, and we will hear more about it before we get through.

Mr. FISHER. With pleasure.

Mr. FOSTER. Trying to suppress a denomination.

Mr. FISHER. Oh, no, giving it all due credit.

Department of Railways and Canals—secretary of department and chief clerk, office of deputy minister and chief engineer, $2,500.

Mr. FOSTER. Who is the secretary now ?

Hon. H. R. EMMERSON (Minister of Railways and Canals). Mr. Jones.

First-class clerks, salaries, $17,250.

Mr. EMMERSON. You will notice a typographical error there. It reads three at $1,000; that should be $1,900. There is a decrease of $50 owing to the superannuation of Mr. Filteau. He was receiving $1,900, but whoever takes his place will commence with $1,500, making a saving of $400. The difference is explained by the statutory increases.

Mr. FOSTER. How old was Mr. Filteau ?

Mr. EMMERSON. I do not know his age exactly, but he had been in the department a great many years. He became incapacitated because of his eyes and his throat.

Second-class clerks, salaries, $8,000.

Mr. EMMERSON. These are all statutory increases. There will be a saving of $100 with respect to one of these clerkships. One clerk unfortunately was drowned during the past season and his successor will begin at $1,200. He was in receipt of $1,300.

Junior second-class clerks, salaries, $8,075.

Mr. EMMERSON. Four of these received the statutory increase of $50, and three received six months' increases of $25. There is a recommendation for an additional clerk at a salary of $800.

Mr. FOSTER. What is the necessity for that ?

Mr. EMMERSON. The deputy minister reports that in consequence of the additional work in the department it will be necessary to appoint another junior second class clerk.

Mr. FOSTER. I suppose the new clerk will be employed to look after the increased deficit ? This will require a smart man.

Mr. EMMERSON. The report of the deputy minister will explain that; we will speak of the deficit a little later.

Contingencies, $5,000.

Mr. FOSTER. How much of this was spent last year ?

Mr. EMMERSON. Up to January 1, $3,000 had been expended.

Public Works—Chief engineer, salary, $3,400.

Mr. BERGERON. Has Mr. Lafleur been appointed chief engineer of the department ?

Mr. HYMAN. Yes, Mr. Lafleur has been appointed chief engineer. He was acting engineer of the department for, I think, six or seven years, and upon the report of the deputy, Mr. Lafleur has been appointed chief engineer by Order in Council in the usual way. It is only fair to explain to the House, that Mr. Lafleur has been appointed at a salary of $3,500, but as these estimates have been printed there is only $3,400, so I shall have to ask for $100 extra in the supplementary estimates for Mr. Lafleur.

Second-class clerks, salaries, $17,800.

Mr. HYMAN. There is an increase of one second-class clerk by promotion from the junior second to the second-class of Mr. H. J. Guppy, in accordance with the report of the deputy minister. Mr. Guppy has been 22 years in the service. An amount was taken for this purpose last year.

Mr. BERGERON. Is he at the minimum of his class ?

Mr. HYMAN. He was appointed at the minimum.

Mr. BERGERON. And was he at the maximum of his class before ?

Mr. HYMAN. He was after 22 years service.

Three junior second-class clerks, $2,600.

Mr. BERGERON. Was he taken from that class ?

Mr. HYMAN. He was taken from that class. That explains why there is one less.

Department of Public Works—contingencies, $15,000.

Mr. FOSTER. How much did you spend last year ?

Mr. HYMAN. $14,430.

Post Office Department—$362,189.

Mr. FOSTER. What is the minister's policy now with regard to statutory increases ?

Sir WILLAM MULOCK. I give effect to every recommendation from the deputy within the law. All the increases here are statutory.

Five messengers, $3,524.25.

Mr. BERGERON. What is the maximum salary for a messenger ?

Sir WILLIAM MULOCK. $700.

Mr. BERGERON. I see one here at $724.25.

Sir WILLIAM MULOCK. I do not understand that. If my hon. friend will let the item pass, I will get the information on another day.

Provisional allowance, $1,850.

Mr. BERGERON. What is the object of that ?

Sir WILLIAM MULOCK. Some years ago we established some dead letter branches outside of the city of Ottawa, in Winnipeg and the west; and the clerks in these offices are paid provisional allowances on account of the extra cost of living, in accordance with the policy laid down by our predecessors, which we have carried out.

Mr. BERGERON. This is a lump sum to cover the different places, I suppose ?

Sir WILLIAM MULOCK. This is the total sum paid on a certain fixed scale, established by an Order in Council.

Post Office Department—contingencies, $41,710.

Mr. BERGERON. I see here some words respecting letter carriers' boots. Do I understand that the government supply boots to all the letter carriers all over the country?

Sir WILLIAM MULOCK. Yes. We do not make them here. They are made in different cities; but before they are issued, they are all inspected by one man here. We furnish the letter carriers with uniforms, including boots.

Mr. FOSTER. Is it done by contract ?

Sir WILLIAM MULOCK. Tenders are obtained in different cities. Circulars are sent out inviting tenders from a number of manufacturers in each place.

Mr. FOSTER. Always of the right persuasion ?

Sir WILLIAM MULOCK. I would not inquire into a minor matter of that kind.

Mr. FOSTER. The supposition is that a Conservative cannot make good boots, I suppose ?

Mr. HYMAN.

Mr. BERGERON. Who is the contractor in Montreal ?

Sir WILLIAM MULOCK. I cannot give that information now. I will give it on the outside estimates for my department.

Mr. FOSTER. Are all the boots inspected by one man ?

Sir WILLIAM MULOCK. Every pair. Not a single boot escapes his eye.

Balancing and summarizing depositors' accounts at the close of the year ending June 30, 1905, $3,710.

Mr. BERGERON. Is there any special clerk for that ?

Sir WILLIAM MULOCK. That is done by the clerks in the department after hours, and an extra allowance is made for work done after hours.

Mr. FOSTER. You pick out the proper clerks ?

Sir WILLIAM MULOCK. The head of the branch picks them out.

Department of Trade and Commerce, $28,950.

Mr. FOSTER. Who is now responsible for this department ?

Mr. PATERSON. Sir Richard Cartwright is the head.

Mr. FOSTER. Is he to administer it from the Senate ?

Mr. PATERSON. Yes.

Chief clerk and accountant, $1,900.

Mr. FOSTER. This is a new appointment?

Mr. PATERSON. No. Mr. Code was for years assistant accountant in the Customs Department and has been replaced in that department by another. There is a great deal of extra work thrown on the Trade and Commerce Department owing to the payment of bounties on iron and coal oil.

Second-class clerks, $1,200.

Mr. FOSTER. What became of the other second-class clerk ?

Mr. PATERSON. He was promoted to be first-class clerk.

Contingencies, clerical and other assistance, notwithstanding anything in the Civil Service Act, $2,000.

Mr. FOSTER. There is an increase here of $500.

Mr. PATERSON. That is due to the fact that they are getting out weekly reports, containing the reports of the commercial agents, which are distributed throughout Canada. Heretofore they were published in the monthly report.

Some resolutions reported.

Motion agreed to without discussion.

Copy of the original list of the electors of Marquette supplied the Clerk of the Crown in Chancery; also a copy of the list as sent to the returning officer; and for copies of the lists supplied by the returning officer to the various deputy returning officers.—Mr. W. J. Roche.

ADJOURNMENT—AUDITOR GENERAL'S REPORT.

Sir WILFRID LAURIER moved the adjournment of the House.

Mr. FOSTER. Before the motion is put, I desire to call attention to the fact, that we have not received the public accounts, nor have we the Auditor General's Report. Probably the First Minister will be able to tell us when the Auditor General's Report will be down. We have gone on with the Civil Service Estimates, but we cannot go much further without the public accounts—

Mr. PATERSON. The Public Accounts have been distributed.

Mr. FOSTER. I think not. A copy was laid on the table, but members of the House have not received copies. And, with reference to the Auditor General's Report, the First Minister will see that we cannot go much further with the estimates until we have received that report.

Sir WILFRID LAURIER. I can hold out little hope of an early distribution of the Auditor General's Report. The last account I had of it was two or three days ago. There were then in the hands of the Auditor General proofs for about 160 pages ; but there are about 300 pages of manuscript yet to come.

Mr. BERGERON. We are paying for eleven more clerks which ought to facilitate the work.

Sir WILFRID LAURIER. We are not paying those clerks yet but shall begin to pay them next July. That may expedite matters, but in the meantime, the position is that a good deal of the manuscript is not yet in the hands of the printer.

Mr. FOSTER. That is the fault of the departments. If they have not got the work forward, he cannot do it. The Auditor General does not prepare the manuscript——

Sir WILFRID LAURIER. Certainly, he prepares the manuscript of his own report. The fault is not with the departments so far as I know. I will see the Auditor General, and perhaps I can give the House more information to-morrow. But I cannot hold out any hope of an early presentation of the Report of the Auditor General.

Motion agreed to, and the House adjourned at 6 p.m.

HOUSE OF COMMONS.

FRIDAY, January 20, 1905.

The SPEAKER took the Chair at Three o'clock.

VACANCY—WRIGHT COUNTY.

Mr. SPEAKER. I have the honour to inform the House that I have received the following communication :

To the Honourable the Speaker of the House of Commons :

Sir,—I have the honour to hereby tender my resignation as a member of the House of Commons for the electoral district of Wright, in the province of Quebec, having elected to sit for the electoral district of Quebec East.

Given under my hand and seal at Ottawa this 20th day of January, 1905.

(Sgd.) WILFRID LAURIER.

Witnesses :
(Sgd.) Sydney Fisher,
C. Fitzpatrick.

VACANCY—CARLETON.

Mr. SPEAKER. I have received a further communication to the following effect :

To the Honourable the Speaker of the House of Commons :

Sir,—I, Edward Kidd, of North Gower village, in the county of Carleton, farmer and manufacturer, who was duly elected a member of the said House of Commons for the electoral district of the county of Carleton, hereby declare my intention to resign my seat as said member in this said House of Commons and I do hereby resign the same.

In witness whereof I have hereto before two witnesses set my hand and seal this 19th day of January in the year 1905.

(Sgd.) EDWARD KIDD.

Witnesses :
(Sgd.) Samuel Barker, M.P.,
John W. Daniel, M.P.

I beg to inform the House that I have issued my warrant in each of these cases for a new election.

Mr. HAGGART. A warrant for both ?

Mr. SPEAKER. Yes.

PAY OF NORTHWEST MOUNTED POLICE.

House in committee to consider proposed resolutions respecting the pay of the Northwest Mounted Police.—Sir Wilfrid Laurier.

On section 1,

Resolved, That it is expedient to provide that the pay of the commissioner and other members of the Northwest Mounted Police shall not exceed the amounts following :—

Commissioner of police, per annum ..	$3,000 00
Assistant commissioners, per annum..	2,000 00
Superintendents, per annum	1,800 00
Inspectors, per annum	1,400 00
Surgeons and assistant surgeons, per annum	1,800 00
Veterinary surgeons, per annum	1,400 00
Four staff sergeants, per diem	2 00
Other staff sergeants, per diem	1 75

Other non-commissioned officers, per diem	$ 1 25
Constables, per diem	1 00
Special constables and scouts, per diem	1 50
Buglers under 18 years of age, per diem	0 50
Working pay to artisans, per diem	0 75

Mr. HAGGART. What are the changes ?

Sir WILFRID LAURIER. This resolution was introduced in consequence of the representations which have been made to the government on the floor of this House on both sides, from time to time, advising that the pay of the Northwest Mounted Police should be increased. This matter has been under consideration, and I think we are meeting the public demand and the exigencies of the case in providing for the salaries now set forth in this resolution. The increases are as follows :

Officer.	Present Pay.	Proposed Pay.
	$	$
Commissioner	2,600	3,000
Assistant commissioners	1,600	2,000
Superintendents	1,400	1,800
Inspectors	1,000	1,400
Surgeons and assistant surgeons	1,400	1,800
Veterinary surgeons	1,000	1,400

We have four staff sergeants to whom we give $2 a day. Other staff sergeants receive $1.50 a day, and we propose to give them $1.75 a day, an increase of 25 cents a day. Non-commissioned officers receive $1 a day, and we propose to give them $1.25 a day. Constables receive 75 cents a day, and we propose to give them $1 a day. Special constables and scouts we have no right to pay for particularly, but we have paid them from 75 cents to $1.25 a day. We propose to give them $1.50 a day. Buglers under 18 years of age receive 40 cents a day, and we propose to give them 50 cents a day. Working artisans receive 50 cents a day, and we propose to give them 75 cents a day. It is calculated that this will increase the pay of the force by $50,000.

Mr. HAGGART. What is the strength of the force ?

Sir WILFRID LAURIER. I cannot say what the strength of the force is at the present time. There are 300 in the Yukon, but I cannot say how many in the Northwest Territories. I think there are 600, but perhaps I am mistaken as to that. The force costs $1,000,000 in round numbers, and we will add by this resolution $50,000 to the cost.

Mr. HAGGART. Under your resolution you take the power to increase the pay if you like. Is it the intention of the government to increase it up to this sum ?

Sir WILFRID LAURIER. Up to this maximum. We do not propose to make the increase in a bulk sum at once, but to gradually increase the pay. We take power to reach the maximum and no more.

On section 2,

Resolved, That the Governor in Council may authorize extra pay and allowances to be paid to members of the force serving in the Yukon Territory or the unorganized portions of the Northwest Territories.

Mr. HAGGART. What is the amount of the extra pay in the Yukon?

Sir WILFRID LAURIER. I think it is either 25 cents or 50 cents a day; I forget at the moment. That amount is paid to the constables, and the officers have been given a certain proportion of additional pay which I will be able to state at the next stage.

Mr. HAGGART. Would it not be better to have the amount stated in the resolution ?

Sir WILFRID LAURIER. No. Because at the present time we are simply carrying out what has been in force in the Yukon for three or four years. When we sent men to the Yukon it would have been just to give the staff we required the same rate of pay as was given in other sections of the country and we increased the rate generally; we now propose to maintain that same rate.

Mr. HAGGART. I do not know under what authority you gave increased pay to the constables in the Yukon.

Sir WILFRID LAURIER. We did it by taking an appropriation for it every year.

Resolutions reported.

SUPPLY.

House in Committee of Supply.

Department of Labour, Civil Government, salaries and contingencies, $20,100.

Mr. HAGGART. What is the reason of the increase?

Hon. Sir WILLIAM MULOCK (Postmaster General). I will explain all the increases. The total increases in salaries are $2,450. The vote last year was $16,400. This year it is proposed to ask for salaries, $18,850 an increase of $2,450. This increase is made up as follows: $100 increase to the deputy minister; that is under the statute; the deputies go up by $100. Five second-class clerks receive increases of $50 each, which make $250. Provision is made for the promotion of two third-class clerks to junior second-class clerkships, involving an increase of $100, which makes $200. It is proposed to make provision for the appointment

of a new chief clerk as secretary of the department at $1,900. That makes $2,450. All these increases are in the ordinary course excepting the one involved in the appointment of a new officer. The deputy minister is frequently required to be absent from the department in connection with various outside matters, and the work of the department is such that it is necessary to have some person who will be a responsible head of the department in his absence. During the past few years he has been called away to deal with important questions, and during his absence the department is more or less handicapped. No appointment has as yet been decided upon but if parliament passes the vote for the additional clerkship then we will endeavour to appoint a suitable person, a man who will be quite competent to act as deputy during the absence of the deputy himself, and who, whilst the deputy is on duty, will render valuable assistance in carrying on the increasing work of the department.

Mr. HAGGART. Is the new chief clerk to be an officer in the department?

Sir WILLIAM MULOCK. No, it will be an additional appointment to the service.

Mr. HAGGART. I suppose you have an Order in Council for the change of the classification of the officer on the report of the deputy?

Sir WILLIAM MULOCK. Yes, we comply strictly with the Act; a report and recommendation from the deputy which is approved by the head of the department and decided by Council.

Mr. HAGGART. It would be well always to submit these reports to the House, before the estimates are passed as they would give the reasons of the department for the change.

Sir WILLIAM MULOCK. I have no doubt that we follow the regular practice, but I do not think it has ever been the practice to bring these reports to the House. I cannot recall any such practice in my experience, but of course there is no objection whatever to it.

Mr. WHITE. I see a foot-note that this $18,850 or any portion of it may be paid notwithstanding anything in the Civil Service Act. What is the meaning of that?

Sir WILLIAM MULOCK. That is an error. The deputy says it was there in former years before this classification, and has been repeated by the printer; but it is not necessary, and may be struck out.

Administration of Justice—Miscellaneous expenditure, including Northwest Territories, $65,000.

Mr. HAGGART. We have no objection to voting any of the ordinary items in the civil service expenditure; but in regard to all other matters we have a right to have the Auditor General's Report before passing the votes.

Mr. FTZPATRICK. My hon. friend knows that the Auditor General never criticises the Department of Justice, and it is not at all likely that there will be any reference to my department in the report. However, I am of the opinion that the objection taken, if presisted in, is a good one.

Sir WILFRID LAURIER. I may say that on Monday there will be placed upon the table a preliminary report of the Auditor General, which will embrace the Audit Department, the Customs Department, the Geological Survey, the office of the Governor General's secretary, the Indian Department, the Justice Department, Legislation, the Militia Department, the Post Office Department, the Department of Printing and Stationery, the Privy Council and the Secretary of State.

Mr. HAGGART. Then we shall be in a position to consider these items on Tuesday, after we have had an opportunity of seeing the report.

Department of Marine and Fisheries—eight technical officers, $13,300.

Mr. HAGGART. There are eight technical officers instead of seven.

Mr. PREFONTAINE. We moved up one.

Mr. HAGGART. What was the necessity of moving him up?

Mr. PREFONTAINE. A technical officer, Mr. Cunningham, was put in the outside service. That is how the change took place.

Mr. HAGGART. What reason did the deputy assign for a new officer of that rank? It is not sufficient to say that a man is at the maximum of his class, and is removed to this position. We must have a report showing the necessity for an increase of that kind.

Mr. PREFONTAINE. All these proceedings were taken. The deputy minister gave the necessary certificate on account of the increased work of the department. The work has increased considerably during two years, and when that technical officer was removed to the outside service, the deputy minister reported that it was necessary to replace him, and consequently it was done.

Mr. HAGGART. Have you the report of the deputy at hand?

Mr. PREFONTAINE. It is on record and I can place it on the table.

Mr. HAGGART. Where there is a change in an office of that kind, you should have the report giving the reasons for the change, especially when the statute requires that to be done.

Mr. PREFONTAINE. I do not know that the statute requires that this statement should be put on the table of the House. It requires that the report should be had from the deputy minister, and that was done. As regards depositing it on the table of the House, I am prepared to do so.

Mr. HAGGART. Surely the House is entitled to as much information as Council in reference to the reasons for making this increase.

Mr. PREFONTAINE. I do not deny that, but I do not know that it has been customary to place these reports of the deputies on the table of the House. Of course, I have no objection at all to doing so.

Mr. TAYLOR. I understand from the minister that this technical officer was put on the outside service. If so, why are we voting money for the outside service in this vote ?

Mr. PREFONTAINE. We are not voting money for the outside service.

Mr. TAYLOR. The minister said the technical officer was required for the outside service.

Mr. PREFONTAINE. Not at all. I said that we had taken a man from the inside service and placed him in the outside service, and that it was on the report of the deputy minister that this new officer was required.

Mr. HAGGART. It is the very opposite that you are doing. You are not taking a party from the inside service and putting him on the outside, but you are taking one from the outside service and putting him on the inside.

Mr. PREFONTAINE. That is what I said.

Mr. HAGGART. You said the reverse. Has there been a recommendation from the department for the statutory increases, and has every one got the increase who was recommended for it ?

Mr. PREFONTAINE. Yes.

Mr. TAYLOR. Last year there were twelve first-class clerks, and now there are eleven in the estimates. I understood the Minister of Justice to say that one of the twelve had been made a technical officer. But the Minister of Marine and Fisheries told us that the technical officer was brought in from outside.

Mr. FITZPATRICK. An additional officer has been added to the technical branch. We have to make provision for one additional technical officer, and there is one first-class clerk less. The estimate is for one more technical officer and for one less first-class clerk.

Mr. TAYLOR. But that is not what the minister of the department told us. He said that the technical officer had been brought from the outside and not from the inside service.

Mr. FITZPATRICK. I think he said that Cunningham had been transferred to the outside service, but did not say whence he had been taken. As to the construction to be put on the statute, I take issue with my hon. friend from Lanark (Mr. Haggart). The minister comes to parliament and asks parliament to vote an appropriation for an additional officer. The condition upon which parliament votes the appropriation is that full information be given by the minister to the House ; and after parliament has voted the item, it is necessary for the permanent head of the department to make a report to the effect that an additional officer is required, and that the person recommended has the necessary qualifications. But that is not a condition precedent.

Mr. HAGGART. I have not looked at the statutes lately, but the practice used to be entirely different. First of all, the deputy head reported what his department required. Then the minister had to get the consent of the Council for the appointment asked for. The voting of the money by parliament was not a condition precedent at all. The power of appointing rests with the Crown. The Crown may appoint, but cannot pay. In the past, when a change was required in the cadre of a department, the report of the deputy head required the sanction of the minister, and then its adoption by the Council. If the Council approved, an estimate was submitted to meet the expenditure. The minister should always be ready in the House to give the reasons which he submitted to the Governor General in Council for the new appointment. As to the other question, the explanation of the Minister of Justice is entirely different from that of the Minister of Fisheries. The latter told us that he took this technical officer from the outside and not from the inside service. What was the need of another technical officer if you had him already in the department as first-class clerk ? Who was the first-class clerk promoted ? Evidently the minister desired to give additional pay to some first-class clerk who had reached the maximum of his grade, and he took this means of doing it.

Mr. TAYLOR. Will the Minister of Marine and Fisheries inform me if it was one of the twelve gentlemen who were in the first-class list last year who was promoted to the position of technical officer ?

Mr. FITZPATRICK. My hon. friend knows well that no promotion could take place until authorized by parliament. All we are doing is giving authority to the minister to do this in the future.

Mr. TAYLOR. What does the minister intend doing ? Does he intend taking one of these twelve first-class clerks and making him a technical officer ?

Mr. PREFONTAINE. I cannot say at present, but will do for the best.

Mr. TAYLOR. We ought to know before we vote the money. Last year we provided for twelve first-class clerks, and now are only providing for eleven. Who was the one who was promoted and made a technical officer ?

Mr. HAGGART. The House does not authorize appointments or promotions at all. That is the function of the Governor General in Council. What the House does is vote the money, and the minister makes the appointment on the approval of the Governor General in Council. Will the minister be kind enough to tell us who the officer is whom he intends to recommend for promotion to the technical branch ?

Mr. PREFONTAINE. It will be one of the first-class clerks, but, I regret to say, I cannot now state whom I will recommend.

Department of Marine and Fisheries—contingencies—clerical and other assistance, including the payment of $2.25 per day to M. Lamouche, $650 per annum to W. L. Charbonneau and $550 to Henry O'Brien, notwithstanding anything in the Civil Service Act, $3,000.

Mr. HAGGART. What is the meaning of this?

Mr. PREFONTAINE. Last year there was only one of the persons—Charbonneau—mentioned in connection with this vote, as hon. gentlemen will see on referring to last year's estimates. The other two were being paid out of the same vote, though their names were not mentioned. Mrs. Lamouche has been employed in the department since 1879, and, before that she was employed in the Finance Department. She had always been paid out of contingencies. Last year the appropriation was exhausted before the end of the fiscal year, so she could not receive her salary, causing her great inconvenience. It was decided that hereafter her name should be mentioned in the estimates. She keeps the establishment book and also despatches the notices to mariners. Charbonneau is a messenger to whom we pay the same salary as last year. Since the redistribution of the rooms by the department, another messenger is necessary. The officers of the Marine Department were formerly all on one flat, but now, with the increased work carried on, we have offices on another flat, and we have O'Brien as messenger there.

Mr. TAYLOR. And has the money voted last year been expended?

Mr. PREFONTAINE. Yes.

Mr. TAYLOR. And the minister tells us that the money could not be drawn by certain of these officers because their names were not mentioned. Then, the vote lapsed and the unexpended money should have gone back into the treasury.

Mr. PREFONTAINE. The vote was over expended.

Mr. HAGGART. I cannot understand that, and it is impossible to understand it with the explanation the minister gives. How could the vote be over expended ?

Mr. PREFONTAINE. The vote was $3,000 and it was exceeded by $2,000.

Mr. HAGGART. There is an increase of $3,000 in the next item of contingencies, that for printing and stationery. We should have an opportunity of consulting the Auditor General's Report in order to understand how the money has been expended.

Mr. DEPUTY SPEAKER. This vote will stand.

Some resolutions reported.

ADJOURNMENT—BUSINESS OF THE HOUSE.

Sir WILFRID LAURIER moved the adjournment of the House. He said: On Tuesday I propose to finish the item of civil government. We have the High Commissioner's office and the Departments of Justice, Interior and Militia. The Minister of Militia (Sir Frederick Borden) will be here on Tuesday, and I will have somebody to take the estimates for the Department of the Interior.

Motion agreed to and House adjourned at 3.55 p.m.

HOUSE OF COMMONS.

MONDAY, January 23, 1905.

The SPEAKER took the Chair at Three o'clock.

QUESTIONS.

PRINCE EDWARD ISLAND RAILWAY.

Mr. ANGUS A. McLEAN asked :

1. What was the total expenditure in connection with the Murray Harbour Branch of the Prince Edward Island Railway up to 1st January, 1905.

2. How much has been expended on Hillsboro' Bridge for all purposes connected with the construction thereof up to 1st January, 1905 ?

3. What were the legal expenses in connection with the above public works since 30th April, 1904 ; and separately to whom paid, and the amount paid to each person ?

Hon. H. R. EMMERSON (Minister of Railways and Canals):

1. Total expenditure in connection with Murray Harbour Branch Railway to January 1, 1905, is $1,018,711.93.

2. Total expenditure on Hillsboro Bridge to January 1, 1905, is $1,220,968.32.

3. The legal expenses in connection with these public works since April 30, 1904, up to January 1, 1905, is $261.30, made up as follows :

F. L. Haszard..	$180 16
S. Blanchard..	26 09
G. S. Inman..	55 05
	$261 30

I. C. R.—STATION AGENT AT FREDERICTON.

Mr. CROCKET asked :

1. Has Odbur White, station agent of the Intercolonial Railway at Fredericton, N.B., been notified that his services as such agent are to be dispensed with on the twenty-fourth day of January, inst. ?
2. If so, when was he so notified, and for what reason ?
3. Have any complaints been made against him in reference to the performance or non-performance of his duties, or otherwise ?
4. If any such complaints have been made, by whom were they made ; were they made in writing, and have they been investigated ?
5. What was Mr. White's salary ?
6. Has any other person been appointed or notified of appointment as Mr. White's successor ?
7. If so, who, and at what salary ?

Hon. H. R. EMMERSON (Minister of Railways and Canals):

1. Yes.
2. January 10, 1905.
3. Yes.
4. Mr. Tiffin, General Traffic Manager, and Mr. J. E. Price, General Superintendent, reported him as not qualified for the position.
5. $65 per month.
6. Yes, temporarily.
7. R. Z. Walker. Salary $85 per month.

CORNWALL CANAL EMPLOYEES.

Mr. PRINGLE asked :

1. How many extra men were employed on the Cornwall Canal during the months of October and November, 1904 ?
2. At whose request and on whose recommendation were these men placed at work ?
3. What was the nature of their employment?
4. What was their remuneration per day ?
5. When were they discharged ?

Hon. H. R. EMMERSON (Minister of Railways and Canals):

1. There were 25 more men employed on the Cornwall Canal in October and 21 in November, than in the preceding month of September, 1904.

2. Nobody requested extra men to be employed during these months, but in the ordinary course the works for which parliamentary appropriations were made, were undertaken during the working season. The superintendent of the canal requiring men for these works of repairs took the men recommended by Mr. Robert Smith.

3. They were employed rebuilding pier below lock No. 19, cleaning out ditch at upper entrance, and repairing scow, also levelling ground at lock No. 17.

4. Labourers $1.50 per day. Foremen $2 per day. Masons and caulkers $3 per day. Man and team $3 per day.

5. The work having been completed, most of the men were discharged on November 17, 1904, and the last four men on December 3, 1904.

P. E. I. TELEGRAPH RATES.

Mr. LEFURGEY asked :

1. How much yearly increase in subsidy was given to the Anglo-American Telegraph Company for the service between Prince Edward Island and the mainland ?
2. What are the services required to be performed, in detail, (a) rates now chargeable on regular messages of ten words and extra on additional words above ten, between Prince Edward Island and the following places : Maritime Provinces, Quebec, Ontario, Manitoba, Northwest Territories and British Columbia ; (b) rates to United Kingdom ; (c) night rates; (d) times for opening and closing offices on Prince Edward Island, and in Sackville, N.B.?
3. Over what period of time is this arrangement binding on the company and government ?

Hon. SYDNEY FISHER (Minister of Agriculture) :

1. $5,000.

2. (a). By the present agreement the company has reduced its former rates on messages from points on Prince Edward Island to the provinces of Nova Scotia, New Brunswick, Quebec and Ontario, from 50 cents for 10 words, with free address, and 3 cents for each additional word, to 30 cents for 10 words, with free address, and 2 cents for each additional word. A proportionate reduction is to be made for press messages.

(b). Rates to Manitoba, Northwest Territories, British Columbia and United States of North America are also reduced from 50 cents and 3 cents to 25 and 2 cents, to which the rates of connecting lines must be added.

(c). There are no night rates between points in eastern and central Canada, but connecting lines allow night rates to northwestern Canada and the United States.

(d). Under the new agreement an all-night service is given at Charlottetown, P.E.I., and Sackville, N.B., and an extended service at Summerside, which places had formerly been deprived of such privileges ; the Sunday service has also been made similar to that prevailing in Western Union offices in the maritime provinces.

3. The present agreement is binding for a period of five years.

FREE TRANSPORTATION OF HAY ON I. C. R.

Mr. WILMOT—by Mr. W. J. Roche—asked :

1. Is the Order in Council still in force authorizing hay to be carried on the Intercolonial Railway free of freight charges ?
2. Is any hay now being carried on the Intercolonial Railway free under such authority ?

3. How long does the government intend to continue the shipment of hay free ?

4. If the said Order in Council has been cancelled, when was it cancelled ?

Hon. H. R. EMMERSON (Minister of Railways and Canals) :

1. The Order in Council limited the time for free transportation of hay over the Intercolonial and Prince Edward Island Railways to the 31st of December, 1904, except for such as had been bona fide ordered between the 6th of October and the 31st of December, 1904, and for which cars could not be provided during that period, may be carried free after that date.

2. Yes.

3. Answered by No. 1.

4. The Order in Council has not been cancelled.

MOTION AGREED TO WITHOUT DISCUSSION.

For a statement showing the amount of money spent by the government, or any department thereof, in the parish of Chateau-Richer, county of Montmorency, for building wharfs, piers, docks, breakwaters, &c., or for removing boulders or rocks from the beach in front of the said parish, or for any other public works, from the 1st of September, 1904, to the 15th of November of the same year.—Mr. Morin.

REPORT PRESENTED.

Partial report of the Auditor General for the year ending June 30, 1904.—Rt. Hon. Sir Wilfrid Laurier.

RAILWAY ACT AMENDMENT.

On the order :

Second reading of Bill No. 4, An Act to amend the Railway Act, 1903.—Mr. W. F. Maclean. E.

Mr. W. F. MACLEAN (South York). Might I ask, in connection with the Orders of the Day, why my bill has not been called ?

Sir WILLIAM MULOCK. It is not printed in both languages.

Mr. W. F. MACLEAN. You take advantage of that ?

Sir WILLIAM MULOCK. It is not taking advantage. Some member may call attention to the fact ; but if no member objects, the bill may be proceeded with.

Sir WILFRID LAURIER. The House is too thin to-day for such an important subject.

Mr. W. F. MACLEAN. When will it be thicker ?

Sir WILFRID LAURIER. Perhaps next week.

PAY OF NORTHWEST MOUNTED POLICE.

Resolutions respecting the Northwest Mounted Police reported from the Committee of the Whole, read the first and the second time, and agreed to.

Sir WILFRID LAURIER moved for leave to introduce Bill (No. 8) to amend the Mounted Police Act, 1894.

Motion agreed to, and Bill read the first time.

Sir WILFRID LAURIER. There is nothing now before the House except the voting of supply, and I understood from my hon. friend the other day that before going on he wanted to have the Auditor General's Report. We have furnished something on which we can take supply to-morrow. I now beg to move that the House do now adjourn.

Motion agreed to, and House adjourned at 3.20 p.m.

HOUSE OF COMMONS.

TUESDAY, January 24, 1905.

The SPEAKER took the Chair at Three o'clock.

NEW MEMBER.

Mr. SPEAKER. I have the honour to inform the House that the Clerk of the House has received from the Clerk of the Crown in Chancery a certificate of the election and return of Arthur Lachance, Esquire, for the electoral district of Quebec Centre.

SELECT STANDING COMMITTEES.

Rt. Hon. Sir WILFRID LAURIER (Prime Minister) moved :

That the report of the special committee to strike the Standing Committees of this House, presented to this House on Thursday the 19th inst., be amended, and that the name of Mr. Macpherson, member for the electoral district of Vancouver city, and of Mr. Boyce, member for the electoral district of Algoma West, be added to the Standing Committee on Railways, Canals and Telegraph Lines, and that the name of Mr. Macpherson, member for Vancouver, be substituted for the name of Mr. Marcil on the Committee on Printing.

Mr. FOSTER. That adds one each to the Committee on Railways and Canals ?

Sir WILFRID LAURIER. Yes.

Mr. FOSTER. I suppose Mr. Haggart had cognizance of it ?

Sir WILFRID LAURIER. I notified Mr. Haggart.

Motion agreed to.

Sir WILFRID LAURIER. I beg to move:

That the report of the special committee appointed to prepare and report with all convenient speed lists of members to compose the select standing committees of this House dur-

ing the present session, as amended, be concurred in.

Motion agreed to.

JOINT COMMITTEE ON PRINTING.

Sir WILFRID LAURIER moved :

That a message be sent to the Senate to acquaint their honours that this House will unite with them in the formation of a joint committee of both Houses on the subject of the printing of parliament, and that the members of the Select Standing Committee on Printing, viz.: Messrs. Bennett, Bergeron, Clarke (Toronto), Cyr, Dyment, Gervais, Henderson, Hughes (Victoria), Johnston (Cape Breton), Johnston (Lambton), Lavergne (Drummond and Arthabaska), Maclean (South York), McColl, Macpherson, Oliver, Parmelee, Piche, Prefontaine, Roche (Marquette), Ross (Yale and Cariboo), Scott, Sutherland (Oxford), Taylor and Tisdale, will act as members, on the part of this House, on the said joint committee on the printing of parliament.

Motion agreed to.

LIBRARY COMMITTEE.

Sir WILFRID LAURIER moved :

That a select committee composed of Messrs. Bourassa, Bergeron, Brodeur, Calvert, Demers (St. John and Iberville), Johnston (Lambton), Hyman, Sir Wilfrid Laurier, Scott, Grant, Smith (Nanaimo), Foster, Stockton, Clarke (Toronto) and Monk, be appointed to assist Mr. Speaker in the direction of the library of Parliament, so far as the interests of this House are concerned, and to act as members of a joint committee of both Houses on the Library ; and that a message be sent to the Senate to acquaint their honours therewith.

Motion agreed to.

DEBATES COMMITTEE.

Sir WILFRID LAURIER moved :

That the select committee be appointed to supervise the Official Report of the Debates of this House during the present session, with power to report from time to time, be composed of Messrs. Bureau, Guthrie, Gervais, Clark (Essex), Ethier, Johnston (Cape Breton), Logan, Scott, Macpherson, Bergeron, Clarke (Toronto), McCarthy (Calgary), Schaffner, Roche (Marquette) and Taylor.

Motion agreed to.

MEMBER INTRODUCED.

Arthur Lachance, Esquire, member for the electoral district of Quebec Centre introduced by Sir Wilfrid Laurier and Hon. Chas. Fitzpatrick.

REPORTS PRESENTED.

Annual report of the Department of Indian Affairs for the year ended June 30, 1904.—Sir Wilfrid Laurier.

Annual report of the Department of Marine and Fisheries for the year ended June 30, 1904.—Hon. R. Préfontaine.

SUPPLY.

House in Committee of Supply.

Civil government—Department of Militia and Defence—salaries, $48,350.

Rt. Hon. Sir WILFRID LAURIER (Prime Minister). The first item for the deputy head requires no explanation. The second item, that of chief clerks, shows a decrease of one by the superannuation of Major Benoit. Instead of five chief clerks, there will be four.

Mr. FOSTER. How old was Mr. Benoit ?

Sir WILFRID LAURIER. He must have been thirty years in the service and about sixty years of age.

Mr. FOSTER. Why was he superannuated ?

Sir WILFRID LAURIER. Because of very serious and chronic bad health. In the first-class clerks, there is an increase of one owing to the promotion of Mr. Chesley.

Mr. FOSTER. Were all the vacancies filled last year ?

Sir WILFRID LAURIER. No, there are two vacancies which we do not intend to fill. In the second class there were eight last year, and only six this year.

Mr. FOSTER. Are all of the six clerkships unfilled ?

Sir WILFRID LAURIER. They are all filled.

Mr. FOSTER. So that the reduction is simply an apparent one, because the full number was not filled last year.

Sir WILFRID LAURIER. We might have found people to fill them, but resisted the temptation.

Mr. FOSTER. Has my right hon. friend any idea as to the outcome of that Martineau business ? He will remember that there was a serious lache in the Militia Department, and that there was a suit of some kind in which Martineau gave evidence. Did that evidence implicate others, and what is the position of Martineau now ?

Hon. CHARLES FITZPATRICK (Minister of Justice). He is in the penitentiary at Kingston now. I think his sentence was for seven years. So far as the civil remedy is concerned, the government have taken action against the Bank of Montreal to recover the money paid out on these cheques, and the case is somewhat complicated by the fact that the Bank of Montreal has taken action against the other banks through which the cheques were passed. The suit is now waiting judgment by Mr. Justice Anglin.

Mr. FOSTER. It seems rather extraordinary that such defalcations could have taken place in a well organized and super-

vised department. As I understand, cheques were drawn in a very loose way and were signed only by one person. The whole transaction seemed to show something wrong in the supervision and checking of that kind of work. One finds it difficult to understand how a raw, new clerk could have had such facilities free of check or supervision. Have any steps been taken to render such defalcations more difficult ?

Mr. FITZPATRICK. It is almost impossible for any individual or government to protect itself absolutely against fraud. The practice in the departments requires that all cheques be signed by two officials. In addition, when the cheques were returned to the department, the practice was to have them compared with the bank list by two of the officials, the one independent altogether of the other. It would appear that there was some remissness in that respect.

Mr. FOSTER. The same man who drew the cheques, checked off the list ?

Mr. FITZPATRICK. No, but instead of having two officials go over the cheques and compare them with the bank list at the end of the month, only one did the work. It appears to me that when at the end of the month the bank returned its statement of the amounts paid over, the cheques should have been in the hands of an official of the department and there ought to have been some method of ascertaining what had been going on during the month. We are in the habit of criticising very severely, on both sides, the action of the officials of the department, and we are told that there are practices in the department which would not be tolerated in any private institution. It would appear that some of the cheques in question were paid with only one signature attached. That was not the fault of the department, but of the bank that paid the amount. In fact, I understand, that some of the cheques bore no signature at all—simply the official cheque filled in. So, this is not a case of laxness or remissness exclusively on the part of public officials.

Mr. FOWLER. Have any steps been taken to collect the guarantee bond which this man Martineau put up when he was appointed ? I suppose he did put up a guarantee bond ?

Mr. FITZPATRICK. Nothing was done with respect to the guarantee bonds. I think my hon. friend (Mr. Fowler) will bear me out when I say that it would not be the part of prudence to take steps against the guarantor until we have settled the question of liability. Our contention is that there is no liability, that the cheques being bogus cheques, the bank was not authorized to make payment to Martineau.

Mr. FOWLER. The government are still fighting that question ?

Mr. FITZPATRICK. We have it tried. It is sub-judice.

Mr. FOSTER. Who are the guarantors ?

Mr. FITZPATRICK. I have not the names under my hand.

Mr. STOCKTON. Do I understand the minister to say that the government repudiate the liability on cheques paid by the bank that were not properly signed ?

Mr. FITZPATRICK. Yes.

Mr. STOCKTON. And that stands for judgment ?

Mr. FITZPATRICK. Yes.

Civil government—Department of the Interior —salaries,$166,254.

Sir WILFRID LAURIER. There is an increase of $25 for the chief clerk—law clerk—which takes him to this maximum. The increase to the secretary is also the statutory increase. The same with the chief clerk, timber and mines, the clerk of patents —taking him to his maximum—the chief clerk of the registration branch, the accountant, and the chief clerk of the Dominion lands, patent branch. In fact there are none but statutory increases. There is one sub-item of this vote which calls for some explanation :

Two surveyors at $2,300 each, J. J. McArthur and C. A. Bigger, notwithstanding anything in the Civil Service Act.

Mr. McArthur is an old employee of the department, having first joined the staff in 1897, I believe. He has been employed ever since in one work or another under the department, and always as a surveyor.. For the last two or three years he has been paid out of the Alaska boundary appropriation. Mr. Bigger is also a land surveyor. He was employed in the department from 1882 to 1887, when he resigned. He was taken into the department again in 1901. Since then, he has been employed in marking again the boundary between the state of New York and the province of Quebec, being paid out of a special vote. It is now proposed to put these gentlemen under the regular staff of the Department of the Interior.

Mr. FOSTER. Are these middle aged men ?

Sir WILFRID LAURIER. Mr. McArthur is perhaps, 54 or 55. I do not know Mr. Bigger's age.

Mr. FOSTER. The Prime Minister has not finished his explanation I think. There are some extra junior clerks.

Sir WILFRID LAURIER. There are two second-class clerks and one third-class. The engagement of these is made necessary by the growth of the work of the department.

Mr. FOSTER. All these clerks are in the department here ?

Sir WILFRID LAURIER. Yes.

Mr. FOSTER. I would ask for information if the Prime Minister has it, concerning the change or proposed change in the deputy head. I see it stated in the newspapers that the deputy has resigned or intends to resign. He is a man in the prime of life, and, I have understood, a very efficient man. What are the reasons for giving up such a 'good sit ?'

Sir WILFRID LAURIER. Mr. Smart has given up the service. There is no reason, so far as I now know, except that he thinks that he can better his circumstances by going into business himself. He has not been superannuated so far as I know.

Mr. FOSTER. Who has been appointed in his place ?

Sir WILFRID LAURIER. Mr. Cory.

Mr. FOSTER. Who is Mr. Cory ?

Sir WILFRID LAURIER. He was inspector of offices in the Yukon Territory.

Mr. FOSTER. How long was he there ?

Sir WILFRID LAURIER. From July, 1901.

Mr. FOSTER. What are his special qualifications ?

Sir WILFRID LAURIER. He has done good service in the work with which he was intrusted. Mr. Smart, who, the hon. gentleman (Mr. Foster) says was an efficient man, had not been connected with the service until he came here. Mr. Cory has had experience in a post that was very difficult to fill, where he gave satisfaction. We hope he will be as efficient as Mr. Smart has been.

Mr. FOSTER. The deputy head of a department, especially in such a department as the Interior, has a multiplicity of branches to supervise and a great variety of work to do. It struck me when I read of the appointment that the mere fact that a man had shown efficiency in the Yukon where there is no great variety, but only a special branch of work, might not, imply the general qualifications necessary to the permanent head of the department.

Sir WILFRID LAURIER. I do not agree with my hon. friend. I think that a man that has been in the service in the Yukon for five years and has given satisfaction must be a very good man. I understand that, before joining the service he was for eleven years in the office of the Attorney General for Manitoba.

Mr. FOSTER. I suppose I need not ask if he belongs to the party of the leader of the House ?

Sir WILFRID LAURIER. I do not know. But I should be sorry if he did not.

Civil government—Department of the Interior—contingencies, $27,185.

Sir WILFRID LAURIER. There is a decrease of $20,000 there because there is no vote for salaries and expenses of the mines branch. I do not wish to gain undeserved credit. My hon. friend will find the item again, in No. 216, Dominion Lands.

Civil government — Department of Indian Affairs—salaries, $66,382.50.

Sir WILFRID LAURIER. There is only one item there which I think requires explanation. We ask an appropriation for six chief clerks instead of five. The reason is that Mr. Bray has been promoted to a chief clerkship. Mr. Bray has been in the department as a first-class clerk since 1884, and he has simply got promotion.

Mr. FOSTER. The fact that a man has been promoted is scarcely a reason why you should establish an additional chief clerkship. When you establish an additional chief clerkship for a good reason, then of course a man is either promoted to it or another one appointed. What was the reason for adding to the chief clerkships?

Sir WILFRID LAURIER. The reason is that Mr. Bray, as I understand, is a very efficient officer who has been in the service since 1884; he had reached the top of his class, and I think it is only reasonable that he should be promoted one step higher as a reward for good service. My hon. friend will agree to that.

Mr. FOSTER. But that must always have a limitation, because on that principle you will be constantly increasing the number of chief clerks.

Sir WILFRID LAURIER. But when you have a man like Mr. Bray who has been twenty years in the service and has reached the maximum of his class, and who cannot therefore get any further statutory increase, I think it is a good practice and a good principle, in order to encourage the civil servants, to reward them in some way, and that is the only way in which Mr. Bray can be rewarded.

Mr. BERGERON. How old is he now ?

Sir WILFRID LAURIER. Fifty-nine.

Mr. BERGERON. Could you not increase his salary in an indirect way, by giving him a pension ?

Sir WILFRID LAURIER. This is the only way it can be done. There is a statutory increase of $50 a year given until a man has reached the maximum of his class. Mr. Bray was in the first class, and he could not go any higher. He might serve twenty years more without having an addition to his salary. He could not get the $50 a year which everybody else gets until he reaches the maximum. So in order to give him an incentive, and encourage the

civil servants generally, he has been promoted.

Mr. BERGERON. Is that the general practice, or is this a special case ?

Sir WILFRID LAURIER. It is a general practice that a man who has reached the maximum of his class, and has been long in the service is promoted.

Mr. FOSTER. I have nothing to say against Mr. Bray at all; he may be an excellent officer, I do not know him personally. If the right hon. gentleman says he is an excellent officer, I do not cavil at that. But I am saying that the principle upon which the right hon. gentleman is basing an addition to the chief clerkships is a very dangerous principle and, to my mind, is one which we have certainly not acted upon heretofore in the civil service. There is a theoretical civil service which requires a certain number of classes of clerks, and when it is determined how many of each class is required for efficiently carrying on that service, then the staff is completed with the required number. If the argument is to be taken that whenever a man comes up to the top of a lower class and is a deserving clerk, therefore you are to raise him to a higher class in order to give him promotion, I do not think that is ground on which you can possibly stand. Because if we go through the civil service here I am quite sure you will find there are scores, may be hundreds, of deserving clerks who are at the maximum of their class and have been for years, and yet they are not put into the class above, because they are met with the answer as to the theoretical organization and are told: We consider that we have already a sufficient number of chief clerks, and you are in the first-class list and are at the maximum of your class ; but because you are at the maximum of your class we cannot therefore add to the number of the next higher class in order simply to promote you. If you do that the House will easily see into what the practice would drift. The theory is, and I think the practice has been up to this time, that we do not want any more chief clerks than the theoretical organization requires for the proper working of the department. If a man in a class below gets to the top as to salary and can get no more salary under that, then he may be told : There is no vacancy in the superior class, but when that vacancy occurs for any reason a deserving man in a lower class will go into that higher class. But if the theory of my right hon. friend is correct you will have immediately to extend every class of clerkships above the third-class, and if that is to be the recognized principle you will have deserving men coming up from every one of your departments and saying, I have been years at the head of my class and cannot get any further increase, I have reached my maximum, you must make a clerkship in the next class for me. If that is the principle upon which you are going to act, you can see the difficulty you are getting into. I say the principle is not right. When the work of a department is such that an additional chief clerk is absolutely necessary, and when you come to the House and ask for an additional chief clerk, then you are on good ground; then you look around among your men in the class below and you may take the most deserving man who is at the maximum. I think my right hon. friend will see that he is not going on the right basis, and probably he will revise his basis of claim.

Sir WILFRID LAURIER. I do not see why I should revise it. I think I have been following the practice which has been invariably followed ever since I can remember. There is no department in the service in which the number of officers is limited, beyond which number we cannot go. I agree with my hon. friend that the reason I stated would not be sufficient as a general principle, to promote a man from a lower class; but I think that the minister in every department, when he sees that he has a good man working steadily to the front, a man who has been in the service for twenty years, and has given full satisfaction—I think he is justified in promoting him to a higher class in order to reward him. I think under the circumstances the proposition is quite defensible.

Mr. FOSTER. If another chief clerkship is necesary for the work, then of course that follows.

Civil government—Department of Finance and Treasury Board, $57,865.

Sir WILFRID LAURIER. There is an increase in this department of $1,963.50, and I will give my hon. friend the detailed estimate of it :

Chief clerks—		
Two statutory increases of $50 each.. ... .$	100 00	
		$ 100 00
First class—		
Two increases at $25 each..$	50 00	
Five increases at $50	250 00	
Two special increases, 1904-5, at $100 each and increases, 1905-6, $50..	300 00	
		600 00
Second class—		
Five increases at $25..	125 00	
Four increases at $50	200 00	
Short estimated, 1904-5, ...	12 50	
One proposed promotion from junior second class	1,200 00	
	$1,537 50	
Less difference between one new appointment at $1,200, and one vacant at $1,475..	275 00	
		1,262 50

Mr. FOSTER. Who is the junior second-class clerk who is to be promoted ?

Sir WILFRID LAURIER. That has not been decided.

Junior second class—		
Seven increases at $50	$ 350 00	
Three short estimated, 1904-5, at $12.50	37 50	
One new appointment..	1,000 00	
Two new appointments at $800 each	1,600 00	
	$2,987 50	
Less one superannuation, $1,075.		
One dropped at $1,075, one at $937.50	3,087 50	
		$ 100 00
Decrease..		$100 00

Mr. FOSTER. Who has been superannuated ?

Sir WILFRID LAURIER. Mr. Tasker has been superannuated.

Mr. FOSTER. Is that the only superannuation that has taken place ?

Sir WILFRID LAURIER. Yes. Amongst the messengers there are two increases of $50 each, making the total increases $1,963.50.

Mr. FOSTER. Is there a vacancy provided for in the estimates of the coming year that is to be filled outside of the promotion of a junior second-class clerk ?

Sir WILFRID LAURIER. There is a vacancy to be filled.

Mr. FOSTER. In what class ?

Sir WILFRID LAURIER. In the junior second class.

Mr. FOSTER. When did that vacancy occur ?

Sir WILFRID LAURIER. There is a promotion to take place, and that will create a vacancy.

Mr. FOSTER. How does the promotion take place ? Is there a vacancy in the grade above ?

Sir WILFRID LAURIER. This estimate provides for the vacancy and promotion.

Mr. BERGERON. The promotion of a clerk from the second class to the first class ?

Sir WILFRID LAURIER. No ; from the junior to the second class.

Mr. BERGERON. No, but I understood that the promotion was to take place to a vacancy in the first class.

Sir WILFRID LAURIER. No, to a vacancy in the second class.

Mr. BERGERON. Is the vacancy caused by the reason which we found to exist a few moments ago in the Indian Department ; that is, by rewarding a clerk by putting him in the first class ?

Sir WILFRID LAURIER. No.

Civil government—Department of Finance and Treasury Board—contingencies, $12,000.

Mr. BERGERON. What is that for ?

Sir WILFRID LAURIER. The item of—

Clerical and other assistance, notwithstanding anything in the Civil Service Act. $5,000.

is to provide for two messengers who have not passed the civil service examination. There is nothing new in that. Then there are seven extra clerks at $640 each, five at $550 each, making $2,750 ; one at $500 and two messengers at $1,100, making a total of $4,990. The estimate is $5,000. Then, for printing and stationery the estimate is $3,200.59 and for sundries $3,177.

Mr. BERGERON. Who controls the expenditures in that department ?

Sir WILFRID LAURIER. In the Finance Department ?

Mr. BERGERON. Any department. Who controls the expenditures for stationery and sundries ?

Sir WILFRID LAURIER. I can only say that so far as my own department is concerned, these expenditures, which reach the same amount nearly every year, are controlled by the Clerk of the Privy Council, and I suppose it is very much the same in other departments. These matters are controlled by the deputy heads.

Civil government—High Commissioner's office, London—salaries, $10,300.

Sir WILFRID LAURIER. I have to make a motion there to drop one first-class clerk at $1,900. We only have one clerk. I therefore beg to move :

That this item be reduced from $3,750 to $1,850, and that it be made to read as follows : one first-class clerk at $1,850.

Motion agreed to.

Mr. FOSTER. Who is the secretary now?

Sir WILFRID LAURIER. The secretary is Mr. Griffith, and then we have Mr. Taylor, Mr. Luke, Mr. Allin and Mr. Churchouse. There has been no change in the department since my hon. friend's time, except that Mr. Reynolds has been superannuated, Mr. Churchouse has been added and Mr. Griffith has taken the place of Mr. Colmer.

Mr. FOWLER. Is there no salary attached to the office of High Commissioner ? I do not see any salary provided for him.

Sir WILFRID LAURIER. That is regulated by statute, if I remember rightly.

Mr. FOSTER. The High Commissioner does not take any salary.

Sir WILFRID LAURIER. Well, I think he spends more than he takes.

Mr. BERGERON. I remember that some years ago the government of Canada bought a house in London for the High Commissioner.

Sir WILFRID LAURIER. Yes.

Mr. BERGERON. I understand that Lord Strathcona does not live in that house, but that he lives in his own house. Who occupies the house that belongs to the government ?

Sir WILFRID LAURIER. My belief is that we sold that house years ago.

Departments generally—contingencies—care and cleaning of departmental buildings, including amount of $100 required to pay for firing noon gun, which amount may be paid to a member of the Civil Service, notwithstanding anything in the Civil Service Act, $35,000.

Mr. FOSTER. Is not that gun very nearly worn out ?

Sir WILFRID LAURIER. No, it is still doing good service once a day. The increased expenditure there goes to the charwomen.

Mr. FOSTER. On what basis is that service now carried on ?

Sir WILFRID LAURIER. I think the same system as that which formerly prevailed. There is a superintendent, Mr. Conroy.

Mr. FOSTER. The same superintendent?

Sir WILFRID LAURIER. Yes.

Mr. FOSTER. And what are they paid ?

Sir WILFRID LAURIER. I think they have an increase of 25 cents a day, they get 75 cents a day now.

Mr. FOSTER. What did they get before?

Sir WILFRID LAURIER. I think it was 50 cents, some got 50 cents and some 75 cents.

Mr. FOSTER. Are you going on the uniform principle now that all are equally good ?

Sir WILFRID LAURIER. Yes, it is like the Scripture, the last comer is entitled to the same pay as the first.

Mr. FOSTER. When was the increase given ?

Sir WILFRID LAURIER. Last year.

Mr. FOSTER. About what time ?

Sir WILFRID LAURIER. My hon. friend should not put that question ; none of them have votes, I can assure my hon. friend. My friend Mr. Fraser does not know the date and I do not know either ; it was during the year 1904 and previous to October.

Mr. FOSTER. About that time ?

Sir WILFRID LAURIER. Perhaps.

Mr. FOSTER. That is, taking the small and the great, the autonomy for the Northwest and the increase to the charwomen are given for the same reason just before the election.

Sir WILFRID LAURIER. It is a good reason all round.

Geological Survey—civil government, $64,155.

Sir WILFRID LAURIER. There is a decrease there of $500 in the salary of the deputy head and director. I could not give any explanation as to that ; I have been unable to get the information yet. If my hon. friend will pass the item I shall get the information.

Mr. FOSTER. If my hon. friend will make a point to give that explanation we shall pass it.

Sir WILFRID LAURIER. I shall give the explanation when we come to concurrence.

Administration of Justice—miscellaneous, including Northwest Territories, $65,000.

Mr. FOSTER. Why is this any longer required ?

Mr. FITZPATRICK. It will not be any longer required if the Territories are erected into provinces, but in the interval we have to make provision for the conditions existing at the present time.

Mr. FOSTER. You have not full faith that you are going to carry it ?

Mr. FITZPATRICK. Yes, we have absolute faith, but at the same time we are dealing with conditions as they exist and this provision is therefore made.

Mr. FOSTER. What comes under that miscellaneous expenditure ?

Mr. FITZPATRICK. This amount is estimated to be spent for the maintenance of prisoners at police posts in the Northwest Territories, for the transportation of prisoners from place to place in the Territories and from the posts to Stony Mountain penitentiary, Crown prosecutors, legal services, jury and witness fees, coroners' inquests, and fees of sheriffs and clerks of courts. I can give the amounts expended last year. Maintenance of prisoners, $19,363.80 ; transport of prisoners, $12,847.46 ; crown prosecutors $9,333.26.

Mr. FOSTER. Who appoints the Crown prosecutors ?

Mr. FITZPATRICK. We appoint them here.

Mr. FOSTER. By this government ?

Mr. FITZPATRICK. By this government. Jury and witness fees, $18,000 ; coroner's inquests $2,000 ; Sheriff's fees $956 ; clerk of the court fees $1,700 ; extradition cases $588 ; copies of evidence $210 ; sundries $866.68.

Travelling allowances and expenses of judges in Manitoba, British Columbia and the Northwest Territories, $20,000.

Mr. FOWLER. Why is there that increase in the travelling expenses ?

Mr. FITZPATRICK. Because of the increase in the number of circuits. Two circuits have been added in Manitoba and this provides for the increased expenditure involved by the increased number of circuits.

Mr. FOWLER. Do the judges receive the same allowance there as in the other provinces ?

Mr. FITZPATRICK. In Manitoba the allowance is not fixed by statute, it is fixed by Order in Council. In Manitoba the judges are allowed actual moving expenses and $5 per day, in British Columbia necessary and reasonable disbursements for travelling and living accommodation and $6 per day. There has been frequent complaint on the part of the judges that the $5 per day is not sufficient to pay for their accommodation. The Order in Council for Manitoba was passed on the 27th of October, 1882, and that for British Columbia in 1878.

Mr. FOWLER. I think the minister should make a change in that respect. It seems rather infra dig on the part of a judge to have to keep an account of his travelling expenses and disbursements like an ordinary clerk. I think there should be a lump allowance made to the judges there as in the other provinces, sufficient to cover their expenses.

Mr. FITZPATRICK. I quite agree with the hon. gentleman. It ought to be made a matter of statute for the newer provinces as well as for the older. If the question of the remuneration of the judges comes up this session, this matter of expenses should be dealt with at the same time.

Mr. W. J. ROCHE. If a new district is created, is it the intention of the government to appoint a new judge for it ?

Mr. FITZPATRICK. If a new district is created, it is customary for the government to appoint a judge for that district, but that is only applicable to county court judges. The travelling allowances we are dealing with in the first instance are those payable to the judges of the high courts who go from Winnipeg on these circuits.

Mr. W. J. ROCHE. The particular circuit you are speaking of has been covered in the past by some of the present judges.

Mr. FITZPATRICK. Not if it is a new circuit. A county court judge may be appointed.

Mr. FOSTER. Who is the Chief Justice of the Northwest Territories ?

Mr. FITZPATRICK. Hon. Arthur Sifton.

Mr. FOSTER. Any relation to the Minister of the Interior ?

Mr. FITZPATRICK. I have not examined the baptismal certificate, but I understand that he is his brother.

Mr. FOSTER. How many judges are there in the Northwest ?

Mr. FITZPATRICK. I think six.

Mr. FOSTER. Is Judge Richardson still a judge there ?

Mr. FITZPATRICK. No, he retired last year. He had reached that period of service which entitled him to retire on his full salary.

Mr. FOSTER. Who has now his place ?

Mr. FITZPATRICK. Mr. Sifton.

Mr. W. J. ROCHE. Is there any rule with reference to those judges who can retire and draw an allowance from this government ?

Mr. FITZPATRICK. There is a statute which regulates the amount of the retiring allowance. After fifteen years' service a judge is entitled to retire on a two-thirds pension. If he has reached the age of eighty he receives his full salary. If he has served thirty years he goes out on his full salary. If he has reached the age of seventy-five, and has served twenty-five years, he retires on his full salary.

Mr. W. J. ROCHE. They can engage in any other occupation afterwards ?

Mr. FITZPATRICK. Very few of them do, I think.

Mr. W. J. ROCHE. Some of them engage in political work.

Mr. FITZPATRICK. I am afraid we can find one of them, at all events, in the Senate.

To supplement the salary of the judge of the county court for district No. 7, Nova Scotia, $600.

Mr. FOWLER. Why is that ?

Mr. FITZPATRICK. A few years ago provision was made for the payment of this additional amount to Judge Dodd, of Sydney. I understand that it was the desire of parliament to place him somewhat on the same footing as the judge of the county court at Halifax, who received an amount above what the other judges received, owing to the amount of his work being very large.

Mr. FOWLER. Why not make that a statutory allowance ?

Mr. FITZPATRICK. I think that ought to be done, not only in this case, but in the cases of the judges of the divorce and matrimonial courts as well. But this has been the long usage of parliament, and we have not made the change.

Court room and offices at Prince Albert, $840.

Mr. FITZPATRICK. There is no court room at Prince Albert, and this accommodation has to be provided. The present arrangement involves payment for the rental of the sheriff's office at the rate of $15 a

month and for the court room and chambers, including heating, lighting, &c., at the rate of $55 a month, making in all $840 per annum.

To be paid the government of the Northwest Territories, on account of remuneration and expense of stenographers provided by that government for the Supreme Court of the Northwest Territories, $3,000.

Mr. FITZPATRICK. This is under an arrangement which we have entered into with the Attorney General of the Territories, whereby stenographers provided for the Supreme Court of the Territories are paid for by us, we utilizing their services at criminal courts.

Supreme Court of Canada, $28,040.

Mr. FITZPATRICK. These estimates provide merely for the usual increase recommended for the staff. All the officials received their annual increase of $50 each. There is an increase of $1,000 in the item of printing and distributing. That is due to the increase in subscriptions and involves of course an increase in the receipts. I am now negotiating with a law book publishing company to deal with our reports as they are dealt with in Ontario. A great deal of delay at present occurs in the printing and distribution. At times judgments have been rendered three months before they are printed and distributed. I might mention, as showing the evil of this, that a case came up before the Supreme Court in which a decision had been rendered, which would not have been given by the provincial judges had they known of a judgment on a similar question which had been rendered by the Supreme Court. I hope to be able to bring about as early a distribution of the reports as is had in Ontario, where the distribution is made with very great expedition and also considerable economy.

Mr. FOSTER. What is the meaning of the item of $60.75 for 'trams' which appears in the Auditor General's Report.

Mr. FITZPATRICK. I suppose that would be for the car fares of messengers and other officials. Frequently the judges remain at their own houses and require to have law books brought down.

Exchequer Court, $11,690.

Mr. FITZPATRICK. The only increase is $200 given to Mr. Duncan Clarke, who has been promoted from the junior second-class to the second-class. He has been in the service over ten years and is a most faithful, reliable and able officer. He has charge of the docket, acts as stenographer for the registrar, looks after the sales of law stamps, and does all the work of accountant.

Mr. STOCKTON. I would like to call attention to what appears to me an inequality between the Registrar and Marshall of the Admiralty Court at Quebec and similar officials in other provinces. A salary, in addition to the fees, under the admiralty rules of 1893, is given these officers in Quebec, but no salary is given similar officials in the other provinces. All they get are the fees. I am not objecting to the salary given the Registrar in Admiralty at Quebec, but I think that a salary should be given to all the registrars and the fees abolished entirely. It is hardly the proper thing to have the registrar tax his own fees. In that case the fees now given by means of stamps could go into the revenue of Canada.

Mr. FITZPATRICK. My hon. friend will understand how tenacious we are all, particularly at the bar, of our ancient privileges and rights. The reason for the distinction to which he refers is that formerly we had an Admiralty Court at Quebec which was an imperial court. At that time we had a judge and a registrar. The registrar was appointed under the Admiralty Act; and when the old court became a branch of the Exchequer Court, we took over the old officials. Mr. Dunbar, the registrar at Quebec, was one of the officials we took over, and consequently has been paid under the new system the same salary which was paid him when the court was an imperial court.

Mr. STOCKTON. But the same thing applies to the province of Nova Scotia and New Brunswick. There the Vice Admiralty Courts were imperial courts and were abolished precisely as in the province of Quebec.

Mr FITZPATRICK. But are the present registrars those who were officials under the old Act?

Mr. STOCKTON. Not now, but the old registrars continued after the abolition of the Vice Admiralty Court.

Mr. FITZPATRICK. The intention was to continue to the old officials the salaries they were receiving.

Mr. FOSTER. And when these go out?

Mr. FITZPATRICK. The new rule will prevail.

Yukon Territory—travelling allowances of judges, $1,500.

Mr. BERGERON. How many judges?

Mr. FITZPATRICK. Three. They are all High Court judges. There are no county court judges. Mr. Justice Macaulay, in addition to being a judge of the High Court, performs the duties of police magistrate.

Mr. BERGERON. Who is the sheriff ?

Mr. FITZPATRICK. Mr. Eilbeck.

Mr. BERGERON. Is he a young man ?

Mr. FITZPATRICK. He can hardly be, for, on looking over my list, I see the name of J. M. Eilbeck as deputy sheriff. He is the son of the sheriff.

Mr. FOWLER. Mr. Eilbeck had a long leave of absence, had not he ?

Mr. FITZPATRICK. No, he did not get it.

Mr. FOWLER. In this vote there is an item of living allowance of judges at $5,000 each. This question was up last session, and the minister said that the allowance would be done away with. At least, in answer to criticism of mine he said it was unnecessary and ought to be done away with. The expense of living in the Yukon is not so high as it used to be, and not so high in comparison with other places as to justify so large a sum being paid by the country for living expenses. Judges in other parts of the country pay their own living expenses. If the salaries paid judges in the Yukon are not sufficient, let them be increased instead of giving a living allowance.

Mr. FITZPATRICK. The judges in the Yukon are paid $5,000 a year, the same as the judges in the High Court in Ontario and Quebec, and are also paid $5,000 each as a living allowance. My objection to adding anything to the salary is that it may be found inadvisable to have three judges there, while one may be needed elsewhere in the Northwest Territories. If the salaries were at a larger rate than at present, and we wanted to move one of the judges of the Yukon to fill the new place, a grievance would arise if his salary was not continued at the same rate. When a judge is appointed at a certain salary it is very inconvenient to lower that salary.

Mr. FOWLER. Is the salary attached to the judge or to the position ?

Mr. FITZPATRICK. To the position.

Mr. FOWLER. Then, if a judge is no longer judge of the Yukon, he would no longer receive the salary of judge of the Yukon. If he were transferred to Ontario he would receive the salary of a judge of the same rank in Ontario.

Mr. FITZPATRICK. It might be considered to be, to some extent, an interference with the independence of a judge if, being appointed at a fixed salary, he were liable to be removed to another place at a smaller salary. He would hardly be in the position of a man who felt himself independent of parliament in regard to his salary.

Mr. FOWLER. Would not the same apply to his living expenses ?

Mr. FITZPATRICK. No, that might vary according to the locality.

Mr. STOCKTON. That would be a yearly allowance ?

Mr. FITZPATRICK. Yes, a yearly allowance voted by parliament each year. If the conditions change so as to make the vote unnecessary, there is no reason why it should be continued.

Mr. BERGERON. These judges, I imagine, would not be changed without their own consent ?

Mr. FITZPATRICK. No.

Mr. BERGERON. And I suppose they would not consent to a change, because I think they are receiving higher salaries than any other judges. When this allowance was given, years ago, I thought it quite reasonable. But I am told that the expense of living in the Yukon is not nearly so high as it was, and so this living allowance is a great deal too much.

Mr. FOWLER. There is not the slightest doubt that the expense of living in the Yukon has greatly decreased. Last session we had a discussion, and this fact was admitted, and no reasonable excuse was given for this allowance. As I understand it, they have all the comforts of civilization in the Yukon, and there is little difference in the cost of living between the Yukon and the Northwest Territories. I do not think there would be any difficulty in finding gentlemen to fill the positions of judges if this allowance for living expenses were cut out altogether.

Mr. MONK. What is the rule which prevails in regards to living allowances ? I see that the judges get as much for living allowance as for salary ? I understand that they live in Dawson City and that there is not circuit work.

Mr. FITZPATRICK. Of course the expense for circuit work would be under the head of travelling allowance.

Mr. MONK. It seems strange that they should get as much for living allowance as for salary, and the rule seems to apply to the other officers of the court—each officer has a living allowance. The sheriff gets $4,000, as does the clerk of the court, and each has a living allowance. So have the deputy sheriffs, assistant clerks, police magistrate and stenographers of the territorial court. And the Crown prosecutor—besides very considerable remuneration—I think that last year he received between $7,000 and $8,000—has an allowance for expenses.

Mr. FITZPATRICK. Not a living allowance.

Mr. MONK. I suppose that under the conditions that prevail in the beginning an allowance is necessary. But what is the rule now ? Is the same thing allowed for the stenographer or for the sheriff as for the judge ?

Mr. FITZPATRICK. No, the living allowance for the sheriff, police magistrate,

clerks of the court, and stenographers, is $1,800 each.

Mr. MONK. There is no distinction between the sheriff and the stenographers of the territorial court. But the allowance for the stenographers in the police court is not fixed at the same rate.

Mr. FITZPATRICK. The stenographer for the police court gets $1,200 salary and $1,800 for living allowance.

Mr. W. J. ROCHE. Does this practice prevail in the other departments with reference to the living allowances of officials in the Yukon ?

Mr. FITZPATRICK. I understand in all the departments. But I know that so far as the Yukon is concerned, a living allowance was granted to all the officials of the other departments.

Mr. W. J. ROCHE. I understand that in the province of Manitoba the officials are allowed so much for their general expenses, but not a regular living allowance. They are allowed a salary and all expenses, but they have to produce vouchers for every expenditure. It is different in the Yukon, where they are allowed so much, whatever the expenditure may be.

Mr. FOWLER. Will the minister say how much jurors are paid in the Yukon ? Are jurors and sheriffs paid in a different manner from the other provinces ?

Mr. FITZPATRICK. I have not got the information with respect to that, but I can easily procure it if the hon. gentleman wishes.

Mr. FOWLER. About Crown prosecutors, how are the fees regulated ?

Mr. FITZPATRICK. We pay Crown prosecutors in the Yukon exactly as we do all the other counsel employed by the department. When a Crown counsel has rendered a service he sends in his bill, which is taxed in the department in the regular way. Of course I may say that we allow parties something more in the Yukon than we do in the older provinces ; but the bills are taxed in the regular way.

Mr. FOWLER. And the only fees he gets are what he gets from the department here ?

Mr. FITZPATRICK. I cannot say as to that, but not in connection with his work as Crown prosecutor. He is supposed to receive nothing at all as Crown prosecutor except what he receives from the department. It would be a grave breach of propriety on his part to take fees from any one else in cases in which he is retained by the government.

Mr. FOWLER. But he is allowed to practice besides ?

Mr. FITZPATRICK. Yes.

Mr. FOWLER. How much was paid to the Crown prosecutor last year as fees ?

Mr. FITZPATRICK. I have not got that, I have only the Manitoba fees.

Mr. FOSTER. Mr. Pattullo was paid last year $7,000.95 ; Mr. Noel received $666. I think the minister ought hardly to dismiss this matter so easily. There is evidently something wrong in one or two particulars. This scale of living allowance was fixed when there was really a great difference in the cost between the Yukon and the Northwest Territories, for instance, and British Columbia. But everybody knows that that scale of living has been greatly reduced since then. Take the scale of living of a Northwest judge, for instance, you allow him nothing for his living, you give him a salary. Yet you give $5,000 in the Yukon in addition to what it costs a judge to live in the Northwest Territories. It is paying a man for something which does not cost him the amount, whilst the idea under which it is paid is that it is to cover an actual expense. It is not a right principle, as my hon. friend knows, to pay a man something as a solatium or salary under the guise of paying it as a necessary expense. Now if this practice runs through all the other departments, as I suppose it does, then it is a very large item, besides being an unfair item and it is well worth inquiring into. I think some steps ought to be taken to reduce it to a fair scale. It is unjust to the police magistrate, who has just as good an appetite and eats just as much food, and as good food, as a stenographer, that the stenographer gets $1,800 and the police magistrate only gets $1,200. Why make that difference between them? The police magistrate ought to eat more, because the stenographer's work is lighter, but there is discrimination in the living allowance. I have no doubt this living allowance really becomes part of the salary, because the difference in expenses does not at all mount up to the allowance which is given here for the purpose of living expenses. I think my hon. friend ought to look into that matter. I noticed in the newspapers that a reign of economy has been inaugurated in the Yukon, and that many officials are being dispensed with. Probably the economies are taking place because there is less work. The other ministers also seem to be getting in a little work in this respect in their departments. I think it is unfair to discriminate, and a bad principle, to give to officials under the guise of a necessary expense what is really an addition to their salary.

Mr. FITZPATRICK. I quite agree that it is proper that we should have a certain specified sum for a salary, and that the sum paid should be the remuneration for services rendered by the individual to the government. Then in addition to that, if anything further is required, it ought to be

in view of conditions existing, which may vary from time to time. But I quite agree that we should not, under cover of granting a living allowance, enable a man to eke out an addition to his salary, that is improper. When this matter came up for consideration I made inquiry as to the conditions existing in the Yukon. My information is—my hon. friend may have better information—that since 1900 there has been no appreciable variation in the cost of living in the Yukon. The conditions now are about the same as they were at that time. I can see no good reason why they should vary. We must consider that almost everything that is needed must now be brought into the country at a considerable cost, which would add to the original cost of living. Then the cost of transport, I apprehend, would remain the same now as it was about that time. However, I may say to my hon. friend that I took the trouble, when George McCaulay was in the east, to send for him to come to Ottawa and explain what the conditions were. And I received from him the assurance that the conditions were the same, that the cost of living was practically the same as in 1900, and that of the additional sum of $5,000, very little could be saved. That is the information I have. While I agree with my hon. friend in the principle he laid down, I have given him the information on which I have acted, and I appreciate the necessity of giving this additional remuneration.

Mr. FOWLER. Did the minister ask the sheriff whether he required $5,000 more to live in the Yukon than a judge requires in the Northwest Territories of Manitoba? That is the very point.

Mr. FITZPATRICK. Here is the position. I questioned him with respect to the difference in the increase in house rent, in the general increase in living, and the cost of ordinary necessities of life, whether or not it cost more to procure these ordinary necessities than it did here. I was told that it did, and is was on that information that I based my estimate.

Mr. FOWLER. There is no dobut it would cost more in the Yukon than it would either in the Northwest Territories or in the east. But the point I make is that it does not cost $5,000 more, the difference is too great in the living expenses. The fairer way to get at it would be to attach to the office of the judge of the Yukon a certain salary, and if we give $5,000 in this country, give him say, $7,000 there, and let him pay his own living expenses. For it does not seem to be the right thing to make a certain scale for judge, a certain scale for a police magistrate and another scale for a stenographer; you are drawing distinctions that should not be drawn in a matter like this where one man is supposed to be as good as another, and considerably better sometimes. For that reason I object to giving the extra salary. Give an increased salary, but don't say that the sheriff shall receive $1,800, a judge $5,000, a stenographer $1,000. I do not think that is right at all.

Mr. BERGERON. I do not object to increasing the salary, I think the Minister of Justice is right in saying that the salary having been increased once, it would be difficult to change it. But I think the allowance should be reduced. I may mention that a day or two ago I saw a gentleman from Dawson, a political friend of hon. gentlemen opposite, and he told me that the cost of living up there was very much reduced, in fact it was much the same as it is here, for the reason that the population has greatly decreased in Dawson; instead of being 40,000, it is now about 12,000. There are now ample provisions there, and rents are reduced. I think the living allowance should be reduced without touching the salary. Let the judge have $5,000 a year and reduce the living allowance. It is not a right principle to make this difference between the living allowance of the judge and the stenographer, or any other employee.

Mr. FITZPATRICK. I may say to my hon. friends opposite that all the departments are considering the question of living allowances, and if there is any objection to allowing the item to pass, I am willing it should stand until such time as we have made a rule applicable to all the departments, and which will be consistent with the altered conditions in the Yukon. So far as I am personally concerned, I am prepared to allow the item to stand for a day or two until I can get better information. I know where I can get it.

Mr. FOSTER. I suppose the same question will come up in other departments. I think it ought to be looked into.

Mr. FITZPATRICK. Yes, with respect to all the departments. What my hon. friend has said is applicable not only to the Department of Justice, but to all the departments which have officials in the Yukon.

Mr. BERGERON. There ought not to be discrimination anyway.

Mr. FITZPATRICK. I do not agree that there is discrimination. I made a mistake when I said that Sheriff Eilbeck was in the Yukon. That gentleman is now in a hospital in San Francisco where he has undergone an operation.

Living allowances of sheriff, deputy sheriff, clerk of court, assistant clerks, police magistrate and stenographers of territorial court at $1,800 each, $14,400.

Mr. SPROULE. How will your determination in reference to these salaries be affected by the fact that these votes have passed the House?

Mr. FITZPATRICK. We are not obliged to pay them. We only get authority to pay

them, and if the House attaches the condition that the authority is given upon the assurance given by the Minister of Justice that this money will not be paid except after an investigation, then, of course, whoever comes here next year and seeks to put justice estimates through will have to be responsible for the performance of that condition. It is immaterial to me. I am willing to allow it to stand over, get the information and come back to the House after the other ministers have come to a conclusion about it.

Mr. FOWLER. What are the salaries of a police court judge and stenographer ?

Mr. FITZPATRICK. The police court stenographer gets $1,200.

Mr. FOWLER. Salary ?

Mr. FITZPATRICK. Yes.

Mr. FOWLER. And you have a police court judge ?

Mr. FITZPATRICK. Mr. Justice Macaulay was originally appointed police magistrate for the Yukon Territory, but after he went to that territory it was found that it would be necessary to add to the strength of the high court. We thought that the better plan would be to confer upon Mr. Justice Macaulay the jurisdiction of a high court judge, leaving it to him to continue to perform the duties of police magistrate.

Mr. FOWLER. And he just gets the salary of a police magistrate ?

Mr. FITZPATRICK. He gets the salary of a High Court Judge.

Mr. BERGERON. What is the reason the police court stenographer does not get the same salary as the stenographer in the other court ?

Mr. FITZPATRICK. Because he is not so competent. We have a stenographer in the high court who can take depositions in French and English. It is very hard to get men who are competent to take depositions in French and English, and it is much more difficult to get men to report evidence in the high court than in the police court, where practically a man can take it under dictation. In jury cases, as my hon. friend doubtless knows it is sometimes very difficult work for the stenographer to report accurately.

Mr. BERGERON. And you have two of that kind ?

Mr. FITZPATRICK. Yes, and very competent men.

Mr. FOWLER. Do these judges go on circuit, or only sit in Dawson ?

Mr. FITZPATRICK. Yes, they go on circuit.

Mr. FOWLER. What circuits have they?

Mr. FITZPATRICK. I do not think there is much circuit work done. I think there are only two circuits.

Mr. FOWLER. I suppose Judge Macaulay only sits as police magistrate, and then sits in the court of appeal en banc.

Mr. FITZPATRICK. I believe he does considerable amount of high court work. Our experience, at least since I have been in the department, has been that judges very frequently in the winter time come out; in fact, almost every third year one of them comes out, so that when one is away the others have to perform the duties.

Mr. FOSTER. Who is the Governor of the Yukon ?

Mr. FITZPATRICK. I cannot say. I think there is no commissioner appointed permanently, but that the officer in charge of the mounted police is performing the duties.

Mr. FOSTER. Did the former commissioner resign before he ran ?

Mr. FITZPATRICK. I apprehend he was obliged to do that.

Mr. FOSTER. A bona fide resignation ?

Mr. FITZPATRICK. Yes. I think that Major Wood of the mounted police now performs the duties.

Mr. FOSTER. I suppose it would be possible for the ministers to have this matter taken up, and before the end of the session be able to inform parliament what conclusion they have come to in reference to it. It ought not to be difficult to come to a conclusion in regard to it.

Mr. FITZPATRICK. I think so. In view of the fact that we have here now Mr. Cory, who has been acting as inspector of public offices in the Yukon for some years past, I think we ought to be able to get reliable information—information of such a nature as to enable us to determine what we ought to do.

Mr. FOSTER. And then we have another reliable source of information—the man who is to speak for the Yukon, who will be here in a little while, and who will be able to give my hon. friend very reliable information.

Mr. FITZPATRICK. And I have no doubt it will be perfectly impartial.

Mr. FOSTER. It will be truthful.

Mr. BERGERON. He will know what he is talking about, anyway.

Mr. FITZPATRICK. I hope there is no insinuation contained in that.

Mr. BERGERON. Oh, no, not here.

Maintenance of prisoners, $25,000.

Mr. BERGERON. How many prisoners are there there ? Are they living like the judges ?

Mr. FITZPATRICK. We do our best for them. The prisoners in the Yukon are kept in the guard-room, and we allow the mounted police $2 per diem for each prisoner.

Mr. FOSTER. For his keep ?

Mr. FITZPATRICK. Yes.

Mr. BERGERON. How many are there ?

Mr. FITZPATRICK. I have not the figures.

Mr. BERGERON. How many are there generally ?

Mr. FITZPATRICK. I could not tell you.

Mr. BERGERON. Twenty-five thousand dollars would pay for a good many.

Mr. FITZPATRICK. It occurred to me that we ought to be able to reduce that amount, and I asked the official why we could not reduce it. For the information of the House, I shall read the report which he makes.

Probably this could be reduced to $20,000 without any inconvenience as desired by the minister, but it was thought that a good margin should be left, as the rate being $2 per diem, each prisoner costs $730 and it would only take ten additional prisoners to cost $7,300 more.

Last year, of course, we did not spend the amount we estimated.

Mr. FOSTER. Two dollars is a pretty high rate.

Mr. FITZPATRICK. Everything appears to come high in the Yukon. We pay 60 cents in the Northwest Territories to the Mounted Police. That has been the rate established for some years, and the rate is $2 in the Yukon.

Mr. FOSTER. I notice in the present contest in Toronto—to bring in an extraneous matter—that a document was sent around which represents a scientific man there as saying that it is possible to get up a good food and to keep people for three cents or so a day. My hon. friend might get a supply of that food, and it would be a tremendous economy.

Fees and expenses of witnesses, jurors and interpreters in criminal trials, $15,000.

Mr. BERGERON. How many terms of the criminal court have they there ?

Mr. FITZPATRICK. The judges themselves regulate that; they sit when it is necessary.

Mr. BERGERON. They have no regular terms ?

Mr. FITZPATRICK. No regular terms.

Law books, &c., and freight thereon, for the use of bench and bar and stationery, and freight thereon, for use of courts, $2,500.

Mr. BERGERON. Is that amount spent each year on the purchase of books ?

Mr. FITZPATRICK. Yes, we have been doing that for years. I may tell my hon. friend that up to the last year or two we did this for the Northwest Territories as well. I am in the hands of the House with respect to that item. I cut it out with respect to the Northwest two years, and it is a question whether or not we should continue to supply books for the judges and the bar of the Yukon. I think it is a vicious practice that has grown up and has been continued for many years.

Mr. BERGERON. So long as the money is expended for that purpose it may be all right.

Mr. FITZPATRICK. There is no question about that.

Mr. BERGERON. I suppose that my hon. friend finds out if the books are bought ?

Mr. FITZPATRICK. I know absolutely nothing about that, but I take all the responsibility for anything that is done, because it is my deputy, one of the most competent men for work of that description, who makes a selection of books and sees that they are sent up.

Mr. BERGERON. They are sent from here ?

Mr. FITZPATRICK. Yes, they are bought in Toronto and sent forward from there.

Mr. BERGERON. They have a librarian in the Yukon ?

Mr. FITZPATRICK. Yes, there is a librarian who receives a salary of $1,500 and $1,200 as living allowance.

Mr. BERGERON. There is another discrimination, $1,200 for him and $1,800 for the stenographer.

Mr. FITZPATRICK. I cannot help discriminations; a good man must necessarily command higher wages.

Mr. FOWLER. Did I understand the minister to say that he proposed to cut this item out ?

Mr. FITZPATRICK. No, I did not say that; I said I was entirely in the hands of the House with respect to that. It is a practice that has grown up in all sections of the country administered from here. I found it in existence in the Northwest Territories and the same system was adopted for the Yukon, which, of course, had a provisional government similar in some respects to that of the Northwest Territories. Two years ago, I think it was, we dropped the item with respect to the Northwest Territo-

ries, and I now say that I am in the hands of the House with respect to this item. There are reasons why we should supply the judges and the bar with law books and there are reasons why we should not. I could urge very good reasons why a judge out there should be required to have his own library and why the bar should provide their own books as lawyers do with us.

Mr. FOWLER. As a matter of fact, it seems to me that the lawyers there get better fees than we do down here and are in a better position to buy books than we who are struggling in the east.

Mr. FITZPATRICK. Some of you struggle very successfully.

Mr. FOWLER. In my judgment that item should be struck out.

Mr. FITZPATRICK. I have no objection to dropping it.

Mr. FOWLER. It is not a large item it is true, but the principle remains the same, whether it is large or small.

Mr. FOSTER. Let it drop.

Mr. DEPUTY SPEAKER. The item of $2,500 is dropped.

Mr. GALLIHER. Do I understand you to say that item was cut out?

Mr. FITZPATRICK. I have no objection to hearing what my hon. friend (Mr. Galliher) has to say, but I am afraid it is disposed of.

Mr. GALLIHER. If the item has been dropped, of course it is no use my saying anything.

Miscellaneous expenditures, including fees and expense of crown prosecutor, salary and living allowance of stenographer of police court and other officers or employes connected with the administration of justice, coroners' inquests, &c., &c., $25,000.

Mr. BERGERON. Of that $25,000 how much was spent last year?

Mr. FITZPATRICK. Of the stenographers, Geo. Grey received $2,000, salary and living allowance, $1,800; J. A. Valiquette received a salary of $2,000 and living allowance, $1,800; H. G. Blankman, stenographer, received a salary of $1,200 and a living allowance of $1,800. The Crown prosecutor received somewhere in the neighbourhood of $7,030.

Mr. DANIEL. Is the minister in possession of information as to the amount of fees that are paid in these courts? I am inquiring especially in regard to fees for medical evidence.

Mr. FITZPATRICK. I have not that information by me, but we have in the department a scale of allowances for the Yukon Territory.

Dominion Police, $37,000.

Mr. BERGERON. There is an increase there.

Mr. FITZPATRICK. That is caused by the increase of pay to the commissioner and the members of the force. The commissioner had been in receipt of $2,400 a year, and for many years there had not been any addition to his remuneration. I myself, without solicitation on his part, recently increased his allowance to $3,000 a year. The commissioner of police, Col. Sherwood, is one of the most competent officers in the Dominion.

Mr. SPROULE. If he succeeded in getting the best of those bogus ballot boxes, I think he ought to get it.

Mr. FITZPATRICK. When occasion requires, he is always to the fore.

Mr. FOSTER. What was the addition to the pay of the police?

Mr. FITZPATRICK. Forty men received an increase of 25 cents per diem. The inspectors now get $2.90 and $2.75, the sergeants, $2.40; 14 constables, $2.15, 9, $2.05, 7 $1.80 and 8 $1.50.

Mr. FOWLER. Did you add any to the force?

Mr. FITZPATRICK. Yes, two men have been added, involving an increased expense of $1,350. The justification for that is the necessity for policing the different public buildings throughout the city. Formerly when the departments were all together here, we could do with a smaller force. So far as the police force is concerned, it is absolutely controlled by the commissioner. He makes all his recommendations, and the statute practically makes him the master of the force, and I think it is quite proper that it should be so.

Mr. DANIEL. Will the minister inform the House whether this building is under the control of this parliament or under the control of the provincial government? I saw in the press the other day that the barber down stairs had been reported for shaving on Sunday, and I thought that perhaps the hon. minister could give us a little information as to what extent policemen in plain clothes or otherwise, who are not members of the Dominion police, have the right to invade the barber shop, the restaurant and other parts of this building?

Mr. FITZPATRICK. That is a somewhat delicate constitutional question, and requires some consideration before I can give an answer. I am quite safe, however, in saying this, that if the Dominion police had been aware that any outsider had invaded the premises for the purpose described by my hon. friend, he would have received very scant courtesy indeed.

Post Office—outside service—salaries and allowances including salary of $960.00 for Mr. James Dundas, a railway mail clerk, re-instat-

ed in the service on the 1st September, 1898, and hereby restored to his former status under the Civil Service Superannuation Act on payment of a sum equivalent to the statutory deduction on that salary from date of dismissal; his service to be considered as continuous, notwithstanding anything in the Civil Service or Superannuation Acts, $1,694,238.50.

Mr. FOWLER. Explain this.

Sir WILLIAM MULOCK. Mr. Dundas was a railway mail clerk in Ontario. In the year 1896 he was reported by the judges in an election trial as guilty of some corrupt practice, and on that account was dismissed from the service.

Mr. FOSTER. In the Dominion elections or the provincial?

Sir WILLIAM MULOCK. In the Dominion, in a controverted election case. He was a year and a half out of the service, and was then reinstated. In the meantime, the civil service Superannuation Act had been repealed, and if he had not been allowed the benefit of that Act, he would have lost many of the advantages that would otherwise have accrued to him as the result of his contributions to the fund.

Mr. BERGERON. Whom was he dismissed by?

Sir WILLIAM MULOCK. The present government.

Mr. FOSTER. What was his crime?

Sir WILLIAM MULOCK. He was convicted by the trial judges of having bribed an elector and paid money in the campaign.

Mr. FOSTER. Has my hon. friend any sympathy or fellow feeling for him?

Sir WILLIAM MULOCK. I do not know what my hon. friend means by the inquiry. The item itself explains the extent of our sympathy.

Mr. FOSTER. It is a justification of him as a good officer anyway.

Sir WILLIAM MULOCK. He was dismissed as there was nothing apparently to mitigate the offence. But afterwards some friends of his told me that his offence really arose from good fellowship and that he was not a bad sort of fellow after all. In order to be satisfied, I myself applied to the trial judges to see if they could find anything in extenuation and they did so. On the strength of their view of the case, the Council reinstated him.

Mr. FOWLER. How long was he out—about a year and a half?

Sir WILLIAM MULOCK. I think so. I have here the Order in Council which I shall read, if my hon. friend desires. The judges made a friendly report and we concluded to reinstate him.

Mr. BERGERON. I do not wish to criticise my hon. friend's course. On the contrary, I think he took a very charitable view; but if the government are going to look at such things in that way, I could remind them of cases of men who were dismissed simply because they had voted at the elections and without undergoing any trial at all. Those men had paid into the superannuation fund and lost their positions and everything. If the government are prepared to continue in the course indicated by my hon. friend, I could present for their consideration some very deserving cases.

Sir WILLIAM MULOCK. I would be very sorry indeed that any one should be dismissed simply for having voted.

Mr. BERGERON. I could name some.

Sir WILLIAM MULOCK. I do not think it possible that the government could have dismissed a man simply because he exercised his rights as a citizen, and I am quite confident there must be some other circumstances of which my hon. friend apparently knows nothing.

Mr. FOSTER. In my own county a man was dismissed, who simply went and cast his vote, and took no other part in the election at all. The only reason given for his dismissal was that he had a brother, who did not hold a government office, but who took an active part in the campaign. That was conclusively proved by one of the government's own commissioners. The only reason why this man was dismissed, and the reason given parliament for his dismissal, was that his brother was an active partisan. Now that you have made the amende honourable to this gentleman—and I am not finding any fault with you for that—surely you ought to do something in the case I mention.

Sir WILLIAM MULOCK. I am not speaking for any other department but my own, and I have no information of anything of the kind to which my hon. friend refers. I think it will be found that there were other circumstances to justify the government, but it is quite impossible in a general way to deal with these methods. Each case must be dealt with on its own merits. I should be amazed if any minister ever dismissed any one for having simply exercised his rights as a citizen.

Mr. FOWLER. There were more persons dismissed in the district I represent from the hon. gentleman's own department after 1896 than from all the other departments. He seemed to be particularly vindictive against persons who had been reported to him as having simply voted as their consciences dictated. Persons holding post offices throughout the country were dismissed without any investigation whatever. The hon. gentleman says that a man has a perfect right to vote, in which I agree with him, but I go further and say he has not only the right to vote, but the right to use

whatever influence he has to induce others to vote as he thinks right. I do not think that a man should be dismissed for having exercised his powers of persuasion over his fellow citizens. The only ground for dismissal should be dereliction of office.

Sir WILLIAM MULOCK. I would not like by my silence to be considered as admitting that I ever dismissed any one under such circumstances as those to which my hon. friend has referred. If he will bring any case of dismissal to my attention, he will find that the circumstances differ materially from what he thinks they were.

Mr. FOWLER. I never knew the hon. gentleman yet to admit anything, but he must remember that during the last four years I have frequently brought to his attention dismissals of postmasters for no other reason than the recommendation of the person who had control of the patronage.

Sir WILLIAM MULOCK. The other day I promised my hon. friend from Beauharnois an explanation why a certain messenger was getting $720. The explanation is that some officers in that class have accepted the grade system, which was inaugurated three years ago. Under that system a man is graded at so much a day and may ultimately reach the yearly amount of $725.

Mr. BERGERON. Where is the line of demarcation between the two classes when the appointments are made?

Sir WILLIAM MULOCK. The messengers may be appointed purely messengers or on the grade system. For example, a porter or packer gets $700 a year. To-day, if we were to appoint a porter or packer, we could, if we chose, appoint him as a grade officer, on a per diem basis. That system has been very generally adopted with letter-carriers and those who work around post offices. They enter at $1.25 per day, rising, in a few months, to $1.50 a day and so on until, after about four years service, they reach a maximum of $2.25 per day. In addition, they are entitled to a bonus of $20 a year for good conduct. I think that my hon. friend will find that these figures aggregate $724.25. The officer he speaks of was in that class, at a maximum of $724.25, and his name was A. Smith.

Mr. BERGERON. And they are appointed permanently ?

Sir WILLIAM MULOCK. Yes, the difference is in the mode of payment.

Mr. BERGERON. Who decides how they shall be appointed ?

Sir WILLIAM MULOCK. When the law came into effect, every man had the privilege of electing to continue under the old law or come under the new. The new appointments are made under the grade system.

Mr. BERGERON. I thank the Postmaster General for this information. Coming back to the matter we were speaking of a few moments ago, I wish to refer to a case that came under my own observation. The Postmaster at Beauharnois in 1896 was Mr. Alexis Doutre. He was a very good officer, and nothing was ever said against the way he kept the post office. Before his appointment he had been a strong partisan, but, while postmaster he did nothing that should have excited the anger of those in the locality who did not share his political opinions. When my hon. friend (Sir Wm. Mulock) took hold of the department, Mr. Doutre was dismissed summarily, without investigation granted, though I asked for it. An officer of the department came and demanded his keys. The dismissal caused Mr. Doutre great inconvenience. He had rented a house for which he was personally responsible. The gentleman who replaced him in office, a political friend of hon. gentlemen opposite, has performed his duties well. But, I am sorry to say, he is very sick to-day, and I believe, cannot hold his position very long. I think it would be a graceful and generous thing for the Postmaster General, if the position becomes vacant, to reappoint Mr. Doutre to the position he formerly held. He has not recovered financially from the disadvantages to which he was put by his sudden dismissal. It was unexpected ; it was a contingency he had not provided for. If he were reappointed, it would only be an act of justice, and it would do the party of the hon. member far more good than it would do me. It would be a wise move for the further reason that, when the time comes to fill the office, the Postmaster General will find many demands, but he will find few applicants who would be acceptable to himself if he knew the cases well. I might say that I have always looked at these matters differently from the Postmaster General. Even in the old days, during the time when I supported a government in this House, there were many postmasters in Beauharnois opposed to me. Yet, I never asked for the dismissal of any of them, and some of them are there still and they worked against me. I do not complain of that, because their official duties are properly performed. But I use this argument as a further ground for asking that, if the present postmaster of Beauharnois does not hold his office, the Postmaster General will re-appoint the man who was dismissed—as he will find on looking into the matter—without any good reason.

Sir WILLIAM MULOCK. My hon. friend (Mr. Bergeron) has certainly a very winning way of appealing to one. I can only say that if it becomes necessary to appoint a postmaster at Beauharnois, what the hon.

gentleman has said will be remembered. Of course, I cannot make any promise. I do not recollect the circumstances under which the former postmaster was relieved of his duties.

Mr. BERGERON. I would be happy, in another place to remind my hon. friend of the circumstances.

Mr. SPROULE. Some time ago, it was intimated in the newspapers that, notwithstanding that the Postmaster General had increased the salaries of country postmasters, it was contemplated to give them another raise, and that that would be done this winter. Was there anything in that, or was it a rumour for election purposes ? It was spoken of several times in our part of the country.

Sir WILLIAM MULOCK. I did not hear the rumour, and do not know of any foundation for it.

Mr. FOWLER. Will the hon. gentleman (Sir William Mulock) please explain the increases ?

Sir WILLIAM MULOCK. There is a total increase of $125,068. This is made up as follows : Increases in Post Office Inspectors' offices $2,154.75 ; increases in the railway mail service $22,456.50 ; the city post offices $90,456.75—all increases in salaries.

Mr. FOWLER. Are they all statutory ?

Sir WILLIAM MULOCK. I think so. The inspectors are entitled to certain increases after certain years of service. There are seven increases of $100, seventeen increases of $50 each, one increase of $78.25, one increase of $30 and a short estimate in 1904-5 of $496.50. There are seven increases to the inspectors of $100 each. In the New Brunswick division Mr. N. R. Colter gets an increase of $100, which will bring his salary up to $2,500. The limit is $2,600.

Mr. FOSTER. According to the Auditor General's Report he is not nearly up to the maximum yet.

Sir WILLIAM MULOCK. At all events, he is entitled under the law to an extra $100. The Civil Service Amendment Act raises the maximum to these inspectors. They were not entitled to promotion to a higher class until they had passed so many years in the service, that was under the old law ; but under the amendment of two years ago many changes were made in the salaries of civil servants, and, amongst others, of the inspectors.

Mr. FOWLER. Are they all on one footing ?

Sir WILLIAM MULOCK. All treated exactly the same, no discrimination at all, no favouritism ; they are all treated according to the law.

Mr. FOWLER. Discrimination is not always favouritism.

Sir WILLIAM MULOCK. In the Quebec division Inspector Bolduc gets an increase of $100.

Mr. FOSTER. In the New Brunswick division Mr. Colter is now getting how much?

Sir WILLIAM MULOCK. What the Auditor General has assigned to him, I suppose.

Mr. FOSTER. The yearly increase is $100 to an inspector ?

Sir WILLIAM MULOCK. I forget what the provision of the Act is, there are a number of changes in the status of the civil service. Inspector Bolduc is now getting $2,400.

Mr. FOSTER. No, he got $2,288 according to this report.

Sir WILLIAM MULOCK. My officer says $2,400 is right. I cannot explain the Auditor General's figures ; I do not know which is right. But he is at his maximum.

Mr. FOSTER. But these are all government officers. Does he get anything besides his salary ?

Sir WILLIAM MULOCK. My officer explains that that will be for the year closing June 30, 1904, and that would be $2,300. He has probably had $100 of an increase, and then on that $2,300 there may have been some reduction for superannuation, which will bring it down to that broken sum. Now my officer says that the salary was increased from $2,300 to $2,400 in August last. Therefore, what I am reading is correct.

Mr. FOWLER. For the new year he will get $2,500 ?

Sir WILLIAM MULOCK. He is actually now in receipt of $2,400, and that will continue to be his salary until these estimates come into effect. Then he will get the benefit of the $100 increase.

Mr. FOWLER. Will that $12 and some cents be the amount of his superannuation tax ?

Mr. FOSTER. It is $11.58.

Sir WILLIAM MULOCK. I do not know what the deduction is for the superannuation fund. It is two and a-half per cent, is it not ?

Mr. FOWLER. Yes.

Sir WILLIAM MULOCK. If Mr. Colter entered after the repeal of the Superannuation Act, his contribution would be at the rate of five per cent per annum to the retirement fund.

Mr. FOSTER. Then, I do not see how you get that figure.

Sir WILLIAM MULOCK. The next item is J. W. Bain, Montreal division. He re-

ceives an increase of $100. J. A. Madore, assistant inspector, will get an increase of $100. Kingston office, Henry Merrick, present salary $2,500, will get $100 extra; Toronto office, J. Henderson, present salary, $2,500, will get $100 extra; Victoria division, E. H. Fletcher——

Mr. FOWLER. If these increases are only by virtue of the Act passed two years ago, how do these men come to get $100 more than the other inspectors you spoke of?

Sir WILLIAM MULOCK. I suppose they have been longer in the service, and got their promotion earlier.

Mr. FOWLER. But I understand that all this dates from the Civil Service Act passed two years ago.

Sir WILLIAM MULOCK. This $100 is one thing and the salary before that Act applied is another thing. They were appointed at different dates.

Mr. FOWLER. But they were not getting these statutory increases before the passing of that Act.

Sir WILLIAM MULOCK. Not these, of course.

Mr. FOWLER. No, but they were all supposed, as I understand, to start even from the time the Act was passed two years ago, and I cannot understand how some persons get a little farther ahead than others.

Sir WILLIAM MULOCK. We will see what the old Civil Service Act gave them. The old Act said that a first-class inspector on appointment should receive $2,200 a year, after ten years' service $2,400, and after twenty years' service $2,600 a year. A second-class inspector on appointment received $2,000, after ten years' service $2,200, and after twenty years' service $2,400. Then this law was amended by the Post Office Amendment Act, chapter 49 of the statutes of 1903 as follows:

The salary of a post office inspector on appointment shall be two thousand dollars, with increases of fifty dollars a year for six years, and one hundred dollars a year thereafter up to a maximum of two thousand six hundred dollars.

Any post office inspector who, at the passing of this Act, has completed six years of service as such may be granted an increase of one hundred dollars a year up to the maximum of two thousand six hundred dollars.

Any post office inspector who, at the passing of this Act, has completed less than six years of service as such may be granted an increase of fifty dollars a year until he has completed six years of service, and one hundred a year thereafter up to the maximum of two thousand six hundred dollars.

The salary of an assistant post office inspector on appointment shall be twelve hundred dollars, with increases of fifty dollars a year for the first six years, and one hundred dollars a year thereafter up to a maximum of one thousand eight hundred dollars.

And so on. There are two other classes. These persons did not have the same salaries.

Mr. FOWLER. They did not all start even?

Sir WILLIAM MULOCK. No, they did not. That disposes of seven of them. I did not give Mr. E. H. Fletcher, of Victoria, whose salary is $2,400. He will get $100. That makes $700 given to the inspectors.

Mr. FOWLER. Are there only seven inspectors altogether?

Sir WILLIAM MULOCK. There are about eleven, but the others are at the maximum. Then there are seventeen increases of $50 each, making $850. I will give those. They are clerks in the inspectors' offices, as follows:

	Present salary.
Nova Scotia Division—	
E. A. Macdonald, junior 3rd class	$ 750
New Brunswick division—	
W. Hatch, first class	1,200
A. Thompson, senior second class	1,150
Quebec division—	
M. Pelletier, junior 2nd class	950
M. M. Shaw, junior 3rd class	750
Montreal division—	
M. A. Curran, 4th class	630
Ottawa division—	
M. J. Whitty, first class	1,300
A. L. Robinson, junior 3rd class	750
M. C. Green, 4th class	630
Kingston division—	
M. Ford, junior 3rd class	750
Toronto division—	
M. S. Bradley, senior 2nd class	1,050
London division—	
H. G. Sears, 4th class	450
Manitoba division—	
J. L. Broughton, first class	1,250
J. R. Simmons, senior 2nd class	1,050
E. R. A. Stevenson, senior 2nd class	1,050
N. Gouin, 4th class	630
Vancouver division—	
P. Keyes, junior 3rd class	750

Seventeen in all receiving $50 each, which makes $850. Then in the office at St. John there is an increase of $78.25. This is to advance J. C. Henderson, messenger in the office of the post office inspector at St. John from grade D to grade C, increasing his salary from $1.50 to $1.75 a day. There is also an increase of $30 to increase the salary of M. A. O'Reilly, junior third-class clerk in the office of the post office inspector at Quebec, from $770 to $800, the maximum of the class. This includes another item of $496.50, short estimated for 1904-5. It is made up of the following particulars: The salaries of the undermentioned junior third-class clerks were raised to $700 on 13th August, 1903, which became the minimum salary of that class by the amendment to the Civil Service Act of 1903:

	From	To	
Quebec division—			
M. M. Shaw	$ 690	$ 700	
Kingston division—			
M. Ford	610	700	
Vancouver division—			
P. Keyes..	600	700	
	1,900	2,000	
		1,900	200

Three increases of $50 each granted to the undermentioned junior third-class clerks which had not been specially provided for in the estimates for 1904-5.

	From	To	
Quebec division—			
M. M. Shaw	$700	$750	
Kingston division—			
M. Ford	700	750	
Vancouver division—			
P. Keyes..	700	750	$150
Two increases of $78.25 each.			
Messrs. J. A. Screaton, messenger in the office of the post office inspector at London, and A. Raymond, messenger in the office of the post office inspector at Quebec, were advanced from grade 'D' to grade 'E' from March 1, and September 1, 1904, respectively, with an increase of 25 cents a day or $78.25 a year each..			$156 50
			$506 50
Less an over-estimate, in the salary of Miss M. A. O'Reilly, junior third-class clerk in the office of the post office inspector at Quebec....			10 00
			$496 50

The next item making up this $125,000 is increases to the salaries of the railway mail clerks. The total amount of the increase in the salaries of the railway mail service men is $32,456.50.

I may explain generally that there was an amendment to the Post Office Act affecting the salaries of the railway mail clerks. Formerly the railway mail clerk service was divided into three classes. A man received, I think, $480 at entrance, and in a short time when his period of probation ended, he was entitled to be promoted to a third-class clerkship at $520. He remained in this class for at least five years and then he might be eligible to be promoted to the second class. I think the minimum of the second class was $640. If he were promoted from the third class to the second class he would enter at a minimum of $640 and go up to $800, the maximum of the second class. He would remain at that figure until he was promoted into a higher class, which in the past depended to some extent upon the occurrence of a vacancy, so that a man might stick at $800 for a considerable period. The maximum of the first class was $960, and if a man was promoted from the second to the first class his maximum would be $960 and mileage. We changed the law a couple of years ago abolishing classes and fixing a minimum entrance salary and a maximum salary. Men now enter the service as probationers for six months, after examination, and they are paid $400 a year during this probationary period and also their mileage. If at the expiration of the probationary period they are considered fit to be continued in the service they are appointed and begin at a salary of $500 a year. There is now no division into classes, but every mail clerk is entitled to an annual increase if his service is satisfactory until he attains the maximum salary of $1,200.

Mr. FOSTER. What is the annual increase?

Sir WILLIAM MULOCK. $50. We have 460 railway mail clerks, and this $50 a year practically applies to all of them who are deserving, and I think there are not many who are not deserving. Even those who were formerly at the maximum are getting the benefit of the $50 until they reach the $1,200.

Mr. FOWLER. Has there been any change in the mileage rate ?

Sir WILLIAM MULOCK. No, it is the same as it was, half a cent per mile in the day time and a cent at night.

Mr. FOWLER. Who settles the routes of the different clerks?

Sir WILLIAM MULOCK. The Controller of the Railway Mail Service, Mr. Armstrong.

Mr. FOWLER. What is the duty of the chief railway mail clerk of each?

Sir WILLIAM MULOCK. We have no such office now, we have a superintendent for each province.

Mr. FOWLER. He used to be called the chief clerk.

Sir WILLIAM MULOCK. In New Brunswick for example there is a superintendent.

Mr. FOWLER. What is his duty?

Sir WILLIAM MULOCK. He is an office man to some extent, keeping tab on the clerks.

Mr. FOWLER. Does he not settle their routes?

Sir WILLIAM MULOCK. Subject to the opinion of the controller.

Mr. FOWLER. Always?

Sir WILLIAM MULOCK. I suppose he is largely responsible for the organization in his district.

Mr. FOWLER. The controller would not have to pass upon the route of each man. For instance, suppose the superintendent directed John Smith to run from St. John to Montreal, the controller would not have to pass on that before it would be made

John Smith's route, but if there was a complaint the controller would be brought in.

Sir WILLIAM MULOCK. I fancy he would have to pass on that because a railway mail clerk running from St. John to Montreal would be operating in other inspectors' districts, and that circumstance would have to be considered. Does the committee desire me to read the names of the clerks.

Mr. FOSTER. They are all on that uniform basis?

Sir WILLIAM MULOCK. All on that uniform basis. There may be some who do not get the increase for some reason. The controller determines the question. I have nothing to do with that except to act on his advice and the advice of the deputy.

Mr. FOWLER. Where you have a system of mileage as with the railway mail clerks I suppose the amount of salary depends largely on the number of miles travelled; they are not all alike.

Sir WILLIAM MULOCK. I do not think that there is much profit to the clerks in the mileage as when traveling they are put to extra expense. Some of them are economical and may make something out of it, but from what I hear there is not much gain to them in travelling when they receive only half a cent to a cent a mile.

That disposes of $32,456.50. The next item making up the $125.000 is an item of $90,456.70 for city post offices.

Some resolutions reported.

On motion of Sir William Mulock, House adjourned at 6 p.m.

HOUSE OF COMMONS.

WEDNESDAY, January 25, 1905.

The SPEAKER took the Chair at Three o'clock.

QUESTIONS.

STR. CHAMPLAIN.

Mr. MORIN asked:

1. What is the actual cost to the government of the steamer 'Champlain' delivered at Quebec?
2. What average sum per diem has the said steamer 'Champlain' cost the government since she arrived at Quebec?
3. How many trips across the St. Lawrence, from the wharf at Riviere Ouelle or St. Denis, to Murray Bay has the said 'Champlain' made?
4. What is the reason why the said steamer 'Champlain' has not made regular trips between the two above named places?

Hon. RAYMOND PREFONTAINE (Minister of Marine and Fisheries):

1. $87,600.
2. For wages, board, fuel, oil and clothing, an average of $80.
3. Sixteen round trips, up to the latest report on the 17th instant.
4. Very heavy ice which grounds on a shoal extending off Rivière Ouelle wharf (this shoal will be removed this season) combined with snow storms and fog; and for a short time undergoing repairs owing to slight accident.

STR. 'MONTCALM.'

Mr. MORIN asked:

1. What is the actual cost to the government of the steamer 'Montcalm' delivered at Quebec?
2. What is the average cost per diem to the government of the steamer 'Montcalm' since its arrival at Quebec?
3. What is the said steamer employed for?
4. How many trips has the said steamer made from the city of Quebec to the Island of Orleans and vice versa?

Hon. RAYMOND PREFONTAINE (Minister of Marine and Fisheries):

1. $272,000.
2. $150 principally owing to the large coal consumption.
3. She is employed in the endeavour to secure the opening of navigation between Quebec and Montreal earlier in the spring, and keep it open later in the fall. Also to render assistance to vessels caught in the ice, and establish the possibility of winter navigation on the north shore of the Gulf of St. Lawrence. She will also be employed in the summer time as a lighthouse and buoy tender for the province of Quebec.
4. None; her work has been above Quebec.

MONTREAL HARBOUR COMMISSION.

Mr. AMES asked:

1. Who are the present members of the Harbour Commission of the port of Montreal appointed by the government?
2. When were the several appointments made?
3. What is the length of their term of office?

Hon. RAYMOND PREFONTAINE (Minister of Marine and Fisheries):

1. Hon. Robert Mackay, Jonathan Hodgson, Robert Bickerdike, M.P., Alphonse Racine, Eustache H. Lemay and W. E. Doran.

2. The date of appointment of the first five was September 28, 1896. The date of Mr. Doran's appointment was April 15, 1902.

3. During pleasure.

Mr. AMES asked:

1. Has Mr. Jonathan Hodgson tendered his resignation as a member of the Board of Commissioners for the port of Montreal ?

2. If so, what reasons did he give for his action ?

3. Has the said resignation been accepted ?

4. Is it the intention of the government to name another in his place ?

5. If so, when will the nomination be made ?

Hon. RAYMOND PREFONTAINE (Minister of Marine and Fisheries):

1. Yes; March 23, 1904.

2. Personal reasons.

3. No.

4. No. The intention of the government is to revise the whole organization of the Harbour Commissioners of Montreal this session.

5. Answered by the answer to No. 4.

OCEAN AND RIVER SERVICE.

Mr. AMES asked:

1. Referring to the estimates for 1904-5, in which occurred the following item : Ocean and river service, further amount required for removal of obstructions, including sunken elevator at Montreal, and obstruction in Ostall river, B.C., $9,000, and regarding which it was stated in the House by the Hon. Minister of Marine and Fisheries that $7,000 of this amount was for the raising of the above elevator, has this amount been reimbursed to the government by the parties interested, or are any steps being taken to secure the repayment of same ?

Hon. RAYMOND PREFONTAINE (Minister of Marine and Fisheries):

1. The cost of raising the sunken elevator at Montreal has been paid to the Montreal Harbour Commissioners by the Montreal Grain Elevating Company. The Department of Marine and Fisheries has been put to no expense in the matter.

STEEL SHEDS—MONTREAL HARBOUR.

Mr. AMES asked:

1. When were the plans, specifications and estimates for the steel sheds, presently being constructed in the port of Montreal, first approved by the government ?

2. Since the aforesaid approval have any alterations in said plans, specifications and estimates been authorized by the government ?

3. Since the awarding of the contract by the Harbour Commission have any alterations in the terms thereof received the sanction of the government, and if so, what are they ?

Hon. RAYMOND PREFONTAINE (Minister of Marine and Fisheries):

1. December 21, 1903.

2. No.

3. No.

Mr. PREFONTAINE.

MR. P. W. ST. GEORGE.

Mr. AMES asked :

1. Is there at present in the employment of the Department of Marine and Fisheries a party by the name of P. W. St. George ?

2. If so, when did his term of service commence ; for what work was he engaged ; and what remuneration has he to date received ?

3. What degrees, titles or certificates does the said P. W. St. George hold as engineer ; and what previous experience has he had in the matter of the construction of steel sheds ?

4. Has the said P. W. St. George prepared plans independent of the Harbour Commissioners of Montreal for steel wharf sheds ? If so, when, and at whose instance ; and have any such plans been submitted to or approved by the Governor in Council, or by the Minister of Public Works, or by the Minister of Marine and Fisheries ?

Hon. RAYMOND PREFONTAINE (Minister of Marine and Fisheries):

1. Yes.

2. August 9, 1904. As engineer to superintendent, in conjunction with the engineer of the Montreal Harbour Commissioners the construction of sheds and conveyor galleries in the harbour of Montreal.

He has been paid up to date, $1,167.67.

3. He is a member of the Institute of Civil Engineers of London, England, and a member of the Council of the Canadian Society of Civil Engineers. This is considered sufficient guarantee of his professional standing.

4. In October, 1904. At the instance of the minister to embody changes suggested by the Shipping Federation and other parties interested. They have been submitted to the Minister of Marine and Fisheries and are now under consideration.

IMPORTS UNDER PREFERENTIAL TARIFF.

Mr. DANIEL asked :

1. What is the amount and value of goods imported into Canada under the preferential tariff during the years 1903 and 1904 ?

2. Of these amounts, what proportion was imported through St. Lawrence ports, and what proportion through Canadian Atlantic ports ?

3. What amounts were imported through United States ports, and what were the ports, and what was the amount for each such ports ?

Hon. WM. PATERSON (Minister of Customs):

1. The Customs Statistical Returns do not enable an answer to be given to this inquiry, except as to the value of goods entered for consumption in Canada under the Preferential Tariff, which was as follows :

For fiscal year 1902-3, $37,614,505.

For fiscal year 1903-4, $44,765,253.

2.—3. The Customs Statistical Returns do not show separately the goods imported through the United States of the St. Lawrence or Atlantic ports of Canada when entered under the Preferential Tariff. We could give from the total imports under both the General and Preferential Tariffs,

the quantity that came in at the Atlantic and St. Lawrence ports and the American ports, but we cannot distinguish with reference to the Preferential goods in that respect.

TRENT VALLEY CANAL.

Mr. WARD—by Mr. Foster—asked :

1. What surveys, if any, have been made during the past year, of proposed routes of the Trent Valley Canal between Rice Lake and Lake Ontario ?
2. By whom have such surveys been made ?
3. Have any reports of such surveys been received by the government ?

Hon. H. R. EMMERSON (Minister of Railways and Canals):

1. Surveys have been or are being made between Rice Lake and Port Hope, also between Rice Lake and Cobourg and between Rice Lake and Trenton in connection with the Trent canal.
2. The surveys are being conducted by Mr. E. J. Walsh, C.E.:
Port Hope survey being made by Mr. G. L. Law.
Cobourg survey being made by Mr. G. L. Law.
Trenton survey being made by Mr. S. E. Patterson.
3. No reports have yet been received of the results of these surveys, which are not finished.

MONTREAL HARBOUR COMMISSION—PERMANENT SHEDS.

Mr. F. D. MONK (Jacques Cartier) moved:

For copies of all correspondence between the Board of Montreal Harbour Commissioners and the Department of Marine and Fisheries in regard to the erection of permanent sheds upon the wharfs in the harbour of Montreal ; and of the correspondence had between the government and the Federation of Shippers ; and engineers' reports in the possession of the government upon the same subject ; also copies of correspondence between the Department of Marine and Fisheries and F. D. Monk, M.P., upon the same subject.

He said : The object of this motion is to obtain all the correspondence which has taken place within the last two or three years between the government and the Harbour Commissioners of Montreal. It is desired also to have some light thrown, by the production of that correspondence, upon the difficulties alleged to exist among the Harbour Commissioners, or if not within that body itself, between the Harbour Board and the government. These difficulties have undoubtedly delayed the prosecution of the harbour improvements and more particularly the construction of the permanent sheds, which were expected to be terminated for the opening of navigation.

It is also desired to know what is the policy of the government in reference to the Montreal Harbour Board, and if the government intends, during the present session, remodelling and changing completely the constitution of the board. I perceive by an answer given by my hon. friend the Minister of Marine and Fisheries (Mr. Préfontaine) a moment ago, that that object is in contemplation; hence it is that we are interested, not only in Montreal, but I submit all over the Dominion, in knowing what those changes are. Let me state, Sir, for the information of the House, that the Harbour Commissioners of Montreal are a very old institution. The administration of the harbour may be said to have been organized long before confederation, and indeed previous to the union of the two Canadas. The first statute relating to harbour administration in the port of Montreal is 6 William IV, chap. 20; and from time to time during the union that statute was amended by the parliament of United Canada. Since confederation, no less, I believe, than twenty-one amendments were made to the law organizing as a body the Harbour Commissioners of Montreal, defining their jurisdiction and indicating the limits of the harbour itself.

In 1894 the legislation to which I have just referred was consolidated by chapter 48 of 57 and 58 Victoria, known as the Montreal Harbour Commissioners' Act of 1894, which is the law as it stands to-day. Under the terms of this law, I think it is well to remind the House, the Montreal Harbour Board, the administration of the harbour, is, in an indirect manner, under the control of the Dominion government. The corporation of the Harbour Board of Montreal now consists of eleven commissioners, of whom six are appointed by the Governor General in Council, and hold their office during pleasure. The mayor of Montreal is ex-officio, during his occupation of the magisterial chair, that is during his term of office, a member of the Montreal Harbour Board. In addition there are four commissioners elected by each of the following bodies for four years : First, the commissioner elected by the Montreal Board of Trade, another commissioner elected by the Montreal Corn Exchange Association, another by the Chambre de Commerce de Montréal, and finally, a fourth by the shipping interests; that is to say, persons or companies having offices in Montreal, owners or agents of sea-going vessels entering the harbour of Montreal for the purpose of trade. This legislation of 1894 not only defines anew the limits of the harbour, but gives the commissioners extensive powers of borrowing, expropriating, executing improvements, and levying tolls and rates.

A word now as to the personnel of the commission as it is composed at the present time. The members of the commission named by the government and occupying their positions during pleasure, are : The Hon. Robert Mackay, president of the

board; Jonathan Hodgson, Robert Bickerdike, M.P., Alphonse Racine, merchant, Eustache Lemay, merchant, Wm. E. Doran, architect—all six named by the government; His Honour Mayor Laporte, ex-officio member of the board, and James Crathern, John Torrance, L. A. Geoffrion and Robert Reford, elected by the different interests I mentioned a moment ago. I need not say that these gentlemen are excellent representatives of the business, commerce, trade and shipping interests of the city and port. The president, Hon. Robert Mackay, is a man of leisure, having large interests in the city and port of Montreal, a man of executive ability; and I am bound to say has always seemed to take a lively interest in the improvement of the harbour. Under the legislation of 1894, and pursuant to the provisions of that statute, the board has a secretary, a chief engineer, Mr. John Kennedy, a harbour master, Mr. James McShane, a deputy harbour master, Captain Bourassa, and a paymaster.

Within the last ten or eleven years very extensive improvements have been contemplated and have been in part carried out in the port of Montreal. Not only were these improvements advisable, but they were absolutely necessary in order to ensure to that seaport its share of the trade of this continent, and in order to keep pace with rival ports in the United States. The situation of the port of Montreal, as members of this House know, is such that if properly improved it should occupy a preponderant position in the grain export trade, and indeed in the commerce of the west generally upon this continent. Let me give a few figures, taken from the statistics of 1900 in order to show the comparative importance of that port as compared with the other seaports of the Dominion. The foreign trade of the chief ports of the Dominion is shown in the following table:

Port.	Amount of trade.
Montreal	$133,895,190
Quebec	10,619,765
Halifax	13,094,094
St. John, N.B.	14,463,937

These statistics are for the year 1900; but the amount of trade in the port of Montreal since that date has been increasing, I think, regularly every year. The customs receipts for the cities named amounted in the same year to the following figures:

Port.	Receipts.
Montreal	$9,136,377
St. John, N.B.	897,659
Halifax	1,252,067
Quebec	961,937

It will be seen by these figures that the port of Montreal, by reason of its situation, appears destined to command, if properly managed—subject of course to necessary improvements—a very large proportion indeed of the trade of the west, not only of Canada, but indeed, as many believe, of the trade of the Western States.

Under the terms of the statute now governing the Montreal Harbour Board, the commissioners make yearly reports to the government. Formerly these reports were made to the Department of Public Works, under the jurisdiction of which department the Harbour Board of Montreal was. Under the legislation of last parliament, the supervision of the Harbour Board and of the works to be executed therein, has been removed from the Department of Public Works and handed over to the Department of Marine and Fisheries. Unfortunately, the Harbour Board has made no report, at least, so far as I am aware, for the year 1903 nor for the year 1904. Some disagreement, so far as I have been able to ascertain, occurred in regard to the report of 1903, and in consequence we are in possession only of the report of 1902, the latest report given out and published, and, I believe, returned to the government.

From this report we learn that the total bonded debt of the Harbour Board of Montreal at the end of the year 1902 was $5,322,000, of which $2,222,000 was due to the public at large and $3,100,000 to the government. Upon this debt the average rate of interest is about 3⅞ per cent. And I may say that the Montreal Board has never defaulted in its payment of interest either to the bondholders at large or to the government, differing in that respect from other harbour boards of the Dominion. As members of the House know, the government of Canada has, from time to time, advanced the money to the Montreal Harbour Board for permanent improvements to be made subject to the government's approval of the plans. I do not find any specific provision of the law which obliges the Harbour Board to submit its plans for permanent improvements for the approval of the government, but I presume that would result from the fact that the Harbour Board is a body supervised by the government, as represented by the Department of Marine and Fisheries, or it may be a condition of the advances made by the government. By the Act 61 Victoria, chapter 47, a loan of $2,000,000 by the Dominion government to the Montreal Harbour Board was authorized. The report of 1902 shows that of this sum $650,000 was handed over to the Harbour Commissioners on capital account. In the same year over $1,000,000 was expended in permanent improvements, of which $333,522.21 was applied to the construction of a grain elevator in a prominent part of the harbour. The plans for permanent improvements seemed to have been prepared after mature consideration of all the interests involved, and, if carefully carried out, would, no doubt, place the port of Montreal upon a modernized footing, which would enable it to compete successfully with all the rival ports of the continent. While dealing with

the situation of the Montreal Harbour Board, I may mention also that the revenue of the Board for the year ending 31st December, 1902, amounted to $327,236.07, being an increase over the previous year of $56,824.93. As to the tolls collected at the port—a matter of some importance, since it is the desire of those interested in the port, and the expectation of all who are interested in the trade of the Dominion, that ultimately the port shall be made free—we find that the wharfage dues on imports amounted to $183,426.79, while the wharfage dues on exports amounted to $96,822.11, or a total of $280,248.98. There were other tolls and dues collected. So the House will see that we are far indeed from having a free port at Montreal. It is proper to say that there was an increase in the revenue for 1902 as compared with the previous year. The increase of dues on imports was $50,812.11, and on exports $9,139.06. There was a surplus of ordinary revenue over expenditure of $19,402.52. That the port of Montreal increased in importance during this last year for which we have the record may be inferred from the fact that there was an increase of over 88,000 tons in ocean vessels and over 200,000 tons in inland vessels. There was a decrease in the shipments of grain for export of 1,800,000 bushels, showing that probably there is a great deal of truth in what has been said from time to time that though the port of Montreal was favourably situated for the export of grain, it has not benefited by such improvements to such an extent as will enable it to compete successfully with the great grain shipping ports of the United States. It is well to note an increase in the exports of lumber to Europe of 18,000,000 feet, though there is a decrease in the shipment of lumber to South America of more than 500,000 feet. There was an increase in the export of flour of over 135,000 barrels, and a decrease of 41,000 cases in the export of eggs. The export of cheese increased by 328,000 boxes and the exports of butter by 132,000 boxes. Another increase worthy of being noted was that in the export of apples to Europe of over 387,000 barrels. The export of cattle increased by 3,000 head, but, on the other hand, there was a decrease of over 8,000 head in the export of sheep and over 6,000 head in the export of horses. The imports of coal decreased by 78,000 tons.

Now, Mr. Speaker, having made the House acquainted, in a superficial manner, with the position of the Harbour Board of Montreal, and with the condition of the trade there, I come more immediately to the object of the motion which I have the honour to place in your hands. And I would say that there seems to be—there is, in fact— a very widespread impression, which many circumstances tend to confirm, that there exist disagreements among the Harbour Commissioners, or differences of opinion amounting to disagreement between the Harbour Commissioners and the governmental department—the Department of Marine and Fisheries—under the supervision of which the Harbour Board carries on its work.

I may say to the House that, without going into details, traces of that disagreement can be found as far back as the year 1902. I have here in my hand a copy of a letter addressed by the then Minister of Public Works to the president of the Montreal Harbour Board, and having reference to the claims, the demands, the proposal of what was known as the Wolvin syndicate and other objects too, which show that there were at that time considerable difficulties existing between the government and the Harbour Board, and articles which I have also, which I will not take up the time of the House in reading and which I have taken from the government organs in Montreal and from other papers supporting the government indicate that in 1901 and 1902 there were difficulties existing between the government and the Harbour Board in regard to the plans for the improvement of the harbour and the execution thereof. In the early part of the present winter there certainly did arise difficulties in regard to that part of the plans for the improvement of the Montreal harbour which concerns the permanent sheds to be erected on the new wharfs. That these difficulties were of a rather acute nature, I think there is no doubt, although the House will readily conceive that it has been impossible for me to see exactly what these difficulties have been. Suffice it to say, that, although the original plans for the improvements have been approved by the government and although contracts have been entered into for the execution of these plans the works in connection with the permanent sheds were suspended for a certain time. The contractor in chief, Mr. Lyall, did in fact intimate to the sub-contractor, the Dominion Bridge Works, whose place of business is in the town of Lachine, that these difficulties existed and that the plans, as regards the permanent sheds might, for some reason or other, be altered. I come now to what was one of the objects which I had in view when I presented this motion. There entered into the construction of these permanent sheds a large quantity of iron, and as a result of these difficulties, the Dominion Bridge Company suspended work upon the preparation of the material to be used in these sheds, work which was to be continued during the winter at the works at Lachine and which would have enabled, I submit, the sheds to have been promptly erected in the spring at the opening of navigation. The consequence was that a large number of workmen in the town of Lachine, habitually engaged in work for the Dominion Bridge Company by the suspension or interruption of this work, found themselves without occupation and that at a season of the year when they had expected to be employed

in a continuous manner, and when this interruption was calculated to be very detrimental to them. It was stated in the town of Lachine by a number of people who were not my most active supporters in the last election that the suspension of these works was to be attributed to the fact that the county of Jacques Cartier had not elected a supporter of the government. Mr. Speaker, I think I may say to you who have been elevated by the unanimous vote of this House to the high position you occupy outside entirely of the field of active politics, and I think you will be prepared to admit, that there are a great many cunning men in the Liberal party who are endowed with the wisdom of the serpent. I deemed it incumbent upon myself to make an investigation, because I am bound to say that I never for one instant supposed that this government would have been so machinavellic as to endeavour to obtain a suspension of these works being carried on at Lachine out of pure party spirit. I corresponded in regard to the subject with the Minister of Marine and Fisheries and he gave me every assurance that the cause of the suspension was not what I have just mentioned that it was represented to be and I believe he also gave me the assurance, as the correspondence will show, that he would endeavour to bring that matter to an immediate settlement, which, I believe, he has endeavoured to do.

Now, what in reality, has been the cause of these difficulties which seem to have existed between the Harbour Commissioners or amongst them and the government of this country? I have been unable to find for this question an absolutely definite solution, but I have no doubt that some light will be thrown upon the subject by the hon. Minister of Marine and Fisheries himself, and by the correspondence which will be brought down. There was a consulting engineer named by the government, if I well understood the answer given to-day by the hon. Minister of Marine and Fisheries to the question put by my hon. friend from St. Antoine division (Mr. Ames), and I believe that there have been serious differences of opinion between that consulting engineer and the regular engineer of the Board. I believe that these two gentlemen are both qualified to advise the Harbour Board and the authorities in charge of the carrying out of these improvements, and it would be, I think, highly desirable that the government should use its influence because in reality not only has it the supervision, but as I have indicated before, it has the absolute control of the majority of that board, and it would be desirable I say that the government should exercise its influence to harmonize, if possible, the relations existing between these two engineers in charge of the works.

It has been said that differences have existed even between some members of the Board and the hon. the Minister of Marine and Fisheries (Mr. Préfontaine) and it has been said that my hon. friend from the St. Lawrence division of Montreal (Mr. Bickerdike) is one of those who have had serious differences of opinion with the Minister of Marine and Fisheries in regard to what was to be done in the harbour of Montreal, and there are others also. Possibly the hon. gentleman will be able to throw some light upon that subject himself. What we particularly desire to know and what I trust the Minister of Marine and Fisheries will be able to tell us is, in the first place, whether the plans for the present improvements have received the approval of the department and if they have received that approval, and if no change has occurred, if the present Minister of Marine and Fisheries is of the same opinion as the previous minister who no doubt was called upon to give his approval to those plans, then what are the causes of delay and of difficulty? There is also the larger question which I mentioned when I opened my remarks and it is this: Is it the policy of the government to change the present order of things and to assume immediately or during the present session, under legislation to be introduced, complete control of the port of Montreal. The Minister of Marine and Fisheries (Mr. Préfontaine) will remember that last year he gave notice of a Bill relating to the Montreal Harbour Board, a Bill which was no doubt intended to modify in some degree the present law. My hon. friend gave notice of that Bill but towards the end of the session, I think in May last, he withdrew the Bill and I do not believe the House ever had any knowledge of what were the provisions or dispositions of law contained in that Bill. In regard to this latter question, which is one of very much importance not only to ourselves in Montreal but to the Dominion at large, opinions are divided. There are a great many who believe that it would be in the interest of the port of Montreal and of the country in general that the government should assume absolute control of that very important port, and make it a national port and a free port. That opinion is entertained by many, and if I had time Sir, I would read to the House a very interesting report which I have here which was prepared by a sub-committee of 'La Chambre de Commerce de Montreal, a body represented by election upon the Board of Harbour Commissioners, a report prepared with the object of showing that the change to which I have alluded would be a change in the interest of the harbour of Montreal and of the commerce of the country generally. There are others who undoubtedly fear that if that change was carried into effect the administration of the harbour of Montreal would no longer be participated in by representatives of our great commercial bodies as it is at present, would no longer be participated in by the mayor of Montreal,

one of the Harbour Commissioners ex-officio, and I may mention for the information of the House that the city of Montreal in 1902 contributed over $125,000 to these harbour improvements. There is a fear in other words, Mr. Speaker, that the administration of the affairs of the board would assume a political aspect and that the business interests would not be sufficiently represented. It seems to me, after having gone fully into the matter, that it would be possible to obtain the great advantage of the government making the port of Montreal a national port, assuming its cumbersome debt and administering the port without at the same time sacrificing the right of representation, which under the present law is reserved for the shipping, commercial and business interests of Montreal, nor would it, I think, be absolutely necessary to eliminate from representation on the Board of Commissioners, if such were created for the administration of the port, some representation from the city of Montreal itself. The House will understand that these questions are questions of importance upon which we have a right to expect some information and enlightenment from the Minister of Marine and Fisheries. 'I hope, Sir, that nothing which I have said has tended to reflect upon the Harbour Board as at present constituted, which is a body entitled to the greatest respect, but there are two observations which I would make, one is that it appears from reports of recent meetings of the board that the difficulties to which I have alluded do in reality exist and that these meetings of that important body convened for practical and urgent purposes are sometimes employed in what would appear to be a purposeless manner. I have here a copy of the Montreal 'Witness' of Saturday, January 21 last, in which appears a report of the meeting of the board which occupies some three columns. It is entitled 'A wrangle over an inventory' and, without taking up the time of the House in reading that report, which is somewhat long, I may say that members of the House, by looking at that report, will understand that there was some truth in what appears to have been said by a member of the board present at that meeting. He is reported to have said:

> We are ridiculous before the public. How much more ridiculous we are making ourselves.

Perhaps this comment upon the proceedings of the board was a little severe, particularly when applied to men occupying high business positions such as the members of the Montreal Harbour Board, but from one end of that report to the other it appears that the time of the meeting was taken up in discussing subsidiary questions. A violent altercation for instance occurred between the hon. member for the St. Lawrence division (Mr. Bickerdike) and some other members of the board as to whether the storekeeper had been absent for a month or less than a month on election work. My hon. friend for St. Lawrence Division (Mr. Bickerdike) if he looks over this report will see that there was a great deal of excitement in regard to what I consider a question of not very much importance, in view of the really very important matters that the board has to deal with at the present moment. The general impression in the city of Montreal is that there are difficulties there that should be assuaged. A general impression also exists that the government has a policy in regard to the administration of the board and that policy is a policy of change and of improvement. A French paper of Montreal, 'La Presse,' I think I may say an organ favourable to the government, on January 21 last alluded to that general impression in the following words:

> Rumour has it once more that it is the intention of the government to submit to the parliament the abolition of the harbour commission and to substitute in its place five standing commissioners who will give all their time to the business of the harbour.
>
> As a matter of course, such commissioners would be paid by the government.
>
> The commission so reconstituted would be put under the jurisdiction of the Department of Marine and Fisheries.

There are other points of information there which do not bear exactly upon the question which I have just alluded to. Under all the circumstances, Mr. Speaker, I think the production of this correspondence and a declaration from the government as to what its policy is at the present moment in regard to the port will be information very gratefully received by this House and the public at large.

Mr. ROBERT BICKERDIKE (St. Lawrence, Montreal). Mr. Speaker, I had not intended taking any part in this discussion, as I felt that the hon. Minister of Marine and Fisheries would bring down all the correspondence that has been asked for, only that my hon. friend from Jacques Cartier (Mr. Monk) has alluded to me as being one of the wrangling members of the Harbour Commission. It is true that a large body of merchants, eleven in all, cannot always be of one mind. If they were, there would be no necessity of having eleven ; it would be sufficient to have one. There is hardly an institution in existence, commercial or otherwise, in which there are not sometimes differences of opinion. If the newspaper reports are correct, even in the Tory caucuses, which my hon. friend sometimes attends, there are differences of opinion.

Mr. FOSTER. Fight like blazes.

Mr. BICKERDIKE. I think there is no better guarantee that the funds of the public will be judiciously expended than the fact that there are on that board different representatives who have different views. The best proof of that fact is that we have

now a port which, while not complete by any means, is very much better than it ever was before. With regard to the permanent sheds which my hon. friend has alluded to, there has been considerable discussion. He will, I am sure, remember that we had meetings with all the different commercial bodies of Montreal on that subject, and that we thrashed it out for nearly a year getting ideas from the steamship companies, the railway companies and the minister himself. Finally we had a joint meeting of all the interested bodies in Montreal, at which I think the Minister of Marine and Fisheries and the Minister of Public Works were present, and the Prime Minister as well. The various ideas on the subject were threshed out on that occasion, and the general consensus of opinion was that for the upper or extreme western portion of the harbour, which the large mail and passenger steamers mostly frequent, double-decked sheds were absolutely necessary, that in the centre of the harbour, the section known as the Bonsecours market district, which is frequented by the large freight and cargo steamers, single sheds would be sufficient, and that at the eastern end of the harbour, which is chiefly used for lumber and coal, no sheds would be required.

Mr. MONK. Might I interrupt my hon. friend to ask him if this was decided on before the trip which the Harbour Commissioners made within the last three or four months to the United States for the purpose of inspecting the permanent sheds there ?

Mr. BICKERDIKE. The Harbour Commissioners did not make a trip recently to the United States to examine the permanent sheds. The recent trip to which my hon. friend alludes was made by the Harbour Commissioners for the purpose of examining the railway terminals. It was in January, 1903, that it was decided to build the permanent sheds in Montreal. I will just read, for the information of my hon. friend, one of the motions that was then adopted :

After an examination of the plans and a very long discussion, it was moved by Mr. Robert Reford, seconded by Mr. Lemay, that the plans of the sheds on the wharfs prepared by the chief engineer be approved.—Carried.

It was in January, 1904, that the Harbour Commissioners went to the United States to examine the terminals of the railways. So far as I know, there has been no delay. I think it is a mistake to say that the bridge works at Lachine, in the county which my hon. friend represents, stopped work on that account. I have no doubt they closed down during the winter months, just as a great many factories do, when there is not much to do ; but it was not on account of any change in the plans. It is true, the government have had some plans submitted to them, and they are looking into them to see whether they would be any improvement on the old plans ; but up to the present time there has been no change in the plans. So that that story about the bridge works is entirely without foundation. We must have, Mr. Speaker, at Montreal the best harbour on the continent, and it will be made so either by the present board or by our successors. What Montreal requires is these permanent sheds, with good elevators. We have now one elevator belonging to the harbour, two belonging to the Canadian Pacific Railway, and two or three belonging to the Grand Trunk Railway. There is no reason whatever why the harbour of Montreal should not, inside of two years, be the best equipped harbour in America and become the Liverpool of this country. Even with the reduction of over 40 per cent that was made in Montreal on the harbour dues, we have still paid our interest, we have never repudiated it, and we hope to continue paying our interest out of revenue without any additional taxation.

Mr. MONK. Would my hon. friend, who is a member of the Board, tell me why no report has been issued for 1903 and 1904 ? The last report published was for 1902.

Mr. BICKERDIKE. There is a very good reason for that. We have not had the time to get out the report for 1904. The report for 1903 was delayed on account of a difference in stock taking. When the stock was taken by the Harbour Board they were not quite certain whether it was quite correct or not, and they decided to take it over again. That could not be done in the summer and had to be postponed until the autumn. It is now being done, and the report will be out inside of a month.

Motion agreed to.

MOTION AGREED TO WITHOUT DISCUSSION.

For copies of all Orders in Council, reports of the minister, recommending and authorizing the sale of government lands in the Northwest Territories during the years 1903 and 1904. Also a return of the lands sold, if any ; the rates and terms at which they were sold, and the persons to whom they were sold.—Mr. Foster.

INTERCOLONIAL RAILWAY—TRANSPORT OF HAY.

Hon. G. E. FOSTER (North Toronto) moved :

For copies of all correspondence had with the government or any member thereof, or with any official of the Intercolonial Railway, in reference to the transport of hay during the year 1904, from points in Ontario and Quebec to points along the Intercolonial Railway, including the railway in Prince Edward Island. Also the report of the Minister to Council and the Order in Council, if any were passed, recommending or authorizing a rebate or reduction in the rates for carrying the same. And the names of the parties to whom rebates or reductions in the rate of freight upon hay were made, and the quantities shipped to each.

Hon. H. R. EMMERSON (Minister of Railways and Canals). There is no objection to the motion, but it may take some little time to prepare the return, because the papers are very largely at Moncton.

Motion agreed to.

ARBITRATION *IN RE* INTERCOLONIAL RAILWAY AND GRAND TRUNK RAILWAY.

Hon. G. E. FOSTER (North Toronto). Before the Orders of the Day are called, I would remind my hon. friend the Minister of Justice of the conversation we had across the floor the other day regarding the arbitration now going on, I have picked up incidentally some little information myself in respect of it, and I see that the arbitration really covers all the disputed points—of which there are a great many—between the Grand Trunk Railway and the Intercolonial Railway, from the contract of 1879 down to the latest, including those important ones with reference to the Drummond County Railway and the procuring of terminal advantages in the city of Montreal. I find also that the situation is really very grave and serious, and I think the House ought to have all the information that can be given it. I quite understand that the questions in dispute are being arbitrated but any papers that can be brought down ought to be brought down. Some of the points are extremely important, and the House should be possessed of all information concerning them as soon as possible.

Hon. CHAS. FITZPATRICK (Minister of Justice). There is no deed of submission, as I thought there was. The contract provides for an arbitration with respect to the difficulties referred to by my hon. friend, and the arbitrators are now adjudicating upon claims put forward, both by the government and the Grand Trunk Railway. In view of the statement I made in the House the other day, I thought it proper to apply to the gentlemen representing the government before the arbitrators for a statement. I received a very complete statement this morning, which I intend to have copied and laid on the table, and will have a copy sent to my hon. friend. In all probability in a day or two I shall be obliged to ask for leave to introduce a bill to amend the Act of last session, and will then be in a position to give further information.

SUPPLY.

House in Committee of Supply.

Post office—outside service, $1,694,238.50.

Hon. Sir WILLIAM MULOCK (Postmaster General). When the committee rose yesterday I was explaining the increase of $125,068 in the outside service. I had got down to the last classification of increases, namely, the increases in the city post offices, which amounted to $92,680.75. I propose now to give the details. I will give the increase by classes :

375 increases of $50 each	$18,750 00
178 increases of $78.25 each	18,928 00
19 increases of $30 each	570 00
1 increase of $24	24 00
52 additional appointments	25,197 50
Short estimate 1904-5	30,210 75
Increase in provisional allowance	4,000 00
Total	$92,680 75

Mr. FOSTER. There is no benefit in going over the list ; if there are any special cases the hon. gentleman might mention them.

Sir WILLIAM MULOCK. There is nothing special. But perhaps I might give some particulars of that estimate of $30,000. There is someting I ought to explain. There is a short estimate of $30,210.75, and an increase in the provisional allowances of $4,000. That $4,000 is to provide for increasing the staff of the Winnipeg, Vancouver and Victoria post offices, and to meet the increased expenditures, and the increases in the salaries of the staff. The hon. gentleman will remember there is an increased provisional allowance given to the staffs in all the cities west of Ontario.

Mr. FOSTER. At what rate is that given now ?

Sir WILLIAM MULOCK. In Manitoba and British Columbia to employees whose salaries are $800 and under, the provisional allowance is at the rate of $15 a month, or $180 a year. That is given on account of the increased cost of living in the west over the cost in eastern Canada.

Mr. FOSTER. Is that on the same scale in Manitoba, the Northwest and British Columbia ?

Sir WILLIAM MULOCK. The same.

Mr. FOSTER. What difference is there between that scale now and the scale, say in 1896 ?

Sir WILLIAM MULOCK. Allow me to complete the statement. I gave the provisional allowance where the salary is under $800. Where the salary is over $800 and running up to $900, clerks are paid an amount which will make the total income reach $980, this being the amount that would be received by a clerk whose salary is $800 a year. Where the salary is $900 and up to $1,200 a year, the allowance is at the rate of 10 per cent of the salary. Railway mail clerks are paid a provisional allowance at the rate of $10 monthly if the salary is less than $800, and from $800 to $960, the allowance is 10 per cent on the salary. There is no allowance when the salary exceeds $960 a year. I am told that the rate at a

former period was $10 a month, and it is now $15.

Mr. FOSTER. Has the rate of living increased ?

Sir WILLIAM MULOCK. When this increase was made it had been pressed upon us as a just provision. I think there is no doubt that in consequence of the recent development in Manitoba, and the large number of people going in there and into the Territories, the cost of living has increased, and in British Columbia as well.

Mr. FOSTER. Has the minister any data upon which he makes that statement or is it just an impression ? What means has he taken to find out ? It would seem to me that, with the opening up of that country, the larger number of railways and better communication, more products in the country itself, and all that, the cost of living should not increase—I mean over and above the rate of increase in other parts of the Dominion. I think the rate of living has increased in Toronto for instance. But has it increased more largely after all this development in the west, has it increased more largely there than it has in the east ? The hon. gentleman knows that the provisional allowance was first given because there was a difference between the scale of living in the east and west. Now if the scale of living has increased in the east and is equal, to say no more, to the increase in the west, there is no justification for the increase in that provisional allowance. I would like to have some information so that we may know upon what basis this is done. I hope the time will soon come when we will be able to treat these employees in their several classes just the same all through the Dominion. I think these distinctions and discriminations should cease as soon as possible.

Sir WILLIAM MULOCK. It is not just lately that the increase has been made. It is three years since the increase was made in the provisional allowances. Speaking from memory, my recollection is that information was obtained as to the increased rental, and the value of many of the necessaries of life, in consequence of the great growth in the cities of Winnipeg and Vancouver. There was a careful consideration of the question, and I will give to my hon. friend proof that this was a necessary step. We could not retain in the service in the Winnipeg post office any persons who were appointed at the salary allowed by law, and with the old provisional allowance ; they could do far better elsewhere, we could not get them to remain with us, and they complained that they could not even subsist reasonably on the allowance made. In fact, the difficulty was so great that until this was brought about, we had to transfer officers from the older districts having larger salaries, to Winnipeg, giving them a provisional allowance. But since we have increased the provisional allowance we do not experience the same difficulty. This allowance was made in two steps. Frst of all, it was given to the staff in Manitoba, and it was represented to us that the same reasons existed for giving it to the staff in British Columbia ; and it was not possible, on looking into the matter, to resist the argument, it seemed to be well supported. There were communications of different kinds, members on both sides of the House brought this matter up in parliament and pressed it on the attention of the government ; so it was not a haphazard step at all.

Mr. DANIEL. Have all the clerks in the St. John post office received the statutory increase who were entitled to it by length of service ?

Sir WILLIAM MULOCK. I am told that all the members of the staff of the St. John post office with one exception were given increases. That was an exception on merit. That one person was not considered entitled to the increase.

Mr. DANIEL. On examination?

Sir WILLIAM MULOCK. Proper inquiry by the department. My deputy is unavoidably absent on account of some domestic affliction, but the accountant informs me that the deputy passed upon that case deliberately, and thought that the clerk in question was not entitled to his increase. I do not interfere with these matters at all.

Mr. FOSTER. What is the system ? Do you get reports from the postmasters.

Sir WILLIAM MULOCK. The practice is to require the superior officers—the postmasters—to report upon the merits of the different persons who are members of the staff, to furnish a good deal of detailed information and to give their opinion. The deputy in turn—

Mr. FOSTER. The deputy here?

Sir WILLIAM MULOCK. My deputy here. The deputy here also exercises some judgment or discretion, and as the result he brings to me his recommendation.

Mr. FOSTER. The superintendent in the province has nothing to do with that?—Coulter, for instance, in New Brunswick?

Sir WILLIAM MULOCK. No, the postmaster of St. John, for instance, would speak for the St. John post office. These matters do not pass through the inspectors' hands at all.

Mr. SPROULE. It seemed to me while listening to the names being read that at some post offices there was a larger number who got additions to their salaries than at others. Is there any basis or principle upon which it is done?

Sir WILLIAM MULOCK. The maximum salaries as provided by law are not excessive or unreasonable, and the practice of the department is to consider every person entitled as time goes on to his ordinary annual increase if his services have been satisfactory, and that is the rule that is applicable throughout. There may be some instances where persons, as in the case of St. John, do not receive the increase because they do not deserve it. As to there being more increases in one office than in another the explanation of that is that there are more clerks in one office than in another. Take Toronto for instance; my hon. friend representing Toronto will be pleased to know that the growth of business has been something very great there. The revenue exceeds a million dollars a year now. I have forgotten what it was a few years ago but you cannot have an extra $50,000 of revenue without having to correspondingly increase the staff. There is a constant growth and our staff is increasing almost every day in consequence of the increased business. Toronto has a staff of many hundreds now. The revenue in Toronto is by far the greatest of any post office in Canada.

Mr. SPROULE. That is one of the offices that I was impressed with comparing Toronto with Montreal. It appeared to me, while listening to the list being read out that there was a larger number of employees in Montreal who had received increases than in Toronto, and I was anxious to know upon what principle or basis these increases were made. We had in addition to the information given to us that increases were granted in Winnipeg and Vancouver because of the increased cost of living which it was said was much greater there than in the east. Of course, that would not apply to Toronto or Montreal. There surely must be some basis established for increases in all these post offices —Montreal, Toronto, Winnipeg and Vancouver.

Sir WILLIAM MULOCK. They are all treated in the same way. I think on the surface my hon. friend must have something to justify his inquiry but I think I can explain it to his satisfaction. Whilst there has been a great increase in the revenue of the Montreal office and also of the Toronto office there has been a greater increase in the Toronto office and that has involved greater additions to the staff. If a member of the staff has reached the maximum, that ends him. The more new men who are appointed the more increases there will be, because there will be more men below the maximum, and that will explain why there are more men below the maximum in Toronto than in Montreal.

Mr. SPROULE. Am I correct in understanding that each clerk, say a first-class clerk, who has not reached the maximum gets a certain percentage of increase according to the number of years he has served, and that the same rule applies to the second, third and fourth-class clerks as well?

Sir WILLIAM MULOCK. Yes, they are all treated in the same way. Every man's case is gone into individually. If he has not reached the maximum he will be given an increase if his services are satisfactory. That principle has been applied throughout the whole service.

Mr. SPROULE. If they are not satisfactory they are not increased?

Sir WILLIAM MULOCK. There are increases that the law allows. Under the Civil Service Act there is a maximum salary assigned to every office and the Civil Service Act provides for a sum that may be paid by way of increase. Parliament votes the money and the increase is then awarded if the case is a meritorious one.

Mr. SPROULE. Under the Civil Service Act there is a statutory increase of $50 per year, but that would not be the same to the different grades in the post office.

Sir WILLIAM MULOCK. Well, yes, some would get $50 and some are entitled to $30.

Mr. FOWLER. Does this work automatically? Do they get their increases as a matter of course?

Sir WILLIAM MULOCK. No.

Mr. FOWLER. Only if they are recommended?

Sir WILLIAM MULOCK. That is all. Is my hon. friend (Mr. Fowler) interested in the St. John post office?

Mr. FOWLER. Only generally.

Mr. CROCKET. Mr. Chairman, before this item passes I would like to call the attention of the Postmaster General (Sir William Mulock) to the fact that the Fredericton post office is not adequately equipped or sufficiently staffed for the business that is done in the office. I find by the Auditor General's Report that for the fiscal year ended June 30, 1904, the revenue amounted to $14,054.93 and that the staff of the office was composed of a postmaster, three second-class clerks, and two fourth-class clerks, five assistants in all. In 1895 the revenue of the Fredericton post office amounted to $11,638.74 so that there has been an increase in the business of the office amounting to nearly $2,500, whereas the staff, I believe, is the same to-day as it was ten years ago. I have examined the record in referenece to the Charlottetown post office for the purpose of making a comparison, and I find that for the year ending June 30, 1904, the revenue of the Charlottetown post office amounted to $19,193.57,

while the staff of that office was composed of a postmaster, one assistant postmaster, four second class, five third class, and one fourth class clerk and one stamper and sorter. The postmaster in Charlottetown had twelve assistants where the business done amounted to $19,193.57. Fredericton, then with three quarters of the business of Charlottetown has less than one half the staff.

I think that these facts show pretty conclusively that the Fredericton office is not sufficiently staffed. There have been many complaints among the business and professional classes of Fredericton, and among all citizens who have occasion to go to the post office frequently of the slowness with which the mails are distributed. Fredericton, as all know, is an important city. It is the capital of New Brunswick, the seat of the legislature, the seat of the courts, the military centre of the province, and the seat also of the provincial university, the provincial normal school and several other important provincial institutions. A large volume of business is done there, and the citizens generally feel that they are entitled to a more expeditious distribution of mails than they are receiving under the present service. I trust the minister will take this matter into his consideration, and if possible provide that office with at least two or three additional clerks, as I think the records clearly show it is entitled to.

Sir WILLIAM MULOCK. Mr. Chairman, I would explain to my hon. friend (Mr. Crocket) that in the case of Charlottetown the post office officials also discharge the duties which ordinarily devolve on the office of inspector. There is no inspector's office in Prince Edward Island, and the postmaster, and such of his staff as he may draw on, act also as inspectors. We have a separate inspector's establishment for New Brunswick. It may be, however, that the public interest would be advanced by the addition of a junior clerk, and I will have that inquired into again.

Mr. CROCKET. I observe in the statement for the city of Charlottetown that one official is designated as being also assistant post office inspector.

Sir WILLIAM MULOCK. Yes.

Mr. CROCKET. I did not observe that any of the other clerks had any duties to perform in reference to the inspection.

Sir WILLIAM MULOCK. I should have added that the post office officials in Charlottetown also do the work performed by the superintendent of the railway mail service in other places. For instance, in New Brunswick you have a superintendent of railway mail services, but we have none for Prince Edward Island, this work devolving upon the postmaster and such of his staff as he may require, and I have already explained the case of the inspectors.

Mr. FOSTER. At the same time I think, having some knowledge of that city myself, as I represented it for four years—and this matter was a subject of complaint even at that time—that if the minister will look into it, he will see that the people are not given as complete and quick service as they ought to get. There is a great deal of waiting and delay in the delivery of the mail, and the general impression there is that this occurs because there is not a sufficiently large staff to have the work done quickly as well as efficiently. It is a well managed office at the present time, and the clerks are efficient clerks, but I think that the minister will probably find that he will consult the convenience of the people and greatly help matters by the addition of at least one more clerk to the staff.

Sir WILLIAM MULOCK. I shall carefully inquire into it.

Mr. FOSTER. There are, of course, all these other things to which my hon. friend (Mr. Crocket) has referred, which entail a great deal of work.

Sir WILLIAM MULOCK. The same thing applies to Prince Edward Island.

Mr. FOSTER. Yes, there is a local legislature there and also university educational establishments. However, I think the facts of the case, as set forth by my friend from York (Mr. Crocket), merit some inquiry from the minister.

Mr. CROCKET. I do not wish to be understood as in any way reflecting on the staff of the Fredericton post office. It is recognized throughout that city that the staff is painstaking, faithful and efficient from the head down; the complaint is that the staff is not sufficiently large.

Sir WILLIAM MULOCK. I shall have the officer whose duty it is to look into these matters give his best consideration to the case of Fredericton.

Mr. FOSTER. I understand, with reference to the provisional allowance, that this $4,000 extra is not to increase the amount of allowance given to the clerks who have already received the allowance, but is for new services.

Sir WILLIAM MULOCK. Yes, it is to meet the additions to the staff.

Mr. FOSTER. There was an item of 52 new appointments that the minister is to explain.

Sir WILLIAM MULOCK. Yes, there is an item of 52 additional appointments with salaries amounting to $29,197.50, as follows :

Charlottetown post office, one stamper and sorter.

Halifax post office, one letter-carrier.

St. John city post office, one fourth-class clerk.

Sherbrooke post office, one porter.

Montreal post office, three fourth-class clerks, one stamper and sorter, fifteen letter-carriers, three porters.

Toronto post office, five letter-carriers, nine porters.

London post office, three letter-carriers.

Hamilton post office, one letter-carrier, one porter.

Winnipeg post office, one junior third-class clerk, one letter-carrier, one porter.

Vancouver post office, three letter-carriers.

Victoria post office, one letter-carrier.

That makes up the list.

Mr. SPROULE. I presume that later on we will have supplementary estimates in which these officers are interested, and that we can discuss these matters then, because some of our friends who are absent desire to speak on them.

Sir WILLIAM MULOCK. That is quite right, there will be opportunities. I said that in that $125,000 there was an item of $30,210.75, a short estimate. I have given the details of everything except this. My statement in reference to it is as follows :

The minimum salary of the senior second-class having been fixed at $1,000, and the minimum salary of the junior third-class at $700 by the amendment to the Post Office Act of 1903, the salaries of seven senior second-class clerks were raised to $1,000 each and the salaries of forty-one junior third-class clerks to $700 each, making a total increase of $2,360.

One hundred and thirty-nine increases of salaries not specially provided for in the estimates for 1904-5, $12,416.50.

The undermentioned employees having been promoted to higher classes, their salaries were raised in consequence :

J. O. Carrier, Quebec post office, senior third at $800 to junior second at $900..	$100 00
G. W. Wills, Ottawa post office, senior third at $800 to junior second at $900..	100 00
C. F. Cole, Windsor post office, stamper and sorter at $360 to fourth-class at $400..	40 00
	$240 00

One hundred and forty-nine letter-carriers, messengers and porters have been brought under the provisions of the amendment of 1902 to the Post Office Act, involving an increase of $15,620.50. I will explain why this was not estimated before. Under the new Act they had the option within a certain period to come under its provisions. They have come in by degrees. As they come in they become entitled to additional pay. A letter-carrier now appointed is appointed under the grade system, at a per diem rate of pay. At $2.25 per day it amounts to about $700 a year, in addition to which he is entitled to a bonus of $20 for good conduct. So that he can now get $725 a year instead of the old maximum of $600. We do not force the new system upon them, but one by one they have been coming in under it.

Mr. FOSTER. What advantage do they lose ?

Sir WILLIAM MULOCK. I think it is entirely for their benefit.

Mr. FOSTER. Did they have superannuation under the old system ?

Sir WILLIAM MULOCK. Yes, and they have the same under the new. The Act declares that their coming in under the new system shall not affect them prejudiciously with respect to their superannuation. Some of them were nervous about it for a while and hung back; but a great many have now come in.

Mr. SPROULE. What percentage of them have availed themselves of the Act since last year ?

Sir WILLIAM MULOCK. Of those appointed prior to July 1, 1896, 49 accepted in 1902, 60 in 1903, and 108 in 1904. Of those appointed since July 1, 1896, 144 accepted in 1902, 11 in 1903 and 12 in 1904. According to this statement, there are now 384 under the new Act. That leaves out about 142. They are timid about it, having an idea that if they were sick they would not receive pay and might be in some way prejudiced. The idea of the amendment was to put pressure upon them to prevent them being unnecessarily sick. When men are paid by the year, we find that they are occasionally absent from duty, when, if they had a fear of loss of pay, they would discharge their duty. With regard to letter-carriers, it is extremely inconvenient to the public if they do not report for duty.

Mr. FOSTER. How many grace days has a letter-carrier ?

Sir WILLIAM MULOCK. They are allowed two weeks' holidays, and they have a sort of half holiday on the ordinary statutory and other holidays enjoyed by the people.

Mr. FOSTER. The per diem is simply for working days, including holidays ?

Sir WILLIAM MULOCK. Yes. They are paid for all holidays.

Mr. FOSTER. Suppose one does not turn up for duty, what is the process to find out what is the matter with him ?

Sir WILLIAM MULOCK. When a man does not turn up, it is the duty of an officer of the post office to at once seek the cause of his absence, and to make a report to the postmaster and ultimately to the deputy. Every case of absence is specially inquired into, not just dealt with in an automatic way, and the true merits ascertained. Under this system a letter-carrier can make

$125 a year more than he could under the old system, and for that increase we reserve the right to deduct his pay when he does not appear for duty.

Mr. FOSTER. But if he is really ill ?

Sir WILLIAM MULOCK. We do not encourage absences at all.

Mr. FOSTER. If he is really ill, is his pay docked ?

Sir WILLIAM MULOCK. There is no provision for payment in the case of absences from casual illnesses. I would not say anything to lessen the influence of the department on the staff to see that they are in attendance. There is one case on record, a very sad case, of a man being paid though absent; but I think that should be the exception.

Mr. FOSTER. It has also this point to it: it makes the government a pretty hard employer. An employer of labour in a factory or a store, if he has deserving employees and they are laid up for a few days by real sickness, will commonly pay them. It seems that, if it is real illness, there should be at least a minimum limit for which deserving employees should have the pay granted to them.

Sir WILLIAM MULOCK. My hon. friend did not quite catch the point. I explained that we have a provision for paying the men a bonus of $20 a year; so that if a man had a few days illness, that bonus would cover eight days at $2.25, or ten days at $2. All who give good and faithful service during the year get the bonus.

Mr. SPROULE. I thought you expected good conduct from every employee who was earning his salary. What other kind of conduct do you expect ?

Sir WILLIAM MULOCK. Every man is supposed to render reasonably good service, and if he does he gets the bonus. No two men discharge their duties precisely alike; but when a man is reported as having rendered satisfactory service, he gets the bonus of $20.

Mr. SPROULE. He is reported on by some superior officer ?

Sir WILLIAM MULOCK. Yes, there is a superintendent of letter-carriers attached to every post office except perhaps some small ones. The superintendent keeps a check on the letter-carriers. They are all, I think, very well satisfied with the arrangement, and I think are giving very excellent service. We hold the postmaster responsible for the efficiency of the office. He in turn looks to his subordinate officers to do their duty, and will call upon the superintendent of the letter-carriers to see that they do their duty. The superintendent reports to the postmaster, who in due time makes his recommendations to us. There is every disposition to encourage faithful service and the men are treated very well.

Mr. SPROULE. I am not saying that they are not, but wish to know if they are all dealt with exactly on the same principle, or is it in the power of some one to favour some and overlook others ?

Sir WILLIAM MULOCK. There could not be a man overlooked. The superintendent is there every day and knows every one of these men. He is anxious to have them do their duty and he would demoralize the service if he were to introduce favouritism. A letter-carrier must be faithful and punctual in attendance, prompt in his work and tidy. These are conditions the superintendent will bear in mind, and he is most anxious to encourage them. I think there is an excellent feeling amongst all the officers. I have never heard of any friction and would be very much disappointed if I thought any superintendent was guilty of any injustice to any one.

Mr. SPROULE. I have not heard of any, but simply asked for information.

Mr. FOSTER. What superannuations has the minister made last year ?

Sir WILLIAM MULOCK. I am not in a position to give that information.

Mr. FOSTER. I see by the returns that one O'Neil, in Montreal, was superannuated at thirty-three years of age and a gratuity of $506 paid him.

Sir WILLIAM MULOCK. He had consumption and has since died. He was not superannuated in the ordinary sense. Under the Act, if a man has not been ten years in the service, he cannot get superannuation but a gratuity.

Mr. FOSTER. That would be the case here, because he had been only 9⅔ years in the service.

Mail service by railways	$1,468,800 00
Mail service by steamboats	87,900 00
Mail service by ordinary land conveyance..	975,000 00
Supply and repair of mail bags, &c.	30,000 00
	2,561,700 00

Sir WILLIAM MULOCK. I will explain the practice which has been followed of late years. You will observe that there is no increase either in the mail service or miscellaneous expenditure, but it does not follow that there will not be an increase asked for. Our service is expanding very rapidly and I would prefer waiting until the last moment before asking for any increase. In a couple of months we will be three-quarters through our fiscal year, and my officers will be in a better position to tell me what increases will be required than they were last December when these estimates were prepared. I prefer to ask

for all the increases later on than ask for them piecemeal.

Mr. FOSTER. That is a reasonable position provided the minister does not wait until the dying hours of the session, as is so often done, to ask for increases. My hon. friend has frequently sinned in that respect as well as his illustrious colleagues. If the items are brought down in sufficiently good time to enable the House to criticise and discuss them, that will be perfectly satisfactory. Is there any system upon which our carriers by water are paid? Are they paid according to weight or is it just a rule of thumb arrangement, each carrier getting as much as he can for the service he does?

Sir WILLIAM MULOCK. We have a maximum allowance of 5 cents a mile for steamers. Where the volume is very small the rate is lower.

Mr. FOSTER. Have you no system of paying by weight?

Sir WILLIAM MULOCK. No, there has never been such a system.

Mr. SPROULE. Is it five cents for any quantity of mail, or for any specific quantity?

Sir WILLIAM MULOCK. The volume of mail matter which goes by steamer is not very great. A steamer will have to handle a bag or two or three and really the trouble is bringing the bags to the dock and putting them on board and receiving them and taking care of them during the voyage.

Mr. FOSTER. I see that the Newfoundland service, between North Sydney and Port Aux Basques seems to be upon a weight basis. Mr. Reid is paid at 50 cents per pound for letters and 5 cents per pound for papers.

Sir WILLIAM MULOCK. I am informed that that is an arrangement that has been in force for about twenty years. Newfoundland pays it one way and we pay it the other. At one time it was paid through some other department, and it has been transferred to the Post Office Department.

Mr. FOSTER. Is that the only case in which the payment goes by weight?

Sir WILLIAM MULOCK. I believe so.

Mr. FOSTER. Of course, this does not include the steamship subsidies?

Sir WILLIAM MULOCK. I do not know whether the steamship gets a subsidy or not.

Mr. SPROULE. I understood, when the Minister of Trade and Commerce explained the steamship subsidies that they had some relation to the number of pounds carried. But now the Postmaster General, as I understand him, says it makes no difference whether the mail matter carried is much or little.

Sir WILLIAM MULOCK. The amount of mail matter carried varies with the occasion. Take, for instance, the ordinary man-carrier, one day he may start with a bag almost empty, and next day, through the publication of a weekly paper or something of that kind, the bag may be pretty heavy.

Mr. FOSTER. Are tenders called for in the case of these steamships?

Sir WILLIAM MULOCK. No. I do not recall a case where there is any competition.

Mr. FOSTER. But where there are competing lines on the same route, are tenders called for and contracts made?

Sir WILLIAM MULOCK. Yes. But cases of competition are so rare that I thought for the moment there were none. I am informed that there is one, from Vancouver up the north shore.

Mr. FOSTER. And between Kingston and Cape Vincent there ought to be competition.

Sir WILLIAM MULOCK. I think there is no competition. The contract is held by the Folgers. I think it is a continuance by renewal of a contract that has been in force for many years. I remember looking into it when it expired and trying to find a way by which we could better ourselves, but decided to renew it.

Mr. FOSTER. Has there been any change in the basis upon which the railways are paid? Some ten years ago, or more, I think, there was a readjustment. Has any change been made since then?

Sir WILIAM MULOCK. There has been no change.

Mr. FOSTER. And the mileage allowances of that time have been extended to the new branches of the railways?

Sir WILLIAM MULOCK. Yes.

Mr. FOSTER. On the same basis?

Sir WILLIAM MULOCK. In some cases where the line is into a new country where population is very sparse, we pay a smaller rate, which is increased as the volume grows. The controller keeps track of them.

Mr. FOSTER. Can the minister tell us whether he is carrying parcels, pamphlets and that kind of matter at a rate that pays for the service rendered. It must be a large part of the mail carriage at the present time and constantly increasing. There was a period, I think, when the country was paying a good deal more for this class of matter than it received. The country has a right to get at least the cost of carriage upon that class of matter.

Sir WILLIAM MULOCK. I am afraid I could not give an opinion that would be of any value on the question whether or not we lose money in the parcel post branch. But, taking parcel post and newspaper post together, I am assured it is a great loss.

Mr. FOSTER. Postage is imposed on newspapers is it not?

Sir WILLIAM MULOCK. A very small one.

Mr. FOSTER. On the zone system?

Sir WILLIAM MULOCK. Within a radius of forty miles from the place of publication newspapers pass free from the office of publication. This is the same as it was before. Beyond the radius of forty miles, and within a radius of 300 miles the rate is ¼ cent per pound, and beyond that ½ cent per pound.

Mr. FOSTER. These are the rates fixed at the time the hon. gentleman (Sir William Mulock) made the change ?

Sir WILLIAM MULOCK. There has been a slight change since then.

Mr. FOSTER. In the way of lowering or increasing?

Sir WILLIAM MULOCK. Lowering.

Mr. SPROULE. What is the practice with regard to mail carrying contracts. Some years ago, a good many contracts were cancelled because they had been renewed without public tender. Are all contracts on expiration thrown open to the tender ? Or are they renewed, and if so on what basis ? Are any contracts renewed at higher figures than when they were tendered for in open competition ?

Sir WILLIAM MULOCK. The Post Office Act provides that all contracts involving an expenditure of $200 or over must be let by tender. That, of course, has been done. When these contracts have matured we have made it our business to ascertain whether or not the service had been satisfactory and whether it would be in the public interest to renew or to call for tenders. I do not think it expedient to be always changing mail carriers if the one holding the contract has given satisfactory service. When a contract which was let at open competition expires, the inspector makes a report stating whether good service has been performed or not. If the service has been good, the contractor is given the opportunity of renewing. If the service involves an expenditure of less than $200 a year, the law gives the Postmaster General power to make a contract without tender. But that is a power I have not exercised unless the expenditure was very trifling, and the circumstances justified it.

Mr. SPROULE. I notice that the Postmaster General has drifted into a system that was in vogue before he took charge of that department, and which he condemned unsparingly on many occasions, that was the renewal of contracts to mail carriers where the amount was $200 or less and where it had originally been let by public tender. I know that many of these contracts in our part of the country were cancelled, where they had been let exactly upon those principles, and it was stated to this House that there was a great saving to the country in consequence, and of course the previous government were condemned for carrying out a system which was not the most economical. Now it seems that experience has proven the wisdom of what the hon. gentleman's predecessors did, he is now adopting the same principle that was in vogue before he came into power. In some instances I am told that these contracts are renewed and a larger price given. I am not complaining of that, because I think that on the whole mail contractors are doing the work at prices too low. I do not know of any specific cases where there is a great grievance ; but I have been told that in some instances where this work was let by contract originally, at the expiration of the time when others were contemplating doing it at a lower figure, they did not have an opportunity of tendering because the contract was renewed at the original figure. They think now they have as good grounds of complaint as others had before who were under the same system denied the right of tendering by a renewal of the contract.

Sir WILLIAM MULOCK. I do not know that it is necessary to revive the discussion on that point which we have had many times. But perhaps my hon. friend would permit me to explain to him the point I used to take. The objection I took to the contracts was that they had not been let by tender where the law required them to be let by tender, and therefore they had to be cancelled and relet by tender.

Mr. SPROULE. I drew the attention of the minister to cases in my personal knowledge where they have been let by tender and cancelled.

Sir WILLIAM MULOCK. My hon. friend will agree that where a contract is let by tender and it might be well in the public interest to renew it, it might not be wise to renew it under the same conditions. In a market where the price of labour goes down there might be such a change in the conditions as would make it proper to renew that contract without tender. But where the reverse is the case, as it is to-day, where the price of labour is going up, there is nothing to be gained by inviting tenders to perform a service that was let by public tender four or five years ago. I am desirous of renewing now, where we can on that basis, any contract made a few years ago,

and where it is in the public interest. I do not think my hon. friend can cite to me one single case since I have been Postmaster General, where I have renewed a contract involving an expenditure exceeding $200 a year, and allowed a larger sum. I have no power in law to do it, and I am quite satisfied that I have not done so. There are cases where I have had to increase the price where a contract involved a smaller sum than $200, where the contract has expired, and the contractor would not renew it. Then it is wiser to get somebody else to take it, if you can, for ten or twenty dollars more. There are some cases of that kind, but that power is given to me by law, I have power to make these contracts under those circumstances ; but I have no power by law to renew a contract involving $200 a year or more, a year at a higher price, and I do not think I have ever violated the law in that respect.

Mr. SPROULE. I have been told of cases where the contracts were entered into at a higher figure. I do not complain of that, because I do not think they were paid too much. But I rose more especially to say that I do not think there was that fluctuation in wages from year to year previous to 1896, which would justify the adoption of the principle that is carried out now, any more than it justified the same principle then, because wages are about the same to-day.

Sir WILLIAM MULOCK. A good deal higher to-day.

Mr. SPROULE. Well, the contracts for carrying the mails, so far as I know, are about the same as they were eight or ten years ago.

Sir WILLIAM MULOCK. It costs more to keep a horse to-day.

Mr. SPROULE. It may, but I find contracts were taken when they were made without public tender, and were taken at about the same figure as seen years ago.

Mr. DANIEL. Do these items include the subsidies given for carrying the mails on the River St. John?

Sir WILLIAM MULOCK. All those expenses are included here.

Mr. DANIEL. Will the minister state the amount paid as subsidy to the Star line of steamers carrying the mails on the St. John river ?

Sir WILLIAM MULOCK. The Star line for many years, long before we took office, carried the mails under an arrangement which has been continued since. But of late years there has been some additional post offices established along the route, which involve some more trouble and expense to the steamers, and some allowance has been made for that.

Mr. DANIEL. I understand that the amount of subsidy given to the Star line amounts to $1,510 a year, for thirty-two weeks; they do not run in the winter-time. Out of that $1,510 they have to pay, or did have to pay a year or two ago, $550 to employees for the delivery of mails at the St. John office and getting mails from that office. The same way at all the stopping places such as Maugerville, Gagetown and other places on the River St. John, also at Fredericton. That leaves them only $950 for the service, which is at the rate of eleven and a quarter cents a mail bag. They consider that the amount is entirely too small. In addition, they have to give bonds of $3,000 a year; and they carry between 8,000 and 9,000 bags a year. They also state that the amounts which they have to pay for obtaining delivery of these mails are increasing year by year and they think that the amount of the remuneration which they receive for carrying these mails is not sufficient and that it should be increased. I would be very glad if the hon. Postmaster General would leave that item over so that we can see a little more about it and bring the facts a little more to his personal attention. I have just now met a gentleman who is interested in this very service and I know he expects to call upon the hon. Postmaster General to-morrow and I would be glad if the items were allowed to stand over for to-day.

Sir WILLIAM MULOCK. I may explain to my hon. friend that we do not take a vote for each separate service. We have thousands and thousands of services and there is a bulk sum taken. My hon. friend will have an opportunity later on to discuss this matter upon the supplementary estimates.

Mr. DANIEL. Very well.

Mr. AMES. I would like to ask the hon. Postmaster General whether any complaints have reached him as yet in reference to the unsanitary condition of the branch post office on St. Catherine street in the city of Montreal, whether it is his intention to renew the lease for the post office without requiring the premises to be put in a proper sanitary condition, and whether the Health Department in Montreal has not on several occasions found fault with the condition in which the premises are kept and no notice has been taken of its complaints.

Sir WILLIAM MULOCK. We have no information upon that subject. I think my hon. friend (Mr. Ames) is perhaps misinformed.

Mr. AMES. I can lay the originals of the Health Department's reports before the House if necessary. I should like also to ask the hon. Postmaster General whether any report was made to him on or about November 1 in respect to the illegal stamp-

ing of letters by an employee of the department in the main post office in the city of Montreal ?

Sir WILLIAM MULOCK. My officer does not know the facts in that case. He says that there has been something of that nature the subject of an inquiry, but if my hon. friend desires information upon that point I will get it for him.

Mr. AMES. I would be very glad to have it. I would also like to ask the hon. Postmaster General whether it has been brought to his attention of late that a number of remittances of interest made by the city of Montreal to some of its bondholders have disappeared, presumably in the mails of the city of Montreal, and whether any investigation has taken place to ascertain whether these cheques have been stolen, endorsed and paid through the negligence or culpability of any of the officials of the department ?

Sir WILLIAM MULOCK. No, we have no information upon that point. Were these letters registered ?

Mr. AMES. I cannot say as to that, but I can lay the facts before the House.

Sir WILLIAM MULOCK. Can my hon. friend say whether the letters were registered ?

Mr. AMES. I do not think the letters were registered, but there were letters sent out by the city treasurer containing cheques for interest due to certain parties, which cheques disappeared and which were forged and collected to the detriment and loss of the parties for whom they were intended.

Sir WILLIAM MULOCK. Can my hon. friend say whether the matter was brought to the attention of the postmaster of Montreal ?

Mr. AMES. It was by the public prints. I can lay a statement before the House if desirable.

Sir WILLIAM MULOCK. It is generally the case, if there is any possible chance of a grievance, that it is brought formally before the officials. They may have taken steps in this case, and if so I have no doubt it will be fully investigated. Of course, the parties would not suffer by reason of the forging of the endorsement.

Mr. AMES. The reason I bring these matters up is for the purpose of ascertaining whether the hon. Postmaster General is at present satisfied with the working of the Montreal post office and all its particulars.

Sir WILLIAM MULOCK. There has been a recent change in the postmastership.

Mr. SPROULE. Can the hon. Postmaster General give any information as to the number of new offices opened during the year ?

Sir WILLIAM MULOCK. That is in the annual report.

Mr. SPROULE. The hon. Postmaster General might turn up at the same time the number of miles of mail service added during the year.

Sir WILLIAM MULOCK. There was an addition of 317,468 miles of stage routes during the year. If the hon. gentleman desires to know the number of miles additional carried, it will be necessary to go through the service and multiply that mileage by the frequency of the service. There were 919 and 96-100 of a mile additional railway mail service in force during the past year. We are now carrying the mails 18,366 track miles a year and 16,129,121 stage route miles per year. The total number of post offices in existence on June 30 last was 10,460, but I do not find a statement in the report showing the increase during the year.

Mr. SPROULE. I was led to make the inquiry from the fact that the same amount is asked for the mail service for the coming year as was voted last year. It would appear to be very easy, if we added 317,468 miles of mail service, to determine approximately how much more money would be needed. It would seem from the estimates here as though the country is not expanding at all or that the service is not growing. It is true that the hon. minister says that later in the year he will be better able to make an estimate of just about how much will be needed in the year, but you would think even at the beginning of the year, in view of the number of new offices that have been opened up and the number of additional miles of mail service, that one could make an approximate estimate of the additional amount of money that would be required for the coming year.

Sir WILLIAM MULOCK. We are adding new post offices and mail services every day especially in the Northwest Territories.

Mr. SPROULE. That 378,000 miles is some proportion of what we had last year. Would it not seem natural to assume that there would be that proportion and that it would increase by that amount.

Sir WILLIAM MULOCK. When the supplementary estimates are brought down we will have a great deal of data giving the actual conditions up to that time. People are flocking into the Territories and wherever there is a little coterie of settlers we try to establish services whether they pay or do not pay. People are spreading all over the Territories ; they are going everywhere and we are adding servics every day of the year.

Mr. SPROULE. It does not appear to be on a very intelligent business basis if you have no idea of the proportion. There must be some proportion from year to year.

Sir WILLIAM MULOCK. If the hon. gentleman can tell me how many immigrants are going into Manitoba from now until next year and where they are going to settle, then perhaps I can tell him definitely. In answer to the hon. gentleman's inquiry as to the increase in the number of post offices I find that 310 were added during the last fiscal year.

Mr. SPROULE. There are now 10,460 post offices and 310 must be some proportion of the whole number, must it not? There were so many miles of mail routes; this year we have added so many more, and that must be some proportion of the whole number. Now would it not be natural to estimate, if you are judging from a business standpoint, what would be the additional amount required for the coming year, and then to provide for that proportion of increase? We are only estimating one year ahead, but you are giving exactly the same estimate as that of last year. That does not seem to be the most intelligent business judgment that could be exercised.

Sir WILLIAM MULOCK. It must be remembered that these estimates are prepared not to-day, but as long ago as December, on data covering the period up to the end of November. I want to give the House the latest possible information, and when the supplementaries are brought in we will know the state of affairs up to that date, as the new services are posted up in the department from day to day. Is it not better to have definite information up to March 1, than up to last November?

Mr. SPROULE. Yes.

Sir WILLIAM MULOCK. That is the object of it and I think my hon. friend (Mr. Sproule) on reflection will see that we are taking the better course.

Mr. SPROULE. I can hardly agree with that. Whatever information was in the possession of the department up to November or December must be as reliable, in estimating the future, as the information up to March 1 would be; one is a proportion of the year just as the other is. Any one coming into this country picking up the estimates and seeing that the Postmaster General is asking the same amount for the coming year as he did for the last year would naturally reach the conclusion that the country is not expanding very fast, but we know that it is expanding very fast.

Mr. FOSTER. My friend is right. I think that on general principles the main estimate ought, wherever it is possible, to be the main estimate and that the supplementary estimate should be made as small as possible. I wish to ask the minister from what railways we are now getting free mail service and to what extent. It strikes me that some of our subsidies were given some time ago with an obligation compelling the railway taking the subsidy to carry the mails of the Dominion free. Are we getting any return in that way at the present time?

Sir WILLIAM MULOCK. The department is getting no mails carried free. I think the condition attached to these subsidies is that in the case of a railway receiving a subsidy it must perform services to the government to the extent of three per cent of the subsidy before it would be entitled to payment for services.

Mr. FOSTER. For mail services?

Sir WILLIAM MULOCK. For services of any kind, for carrying police or supplies or mails, it would have to earn three per cent on the subsidy before it could get any cash.

Mr. FOSTER. To what extent is the Post Office Department benefited by that?

Sir WILLIAM MULOCK. I think we pay the Receiver General as if the Receiver General was the railway. When we put the mails on a new line of railway that is in that position, instead of paying what the railway earns to the railway we pay it over to the Receiver General.

Mr. FOSTER. What payments are made by the Post Office Department, and in respect of what roads? What I want to get at is whether we have got any actual advantage in that respect?

Sir WILLIAM MULOCK. I suppose the Receiver General could get us up a statement on that point. We simply pay our money over to him. These roads are only in their infancy as yet.

Mr. FOSTER. Was not the Canadian Northern which runs to Winnipeg subsidized under that condition? That has been running for two years.

Sir WILLIAM MULOCK. I think it first ran one train a week, then two and then three trains a week. It is now, I believe, running a train daily.

Mr. FOSTER. Would the minister inquire in his department and find out to what extent the post office or the country has benefited in that way?

Sir WILLIAM MULOCK. The post office, I explained, has not benefited in the slightest.

Mr. FOSTER. My hon. friend knows what I mean. He knows that certain railways were bonused under certain conditions, one of these being that they were to do a certain amount of public carrying for the country. What I want to get at is

to what extent the Post Office Department has participated in that. The country has got the benefit of it if these roads under these conditions have been carrying the mails.

Sir WILLIAM MULOCK. As I explained to the hon. gentleman, if it is a question between the department and the railways the department has to pay the Receiver General for the service. The railway company has not received money from the government, because it is not entitled to payment of its claim until it has earned three per cent.

Mr. FOSTER. Very well, I will put my question in another way. Will the minister give us the information as to how much his department has paid the Receiver General in respect of the services rendered to his department by such roads as were bonused under the condition that they should do a certain amount of carrying for the country ?

Sir WILLIAM MULOCK. I will get that information.

Mr. SPROULE. There has been a good deal of talking for some years past as to whether it would not be wise to put the telegraph and telephone systems of the country under the Post Office Department, and the hon. minister informed us last year that that question was engaging his attention. I would like to inquire if he has reached any conclusion regarding it, or has he been able to collect sufficient data to enable him to judge whether it would be a proper thing to do or not ?

Sir WILLIAM MULOCK. That is a very interesting and large question. I am afraid I am not able to supplement what I stated last session. It is now 6 o'clock, and I do not think it is desired to meet to-night. If it is not, perhaps my hon. friend will allow the discussion to terminate now. I move that the Committee rise and report progress.

Mr. MONK. I would like to ask the hon. Postmaster General to bring down, for the next meeting of the Committee, the report alluded to by my hon. friend from St. Antoine, Montreal, in regard to the illegal stamping of letters which took place during the last election campaign.

Some resolutions reported.

On motion of Sir Wilfrid Laurier, House adjourned at 6 p.m.

HOUSE OF COMMONS.

THURSDAY, January 26, 1905.

The SPEAKER took the Chair at Three o'clock.

Mr. FOSTER.

QUESTIONS.

NAVAL STATION AT ESQUIMALT.

Mr. SLOAN asked :

1. Has the government any information that the Imperial authorities propose to abandon Esquimalt as a naval station ?

2. If so, what action has this government taken in respect to section nine (9) of the terms of the union, under which the colony of British Columbia entered into union with the Dominion of Canada, reading as follows : 'The influence of the Dominion government will be used to secure the maintenance of the naval station at Esquimalt.' ?

Rt. Hon. Sir WILFRID LAURIER (Prime Minister). The government has no information that the Imperial government proposed to abandon Esquimalt as a naval station. Therefore, there is no occasion to make a statement in regard to the second question of my hon. friend (Mr. Sloan).

MACCAN MAIL CARRYING CONTRACT.

Mr. FOWLER—by Mr. Foster—asked :

1. Is there a contract in force for the carrying of mails from Maccan, Intercolonial Railway station, to the post office in the town ?

2. If so (a) what is the contract price, and (b) who is the contractor ?

3. (a) Were public tenders asked for ? (b) If so, who were the several tenderers, and what were the amounts respectively ?

4. What sum was paid the previous contractor for same service ?

Hon. Sir WILLIAM MULOCK (Postmaster General) :

1. Yes.

2. (a) Ninety-seven dollars per annum ; (b) Robert Harrison.

3. (a) Yes ; (b) Robert J. Harrison, $97; Jerome Loring, $97; George J. Harrison, $126.

4. One hundred and eighteen dollars and ninety-two cents per annum.

MARCONI SYSTEM ON THE 'STANLEY' AND THE 'MINTO.'

Mr. LEFURGEY—by Mr. Martin—asked :

1. Under what arrangement and for what purposes has the Marconi system of telegraph been placed in the government boats 'Stanley' and 'Minto' ?

2. Does the government pay for this, and if so, how much ?

3. Has the work thus far been successful?

4. Has the Anglo-American Telegraph Company protested against the establishment of Marconi stations on Prince Edward Island, (a) in connection with these boats ; or (b) for the purpose of establishing telegraphic communication between Prince Edward Island and the mainland ? If so, why ?

5. Does the government recognize such a protest ? If so, why ?

Hon. RAYMOND PREFONTAINE (Minister of Marine and Fisheries) :

1. Under contract, for the purpose of being able to communicate from one ship at

the mainland to the other ship at the island.

2. Yes, $1,500 for each ship, the cost of the installation.

3. Very successful.

4. Yes. (a) No. (b) Yes, on account of competition with them.

5. No, for public reasons.

MURRAY HARBOUR BRANCH, P.E.I. RAILWAY.

Mr. MARTIN asked :

1. Has the Murray Harbour branch line of railway in Prince Edward Island been completed ? If so, when ?

2. If not, what remains to be done, and what is the estimated cost of same, including rolling stock ?

3. How many of the bridges are wooden, or partly wooden structures ? Are they to be replaced by stone or steel ? If so, when, and what is the estimated cost ?

4. How many booking and other stations are now built on this line, and where ? How many more are proposed to be built, and where ?

5. Is a station to be built at Grand View or Newton Crossing on this line ? If so, is it to be a booking station ?

6. Has a delegation from Prince Edward waited on any member or official of the government during the session of parliament, asking for this station ? If so, of whom composed ?

Hon. H. R. EMMERSON (Minister of Railways and Canals). The information to enable me to answer this question is only to be had at Moncton, and I have not yet had an opportunity to secure it.

Mr. SPEAKER. Stand.

DISALLOWANCE OF ACT OF BRITISH COLUMBIA LEGISLATURE.

Mr. RALPH SMITH asked :

1. Have any of the Acts passed at the last session of the British Columbia Legislature of 1904 been disallowed ?

2. If any of such Acts have been disallowed, what are they, and for what reason ?

Hon. CHARLES FITZPATRICK (Minister of Justice) :

1. Yes.

2. Chapter 20, intituled : 'An Act to regulate immigration into British Columbia'; it was found to be ultra vires or interfering with Dominion policy.

EMPLOYMENT OF MR. P. M. BREDT.

Mr. LAKE asked :

1. Is Mr. P. M. Bredt at present in the employ of the Dominion government ?

2. If so, since when, in what capacity, and at what salary ?

3. On whose recommendation was Mr. Bredt appointed to his present position ?

4. Was Mr. Bredt in the employ of the Dominion government in 1904 ? If so, during what period or periods, and in what capacity or capacities ?

5. Did Mr. Bredt retire from the service of the Dominion government in 1904 ? If so, on what date ?

6. What was the reason for his retirement ?

7. On whose recommendation was Mr. Bredt appointed to the position he occupied with the government during 1904, and prior to that year?

Rt. Hon. Sir WILFRID LAURIER (Prime Minister). Will the hon. member (Mr. Lake) tell me to what department he refers ?

Mr. LAKE. The immigration department.

Sir WILFRID LAURIER. We will let the question stand, and I will try to get the answer.

EMPLOYMENT OF MR. SYDNEY PORTER.

Mr. LAKE asked :

1. On what date did Mr. Sydney Porter retire from the position of homestead inspector prior to the general election of 1904 ?

2. What salary was Mr. Porter drawing at the time of his retirement ?

3. Is Mr. Porter at present in the employ of the Dominion government ? If so, in what capacity, and at what salary ?

Rt. Hon. Sir WILFRID LAURIER Prime Minister) :

1. Mr. Sidney Porter retired from the position of homestead inspector on August 31, 1903.

2. He was receiving a salary of $125 per month.

3. Yes ; colonization agent at $125 per month.

EMPLOYMENT OF MR. J. R. POLLOCK.

Mr. LAKE asked :

1. Is Mr. J. R. Pollock in the employ of the government ? If so, since when ?

2. Was Mr. J. R. Pollock in the employ of the government during October, 1904 ? If so, what were his duties ?

Rt. Hon. Sir WILFRID LAURIER (Prime Minister) :

1. Yes, Mr. Pollock has been in the employ of the government since May 12, 1902.

2. Yes; homestead inspector.

LAND OBTAINED BY MR. HENRY ENTENIER.

Mr. LAKE asked :

1. When did Henry Entenier enter for his first homestead ?

2. Has Mr. Entenier entered for a second homestead, or obtained from the government any land since that time ? If so, what is its location, at what price, and under what conditions did he receive it ?

Rt. Hon. Sir WILFRID LAURIER (Prime Minister) :

1. On May 31, 1893.

2. Mr. Entenier has not entered for a second homestead. Upon report of homestead inspector that only a portion of the land in their homesteads was cultivable in consequence of early frosts, caused by the lowness of the land, and because of hail in some years, settlers in the Kroneau district (of which Mr. Entenier is one) were al-

lowed to purchase each an additional quarter section, subject to ordinary cultivation conditions. He bought the SE. quarter section 14, township 15, range 17, west of the 2nd meridian, at the regulation price of $3 per acre, payable one-fourth at time of purchase, the balance in three annual instalments, with interest on any unpaid balance at 5 per cent per annum.

DRILL HALL IN SHERBROOKE.

Mr. WORTHINGTON asked :

1. Has a sum of money been placed in the estimates for the construction of a drill hall in Sherbrooke ?
2. If so, what amount, and when will such appropriation be available ?
3. Is it the intention of the government to increase the appropriation in the near future ?
4. Has a suitable site been procured ? If so, where, and at what cost ?
5. Have plans and specifications been prepared ?
6. Is it the intention of the government to call for tenders for the construction of the same ?
7. When does the government intend commencing the construction of such drill hall ?
8. Is the government aware that the four different branches of the service which exist in Sherbrooke have for some time past had no suitable premises for the retention of arms and accoutrements ?

Rt. Hon. Sir WILFRID LAURIER (Prime Minister) :

1. Yes.
2. $10,000. Money available at present.
3. Yes.
4. Yes ; on Victoria street, between Belvedere and Goodhue streets ; price paid $6,000, of which $1,500 was contributed by the corporation of the town of Sherbrooke.
5. Plans and specifications are now in course of preparation.
6. Yes.
7. As soon as plans are prepared.

Mr. SAM. HUGHES. Part of that question is not answered.

Sir WILFRID LAURIER. It is so general that I cannot answer it. I would have to communicate with several departments, and that will be done perhaps later on.

POST OFFICE IN SHERBROOKE.

Mr. WORTHINGTON asked :

1. Has any amount been placed in the estimates for the purpose of improving and increasing the accommodation of the Sherbrooke post office ?
2. If so, what amount has been so placed in the estimates, and when will such appropriation be made ?
3. Have tenders been called for the work of the same? If so, have any been accepted, and from whom?
4. Is it the intention of the department to increase the staff and efficiency of the Sherbrooke office ?
5. What are the salaries of those now employed, postmaster and clerks ?

Sir WILFRID LAURIER.

Rt. Hon. Sir WILFRID LAURIER (Prime Minister) :

1 & 2. Yes ; there is at present an amount of $2,000 available for that purpose.

3. The principal item is for lock boxes ($1,650), which are supplied under contract.

Hon. Sir WILLIAM MULOCK (Postmaster General). I would ask the hon. gentman to allow the last two parts of his question to stand.

ANTHRACITE COAL USED BY GOVERNMENT.

Mr. A. K. McLEAN—by Mr. Martin—asked :

1. What were the quantities of anthracite coal used in the several departments of the government of Canada, in the provinces of Quebec, New Brunswick, Nova Scotia, and Prince Edward Island, in the years 1900, 1901, 1902. 1903 and 1904 ?
2. What was the total expenditure per year for said coal for each of said provinces during said years ; and separately, what were the names of the parties to whom paid, and the price per ton paid to each ?

Rt. Hon. Sir WILFRID LAURIER (Prime Minister). As this reply would require a large amount of work, would the hon. gentleman be kind enough to ask for an order of the House for a return ?

SURVEYS FOR GEORGIAN BAY CANAL.

Mr. BRABAZON asked :

1. How many parties are engaged on the surveys of the proposed Montreal, Ottawa and Georgian Bay Canal ?
2. Who are the engineers in charge of said parties, and what territory do they respectively cover ?
3. When did the several parties commence operations ?
4. Of how many men did each party consist on the 1st of January inst. ?
5. Have any interim reports been received by the government from any of the engineers ? If so, what is their tenor ?
6. When is it expected that the survey will be completed ?

Rt. Hon. Sir WILFRID LAURIER (Prime Minister) :

1. Ten.

2. Section No. 1, Lake Nipissing to middle of Lake Huron, A. J. McDougall engineer in charge. Section No. 2, middle of Lake Huron to head of Johnson's rapids, on the Ottawa river, H. P. Bell engineer in charge. Section No. 3, head of Johnson's rapids to Des Joachims rapids, Wm. Cross engineer in charge. Section No. 4, head of Des Joachims rapids through north and south channels of Allumette island to Fort Coulonge, G. L. Griffith engineer in charge. Section No. 5, from Fort Coulonge through Calumet, Portage du Fort and Snows to head of Chats rapids, A. Robert engineer in charge. Section No. 6, head of Chats rapids through Lake Deschênes to the Gatineau river, W. G. Warner engineer in charge. Section No. 7, from the Gatineau river down

the Ottawa river, through Grenville rapids, to the foot of Carillon rapids, E. E. Perrault engineer in charge. Section No. 8, from foot of Carillon rapids, through Lake of Two Mountains and Ste. Anne rapids, to head of Lake St. Louis, C. E. McNaughton engineer in charge. Section No. 9, from head of Lake St. Louis to Montreal by the Lachine canal, with investigation of the Back river channels to the St. Lawrence river, L. R. Voligny engineer in charge. Party No. 10 (subdivision of section No. 1), Lake Nipissing, F. H. Peters, first assistant, in charge.

3. The first nine parties were ordered to report on the 27th October, 1904; party No. 10 was formed later on, and began work in the first week of January instant.

4. Each party is composed of 16 men—engineering staff, 7 men; river men, labourers and cook, 9 men. Extra men are employed when required. On the 1st January instant the several staffs were as follows:—

Section No.	1	16 men.
"	2	21 "
"	3	16 "
"	4	21 "
"	5	16 "
"	6	21 "
"	7	29 "
"	8	20 "
"	9	28 "

5. Only usual reports respecting field work have been received.

6. The survey is expected to last one year.

I. C. R.—STATION AGENT AT FREDERICTON.

Mr. CROCKET moved:

For copies of the letters of Mr. Tiffin, general traffic manager, and J. E. Price, general superintendent, of the Intercolonial Railway, reporting Odbur White, station agent at Fredericton, N.B., as not qualified for his position; and of all other correspondence in the possession of the government or the Department of Railways and Canals, relating to the dismissal of said Odbur White?

Hon. H. R. EMMERSON (Minister of Railways and Canals). There is no correspondence. Reports were made to me orally at Moncton in the month of December. I have received a letter from Mr. White, to which I have replied. That correspondence can be furnished if the hon. gentleman is satisfied with that.

Hon. JOHN HAGGART. Perhaps the minister would be more particular in future, when he gives an answer to a question put in the House, to state that the report is an oral one; for certainly, in listening to him, I came to the conclusion that it was a report in writing that had been made in reference to that matter.

Motion agreed to.

MOTION AGREED TO WITHOUT DISCUSSION.

For copies of all correspondence had with the government or any member or official thereof, in reference to the building and location of a railway station at Charlottetown, Prince Edward Island; also report or reports or memorandum of any minister or official of the government, with reference to delegations from the province of Prince Edward Island, asking for the construction of such work.—Mr. A. Martin.

SUPPLY.

House in Committee of Supply.

Post office—outside service, miscellaneous expenditure, $289,740.

Mr. AMES. Mr. Chairman, before this amount is voted, I would like to refer again to a matter which I spoke of yesterday when we were discussing the estimates of the hon. Postmaster General with special reference to the post office in the city of Montreal. I would like to quote for the benefit of the hon. Postmaster General and the members of this House an extract from a statement which was delivered by Mr. Justice Desnoyers from the bench in the city of Montreal on December 17, 1904, at the time that he committed six prisoners for trial in the case of the Crown vs. Geo. Bissonnette et al., charged with conspiracy. At that time the hon. judge spoke as follows:

Besides, the first of November, Bissonnette, took from No. 29 St. Charles Borromée street, a bundle of envelopes and had the stamps cancelled and the envelopes brought back to No. 29 St. Charles Borromée street. These letters were to serve bogus voters by putting them in a position to make fraudulent identification in case it should be necessary so to do.

I would like to know whether the hon. Postmaster General has received a report from his subordinate, and what action has been taken on this report, inasmuch as it would appear from the words of the judge that some of the officials of the Montreal post office had prostituted their position in order to assist in the preparation of electoral frauds.

Hon. Sir WILLIAM MULOCK (Postmaster General). Until yesterday, I had never heard of the matter in any way. I made inquiry in the department and I find the following report from Mr. J. L. Palmer, the assistant postmaster at Montreal:

Montreal, 3rd November, 1904.

Sir,—I beg to report that yesterday complaint was made to this office that some one upstairs had handed a parcel of letters to an employee to postmark and return to him; that the same man had used the same employee for the same purpose the day before. I made inquiries of those likely to know something about the matter, and finally ascertained that Mr. Louis Thibault, of the public works branch here, had, on Tuesday about noon stamped a certain number of envelopes, whether empty and addressed I do not know. When I learned this I sent for Mr. Thibault, who is a very obliging person

and very useful to us, and questioned him concerning this accusation.

Mr. MORIN. To us!

Sir WILLIAM MULOCK. This is the assistant postmaster who is writing. This is Mr. J. L. Palmer's statement:

He said that he had stamped some letters the day before; that he thought he was doing no harm, and the chances are he did not think there was any harm in doing so. He said that he would bring me down what letters had been given to him yesterday. There were about thirty, I fancy, empty envelopes, unaddressed, prepaid with a two-cent stamp each, and some five or six closed against inspection. He gave me to understand that he got them from some one of the name of Bissonnette.

I asked the superintendent to warn the clerks in charge, our stampers and sorters and others concerned against allowing any one to meddle with our stamping machines, other than those authorized to do so.

Of course these stamping machines and electric plant are kept in order by employees of the Public Works Department, and they have, necessarily, free access to the office in consequence.

Mr. Thibault wanted to know what he would do with these envelopes, and few closed letters which had been given to him by this party. He was told to do as he pleased with them; that they had not been posted and that, consequently, it rested with him to dispose of them as he deemed best.

Yours faithfully,
(Sgd.) J. L. PALMER,
Assistant Postmaster.

The Postmaster General
Ottawa. Ont.

I sent for the secretary of the department and questioned him as to the position of this man Thibault and he gave me the following memorandum:

Re case of Louis Thibault:

Under date the 3rd November last, the postmaster of Montreal reported that Louis Thibault, who is employed as an electrician by the Department of Public Works, to attend to the electric stamping machines in use at the Montreal post office, had, at the instigation of a friend of his named Bissonnette, improperly passed through one of the stamping machines a number of unsealed empty envelopes unaddressed and prepaid with a two-cent stamp each, also some five or six envelopes which were closed against inspection.

The object which this man Bissonnette had was, it appears, to give the envelopes in question (which he used to inclose certain election documents) the semblance of having passed legitimately through the post office, although actually delivered by hand.

The question as to whether this department has any action against Bissonnette for an improper use of post office material, apparently for a fraudulent purpose, has been submitted to the Department of Justice, but as yet no answer has been received from that department.

The Department of Public Works has also been asked whether in view of the serious impropriety of Thibault's conduct he is a suitable person to be entrusted with work which gives him the opportunity of making an improper use of post office material, but no reply has yet been received from the Department of Public Works, beyond a statement from the private secretary that the minister was out of town and that the matter would be referred to him on his return.

I asked the secretary of the department how this man Thibault came to be allowed access to the working part of the post office, and he gave me the following explanation: It appears that there are certain electrical works in connection with the building generally and that this man Thibault is an electrician. A small part of the post office in the city of Montreal is occupied by stamping machines that are run by electrical power, and it was part of the duty of this man Thibault to come in from time to time and see that these machines were in proper order. Accordingly, no question would arise in case of his appearing at one of these machines. The probability is that on one of these occasions he came to one of these machines, and whether surreptitiously or otherwise, the probability is that he made an improper use of his position, which was only to examine the machines and see that they were in order, to stamp these envelopes.

Mr. HAGGART. What is the date of the letter in which you made inquiry of the Department of Public Works and to which you seem to have no answer?

Sir WILLIAM MULOCK. December 17. I will read the letter to my hon. friend (Mr. Haggart). It is from the Deputy Postmaster General to the Minister of Public Works, and it is as follows:

Under date the 3rd November last, the postmaster of Montreal reported that Louis Thibault, who is employed as an electrician by the Department of Public Works to attend to the electric stamping machines in use at the Montreal post office, had, at the instigation of a friend of his named Bissonnette, improperly passed through one of the stamping machines a number of unsealed empty envelopes unaddressed and prepaid with a two-cent stamp each, also some five or six envelopes which were closed against inspection.

The object which this man Bissonnette had was, it appears, to give the envelopes in question (which he used to inclose certain election documents) the semblance of having passed legitimately through the post office, although actually delivered by hand.

I beg therefore, to submit the question as to whether in view of the serious impropriety of Thibault's conduct he is a suitable person to be entrusted with work which gives him the opportunity of making an improper use of post office material.

That is signed by the Deputy Postmaster General.

Mr. BERGERON. To that letter there was no answer.

Sir WILLIAM MULOCK. There is an answer dated December 23, 1904, from the private secretary to the Minister of Public Works.

Mr. BERGERON. What is that answer?

Sir WILLIAM MULOCK. It is as follows :—

December 23rd, 1904.

Sir,—I have the honour to acknowledge your favour of the 17th inst., which has been received in the absence of Honourable Mr. Hyman from Ottawa, with reference to an employee of this department in the Montreal post office, Louis Thibault by name. On the minister's return to the city, your letter will be laid before him.

I have the honour to be, sir,
Your obedient servant,
JAS. B. HUNTER,
Private Secretary.

Mr. AMES. I would like to point out to the minister that all this correspondence relates to the second offence, that the first time the letters passed through without detection and that nearly all this correspondence related to the second lot of letters which were caught while they were going through.

Sir WILLIAM MULOCK. I have not seen my deputy on the subject because he has been absent from Ottawa, but the file contains the letter from Palmer and of course our action would be with reference to this complaint. The letter from Mr. Palmer says:

I beg to report that yesterday complaint was made to this office that some one 'upstairs' had handed a parcel of letters, &c.

That was the information furnished to us by the assistant postmaster and that is the information which moved the department to action; I do not think we have any other information in regard to any other alleged offence. It may have been as my friend (Mr. Ames) says, but the whole file was submitted to me by the secretary of the department this morning.

Mr. SPROULE. In the letter you refer to another alleged offence, so that there must have been another occasion when the same thing was done.

Sir WILLIAM MULOCK. That may appear; whatever was in Palmer's letter was the subject of our inquiries of the other departments, first as to whether Thibault or Bissonnette can be proceeded against criminally, and whether Thibault is a proper person to continue in the public service. One act of this kind is just as censurable as a dozen acts. If a man has committed this offence on one day that is sufficient ground for action although two offences may aggravate the case.

Mr. AMES. Has the minister any reply to his inquiry to the Department of Justice as to whether the department can proceed against Bissonnette for the misuse of the mails?

Sir WILLIAM MULOCK. The matter has been referred to the Deputy Minister of Justice, but I do not know what has transpired as I have not had an opportunity of inquiring.

Mr. AMES. Will the Minister of Justice (Mr. Fitzpatrick) let us know?

Mr. FITZPATRICK. Probably we have fourteen or fifteen applications of this sort every day, and it is absolutely impossible for me to carry in my mind the result of the different references, but since the matter was brought up I have made application to the department for details and I expect to have them in a few minutes.

Mr. AMES. I should be very sorry to believe that there are fourteen or fifteen cases of this kind every day because it is a case of such an extraordinary character.

Mr. FITZPATRICK. I am sure my hon. friend (Mr. Ames) would not intentionally misrepresent what I said. I did not say there were fourteen or fifteen cases of this sort every day; I said there were fourteen or fifteen references to the department.

Mr. AMES. There is another matter which I would like to bring to the attention of the Postmaster General before we have the estimates for his department. In the Montreal 'Star' of January 13, 1905, there occurs a statement purporting to come from the city treasurer as follows:

It is true that letters containing cheques for interest upon civic bonds have evidently been opened at the post office in this city and have been forged and cashed.

I would like to know if the minister has any information on this.

Sir WILLIAM MULOCK. I am informed that this matter has not been brought to the attention of the department except through a newspaper report, but as soon as it was brought to the notice of the department in that way, a communication was directed, on December 19, to the inspector at Montreal, Mr. Bain, instructing him to make an investigation. The memorandum is as follows :—

This matter was referred to the post office inspector at Montreal for a report on the 19th instant, but the report has not yet come to hand.

Mr. SPROULE. What seems strange to me about this case is that it was reported to the Department of Public Works, that one of their employees was doing improper work in the Post Office Department, and yet for two and a half months, so far as we know, that employee has never been dismissed or reprimanded.

Sir WILLIAM MULOCK. In the absence of the acting Minister of Public Works I may say that he has not had this matter in hand for two and a half months. It was on December 17 that the Post Office Department directed a communication to him. The holidays were then on and the Minister of

Public Works, I presume, did not return to Ottawa until some time in the new year. It may be that he has dealt with the case, for all we know, but it has not been under his notice for two and a half months. I presume the minister was with his family during the holiday season; he came down to Ottawa early in January and since then there has been a good deal to do getting ready for the session, and we are still only at January 26.

Mr. SPROULE. This I think would be the proper time to make inquiry in reference to another matter. Complaints are made with regard to the time of the delivery of mail, especially of newspapers, in the House of Commons post office. I was here week before last and we waited a little over an hour after the trains were in before we could get a paper in the House of Commons. I was told that this could be easily remedied by having a bag brought direct from the train to the House of Commons post office, instead of having the mails delivered at the post office down town, sorted there and then brought up here. It seems to me that could be easily done and it would be a convenience. We went down town and bought papers there, and had them up here nearly an hour before they were delivered in the House of Commons post office. That I think ought to be changed. I would also call attention to the fact that on Sundays the House post office is closed at four o'clock in the evening. Letters dropped into the post office after four o'clock do not go out by that night's mail, which leaves at eleven o'clock. It seems to me that it would be an easy matter to have a bag sent from here at the last moment either to the train or to the city post office. I spoke about this to the postmaster, who is a most courteous, accommodating, and obliging man, and he told me that it would not be difficult to have a more convenient arrangement, but that his attention had not been drawn to it before. This system has not always prevailed, because I can remember that some years ago we could mail our letters at a much later hour. Having drawn the attention of the hon. Postmaster General to the matter, I have no doubt that he will confer with his employees and have a change made.

Sir WILLIAM MULOCK. With reference to the first point made by my hon. friend, whether the mails would get here more quickly if sent direct from the train to the House of Commons rather than via the post office, let me explain that the arrangements for conveying the mails to and from the House of Commone are under the control of a committee of this House or a joint committee of both Houses. The postmaster here is not an officer of our department; he is an officer of this House.

Mr. HAGGART. What joint committee controls them ?

Sir WILLIAM MULOCK. It is called the Committee of Internal Economy, I believe. The Post Office Department has no jurisdiction over the mail service between the Post Office and the House.

Mr. SPROULE. The Postmaster General did not say so when we were distributing our literature and he threatened to throw it out.

Sir WILLIAM MULOCK. We will discuss one thing at a time ; I am now giving my hon. friend the information he desired. At present the practice is to have the mails that come from the west and from Montreal sent here in a special bag directed to the House of Commons. They are brought by electric car to the post office and there delivered to the courier of the House of Commons, who is in attendance, and who at once brings them here. He does not wait on the sortation of the mails at the city post office at all.

Mr. SPROULE. The Postmaster General evidently misunderstands me. I said that the complaint was not with regard to letters, but papers.

Sir WILLIAM MULOCK. Whether letters or papers, they came in a bag directed to the House of Commons, and there is no delay caused by their coming via the city post office. There may be some delay on the part of the courier, but that is a matter for Mr. Speaker, and I will call his attention to the hon. gentleman's question. With regard to having the outgoing mail on Sunday evening close at half-past ten instead of 4 o'clock, I may say that the mails are despatched from the city post office to the station at the latest possible moment before the departure of the train, and if the House of Commons gets its mails into the city post office in time for the last despatch of the mails to the station, which takes place at about half-past ten, my hon. friend's point would be met. The remedy rests with the post office in the House of Commons, not with us.

Mr. SPROULE. The papers were one hour later than the letters. After I had gone down to the city and purchased a paper, I inquired here, and was told that the mail had not yet arrived from the post office.

Sir WILLIAM MULOCK. That is between the postmaster here and the courier.

Mr. HAGGART. Is the party who brings the mail from the city post office to the House of Commons under the control of the Speaker or of the postal authorities ?

Sir WILLIAM MULOCK. The postmaster of the House of Commons informs me that he is a man named Patterson, and he is employed by Mr. Speaker.

Mr. MONK. I would like to ask the hon. minister if he is able to tell the com-

mittee what is the amount of rental paid for the branch post office in the city of Montreal situated at No. 2467 St. Catherine St., and whether the lease for that office expires this year ? Some documents have just been placed in my hands by the hon. member for St. Antoine division (Mr. Ames) who has been obliged to absent himself, and who represents that part of the city, from which it would appear that that post office as at present organized is a source of danger to the public health. Numerous complaints were placed in the hands of my hon. friend from St. Antoine division ; in consequence of these, the health officer of the city of Montreal was asked to make an examination and report. This is the report which he made :

Montreal, December 1, 1904.

H. B. Ames, Esq.,
180 St. James Street.

Sir,—I have the honour to make you the following report re the sanitary condition of No. 2467 St. Catherine Street. We made the smoke test. The place is unhealthy at present and is besides very badly kept. There are not sufficient water closets for the number of employees. The proprietor, Mr. Pacaud, was notified to put the premises in good order and the department will see that that is done as soon as possible. I may also add that it is largely the fault of the occupants if their quarters are not kept as they ought to be.

Your obedient servant,
J. A. DUROCHER.
Supt. of Sanitary Police

It would appear that at a later date inquiry was again made of Mr. Durocher as to what had been done with regard to these premises. I have here his answer addressed to Alderman Ames :

City Hall, Montreal, 12th, January, 1905.

H. B. Ames, Esq.,
180 St. James Street.

Sir,—Your letter of the 10th instant was received yesterday. In reply I must say, as I did, on December 1st, that the place is not kept as it should be. The water closets and floors are dirty. There has been negligence since we have had all put into good order, and it is again in a bad state. There is gas escaping from a pipe placed in the back by order of the manager of the office. There is not a single cuspidor in the establishment and you can imagine the result. We have notified the proper party to repair the gas pipe, to supply cuspidors, to have the floors washed, &c. The said official believes the owner to be bound to do the cleaning, therefore, I believe he should be made to fulfil his obligation. I do not believe that the health department would be justified in interfering in such a case.

Your obedient servant,
J. A. DUROCHER.

It is in consequence of these documents that I ask my hon. friend whether the lease expires this year or whether, in the short time which is to elapse between now and February 1, the Post Office Department could not take measures, before allowing that lease to be renewed either expressly or tacitly, to have that public office made absolutely conformable to all the sanitary rules and by-laws of the city of Montreal ?

Sir WILLIAM MULOCK. After my hon. friend from St. Antoine (Mr. Ames) had referred to this matter yesterday, I made inquiry, and was informed that it had not been brought to the attention of the department. I gather from the papers just read by my hon. friend from Jacques Cartier, that the health superintendent of the city of Montreal informed the hon. member for St. Antoine that the premises were not proof against the smoke test. Whilst Mr. Durocher has said in his report that the case is perhaps one which does not come within the jurisdiction of the health department of the city of Montreal, the Post Office Department is very much interested in having all its buildings in a sanitary condition satisfactory to the public and the officials. I am sorry therefore, that my hon. friend from St. Antoine did not at once bring the matter to the attention of my department. According to the superintendent's statement, it would appear that most of the condition complained of is due to the neglect of the occupants of the building over whom the health department has no jurisdiction. That is a very extraordinary state of affairs. It is very extraordinary that the occupants of any public building should be so regardless of hygienic conditions as to impair their own health as well as that of the public. I shall however, have the matter looked into and see what can be done to abate the nuisance, whether the superintendent of sanitary police in Montreal has jurisdiction or not. That would have been done long ago if we had been made aware of the facts. The rental paid for the premises is $250 per annum, but I cannot say when the lease expires. I shall look into the matter and see that the department does everything possible to remedy the condition complained of.

Mr. MONK. I do not understand how my hon. friend can pretend that the health department of the city of Montreal has no jurisdiction.

Sir WILLIAM MULOCK. I do not say so. It is Mr. Durocher who says so in one of his reports.

Mr. BRODEUR. Has this report of the sanitary superintendent's been sent to the Board of Health of Montreal ?

Mr. MONK. When a health officer in Montreal is called upon to visit a house, he makes an entry of his visit and the result, and that constitutes a report. He makes no special report, but will make one, if asked to do so, to a member of the Board of Health or any one else who wants it.

Sir WILLIAM MULOCK. For the information of my hon. friend from East Grey (Mr. Sproule) I made inquiry of the postmaster, and he says that whilst there is a

mail despatched from here at four o'clock in the afternoon on Sundays, there is also one despatched as late as 9 o'clock at night. Does my hon. friend desire a later service ?

Mr. SPROULE. I have mailed letters myself at 5 o'clock on Sunday, and they were only stamped and despatched the next day.

Sir WILLIAM MULOCK. The concluding words of Mr. Durocher's report of January 12 are :

I do not believe that the health department would be justified in interfering in such a case.

Mr. BERGERON. But the minister says that he will act in spite of that.

Sir WILLIAM MULOCK. I will do all that is reasonably possible. I am sorry it was not brought to my attention sooner.

Mr. MONK. I think the sense of that is that the Health Department would not be jusified in interfering to make the repairs itself, because there is no doubt I suppose, that the proprietor or occupant is bound by direction of the Act to obey a health officer. Perhaps the sanitary inspector considers that his rights do not authorize him to act, but I think this department has enough in these reports to insist upon the place being kept in a sanitary condition.

Sir WILLIAM MULOCK. Quite right.

Mr. SPROULE. I notice that the Postmaster General still keeps a separate item for the Yukon Territory mail service. What object is there in that ?

Sir WILLIAM MULOCK. The revenue and expenditure are given as a whole. It may be some information to give the Yukon expenditure separately. I suppose it is no harm to give that information.

Mr. SPROULE. But I was asking the reason for it.

Sir WILLIAM MULOCK. I do not know. I instructed the Deputy Postmaster General in balancing up the accounts to incorporate the revenue and expenditure as before, but I did not go into his report in detail.

Mr. FOSTER. I suppose it is a relic of the system adopted by the Postmaster General some years ago, when he kept the Yukon expenditure by itself. And, as he showed a surplus without taking account of the Yukon expenditure he claimed it as a surplus for the department. Yet, as every one knew, there was a large deficit in the total service. I am glad he has given up that arrangement, and I do not see any reason why a special heading should be made here for the Yukon. Before we leave the consideration of sums paid steamships and railways and miscellaneous expenditure, there are two or three points I wish to bring to the Postmaster General's attention. Will the Postmaster General tell us what was spent in commissions on savings bank business last year. He has taken $27,500. The rate has not been changed, I suppose?

Sir WILLIAM MULOCK. As the hon. gentleman (Mr. Foster) knows postmasters are not only paid an allowance on their revenues but also what is called forward allowance, allowance on money matters, saving's banks, postal notes and so on. They are now paid ten per cent more than they were on all salaries and allowances. For example, the man who formerly received $10 on money order business would now receive $11 ; the man who received $50 on savings banks would now receive $55. The Auditor General's Report page S—51 shows that the commissions allowed to postmasters on saving's bank business transacted was $23,604.90.

Mr. FOSTER. The minister is taking $4,000 more than was expended last year. I suppose there is a gradual increase in the business?

Sir WILLIAM MULOCK. The transactions in and out may be greater but I do not think there was a real increase in the amount on deposit at the end of the fiscal year.

Mr. FOSTER. Does this cover money order business?

Sir WILLIAM MULOCK. No, only savings bank business.

Mr. FOSTER. On what principal are the allowances for travelling expenses of inspectors based?

Sir WILLIAM MULOCK. They must furnish an itemized account of their expenses.

Mr. FOSTER. They actually give vouchers, I suppose?

Sir WILLIAM MULOCK. Yes, so far as one can in travelling.

Mr. FOSTER. I would like to be informed as to the payments for the manufacture of postage stamps, post cards, envelopes and post bands. As I remembered it, there was formerly a contract with the Burlands but a new arrangement was made. Under that new arrangement are the same rates paid as before, or are they lower rates?

Sir WILLIAM MULOCK. The rates paid now are lower than were paid to the Burlands.

Mr. FOSTER. Considerably lower?

Sir WILLIAM MULOCK. If the hon. gentleman (Mr. Foster) desires it I can have a comparison made of the figures in the Auditor General's Report for 1897 with those in the last report.

Mr. FOSTER. The hon. minister has his contracts?

Sir WILLIAM MULOCK. It is all covered by contract.

Mr. FOSTER. I do not need the information to-day, but perhaps the Postmaster General will have it prepared.

Sir WILLIAM MULOCK. I will have it sent to the hon. gentleman. To avoid mistake will he be good enough to send a memorandum of just what he wants.

Mr. FOSTER. There is a large expenditure for mail bags, locks, repairs and so on. And I see a number of people are employed in Ottawa, Toronto and other cities in making the mail bags. Does the minister call for tenders for this work, giving specifications and allowing for public tender ?

Sir WILLIAM MULOCK. A contract was let after tenders had been invited from competent persons. The present contractor is Mr. Carson, of Ottawa. The contract was let about two years ago.

Mr. FOSTER. My question was, whether public tenders were called for, either by circular or advertisement ?

Sir WILLIAM MULOCK. There was a fair and honest competition. I am told that we have adhered to the practice that was in force when we took office.

Mr. FOSTER. To come squarely to the point, does the minister simply advise certain friends of the party, whom he knows to be such, and get rates from them in a sort of private competition ?

Sir WILLIAM MULOCK. No.

Mr. FOSTER. Or is it a competition in which the public generally has a chance to give figures ?

Sir WILLIAM MULOCK. I am informed by the superintendent of stores branch that he adheres to the practice that has been followed in the department for many years, of sending out notices to different parties asking them on or before a certain date to send in written tenders for the work. These tenders come in registered, they are all opened at the same time, and contracts are awarded strictly according to the tenders.

Mr. FOSTER. My hon. friend still does not answer as to the selection of persons who receive these kindly invitations to send in estimates. How are they selected ?

Sir WILLIAM MULOCK. Well, the hon. gentleman's colleagues left us a list of names, to which we have added, of men in the trade who are competent to do the work. They are not all of the same political faith—if that is what my hon. friend is driving at. In fact, the successful contractor on the present occasion, Mr. Carson, I understand is not a supporter of this administration.

Mr. FOSTER. The information I have, then, is that there is no distinction made, that the selection is made independently of the political leanings of the parties, who are supposed to be competent manufacturers in that line, and that consequently these invitations are not confined to one class or one party.

Sir WILLIAM MULOCK. I thought I had made it quite plain. The superintendent of the branch informs me that there was a list of persons to whom the late government was in the habit of sending invitations for tenders. We have added some names to that list, but we have not created a new list, and tenders are invited from those whose names are on the old list, as well as from those who have been added. He reminds me that some of the late contractors, Borbridge & Co., are on that list. They are invited to tender, and have been successful more than once. They were not the successful tenderers the last time, they were third on the list; but when they were first they got the contract.

Mr. FOSTER. The contract goes to the lowest tenderer, other things being equal.

Sir WILLIAM MULOCK. Yes.

Mr. FOSTER. With respect to the uniforms, are they all got at one establishment, or is a contract price made, and then are parties asked whether they will manufacture at that price ? I notice that, whether they are made in Toronto, or Ottawa, or somewhere else, the price seems to be the same all the way through, so far as I can judge. If separate tenders are called for in each city, it seems to me a little strange that the prices are exactly the same.

Sir WILLIAM MULOCK. The superintendent of stores branch informs me that at one time the department invited tenders for the supply of uniforms complete, the contractors furnishing the cloth. But there was a weak spot in that practice, we got inferior cloth, and we would not discover it perhaps until the goods were delivered, when it was too late to remedy it. We had to have different suits of clothing at different seasons of the year, and a few months before a change of season, supplies were required by the contract to be delivered to be used when that season arrived. But there was so much difficulty in getting uniform styles of cloth, and good cloth which complied with the samples, that at last the department decided to purchase the cloth itself, which had not been the practice. I made the mistake myself of inviting tenders for goods made up, the contractor furnishing the cloth, and our attempts in that direction were very unsatisfactory. So the department had to revert to the former practice of purchasing the cloth itself and issuing it to the contractors to be made up. The department also supplies small things called trimmings, monograms and numbers. The department knows what is the reasonable rate to allow for making up a garment, and

that rate is made known to the different makers. They are communicated with and informed that the department is prepared to allow such and such a rate for the manufacture of such and such garments. The superintendent informs me that he communicated with a number of manufacturers in different cities to see what rate they would charge for making up different garments. That gentleman has had thirty-five years' experience, and is able to form a good and reliable opinion. He thus established for the department a scale of prices for the manufacture of the respective garments, and that is the scale on which they are paid.

Mr. FOSTER. Then there is no competition as to the price for making ?

Sir WILLIAM MULOCK. We do not call for their manufacture at a lower price than the minimum price that we have made. so there is no competition in the matter of making up.

Mr. FOSTER. Well, by allowing a fair price we are in a position to criticise the manufacturers and to see that the goods are properly made up.

Sir WILLIAM MULOCK. A reasonable price is offered, and every garment has to pass examination.

Mr. FOSTER. Every garment will have to pass examination even if they had a competitive price. I do not suppose the slowest department would accept the work, even if the contractor was making the garment at fifty cents less than his competitor unless he filled the specifications. This then takes away all competition as far as the making up is concerned. I am not saying that the price may not be a fair price for good work. It very probably is. After the long experience that has been had, it would probably be the fairest price consistent with quality and workmanship that you could get. Well, then, in reference to the purchase of the original cloths—is that advertised for, or is it a matter of public tender ?

Sir WILLIAM MULOCK. Reputable mills are asked to tender.

Mr. BERGERON. Which mills ?

Sir WILLIAM MULOCK. Good manufacturers of cloth.

Mr. BERGERON. All Canadian ?

Sir WILLIAM MULOCK. All Canadian, all wool and a yard wide.

Mr. BERGERON. If I understand well, the cloth is furnished by the department to the different makers in different parts of the country. All that the government has to pay for is the cutting and making of the uniforms. Could the hon. gentleman say how much each of these uniforms costs ?

Sir WILLIAM MULOCK. The manufacturers of uniforms purchase the material from the department. We get it from the mills, and we supply it to the men who make up the goods. They have to pay us the cost price.

Mr. BERGERON. The cloth is inspected, of course, when it leaves here ?

Sir WILLIAM MULOCK. Every yard of the cloth is inspected by the men in the department. To prevent substitution of any other cloth, every yard is stamped with the stamp of the department inside in a practically indelible way, so that the department can identify its own cloth after it is manufactured and after the goods come back.

Mr. BERGERON. Who has given the idea of the model of the letter-carriers' uniforms and caps ? I think the letter-carriers' uniform is the worst I have ever seen in my life.

Mr. FOSTER. I imagine a prize was offered for it.

Sir WILLIAM MULOCK. I am told that the design has been hallowed by antiquity.

Mr. BERGERON. Could it not be changed ?

Sir WILLIAM MULOCK. Mr. Smith tells me that the question is under consideration. I would be very glad indeed if my hon. friend would furnish us with some suggestions.

Mr. BERGERON. The cap, also, I suppose, is a piece of antiquity ?

Sir WILLIAM MULOCK. I believe there have been some improvements in the summer cap.

Mr. BERGERON. There might be an invitation issued for competitive designs.

Mr. FOSTER. Is the same principle carried out in reference to the duck for the bags, or are the contracts made for the material and making up as well ?

Sir WILLIAM MULOCK. In the case of the mail bags, the contractors supply duck and all materials and furnish the bags complete.

Mr. FOSTER. Would not my hon. friend think that he would probably get better bags and have a better return for his money if he took the same course in respect to those that he does in reference to the uniforms for the men, or are the standards more easily distinguished in duck ?

Sir WILLIAM MULOCK. The superintendent says there is not the same necessity for adopting the precautions we take in regard to cloth for the uniforms in regard to the supply of duck, because the standards in duck are clear, precise and easily distinguished, so that there is not the same opportunity for the duck not being in accordance with the specifications.

Mr. FOSTER. I dare say that is so. The only information I would like to have, if the hon. minister will make a note of it, is the names of the parties from whom tenders were asked for the making of the bags and their tendered figures.

Sir WILLIAM MULOCK. Do you want the amounts and all ?

Mr. FOSTER. Yes.

Sir WILLIAM MULOCK. I will give all that information.

Mr. FOSTER. Then I see here that there is an item of $4,342 for detective service. In what way is detective service used by the hon. Postmaster General ?

Mr. INGRAM. Perhaps, before you leave that item of clothing, I may be allowed to ask the hon. minister a question in reference to the locks for mail bags. Do you anticipate making any change in the style of lock used on the mail bags, or do you propose to continue the use of the old one ?

Sir WILLIAM MULOCK. Would my hon. friend (Mr. Ingram) allow me to answer the question my hon. friend from North Toronto refers to ? He asks me what is covered by the item of $4,342 for detective service.

Mr. FOSTER. What is the general line of service ?

Sir WILLIAM MULOCK. Last year, or a year or so ago, we had a very serious robbery of the mails in the Northwest Territories, and we spared no expense to bring the culprits to justice. We succeeded, after a long investigation, in tracing guilt to a mail clerk and to a member of the legal profession, and put them on trial. They were convicted. One of them is undergoing a sentence of three years, and the other, I think, of seven years.

Mr. FOSTER. That is the Calgary case ?

Sir WILLIAM MULOCK. Yes, or the Regina case. Some of the money was recovered, but we did not spare expense in order to detect the guilty parties. I think there is another person accused of complicity or guilty knowledge at present in confinement awaiting trial. I think that about absorbs that item.

Mr. FOSTER. The hon. Minister of Justice is not concealing the other, I hope.

Mr. FITZPATRICK. No ; he came back, but I do not know what became of him.

Mr. FOSTER. Do you use the Dominion officials as detectives ?

Sir WILLIAM MULOCK. Altogether.

Mr. FITZPATRICK. The case was entirely dealt with by the Dominion officials.

Mr. INGRAM. Who has the contract for furnishing the locks for the mail sacks and is that contract being continued ?

Sir WILLIAM MULOCK. The lock on the mail bag is a patent lock. The patent was at one time owned by Mr. Low, and it was with him that the department had the contract for their supply. That was the condition of affairs prior to our coming into office, but some seven years ago Mr. Low sold out his patent rights and business to a Mr. Sheppard, who has carried on the manufacture ever since.

Mr. INGRAM. Has the department not been consulted with respect to a patent lock that is much quicker, that will close ten or twelve bags in the time that it takes to close one of the old ?

Sir WILLIAM MULOCK. The superintendent says that we have had no notice of any complaints that the lock is too slow in fastening or in any way unsatisfactory or that there was any new and quicker working lock. He says that this lock has been in use for ten years and has had a good trial.

Mr. INGRAM. I think the hon. gentleman will find some correspondence in his department with respect to this improved lock which I understand is now being used quite largely in the United States. Time is a very important factor in the closing of mail bags where you have a large number to deal with.

Sir WILLIAM MULOCK. I am informed by the superintendent that on several occasions persons from the United States, some of them connected with the United States post office and some not, have come to the department at Ottawa showing what they considered were improved locks. They have been shown our locks, and after examining them have invariably gone away saying that we had a better lock than theirs and that they had nothing to teach us.

Mr. FOSTER. Where does the gentleman get his boots, I mean the boots for his letter-carriers ?

Sir WILLIAM MULOCK. The same system that has been in force for years is in force to-day, the old price and the old system.

Mr. FOSTER. What is that ?

Sir WILLIAM MULOCK. The department has a standard quality and fixes a price of so much a pair for boots of that quality. The standard price is $4.50.

Mr. FOSTER. I find that you have been particularly good to the Halifax people because the boots for letter-carriers in Halifax are put down at $7.50 a pair. Are they a long boot or different from the others ? There is a great disparity in price there. When you come to Ottawa, which must have just as strenuous a climate as that of Halifax, though perhaps there is not as much fog, the boots cost you $4.50 and there are

some cities where they do not appear to be any.

Sir WILLIAM MULOCK. The $7.50 must be a misprint or a mistake in multiplication.

Mr. FOSTER. The multiplication is all right, but I see the $7.50 is a mistake, because the multiplication carries out about $4.50. Are all these boots made in the same place ?

Sir WILLIAM MULOCK. They are made in different cities.

Mr. FOSTER. I find that in St. John there are no bootmakers ; the boots for that city are made by W. M. Watson of Aurora. Where is Aurora ?

Sir WILLIAM MULOCK. In North York. The system is to have the boots to be used in one place made by bootmakers in another place ; for example, the boots for Halifax will be made in St. John and elsewhere. They say that that practice was adopted to prevent the carriers dickering with the contractors, perhaps getting them to have boots of a little different appearance and different material, and in order to preserve the standard for which we are paying, they are made in that way. The letter-carriers are measured and the boots are issued to them. The boots are all sent here to Ottawa and then re-issued.

Mr. FOSTER. And there is no competition in the price for the making of the boots ?

Sir WILLIAM MULOCK. No, $4.50 is the standard price.

Mr. DANIEL. Who has the contract in St. John for making the letter-carriers' boots ?

Sir WILLIAM MULOCK. E. Walsh is the bootmaker in St. John who makes for us.

Mr. FOSTER. He makes them for Aurora, does he ?

Sir WILLIAM MULOCK. There are no letter-carriers in Aurora.

Mr. FOSTER. There the minister is neglecting his privileges ; he should have letter-carriers there and have their boots made in St. John. There is an item here with reference to a stamper :

The International Postal Supply Company, New York, to rent of two stamp cancelling machines, 12 months to June 30, 1904, $1,000.

Does the minister use these in his large post offices ?

Sir WILLIAM MULOCK. Yes.

Mr. FOSTER. And does it on the rental system ?

Sir WILLIAM MULOCK. Yes.

Mr. FOSTER. What is the cost ?

Sir WILLIAM MULOCK. We have machines of two classes, one is worked by electrical power and the other by hand. The patent is owned by a United States firm, the International Supply Company, but it was Mr. Dalton of that firm who interviewed me upon that subject. We formerly had perhaps a dozen machines which we rented. Some of them were electrical stamping machines, but they were very slow and were always breaking down. This type of machine is certainly the best known in the post office world to-day, and it was impossible to buy them. I tried the best I could to buy them outright, but it was not possible to do so.

Mr. FOSTER. Is there no price for the sale of the machine ?

Sir WILLIAM MULOCK. There is no price ; they would not sell them, and it would not pay any government to go to work to make them. If my hon. friend would drop into the city post office of Toronto or that of Ottawa, he would see a machine at work, and the rapidity with which it stamps will at once show him that no matter what rental we are paying, it is a great economy of time and money.

Mr. FOSTER. In Toronto, I notice that the rent is $500 and $200. I suppose they are on a smaller scale ?

Sir WILLIAM MULOCK. That is $500 for each power machine and $200 for each hand machine.

Mr. FOSTER. One other question. In most of the city post offices a large number of labourers appear to be employed at from $1 to $1.50 per day. Outside of the packers and sorters, what do these labourers generally do ?

Sir WILLIAM MULOCK. These would probably be persons on the way to entering the service.

Mr. FOSTER. Nine thousand dollars has been paid for labourers in Montreal.

Sir WILLIAM MULOCK. They may gradually be promoted into the ranks of the packers and sorters and carriers. At Christmas-time we have to employ large numbers —at Toronto perhaps 30 or 40 ; and as soon as the pressure is over, we lay them off.

Mr. FOSTER. I suppose the minister does not remember the number employed about October and November in the Montreal post office ?

Sir WILLIAM MULOCK. I know what my hon. friend has in mind, but I do not think there was any change.

Mr. SPROULE. In regard to the clothing for letter-carriers, do I understand that the cloth is furnished by the government, and the charge is only for making the clothing ?

Sir WILLIAM MULOCK. We issue so many yards of cloth to the contractor, and he has to make the garments to fit the different persons who wear them; and his price to us will be the cost of the work and the cost of the material.

Mr. SPROULE. In regard to the supply of mail bags and repairs, I understood the minister to say that there was no competition in that work. What method has been adopted to determine who should get these contracts ?

Sir WILLIAM MULOCK. There was a list of persons who made the mail bags when I took office, and I added to the list. We invited tenders from these persons, and the tenders are received in a very strict and regular way by the superintendent. They come by registered letter to him, and at the time named he opens them, figures them out, and makes a report to the deputy, and the contract is awarded to the lowest tenderer.

Mr. SPROULE. Are there only a few parties known to the government who are invited to tender, or is the invitation extended to the general public ?

Sir WILLIAM MULOCK. Specifications are prepared and sent to these different persons, with an intimation of the average quantity that may be required.

Mr. SPROULE. What I want to ascertain is how you determine to whom these will be sent; because if the matter were entirely in the hands of the minister, he could select a few of his own friends and ask them to tender, but the outside public would not have any opportunity.

Sir WILLIAM MULOCK. The system we are following is the system that was in force when I took office. There were a number of reputable contractors known to the department, and we added to the list, and the superintendent sent invitations to the persons named on the list. One of the successful tenderers under our administration is Mr. Borbridge, who had been a contractor under the previous government. The present contractor in Toronto is one of my hon. friend's friends.

Mr. SPROULE. The hon. gentleman says he extended the list, and I have no doubt he did, and he has been remarkably fortunate in finding good men in his own constituency. I find that one William Willis, of Aurora, was paid $3,217.55 for making duck bags, &c. I also find that Thomas Fardy, of Newmarket, for repairing cotton duck bags and jute newspaper sacks, was paid $600. Then, C. H. Hall, of King, which is in the same riding, was paid $2,024.75 for repairing cotton duck bags and linen newspaper sacks. Then, I see that Wm. Watson, of Aurora, was paid $307 for making letter-carriers' boots. So that the Postmaster General has been pretty fortunate in finding just the right kind of men in his own constituency to do this work. I do not see many constituencies represented by members of the opposition favoured in this way.

Sir WILLIAM MULOCK. My hon. friend has never asked me to give any of this work to his own friends. There is no telling what I might do if appealed to. These repairs are made on a regular system. You cannot measure the value of the work. The department allows a fixed sum out of which the contractors buy the material and make the repairs. They have to take the lean with the fat, and get the same price per bag whether it be seriously damaged or not. They are paid 25 cents a bag for supplying the material and doing the work and they are held to a minimum rate of wages to their employees.

Mr. SPROULE. I was not complaining about the cost of repairs, but, I was pointing out the large proportion of friends of the minster in his own constituency who are given this work and to whom a large sum is paid every year for this purpose. I believe that others quite as capable would do the work just as well and perhaps cheaper if they were allowed an opportunity to compete.

Sir WILLIAM MULOCK. There are more on the list than those in my constituency.

Mr. SPROULE. I know that, but I am drawing attention to the somewhat large number of contracts given to the hon. gentleman's constituents.

Sir WILLIAM MULOCK. It has always been the practice to let the work in that way.

Mr. FOSTER. I see that Chas. Miller was paid $3,713 and Robert Miller, $3,309, being amounts deposited by them in the Post Office Saving's Bank of St. Scholastique and fraudulently was drawn by the assistant postmaster.

Sir WILLIAM MULOCK. That was discussed last year.

Mr. FOSTER. Then I shall not refer to it again. With reference to the hon. gentleman's officials in the Yukon Territory, does he give them a living allowance in addition to their salary?

Sir WILLIAM MULOCK. No, only a salary, but their pay is greater than it would be in old Canada.

Mr. FOSTER. The Minister of Justice might take a leaf out of the hon. gentleman's book and give a salary without a separate living allowance.

Mr. FITZPATRICK. It would be well for the hon. gentleman to ascertain the dif-

ference in salaries. Our salaries are much smaller in proportion.

Mr. FOSTER. The salaries in the Post Office Department in the Yukon do not seem to be so inordinate. The postmaster of Dawson city gets $5,000.

Mr. FITZPATRICK. He would not get more than $2,000 in an eastern city.

Mr. FOSTER. What I am objecting to, is keeping up the distinction between living allowance and salary. I think a fair salary should be given and the living allowance done away with.

Mr. FITZPATRICK. There is a great deal of force in the way my hon. friend puts the case but how would he deal with the judges?

Mr. FOSTER. They are always hard to deal with.

Mr. FITZPATRICK. Would you pay a judge in the Yukon double the salary you pay a judge in the Territories, although each is administering justice under the same conditions except as regards living expenses?

Mr. FOSTER. That same line of argument would apply to everybody else. I should imagine that a judge after exercising his office two or three years in the Yukon, would not care to leave that delightful region and sacrifice his living allowance. But even if you made the salary larger and dispensed with the allowance, if a judge wished to be removed east to a less rigorous clime, he would in that case have to accept the smaller salary prevailing in the district to which he desired to be moved.

Mr. BERGERON. I see that my hon. friend gives a larger bonus to some letter-carriers than to others. Why this discrepancy?

Sir WILLIAM MULOCK. The bonus is the same to all, and is at the rate of $20 per annum. But the letter-carriers come in at different times. Suppose a letter-carrier were appointed in November, he would only get his proportion of the $20 for that year. The bonus is estimated for the calendar year.

Mr. BERGERON. There must be many new letter-carriers, because I see a good deal of difference in the bonuses paid.

Sir WILLIAM MULOCK. They were employed before, but under the old Act to which I referred yesterday. They were given the privilege of coming in under the new Act, and so the bonus applies to them. A man, let us say, decides to come in under the new Act. He will be paid from that time forward on a different principle, and, on December 31, he will be given the part of the bonus of $20 proportionate to his length of service under the new Act to the end of the year. After that, at the end of every year he will be paid the bonus of $20 if his conduct during the year has been satisfactory.

Mr. BERGERON. Irrespective of the amount of his salary ?

Sir WILLIAM MULOCK. Yes.

Mr. BERGERON. But, on this page there does not seem to be three who are paid the same amount.

Sir WILLIAM MULOCK. The amount paid would depend upon the length of time from the date of the letter-carrier coming under the new Act to the end of the year.

Mr. BERGERON. Some receive nothing at all ?

Sir WILLIAM MULOCK. They are probably not under the new system.

Mr. BERGERON. Is it necessarily that, or does the payment depend at all upon good conduct ?

Sir WILLIAM MULOCK. If a man does not deserve it, he does not get it. If he has been guilty of misconduct sufficient in the opinion of his superior officer to disentitle him to the bonus, it would not be paid to him.

Mr. BERGERON. I suppose that would be decided by the postmaster or deputy postmaster ?

Sir WILLIAM MULOCK. The postmaster is responsible.

Mr. BERGERON. It is at his discretion? It does not come to the office here ?

Sir WILLIAM MULOCK. We have nothing to do with it. The men are reported on by the officers where they work. It is perfectly fair ; there is no politics in it and no interference.

Mr. BERGERON. I suppose not. I merely wanted to know the principle on which it was done. Now, on what principle does the Postmaster General proceed in determining what places shall have letter-carriers ?

Sir WILLIAM MULOCK. There is no rule. When it seems necessary in the public interest, and a wise thing to do then the system is established. Not many cities have been brought under the system. I think I have only brought one under it—Brantford.

Mr. BERGERON. What is the population of Brantford ?

Sir WILLIAM MULOCK. I think the revenue of Brantford post office was over $36,000.

Mr. BERGERON. Would the revenue be one reason for establishing the letter-carrier system ?

Sir WILLIAM MULOCK. It would be a circumstance to be considered.

Mr. BERGERON. And the population too, I suppose ?

Sir WILLIAM MULOCK. Yes.

Mr. BERGERON. What is the population of Brantford ?

Sir WILLIAM MULOCK. I could not say.

Mr. SAM HUGHES. The hon. member for Brantford city (Mr. Cockshutt) would be able to inform the committee.

Mr. COCKSHUTT. The population of Brantford city is about 18,000. The population of the parliamentary division is different, because Brantford takes in also a part of the country district with a population of about 5,000.

Mr. BERGERON. In what cities has the letter-carrier system been established ?

Sir WILLIAM MULOCK. Halifax, St. John, Quebec, Montreal, Ottawa, Kingston, Toronto, Hamilton, Brantford, London, Winnipeg, Vancouver and Victoria.

Mr. FOSTER. There is some talk of a pneumatic tube system for certain cities. Will the Postmaster General please give us an idea of what is contemplated, and what the cost and advantages are likely to be ?

Sir WILLIAM MULOCK. A contract has been let for the manfacture of tubes for a pneumatic system for Toronto and Montreal. These are the only cities for which there has been any parliamentary provision. The money was voted last session, and the matter is in charge of the Public Works Department.

Mr. FOSTER. What will be the extent of the system in these two cities.

Sir WILLIAM MULOCK. The scheme for Toronto is to have tubes from the post office to be established wherever the Union station is, to the main post office at the head of Toronto Street, and also to the sub-office at the subway on Queen Street West. In Montreal it is proposed to acquire a site—it may have been acquired by this time—to erect a station post office near Bonaventure station, and to connect that office by pneumatic tube with the main post office. That is the extent of the work for which there is a parliamentary appropriation.

Mr. FOSTER. These tubes will be used, I suppose, for the transmission of the incoming mail matter to the central post office and of the collections at the central post office to the railway ?

Sir WILLIAM MULOCK. Yes.

Mr. FOSTER. Is it intended that the whole service shall be done by the tube ?

Sir WILLIAM MULOCK. We shall utilize it as much as possible. I do not know whether or not it will be equal to the demands upon it.

Mr. BERGERON. Has it been decided to build a branch post office in the St. James division, Montreal ? Before the session opened I saw a correspondence about it in the papers, saying that an application had been made, and we were told the matter was being taken into serious consideration.

Sir WILLIAM MULOCK. That is a matter for the Public Works Department.

Mr. BERGERON. The construction of it, but the request for it must come from the hon. gentleman. If the hon. gentleman says he wants a branch here, it will be built.

Sir WILLIAM MULOCK. I am not able to give my hon. friend a scheme for the erection of public buildings in Montreal in connection with the post office. I know it has been the subject of investigation and inquiry, and the officials of the department have furnished to the Minister of Public Works a requisition, probably, in regard to the matter. But I do not pretend to give any details.

Mr. BERGERON. Has my hon. friend decided to recommend the establishment of a branch post office in St. James division, the eastern part of the city ?

Sir WILLIAM MULOCK. I am not sufficiently familiar with the geography of Montreal, with the names of the wards and streets, to be able to speak upon that question with any degree of satisfaction to myself. I do remember that a decision was come to, to recommend the acquisition of a location for an office near the station. But I cannot say about these other points.

Mr. BERGERON. Perhaps I may be able to help my hon. friend's memory by reminding him of the fact that the member for St. James division, Montreal (Mr. Gervais), some time ago made a demand upon the hon. gentleman for the esablishment of a branch post office in the eastern part of Montreal, a great commercial division. If my hon. friend has not decided to recommend it, I do not know how the Minister of Public Works could ask parliament for an appropriation for that purpose. The Minister of Public Works will not ask any money from parliament to build a branch post office in that part of the city unless the hon. gentleman asks for it.

Sir WILLIAM MULOCK. If the hon. gentleman will look into the estimates he will see that there was an appropriation. Whatever was in the estimates was put there in accordance with the views of the department. I have not got the estimates of last year.

Mr. BERGERON. Well, the Minister of Public Works would not build a post office

anywhere without having first been advised by the Postmaster General.

Sir WILLIAM MULOCK. I presume not.

Mr. BERGERON. Then the hon. gentleman must remember whether he has advised the erection of a branch in St. James division.

Sir WILLIAM MULOCK. If I had advised it, I would not hesitate to tell my hon. friend exactly. I am very anxious to improve the service at Montreal; it has been the subject of investigation and inquiry. I think the views of the department have been presented to the Minister of Public Works.

Mr. BERGERON. Does my hon. friend remember receiving a letter about it from the member for St. James division? That might help him to remember.

Sir WILLIAM MULOCK. Do not ask me to talk about letters that I have not here.

Mr. BERGERON. Could not the hon. gentleman find out whether he did get a letter from the member for St. James division?

Sir WILLIAM MULOCK. If I had, I might not think it proper to divulge the letter.

Mr. BERGERON. It was published in the papers.

Sir WILLIAM MULOCK. Then my hon. friend has seen it?

Mr. BERGERON. Certainly; and I am surprised the Postmaster General has not seen it.

Sir WILLIAM MULOCK. If he sent me a letter, I suppose I received it.

Mr. BERGERON. Now, we are coming to the point. I want to know from my hon. friend if he has decided to recommend the building of a branch post office in that part of Montreal. Since he says himself that in the estimates of the Minister of Public Works there will be an amount of money—

Sir WILLIAM MULOCK. I did not speak of the future; I said there had been a provision in the estimates of last session for giving additional facilities in Montreal.

Mr. COCKSHUTT. I would like to ask the hon. Postmaster General if he intends to place an amount in the estimates for improving the service in Brantford? Brantford is receiving at present a little over $5,000 per annum, whereas Kingston, giving a revenue about the same as Brantford, is receiving over $18,000 per annum. We think the facilities there are not what they should be, that the building is inadequate, and the whole service needs reorganization. The board of trade has pressed for that for several years, and I think they have communicated with the minister with reference to it. We would esteem it an act of justice if the minister would place an additional amount in the estimates for Brantford, making a more liberal allowance to the men employed there all round. I think they are underpaid. The letter-carriers are fairly well paid, I do not think they are complaining; but the general administration of the office is not very satisfactory to the business men. They pressed that point upon the minister last year, and I think it was investigated, but very little has been done. There has been a coat of paint applied to the outside of the building and some slight reorganization inside. But the building is not adequate for the purposes of the Post Office, the Inland Revenue and the Customs Departments, for which it is now used. We think it is not in keeping with the position of Brantford commercially. It may have been adequate twenty-five years ago, when the revenue derived from the post office was about one-third what it is to-day. I would like to ask the minister if anything is going to be done about it?

Sir WILLIAM MULOCK. With regard to the first part of my hon. friend's question as to whether there is to be an additional building, I cannot anticipate the estimates that are to be brought down. As to whether there is sufficient money expended upon the staff, or whether the service itself could be improved, those are departmental matters with which I am bound to deal. We have what is called a superintendent of city post offices, whose duty it is to keep himself advised of the conditions of city post offices and to report. If that officer should report that it was necessary to make any changes in the management and the business of the Brantford post office, the department would be very much influenced by his advice, and would endeavour to give effect to it. I am not aware that he has made any report or recommendation that has not been attended to.

Mr. COCKSHUTT. There is this important point, that while Brantford receives an expenditure of only $5,147, Kingston receives $18,978, and the revenue of the two offices is about the same; if there is any difference it is in favour of Brantford. We think the expenditure is altogether out of proportion to the revenue which the office returns to the department. Either we are getting a great deal too little, or Kingston is getting too much.

Sir WILLIAM MULOCK. I think my hon. friend has made a mistake in his figures when he says that Brantford is only receiving $5,147. That sum represents only the salaries of the letter-carriers. There is paid in salaries to the staff $6,829; altogether over $12,000 a year is paid to the Brantford staff, inside and outside.

Mr. FOSTER. If my hon. friend beside me is through with that other business, I want to ask the hon. Postmaster General a question on another point. That is in refer-

ence to rural delivery. Has the hon. minister come to any conclusion in reference to the introduction of that system ? It strikes me that at one time he had the idea that rural delivery might be experimentally tried in some sections of Canada. Does he hold that opinion now, or has he any intention of making any experiment in that way ?

Sir WILLIAM MULOCK. I do not think I ever expressed myself in favour of even making the experiment.

Mr. FOSTER. Yes.

Sir WILLIAM MULOCK. I expressed myself in favour of properly and thoroughly investigating the system, its merits and demerits, and I have come to the conclusion that it is altogether premature to talk of rural delivery in Canada.

Mr. FOSTER. The reason being the sparseness of the population ?

Sir WILLIAM MULOCK. The conditions of Canada would not warrant it. It would involve this country in millions upon millions of dollars of expense. I think the prevailing opinion amongst the people of the United States is that they have established a system that in the course of time will be a burden upon them as great as the pension system, and I know that many of them would gladly recede from the system if they could, but it is too late. The United States congress four or five years ago voted $3,000,000 a year for this system. The vote went up to $6,000,000, then to $12,000,000, and now it is $20,000,000 a year, and they have not got beyond the fringe of the service yet.

Mr. FOSTER. This, I believe, is a point the hon. gentleman has looked into. To what extent is it applied in the United States ? Is it applied to certain portions of the country ?

Sir WILLIAM MULOCK. They have certain regulations. They pretend to confine it to places where the roads are good and where there is a certain number of people per mile, but those who are living in less favoured places are not content with these regulations, and the regulations are not strong enough to bind the public and politicians. So, they are face to face with the question now as to whether they will have to apply it everywhere throughout the whole United States.

Mr. FOSTER. I think the hon. minister is wise in his conclusion that we are not yet quite in a position in Canada to adopt that system. I quite agree with him in that respect. Another point is as to the increase of rates of certain classes of mail matter, since last session, or was it before last session that this increase took place ? It is greatly complained of, and it is said that it has made burdensome the transmission of certain articles, take books, for instance, commercial documents, and the like of that; that it has made it almost impossible to transmit them by mail at any kind of reasonable cost. Sometimes the cost of the postage is equivalent to the cost of the book itself that is sent. I think the hon. minister has power under the law to make these changes to a certain extent in the revenues that he collects, or in the taxes he puts upon certain articles. I would like to know what were the increases made and upon what classes of material and whether the hon. minister is satisfied that he did a wise thing, and did not overburden certain classes of transmitted articles.

Sir WILLIAM MULOCK. There are a number of different rates chargeable to different kinds of mail matter. My hon. friend will not perhaps ask me to define the different articles, but I will just by way of illustration say that there would be one rate for a lithograph and another rate for a printed picture, and there were fine distinctions as to whether a bit of mail matter came under one rate or another. It was found perfectly impracticable to apply such fine discriminations in the practical working of a post office. Mail matter is brought in at a late hour and the staff cannot open the packages to see that they are properly prepaid. They had to have a practical scheme, and accordingly we endeavoured to reduce the classification. There is the letter rate, the newspaper rate, the parcel post rate, and the rate on miscellaneous articles.

Mr. FOSTER. That is one of the classes on which the raise took place.

Sir WILLIAM MULOCK. My hon. friend is not correct in describing it as a raise. This was discussed ad nauseam last session. When the Deputy Postmaster General was here last session, I remember asking him the question, and he told me that whilst they had grouped all of the miscellaneous articles into one class, it did not amount to a raise generally, although you might pick out an isolated item and say that there was a raise in respect to that one item, for example, as regards books. The rate on books in Canada is as low as it is in Great Britain, or the United States, or, I fancy, anywhere in the world.

Mr. BERGERON. In his last answer, the hon. Postmaster General spoke about a sum of money that had been voted last session for a site in Montreal. I find in the estimates the following items :

Montreal post office—improvements, $25,000.
Montreal post office—installation of pneumatic tube system for post office purposes, $55,000.
Montreal new postal station—site and building, $75,000.

Will my hon. friend tell me in what part of Montreal this site is, or where this post office will be situated ?

Sir WILLIAM MULOCK. I think that is intended for the postal station, in the vicinity of Bonaventure station.

Mr. BERGERON. And the amount of $55,000 for the pneumatic tube system is entirely for that system and not for a building ? They are two different things ?

Sir WILLIAM MULOCK. Yes.

Mr. BERGERON. And the site of this new postal station will be near the Bonaventure station, of which my hon. friend spoke a few moments ago. Do I understand that ?

Sir WILLIAM MULOCK. I have said so, so many times that I did not think it necessary to repeat it. That item is to supply a postal station and plant in the vicinity of the railway station.

Mr. BERGERON. So it has nothing at all to do with any post office branch in St. James division or any other part of the city of Montreal ?

Mr. SAM. HUGHES. Is the hon. Postmaster General taking steps to have the post offices in the Northwest Territories opened up as settlement goes on from place to place ?

Sir WILLIAM MULOCK. Yes, I think so.

Indians, Ontario and Quebec—relief, medical attendance and medicines, Quebec, $5,600.

Mr. FOSTER. Before going into that, I may say that in looking over the Auditor General's Report I find that the First Minister in some way fell into error in reference to the promotion of Mr. Bray to a chief clerkship. The reason given for the promotion was that when a deserving clerk in a class below had come to the maximum of his class and was a good clerk and there was no vacancy it was then legitimate to create a clerkship in the class above and translate him by promotion to that class. The right hon. gentleman's whole contention was on the ground that Mr. Bray had several years, and there are also two clerks but I find from the report that he had not reached the maximum, that he got last year only $1,650 and that the only person who has reached the maximum in that class was Mr. McGirr, who is at his maximum and has been at his maximum for several years, and there are also two clerks who are as high as or higher than Mr. Bray in point of salary, Mr. Dalton and Mr. Orr. This requires some explanation.

Sir WILFRID LAURIER. I shall give the information to my hon. friend at the next sitting.

Mr. FOSTER. Coming to the item, is that relief administered on the same principle as when I was in the House before?

Sir WILFRID LAURIER. I am not aware that there is any change at all; it is given for actual medicines and for medical services. I shall read the explanation.

The Indians in the province of Quebec have with a few exceptions no funds of their own, and it has always been found necessary to provide funds for relief of destitute and for seed and medical attendance. Assistance in the way of relief is only extended to such Indians as are shown to be in actual need of the necessaries of life through sickness or some other unavoidable cause. Seed is only supplied to such Indians as have land ready for cultivation and who are unable to procure seed themselves, and it is supplied as near seeding time as possible. The cost of medical attendance is gradually increasing. It seems that not only in this province but in all, the cost of this service increases with the advance of civilization.

The amount provided for the year 1903-4 was $5,600.

The expenditure was $4,153.17.

Annual salaries are paid from this grant to the undermentioned physicians :

Dr. Jules Constantine, Pointe Bleue	$500 00
J. A. Claveau, M.D., Chicoutimi	200 00
J. A. Pelletier, M.D., St. Urbain	50 00
W. Ouimet, M.D., Oka	100 00
F. W. McCartney, M.D., Gaspe	80 00
E. Allard, M.D., Escoumains	200 00
L. G. Pinault, M.D., Restigouche	200 00

Other physicians are paid according to the attendance given from time to time. A portion of the cost of maintenance of Indian patients in the provincial lunatic asylums in Quebec is also paid from this vote.

Mr. FOSTER. How are the supplies that are given out in small quantities to the Indians purchased ?

Sir WILFRID LAURIER. Through the agents on the reserves.

Mr. FOSTER. There seems to be a distinction between medical officers and the attendance of doctors. Have you some medical officers entirely devoted to the work of the Indians?

Sir WILFRID LAURIER. I understand that on some of the reserves there are regularly attending physicians at yearly salaries and the others are simply called in for attendance and paid by fees. They send in their bills for services rendered and are paid.

Indians, Ontario—relief, medical attendance and medicine, $3,300.

Sir WILFRID LAURIER. The attendance in Ontario is of very much the same character. I shall give it in detail as I have it here.

This grant is intended for the assistance of sick and destitute Indians belonging to bands in the province of Ontario which have no funds in the hands of the department. The fixed charges against this grant are :—

Dr. J. W. McIntosh, Manitoulin Islands and North Shore	$184 00
(The balance of Dr. McIntosh's salary of $1,000 is paid by the band.)	
Dr. J. H. Arthur, Spanish River	75 00
(The balance of Dr. Arthur's salary of $600 is paid by the band.)	

Dr. F. H. Mitchell, Oneida Reserve.. ..$300 00
Dr. J. F. James, Munsee Reserve.. .. .. 60 00
Dr. J. W. Merrill, Pogomasing and White River.. .. .. 100 00
Dr. E. Bedard, Mattawa.. .. .. 200 00
Dr. Channonhouse, Golden Lake.. .. .. 200 00
Dr. J. M. Grady, Fort William.. .. .. .. 50 00
(The band pays $75 additional.)

I observe from the report that each year the demand for relief is increasing in the unorganized districts of the province.

Mr. BERGERON. Is it too late to inquire the name of the physician at the Caughnawaga reserve?

Sir WILFRID LAURIER. There is no regular physician for this reserve. The Indians pay their own fees for the services rendered, and the account is sent here and paid.

Mr. BERGERON. There is no regular physician.

Mr. SPROULE. Am I correct in understanding that this is all that is paid out for medical attendance and medicine for Indians in the various provinces. I see you have Quebec, $5,000 and Ontario $3,300. Are no other salaries or payments made to medical men for attending Indians?

Sir WILFRID LAURIER. I am giving the names of all the men who have been appointed to receive yearly salaries for attending the Indians. If there are reserves which have no regular physicians, and where the services of a physician are required, he is sent for, and his account is paid; but everything is paid out of this appropriation.

Indians—blankets and clothing, Ontario and Quebec, $500.

Mr. BERGERON. Where are these bought and from whom?

Sir WILFRID LAURIER. They are bought by tender. Last year they were furnished by Horn Bros., of Lindsay.

Indian Schools—Maritime Provinces. Ontario and Quebec, $49,230.

Sir WILFRID LAURIER. This is the same vote as usual.

Mr. FOSTER. Are the schools being satisfactorily carried on? What are the results from year to year?

Sir WILFRID LAURIER. I do not know how far we claim to have made progress in the education of the Indians, but I do not know that any retrogression has taken place either. The Indian, as my hon. friend knows, is rather refractory in regard to education. I understand from the department that the condition of things is about the same from year to year.

Mr. BERGERON. How many schools are at Caughnawaga?

Sir WILFRID LAURIER. The number of schools in the province of Quebec is 17, the number of pupils on the roll 795 and the average attendance 377. At Caughnawaga there are two Roman Catholic schools, each with a boys' division and a girls' division, and one Methodist school, at Lorette 1, at Becancour 1, at Oka Village and country 2, at Restigouche River 1, at Temiscaming 1, at Lake St. John 1, at Maria 1, at Maniwaki 1, at Lake St. Francis 2, at Betsiamits 1, and at St. Regis 2.

Mr. FOSTER. Is the school population from year to year increasing, diminishing, or keeping about stationary? Also, is the attendance compulsory? If we provide the school and the teacher, there ought to be means taken to see that the greatest benefit is got out of it for all the children.

Sir WILFRID LAURIER. I understand that there is not much progress in that direction. The attendance is about stationary. There are compulsory clauses which the government may enforce, but whether that is done or not, I do not know.

Mr. FOSTER. Can the minister say what are the general effects of the schooling on the children? Do they still remain Indians, with all their desires, or do they get any higher ideals from going to these schools?

Sir WILFRID LAURIER. On that point I cannot speak for the department; I speak from my own information. I am afraid we cannot have very much hope in that respect. Some years ago, at the time the Indians had a vote, I remember being in the province of Ontario, in a riding where there was a large Indian reserve, on which there were about seventy families of the Five Nations who were still pagans, who spoke their own language, and absolutely refused to be taught English. In the province of Quebec, so far as I have been able to see, the Indians at Lorette and Caughnawaga, Lorette especially, they are slowly improving. But they still live in tribes and pursue their own industries of fishing, hunting, and manufacturing certain Indian curiosities. Some of them, however, are educated, even liberally educated, and have joined the professions. Some have gone into the ministry. But speaking generally, I am afraid we cannot claim that we have trained the red man to the standard that we would like.

Mr. FOSTER. I acknowledge that it is a somewhat hopeless and despondent task; but I suppose we are obliged to do all we possibly can to put these advantages before them. What are these children taught? After they get through, are they able to read and write and do arithmetic, and thus somewhat fitted for business? Do they carry away anything with them in the shape of learning, and do they apply any of their knowledge to mechanical work in the schools?

Sir WILFRID LAURIER. My information from the department is that at the

day schools they are taught simply the primaries which are taught to white children. As regards results, if I can give personal experience, a large deputation last year from the Oka Indians waited on me. One of them was certainly a very well read man. He had a bundle of papers to show his titles and was well versed in the history of his tribe from the early concessions of the French kings down to the present. He could read and write very well. I believe that in the Ottawa and Quebec tribes the knowledge of reading and writing is pretty well distributed, but whether they apply that knowledge to the arts of life and to bettering their circumstances, I am unable to say.

Mr. FOSTER. Does the department know from its experience whether, as a result of a generation of education, the Indians who have grown up in these schools really do any amount of general reading?

Sir WILFRID LAURIER. They are large readers of the periodicals and the daily press.

Some resolutions reported.

On motion of Sir Wilfrid Laurier, House adjourned at 6 p.m.

HOUSE OF COMMONS.

FRIDAY, January 27, 1905.

The SPEAKER took the Chair at Three o'clock.

SELECT STANDING COMMITTEES.

Rt. Hon. Sir WILFRID LAURIER (Prime Minister) moved :

That Mr. Augustin Bourbonnais be transferred from the Committee on Miscellaneous Private Bills to the Committee on Standing Orders.

That Mr. L. P. Demers be transferred from the Committee on Standing Orders to the Committee on Miscellaneous Private Bills.

That Mr. Thomas Greenway be transferred from the Committee on Banking and Commerce to the Committee on Agriculture.

That Mr. Hugh Guthrie be transferred from the Committee on Agriculture to the Committee on Banking and Commerce.

Motion agreed to.

INSTRUCTIONS TO THE GOVERNOR GENERAL.

Mr. W. F. MACLEAN. Before the Orders of the Day are called, I would like to ask the Prime Minister (Sir Wilfrid Laurier) if he will tell the House whether there are any and substantial changes in the instructions of the new Governor General—changes from the ordinary instructions ?

Sir WILFRID LAURIER. I am not aware of any.

GRAND TRUNK PACIFIC RAILWAY SURVEYS.

Hon. GEO. E. FOSTER. Before the Orders of the Day are called, I would like to ask the Minister of Railways and Canals (Mr. Emmerson) whether he has any information which can be communicated to the House with reference to the Grand Trunk Pacific surveys of the route between Quebec and Moncton ? I noticed in the papers some semi-authoritative statements as to what had been found as a result of these surveys, and in some cases the statements were definite. If there is any information that the House could have, I would like very much to get it. If he has not got it at his hand, would he just intimate whether, in answer to a request of an order of the House, there are any papers that he could bring down at present with reference to those surveys ?

Hon. H. R. EMMERSON (Minister of Railways and Canals). I may say in reply to my hon. friend that there are no reports in the Department of Railways and Canals with respect to the surveys. The Act provides, if I remember correctly, for reports to be furnished annually by the Commissioners to the Department of Railways and Canals. The surveys already made, as I understand, are preliminary. I know there has been no report from the construction commission to the Department of Railways and Canals with respect to these surveys. There is no information in the department which I could bring down to the House.

Mr. FOSTER. Do I understand the minister to say that the procedure would be something like this : That those engineering parties, through their chief, would report to the commission, and that the commission would then include these in their annual report ? Does the minister mean to say that parliament should sit here and not have the benefit of the results of those engineers' reports until they came a year afterwards through the medium of the commission ? Surely my hon. friend will not contend that we are to sit here and wait eighteen months for reports to be digested, or pigeon-holed, or whatever is done with them, by the commission, whilst we, representing the country, are kept without the information. Surely that cannot be the course of procedure which will be followed.

Mr. EMMERSON. I suppose my hon. friend will have to exercise the same patience that I will have to exercise until those reports are given to the Department of Railways and Canals according to law. Then, of course, the department will be in a position to furnish the information. It is a question of the construction of the law. My hon. friend can refer to it for himself.

Hon. JOHN HAGGART. Mr. Speaker, what department is the commission under ?

Surely we have a right to the reports made to the commission, if they are completed; and there is no necessity for us to wait until the commission reports to the Minister of Railways and Canals. Under what department is that commission?

Mr. EMMERSON. I presume that the commission would be associated with the Department of Railways and Canals.

Mr. FOSTER. How intimate would the association be?

Mr. EMMERSON. It is not particularly under that department; it is a body by itself, an independent body, under the provisions of the Act which created it.

Mr. FOSTER. Well, perhaps we are not in a position to discuss the matter under this order——

Sir WILFRID LAURIER. No.

Mr. FOSTER. But if the rendering of the Minister of Railways and Canals is correct on that point, something will have to be done by the House, because I do not imagine that members on either side of the House would be willing to wait a year and a half for the commission to digest the information, when they want it themselves.

Sir WILFRID LAURIER. I suppose my hon. friend will wait, at all events, until there are reports of that survey made by the parties who are in the field. They will report to the commission, and the commission will have to report to the Railway Department. The discussion is premature now, and it may be renewed some time later.

Mr. MACLEAN. Perhaps the right hon. Prime Minister will bring down the Order in Council creating the commission and let us see it. There may be some information in it as to which department the commission belongs.

Sir WILFRID LAURIER. No, there is no necessity for that, because the commission has been created under statute and not under Order in Council.

Mr. SPROULE. This report should be given to the public and communicated to parliament. It was given to the public through the press some time ago.

Sir WILFRID LAURIER. No.

Mr. SPROULE. I think I noticed the report in the Toronto 'Globe,' and that is evidently the government organ we may assume that it is correct. If the report is available for the press it should be available for parliament.

Sir WILFRID LAURIER. What my hon. friend saw in the 'Globe' was only a rumour. There has been no report in the press.

Mr. SPROULE. Then it is only a rumour?

Sir WILFRID LAURIER. Sometimes there are rumours in the press and sometimes there are facts.

Mr. HAGGART. Have there been any reports from the surveyors to the commission in which there was a statement, approved or otherwise, as to the location?

Sir WILFRID LAURIER. I assume, and probably with some degree of certainty, that there may have been interim reports, but so far as my knowledge goes there has been no final report.

SUPPLY.

House again in Committee of Supply,

Indians—schools, Maritime Provinces, Ontario and Quebec, $49,230.

Mr. COCKSHUTT. Mr. Chairman, may I have the privilege of addressing you for a few moments in connection with the matter of grants to Indian schools? My right hon. friend the First Minister had the goodness to refer to me yesterday as an authority upon educational matters in connection with the young Indians. My information is perhaps obtained from sources that are as reliable as any that can be furnished, and I desire to submit a few observations in connection with the grants to Indian schools from the experience I have had in meeting the Six Nation Indians particularly for many years past. I may say that the Mohawk institution, that figures, I think, the fourth in the list of grants, is an institution with which I have had a good deal of familiarity and it is in reference to that particularly that I wish to speak. I may say that the grants that have been made from time to time to that institution have, I believe, for the most part, been very well expended. If I were sure that all the grants to all the Indian schools were of the same nature as that I should have no hesitation whatever in saying that it was well expended money. The question was asked, and my right hon. friend referred to me yesterday, in reference to what the effect was upon the rising generation of Indians. I may say that the effect has been for the most part very good indeed. It is perhaps not generally known that the county of Brant contains the largest reservation that exists in North America, that is in point of population, the population being upwards of 4,000. Contact with civilization has not acted as was generally expected it would in the destruction of the race. The race is actually upon the increase. I know from last year's report that it has increased some 63 in numbers. This fact then leads to an observation as to what is the ultimate destiny of our Indian race so far as the Six Nation Indians are concerned. I believe their destiny is not extinction but absorption, that they will ultimately be absorbed into the peoples of this country and become consolidated as a Canadian race. The white blood has now been

so infused into the race that there are comparatively few of pure blood there. This may appear to be surprising, but it is nevertheless the fact and we have to face the facts as they are. The race is likely to be absorbed among the population of Canada. Within probably three or five generations this change at the rate at which it is going on now, will have been completed. The question has been raised: Is the money being well expended which is devoted to the education of Indians? I think I may say it has been well expended at the Mohawk institution. The grant that is made at present is some $60 per head for 91 pupils, although I see that they did not obtain last year the total of that grant for reasons that I cannot explain. They obtained from $4,700 to $4,900. I find that it is stated as $4,700 in one report and $4,900 in another, whereas they were entitled to some $5,400. This grant has been made for perhaps ten years or in the neighbourhood of ten years. It was first made when Mr. Dewdney was in charge of the department, and I think I had the honour of seeing him in connection with the grant at that time. It has been continued ever since and young Indians have been turned out from that institution who are filling many honourable positions in the land. Residents of the city of Toronto well know that one of the most distinguished residents of Toronto was a former resident of the Six Nation reserve. He has obtained a salary which is not less than that of the First Minister sitting in this House and is at the head of one of the greatest financial institutions of this country. He is a former pupil of this institution. I would refer also to the fact that in the days of Sir John Macdonald, it was his custom to occasionally introduce into the Department of the Interior and the Indian service, graduates of note from the Six Nation reserve and there is one young lady still in the department. I would suggest to my right hon. friend that it would be wise to continue that custom introduced in the time of Sir John Macdonald. It furnishes an incentive to the young men of the Six Nations to make great efforts and I think that it is one of the object lessons that should be set before them. These are positions that they can fill and I think they are entitled to feel there are positions that they can occupy in this country. It should be remembered in discussing this question that the grants that are given to the Six Nations are largely taken out of their own moneys, that they are not a charge upon the country. These grants are derived largely from their own interest money and the Six Nation Indians are not a charge upon the people of the country. I know not whether they are considered constituents of my hon. friend the Minister of Customs (Mr. Paterson) or of myself, but they are residents of the county of Brant, they are upwards of 4.000 in number and in the year 1887 my hon. friend the Minister of Customs and myself had the honour of polling the first Indian vote ever polled for a white man in North America. This vote was fairly evenly divided. I think the disfranchising of the Indians was a step in the wrong direction, inasmuch as I believe the Indians of the Six Nations are advanced by conferring upon them the responsibilities of citizenship. They were enfranchised in 1885, I think, by Sir John Macdonald, and up to the year 1896 or 1897 they had the privilege of voting in Dominion elections. That has been discontinued owing to the provincial lists becoming operative and they are not qualified to vote in provincial matters. I believe the advantage of voting to the race was considerable.

I believe that right should be again conferred, although I am not in a position to ask for that to-day. I say that our ideal should be the absorption of these tribes by the people of the country. With that end in view, I think I may well say that they will become a credit to this country and that the money we are expending on them is well expended. Probably no nation on the face of the earth has advanced more rapidly than the Six Nations of Brant county have done during the last century and a half. It is only a century and a half since they were a barbarous race; to-day many of them occupy well tilled farms and are in comfortable circumstances, and many of them are capable of discharging duties in high stations. That is a fact to which I can vouch from my own observation. We have had no less than eight of these Indians in our own domestic service in fifteen years, and they have all acquitted themselves satisfactorily. If my right hon. friend (Sir Wilfrid Laurier) will inquire in the department, he will find that there is a young Indian lady there who for the past fifteen years has acquitted herself creditably and is to-day drawing a considerable salary for efficient work. That is only a sample of what can be done and is being done through the instruction which is being obtained in the Mohawk institution. I may say that the training given at that institution is technical and manual as well as educational, and this, I think, should be the basis of all instruction to the Indians; that is, they should be taught to work. We know that in former days, even in my earlier days, the redman's burden was carried by the Indian woman. To-day that condition has disappeared. This shows the advance of civilization among them. The only way to assist the Indians to advance to first-class civilization is to teach them to work.

The Iroquois, or Six Nations, are probably the most advanced tribe on the North American continent to-day, and their advancement is largely due to the work of the industrial school near the confines of the city of Brantford. That institution is maintained largely by the New England Com-

pany, of London, England, a charitable institution, and not the government, nor is it aided largely by public moneys. During this past year the Rt. Hon. the Earl of Stamford, a commissioner of the company, visited that institution, and also investigated the schools on the Six Nations reserve. He went to Lytton, in British Columbia, also where the company has established an institution. As I said, these schools are almost entirely maintained as charities by the New England Company, and the government grant is a small proportion of the money expended on them. That being the case, I trust that when a further grant is asked, as I think it will be at an early day, for the purpose of furnishing fire protection for the new institution, my right hon. friend (Sir Wilfrid Laurier) will view that application favourably, and that the Minister of Customs (Mr. Paterson) will join with me in pressing the necessity of a grant towards this crying need of this institution. You will remember that it was burned down eighteen months ago. The buildings, which were totally destroyed, have been replaced with the insurance money, but fire protection is still required. Water mains are being laid by the city of Brantford into the country, and it is expected that it will cost $8,000 to provide the fire protection. The New England Company have applied to the department for $3,000 towards this expense, and I would be very glad if my right hon. friend (Sir Wilfrid Laurier) could see his way to granting that request. The lives of the children would be in danger in the event of a fire under present conditions. I trust that when this matter comes up for consideration it will not be viewed from any party standpoint, as the remarks I am making are not made in any factious spirit or with a desire to unduly criticise; my desire is to point out the fact that the institution is worthy of the grant it is now getting, and should also receive a further grant of $3,000 towards fire protection. That grant would be appreciated not only by the Mohawk Institute but also by the Six Nations, who are a large part, probably 10 per cent, of the population of Brant.

The right hon. gentleman (Sir Wilfrid Laurier) yesterday referred to pagan rites on this reserve. I am free to admit that they are still practised, but to a very small extent. My hon. friend says he saw them when he was there. I admit that the practice still exists, but not 10 per cent of the Six Nations or Iroquois are to-day pagans; I think less than 300 out of 4,000. It is true that the white dog is occasionally sacrificed and that the green corn dance takes place, but the occurrence of these rites is due to the white man rather than the Indian. The Indians cater for the audience that applies for the ancient rites, and if our intelligent white men would cease to demand this kind of entertainment these rites would cease. I am not blaming the Canadians particularly, as I believe that the British visitors are more to blame than the Canadians. They pass the Church of England, the Presbyterian Church, the Methodist Church and the Roman Catholic Church and drive to the long house, in order that they may see these rites performed, as they are something they have never seen before. That causes the Six Nations to continue the rites although they have long ceased to have any meaning. Of the 4,000 Indians in the county, a large majority are professing Christianity. I trust that when my hon. friend visits the reserve he will visit some of the other schools and churches; there he will not see war paint, but men seated and in their right minds, worshipping God in the same way as we all worship Him. The Indians are, of course, largely of the Church of England, and come under the heading, as I do myself, of miserable sinners. The Mohawk church is attended by the pupils of the Mohawk institute, 125 or 130 in number, and there is also a white congregation of six or eight, of which I am generally one when I am at home. I hear them every Sabbath, and I may say for the benefit of gentlemen on both sides of the House, that whenever they are in Brantford, if they attend service at this church, they will hear a service of which they may be proud, and will feel satisfied that the little grant made by the government of Canada towards the institution and the Mohawk church is well expended. I may say as a matter of information that the King of England during the past year has granted to the Mohawk church the privilege of being known as His Majesty's Chapel of the Mohawks. That is a privilege which the Mohawks enjoyed in the old days in the United States, and they were promised when they came into the Grand River valley that they would have the same privilege there, but it was only in the past year, through the Earl of Stamford and the late Governor General, Lord Minto, that application was made to the King for this privilege, which he has been graciously pleased to grant. This house of God, in which these pupils of the Mohawk Institute worship, is maintained by the New England Company, and the incumbent of the church is also the superintendent of the school. I think that the Minister of Customs (Mr. Paterson) will agree with me that the affairs of that institution, under the management of the New England Company—because, as I have said, it is not a government institution—have been well and faithfully administered for upwards of seventy-five years. The church and institute have been a great boon for the Six Nations, and it is through their influence that the Six Nations, although they were first in war in the old days, are to-day first of the native Indian tribes in the arts of civilization and peace. That is the reputation which this

nation to-day enjoys, and I trust that this item, which refers to the grant to the Mohawk Institute will be increased. I thank the hon. gentleman for the opportunity which he has given me of making these few remarks in connection with an institution in which I take a deep interest.

Salaries of chiefs, Cape Croker and Gibson and Agent Oka, $150.

Mr. BERGERON. Are the troubles at Oka between the Indians and the seminary now over?

Sir WILFRID LAURIER. I am sorry to say that the trouble is not over, but I am not without hope that it may be got over. We have lately had correspondence upon this subject, and there has been an agreement, not completed, but in the way of completion, to have the rights which are claimed by the Indians and disputed by the seminary, as to the land in question, referred to the Privy Council. Counsel have been empjoyed on both sides, in order to have the question submitted in the proper way for a judicial decision. I may say, speaking not officially, but on behalf of the department, that the government have agreed to this, and intend to ask for an appropriation from parliament to cover the expenses of the Indians.

Mr. BERGERON. What has become of the arrangements which were made between the government of Canada and the Indians of Oka, in 1882, I believe, by which the Indians were to surrender their rights on condition of the seminary buying a piece of land for them in the township of Gibson in Ontario?

Sir WILFRID LAURIER. A piece of land was bought in the township of Gibson, on the Georgian bay, but there was never any official agreement between the Indians and the seminary in regard to it. A good many Indians left the reserve at Oka and went to Gibson to settle, but I understand that the greater part of them came back to Oka again. The Indians are under the impression that they have an absolute title to the land, that the grant made by the King of France to the seminary did not deprive them of any of their rights. This is disputed by the seminary, and until we can have a judicial determination of the question, it is impossible to expect that there will be peace in the locality. Every one of the Indians is absolutely convinced that the seminary are trespassers, and that they are the true owners of the soil. We have asked them to agree to submit the matter to the judicial decision of the Privy Council, and I understand that they are willing to do so. The seminary are also ready to have the question of their title submitted to the courts.

Mr. BERGERON. Was not the sum of $16,000 paid to purchase the property which was to be substituted for the Oka reserve? What is to become of that money?

Sir WILFRID LAURIER. The seminary agreed to pay and did pay $16,000 for the township of Gibson; but two years ago the money was returned to the seminary except the part which is actually held by Indians.

Mr. BERGERON. How is it that we are paying salaries to these Oka Indian chiefs? I do not see any such payments made to the chiefs of other reserves.

Sir WILFRID LAURIER. Most of the bands have funds of their own; but the Oka Indians have no money of their own, and therefore we pay $50 to the chief of the band at Gibson, also $50 to two other chiefs.

Ontario and Quebec—survey of Indian reserves, $500.

Mr. FOSTER. Is that a yearly business?

Sir WILFRID LAURIER. This grant of $500 has been voted for several years, and it is intended chiefly to pay the cost of subdividing some reserves and re-surveying the lines of old reserves where the lines have become obliterated. This is in cases only where the Indians have no funds of their own. Last year the expenditure was as follows:

A. E. Hanson—Expenditure on Canvose and York county surveys, N.B.	$155 78
Dominion Express Company—Express charges on plan of Bury	0 35

Deputy Minister of Lands and Mines and Irving R. Todd—Running lines Indian reserve, Seven Islands	300 61
Irving R. Todd—Running lines Indian reserve, Vanceboro, N.B.	14 15
Canadian Express Company—Express charges on map	0 25
J. K. Eaton—Sub-dividing 40-acre wood lot, Colchester county, N.S.	35 00
J. H. Honde—On account of survey Reserve Abenakis, St. Francis	200 00
	$727 39

Mr. SPROULE. Is any of that money used for surveys on the Indian islands in the Georgian bay?

Sir WILFRID LAURIER. No, all that expenditure is over now. I understand that the surveys there are all done.

Indian land management fund, $14,000.

Mr. BERGERON. Is this the vote from which some of the salaries of the chiefs are taken?

Sir WILFRID LAURIER. No, this item is to assist the Indian land management fund under terms of the Order in Council of July 1, 1893.

Mr. FOSTER. How long will it be before this ceases ?

Sir WILFRID LAURIER. Fifteen years more.

Mr. FOSTER. Then the fund will be completed ?

Sir WILFRID LAURIER. Yes.

Grant for Agriculture Society, Munceys of the Thames, $90.

Sir WILFRID LAURIER. This is an old grant, in existence about fifteen years. These people organized a very creditable agricultural society and have gone to considerable trouble and expense year after year. It has been of great benefit to the farming interest of the reserve.

Erection of lockup at St. Regis, $500.

Sir WILFRID LAURIER. It has been the policy of the department for a number of years to have a lockup at St. Regis, but the intention could not be carried out owing to some local trouble. The department had rather serious trouble with the St. Regis Indians the last few years. Peace however is now restored, and there is no difficulty in the way of having this lockup erected. Its erection is recommended by the agent.

Mr. BERGERON. Will $500 cover the whole cost ?

Sir WILFRID LAURIER. Yes.

Mr. SPROULE. You had the same vote last year and there is nothing to indicate that this is a revote. Where items are revotes, that ought to be shown, so that we would know the money was voted before and not expended.

Sir WILFRID LAURIER. My hon. friend is perfectly right. This is a revote and nothing has been expended of it yet.

Mr. BERGERON. Is there any report of what took place in Caughnawaga when some detectives from Montreal seized liquor there. The liquor was found in a few houses but we have heard nothing about the matter yet.

Sir WILFRID LAURIER. It was reported that liquor was being illegally sold there and we organized a raid. I am sorry to say that our raid could not be called a success. We succeeded only in getting one case.

Mr. BERGERON. Is it intended to continue the work ?

Sir WILFRID LAURIER. Certainly.

General legal expenses, $3,500.

Mr. FOSTER. Who was the Attorney in the Buckshot case ?

Sir WILFRID LAURIER. Mr. Lemieux.

Mr. FOSTER. And in the Six Nation reserve cases at Brantford ?

Sir WILFRID LAURIER. Mr. Lewis Heyd.

House of Commons salaries, $77,550.

Mr. FOSTER. There is an increase here of $2,200. How is that accounted for ?

Mr. SPEAKER. There are thirty-five clerks, regular increment $1,850 ; the new appointment of Mr. Paradis in place of Mr. Polette, deceased, $1,200 ; Mr. Norbert, appointed in place of Mr. Scott, retired, $800 ; Mr. Patry, in post office, $700, making a total increase of $4,550, from which have to be deducted the salary of Mr. Polette, deceased, $1,100, and that of Mr. Scott, retired, $1,250, making a net increase of $2,200.

Mr. WHITE. There is a reduction of one clerk in the chief's branch. Has that officer been retired or has he been transferred to some other branch ?

Mr. SPEAKER. Retired.

Mr. WHITE. There has been a change in the translation branch of one second-class clerk. Was there a recommendation from the chief of the department, the Clerk of the House, for the appointment of the additional clerk ?

Mr. SPEAKER. Yes.

Mr. BERGERON. How many employees of the House are there ?

Mr. SPEAKER. Seventy-four. The list is given on page 29.

Mr. BERGERON. Does that include the sessional as well as the permanent employees ?

Mr. SPEAKER. Yes, both.

Mr. BERGERON. Perhaps I shall be in order if I call Mr. Speaker's attention to a point not concerning salaries. I would like to know if rooms cannot be afforded for the accommodation of some of the old members of the opposition. I think I shall assist Mr. Speaker in meeting the existing difficulty by mentioning the matter here. There are a good many rooms in this building, and, perhaps, His Honour the Speaker, using a little authority, might place at least a few rooms at our disposal where we could carry on our work. I need hardly say, Mr. Chairman, that it is impossible for us to work under present conditions. During the sitting of the House we have to occupy ourselves with what goes on in this chamber, and when the House is not sitting we have no place to work. If a spare room cannot be found somewhere, I think it would be the part of grandeur d'âme for hon. members on the right of the Speaker to help us to obtain rooms where we could work.

Mr. SPEAKER. That is a matter that I have taken up within the last few days, but for the present, it does not seem possible to hold out much hope of complying with

the hon. gentleman's request. Even a number of the permanent officials are in quarters outside this building at this time. Until some increase in the number of rooms is secured, it will be difficult to afford the accommodation desired. However, we are looking into the matter, and some remedy may be found.

Mr. W. F. MACLEAN. Perhaps Mr. Speaker would interview the Minister of Public Works and see if some enlargement of this building is not possible. Possibly putting on another story might meet the difficulty.

House of Commons—expenses of Commons—extra sessional clerks, &c., $25,780.

Mr. WHITE. What is the rate of pay to sessional clerks ? Is it $4 a day uniformly ?

Mr. SPEAKER. Yes, that is the uniform rate.

Mr. WHITE. On looking over the last report of the Auditor General that is in our possession, I find that some sessional clerks were paid a less sum for part of the session —$2.50 per day, or $3.50 a day for part of the session and $4 a day for the remainder.

Mr. SPEAKER. The rate was changed during the session.

Mr. WHITE. That would hardly apply to all, because in some instances $4 a day is paid for the whole session. But, as I understand it, the intention is to make it $4 a day uniform.

Mr. SPEAKER. Yes, they are being paid at that rate now.

Mr. WHITE. There are two additional clerks provided for, outside of the twenty-eight permanent sessional clerks. These two, I presume, are the clerks in the whips' rooms ?

Mr. SPEAKER. Yes.

Mr. WHITE. Are they paid at the same rate as the others, $4 a day ?

Mr. SPEAKER. They are paid at the same rate, as I understand.

Mr. WHITE. I suppose the translation is paid for in the usual manner, by the page?

Mr. SPEAKER. Yes, in the same manner as heretofore.

House of Commons—contingencies, $26,460.

Mr. SPEAKER. There is an increase of $100 for expresses between the House and the government printing office. This is necessary owing to the additional work.

House of Commons—publication of debates, $60,000.

Mr. BERGERON. I do not think that the French version of 'Hansard' has been published yet. It had not been published a short time ago. The English 'Hansard' came out shortly before the beginning of the session. I called the attention of the Speaker to the fact. This work should be published as soon as possible.

Mr. SPEAKER. It is probable that the delay is due to the increased work thrown upon the Printing Bureau by the elections. Such a delay would not occur during an ordinary year.

House of Commons—estimate of the Sergeant at Arms, $50,055.

Mr. SPEAKER. I see there is a provision here of $800 for a Speaker's steward. Is that a new appointment ?

Mr. SPEAKER. It is not exactly a new appointment, it is largely a change of title. The man was transferred from a similar position here and is doing a like work as before ; but under a resolution of the Internal Economy Committee of last year, he is assigned a special duty and given that title.

Mr. WHITE. Then I find there has been an addition to the staff of three permanent messengers, an increase from eight to eleven, including Mr. George, who is the Speaker's steward. What necessity was there for an increase of nearly 50 per cent in the permanent staff of messengers?

Mr. SPEAKER. This statement will explain the matter:

Increases to 4 on messenger staff—Connolly $50, T. Stewart $30, C. R. Stewart $50, and Boutet $60..	170 00
Lalonde appointed permanent messenger to fill place of C. George appointed Speaker's steward..	550 00
Two permanent messengers—one to take the place of Patry transferred to the clerk's department, and the other to take the place of Asselin appointed to the post office, 2 at $500 each..	1,000 00
One assistant house carpenter, formerly paid by Department of Public Works	700 00

Mr. WHITE. That is another vote altogether. There are at least three additional.

Mr. SPEAKER. That is all that is included in this vote.

Items increased—		
Pages $30, servants $162.50, permanent charwomen $1,095, sessional charwomen $575..	$2,262 50	
		4,682 50
Less items reduced—		
Salary of Patry transferred to clerk's department..	$650	
Sessional messengers..	678	
		1,328 00
Actual increase..		3,354 50

Mr. WHITE. Has Mr. Patry been taken out of the reading room or simply transferred to the clerk's department. Because if he has not been taken out of the reading room and somebody else put in his

place, the explanation is not very satisfactory.

Mr. SPEAKER. It is merely a case of transferring him from one staff to another.

Mr. WHITE. That does not account for the increase of three in the messengers staff, in addition to the extra house carpenter. I would like to know what necessity existed for that increase in the permanent messengers staff, and whether the Speaker had a report from the sergeant-at-arms as to the necessity of increasing the messengers staff from eight to eleven.

Mr. SPEAKER. The necessity of appointing these additional messengers was pressed upon the Speaker. The work is constantly increasing. Last session, and the session before particularly, were very long sessions.

Mr. WHITE. But surely there should have been some report of the chief official of that branch of the department that there was a necessity for an increase of these permanent messengers. You have an increase here of three permanent messengers. The explanation with regard to Mr. Patry, I have already shown, does not affect these three extra messengers at all, because Mr. Patry remains in the same position as before, but is merely transferred from the sergeant-at-arms' branch to the clerk's branch. Now I want to know why these three additional permanent messengers have been appointed, whether the sergeant-at-arms made a report to the Speaker intimating that there was a necessity for increasing the number.

Mr. SPEAKER. I am informed it was done under the express suggestion of the clerk. There was found to be a necessity for these additional employees by reason of the increased work. It was on his recommendation.

Mr. WHITE. And not on the recommendation of the sergeant-at-arms. Well, what is the maximum of the salary of permanent messengers?

Mr. SPEAKER. $750.

Mr. WHITE. I find there appears to have been an addition of $50 for five of these sessional messengers, and the rest appear to have only got $30 addition. Why is there that discrimination?

Mr. SPEAKER. By resolution of the Internal Economy Board the assistant chief received $50, and the others $30 of an increase.

Mr. WHITE. But there are five of them here who appear to have received $50 additional.

Mr. SPEAKER. I only see one who has got an increase of $50, Mr. Connolly.

Mr. WHITE. There are five permanent messengers here at $750, and according to the last estimates, these were at $700.

Mr. SPEAKER. Those five have reached the maximum.

Mr. WHITE. They have reached it by giving them $50 additional in one year. With regard to Mr. George, he has had an addition of $100, whereas the other messengers have only received an addition of $30 a year. If I remember well, the arrangement about increases was that the messengers were to get $30 a year. Of course if that applied to the whole there would be no special objection to it; but there should not be discrimination.

Mr. SPEAKER. Last year, I believe, there was a general increase.

Mr. WHITE. I find in the Auditor General's Report that bonuses were paid to the permanent messengers ranging from $50 to $100 for the session of 1903. I am not making any objection to that, because all these were good men, and perhaps deserving of the recognition that was given to them. But I think the practice is a vicious one, and I hope His Honour the Speaker will not continue it. If it is desirable to increase the salaries of the messengers, it should be increased permanently, I think. But what I am desirous of ascertaining is whether the $50 bonus which was given to the permanent messengers for the session of 1903, was made a permanent addition to their salaries, and whether they had reached the maximum by having that addition made to their salaries earlier than they otherwise would have done.

Mr. SPEAKER. The clerk informs me that the bonus was given owing to the length of the session, and was not to be a permanent increase.

Mr. WHITE. That is not a very satisfactory explanation, because these gentlemen were employed for the whole year. I am not finding any fault with granting bonuses to them, but they are employed for the whole year. It matters little what the length of the session may be, they have to be here the whole year round. With regard to that, I would like to ask Mr. Speaker as to whether his steward, during recess, is relieved of duty, or whether, having been taken out of the class of permanent messengers, he is required to be on duty as a messenger during recess.

Mr. SPEAKER. The allowance of course is not a sessional allowance. When the session has been very protracted, with long hours and that sort of thing, perhaps there cannot be much said in criticism of an allowance of that character.

Mr. WHITE. Is the system of bonuses to be continued or abandoned?

Mr. SPEAKER. I cannot speak as to the future.

Mr. WHITE. Another question was as to whether the steward, who formerly was a messenger and who, during recess, performed the duties of a messenger, is to continue to perform those duties, or whether he will be relieved of duty altogether during the recess.

Mr. SPEAKER. He was formerly a permanent messenger. He is now in charge of the restaurant and of the property.

Mr. WHITE. I am afraid my hon. friend does not apprehend the meaning of the question I put to him. What I am asking is as to whether the Speaker's steward who was formerly a permanent messenger and required to discharge the duties of a permanent messenger during the recess will still continue to discharge the duties of messenger during the recess, or whether he will remain out altogether during the recess and only be required to be on duty during the session.

Mr. SPEAKER. I understand he is now only employed during the session except that he has to take care of the property in his charge during the whole year.

Mr. WHITE. He always had to do that.

Mr. FOSTER. Do we understand then that what formerly was done by a permanent messenger detailed for that service while the House was in session, which messenger had his own duties during the remainder of the year to perform, is now done by another official, that now we have been advanced to this other stage that the Speaker has a full fledged steward of his own who comes when the Speaker comes, who goes when the Speaker goes, and who has no duties during any other part of the year ? I have not been able to find out exactly from what Mr. Speaker has said as to whether that is the condition of things or whether this steward comes back to his work when the Speaker leaves at the adjournment of the House.

Mr. SPEAKER. As I understand he has to be here under the order of the chief messenger during the entire year.

Mr. FOSTER. But the answer so far as I can get it is not an answer to my question, but simply a statement that he has to stay here under the orders of the chief messenger. The question is what duties does he perform after the Speaker leaves ? I know this was an arrangement made by the late Speaker, and not by the present one, but at the same time we ought to have an answer.

Mr. SPEAKER. As far as I can understand in the interim he is responsible for the property and looks after that. These are the only duties he is required to do.

Mr. WHITE. Yes, but these duties were imposed upon this gentleman when he was a permanent messenger. He had to take care of the property in the restaurant and in the Speaker's chambers and he discharged other duties as a messenger during that period of time. Now we have this curious circumstance or anomaly presented to us, that there are three additional messengers in these estimates more than were provided for last year, and the explanation we get from the hon. Speaker is that the clerk recommended the appointment of these three permanent messengers. I do not know what the clerk's authority is in regard to that matter, but I always supposed when I was occupying the position which my hon. friend occupies now, in so far as that branch of the staff was concerned, if any increase was required a report should come, and I required that a report should come, from the sergeant-at-arms, who is the chief of that staff. Of course, I understand that the clerk is the chief of the whole staff, but still it seems to me that it would have been more proper if the sergeant-at-arms had recommended the appointment of these permanent messengers. We never found in former years that eight messengers were too few to discharge the duties required of them. Now we find that we require an addition of three permanent messengers to the staff.

Mr. FOSTER. Is one of these the steward?

Mr. WHITE. No, there are three permanent messengers added to the staff and charged as permanent messengers and there is the Speaker's steward. In regard to the steward's duties spoken of by Mr. Speaker, they were discharged by him in former years ; that is to say he had to take care of the property in the restaurant during the recess and also of the property in the Speaker's chambers. All these properties were under the charge of the sergeant-at-arms, who was responsible for their safe-keeping. The sergeant-at-arms was responsible for the property in the restaurant and in the Speaker's chambers.

Mr. SPEAKER. I am now instructed that both the clerk and the sergeant-at-arms concurred in the recommendation.

Mr. WHITE. The sergeant-at-arms concurred in the recommendation of the appointment of these three permanent messengers ?

Mr. SPEAKER. So I am informed. The matter then came before the Internal Economy Committee in the regular way and they endorsed the recommendations and sent them on.

Mr. WHITE. No doubt the Committee on Internal Economy would give effect to any recommendation the Speaker might make in regard to this question, because the Speaker is supposed to know more about the needs of the House than any other

member of the Committee on Internal Economy. But I have been trying to find out what the necessity was for these three additional messengers and I confess that I have not been able to do so yet. Before we pass from the consideration of the messengers I wish to say that the two night watchmen do not appear to have received any addition to their salaries during the present year. Is there any good reason why they should not be given $750 the same as the five messengers referred to in the previous item? They are both good men, they have been a long time in the service, their duties are somewhat exacting, and if the maximum is $750, surely these two men ought to be considered as well as the rest of the messengers.

Mr. SPEAKER. As I am informed they had an increase in the previous year.

Mr. WHITE. Have not all these others had an increase in the previous year? They have all had an increase during the previous year.

Mr. SPEAKER. Well they were brought up to $700 during the previous year.

Mr. WHITE. Then these estimates are not correct because the estimates say that there was $700 estimated for each of them last year. The same amount is estimated this year as last year, $1,400, that is $700 each for the two night watchmen last year and the same amount is estimated this year so that the explanation does not appear to me to be very satisfactory.

Mr. SPEAKER. They came up to the $700 a year by the increase last year and they do not get any increase this year.

Mr. WHITE. Are they not entitled to reach the maximum the same as other messengers, the maximum being $750?

Mr. SPEAKER. They never have been considered in the same class.

Mr. WHITE. They have not been put on the same footing?

Mr. SPEAKER. No.

Mr. WHITE. We always had considered them the same.

Mr. SPEAKER. It is worth considering whether they should not be put upon the same footing.

Mr. WHITE. Yes, I think they should get the same as the other messengers. In regard to the House carpenter, is Mr. Sinclair still in the service?

Mr. SPEAKER. He is still in the service.

Mr. WHITE. I suppose this is his salary that is advanced to $750?

Mr. SPEAKER. Yes, he is getting $750.

Mr. WHITE. Was there a report as to the necessity of employing a second House carpenter from the sergeant-at-arms or any person in authority?

Mr. SPEAKER. There has always been one employed, and heretofore he was employed by the Department of Public Works and this is simply a transfer from the Department of Public Works to the House of Commons and not an increase.

Mr. WHITE. Was there one permanently sent from the Department of Public Works in addition to Mr. Sinclair? Was there a permanent House carpenter paid by the Department of Public Works to work here all the year round?

Mr. SPEAKER. I am informed that he is paid a per diem allowance; he has been on for fifteen years.

Mr. WHITE. Just for the days he was on duty?

Mr. SPEAKER. It amounted to very nearly this amount, practically this amount.

Mr. WHITE. With regard to the next item, 50 sessional messengers, at $2.75 per diem, when was the increase made in the pay of the sessional messengers?

Mr. SPEAKER. At the request of the House generally, as I am informed, there was an increase all round last year, and they shared in the increase.

Mr. WHITE. There is an increase in the number.

Mr. SPEAKER. Yes, I think there is an increase in the number.

Mr. WHITE. The estimates this year provide for the same number of messengers as last year, and yet there is a reduction of $678.50 in the item. How does that occur?

Mr. SPEAKER. The amount was over-estimated for the previous year; this year an estimate is taken only for the amount that it is expected will be expended.

Mr. FOSTER. There is an over estimate this year. Does the Speaker intend to take on more sessional messengers?

Mr. SPEAKER. There is no intention of doing so.

Mr. FOSTER. The length of the session, of course, is an indeterminate quantity. I do not think my hon. friend has been well answered as to why three additional messengers should be appointed. That is a large addition to the number now in the service. I would like to have the Speaker give the reasons why there had to be an increase in the number of messengers by one-third. What additional work made that necessary? Is it the duty of the sergeant-at-arms to make recommendations for such an increase? He is an old officer, and the officer in charge knows the amount of work, knows the messengers and how the work is done. It would seem that he would be

the proper person to recommend when an increase was necessary. He would recommend to the Speaker, and if the Speaker concurred in his recommendation it would go to the Internal Economy Committee for final action. The Internal Economy Committee should ask for a report in writing from the sergeant-at-arms to the Speaker setting forth the reasons for the proposed increase. I would ask if there is such a report ?

Mr. SPEAKER. I am informed that it was at the request of the sergeant-at-arms and at his suggestion that the increase was made, but I cannot ascertain that there was any written report on the matter. I am informed that the Internal Economy Committee acted upon the report of the sergeant-at-arms which was concurred in by the Speaker.

Mr. FOSTER. I am sorry to hear the Speaker say that; it is a reiteration of the remarks made by a responsible minister yesterday. The Intercolonial is a matter of much importance to this country, and consequently to the representatives of the people in parliament. Its business is the country's business, in fact, and yet we have the Minister of Railways yesterday saying that as he was travelling around some one made a verbal report, and he, like the Shah of Persia, or the Sultan of Turkey, immediately, on that verbal report, cut off a man's head. He had no report as to the reasons for the action, there was nothing but a verbal report. No business is well done, I think the House will agree, unless you have the officers pinned down in black and white on these important points. The sergeant-at-arms does not get to the Internal Economy Committee, but it is stated that he has made a recommendation. If I were on the Internal Economy Committee I should ask to see the written report. And I am sure there must be somewhere in the records of the Internal Economy Committee such a report, and I would like the Speaker to bring it down.

Mr. SPEAKER. I have made inquiry and I cannot find that there is any written recommendation.

Mr. WHITE. Then I hope my hon. friend will not make the appointments until he gets a recommendation from the sergeant-at-arms as to the necessity for this large addition to the permanent messengers' force. In the old days it was not found that the messenger staff was not too small, and I am inclined to think that the work of the House has not increased to such an extent as to render necessary the addition of nearly 50 per cent to the staff.

Mr. SPEAKER. I can see the force of the hon. gentleman's observation and will endeavour to carry out that suggestion in the future and to have reports.

Mr. WHITE. Have these appointments been made ?

Mr. SPEAKER. Yes, they have been made.

Mr. OSLER. Are these men paid $2.75 for each working day or for each day in the week ?

Mr. SPEAKER. They are paid for every day during the week; many of them do duty on Sunday.

Mr. FOSTER. Can the Speaker give the date at which these appointments were made ?

Mr. SPEAKER. I have not the dates by me at present.

Mr. FOSTER. I think this is of sufficient importance to let the estimate stand until we find out about it. I do not see how the appointment could have been made if there was no money voted for it. How many sessional messengers are there now at work?

Mr. SPEAKER. There are nine permanent.

Mr. FOSTER. Then the other two are not appointed ?

Mr. SPEAKER. Yes, but not as permanent. They will commence next July to be permanent.

Mr. FOSTER. Then they are not appointed yet ?

Mr. SPEAKER. Not as permanent.

Mr. SAM. HUGHES. Does the Speaker make any examination as to the personal qualifications of these men for the position ? Last year here was a young lad, who was one of the best messengers I have seen about the House. It might be well to consider the advisability of getting active energetic young fellows, who would do the work up to time.

Mr. WHITE. If two of these messengers are not yet appointed as permanent, how are they being paid—out of the sessional vote ?

Mr. SPEAKER. At present out of the sessional appropriation.

Mr. FOSTER. Then to say that they are not appointed is simply a technical answer. They are in the service, and they are being paid out of the people's money. I think we ought to have the recommendation of the sergeant-at-arms. There is one business way in which this ought to be managed. According to all the traditions of the House, the sergeant-at-arms is the responsible officer who should make the recommendations when additions are necessary, after which they come before the Internal Economy Committee. I do not presume to give advice to the hon. gentleman ; but if I were Speaker, I think I should rather have these appointments, which are part of the domestic

economy of the House, come to me in the shape of recommendations from the responsible officer, with a detailed statement as to why they were necessary, before I brought them before the House. I think that is the businesslike way of having the thing done.

Mr. HAGGART. The hon. the Speaker got a vote last year for the purpose of paying a certain number of sessional messengers, and he has had the full number up to the 1st of July next. How does he pay these two, who are above the number, when he has not a vote for them ?

Mr. SPEAKER. They are regular sessional messengers like the other messengers. They are included in the fifty who are being paid out of last year's vote.

Mr. HAGGART. You got a certain vote for a certain number of sessional messengers last year. You have increased that number by two, whom you are paying as sessional messengers until you get authority from the House to put them permanently on your staff from the 1st of July next. Where does the money come from to pay them ?

Mr. SPEAKER. They were already on the list of sessional messengers, and they are merely to be permanent after the 1st of July.

Mr. WHITE. Have you reduced the number of sessional messengers from whom you take these two, or have you appointed the fifty and these two ?

Mr. SPEAKER. There are just fifty, and these two men are among them.

Mr. WHITE. Then I would again urge my hon. friend not to make these permanent appointments. He has made one already. When was that appointment made to the permanent staff, and who is the appointee ?

Mr. SPEAKER. One was appointed about August last. His name is Lalonde.

Mr. HAGGART. How are you paying him ? He is in excess of the number provided for by parliament.

Mr. SPEAKER. We are paying him out of the vote for permanent messengers. If it is short, we shall have to ask for a supplementary vote.

Mr. WHITE. What does the Speaker say in reference to these two permanent messengers who have not yet been appointed ? I suggest to him, that before these appointments be made, a report should be obtained in writing from the sergeant-at-arms as to the necessity of their appointment. Are we to understand that the Speaker will adopt that course, and if the report cannot be obtained from the sergeant-at-arms that there is a necessity for the appointment of these extra permanent messengers, he will not appoint them ?

Mr. SPEAKER. I think that is reasonable, and I think I can assure the House that I will follow that course.

Mr. BERGERON. I see in the Auditor General's Report, O—20, a number of items that have a very familiar appearance. Such items as books and maps for instance, 35 Canadian Parliamentary Guides, $70 ; Canadian Politics, $5.40 ; Canadian Annual, $3.80 ; Canadian Annual Review, $46.35 ; New Dictionary of Larousse, $43 ; Political Appointments to Parliament and the Judical Bench of Canada, $60, and so on. Who supervises these purchases and who is responsible for seeing that they remain the property of the government ? Then there are considerable purchases of furniture every year. It is most extraordinary what a quantity has to be purchased each year, and one wonders what becomes of all the things purchased. There are purchases of desks and tables and all sorts of things from Bryson, Graham & Co., amounting to $999.13. Also from J. O. Leblanc for desks and lounges and chairs amounting to $421.50. Also from Harris, Campbell & Boyden Furniture Company, desks and tables and chairs to the extent of $157.75. I need not take up the time of the committee in going through the list, but I remember well when years ago pages of that kind were read in the House. Of course we have had some additional rooms opened, but still I cannot understand why we should require each year so much furniture. Where do you put it all? Who is in charge when the House rises and the Speaker goes away, and who is responsible that that furniture is not taken away from the building ?

Mr. SPEAKER. The Clerk of the House is responsible for the purchases of books. He himself has a library belonging to parliament and so have the translators, and from time to time books have to be purchased which they require. As regards the furniture, it is only purchased on the recommendation of the sergeant-at-arms, who must initial all the accounts. The furniture is then under his charge. As regards the desks, I have been Speaker only a few days and in that time have received quite a number of requisitions from gentlemen on both sides to be furnished with desks. No doubt my predecessors have had similar experience. Of course, as in a private house, furniture gets used up and has to be replaced from time to time. I shall endeavour to keep check of these matters and see that no unnecessary furniture is purchased.

Mr. SAM HUGHES. Have you, Mr. Speaker, submitted to the members any plan showing the re-arrangement of the rooms ?

Mr. SPEAKER. I have not submitted any final plan, but am considering whether a re-arrangement can be made so as to satisfy the requests of some members. I find it a very difficult matter to deal with.

Mr. BERGERON. Is there not a piano in the Speaker's rooms belonging to the House ? I see we are paying rent for one ?

Mr. SPEAKER. The piano has always been rented, and it is a question whether it would not be better to purchase one outright.

Mr. MACPHERSON. I am sure the members from British Columbia would wish that it were in your power, Mr. Speaker, to enlarge the chambers. We from British Columbia are in the unfortunate condition of not having any recognized room in the House. In this respect we are much less fortunate than some of the older provinces, who seem to have all the good things of this life. I would like it very much if his hon. the Speaker could see his way clear to help out the orphans from British Columbia and arrange to have them domiciled in a fitting room of their own.

Mr. GANONG. Would Mr. Speaker be kind enough to advise me whether there is or is not a room set apart for the New Brunswick members ?

Mr. SPEAKER. No ; I am afraid they are at present as much orphans as the hon. members from British Columbia.

Mr. GANONG. There is no such room, then, I understand ?

Mr. SPEAKER. I understand that the only room that can be utilized by them at present is the Agricultural Committee room, in which certain desks were heretofore placed for the use of the maritime province members.

Mr. GANONG. Walking along one of the upper corridors we find a room whose door is marked 'N.B. Members.' As far as I can learn, that means N.B. Grit members. I would advise Mr. Speaker to have the word 'Grit' painted before 'N.B.' There is a room there, but if a Tory puts his head in, he is apt to be requested to get out.

Mr. W. F. MACLEAN. I can say, on the authority of a former Speaker of this House, that there is no room in this House which any member is not free to enter. And I can remember a case where this former Speaker said that if any person put a lock on any room in the House and any member wished to enter that room, he would send his locksmith to open it.

Mr. SAM. HUGHES. Now that this matter is up, I certainly think it should be made clear that if there are to be rooms for any, there must be rooms for all. It should all be done on some systematic basis, and fair-play should be shown. I trust that Mr. Speaker will see to it that the leader of the Conservative opposition in this House is given an additional room adjoining his own, where his secretary can work.

The SPEAKER.

Mr. LOGAN. This discussion should show us that it is about time for the House to consider how business is to be done. There is, no doubt, just ground for complaint on the part of members on both sides. Many of us have a large correspondence to attend to, and the majority must attend to that correspondence in their places in this chamber or somewhere else, no special accommodation being afforded. We should provide in some way proper accommodations for the members of the House. I understand that in the United States a member of Congress is given an allowance for a secretary and is also given a room in which to do his work. In this House, under the previous administration, I am informed, the members of the Liberal opposition had to do their work in the corridors of the House. Looking over the list of rooms that has been posted in this House, I find that our friends of the opposition have no great reason to complain in comparison with the members on this side. If they complain, I would like them to refer to the distribution of rooms of about ten years ago, and they will see what insignificant accommodation was given to the opposition of that time. I find that at present our friends of the opposition have the following rooms, outside of the rooms provided for the leader and the whips :—Room No. 6, Conservative headquarters ; No. 34, Conservative members ; No. 36, Ontario Conservative members ; No. 37, Conservative ex-ministers; No. 56, Conservative members from Ontario ; No. 72, Conservative members—Messrs. White and Foster. Here we have six rooms in all. On the Liberal side we find that, apart from the rooms occupied by some of the ministers, including the Prime Minister and the Minister of Finance, there are the following :—Room No. 16, Liberal headquarters ; No. 48, North-west Territories members ; No. 58, Liberal members from Ontario ; No. 49, Chairman of the Printing Committee and members from Ontario ; No. 67, Liberal members from New Brunswick ; No. 68, Liberal members from Nova Scotia ; No. 69, Chairman of the Debates Committee and some Liberal members ; No. 71, Liberal members of the province of Quebec—eight rooms in all. So that the opposition, with a membership of 76, have six rooms, while the government side, with a membership of 138, or nearly double, have only eight rooms. I think the comparison does not give our friends on the other side anything to complain of. But, outside of the comparison, all the members have something to complain of in the accommodation afforded. I presume that many members have an average mail of from twenty-five to thirty-five letters a day. Where are we to answer these letters ? If we dictate to a stenographer, where is the work to be done ? As you walk about, you see members even sitting in the corridors dictating their correspondence. Go into the Railway Committee

Room, and you find stenographers here and there writing at the dictation of members. This is not in accordance with the dignity of the House or with the work we have to do. We do not come here to play, but each of us bears a certain responsibility and has important work to do. Members on the government side of the House may have a great many questions of patronage arising in their counties, involving a large correspondence, for the carrying on of which there it now no accommodation. This discussion will have done good if it arouses the government and the House to the necessity of providing better accommodation for the members in the immediate future.

Mr. GANONG. Perhaps Mr. Speaker will provide a few desks for Tories in that room he spoke of. If he does, I will take my chances on getting into the room.

Mr. LEFURGEY. The room referred to by Mr. Speaker as affording accommodation for Conservative members from the maritime provinces is sometimes occupied by the sittings of the Committee on Agriculture. Besides, if it is to be lumbered up with many more desks, it will not be possible to do work there any better than at our desks in this chamber. It will be in the interest of the House and of the country to provide better accommodation, for members would then have opportunities for research and study, and could better fit themselves for the discussion of public questions. At least rooms should be provided for the members on either side from the different provinces. New Brunswick, Nova Scotia and other provinces have been named. I will put in a word on behalf of the members from Prince Edward Island. With the work of the country growing every year, and, as the hon. member from Cumberland (Mr. Logan) says, with members receiving an average of from twenty-five to thirty letters a day, it is impossible to do the work unless members are given better accommodation. Outside of the discussion whether the rooms should be given to Liberals or Conservatives, I think it would be well for the government to take into consideration the matter of providing better accommodation for members.

Mr. SAM. HUGHES. There is another matter to which I wish to draw the attention of the Speaker and the House. At the present moment I am informed the full lights are turned on, and we have practically only twilight in this chamber. A few years ago we had a very good light, and it was changed for some purpose or other, and since then it has been very inadequate. I would respectfully suggest that the candle power should be at least doubled in this chamber. Getting old as some of us are, we find it is absolutely necessary to have the chamber better lighted. I think the old apparatus is still here, and why not combine that with the present system?

Mr. TAYLOR. This being the first session of a new parliament and a new Speaker, I would now venture to make the suggestion that I made when the Conservative party were in power, and which I think would have been acted on had they remained in power another session, that is, to provide more accommodation for the members of both sides, to which I think they are justly entitled. The suggestion I made then, and that I make now, is that we provide accommodation outside the House of Commons for the Speaker, the sergeant-at-arms and the chief messenger. I think the House of Commons should be reserved altogether for the use of members. I do not think it would be any more difficult for the Speaker, the sergeant-at-arms and the chief messenger to go to their lodgings at night than it is for the Prime Minister, the other members of the government and the House of Commons. We all have to make our way home. I do not see the necessity for any of these gentlemen being housed in this building. The restaurant people also—they all have too much accommodation taken away from the members. These gentlemen should have quarters, they should have rooms here; but there is no necessity for the larger part of the House of Commons being taken up by the Speaker, the deputy speaker, the sergeant-at-arms and the chief messenger. These gentlemen should be provided with respectable quarters outside. I know the present Speaker and the former Speakers would prefer living in respectable quarters outside. In this way accommodation could be provided so that every man, or groups of a few members, could have rooms where they could do their private correspondence without being obliged to do it at their desks, as most of us have to do. I make this suggestion to the Speaker and to the Prime Minister, that arrangements be made immediately for removing all the families now living in the House of Commons and putting them in permanent quarters outside, allotting the rooms vacated proportionately between the members supporting the government and those supporting the opposition.

Mr. MILLER. In the constituency I come from we are in the habit of considering the rights of the ladies. I have noticed that there is no general waiting-room in this House for the convenience of ladies. I think there ought to be such a room for ladies who come here from a distance, no matter what may be their political leanings, a room with all the proper conveniences which they would expect to find in connection therewith.

Mr. SPEAKER. I can inform the gallant member who has just spoken (Mr. Miller) that now, for the first time in any session, there has been a nicely furnished cloak room provided upstairs for ladies, and a couple of attendants are there to see that

their wants are provided for. That is a move in the right direction. The whole matter has been very fully discussed, and I can assure the House that I will bring it promptly to the attention of the government, and perhaps make some future reference to it.

Mr. WHITE. Before we pass from this subject I would like to say a word more with reference to the sessional writers. I see by the Auditor General's Report that whilst the general sessional writers are paid $4 a day, Mr. P. A. Stewart and Mr. Taché are paid $600 each for the session. Has there been any increase in the salaries of these gentlemen since this report was published? They have enjoyed that salary for a long series of years, and were getting $600 a year when the sessional writers were only getting $3 a day. I would like to know whether any increases have been made in the salaries of these gentlemen, because we have the curious anomaly here of the two chief sessional writers getting $600 a year each, and their subordinates getting a larger sum during the session of 1904. That should not continue. These chief sessional writers ought at least to get a larger pay than the ordinary sessional writers.

Mr. SPEAKER. There has been no permanent increase in the salaries for the last two sessions. The sessions of 1903 and 1904 were very long, and an extra allowance was made on that score of $300 each.

Mr. WHITE. Would it not be better that a permanent addition be made to the salaries of these gentlemen than that they should be dependent upon the will of the Speaker for an increase? They are both good men, at least they were in former times. I suppose Mr. Stewart must be pretty well advanced in years, but they both discharge their duties efficiently. Yet it seems anomalous that, according to the Auditor General's Report, they are receiving a less sum than their subordinates. It seems to me that these two gentlemen, instead of being dependent upon getting a bonus whenever it pleases the Speaker or the Committee on Internal Economy to give them a bonus, should have a permanent addition to their salaries.

Mr. SPEAKER. The suggestion is worthy of consideration, and will be considered.

Mr. FOSTER. With reference to the books, as I understand, Mr. Speaker, these books which were purchased under the direction of the clerk go towards filling out the clerk's personal library, I mean his official library.

Mr. SPEAKER. Yes, and the translators' library. Some are transferred to the library.

Mr. FOSTER. I notice in some cases there are a number of copies of the same book, as for instance of the Canadian Annual Review, a very good book, and I dare say it is well used. There are a dozen copies of that document.

Mr. SPEAKER. These are distributed to the leading officials of the House as being useful to them in their work.

Mr. BERGERON. I agree with the opinion of the hon. member for Cumberland (Mr. Logan), except that I do not think we have as much accommodation as he says. Only a few of us have a room to work in. We are eleven members of the opposition from Quebec, and not one of us has a room to himself. The whole opposition has room No. 6, and those who were there in the old time know how inadequate is that room for seventy-five members. I think that this practice of separating the members in that way does more harm than good. Why not move them together more? Instead of having one room for the Liberal members and another for the Conservative, why not let all the members from New Brunswick, say, have one room, and the same with the members from Quebec, and with every other province? There is no reason why the members on both sides of the House should not be perfectly friendly and near one another while attending to their private correspondence. I am afraid it will lengthen the session if we do not get a room. We have to stay here. I am very glad to be able to state publicly what the conditions are so that the people who have correspondence with us will know why it is that they sometimes do not get answers. I cannot write letters here. I can go to No. 6, but I cannot do any work there because there are so many gentlemen speaking in the room. I cannot be here five minutes until gentlemen come and engage in conversation so that it is impossible to do any work here. We should have some quarters where we could work. I ask the right hon. Prime Minister how a member can prepare any serious work in a place like this. It is impossible to do it. The consequence is that if we are not well prepared with our work we may delay the House, because our speeches may be longer than they would be if we had an opportunity of preparing them more thoroughly.

Customs—salaries and contingent expenses of the several ports in the various provinces and in the Northwest Territories, including pay for overtime of officers, notwithstanding anything in the Civil Service Act, $1,214,865.

Mr. BERGERON. There was a question raised some time ago in Montreal in regard to the appointment of a deputy collector. I have not yet heard whether the question has been settled or not.

Hon. WILLIAM PATERSON (Minister of Customs). No, there has not been any deputy collector appointed.

Mr. BERGERON. Was there a demand or a suggestion to that effect?

Mr. PATERSON. Well, I have heard it suggested, but I would not call it a demand. There has been no deputy collector since Mr. O'Hara died. The department has not felt the necessity of it. We have no deputy anywhere.

Mr. BERGERON. Did my hon. friend get a demand from the trade of Montreal to the effect that Mr. White, the collector, had not time to answer all the questions which were put to him in the custom house there as the business of the port is very extensive ? A petition was presented by the trade of Montreal to that effect. I understand it was supported by the present collector and that it contained the statement that it would be in the interest of the trade at that port to have a deputy collector appointed.

Mr. PATERSON. Perhaps there has been a petition. If there has been it has been lately. It has been running in my mind that I had seen something in the papers about it, but there has been no action.

Mr. BERGERON. There has been no decision ?

Mr. PATERSON. No.

Mr. FOSTER. Will the hon. minister take this item up by the different provinces and tell us what are the increases in each—or by ports, whichever he chooses ?

Mr. PATERSON. We have not the estimate in that way.

Mr. FOSTER. In what way has the hon. minister the estimate ? Everything is lumped here. You have simply a line or two and a million and a quarter of dollars at the end of it. What is the system of explanation there ?

Mr. PATERSON. Largely comparing one year with another. The only increase asked for this year is for the salaries and contingencies of the various ports. We are asking $20,000 more.

Mr. FOSTER. Will the hon. minister take it up by ports ?

Mr. PATERSON. No.

Mr. FOSTER. How then ?

Mr. PATERSON. In a general way. If the hon. gentleman wants to know what has been expended last year in the different provinces by way of increase, I can give him that, and as it has been done in one year the presumption is that you may require to have something done in that way during the coming year, either in the way of new appointments which have been found necessary or in the way of increases that may have been given in the department.

Mr. FOSTER. Does the hon. minister say that he is not able to take it up by ports ? That seems to be the only way in which it can be fairly followed. Which province will the hon. minister take up first ? I suppose as Ontario occupies a very prominent position in the eyes of the world the hon. minister might take up Ontario first.

Mr. PATERSON. Last year we asked for an additional vote of $35,000.

Mr. FOSTER. For Ontario ?

Mr. PATERSON. No, for the whole Dominion. There was absorbed of that by increases $22,000 in round numbers. I have a list of how they were distributed if the hon. gentleman wants it. Does he want the individual names or does he want the bulk sums ?

Mr. FOSTER. That is for the increased expenses of last year ?

Mr. PATERSON. Yes, for the increases in salaries last year. I can give it to him by provinces if he desires it with all the names.

Mr. FOSTER. I suppose that is the way we will have to get at it.

Mr. PATERSON. In that way or will the hon. gentleman take it in bulk at so much ?

Mr. FOSTER. Well, it is much easier for the hon. gentleman if we take it in the bulk, but I am afraid we would not get much information.

Mr. PATERSON. If I read the names would the hon. gentleman know the officers anyway, or would it assist him in any way?

Mr. FOSTER. I have here the towns and ports and officers and everything in connection with each port. The only way you can follow it is to take them as they appear in the Auditor General's Report.

Mr. PATERSON. I will give merely the bulk sums to the hon. gentleman and then if it will help him, I will give him the names of the officers at the differents ports. In the province of Ontario we increased the salaries of 72 officers.

Mr. FOSTER. That is last year ?

Mr. PATERSON. Out of the amount voted last year—the increase being $5,060. In Quebec we increased the salaries of 77 officers, the total increase being $5,076. In New Brunswick seven officers have been increased, making $500 in all. In Nova Scotia 37 officers had an increase.

Mr. FOSTER. New Brunswick seven, and Nova Scotia thirty-seven, and yet somebody wonders why Nova Scotia went solid.

Mr. PATERSON. New Brunswick went pretty nearly that way too.

Mr. FOSTER. Oh, no.

Mr. PATERSON. The thirty-seven amounted to $3,210, in Manitoba there were

twenty-two increases totalling $3,050, and in British Columbia forty-nine increases amounting to $5,180. In Prince Edward Island we had eight increases coming to $450, in the Northwest Territories we have six increases amounting to $600. That it to say we were able last year to increase the salaries in all of 278 officers at a cost of $22,186. We are asking for $20,000 extra this year.

Mr. FOSTER. You had an unexpended vote last year of $11,000.

Mr. PATERSON. Yes, there was that amount unexpended. So this year we are only asking $22,000 out of which we will make our increases, although of course I may have to ask for a supplementary vote as we can judge better towards the end of the session.

Mr. FOSTER. On what basis are these increases made? There are such things as regular increases and special increases.

Mr. PATERSON. In the outside service there is no regular increase.

Mr. FOSTER. But there is the custom.

Mr. PATERSON. The custom is efficiency and the work performed. Last year we gave increases chiefly to the men who were getting small salaries of $500 and $600. We were not able to do so much for the higher classes of officers some of whom of course deserved it, and in some cases these increases were given.

Mr. FOSTER. How does the minister get his information as to the officers to whom increases should be given? On the report of what officers?

Mr. PATERSON. The collectors and the inspectors. Of course we can see for ourselves where a salary is only $500 or $600, and the commissioner has often reported to me verbally that in his view no officer should be paid less than $600. It has been urged upon us that the cost of living has increased lately and we now have most of our officers up to the $600 mark.

Mr. FOSTER. I do not suppose the minister, for instance in Ottawa, takes his list of officers and finding a man who last year was getting $450 would say to his secretary, 'now increase that man to $500' because he might be increasing a man who is altogether inefficient, and even if a man has a low salary if he is inefficient in his work he is scarcely deserving of an increase. There must be some method by which information comes to the head of the department here, the minister, on which he makes his decision as to the increase so as to be able to know that undeserving men do not get increases. Of course in the statistical branch the minister would have the information here. He knows when the officer is appointed and how many years he has been in the service. How does the minister acquire information as to outside officers.

Mr. PATERSON. We confer with the collectors and inspectors with respect to that. I might say to the hon. gentleman that we are communicated with by the officers themselves, and we make inquiries in reference to them and ascertain from our inspectors as to the services they are rendering, and upon that information we make up our minds whether we should grant the increase.

Mr. FOSTER. Is that all the information my hon. friend has, is that the only system?

Mr. PATERSON. That is the only system.

Mr. FOSTER. My hon. friend never receives letters or representations?

Mr. PATERSON. Oh, yes.

Mr. FOSTER. These count?

Mr. PATERSON. Yes, but we cannot trust to these, you know; we must have the official information.

Mr. FOSTER. Take for instance Halifax. Is there a report required by the minister's department here as to the general condition and efficiency of the work in the port of Halifax, say in the customs house? Are these things reported on to Ottawa where the salaries are ultimately decided.

Mr. PATERSON. Yes, there is such a system.

Mr. FOSTER. From all ports.

Mr. PATERSON. Yes, we have in Nova Scotia, Mr. Bremner and Mr. McDonnell. Mr. Hill was with us for thirty-five or forty years but he has passed away, and Mr. McDonnell was appointed in his place. We have also had for many years Mr. Bremner. They visit all the ports and we expect a report from every port in the Dominion at least once a year. I think we have it oftener in some cases. We have in Ontario now a chief inspector and three officers.

Mr. CLEMENTS. I would ask the Minister of Customs what salary the customs collector at Coatsworth, in my own constituency of West Kent, receives and what the returns for the last fiscal year for that port were?

Mr. PATERSON. What is the name of the port?

Mr. CLEMENTS. I do not know. It is a few miles from Romney.

Mr. PATERSON. Thomas Robinson is the collector, and he receives $400.

Mr. CLEMENTS. What are the revenue returns from that office?

Mr. PATERSON. $19.32.

Mr. CLEMENTS. While I think a port is necessary in that district, I think it is in the wrong place. I think the town of Wheatley, about five miles from there, is the proper place. I would ask the hon. minister to take that into consideration.

Mr. PATERSON. I shall be very glad to inquire as to that. I judge, from the small amount of revenue returned that it must be largely a preventive station. Does the hon. gentleman say that Wheatley would be a better point to prevent smuggling than where the office is now ?

Mr. CLEMENTS. Yes.

Mr. CLARE. What increases of salaries were made at the Galt customs house ?

Mr. PATERSON. The salary of Mr. Denis, the preventive officer, was advanced from $600 to $650. The collector has asked for an increase, but it was not given last year. It is under consideration.

Mr. WM. WRIGHT. I represent a large district, the district of Muskoka, in which there is no custom house at all, and we find it very inconvenient in getting goods in. I am sure that the revenue of that district is much larger than that of many others which have custom houses.

Mr. PATERSON. We have had strong representations from portions of Muskoka on that subject, among others from Bracebridge, a large and thriving place. During the summer months, when there is a good deal of traffic, we have an office at Gravenhurst. We have had applications for new offices from thirty or forty places, but it is difficult to accommodate them all. The opening of every new port means an additional expenditure. Then, while we are very anxious to oblige the business community as far as we can, we are not able to secure the same judgment with reference to values and as to whether invoices are correct, at many of these points that we can at larger points, where we can afford to pay larger salaries and have men especially delegated for the work. In the United States there are only a few very large ports. I believe it is a fact that for their 80,000,000 people, they have not as many ports as we have in Canada—not relatively, but absolutely. But the people of Canada have been accustomed to having conveniences nearer home. I can well understand what the hon. gentleman says as to the strong claims of the district he represents; but the department feel that the fewer ports we can have, with due convenience to the people, the greater uniformity in values we can secure.

Mr. WM. WRIGHT. Have you any system for opening new offices, with reference to size or population ?

Mr. PATERSON. When we get applications of that kind, one of the inspectors makes inquiry personally, then the department gets a statement from the office at which it is probable the entries were made. For instance, we would get from the collector at Orillia a statement of the goods entered for consumption in the town of Bracebridge, and in that way arrive at the amount of revenue that might be expected.

Mr. BARKER. Does the hon. gentleman propose to make any increases in the staff at Hamilton ?

Mr. PATERSON. I do not think there is any pressing demand for increases there. I think we are pretty well manned there.

Mr. BARKER. I think so, too ; but there will be a great deal of disappointment if some appointments are not made.

Sir WILFRID LAURIER. Would it be a disappointment to the sitting members ?

Mr. BARKER. No, but to some very strong supporters of the right hon. gentleman who expect offices.

Mr. FOSTER. In the United States, where there is a small number of ports comparatively, taking into account its population, how do they overcome what seem to be great difficulties to us ?

Mr. PATERSON. I suppose the business is done through brokers, with power of attorney.

Mr. FOSTER. That system is also in vogue here.

Mr. PATERSON. Yes, in the larger cities, but we are under no responsibility to the brokers.

Mr. FOSTER. I see there are very large increases in Nova Scotia compared with New Brunswick. How does my hon. friend account for that ?

Mr. PATERSON. In New Brunswick the officers were better paid, and in raising the pay in Nova Scotia we are bringing the officers there on a footing more nearly equal to those of New Brunswick.

Some resolutions reported.

ADJOURNMENT — AUTONOMY OF NORTHWEST TERRITORIES.

Sir WILFRID LAURIER moved the adjournment of the House.

Mr. FOSTER. Can the Prime Minister give us any information as to the probable time when the Bill for the establishment of the Northwest province, or provinces, will be ready ?

Sir WILFRID LAURIER. I cannot give any definite information to-day.

Mr. FOSTER. I suppose it will be as soon as possible ?

Sir WILFRID LAURIER. Yes ; I am very anxious to do so. I suppose that next week we shall commence a more regular

course of business than we have had up to this time. I should think that the bill referred to could be introduced probably during the second week in February.

Motion agreed to, and House adjourned at 6 p.m.

HOUSE OF COMMONS.

MONDAY, January 30, 1905.

The SPEAKER took the Chair at Three o'clock.

DOMINION ELECTIONS ACT AMENDMENT.

Mr. HUGH GUTHRIE (South Wellington) moved for leave to introduce Bill (No. 9) to amend the Dominion Elections Act, 1900.

Sir WILFRID LAURIER. Explain.

Mr. GUTHRIE. Mr. Speaker, the object of the proposed Bill is to broaden the application of section 112 of the Election Act. That is the section which defines undue influence for the purposes of an election. It applies to acts by way of force, violence, restraint, or threats of the same, for the purpose of intimidating electors or of influencing their votes for any candidate. The proposed amendment goes a little farther than the present section, and provides against the canvassing or soliciting of votes by employers from their own workmen, leaving it open to any employer to canvass the rest of the world if he so chooses, but restricting him in the case of his own workmen. It is general in its application, including all persons who employ labour—mercantile men, professional men, manufacturers or large corporations—all kinds of corporations.

Mr. MACLEAN. What about the farmer and hired man ?

Mr. GUTHRIE. The farmer and hired man will be included also. I think the general section 112 does not go quite far enough to meet this case. The mere fact that an employer canvasses his men involves some intimidation, if not direct, at all events, indirect.

Mr. BRODER. Does it include the civil service ?

Mr. GUTHRIE. I have not made it apply to the civil service, but I fancy it might be made to apply to them, too. Anything in that direction, I think, would improve the condition of affairs which exists to-day. That, in brief, is the object of the proposed Bill.

Motion agreed to, and Bill read the first time.

Sir WILFRID LAURIER.

QUESTIONS.

RETIREMENT OF J. B. SHAW.

Mr. LAKE asked :

1. On what date did Mr. J. B. Shaw first enter the government service in the Customs Department at Regina, and at what salary ?
2. On what date did he retire from the service, and what salary was he receiving when he did retire ?
3. During what period in 1904, if any, was he not employed in the service of the government?
4. On what date did he re-enter the service of the government in the Customs Department at Regina ?
5. On whose recommendation did he re-enter the service of the government, and at what salary ?
6. What position did he occupy during his first period of service, and what position does he occupy since re-entering the service ?
7. What was the cause of his retirement ?

Hon. WILLIAM PATERSON (Minister of Customs) :

1. Mr. J. B. Shaw entered the Customs service at Regina, April 4, 1903, at a salary of $700 a year.
2. His resignation from the service was accepted September 30, 1903, at which time he was receiving a salary at the rate of $700 a year.
3. He was not employed in the customs service from October 1, 1903, until December 1, 1904.
4. Mr. Shaw re-entered the customs service at Regina December 1, 1904.
5. The Minister of Customs authorized Mr. Shaw's re-employment in the customs service at a salary of $900 a year.
6. Mr. Shaw's position during his first period of service and since re-entering the service was that of acting preventive officer of customs, but subject to the performance of such duties as the collector might direct.
7. The officer has not stated any cause to the Customs Department for his retirement.

RETIREMENT OF P. G. FISHER.

Mr. LAKE asked :

1. Is Mr. P. G. Fisher at present employed in the Customs Department at Regina ?
2. If so, in what capacity, and at what salary?
3. If Mr. Fisher is not in the employ of the Customs Department, when did he retire ?
4. What was the cause of his retirement ?
5. What salary did Mr. Fisher draw for his services for November, 1904.

Hon. WILLIAM PATERSON (Minister of Customs):

1. P. G. Fisher is at present employed in the customs service at Regina.
2. His position is that of an acting landing waiter, but subject to perform such duties as the collector may direct. His salary is $700 a year.
3. Mr. Fisher has given notice of withdrawal from the service to take effect January 31, 1905.

4. His reason for withdrawing from the customs service appears to be that another customs officer recently employed at the port receives $900 a year.

5. Mr. Fisher received for salary from the Customs Department for November, 1904, $58.18.

EMPLOYMENT OF P. M. BREDT.

Mr. LAKE asked :

1. Is Mr. P. M. Bredt at present in the employ of the Dominion government ?

2. If so, since when, in what capacity, and at what salary ?

3. On whose recommendation was Mr. Bredt appointed to his present position ?

4. Was Mr. Bredt in the employ of the Dominion government in 1904 ? If so, during what period or periods, and in what capacity or capacities ?

5. Did Mr. Bredt retire from the service of the Dominion government in 1904 ? If so, on what date ?

6. What was the reason for his retirement ?

7. On whose recommendation was Mr. Bredt appointed to the position he occupied with the government during 1904, and prior to that year?

Right Hon. Sir WILFRID LAURIER (Prime Minister):

1 and 2. Since December 31, 1904, Mr. Bredt has been employed as colonization agent at $125 per month.

4. Yes, from January 1 to October 4, 1904. From January 1 to June 1, he filled the position of local immigration agent at Regina ; from June 1 to October 4, he was colonization agent.

5. Yes, on October 4, 1904.

3, 6 and 7. He was employed on recommendations satisfactory to the Minister of the Interior (Hon. Clifford Sifton).

MURRAY HARBOUR BRANCH.

Mr. A. MARTIN asked :

1. Has the Murray Harbour branch line of railway in Prince Edward Island been completed ? If so, when ?

2. If not, what remains to be done, and what is the estimated cost of same, including rolling stock ?

3. How many of the bridges are wooden, or partly wooden structures ? Are they to be replaced by stone or steel ? If so, when, and what is the estimated cost ?

4. How many booking and other stations are now built on this line, and where ? How many more are proposed to be built, and where ?

5. Is a station to be built at Grand View or Newton Crossing on this line ? If so, is it to be a booking station ?

6. Has the delegation from Prince Edward Island waited on any member or official of the government during this session of parliament, asking for this station ? If so, of whom composed ?

Hon. H. R. EMMERSON (Minister of Railways and Canals):

1. The Murray Harbour Branch of the Prince Edward Island Railway has not yet been completed.

2. The work remaining to be done is as follows, viz :

Hillsboro' Bridge.

Rip-rapping, completion of approaches, rip-rapping piers, erecting and placing in position five fixed spans and one swing span, building rest piers, tracklaying and flooring of whole structure.

On the line.

Three iron bridges to be erected to replace temporary wooden trestles, station and terminal facilities to be completed, water tanks to be erected, rolling stock to be provided.

The estimated cost to complete above mentioned works is $561,253.93.

3. There are three temporary wooden bridges which will be replaced by iron or steel, probably during the current year, and the estimated cost is about $8,000.

4. There are two booking stations built, one each at Hazel Brook and Vernon River, and two under construction, viz.: Melville and Wood Island.

Two way stations are built, one at Albion and one at Lake Verde. Four shelters are built, viz.: Southport, Bunbury, Mount Herbert and Hermitage, and one under construction at Hopefield.

Three booking stations are proposed to be built, one each at Uig, Murray River and Murray Harbour.

One way station is proposed to be built at Fodla.

Two shelters are proposed to be built, one at Surrey and the other at Bell River.

5. The question as to building stations at Grand View and at Newton Crossing is under consideration.

6. Messrs. A. B. Warburton and L. E. Prowse of Prince Edward Island interviewed the Minister of Railways and Canals recently on the subject of stations on this line.

SHERBROOKE ARMOURIES.

Mr. WORTHINGTON asked :

Is the government aware that the four different branches of the military service which exist in Sherbrooke have for some time past had no suitable premises for the retention of arms and accoutrements ?

Hon. Sir FREDERICK BORDEN (Minister of Militia and Defence):

Quarters have been provided for all the branches of the militia service referred to.

PRINCE EDWARD ISLAND RAILWAY BRANCH.

Mr. A. MARTIN asked :

1. Has the survey of the proposed railway line in the province of Prince Edward Island between Stanley Bridge, New London, and the main line of the Prince Edward Island Railway been completed ? If not, what are the reasons for the delay ?

2. Was there more than one route surveyed, and what were the terminal points of each ?

3. Are tenders for construction to be called for, and when ?

4. When was the survey begun ?

5. What is the length of the line, and the estimated cost of construction ?

Hon. H. R. EMMERSON (Minister of Railways and Canals):

1. Yes, the survey has been completed.

2. Two routes were surveyed. One via Clifton and one further east, with terminus at Emerald Junction and Stanley Bridge.

3. No decision can be reached until the engineer's report is received.

4. August, 1904.

5. This information cannot be given at the present time because the engineer, who made the surveys, has since been seriously ill, and he has not completed the plans, nor made his reports.

ADVANCES BY ORDER IN COUNCIL.

Mr. AMES—by Mr. Perley—asked:

What is the total amount of the advances that have been made by the Governor in Council to date under the authority of Act 3, Edward VII., chapter 36, section 1 ?

Hon. RAYMOND PREFONTAINE (Minister of Marine and Fisheries). $800,000.

IMPORTS FROM UNITED KINGDOM.

Mr. DANIEL asked:

1. What amount of goods from the United Kingdom was imported into Canada during the years 1902-3 and 1903-4, (a) through St. Lawrence ports, (b) through Canadian Atlantic ports, and (c) through United States ports ?

2. In the case of the United States ports referred to, what were the ports, and what was the amount of goods imported through each such port ?

Hon. WILLIAM PATERSON (Minister of Customs) :

1. The total value of goods imported into Canada from the United Kingdom was as follows :—

Direct to Canadian ports—

Fiscal year	1902-3..	$46,271,934
"	1903-4..	49,275,031

Imported through United States ports:—

Fiscal year	1902-3..	$12,796,772
"	1903-4	12,685,878

Customs returns have not been compiled for these imports separately via the St. Lawrence route and via Atlantic ports. Such compilation would take some time to complete.

2. The customs returns used for statistical purposes do not indicate the United States sea-board ports through which goods have arrived from the United Kingdom for Canada.

My deputy tells me that it is possible for us to obtain that information for the hon. gentleman (Mr. Daniel) should he desire it, and should he deem it of sufficient importance to ask for it. It would require about a month however to get the information as search would have to be made. With reference to customs returns for the separate ports in the United States through which goods have come in, we have no means of obtaining information, as we take cognizance of them only at the border.

Mr. DANIEL. I would be glad if the hon. minister would furnish the information which he says he would be able to furnish a little later on in connection with the reply to the first question.

Mr. PATERSON. If the hon. gentleman will be content to drop the question with this I will ask to have the information procured and will bring it down as soon as I can get it.

CENTRAL TRAINING CAMPS.

Mr. WHITE asked :

Has the government selected a site for the central military training camp ? If so, where will it be located ?

Hon. Sir FREDERICK BORDEN (Minister of Militia and Defence). No, the matter has not been finally determined.

AGRICULTURAL MEETINGS.

Mr. WORTHINGTON asked :

1. Is it the intention of the government, through the Department of Agriculture, to hold in co-operation with the farmers' clubs of the province of Quebec a number of agricultural meetings ?

2. For what purpose will these meetings be held ?

3. In what counties in the Eastern Townships will these meetings be held, and in connection with what agricultural societies or farmers' clubs ?

4. Is it the intention of the Department of Agriculture to hold one of these meetings in the county of Sherbrooke ? If not, why not ?

5. Is it the intention of the Department of Agriculture to hold in addition to these regular annual meetings a series of large conventions? In what county in the Eastern Townships will this convention be held ?

Hon. SYDNEY FISHER (Minister of Agriculture) :

1. Yes. In co-operation with various agricultural organizations.

2. The purpose of these meetings is to give instructions by experts regarding the breeding and arrangement of live stock and poultry, the cultivation of the soil, the care of milk, selection of seeds, management of orchards, &c.

3. The meetings will be held in the Eastern Townships, as follows :

One meeting in Huntingdon county, in connection with the Agricultural Society of 'A' Division.

Two meetings in Chateauguay county, one French, in connection with the Farmers' Club at Ste. Martine, and one in English at Ormstown.

One meeting in Brome county, in connection with the Farmers' Club at Sutton.

Two meetings in Shefford county, one French, in connection with the Farmers' Club at Roxton Falls, and one English, in connection with the Farmers' Club at Waterloo.

One meeting in Missisquoi, in connection with the District of Bedford Dairymen's Association.

Two meetings in Stanstead county, one English, in connection with the Agricultural Society of that county, and one French in connection with the Farmers' Club at Coaticook.

Two meetings in Wolfe county, one English, in connection with the club at Bishop's Crossing, and one in French, in connection with the Farmers' Club at Weedon.

Two meetings in Compton county, one French, in connection with the Club at La Patrie, and one English, in connection with the Farmers' Club at Bury.

Two meetings in Drummond county, one French, in connection with the club at St. Germain de Grantham, and one English, in connection with the Farmers' Club at Ulverton.

One English meeting in Richmond county, in connection with the Farmers' Club at Danville.

Two meetings in Inverness county, one English, in connection with the Farmers' Club at Inverness, and one French, in connection with the Farmers' Club at Plessisville.

One meeting in Beauce county, in connection with the Farmers' Club at St. François.

One meeting in Arthabaska county, in connection with the Farmers' Club at Victoriaville.

The agricultural societies in each county are also lending their co-operation.

4. The above programme was prepared by the officers of my department, and when submitted to me it met with my approval, and I considered it the best that could be made under the circumstances.

5. Yes. The convention for the Eastern Townships will be held in Missisquoi county, at Cowansville, in connection with the District of Bedford Dairy Association.

THE SALMON FISHERIES OF BRITISH COLUMBIA.

Mr. SPROULE asked :

1. Have any representations been made to the government, or any member thereof, asking for the suspension of salmon canning operations in British Columbia during the years 1906 and 1908 ?

2. From whom do these representations come ?

3. Is there any truth in the statement published in the newspapers that United States canners located on Puget Sound have instigated this movement ?

4. Have any protests been received by the government against the closing down of the salmon canning industry during the years named ? If so, from whom ?

5. What action does the government intend to take upon this matter ?

Hon. RAYMOND PREFONTAINE (Minister of Marine and Fisheries) :

1. Yes.

2. The Fraser River Canners' Association, Honourable E. G. Prior, Victoria, and the bank managers and principal business men of Vancouver.

3. No. The Fraser river canners, alarmed at the rapid decrease in the catch of Sockeye salmon during the last four years—962,652 cases in 1901, 293,477 in 1902, 204,809 in 1903 and 72,688 in 1904—stated in petitions to the government that the industry will be ruined unless the suspension referred to is carried out immediately. To secure concerted action with the United States canners on Puget Sound, a conference of Puget Sound and Fraser river canners was held at Seattle on December 21st, 1904, and a second conference on the 29th of that month, which resulted in memorials being forwarded urging immediate action by Canada, conditional on similar action by the state of Washington.

4. Yes ; from the Victoria Board of Trade, New Westminster Board of Trade, British Columbia Fishermen's Union, City Council of New Westminster, J. H. Todd & Sons, Victoria ; Henry Doyle, Vancouver, and Richard Hall, M.P.P., delegated to Ottawa for such purpose.

5. No decision has yet been reached.

THE ATLANTIC FISHERIES.

Mr. GANONG asked :

1. Has the report of the committee appointed to investigate the Atlantic fisheries been received ?

2. If so, when was it received ?

3. Has the committee finished their work ? If not, when will they resume the investigation ?

Hon. RAYMOND PREFONTAINE (Minister of Marine and Fisheries) :

1. No.

2. Answered by above.

3. The investigations on the ground have been finished.

VICTORIA, B.C.—COLLECTOR OF CUSTOMS.

Mr. SPROULE asked :

1. What was the date of the demise of A. R. Milne, C.M.G., collector of customs at the port of Victoria, B.C.?

2. Has the position of collector of customs at Victoria, rendered vacant by the death of Mr. Milne, been filled ?

3. If not, what is the reason of the delay in making the appointment ?

4. Who has been acting collector of customs at the port of Victoria since Mr. Milne's death?

5. Have any representations been made by public bodies in favour of the filling of the vacancy ?

6. If so, on whose behalf were these representations made ?

Hon. WILLIAM PATERSON (Minister of Customs). Mr. Milne, the late collector, died on January 17, 1904. Mr. John C. Newbury, who was chief clerk under Mr. Milne, has been acting as collector since Mr. Milne's death. The question of appointing him permanently to the position is now before Council.

OTTAWA DRILL HALL.

Mr. SAM. HUGHES asked :

1. Is the government aware that the accommodation in the present Ottawa drill hall is regarded as totally inadequate for the purposes of the Ottawa brigade ?

2. Does the government know that by reason of this lack of accommodation the sergeant's mess of the 43rd regiment has for some time been compelled to occupy quarters in another portion of the city ?

3. Is the government aware that one or both of the present members for Ottawa, Messrs. Belcourt and Stewart, gave assurances during the last Dominion election campaign that a new drill hall would be erected in Ottawa in the near future if the Liberal government was sustained on the 3rd of November ?

4. Is it the intention of the government to give effect to the pre-election promises of Messrs. Belcourt and Stewart by placing a sum of money in the supplementary estimates for the next fiscal year, with a view to the erection of a new drill hall in Ottawa ?

Hon. Sir FREDERICK BORDEN (Minister of Militia and Defence) :

1. While the accommodation in the present Ottawa drill hall is not all that could be desired, it compares favourably with that of other cities in the Dominion.

2. Yes ; and the government pays for the accommodation of the sergeants' mess of the 43rd regiment.

3. No.

4. The question of increased accommodation is under consideration.

LINDSAY DRILL HALL.

Mr. SAM. HUGHES asked :

Is it the intention of the government to erect a new drill hall in Lindsay for the use of the militia of the riding of Victoria and Haliburton ?

Hon. Sir FREDERICK BORDEN (Minister of Militia and Defence). The matter is under consideration.

REPORTS PRESENTED.

Partial report of the Auditor General.—Rt. Hon. Sir Wilfrid Laurier.

Mr. FOSTER. Is that the remaining half ?

Sir WILFRID LAURIER. No, there is more to come.

Report of the Department of Justice respecting Penitentiaries—Hon. Chas. Fitzpatrick.

Mr. SPROULE.

LABOUR UNION LABELS.

Mr. RALPH SMITH (Nanaimo) moved that the House go into Committee to consider the following proposed resolution :

That it is expedient to provide for the registration of labour union labels, and to provide pecuniary penalties for the unlawful use of such labels when so registered.

Motion agreed to, and House went into committee.

Mr. RALPH SMITH. Mr. Chairman, I do not think it will be necessary for me to occupy the time of the House for many minutes on this question, as the principle of this resolution has been before the House of Commons since 1897. Every session since that time, a Bill embodying this principle has been introduced, and in 1898, and again in 1900, the Bill was passed through the House ; but on each occasion it was rejected by the Senate. The people who consider that they have a grievance in connection with the desire to register union labels have made up their minds, since the House of Commons agrees to the principle of this Bill, and since the principle itself is so reasonable and fair, to press for this legislation as long as it is necessary to do so. In my opinion, the majority in the Senate at the present time will be quite prepared to confirm any legislation along these lines if the House of Commons passes it. The object of this legislation is very simple and plain : it is to provide for the registration of union labels. Now, union labels are more extensively used in Canada at the present time than the members of this House are perhaps aware. I have a list of manufacturing interests in Canada which are operating, and have operated for some time, under union labels, and I think it is necessary that these names should be placed on record, in view of the fact that the Canadian Manufacturers' Association, the chief opponent of this measure, has fought it from the very beginning. In my opinion, they have very much misunderstood the object and operation of the Bill. I do not know that it is necessary for me to read all of these names. There are nearly 100 manufacturers in Canada, from Vancouver to Quebec, who are working harmoniously with the trades unions and using the union labels.

Maddocks & Company, 246 Spadina Ave., Toronto.
John Moses, 354 Spadina Ave., Toronto.
J. D. Hamilton, Stratford.
G. F. Kimberley, St. Catharines.
Havana Cigar Company, Toronto.
C. Blankstein, Berlin.
Weis Brothers, St. Catharines.
Timmons & McIlwain, St. Catharines.
James Crawford, St. Thomas.
Kressler & Kraen, Berlin (heartily in accord)
Guelph Cigar Company, Guelph.
John McHugh, St. Catharines.
Cuban Cigar Company, Galt.
William Atkins, London.

William H. Skelly, Galt.
M. K. Halloran, Brantford.
Begg Brothers, St. Catharines.
E. J. Winter, Brantford.
Charles F. Tansey, St. Catharines (would be beneficial to all).

Girardin & Company, Montreal (cigars).
L. Z. Boudreau, printers, Montreal.
A. P. Pigeon, printers, Montreal.
List of 318 firms using shoe labels.
Co-operative Broom Company, Berlin, Ont.
Jones Brothers, Woodstock (cigars).

This list comprises some 90 firms doing business in Canada who have been working harmoniously with the trades unions, and all that they ask is that these labels should be registered. If a manufacturing firm agrees to work with a union the placing of the union label on its goods is an indication that the union is perfectly satisfied with the conditions under which the men work. But should there be a manufacturer across the street, who is a competitor and not prepared to work in harmony with the union, there is still nothing to prevent him fraudulently using the union label on his goods and the union has no remedy. The object of my resolution is to enable any trades union to apply, in the name of some of its officials to the Department of Agriculture and have any particular design adopted by it registered in the names of its officials. I have in my possession some letters from manufacturers with regard to this matter.

Mr. HAGGART. Cannot any person have a label registered at present ?

Mr. RALPH SMITH. I am not aware that he can. As a matter of fact the unions did try to get amendments to the Trades and Marks Act for the purpose of accomplishing this, but the Senate threw out the Bill as they did not consider it wise to interfere with the Act.

Mr. CLARE. What difference between this Bill and the one that went through this House.

Mr. RALPH SMITH. The Bill I propose to introduce is not an amendment to the Trades and Marks Act, but a separate and distinct Bill providing for the registration of labels.

Mr. CLARE. Was the Bill before the House last year ?

Mr. RALPH SMITH. This is an exact copy of it.

Mr. CLARE. Was it thrown out by the Senate ?

Mr. RALPH SMITH. It only passed its first reading in this House and was laid over with a large number of Bills for the purpose of shortening the session.

Mr. CLARE. But did you not say it was thrown out by the Senate ?

Mr. RALPH SMITH. Not the Bill of last year, but a Bill introduced in 1901, providing for an amendment to the Trades and Marks with the same object.

Mr. GANONG. Does the hon. gentleman say that you cannot now register a label under the present law ?

Mr. RALPH SMITH. I understand it is not possible to register a Trades Union mark at present. The late Mr. Bertram, who was formerly member for Toronto Centre, and a very large manufacturer, introduced a Bill to the same effect in 1898 and had it passed through this House. I would ask permission to read a short extract from what he then said :

Instead of raising objections to a union workman using a label or mark, I think it should be encouraged, for the simple reason that the fact of the goods they manufacture bearing such a label or mark is an incentive to them to produce a higher and better class of goods : otherwise the label would be of no value to them. I am satisfied that the evils resulting from this practice as indicated by the speeches of some

of the honourable members of the Senate are entirely imaginary.

Again Mr. Levitt, manufacturer of cigars in Stratford, Ontario, writes as follows, in answer to a request from a labour union :

I take the opportunity as a manufacturer of union-made cigars, to offer my full support to the passing of such a Bill (that is, our present Bill D.). It would not only mean a protection to the union, but also to the employer who is using the same and paying a fair living wage to his employees. It is something that is greatly needed, as it not only protects employers and employees, but the public at large from unscrupulous manufacturers. Many of the non-union-made goods are made by child labour or the employees receive such small wages that it makes them anything but admirable citizens to have in our midst. Wishing you every success in your undertaking and that the members now in session at Ottawa will look on the passing of said Act as a benefit to all.

I would like to read the following opinions from large manufacturers :

We beg to state that we are in favour of the granting of such legislation, as we are of the opinion union labour being done by skilled mechanics is justified in the issuing of a mark or token attached to the product of such labour designating it in union labour. Wishing you success.—Simmons & McIlwain Manufacturers, St. Catharines, Ont.

We heartily endorse your efforts.—Maddocks & Co., Mfrs., Toronto.

In answer to your favour, whether registration of labels should be granted to union labels, I should say decidedly yes, as I can in no way see that the granting of such a right to labour would interfere with those of others, and further, in my experience of 30 years, I find that the better conditions obtaining in union establishments, as to wages, hours, &c., have a decided tendency to draw the most skilled workmen to those factories, and I see no reason why this should not be expressed in the form of a union label attached to the product of such labour.—M. K. Halloran, Brantford, Ont.

We will state that during our ten years of cigar manufacturing in Ontario it has been our experience that protection to the union label means less child labour, better sanitary conditions and a great preventive to the unwholesome conditions now existing in many of the unfair factories. Consequently we appeal to the government to protect the union label in every particular.—Beggs Bros., St. Catharines, Ont.

We are pleased to learn that application has been made to the government providing for legislation for registration of union labels, and trust that the government will look upon it in a favourable light, and grant your petition. As we have used the union label for years, we know that it is a good thing in protecting trained and efficient workmen, and the public, against sweat shops, child labour, &c.—Kurtz & Company, manufacturers, Vancouver, B.C.

We consider that our employees are entitled to have their work distinguished by their label, and that label protected by law.—The Geo. E. Tuckett & Sons Company, Limited, Hamilton, Ont.

We are heartily in sympathy with your movement.—The Stratford Clothing Company, Limited.

We have no doubt that the passing of an Act would have a good effect on every one concerned. —Spilling Brothers, Toronto.

We are heartily in accord and hope your efforts will be successful.—Inland Cigar Manufacturing Company, of Kamloops, B.C.

We are favourable to the use of the union label, because it represents a better class of work produced under fairer conditions of labour.—The Times Printing Company, Hamilton, Ont.

I thoroughly approve of the Bill now before the Dominion parliament authorizing the registration of union labels by the organizations concerned.—The Expositor, Brantford, Ont.

I have a large number of letters from these manufacturing interests that are working with the unions in the application of the union label, agreeing that some provision should be made for the registration of the label.

In asking for this legislation, we are not asking for anything new. Only after very serious consideration would I bring before this House any proposition for which no precedent could be given. This legislation was passed in England twelve years ago. In that country, the unions connected with any manufacturing interest can create a design, have it registered as a trades union label under the Copyright Act. And I have here a list of the states of the neighbouring union in which this principle of the union label is established by law, and in that list are the names of no less than thirty-one states. The Bill I propose to introduce is an exact copy of the law that has passed these state legislatures and has been in operation for years. These facts, I think, should be a sufficient guarantee to members of this House, that there is nothing in this legislation that would prejudice the rights or interest of the public.

As I say, the chief opposition to the registration of the union label in the past has emanated from the Canadian Manufacers' Association. The Canadian Manufacturers' Association make no discrimination in their opposition to this class of legislation. With them it is not a question of whether the principle of a measure is or is not important; but, as can be seen by their weekly journal, they oppose every kind of legislation that has for its object the bringing about of better conditions for the industrial classes.

An hon. MEMBER. Gammon.

Mr. RALPH SMITH. That is the fact, whatever the hon. gentleman may say. And to prove that it is a fact, I may remind the House that the Canadian Manufacturers' Association have legislative committees which visit all the legislatures of the Dominion, including this parliament. And, last year, when a Bill was proposed in the legislature of the province of Quebec em-

bodying the principle that has been established in the law of England for ten or fifteen years, the well-known principle of compensation for workmen, the committee of the association appeared and bitterly opposed that Bill and secured its defeat. The Canadian Manufacturers' Association want high protection for the Canadian Manufacturers' Association and absolute free trade for everybody else. I quite understand that it may have been necessary and wise on their part to oppose certain extreme legislation; but they do not discriminate; they oppose whether the legisation is reasonable or not.

Now, before I take my seat, I wish to refer to two or three objections that have been brought forward by the Canadian Manufacturers' Association to this measure. The first is that it would be injurious to the manufacturers of this country. Well, for my part, I do not wish to do anything to injure our manufacturers; I will not be the promoter of any legislation or of any principle that will injure the manufacturing interests of this country. But I am sure the manufacturers have not given the consideration to this matter that it deserves or they would not view it as they do. Under the legislation I propose, the label cannot be used without the consent of the manufacturer himself. The Bill is entirely permissive. For instance, if the Cigar Makers Union create a design and have it registered under the law, and they come to the manufacturer, the owner of the industry in which they work, and say : We are perfectly content with the conditions under which we work, and, if you like you can place this label upon your product—if the manufacturer declines, that is an end of the matter; the label cannot be used at all.

Mr. SPROULE. But would not the legislation be a means to enable them to boycott the manufacturer ?

Mr. RALPH SMITH. I was just coming to that, for this also is one of the extraordinary arguments put forward by the Manufacturers' Association. Unions using the label under this proposed law could not carry on a boycott against any manufacturing interest any more than they can to-day. If a manufacturer to-day refuses to work with the union, there is an opportunity to boycott him. But it is not done. This Bill provides no machinery that will give the unions a better opportunity to boycott a manufacturer than exists to-day. It is necessary for the members of this House to have the Bill in their hands before they can discuss the subject fully; but I am convinced that when hon. members have an opportunity to read the Bill, they will agree that the Manufacturers' Association, who are fighting this principle so strongly, have an erroneous conception of the legislation proposed. I move the adoption of the resolution.

Mr. SPROULE. Can a factory use that union label without being compelled to have nothing but the union labour in its employ?

Mr. RALPH SMITH. There is nothing in the Bill to compel a factory to employ nothing but union labour. In fact, the union label could be operated without a union at all. If the workmen in a certain factory agree that the conditions under which they work are good, and unite for the purpose of having a registered label, that is all that would be necessary.

Mr. SPROULE. Would this apply to the Government Printing Bureau ?

Mr. RALPH SMITH. I do not know what the hon. gentleman (Mr. Sproule) is driving at.

Mr. SPROULE. I asked what I regard as a perfectly fair question. Just as we wished to know whether the Railway Act would apply to the Intercolonial Railway, so we wish to know whether this Bill will apply to the Government Printing Bureau.

Mr. RALPH SMITH. I did not catch the hon. gentleman's question. There is nothing in the Bill to make it specifically applicable to government work. But there is no objection to that, and I would be glad to see that provision inserted, so far as I am concerned.

Hon. JOHN HAGGART. Perhaps it is because I have not paid particular attention to this matter, but from the hon. gentleman's statement, I do not clearly understand the position. I do not understand why any corporation have not a right to register a trade mark or a design, and why they have not a right to enter into any arrangement they choose to make with parties who are manufacturing any article, as to whether they shall use the design. I do not think there is anything in the law at present that prevents that. I think that the Registration, or Design Act is broad enough to allow it. But if the object which the hon. gentleman has in his mind is to allow other than corporations, men who are not responsible parties, to register a design, in order that he may receive a benefit from it without being liable in any way to penalties to other parties—if that is the object, it would be objectionable. But if the object of the hon. gentleman in introducing the resolution is merely to give to a corporate body the right to register a design and to enter into arrangements with a manufacturer to use that design if he likes, there cannot be any possible objection to it.

Mr. RALPH SMITH. But the application covers every organized body. The hon. gentleman must remember that the majority of trades unions in this country are not incorporated. The application of this label will be allowed to all these bodies.

Mr. W. F. MACLEAN. Would the hon. gentleman say whether similar legislation has been introduced in any other country?

Mr. RALPH SMITH. Yes, legislation of this kind was passed twelve years ago in England, under the Copyright Act, covering every union incorporated or otherwise. The same provision is also made in an Act of the Congress of the United States.

Rt. Hon. Sir WILFRID LAURIER (Prime Minister). As I understand, the chief object of this legislation is to provide penalties against the unlawful use of this label. I would be disposed to agree with the hon. member for Lanark (Mr. Haggart); I do not see any necessity for it. But as I understand the principal object of the Bill is to provide penalties against the unlawful use of such a label. We are at the present moment committing ourselves to nothing in passing this resolution, and until we have the Bill before us founded upon this resolution, it is not possible to discuss the matter intelligently.

Mr. A. B. INGRAM. This Bill has been before this House on a good many occasions. It has passed this House on two or three different occasions, and was sent to the Senate, where it was thrown out, both when the Conservative party were in power and since the Liberal party have been in power. It seems to me a useless waste of time to introduce legislation of this kind from year to year as long as the government look upon it so unfavourably as they have done in the past. So far as the Bill itself is concerned, I do not wish to discuss it at this moment, but it strikes me that the hon. member for Nanaimo (Mr. Ralph Smith) will make very little headway with his Bill, judging from the tone of the House at the present moment. I think the government ought to give an expression of opinion as to whether they are favourably disposed towards the passing of this legislation.

Sir WILFRID LAURIER. We must see the Bill first.

Mr. INGRAM. It is the same old Bill.

Resolution reported, read the first and second time and agreed to.

Mr. RALPH SMITH moved for leave to introduce Bill (No. 10) respecting Labour Union Labels.

Motion agreed to, and Bill read the first time.

MOTIONS AGREED TO WITHOUT DISCUSSION.

For a return showing the value of vegetables imported from the United States, and entered at the ports of Montreal and Toronto, during the fiscal year ending the 30th of June, 1904; giving separately the values for the first and last six months of said year. Also a statement showing the value of canned, preserved or dried vegetables entered at said ports for the fiscal year; and the amounts of duties collected at both ports in the above cases.—Mr. Monk—by Mr. Bergeron.

For copies of all circulars or advices issued by the Intercolonial Railway governing the transport of hay, under the free transport Order in Council of 1904, and of all certificates signed by municipalities or individuals to whom hay was delivered thereunder.—Mr. Foster.

COMMUNICATION BETWEEN PRINCE EDWARD ISLAND AND MAINLAND.

Mr. A. MARTIN. Before the Orders of the Day are called, I wish to draw the attention of the government to the delay which occurs in the transmission of the mails from Prince Edward Island to the mainland. We find only to-day on the files in the reading room the newspapers published in the island a week ago, which means that for nearly a week the people of the province are without mail communication with the mainland. This I know is an old complaint, we have suffered from it for years. It seems to me that it was the duty of the government, seeing that the winter boats were unable to effect a crossing to have the route at the Capes in readiness. There appears to be the same unreadiness every year, to the great loss of the people of the province.

Rt. Hon. Sir WILFRID LAURIER (Prime Minister). Will my hon. friend pardon me? If he has any lengthy remarks to make, I would suggest to him that it would be more in order if he were to reserve them until the House is moved into committee. Of course, if he only wishes to put a question, there can be no objection to it.

Mr. ALEX. MARTIN. The question is whether the government are going to make further provision for improving the unsatisfactory communication between the province and the mainland? We have two boats, the 'Stanley' and the 'Minto.' The 'Stanley' is now getting very old. Every one knows that the 'Stanley' is not able to perform the work. I would like to know if the government intend to proceed with the construction of a new boat and if those yearly troubles are to be remedied.

Sir WILFRID LAURIER. I am sorry to hear that the service is not satisfactory. I was led to believe that is was more satisfactory than ever before, but if it has become unsatisfactory by reason of the fact of one of the boats getting old the matter will have to receive some consideration. Perhaps latter on I will give some answer to my hon. friend on this matter.

ICE JAM IN THE ST. LAWRENCE.

Mr. ANDREW BRODER (Dundas). Mr. Speaker. before the Orders of the Day are called, I wish to refer to a matter that I think should have the attention of the gov-

ernment. In the St. Lawrence river, below the village of Morrisburg, where I live, there is a very serious blockade of ice about seven miles long, the water has risen some six feet and unless something is done to avert it, serious damage will be occasioned to a great deal of property belonging to people who live adjacent to the river. In 18 years, I think, this is the fourth serious ice jam they have had in that vicinity, and once or twice considerable damage has been done. The dangerous feature of the present blockade is that it has occurred so early in the winter that if the cold weather continues and a heavy fall of snow comes it is difficult to tell what may happen. Previous to this the ice jams have occurred later in the winter and the spring coming soon after the commencement of the block the ice rotted and broke away. But, this ice jam commenced to form on the 9th of the month and now it extends from Woodlands to west of Aultsville, the channel being closed for a distance of seven miles. The snow comes down and forms what is called anchor ice and this blocks the river. The water is rising and endangering property along the banks of the river. It seems that the ice forms in the bays, and when it breaks it floats across the river, catches on the opposite point and then the formation of a bridge takes place. I was told by an individual who seems to have the facts in his possession that the ice has been cut on the American side in the bay and allowed to swing round. I do not know as to the truth of this statement, but this gentlemen told me that a day or two ago, and if it is so there ought to be some understanding between the Canadian government and the American government that this thing should not be allowed to reoccur. Those who understand the remedy say that if piers were built in the bay on the American side, the ice would not float out and this danger would be averted.

I take this opportunity of bringing this matter to the attention of the government. They ought to have an individual visit the place and see what the conditions are anyway.

RAILWAY ACT AMENDMENT.

Mr. E. A. LANCASTER (Lincoln and Niagara) moved the second reading of Bill (No. 2) to Amend the Railway Act, 1903.

Mr. A. LAVERGNE. (Translation.) I notice by the Orders of the Day that this Bill is not yet printed in the French language. In this case, I would advise the promoter of the Bill not to move the second reading until we have the French copy before us. It is desirable that we should have this Bill in French so that we may know its purport before discussing it.

Mr. LANCASTER. I may say in regard to that matter that I was informed by the translator to-day, who came to me for the purpose of telling me, that although the Orders of the Day showed that the Bill was not printed in French it was actually printed in both languages, and he wanted me to know it, so that I would not hesitate to go on with it this afternoon. The French translator said that although the Orders of the Day did not show it to have been printed in French it was as a matter of fact printed and distributed in both languages and he thought it was right I should know it.

Mr. SPEAKER. I can only accept the paper as I find it in my hands.

Mr. HAGGART. Several times Bills when printed in French and distributed, although not shown on the order paper, have been proceeded with.

Mr. LANCASTER. The French translator came to me in the library where I was looking up some books and said to me: 'Are you in charge of that Bill?' And when I told him that I was, he told me he thought it was right that I should know that the Bill had been printed in French and distributed several days ago, although the Orders of the Day did not show it.

Sir WILFRID LAURIER. There is no object in delaying this Bill whatever. If the Bill is printed in French I do not see why the matter should not be proceeded with, but, of course, Mr. Speaker, may only have the official paper before him and it may not show that the Bill has been printed in French. Can we not take up the next item and in the meantime ascertain whether the Bill is printed in French?

Mr. LANCASTER. I have been asked to allow the next Bill, to amend the Act respecting the Certificates to Masters and Mates of Ships, to stand.

Mr. SPEAKER. It appars from a copy produced that the Bill is printed in French. The hon. gentleman may proceed.

Mr. LANCASTER. Mr. Speaker, this Bill is to remedy a state of affairs, which, I think, every hon. gentleman in this House will agree must be remedied in some way. The Bill is aimed at protecting the lives of and preventing injuries to people upon highway crossings where railways cross upon the level of the highway. The law was laid down decisively a year ago last autumn by the Supreme Court of Canada in the case of McKay vs. the Grand Trunk Railway, which practically renders the section which I am seeking to amend by this Bill nugatory and of no effect at all. The section which I am dealing with is a section which has always provided for protection of some kind to people upon the highway on the rail level in thickly populated portions of cities, towns and villages and that legislation has existed since 1857. The first enactment was in 20 Vic., chap. 12, sec. 11:

——and that no locomotive or railway engine shall pass in or through any thickly peopled portion of any city, town or village at a speed greater than six miles per hour, unless the track is properly fenced.

That enactment was continued year after year in every consolidation of the railway law until 1892, when it was changed by substituting for the words 'unless the track is properly fenced' the words 'unless the track is fenced in the manner prescribed by this Act.' Hon. gentlemen will see that there was no practical change although there was a verbal change.

Mr. HAGGART. Is that the law now?

Mr. LANCASTER. Practically. The Supreme Court decided in the case of McKay vs. the Grand Trunk that it meant, that if they fenced the track against the adjoining owners of land and did not provide any protection upon the highway at all, they could still run as fast as they liked unless an order was obtained from the Railway Committee of the Privy Council, whose place is now taken by the Board of Railway Commissioners. The law was changed verbally, but not in effect in 1903, in consolidating the Railway Act so as to read:

No train shall pass in or through any thickly peopled portion of any city, town or village, at a speed greater than ten miles an hour,——

You will observe that they were permitted to run at the rate of ten miles an hour instead of six.

——unless the track is fenced or properly protected in the manner prescribed by this Act, or unless permission is given by some regulation or order of the board. The board may limit such speed in any case to any rate which it deems expedient.

Mr. HAGGART. What clause is that?

Mr. LANCASTER. Clause 227 of the Consolidated Railway Act, 1903, chap. 58. It is quite obvious that the decision of the Supreme Court still applies, the only difference as you will see being in the wording of the Act. They are not permitted to run at a greater speed than ten miles an hour unless the track is fenced as required by the Act, or as it now reads 'unless the track is fenced or properly protected in the manner prescribed in this Act.' This matter was discussed at great length last session when this Bill was sent to the Railway Committee and back again to the House, but nothing was done to remedy the evil. It is a very serious evil and the number of lives that are being lost and the number of people who are being injured in cities, towns and villages, by railways at unprotected railway crossings is very great. Although this Bill did go to the Railway Committee and although it was discussed in the House last session, I am afraid I shall be compelled in the discharge of my duty here to go into this matter a little more fully than I otherwise would, owing to the fact that this is a new parliament and that many of the gentlemen who are here were not here last session and would perhaps desire to hear this discussed at greater length than would be necessary if I were speaking only to those who were here last session. The decision of the Supreme Court is that all the protection we can get under this section is a special protection which the Railway Committee might order. It is true that in the case decided, the Supreme Court refer to the Railway Committee of the Privy Council, because at that time the Railway Commission was not in existence, and the Railway Committee of the Privy Council had the same jurisdiction as is now possessed by the Railway Commission. The Railway Commission is bound by exactly the same rules as those laid down by the Supreme Court, that is that they can give any protection they like at any place or any kind of crossing, but according to the decision in this case unless you get a special order for special protection at every crossing we are entitled to no protection whatever, at that place of intersection where the danger exists and where people are being injured or killed. This is the way the section has been construed by the Supreme Court as will be seen in Volume 34 of Supreme Court Reports, in the judgment of Mr. Justice Davies who gives his decision at page 94. I shall read one or two extracts from that decision in order to show that I am not taking a wrong view of that decision. I shall, however, preface this by saying that the effect of the decision is, that unless the track is fenced as against adjoining owners the company is liable, but if it is fenced as against adjoining orders, then there is no liability for an accident at a crossing no matter how fast the train may run unless an order has been obtained for special protection at the particular crossing. Mr. Justice Davies said:

The negligence which did cause or lead to the accident was found by the jury to be the speed at which the train was running over the street crossing and the absence at such crossing of a flagman or gates.

The contention of the plaintiff is that the speed at which the train was running was a violation of the statutory provision of the Railway Act because it was of greater speed than six miles an hour through a thickly peopled portion of the town of Forest, the railway track at the crossing of the street not being fenced as he contended in the manner required by the Act. The plaintiff further says that even if the Act has been complied with as regards fencing, the rate of speed in the absence of gates or watchman at the crossing was a matter at common law open to the jury to pass upon, and if they found it, under the circumstances, a dangerous rate and a cause of the accident the defendant company would be liable.

The Court of Appeal reached the conclusion that the proper construction of the statutory provisions with regard to the fencing prescribed

at the crossings and the rate of speed at which a train could run through a thickly peopled portion of any city, town or village, requires either a fencing across the highway at the crossing, so retaining the travelling public in a place of safety while the train is passing, or the stationing of a watchman or the maintenance of a reasonable fence sufficient for the purpose, or the reduction of the speed of the train to the permitted maximum of six miles an hour. As the company had not adopted any of these precautions which the court decided were obligatory by statute they held it liable under the finding of the jury and dismissed the appeal.

I pause here to remark, Mr. Speaker, that I think nine out of ten lawyers in Ontario at all events understood the law to be as the Court of Appeal pronounced it, that this section was not idle, was not meant to be nonsense, was not placed on the statute-book and reiterated from year to year from 1857 for the mere sake of employing someone to print a few more words; that it was intended to mean something and did mean something, and that it laid down the rule that a train should not exceed six miles an hour unless the track was properly fenced, and that a proper fence would be a fence to protect the people in regard to the subject-matter of the section, which is the protection of life upon the highway, because the section is dealing only with the danger of travelling along a highway where railways intersect the highway at rail-level. Every one believed that the Court of Appeal of Ontario decided that the section meant this, and as the railway had exceeded six miles an hour and had provided no protection therefore they were liable.

I am here to say that we must be practical in this House, and that our legislation must deal with things as they are. You may argue that a railway does not want to kill people, but unless you pass a law making a railway liable the railway will not worry much whether it does or does not kill people. There is no sentiment about a railway except the wish to make all the money they can, and they will run their trains as fast as the public demand in order to make them pay and will not bother about any ones life unless you have a law which will take some money from their pockets, and unless there is imposed on the railways a liability, definite, clear and certain which can be enforced without the necessity of having to go across to England as the parties in the McKay case started to do; they will not adopt precautions. A person injured or the relatives of a person killed should be able to recover damages as in other cases of negligence when the company does what it ought not to do, and unless you have such a definite and clear responsibility as I have indicated you can get no practical benefit in regard to the regulating of the speed of trains.

Mr. Justice Davies in reversing the judgment of the Court of Appeal goes on to say:

A careful reading and consideration of the whole Railway Act and its general scheme and purpose has lead me to the conclusion that the construction placed upon these sections by the Court of Appeal in this case was not the proper one, and that the sections relied upon by that court in its judgment do not either require or authorize railway companies, without the previous order of the Railway Committee of the Privy Council, to fence highways or place gates across them where they are crossed at the level by the railway, or compel them to place flagmen at these crossings to warn the public when trains are crossing.

In my judgment parliament has by the 187th section of the Railway Act vested in the Railway Committee of the Privy Council the exclusive power and duty of determining the character and extent of the protection which should be given to the public at places where the railway track crosses a highway at rail-level.

That brings us to the issue which is really the serious thing in this matter. According to that decision—and I am not here to say that it is not the correct construction of the law and a correct decision, although I have heard it questioned—it is a decision of the Supreme Court of Canada, and every court in Ontario and every other province is bound by that decision until it is reversed. It can be reversed in two ways, either by the judicial committee of the Privy Council in England or by parliament reversing it as I am indicating in my amendment. The issue is: Is it intended that there shall be no more protection in the thickly peopled portion of cities, towns and villages than there is anywhere else? That is what that decision amounts to, that is unless you get a special order for a special protection at every street in every part of every city, town and village where life is endangered by the rapid running of trains; they can run as fast as they like, can exceed the statutory limit which used to be six miles and is now ten miles an hour, can absolutely ignore all rights of the people and yet evade all liability. The section is nugatory, because it is dealing entirely with the protection of people at crossings where railway trains run through thickly peopled districts.

Mr. HAGGART. Is the wording of the section in the present Act, the Act of 1903, similar to that of the Act on which the Supreme Court gave its decision?

Mr. LANCASTER. The operative part is the same but the statute of 1903 has some other words added explicitly saying that the board can order any protection they like and regulate the rate of speed. But I point out that the only serious objection made to this section of the Bill in the Railway Committee last year by the representatives of the railway was that that could be accomplished by other sections of the Railway Act. It was pointed out that there is a portion of the Railway Act devoted to the powers of the board and that they have ample power

to order protection without these words. The effect of the legislation is exactly as it was when the Supreme Court decided this case a year ago last December.

The result is that in the laws of this country, as construed by the Supreme Court of Canada, there is no protection to-day for the public in the thickly-peopled portions of cities, towns and villages, unless you get a special order from the Board of Railway Commissioners in each particular case. Now, what does that involve ? In the first place, every city, town or village has to make a special application in regard to every crossing—practically to bring a lawsuit against the railway company in regard to every crossing where there is not now protection, and the railway company can oppose the application and fight it out here in the city of Ottawa before the Board of Railway Commissioners ; and then there may be an appeal from that body to the Governor in Council. There must be a separate application in regard to every crossing. We have no law to meet the case unless my amendment, or some amendment like it, is adopted. You have to file plans and bring your witnesses and fight out your application for each particular crossing. That, I repeat, was not the intention of parliament. In my opinion, the Court of Appeal properly construed the object of parliament in making the law from 1857, when it laid it down that in the thickly-peopled portions of every city, town and village the railways should not exceed a speed of six miles an hour unless they afforded some kind of protection. By this section of the Act parliament intended to deal with that class of case which is so common that it requires a general rule. The thickly-peopled portions of cities, towns and villages require more protection than the open country, where the same obstructions to the view do not exist, and where there are not the noises which prevent approaching trains being heard. I said at the outset, and I repeat it, that there are too many lives being lost and too many people being injured by the railways at these crossings—a great many more than are necessary. This would not be the case if the railways were required to put in some protection. My Bill of last session was sent to the Railway Committee against my desire, but by the decision of the majority of the House ; and what were the objections urged against it there ? There were three objections, two of which, I am glad to say, I have been able to avoid by my present amendment. The first was this. I thought we should define what a thickly-peopled portion of a city, town or village was, that is we should say, within the incorporated limits of every city, town and village. But it was said that there were sections within the corporate limits of every city, town and village which were not so thickly-peopled as to make that necessary—that there were open spaces where crossings did not require any greater protection than in the country. And so the section, as I propose to amend it, will read :

> No trains shall pass in or through any thickly peopled portion of any city, town or village, at a speed greater than ten miles an hour, unless the track is fenced and properly protected in the manner prescribed by this Act.

My amendment is first to strike out the word 'or' and insert the word 'and' instead. By the decision of the Supreme Court the railway company has only to fence against the adjoining owners ; and unless you get a special order from the Railway Committee of the Privy Council, or from the Board of Railway Commissioners, you are not entitled to any other protection. I contend that unless the word 'or' is struck out and the word 'and' is substituted, the railway company is not obliged to provide protection so long as the track is fenced against the adjoining owners, though that may have nothing to do with the proper protection of the crossing. I cannot help saying that I think it was unintentional on the part of the Hon. Mr. Blair, who was in charge of the Railway Bill during its passage through this House, that the word 'or' was used instead of the word 'and' ; because, according to the decision of the Supreme Court, it does not compel the railway company to afford any protection at the crossing at all. Even if you get an order from the Railway Commission requiring the company to erect gates or put a watchman on, or afford some other kind of protection, and the company does not comply with that order, but only fences the track against the adjoining owners, it is not liable. Therefore, I propose, by my amendment, that the railway company shall be bound to fence the track against the adjoining owners and shall also be bound to afford protection at the crossings in whatever way the law directs.

The second objection urged against my Bill of last year in the Railway Committee was that it made provision only for a watchman or a flagman, who was, I thought, the best possible kind of protection—not an inanimate gate, but a man who, on the approach of a train, could direct the traveller's attention to it, and say : 'Hold on, the express is coming down in a minute or two.'

That would be the best protection. But it was argued by the usual representatives of the railways in the Railway Committee that it would be a fearful expense to provide these watchmen, that there were cheaper ways of affording protection, such as automatic or other gates. They said my Bill should not pass, because it limited the protection to watchmen. The Minister of Railways raised that objection in this House, and said there were better means of protection than watchmen. True, these gentlemen did not suggest or point out any other remedy. But I recognize the force of the suggestion that the railway companies

should have the right to provide either gates or watchmen, as they see fit.

I have given into them this year, and am only asking that the railway companies should provide either watchmen or gates. Where they put in gates, they need not employ watchmen, but if they do not want to use gates they must employ watchmen. They have to do either the one thing or the other or else keep their speed down to ten miles an hour. If they keep their speed below ten miles an hour then they will not be responsible should they run into anybody, and they need not put up a gate or employ watchmen. The railway companies, however, urged very strongly that they must run at a fast rate of speed, and consequently the minimum rate was raised from six to ten miles an hour. I am willing to take that rate as the minimum, but if they run beyond that rate they must provide some protection. In every case, the accident is due to the fast rate of speed which prevents people from seeing or hearing a train coming in time to avoid it. In the village of Grimsby, two years ago, three young people who were walking home from church at eight o'clock in the evening, shortly before Christmas, were hurled into eternity by a train which was running over fifty miles an hour. The train hands admitted a speed of forty-five miles and we may safely conclude that it must have been at least fifty. These young people were waiting for a freight train to cross, and were struck by another train coming in an opposite direction. There could be no suggestion of suicide, they were all trying to keep out of the way, but could not see or hear the coming train in time to avoid it. Had it been going at the rate of ten miles an hour they would certainly have escaped. In the Mackay case the rate of speed was about twenty miles an hour, which the jury found unreasonable, and if it were not for the construction put upon the law by the Supreme Court, the verdict would have stood. This matter is one of great importance. Last year my hon. friend the Minister of Justice acknowledged that there was a grievance and that something should be done, but another twelve months have rolled around and nothing has been done, and nothing will be done until you force the railways to furnish adequate protection under severe penalty. We frequently have the contention raised that all railways should be compelled to get off the level—that they should either go underneath or bridge over the highways. Were I to go that far, I would be told that that would be imposing on the railway companies an enormous expenditure. Mr. Justice Davies, in giving his decision, acknowledged that in England the law is what we would like to have it here, but he added that as the population there is more dense and the railways longer in existence, greater precautions are required. He went on to say:

No negligence was found or proved with regard to the fencing and if my construction of the Act is correct there was none, it being admitted that on this construction the fences were all right. That being so the rate of speed at which the train could run across the level highway crossing was a matter solely for the determination of the Railway Committee, as was also the determination of the kind, character and extent of the protection which either by gates, watchman or otherwise, should be provided for the travelling public.

In England the railways are not allowed to run at all on the level across a public highway. I do not say that we should go that far, although I know that if I did I would be more popular with many newspapers, which take that view. There is another view to be considered, and that is the desirability of having some clearness and certainty in our legislation. People should not be compelled to go from court to court and even across to England in order to find out what an Act of parliament really does mean. We want our legislation so drafted that any man of ordinary intelligence can tell without doubt what is the law. But in this Mackay case, what happened? Mr. Justice McMahon, a pre-eminently able judge, decided in favour of the plaintiff, and his decision was upheld by the full Court of Appeals of Ontario, comprising five judges. Mr. Justice Girouard of the Supreme Court took the same view, but the other four judges of that court reversed the decision. It appears now that the Mackay case has been settled. It appears that when the plaintiff undertook to appeal to the Privy Council, the railway company thought it better to settle his claim rather than run the risk of having the decision of the Supreme Court reversed. They knew the case, and they were afraid that the Privy Council would decide that the Court of Appeal in Ontario was right. They did not want the judgment disturbed, and they paid the claim. But the effect of it is that, even though a person is killed or injured by a train running at more than ten miles an hour through the thickly peopled portion of any city, town or village, his administrators or he cannot recover damages unless a special order was passed for protection of the crossing at which the injury took place.

Suppose that a man is accustomed to drive into this city by Wellington street. And suppose that, on Wellington street, there is a railway crossing which is protected by gate or watchman under order of the Railway Commission. But one morning the man, instead of driving in by Wellington street, drives in by another road where also there is a railway crossing. Is it not reasonable that he should expect the same protection and to be stopped at that crossing by a gate or watchman as in the case of the road to which he is accustomed ? May he not fairly suppose that streets leading into the same city will

be protected in the same way, and that the lives of passers-by will not be dependent upon their knowledge of the special local conditions ? To whom does the highway belong ? Who has the first right in the highway ?

Mr. W. F. MACLEAN. The King's subjects.

Mr. LANCASTER. Certainly, the King's subjects, as my hon. friend says. If you draw an indictment against a person for obstructing the highway, you charge him with preventing His Majesty's liege subjects from having free access to and free passage on and along that highway. The whole object of the highway is to benefit the King's subjects. When, to open up the country, we encourage railways to build and allow them to cross highways on the level, we give them license to use the highway—not to control or obstruct it. The people passing along the highway have the right to pass there safely. If the railway is given a license to cross, it should be compelled by parliament to make the crossing as little unsafe as possible. Of course, it cannot be made absolutely safe, but nothing that can be suggested by any person in this House or out of it should be left undone to make the highway safe for the people who have to use it.

The section as it stands means nothing—it has no practical effect. Crossings need not be protected unless there is a special order of the Railway Commission to that effect. And, before such an order can be had, what must be done ? I have here the rules of the Railway Commission, issued recently. They are rules such as those of the High Court of Justice of Ontario. You must practically make out a statement of claim, employing a lawyer to draught it so that it will not be demurrable, but will stand attacks from the keenest railway lawyers; this must be served and filed; they put in their answers; you put in a reply; and a time must be fixed for the hearing, and you must come to Ottawa and press and try the case. I contend that the members of this House ought to be able to pass a section such as the one that I propose that will cover the cases and give effectual protection to the people without all that expense and trouble.

Hon. H. R. EMMERSON (Minister of Railways and Canals). The consideration of this section of the Railway Act has claimed a good deal of the time of this House in a former parliament, and certainly consumed a great deal of the time of the committee to which the Bill at that time was referred. I think my hon. friend (Mr. Lancaster) makes too much of the idea that if one wants the Railway Commissioners to deal with this subject, which is entirely within their jurisdiction, he would have to come to Ottawa and make a special application in every case. I am surprised he has not referred to the Act which created the Commission. He certainly has not studied its provisions. Parliament, in its wisdom, delegated to the Railway Commission the powers which were formerly exercised by the Railway Committee of the Privy Council, among them the power to deal with this subject of crossings. Section 227, which my hon. friend seeks to amend, states in very clear terms :

> No train shall pass in or through any thickly peopled portion of any city, town or village, at a speed greater than ten miles an hour, unless the track is fenced or properly protected in the manner prescribed by this Act, or unless permission is given by some regulation or order of the board. The board may limit such speed in any case to any rate which it deems expedient.

This section recognizes the jurisdiction and the duty of the Commissioners to deal with this point. And, when giving that power to the Commissioners, parliament saw fit to make further provision in connection with the exercise of the powers thus given. Under section 24 of the Railway Act, it is provided :

> The board may, of its own motion, or shall, upon the request of the minister, inquire into, hear and determine any matter or thing which, under this Act, it may inquire into, hear and determine, upon application or complaint, and with respect thereto shall have and may exercise the same powers as, upon any application or complaint, are vested in it by this Act.
>
> 2. Any power, or authority vested in the board under this Act, though not so expressed in this Act, be exercised from time to time, or at any time, as the occasion may require.

Section 23 of the Act, preceding the section I have just read, says:

> The board shall have full jurisdiction to inquire into, hear and determine any application by or on behalf of any party interested.

I need not take up the time of the House by reading the section, which recites the full powers of the board. But as will be seen by section 23, it was recognized by parliament that this matter could be dealt with outside and apart from any particular application; that in a sense it did not require an individual, or individuals, or even communities, to make application to the board; but that of its own motion the board could take into consideration the whole subject, and make special provision regarding this or that particular crossing. Now it would be absurd to expect that you could frame a section that would be properly applicable to every railway in this country, it would be absurd to require that it should be so applicable. Because we have railways and railways; we have railways in many sections of the country where there is only one train a day, we have other railways along which scores of trains pass daily. This House could not expect to frame a regulation or a section of the Act that would be applicable to all alike.

Mr. W. F. MACLEAN. Why not ?

Mr. EMMERSON. Because the conditions are different, because circumstances do not require it; and under the law and policy adopted by this parliament in the Railway Act of 1903, they gave to this board the special power of dealing, or legislating, if you will, respecting the different crossings and different railways throughout the land. They practically gave the board the power of legislating, with the circumstances of each particular case before them; and the board, with full knowledge of the requirements and needs of the locality in question, can very easily and very readily frame a regulation or pass an order to meet the difficulty, and the circumstances and conditions of each case, removing any grievance and making the lives of the people safer. In this way the board could gain its object without doing any great injury, as would be the result if you had a hard and fast law applicable to every railway in the country. The Act says: 'The board may of its own motion, or shall upon the request of the minister' deal with any grievance arising with respect to any crossing. Previous to passing the Act of 1903, the usual course was to make application direct, I think, to the Department of Railways and Canals, and then these matters were referred to the Railway Committee of the Privy Council. The evidence could be heard, either orally, or written documents could be placed before that committee dealing with the matter. They had full knowledge of all the circumstances, they could make special orders, and in that way this difficulty has been solved in the past. The law of 1903 merely created another tribunal, giving them even greater power, giving them full power to deal with these questions, and charging them with the duty of dealing with any alleged grievance after inquiring into all the circumstances of the case. Now last winter exception was taken to this fact because it required you to deal at once regarding the rate of speed. There is no one at all familiar with the running of railway trains who is not aware that there are towns and communities where the number of crossings is so great that it is necessary to take special care, that special safeguards should be provided, that special watchmen should be required; while a neighbouring crossing would not need the same care or attention. The conditions, I say, are different; and I think that parliament very wisely created a body to deal with this very question, a body that can have expert evidence before it, a body whose officers are charged with the duty of inquiring into grievances such as my hon. friend would seek to remedy by his amendment. Of course it is important in the public interest that great care should be taken by parliament in making regulations for railways that run through cities and towns. Parliament has recognized that, and has provided means whereby the public can be protected, and is protected, whereby the lives of the people are protected. It seems to me there could be no more efficient way of doing this than the mode that parliament has provided in this instance.

It is only two years ago that parliament decided on this policy of regulating railway crossings by a board of commissioners. That board has only been in existence a year and a half, and I think it has discharged its duties well and wisely, and has given very great satisfaction. I do not think my hon. friend has shown any cause why the powers of the Railway Commission should be in any way limited or restricted. There has been no good reason shown by him why we should take from them the right to regulate this very matter. You might as well say that here we shall have a special Act relating to freight tariffs. Provision is made whereby that commission can regulate freight and passenger tariffs. Surely that board is much more competent to deal with that matter, surely that board can deal with it much better than either this House or a committee of this House. The policy has been adopted. Why should it be changed? I think my hon. friend has entirely failed to give any good or substantial reason why it should be. We have listened to him with pleasure this year as we listened to him last year not merely on the floor of this House but in the Railway Committee room. He certainly entertained us and——

Mr. LANCASTER. He wants to convince not entertain you. Entertaining is no good.

Mr. EMMERSON. My hon. friend has entirely failed to convince us, but I was willing to recognize his success in entertaining us.

Mr. W. F. MACLEAN. It was fine entertainment for that family of three people who were killed at St. Catharines.

Mr. EMMERSON. Unfortunate accidents occur unquestionably and I am not in any sense seeking to avoid protecting the public in respect to railway accidents. I am not doing that but I am endeavouring to point out that parliament has provided the machinery and the means whereby the public can be protected.

Mr. LANCASTER. The machinery is not working.

Mr. EMMERSON. The machinery is in excellent working order.

Mr. LANCASTER. It is not doing anything.

Mr. EMMERSON. The Act is there; the power is there. The question, of course, as to whether there could be a general section that would apply uniformly to the whole country I think is one that would be very difficult to solve.

Mr. HAGGART. What would ?

Mr. EMMERSON. It would be very difficult to have a general law affecting crossings and the speed of trains that would be applicable to the various conditions that are to be found in connection with the railways of Canada. There are always questions arising as to the interpretation of Acts of parliament. My hon. friend has read to us to-day the decision of the Supreme Court, and in that way he has demonstrated that able jurists differ as to the interpretation to be put upon statutes.

Mr. LANCASTER. Then why not make it clear ?

Mr. EMMERSON. Precisely ; we have made it clear. It is clear because we have given power to the Railway Commissioners to deal with the matter. They can make special order. Section 227 of the Railway Act specially says :

The board may limit such speed in any case to any rate which it deems expedient.

They may go below the ten miles an hour limit ; in fact, the board have every jurisdiction and control over speed, and under these conditions I do not see why we are called upon to in any way interfere or limit their powers in that respect. They can certainly deal with the special conditions and circumstances very much better than the members of this House can. If we could have every type of conditions, and if we could have all the circumstances relating to each particular crossing in the country, we might classify them and apply to certain conditions certain kinds of protection and safeguards while in reference to another classification of conditions there would be an entirely different set of safeguards.

Mr. HAGGART. Does the hon. minister hold that the board can alter or amend by regulations or rules clause 227 ?

Mr. EMMERSON. If my hon. friend (Mr. Haggart) understood me to make that statement he certainly misunderstood me.

Mr. HAGGART. I understood the hon. gentleman to say so.

Mr. EMMERSON. What I was trying to point out—perhaps I was doing it very imperfectly—was that the board have power to legislate in respect to every particular crossing in Canada in connection with every particular railway. They have complete power under that section 227 to go further than does my hon. friend with his amendment. Under section 227 the board can pass legislation in respect to the speed, they can legislate upon conditions, they can widen out their orders, they can impose terms and they can make the conditions more binding than even the section of my hon. friend. That in no way amends section 227, but when section 227 delegated and wisely delegated to the commissioners these legislative powers, because they are in a sense legislative powers and powers that can be exercised or legislation that can be enacted with a full knowledge of the conditions and circumstances, it enabled them more successfully to frame their regulations than we could by any general regulation such as is proposed by my hon. friend. Section 23 of the Railway Act provides :

The board shall have full jurisdiction to inquire into, hear and determine any application by or on behalf of any party interested ;

(a) Complaining that the company, or any person, has failed to do any act, matter or thing required to be done by this Act, or the Special Act, or by any regulation, order or direction made thereunder, by the Governor in Council, the board, the minister, or any inspecting engineer, or has done or is doing any act, matter or thing contrary to, or in violation of this Act, or the Special Act, or any such regulation, order, or direction ;

(b) Requesting the board to make any order, or give any direction, sanction or approval, which by law it is authorized to make or give ;

And the board may order and require any company or person to do forthwith, or within or at any specified time, and in any manner prescribed by the board, so far as is not inconsistent with this Act, any act, matter or thing which such company or person is or may be required to do under this Act, or the Special Act, and may forbid the doing or continuing of any act, matter or thing which is contrary to this Act, or the Special Act, and shall have full jurisdiction to hear and determine all matters whether of law or of fact, and shall, as respects the attendance and examination of witnesses, the production and inspection of documents, the enforcement of its orders, the entry on and inspection of property, and other matters necessary or proper for the due exercise of its jurisdiction under this Act, or otherwise for carrying this Act into effect, have all such powers, rights and privileges as are vested in a Superior Court.

Now under that clause it will be recognized that parliament intended that this board should have ample power to not merely frame regulations, but to enforce them.

The decision of the board upon any question of fact and as to whether any company, municipality or person is, or is not, a party interested within the meaning of this section, shall be binding and conclusive upon all companies and persons and in all courts.

My hon. friend goes on to say that you must make application, you must employ lawyers, you must go before them as you would before any court. Under the section which follows, the board may act of its own motion without any application, if it comes to their knowledge in any way either by the report of its engineers, a simple letter or a verbal utterance that a grievance exists. A verbal utterance would be sufficient to put the machinery in motion or—

They shall upon the request of the minister, &c.

If an applicant were to come to the Department of Railways and Canals, if com-

plaint were made with respect to the crossing over here in Hull or at any point in Canada the Minister of Railways, under this Act, has the power to direct the board to deal with the matter, not at the expense of the applicants, not at the expense of the people of the country; the board can deal with it regardless of individuals, regardless of corporations, simply as a duty which has been imposed upon them by the parliament of Canada, and I am sure that the contention of my hon. friend (Mr. Lancaster) that it would be a laborious task, that it would be an expensive luxury to have these remedies applied by the board is certainly without foundation. My hon. friend, I am sure will agree with me in the statement that simply sitting down and writing the facts and addressing a letter to the Department of Railways and Canals is not very expensive. The party writing would be put to the expense of providing stationery, but he would not even have to place a postage stamp upon the letter; he would simply have to mail the letter and the machinery provided by this Act would be set in motion and the remedy can be applied.

Mr. LANCASTER. Nothing has been done; it is in the same condition as it always was.

Mr. EMMERSON. Nothing has been done?

Mr. LANCASTER. It is in the same dangerous condition it always was.

Mr. EMMERSON. There is some particular crossing which my hon. friend has in his mind?

Mr. LANCASTER. The one I referred to.

Mr. EMMERSON. My attention has not been directed to any crossing. It is quite apparent, in reviewing the whole facts, that parliament adopted a certain policy; parliament concurred in the enactment of a law giving certain power to this tribunal. That tribunal is efficiently exercising its powers and jurisdiction. My hon. friend, I think, has not shown any good and sufficient reason why there should be a reversal of that policy or why we should take from this board powers which it now enjoys. It does not seem, to me at least, that his proposed amendment would in any sense meet the difficulty as well as it has been met to-day by the present powers of the board.

Mr. G. W. FOWLER (King's and Albert). Mr. Speaker, the hon. minister, while he denied that the hon. member for Lincoln (Mr. Lancaster) had been able to convince the House, was willing to admit that he had been somewhat entertaining. Candour compels me to say that the minister has been neither convincing nor entertaining. The hon. gentleman has not ventured to deny the absolute necessity which exists for some measure to be taken in order to protect people at level crossings in this country. My hon. friend is a man of considerable nerve, but he would scarcely have nerve enough to make a denial of that proposition. There is not a week but that you read in newspapers of the death of some person at these level crossings. In my own town, through which the Intercolonial Railway, over which the hon. gentleman presides—and so successfully (?) presides—only the other day a young lady crossing the track was killed by a train which was running at a speed of between 40 and 50 miles an hour through the very heart and business centre of the town where hundreds of people cross the track during the business hours of the day, where there was no protection whatever, neither gates nor watchman. Trains are allowed to come in there at all rates of speed, from 25 miles an hour up to 60 and 70 miles an hour. A number of other deaths have occurred at this same crossing. I have here in the Stratford 'Daily Herald' of January 28, the report of the killing of a man by a Grand Trunk Railway train at a crossing a few miles east of a little town called Shakespeare and the coroner's inquest in that case is now going on. This is a matter of very grave importance. These railways are soulless corporations; they are more interested in getting dividends than in safeguarding the lives of the people. We, as representatives of the people, have that duty to perform, and it is for us to see that legislation is enacted that will prevent the railways from making this wholesale slaughter of human life. I have given some attention to this matter and the result of my observation is that I do not believe there is a single instance of a person being killed by a railway train in which the fatality was not directly or indirectly the result of carelessness by some person. Trains are allowed to pass through settlements at speeds varying from 40 to 60 miles an hour, right in the heart of thickly settled towns or villages. It is outrageous. What is the remedy suggested by the minister? He says that this Railway Commission will look after this matter. This Railway Commission does not strike me as being in a position to look after anything. It may have a tail but it has no head, and the head is supposed to be the thinking and acting and doing part of anybody.

The Railway Commission is overloaded with work at the present time; and yet the hon. minister would have us believe that this commission is ready to visit all the towns from the Atlantic to the Pacific and inspect the level crossings wherever necessary. Was there ever so absurd a contention put forward by a man in his position? The hon. minister cites section 24 of the Act, which provides that the board may of its own motion do so-and-so. As I understand there are many pressing cases at the present time which the Commissioners have not adjudicated upon; and yet the hon. gentleman would leave this whole matter to their

action. Now, this difficulty could be wholly remedied by the adoption of the very effective general clause proposed by my hon. friend from Lincoln. The minister would have us believe that it is the proper thing to have special legislation for each particular case. We do not want special legislation in this country; we want general legislation, which will treat all places alike. What special circumstances can exist in any particular place to justify it being exempted from the operation of the general law? My hon. friend never gave us any reason to show why any town or village in this country could justly be exempted in this way, because he could not. There is no case which a general Act could cover so well. What does the hon. member for Lincoln wish to do? He simply wishes this House to make a declaration which will state the meaning of the law clearly and distinctly so that there would be no doubt about it. The hon. minister put it forward as a reason why this legislation should not pass, that great judges had differed as to the meaning of the present Act. Could there be a stronger reason in favour of the proposed amendment, in order that these great minds may not differ. The commissioners, in their rules and regulations, require that every proceeding taken before the board under the Act shall be taken either by the applicant or his solicitor; and in cases relating to level crossings two or three years might elapse before a judgment could be got, if we are to judge by the past history of the Railway Commission. This could all be remedied by adopting the very effective clause proposed by the hon. member for Lincoln, who is entitled to a hearty meed of thanks from the people of this country not only for what he has already done in connection with this matter, but for the legislation which he introduced in the last session of parliament, and which the government, although they opposed it at first, were at last brought to believe in and adopt. I fail to see that that hon. minister has answered the argument of the hon. member for Lincoln in any way, and I think this Bill should pass.

Mr. W. F. MACLEAN (South York). Mr. Speaker, the Minister of Railways and Canals has laid down the doctrine that we should not classify incidents, and having classified them, meet them by a general proposition. He has taken for granted that once we have this Railway Act, no amendments are to be brought forward. Now, I take it that that Railway Act will be ineffective, if it is not constantly reinforced by new legislation; and there is good reason for the amendment proposed to-day. It deals with a number of cases that are peculiarly alike—cases that may occur in incorporated villages, towns and cities, and for which there is sufficient cause for a general Act governing them. The hon. Minister of Railways and Canals says we should leave these matters to the commissioners. It is true that they might make a general rule governing them; but we do not know when any such remedy will be applied by the commissioners, and so we come to parliament for such a general rule. This is only one incident. There are hundreds of grievances in this country that could be speedily and easily remedied by amendments to the law—by inserting more definitions in it. I contend that a splendid case has been made out in favour of this amendment, which is in the direction of protecting the rights of the people. The lives of the King's subjects are of more value than the interests of the railways. The people are being mowed down every day. In the city of Toronto the other day there was a collision at one of these crossings between an electric car and a railway train by which five or more people were killed; and the same thing is happening in other parts of the country. The people look to parliament to make the law and the Commission to enforce it. We are at the mercy of this commission, which is to-day without a head. Therefore parliament ought to pass a law defining what protection shall be provided at crossings. That is a reasonable proposition, and the principle under which we bring it forward is the general principle that the more experience we have of this Railway Act, the more necessity there will be for parliament to introduce additional definitions into it. On that ground, I say parliament is well within its rights in constantly amending and extending the operation of this Act, and not leaving these matters to the mercy of the railway commissioners. I trust that the House will be prepared not only to make this amendment, but many other amendments to that Act, whenever a general proposition can be outlined and put into a Bill. The hon. member for Lincoln (Mr. Lancaster) has shown that these incidents are all of one kind, and that the public rights can be protected by a general law, instead of being left to the mercy of either the courts or the railway commissioners. I am sick and tired of hearing talk about going to the courts and to the Privy Council to obtain protection for the rights of the people instead of going to parliament. This is the place for redressing grievances and protecting the rights of the people; but we find hon. gentleman opposite, as usual, against the rights of the people, and in favour of increased rights for the railway companies.

Mr. L. P. DEMERS (St. John). This doubtful clause, 227 of the Railway Act, was introduced in 1892 by the hon. member for Lanark (Mr. Haggart), then Minister of Railways. There can be no doubt as to the meaning of that clause :

No train shall pass in or through any thickly peopled portion of any city, town or village, at a speed greater than ten miles an hour unless

the track is fenced or properly protected in the manner prescribed by this Act.

Well, the manner prescribed by the Act is stated in clause 199 of the same statute, which corresponds with a similar clause in the Act of 1888. Clause 199 says :

The company shall erect and maintain upon the railway, fences, gates and cattle-guards as follows :—

Fences of a minimum height of four feet six inches on each side of the railway.

Cattle-guards, on each side of the highway, at every highway crossing at rail-level by the railway. The railway fences at every such crossing shall be turned into the respective cattle guards on each side of the highway.

I see no doubt as to the meaning of the clause, and the Supreme Court held that its meaning was undoubted. There is nothing in the law to oblige a railway company to put up gates when the railway crosses streets, and I do not see how we could amend the law. Everybody agrees that we cannot legislate to decrease the speed of railways. Railways are built for the purpose of giving greater facilities and more speedy communication, and we should not pass a law which would have for its object the decreasing of their speed. All we should do is to regulate the speed and protect the public. My hon. friend from Lincoln (Mr. Lancaster) submits to this House a proposition which, though the principle be good, is not practicable. Every one will admit that in certain places there should be gates. Where there is a large population, no doubt it is necessary that a railway company should maintain gates, but in other places, even in villages, that necessity does not exist to anything like the same extent. Take my own town, the town of St. John ; I know that the people there would like to have gates at some crossings, but they are not asking for them at every street. That would entail a heavy expenditure on the railways, and is not required by the people. The people would be satisfied to have gates only on the important streets, where the circulation is large. But if we should adopt the law proposed by my hon. friend from Lincoln, we would impose on railway companies the obligation of maintaining gates across every street. I think that would be going too far, and is not required by public necessity. It would be wiser for us to leave this question to the Railway Commission, which has power to legislate on these matters. Whenever a question arises as to the necessity of having gates in any particular locality, the Railway Commission is the best tribunal to decide the matter. For my part, I cannot see why, because in some streets gates may be required, we should compel railway companies to put them up and maintain them in every street. It has been suggested that the Railway Commission have no jurisdiction to compel companies to put up and maintain gates, but if we will look to clauses 186 and 187 of the Railway Act we will find that, not only have the Railway Commissioners the power to compel the railway companies to adopt that means of protection, but they may compel a company to carry its railway underneath or over a highway. This is clearly stated in section 186. Then take section 187, and you will find that section 186 applies, not only to new railways, but to railway crossings already in existence. This shows that the Railway Commission have full power to apply the requisite remedy. Why, therefore, should we proceed to legislate upon the subject before we have ascertained that the Railway Commission are unable to perform their duties ? Where is the evidence that any complaints have been submitted to the commission and that the commission have failed to apply a remedy ? I cannot see any evidence which would justify our intervening. Were I to see any doubt in favour of our adopting such a law as our hon. friend proposes, I would be inclined to give his proposal the benefit of the doubt, not having any particular inclination in favour of the railway companies as against the public.

Mr. W. M. GERMAN (Welland). There can be no doubt that there exists a crying grievance throughout the country with regard to the speed at which railway trains run through thickly-peopled portions of towns and villages. I know that the grievance exists in the county I have the honour to represent, and some means should certainly be devised to overcome it. Whether the means proposed furnishes the proper remedy or not can be left to the Railway Committee to decide. No doubt the Railway Commission has power to enforce rules and regulations regarding the speed of trains and the protection that shall be afforded the general public, but the difficulty that exists is this : The Railway Commission does not act, and the people do not bring the matter to the attention of that commission. It would take a very long time indeed to get the Railway Commission to decide on all the questions in dispute between the railway companies and the public regarding what protection should be placed at the different highway crossings in the thickly-peopled portions of towns and villages.

Mr. HAGGART. Would you not think it was the duty of the Railway Commission to make general rules and regulations with regard to crossings ?

Mr. GERMAN. But the Railway Commission have not made any such rules, and we have no expectation that they will.

Mr. HAGGART. If my hon. friend will read clause 25 of the Act, he will find that it is the duty of the Railway Commission to make these rules.

Mr. GERMAN. Well, all I can say is that they have not done, and, from present

appearances, they are not likely to do it very soon. There is strong complaint, throughout Ontario at any rate, from many of the thickly-peopled portions of towns and villages, that proper protection is not afforded the public. For my part, I am in favour of this Bill going to the Railway Committee. If, in the meantime, the Railway Commission will meet and promulgate satisfactory rules and regulations, these should be accepted as sufficient; but unless they do so, I think this parliament should pass a law to overcome the difficulty regardless of the action of the Railway Committee.

Mr. JOHN HAGGART. My hon. friend from Lincoln (Mr. Lancaster) has introduced again the Bill which he presented to this House first a couple of years ago. I had not had the pleasure of hearing his argument before, but I have listened with attention to what he said this evening. The clause of the old Act which he read provides:

> No locomotive or railway engine shall pass in or through any thickly peopled portion of any city, town or village, at a speed greater than six miles an hour, unless the track is fenced in the manner prescribed by this Act.

I do not know how language could be plainer that that. My hon. friend states that the judge who tried the case in the first instance decided it in one way, and his decision was sustained by the Court of Appeal. The case then came to the Supreme Court, and that court reversed the decision of the courts below. He says also that, in order that the law might remain as the Supreme Court has decided it, the company paid the claim thus making an appeal unnecessary. The section I have quoted is from the Act 55-56 Victoria. Is that the wording of the Act at present? The words of the present Act are as follows:

> No train shall pass in or through any thickly peopled portion of any city, town or village, at a speed greater than ten miles an hour, unless the track is fenced——

That is the wording of the old Act, but it goes on:

> ——or properly protected in the manner prescribed by this Act.

In order to understand both clauses we need to know what is meant by 'properly fenced' in the old Act and 'properly fenced or protected' in the Act of 1903. I have not had the opportunity of looking at the Act 55-56 Victoria, but my hon. friend from Welland (Mr. German) has shown what the words mean. As to the present law, I think, there can be no meaning other than that no railway company has a right to run any train through the thickly peopled portion of any city, town or village, at a speed greater than ten miles an hour, unless the Board of Railway Commissioners orders otherwise. Look at the powers of the board. The board may make orders and regulations as to the speed of trains, as to the use of steam whistles, as to the passing from car to car, as to the coupling of cars or shelter to be provided for employees. The Minister of Railways (Mr. Emmerson) says it would be impossible to make regulations fixing the speed of trains generally, because they may have to vary in different places. My contention is that the Act imposes upon the commissioners the duty—although the word used is 'may'—to make regulations and rules in reference to all these subjects, and that where it is desired that the rules shall not be applicable to a particular case an order may be made applying to that case. So, it seems to me that the law plainly is that, until rules and regulations are passed by the Board of Railway Commissioners, no train may pass in or through any thickly peopled portion of any city, town or village, at a speed greater than ten miles an hour. I do not think that the amendment by my hon. friend from Lincoln could make the law any plainer or any stronger. I may be mistaken, and the courts may hold that the view I express is not the correct one. At the same time, I do not know any words in the English language which could more clearly limit the powers of the railway company to run trains at a rate faster than ten miles an hour, unless the track is fenced or properly protected in the manner prescribed by the Act, and the meaning of those words has been set forth by the hon. member for Welland. We have given the power to the Railway Commission, and if that body does not exercise that power, it ought to do so. There are other ways, perhaps, in which protection for the public at these crossings might be better provided than by having gates or watchmen. There is a plan at present in use in portions of Canada and the United States by which a train, long before it reaches a crossing sets a bell ringing. Surely, a railway company ought to be allowed to provide protection of that kind wherever it is the best that can be provided. I suppose it is of sufficient importance to receive the fullest consideration from the committee and from the Minister of Railways, and the minister ought to have a policy in regard to the Bill and to state that policy to the House.

At six o'clock, House took recess.

After Recess.

House resumed at eight o'clock.

Mr. R. BLAIN. The Bill introduced by my hon. friend from Lincoln (Mr. Lancaster) asking that parliament give better protection at level railway crossings, is one that should receive careful consideration at the hands of this parliament. Many years ago when the question of better protection at level crossings was up for discussion, the people were told to go with their cases to the Railway Committee of the

Privy Council, and that their grievances would be redressed. The people were not satisfied with that recourse, they did not get much remedy. At previous sessions of parliament we were told, when the question came up for consideration, and the people were agitated about it, that they would have to wait until the Railway Commission was inaugurated. Well, that commission was inaugurated in 1903, and from that moment until this moment I do not think there is one case in all Canada where better protection has been given to the public. Therefore, whether the power rests with the Railway Committee of the Privy Council or whether it was given to the Railway Commission board is not very important in so far as the public are concerned; for neither from the one or the other have they been able to receive such protection as I think the people of Canada are entitled to. I had the honour of bringing this question myself to the attention of the Minister of Railways and Canals in 1903, when the Railway Bill was up for discussion. I moved this amendment, which will be found on page 6257 of the 'Hansard' of 1903:

> Every company shall provide and maintain at all level crossings within cities, towns and villages, whether incorporated or otherwise, such gates, electric bells or subways as may be sufficient for the protection of persons using the streets or highways.

The Minister of Railways speaking to that amendment, said:

> It is useless to put that on the statute book for the reason that the Railway Commission have power to do it, and will do it when they commence their work.

We have examples of this in every county in Canada. In my own county the Grand Trunk Railway Company constructed a line from Toronto to Hamilton, with one track. At that time the trains did not run very fast, and at villages in the southern part of my own county there was no protection whatever at level crossings. After a few years had elapsed the Grand Trunk constructed another track, making a double track between Toronto and Hamilton, and on that double track the Grand Trunk not only run their own trains but the Canadian Pacific Railway has running rights over that road. Now trains are running over that road at the rate of forty and forty-five miles an hour, passing through important villages at that high rate of speed, yet there is no better protection for the public than there was when there was only one track and trains were running at a low rate of speed. It does seem to me that when such changes are taking place the public should be considered, either by this parliament or by the Railway Commission. The Minister of Railways and Canals answered the amendment I introduced in 1903 by saying that the question of better protection at railway crossings would be dealt with by the commission, and we took him at his word. In the town of Brampton where I live, there is a very dangerous crossing, one that has caused the people of that community a good deal of anxiety, and at which a number of persons have been killed during the last few years. The mayor of that corporation had a resolution passed by the council, and plans were prepared showing the dangerous condition of the railway crossing there. These plans were submitted to the Railway Commission, at one of their sessions, held in the city of Toronto, accompanied by every measurement that was necessary, pointing out that houses were constructed close to this crossing, and that when the public were passing over it they would not see fast running trains. We placed before the Commission Board the very same information that we had placed before the Committee of the Privy Council and with exactly the same result, that we got no satisfaction whatever. It is not enough for the government to say now that they have transferred from this parliament to the Railway Commission power to deal with cases of this kind. What the public desire is that either the government or the Railway Commission should see to it that the law is enforced, if we have such a law, and that better protection is given. My hon. friend from Lincoln has brought the matter to the attention of the government at former sessions of parliament. Petitions have been presented from almost every municipality in this country where there are large towns and cities, almost every municipality has had some trouble with this question. I am of the opinion that general legislation should be enacted. It may be said that perhaps the same danger does not exist in every town. I am of the opinion that while there are towns that do not require special protection at railway crossings because the population is not large and the traffic is not great; still I think it would be better to have legislation so that special cases may be dealt with by the Railway Commission rather than that every case should be dealt with by it. I am in thorough accord with the Bill introduced by my hon. friend. Perhaps it can be improved upon, but I think the hon. member for Lincoln should receive the co-operation of the government so that legislation may be enacted at this session which will give better protection to the public at level railway crossings in every part of Canada.

Mr. ALFRED H. CLARKE (South Essex). I entirely agree with the object of the Bill which has been introduced by the hon. member for Lincoln (Mr. Lancaster), and if there were no existing provisions to protect the public otherwise than by this Bill, I would be strongly disposed to support it. But it appears to me there are two or three reasons why this question can be better dealt with by the Railway Commission than

by laying down one uniform rate of speed at all places in the same town. I come from a constituency where we have two or three trunk lines, and where there has been a good deal of complaint about the rate of speed at which trains have run in going through some of the towns. The difficulty we find is not so much, or not altogether, the rate of speed, but that at some of the crossings there are obstructions, there are buildings in some places which obstruct not only the sound but the sight of trains. It seems to me proper that in those cases there should be a different rate of speed. I do not think ten miles an hour is slow enough at some crossings in some towns and cities; in others ten miles may be a sufficient protection. I think therefore that inasmuch as varying conditions exist, the Railway Commission can better deal with this question, and fix a low rate of speed where there is a dangerous crossing, as they have a right to do, and perhaps another rate of speed at another crossing, in order to do complete justice according to the circumstances which may arise. Another difficulty frequently arises in determining whether or not a particular crossing is in a thickly-peopled part of a city, town or village, so as to have the benefit of the protection contemplated by the Act, and persons suffering damages are uncertain as to their legal rights.

One jury may say that a certain crossing is located in a thickly peopled part; another jury may say that it is not a thickly peopled part. The Railway Commission may say that at a certain crossing a certain rate of speed may be established and that at certain other crossings a certain other rate of speed may be permitted, and if there is any grievance in respect to any particular crossing there will be no trouble in bringing the matter before the Railway Commission. My experience with the Railway Commission has not been that it is a difficult matter to get before them. We had a difference with the Pere Marquette Railway Company in regard to their service, a letter was sent to the hon. the Minister of Railways and Canals and immediately the matter was taken up by the commission and relief given. Its proceedings were prompt and expeditious, and it is a body that can do complete justice to every case. I think it is better, until we find that the Railway Commission does not afford the remedies to the public which they are entitled to, that we should not depart from the course which this House has so recently committed itself to, of leaving these matters to be disposed of by that tribunal.

Mr. DAVID HENDERSON (Halton). Mr. Chairman, I do not propose to continue the discussion of the question along the legal lines. That feature has been very well dealt with by the hon. member (Mr. Lancaster) who has introduced the Bill. I shall simply content myself by pointing out to the committee and to the government that conditions prevail in the country, in the rural sections as well as in the incorporated towns and villages, that may require the attention of those in authority. I will give an illustration with which I am familiar, taken from the county I have the honour to represent, where, between Toronto and Hamilton, as has been referred to by my hon. friend from Peel (Mr. Blain), there are a great many trains passing every day. I know of one crossing where, I was informed, during the time I visited that section of the country, that as many as from 75 to 80 trains cross the public highway between two villages inside of 24 hours. It does seem to me that, if, in the outskirts of incorporated villages and towns, additional precaution is required, those in the country are fairly entitled also to protection. From 75 to 80 trains a day is a large number, and there is nearly as much risk to the public on a rural highway that is very frequently travelled as there is in the towns and villages. My object in rising is simply to say that if the matter is to receive more careful consideration from this House, the hon. Minister of Railways and Canals (Mr. Emmerson) and the government, there are many sections of the country that demand similar protection to that which would be afforded by this Bill in villages and towns.

Mr. G. H. PERLEY (Argenteuil). Mr. Chairman, although a new member, I feel I should say a few words in support of this Bill or rather in support of the principle of it. I know it is very difficult for the government to deal with this question, but at the same time no one can dispute that the people have a grievance in regard to the crossings in towns and villages. I understood the hon. member for St. John and Iberville (Mr. Demers) to say that he did not think any case had been made out. It seems to me that the mere fact that so many people are killed from week to week and month to month is quite sufficient to make out a case for this House to deal with. It is evident that the machinery for getting at this matter in a practical way is not sufficient. We all know that the Railway Commission has power to deal with it. Nobody disputes that, but at the same time I do not think any one can dispute the fact that it is an expensive proceeding for any town or village to come before the commission here in Ottawa and get a grievance righted in regard to a certain particular crossing. The hon. Minister of Railways and Canals (Mr. Emmerson) has referred to the permissive clause of this Act, by which the Railway Commission may take the matter in hand without being asked to. From experience we all know that these permissive clauses very seldom amount to much and particularly with a body which has now so much to do and before which there will be more and more cases coming as time

goes on. It is not at all likely nor is it in human nature that the board would wish to take up these matters unless they are brought to its notice. The hon. Minister of Railways and Canals claims that because this House has given the commission power to deal with these matters, therefore, this House should leave the commission alone. The commission is the creature of this parliament and if there is something in the Act which ought to be remedied, I cannot see that that is any argument why this parliament should not provide the remedy. The hon. Minister of Railways and Canals deliberately neglected to express any opinion on the merits of this question, and it seems to me that that is the fair way for the members of this House to consider the question which is of so much interest to the people at large. No doubt, towns and villages differ, as the hon. Minister of Railways and Canals stated, in their requirements, but at the same time I do not know of any town or village in which it is right or proper that a railway company should run a train at the rate of forty or fifty miles an hour without protection for the public ; and certainly the hon. Minister of Railways and Canals did not give us the name of any such town or village, even if he knew of one himself. I feel, Mr. Speaker, that something ought to be done to make it easier for the public to get their rights. I am sure that in so far as the actual wording of the Bill is concerned the hon. Minister of Railways and Canals and others of more experience will be able to say whether it ought to be worded exactly as it is, but I certainly feel that it is right for this House and the government to take this matter into their consideration and pass some such legislation of a general character as will meet the requirements of the case. I do not think that the people ought to be left to come to the commission and fight out these matters in detail as they now have to do.

Hon. CHARLES FITZPATRICK (Minister of Justice). Mr. Chairman, I am quite sure we all agree with the object which the hon. gentleman (Mr. Lancaster) who introduced this Bill had in view ; that is to say the fuller protection of life and property at level crossings throughout the cities, towns and villages of Canada. At the same time it is important for us to realize what the legislation at the present time is and to ascertain, if possible, how far an improvement in the direction which my hon. friend wishes to go and in which we sympathize with him, would be accomplished by the legislation that he has introduced. It seems to me that it is impossible to imagine that this House could possibly incorporate a railway company that would not at some point pass through a city, town or incorporated village, and in passing through a city, town or incorporated village of necessity it must cross some one of the highways in these cities, towns and villages. What is the law in such a case ? The law is that no railway can cross a highway in any city, town or village except with the previous consent of the Board of Railway Commissioners, and the law is that this Board of Railway Commissioners must determine the conditions under which this railway can cross the highway. Now, if the railway is already in existence over the highway it is still within the power of the Railway Commissioners to alter the conditions under which that railway crosses the highway ; so you have in the Board of Railway Commissioners at the present time the power to determine the conditions under which the crossing is to be made and the power to regulate a crossing already in existence.

Mr. COCHRANE. But they do not do it.

Mr. FITZPATRICK. My hon. friend will exercise a little patience, please. What did my hon. friend seek to do by his legislation, and what would be the effect of the legislation he is introducing ? There should be, it seems to me, no doubt that railway crossings must of necessity exist under different conditions, and you must deal with each crossing in the light of the local conditions. For instance, you would not pretend to regulate a crossing in the heart of a great city in the same way and to make it subject to the same conditions as you would a crossing in the outskirts of some obscure village. You must bear in mind the conditions existing at each crossing. What would be the result of the proposed legislation if we adopted it ? The result would be that the Railway Commissioners would not have a free hand, but that they would be obliged to determine that at each railway crossing, whatever might be the local conditions, there must be either one of two things—either a watchman or a gate. No discretion is to be exercised if the crossing is in the heart of Montreal, or, as I said, on the outskirts of some obscure village anywhere throughout the Dominion of Canada. The conditions of crossing would require to be settled by the Board of Railway Commissioners in absolutely the same way in all cases.

Mr. FOSTER. How is it now ?

Mr. FITZPATRICK. Now it is subject to the control of the Board of Railway Commissioners.

Mr. FOSTER. But under a condition imposed by parliament ?

Mr. FITZPATRICK. I do not quite understand.

Mr. FOSTER. As to speed.

Mr. FITZPATRICK. In the absence of regulations, the speed cannot exceed 10 miles an hour.

Mr. FOSTER. But they can regulate ?

Mr. FITZPATRICK. They can regulate that speed so as to make it less than 10, or they may permit them to proceed at a higher rate, provided that proper precautions are taken at the crossing.

Mr. FOSTER. Can the Board set aside a law of parliament ?

Mr. FITZPATRICK. Of course, they can, when the law provides that they shall have the power to do so.

Mr. FOSTER. Does it provide that power ?

Mr. FITZPATRICK. Of course, it does ; the section—No. 186, I think—says that positively.

Now, Mr. Speaker, it seems to me that if I have stated the conditions correctly, namely, that the Board of Railway Commissioners have the power to determine the conditions under which a crossing can be made on the level, then the only question to be considered further by this House is as to whether or not the Board of Railway Commissioners can be moved to interfere in each particular case. It is not necessary that the Board of Railway Commissioners should deal with each case in each municipality, but it is free to the Board to determine the conditions under which all the level crossings in any municipality shall be regulated. They shall have the right to determine the conditions for the whole municipality at one time. And then the question comes up as to whether or not it is an obligation on the individual to go to the Board of Railway Commissioners and complain of the conditions existing at each crossing, or whether or not by some other method the Board can be moved to take action. Let us see what happens.

Mr. COCHRANE. Nothing happens.

Mr. FITZPATRICK. As a rule, the conditions are that a railway crossing is dangerous to all persons in a particular locality. No one individual is affected by that exclusively, but dozens of those who use that crossing are affected, and as a result those individuals would all of necessity make application to their municipal council. Through this body the municipality would act ; if a railway crossing dangerous to the life of the individual existed within the municipality, the corporation of the municipality would take action, and, if the corporation did not take action, we all know how prone our electors are to go to members of parliament, and if they draw the attention of members of parliament to the fact, all the members would have to do would be to draw the attention of the minister to the existence of the dangerous crossing, and then the Act provides that the minister, of his own motion, can set the machinery of the Board of Railway Commissioners in action and have the matter regulated, so that you will have either the individual concerned with the crossing acting through the municipal council, or else they can act through their member, and in this way bring pressure to bear on the minister. It seems to me that these are conditions which would commend themselves to this House, and that the members will see how reasonable it is to allow this matter to be dealt with by that Board which this parliament has created for the purpose of dealing with questions of this sort. I quite understand that it is exceedingly important that public attention should be drawn to the conditions existing at these crossings, and especially that the attention of the Board of Railway Commissioners should be drawn, and this discussion is an important discussion from that standpoint. It is important that the Board should know, as they will learn as a result of this discussion, that these dangerous railway crossings exist at different places, and that parliament expects them to provide a remedy for these dangerous conditions. My suggestion would be, under the circumstances—because, after all, this is an important matter, and affects not only the individuals and municipalities, but the railway corporations as well—I know it is not popular in this House to speak in the interests of railway corporations, but, so far as I am concerned, at all events, I think that a railway corporation is entitled to justice as well as a municipality or an individual—I consider that under the conditions that arise here, it is proper that we should refer this matter to the Railway Committee, so that the Railway Committee may hear all those who are interested further, and if further light comes to us it is possible that we might all change our minds and endeavour to introduce legislation which would be effective if it is necessary to do so. I would therefore concur in the second reading of this Bill, with the understanding that it should go to the Railway Committee for further consideration.

Motion agreed to, and Bill read the second time.

Hon. CHARLES FITZPATRICK (Minister of Justice) moved that the Bill be referred to the Select Standing Committee on Railways, Canals and Telegraph Lines.

Mr. E. A. LANCASTER (Lincoln and Niagara). Mr. Speaker, before that motion is put, I desire to say a word or two. Those of us who were in the House last parliament will remember that many public bills were referred to the Railway Committee, and nothing came of any of them. No amendment was made unless a Bill was considered and dealt with in the Committee of the Whole House, as Public Bills are supposed to be dealt with. I remember that the hon. member for St. John and Iberville (Mr. Demers) introduced very necessary legislation imposing on railways responsibility for fires caused by locomotives along the line

or their railway, and making them liable for damages to the people whose property along the railway was injured by such fires. That Bill was introduced in two different sessions and sent to the Railway Committee, but nothing came of it on either occasion. When we were considering in the House the general Bill consolidating the general Act that amendment became law. Then Mr. Cowan, who represented Essex, introduced in two different sessions a Bill relating to drainage under railways, legislation which was very much needed in the interests of the farming community, particularly Ontario. That Bill was sent to the Railway Committee each session, but nothing came of it until, in 1903, we were considering in the Committee of the Whole House the Bill to consolidate the General Railway Act, when it, too, was adopted and became law.

I could instance other Bills. For instance, the Minister of Agriculture, in introducing any measure relating to his department, does not suggest that it should go to the Committee on Agriculture and Colonization. If he wants the Bill passed, if he is sincere, as I presume he is, and as I am to-night, he insists, as I do, upon the Bill being dealt with as all Public Bills are, by being referred to the Committee of the Whole House. I could instance many other cases. When the Minister of Justice last session introduced an amendment to the Railway Act, the same Act that I am endeavouring to have amended to-night, he did not say that he wanted the Bill to go to the Committee on Railways, Canals and Telegraph Lines, although the railways were interested in that Bill to a much larger extent than they are in mine, in order that the railways might be heard on the question, and that those who were against the railways might also be heard. He took the regular course of moving that the House go into Committee of the Whole on the Bill. It was dealt with as all Public Bills are; it was discussed in Committee of the Whole House and there only. What was right with regard to the Minister of Justice amendment to the Railway Act of 1903 is equally right with regard to the amendment of the member for Lincoln to the same Act. I submit, with all due deference, that this Bill ought to be dealt with by the Committee of the Whole House, and not be sent to the Railway Committee. That committee is only a cul de sac, a place that leads nowhere. The Bill must come back here. Suppose the committee endorses it, it has to come back here and be dealt with by the whole House. Suppose, on the contrary, the committee say they do not think it ought to be passed, still it must come back here; they cannot keep it out of this House. It is only tying up the Bill for the session, as was done in the case of the cattle-guard legislation which was introduced by me for three sessions and was always sent to the Railway Committee and smothered there—always killed in some way, but not on its merits; and finally the amendment was passed when the House was in Committee of the Whole on the General Railroad Consolidation Bill of 1903. With all these facts before us, with this knowledge, to which we cannot shut our eyes, as to what happens to public legislation that goes to the Railway Committee, I object to this Bill being sent there. I am not referring to Private Bills, which properly go there, and which, if condemned there, do not come back to the House at all. But Public Bills, properly so-called, I submit, should not be sent to the Railway Committee, and this Bill should be treated like all other Public Bills. There should be the same rule for all of us. We should now go into Committee of the Whole House and discuss this Bill; and I think we could put it into better shape than we could by wasting our time in the Railway Committee, having a lot of discussions and votes and hearing railway counsel and other people, who after all can tell us nothing that we cannot learn from our constituents. We are supposed to make the laws as we understand that our constituents want them ; and if the Minister of Justice or myself or any one else in this House wants to know what the views of the railway companies are, we are honest and intelligent enough to find them out as part of our duty, just as we find out the views of the rest of our constituents—because the railways are as much our constituents as other people. I submit, therefore, that we should deal with this Bill on the floor of this House, as we do with all other Public Bills. I do not think it is the proper course to send it to the Railway Committee, and I must ask the House to reject the motion of the Minister of Justice.

House divided on the motion of Mr. Fitzpatrick.

Motion (Mr. Fitzpatrick) agreed to.

STEAMBOAT INSPECTION ACT.

Mr. L. G. McCARTHY (North Simcoe) moved second reading of Bill (No. 6) to amend the Steamboat Inspection Act of 1898. He said : The object of the Bill is to remedy a grievance which the marine engineers allege to have existed for some time past. They complain that the department, which now has power to issue permits, are thereby enabled to grant to men, who have not passed examination, certificates for the season to act as marine engineers. I have introduced this same Bill for two consecutive sessions. Last session it did not reach its second reading and the session before I agreed, owing to some objections, to allow it to stand. The Bill has since been pretty well circulated throughout the districts interested; and from what I have heard from the marine engineers themselves, the lumbermen who own tugs, and the fishermen who require tugs in their business, they desire to be given a hearing before a committee of the House. Since introducing the Bill I have found that there is a good deal of difference of opinion among the interests concerned, and after consultation with my hon. friend the Minister of Marine and Fisheries, I came to the conclusion that the wisest course would be to have a small special committee which would hear the parties interested and report to the House. Were we to discuss the matter here, I am afraid there would be much difficulty in arriving at a satisfactory conclusion. From what I have heard from the different interests in my own constituency, it may be somewhat difficult to deal with the matter, and in justice to all parties interested, unless we hear from each class of persons what they have to say, the conclusion I have come to therefore is that the only satisfactory way to dispose of it would be to have the various parties interested brought before a special committee.

Mr. LANCASTER.

Motion agreed to, and Bill read the second time.

Mr. McCARTHY moved that the said Bill be referred to a special committee consisting of the following : Johnston (Cape Breton), E. F. Clarke, Bickerdike, Bennett, Johnston (Lambton), Lefurgey, Smith (Nanaimo), Lancaster, McPherson, Sproule, Préfontaine and the mover.

Motion agreed to.

Sir WILFRID LAURIER moved the adjournment of the House.

Mr. FOSTER. What business to-morrow?

Sir WILFRID LAURIER. We shall take up the Seed Bill and then the Census Bill and then go into Supply.

Mr. W. F. MACLEAN. When does the government intend to take up the notice of motion with regard to the Chief Commissioner of the Railway Commission ?

Sir WILFRID LAURIER. To-morrow we will take the notice stage. It will come up for discussion on Friday.

Motion agreed to, and House adjourned at 9 p.m.

HOUSE OF COMMONS.

TUESDAY, January 31, 1905.

The SPEAKER took the Chair at Three o'clock.

OTTAWA ELECTRIC COMPANY.

Mr. W. A. GALLIHER moved for leave to introduce Bill (No. 12) respecting the Ottawa Electric Company.

Some hon. MEMBERS. Explain.

Mr. GALLIHER. The Bill is along the lines of the one introduced last year ; in fact, it is the same Bill.

Mr. FOSTER. To new members like myself that does not convey any instruction. Cannot the hon. gentleman give us briefly the purport of the Bill ?

Mr. GALLIHER. Shortly, the Bill is to acquire the power to purchase stock in other companies.

Motion agreed to, and Bill read the first time.

ATLANTIC, QUEBEC AND WESTERN RAILWAY COMPANY.

Mr. C. A. GAUVREAU moved for leave to introduce Bill (No. 13) respecting the Atlantic, Quebec and Western Railway Company.

Mr. FOSTER. We should have some explanation of this, Mr. Speaker.

Mr. GAUVREAU. (Translation.) Mr. Speaker, by this Bill the company is simply asking for an extension of time.

Motion agreed to, and Bill read the first time.

THE MOLSONS BANK.

Mr. H. B. AMES moved for leave to introduce Bill (No. 14) respecting the Molsons Bank.

Mr. FITZPATRICK. Would the hon. gentleman explain the provisions of the Bill ?

Mr. AMES. The Bill provides for a redistribution of the capital stock of the Molsons Bank, so that the shares hereafter instead of being $50-shares may be $100-shares.

Motion agreed to, and Bill read the first time.

FIRST READINGS.

Bill (No. 11) respecting the Columbia and Western Railway Company.—Mr. Galliher.

Bill (No. 15) respecting the St. Mary's and Western Ontario Railway Company.—Mr. McIntyre.

Bill (No. 16) respecting certain patents of the Canada Car Company, Limited.—Mr. L. P. Demers.

Bill (No. 17) respecting certain patents of the Goodwin Car Co.—Mr. Demers (St. John and Iberville).

Bill (No. 18) respecting the Ottawa, Northern and Western Railway Company.—Mr. Parmelee.

Bill (No. 20) to incorporate the Moosejaw and Edmonton Railway Company.—Mr. Scott—by Mr. Logan.

CALGARY, RED DEER AND BATTLEFORD RAILWAY.

Mr. H. LOGAN moved for leave to introduce Bill (No. 19) to incorporate the Calgary, Red Deer and Battleford Railway Company.

Mr. SAM. HUGHES. Explain that.

Mr. LOGAN. The object of the Bill is to incorporate a company to build a railway from Calgary to Battleford. That is all the explanation.

Mr. SAM. HUGHES. Is this to revive a charter that was extinct last year ?

Mr. LOGAN. No. It is to create a new company.

Motion agreed to, and Bill read the first time.

PRIVATE BILLS—EXTENSION OF TIME.

Mr. GEO. D. GRANT moved :

That in accordance with the recommendation contained in the report of the Select Standing Committee on Standing Orders, the time for receiving petitions for Private Bills and also the time for presenting Private Bills be extended to Thursday, February 23, and Thursday, March 9, respectively.

Hon. JOHN HAGGART. I do not think there is any thing very objectionable in the motion, but I must object to the motion for the adoption of the report being made on the very day the report comes in. I think that objection should apply to all reports. We should have an opportunity to see what they are before a motion is made for their adoption.

Mr. T. S. SPROULE. As one who has often objected to motions of this kind in former years, I object again. It seems to me that they always tend unnecessarily to lengthen the session. Either the time is sufficiently long to allow parties to introduce their Bills, or it is not. The judgment of parliament was that the time was sufficiently long and therefore it made the rule. If the time is not sufficiently long, then we should amend the rule and make it longer. If the rule is what parliament thinks it ought to be, we should not violate it so often. I had the assurance of the Prime Minister last year that all and sundry ought to take notice that in future it would be the aim of parliament to confine them within the limits of the rule as nearly as possible, and that when a violation of the rule took place, there must be a strong and exceptional reason given for it.

Mr. HAGGART. I raise the point of order, that the motion is out of order.

Mr. SPEAKER. I think the objection is a good one, and the motion will have to stand as a notice.

THE SAFETY OF SHIPS.

Mr. J. H. SINCLAIR (Guysboro') moved for leave to introduce Bill (No. 21) to amend the Act respecting the safety of ships. He said: Under the existing regulations tramp boats of the class known as shelter deck boats, are not allowed during the winter season to carry timber between the main deck and the upper deck, and the purpose of this Bill is to permit them to carry deals and timber in that space. The policy of the government is to make no change of this kind unless it is approved by the Board of Trade in England, and I have taken the precaution to ask the Department of Marine and Fisheries to communicate with that authority to see if this change will be acceptable to them. I do not intend to press the Bill to a finish unil we hear that it is acceptable to the British Board of Trade.

Motion agreed to, and Bill read the first time.

THE BOARD OF RAILWAY COMMISSIONERS.

Hon. CHAS. FITZPATRICK (Minister of Justice) moved that the House do on Friday next go into Committee of the Whole to consider the following proposed resolution:

1. Resolved, That if a judge of any Superior Court in Canada is appointed Chief Commissioner of the Board of Railway Commissioners for Canada, he shall not be removed at any time by the Governor in Council except upon address of the Senate and House of Commons.

2. Resolved, That if any chief commissioner of the Board of Railway Commissioners for Canada, having been at the time of his appointment as such chief commissioner a judge of any Superior Court in Canada, or having resigned his office as such judge for the purpose of accepting appointment as such chief commissioner, has continued in office as judge of one or more Superior Courts in Canada and in the said office of chief commissioner for periods amounting together to fifteen years or upwards, or has become afflicted with a permanent infirmity disabling him from the due execution of his office, and if such chief commissioner resigns his office, or if his term of office, or any renewed term of office, has expired, His Majesty may, by letters patent under the Great Seal, reciting such periods of office or such permanent infirmity, grant to such chief commissioner an annuity equal to two-thirds of the salary of the judicial office which he held at the time of his appointment as such chief commissioner, or which he resigned for the purpose of accepting such appointment, to commence immediately after his so ceasing to hold office as such chief commissioner, to continue thenceforth during his natural life, and to be payable by monthly instalments and pro rata for any period less than a year during such continuance.

3. Resolved, That if any such chief commissioner of the Board of Railway Commissioners resigns his office or completes his term of service, original or renewed, therein, having, in either such case,

(a) attained the age of seventy-five years, and continued in office as such judge and in the said office of chief commissioner for periods amounting together to twenty years or upwards, or

(b) attained the age of seventy years, and continued in office as such judge and in the said office of chief commissioner for periods amounting together to twenty-five years or upwards, or

(c) continued in office as such judge and in the said office of chief commissioner for periods amounting together to thirty years or upwards,

His Majesty may, by letters patent under the Great Seal, reciting such period of service, and, in cases (a) and (b), such chief commissioner's age, grant to him an annuity, payable as aforesaid, equal to the salary of the judicial office which he held at the time of his appointment as such chief commissioner, or which he resigned for the purpose of accepting such appointment, to commence immediately after his resignation as chief commissioner and to continue thenceforth during his natural life.

4. Resolved, That if between the date of the appointment of any such chief commissioner or of his resignation of his office as such judge and the date of his resignation of, or retirement from, the office of chief commissioner, the salary attached to the judicial office which he held at the time of his appointment, or which he resigned for the purpose of accepting appointment as such chief commissioner, has been increased, the annuity to be granted to him hereunder may be increased in the same proportion.

5. Resolved, That local judges in Admiralty of the Exchequer Court shall be deemed to be judges of a Superior Court within the meaning hereof.

He said: I have the authority of the Crown to introduce these resolutions.

Mr. W. F. MACLEAN. I must take the rather unusual course on this motion of drawing the attention of the government to the condition of affairs that exists in the country in connection with the matter treated in this resolution. It is so important that I think I shall be able to show the government that its duty is rather to abandon this legislation and take advantage of the legislation which now exists and proceed to fill up the vacancy in the Railway Commission. What is the situation in the country to-day?

Sir WILFRID LAURIER. I raise the point of order that at this stage no debate is allowed.

Mr. W. F. MACLEAN. My hon. friend the First Minister has made a motion and I am drawing the attention of the government in the country to a certain condition existing in connection with this very question.

Sir WILFRID LAURIER. The motion just made has always been taken as simply a notice of motion.

Mr. SPEAKER. I think the point well taken. The hon. gentleman cannot debate the question at this stage.

Mr. SPROULE. On Friday next will not the Speaker have to leave the Chair, in compliance with the motion just made, and allow the House to go into Committee of

the Whole without a motion to that effect being made again, and will not this preclude any debate before the House is in committee ?

Sir WILFRID LAURIER. No, in the case of all resolutions dealing with money, the first stage consists of giving notice that on a certain day a motion will be made that the House go into a Committee of the Whole. The second stage then will be the debate on that motion with the Speaker in the Chair. The resolution is then moved in committee and the committee reports. But the report of the committee cannot be concurred in until the following day. The most ample discussion is therefore allowed at every stage. I would draw my hon. friend's attention to rule 93 :

If any motion be made in the House for any public aid or charge upon the people, the consideration and debate thereon may not be presently entered upon, but shall be adjourned till such further day as the House thinks fit to appoint, and then it shall be referred to a Committee of the Whole House before any resolutions or vote of the House do pass thereupon.

Motion agreed to.

TRANSPORTATION COMMISSION.

Mr. FOSTER. Before the Orders of the Day are called, can the hon. gentleman give any information as to whether the membership of the transportation commission is complete, and also wheher any reports have yet been made ?

Sir WILFRID LAURIER. I could not give the answer to my hon. friend now but will do so to-morrow

MINISTERS OF FINANCE AND INTERIOR.

Mr. FOSTER. Can my right hon. friend tell us when we may have the pleasure of seeing the Finance Minister (Mr. Fielding) in his place. I observe also that another minister, the Minister of the Interior (Mr. Sifton) is absent. When shall we see him back in this sphere of activity ?

Sir WILFRID LAURIER. I think that the Minister of the Interior will be here about February 15. I am sorry to say that I cannot give definite information regarding the Minister of Finance, and my hon. friend will regret this as much as I do. The last information I have is regarding a domestic matter which has kept him in Vienna longer than he expected.

REPORTS PRESENTED.

Report of the Department of Agriculture for the year ending October 31, 1904 (Mr. Fisher).

Report of the Department of Trade and Commerce for the year ending June 30, 1904—Hon. Wm. Paterson.

INSPECTION AND SALE OF SEEDS.

Bill (No. 7) respecting the Inspection and Sale of Seeds—Mr. Fisher—was read the second time, and the House went into Committee thereon.

Mr. SPROULE. Is this the same Bill that was before the House last year and the year before?

Hon. SYDNEY FISHER (Minister of Agriculture). Practically it is. There are, however, certain slight modifications which I shall explain in general terms. My hon. friend (Mr. Sproule) who has asked me this question, will remember that the Bill as introduced last session was for the purpose of controlling the sale of agricultural seeds, so as to remove a grievance or difficulty which has existed in the past, in that these seeds frequently are impure in having the seeds of weeds mixed with them, or in the seeds not being germinable, thus causing loss to the purchaser both in their purchase and in their use. For the purpose of learning the facts I instructed an officer in my department to investigate this question. As much as four years ago, this officer went carefully into the subject. He took a large number of samples of the seeds that were being sold in various parts of Canada and analyzed by methods well known in seed laboratories. His reports show that there was a real need for control over this trade. Investigation proved that large quantities of very inferior seeds were being sold in this country, and that in those seeds there was a large number of weed seeds, often the seeds of weeds that were unknown in the locality where the seed was to be used, so that the result of its use would be to introduce into localities pernicious weeds which, till that time, had not been known in those localities. This was one part of the evil. The other part was that in frequent instances seed was sold under false names, that is, it was not what it was represented to be. A notorious instance of that kind was found in the eastern part of Canada, where a seed was sold purporting to be the seed of a spring grain, when, as a matter of fact, it was the seed of a grain which was to be sown in the fall in order to ripen. Again large quantities of seeds were sold of which a proportion, in some cases a considerable proportion, was not germinable. The purchaser, not knowing this, sowed the usual quantity and, of course, got little, if any, return. These difficulties in the trade were the more likely to continue, because the farmer who purchased the seed had no means of determining its value. In some cases, of course, the weed seeds are quite apparent, but, not unfrequently, these seeds are not recognizable by the farmers. Sometimes they are seeds of weeds entirely unknown in the purchaser's locality, or in many cases, the farmer is not familiar with the seeds of even the ordinary weeds of his

own neighbourhood. In many other instances the value of the seed could not be determined except by what I might call laboratory methods, such as have been in established use for some time in other countries. In the United States and various European countries, the laboratory investigation of the quality and value of seeds has been carried on for many years. There is to-day a thoroughly established method for the examination and testing of seeds of all kinds. We thought it wise that the advantages of science should be put within reach of the farmers of the Dominion of Canada for their protection in the seed trade. I therefore, established in the department a seed laboratory and the work of that laboratory has since been going on. I am glad to say that, by the testimony of the seedsmen themselves as well as of many farmers, the investigations and reports of this branch have contributed materially to improvement in the trade, and that for the last year or two there has been a decided improvement in the quality of the seeds sold to our farmers. A greater number of farmers to-day are critical of the seed they buy than formerly, and their knowledge has compelled improvement. But there is much yet to be done.

Mr. SAM. HUGHES. Mr. Chairman, I rise to a point of order. There are many on this side anxious to hear the eloquence of the hon. minister and to follow his explanation, yet there is not an hon. gentleman on the ministerial side paying the slightest attention, and the noise of their conversation makes it impossible for us to hear the minister. I ask you to call the hon. gentlemen to order.

Mr. DEPUTY SPEAKER. I hope hon. gentlemen will keep order for it is very unpleasant for a speaker to be interrupted.

Mr. FISHER. The noise was not interferring with me, Mr. Chairman, though I would prefer to talk without so much effort. I need hardly say that I am not attempting any eloquence in regard to a matter of busines such as this. I was saying that, though much had been accomplished there is still room for improvement. While the general average of the trade has been improved, I regret to say there are still in our country a number of men who handle seeds for agricultural purposes who do not seem to be alive to the importance of the trade and who still deal in very inferior seeds. This House has practically declared its opinion that a law should be passed to control this trade. A Bill was introduced last session, but was dropped because, owing to the lateness and length of the session, it was deemed impossible to make it law. I hope that, introducing it as I have done this session, at an early stage, when there is every opportunity for hon. members to give attention to the subject, the result will be better. I think I can fairly call for the co-operation of members on both sides to effect this improvement in the relation of the farmers to those who supply them with seed, and that I may look with confidence to the Bill being passed into law. I shall be extremely disappointed if the Bill is not passed this session. I need hardly go into details in explaining the Bill, but may say in general terms that we wish to provide by this Bill machinery which will, in the first place prevent the sale of seed containing more than a certain number of seeds of pernicious weeds, the presence of the seeds of which, I consider, makes seed unfit to be sold in Canada. Section 3 and section 6 combined absolutely prohibit the sale of seeds containing certain weeds. In addition to that, we propose to establish a grade or standard of the seeds which shall be permitted to be sold with the brand of No. 1, or of an extra quality upon it. That is established by section 4. Then we propose to provide machinery by which the law may be carried out. I think, in brief language, I have given the substance of the Bill. The details will come up as the various sections are considered. I think perhaps it is better that I should defer the explanations of the changes that have been made in the present Bill as compared with the Bill of last session until we come to each section, when I will be able to explain more fully. Again I would repeat for the information of the House that the general proposals of the Bill are: In the first place, to prohibit absolutely the sale of seed which contains seeds of particularly pernicious weeds; and secondly, to provide a standard, a No. 1 quality of seed.

Mr. SPROULE. We have had this same Bill before the House during two previous sessions. The first time, I understood, it was allowed to drop because it was found objectionable to seedsmen, and to farmers as well. Last year it was put on the paper at a reasonably early period of the session, and, of course, could have been put through if the government had made any effort to do so. Therefore, the minister and his side of the House are responsible for the Bill not going through last year. There was time enough, but it was assumed that so many objections were raised throughout the country that the government thought better not to push it on. Might I ask whether, since then, the government have received numerous objections to the Bill, or whether reasons have been given why it should not pass, or amendments suggested. In my experience the seedsmen do not look upon it with much favour, whatever the farmers may think.

Mr. FISHER. I think my hon. friend put the matter a little strongly when he alleged the reasons for the Bill not having been put through and made law last session. It is true the Bill was introduced about the mid-

dle of the session, I think, but at the same time there was a great deal of other pressing matter before the House. Also certain opposition to the Bill developed, chiefly on the part of the hon. gentlemen opposite, but on the part of a few gentlemen on this side of the House as well, who were afraid that the Bill might interfere unfairly with the trade. The seedsmen made certain objections. I do not remember, however, at the present time that any farmers' organization or any representative farmers intimated that there was anything in the Bill that they objected to. On the contrary, I was able to quote and to show last session, and the session before, a very strong demand on the part of those organizations who in Canada largely speak for the farmers in a non-political sense ; they wanted a Bill of this kind. The opposition which developed was raised chiefly at the instance of the seedsmen. But their objections were thoroughly threshed out last year, and related only to slight points which I have to a certain extent modified in the present Bill. But at the same time I do not profess to have met their views entirely, because if I did meet their views entirely I think the Bill would be practically emasculated, and would be of no use for the purpose of protecting farmers in the trade. I acknowledge that if this Bill did not tread upon the toes of somebody in the trade it would be unnecessary, and I would not have introduced it. It is only because there are certain people who deal in seeds in this country who require to be regulated by law that this Bill is necessary, and for that reason only am I desirous of making the Bill law. I speak of these people knowing well that they do not include the large majority of the seed dealers, who are an honourable body of men, who deal honestly and fairly, and carry on their trade in a reputable way. At the same time there are, unfortunately, certain other men dealing in seeds that ought not to be sold, and it is for the purpose of restraining these men that we find the necessity of this Bill. As I said a moment ago, when we come to the details of the measure I will be able to explain the slight modifications which I have made. and which will, I think, to a large extent meet the objections which some of the reputable traders in seeds expressed last session.

Mr. SPROULE. I think the minister, whether wittingly or unwittingly, does the opposition great injustice when he intimates that it was because of the opposition they raised to the Bill that it was left over last session. The Bill was discussed, and after a lengthy discussion the opposition expected the Bill would go through. They had raised all the objections that they thought desirable to raise, and drew the minister's attention to the weak features of the Bill. After that they expected the Bill would be gone on with, and paid no more attention to it. But the government did not make any effort to carry it through, the minister did not make any effort to carry his own Bill through. The reason which he gives to-day seems to me not to be a good one, that is to say, it was not pushed through because there was other more important business before the House for the government to deal with. According to the explanation which the hon. gentleman gave us at first he would seem to regard this measure as one of the most important which could be brought before this House ; but if the interest of the farming community is to be staved off until every other measure and every other interest is attended to, and finally this Bill is to be thrown over, it seems to me that it is not very complimentary to the farmers. My first inquiry was as to whether this Bill was exactly the same as the previous Bills; also whether the hon. gentleman had received any objections to this Bill. If so, we can deal with them when we come to them.

On section 2,

Mr. FISHER. That fixes the date of the coming into operation of the Act. We will let that section stand.

On section 3,

No person shall sell, or offer, expose or have in his possession for sale, for the purpose of seeding, any seeds of cereals, grasses, clovers or forage plants unless they are free from any seeds of the following weeds :—Wild Mustard or Charlock, (Brassica Sinapistrum, Boss); Tumbling Mustard, (Sisymbrium sinapistrum, Crantz.) ; Hare's Ear Mustard, (Coringia orientalis, Dumort.) ; Ball Mustard, (Neslia paniculata, L. Desv.) ; Field Pennycress or Stinkweed, (Thlaspi arvense, L.) ; Wild Oats, (Avena fatua, L. and avena strigosa, Schreb.) ; Bindweed, (Convulvulus arvensis, L.) ; Perenniel Sow-Thistle, (Sonchus arvensis, L.) ; Ragweed, (Ambrosia artemisiaefolia, L.); Great Ragweed, (Ambrosia trifida, L.); Purple Cockle, (Lychnis Githago, Lam.); Cow Cockle, (Vaccaria Vaccaria, L.) Britton) ; Orange Hawkweed or Paint Brush, (Hieracium aurantiacum, L. and Hieracium praealtum, Vill.); Ergot of Rye, (Claviceps purpurea, Tul.), unless each and every receptacle, package, sack or bag containing such seeds, or a label securely attached thereto, is marked in a plain and indelible manner—

(a.) with the full name and address of the seller ;

(b.) with the name of the kind or kinds of seed ;

(c.) with the common name or names of the aforenamed weeds, the seeds of which are present in the seed sold or offered, exposed or had in possession for sale.

2. The provisions contained in this section shall not apply to the sale of seed that is grown, sold and delivered by any farmer on his own premises, for seeding by the purchaser himself, unless the purchaser of the said seed obtains from the seller at the time of the sale thereof a certificate that the said seed is supplied to him subject to the provisions of this Act.

Mr. LENNOX. I call the attention of the hon. minister to the wording of this

clause. It does not appear to me that it reads very well :

No person shall sell, or offer, expose or have in his possession for sale, for the purpose of seeding, any seeds of cereals, grasses, clovers or forage plants unless they are free from any seeds of the following weeds—

Then, reciting these weeds, it goes on again :

—unless each and every receptable, package, sack or bag containing such seeds, or a label securely attached thereto, is marked in a plain and indelible manner.

These two words 'unless' do not harmonize or make complete sense. As the intention evidently is that these seeds shall not be offered for sale unless properly labelled, I would suggest that the section be made to read :

No person shall sell, or offer, expose or have in his possession for sale, for the purpose of seeding any seeds of cereals, grasses, clovers or forage plants having therein the following weeds—

Reciting them, and then going on :

—unless each and every receptable, package, sack or bag containing such seeds, or a label securely attached thereto, is marked in a plain and indelible manner.

I think that would make it read better.

Mr. FISHER. I think perhaps the criticism of my hon. friend (Mr. Lennox) is correct when he says that the two words 'unless' do not sound well. The meaning, however, is just the same.

Mr. LENNOX. I think it would read better, and be clearer.

Mr. FISHER. I think it would read better, but I do not think it is worth while making the change.

Mr. FOSTER. I think the suggestion is an improvement.

Mr. FISHER. I think it is in the wording. I do not see any objection to the change.

Mr. NORTHRUP. If the hon. minister would add the one word 'and,' I think it would cover the point.

Mr. LENNOX. I move that the amendment be made in the way I suggest.

Mr. FISHER. That change, which changes the form, so to speak, of a clause, might interfere with the wording of the Bill later on, and I think it would be better perhaps to leave it at the present time until we see whether a change in the form of the sentence might not interfere with the form of any of the sections afterwards. I will bear in mind the suggestion, and before we report the Bill we may deal with it.

Mr. LENNOX. Very good. I am satisfied with that, but I do not think it can interfere with anything subsequently appearing in the Bill. Then, in reference to the other part of the clause—subsection 2—and this is probably a finer distinction than the other, I would suggest that the words 'that is,' immediately before the word 'grown,' be left out, merely for better reading.

The provisions contained in this section shall not apply to the sale of seed that is grown, &c.

It would read better as follows :

The provisions contained in this section shall not apply to the sale of seed grown, &c.

Mr. FISHER. Perhaps those words are not necessary. All through the Act we speak of seeds that are free from the seeds of weeds. If we adopted the first suggestion of my hon. friend, substituting for 'unless they are free from any seeds of the following weeds,' the words containing therein' or 'having therein,' we would be making use of a different form of expression from that which we find in other portions of the Bill. The expression 'free from seeds' is contained all through the Bill, and it would be rather awkward to change it. The words 'that is' are perhaps unnecessary, but their presence does not interfere with the sense.

Mr. NORTHRUP. I would call the hon. minister's attention to the fact that the suggestion of my hon. friend from South Simcoe (Mr. Lennox) would be met by simply putting the word 'and' before the second 'unless.' That would avoid any complication, and perhaps meet the views of my hon. friend.

Mr. FISHER. I think that would change the sense.

Mr. W. F. MACLEAN. Mr. Chairman, I would like to ask the hon. Minister of Agriculture for some information in regard to the extent of the weed plague, both in the eastern portion of the country and in the Northwest Territories. Is it a fact that there are more weeds in the west, especially in the wheat country, than formerly, and are they becoming a menace to the growth of wheat in that country ?

Mr. FISHER. In regard to the latter part of my hon. friend's question, I think I am well within the mark in saying that as cultivation increases in the west the number of weeds increases. There is very little of what I might call hoe cultivation, practically none, and without that weeds are sure to increase wherever land is cultivated. They are increasing in that country just as cultivation is increasing. There is also a large introduction of weeds into the west in the crops which, before the land was cropped, were entirely unknown. How they got there it is not easy to determine. In some cases they have been brought in in seed, and sometimes also they have lain dormant for many years, as weed seeds sometimes will, and are brought out by cultivation. In the eastern parts of Canada good culti-

vation, good farming, reduces the number of weeds. I would not like to say that in that respect our farmers are deteriorating. I think to-day there are more fields that are well cultivated in eastern Canada than there were fifteen or twenty years ago, but at the same time there is a spread of bad weeds in parts of the country where these individual and particular weeds were formerly unknown, and I think it is due to the greater facilities of communication and the greater facilities of trade, inasmuch as seeds that are grown in one part of the country are more often sent to another part of the country than they used to be in the days of early settlement, when the farmers bought chiefly from their own neighbours and never went far away from home to get their seeds. To-day it is quite a common thing for farmers in the older provinces of Canada to buy seed that has been grown hundreds of miles away from where it is to be sown. In the days of the early settlement this was not so much the case, and in consequence of this facility of trade new weeds are being found constantly in certain sections of the country.

Mr. W. F. MACLEAN. I would like to ask the hon. minister whether he can say there is any relation between the growth of the weed plague in the west and the change in the hard wheat belt. The hard wheat belt seems to be growing and the weed plague seems to be growing. I would ask him if he has any information on that point?

Mr. FISHER. I do not think I have. I do not know of any information that would lead me to believe that the presence of weeds in the soil or the growth of weeds in the crop has affected the quality of the wheat.

Mr. W. F. MACLEAN. But the hard wheat belt is moving. It does not remain in the same place.

Mr. FISHER. I will accept the hon. gentleman's statement. I do not know whether it is true or not.

Mr. W. F. MACLEAN. It is.

Mr. LENNOX. I understood this section was to stand.

Mr. FISHER. I have no objection in view of the suggestion about the wording, but I would like to finish the discussion on the principle of the section and to adopt that allowing the section to stand only for verbal correction.

Mr. COCKSHUTT. As one interested in the seed trade for a number of years, I would like to submit a few observations in connection with this clause. I would call attention first to the latter part of the first paragraph of clause 3.

> Unless each and every receptacle, package, sack or bag containing such seeds, or a label securely atached thereto, is marked in plain and indelible manner, &c.

I would submit that packages are of different sizes, and that what might be quite possible in regard to a 200 weight package will be quite impossible in connection with a very small package. The Bill as now framed makes no difference between packages of different size, but the small dealer buys some of his seeds in very small quantities. It would be impossible to put the names of all the noxious weeds on one of these packages as they are not large enough. In this list there are 25 names, many of which are long and unintelligible to the average farmer. It seems to me that if we are going to have a law of this kind it should be a practical law and one that could be carried out. As a merchant who has been engaged in the handling of seeds, I would like to be in a position to assist in the carrying of legislation which is practical, but I do not think from my experience that all of these names can be put on each receptacle or bag. There is no way in the average seed warehouse of printing all of these names and they would have to be written, which would be a serious matter because sometimes a merchant will have from 100 to 200 packages of seed on hand; to label every one of these packages seems unnecessary so long as the particular package from which the merchant is selling is labelled, in order that the buyer will know what he is buying, which ought to be the principal thing required. There is no intention on the part of the average merchant to impose on the public seeds that are not fit for sale or use, and I think the seed merchants are as much entitled to respect in this regard as other merchants. They endeavour to do what is right and expect to do business because of the confidence people have in them.

What I cannot understand in subsection 2 of subsection 3 is why farmers are exempted from the legislation which is applied to merchants. Seed that may be purchased from one farmer by another may be as harmful as any seed purchased from a merchant. If the seed sold by the farmer is as noxious as that sold by the merchant, the farmer should be under the same law as the merchant, but according to this subsection, he does not seem to be; he may sell to his neighbour seed which a merchant would be prohibited from selling. That is one law for the merchant and another for the farmer. I come from a section where seed growing is a considerable business and our farmers are anxious to have their seed placed on the market. If it cannot be so placed then so much money will be tied up in bags, because the law says that the grain cannot be sold as seed as it may contain too much of these weeds.

I submit that these criticisms ought to have the attention of the minister. I regret that the Bill is in my hands now for the first time and that I have not had the pleasure of hearing it discussed before and I would like to have some opportunity of looking into its provisions. I desire to co-

operate with the minister in any way I can, but I submit that some of these features are impracticable, and I think that we should endeavour to have all legislation that we may pass carried out in the spirit in which it is enacted.

Mr. FISHER. I may tell my hon. friend (Mr. Cockshutt) that I quite concur in his idea that the law should be such as can be carried out easily for the seller as well as the buyer. I have framed the provisions of this Act with that idea always in view, and I think that practically the Act does allow all of that. My hon. friend has made three criticisms of this section which I shall take up one by one. His first criticism is that it will be practically impossible for the seller to put all the names of these weeds on the packages. I may say to my hon. friend frankly that I consider that this section will practically prohibit a seller selling seed with these weeds in it. If he does undertake to sell seed with the names of these seeds on it, and says that they are all in that seed, I do not think that any farmer will buy it. If he is selling seed which contains a majority of the weeds mentioned in that list he ought not to sell it because he will be selling something which will be disgraceful to this trade ; he should be prevented from doing it. It is possible that a man might honestly and properly sell seed containing one or two of those weeds, and in order to enable that to be done with proper protection to the trade, I have changed the original intention of the Bill as introduced two years ago, when the sale of seed containing any of these weed seeds was to be absolutely prohibited. The Bill in its present form does permit of a little safeguard for the honest seller who may know that there are some of these seeds, a very few, in the seeds they are selling, and who then honestly tell their purchasers of this fact. That provision is made distinctly and directly in the interests of the trade, allowing them to go as far in the way of selling seed containing seeds of these pernicious weeds as I think it would be proper and right to permit.

My hon. friend speaks of the size of the package. These weed seeds would not be in the garden seeds which are sold in small packages such as my hon. friend perhaps has in his mind's eye when he speaks as he has done. A great many garden seeds are sold in little paper packages on which it would be difficult to write the names of these weeds, but we do not expect to find these weeds in these seeds, and if they were in them it would be highly improper and we should do anything we can to prevent it. If a package is large enough to have a label attached to it bearing the name, surname and address of the seller and the name of the variety of the seed contained in it, it would be possible to write on the back of the label the names of the weeds whose seeds are contained in it, and there would be no real difficulty in that. If we allow what my hon. friend proposes we would have a condition of affairs under which the farmer would purchase his seed and have it taken perhaps by a scoop out of a large bag or box in the store of the salesman, and afterwards if he found that that seed was not good or if he took a sample of it to be tested by the seed laboratory, it would be impossible for him to prove conclusively that that seed had come out of any individual package or bag or box in the seed salesman's warehouse, and therefore there would be no possibility of proceeding against the salesman.

In regard to the second objection which the hon. gentleman made, that clause 2 of subsection 2, of section 3, seems to exempt farmers from the provisions of this Act, I may say that it only exempts farmers from the provisions of this particular section. The reason for that exemption is this : As my hon. friend says, we do not wish to interfere with the trade of anybody, and more than is absolutely necessary. The provisions of this section are very limited, because they apply only to the case of a farmer who sells seed on his own premises to somebody who is going to use the seed, not to sell again, but for seeding purposes. Practically it exempts the case of a farmer who on his own soil sells seed which he has grown himself on that very soil to a neighbouring farmer who is going to sow it. That does not offend against one principle of this Act, which is intended to prevent the spread of weed seeds in new sections. The farmer does not send it away somewhere else to be used. In the next place, the farmer who purchases the seed probably knows the land of the farmer who raised it—knows whether it is clean land, knows pretty well what kind of weeds were growing in that farmer's fields, and he purchases the seed with his eyes open to all these things; whereas if the farmer buys seed from the seed merchant, he does not know where the seed was grown, has never seen the fields where it was grown, does not know whether they were clean or not, does not know whether the seed came from a thousand miles away or from the next farm, and therefore does not know what evil weeds he may be introducing into his own farm and his own section. The two cases are entirely different. It is for the purpose of preventing an unnecessary interference with the sale and purchase of seeds among neighbours where seed is largely grown that this proviso and exemption is made. But the exception is very small, because if the purchaser chooses, he may require that the seed be sold under the provisions of the Act. If he does not require that, he purchases the seed with his eyes open without availing himself of the protection which this Act provides. This

clause is only put in for the purpose of facilitating trade in seeds amongst neighbours, and not unnecessarily interfering with that part of the seed trade. But the trade with seed merchants is so totally different that it requires a supervision and control which the other class of trade does not.

Mr. COCKSHUTT. The hon. gentleman meets to a certain extent the objection which I made, but still I think not fully, with regard to the sale of seed by one farmer to another. The merchant is deprived of the sale of such seed, and at the same time is hampered with legislation, while the farmer is not. Therefore, he cannot take advantage of the facilities of the Act and do the business he could do without it. The average profit on a bushel of clover seed is only about five per cent of its value, which constitutes a valid reason why it is not fair to hamper the merchant. It should be remembered that the merchant is not the originator of the seed; but the farmer or grower is. When the farmer takes the seed to market, the buyer may say to him, I must send the seed to the laboratory at Ottawa and ascertain whether it is saleable under the Act; if it is not, I must leave it on your hands. If the merchant practices adulteration, you can punish him; but if he buys from a farmer in good faith and offers the seed for sale in good faith, he is dealing in a fair and honourable way, even though he may not be living up to the strict terms of the Act. The secret of the whole matter is that the farmer is the grower of the seed in the first place, and therefore the Bill should begin with the land. The man who grows the seed is the best judge of what is in it. He knows whether the field is thoroughly clean or whether it is infested with wild oats or mustard, for instance. I would rather have two minutes to look over the field where the seed is grown than an hour to examine bag after bag of the seed. Therefore, I think the grower of the seed should be held accountable rather than the merchant or handler of the seed. The merchant should not be hampered more than the farmer is. Both should come under the one law. If the merchant is held amenable to it, so should be the farmer, who in selling to his neighbour is taking away from the merchant the business which he would otherwise have. The merchant has to pay taxes, and he should be safeguarded in his business. I submit these points for the consideration of the minister.

Mr. FISHER. My hon. friend has completely endorsed what I said a moment ago, that in such a sale as I referred to, the purchaser does not need the protection of this Act. The hon. gentleman said he would rather have two minutes to examine the field where the seed was grown than an hour or two to examine bag after bag of the seed. That is just what the purchaser does who buys seed on the premises where it is grown, and therefore he does not need the protection which the farmer does who buys from the seed merchant. But my hon. friend forgets another thing. The seed sold by the farmer must be sold to another farmer for his own use. The seed merchant buys from the farmer who grows the seed, and then cleans the seed. He has appliances and facilities for cleaning it, and as a matter of fact the seedmen of Canada do clean their seed. Further on, the Bill allows the farmer to sell seed to the seed merchant for cleaning purposes. In section 7, there is a provision that if the seed is sold to the merchant to be cleaned, then the provisions of the Act do not apply. The merchant buys from the farmer the poor or dirty seed, and proceeds to clean it and sell it as clean seed. He pays the farmer a much less price for the dirty seed than he receives for the clean seed which he sells, and quite rightly, for he ought to be paid for his work of cleaning it. But it is not necessary that the provisions of the Act should apply where a farmer sells impure or dirty seed to a merchant to be cleaned. The merchant can take care of himself quite well.

Mr. A. A. WRIGHT. I wish to say one word with reference to this Bill. It came before our farmers' institute a year ago, and there was only one objection which the farmers had to it. It was this, that it prevented the farmers from trading in seed among themselves. You know that a farmer who lives on clay land is always anxious to buy seed from his neighbour who lives on sharp or sandy soil. He thinks that the seed grown upon sharp soil, when sowed upon clay land, would produce a better crop, and that the seed grown upon clay land, when sown upon sharp soil, will produce equally good results. Frequently farmers are anxious to exchange their labour for seed and cannot go to a merchant to buy it. Farmers should have the privilege of buying seed from one another without getting into any difficulty under this Act. They buy with their eyes open. An examination of the field when the crop is growing gives a far better idea of the quality of the seeds than looking at the crop after it is harvested and threshed. Consequently, the farmers are anxious that the Bill should be changed so that they might be free to purchase from one another. As regards the marking of packages, no one would ever buy seeds which would have on the package the names of all these weeds, and no man would undertake to put up packages of seed for sale which would contain all these foul seeds.

Mr. WALSH. How will this section affect merchants in the country districts who buy grain from the farmers? Suppose a merchant buys a lot of grain and the very same day sells a number of packages of the seeds which turn out to contain some foul weeds,

would the merchant be subject to the penalty provided by this Act ?

Mr. FISHER. The exception in this clause only applies to the purchaser who buys from a farmer for the purpose of using the seed himself. If the seed is sold to a man who wishes to sell again, all the provisions of the Act apply.

Mr. WALSH. In many cases the merchants have no way of knowing whether there are foul seeds in the grain purchased or not.

Mr. FISHER. If they undertake to deal in seeds, they must take the necessary precautions to secure pure seeds.

Mr. LALOR. How can a country grain dealer, who buys seeds from a farmer and probably the very same day sells some of those seeds, tell whether there are any foul seeds in the grain or not ? I do not see why you should bring him under the provisions of the Act. In allowing one farmer to sell foul seeds to another, you are placing a bonus on the spreading by farmers of foul seeds in the neighbourhood where they live.

Mr. FISHER. If the local grain dealer buys seed from a farmer, all the provisions of the Act apply to the farmer who sells to him. It is only when a farmer sells to another farmer who intends using the seed for sowing purposes, that the exemption applies. If a farmer sells to a country store-keeper, the store-keeper has the same recourse against the farmer as the farmer would have against him. But if a farmer sells to a merchant, who has cleaning machinery, grain for the purpose of being cleaned, then the provisions of the Act do not apply to the farmer. But if he sells to a purchaser, who intends selling the seed again without cleaning it, then the farmer comes under the Act.

Mr. COCHRANE. In our section of the country, the farmers often sell without knowing what the purchaser intends doing with the grain. The purchaser does not let the farmer know that he is buying the grain to sell it as seed. Suppose a farmer sells grain to a grain dealer and then the grain dealer sells some of the grain to another farmer who wants it for seed, in what position would the farmer in the first instance be ? He did not sell the grain to the purchaser in order that the purchaser might sell it again. He sold it that the purchaser might do as he likes with it.

Mr. FISHER. That would be a matter left to the discretion of the court and the court in such case would probably find the farmer guiltless and the grain merchant guilty.

Mr. BARR. It seems to me that the object of the Bill is, to a considerable extent, to furnish grist to the lawyers. The usual custom is for the farmer to sell his grain wherever he finds the best market. Surely there should be a guarantee given the farmer that he did or did not sell the grain for seed. Otherwise the merchant can throw the responsibility back upon the farmer and endless litigation would be the result. There should be some provision to protect the farmer or he will be in continual trouble. No doubt where a seed grower has grown grain for seed, where he has exhibited it for sale as seed, it is necessary that the law should protect the purchaser against the purchase of foul seeds. But when a farmer sells grain without understanding that it is purchased to be sold again as seed, why should he be responsible? A country merchant, purchasing grain from a farmer might ask if he could sell the grain for seed. The farmer, not understanding the law—it would take a long time to understand it—gives his consent, and sells his grain at the best price he can get for it. The merchant can afterwards plead that he purchased the grain for seed and so paid a high price, and, if proceeded against under the law, might throw the responsibility on the farmer. I submit that the farmer, selling his grain in that way must be given better protection than he is given under this Bill.

Mr. FISHER. I sympathize with my hon. friend's (Mr. Barr's) desire to protect both sides of the bargain, and I think this Bill does protect both sides to the utmost possible extent. My hon. friend says that a country store-keeper buying grain from a farmer can afterwards sell it for seed and pretend that he bought it for seed from the farmer. But the machinery of the Bill, which we come to later on, provides that, in order to be able to make such a plea the purchaser must within seven days take a sample and have it analyzed, and, if the seed is found to be impure or wrongly described, the purchaser must proceed against the farmer from whom he bought the seed for having sold it under false representation. I think this completely protects both sides in the case we are discussing. But I say frankly that I do not want the farmer or the country store-keeper, or the seed merchant either, to be protected so much that we never can convict him if he has done wrong. I want the Bill such that under it wrong-doing can be punished and so prevented. My hon. friend seems to fear that the farmers or country store-keepers will not be informed about the law. As soon as it becomes law I intend to take every means in my power to spread the knowledge of it, as I did with regard to the proposals for this Bill, concerning which the farming community are pretty well informed, as well as concerning the discussion of the subject in this House last year. I think the leading farmers, at any rate in

all sections of the country, as well as the country store-keepers and the seed merchants are pretty well informed as to what is proposed in this Bill. And they will be still better informed if it becomes law.

Mr. CLEMENTS. I would like to ask the minister what position the millers will be in under this law? Speaking for my own city of Chatham, I can say that the millers there take every precaution to get the best seed to dispose of among the farmers. And the same is true of the seed merchants. It seems to me that the effect of this Bill will be to drive a great many dealers out of business and so put the farmers at a disadvantage.

Mr. FISHER. Anybody who sells seed for seed purposes will come under the operation of the Bill whether he is a miller, a dealer, a farmer or anything else—except the farmer who sells on his own premises to his neighbour. My hon. friend (Mr. Clements) describes in eulogistic terms the seedsmen and millers of his district and I have no doubt he describes them truly. These people need not fear the Bill; on the contrary it is a Bill that will protect them from dishonest competition.

Mr. CLEMENTS. It seems to me that the millers will be compelled to go out of the selling of wheat, oats and things of that kind as seed. Yet, I am sure hon. members will agree with me that millers throughout the country are most anxious to furnish the farmers with the best seed possible and that they do it.

Mr. FISHER. If they are selling seed that will render them liable to prosecution, they are selling seed that it is not desirable that the farmers should buy.

Mr. LENNOX. I would call the hon. minister's attention to a rather different phase of subsection 2 from that we have been discussing. The argument has been directed to the idea that the farmers are getting too much indulgence under this section. On the other hand, I think they are not getting the protection they are entitled to. It is true that there is a provision which may, to some extent, facilitate the disposal of their grain by the farmers. But when we turn to section 7, it appears to me—and I would ask the minister to take it into his consideration before we pass that section finally—that, the farmer should have the protection that is thrown about him under subsection 2 not only as regards selling to a neighbouring farmer, but in all cases. In one case, he is selling his grain not knowing to what purpose it will be diverted, and in the other he is selling it knowing that it will be used for seed. To avoid the possibility of lawsuits and the complications that would follow, I submit, the subsection should be framed in such a way as to afford protection to the farmer in all cases of selling his grain ; and should throw on the dealer in seeds the onus of seeing that the grain is not resold for seed until it is put in proper condition. That could be accomplished, perhaps, by the introduction of a very few words. I will read the section as I would like to see it, for the consideration of the minister :

> The provisions contained in this section shall not apply to the sale of seed grown, sold and delivered by any farmer on his own premises, for seeding by the purchaser himself or to a dealer in seeds, unless the purchaser himself or the dealer in the seeds obtains from the seller at the time of the sale thereof a certificate that the seed is supplied to him subject to the provisions of this Act.

The proper course is to provide that dealers in seeds shall guarantee to the public that seeds purchased from them are in reasonable condition, and to leave the farmer absolutely free to sell his seed to a dealer in whatever condition it may be, because, the farmer has not facilities, probably, to extract the various weed-seeds, and, in many instances is not aware of the fact that these objectionable seeds are present in the grain.

Mr. ARMSTRONG. Would the minister say what would be the probable cost to a seedsman of the machinery necessary to clean all the seeds he has referred to? I cannot help thinking that if the machinery is expensive it will not only increase the cost of the seed to the farmer, but it will place the seed business in the control of a very few hands.

Mr. FISHER. The cost of the machinery to clean the seed would depend altogether upon its capacity as well as upon its effectiveness. Probably the largest seed dealers in Canada have machinery which would fulfil all the requirements of this Act, and sufficient to meet all the demands likely to be made upon them. Such a machine would cost about $800 ; while for a small business, an ordinary fanning mill would do a great deal, though it would not be completely effective, such a machine as can be got for $30 or $40. But the large seed merchants could get all the machinery required in this country, for less than $1,000.

Mr. ARMSTRONG. Then I think the effort will be practically to force the cleaning of seeds and the sale of seeds, in our country, into the hands of a comparatively few. There are very few local seed merchants who would invest in machinery costing $800 for the purpose of cleaning the seed that will be sold in their community. While I think that many provisions in the Bill, are wise, there are others that I think are too sweeping. When you compel farmers to purchase only such seeds as have gone through the hands of the seed merchants, you may depend upon it they are going to pay a great deal more for their seeds.

Mr. FISHER. As a matter of fact, the seed merchants of Canada to-day are pretty well equipped with seed cleaning machinery, The seed merchants have practically all the machinery necessary to fulfil the requirements of this Act. An investment in a plant costing from $500 to $700 or $800 to enable a man to carry on a business of this kind, would be a very small charge upon the business. When it comes to the farmers themselves cleaning their seeds, they cannot do it ; therefore we provide machinery by which, under certain conditions and in certain circumstances, they can sell seeds if the purchaser chooses to buy from them.

Mr. ARMSTRONG. How many seed merchants have the necessary machinery ?

Mr. COCHRANE. Is there one between Kingston and Toronto ?

Mr. FISHER. I am told by my officer who is familiar with the trade that there are fully fifteen seed merchants who have the full equipment.

Mr. BARR. Is that for the whole Dominion ?

Mr. HENDERSON. That is a big combine.

Mr. FISHER. That would be for the whole Dominion, but most of them are located in the province of Ontario.

Mr. BARR. What will Manitoba and the other provinces that have no machinery of this kind do ? It is not likely to benefit the farmer, and that is the starting point. It seems to me dangerous legislation and is making a radical change.

Mr. FISHER. There are two or three seed merchants in the province of Manitoba who are thoroughly equipped, and one at any rate in the province of British Columbia who is well equipped ; and there are some others in Ontario further east.

Mr. CLEMENTS. The point raised by my hon. friend from East Lambton (Mr. Armstrong) was exactly the point I wanted to bring to the notice of the minister. While I would compliment the minister upon his desire to pass useful legislation in this direction, I cannot see myself that it is going to benefit the farming community to any extent. It will certainly cause a great deal of trouble.

Mr. COCKSHUTT. So far as my experience goes, no machine has yet been devised that can thoroughly remove all the seeds named in the Bill, and that is the point I desire to draw to the attention of the minister. For instance, from alsike clover and timothy seed there is no machine yet devised that can remove false flax seed. So far as I am aware that has never been removed successfully by any machine. Now the minister rather intimated that seed merchants wilfully left in certain seeds that might be removed by machinery. I believe it is the endeavour of every honest merchant to remove every impure seed that it is possible for him to remove. But I want to point out that there are certain seeds mentioned in this Bill that cannot be removed by any machine ever yet designed. No machine can be designed, unless it has eyes that can take out those weed seeds that are the same size and weight as the pure seed. Wind won't do it, and sieves won't do it. Then what will do it ? Nothing but eyes, and we have no machine yet, that has eyes and that will take out these seeds of similar weight and similar size, and only different colour, from the sample. The effect of the Bill will be to put the business into a few hands, to raise immensely to the farmers of this country both the price of the seed grain and the seed grasses ; and both of these, if they are cheap, constitute an element of wealth that no farmer can afford to ignore. My belief is that clover seed at $8 or $10 a bushel is quite high enough ; if you put it up to $12 or $14 a bushel you are going to do great harm to agriculture in this country. I submit it is not well to pass too drastic a measure. I trust the minister will allow that clause to stand until he has had an opportunity to look into it and to make it more workable.

Mr. FISHER. I would point out to my hon. friend that I did not say that weed seeds would be entirely removed ; I said that machinery was in existence which could conform to the provisions of this Act. The provisions of this Act do not require absolute purity, they come as closely to it as we can make them under the circumstances prevailing in the trade. We do not expect to get absolute purity, we would be very glad to do so, but that is likely to be impossible. I may say that the Bill has been considerably modified so as to make it less stringent than the Bill of last session. But I desire to say that if the Bill is not passed as stringent as it is here framed, it will be practically useless in improving the seed trade in this country ; and I am not prepared to take the responsibility of leaving the seed trade any longer without control.

Mr. A. A. WRIGHT. I am inclined to think that if the seed trade got into fewer hands it would be better for the farmers of this country, because the dealers would be able to get a better class of seed and sell it cheaper than they would otherwise. Allow me to give you one illustration from my own riding. A gentleman from the state of New York came there and went into the seed business. When he was purchasing seed he got a list of all the farmers who grew good seed. He had an agent whom he sent round to inspect every field before the crop was harvested, so that he

might know exactly what foul seed of any kind was growing in that field. When he found farmers who had the very best quality of seed and the cleanest fields, it was from them he purchased his seed. The consequence was that farmers gradually began to grow a better class of seed. But unfortunately the duty imposed by the United States government on seeds going into that country was so high that he could not export any from Canada. I think, therefore, that if this Bill becomes law we will eventually have not only better seed, but cheaper seed, by reason of the inspection of seeds in the fields where they are growing.

Mr. COCHRANE. What kind of seed is it that the hon. gentleman refers to?

Mr. WRIGHT. Peas.

Mr. COCHRANE. It is a great trouble to clean peas I am sure. You must have time. An ordinary fanning mill would take all the foul seeds out of peas.

Mr. DEPUTY SPEAKER. Section 3 stands:

On section 4,

4. No person shall sell, or offer, expose or have in his possession for sale, any seeds of timothy, red clover, alsike, or any mixture containing the said seeds, in or from any receptacle, package, sack or bag upon which is marked 'No. 1' or any other designation which represents such seeds as of first quality, unless they are free from the seeds of weeds named in section 3 of this Act, and are also free form the seeds of White Cockle, (Lychnis vespertina, (Sibth.); Night-Flowering Catch-fly, (Silene noctiflora, L.); False Flax, (Camelina sativa, Crantz.); Canada Thistle, (Onicus anvensis, Hoffm.); Ox-eye, Daisy, (Chrysanthemum Leucanthemum, L.); Curled Dock, (Rumex Crispus, L.); Blue Weed, (Echium vulgare, L.); Ribgrass, (Plantago lanceolata, L.); Chicory, (Cichorium Intybus, L.), and contain out of every one hundred seeds not less than ninety-nine seeds of the kind or kinds represented, or seeds of other useful and harmless grasses and clovers, of which ninety-nine seeds must be germinable.

Mr. LENNOX. I would call the hon. minister's attention to this in connection with the next section. Probably we could deal with it when we come to section 5, but we might as well understand how it works out now. It is provided that out of every one hundred seeds ninety-nine shall be of the kind or kinds proposed to be sold. Then, section 5 provides:

The Governor in Council may make regulations determining the maximum proportion of seeds of the weeds named in sections 3 and 4 of this Act, that may be tolerated in any seeds without affecting their character as being within the meaning of the said sections free from the seeds of the said weeds.

I do not see how these two sections can possibly work out together. There is a definite provision in section 4 that out of every hundred seeds ninety-nine must be of the character proposed to be sold. If that is absolute then the provision contained in section 5 can have no application; and it is very important, I should think, that there should be some provision of that character because it is almost impossible that the growers of seeds should come up to the provision which is here contained, if I understand these two sections aright.

Mr. FISHER. In reply to my hon. friend I will say that section 4 is absolute. Of every one hundred seeds there must be ninety-nine of the kind which is purported to be sold. But, the regulations which may be passed under section 5 could not contravene that in any way whatever. That would refer to the percentage of seeds which might be allowed where the Act requires that the sample must be free from seeds, but that would in no way override the necessity of ninety-nine seeds out of a hundred being true to the name of the sample.

Mr. LENNOX. Does the hon. minister see the effect of that? Is it possible to work that out in the way the hon. minister suggests? It is provided that out of every one hundred seeds there shall be ninety-nine of the character that is purported to be sold; that is that out of one hundred seeds in the whole package there shall be ninety-nine seeds of the character represented to be sold. Then what happens under section 5? That only allows one per cent of objectionable seeds. That only leaves one per cent of all those weed seeds enumerated in section 3 and again added to in section 4, which may be represented in these seeds. Then, how can it be worked out? The Governor in Council may determine what proportion of objectionable seeds shall be in a package without militating against the provisions of the Act. That—I say it with all due respect—is not good sense upon the face of it.

Mr. FISHER. I do not agree with my hon. friend. If my hon. friend will look at section 6 he will see that there is a provision in that section also for a greater proportion than five to one thousand of the seeds sold as being permissible even though the Act may say that no weed seeds shall be present. Now, the regulations under section 5 may go as high as ten per thousand permissible and still not interfere with the provision of one per cent in section 4, but they may go a great deal less than ten per thousand. They may by regulation be placed at only two or three per thousand and that would not contravene or interfere with the one per cent which may under section 4 be existent. But section 4 requires absolutely that there shall be ninety-nine per cent of the seed which is purported to be sold; that is absolute and no regulation under section 5 can go beyond that or allow more than one per cent,

but it might allow much less than the one per cent and still be within the provision of the Act.

Mr. LENNOX. Which is only making it a little more absurd than I thought it was. That is all the difference.

Mr. FISHER. I cannot see it.

Mr. LENNOX. It comes down to this, according to the hon. minister and according to the section, that the utmost of foul seed that can be contained in the package is one per cent, but after providing for that condition of things and after the admission, extracted by the hon. member for Brantford (Mr. Cockshutt) that as to certain seeds it is impossible to extract them, we have this position of things that the most that can possibly be contained in a package is one per cent of foul seeds. Then we have sections 5 and 6 containing this additional provision that the Governor in Council may make regulations by which the one per cent of foul seeds shall not be permitted. What condition of things will we have in regard to the farmer who is growing seeds ? I am not solicitous about other parties because I think they can protect themselves, but we have this condition as regards the farmers that we have them reduced to the absolute necessity of having ninety-nine per cent of the kind of seeds that are purported to be sold, with the additional burden, cast upon them, that the Governor in Council may make a regulation that even that door of one per cent of escape may be closed and it may be made a fraction of one per cent. If it was unreasonable before, I think it is much more unreasonable by reason of these provisions contained in sections 5 and 6.

Mr. FISHER. I do not think my hon. friend understands the section.

Mr. COCHRANE. That is the trouble.

Mr. FISHER. Yes, that is the trouble, but at the same time as the trouble is there, I will try to explain it. Under section 4 there are two conditions which are requisite before a sample of seeds can be marked No. 1. The first is that the seeds are free from the seeds of certain weeds. Does my hon. friend understand that ?

Mr. LENNOX. Yes.

Mr. FISHER. First, that they are free from the seeds of the weeds named. That is the first condition. The second condition is that there shall be at least ninety-nine seeds in every one hundred of the seed which is purported to be sold. Now, in regard to the first condition, the Governor in Council may make regulations as to what percentage, if I may call it so, or fraction of a percentage may be permitted and the sample still be considered to be free from these weed seeds. That would probably be, surely be in this case, far less than one per cent permissible.

Mr. LENNOX. Exactly, it must be.

Mr. FISHER. Then in regard to the second contention of its being necessary that 99 seeds out of 100 should be the seeds purporting to be sold, section 5 does not apply to that at all.

Mr. LENNOX. No, I know that.

Mr. FISHER. Very well then, as far as the first part of it is concerned, it would state what number of seeds per thousand were allowed to be present without being considered to be present. That may sound like an anomaly, that they are present but yet are not to be considered present ; but that is in deference to what my hon. friend from Brantford (Mr. Cockshutt) has pointed out—and I was well aware of it—that we do not expect absolute perfection, we do not expect to get absolute freedom from all weed seeds, but we do want to get just as little as the conditions of the trade, the perfection of machinery and circumstances will permit. We have, therefore, inserted section 5 for the purpose of making a slight allowance for human fallability and weakness, or for the weakness of machinery, if you choose to put it in that way. I think my hon. friend will now understand the necessity of the two sections.

Mr. LENNOX. I think I understand the minister. It is just this, that there must be 99 seeds out of each 100 which are seeds of the variety purporting to be sold. There may be one foul seed in 100, but that possibility does not become absolute, because the Governor in Council may cut that down just as much as they like.

Mr. FISHER. My hon. friend does not go quite far enough. What he says is true of the seeds named, but there might be other seeds which are not named, and still there must not be more than one per cent of weed seeds.

Mr. LENNOX. The minister says that there is only one per cent of margin. In any case there must be 99 per cent of pure seed ; if there are other seeds that are not named here, there is still only one per cent to work on. I would ask the minister if he thinks it is wise to make so drastic a provision in reference to this matter, and to throw such a serious onus on the people who raise and sell seeds ?

Mr. FISHER. My hon. friend again misses one point : this is optional. A man need not put ' No. 1 ' on a package. This is a clause which provides, that if a package of seeds is sold as No. 1, that is, as the best quality, it must live up to this clause. If a man is selling seed that he knows is not No. 1, he should not put No. 1 on his seed.

Mr. LENNOX. That is what I wanted to get at. I quite admit that it is optional,

but what I want to ensure is that the sale of what may be safely branded as No. 1 seed shall not be confined to the hands of half a dozen men. This Act is driving out of the market the large class of producers, and is confining the market to the hands of the half dozen men who have this superior machinery, and when you limit it so that the requirement is as near perfection as you can get—as near perfection as the late Ontario government, 'almost perfection'—you are driving out the producers and the honest, hard working farmer, and creating a monopoly in the hands of a few, which thing is what I want to avoid.

Mr. FISHER. I am rather disposed to take straight issue with the hon. gentleman. If it is necessary that the farmer, in order to get good seed, should have to get it from only a few people, I think that is better for the farmer than to get bad seed from a lot of people. I am prepared to pass a law so drastic that if people will not live up to the law and give the farmers what they profess to be selling to them, they shall be driven out of business. That is the whole purpose of the law. As I said, to begin with, if this Bill did not tread upon the toes of any one in the seed business, there would not be any raison d'être for the Bill at all.

Mr. FOSTER. What ?

Mr. FISHER. Does my hon. friend dispute that ? Perhaps he wants a translation.

Mr. COCHRANE. You ought to talk so that people will understand you.

Mr. FISHER. The hon. gentleman understands ; he read some French the other day.

Mr. FOSTER. I did not recognize the French.

Mr. FISHER. The hon. gentleman's ear and pronunciation are so perfect in that language that I bow to his superior knowledge. We had an evidence of it the other day.

Mr. HENDERSON. Humbug.

Mr. FISHER. I say frankly that I do not want seed to be sold as No. 1 which will not live up to the provisions of this section. I am prepared to advocate that the Bill should be so drastic that seed cannot be sold to farmers in Canada marked as 'No. 1' and said to be of the highest quality, unless it lives up to the provisions of this section. As a matter of fact, we have had a large number of samples of seed tested, and I have here a statement of what was collected last year. We collected 450 samples through the country, and of the timothy seed 49 per cent of the samples lived up to the provisions of this section; of alsike seed, 17 per cent lived up to the provisions of the section ; and of red clover, 21 per cent, and these were samples of seed that were taken largely in the parts of Canada where avowedly poor seed is sold. When we come to take the samples of seed sent to us by reliable and responsible merchants, we find that there were 196 samples received. Of the samples of timothy 76 per cent were up to this standard ; alsike, 54 per cent ; and of red clover, 63 per cent, showing that if men try to carry on their business properly and rightly, there is no difficulty for them to be able to live up to the provisions of this section. It can be done if people will only try to do it, and if they will not try to do it, it is the object of this Bill to make them do it.

Mr. ARMSTRONG. Will the minister tell us what number of firms in western Ontario have the necessary machinery for cleaning the seeds—machinery which costs over $800 ?

Mr. FISHER. I would not like to mention the names of the firms ; to do it would look a little too much like advertising. I may say that a considerable number of the leading seed merchants in Ontario have the machinery.

Mr. ARMSTRONG. As there are only fifteen in the Dominion, would it do any harm to name them all ?

Mr. FISHER. I do not think it would be wise to name individual firms.

Mr. SCHAFFNER. It seems to me that one of the great difficulties in the discussion of this Bill is the manner in which the Bill is drawn. If I understand it correctly, the intention of section 4 is that there is to be not more than one seed out of 100 that is not the right kind of seed. If that is the manner in which this is to be judged, I see absolutely no use of clause 5, which says the Governor in Council may determine how many poor seeds may be tolerated. It says that distinctly—

> The Governor in Council may make regulations determining the maximum proportion of seeds of the weeds named in sections 3 and 4 of this Act.

I understood the minister to say that it did not mean the seeds named in section 3, but it might mean some other seed. I think this Bill is not properly drawn for presentation to this House.

Mr. FISHER. I am sorry to hear the hon. gentleman's opinion on such a subject. I venture to say that the Bill is drawn by the best draftsmen of Bills that are available for this House or this country. I do not pretend myself to draft Bills. They are drawn by the Department of Justice, on the instruction we give as to what is required. But I think I have given a complete explanation of the point at issue, and have shown that clause 5 does not apply at all to the percentage of foreign seeds, in what my hon. friend has quoted in section 4.

Mr. COCHRANE. What do you want it in for ?

Mr. FISHER. Because it applies to another portion of section 4. As I stated a few minutes ago, there are two conditions in clause 4, and clause 5 regulates or controls to a certain extent the first condition, but does not interfere in any way with the second condition. My hon. friend who spoke a few minutes ago insists that it does. I cannot help it if he does not understand it.

Mr. COCHRANE. As a plain, practical farmer, I wish to say that there is the trouble. The minister says he is pleading for the poor farmer. Well, I am one of them.

Mr. FISHER. My hon. friend is not a poor farmer.

Mr. COCHRANE. I made my living as a farmer, which you never did. If the hon. gentleman does not understand farming better than he does this Bill, he would be in a very humble position in life if he tried to make his living by it. He tells the farmers that they can understand this Bill thoroughly. If it is so plain, how is it that the Minister of Agriculture, with all his wisdom, cannot explain it so that the lawyers of this House can understand it ? What position will the poor farmer be in when he goes before a court? I want to impress this on the hon. gentleman's mind—because it requires a great deal to impress a fact on the mind of a gentleman who is so conceited that he thinks he knows it all—that this Bill is so complicated that with all his explanations he cannot bring it down to the comprehension of the lawyers of this House. I wonder if the Minister of Justice understands the Bill that he has drafted.

Mr. COCKSHUTT. I want to draw attention to the word 'free' used in clause 4. I understood the hon. minister to say, when discussing clause 3, that he did not expect absolute purity; but the word 'free' as used in clause 4, is not a comparative term; it is absolute, so that if there is one impure seed in a bushel it cannot be said to be free. That is an impossibility. There must be absolute purity from all the seeds enumerated in clause 3, and also those named in clause 4.

Mr. FISHER. No, no. That is just why I want clause 5, to which another hon. gentleman objects so much, so that we may make a regulation to provide that absolute freedom to a certain extent as it may be found necessary.

On section 7—exemptions from the Act,

Mr. CHISHOLM. Why should the provision for cleaning seeds be confined to merchants ? It seems to me that the farmers should be included. A cleaning machine costing $800 might be purchased and taken around from farmer to farmer in the same way as is done with a threshing machine.

Mr. FISHER. If the seeds were cleaned in the way my hon. friend suggests, by the farmers themselves, they would not be sold at all until after they were cleaned; and then they would not require to be exempted.

Mr. CHISHOLM. If the Minister of Agriculture took steps to educate the farmers as to the different kinds of seeds, he might encourage them to prevent the spread of noxious weeds without embarrassing them so much. If he had sample cases prepared, such as I think he has already prepared, with noxious seeds contained in small bottles, properly labelled, and if every seed merchant were compelled to have one of these cases on exhibition at the place where he sold seeds, and at the same time have a bottle containing the seeds he was selling absolutely free from impurities, so that the farmers could see them, he might in that way do a great deal to educate them without hampering them, and prevent a great deal of litigation.

Mr. FISHER. I am glad to hear the suggestion of my hon. friend. We have been trying to do that kind of work. We have had prepared a cardboard box containing samples of the weed seeds known in the country and are distributing those boxes to those who deal in seeds and the agricultural organizations throughout the country. That is one of the educational factors that we have been making use of in order to instruct the farmers so that they may be able to examine what they buy. We are not restricting our efforts to educate the farmers but on the contrary are increasing them.

Mr. COCKSHUTT. Are the provisions in clause 7 intended to apply to seed sold for export ? There are many noxious weeds which thrive in a climate such as ours, but might not mature in Great Britain, France or Germany, and seeds containing the seeds of such weeds might not be prejudiced thereby to anything like the same extent in those countries as in Canada. Will the provisions of this Bill apply to such seeds when sold for export ? The bulk of the seed trade in Ontario is with foreign countries, and it is not desirable that we should in any way restrict those markets.

Mr. FISHER. Section 6 provides that no person shall sell or offer or have in his possession for sale for the purpose of seeding in Canada—Any seeds of timothy, &c. I do not think that this restriction is in any of the other sections, but I might say that, as a matter of fact, our seed merchants export almost entirely the highest quality of seed. That is one of the evils we have to contend with, namely, that the best quality is exported and the inferior sold in Canada. The best quality is exported to countries where they have just such legislation as

we are now proposing. Consequently these countries have been able to get better seeds than our own farmers can procure. The Bill applies to all seeds held for sale in Canada, whether intended for export or not. If it did not, we would be constantly hampered in the enforcement of the law by having to decide whether the seed was intended or not for export.

Mr. COCKSHUTT. What the hon. minister says may be true as regards European markets, but the United States are prepared to buy all grades of seeds. They will not pay the same prices, but will buy any seeds at a price. It appears to me important that this Bill should only apply to seeds sold retail for use in Canada. Why should we lessen the value of goods which we send to a foreign country ? If you will prevent dealers from buying certain seed even for export, you will make a marketable commodity a dead stock in the hands of the growers or merchants. I do not think this Bill should apply to seeds intended for export. We can safely let the foreign countries look after their own interests.

Mr. FISHER. I have no desire to protect foreign countries, but the difficulty of carrying out this measure would be very much greater if we were to allow seed to be held in this country, ostensibly for export, of a quality inferior to what is allowed to be sold in the country.

Mr. A. A. WRIGHT. I do not agree with the hon. member for Brantford (Mr. Cockshutt). We should apply to seed for export the same test as to seed for use in the country. We should endeavour to gain the reputation of growing the best seed in the world, just as the growers in Germany of the sugar beet seed are reputed to grow seed that cannot be excelled. France has a similar reputation for cauliflower seed. When you want the best cauliflower seed, you must go to France. One word with reference to the fear expressed that this trade will go into the hands of a very few. As a matter of fact, the wholesale trade is limited to a very few and that is a good thing. How does this particular trade work? A wholesale firm sends out a traveller to the retail dealers in Renfrew. He tells these dealers that if he can sell a sufficient quantity to send a carload to the town of Renfrew, whence it could be distributed to the various other places, he will do it on more favourable terms. The freight is a very important factor. If the retailer can buy at wholesale prices every kind of seed he wants and have it delivered cheaply at his own door, he will not fail to do so because he would then be able to undersell everybody else in his own vicinity.

Mr. MILLER. If the Bill should pass in its present shape, it may lead to some confusion, and some guiltless persons may possibly suffer. The main object of the Bill is to protect the farmer who desires to keep his farm clean and to purchase seed free from noxious weeds. I would suggest that in every case the purchaser should be entitled to a certificate from the seller to the effect that the seller has sold a certain quantity of a certain seed to the purchaser for seed purposes and has sold it, knowing that he is incurring all the responsibility under this Act. We should provide further that any seed sold without such certificate shall be deemed to have been sold for other than seeding purposes. That would meet the many objections raised. The objection that this Bill would drive the trade into the hands of the large dealers does not apply. As a fact the majority of seed merchants purchase their seeds from the wholesale seed merchants who have the appliances for cleaning.

Again, if we say that, in order that the farmer may be protected by the provision of the Bill, the seed merchant in the country store will suffer, then, I say, so let it be; it is a case of the greatest good to the greatest number. We might apply the same argument and say : We will allow every person to sell drugs : We will allow every person to practice medicine. But we do not apply the argument in that way. There is another thing that, in my opinion, might be provided for by the Act and is not. I have known many cases of farmers purchasing in the spring what they believed to be turnip seed, but what they found out too late to be rape seed. It seems to me that where that is done there must have been not merely negligence but deliberate fraud.

If there is any way of punishing the man who is guilty of selling for turnip seed something that is utterly worthless for the purpose for which it is purchased, it would be well, I think, to cover the case in this Bill. There is another point which may not properly come under this Bill as it is at present, but which could easily be allowed for by some little change in the title and might be provided for in a special section. I would suggest that there should be a provision in the Bill that the man owning or having under his control a threshing machine should be obliged, before he leaves the premises of one farmer to go to those of another, to thoroughly clean his separator.

Mr. FISHER. I sympathize very much with the remarks of my hon. friend (Mr. Miller) in many of the points he has raised. I may tell him frankly, that, in consequence of the opposition to the details of the Bill, I have thought it best to take one step at a time. I hope the day will come, and not very long hence, when we shall be able to go further than is provided for in this Bill, but I suppose it will be impossible, at one fell swoop to effect all the reforms in the seed trade that we would like to see, particularly as that trade has existed hitherto

without control or supervision. I hope that, in the future, provisions shall be made, such as my hon. friend speaks of, but at present, I fear, we can hardly go as far as he would like. As to his first suggestion concerning a certificate accompanying every sale of seed, under the provisions of the Act, there is a subclause in section 3 providing that a certificate can be given that the provisions of the Act do not apply, but, in every other respect all the processes of the Act shall apply to every sale without a certificate required or given.

Mr. HAGGART. Is any law similar to this in force in any country so far as the minister knows, and if so, does it work well ?

Mr. FISHER. I cannot say that exactly similar provisions are in force in any country that I know of. In certain European countries including Austria-Hungary and Switzerland, they had a system called a guarantee system which is provided for by law and which seems to work fairly well. But I hardly thought the condition of the trade here such that we could safely introduce that system. I have taken most of the provisions of this law from laws somewhat similar in their nature—but dealing with other subjects—already in force in Canada. I have taken some of the provisions from the Fruit Marks Act, and of the General Inspection Act.

Mr. HAGGART. I understood that they had a law on this subject in Germany and also in Great Britain, and I wondered how they compared with this and whether they were successful or not.

Mr. FISHER. There are laws on this subject in European countries much more drastic than this. When I first drew this Bill, a couple of years ago, I was much closer to those models than I am in the Bill as now presented. I have been modifying in the direction of leniency, and as I said to my hon. friend (Mr. Miller), I think that it is necessary to proceed a step at a time. I trust that with the improvement in the trade which, I am sure, will result from the passage of this law, we shall be able to go further as the trade can stand it.

On section 8,

Mr. MACDONELL. I would like to ask the minister if it is the intention that a person shall be punishable only when he has violated the provisions of sections of 3, 4 and 5—all of them ? That is the way it is drawn.

Mr. FISHER. I do not think my hon. friend (Mr. Macdonell) has read the section. It says :

Every person who, by himself or through the agency of another person violates any of the provisions of sections 3, 4 and 5——

He is punishable if he violates any of the provisions. There is a misprint in my copy of the Act which I should like to correct. I move that in line 3 or of section 8, the figure 5 be struck out and the figure 6 substituted. Section 5 is not a provision of the Act that can be violated, though section 6 is

Amendment agreed to.

Mr. MACDONELL. I would still urge upon the minister the point that the person should be liable if he violated any one of the previous sections—3, 4 or 5. The Act, as drawn, makes these sections cumulative, it brackets the three of them, and says that a man must offend against the provisions of all three sections in order to be liable to indictment. If he offends against any one section, it should be sufficient. I submit the matter as a legal question, and the word 'or' should be substituted for the word 'and.'

Mr. FISHER. I am not prepared to set up my own opinion against the legal opinion of my hon. friend (Mr. Macdonell), who is a lawyer of high standing. But I do not read it in that way, and I would be disposed to risk the enforcement of the Act with the words as they are in the section.

Mr. COCKSHUTT. The fine seems to be rather heavy. I understand that these costs may be levied upon every package. That is unnecessarily severe. If it is pointed out to him that one of these packages is wrong and he can fall back on the parties from whom he got it, why, of course, he will do it. But to fine him on the whole fifty packages when he is only selling from one seems to be rather severe. Further, I cannot ascertain where the responsibility of the retailer begins and the responsibility of the wholesaler ends. I do not find in this clause a point at which it may be said that the wholesaler is relieved and the retailer becomes responsible. And when the retailer becomes responsible, it does not appear that he is ever relieved so long as the result of that crop is unknown. I would ask whether he is relieved before or after the crop has been reaped ? If it is open for a man to come back six months afterwards and say: That seed I got from you is not pure seed—of which there is no evidence that he did get it, he only says so—there is a great difficulty. Now, as a dealer, I might buy in the early part of the season from a man in Toronto, later in the season I would buy, say, from a man in Hamilton, and I might also buy from Chicago. It would be impossible for me to tell which of these three lots I sold from to an individual who might complain at the end of the season. Therefore, the responsibility rests upon the seller, and it is not clear where it begins and where it ends.

Mr. FISHER. In the first place, in a case where there is no proof, I do not think the

person accused would have very much to fear, because without proof he cannot be condemned. In the second place, in regard to the retailer and the wholesaler, the case would be in regard to a certain sale, whoever made that sale would be responsible. The provisions of subsections 2 and 3 of this section enable a person who has made a sale to escape responsibility of that sale under certain conditions which are here detailed, one of which is that it was a seed package the seal of which had not been broken. The other is that he must prove to the satisfaction of the court that he had not tampered with the seed, and that it was really in the condition in which he obtained it, and that he had sold it in good faith. He would have to prove this to relieve himself from responsibility. The proof on which he would be relieved of responsibility would no doubt serve in a court of law against the person who sold it to him. So far as the protection of the wholesaler who sells to the retailer is concerned, the wholesaler would have no responsibility if the retailer sold again, because the last purchase would be the only purchase on which a case could be founded, unless under the circumstances to which I have just referred. The hon. gentleman also spoke about a minimum penalty, that is to say, that if a person sold a large number of packages he might be unfairly mulcted in a considerable sum.

Now, if my hon. friend will study the section carefully, he will see that while there is a maximum limit there is no minimum limit. In the amount to be imposed on him for each package, the magistrate or the court, I suppose, who imposed the fine would take all the circumstances into consideration. If he judged that a small amount would suffice to punish him and to indicate that he had done wrong, the amount placed on the sale of each individual package would be so nominal that the whole amount he would have to pay would be very small.

Mr. BARR. Suppose a farmer purchases from a retailer and he finds that the seed is not good and proceeds against the retailer. But the retailer gets out of it on the ground that he purchased the seed from a wholesale dealer or some other person ; then would the farmer have to proceed against the wholesale dealer ?

Mr. FISHER. I think subsection 3 of this Act would meet such circumstances :

> Every magistrate who has disposed of any case under the foregoing subsection shall, within one month from the date of his judgment therein, send to the Minister of Agriculture a report of the case.

I think it will then be the duty of the department to take up the case and proceed. Although that is not expressly stated, I think it is implied that such a case as the hon. gentleman indicates would be one that the department might properly take up.

Mr. SPROULE. Is that the object for which a report is to be made ?

Mr. FISHER. Yes.

Mr. A. MARTIN. I think the minister would be assuming a grave duty in deciding whether he should take it up or not. This section makes it optional for the Department of Agriculture to interfere in the case. I may say that I think the intention of the minister in drawing this Bill is a good one. But I regret that we have not sufficient information before us as to how similar Acts work in other countries to enable us to judge of the probable effect of this one. I think we should proceed very slowly on such information as we can get. I think the committee ought to be placed in possession of an abstract of the legislation passed in other countries on this subject, that would enable us to come to a conclusion as to whether we should pass this measure in its present form or not. If there is a law on the statutes of the United States, as I think the Minister of Agriculture said there was, we ought to be placed in possession of it. I think the Bill will largely increase the price of seeds to farmers, and I think that a large majority of farmers, after purchasing their seeds, will hesitate very much before going into court and taking the chance of getting a remedy for the sale of impure seeds to them.

Mr. FISHER. I think my hon. friend (Mr. A. Martin) does not quite give the farmers the credit which is due them for defending themselves. We have a number of laws on the statute-book to protect trade in various ways. We have the General Inspection Act, we have the Act which deals with commercial fertilizers and a number of other Acts, all of which are framed for the purpose of protecting the individual in his trade. This is another Act of the same character. The point my hon. friend brought out in regard to the government, or the department, proceeding and taking up cases is one in regard to which I do not agree with him. I do not think it ought to be imperative under the Act, because circumstances vary so much that it would be necessarily left in the discretion of the minister of the department as to what should be proceeded with and as to what should not be proceeded with. That is the invariable rule in all cases that come under the Inspection Acts, and in this case I think it would be absolutely necessary as in the other cases.

Mr. A. MARTIN. I think it would not be a good feature of the Bill that it should be left in the hands of the Department of Agriculture to determine whether the purchaser shall have any remedy or not. It might lead to some very improper decisions by the Minister of Agriculture and some farmers might suffer while some others might get the benefit. Information in reference to the working of similar enact-

ments in other countries is wanting. The hon. minister did not enlighten the committee in this respect. It is very well to protect the farmers, but I am afraid this is a Bill for the lawyers to fight over. I would gladly support an effective and workable Bill, but this one is full of difficulties. The committee should have better information in reference to what has been done in other and older countries.

Mr. FISHER. Under any circumstances and in any case the department or any individual could proceed. It is an offence against the law. The Bill does not limit the prosecution to the person who suffers.

At six o'clock, committee took recess.

After Recess.

Committee resumed at eight o'clock.

Mr. FOSTER. What is the object of the 3rd subsection of section 8 ?

Mr. FISHER. The object of the third subsection of section 8 is to provide in case the person accused of selling fraudulently has proved that he was not himself responsible for the condition of the seeds, then an approach may be made to the Minister of Agriculture so that if it is thought necessary or advisable, departmental action can be taken for the carrying on of the prosecution. If my hon. friend will read the section just preceding he will see under what conditions and circumstances the seller can clear himself of a charge of breach of the Act. When he has done so some one else is evidently guilty and section 3 provides that the department may be notified of the condition of affairs, may take it into consideration and if it is thought advisable may institute a prosecution against the party who is guilty.

Mr. FOSTER. Not against this person.

Mr. FISHER. No, against the person who is guilty.

Mr. FOSTER. They may commence a new prosecution.

Mr. CHISHOLM. Would the Minister of Agriculture explain to us what would be done in a case where a retail merchant had bought seed in an unbroken package, had sold it and it was subsequently found that the seed had originally been supplied to the retail merchant from a wholesale merchant in a foreign country. How could the man be punished ?

Mr. FISHER. We could not do anything.

Mr. A. MARTIN. In this case the retailer is summoned and brought before the court by the farmer, but when the retailer proves that he is innocent but that the wholesaler from whom he has bought the seed is the guilty person what does the minister propose to do ? He proposes that the retailer who is innocent shall pay the costs, and what remedy has the retailer ? He has only to transmit that evidence to the Department of Agriculture, the Department of Agriculture may pigeon-hole the complaint after subjecting him to costs. In my opinion this is a Bill altogether in the interests of the wholesale dealers. When an action such as this section provides is brought against a retailer an opportunity should be given to him to proceed against the wholesaler without having to submit to the Department of Agriculture the question of whether or not he should be able to do so. Favouritism might be shown in such a case. The department might take action in the case of a retailer who is friendly to them and do nothing in the case of a retailer who was not. If the retailer is to be subjected to costs he should have an opportunity of proceeding against the wholesaler from whom he has bought.

Mr. FISHER. If my hon. friend reads the Act he will see there is nothing in it to prevent that either.

Mr. A. MARTIN. The section reads :

> Nevertheless, if the accused proves to the magistrate before whom he is tried that the package, sack, bag or receptacle containing the seed respecting which the complaint or information is laid, was purchased by him directly from a seed merchant domiciled in Canada, and was not opened, or the state of the seed was not altered, while it was in his possession, and he had no reason to believe that the seed did not comply with the provisions of this Act, he shall, upon disclosing the name of the person from whom he purchased the seed, and the place and date of the sale thereof, to him, not be liable beyond the costs of prosecution.

What is the next step ? Is there a provision here that the retailer shall fall back on the wholesaler ? No. It says :

> Every magistrate who has disposed of any case under the foregoing subsection shall, within one month from the date of his judgment therein, send to the Minister of Agriculture a report of the case, giving the name of the accused, the name of the person who sold the seed to him, and the date and place of such sale.

That is all he has to do, and it is then for the Minister of Agriculture to say what is to be done. He may say : Well this man is obnoxious to us, he has mulcted him in costs, but there is no remedy for him. Another person may be viewed with more friendly eyes by the Minister of Agriculture, who will say we will proceed in this case and bring the wholesaler into court. I do not think that this power should be placed in the hands of the Minister of Agriculture or any other minister.

Mr. FISHER. My hon. friend has read the conclusive proof of what I just told him ; there is nothing in this Act to prevent the retailer himself proceeding against the

person who sold the goods. The magistrate is obliged to report the case to the Minister of Agriculture in case the minister should think it is a case in which proceedings should be taken, whether the retailer cares to do so or not. But the retailer has all the machinery of this Act to protect himself. There is nothing in the Act to prevent him from proceeding against the wholesaler.

Mr. A. MARTIN. There is nothing in the Act and that is the whole trouble. In place of allowing the farmer to have a judgment against the retailer and the retailer to fall back on the wholesaler as it should be in the Bill.

Mr. FISHER. It is so in the Bill. That is what this subsection means. I have informed the hon. gentleman and the House that it means that the magistrate shall report the case to the minister in case the minister thinks it necessary to proceed, but that does not debar the retailer from proceeding against the wholesaler. The retailer has at his disposal the whole machinery of the Act just as the farmer had against the retailer. I have stated that to the hon. gentleman and I cannot make it any clearer.

Mr. A. MARTIN. Well, I cannot make it very much clearer to the hon. minister. What my contention is, is this, that when the farmer brings a suit against the retailer, and the seed is proved to be faulty, he should be able to get a judgment against the retailer ; and if the retailer is aggrieved, let him get his remedy from the wholesaler. I think that would be a great improvement on the Bill.

Mr. FISHER. I think it would be unfair to the retailer, if he is able to supply the proof described in subsection 2, to have a judgment rendered against him, and I want to protect the retailer to that extent.

Mr. A. MARTIN. The Minister of Agriculture knows very well that the farmers of this country are not going to law against the wholesaler in Montreal or Toronto. Take the case of a farmer in Prince Edward Island, who buys seed from a retail merchant and brings him into court and proves that the seed was not what it was represented to be. He cannot get judgment against the retailer because the retailer falls back on the wholesaler in Toronto. The Minister of Agriculture expects the farmer to proceed against the wholesaler——

Mr. FISHER. No.

Mr. A. MARTIN. Or leave it to the Department of Agriculture.

Mr. FISHER. That would be a case in which it would be quite proper for the minister to take up the case and proceed against the wholesaler ; but at the same time there is nothing to debar the retailer in Prince Edward Island from proceeding against the wholesaler himself.

Mr. A. MARTIN. It is a great objection, I think, to this Bill that the farmer, after bringing the suit against the retailer and proving his case, should then be compelled to go against the wholesaler in a distant part of Canada.

Mr. LENNOX. I ask the minister to explain clause 8. It is said that the fine need not exceed $5 for the first offence. It can therefore be up to $5, and that fine shall be in respect of each receptacle, package, sack or bag, and it may apply to a case where a man has it in his possession for sale, contrary to the said provision. I want the minister to say to the committee whether that will cover a case of this kind. A dealer gets a large quantity in bulk of any kind of seed and does it up into a thousand packages. Then it is discovered that he has that seed for sale, and that it has this improper admixture of noxious weeds in it. Is it contemplated by the minister that an information may be laid charging this man with having a thousand packages of a certain kind of seed for sale contrary to the provisions of the Act, and that he may be fined in respect of each of these packages to the extent of $5, so that there could be inflicted by a magistrate—a magistrate who has, perhaps, no great knowledge of law—a fine of $5,000, or in default of payment a term of one month's imprisonment.

Mr. FISHER. Yes, under the reading of the Act the extraordinary case which my hon. friend cites might occur ; but I would trust to common sense and judgment of a magistrate to deal with the case on its merits, and to put the fine on each individual package low enough not to make it such an outrageous and extraordinary fine. Were such a fine as my hon friend speaks of inflicted, I think it would be a proper case to take on appeal to a higher court ; so that the last resort would not be left in the hands of what my hon. friend has described as an ignorant country magistrate.

Mr. LENNOX. I do not propose to take the language of the hon. minister. I did not use the term 'ignorant country magistrate.' The minister may have very good reasons for wishing to put it in that form.

Mr. FISHER. No, I thought that was what the hon. gentleman said.

Mr. LENNOX. Allow me to say that the hon. minister is mistaken.

Mr. FISHER. I beg the hon. gentleman's pardon.

Mr. LENNOX. I said that it might be dealt with by a magistrate who had no great knowledge of law. I suppose that might happen with a magistrate, as it might with a Minister of the Crown. I submit to those

in this House who have a knowledge of law that the hon. minister is not right in suggesting that in the case I put there could not be a successful appeal to a higher court. There would not be ground for an appeal. The magistrate would not have gone beyond the limits of the evidence and would not have exceeded his jurisdiction. If there is any such rule of law as that a judgment of a magistrate can be set aside when he acts within the limits laid down by the statute, it would be important to this House to be acquainted with that fact. As I understand it, there is no such rule of law. The case I put is clear, and I believe it is beyond question. It is not beyond the imagination of members of this House that there might be times when it would be very satisfactory to a magistrate to impose just such a fine, and it might happen that in the next adjoining municipality a person would be fined simply $5 or less for a single offence. There is liable to be great inequality and a great perversion of justice under this section. I do not say it with any desire to carp particularly about the Act, but I think it is well worth while for the minister, who, I will imagine, is anxious to advance the interests of the farming class, to consider whether that would be a wise provision.

Mr. FITZPATRICK. As the hon. gentleman says, it is quite true that inconvenience would result from the application of the law as stated here; but the hon. gentleman is aware that cumulative penalties are not at all unknown to the profession. They have arisen under the Banking Act and under the Railway Act. I have a case in mind of a bank having been proceeded against for an enormous amount by cumulative penalty. How does my hon. friend propose to deal with a matter of this kind? My attention has frequently been drawn to this difficulty, and up to the present time I have not found a remedy. If my hon. friend could suggest a remedy, I have no doubt the Minister of Agriculture would be glad to apply it.

Mr. FOSTER. You might make a maximum aggregate fine.

Mr. FITZPATRICK. The fine is $5 for each particular offence. If a man sells one package, the fine of $5 would not be excessive, and if he sells one hundred, the principle is the same—he has committed one hundred offences.

Mr. FOSTER. He may have made only one sale, and yet have a thousand packages for sale.

Mr. FITZPATRICK. My hon. friend is quite right. What has been pointed out is a serious inconvenience; the point is to find some remedy. It might not only be an inconvenience but something more. It might be an injustice.

Mr. LENNOX. My hon. friend the Minister of Justice has met this matter in the spirit I expected. It is not the case of a second offence——

Mr. FITZPATRICK. It is for cumulative offences.

Mr. LENNOX. I do not know that I would call it a case of a cumulative penalty, but rather a case of a man being liable for merely having in his possession goods which do not come up to a certain standard. He shall be liable to a fine for the first offence not exceeding $5 and for each subsequent offence not exceeding $25 together with the costs of prosecution for each receptacle, package, sack or bag in or from which seeds are sold offered exposed or had in possession for sale contrary to such provision. The hon. minister will perceive that the case I am dealing with is not a case of sale but the case of a person having simply in his possession a number of packages. There is a provision for a cumulative penalty. In the case of a second offence he may be fined up to $25 for each separate parcel in his possession. You might have a case where a man had offered one package for sale contrary to law and had been informed against and fined up to the limit of $5. He might then be informed against for having in his possession one thousand parcels contrary to law, and be fined $25 for each parcel or up to $25,000. Is it not absurd that such discretion should be left in the hands of any magistrate without limit or right of appeal. What I would suggest is that in no case should the penalty exceed a certain sum.

Mr. FITZPATRICK. I quite appreciate the point and the remark made by my hon. friend the leader of the opposition. But there is this difficulty. You must not deal with a large offender on more favourable terms than with a small offender. The discussion has been profitable. I do not think that this Bill can leave the committee tonight, and I would like to deal with the point now made in such a way as not to create an unfortunate precedent.

Mr. LENNOX. A person who had a thousand packages might not be a large dealer. A very small quantity might be divided into a thousand packages.

Mr. FOSTER. I think the position taken by the Minister of Justice is very reasonable. But whichever way you have it, you will have some inconvenience. It would be a great hardship to have this cumulative penalty put upon a dealer who really was not very guilty after all, and you might sometimes fail to mete out proper punishment to an inveterate breaker of the law. We might, however, take the more lenient course, and limit the maximum penalty; and then if we found that the law did not work well, we could change it.

Mr. FISHER. I am quite willing to let that section stand in order that I may look into the matter with my colleague. We thought that by making no limit to the smallness of the penalty, we were giving the opportunity for the imposition of a very light sentence, even when a large number of packages was concerned.

Section 8 is allowed to stand.

On section 9—who shall be prima facie liable.

Mr. FITZPATRICK. This is to prevent the penalty being imposed on the clerk.

On section 10—examination of seeds, payment of samples, penalty for preventing examination.

Mr. SPROULE. Is it the intention to appoint an inspector ?

Mr. FISHER. We shall require a staff for the purpose of enforcing the Act.

Mr. TAYLOR. This is the object—to give employment to a staff of hungry officials.

Mr. FISHER. The hon. gentleman makes a statement quite unwarranted, not in accord with the facts, and for which he has no foundation. The object of the Bill has been explained, my hon. friend knows it well, and he deliberately undertakes to misrepresent it.

Mr. SPROULE. I rise to a point of order. I ask you, Mr. Chairman, whether it is in order for any member to say that another deliberately misrepresents the object of a Bill.

Mr. DEPUTY SPEAKER. The minister probably went a little too far in using the term 'deliberately,' but was no doubt provoked to use the term by the hon. member for Leeds who imputed an unworthy motive to the hon. minister, and was equally out of order.

Mr. FOSTER. You are most accommodating, Mr. Chairman. On being called to give a decision upon one point of order, you take up another, and we are very much obliged for the double ruling.

Mr. A. MARTIN. I think the committee should have some information from the Minister as to the number of persons who are to be employed in carrying out this Act, what their duties will be and about how much the cost to the country will amount to.

Mr. FISHER. So far as I can see at present, there will be no necessary additions to the staff I now have.

An hon. MEMBER. Then, the hon. minister must have too many now.

Mr. FOSTER. The minister spoke of analysts—these, I suppose, he already has in the department ?

Mr. FISHER. Yes.

Mr. FOSTER. Section 10 authorizes 'any person charged with the enforcement of this Act' to enter premises under certain circumstances. That would seem to indicate that persons are to be appointed to enforce the Act; and it seems to me that if the Act is to be made efficient, the minister must employ people to enforce it. As my hon. friend from Prince Edward Island (Mr. Martin) suggests, this is a good time for the minister to take the committee into his confidence and tell us what the cost of enforcing the law will be, as measured by the salaries of the officials who will be necessary.

Mr. FISHER. For education and analytical work, I already have a staff——

Mr. FOSTER. A staff distributed over the country ?

Mr. FISHER. They travel part of the time carrying on educational and organization work, and part of the time they are in the office at Ottawa. There are four or five men under the head of this branch, Mr. Clark. I hope to utilize the services of these men where it is necessary for the department to intervene. They now collect specimens—where we do not get them voluntarily sent in—by purchasing in the open market. That kind of work has been going on for four years. It may be necessary to add one or two to that staff, not so much with a view to enforcing this Act, but to assist in the general work of the department, and, as part of that work, to supervise the enforcement of the Act. I think it will generally be enforced by those who are defrauded and who take advantage of the Act as a means of protecting themselves. In cases such as those covered by section 8, the department might intervene through one of its officials, whose duty it would be to put a case in the hands of the Department of Justice. And we shall be able, when we think it necessary, to employ the Dominion Police to enforce this law, the same as any law, in cases where the government finds it necessary to intervene. At present I have no intention of adding to the staff in the way of inspectors to go about the country and specially do the work of enforcing the law.

Mr. SPROULE. What would be the position of a purchaser of seeds who found the field in which the seed had been sown grown up with weeds, though he had not noticed the weed-seeds before sowing ?

Mr. FISHER. He would be competent to proceed under the Act, but the difficulties of proof would be very great, unless he had taken the precaution to take a sample of the seed under the provisions of the Act soon after purchasing the seed. But any farmer, knowing the Act to be in force, if he had any suspicion of the seed he had

bought, would take a sample, and then he would be armed for procedure if he found it necessary to act.

Mr. SPROULE. I am inclined to think the seedsman would order him out of his place of business if he tried to take a sample, because it would be throwing suspicion on the goods.

Mr. FISHER. The seller need not know anything about his taking a sample under the Act.

Mr. SPROULE. I thought the sample had to be taken in the place where the seed was bought.

Mr. FISHER. Yes; or in the presence of two disinterested witnesses.

Mr. SPROULE. He could buy it, take it home and sample it there ?

Mr. FISHER. He would have to prove that it was the seed that he had got from the individual.

Mr. COCHRANE. In our section we grow a great deal of alsike. Some of it is exported to be used, as I understand, for colouring purposes. I have had as many as twenty bags of alsike seed in the barn at once, but I could not say, when raising the seed, what it was to be used for. Yet, under this law, as I understand it, these inspectors could come in and take samples and put me to a lot of trouble.

Mr. FISHER. Wherever the person engaged in enforcing the law has reason to suppose that seeds are kept contrary to the provisions of the Act, he would have a right to enter and make an examination.

Mr. COCKSHUTT. I would like to ask if there is no limit to the applications for samples ? Is the dealer obliged to furnish samples to every inspector and complainant who may demand it of him ? If they are allowed to come in and demand interminable samples, the seedsmen will be much hampered, because the seed business is a rush trade, as every one knows. Further, I understand the minister to say that it is not necessary that the seller of the seed should be present when the sample is taken, or have any knowledge of it. I would object to that. That was done in our town in one case and did serious harm to the dealer. Surely, the man who furnishes the sample should know what it is for. He should be able to keep a sample for his own use, the same as he would of food products that are analyzed by the department. When the government analyst buys a pound of coffee or other article for examination, he always leaves a portion of it with the dealer, so that the latter can get it examined by another analyst if he desires. If these seeds can be taken without the knowledge or consent of the owner, I think you are doing a grievous harm to the tradesman or grower behind his back.

Mr. FISHER. With regard to the idea that any one may go in and take samples, it is to be remembered that this section only gives authority to do so to the official who is charged with the enforcement of the Act. The department is not going to instruct a dozen officials to go and take samples of any individual's crop. An ordinary informer cannot take a sample under this provision, it is only the person charged with the enforcement of this Act that is allowed to enter on a man's premises by authority and take a sample, and clause 10 says he shall not be impeded in the exercise of his authority and his duties for that purpose.

Mr. COCHRANE. I asked about the case of a farmer who was raising alsike clover seed for export. Now I have had many bags of seed on my place at the same time, and under this clause I should think that a party would have power to come into my barn and inspect those bags whether I was willing or not, even though he might not know whether they were going to be sold for seed or not. That would be a great hardship, and should not be allowed unless the official was notified that they were there for sale for seed. This clause allows an inspector to do that sort of thing.

Mr. FISHER. No doubt the man charged with the enforcement of the Act would have such power, and if the seed is likely to be sold for seeding purposes I think a government official should have that power, as he has in many other cases. He is a government inspector for that purpose, and is empowered to enter into premises where he believes any article is being held for seed purposes contrary to law. He will have that power under this Act. I would not like to say that we should restrict that power of a government official in the exercise of his functions.

Mr. FOSTER. But that seems to be an extraordinary power. I do not think an official should have that power in reference to all seeds in respect to which no accusation or charge has been made. But my hon. friend here is simply the possessor of a lot of grain that he has raised and stored in his barn or his granary. There is no question about selling the seed for seed purposes or anything of the kind ; and without his being charged with any impropriety, you say that a certain official may enter his premises whenever he chooses and make an inspection of his grain, and if he is impeded by the owner the latter renders himself liable to a fine of $500. It seems to me that is going too far, and that before your enforcer of the law can enter any premises it must be premises in which it is supposed that there is seed out of which sales have been made for seed purposes. But this clause goes much further. Any granary, chamber, receptacle of

any kind in any part of the country whose owner is not selling seeds for seed purposes or anything of the kind, may be opened arbitrarily by this official, and if the owner, who has a right in his own possession, obstructs the official he renders himself liable under the law. I think that should only take place where there is a seed about which there is a question of illegal selling for seed purposes.

Mr. FISHER. This clause is exactly similar to the clause in the General Inspection Act, in the Inland Revenue Act and also in the Customs Act. Customs officers have far greater powers than are given here.

Mr. COCHRANE. I do not think the case here is at all parallel to a case under the Customs or Inland Revenue Acts, because in these latter cases a man is defrauding the revenue. I am not defrauding anybody, so far as I am concerned. I raise that grain myself. I am not responsible under this Act for what I do with it. I am not liable for what I do with alsike clover or anything else I have in my possession. Yet an official of the government can come into my premises whenever he sees fit and inspect my wheat; he can take a sample of wheat, or timothy with foul seed in it, as there very often is, and it is nobody's business so long as I keep it in my granary and do not sell. I do not think any government official should be allowed to come on my premises and inspect my grain when he don't know whether I have it for sale for seed or not. It is none of his business what I have it there for, unless I let the public know that I have this seed there for sale for sowing purposes.

Mr. FISHER. There is a good deal in what the hon. member for Northumberland (Mr. Cochrane) says, and I think it might be well possibly to limit the application of this section in some cases. As I said before, it is taken almost verbatim from the General Inspection Act; but the circumstances are a little different.

Mr. LENNOX. I would ask the minister to consider another phase of this matter. There is a penalty of $500, no for having seed that is improperly labelled, but for, in any degree, obstructing the officials. It might work out in this way: A farmer has only enough wheat upon his place to seed his own farm and feeling it to be a serious injustice that this official should come in, inspect his grain and takes a sample of it. He does, to some slight extent, obstruct the official. He has no knowledge of the law. Of course, it is said, that a want of knowledge of the law is no excuse—that every man is bound to know the law, but still we must look at this thing from a practical standpoint. He has no knowledge of the law, he knows he is right, he obstructs this official and he is fined. He has only enough seed to seed his farm, he has no intention of selling any, he can prove beyond question that he had not anything to sell, he feels it an injustice that this man can come in and invade his rights and property, he obstructs him to some extent and although it is proven in the end that the grain was not offered for sale he is fined $500. I would like the hon. minister to consider that point.

Mr. FISHER. The qualification which I have just suggested might be put in in accordance with the request of the hon. member for Northumberland (Mr. Cochrane). That will cover the point that the hon. gentleman speaks of.

Mr. LENNOX. Very good.

Mr. SPROULE. In regard to that other question it seems to me it is not very clear yet, that is, as to who may take samples of seed, and under what circumstances they may be taken for the government analyst. The Bill says 'any inspector, informant or complainant.'

Mr. FISHER. That is the 11th clause.

Mr. SPROULE. Yes, my first question was: must these samples be taken in the presence of the person who sold the seed? And the hon. minister's first reply was that this was quite unnecessary. I see there is a provision which says:

> Any inspector, informant or complainant who, finds or suspects seeds to be sold, or offered, exposed or had in possession for sale for the purpose of seeding in violation of the provisions of this Act, shall take a sample from the said seeds and forward it to such person as the Governor in Council appoints as an official seed analyst to examine and report upon any seed submitted for analysis under the provisions of this Act.

Section 12 provides that:

> Any sample of seed taken for official analysis——

This may be taken by either the inspector, informant or complainant:

> ——under the provisions of this Act shall be taken in the presence of—
>
> (a) the person who sold or offered, exposed or had in his possession for sale the said seeds, or
>
> (b) two impartial or non-interested witnesses.

Would it be competent for a person when purchasing seed to take it home, then afterwards call in two impartial witnesses, take a sample of the seed and send it to the government analyst?

Mr. FISHER. Yes. The farmer who purchases the seed need not necessarily take a sample in the store before he leaves. He may take it home. He may send his servant or his boy to buy the seed and when he gets this seed home, according to the provisions of section 13, he may take a sample 'within seven days from the date on which the seeds entered into the personal possession and became the property of the puchaser.' It would never do to restrict the tak-

ing of a sample of the seeds to the moment of purchasing the seeds. We would practically nullify the operation of the Act. Of course, when the sample is taken it has to be taken fairly in the presence of two unbiased, unprejudiced witnesses who will certify to its being a fair sample of the seeds.

Mr. SPROULE. This applies to seeds that are not sold in sealed packages. Suppose seeds are sold in sealed packages, what then ?

Mr. FISHER. There are two cases provided under section 13. One is the case where seed is sold in a sealed package. I am glad to know that a number of the best seedsmen are putting up their seeds in small sealed packages for the express purpose of protecting their own reputation, and the seed is sold through the retailer in an unbroken package bearing the seedsman's seal. Then, a sample must be taken at the time of breaking the seedsman's seal. Where the seed is sold in bulk and then retailed, we have to make other provisions and the provisions are as contained in section 13. Samples are to be taken within seven days and under section 12 they must be taken in the presence of two impartial and non-interested witnesses. I think we safeguard the seller as well as we possibly can.

Mr. FOSTER. In reference to section 11, second line, does not the hon. minister think that is a little loose ?

Any inspector, informant or complainant who finds or suspects seeds to be sold, &c.

Any man of a suspicious turn of mind is always suspecting things. We quite well know what little rivalries and jealousies are likely to take place.

Mr. FISHER. That is only as regards the taking of the sample. If he did not suspect he would not take the sample at all. We must allow him to take the sample on suspicion.

Mr. FOSTER. I do not know that you should allow him to take it on suspicion. I think he should have something stronger than suspicion. He should have some just ground for believing. Suspicion is very different from the basis upon which a man ought to proceed in any form legally against his neighbour or against a citizen.

Mr. FISHER. What does my hon. friend want him to have ?

Mr. FOSTER. He should have some good ground for believing. He should have some prima facie evidence. Any man can suspect anything, and suspicious men are apt to suspect anything.

Mr. FISHER. You cannot get the evidence until you have taken a sample and analysed it.

Mr. FISHER.

Mr. FOSTER. Neither could a man enter a house and take a criminal from that house until he had some basis for doing so.

Mr. FISHER. It is not a question of going into a man's house. It is simply the taking of a sample.

Mr. FOSTER. It is a question of interfering with a man's property. He should have some reasonable ground for believing.

Hon. L. P. BRODEUR (Minister of Inland Revenue). I may say that in regard to the Adulteration Act it is almost similar to this provision of the Bill. Where there is ground for suspecting that the law has been violated the inspector may go into a house and get samples; in fact, we generally give instructions to the inspectors to go into every store where they think goods are being offered for sale which do not comply with the law and procure samples. I suppose the same principle might apply in this case. There is nothing injurious to any person in the fact that collections of samples are made.

Mr. SPROULE. But you do that for the safety of the public health.

Mr. BARR. Do I understand that when taking these samples they are obliged to pay for them ?

Mr. FISHER. Yes.

Mr LENNOX. Under section 10, but not under section 11.

Mr. FISHER. Section 11 provides for the taking of a sample from what the purchaser has. It is not a forcible entry and the taking of a sample from somebody else's seed. It is the taking of a sample from the seed which has been purchased and which is in the possession of the purchaser who must take it and forward the seed to the analyst.

Mr. LENNOX. Is that correct ?

Mr. FISHER. I understand so.

Mr. LENNOX. I am not quite sure of that. If you take section 11 and section 12 together I think that section 12 will probably embrace what is provided for in section 11, and section 11 authorizes an inspector, informant or complainant who finds or suspects seeds, &c., to take a sample from the said seeds and forward it to the government analysts, and then any sample of seeds taken shall be taken in a certain way according to section 12. Do not these two sections go together ?

Mr. FISHER. Certainly.

Mr. LENNOX. But then the inspector, informant or complainant can go into the premises of a person who has not sold one bushel or one package of grain and take a sample and not pay for it, whereas under section 10 if you take samples you must pay for them. I cannot see the reason for that difference.

Mr. FISHER. My reading of it is that section 10 gives authority to enter in and take a sample where there is somebody objecting to the taking of a sample, for instance from a merchant's bin or dealer's bag. There the person charged with the enforcement of the Act is given certain authority and power; similar authority and power is given under the Customs Act, the Inland Revenue Act, and the Adulteration of Foods Act. It is not an unusual power at all. It is given under most of the Acts connected with the administration of just such things as this in Canada. But to return for a moment to my point. This section 10 provides for the taking of a sample when there is objection on the part of the owner of the grain to the taking of the sample, and the person charged with the enforcement of the Act has to exercise his authority and rights in order to perform his duty. Section 10 gives him that authority and that right. Section 11 provides that in a case that is in dispute, a sample must be taken to be forwarded to the government analyst for test or analysis, and it says that, that sample shall be taken by anybody who is entering upon a prosecution or a case or even if he does not want to enter into a case, if he simply suspects he has been wrongly treated he will take a sample of the grain and forward it to the government laboratory for analysis. Section 12 provides necessary precaution as to how and under what conditions a sample is to be taken which is to be forwarded for analysis. If the sample were not taken under these conditions, the analysis of the sample could not be used as proof in a test case. That is the object of section 10, to provide regulations and conditions under which a sample should be taken, the result of analysis of which would be used in a test case. I think these are the reasons for having three different sections; they deal with the matter in three different ways.

Mr. LENNOX. Section 11 can be taken with section 12.

Mr. FISHER. Yes; any samples taken under section 11 must be taken in the way prescribed in section 12.

Mr. LENNOX. Section 11 goes very far. It embraces any case where goods are to be sold or offered, exposed or had in possession for the purpose of sale, and so on. It embraces any case where any person has these goods for sale. Then any inspector, informant or complainant may take a sample of seed with or against the owner's will and send it to the analyst, so that I do not see exactly why, if it is to be paid for in the case my hon. friend mentioned before, it should not be paid for in this case. That this provision applies to seller as well as buyer is further borne out, I think, by the provision in section 12 that a sample may be taken in the presence of (a):

The person who sold or offered for sale or had in his possession for sale, such seed.

Now, if this did not apply to the dealer or grower, how could the sample be taken in the presence of the person who offered, exposed or had it in his possession for sale? These are words which show plainly that not only does it embrace the case which the minister refers to as a case where a person has suffered, and therefore voluntarily acts, and might be supposed to surrender his sample without payment, but also that it applies to the other case of the dealer or grower, and if there is good reason for having provision for payment in the 10th section, I submit to the minister that there is much more reason for having it in the case of these two sections, for this reason that in this case there are a variety of people, not alone a government official who is always doing justice, but a variety of people who may act; we have an inspector, an informant, and a complainant, and the informants and the complainants may if they think fit be legion. A may take a sample to-day, B to-morrow, and C the next day. There is no limit to the possible number of samples, and thus a valuable seed might be frittered away by enemies. That is not a probability, but it is a possibility, and a law should be certain. The Minister of Agriculture brings in the analogy of adulterated food. Surely he does not think that there is any analogy between a case of malfeasance such as that, a deliberate act of adulterating food, and the act of an honest farmer who has in his possession grain which he has no suspicion offends against this law, grain which contains seeds of which he does not know the name and which he has no means of testing. One is a direct crime against the laws and the other is at most a mere matter of neglect or want of knowledge or nonfeasance.

Mr. FISHER. Will section 11 apply to any inspector? No one has a right to go in and take a sample contrary to the desire of the owner except the government officials. The informant or complainant cannot do it except by the permission of the person owning the seed.

Mr. SPROULE. You make it imperative because you say 'shall.'

Mr. FISHER. That 'shall' means that in case of taking a sample for the analyst in order to get evidence for a prosecution; a sample shall be taken which shall serve the purpose.

Mr. SPROULE. He may be an informant or an inspector.

Mr. FISHER. I would not say that this section at all authorizes any informant or complainant or even an inspector to go into a place against the owner's will but of course I would not give a legal opinion on it. Section 10 does give that authority to the inspector.

Mr. SPROULE. You tell him to do that knowing that he has not the authority.

Mr. FISHER. I tell him to do a thing which, for a purpose, I presume he is able to do. If he is not able to do it I suppose he must get the sample in some other way.

Mr. LENNOX. 'Shall' is ordinarily imperative. Will the minister allow these two sections to stand for consideration ?

Mr. FISHER. I am perfectly willing to let them stand.

Sections 11 and 12 allowed to stand.

On section 13—Samples to be sent within seven days.

Mr. COCKSHUTT. What guarantee will there be to the dealer that the seed will reach the analytic department in the same shape as when it left the retailer's hands ? That is a very important matter. Seed might be surreptitiously placed in a parcel that was purchased. I would remind the hon. minister of the parable of the tares. He will remember that according to Holy Writ, a man sowed good wheat in his fields and at night, while he slept, the enemy sowed tares, and when the seeds sprang up the owner found both growing together. It might be so in this case. I would like to know what safeguard there is that the samples, when they reach the analyst, will be exactly the same as they were when they left the dealer's hands.

Mr. FISHER. Under section 17 the Governor in Council may make regulations, and in these we propose to provide for the method of despatching the samples to the seed laboratory.

On section 14—analysis and certificate.

Mr. WM. WRIGHT. Might I ask the Minister of Agriculture how many places in Canada will be available to anybody wishing to have seed tested ? Will it all have to be sent here to Ottawa from every part of Canada ? If so, I think it will be a very serious hindrance to the grain trade. Everybody acquainted with the trade knows that all the seed business is done inside of a few weeks, and every dealer buys very carefully, for the reason that he knows that if there is any left over, he will have to carry it for twelve months. Perhaps half the seed sold by dealers is sold on rush orders by wire to headquarters, and has to be hurried out at once. What opportunity would there be for a dealer to send samples to a central place and have them sent back before retailing the seed to his customers ? How long would it probably take, say from Manitoba, or from the maritime provinces, or from British Columbia ?

Mr. FISHER. I suppose that for the present there would be only one seed laboratory for analysis in the city of Ottawa. It is true, as my hon. friend says, the seed business is rushed pretty strongly in the spring, and I do not think it would be possible for the retailer to wait for an analysis of the seed he is selling. On receiving the seed he would take a sample and send it for analysis, and in the meantime would probably have to go on selling the seed. However, in section 8, subsections 2 and 3, machinery is provided by which, if he were prosecuted for selling bad seeds, and he had a sample taken in the way I speak of that would be a proof that would enable him to relieve himself of the responsibility and pass it on to the wholesaler who had sold him the seeds.

Mr. WM. WRIGHT. Another point while I am on my feet. Anybody having a suspicion that any seed may be impure and not up to the requirements of this Act, should immediately send a sample to the Department of Agriculture. I think twelve months is altogether too long in order to ascertain whether action is going to be taken with regard to any seed. I think that anybody feeling aggrieved should be able to get an answer back within three months.

Mr. FISHER. That point comes up later on.

On section 15—certificate as evidence.

Mr. LENNOX. I wish to call the attention of the Minister of Justice to the words 'shall be accepted as evidence.' Sometimes it is provided that it shall be prima facie evidence in a matter of this kind. I presume that it shall only be accepted as evidence in the case, not as necessarily conclusive evidence.

Mr. FITZPATRICK. I would not think it would be looked on as conclusive at all—merely as part of the evidence in the case.

Mr. LENNOX. I think that is fair.

On section 18—time for prosecution limited.

Mr. LENNOX. Should we not better limit that to 6 months ?

Mr. FISHER. It was six months in the old Act. My reason for changing it to twelve was the case contemplated in subsection 2 of section 8. In such a case, if the prosecution failed against the retail dealer, it would have to be continued against the wholesale dealer, and if the limit were made six months, there might be a failure of justice.

Mr. LENNOX. In that case the extension is quite right, but in ordinary cases the limit should be only six months.

Mr. FISHER. I shall consider the point and perhaps we might make the limit of twelve months apply only to cases under subsection 2 of section 8.

Mr. MACDONELL. This clause is rather vague. It says that any prosecution may be

commenced within twelve months from the time when the matter of complaint or information arose and not later. What is that time ? Is it the time of sale by the wholesale dealer or resale by the retail dealer ? There might also be a doubt as to the nature of the offence. One of the offences is the exposing for sale. A merchant might expose for sale during two years and no prosecution be taken against him within those two years. If one were taken subsequently, what would be the position ? In my opinion none could be because the twelve months from the time when the matter of complaint or information arose would be up. It seems to me the clause might be made clearer.

Mr. FISHER. This clause was taken verbatim from the Summary Convictions Act. The clause in that Act is well understood and its interpretation well established by the courts.

Mr. MACDONELL. I am not aware of any provision in the Summary Convictions Act which makes the exposing for sale an offence. Supposing a man had the goods exposed for sale a couple of years, what date would you take as that on which the matter of complaint or information arose ?

Mr. FISHER. I cannot answer the legal question my hon. friend has raised. I submitted the matter to the Department of Justice and they evidently considered that this clause covered the case.

Mr. WALSH. Suppose information is not laid for six months or a year and no report given on the sample and the seedsman in the meantime goes on selling, how is the farmer to be protected ?

Mr. FISHER. I hope there will not be any such delay in analysing the samples and giving a report. The report should be given in two or three months at the longest. But this Bill is intended to act rather as a deterrent than as a means of punishment. Merchants will be very careful, because if they are fined a few times, they will get a reputation for selling bad seed and lose their trade. In that way the Act will do more good perhaps than by punishing wrong transactions.

On section 2 :

This Act shall come into operation on the first day of September, 1905.

Mr. COCKSHUTT. I think the delay is not sufficient. A great deal of seed will be on hand at that period, timothy seed just begins to sell freely in Ontario at that date. Fall wheat is then sown from the seed of the former season and the new seed is not on the market in time for the sowing of the fall wheat. There ought to be more time given the dealers, who have large amounts of seeds that may be condemned, to get rid of their stock on hand either by exporting it or cleaning it or in some other way. A vast amount of stuff is held by the seedsmen from one season to another, and to bring in a sweeping Act which would take away thousands of dollars worth of property from the seedsman, as this will, is not in accord with justice. I think the time should be extended six months or a year.

Mr. FISHER. I do not take much account of the idea that this Act will come into force too soon. Everybody in Canada has been fully warned that it is coming into force. The trade expected it last year, but unfortunately the pressure of business prevented its becoming law. I have been informed by those who are more expert than I in trade matters that any time between June 15 and September 15 would be the most convenient to the trade for the changed conditions, and have therefore made the date September 1. There can be no doubt that the Senate will pass the measure, and the trade will have six months in which to prepare for it. I am quite prepared to consider any date for the coming season which would be most convenient to the trade, but do not think we should put it off for another season.

Mr. COCKSHUTT. The time of the year that the hon. gentleman has selected is the proper one—between June and September. But I think that 1906 would be a better date to bring in so sweeping a measure.

Mr. FISHER. They have had warning.

Mr. COCKSHUTT. There is a vast quantity of seed in the hands of dealers that would not pass under the Act, and to make a law under which that property, perhaps, cannot be realized on at all, will be a very serious loss to individuals. It may reflect upon our farmers as well, who hold over considerable quantities.

Mr. FISHER. I would not like to take the responsibility of allowing seed such as the hon. gentleman (Mr. Cockshutt) speaks of, to be distributed among the farmers for another year.

Mr. P. H. McKENZIE. As an agriculturist, I think we have been too long without this Act, and I protest against it being postponed any longer than the minister has stated. It is generally admitted in this country that the weed nuisance is becoming a very serious one, that many of our best farms are becoming polluted with foul weeds, and that the cost of farming these lands is increased by the weed nuisance. Farmers are looking to the Minister of Agriculture to provide a remedy for this condition of affairs. Having listened to the debate, I must say, as a farmer, that I compliment the Minister of Agriculture on the steps he has taken, and I hope he will not longer delay in putting the law into proper condition and bringing it into

force in the interests of the farming community.

Mr. COCKSHUTT. I would just say, in answer to the hon. gentleman (Mr. P. H. McKenzie) that the seed grown in the province of Ontario is among the best in the world, in spite of our having no such law as is now proposed. I speak particularly of red clover and alsike. Ontario seed of these kinds brings, as is well known, more than the American product, and more than most of the European product. That being the case, why do we need this Bill so urgently? It is certainly not because our seed is inferior. We have a large quantity of good seed, but most of it is shipped abroad.

Mr. P. H. McKENZIE. That is the very difficulty. We are exporting our best seed, and inferior and foul seeds are being sold to our own farmers. And, unfortunately, we have too many farmers who are willing to buy bad seed. We would like to have it put beyond the power of farmers to buy poor seed. This should be done in their own interest. I have noticed that the principal part of the opposition to this Bill has come from the lawyers and the seedsmen. I am astonished, in the first place, that the lawyers should object to the Bill. They say it is going to cause no end of lawsuits. Well, that would certainly be in their interest. As to the seed dealers, I think that when the law is working properly—as it will do before it is long in force—it will be found that it will not injure them at all. And it will greatly benefit the country in which we all take such an interest, and the prime industry of the country, the industry of agriculture.

Mr. A. A. WRIGHT. I am delighted to know that such good seed is produced in this province. And if, as the hon. gentleman (Mr. Cockshutt) says, there is such a great amount of splendid seed throughout the country, so much the better for the country at large, and so much the less danger of disaster to the holders of the seed. If the seed is good there is no danger of trouble.

Mr. HENDERSON. I am surprised to hear an hon. gentleman talking about opposition to this Bill. It can only be explained on the ground that it comes from gentlemen who are new members of this House, and who fail to make the distinction between fair criticism and opposition. The life of parliament is criticism. It is unfair for any hon. gentleman to charge His Majesty's loyal opposition with having opposed a Bill simply because they have criticised its provisions. We have been endeavouring to help the minister to improve the Bill and make it workable. This we have been doing for the past three years, and I am happy to say that there has been a vast improvement in the Bill. I think the minister himself admits that there has been a great improvement, and I am sure he will give us credit for the assistance we have given. I believe that he looks at it differently from these other hon. gentlemen. There may be questions on which we disagree. For instance, there is the question of the time when the law should come into operation. But for my part, I am not prepared to give an opinion of that subject. My hon. friend from Brantford (Mr. Cockshutt) may be correct. He knows the conditions of the trade, probably, even better than the Minister of Agriculture does. There is room in this case for a fair difference of opinion; and I am sure that the Minister of Agriculture will not say that my hon. friend from Brantford has opposed the Bill simply because he has suggested a later time for its coming into operation. In view of the improvement that has already been made, it might be worth while to wait and get a perfect Bill, and one thoroughly workable—for there seems to be great difference of opinion as to whether this Bill is workable or not. I am not opposing the Bill by any means. If it is a good law for the country, His Majesty's loyal opposition will stand by it. We are the guardians of the farmers' interests as much as are hon. gentlemen opposite. I believe we represent more farmers than they do. We have been the friends of the farmers and have advocated the farmers' interests in every matter, not merely in such measures as this, but in the general policy of the country, and in providing markets for the farmer. It is not reasonable to say that we are opposing the measure because we criticise it. I am sure the Minister of Agriculture will give us credit for having assisted materially in bringing the Bill into its present improved shape.

Mr. FISHER. I am glad to give hon. gentlemen opposite, and especially the hon. member for Halton (Mr. Henderson), an old friend whom I have seen in this House for many years, all the credit possible. But I would give him even more credit if he had not said so much about being the friend of the farmer. The hon. gentleman doth protest too much, methinks, I believe the farmer will realize that fact. We are not going to discuss the question as to who are the friends of the farmers; the records of parliament and the records of legislation will prove that better than any protestations the hon. gentleman can make or I can make. But I am glad the hon. gentlemen opposite endorse the Bill which I have the honour to present to the House, and of helping through so far as it has gone. The principle of the Bill after all is the chief thing, and if we can get an unanimous endorsation of the principle of the Bill, I have no doubt the details can be threshed out and made workable by the combined common sense of the

members of this House. The Bill to-day, while not so drastic as it was, is probably more to the taste of the people than when it was first introduced, and is more likely to be successful when passed. I trust that when this Bill becomes law and has been in force for a few years, the condition of affairs will be such that we will be able to pass a still more drastic measure, giving greater protection to the purchaser of seeds and greater protection to those who are engaged in the trade. I would be glad to be able to do that in the years to come as Minister of Agriculture.

Mr. HENDERSON. I do not think it lies in the mouth of the Minister of Agriculture to charge me, during the time I have been in this House, now some sixteen or seventeen sessions, with having at any time failed to stand up in the interests of the farmers of this country. Perhaps the hon. gentleman can recollect the time when he opposed a measure in this House that was directly in the interest of the farmers, when he stood up against a measure that was intended to protect the butter interests of the farmers. That is something I cannot be charged with. The hon. gentleman would take half an hour to explain away that little difficulty. I have heard him try to do it, but to my mind he failed altogether in accomplishing his object.

Mr. FISHER. It was all explained away in the elections of 1897.

Mr. HENDERSON. It is hard to explain away a speech and harder to explain away a vote.

Mr. A. A. WRIGHT. I am astonished to hear the hon. member for Halton (Mr. Henderson) say that he has improved this Bill by opposing it during all these years. I am sorry that we did not live with him, or he with us, in the days of the children of Israel, when Moses brought down the law on the mount. We would have heard the hon. gentleman cry out: Wait Moses for a little while until the members of the opposition get a chance at this Bill, and you will see how they will improve it for you.

Mr. HENDERSON. This is a new phase of the question. I do not know what kind of seeds they had in those days, I do not know what the hon. gentleman refers to.

Mr. FOSTER. Manna.

Mr. HENDERSON. He must have an extraordinary idea of legislation. I do not know where he is getting a precedent in those olden days for what we are doing this afternoon. He has not been here all the afternoon.

An hon. MEMBER. Where was he?

Mr. HENDERSON. I don't know. perhaps he was out with Moses somewhere. He spoke about my opposing the measure. I never opposed the measure, I do not know a gentleman on this side who has opposed it. The member for South Renfrew (Mr. A. A. Wright) does not seem to be able to draw a distinction between fair criticism and opposition. The proper way to deal with the Bill in this House is to criticise it. I am not like the hon. gentleman, who merely sits here to register everything that the government proposes, whether it is right or wrong. When the hon. gentleman does that, I do not consider he is acting in the interests of his constituents, because he is simply registering what another man does. I am glad to hear the Minister of Agriculture say that while this measure is not so drastic as the measure of previous sessions, he thinks it will be much more acceptable to the people, and can be more effectually enforced.

Mr. FISHER. I move that the committee rise, report progress and ask leave to sit again, when we will take into consideration the various sections that we have not dealt with.

Mr. FOSTER. I would suggest to the hon. gentleman not to take this up in committee stage again for, say, about ten days. The discussion we have had will go out to the country through the press, and in the meantime we may receive certain suggestions which will serve to make the Bill even better than it is.

Mr. FISHER. The hon. gentleman's suggestion is reasonable, but the business of the House may require that we take it up a little earlier.

Progress reported.

On motion of Sir William Mulock, House adjourned as 9.50 p.m.

HOUSE OF COMMONS.

WEDNESDAY, February 1, 1905.

The SPEAKER took the Chair at Three o'clock.

FIRST READING.

Bill (No. 22) respecting the Calgary and Edmonton Railway Company.—Mr. Oliver—by Mr. Scott.

QUESTIONS.

SHERBROOKE POSTAL SERVICE.

Mr. WORTHINGTON—by Mr. Lefurgey—asked:

1. Is it the intention of the government to charge a two-cent postal rate on letters from the city of Sherbrooke to a branch office in the city, and only a one-cent postal rate on letters to the central office in the city?
2. Has the government under consideration the establishment of postal delivery service in the city of Sherbrooke?

Hon. Sir WILLIAM MULOCK (Postmaster General) :

1. The two post offices in the city of Sherbrooke are independent post offices, neither being a branch of the other. The letter rate is fixed by statute, and not under the control of the government, and the rates charged in Sherbrooke are in accordance with the provisions of the Act.

2. The answer to the second question is : No.

THE MANITOBA SCHOOL FUND.

Mr. BOLE asked :

1. What amount was paid last year to the government of Manitoba for interest on the school trust fund ?

2. Was the total amount claimed by the government of Manitoba paid ? If not, how much was deducted, and for what reason ?

Rt. Hon. Sir WILFRID LAURIER (Prime Minister) :

1. The amount paid to the Manitoba government on account of interest, &c., on the Manitoba school lands fund for the fiscal year 1903-1904 was as follows :—

Interest on the credit balance of the fund on 30th June, 1904..	$31,290 66
Balance revenue, other than principal moneys, and interest on sales, for fiscal year 1903-1904.	43,934 26
Total..	$75,224 92

2. The total amount claimed by the Manitoba government has not been paid. There are two amounts, in regard to which a settlement has not yet been made.

(a.) The sum of $81,342.17 being the total amount of the costs of management from the time the fund was formed in 1879 to the 30th June, 1904. The reason that it has not been settled is on account of the difference of opinion between the provincial government and the Auditor General as to the mode of treating these costs.

(b.) The government of Manitoba contends that the loan of $30,000 made to the province in 1879 and 1884, and which, in accordance with the provisions of Act 41 Vic., cap. 13, was repaid out of the first proceeds of sales, should now be paid over to the province.

BUILDINGS LEASED BY THE GOVERNMENT.

Mr. SAM. HUGHES asked :

1. How many buildings or portions of buildings in the city of Ottawa have been leased by the government for public purposes since the 1st of January, 1904 ?

2. Where are such buildings or portions thereof located, and who are the lessors ?

3. What rental has the government stipulated to pay for the use of these buildings or portions thereof ?

4. By what branches of the public service are these buildings occupied ?

5. In the preparation of the leases did the government stipulate, in each case, that the lessor or lessors should pay taxes to the municipality of Ottawa ?

6. If such stipulation was not included in any lease, what was the exemption, and why was it made ?

7. In the event of the government deciding to lease further buildings in Ottawa for public purposes, or to renew existing leases when they expire, is it the intention of the government to insist that the lessor or lessors must pay municipal taxes on such buildings ?

Hon. CHAS. HYMAN (Acting Minister of Public Works) :

1 & 2. The following premises were rented by the government since 1st January, 1904 : Building on Queen street, owned by and leased from Jas. W. Woods ; two flats and store room in the Corry block, on Rideau street, owned by and leased from Jas. A. Corry ; two rooms in building, 193 Sparks street, owned by and leased from Slater & Sherwood ; two rooms in Orme block, 176 Wellington street, owned by and leased from J. L. Orme & Son.

3. Building on Queen street, at $5,300 per year ; flats and store room in Corry block, at $4,600 per year ; rooms in building, 193 Sparks street (Sherwood & Slater), at $45 per month ; rooms in Orme block, 176 Wellington street, at $250 per annum.

4. Jas. W. Woods' building, on Queen street, occupied by the Railway Commission; flats and store room in Corry block, occupied by the Georgian Bay Ship Canal Survey, by the Ottawa River Works staff, and the Hydraulic Survey of the Department of Marine and Fisheries ; rooms in buildings, 193 Sparks and 176 Wellington streets, are occupied by the Interior Department.

5 & 6. In the case of the Railway Commission lease, it has been stipulated that the lessees shall pay taxes. In the other cases, it being only for rooms and for a comparatively short period, no stipulation has been made about taxes.

7. This matter is now under the consideration of the government.

IMPORTS AND EXPORTS.

Mr. FOSTER asked :

1. What is the total importation of merchandise for home consumption into Canada for the current fiscal year to December 31, 1904 ; also the importation from Great Britain and from the United States respectively ?

2. What is the total exports and the exports of home products for the same period, and also the exports of home products to Great Britain and the United States ?

Hon. WILLIAM PATERSON (Minister of Customs) :

1. The total importations into Canada of merchandise for home consumption for the current fiscal year up to December 31st, 1904, was $123,043,650. For the same period, the importations of merchandise from Great Britain amounted to $28,923,454, and from the United States to $74,739,987.

2. The total exports of merchandise exported from Canada for the current fiscal

year up to December 31st, amounted to $118,438,246. Total exports of merchandise —home products—for the same period, amounted to $113,229,216. Total exports of merchandise — home products — to Great Britain, $63,072,205, and to the United States to $38,077,738.

THE DEPARTMENT OF AGRICULTURE, FRUIT DIVISION.

Mr. A. MARTIN asked :

Is it the intention of the government, in consonance with the resolution of the Fruit Growers' Association of Prince Edward Island, approved by the other organizations in Canada, to maintain its usefulness to the growing needs, the fruit industry demands ?

Hon. SYDNEY FISHER (Minister of Agriculture). On the passage of the Act to provide for the marking and inspection of packages containing fruit for sale, known as 'The Fruit Marks Act, 1901,' it became necessary to organize a staff for the administration and enforcement of the Act. The organization was placed, by the Minister of Agriculture, under the control of the Commissioner of Agriculture and Dairying, Dr. James W. Robertson, and became known as the fruit division of his branch.

In addition to the enforcement and administration of the Fruit Marks Act, the fruit division was charged with the supervision of the packing and transportation of fruit, particularly in cold storage and cool chambers, and the marketing of the same ; and this brought the work of the division in close connection with the cold storage and extension of markets divisions, which, having been organized principally for facilitating the transportation and promoting the sale of dairy products, were in charge of the chief of the dairy division, Mr. J. A. Ruddick, under the Commissioner of Agriculture and Dairying for several years prior to the retirement of the latter.

Upon the retirement of Dr. Robertson, and the abolition of the office of Commissioner of Agriculture and Dairying, Mr. Ruddick was appointed dairy commissioner, the work of the cold storage and the extension of markets divisions being continued under him ; and owing to his close relations with the work of the fruit division, as above stated, it was deemed advisable to place the work of the latter division in his charge as well. The chief and other officers of the fruit division have been retained in office with the same duties as formerly, which they will hereafter perform under the dairy commissioner, as they formerly did under the Commissioner of Agriculture and Dairying.

It is the intention of the Minister of Agriculture to make the work of the department, both in the fruit division and at the experimental farms, commensurate with the needs of the fruit industry of Canada.

BRITISH COLUMBIA JUDGESHIP.

Mr. SPROULE—by Mr. Lefurgey—asked:

1. How long has the present vacancy on the county court bench of British Columbia existed?
2. What is the cause of the delay in filling the vacancy ?
3. Is it the intention to appoint Mr. W. W. B. McInnes, ex-M.P., to the position ?

Hon. CHARLES FITZPATRICK (Minister of Justice). There are two judicial districts, one constituted by an Act of the British Columbia legislature in 1903, and the other similarly constituted in 1904. No appointment has been made to the bench for either district.

Mr. FOSTER. The hon. member has not answered the second and third questions.

Mr. FITZPATRICK. There has been no cause of delay beyond the fact that the vacancy has existed in one case since 1883 and it has not been thought necessary to make the appointment. With regard to the third question, no doubt the name of Mr. McInnes will be taken into account in connection with other names when the appointments are made.

OTTAWA IMPROVEMENT COMMISSION.

Mr. PERLEY asked :

How many men were on the pay-list of the Ottawa Improvement Commission for the months of September, October, November and December, 1904, and January, 1905, respectively?

Right Hon. Sir WILFRID LAURIER (Prime Minister). The number of men on the pay-list of the Ottawa Improvement Commission during September, October, November and December, 1904, and January, 1905, was as follows :

September, 139 men.
October, 164 men.
November, 152 men.
December, 157 men.
January, 102 men.

GEOLOGICAL SURVEY.

Mr. PERLEY asked :

1. Have any appointments been made during the month of January, in connection with the Geological Survey Department or Museum ? If so, who have been appointed, and what are their duties and salaries respectively ?
2. Were any of the employees of the Geological Survey Department, other than technical officers, absent from their duties at any time during the month of January, 1905 ? If so, who were these individuals ?

Right Hon. Sir WILFRID LAURIER (Prime Minister):

Napoleon Seguin, fireman, temporary staff, January 16, 1905, salary $500 per annum.

Absence.	Dates.	——
W. H. Boyd	3rd	Statutory leave.
C. F. King	3rd	"
Vincent Perrin	3rd & 4th	"
Jane Alexander	7th	"
Emily F. Goodman	7th	Sick leave.
M. F. Connor	30th	"
O. O'Sullivan	26th	Statutory leave.
F. H. Maclaren	7th	Not paid for absence.
Paul Frereault	28th-31st	"

MARCONI WIRELESS TELEGRAPH STATION.

Mr. LEFURGEY asked :,

1. How much has the government contributed towards the construction of the Marconi Wireless Telegraph Station at Table Head, Glace Bay, N.S.

2. What is the reason assigned by the Marconi Wireless Telegraph Company, or by Mr. Marconi, for the delay in, or inability to operate the station at Glace Bay ?

Hon. RAYMOND PREFONTAINE (Minister of Marine and Fisheries):

1. $80,000.

2. Change of site because of insufficient accommodation at the first location and for the greater security of the station ; also on account of the work being interfered with by the continued bad weather.

This station has not yet been handed over to the Department of Marine and Fisheries.

INTERCOLONIAL AND P. E. I. RAILWAYS.

Mr. KEMP moved for a return showing :

1. The amount of money paid by the Intercolonial and Prince Edward Island Railways, between June 30th, 1904, and January 1st, 1905, arising out of claims for damages and refunds of all kinds ; also compensations.

2. The nature and amount in each case.

3. The name of the person or persons, firm or corporation to whom the same were paid.

4. The dates in each case on which the claims for damages, refunds or compensations were filed.

5. The dates of payment of each.

Hon. H. R. EMMERSON (Minister of Railways and Canals). There is no objection to the order but the word 'compensation' is very general, and if the motion were to pass in its present shape, we would be required to give a statemnt of the wages paid every employee.

Mr. KEMP. What I mean is compensation for injuries. In the Auditor General's Report, compensations are dealt with, and it is that class of compensations to which I refer. I would ask that the motion be amended by adding after the word 'compensation' the words 'for injuries as dealt with in the Auditor General's Report.'

Motion as amended, agreed to.

Sir WILFRID LAURIER.

CANADA-CAPE BRETON CASE—RESIGNATION OF CAPTAIN SALMON.

Mr. H. B. AMES (St. Antoine, Montreal) moved :

For copies of all correspondence, telegrams, &c., which passed between the Minister of Marine and Fisheries, or the Deputy Minister of Marine and Fisheries, or any other official of the said department, and Captain R. Salmon, former wreck commissioner, in the matter of the Canada-Cape Breton investigation, and the resignation of Captain Salmon from his position as wreck commissioner.

He said: I desire to lay before the House the reasons which make it necessary in my opinion to ask for the return of these papers. Most of the members of this honourable House will remember that early last summer a very regrettable accident occurred in the St. Lawrence channel by which several lives were lost, much property destroyed and confidence in the St. Lawrence route somewhat shaken. As was natural and right, there was a demand for a thorough investigation of all the circumstances. The department of Marine and Fisheries, which had created a board whose duty it was to investigate accidents of this kind was naturally called upon to look into the matter with a view to placing responsibility for the accident upon the shoulders of the proper parties. In accordance with orders issued by the department, as I understand it, Captain Salmon opened his court, and, with Captain Reid and Captain Lachance acting as assessors, proceeded to take full evidence with a view to ascertain who was responsible for this terrible accident. He notified, as I understand, the counsel of the Richelieu and Ontario Navigation Company, whose steamer 'Canada' was one of those that suffered in the collision. That company, if I am rightly informed, intimated to their counsel that they did not desire to produce testimony before Captain Salmon's court. The wreck commissioner made his investigation as he was by law bound to do, examining the crews of the two vessels with a view to finding out where the fault lay, whether with the channel, with the boats or with the men who were commanding and operating the two vessels. Finally on September 26, the wreck commissioner made public announcement that he was prepared shortly to render the decision at which he had arrived. And from that time the public heard nothing about the matter until October 5, when Captain Salmon, mounting the bench, taking his position as a judge, delivered a statement setting forth his finding in this peculiar case and placing the responsibility upon those who, in his opinion, should bear it, and forthwith gave in his resignation, on the ground that he had been hampered and tampered with in the performance of his duties by the Department of Marine and Fisheries.

At this point it becomes necessary therefore, to refer to the statement which Capt. Salmon speaking at that time from the bench gave to the public. He stated that on September 26, the same day on which he had given notice of his intention to deliver judgment, placing the responsibility for this accident, the Richelieu and Ontario Navigation Company, one of the parties interested in the case, through their counsel, made application to him for a reopening of the case on the ground that they had new evidence to submit and new witnesses to produce. Although his decision was practically made, nevertheless, Captain Salmon acceded to the request and granted the company a delay of seven days, and stated that he would hear any new witnesses on October 3, if they would produce them. On September 29, three days later, it appears, that Captain Salmon, received a communication from Mr. Archer, the counsel of the Richelieu and Ontario Navigation Company, at one time the law partner of the Minister of Marine and Fisheries (Hon. Mr. Préfontaine) and presumably at the present time connected with the same office, asking, not that the wreck commissioner should hear certain new witnesses, but that he should accept a typewritten statement which Mr. Archer had prepared to setting forth certain evidence that had been given in the Admiralty Court in Quebec, and should take it into consideration before he gave his judgment. Captain Salmon naturally replied that, as he could have no control whatever over this evidence, he could hardly be expected to take it into consideration, that, certainly, as it did not come with the concurrence of both contending parties, but simply from the counsel himself, the acceptance of it would not be fair. Then, if we may believe Captain Salmon's statement, Mr. Archer turned to the Department of Marine and Fisheries to see whether it would not be possible in some other way to accomplish what he had in view. We find that Mr. Archer communicated with the Minister of Marine and Fisheries (Mr. Préfontaine) or with the department, and asked that orders should be issued to withhold Captain Salmon from giving decision in the matter until the report should be brought down by the judge sitting in the Admiralty Court in Quebec. This court, as hon. members know, is one that is called upon simply to deal with actions for damages and determine who shall pay. Next, we find that Captain Salmon is in receipt of a telegram from the Deputy Minister of Marine and Fisheries peremptorily ordering—or its equivalent—ordering him to withhold his judgment until such time as it might suit the department to order him to make it known. If Captain Salmon has rightly given us a copy of the telegram received—that, of course we cannot find out until the papers are laid on the table of the House, that telegram reads as follows :—

Minister desires you to do nothing further until you get orders from him.

I would like to point out to you, Mr. Speaker, and to the hon. members of this House that at the time Captain Salmon received this telegram he was a judge to all intents and purposes, that he was a court and that he was about to deliver an important judgment. Yet, it was at that time he received a communication peremptorily ordering him not to deliver that judgment but to allow the case to remain as it was for an indefinite period, possibly allowing unfit men to continue in the performance of duties aboard steamboats, bringing risk of life and limb to others, although these men should have been deprived of their licenses and prevented from continuing in the steam boat service. You do not wonder that Captain Salmon resented action of that kind, and that he found himself, as an honourable man, bound to choose whether he would retain or give up his commission. Therefore, he made the following statement, the truth of which can probably be verified when the papers are laid before the House:

This court——

Referring to himself.

——was approached by the Deputy Minister of Marine and Fisheries upon a certain date in this city with the specific inquiry as to the possible decision to be rendered in the case.

Let me point out the impropriety of the Deputy Minister of Marine and Fisheries, if this allegation is true, approaching a judge who was about to deliver a decision, to ask him which way that decision was likely to go. Captain Salmon adds :

In response to the inevitable and negative reply to such inquiry, the court was offered the suggestion that it might be advisable to consult the counsel of the Richelieu and Ontario Navigation Company, Mr. Archer, before rendering the decision, and that such action would be exceedingly acceptable to the Minister of Marine and Fisheries.

I trust, Mr. Speaker, that it is not customary in this Canada of ours for orders to issue from ministers requesting judges to consult with counsel who may be engaged in an important case, before rendering judgment. It was evident that, through some inference probably, Mr. Archer concluded that Captain Salmon's judgment was not likely to be in favour of his clients, and consequently he deemed it expedient to take other measures, if possible, to keep the judgment from being delivered against the interest of the clients whom he represented. So it came about that Captain Salmon saw fit to give his resignation. He claimed that although as an officer of the department in ordinary matters he was bound to obey his superior officers, and when, on the demand of the Minister of Marine and Fisheries, he was constituted a court of investigation, while he sat as

such court he was to all intents and purposes a judge, and could no longer be interfered with or unduly influenced until such time as he had delivered his decision. He considered that the attempt beforehand to ascertain his verdict, the attempt to delay his judgment, was certainly an attempt to hamper the usefulness of that court; and being an honourable and independant man, he felt there was but one of two things to do, either to disobey the orders that had proceeded from the department to which he belonged, or else to accept the orders, and to feel thereafter that in his capacity as a judge he had submitted to influences which he could not defend. And so he resigned his position, and he stated the reasons why he resigned, and it remains to be seen whether the reasons he gave are, by this House and the country, considered to be sufficient.

Now, I want simply to point out that to all intents and purposes Captain Salmon was a court. It is distinctly specified in the law that while constituted as a regular commissioner he is a court, and that therefore he was expected to uphold the dignity of the court, and endeavour to surround himself with the same atmosphere which should characterize any of the courts of this country. Captain Salmon resigned on the principle that our courts should be sacred and inviolate, that no man should be allowed, during the deliberation of the judge, to interfere with him in making up his mind. I may say that, speaking for the business and commercial interests of the great city of Montreal, it is a great disappointment to us that Captain Salmon should have found it necessary to resign and return to England. We had hoped that we might in time establish a Marine Court in Canada, whose decisions would be of equal value and importance to those of the Marine Courts on the other side of the Atlantic. We know that Captain Salmon in England would naturally state the reasons of his resignation, and naturally we feel that the Marine Courts of Canada will be degraded in the eyes of the mother country and of the world. Further than that, we feel that there are grave questions involved. When two great shipping companies meet with an accident and it becomes necessary to fix the responsibility of that accident upon the crew of one or other of these vessels, the possibility that undue influence may be brought to bear on the court in the interest of either of the contending parties, causes a feeling of doubt and of unprotectedness to exist throughout the entire shipping community. I would also point out that cases of this character where life and limb are at stake need to be considered with great care. In this particular case four lives had been lost. It was of course important that nothing should interfere with an absolutely impartial decision as to who was responsible for the accident, and who was primarily responsible for that loss of life. The travelling public can never feel that they are protected until they are satisfied that when an investigation takes place it will be absolutely impartial.

Further than that, this case affects the marine and shipping interests of the city of Montreal. We are very anxious that it may become possible to reduce the amount of marine insurance that our shipping interests are called upon to pay. We realize that that can only be done by creating, first of all, an excellent channel, and secondly, by creating confidence in the administration of everything connected with the operation of that channel. The doubt as to whether that duty will be well discharged, and as to whether justice will be impeded, militates against a reduction of the insurance which the shipping interests of Montreal are called upon to pay.

Now, Mr. Speaker, I trust that when the correspondence is brought down, and when we receive from the Minister of Marine and Fisheries the explanations which I am sure he will be willing to give, the apprehensions that have been aroused will be allayed. Certainly I think that this House, on the face of the case I have presented, is at least entitled to a full explanation and an opportunity to study the full correspondence.

Hon. R. PREFONTAINE (Minister of Marine and Fisheries). First of all I desire cordially to thank the hon. gentleman for having brought this question before the House, because, notwithstanding the explanations that have already been given in the newspapers and otherwise, there still seems to exist some misapprehension, either voluntary or involuntary. I do not mean to tax the hon. gentleman (Mr. Ames) with having wrongfully represented the facts of the case, but surely the hon. gentleman has not examined the law nor the facts as they have been published at various times in the newspapers. First, as regards the law. The hon. gentleman seems to be under the misapprehension, and has so stated, that Captain Salmon, when he was instructed to investigate the collision which occurred between the 'Canada' and the 'Cape Breton,' was instructed to hold a court. That is quite erroneous and contrary to the law as it exists. First, I might state that there are two kinds of investigations held by the wreck commissioner under the authority of the Minister of Marine and Fisheries. There is a preliminary investigation. Then, there is a formal investigation. The two are easy to understand with a few words of explanation. In this case there was no formal demand for an investigation. The two parties interested seemed to have thought that it was not required. After waiting for a few days or a few weeks I took it upon myself, in the

interest of the public and in the interest of navigation under section 4 of 1 Edward VII, chap. 37, to instruct the wreck commissioner to proceed with a preliminary investigation.

Mr. HAGGART. What is the statute ?

Mr. PREFONTAINE. 1 Edward VII, chap. 37, an act to amend the Shipping Casualties Act, 1901, which was assented to on the 18th July, 1904. By section 4 I am empowered, as Minister of Marine and Fisheries, to order a preliminary investigation. The clause reads as follows :

The minister may appoint a principal officer of customs or any officer of the government of Canada, or any person to make preliminary inquiries respecting such shipping casualties, and may define the territorial jurisdiction of any such officer or person.

Therefore, the person whom I might appoint is not designated, except that the person whom the minister designates is empowered to hold an investigation within the limits and according to the jurisdiction that the minister gives him and nothing else. Of course, it is provided by subsection 2 of section 4 how he is to conduct the inquiry and how he is to give his report upon it.

If, upon a preliminary inquiry, the officer holding it is of opinion that any loss, or damage, or the stranding of any ship, or any loss of life, has been caused by the wrongful act or default or by the incapacity of the pilot in charge, or that such pilot has been guilty of any gross act of misconduct or drunkenness, the license of such pilot may be suspended by such officer until a formal investigation under this act has been held and a further decision rendered upon the case : provided that the term of suspension shall not exceed a period of three days, unless the minister notifies such pilot within that time that a formal investigation will be held.

Captain Salmon held the investigation in virtue of this statute. He should have known it, and if he did not know it when he rendered judgment, and he seems not to have known it, he was unfit for the position he occupied.

Mr. HAGGART. Have you the instructions to Captain Salmon ?

Mr. PREFONTAINE. What is that ?

Mr. HAGGART. How are we to know that it was only a preliminary investigation ? What are the instructions ?

Mr. PREFONTAINE The papers will show it. I will place all the documents before the House, and it will appear that it was a preliminary investigation that he was instructed to hold. From the beginning of the investigation I discovered that he was rather prejudiced against one or other of the parties, and I found it very strange indeed that this officer should stand in that position in an important case like this. So I directed him to carry out his proceedings properly and see that justice should be rendered to all parties. Captain Salmon, knowing very well that he was not holding a formal investigation, never notified the parties as to what was the accusation. Instructions were given under the section I have just read to hold a preliminary investigation. Now, I go farther. Under this clause, I contend rightly, I presume, that the officer was under my charge during the whole time that he was conducting that investigation. I discovered that the parties interested refused to produce their witnesses and refused to take part in the investigation. The proprietors of the 'Cape Breton,' as well as the proprietors of the steamer 'Canada ' were interested in not taking part in the investigation, which was only a preliminary investigation, and why? Because at the time that the investigation began there was pending before the Vice Admiralty Court of Quebec a case in which damages were claimed by the Richelieu and Ontario Navigation Co., in which it was sought to establish the responsibility between the two companies and in which the two companies took part. The action had been instituted, I understand, by the Richelieu and Ontario Navigation Co. against the proprietors of the ' Cape Breton ' the Dominion Coal Company. This investigation had begun before Judge Routhier in the Vice Admiralty Court of Quebec, and both parties were fighting for their rights. In face of that what was my duty? My duty was clearly defined. It was to see that the rights of neither party should be prejudiced. I was informed by both sides that there were witnesses who would be examined before the Vice Admiralty Court and who would not appear before Captain Salmon in the preliminary investigation. I made Captain Salmon aware of that fact and I also gave him a formal notification that it might be necessary to suspend that investigation of his and await the judgment which would be pronounced in the Vice Admiralty Court. He went on with the investigation. Then it came to the point where the case in the Vice Admiralty Court had been argued before the judge. When the case had been argued before the judge I believed it was my duty to instruct Captain Salmon to suspend his proceedings, and that I did under the law. It is such a clear law that surely if it had been taken communication of by my hon. friend from Montreal, St. Antoine (Mr. Ames) he would not have made the remarks he has made. All through the Act, chapter 35 of 1 Edward VII., 1901, it is clearly established that the wreck commissioner in conducting a formal investigation remains under the control of the Minister of Marine and Fisheries in order that justice may be rendered properly. Following up what I have said just now, I will cite section 15 of the Shipping Casualties Act of 1901.

Whenever a formal investigation is likely to involve a question as to cancelling or suspending the certificate of competency or service of any master, mate or engineer, he shall be fur-

nished before the commencement of the investigation with a copy of the report or statement of the case upon which the investigation has been ordered.

In this case none was furnished anybody; there was no complaint on the part of the families of those who had lost their lives in the accident, for the simple reason that coroners' inquiries had been held in each case a long time before the date of this preliminary investigation which was held by Mr. Salmon.

Then I would cite section 14.

Every formal investigation shall be conducted in such manner that if a charge is made against any person, that person shall have an opportunity of making a defence.

Following the well known English principle, that nobody shall be found guilty or condemned without being heard.

Now I cite from the same Act, clause 22.

The minister may, if he thinks that the justice of the case requires it, re-issue and return the Canadian certificate of the master, mate or engineer which has been cancelled or suspended or shorten the time for which it is suspended, or grant in place thereof a certificate of the same or any other lower grade.

Therefore again the minister remains the final tribunal in the case when it is a formal investigation, and in this case it was not a formal investigation.

Then we have section 25.

In any case where a formal investigation has been held the minister may order the investigation to be re-heard either generally or as to any part thereof; and he shall do so—

(a) If new and important evidence which could not be produced at the investigation has been discovered.

What was the necessity I would like to know of Capt. Salmon, an officer of my department, of pronouncing a judgment when I was instructing him to hear the witnesses that had been heard before the Vice-Admiralty Court.

Mr. HAGGART. Do these rules apply to a preliminary investigation?

Mr. PREFONTAINE. They apply particularly to a preliminary investigation because he is not called upon to render a judgment, but simply to make a report to the minister in order to show whether it is necessary to hold a formal investigation. That is good law and justice too.

Now I come to subclause (b).

If for any other reason there has in his opinion been ground for suspecting that a miscarriage of justice has occurred.

In this case it was perfectly clear to me that a miscarriage of justice was going to take place. How could Capt. Salmon pronounce either in favour of the 'Canada' or the 'Cape Breton' or rather of the Richelieu and Ontario Navigation Company or the Canada Coal Company, when there was other evidence which had been produced before the Vice-Admiralty Court and which he refused to hear.

Now I shall cite, Mr. Speaker, the opinion of the Merchant's Service Guild of Liverpool.

Mr. HAGGART. Before the minister goes on, would he give us the instructions to Capt. Salmon, so that we will know whether this was a preliminary or a formal investigation.

Mr. PREFONTAINE. I have not them here but I shall produce them.

We received the following communication:

9th November, 1905.

The Minister of Marine and Fisheries,
Canada.

Sir,—With reference to our communications of the 7th ultimo and 15th inst. relative to the inquiry into the 'Canada-Cape Breton' collision, the Guild have been favoured with a copy of the Montreal 'Daily Star' wherein appears a full copy of the judgment, and also your own action previous to judgment being given.

Perhaps you are not aware that whenever an action for damages in the Admiralty Court between the owners of two ships is pending, the Board of Trade invariably defer their official inquiry until its conclusion in order that the civil action should not be prejudiced in any way.

This is the mode of procedure in England, and I am blamed for having done what justice demanded and for following the precedents of the Board of Trade, the English precedents, in the case of investigations of this kind.

That I think disposes of the question of law, because I submit that according to our laws and according to precedents the Minister of Marine and Fisheries was perfectly justified in acting in the way that he did act. Now we come to examine the conduct of that officer and the opinions that have been expressed of his conduct in this same inquiry. You will see that everything which I stated, in answer to the attacks that were made on me at the time, was perfectly right. I shall read the report of that interview from the Montreal 'Star' of October 6, 1904. It is headed 'The Minister of Marine Talks.'

Minister of Marine discusses occurrence.

Hon. Raymond Préfontaine, Minister of Marine and Fisheries, to-day gave the following interview on the occurrence:

Mr. Salmon shows his want of judgment, and, therefore, his unfairness for the position he held in the Department of Marine and Fisheries, by his contemptible attempt to insinuate that he was interfered with in his duties as wreck commissioner, as appears clearly by the documents, some private and confidential, which he communicated to the public.

In advising him as I did, I fulfilled my duty to the shipping interest with absolute impartiality, and followed numerous precedents in

the department. I have done what everybody does before all the courts of the land. Requests are made every day to re-open investigations and to suspend judgment, upon showing good grounds and reasons for so doing.

As regards exercising any political influence, it is farcical, when everybody knows that a majority of the directors of the Richelieu and Ontario Navigation Company belong to the opposite party, as do also some of the counsel engaged in the case.

He has very bluntly and unjustly refused their reasonable and just request to hear new and important witnesses in order to do full justice.

As regards his resignation, I was expecting it for some time. He had already six months ago verbally tendered it, and he knew that he could not remain in the department, my intention being to call for his resignation in the interests of the department, and the reason for my delay was to allow him to close the cases before him.

That statement is exactly true. Capt. Salmon had not given satisfaction; there had been very serious complaints against him and without going beyond this case I need only cite one incident with reference to one of the officers of the 'Cape Breton.' I shall not quote from papers on this side of the water but I shall cite the Edinburgh 'Scotsman,' in which the following remarks are made as regards the conduct of this individual :

The Merchant Service Guild and Shipping Inquiries in Canada.

The conduct of marine inquiries into shipping casualties held in Canada has lately been once more taken in hand by the Merchant Service Guild. It has been urged that captains and officers have been bullied and brow-beaten whilst under evidence, and that the decisions of these inquiries have not been in accord with justice. A recent case which the Guild dwelt upon was that of the investigation into the collision between the steamers 'Canada' and 'Cape Breton.' The chief officer of the latter steamer, whilst under evidence, was subjected to a searching examination in the rules of the road by the president of the court, Captain Salmon, who also held the position of Canadian wreck commissioner. In the course of his examination the officer gave an answer which the Guild considered as a perfectly correct one, but the president, thinking otherwise, his anger became aroused and he ejaculated that 'it was God's mercy that he had not had an accident previously, and that the place for him was in jail.'

Having ascertained the facts, the Guild communicated with the Minister of Marine, Canada, referring to this unwarrantable and offensive statement and requesting Captain Salmon to make an apology for the insult offered to the chief officer of the 'Cape Breton.' The reply of the Minister of Marine stated that Captain Salmon had resigned his position as wreck commissioner, but that the communication of the Guild had been filed for reference if necessary. Subsequently, it transpired that, although he had nothing to do with the collision, the certificate of the chief officer of the 'Cape Breton' had been withheld by the Court of Inquiry until such time as he had been examined by an examiner of masters and mates, and found efficient in the rules of the road. The Guild again communicated with the authorities, stating that it would be an extraordinary thing that the court should deal with the certificate of a witness simply because of the manner in which he gave his evidence. They knew of no legal authority which permitted the certificate being withheld, and trusted that this decision would be quashed. They have now received a further letter from the Canadian Minister of Marine, who conveys his best thanks for information furnished him as to practises of the Board of Trade in connection with inquiries into shipping casualties, and also begs to state for the information of the Guild that the certificate of the chief officer of the 'Cape Breton' has been returned to him.

Captain Salmon had no more jurisdiction over this man than the man in the moon, and had no power to suspend his certificate except for three days; and if during those three days the Minister of Marine and Fisheries did not give the necessary notice that there would be a formal inquiry, the certificate would have to be returned. Captain Salmon did not know that. He was determined to act as a court of justice, and committed the wrongful act that he did. I have heard of a commissioner's court in my native county which condemned a witness, and this is a case of the same kind. In the province of Quebec these commissioners have jurisdiction in small cases to the extent of $25. These gentlemen live amongst the farming community, but they generally know a little more than their neighbours. In the case I refer to and of which I am reminded by Captain Salmon's action, a butcher was suing one of his neighbours for an account of $10 for meat. The farmer contended that he did not owe the account, and the plaintiff brought as a witness the hired man of the farmer, who had lived in the house of the farmer at the time the meat had been furnished. The witness said : I know that this meat has been furnished, and that the account is correct, because I ate the meat myself. The justice said : You ate the meat, then ? The man who eats the meat pays for it—judgment against the witness.' That case was appealed to the higher court in Montreal and it cost about $200 to quash that judgment of the justice of the peace. The action of Captain Salmon in this case has been just the same. He condemned this officer and cancelled his certificate because he did not as a witness give an answer that was satisfactory to Captain Salmon. The position taken by Captain Salmon was entirely wrong, unjust and unfair, and revealed an incapacity on his part which it is hardly possible to imagine. As regards his resignation, as I stated in my interview, if it had not been tendered he would have been asked for it, because he was unfit for the position he occupied. As regards the poor fellow returning to England, that is not exactly the fact. Captain Salmon cannot get a position under any marine organization; I know that

perfectly well. He is in New York at the present time. I do not want to say any more about him. The certificates of the officers which have been cancelled, like that of the first mate of the 'Cape Breton,' have been returned to them. We could not hold the officers as suspended, and it was our duty to do what we have done in the matter. I repeat, if Captain Salmon had known his duties, if he had known the law that he was administering, he would not have rendered himself guilty of the act which he committed. I thank the hon. gentleman for having given me the occasion to state the facts as they are. The documents will be willingly placed before the House as soon as possible within the next few days, and they will bear out exactly what I have stated.

Mr. F. D. MONK (Jacques Cartier). After the discussion which has taken place this afternoon, the members of the House will be curious to see the documents and to find out exactly what Captain Salmon's position was. I have not the pleasure of Captain Salmon's acquaintance. In fact, my estimate of him has been formed from what I think I heard from the hon. Minister of Marine and Fisheries himself, a couple of years ago, when, in passing his estimates through this House, he gave unstinted praise to that individual, declaring him to be highly qualified for the position he held.

Mr. PREFONTAINE. I did not know him then.

Mr. MONK. If my hon. friend did not know him he should not have gone so far as he did at that time. But my hon. friend has drawn a distinction to-day which has never been drawn before, and which I think he himself neglected to draw, when there was a great storm in the press of the city of Montreal and among the public generally, as to the action of the Department of Marine and Fisheries towards Captain Salmon. I have listened to the reading of the interview which my hon. friend gave to the 'Star' at that time, and in which he failed entirely to point out that Captain Salmon was holding what he calls a preliminary inquiry. The matter was discussed at great length in the papers of the city of Montreal at the time. My hon. friend will remember that a great deal of indignation was shown at the interference with Captain Salmon in the performance of his statutory duties. Nobody that I am aware of claimed that Captain Salmon was not holding a court. On that point I think there cannot be any doubt. In fact, the Department of Marine and Fisheries and my hon. friend the minister himself cannot have considered that Captain Salmon has proceeded under the section of the Shipping Casualties Act of 1901, which he has quoted to the House, because if that was the case, why did the Deputy Minister of Marine and Fisheries—and that has not been contradicted—say that Captain Salmon was holding a court, and endeavour to persuade him from rendering judgment, and suggest to him that he should see Mr. Archer in order to satisfy the desire of the Minister of Marine and Fisheries, and learn from Mr. Archer what he should do? It has not been contended at any time that Captain Salmon was acting under the section referred to by my hon. friend. There are two kinds of inquiry, one of an informal nature, and the other, which is the one undoubtedly held in this case, under a section to which I will refer in a moment. But what I submit to this House is this, that even if that inquiry had been held under section 4 of the Shipping Casualties Act of 1901, as amended in 1904, it was not proper for the Minister of Marine and Fisheries or his department in any way to interfere with the wreck commissioner in the execution of his duties in a preliminary inquiry. To suppose that even in a preliminary inquiry, the wreck commissioner, who is seized with that inquiry and is proceeding with it, may be dictated to by the Minister of Marine and Fisheries—to suppose that the Minister of Marine and Fisheries may order the wreck commissioner to stop the inquiry, is, I submit, entirely contrary to the very words and sense of the Casualties Act of 1901. I have no doubt that the instructions to the wreck commissioner, will show that he was not acting under section 4 at all, but section 8. Let me read that section 8 as amended by the statute, chap. 64, 3 Edward VII., 1903:

> The minister may appoint any officer of the government of Canada, or any judge of the Superior Court of the province of Quebec, or any judge of a county count, or any local judge in Admiralty of the Exchequer Court of Canada, or any stipendiary magistrate, to be a commissioner to hold formal investigations, and a commissioner shall for such purposes be a court.

Among the cases in which such court may hold a formal investigation of cases of shipping casualties and collisions, I venture to assert, without fear of contradiction, that Capt. Salmon proceeded under that section 8. He did not proceed under section 4 which calls upon him merely to make a preliminary inquiry and report to the minister whether a formal investigation is necessary. There never was before the commissioner any question as to the nature of the investigation he was holding. It was treated as a formal investigation, and the commissioner presiding was considered the judge. All parties interested appeared before him, and all the proceedings were conducted, as they should have been, under section 8. The proposition of my hon. friend the Minister of Marine and Fisheries, that because an action was begun before the Admiralty Court was a sufficient reason to warrant his stopping this investigation, seems to me absolutely without foundation.

The object of the proceedings in the Admiralty Court was to settle the question of damages due by one shipping company to the other. That court sat for the purpose of settling a private claim affecting private interests and not at all as a tribunal to settle matters affecting the public interest. But the court over which Capt. Salmon presided is one that was created by statute in the interests of shipping generally, in the public interest, for the purpose of inquiring into the causes of the accident, according to the rules of marine science, and reporting the results to the department. After an accident has taken place and a formal investigation into the causes of that accident has begun, to suppose that because the parties interested judged fit to bring their difficulties before the Admiralty Court, the commissioner may be subjected to an order from the Department of Marine and Fisheries to stop his proceedings, is to defeat completely the object of this legislation. The pretension of my hon. friend the Minister of Marine and Fisheries that, under all circumstances and at any time, a commissioner is subject to the orders of his department appears to me absolutely repugnant to any wise and proper interpretation of the Casualties Act. Whether the commissioner were holding a mere preliminary inquiry or making a formal investigation under section 8 he was not subject to orders from the Minister of Marine. I am sure that a careful reading of the authorities quoted by my hon. friend will only prove that the wreck commissioner may under special circumstances, such as when new witnesses or new evidence have been discovered be ordered to renew or reopen his inquiry. The facts of this case, as they have been stated by my hon. friend from St. Antoine Division (Mr. Ames) and as they will no doubt be shown by the papers when brought down, show that the minister went a step further and considered himself authorized to prevent that investigation. I think that in so doing he assumed an authority which does not belong to him, and that this House should not fail to express its appreciation of such conduct.

Mr. R. FORGET (Charlevoix). In rising for the first time, Mr. Speaker, to address this House I regret very much that I have to differ from my hon. friend the member for St. Antoine (Mr. Ames), and the member for Jacques Cartier (Mr. Monk). The sad accident to the steamers 'Cape Breton' and 'Canada' is one of course in which I felt a very deep interest, and the proceedings in connection with which I followed, as it was my duty, from step to step. As far as I am in a position to form a judgment, in my opinion, the course taken by the hon. the Minister of Marine and Fisheries was legal and right and gave justice to both parties. When I say that his action was legal, I am not speaking from any legal knowledge of my own, but according to the advice received from eminent counsel—not alone from Mr. Archer, who was our attorney in the matter, but also from counsel who are acting with him, namely, Mr. Pentland and Mr. Wm. Cook, of Quebec, and Mr. Angers—not my predecessor in this House, but the Hon. Mr. Angers. And I think I may safely say that Messrs. Pentland, Cook and Angers, are recognized throughout the Dominion as the best marine lawyers in this country. This accident took place late in June of last year. A few weeks later, the wreck commissioner held an inquiry. In that investigation, the Richelieu and Ontario Navigation Company decided not to take any part, as we could not get hold of all the witnesses we required. We instituted an action in the Vice-Admiralty Court in the city of Quebec; and while the case was proceeding in that court, Capt. Salmon, to my knowledge, came down into the corridor of the Court House of the city of Quebec and there threatened our lawyers that he would render judgment that same morning, and he made that threat in the presence of the witnesses of both parties who were in the corridor. In view of this extraordinary conduct, I, acting for the Richelieu and Ontario Navigation Company, got our counsel together and asked them what could be done to save the situation, as no doubt it was the intention of Capt. Salmon to prejudice all these witnesses. After asking Capt. Salmon without success to withhold his judgment, the Hon. Mr. Angers advised our attorney, Mr. Archer, as a last resource, to see the Minister of Marine and Fisheries, as he had a perfect right to do, and ask him to request Capt. Salmon to wait. The hon. minister was then at the Frontenac Hotel, and the request was only a fair and reasonable one, and in granting it the minister did nothing but justice to both parties. Since that ex parte enquête before Capt. Salmon—an enquête in which the Richelieu Company was not represented—took place, the Vice-Admiralty Court gave judgment. We are told that this is a civil suit and nothing else. But if the Richelieu company or any other party are civilly responsible for any damages, surely they must be criminally responsible as well for the lives of these people. One reason why we thought Capt. Salmon was unfit for the position he held was that he did not even know the local law of the port of Sorel. There was a law for the port of Sorel, but there was no law defending the limits of that port that we might know exactly where that local law applied. That is the reason why we did not appear before Capt. Salmon's court. This is not a political question and I feel free to differ from my hon. confrère (Mr. Ames), to state that difference frankly, and to say that, in my opinion, the Minister of Marine and Fisheries showed only justice and fair play to both parties in this case.

Hon. JOHN HAGGART (South Lanark). I do not know what was called for by considerations of justice between the parties, but, as to the action of the Minister of Marine and Fisheries in the case, this House can have but one opinion. The minister said he was gratified that the hon. member for St. Antoine, Montreal (Mr. Ames), brought the subject before the House as it gave him an opportunity of showing how innocent he and the department were in the whole transaction. Yet he did not tell us whether this was a preliminary or a formal investigation. This could be shown by bringing down the instructions given to the officer who investigated the case. Yet he has not brought down those instructions.

Sir WILFRID LAURIER. The papers have not been ordered yet.

Mr. HAGGART. The minister spoke in defence of his action and said he had all the papers here. Yet, he did not quote the instructions to show whether this was a preliminary or a formal investigation. But the thing for the House to consider is not the merits of the case, but the interference by the minister with an officer, be he judge or otherwise, who was authorized by statute to investigate a casualty case. What difference does it make, as my hon. friend from Jacques Cartier (Mr. Monk) has said, taking the statement of the minister himself, whether this was a preliminary investigation or a formal one. What business had the minister or his deputy to interfere or make suggestions as to what evidence should be taken? The statute sets forth in a peremptory manner the duties and powers of an officer making a preliminary inquiry in such a case. He can inspect the ship; he can inspect premises, having the right of entry; he can summon witnesses and swear them; he can look into documents; he can allow expenses to the witnesses and inflict penalties upon those who refuse to give evidence. He is to report his opinion upon the case, accompanied with such extracts from the evidence as he sees fit. So, even if it were a preliminary investigation, it was the duty of the officer to investigate and report to the minister. Fancy a minister, when such an investigation is going on, suggesting that some other evidence should be submitted or that the officer should not give his report with reference to the matter. Why cannot the minister tell us whether it was a preliminary or a formal investigation and remove all doubt? My hon. friend from Jacques Cartier says it is clear that not a question was raised in the court as to the formal nature of the investigation. In such an investigation the statute provides what the duties of the officer are, and a reading of them will show that the reference was the same as sending the case to a court of justice to be inquired into. The minister says that if it were the preliminary inquiry, the penalty that the officer could inflict was a suspension of the officers for three days, pending decision of the question of holding a formal inquiry. If that is all that was involved, why was there any necessity for the minister or his deputy to interfere? As to the merits of the case I know nothing. Captain Salmon may be right or he may be wrong in his finding. But one thing is plain and undeniable, and that is that there has been tampering by the minister or his deputy with an inquiry ordered under statute. The minister brings evidence, intended to excuse himself by showing that the commissioner was unfit for the position to which he had been appointed. Why, this officer was selected by the minister himself to investigate this case. And what is the evidence that he brings to justify his dismissal of the officer? Letters furnished to him after the dismissal. And fancy the mean insinuation of the minister that this officer, who, presumably was doing what he thought to be his duty, is now a vagrant in the streets of New York. And when he said this there was a laugh from his supporters. What is the inference? There is no inference possible except that this is a warning to all officers of the department whose duty it is to hold such investigations as this: Do not dare to exercise an independent judgment, for the minister may differ with you in opinion, and the result will be that you will become a wanderer in the streets of New York.

Mr. AMES. I believe that as a mover of the motion I am entitled to say a word in reply before the debate is closed. There seems to be considerable doubt in the minds of the minister and of the House as to whether this was a formal inquiry or a preliminary inquiry. Certain it is that Captain Salmon thought it was a formal inquiry, because as I understand the minister to say, that if it had been a preliminary inquiry the maximum penalty he would have been permitted to impose was three days suspension of license. You have only to read his report to see that he considered himself empowered to enforce a penalty far in excess of three days suspension of license. The penalties that he permitted himself to inflict under a formal investigation shows that in his judgment it was a formal investigation. For example, he takes upon himself to suspend the certificate of Captain St. Louis. I doubt if he would have cancelled the certificate if he had considered the investigation a preliminary one. He also suspends for a period of twelve calender months the certificate of Peter Kane; would he have done so if he had considered the investigation merely a preliminary one? You have only to read the entire judgment of Captain Salmon to see that he thought he was carrying out a formal investigation. As we have endeavoured to follow the minister through his ex-

planations, we have noted that he is culling flowers on both sides of the path; that whenever any reference seems to assist him on the ground that it was a preliminary investigation he claims the right to that reference; and whenever there is a reference which seems to help him in the contention that it was a formal investigation, he also claims that as well. There is one thing I would like very much to know, and that is, how it was that the minister discovered that Captain Salmon was prejudiced against one of the parties. The minister says he saw there was about to be a miscarriage of justice. How did he find that out? Now, Mr. Speaker, I admit that the minister has the right, after judgment has been delivered and he thinks there has been a miscarriage of justice, to reverse the decision and to remit the penalties. But I submit that during the course of the enquête, while the judge is preparing to deliver his decision, the minister has no right to interfere on the presumption that the court is prejudiced against one of the parties concerned. I would like to point out also that the instructions which were given by the department to the wreck commissioner, if we are to judge from those which were given to his successor, Captain Spain, are very formal. We have only to turn to the last report of the Department of Marine and Fisheries to read: 'That the minister may appoint a commissioner to hold formal investigations'; and these are the instructions which were given to Captain Spain, which we find in his report of December 6, 1904:

My instructions are to investigate every casualty, and to deal promptly with any carelessness or want of judgment shown by either pilots or shipmasters in the navigation of Canadian waters.

'To investigate every casualty and to deal promptly.' That does not mean to withhold judgments indefinitely. The minister has also seen fit to state that Captain Salmon has fallen from grace, and that he is a character no longer to be received with confidence or to be given any further opportunity of dispensing judgments here in Canada. Admitting that is the present opinion of the minister, I am sorry to see that he was so woefully deceived when he appointed him. On the 9th of October, 1903, he told the House in Committee of Supply:

Last year we inaugurated a system of holding investigations into every casualty that occurred. The members of the committee will recollect that this was done at the special request of the Board of Trade in England, in order to render the service as effective as possible. . . . We have replaced Captain Smith, deceased, by Captain Reginald Salmon, at a salary of $2,000. This department is being thoroughly reorganized under a very able officer and we try to make it as effective as possible. Captain Salmon is an officer of the Royal Navy Reserve holding the rank of lieutenant. . . . Captain Salmon is a commissioner of investigation under the law and he has associated with him two expert assessors. . . . We have had a great deal of difficulty in finding a man qualified as Captain Salmon is to take the position at $2,000. It was only after a good deal of inquiry in Canada and England that we succeeded in getting Captain Salmon. He had been employed in Canada on the surveys by the British government, and he became attached to Canada and accepted the position.

Poor man! He became attached before he knew the ways of the Department of Marine and Fisheries.

But I intend, under the advice of Captain Salmon, who is a very efficient officer, to have this matter gone into thoroughly, and have efficient schools of navigation established at the proper ports.

Surely he must have been a good man when his advice was taken by the department in the establishment of naval schools; but now we regret to find that his services are lost to the country for ever.

Motion agreed to.

MONTREAL TURNPIKE TRUST.

Mr. F. D. MONK (Jacques Cartier) moved:—

For a return showing:—1. The present indebtedness to the Dominion government of the Montreal Turnpike Trust (a) on capital account, (b) for arrears of interest.

2. The amounts collected at each toll-gate belonging to the said Turnpike Trust during the year ending 31st December, 1904.

3. The names of all parties who have commuted their tolls, and the amount of commutation paid in each case.

4. The amounts expended on each section or road division under the control of said trust, during the said year ending 31st December, 1904; and the contracts given out during the year, with the name of the contractor and the date and amount involved in each case.

5. The amounts paid out during the said year at each toll-gate for salaries of day and night keepers, and other expenditure at each of the toll-gates maintained.

6. The names of all parties holding passes for free use of the roads under the control of said trust during the said year.

7. The expenses of the said trust during the said year, for rent, salaries of the office, giving name and remuneration of each official.

8. The actual indebtedness in detail of the said trust outside of its bonds due to the government of Canada.

He said: I also desire to add another clause:

9. The amounts collected from year to year since 1896 from the municipalities, under special agreement made, as their share pro rata of the bonded indebtedness of the turnpike trust.

I intend moving a motion in reference to the question referred to in this motion, at a later stage of the session. The object of the present motion is merely to obtain as soon as possible the information which it calls for. On several occasions during

the last two parliaments I have made motions to the same effect, and I would ask the Department of Finance to forward the order of the House to the Montreal Turnpike Trust at Montreal, and to get the report conveying the information. I believe that the information asked for by this motion can be compiled in two or three hours. I would ask my hon. friend the Minister of Customs (Mr. Paterson), who I think represents the Finance department pro tem, to see that the order of the House be sent down to Montreal as soon as possible, in order that that information may be before us at an early date, and that I may be able to move on other lines. It is my desire to bring before the House in another form the question of the toll-bars on the principal roads leading out of the city of Montreal, and I desire to make a suggestion to the government which I think will meet with the approval of the persons who are interested in the development of the roads in the vicinity of the city of Montreal. It is impossible to move the House in that direction unless we have the complete information called for by this motion.

Sir WILFRID LAURIER. There is no objection at all to the motion being granted, but in reference to the last paragraph which has just been added by my hon. friend (Mr. Monk), I was under the impression that the information had already been brought down —part of it, at all events.

Mr. MONK. No.

Sir WILFRID LAURIER. Was it not brought down before ?

Mr. MONK. No, there was never brought down any of the information called for by paragraph 9.

Sir WILFRID LAURIER. Carried.

Motion agreed to.

MOTIONS AGREED TO WITHOUT DISCUSSION.

For a return of all moneys spent by the government on the Toronto harbour and breakwater during each year from 1880 to 1904 inclusive ; and the particular works upon which such moneys were expended, showing how much for dredging, breakwater, piers, cribwork, piling, &c.—Mr. Macdonell.

Return showing the names of all the commercial agents of Canada ; where located ; previous location, occupation and qualifications ; amount of salary of each ; other expenses connected with their positions ; class of product they are chiefly interested in placing on the market ; procedure in the different locations ; results, specific and general.—Mr. A. Martin.

Return giving the names of all officials, clerks and employees on the pay-roll of the Board of Railway Commissioners for Canada, on the 1st of January, 1905, with the amount of salary in each case.—Mr. Perley.

PUBLIC ACCOUNTS COMMITTEE.

Mr. F. D. MONK. Mr. Speaker, before the Orders of the Day are called, I would take the opportunity of suggesting to my hon. friend the Chairman of the Public Accounts Committee (Mr. McIsaac) to call a meeting of that committee as soon as possible. The first meeting is generally employed with the orders for witnesses and documents, and I think it would be important, as we have now a sufficient quantity of the Auditor General's Report to proceed with the business of the committee, that we should have what is in reality the preliminary meeting as soon as possible.

Mr. McISAAC. The matter having now for the first time been brought to my notice, I will call a meeting as soon as possible.

REPORT OF THE DEPARTMENT OF THE INTERIOR—MEETING OF THE COMMITTEE ON AGRICULTURE.

Mr. U. WILSON. I would like to know when we may expect the report of the hon. the Minister of the Interior, and also when we may expect the meeting of the Agriculture Committee. There is a good deal of work to be done by that committee, and unless we get to work soon it will interfere very considerably with the meetings of the other committees, as several members of the Committee on Agriculture are members of other committees.

Sir WILFRID LAURIER. I understand that my hon. friend (Mr. U. Wilson) wants to know when the report of the hon. Minister of the Interior is to be brought down. I am sorry to say that at this moment I cannot give any information to my hon. friend. I understand that at this time, and for some time past, the Printing Bureau has been engaged particularly with the Auditor General's Report. I will make inquiry as to the information which my hon. friend wants, and I will try to give him satisfaction later on. I have no doubt that the Committee on Agriculture will be called to meet at once.

TRANSPORTATION COMMISSION.

Mr. FOSTER. The right hon. First Minister said yesterday that he would, at a later date, give me the information in reference to the Transportation Commission. Has he that information now ?

Sir WILFRID LAURIER. No, I am sorry to say I have not.

SECOND READINGS.

Bill (No. 11) respecting the Columbia and Western Railway Company.—Mr. Galliher.

Bill (No. 12) respecting the Ottawa Electric Company.—Mr. Galliher.

Bill (No. 13) respecting the Atlantic, Quebec and Western Railway Company.—Mr. Gauvreau.

Mr. FOSTER. Probably that will be sufficient to give the Railway Committee some work to do, and it might be better to leave the others until we have a chance to look at them.

SUPPLY.

House in Committee of Supply.

Customs—salaries and contingent expenses, ports, $1,214,865.

Hon. WM. PATERSON. The first sub-item was about finished was it not ?

Mr. FOSTER. I think the minister was giving us a list of the increases in Nova Scotia.

Mr. PATERSON. I think I gave the gross amount of the increase. In Nova Scotia it amounted to $2,210. Of these 37 increases, I may say that 24 were in Halifax, one in Annapolis, one in Canso, one in Digby, two in Lunenburg, four in North Sydney, one in Pictou, one in Port Hawkesbury, and two in Sydney.

Mr. FOSTER. What was the nature of the increases in Halifax ?

Mr. PATERSON. Largely from $550 to $600. These increases were in accordance with our policy in the large ports of raising the salaries of the lower priced men.

Salaries and travelling expenses of inspectors of ports and of other officers on inspection and preventive service, including salaries and expenditure in connection with the Board of Customs and for the compiling of statistical returns of imports and exports, $189,200.

Mr. FOSTER. Will the minister explain very briefly his system of inspection ?

Mr. PATERSON. The inspection is carried on by officers duly appointed, one in New Brunswick, who also takes Prince Edward Island, two in Nova Scotia, two in Quebec, five in Ontario, one in British Columbia, one in Manitoba, who takes in the Territories, and the collector of customs at Dawson, who has supervision as inspector over Whitehorse. Their duties are to be continually engaged in the inspection of the offices, examining the clerical work and everything in connection with the business of the office. They report to the commissioner of customs as to the condition of each port. If anything improper is reported, that of course has to be taken cognizance of by the commissioner, it is brought under my notice and has to be dealt with. The inspection is now pretty thorough. Before 1896, owing to the illness of some of the inspectors, it had been impossible to inspect some of the offices for three or four years and some things went wrong, but in 1896 under the old government Mr. McKay was appointed and since then Mr. Boultbee has died and his place has been filled. I think I can safely say that now every port in inspected once a year if not more frequently.

Mr. FOSTER. What members of the Board of Inspection or the staff of inspectors are in Ottawa ?

Mr. PATERSON. None of these to whom I have been alluding, the inspection staff, are in Ottawa. There is a board called the Board of Customs, but there are 13 officers under Mr. McMichael, whose headquarters are at Toronto.

Mr. FOSTER. Is Mr. McMichael one of the Ontario inspectors or is he a chief ?

Mr. PATERSON. He is the chief inspector.

Mr. FOSTER. And he looks after all the other inspectors ?

Mr. PATERSON. Yes, he is the head and he looks after all the others.

Mr. FOSTER. Do the reports of the others go to him ?

Mr. PATERSON. Yes, they are all forwarded through him.

Mr. FOSTER. What does he do with reference to these reports ? Does he give them a thorough going over ?

Mr. PATERSON. Yes, he goes through them, makes a report and sends them to the commissioner.

Mr. FOSTER. I wanted to get the modus operandi. When Mr. McMichael gets the reports of the inspectors what authority has he? Does he deal with any portion of them himself, and is there a certain time in which he has to report to the commissioner, or does he simply report upon and forward all these reports to the commissioner. I want to ascertain if any of these reports fall by the way or any portion of them, or do they all come to the commissioner with the advantage of the chief inspector's notes and comments.

Mr. PATERSON. Yes, they all come to the commissioner here and final action is taken here. Mr. McMichael would not take action himself, but he would draw the attention of the commissioner to anything which he thought necessary. The commissioner, however, would have to take action.

Mr. FOSTER. Does the commissioner take the sole action in conjunction with his minister of course, or have you a board here, which assists in any way.

Mr. PATERSON. No, not in reference to that matter, because these inspectors are doing the initial part of the work, and it becomes a matter of judgment whether a search should be made. If a shortage were discovered, as sometimes happens, we would have to take a step which we do not like to take, and perhaps feel it incumbent upon

us to relieve the officer of his position. Since I have been at the head of the department we have changed the practice. Formerly we took securities from private individuals, but now the officers are all under guarantee companies, so that if there is any shortage, we simply notify the insurance company which gives the guarantee, and have nothing more to do with the matter. The company has to make the loss good.

Mr. W. J. ROCHE. How are sub-collectors paid—by salary or commission ? If by salary, is there any uniform rule ?

Mr. PATERSON. They are paid by salary, invariably I think. But at certain small points, which are not customs ports, for convenience we give postmasters the power to collect in small matters, and allow them 10 per cent commission.

Mr. W. J. ROCHE. There have been cases in which goods have been brought to the sub-agency, and a man at the place has been employed as an agent of the owner of goods, and has charged a certain fee, and the sub-collector, in stating the amount of duty which the individual had to pay, has included the agents' fee. I myself have seen an account rendered by a sub-collector at Neepawa, in which a fee of 50 cents was charged as the agent's commission on an article on which there was paid $4 of duty. It seems to me that that is entirely outside of the duties of a collector.

Mr. PATERSON. So it is. While brokers may do business for others, we do not recognize them in any way at all. They are not agents of the department. If any charge is made by them, it is no part of our duty to collect it.

Mr. W. J. ROCHE. The party could not get the goods released without paying the agent's fee. The sub-collector has no right to constitute himself an agent for the collection of the agent's fee.

Mr. PATERSON. No, certainly not. We have had occasion to point out that if people pay that, it is not on the demand of the Department of Customs at all.

Mr. W. J. ROCHE. Another thing occurred in connection with the same office. A person bringing in household effects from the old country was anxious to have them passed immediately, but could not produce his certified invoice in order to get the benefit of the preferential rate. He asked the sub-collector of customs if, by paying the full amount of the duty, and later on producing the certified invoice, he would get a rebate. The sub-collector replied, No, certainly not.

Mr. PATERSON. That would be a misapprehension of his duties, because that is our course. If a person comes with an invoice not properly certified, our regulations provide, and our officers are so instructed, that the goods are to be allowed in at the full general tariff rate, and when the proper invoice is produced, a rebate is allowed.

Mr. W. J. ROCHE. And there is no time specified ?

Mr. PATERSON. No time specified, except that it has to be done within three years.

Mr. BENNETT. Is there any age at which the hon. minister deems it right or proper to superannuate officials of his department in the outside service ?

Mr. PATERSON. Under the general Superannuation Act a person over 60 years of age may be superannuated, as the hon. gentleman knows. We have many officers over that age who are capable of performing their duties, and who do not wish to be superannuated.

Mr. BENNETT. May I ask the minister if the case of Mr. George Watson, the collector of customs at Collingwood, who is in his 77th year, is now under consideration for superannuation ?

Mr. PATERSON. I think he has not asked for it.

Mr. BENNETT. He has been upwards of 40 years in the service. Can the minister recollect whether or not he has applied for superannuation ?

Mr. PATERSON. Not that the accountant is aware of.

Mr. BENNETT. I do not think the accountant would be aware of it. I want to know if the minister is aware of it.

Mr. PATERSON. No, I am not.

Mr. BENNETT. There is no question of his superannuation or the appointment of his successor before the minister at present?

Mr. PATERSON. No, not at present, so far as I remember. Is there a feeling that he is not able to discharge his duties ?

Mr. BENNETT. No, but it was felt about the time of the election that it was very expedient to have him superannuated on account of the government receiving the very warm services of a gentleman who was to receive the position. The minister never heard of that ?

Mr. PATERSON. Oh, no.

Mr. BENNETT. I think he will soon hear of it.

Mr. PATERSON. That is certainly an age at which a gentleman might ask to be relieved from service.

Mr. BENNETT. I think so, and in view of the services the other gentleman gave, I think it would perhaps be quite right for him to receive the position.

Mr. PATERSON. Well, I do not know who the other gentleman is.

Mr. ARMSTRONG. I wish to ask the minister how the payment for overtime comes about. At the port of Sarnia you have paid for overtime during the past year $2,786, which is distributed over a number of names. How is the time computed ?

Mr. PATERSON. They are paid so much an hour. Up to two years ago a large part of that amount was paid by the transportation companies. The department and the House, however, took the view that it was only proper that, as the revenue was collected by our officers, they should be paid by us. Therefore we have assumed the payment of all overtime, and do not any longer charge it to the transportation companies ; but if the transportation companies ask for the services of our officers on Sundays, which happens in some rare cases, we do not pay for that ; the transportation companies have to bear it. Is the hon. gentleman's question how we divide it among the different officers ?

Mr. ARMSTRONG. I want to know how you can check it among the different officers.

Mr. PATERSON. They must serve so many hours, and the collector must certify to the fact. The work must be done before 8 o'clock in the morning or after 6 o'clock at night, and in every case they must state the amount of overtime they have put in. The collector has to certify the account, and they are paid 25 cents an hour.

Mr. FOSTER. As regards the expenses of the inspectors, on what basis are they regulated?

Mr. PATERSON. The actual travelling and reasonable living expenses for which they furnish vouchers.

Mr. DANIEL. How many revenue cruisers does the minister employ?

Mr. PATERSON. Really only one is under customs. In Cape Breton waters during the summer we engage a boat called the 'Gladiator.' We have many revenue cutters but they are under the Department of Marine and Fisheries.

Mr. DANIEL. Under whose authority do they work. The Customs or Marine?

Mr. PATERSON. The officers are wholly under my department and are under Mr. Jones. The repairs are done through the Marine Department but are charged against us.

Mr. FOSTER. What are the duties of the Board of Customs ?

Mr. PATERSON. They decide questions that are not very clear under the law. For instance, as to whether a certain article might be a woollen or a cotton. They have periodical meetings at which they rule upon the different questions referred to them. When a decision of theirs is approved by a Minister of Customs, he signs it, and it has the authority of law, but it is subject to an appeal to the Governor in Council.

Mr. FOSTER. Are the statistical officers all in Ottawa ?

Mr. PATERSON. Yes, fifty-seven. They are not all new. Under the old system they would be at Montreal and other ports. They get out reports every month giving us as complete information as you will find in the Trade and Navigation returns.

Mr. FOSTER. The work which was formerly done at the out ports by those who were removed to Ottawa is not now being done there?

Mr. PATERSON. No, it is done here.

Mr. FOSTER. But all the data for that work has to be frowarded from those ports?

Mr. PATERSON. Yes.

Mr. FOSTER. That does not add very much to the work of those ports? The minister does not duplicate by appointing men to fill the vacancies caused by removal of statistical officers to Ottawa?

Mr. PATERSON. We did not fill the vacancies where men were engaged at large ports exclusively in this statistical work. But in so small ports, like Guelph or Brantford, where men were engaged partly in this work and partly in other work, we could not reduce the staff by the removal of one officer. But the increase in the business has generally justified keeping the staff up to what it was before.

Mr. HENDERSON. As to these monthly reports, I would be glad if the minister would tell us whether business men really value and appreciate them. My impression is that they are not much called for or used. But the reports would be much more interesting to me, I know—and I pay attention to the trade and navigation returns—if a column were added to these monthly reports giving the amount of revenue collected. It may be that these reports cost more than they are worth, but, if it is well to continue them, I would suggest that they would be exactly in the form of the trade and navigation returns.

Mr. FOSTER. Can the minister say what the expense of publishing these monthly reports is ?

Mr. PATERSON. We have not that separately from our other printing.

Mr. FOSTER. Perhaps the minister would get that information. I confess it looks well to have monthly reports, but, as my hon. friend from Halton (Mr. Henderson) says they may not be of enough use to justify

the expense of printing and distribution. I hope the minister will be able to tell us at a future sitting what the ordinary monthly circulation is and give us some idea of the expense.

Mr. PATERSON. This system of monthly report was established at the request of the Manufacturer's Association. Perhaps a merchant or ordinary business man may not value them much. But every one doing or contemplating an export business finds them of value. We have to do a great deal of this work any way in order to get out our yearly report. And it is always to be remembered that statistics in order to be of value must be fresh. Under the old system we were not able to get out the fiscal returns for the year ending June 30, until the February or March following, when the figures were of little or no value. Now the figures are fresh and they actually help and facilitate trade. So while it involves an expense I think the expense is justified by the good done to the trade of the country at large. It may be that comparatively few business men in the country subscribe or take an interest in them, but the trade that is helped by them is large and important.

Mr. BERGERON. How many employees are there in the Customs Department in the Yukon ? There is a vote of $42,000 for that.

Mr. PATERSON. There are 12 at Dawson and 11 at Whitehorse, the out-port.

Mr. BERGERON. This covers the salaries of all ?

Mr. PATERSON. Salaries and expenses.

Mr. BERGERON. What has been the method of the Customs Department so far as living allowance is concerned ?

Mr. PATERSON. It was thought better to pay salaries and living allowance so that if the cost of living went down there might be a reduction without a reduction of salary. Formerly we paid $150 per month living allowance. Now, we pay the married men $1,500 a year and the single men $1,000.

Mr. BERGERON. I see an item in tonight's paper headed 'Will have to send for Wives.' It says :

An order was issued yesterday in the administration building to the effect that all married men whose wives live outside the Territory should have $25 a month cut off their living allowance.

I gather that, for years officers have been drawing a living allowance as for the whole family though their wives and families have been living outside the territory. The Department of the Interior at least seems to have found this out.

Mr. PATERSON. If a man is keeping his family at one place and boarding in another I do not know that he gains much by it.

Mr. FOSTER. Has there been any revision of the allowances since it was first fixed?

Mr. PATERSON. It was $1,800, and is now $1,500 for married men and $1,000 for single men. Formerly it was $1,800 all round, no distinction made.

Mr. BERGERON. I would call to the hon. gentleman's attention something which I find in the Ottawa 'Free Press' of tonight—I do not know if there is any authority for it :

An order was issued yesterday in the administration building to the effect that all married men whose wives live outside the Territory should have $25 a month cut off their living allowance.

I understand from my hon. friend that married men get so much and single men so much. This report says :

Formerly married men received an allowance of $125 a month for living expenses. Now only the married men whose wives are with them will get this amount. The others will get but $100.

They are treated like single men when their wives are not there.

It is said that a couple of men whose salaries are affected by this order to the tune of $300 a year have telegraphed for their wives to come in at once. As yet it is not known how many men in the service this new order will affect. The heads of the departments will report on the matter and will tell how many men under them are married but whose wives are not with them.

Has my hon. friend any knowledge of this in his department ?

Mr. PATERSON. No ; I do not think that refers to the Customs Department.

Mr. BERGERON. I think all the departments having officers in the Yukon should adopt some like plan. There seems to be a different way of treating these men in the different departments. In the Department of Justice they are treated the best of all, and in other departments they are not all treated alike.

Mr. PATERSON. When you go into the legal profession, they are not governed by the ordinary laws. As concerns the Post Office, the Interior and the Customs departments, my impression is that we are all about on the same basis. I think, so far as those three departments are concerned, the living allowance is about on the same basis. At any rate, we have reduced ours from $1,800 to $1,500 for married men, and then make a distinction for the first time between married and single men.

Mr. BERGERON : Whether his wife is there or not ?

Mr. PATERSON. Of course, if the man is married, we assume that his wife will be with him. But sometimes they go into that country on temporary business. I know

the collector at Dawson has his family with him, although he himself is out just now. There are some single men there. I fancy that other officers have their wives with them. I do not know about the appraiser, he goes to Victoria ; there is no use keeping him at Dawson all winter, and his living allowance is cut off when he is in Victoria. I presume his family is with him in Victoria.

Mr. FOSTER. What proportion of the minister's officials are uniformed ?

Mr. PATERSON. I think all who come in contact with the public at stations as landing waiters.

Mr. FOSTER. Are the uniforms furnished by the department ?

Mr. PATERSON. I think they have to provide themselves once a year. We make an allowance of $8 once a year for the uniform. They buy the cap, and we supply the cap band and the buttons for the uniform.

Mr. FOSTER. Have they to get these uniforms at any particular place ?

Mr. PATERSON. No.

Mr. FOSTER. You take care that the uniforms are uniform—that your officers present a uniform appearance ?

Mr. PATERSON. Yes, it is rather a neat uniform ; it is certainly a great improvement on the former one.

Mr. FOSTER. You don't have to make any contracts, then ?

Mr. PATERSON. No.

Mr. FOSTER. There is an item here of $12,474.65, which seems to be taken from the general expenditure and which is paid by the railways. What is that ?

Mr. PATERSON. That is a refund of money paid by transportation companies. In 1903 the committee of the House authorized the Department of Customs to pay their own officers. If you recognize the fact that trains should be allowed to run in the general interest of the country, it is part of our business to pay officers who are to collect the revenue for the Dominion of Canada. It involves asking for $60,000 or $80,000 more, and I hesitated for two or three years. But we take the position that we will not pay for overtime on Sunday, that if you are going to require men to work on Sunday you will have to pay for that. In this amount you find there are sums that are refunded to us by the transportation companies.

Mr. FOSTER. The revenue that you collect on Sunday, do you take that into the funds ?

Mr. PATERSON. The Sunday work they require to do is entering and clearing vessels, not to collect the revenue.

Mr. FOSTER. No revenue collected on Sunday ?

Mr. PATERSON. I said the principal work is entering and clearing vessels. We do not encourage, in fact we discourage, any Sunday work that can be avoided.

Mr. FOSTER. But the money which is collected on Sunday goes into the treasury of the Dominion ?

Mr. PATERSON. If there is any collected.

Mr. FOSTER. But as a matter of fact the sum is collected ?

Mr. PATERSON. I could not say that. I think it is very doubtful.

Mr. FOSTER. The hon. minister sees that he is running up against a place where he cannot find an argument, because, if he takes the revenues which he collects on Sundays, on the ground that he himself has laid down he is bound to pay the expenses for collecting the revenues on Sunday as well as on any other day. We will not pursue that point.

Mr. PATERSON. I discouraged Sunday work as much as possible.

Mr. FOSTER. The hon. minister himself does not work on Sunday.

Mr. PATERSON. No, I do not.

Mr. WHITE. And when it is done you do not pay for it.

Mr. PATERSON. Well, I suppose we have discussed this item enough now.

Mr. FOSTER. As far as I am concerned I am satisfied.

Mr. PATERSON. The whole item is carried is it not?

Mr. FOSTER. All right.

Mr. PATERSON. We might as well call it six o'clock.

Mr. FOSTER. All right. What will be taken up to-night ?

Mr. PATERSON. We are ready to go on with militia, I suppose, if the hon. Minister of Militia and Defence (Sir Frederick Borden) is here.

Mr. FOSTER. You must look after your minister.

Mr. PATERSON. I know, but I was asking the hon. gentleman. I think the Auditor General's Report in reference to that is down.

Mr. FOSTER. Yes, 'Militia and Defence' is down.

Mr. PATERSON. Very well, we will go on with that.

At six o'clock, committee took recess.

After Recess.

House resumed at eight o'clock.

PRIVATE BILLS.

SECOND READINGS.

Bill (No. 14) respecting the Molsons Bank.—Mr. Ames.

Bill (No. 15) to incorporate the St. Mary's and Western Ontario Railway Company.—Mr. McIntyre.

Bill (No. 16) respecting certain patents of the Canada Car Company, Limited.—Mr. Bickerdike.

Bill (No. 17) respecting certain patents of the Goodwin Car Company.—Mr. Bickerdike.

Bill (No. 18) respecting the Ottawa, Northern and Western Railway Company.—Mr. Belcourt.

Bill (No. 19) to incorporate the Calgary Red Deer and Battleford Railway Company.—Mr. Scott.

Bill (No. 20) to incorporate the Moosejaw and Edmonton Railway Company.—Mr. Scott.

SUPPLY.

House in Committee of Supply.

Militia and Defence, pay and allowances, $670,000.

Mr. FOSTER. The minister might explain the large increase in this item.

Hon. Sir FREDERICK BORDEN (Minister of Militia and Defence). Before going on with these estimates I would like to make a suggestion to the committee, and to my hon. friends opposite. I would suggest that the same course might be pursued this year as we have been pursuing for the last two or three years, namely, to agree upon a day on which the main discussion of the state of the militia should take place, and that in the meantime some progress might be made with the items here, with the understanding that when that discussion takes place, any subject covered by any of these items should be open to discussion.

Mr. FOSTER. If anything is to be done at all that will have to be the way because the minister's report, I understand, is not yet down. We will go over these items and the minister will be able to give the explanations and we shall reserve one item for a general discussion. I think that will be satisfactory.

Sir FREDERICK BORDEN. I would suggest that the large item of $1,300,000 might be the one to be reserved. That is the item really on which the discussion has taken place in the last two years and it practically covers every branch of the militia service. I am sorry my report is not on the table but as the militia report is brought up to the end of the calendar year, it was impossible to get it into the printers' hands until about this time. As a matter of fact it has been in the printer's hands for a couple of weeks and I hope to have it in a couple of days.

Mr. SAM. HUGHES. Would the minister in the meantime explain these items ?

Sir FREDERICK BORDEN. This item of pay and allowances, as will be seen in the detailed statement on page 38, is for pay and allowances of the Headquarters and District Staff, pay of Permanent Corps, pay of officers and men attending Schools of Instruction, allowances to active militia, and guards of honour. There is an increase in the pay of the Headquarters and District Staff of between $8,000 and $9,000. This is due to the fact that some changes have been made at headquarters ; some additional branches have been created, and additional officers appointed. With regard to the second item, the $460,000, there is a very considerable increase.

Mr. FOSTER. Before the minister goes on to that he might say what additional officers have been appointed and what additional pay is given to the Headquarters and District Staff. What part of the $9,000 there is for new officers.

Sir FREDERICK BORDEN. There is a Director of Training and Intelligence whose pay is to be $2,800, an Assistant Adjutant General, a Director of Artillery, a Director of Transports and Supplies, a Director of Operations and Staff Duties, a Director of Cloth and Equipment. All these are really changes in name chiefly. There is a new officer, the Director of Operations and Staff Duties at $2,800 and an assistant at $1,700.

Mr. SAM. HUGHES. Whom have you appointed to these two offices?

Sir FREDERICK BORDEN. They are not filled; we are simply providing for them. I may say in this connection that under the authority of the Act passed last session, a reorganization of the Headquarters Staff has taken place, under the direction chiefly of General Lake, who came from England a month or two ago, and who is Chief of the General Staff. He has assisted me in constituting a Militia Council under the authority of the Act, and these changes have been made at his suggestion, and with the approval of the Militia Council.

Mr. SAM. HUGHES. Is that a case of an officer from the old country coming out to succeed one of whom the minister is reported not long since to have said that the chief function of each general officer commanding is to prove that his predecessor was an unwise man. Are not these the changes which were made necessary by the Bill passed last session ?

Sir FREDERICK BORDEN. Yes.

Mr. SAM. HUGHES. Have the regulations and orders which were to have been submitted to parliament before the Militia Act of last session became law, been passed? If so, might I suggest that the minister have a copy sent to each member of parliament?

Mr. DANIEL. Who is the principal medical officer of No. 8 district?

Sir FREDERICK BORDEN. Surgeon-major Bridges.

Mr. DANIEL. I saw in one of the daily papers yesterday or the day before that Dr. Bridges had resigned that position, and that Dr. March had been appointed.

Sir FREDERICK BORDEN. I am not aware of such being the case. I will get the information and let my hon. friend know at a later stage.

Mr. DANIEL. How are these officers paid?

Sir FREDERICK BORDEN. The Principal Medical Officers in districts where there are permanent depots receive the pay of their rank. While there are no permanent depots they are paid during the camp, and they are given $25 a month for any duties they may have to perform between the camps.

Mr. DANIEL. I see that Major Bridges is put down as receiving only $2 per day for 366 days to June 30, 1904, the whole amount being $732. If he were receiving the pay of his rank, I should think he would receive more than that.

Sir FREDERICK BORDEN. Yes, $4 per day would be the pay. I am informed that that was before the permanent appointment was made. Dr. Bridges was then a private practitioner and a surgeon in the active militia, and his services were utilized after the death of Dr. McLearn, I think it was, at the rate mentioned by my hon. friend. I will look into the matter, however. My attention has been called to it now for the first time.

Mr. FOWLER. Is he resident in Fredericton and does he attend to the military school there?

Sir FREDERICK BORDEN. Yes.

Mr. SAM. HUGHES. Is the allowance of so much per month to these principal medical officers supposed to differ from the ordinary pay the militia officers draw for their services while in camp? In other words, does it constitute them permanent officers or not?

Sir FREDERICK BORDEN. No, it does not. For instance, in my own district, No. 9, in Nova Scotia, there is no depot; but still it is necessary to have the services of a Principal Medical Officer, not only in camp but at other times during the year, and he is obliged to be in almost constant correspondence with the headquarters here. He is called on to make the examinations of men who are going to attend the schools and to render other services, and it was thought only fair to allow him the small fee of $25 a month to indemnify him from loss.

Mr. SAM. HUGHES. The point I wish to make is this. In case one of these officers should have the chance of being elected to parliament, it will not affect his independence under the Independence of Parliament Act?

Sir FREDERICK BORDEN. No, it is not intended to do so. I think the Independence of Parliament Act specifically protects the militia officer from being affected by any amount of money he receives.

Mr. SAM. HUGHES. I would like the minister to bring down all the details in connection with the retirement of Colonel Gregory from the command of his regiment, for I can tell him that Colonel Gregory has been illegally retired, and he has a ground of action against the government if he chooses to take it. I have also received some correspondence in relation to Colonel Herchmer. The minister considers that he does not come under his authority; but I believe it was through the Militia Department that he obtained his dismissal. Then, what act did the government take, either through the Canadian authorities or through the imperial authorities, in relation to a Surgeon Devine, at Winnipeg, in regard to his distinguished services, how did he obtain his Distinguished Service Order and on what reports did he obtain them? I would also like the details connected with the proposed reorganization of the 16th glad to give the information required.

Sir FREDERICK BORDEN. Those items will be in 'Hansard' and I shall be very glad to give the information required.

Mr. FOSTER. Will the hon. minister give us some idea of the duties of these new officers, one of whom is receiving $2,800 and the other $1,700 a year?

Sir FREDERICK BORDEN. This officer, as I understand it, shall have special control over the instructions to be given with reference to the movements of troops in the field.

Mr. SAM. HUGHES. What is his rank?

Sir FREDERICK BORDEN. Director of Operations and Staff Duties. He comes immediately under General Lake, the Chief of the General Staff. He should be one of the best qualified men in the service, because the condition of the troops, the knowledge they have of tactical work and the work necessary to make them efficient in

the field, will depend very largely on the instruction given by this officer. He will direct the officers in command of districts and of camps as to the instruction they are to give.

Mr. SAM. HUGHES. Does the hon. minister mean to say that this officer will be superior to the District Officer Commanding ?

Sir FREDERICK BORDEN. Not at all.

Mr. SAM. HUGHES. Then how will he direct him ?

Sir FREDERICK BORDEN. Through the regular authority, through the Chief of the General Staff.

Mr. SAM. HUGHES. If the general staff determines what the duties are to be, why could the instructions not be sent by the secretary ? What is the use of this officer ? The district officer commanding has no right to take orders from a junior officer except as representing his superior.

Sir FREDERICK BORDEN. What I meant to say was that it will be the duty of this officer to study and perfect himself in matters of this kind and to prescribe, suggest and advise. When his advice is accepted, instructions are sent through the proper channel to the different District Officers Commanding districts.

Mr. SAM. HUGHES. Does the hon. minister suppose that an officer would occupy all his time laying out plans for drill in camp ?

Sir FREDERICK BORDEN. There are many other things besides that. There is the Intelligence Department. His business is to look over the whole field where military operations might take place—the whole country.

Mr. SAM. HUGHES. What will the rank of this officer be ?

Sir FREDERICK BORDEN. He will not necessarily be of very high rank—a Major, possibly Lieutenant-Colonel. I think the imperial officer to whom the place was offered had the rank of Major.

Mr. SAM. HUGHES. Why did Col. Denny retire ?

Sir FREDERICK BORDEN. His time was up in April and he was offered a position in the Imperial Service which he would have lost had he remained here. He, therefore, requested to be allowed to go and his request was granted.

Mr. SAM. HUGHES. It was on his own motion he retired ?

Sir FREDERICK BORDEN. Entirely.

Mr. FOSTER. I am not a military man but belong to the larger proportion of laymen. I understand from the newspapers that we are now to have a military council. That, I suppose, eliminating the minister, will be the highest authority in the administration of the Militia Department. Will the hon. member give us briefly the constitution of that council ? I do not quite see what this training master has to do.

Sir FREDERICK BORDEN. I regret that I am not really in a position to make as clear a statement as I would like to make on this point. I do not think I can do better than read from the regulations we have just passed and which give the scope of the new proposals, copied very largely from what is being done in England. It will be found in the King's Regulations and Orders for the Militia of Canada, 1904, page 205, Appendix A.:

Extract from a report of the Committee of Privy Council approved by the Governor General, 17th November, 1904, as amended by Order in Council, 17th December, 1904.

On a report dated 15th November, 1904, from the Minister of Militia and Defence, submitting that by the Militia Act, 1904, section 7, it is enacted as follows :—

The Governor in Council may appoint a militia council to advise the minister on all matters relating to the militia which are referred to the council by the minister. The composition, procedure and powers of the council shall be as prescribed.

The minister submits that it is expedient that a militia council be appointed accordingly, and recommends that it be constituted under the title of the militia council and that it be composed of the following members :—

Pres.—The Minister of Militia and Defence.

First Military member—the chief of the general staff.

Mr. FOSTER. Who is he ?

Sir FREDERICK BORDEN. General Lake. Second military member, the Adjutant General ; he is Colonel Vidal. Third military member, the Quartermaster General ; he is Colonel Macdonald. Fourth Military member, the Master General of the Ordnance ; he is Colonel Cotton. Civil member, the Deputy Minister of Militia and Defence. Finance member, the Accountant of the Department of Militia and Defence, with a secretary to be nominated by the Minister of Militia and Defence from among the clerical staff of this department. Mr. Jarvis has been made secretary.

Mr. FOWLER. What position does Lord Aylmer hold ?

Sir FREDERICK BORDEN. He is Inspector General.

Mr. FOWLER. And not on this staff ?

Sir FREDERICK BORDEN. No.

Mr. WORTHINGTON. Is he not a member of the council ?

Sir FREDERICK BORDEN. No. Those whose names I have given form the council.

The minister further recommends as regards its procedure.

1. That the militia council shall meet once a fortnight or oftener, at his direction, for the transaction of business.

2. That a full, but not necessary verbatim, account of the proceedings of the council shall be kept by the secretary and printed for record, together with a schedule of the decisions arrived at.

3. That all such decisions shall be recorded as those of 'The Minister in Militia Council.'

4. That the business brought before the council may be any question which the minister may desire to refer for the advice of his council, and, in addition, any matter upon which the member charged with the administration of such matter may wish to obtain the opinion of the council, and the decision of the minister.

Mr. FOSTER. Would the hon. minister give a case in explanation of that ?

Sir FREDERICK BORDEN. The work of the department is divided up, as my hon. friend (Mr. Foster) will see when I read the duties of the different officers of the council. This section means that a member of the Council, wishing advice on a matter in his particular branch, may bring that matter before the Council. As a matter of fact, I may say, all matters of any importance at all are brought before the Council.

5. That in the absence of the minister the deputy minister shall preside, but that, in that case, no decision affecting questions of general policy shall be carried into effect until the minister has signified his assent.

6. That any member who may dissent from the decision taken shall be at liberty to have his dissent recorded on the proceedings.

7. That the minister be authorized to make such further rules, regulating the procedure as he may deem expedient.

Mr. FOSTER. Have any rules been made ?

Sir FREDERICK BORDEN. There have been some, which I shall be glad to bring down.

The minister further recommends as regards the powers of the militia council, that the several members thereof be responsible to him for the proper administration of their several branches, and that they be charged with the following duties :—

CHIEF OF THE GENERAL STAFF.

The chief of the general staff, as first military member, shall be charged with :

1. Advice on questions of general military policy.

2. The organization of military forces for active service.

3. Military defence of the Dominion.

4. The collection of intelligence.

5. Training of the military forces and their employment when on active service.

6. Education of staff officers.

7. Telegraphs and signalling.

8. Selection and administration of the general staff in the field.

9. Preparation, jointly with the finance member, of estimates for the above services.

ADJUTANT-GENERAL.

The adjutant-general, as second military member, shall be charged with :

1. Raising and peace organization of military forces.

2. Maintenance of the establishments and officers and men.

3. Distribution of units to stations and orders for the mobilization of units.

4. Questions relating to the personal services of officers and men.

Mr. FOSTER. 'Personal service,' what does that mean ?

Sir FREDERICK BORDEN. In the event of an officer distinguishing himself in any way, or having a right to special consideration, the matter would come under the charge of the Adjutant General.

Mr. FOSTER. Or, if an officer had committed any fault, I suppose ?

Sir FREDERICK BORDEN. Precisely.

Mr. SAM. HUGHES. Why is the word 'personal' used ? An officer has his personal individuality as well as his military individuality. The Adjutant General has nothing to do with an officer of the permanent force or the headquarters staff, in his personal capacity, except when he is on service.

Sir FREDERICK BORDEN. It only refers to his service. The word 'service' is used.

Mr. SAM. HUGHES. It could not mean personal conduct.

Sir FREDERICK BORDEN. His conduct as an officer.

Mr. SAM. HUGHES. Why not say that?

Sir FREDERICK BORDEN. I am not sure that it would be an improvement on this wording. However, perhaps the hon. gentleman (Mr. Sam. Hughes) will agree that it is better that I should proceed with the reading, in order that this may go upon 'Hansard' in as connected a form as possible. We can criticise it later. Of course, if hon. members prefer to criticise it now, the matter rests with them.

5. Appointment, promotion and retirement of officers.

6. Honours and rewards.

7. Promulgation of orders to the militia.

8. Education of officers, warrant officers, non-commissioned officers and men.

9. Discipline and interior economy.

10. Ceremonial.

11. Administrative arrangements connected with military training and education, Royal Military College.

12. Selection and administration of adjutant-general's staff.

13. Preparation of militia list.

14. Medical and sanitary questions.

15. Preparation, jointly with the finance member, of estimates for the above services.

QUARTERMASTER-GENERAL.

The quartermaster-general, as third military member, shall be charged with :

1. The organization and training of all transports, remounts, supply and barrack services.
2. Settling the reserves of food, clothing, equipment, general stores and material to be held in depots, garrisons or mobilization stores, and the scales of such articles to be in possession of the troops.
3. Holding and issuing all military stores.
4. Administration of the transport, remounts, railway, supply, barrack, ordinance and veterinary services.
5. Compensation for injuries to men, animals or material.
6. Selection of officers for employment in the above services.
7. Administration of the ordinance store corps.
8. Arrangements for postal services.
9. Advising and assisting the Deputy Minister of Militia and Defence in making arrangements for contracts for the above services.
10. Preparation, jointly with the finance member, of estimates for the above services.

MASTER-GENERAL OF THE ORDNANCE.

The master-general of the ordnance, as fourth military member, shall be charged with:

1. The armament of the forces, including mines, electric lights and all accessories.
2. Sites, designs and armaments for the permanent defences.
3. Settling scales of reserves of arms and ammunition of all kinds.
4. Patterns, provision and inspection of guns, small arms, ammunition and artillery and engineer technical stores and vehicles.
5. Inspection of the process of manufacture in the ordnance factories and control of ordnance workshops.
6. Instruction and maintenance of fortifications, artillery and rifle ranges. Preparation of general plans for all military buildings.
7. Maintenance of barracks and military buildings and lands in military occupation.

Mr. FOSTER. Does the minister build these buildings, or is that work in charge of the Department of Public Works ?

Sir FREDERICK BORDEN. The relative positions of the Department of Public Works and the Department of Militia are not changed in any way. Our work is limited to repairs and to the purely military structures.

Mr. FOSTER. Is he recognized by the Public Works as an officer of the Public Works Department, who had the duty of making plans for military buildings ?

Sir FREDERICK BORDEN. No.

Mr. FOSTER. Then he only has advisory power ?

Sir FREDERICK BORDEN. That is all.

Mr. SAM. HUGHES. Suppose a subordinate officer should submit plans of a building, would the Public Works construct them as the Minister of Militia wished ?

Sir FREDERICK BORDEN. We ascertain what the requirements are, and submit to the Department of Public Works a statement of our requirements. They make a plan and return that plan to us ; if we have any criticism to make we make the criticism and return the plan to the Public Works. There are frequent conferences between the Engineer in charge of this work in the Militia Department and the Architect in the Public Works Department.

Mr. FOWLER. Have you no architect in the Militia Department ?

Sir FREDERICK BORDEN. We have now in the Engineering Branch.

Mr. WORTHINGTON. Do I understand the minister to say that this ordnance officer has control of the manufacture of small arms ? For instance, would he have supervision of the ammunition at present being manufactured in Quebec, and of the Ross rifle, and that sort of thing ?

Sir FREDERICK BORDEN. He would control the inspection. He has the right to go into these factories at any moment and see what is going on, to have a report of the work that is being done there, to see it himself, and to have samples of the ammunition which is being manufactured. So far as rifles are concerned, the inspection of small arms will be directly under his control.

Mr. WORTHINGTON. In the event of any defect being discovered in the small arms and ammunition, or in the rifle itself, with whom would the rectification of this fault lie ? Would he look after that himself, or would it be submitted to the council or a body of experts ?

Sir FREDERICK BORDEN. I should think it would be submitted to the Council. But the Master of Ordnance is primarily responsible for these things being properly done. He is responsible for the inspection, there is no question about that. We are now considering a board of inspection, but that has not been done yet.

Mr. SAM. HUGHES. In this connection I might suggest to the minister—I have no right to make a motion to this effect—but there has been from time to time, as he well knows, very grave questions arising as to whether this officer was acting within his authority. For instance, I claim that Colonel Gregory has not been dismissed from the service, although his name has been struck off the list. He is illegally dismissed, and I intend to bring up that question before the end of the session. Now I was hoping that the minister would have brought down an estimate this year for a judge advocate general. He has in his department an officer admirably qualified for that position, I mean Colonel Smith ; and in case he would not take the position, I believe it is possible to find another officer in Canada of great legal ability and broad training who would take that position. Al-

though the department has not lost a great deal in lawsuits they might have lost a great deal if persons who have a right to complain against the action of officers had followed up their complaints. I hope the minister will have a judge advocate general appointed.

Sir FREDERICK BORDEN. There is a great deal of force in what my hon. friend says, and that proposition is now under consideration by the Council, and before the end of the session the House may be asked to vote the sum necessary. I will now continue with the enumeration of the duties of the Master General of the Ordnance, the fourth military member of the board, so far as we have worked them out:

8. Administration of the engineer staff employed in the above works.
9. Personnel of the technical inspection staff.
10. Technical instruction at artillery and engineer schools and courses.
11. Technical artillery and engineer questions.
12. Preparation, jointly with the finance member, of estimates for the above services.
13. Advising and assisting the Deputy Minister of Militia and Defence in making contracts for guns, ammunition and works constructed under his control.

Mr. WORTHINGTON. I did not quite understand the minister in answer to my question as to who would be responsible in case of any defect being found in the small arms and ammunition.

Sir FREDERICK BORDEN. The Master General of Ordnance.

Mr. WORTHINGTON. Would he have a staff of experts to decide whether they were effective?

Sir FREDERICK BORDEN. Perhaps he would not be able to decide himself, although he is a man of technical knowledge in such matters, and one of the best qualified officers we have in Canada. But he would have the assistance of men technically qualified. For instance, at Quebec he would have in his employ a chemist of first rate capacity, whose services would be required to test the character of the cordite and a number of things that are used in the manufacture of the cartridge. But in any case when there is a complaint of the inferior character of the ammunition, it is always made to the minister, who would at once bring the matter to the attention of the Militia Council and of the officers specially charged with that duty.

Mr. WORTHINGTON. I ask these question because at one of the rifle ranges last season there was a suspicion that the ammunition was not what it should have been, whether through defect in the manufacture or not, I cannot say. It is a very important matter upon which lives of men may depend. It is a question whether the Master General of Ordnance is able to supervise thoroughly himself, without the aid of qualified experts, the manufacture of ammunition and of the new rifle which I believe is about to be adopted.

Sir FREDERICK BORDEN. The Master General of Ordnance will have the assistance of the best technical knowledge that we can provide, and if it is not to be had here we will send away and get it. I am very glad the hon. gentleman has brought the question up and I will be pleased to hear from him in detail privately, if he likes, or he may write me a letter in reference to the particular occasions on which this failure in the ammunition was found to exist. I am told that the same trouble occurs in England. It is absolutely impossible to have the ammunition uniformly and always good. I am also told that our percentage of imperfections is not greater than it is in England.

Mr. FOSTER. It is all tested before it is issued, is it not?

Sir FREDERICK BORDEN. Yes, samples are tested. It cannot all be tested, of course. You cannot test it till you use it, but a certain percentage of the cartridges that are made every day are tested.

Mr. WORTHINGTON. Would it be in order to ask the hon. minister if the department had any adverse reports in regard to the Ross rifle?

Sir FREDERICK BORDEN. No, I am not aware of any adverse reports. There has been some question as to the sight but it has been changed and improved.

Mr. WORTHINGTON. Was there not some imperfection in regard to the breach?

Sir FREDERICK BORDEN. Not that I am aware of. Of course I am only speaking of my own personal knowledge. I have now come to the deputy minister.

The Deputy Minister of Militia and Defence, as civil member, shall be charged with:
1. The interior economy of the Militia Department.
2. The administration of non-effective votes.
3. Parliamentary business and reports to council.
4. Formal communication to other departments of state.
5. The preparation of papers for submission to the militia council, of official reports of its proceedings, and record of the decisions taken.
6. The administration of contracts, in consultation, with the branches specially concerned.
7. Arrangements for the construction of new barracks and other buildings.

In the case of new barracks to be constructed for instance at Montreal, the deputy minister would carry out the business part of it. The work is really done by the Department of Public Works, but the deputy head of the department would carry

out any business negotiations in reference to the construction of these barracks.

8. The custody of militia lands not in military occupation and purchase of land for military purposes.

9. Such other business as the minister may allot to him.

In the absence of the Minister of Militia, he will act for him in all matter of ordinary business.

Mr. SAM. HUGHES. The hon. Minister of Agriculture will not act any more?

Sir FREDERICK BORDEN. You will have to ask him.

Mr. WORTHINGTON. The hon. Minister of Militia and Defence says that the deputy minister has charge of the purchase and selection of lands for military purposes including the purchase of sites for drill sheds. I will cite a little case that happened in my district. We were very anxious to have a new drill shed at Sherbrooke to replace the old one which existed in the vicinity of the parade ground, the only available place for drill purposes in the city, and several deputations waited upon the Minister of Militia and Defence, or his predecessor, in respect to the purchase of a site adjoining this parade ground. Nothing was done until finally an officer landed in Sherbrooke one day, who, in company with a noted publican who was a warm supporter of the government, drove about the city and on his advice purchased a tract of land which was far distant from this parade ground and which was not suitable for a drill shed. It was a site which the militia did not want and about which they were not consulted at all; in fact, the officer came down and in connection with this hotel keeper purchased this piece of land for the purpose of a drill shed. It was not until shortly before he was leaving on the afternoon train that he had the courtesy to call on the senior officer of that town and tell him what he was down there for. In spite of all the representations which have been made to the department, they have still persisted in retaining this land as the proposed site for the new drill shed. As the hon. minister knows several deputations have waited upon him and not on him alone but on the hon. Minister of Agriculture as well. I think I was a member of one of these deputations, and while I do not mean to say that the hon. Minister of Agriculture would entirely usurp the functions of the hon. Minister of Militia and Defence, I think that on that occasion he had everything to say to us. He went so far as to tell us that if this drill shed site did not suit us we could do what we liked about it, in fact if the proposed site did not suit our regiment it would do for another which might be formed. I think that matters in connection with the selection of a site for a drill shed should not be left entirely with the Deputy Minister of Militia and Defence or with any one man. If you have an engineer, or an architect, or anybody who is competent and knows how to select sites of that kind he is the man who should be entrusted with the performance of that duty, but at the same time I think he should be instructed to consult with the officers in the district when buildings of this sort are to be erected. I think that the system of leaving the selection of a site of that kind entirely in the hands of one man is open to serious objection.

Sir FREDERICK BORDEN. It does not follow because there has been this division of work that the particular things placed under particular officers are solely under the control of those officers. Not at all. They all come under the purview of the Militia Council, under the minister and finally under the Governor in Council. As far as the particular case which my hon. friend refers to is concerned, if he were not a young member of the House, I would say that he was rather out of order in bringing it in here at this moment. It is hardly apropos because the deputy minister, as a matter of fact, is not the officer who went there. The course pursued is this: An officer of the Headquarters Staff, the Quartermaster General or the Adjutant General—the Quarter-Master General, I think—is sent to the locality where the building is to be constructed and is asked to make a report.

Now an officer is not able to purchase. My hon. friend says that this officer, whoever he was, went down and drove around with some one whom he does not approve of, and that he purchased a piece of land. I do not know what he means by saying that this officer drove around publicly; whether he means to insinuate that it had any effect upon the officer's report or not, but as a matter of fact the officer who went down had no power to purchase; he did not purchase. He made a report to me—there was not a Militia Council then—with regard to certain lands available. I met several deputations of the citizens and officers of Sherbrooke, and after listening very carefully to the mayor of the city and other influential gentlemen, including a gentleman of the name of Col. Worthington, of that city, I came to the conclusion that the site recommended by this officer was a good and satisfactory site, I recommended it to the Governor General in Council, and an order in council was passed authorizing the purchase of this site. I have not the papers here, it is a very inconvenient moment to discuss this matter, but if my hon. friend wishes to discuss it I shall be very glad to bring down the papers later on and to discuss it as fully as may be necessary.

Mr. FOWLER. The minister undertook to read the hon. member for Sherbrooke (Mr. Worthington) a lesson, and to intimate that he had violated the rules of the House or the rules of debate in bringing up this particular

matter at this particular time. I wish to say that in my opinion—and I am sure in yours also Mr. Chairman, and yours will have more weight in this house than mine, because of your official position—that the hon. member for Sherbrooke was not at all out of order in bringing up this particular matter at this particular time, because we are discussing the appointment of an officer who would be charged with the particular duty of going about the country and selecting sites when necessary. What more fitting time could the hon. member have chosen in which to bring this up?

Mr. WORTHINGTON. I wish to call the attention of the minister to the fact that the deputation, of which my brother, Lt. Col. E. B. Worthington was a member, did not call on him to discuss the drill shed site, but to discuss the camp ground. Whether that question was brought up at that time or not I do not know, but the deputation were certainly not sent in connection with the drill shed on that occasion, but only in connection with the camp ground. As the minister does not understand what the connection was between the officer who visited Sherbrooke to select a drill shed site and this party to whom I refer, I may say that when this officer went to Sherbrooke he must have had some definite object and some instructions. What were his instructions? To whom was he to report? Was he to go around and pick out the first available site he saw or was he to go to some one who had some pull and ask for his advice as to where he should locate a drill shed? It seems to me he must have gone there with the intention of going directly to this man, because I understand that he was met at the station and spent the day with him and reported to nobody in Sherbrooke. Certainly it would have been an act of courtesy not only on the part of the visiting officer, but on the part of the department too if that officer had seen the military officers in charge of that locality.

Mr. FOSTER. Whilst this question is fresh would the minister take into consideration one thing which if carried out would, in my opinion, be a most excellent thing for his department. The case cited by the hon. member for Sherbrooke illustrates it exactly. If any body of men in a town should be able to form a good opinion as to where a drill shed site should be it would be the men who have interest enough in military matters to form a company and carry on drill at great expense and with great trouble. If the minister would make this selecting of drill shed sites, once and for all, entirely non-partisan, and have in view simply what is best for the militia of that district, putting out of view entirely what this man or that man who may be interested because he has something to sell would like to have done for his own personal or political advantage, and to have in view simply the suitability and fitness of a site he would do a good thing for the militia, for his own department and for himself as an administrator in that department. I have heard of so many cases of wrong selection that have taken place, not only with respect to military sites, but also with respect to post offices, and public building sites, that I think we are surely old enough, wise enough and strong enough to select these sites simply because of adaptability and suitability for the purpose for which they are intended. I am quite sure that the Deputy Minister of Militia, if he were left to himself, would prefer this. A deputy has no political leanings. He has no business to permit the least iota of a tinge of partisanship or political bias to influence his discharge of the duties of his office. If any political considerations are to be regarded that is the duty of the minister and not of the deputy minister, and you have the most useful deputy minister when you leave him entirely free from the trammel of partisanship or political bias. I am quite sure that if the Deputy Minister of Militia were left free to exercise his judgment he would make these selections perfectly well, honestly and fairly. Let us eliminate a little of this small partisanship and have these sites selected on the ground of suitability for the prupose.

Sir FREDERICK BORDEN. I endorse every word that my hon. friend has said. While I am not going to admit—I do not think it would be correct to make an admission—that in this particular case any improper act is done.

Mr. FOSTER. We do not want any admissions.

Sir FREDERICK BORDEN. Still I believe in the selection of sites for public buildings perhaps, both under former administrations and under this administration. too much attention has been paid to political influences. I think that the establishment of the Militia Council will enable the minister, who is genuinely anxious to act in the interest of the public, to act independently and properly and fairly. One of my objects in desiring the establishment of this Council was to be relieved, as far as possible, of any influence, political, social or otherwise, which might be used against the public interest in coming to a determination as to the selection of sites or otherwise. I am glad to know that my hon. friend takes the view he does and I hope he will stand by me in the independent carrying out of this idea.

Mr. FOSTER. It will be a great wrench to stand by you, but I will do it on this, sure.

Mr. SAM. HUGHES. When these military properties are taken over by the department, under the control of which of these officers will they come?

Sir FREDERICK BORDEN. The Quarter Master General.

Mr. SAM. HUGHES. Then, why not make him the responsible officer for selecting the sites?

Sir FREDERICK BORDEN. He has been. Because a certain duty has been allotted to a certain officer as being more properly within his scope, it does not follow that he has absolute control. As a matter of fact, all these things come before the Council, and in the future no selection of a drill site or a rifle range site will be made without the question being submitted to the Council.

Mr. OSLER. If I am in order in referring to the grounds which have been allotted to the Ross Rifle Company, I would like to state that about the end of November last, I was in Quebec with a number of visitors who were strangers to the place. We walked out to the Plains of Abraham, and as we did so the first thing that attracted our attention, and that was in evidence more than anything else, was an immense water tank erected on the top of one of the old Martello towers, the legs being driven through the tower, and the water tank standing sixty or seventy feet in the air, the one hideous thing on the landscape. If there was no sentiment about the place, it would be ugly enough; but the rifle buildings themselves are about as ugly as they can be, and a little further on this hideous water tower. It looks as if there were some sort of plan to destroy all the beauty and interest in the Plains of Abraham or the approach to them. I may say that the gentlemen who were with me, some of them on their first visit to Quebec, came away with the feeling that their visit had been spoiled because of the absolute want of appreciation by the people of Canada of the place and its suroundings. Surely it is not necessary to have such a hideous eye-sore erected there to ruffle the feelings of everybody who goes to look at that historic place.

Sir FREDERICK BORDEN. I am very sorry that my hon. friend's aesthetic taste and poetic feelings and those of his friends have been shocked in this rude manner. I have not seen the water tank, so far as I remember, but it is true that permission was given to Sir Charles Ross to place a tank in that Martello tower in order to enable him to protect his factory against fire. I did not understand that the structure was to be one so hideous and disagreeable in appearance, or I certainly should have insisted on some precaution being taken against that. I understood that it would not be visible from the outside at all.

Mr. OSLER. Why, the legs are through the roof of the tower, and there is an erection sixty or seventy feet high, the ugliest possible mercantile tank put on top of it. If that does not destroy the view, you might just as well suggest that a tank should be put on the top of St. Paul's Cathedral or the Tower of London, and not do damage to the surroundings. This is sentiment, it is true, but sentiment surely has something to do with the things of this world; and I can tell the minister that, little sentiment as he appears to have, if he goes down to Quebec and looks at that object, he will certainly order it to be taken down. Not a visitor will go to the Plains of Abraham who will not curse the man who put it up. It is so hideous and such an eyesore that I wonder that the citizens of Quebec have not torn it down.

Sir FREDERICK BORDEN. We felt that it was a very desirable thing to have an industry such as that established by the Ross Company.

Mr. OSLER. I agree with that, but I do not think it should be put there.

Sir FREDERICK BORDEN. And even if a Martello tower has been a little disfigured, I think we shall have to try to put up with it. But as my hon. friend has referred to the matter, I will see if we cannot induce the Ross Company to make some changes. They might perhaps put the legs out of sight. Now, I want to finish reading these regulations :

The accountant of the Department of Militia and Defence, as finance member, shall be charged with :—

1. The consideration and compilation in concert with the various branches concerned, of the annual estimates for militia services.

2. The review of contracts and administration of the Militia Accountant's Branches.

3. General consideration of the cost of the militia.

4. Financial advice to the several branches of the department.

5. Audit of military accounts.

The minister further recommends that the distribution of duties of the officers of the headquarter's staff, approved by the Governor General in Council on the 29th October, 1903, be cancelled.

That is, briefly, the construction of the militia council. I may say that there is a regulation describing in detail the duties of these officers. I am sorry that I have not that here, but I will lay it on the table of the House at the earliest possible moment. I am sure it will give in concise language a better idea of the different duties than I can. I think I have read enough to show that we have framed a very careful constitution for this Militia Council and have included therein all the important branches necessary in the public interest for the carrying out of an efficient militia service.

Mr. FOSTER. You have these four military heads in the council and two civilian heads. You say that each one advises with the accountant in making up the estimates for the sums necessary to carry out the work assigned to him. How do you work out that system ? Will you have a separate staff under each one of these heads ?

Sir FREDERICK BORDEN. That is what has been done.

Mr. FOSTER. So that, for instance, your General Master of Ordnance will have under him a special staff to carry out his work ?

Sir FREDERICK BORDEN. Exactly.

Mr. FOSTER. What staff has the deputy minister ?

Sir FREDERICK BORDEN. He is the permanent head of the civil branch, and has his clerical staff as before.

Mr. FOSTER. Then you will need quite an addition to your working force ?

Sir FREDERICK BORDEN. No, not a very large addition. In fact, on the civil side there is no addition. On the military side there will be some additions, but not many, because we have been able to change around the officers in such a way that no very serious addition will result. The addition amounts to $8,200 for three or four officers.

Mr. FOSTER. Take the four military heads, will each one of those carry out what is assigned to him without having reference to any other head, or to the council as a consultative body ?

Sir FREDERICK BORDEN. He must go before the Council with any important question. I think that that is embodied in the regulations. It is of the first importance that the Minister in Council should have the advantage of hearing the discussions with reference to the different questions about which he may not be informed, and upon which it is absolutely necessary he should be informed. I may say, for the information of my hon. friend, that agenda are prepared a week or two ahead for the information of the Council, and are sent to every member of the Council, so that every one will know what is going to be considered at the next meeting.

Mr. SAM. HUGHES. So that, practically, the minister, in consulting these officers, is merely carrying out what he formerly did individually ?

Sir FREDERICK BORDEN. Yes.

Mr. FOSTER. It is the one mode of communicating between these officers and the minister ?

Sir FREDERICK BORDEN. Precisely.

Mr. WORTHINGTON. Where does the Director General of the Medical Service come in ?

Sir FREDERICK BORDEN. Under the Adjutant General.

Mr. WORTHINGTON. This is one of the most important branches of the service. The Director General of Medical Services should certainly be a member of that council. The health of the troops and the sanitation of military camps are of such importance that it seems only reasonable the Sergeant General or Director General of Medical Services should be a member of that council.

Sir FREDERICK BORDEN. The Council calls before it the directors of the different branches. Whenever an important question comes up on which the Council is not fully informed, those officers come before it, or they may request to be heard before it, and their request is always granted.

Mr. WORTHINGTON. Apart from that, the medical officer is entitled to a seat in that council. Proper attention is not shown to medical officers. They should have as high rank as any other except the Adjutant General.

Sir FREDERICK BORDEN. While I do not yield to my hon. friend in my respect for the importance of the profession to which both he and I belong, still we modelled our system on the British, and in the British Army Council there is no medical officer.

Mr. WORTHINGTON. The British Army Council is open to improvement.

Sir FREDERICK BORDEN. We could not put them all on. We made the best selection we could, and I think the medical service will not suffer.

Mr. TAYLOR. I have listened very patiently to the minister explaining the duties of the board. He wound up by defining the accountant's duty, and said he thought every precaution was taken to guard the public interest. I am not a military man, and am not looking at this matter from a military standpoint at all, but with the eye of a business man, and I do not see in the constitution of this board any provision for the proper laying out of the people's money in purchasing supplies. Let me just draw to the attention of the hon. minister certain items in the Auditor General's Report. Take page V—25, purchased for the Montreal harbour improvements below St. Maurice current, Portland cement, 600 barrels at $1.80. Every one who knows anything about cement knows that Portland cement is the best and most expensive we can get. Then turn up page Q—61. and you will find that the purchasing officer of the Minister of Militia, whoever he may have been, went to Mr. J. B. Jinchereau and bought 19 barrels of cement for improvements in the city of Quebec at $3 and 86 barrels at $2.50

Then he went to Mr. Larose and bought 5 barrels at $3 and 52 barrels at $2.50. Then he went to Mr. Louis Larose and bought 17 barrels at $3 and 86 barrels at $2.50. From Mr. Leon Magnan he purchased 6 barrels at $3 and 98½ barrels at $2.50. Then he went to Mr. Parent and purchased 75 barrels at $2.50 and 20 barrels at $3. From

another Mr. Parent, Pierre Parent, he purchased 35 barrels at $2.50 and 15 barrels at $3. From Mr. Renaud he bought 141 barrels at $2.50. In all, he bought 98 barrels at $3, 658 barrels at $2.50, and 237 barrels at $2.25. If he had bought all this at the rate which it could be bought in Montreal, $1.80, he would have saved the public not less than $702.05 on these few barrels of cement alone. I have brought these things to the attention of the government year after year, and still they send around in this manner buying these things and paying two prices. The cement for sale in Montreal at $1.80 was Portland cement, which as everybody knows, is the best brand manufactured. There is nothing to show what kind this other was—it may have been mere common cement and not worth half the price. Portland cement is imported and it ought to be landed at Quebec or Halifax as cheap or cheaper than at Montreal. I hope the minister, will arrange to have the supplies for the Militia Department bought under conditions of public competition, so that the public may be able to get the goods at bottom prices. This board should have a purchasing department, and let the board itself decide how these supplies should be bought in the best interests of the country. At page 67 the hon. minister will find that a bill as paid to Mr. N. E. Keefer of $3,183.56. Among the items is one for repairing roof of armouries, painting walls, &c., labourers 146 days at $3.50, and 53½ days at $3.25. and masons and slaters are paid at 45 cents an hour. It seems to me that $3.50 is a very big price for labouring men in Halifax.

Mr. FOSTER. Halifax came high all the way through—the minister knows that.

Mr. TAYLOR. Then I find at page Q-66, they charge for 32 cedar posts at $1 a piece. Unless they are carved or something of that kind I cannot understand how they cost so much. This was at Annapolis, Nova Scotia. If there were the ordinary posts that we buy at 20 cents a piece in Ontario, I do not see why they should cost so much at Annapolis. I hope the minister will take down these figures and give us an explanation of them.

Sir FREDERICK BORDEN. As to the cedar posts I have paid $1 a piece for an extra quality of post myself—a post that would square 7 inches. I shall be glad to make inquiry into the matters to which the hon. gentleman (Mr. Taylor) has called attention. As to the cement, I fancy the price varies with the time and place and also with the quantity purchased. The Auditor General must have passed this account, and I do not imagine that he would have passed it if there had been anything seriously wrong. However, as to the general question which these items are used to illustrate, I agree with the hon. gentleman that it would be a proper matter for discussion by the Militia Council. As a matter of fact, I have already mentioned the matter and it is being considered by the Council with a view to adopting a plan under which the best results in the public interest may be attained in the purchase of supplies. These purchases cannot be always made by tender, but, so far as that can be done, it ought to be done. I have brought the matter before the council, and I hope that before the session is over I shall be able to submit the plan they have adopted.

Mr. BERGERON. A few moments ago we were talking about the Plains of Abraham. Will the minister please say how many acres there are in the government's purchase, what portion of it has been leased to certain parties for a factory site and whether the rumours are true that the government intend to dispose of the whole property ?

Sir FREDERICK BORDEN. I do not think there is any truth in the rumour that the government intend to dispose of the property. I have never heard it even proposed. I am not able to give the size of this property, but I will ascertain it. The quantity leased to the Ross Company is not large—in fact not large enough; for they are asking for more.

Mr. FOSTER. Is it part of the Plains?

Mr. FITZPATRICK. It is within a few acres of the Citadel, between the Martello towers which, as the hon. gentleman is aware, are on the top of what we call Perrault's Hill, the highest point west of the city, and the citadel. We call it the Old Cove Fields.

Mr. BERGERON. What are the dimensions of the Plains ?

Mr. FITZPATRICK. I believe it has been proven that what we have hitherto considered the Plains of Abraham is not the Plains of Abraham at all. It is a mile away from the Plains of Abraham. If the hon. gentleman is acquainted with the locality, it is on the other side of the road from the parliament buildings, behind a block of houses, about two acres to the west on the other side of St. Louis Street.

Mr. FOSTER. Where is that Martello tower?

Mr. FITZPATRICK. The Martello tower is to the south, that is the one immediately over the cliff.

Mr. FOSTER. There was a disposition to laugh at my hon. friend from Toronto when he spoke about that, but I do not think it is a laughing matter at all. There are impressions that our own people get, and impressions that visitors get, that have a great influence upon our future. I think we ought to have some regard for aesthetics, and keep what we have got in

that line and treasure it particularly. Take one of those old historic landmarks about which so much has been written,and around which so many memories cluster; we find our own people visit them with the idea of history in their minds, prizing the old landmarks, and people come there from abroad with the same idea, but when they come into the actual presence of one of them they see a great big pair of legs protruding with a tank set up on top. It is an unsightly thing, and ought not to have been allowed. The factory's water tank should go somewhere else, and leave the Martello tower as one of the few landmarks we have in this country, a thing of beauty and a joy forever.

Mr. SAM. HUGHES. Would the minister please explain the relationship between the directors of the various departments and these members of the council.

Sir FREDERICK BORDEN. The Directors are assistants of the military members, they are in charge of the important subdivisions of the work of the different branches I have read. Some of the directors will have two or three subheads and some only one. For instance, in the department of the Master General of Ordnance we have engineering as one of the important branches of his department. The Director of Engineering is under him and the Director of Engineering again has officers under him. Then artillery is naturally one of the important branches of the duties of the Master General of Ordnance and under him also we have a Director of Artillery, an officer who has been in Canada for some time. That will fairly illustrate perhaps, what the duties of the directors are. Under the Quartermaster General we have the army service corps and the Director of Supplies. We have also a Director of Clothing and Equipment.

Mr. SAM. HUGHES. Is the Quartermaster General not a director ?

Sir FREDERICK BORDEN. The Quartermaster General is a member of the Council.

Mr. SAM. HUGHES. Who is the Quartermaster General ?

Sir FREDERICK BORDEN. Colonel Macdonald, he is the third military member.

Mr. WORTHINGTON. What are the duties of the Inspector General? Is he responsible to the Council or to the Minister? I understand he has sole control of the troops, subject to the minister.

Sir FREDERICK BORDEN. I will endeavour to explain it to my hon. friend. I would prefer to read the duties; as a matter of fact the duties have been prescribed and published but I have not got them under my hand. But this is the business of the Inspector General : After the general plans with reference to the control of the militia have been decided on they shall be submitted to the Inspector General, and his duty will be to carry them out, though he may act independently in accordance with his own notions. He shall make an independent inspection of all branches of the militia with reference to every one of these matters about which I have read, and to see whether the policy decided upon by the Council is being carried out. He will report to the minister and to the Militia Council with reference to what he finds. But he is absolutely free and untrammeled in every respect, except that there is placed in his hands a general scheme that has been decided upon by the Council with reference to these important matters. He has to inspect the militia and see whether the scheme is being carried out.

Mr. BERGERON. I want to ask whether there is any rule prescribing what uniform shall be worn by officers in the militia. I have sometimes had the honour to associate with some officers in Montreal, and I observed that some of them were in khaki uniform and others in the ordinary uniform of their corps. It is not a very nice sight to see them in different uniforms. Either they should all be in khaki or in the ordinary uniform. I would like to know whether an order has been given that all the Canadian militia should be dressed in khaki.

Sir FREDERICK BORDEN. There are dress regulations which are promulgated from time to time, and occasionally changed, but I think there is a very distinct rule as to the kind of mess dress which is to be worn on occasions such as the hon. gentleman refers to, public dinners or private dinners. But there are exceptions in favour of the service dress. This is a pretty serious matter. In the rural corps——

Mr. BERGERON. I am speaking of Montreal.

Sir FREDERICK BORDEN. In the city of Montreal, I think the rule is that mess dress should be worn, although there is an exception in favour of the service dress which is also permitted to be worn. In the country battalions it would be a very great hardship to insist upon the mess dress.

Mr. BERGERON. Do I understand that the officers have to pay for this uniform out of their own pockets ?

Sir FREDERICK BORDEN. Oh, yes.

Mr. BERGERON. For an outsider it is a peculiar sight. It seems to me that they should all wear the same uniforms. Men of the same regiment are not dressed alike, and I do not think it is proper.

Sir FREDERICK BORDEN. I admit that.

Mr. SAM. HUGHES. The understanding is that an officer at a function should either go in the proper uniform of his corps—that is, dress uniform—or, if it is a superior function, he should go in evening dress.

Mr. WORTHINGTON. I think one of the reasons for this mixture of uniforms to which my hon. friend (Mr. Bergeron) refers is due to the fact that he may have seen officers of the regular service in company with those of a corps of guides dressed in khaki.

Mr. BERGERON. I have seen officers of the 65th battalion, some dressed in khaki and some dressed in their ordinary uniforms. I have also seen some of the high officials there, some dressed in khaki and some in ordinary uniform.

Sir FREDERICK BORDEN. Staff officers ?

Mr. BERGERON. Staff officers ; and the result is that one who is not very well posted is at a loss to know what their rank is.

Sir FREDERICK BORDEN. Well, I think that is undesirable.

Mr. SAM. HUGHES. At the same time, I would be sorry to see an officer obliged to go to the cost of providing himself with mess uniform. A young officer, a young chap with a small salary, perhaps not more than enough to keep him, should not be obliged to go to the expense of purchasing an expensive mess uniform. He should go to a function in evening dress.

Mr. BERGERON. That would be all right if they were all on the same footing.

Mr. SAM. HUGHES. When a regimental function takes place, and the officer in command of the regiment has not all his officers properly uniformed, the custom is for them to wear undress uniforms, so that all will be alike.

Mr. BERGERON. If that were the rule, it would put an end to any difficulty in regard to the matter.

Military survey, $20,000.

Mr. SAM. HUGHES. This is reduced from last year. In this connection, I would like to ask the hon. minister who does the chartography for the Department of Militia?

Sir FREDERICK BORDEN. Mr. Anderson is one of them.

Mr. SAM. HUGHES. I mean the map printing. The Department of Militia and Defence wants maps, the Department of Public Works wants maps, and each of the departments requires maps. There is no uniform system in the whole business. Would it not be a good plan for the Militia Department, or the Interior Department, whichever would have the better right to do so, to establish a map department and have all the maps of the country constructed at the one place ?

Sir FREDERICK BORDEN. I think so. I think it would be probably the most convenient if that work were done under the Surveyor General, and I have suggested to my hon. colleague, the Minister of the Interior (Mr. Sifton), that we should take the matter up some time, form a sub-committee of council and see what can be done. He agrees with me. But, in the meantime, this money is not being wasted. This is special work that is absolutely required by the Militia Department.

Mr. SAM. HUGHES. I understand it, but I do not think the committee understands what it means. Will the hon. minister explain to the committee how this money is expended ?

Sir FREDERICK BORDEN. This is for a topographical survey of the country along the frontier and at various parts. It is not desirable, perhaps, to describe exactly where the work is done.

Mr. FOSTER. Does this work proceed in consecutive order, so as to cover the whole ?

Sir FREDERICK BORDEN. Yes. We began it in connection with the Royal Military College. We utilized some of the professors there; and the young men there, in connection with their education, find it a great advantage to them to be given a certain amount of work to do in their vacation. We have, of course, had to pay them. Since the establishment of the Intelligence Branch here the work has become more important. We have really taken it over here and have appointed several officers, mostly Royal Military College graduates, to go on with the work under the direction of the Director of Military Intelligence.

Mr. FOSTER. When once done it is really completed ?

Sir FREDERICK BORDEN. Absolutely.

Mr. FOSTER. It stands good for all time ?

Sir FREDERICK BORDEN. For all time. Every road, every hill, every building is charted, and new buildings can be added.

Mr. FOSTER. Yes ; but the topographical part of it ?

Sir FREDERICK BORDEN. Yes. The closing of a road or the opening of a new road would be placed on record, but the work is performed for all time.

Mr. SAM. HUGHES. Is there any object in reducing the grant ? I would like to see that part of the work kept right straight to the line.

Sir FREDERICK BORDEN. We had to purchase certain instruments last year which we do not have to purchase over again, and that is the reason for the reduction.

Mr. FOSTER. The hon. minister will not be able to get through much more to-night.

Sir FREDERICK BORDEN. I thought possibly we might take some of these items in view of the arrangement. We have a rule that on an item to be agreed upon, and which I will suggest shall be the large item of $1,300,000, the whole question of the militia from beginning to end shall be absolutely open for discussion.

Mr. FOSTER. Yes; the general question.

Sir FREDERICK BORDEN. The general question, and any details that any hon. gentleman may wish to speak of. We might dispose of a few more items.

Mr. FOSTER. We will go on with the 'annual drill.'

Annual drill, $600,000.

Mr. FOSTER. This is exactly the same sum as was voted last year?

Sir FREDERICK BORDEN. Yes.

Mr. SAM. HUGHES. Is it the intention that any part of this sum shall be expended for drill at the central camp, and will the hon. minister explain the central camp idea, or will that come up under another item?

Sir FREDERICK BORDEN. No, I think it would perhaps be better to leave that, because it is important.

Mr. SAM. HUGHES. All right.

Sir FREDERICK BORDEN. The item is the same as last year.

Mr. SAM. HUGHES. And for the same purpose?

Sir FREDERICK BORDEN. Yes.

Mr. FOSTER. Have you raised the pay of the force?

Sir FREDERICK BORDEN. Yes.

Mr. FOSTER. What is the pay of the force now?

Sir FREDERICK BORDEN. The pay has been raised from fifty cents to a dollar a day. For the first year it is fifty cents plus twenty cents, for the second year seventy-five cents plus fifteen cents, making eighty-five cents, and for the third year a dollar. We do not treat it as pay. The pay is really fifty cents, but proficiency and good conduct pay is given to every man who behaves himself well in camp, and this system has worked admirably. I am told that last year's camps were the best camps ever held.

Mr. FOSTER. What is the length of drill?

Sir FREDERICK BORDEN. Twelve days.

Mr. FOSTER. Does that include going and coming?

Sir FREDERICK BORDEN. Yes.

Mr. FOSTER. So that the actual drill—

Sir FREDERICK BORDEN—is about ten or eleven days according to the distance. Some corps get in in part of a day and others take a full day.

Mr. FOSTER. It is not very long.

Sir FREDERICK BORDEN. No, it is probably not long enough.

Mr. WORTHINGTON. In connection with the establishment of a central camp I would like to ask the minister whether it is the intention to do away with the local camp?

Sir FREDERICK BORDEN. No.

Mr. WORTHINGTON. Will the camps be maintained in the same old places, or will new camps be selected this year?

Sir FREDERICK BORDEN. I think it is very desirable that the camps should be held in the same places. If we secure good places I think we ought to stick to them. Sometimes it is necessary to change for good reasons, but ordinarily I think we should stick to the same ground.

Mr. FOSTER. How many does this drill?

Sir FREDERICK BORDEN. Including the city corps, something like 40,000.

Mr. FOSTER. This includes the city corps?

Sir FREDERICK BORDEN. Yes.

Mr. WORTHINGTON. The reason I asked about the camps is that I would think it very desirable, especially where cavalry form the main branch of the service, as for example in the Eastern Townships, where we have the Eastern Townships Cavalry Brigade, to have the drill take place near the local headquarters. For several years back these mounted corps have been entrained at the different headquarters and taken by various trains down to Doucet's Landing, put on the ferry and taken across to Three Rivers, and the cost of transport for these mounted infantry corps is far greater than the cost of their whole term in camp. I think it would be far better to have these cavalry regiments drill in the country to which they belong. In the Eastern Townships we are right on the frontier and it is very essential that these men should know the country which they are expected to defend, know the railroads, and rivers and bridges and for that reason I think it would be far better for them to drill in their own districts. Those who do not live in the immediate vicinity of the camp grounds could march into camp instead of being entrained. No corps there would be far enough away to necessitate entraining in order to get to camp, and a day's march coming in and going out would

be very instructive on account of the route march, and the possible bivouacking and camping and the stops for meals and feed. This is a very essential part of the training. For instance in connection with the Eastern Township Cavalry Brigade, I think it essential that a camp should be held at a central point, say the headquarters of the brigade, Sherbrooke, which is right on the frontier. A number of very important railroads centre there, while there are many railroads within from 12 to 30 miles of that place, all along the frontier, which these men should know and be able to protect in case of actual warfare.

Sir FREDERICK BORDEN. No doubt there is considerable force in what my hon. friend says, but at the same time I would point out to him that in case of active service the cavalry would be serving with infantry and artillery, and it is desirable I think, to bring the different arms of the service together in the camps, so that they may understand in some degree at least the relationship which they bear to each other in active service. As to my hon. friend's statement with reference to the cost of going to Three Rivers, he is altogether at sea in stating that the cost of transportation is greater than the full cost of the camp. It is really nothing of the kind, as I can show him at any time. Three Rivers was selected some time ago, very largely owing to the fact that an outbreak of smallpox had occurred among the Indians at La Prairie, where we had been holding a camp for some years. The Director General of Medical Affairs reported that it was absolutely unsafe, and it meant either having no camp or finding another location. A very favourable location was offered to us at Three Rivers at a low figure; and the city of Three Rivers offered light, water and various inducements, and the camp has been held there for two or three years. Last year we had a camp at Laprairie and one at Three Rivers also. I do not know where the camp will be held this year, but I am sure the Council will give every consideration to the question.

Mr. WORTHINGTON. Why were the cavalry drilled last year at Laprairie and the infanty at Three Rivers if it is so essential that the various branches be drilled together ?

Sir FREDERICK BORDEN. Does my hon. friend deny that it is essential to have the different branches of the service drilled together ?

Mr. WORTHINGTON. No, I think it is very essential that they should be drilled together, but there is no place at Three Rivers where artillery can be drilled or where you can manoeuvre cavalry.

Mr. SAM. HUGHES. The minister has not given definite information with regard to the pay of officers. I am inclined to find fault with the small increase of pay he has given to officers as compared with the increases to non-coms. What is the pay of officers of the ordinary active militia ?

Sir FREDERICK BORDEN. There has been very little increase ; I think some slight increase.

Mr. FOSTER. The officers have the glory.

Sir FREDERICK BORDEN. The lieutenant-colonel has a slight increase to $5 a day.

Mr. FOSTER. $5 a day? That is princely.

Sir FREDERICK BORDEN. A major, $4, a captain adjutant or quartermaster, $3 ; that is an increase; lieutenants, $2 ; that is a decided increase, the old pay being, I think about $1.25. Medical officers are paid according to rank ; veterinary officers, $3 ; paymasters, $3 ; regimental sergeant major, $1.25 ; quartermaster sergeants, $1 ; sergeants, 90 cents ; band masters, $1.25 ; company sergeants, 85 cents ; corporals, 60 cents, bombardiers, 60 cents ; lance corporals, 60 cents ; privates, 50 cents, plus of course the good conduct bonus.

Mr. SAM. HUGHES. Take a non-com. getting $1.25 or $1.50 with the addition of the good conduct money and it puts him almost up to the second lieutenant.

Mr. FOWLER. He has the glory.

Mr. FOSTER. Do they use military bands amongst the Japanese ?

Sir FREDERICK BORDEN. I think so.

Mr. SAM. HUGHES. They use 'banzai.' They are great fighters.

Sir FREDERICK BORDEN. They evidently pipe it up fairly well.

Mr. SAM. HUGHES. At all events I hope the minister will not cut off the bands of any of the corps ; they tried it one year and it was a great mistake. There is nothing like the music.

Sir FREDERICK BORDEN. That is right.

Grants to rifle and artillery associations, $60,000.

Sir FREDERICK BORDEN. There is an increase of $10,000 in this vote, in view of the increased interest taken in rifle shooting.

Mr. FOWLER. Is there an increase in the number of rifle clubs?

Sir FREDERICK BORDEN. Yes. I am not able to give the number, but I will have that information.

Mr. FOWLER. I would like the minister to show the distinction between the civil and the military clubs?

Sir FREDERICK BORDEN. I will do that.

Mr. SAM. HUGHES. Has the minister taken any steps to establish miniature or sub-target ranges?

Sir FREDERICK BORDEN. That is being done to some extent.

Dominion Arsenal, $150,000.

Mr. FOWLER. Is there more than one factory now?

Sir FREDERICK BORDEN. No, only one.

Mr. FOWLER. Is it the intention of the minister to establish another?

Sir FREDERICK BORDEN. Yes.

Mr. FOWLER. How soon?

Sir FREDERICK BORDEN. I hope before very long. I explained last year, and I think something was said about it the year before, that there were some people in this country and in England—they have taken out articles of incorporation since—interested in the establishment of a factory for the manufacture of ammunition ; and a condition will be imposed by the government that in case this is done, they shall manufacture in this country all the explosives necessary to be used for the manufacture of ammunition, both in their factory and in the government factory at Quebec. The matter is taking shape, and I hope before the end of the session to be able to lay on the table further information with reference to it, and possibly a contract.

Mr. FOWLER. Then, do I understand that it would be the intention of the government to abandon the manufacture ?

Sir FREDERICK BORDEN. Not at all. We want to have more factories for the manufacture of ammunition. Practically the only factory in Canada now is in the government arsenal at Quebec. It is desirable that ammunition should be manufactured at several points, certainly somewhere in the vicinity of Ottawa. I think it is equally desirable that we should manufacture in Canada all the explosives that are used now, in our factory at Quebec, which are at present imported. I would not propose to give a contract to any company for the manufacture of ammunition which would not also undertake to manufacture explosives.

Mr. FOWLER. In my opinion it is inadvisable to hand over the manufacture of ammunition to any private company. I think the ammunition should be manufactured by the government itself.

Mr. SAM. HUGHES. That is not done in England.

Mr. FOWLER. I do not care what is done in England; that is not necessarily a precedent for us. I think the ammunition should be manufactured solely by the government itself, so as to guard against the danger of its being faulty.

Sir FREDERICK BORDEN. I am afraid that would be a pretty expensive operation, and I have felt that it would be an advantage to encourage a private company to manufacture ammunition as a sort of check upon our own factory. That is what is done in the United States as well as in England. The government manufactures a part and the trade manufactures a part, and one is a sort of check on the other. The present seems to me a favourable moment for encouraging the manufacture of explosives in this country, when we are about to enter upon the construction of railways, perhaps to a greater extent than ever before, and large quantities of explosives will be required ; and it is a moment when private capital may be induced to go into the venture. But I can assure you that I have had very great difficulty in satisfying private capital that there will be any money in going into the manufacture of explosives for government use only, it would be such a very small quantity.

Mr. FOWLER. It might not be a bad idea to establsh these powder factories in connection with the penitentiaries. In case anything happened, the loss of life would not be so important.

Sir FREDERICK BORDEN. That would be better than manufacturing binder twine.

Mr. FOSTER. When the minister brings down his budget of information, there is some information which I would like, and which probably the country would like as well. I would like to know just about what is the military equipment of Canada to-day —how many drilled militia we have, how many rifles we have for them, what stores of ammunition, what large guns, what fortifications, if any, looking towards the protection of our sea-board cities, we have. That indicates the kind of information I would like to get so far as it can be given without injuring our strategical position. I want to say this, that if we are pretty naked, as I think we are, I think it would not do much harm to confess that we are, and let outsiders see simply our brawny arms, provided we make up our minds to do better things and put ourselves in a stronger position. I think we are living on rather slender resources for the defence of this country, and if our people understood the exact position we are in, you might find a larger number ready to support any measures necessary to be taken for the proper defence and equipment of the country.

Sir FREDERICK BORDEN. I am very glad to find my hon. friend taking a greater interest in matters of this kind than perhaps any of us took a few years ago. I might

point out that there is some information which can be given out, but other information with regard to guns and rifles or location of ammunition which I think it undesirable to give. I would suggest that a committee of hon. gentlemen from both sides might meet me or the Council and learn exactly what the conditions are. If my hon. friend who leads the opposition will consider that suggestion I shall be very glad to have a number of gentlemen who take an interest in the matter meet the council and get all the information that can be afforded.

Mr. FOSTER. That is a good idea. You have to get the people to acknowledge that there is a want before you get their support.

Mr. INGRAM. If that suggestion were carried out it would mean that those composing the committee would be bound to secrecy and we could not take any advantage from a conference of that kind. There was a good deal of difference of opinion expressed last year on this point and regarding the publication of the Major General's report. Many military men, including the major general himself, thought that the report should have been submitted to the House in order that the members might know what an officer of the high character and ability of Lord Dundonald considered necessary for the defence of the country. Was any portion of the $110,000 voted for defences at Esquimalt paid the British authorities ?

Sir FREDERICK BORDEN. The whole of it was paid to the British authorities. There is an arrangement between the British government and this government with reference to payments for the expense of defending Esquimalt. Under that arrangement we divide the expenditure. The British government has charge of it and employs its own men very largely except during the annual camp once a year, and we reimburse it one half the expense.

Mr. INGRAM. I understood that a year or two ago our share was $35,000. Has it increased?

Sir FREDERICK BORDEN. A new arrangement was made three or four years ago and laid on the table, under which we pay half the costs.

Mr. INGRAM. This is every dollar that Canada contributes to the defense of the country from an Imperial point of view?

Sir FREDERICK BORDEN. No ; the Canadian government has paid considerable money for the purchase of sites for large guns. We paid $25,000 last year. That was a part of the agreement. We buy all the land necessary for the mounting of the necessary guns for defence.

Mr. INGRAM. Has not some change taken place at Halifax also in the last year?

Sir F. W. BORDEN.

Sir FREDERICK BORDEN. According to the newspapers changes have taken place, but up to the present this government has received no official notice whatever with reference to Halifax.

Some resolutions reported.

On motion of Sir William Mulock, House adjourned as 10.30 p.m.

HOUSE OF COMMONS.

THURSDAY, February 2, 1905.

The SPEAKER took the Chair at Three o'clock.

PRIVATE BILLS—EXTENSION OF TIME.

Mr. GEO. D. GRANT moved :

That in accord with the recommendation contained in the report of the Select Committee on Standing Orders, the time for receiving petitions for Private Bills and also the time for presenting Private Bills be extended to Thursday, February 23rd, and Thursday, March 9th, respectively.

Mr. T. S. SPROULE. So as to elicit an expression of opinion from the right hon. the First Minister, I would point out that the rule providing that petitions for Private Bills shall be presented within a certain time was intended to facilitate the work of the session. If that time be too short, we should amend the rule and give a longer time, but the judgment of the House was that the time limit provided was sufficient. This rule, however, seems to be more honoured in the breach than in the observance, and last session I drew attention to that fact on several occasions. I pointed out that we might as well have no rule as one which we did not follow, and I think the House should either decide to amend the rule or insist on its being observed.

Rt. Hon. Sir WILFRID LAURIER (Prime Minister). It is quite true that my hon. friend from Grey has more than once called the attention of the House, and my own in particular, to the fact that the rule in question has been systematically violated. But I do not think that my hon. friend himself ever objected to this first request, which is invariably made, to have the rule extended. Since I have been in parliament it has been the constant practice to allow one extension at least ; but of late years this permission has been extended unduly, and last session we had the Committee on Standing Orders reporting in favour of an extension of time, not only once, but three or four times. But according to practice, this first extension is granted at once.

Mr. SPROULE. I do not object to this one.

Sir WILFRID LAURIER. The Committee on Standing Orders should take notice, however, that the rule will not be extended any further. Of course, there may be exceptions, but if so, each application should stand on its own merits, and only be granted on special grounds. My hon. friend from Grey suggests that the rule should be amended. Perhaps we may have to revise, not only this, but several rules. For instance, we have a standing rule, which is never observed, fixing the recess for dinner from six to seven thirty p.m. By tacit consent, however, we have always extended that recess till eight o'clock. In the present instance, I am glad to see that my hon. friend from Grey agrees with me that there can be no objection to granting this extension, but that henceforth we should refuse all such applications.

Mr. W. F. MACLEAN. I cannot quite agree with what has been said by either of the hon. gentlemen. Parliament is here to serve the people, and the people should have all reasonable accommodation in getting the legislation they desire. We are not here to tell the public, you must do this at such a time or you cannot have what you want; but we ought to afford every reasonable facility to the public for getting the legislation they desire. There may be some very large interests desirous of obtaining legislation; they may not be able to give the necessary notice, and I think we would be meeting the public convenience by receiving the Bills. I agree with the opinion that an explanation ought to be given, but I still think that it is a good doctrine that we ought to try and accommodate the public in so far as we can in giving them the legislation they may require; we ought to accommodate them at least to that extent.

Right Hon. Sir WILFRID LAURIER (Prime Minister). Certainly we ought to try and accommodate the public, but according to the British constitution, and I think also according to common sense, the public is better accommodated when there are rules surrounding that accommodation and which the public need to understand. But my hon. friend is a reformer, and perhaps he wants to accommodate the public without any rules at all. Perhaps he is in favour of some of those corporations who are generally suitors for private legislation.

Mr. W. F. MACLEAN. The right hon. gentleman (Sir Wilfrid Laurier) mistakes my point. The sessions are increasing in length, they are now four or five months long, and sometimes six months. There is no reason why these rules should not be liberalized—but, of course, the right hon. gentleman is always in favour of restriction.

Mr. URIAH WILSON. The reason of the committee asking for this is this. The secretary of the committee said that the Senate had extended the time to February 23 to receive Petitions and one week longer to receive Bills and if we did not extend the time, all the petitions would go to the Standing Orders Committee of the Senate and none of them to the Commons committee, that is the reason why the committee unanimously recommended this to the House.

Hon. GEO. E. FOSTER. So much for the discussion on the present subject. But there was one remark dropped by my right hon. friend to which I wish to refer. He intimates that by common consent it has come to be the practice in this House not to assemble after recess until eight o'clock in the evening. If that is so, I am sorry that it is so. I think we lose half an hour of very valuable time. For my part I would much rather meet here at half past seven, which is according to the rules, and leave half an hour earlier, if either end is to be sacrificed. Last night we came here when very important estimates were up; there was one minister ready to take his place and go on with his estimates. After a while another minister straggled in; but for quite a while there was scarcely any gentlemen on the other side at all. I am sorry to say that our own side was sparse as well. But the government side is the side that ought to set a good example. I do not think it speaks well to the country when the important business of criticising and passing the estimates for the expenditure come up, that we should not on both sides show our own interest in the disposal of public business by being present. We were here last night, and it was a quarter past eight, or nearly so, before we got to work.

Sir WILFRID LAURIER. Oh, no.

Mr. FOSTER. It was after eight, and it seems to me we ought to get to work at half past seven. There is quite enough time from six o'clock to half past seven to eat what should be ate at a meal for an ordinary man.

CRIMINAL CODE—AMENDMENT.

Mr. D. W. BOLE (Winnipeg) moved to introduce a Bill (No. 23) to amend the provisions of the Criminal Code of Canada, 1902, with respect to common bawdy houses.

Some hon. MEMBERS. Explain.

Mr. BOLE. My reason for introducing this Bill is owing to the fact that a decision of the courts of Manitoba holds that disorderly houses kept by one woman are not liable under the provisions of the Act. The amendment is intended to make houses of this character kept by one woman or more amenable to law and order. The necessity of this amendment is demonstrated in the city of Winnipeg, which I have the honour to represent. In that city disreputable houses conducted by one woman have been established on some of our best streets, and the

good citizens have in some cases found it necessary to take the law in their own hands, by smashing windows and doors in their effort to suppress such nuisances.

Motion agreed to, and Bill read the first time.

QUESTIONS.

W. T. R. PRESTON, IMMIGRATION COMMISSIONER.

Mr. URIAH WILSON asked :

1. What was the object of the visit to Canada in the month of October last of Mr. W. T. R. Preston, emigration commissioner in Great Britain ?
2. Was Mr. Preston sent for by the government, or any member thereof, or did he come on his own initiative ?
3. Is it true that there has been any friction between officials in the High Commissioner's office in London and Mr. Preston ?
4. Have any complaints been made to the government, or any member thereof, or to any of the deputy ministers at Ottawa, or officials of the Department of the Interior, that Mr. Preston has been unduly interfering in the work of the High Commissioner's office.
5. Has Mr. Preston any jurisdiction over any of the staff in the High Commissioner's office, or do his duties confine him solely to immigration work ?

Right Hon. Sir WILFRID LAURIER (Prime Minister). Mr. W. T. R. Preston did not visit Canada in the month of October last, but in the month of November. He arrived here about November 17, and came by permission of the Minister of the Interior (Hon. C. Sifton) in order to discuss with him private matters connected with the Department of Immigration. There has been no friction, so far as the government is informed, between the officers of the High Commissioner's office and Mr. Preston, and no complaints have been made to that effect to any member of the government, so far as I know, nor to any other minister. Mr. Preston has no jurisdiction over any members of the staff in the High Commissioner's office, and his duties are confined to immigration work.

I. C. R.—FUEL INSPECTOR.

Mr. FOSTER asked :

1. At what time was the position of fuel inspector on the Intercolonial created ?
2. What are the duties of such officer ?
3. Who holds the position at present, when was he appointed, and what is his remuneration ?

Hon. H. R. EMMERSON (Minister of Railways and Canals):

1. April 1891.

2. To supervise delivery of coal to locomotives, to inspect it on locomotives while in actual service generating steam and to formulate methods for burning the various sorts of coal supplied so as to produce the greatest efficiency.

3. M. C. Lockhart. Appointed July 5, 1904. Salary $75 per month.

CUTTING TIMBER ON BADGLEY ISLAND.

Mr. FOSTER asked :

Has the Department of Indian Affairs granted permits or licenses to any person or persons to cut timber on Badgley island, north shore of Georgian bay, during the year 1904 or 1905 ? If so, to whom, and to what extent ?

Right Hon. Sir WILFRID LAURIER (Prime Minister) :

No permits or licenses have been granted by the Department of Indian Affairs to any person or persons to cut timber on Badgley island, north shore of Georgian bay, during the year 1904 or 1905.

DAVID ROUSE, CUSTOMS OFFICER.

Mr. URIAH WILSON asked :

1. Upon what date did David Rouse receive his appointment as customs officer at the village of Bath, in the counties of Lennox and Addington ?
2. What salary did he receive when he received the appointment ?
3. Has his salary been increased since that date, and when ?
4. What is his present salary ?
5. What have been the collections at the Bath customs office per year since the year 1896 ?

Hon. WM. PATERSON (Minister of Customs):

1 and 2. David Rouse was installed into office as acting sub-collector of customs at Bath on May 18, 1898, at a salary of $150 a year on appointment in place of John Hogle, deceased, who had been receiving a salary of $450 a year.

3. Mr. Rouse's salary was increased to $400, a year from July 1, 1900.

4. His present salary is $400 a year.

5. The customs collections at Bath for the eight years from July 1, 1896, to July 1, 1904, were $362.73.

SALARY OF W. T. R. PRESTON.

Mr. MONK asked :

1. What is the present salary of W. T. R. Preston, engaged in immigration work by the government in Europe ?
2. What amount has been paid to said Preston on account of travelling or other expenses during the past year ?
3. Where is he at present, and what work is he now engaged upon ?
4. What is the date of his last report to the Department of the Interior ?
5. How many reports has he made during the past year ?

Right Hon. Sir WILFRID LAURIER (Prime Minister) :

1. $3,000 per annum.

2. $679.49 for the 11 months ended November 30, 1904.

3. In London, England, discharging the duties of Commissioner of Immigration for

Canada, with supervision over all agencies in the British Isles and on the continent of Europe.

4. June 30, 1904.

5. One, covering fiscal year 1903-4. This is now being printed.

EMPLOYMENT OF EXTRA MEN ON WELLAND CANAL.

Mr. LANCASTER asked :

1. How many extra men were employed on the Welland canal during the months of September, October and November, 1904 ?

2. At whose request and on whose recommendation were these men placed at work ?

3. What was the nature of their employment, and at what locks or weirs, or on what parts of the canals were they employed ?

4. What was their remuneration per day ?

5. When were they discharged, and why ?

Hon. H. R. EMMERSON (Minister of Railways and Canals):

1. September, 25 men; October, 74 men ; November, 42 men.

2. The superintending engineer required the men, and they were employed on the recommendation of those in whom the department had confidence.

3. General repairs, ditching in Humberstone and along the Feeder, locks 12, 15 and 16. Setting steel poles and building transformer in connection with the electric light plant.

4. $1.50 per day.

5. Some were discharged at end of October and some on December 1 last. Work at which they were employed being completed.

REPORT PRESENTED.

Annual report of the Department of the Interior for the year ending June 30, 1904. —Sir Wilfrid Laurier.

REPRESENTATION OF THE YUKON.

Mr. W. B. NORTHRUP (East Hastings). Before the Orders of the Day are called, I would like to ask the right hon. leader of the government (Sir Wilfrid Laurier) if the government has any information to lay before the House as to the cause of the non-gazetting of the return of the member lately elected in the Yukon ? I understand that in the election in the Yukon, held on December 16 last, Dr. Thompson is said to be elected. The return has not yet been gazetted and the House, I believe, has no information as to whether any return has been made. I would suggest that, particularly at this time, when a Bill to provide for the autonomy of the Territories is about to be brought before parliament, it is important that the Yukon should be represented. It would seem that, if any person is to blame for the delay, the sooner that is discovered the better.

Hon. CHARLES FITZPATRICK (Minister of Justice). The question of the return of the member elected for the Yukon came under the notice of the Secretary of State, who made inquiry as to the reason why the regular return had not been made. He was informed by telegram from the Yukon that February 7 had been fixed by the returning officer as the day for the declaration of the result of the election. The Secretary of State, not having any authority to interfere, sent a telegram to press upon the returning officer the importance of settling the matter at once, so that the hon. gentleman who had been elected might take his seat at the earliest possible moment.

Mr. FOSTER. When was the writ returnable?

Mr. FITZPATRICK. I have not that date in mind at the moment. I thought the question of this return would come up, and had a full statement concerning it, but, unfortunately, I did not bring the papers with me. I shall be prepared to make a full statement to-morrow.

Mr. FOSTER. It seems a long wait for this return.

Mr. FITZPATRICK. It does seem rather peculiar. I have made inquiry myself and I find that under the Yukon Representation Act there are certain provisions of the Dominion Elections Act that are not made applicable to the Yukon, and that, strictly speaking, the returning officer was within his rights in fixing February 7, as the day for making his declaration. Still, the delay is unusual, and he has been asked to make an explanation.

Mr. FOSTER. Who is the returning officer?

Mr. FITZPATRICK. I do not remember the name. But I will have the papers with me to-morrow and will be ready to make a full statement.

BRITISH EMBARGO ON CANADIAN CATTLE.

Mr. HAUGHTON LENNOX (South Simcoe). I desire to call the attention of the government to an item appearing in the Montreal 'Daily Star' in reference to the embargo on Canadian cattle. And, as this is a matter in which every hon. member is interested, and one that effects very deeply the interests of the country, I will take the liberty of reading a few lines. In the special cable correspondence dated February 1, is the following :—

Hon. Henry Chaplin, ex-Minister of Agriculture, started yesterday at Oakham a campaign in the rural constituencies against re-opening British ports to Canadian store cattle. He hotly denounced Sir Henry Campbell-Bannerman for so trifling with the heavy responsibilities which may soon be his as a minister of the crown by favouring the re-exposure of British herds to the risk of disease after the enormous trouble and expense of stamping it

out. If the Canadian store cattle are readmitted, British agriculturists would again find their herds decimated by disease. The removal of the embargo would be an act of insanity, ruinous to the British cattle feeders.

And the correspondent sums it up under the head 'Canada's Problem.'

A most interesting political situation is thus created. The question asked is 'Can the Canadian government enable Sir Henry Campbell-Bannerman to prove to parliament that the Canadian herds are absolutely free from risk of contagion from the American States ?'

I see by the press, particularly in the Toronto 'World,' the statement that the government is about to take active measures to secure the removal of the British embargo. I do not know whether that is a fact or not, but am quite aware that the government in common with members on this side of the House appreciate the importance of having that embargo removed. I submit that it is very important that the agitation now going on against the removal of the embargo should be, in some way, counteracted.

Mr. R. G. MACPHERSON (Vancouver City). I would like to ask the hon. gentleman (Mr. Lennox) if he suppressed any of the despatch he has just quoted from. We had the spectacle last year of that hon. gentleman reading a letter in the House and suppressing part of it.

Mr. LENNOX. I will, as a matter of privilege, reply to the hon. gentleman (Mr. Macpherson) at a suitable time. The public press, I hope, is open to the hon. gentleman (Mr. Macpherson), and I commend it to his consideration. The public press affords exceptional means of enlightenment, and I commend it to the hon. gentleman.

Mr. MACPHERSON. I would ask the hon. gentleman——

Some hon. MEMBERS. Order.

Mr. MACPHERSON. I would ask the hon. gentleman (Mr. Lennox) to hand the paper over to me, or to lay it on the table, so that I can see it for myself.

Hon. SYDNEY FISHER (Minister of Agriculture). The hon. gentleman (Mr. Lennox) has brought to the attention of the House a most important subject which is, apparently, to-day engaging the attention of public men in the old country. For some time past references have appeared in the British press and in the cable despatches in our own newspapers to the utterances of public men on both sides of politics on this subject in the political campaign now going on. I have watched closely the reports of these utterances.

I have felt, however, that it was not for any public men in Canada to interject into a political controversy in the old land the view of the people of Canada upon this subject—I thought that it would injure the position that Canada might occupy in the discussion of the subject with the British government when the time becomes ripe for re-opening the discussion. I may say, that, some time ago, the then Minister of Agriculture in England declared emphatically that there was no use in discussing that question, because the embargo would not be removed. That statement was called forth, I might say, by representations made by the government of Canada on this subject. We have felt, since an emphatic reply of that kind was given, that there was nothing further for us to do until an opportune occasion arose for re-opening the question. I may add that, within the last few weeks what appeared to me to be an opportune occasion for re-opening that question occurred. There was a report, apparently authentic, that the present Minister of Agriculture had declared publicly that, from his observation, the people of Canada seemed to be quite satisfied with the present condition of affairs, and that being the case there was no necessity for further discussing the matter. I took the liberty of immediately making a recommendation to His Excellency, that a despatch should be sent to the home government drawing attention to this utterance, asking if it were an official utterance, correctly reported, and pointing out that if it were, the Minister of Agriculture was labouring under a most grave misapprehension as to the condition of opinion on this question in Canada. So far no reply to that despatch has been received. The question is an important one in the interest of Canadian trade and in the interest of Canadian stock raisers and those who are in the live stock trade between Canada and the old land. I want to assure the hon. gentleman and the House that the question is one which is constantly watched on behalf of the government, and that every occasion that seems possible on which the views of the Canadian people and the interests of the Canadian trade can be furthered will be taken advantage of and has been taken advantage of.

Mr. FOSTER. I think it would be more within the comprehension of the House if the hon. minister would lay that despatch from which he has quoted on the table for the information of hon. members. No doubt we would all like to read that despatch. It is strong and eloquently expressed I have no doubt.

Mr. FISHER. I will be very happy indeed to bring a copy of that despatch down at once.

Mr. W. F. MACLEAN. Does the hon. Minister of Agriculture lay down the doctrine that it would be a good thing for Canadians to export their store cattle to England rather than fatten them here ?

Mr. FISHER. I have never laid down any doctrine on that point, but I do lay down

the doctrine that it would be in the interest of the Canadian live stock trade to have the embargo removed.

Mr. W. F. MACLEAN. Yes, but not for lean cattle.

Mr. BENNETT. As the hon. Minister of Agriculture effected a change in the United State regulations, perhaps he may be able to effect a change in the English regulations. The hon. minister took credit all over the country for having done that, claiming that he alone and not the American government had been all powerful.

Mr. FISHER. I shall be very happy if I can do so.

FLOODS AT VERDUN, QUE.

Mr. F. D. MONK (Jacques Cartier) moved :

For copies of correspondence exchanged between parties in the town of Verdun, county of Jacques Cartier, and the Montreal Harbour Board, or the Department of Marine and Fisheries, respecting protection against floods at Verdun, along the shore of the St. Lawrence River.

He said : Mr. Speaker, the object of this motion is to obtain copies of letters which have been addressed by parties in the town of Verdun near Montreal either to the harbour board of Montreal or to the government in regard to protection against floods. I may mention for the information of the House, that the town of Verdun has extended probably with greater rapidity and has developed faster than any other suburb of Montreal during the past eight years. In 1896 there were but a few houses where the town of Verdun stands to-day. The number of people residing there was so small that it was not then deemed necessary to hold a political meeting during the elections of 1896. To-day the town has a voters' list, I think, of over 1,600 names, there are four polling subdivisions, the population is large, the number of houses has increased in an extraordinary ratio, the street cars from Montreal pass through the town, has electric light, water and drainage and the place is increasing every day. Last year the town suffered a very serious reverse in the shape of an inundation caused by the rising of the St. Lawrence river during the spring freshets. The water inundated the town partly by coming into the tail race of the Montreal waterworks and overflowing the banks of the tail race. The bank is larger on the side of the city of Montreal than on the western side, that is on the side of Verdun, and the water poured in there in a single night in great quantities. It also came in in the ordinary way from the St. Lawrence river overflowing the banks of the river. I may mention that the damage was very considerable indeed. The protection afforded in the vicinity of Montreal against floods only extends into a part of the town of Verdun. It would be necessary, to make that protection absolutely effective, to extend the wall higher up along the river St. Lawrence for some distance along the frontage of the town of Verdun. I saw by the papers that letters had been addressed to the harbour commissioners asking them to provide protection against a recurrence of such a disastrous accident as happened last year. I think it would be a very proper thing for my hon. friend the Minister of Marine and Fisheries (Mr. Préfontaine), or the Department of Marine and Fisheries, to cause an investigation to be made by an engineer of the department, and I know of no engineer possibly who would be more competent to make that investigation than Mr. St. George who was for so long a time the engineer of the city of Montreal and who had occasion particularly to study this matter of inundations. I think it would be only justice to the people of Verdun if the hon. minister would cause an investigation to be made as to what would be the best protection to be afforded against inundations of the town from the St. Lawrence in that locality. As I read the statute, 57-58 Vic., chap. 48, which is the last Act having reference to the harbour commissioners of Montreal, it appears to me, that that part of the town of Verdun which requires protection is outside of the jurisdiction of the harbour commissioners. I may be mistaken but I find in schedule 2 of the Act that I have just referred to that the western limit of the Montreal Harbour Board's jurisdiction is at the Little River St. Pierre and the inundation was caused by the situation of the land higher up than the entry of the Little River St. Pierre. If my interpretation of the schedule is correct it would be for the Department of Marine and Fisheries itself to look into the cause of that inundation and if possible to provide a remedy, because the results of last year's inundation were disastrous in the extreme. The damage was in a certain sense incalculable. These inundations, should they recur, would prevent the development of that thriving town, and if I am correctly informed by the people who know the locality well it would be very easy for the Department of Marine and Fisheries to provide adequate protection against inundation. I may mention, sir, that during the last election, the government candidate in the county of Jacques Cartier pledged himself solemnly as a supporter of the government that this matter would receive the immediate attention of the government.

Mr. PREFONTAINE. He was not elected.

Mr. MONK. There was no condition of course, as my hon. friend will naturally suppose, in regard to that pledge. It was to be done absolutely under any circumstances whatever. People have relied upon that pledge ; in fact I did not receive at the time that support of the electors of Ver-

dun which I might have received had the circumstances been different. I think the Minister of Marine and Fisheries, (Mr. Préfontaine) will appreciate the necessity of at least causing an investigation to be made. The continuation of the protection wall along the bank of the River St. Lawrence to such a point towards the west as would prevent the possibility of inundation from the river itself would not be very expensive. I think at any rate the engineer would be fully able to inform the department on that matter. The other point where water flowed in, that is to say the bank of the tail-race of the Montreal waterworks, just where it enters the River St. Lawrence is absolutely, as I understand the statute I have already quoted, under the control of the Department of Marine, and that department may either order the city of Montreal to provide there a sufficiently high bank to the tail-race to prevent the possibility of any flow in the future, or the department may itself execute the work if it thinks fit to do so. I commend this question, which interests greatly the town of Verdun, to the attention of my hon. friend the minister (Mr. Préfontaine).

Hon. RAYMOND PREFONTAINE (Minister of Marine and Fisheries). In answer to the hon. gentleman (Mr. Monk) I may state that there will be no objection whatever to the production of the papers mentioned, and those that are not in the possession of the department shall be procured from the Harbour Commissioners of Montreal. As regards having a special report made as to the state of affairs at Verdun, I shall consider the matter seriously and consult with Mr. St. George whose name has been mentioned. I know he is a competent man to do this work, because he has been connected with all the works of flood protection in Montreal during the last ten years.

Motion agreed to.

NORTH-WEST MOUNTED POLICE ACT AMENDMENT.

Bill (No. 8) to amend the Mounted Police Act, 1894.—Sir Wilfrid Laurier—read the second time, and House went into committee thereon.

On section 1, pay of the force.

Mr. SPROULE. How will this compare with the salaries now given ?

Sir WILFRID LAURIER. At a previous stage I explained that the object of this Bill is to increase the pay of the officers by $400 and of the non-commissioned officers and constables by 25 cents a day. At present, for instance, the commissioner who has charge of the police at Regina receives $2,600. He will receive $3,000. A superintendent receives if I remember rightly $1,400 ; he will now receive $1,800. The inspectors receive $1,000 ; they will receive $1,400. I may say that this is the maximum, and it is not intended to give them that amount of increase at once. The plan we have adopted is that all officers who have been eight years in the service shall receive at once the increase of $400 ; all others will receive increases varying by $50 for each year that they have been in the service, until they reach $1,400. All those who have been eight years in the service will receive at once the increase of $400 ; those who have been seven years will receive an increase of $350 ; those who have been six years will receive $300 and those who have been one year in the service will receive an increase of $50. The same principle applies to the constables.

Mr. FOSTER. How many assistant commissioners are there ?

Sir WILFRID LAURIER. The list of officers gives 55. Thirteen officers will at once receive the $400 ; two will receive $350 each ; two will receive $300 ; five will receive $250 ; eight will receive $200 ; two will receive $150 ; eight will receive $100 ; ten will receive $50 ; five will receive nothing.

Mr. BERGERON. Who is the commissioner ?

Sir WILFRID LAURIER. Colonel Perry.

Mr. BERGERON. What has become of his predecessor, Colonel Herchmer ?

Sir WILFRID LAURIER. He was superannuated in 1901 or 1902.

Mr. BERGERON. On how much ?

Sir WILFRID LAURIER. I cannot give the exact amount, whatever the law allows him. He came under the rules of the Civil Service and received just the amount that he was legally entitled to.

Mr. BERGERON. Before or after he went to South Africa ?

Sir WILFRID LAURIER. After his return.

Mr. SPROULE. This seems to be a somewhat large increase in salary all at once. To increase a man's salary from by $400 to $2,000 is an increase of 25 per cent. It seems to me there should be some good reason for such a large increase at one time. The Premier has not given us a reason for it.

Sir WILFRID LAURIER. I have on a previous occasion given the reason for it. Last year there was an expression of opinion on both sides of the House that the police were insufficiently paid, and my impression is that even with this increase in salaries the police will not be too highly

paid. Everything has gone up in price as my hon. friend (Mr. Sproule) knows and in the west, where everything is growing very fast, the cost of living is far in excess of what it is in the east. For instance, the maximum pay of a superintendent is $100 less than that of a first-class clerk, and the maximum pay of an inspector is $100 less than that of a second-class clerk. Under these circumstances, I do not think the police are overpaid for the very important duties they perform, and in providing for them this very moderate increase I think we are simply doing what the country would expect of us.

Mr. SPROULE. Notwithstanding that, I still contend that an explanation is necessary, and it seems to me that, coming from hon. gentlemen opposite, it is doubly necessary considering the doctrine they preached years ago when in opposition, that if they came to power they would make this a cheap country to live in. Now it is a dear country to live in, and the right hon. gentleman gives that as an excuse for these increases of salary. I am not complaining of the work done by the Mounted Police, because I think they do their work very well, and are entitled to as high pay as any similar class of men in the country. But it seems to me that when the increase is not a very moderate one, or is what some would regard as an immoderate one, some special reasons ought to be given for it. Last year we increased the salaries of the civil service in Ottawa, but I do not think that in any case the increase reached the proportion of the increase now proposed for the Mounted Police, an increase of 25 per cent at one jump.

Sir WILFRID LAURIER. I am afraid that the remarks of my hon. friend will make my modesty blush. It is true we said that we expected to make Canada a cheap country to live in, but we did not then anticipate that we would do as well as we have done, or that the country would be as prosperous as it is to-day, with immigrants going into the Northwest Territories at the rate of 150,000 a year. I am sure that my hon. friend will agree with me that the conditions are very different from what they were in his time. I am surprised at the criticism of my hon. friend, and in future I shall have to resist the blandishments of hon. gentlemen on the other side of the House. Last year they asked for increases of salary. I yielded to their demands, and now I am criticised. In spite of that, I think I shall have to persist in my good intention. For instance, Colonel Perry, the commissioner of the force, who receives $2,600, is to receive $3,000, which is certainly not an exaggerated price for the services he renders to the country. An inspector, who ranks, say, with a captain, receives to-day $1,000. There are men who have been in that class for twenty years or more, and they are to receive at once $1,400, while officers appointed last year will receive an increase only of $50, while those who have been inspectors for over a year will receive $1,100, and so on until they reach the maximum of $1,400. If my hon. friend will look at the facts as they are, and forget the speeches of former years, he will agree with me that these increases are very reasonable.

Mr. OSLER. I must say that for once I thoroughly agree with the right hon. gentleman.

Sir WILFRID LAURIER. Hear, hear—for once only.

Mr. OSLER. I hope for more than once, but on this occasion at any rate. The Northwest is at the present time an exceedingly expensive country to live in. It is found by those who have business there that the salaries of almost every class of men have been raised, and the Mounted Police are certainly deserving of the most generous treatment that can be meted out to them.

Mr. W. F. MACLEAN. What is the total number of the police now

Sir WILFRID LAURIER. Six hundred in the Northwest Territories and 300 in the Yukon.

Mr. BERGERON. Was there an increase of the force last year or the year before ?

Sir WILFRID LAURIER. There was an increase of 100 men last year.

Mr. FOSTER. How is the force distributed ?

Sir WILFRID LAURIER. There are about 85 posts distributed all over the Territories, from the American frontier to the mouth of the Mackenzie river and from the Red river to the Macleod district. We have established some new posts along the route of the Canadian Northern Railway, and we have two or three posts on the Mackenzie river between Slave lake and the mouth of the river.

Mr. FOSTER. Is the force generally being diminished in the eastern portion of the country, which is the more settled and the more rapidly increasing in population, and is the augmentation of the force in the parts farther west and north ? My right hon. friend knows that in earlier times, in the eastern parts of the Northwest Territories, the number of Mounted Police at the different stations was large, and they gradually came to do almost all the duties done by constables and police in the more settled districts. Before we went out of office we were gradually withdrawing the Mounted Police from the more thickly settled districts towards the east and sending them further north and west without augmenting the total number of the force. Is this process still going on, or is the force in the eastern districts still doing what the muni-

cipalities do down here, and what the municipalities will have to do up there as population flows in ?

Sir WILFRID LAURIER. I am sorry to say that we have made very little progress in that direction, and, if I remember aright, I do not think that the progress made by the government of my hon. friend in that direction was very marked either. We have experienced the same difficulty that was experienced by our predecessors. When we have made attempts to discontinue posts in a district that is sufficiently well settled to enable the people to take care of their own protection, we have received from all parts of the district the most unanimous protests against the removal of the force. We have demonstrated to the people again and again that they must take charge of their own police, especially now, when settlement is going northward, particularly into the Saskatchewan valley, where we have been obliged to establish new posts. But I must confess that I am not satisfied with the progress that we have been able to make in that direction.

Mr. MACLEAN. Will it be possible to reduce the force in the eastern portion of the Territories when the new provinces are created ?

Sir WILFRID LAURIED. Instead of reducing the force, we shall have to increase it. According as the Territories become more settled along the American frontier, there are greater opportunities afforded for stealing horses and cattle and smuggling and in other respects violating the law. We intend increasing the pay of the force by 25 cents a day. The pay of a colour sergeant, which to-day is $1.50 will be made $1.75. The pay of the other sergeants, which is $1, will be made $1.25. The pay of a corporal will be raised from 85 cents to $1.10 a day, and of a constable from 50 cents to 75 cents. We propose to raise the pay gradually. One-third will receive an increase of 25 cents and two-thirds an increase of from 10 to 20 cents.

Mr. FOSTER. So far as the increase of pay is concerned I do not feel disposed to raise any objection. We have a splendid body of men out there, and the country has been well repaid by the services of the force for the money it has cost. I do not expect that for years to come the total of the force will be diminished. It will, on the contrary, rather be increased, at any rate until municipal institutions are firmly established and the population becomes sufficiently large to keep up these institutions. I venture to express the hope that this force will be, as it was under the late government, kept entirely free from the blight of political partisanship and administered with a sole eye to merit.

Mr. SPROULE. What is meant by the term 'unorganized portions of the North-west Territories ?' Is it that portion without provincial autonomy or municipal organization ?

Sir WILFRID LAURIER. By that is meant the Mackenzie River territory and the forts very far north, also the Hudson Bay territory. We give the men there extra pay.

Mr. MONK. Does any portion of the Mounted Police operate in Manitoba ?

Sir WILFRID LAURIER. Yes, on the southern frontier.

Mr. MACLEAN. How many men on Hudson Bay ?

Sir WILFRID LAURIER. A couple of years ago an officer and five men were sent there. I could not say how many are there now.

Mr. MONK. Is not the force at present the sole force charged with the maintenance of order in the territories not yet organized into provinces, and when that organization takes place will that not make a very considerable change in the duties of the force ? As soon as there is provincial organization there will be municipal institutions, and the duty of maintaining law and order will then devolve upon the local authorities ?

Sir WILFRID LAURIER. I must say at once that even after the territories are organized into provinces we do not see the feasibility of dispensing with the services of the force. Of course when the municipalities are organized they will have to look after their own protection, but there is still a very large Indian population in the country and a great many immigrants coming in, and we have to provide, not only against violations of the customs laws, but for the protection of law and order of every kind. I do not think I am slandering the neighbouring country when I say that there is a lawless element coming in from that country against which we have to guard constantly, and we are bound to take every precaution to show new settlers that in Canadian territory life and property are amply protected.

Mr. MONK. When will the Bill for provincial organization be brought down ?

Sir WILFRID LAURIER. About the second week in February, but cannot say for certain.

Mr. BERGERON. The pay of the men is apart, I presume, from the rations ?

Sir WILFRID LAURIER. Yes, we provide rations beside the pay.

Mr. BERGERON. Of course, I do not want to annoy the right hon. gentleman (Sir Wilfrid Laurier), but, remembering old days, I cannot but be impressed with the changes that time has brought in the opinions of hon. gentlemen opposite. I can remember, when hon. gentlemen opposite were on this side, when there was an urgent de-

mand from them for the reduction of the force, and reasons were strongly urged why the country should not be called upon to pay so much for a useless army. In fact, I believe, these urgings were so strong, that the government of that time did diminish the force by a couple of hundred men. But the right hon. prime minister and his friends later on, thought the force should be increased again. I hope that increase was not made necessary by the kind of immigration the government is bringing into the Northwest. The government boasts loudly of increasing the immigration by hundreds of thousands ; but it is not difficult to effect that increase considering the quality of some of that immigration, and considering that the government spend annually $700,000 more than their predecessors in the promotion of immigration. I will not follow the example of the right hon. gentleman and his party when in opposition by finding fault with this measure. It is a good thing for the Northwest that we should have a good police force, and when these men render good service, they should be well paid.

Bill reported, read the third time and passed.

SUPPLY.

House in Committee of Supply.

Penitentiaries—general, $9,450.

Mr. FOSTER. That seems to be a new item.

Hon. CHARLES FITZPATRICK (Minister of Justice). No, that is the usual item. It provides for the expense of general administration at Ottawa. There is no change except a statutory increase of $50 to the architect.

Mr. FOSTER. There is an architect?

Mr. FITZPATRICK. Formerly this officer was connected with the Kingston penitentiary. But I thought it better to remove him to headquarters. His salary is now charged against the general expenditure. He has been in the service for many years.

Mr. FOSTER. I suppose his work is in connection with repairs?

Mr. FITZPATRICK. And construction—additional wings and that sort of thing.

Mr. FOSTER. Does the Department of Justice carry on construction of that kind?

Mr. FITZPATRICK. Yes. We get an appropriation for material, and use convict labour.

Mr. FOSTER. What is the staff at headquarters?

Mr. FITZPATRICK. Two inspectors, the architect, officers contingencies and the expenses of the parole officer. That is a new officer appointed last year.

Mr. FOSTER. I suppose he looks after the paroled prisoners ?

Mr. FITZPATRICK. Yes. The man who is doing the work is not paid a salary but works voluntary. Mr. Archibald of the Salvation Army. He is doing an immense amount of good.

Mr. FOSTER. Will the minister explain what this officer does ?

Mr. FITZPATRICK. When a prisoner is about to be discharged upon parole, the officer is informed. He endeavours, as far as possible, to obtain employment for the man to help him in any way possible. If, for instance, the man is a mechanic, the officer provides him with a kit of tools. We have a vote of $2,000, part of which is placed at the disposal of the officer for these purposes.

Mr. FOSTER. What conclusion has the minister reached as to the results of this work?

Mr. FITZPATRICK. My conclusion is indicated by the fact that I have asked Inspector Archibald to apply for his release from the head of the Salvation Army, so that he may be able to devote his whole time to this work at a fixed salary. Mr. Archibald is an eminently satisfactory official, and will be in a position to do good service in this branch of the administration.

Mr. FOSTER. Does the minister find it less difficult to get employment for the paroled men?

Mr. FITZPATRICK. There is an institution in Toronto—I do not wish to mention the name openly—in which we have ten paroled men. We have received applications from employers who are ready to engage these men—of course, always on the recommendation of Mr. Archibald—and he takes the trouble to look after them after they leave the establishment.

Mr. FOSTER. How many men were let out on parole last year?

Mr. FITZPATRICK. If the hon. gentleman (Mr. Foster) will look at page II the last report of the department he will find a comparative statement of the paroles, pardons, deaths and escapes. Last year, 122 men were paroled. We find the system to work most satisfactorily. One difficulty in connection with the parole is the reporting. The man paroled is obliged to report to the police officials of the locality in which he resides. I find that some of the police officials—and I make this statement here publicly in the hope that some good may come of it—are far too zealous. They go about and make trouble for the unfortunate paroled convict. I have a case in mind in which the convict himself told me that the police officers took the trouble to go to the employer and tell him that the man was

a paroled convict, and, in ways which I will not particularize succeeded in obliging the convict to leave his employment. That is an act of great cruelty, and I make mention of it that those who are guilty of such atrocious conduct may know that it does not receive the approval of parliament.

Mr. FOSTER. What is the proportion of the lapses ? You had 120 on parole but the year before would furnish a better figure to take.

Mr. FITZPATRICK. The year before the number was 113. I do not know that I can find here the exact figures, but some time ago I asked the Commissioner of Dominion Police, Col. Sherwood, who has control of these discharged convicts so far as police supervision is concerned, and the report he made to me was that it would be about seven per cent. That I consider very satisfactory.

Mr. BERGERON. What is the principle upon which the hon. gentleman acts ?

Mr. FITZPATRICK. In the first place, the inspector visits the penitentiaries once or twice a year, when every convict in the penitentiary is entitled to see the inspector separate from the warden or any other officer, that is separate from Mr. Stewart and from Mr. Dawson. If the convict wishes to have his case brought before the minister, he makes his complaint to the inspector, who, on his return, makes a report to myself, and I take up the different cases and look into them. Or the convict may make a petition, or his friends on his behalf, to the department ; or another method is that he may apply through Mr. Archibald, who goes about and visits all these penitentiaries, and who may make a request that a man be discharged on parole. Then the procedure is to apply to the convicting magistrate, or to the judge, for a report of his case.

Mr. FOSTER. On that one point—is it the practice of the department always to apply to the judge ?

Mr. FITZPATRICK. Invariably, it is a rule without exception. Of course it would be impossible properly to deal with these cases if I did otherwise, I cannot have any knowledge of the facts brought out on the trial. I get the magistrate's report, then I apply to the warden in order to ascertain what the conduct of the convict has been while he was in the penitentiary. Then having before me the report of the committing magistrate, or judge, and the warden's report, I consider the case myself. If this has been a second offence, the application is almost without exception refused, except in a case where Mr. Archibald might point out some particular reason why under the circumstances the man should be paroled. But if it is a first offence, or if the convict is a young man and I see that he has an opportunity of getting employment, unless the convicting magistrate has reported strongly against him, so far as possible I help the man along. It may be that I have dealt somewhat generously with these people, but up to the present I have had no occasion to regret it. A first offender always receives consideration as far as it is possible to give it, especially if he is a young man. Then if he is allowed out he is obliged to report every month to the police officer in the locality where he resides.

Mr. FOSTER. This is different, of course, from a case where the minister, under the authority vested in him, pardons out an offender.

Mr. FITZPATRICK. Yes.

Mr. FOSTER. Is it the rule of the department in such cases always to get a report from the judge ?

Mr. FITZPATRICK. Yes. There are two things that are essential in all cases whether the application is for pardon or for parole, that is to get a report of the trial from the judge and of the conditions under which sentence was given, and a report from the warden. That rule is never departed from.

Mr. FOSTER. There is a case I have in my mind which I must look into a little more before I bring it to the attention of the minister. The minister may understand that something like this takes place : There are men who seem particularly willing to take up the cases of men who are charged with crimes, and after having gone through the courts of law are sent down for punishment; there seems to be in some cases almost a mania with these individuals to take up a case like that and approach the minister or authorities and make capital, and perhaps money for themselves, by getting these persons pardoned out. Sometimes they succeed, not so much from the justice of the case, or the merits of the case involved, as from the fact that the person who is interesting himself has, as he thinks, large influence in the party, and he uses that influence for all it is worth in order to commend his case to the department. Now there are one or two cases which came before my own observation, and which, from the apparent circumstances, seemed to me to be rather gross. One of them I intend to talk over with my hon. friend, and if it is such as I think it is, I have no doubt that he will pay every consideration to what I may bring before him. I think it is a great mistake for criminals or others to get an idea into their heads that by getting certain influential persons to act as intermediaries in their behalf they can escape, to a certain extent, the penalty of the crimes they have committed. But the parole business is quite a different matter from that. I am glad to hear the minister say that in all cases it is his invariable rule, before either pardon or

parole is granted, to get the judgment of the court giving sentence.

Mr. FITZPATRICK. I may say in answer to my hon. friend that I have in my mind cases such as he refers to, and I can assure him that the gentlemen in question, probably the same person he refers to, has realized by this time that he has no access to the Department of Justice which any other person does not have. There is no royal road to the Department of Justice. I would like to add that there has never been a case decided by myself that had not previously been examined by Mr. Power, of the Department of Justice, a gentleman in whom we have the greatest possible confidence, who has had an experience extending over twenty years in dealing with matters of this kind. I can safely make this statement, that there is not a case in which I have taken action without a previous report by Mr. Power.

Mr. BLAIN. How frequent have reports to be made to the local authorities ?

Mr. FITZPATRICK. Once a month. The convict is obliged to report each month to the local police authorities. If he fails to report, his case goes to the commissioner of police. If he does report, nothing is said, but if he fails to report each month, the commissioner of police is notified, and as a result applies to me for a cancellation of the ticket-of-leave, and the man goes back to the penitentiary.

Mr. HENDERSON. Do I understand from the Minister of Justice that if a man fails to report he is recommitted to the penitentiary?

Mr. FITZPATRICK. That is the rule.

Mr. HENDERSON. What becomes of those who go to the United States, for example, beyond the jurisidiction of the minister ? How are they dealt with?

Mr. FITZPATRICK. If a man goes to the United States without permission of the minister, he is dealt with as a man who has failed to report, and if he comes back he is recommitted to the penitentiary. Very frequently it may happen that there is a condition attached to the pardon, and if a man violates that in going to the United States, and if his relatives bring him back then he would have to go back to the penitentiary and purge his sentence. But in the case of a paroled convict he may apply for leave to go to the United States, and it sometimes happens that I grant leave; in fact, I almost invariable grant it if a proper case is shown.

Mr. HENDERSON. I would like to know how many at the present time are out on this ticket-of-leave. This is a question that considerable interest is taken in throughout the country, and any information the hon. minister can give I am sure will be appreciated.

Mr. FITZPATRICK. If my hon. friend will look at page II of the report on penitentiaries he will find a comparative statement of the paroles granted since the Act was brought into force in 1898. Last year there were paroled 122 convicts.

Mr. STOCKTON. The hon. minister states that on certain occasions he allows them to go to the United States. In that case does he require a report every month, and if so, to whom ?

Mr. FITZPATRICK. No, if a man is permitted to go to the United States he is exempted from the obligation to report.

Mr. BERGERON. Every month ?

Mr. FITZPATRICK. Yes. I am reminded of the condition under which the parole is granted. It is that they shall not leave the country.

Mr. STOCKTON. If leave is given, and if they leave the country you do not expect a report from them ?

Mr. FITZPATRICK. No.

Mr. MONK. Are there any cases of any persons who have been allowed out on ticket-of-leave being sent back to the penitentiary?

Mr. FITZPATRICK. Oh, yes—about seven per cent. I have not the exact figures here, but the inspector tells me that it is about seven per cent.

Mr. MONK. Last session two returns were ordered by the House. One was a return in respect to the parties allowed out on ticket-of-leave within a certain period of time. The other was a return as to the parties convicted of arson and who had subsequently been allowed out on ticket-of-leave. I do not think that either return was brought down, and I would like my hon. friend to make a note of it and see that the returns are brought down.

Mr. FITZPATRICK. If my hon. friend will look at page II. of the report on penitentiaries, he will find the number of convicts who have been allowed out since the Act first came into force. In respect to the arson cases I have not the slightest recollection of what my hon. friend refers to. If he will be good enough to send me a note I will see that the information is brought down.

Mr. HENDERSON. I understand from the hon. minister that seven per cent of those who have been allowed out have been returned to the penitentiary. May I ask whether they have been returned for failing to report or for some other criminal offence ? I desire to ascertain what effect this leniency of the minister has had upon criminals and upon the country generally.

Mr. FITZPATRICK. If a man fails to report he is returned to the penitentiary unless cause is shown. I referred to a case a few minutes ago in which a man failed to report because he found that by reason of

his reporting he was hounded to death by the local police officials, and on a report to me by Inspector Archibald to that effect, I relieved him of obligation to report. If a man out on ticket-of-leave commits an offence which of itself would not require that he should be returned to the penitentiary, the simple fact that he has committed a breach of the law makes it necessary to send him back to the penitentiary to purge his original offence. For instance, if a man had three years further to serve, if I allowed him out on parole, if he committed an assault and he was brought before a magistrate and convicted of this offence for which he would probably have to serve a month he would have to go back to the penitentiary and purge his original sentence.

Mr. HENDERSON. I understand that about seven per cent have been returned, some for failing to report and others for having committed a breach of the peace whilst out on parole. What proportion has been returned for some criminal offence committed whilst out on parole ?

Mr. FITZPATRICK. I certainly cannot give the information now, and I do not think that I have in my department the information to give that answer. But, I will say that as a result of the Salvation Army—or perhaps I should not say that—but as a result of the work of Inspector Archibald, there is a great improvement in reference to the parole system, and I think if it should be possible for him to devote his whole time to this prison gate work, that the result will be that we will have very few paroled men who will have to be treated as second offenders. Inspector Archibald is exceedingly sympathetic, he is exceedingly enthusiastic in the performance of this work, and I think the greatest possible good will result from his aid to the unfortunate whom we allow out on parole.

Mr. BARR. If the Salvation Army have accomplished so much, why should they not get the credit ? Why should you give it all to Inspector Archibald ? I think this is a recognition of the work they have accomplished which has done more for these unfortunate men than the machinery of the law, and in that case why not give them the credit ? It does seem to me that we should encourage the Salvation Army and try to further the work that they are now doing.

Mr. FITZPATRICK. Originally the Salvation Army did prison gate work. When I became Minister of Justice it occurred to me that they were doing very good work and that they should be assisted. I entered into communication with Miss Eva Booth, then at the head of the Salvation Army, and as a result she suggested that Inspector Archibald should be specially charged with this work while maintaining his connection with the Salvation Army. But, she pointed out that the Salvation Army as a body could not conduct this work to an extent beyond what they were doing. Inspector Archibald undertook to deal with the matter while remaining a member of the Salvation Army and the result is what I have explained. But, I think it necessary, and this is the suggestion of Inspector Archibald himself, that he should give his whole time to this work. There is quite enough for him to do if he gave his whole time to it, and he has applied to General Booth as an official of the Army for leave to engage in this work so that he may become a permanent official of the government.

Mr. BARR. Does the Salvation Army receive any assistance from the government?

Mr. FITZPATRICK. None whatever. We are simply paying the travelling expenses of Inspector Archibald, and there is $500 which we place at his disposal, and on which he can draw for the purpose of procuring the ordinary necessaries that a convict may require to enable him to make a start in life again.

Mr. OSLER. Inspector Archibald is a member of the Salvation Army ?

Mr. FITZPATRICK. Yes, he is the Inspector at Toronto.

Mr. U. WILSON. The hon. minister will remember that there was a small appropriation taken last year for this purpose and I would like to know how much has been spent?

Mr. FITZPATRICK. The amount appropriated last year was $1,500 for travelling expenses and $500 for assistance to paroled and discharged convicts—about $2,000 in all.

Mr. U. WILSON. I presume that the hon. minister is quite as well satisfied as he was a year ago with the work ?

Mr. FITZPATRICK. Yes, I am so well satisfied that I want to secure Inspector Archibald's services altogether for the department.

Mr. BERGERON. If I remember rightly, I think that some of the convicts in the different penitentiaries do not wait until the law comes to their aid and they are released on parole. How many convicts escaped from the different penitentiaries last year ?

Mr. FITZPATRICK. Those who took leave were one last year, one in 1902 and one in 1901. Of course, those who got away and were afterwards recaptured are not entered as escaped convicts.

Mr. BERGERON. My hon. friend speaks only of the one who never returned. Are the authorities still looking for him, or have you given up ?

Mr. FITZPATRICK. I believe we are still looking after him.

Mr. BERGERON. What was the last news ?

Mr. FITZPATRICK. He has not written me lately, but I am not without hope that some information may be had of him.

Mr. U. WILSON. This is a large item, and I would again urge, as I have urged for several session the putting of the Auditor General's Report in the members' hands before the House meets. We have not yet got the whole report. I think it is most unfair to ask us to vote large sums like this without having been able to go through the details and to satisfy ourselves about them. This is in itself a strong argument for the printing of the Auditor General's Report in sections and its distribution to the members at their homes before they come here, because, as a rule, their time is fully occupied here with other matters.

Mr. FITZPATRICK. I do not know the rule of other departments, but if the hon. member looks at page 115 of my report he will find all the details of expenditure.

Mr. U. WILSON. How long has that report been on the table ?

Mr. FITZPATRICK. I think since Tuesday last, but the Auditor General's Report with respect to the Department of Justice has been on the table for at least a fortnight.

Mr. BERGERON. Does the ticket-of-leave system apply only to penitentiaries, or does it apply to those who are imprisoned in jails for terms of less than two years ?

Mr. FITZPATRICK. Yes, it does.

Mr. BERGERON. It is the same law ? I understood the minister to say that before interfering with the sentence he takes the opinion of the judge who has passed condemnation. In the case of Brunet, of Montreal, was there a report from the Chief Justice who condemned him ?

Mr. FITZPATRICK. Yes.

Mr. BERGERON. Would my hon. friend bring down that report ?

Mr. FITZPATRICK. There is no need ; it was only about four lines. I never look for any report from the Chief Justice, beyond a statement to the effect that the jury passed on the facts, that he had passed sentence, and that that ended it so far as he was concerned.

Mr. BERGERON. So, in that case, the minister acted solely upon his own responsibility ?

Mr. FITZPATRICK. Yes ; I do not want to shift the burden ; I take it all on myself.

Mr. BERGERON. How many prisoners are there at present in the different penitentiaries ?

Mr. FITZPATRICK. If my hon. friend will look at page 1 of the report he will find the prison population from 1894-5 down to last year. At the end of the last fiscal year the prison population was 1,286. At the present time it is 1,400.

Mr. BERGERON. In all the penitentiaries ?

Mr. FITZPATRICK. Yes.

Mr. BERGERON. Is there any way of determining, from the increase or decrease of population, whether there is an increase or decrease in the morality of the country, if I may call it that ?

Mr. FITZPATRICK. If the prison population is any index to the morality of the country, I would say that the morality is almost stationary. For instance, in 1894-5 the prison population was 1,250 ; in 1897-8 it was 1,415 ; last year it was 1,286, and at the present moment it is 1,400. So you see it does not vary greatly.

Mr. BERGERON. Is there no way of reducing the expense to the country of the maintenance of prisoners ? I have not made a special study of the matter, but I have read something about it, and in some countries they utilize the services of these men. All of us who have had dealings with the criminal courts know that many of these men are in the habit of living in penitentiaries. Some of them do not conceal the fact that they live better in the penitentiaries than at home ; they cost on an average about $300 a year. Could their services not be profitably employed, for instance, in the macadamizing of roads ? There was a discussion on the employment of prisoners some years ago, but some opposition was made to it by some of the workingmen's societies on the ground that it would encroach on their own revenues ; but if they were employed on such work as the macadamizing of roads, which is not now done, they would not interfere with the labour market. Any one who knows our province knows that the roads are in a dreadful condition, and my impression is that if these men were engaged in outdoor work from 7 in the morning until 6 at night, like ordinary workingmen, they would not be in the penitentiary so often. I am only throwing out a suggestion, and I think this plan would be in the interests of the country.

Mr. FITZPATRICK. One of the difficult problems connected with the administration of justice is to find useful employment for the criminals, not only for the advantage to be derived from their labour, but for the benefit to themselves from being employed. There is not a penitentiary which has not some industry connected with it. At St. Vincent de Paul we have a very large farm, in connection with which we employ a great many convicts. In addition to that, there is a great deal of stone cutting, and, until

recently, quite large building operations were carried on, while a certain number of men are employed in the tailor and shoe shops. That is to say, we endeavour, as far as possible, to utilize the services of the convicts for the purpose of doing all the work required in the penitentiary. At Kingston we endeavour to run, with more or less profit and success, a binder twine industry, and as far as possible, speaking generally, throughout the whole country we utilize the services of convicts. We realize what my hon. friend says, that it is necessary to keep these gentlemen busy.

Mr. BERGERON. I understand that the work they do is done for themselves, such as the making of their own boots and clothing; but, of course, a good deal of money is required to purchase the raw materials. I do not think this goes far enough in the direction I indicated. I would like the convicts to do outside work that would not interfere with the employment of other people, such as road-making. I mention this as one of the things that might be done.

Mr. FITZPATRICK. I have often thought of the possibility of utilizing these men, as on the continent, in connection with road-making. We have control of the convicts so long as they are within the penitentiary grounds, but not beyond the boundary of the penitentiary. The benefit of their work would result to the municipality in which the penitentiary is situated. We could not take the convicts to a distance, because we would have to provide for them.

Mr. BERGERON. It would not cost more than it does at the present time. The men could be taken to any part of the province at a cost of not more than $300 a year each, and it costs that much to keep them now.

Mr. FITZPATRICK. We know what it is to take criminals about. We have sometimes to bring men from Manitoba to St. Vincent de Paul because there is not room for them in the Manitoba penitentiary, and it costs an enormous amount of money. My hon. friend would be shocked if I told him the number of guards that we have to send with these men.

Mr. BERGERON. It is done elsewhere. The convicts who are put to work on the farm or breaking stone are the ones that have nearly finished their term. They are looked on as the safest to be trusted, although two of those who last escaped were among these. There are guards to look after these men, and the only extra expense to which the country would be put would be for feeding the guards. The prisoners have to be fed now.

Mr. FITZPATRICK. Where would you house them?

Mr. BERGERON. This work is done during the summer. An army of thousands of men can be provided for while engaged in making roads. They could camp.

Mr. FITZPATRICK. Pic-nicing.

Mr. BERGERON. I am serious about this matter. We are paying an enormous amount of money for the maintenance of men whom we do not redeem. My opinion is that any man who has been in the penitentiary for a few years cannot do any good. Some time ago a man came to my office looking for work. He had formerly been in good circumstances, but had been in the penitentiary for eight or ten years. While there he had learned the trade of a painter, and he told me that although he had been out of the country, people knew that he had been a convict, and he could not get work anywhere.

Mr. AMES. In looking through the items given for Kingston, St. Vincent de Paul, Dorchester, Manitoba and elsewhere, and comparing them with the items in the Auditor General's Report, I find, roughly speaking, that about half the amount proposed to be voted for each of these penitentiaries can be classified under miscellaneous expenses, which are made up almost entirely of purchases of various articles, I presume, needed for the penitentiary. I would like to ask the minister what system is employed in the purchasing of these articles—whether tenders are called for, by whom they are purchased, whether instructions are given that they should be purchased in certain localities, and whether those who make the purchases are absolutely free to buy in the cheapest market.

Mr. FITZPATRICK. The practice followed is that which has been in vogue ever since the penitentiaries were established. We call for tenders for everything.

Mr. AMES. Are the tenders called for by public advertisement or only from a few persons?

Mr. FITZPATRICK. By public advertisement. If my hon. friend will look at the newspapers for the month of June, he will see the advertisement calling for tenders for supplies for the penitentiaries.

Mr. MONK. Are there not a lot of articles which are purchased otherwise than by public tender?

Mr. FITZPATRICK. I think everything that can possibly be supplied is bought by public tender.

Mr. MONK. What does the advertisement cover?

Mr. FITZPATRICK. Dry goods, groceries, coal, meat, bread, hardware, lumber, building material, leather—everything you can possibly expect to get in a penitentiary.

Mr. MONK. And the contract always given to the lowest tenderer?

Mr. FITZPATRICK. All I know is that the inspectors make a report to me and I approve of it. I do not think my hon. friend can point to a case where the lowest tender has not been accepted. I think there was one case where we were purchasing a superior quality of cloth. Our inspector says the rule is never departed from, that the lowest tender is always accepted.

Mr. BERGERON. I understood that St. Vincent de Paul penitentiary was lighted by electricity.

Mr. FITZPATRICK. It is now.

Mr. BERGERON. Do I understand that the whole village is also lighted by electricity?

Mr. FITZPATRICK. We light the penitentiary and the street on which the penitentiary is situated, and which leads down to the station. That is for our own protection.

Mr. BERGERON. No other street?

Mr. FITZPATRICK. No other street.

Mr. BERGERON. Are there not private citizens who are using the electric light and paying the government for it? I am not criticising, but merely asking for information?

Mr. FITZPATRICK. No. The convent near by and some private persons asked if we would not supply electrictiy, but we thought it would be inconvenient to do so, and we did not entertain the application.

Kingston Penitentiary, $177,600.

Mr. BLAIN. I find here an item of $62,400 for salaries and retiring allowances. Will the minister explain that?

Mr. FITZPATRICK. In the left hand column of my report, at the top of page 115, my hon. friend will see that the total for the warden, Protestant chaplain, Roman Catholic chaplain, accountant, engineer, &c., is $61,355.02.

Mr. BLAIN. Was there an officer retired during the year ?

Mr. FITZPATRICK. Yes, a keeper, named Weir, who became physically incapable of performing his duties.

Mr. BENNETT. I would like to call the attention of the minister to certain items in the Auditor General's Report, page M-21. Beardmore & Co., Toronto, leather, $1,024; The Canadian Locomotive Co., of Kingston, $1,408 ; Garneau & Son, Quebec, dry goods, $1,980 ; M. McLaughlin & Co., Toronto, flour, $4,585 ; Rathbun & Co., cement, $652 ; Swift & Co., Kingston, hard coal, $2,691 ; Were all these items tendered for ?

Mr. FITZPATRICK. Those supplied by Beardmore, Garneau and McLaughlin certainly were, because they are staple articles. The Kingston Locomotive Works supplied the castings used in connection with the new wing. There was no public tender asked for in that case but tenders were asked for by circular.

Mr. BENNETT. Would not that be applicable to the Beardmore Co.?

Mr. FITZPATRICK. No, public tenders were asked for in the case of the leather, dry goods and flour supplies.

Mr. BENNETT. The Beardmore people and the Canadian Locomotive Co., are well known as pretty strong Liberals. The latter is the company in which the hon. member for Kingston (Mr. Harty) is interested. Probably that accounts for their getting the contract.

Mr. FITZPATRICK. My hon. friend is not quite fair. The Ogilvies are supplying flour for the current year.

Mr. BENNETT. Take the case of the George Plunkett contract for coal. Kingston is very much nearer the American side, yet Geo. Plunkett of Cobourg, whose politics are very pronounced, got the contract. Were tenders called for ?

Mr. FITZPATRICK. Yes, by public advertisement.

Mr. BENNETT. Who else tendered for it ?

Mr. FITZPATRICK. There were a great number of tenders for the coal. I am glad to hear my hon. friend criticise me for giving contracts to Liberals, because I have had a great deal of criticism for doing the reverse from other quarters. The McLaughlin Company has been represented to me as very strongly Conservative.

Mr. MONK. I would like to come to the assistance of the hon. minister with regard to the coal in Montreal. All the coal there was ordered from T. F. Moore & Co., and there can be no danger of any reproach from the other side with regard to that firm. I presume that coal is tendered for by everybody at the same price ? In Montreal the important bodies, such as the municipal and school boards, generally divide their orders among the coal dealers. I think my hon. friend next year, even at the risk of getting reproaches from his own side, might follow that plan and not give the whole order to Moore & Co.

Mr. FITZPATRICK. Those bodies to which my hon. friend refers have greater latitude than I have. They have not got a critical opposition to take care of them. If we were to distribute the coal orders around among the different firms, we would be charged with not getting the lowest price.

Mr. MONK. It is all the same price.

Mr. FITZPATRICK. No, if it were, I might take care of some people that I cannot now. There was a firm which grievously complained that I could not give them any part of the coal contract; but the reason was their prices were not low enough.

Mr. AMES. Were all the goods purchased from Hamilton Bros., who received a contract to the extent of $1,330, last year for the Kingston penitentiary and $1,670 for St. Vincent de Paul, the result of tenders.

Mr. FITZPATRICK. Yes.

Mr. AMES. What methods are used to know that the goods delivered are according to sample?

Mr. FITZPATRICK. We have a storekeeper at St. Vincent de Paul, who has been there many years. He weighs and measures the goods, and I have never heard any complaint as to his work not being done properly.

Mr. AMES. Has he any samples or standards or descriptions which will enable him to make sure that the goods delivered are according to order?

Mr. FITZPATRICK. When the tenders are asked for, he has the samples and compares the goods delivered with the samples.

Mr. AMES. Was the same process followed in the case of Lewis Bros., of Montreal, who figure very largely? They supplied Kingston penitentiary with goods to the extent of $1,892 and St. Vincent de Paul $1,123.

Mr. FITZPATRICK. These goods were all purchased after tenders were called.

Mr. AMES. Will the hon. minister lay on the table the forms of tenders used?

Mr. FITZPATRICK. I have not the slightest objection, they have grown sacred by long usage.

Mr. BENNETT. How many tenders were received for the coal supplied by Geo. Plunkett, of Cobourg?

Mr. FITZPATRICK. I cannot tell the number now but I know there were several.

Mr. BERGERON. When are the tenders received?

Mr. FITZPATRICK. In June.

Mr. BENNETT. Can the minister tell whether the coal was delivered from Cobourg?

Mr. FITZPATRICK. The tenders required that the coal intended for St. Vincent de Paul should be delivered at St. Vincent de Paul and that for Kingston at the wharf at Kingston.

Mr. BENNETT I am informed that Mr. Plunkett is not a coal merchant altogether, but a hotelkeeper. We had a case of this kind yesterday, a publican—not necessarily a sinner—dealing in government supplies. I am informed also that Mr. Plunkett is not a dealer in a large way. Will the minister, when his estimates are next taken up, bring the tenders that were received? The amount involved is about $15,000—a considerable sum.

Mr. FITZPATRICK. I will bring the tenders.

Mr. AMES. Will the minister describe how the tenders are received and opened and the contract awarded?

Mr. FITZPATRICK. There is information called for to-day that has not been asked for in the last eight years.

Mr. FOSTER. This is a new House.

Mr. FITZPATRICK. Evidently—a very new House, in some respects. So far, as I know, tenders are advertised for in the newspapers. They are received by the inspectors and opened by them. A tabulated statement of the tenders is prepared and I sign the order to award the contract to the person recommended by the inspectors.

Mr. BENNETT. I may say for the minister's information that attention was publicly directed to a number of these names figuring in the Kingston penitentiary accounts on the occasion of the recent Liberal convention in Toronto. I do not like to refer unkindly to the deceased—and I suppose we may say that the Ontario Liberal government is deceased—but during that convention, it was asserted in at least one newspaper that certain persons prominent in that convention were interested in the supplies for Kingston penitentiary, and that this would account for their enthusiasm at the convention.

Mr. FITZPATRICK. Will the hon. gentleman specify? I do not think that Garneau was there or Lewis Brothers.

Mr. BENNETT. These were not connected with Kingston. I remember that there was a long list in the newspapers.

Mr. FITZPATRICK. Let the hon. gentleman bring the newspapers when I bring the tenders.

Mr. BENNETT. I will.

Penitentiaries—St. Vincent de Paul, $99,750

Mr. FITZPATRICK. There is an increase of $400 there. It is to supply another pair of horses. It appears that the horses there have reached the age, one of eighteen years and the other twenty-one years, and it is about time we got rid of them.

Penitentiaries—Dorchester, $59,700.

Mr. FITZPATRICK. There is no increase there.

Mr. FOSTER. Who is the warden?

Mr. FITZPATRICK. Mr. J. A. Kirk.

Mr. FOSTER. At one time in parliament.

Mr. FITZPATRICK. I never saw him.

Penitentiaries—Manitoba, $59,800.

Mr. FITZPATRICK. There are several increases in this vote owing to the increase in population. We are obliged to have three more permanent guards at $600 a year, and one temporary guard at $500. There is an increase also in the maintenance of convicts, due to increase in the number. The population of the penitentiary is to-day 188—it has gone up even in the last few days—against 140 on June 30, 1903. The item of industries shows an increase, which is due to the fact that we need wood for burning brick to be used in building operations. There is an increase under the item of lands and buildings, because we are obliged to construct an additional wing for which we require material which will cost $3,500.

Penitentiaries—Regina Jail, $12,300.

Mr. FITZPATRICK. There is an increase of salaries to provide for the employment of a temporary turnkey from time to time as required. Maintenance of prisoners and discharge expense is increased because the population is now forty-two, as against an average for last year of twenty-seven. There is an increase on account of industries because additional farm implements must be purchased.

Penitentiaries—Prince Albert Jail, $8,650.

Mr. FITZPATRICK. There is an increase in salaries because, owing to increase of population, an additional turnkey must be employed at $600 a year. I have decided to increase the jailer's salary by $100. He threatened to leave because the salary was too small. The population now is twenty-seven against a daily average for 1903-4 of fourteen. There is a slight increase in the cost of uniforms owing to the additional officer, and in maintenance of prisoners and the discharge expenses because of the increase of population.

Penitentiaries—Edmonton Jail, $8,000.

Mr. FITZPATRICK. That is a new institution. The expectation is that the building will be ready for occupation in July or August. It will have twenty-five cells for convicted males, seven for males awaiting trial, seven for females, and three for insane—a total of forty-two. This will provide accommodation for prisoners from Alberta. At present there are twelve prisoners from Alberta in the jails at Regina and Prince Albert, and fifty-two more in the Northwest Mounted Police guard-rooms. I expect this Edmonton jail will be the penitentiary for the new provinces when they are established.

Mr. FOSTER. One of the new provinces.

Mr. FITZPATRICK. One of the new provinces or the new province.

Mr. FOSTER. What is the system of purchasing supplies for the binder twine industry at Kingston?

Mr. FITZPATRICK. Two dealers in the hemp market in New York furnish quotations and the material is bought from New York, and sometimes from England.

Mr. FOSTER. Who makes the purchases?

Mr. FITZPATRICK. The penitentiary officials send the prices here and receive authority to make the purchases, and they make them direct.

Mr. FOSTER. What was the result of that industry last year?

Mr. FITZPATRICK. My hon. friend will find the details at page 5 appendix A of the report of the Department of Justice.

1. Twine manufactured :—The following is a summary of twine manufactured :

Pure manilla, 600 feet..	415,925 lbs.
Mixed manilla, 550 feet	125,490 "
Rope yarn..	58,850 "
	600,265 "

On the next page he will find the quantity sold.

Mr. FOSTER. How does it work out as regards receipts and expenditures ?

Mr. FITZPATRICK. There is a difference of opinion about that. The inspector considers that it works out satisfactorily in this respect, that receipts and expenditures about balance. We allow 30 cents a day for convict labour. It is about as much as the labour is worth, because they are not very expert nor desirous to learn.

Mr. FOSTER. How do you make the sales ?

Mr. FITZPATRICK. Sales are made to farmers only. Since July 1, 1901, farmers may send in club orders, and the order must be signed by the farmers who use the twine, stating the kind of twine and the quantity they require. The price is fixed by the inspector, who takes into account the amount that he has been obliged to expend to produce the article, and at the same time he pays some attention to the price in the market. But they generally grade their price a little below the market price, about a cent or a fraction of a cent below it.

Mr. SPROULE. We were told last year that they sold it at cost price.

Mr. FITZPATRICK. It is a little below the market price. Where you have convict labour of this sort and allow anything at all for the labour, it is almost impossible to tell what the real cost to the government

is. There is also interest to be taken into account, and the wear and tear of machinery.

Mr. SPROULE. I understood that was all figured out, and that convict labour was reckoned at fifty cents a day. Could the minister tell us how much they sold last year to farmers, and if any twine was sold to any other parties but farmers ?

Mr. FITZPATRICK. Not a pound to any one but farmers.

Mr. FOSTER. Was the whole output sold ?

Mr. FITZPATRICK. No, during 1903-4 we sold 401,557 pounds. We had on hand June 30, 1904, 522,680 pounds. Since July 1 we have sold 209,705 pounds.

Mr. FOSTER. That makes 600,000 pounds that you have sold. How much did you make last year ?

Mr. FITZPATRICK. The total quantity offered for sale in 1903-4 was 924,237 pounds. Quantity manufactured in 1903-4, 541,415 pounds. So long as we have to observe the rule laid down by the House of selling to farmers only, we will have this result every year. We have now 382,822 pounds on hand, but there is an order of the House that we must sell to farmers at the price fixed. The proper way to do would be to dispose of it by public auction.

Mr. SCHAFFNER. Is there any particular time when the orders have to be in from the farmers ?

Mr. FITZPATRICK. No, we sell to farmers at any time.

Mr. COCHRANE. There is an impression amongst the farmers in our section of the country, that unless the orders are in at a certain time they cannot be supplied ; and that time is so early in the season that the farmers are not in a position to advance the money a month or two before they want the twine.

Mr. FITZPATRICK. Orders may come in at any time.

Mr. COCHRANE. The notices given in the newspapers would not bear out that statement.

Mr. FITZPATRICK. My information is that the difficulty my hon. friend refers to is caused by the fact that about two years ago we had only a certain limited quantity of 650-feet-to-the-pound twine, and that one class was exhausted, and when orders for it came in the applicants had to take the ordinary run of twine.

Mr. SPROULE. I think the whole twine business has this defect. Last year or the year before the surplus on hand was sold to a private party at five cents a pound, while in round figures you are asking ten cents a pound from the farmers. Now twine was offered at about the same price as you could get it in any country store. There was surely no inducement for farmers to send for it if they could buy it at a hardware store as they required it and used it up, they would prefer to do that than to send to the penitentiary for it weeks before they needed it. They would naturally go to the most convenient place to get it. But it is believed, and I think there were grounds for the belief, that the twine was not sold to the farmers at cost price. Add the one cent per pound, or the fraction of a cent that is added to cover any loss, to the price of the raw material, and the way it was turned out by others—all that left the impression, though the government states that they sold twine just a little below what others were selling it at, that in fact they sold it at about the same price. We were informed also from other sources that it was not the intention of the government to become competitors with others who were in that business, or to sell below them, because if they did they were destroying their market.

Mr. FITZPATRICK. What my hon. friend says illustrates the difficulty we have in dealing with this business. We have a mill that produces 400 tons. I understand that is only a very small fraction of the total quantity required in Canada. Now we cannot attempt to regulate the market with such an output as that.

Mr. SPROULE. But you can sell the twine.

Mr. FITZPATRICK. We are charged with favouring a certain number of individuals and giving them that twine at a low figure, while other farmers are obliged to compete in the open market and pay the regular price. We are charged with giving favourable treatment to a certain number of individuals. Now with respect to prices, I will give the prices that we charged in 1903-4, and my hon. friend will be able to say whether they are fair and reasonable. In 1903-4 during the harvest, the prices charged were those fixed on May 1, 1903 :

Pure manilla, 650 feet to the lb., 11½ cents per lb.
Pure manilla, 600 feet to the lb., 10¾ cents per lb.
New Zealand (Kingston special), 9½ cents per lb., ¼ cent less on ton lots or over.

During the spring of 1904, the prices charged were those fixed March 15, 1904, as follows :

Pure manilla, 600 feet to the lb., 10½ cents per lb.
Mixed manilla, 550 feet to the lb., 9¾ cents per lb.
New Zealand, 450 feet to the lb., 8¾ cents per lb., ¼ cent less on ton lots or over.

These prices were fixed in March, 1904, they have been in force since that time and are in force now, and notwithstanding that we have, I think, 375,000 pounds on hand.

Mr. BLAIN. Can the hon. minister tell me what kind of twine is that which he has on hand ?

Mr. FITZPATRICK. Yes.

Mr. COCHRANE. I think you are manufacturing a class of twine that the farmers do not use as extensively as they used to.

Mr. FITZPATRICK. My figures only go to June 30 : Pure manilla, 600 feet to the pound ; mixed manilla, 500 feet to the pound.

Mr. COCHRANE. The hon. minister has an inspector of binder twine, and that gentleman ought to know the kind of twine that is mostly used by farmers. He should get that information, and the penitentiary should make the kind of twine that the farmers use now. One class of twine that was formerly used, the farmers do not find it expedient to use now, and if that gentleman would have the class of twine made in the penitentiary that is generally used in the Dominion, the hon. minister would not find so much on hand.

Mr. FITZPATRICK. That gentleman does report, and the inspector tells me that we act on his report.

Mr. COCHRANE. Does he report upon that line ?

Mr. FITZPATRICK. Yes. This whole business of manufacturing binder twine is a charge on the public. In my mind, there is no doubt about that.

Mr. FOSTER. How many men do you employ ?

Mr. FITZPATRICK. Forty convicts out of a present population of 448.

Mr. FOSTER. You do not give employment to 10 per cent of the prisoners.

Mr. FITZPATRICK. Not 10 per cent.

Mr. W. WRIGHT. I would like to ask the hon. minister if the farmers know that this twine is to be purchased there ? I venture to say that there is not one-quarter of our farmers who know that they can purchase twine any cheaper there than they can anywhere else.

Mr. FITZPATRICK. If my hon. friend will take up the report of the Minister of Justice, and look at page 6, he will see the form of circular that is sent out all over the country, in addition to which there is an advertisement published in the newspapers.

Mr. COCHRANE. Which papers ?

Mr. FITZPATRICK. I cannot give the list.

Mr. COCHRANE. I am not talking from a political point of view. These advertisements should be published in the small papers. There are a great many people who do not take the papers from Toronto, but who require binder twine. If the local papers had a chance to publish this advertisement it would produce better results.

Mr. FITZPATRICK. I understand that weekly local papers are chiefly used for this purpose.

An hon. MEMBER. In Ontario ?

Mr. FITZPATRICK. Yes.

Mr. CLARE. I would like to ask the hon. minister if he can give us the factory cost of these twines ?

Mr. FITZPATRICK. The figures I gave a moment ago as representing the price at which these twines are sold, are supposed to represent practically the cost of production, but I imagine that if you take into account the initial cost of the plant, the loss at which it had been run for several years, depreciation and one thing and another, you would find that we are paying a great deal more than we are charging for our twine. However, that is not the opinion of our officials. Here is what is represented to be the cost of the fibre for two years : Manilla fibre, January, 1903, $8.75 per cwt.; 1904, $9.25 per cwt.; average cost, 1903, $8.70 per cwt.; 1904, $9.50 ; sisal, average cost, 1903, $7.77 ; 1904, $7.45.

Mr. LEFURGEY. I would like to ask the hon. minister if there were not quite a number of complaints from the farmers who got this twine last season about the inferiority of it ?

Mr. FITZPATRICK. Not last season. There were complaints before, but not last season. We will occasionally have a complaint or two from people who do not want to pay their debts, but we have had three hundred letters from farmers in different parts of the country commending the twine.

Mr. LEFURGEY. I do not wish to get into a discussion as to whether the parties who made these complaints were able to pay their debts or not, because I know that the people with whom I was speaking were perfectly willing and able to pay their bills.

Mr. FITZPATRICK. Where were the complaints from—Prince Edward Island ?

Mr. LEFURGEY. Yes. They usually pay their bills down there.

Mr. FITZPATRICK. And they send men up here who do that.

Mr. LEFURGEY. We always try to do that, too. There were really some serious complaints from some of our most reputable farmers, who said that the twine knotted and broke, and they have made complaints directly to the department about it.

Mr. FITZPATRICK. Is my hon. friend quite sure that these complaints were made in respect to the twine sold during last season ?

Mr. LEFURGEY. I understand so. People claimed to have a great deal of twine which they tried to use, but which they finally had to abandon and were compelled to buy other twine.

Mr. FITZPATRICK. The inspector, who is more familiar with the details of this matter than I am, says he has no recollection of any complaint during last season from Prince Edward Island. We did have a few complaints from Manitoba and the Northwest Territories, but none from Prince Edward Island.

Mr. LEFURGEY. I will recall the name to the hon. minister of one of the parties to whom I refer. Mr. Lee, of Victoria, sent in one complaint.

Mr. BLAIN. The fact remains that the sale of binder twine direct to the farmer has been a decided success. My hon. friend (Mr. Fitzpatrick) shakes his head at that, but the facts bear out my statement. We find by the record that a few years ago twine was sold to supporters of the government without any tender at a very low price, and the complaint that was made in the House was that the farmers did not have an opportunity of purchasing the twine. Taking up the Auditor General's Report for this year, I find that since the new resolution was adopted by the House almost 500 farmers in Canada ordered direct from the penitentiary and secured their twine. I pointed out last year and the year before that in my humble opinion the penitentiary was manufacturing too many kinds of twine, that what the farmers want is pure manilla twine. That is about the only kind that is sold generally, in Ontario, at least.

Mr. FITZPATRICK. We manufacture manilla and mixed manilla.

Mr. BLAIN. Mixed is not a pure manilla twine. It is sisal and manilla mixed. The farmers do not wish to use that kind of twine. The demand is for a pure manilla twine, and if the Kingston penitentiary were to manufacture a pure manilla twine and put it on the market at cost, or a little over cost, it is useless for any man to stand up in this House and say that the farmers would not purchase it. My hon. friend has already stated that the amount of twine manufactured at the Kingston penitentiary is very small in comparison with the consumption. I would like to ask the hon. minister what amount of twine remains unsold at the penitentiary at this moment ?

Mr. FITZPATRICK. On June 30, 1904, we had on hand:—

Pure manilla, 600 feet to the pound, 320,085 lbs.
Mixed manilla, 550 feet to the pound, 120,900 lbs.

Of that we have sold since that date:—

Of pure manilla, 189,400 lbs.
Of mixed manilla, 17,745 lbs.

My information from the inspector is that we have manufactured about 20 per cent of mixed manilla, but that the greater part, 80 per cent of it, is pure manilla, the intention being to satisfy a demand for that sort of twine which the inspector says exists. It seems to me that my hon. friend will be able to judge, when I gave the figures at which we sold, whether we ought at these figures to have been able to dispose of this twine. He has had more experience with this matter than I have. My impression is that these figures were lower than the market prices ruling at the time.

Mr. HENDERSON. Referring to the matter brought up by the hon. member from Prince Edward Island (Mr. Lefurgey) as to the quality of the twine, I may say that in going among the farmers—and I think that other members here have met with the same experience—I find there is throughout the country a prejudice against the twine that is manufactured at Kingston. There is only a limited amount made there and consumed in the country, and when I ask farmers why they do not buy Kingston twine they tell me that the American twine is far better. It is unfortunate that we have not in this country a sufficiently strong Canadian sentiment to enable us successfully to put upon the market an article such as the twine to which we are now referring. I have heard the Finance Minister (Hon. Mr. Fielding) within the last two years express similar views, and regret the fact that Canadian sentiment did not uphold Canadian products. Our people buy things because they are foreign. I will venture to say that 75 per cent of the farmers of this country will buy American twine because it is American. They have an impression that because it comes from the other side it is better, and the government of the day is largely responsible for this lack of Canadian sentiment. The whole policy of the present government is to cultivate a sentiment amongst the people of this country in favour of purchasing goods that are produced in other countries, and to lessen the purchase of Canadian goods. I attribute very largely the feeling that the penitentiary binder twine is inferior just to this lack of Canadian sentiment. People are willing to buy American twine because it comes from the other side on the principle that far away fields are green, and it is felt that if it is only brought from some other country it must of necessity be better. In the section of country in which I live a large amount of American twine is used. They use chiefly what is known as Plymouth. I asked one man : Why do you buy this Plymouth, and he said : It is so much better. Farmers will not use the penitentiary twine. For anything I know it is equal in all respects to the imported

twine and quite possible this very twine that is bought by our farmers as American twine is Canadian twine. I do not doubt that in many instances that it is a fact. because our Canadian factories are making twine, shipping it across to the United States and selling it to the very men who supply twine to dealers in this country, and I have no doubt that it goes there, comes back here as American twine and takes the market much better, selling as American twine in competition with the Kingston article, although it is of purely Canadian manufacture. It is as I said the lack of a good Canadian sentiment that interferes very materially with the reputation and sale of the Kingston twine.

Sir WILFRID LAURIER. I am sorry for Halton.

Mr. HENDERSON. The government to-day by their whole policy of preferential tariff and free trade in twine, &c., are cultivating that lack of sentiment, and until some change is made in the policy of the government I am afraid these difficulties will crop up from time to time.

Mr. FITZPATRICK. I would like the hon. member to tell me how to cultivate that sentiment which will induce farmers to purchase our twine. I think my hon. friend ought to cultivate the sentiment in his own constituency, and instead of making that fine speech, which is addressed exclusively to me, if he would go to his own constituency and tell his electors what they ought to do in the premises, he would be rendering a great service, and I am quite sure we will all appreciate his efforts.

Mr. HENDERSON. Yes, I have been endeavouring to do that all along the line, but I confess that when I have the whole force and policy of the government against me I find great difficulty and what I complain of is that the government will not change their policy. If the government would join me in the principles I advocate, we could very soon change that sentiment for the better interest of the country and of the Kingston binder twine manufactory. I would like the Minister of Justice to join me in advocating a better Canadian sentiment and to shape the policy of the government along lines that will invite people to use Canadian goods, Canadian cottons, Canadian woollens, binder twine, binders and everything that you can think of, Canadian. Let us cultivate a purely Canadian sentiment. If you go to the United States and enter a shop you will see that if a piece of cotton is laid on the counter, probably ninety-nine out of one hundred ladies will buy that piece of American cotton because it is American. Will the Minister of Justice undertake to say that there is the same sentiment among our Canadian people? It is a matter of extreme regret to me and we must adopt some policy in this country that will produce a better Canadian sentiment.

Mr. FITZPATRICK. I am not in woollens or cottons or ladies furnishings; I am in binder twine and if my hon. friend will undertake to tell me how I can sell my binder twine I shall be very glad. I cannot deal with vague generalities about Canadian sentiment; I have to get back to binder twine. If he will help me to sell my binder twine I will be satisfied.

Mr. HENDERSON. Just create the sentiment.

Mr. FITZPATRICK. And the taste for ladies furnishings.

Mr. HENDERSON. Give the Canadian market a taste for twine made in Canada, impose such protection as will preserve our market for Canadian twine, and inside of five years you will have such a strong sentiment in favour of Canadian twine that I undertake to say there will be no question about the quality of the twine you produce.

Mr. BLAIN. On the question of Kingston twine I wish to express my opinion. I think that the twine manufactured there is good and the farmers of this country have no ground of complaint whatever. The twine coming into my own county is generally appreciated by people of both political parties, if you wish to discuss the matter from a political standpoint. But what I say is that there must be something wrong in the department somewhere if the twine is not sold. I do not wish to complain—perhaps I would not be in a position to point out where the changes should be—but I think that if the Kingston penitentiary is manufacturing good twine, as in my opinion it is, the situation would be improved by manufacturing only pure manilla twine, abandoning the manufacture of the other kind altogether. Then I think that parliament would endorse the minister in spending some money to ensure the sale of the twine direct to the farmer. There must be something at fault in the department somewhere or this quantity of twine which is very small in proportion to the quantity used, would be sold every year. In view of the fact that an enormous quantity of twine is used in Canada, there is something wrong somewhere, or else the twine would be sold every year. I may say that in my own county a great many orders have been sent in during the last three years, and they have not been supplied, for the reason that the department stated that they were sold out of pure manilla twine.

Mr. FITZPATRICK. That is quite right—the 650 feet twine.

Mr. BLAIN. A few counties would consume every pound of twine almost, manufactured in the Kingston penitentiary, but my hon. friend is not manufacturing the kind the farmers want.

Mr. FITZPATRICK. The inspector informs me that we are not now making anything except pure manilla.

Mr. LEFURGEY. Might I ask what has been done in reference to the claims that were made against the government on account of poor twine ?

Mr. FITZPATRICK. The inspector tells me that every claim that has been put in has been satisfactorily adjusted, and that there is not a single claim now pending.

Mr. LEFURGEY. I understood from the parties who spoke to me a few months ago that the claim that they had put in had not at that time been paid.

Mr. FITZPATRICK. Would my hon. friend give me the name of the party ?

Mr. LEFURGEY. Mr. Lee, of Victoria.

Mr. FITZPATRICK. If my hon friend will send us a note we will look into it. I want to say there is a prejudice all over this country against prison-made goods, and that prejudice applies to binder twine and operates to the detriment of the factory. It is a prejudice that is fostered in some directions probably by the labour unions. Of course, we think that our twine is good. I am so advised at all events, and I see no reason why in the interest of Canada at large, our twine should not be bought. After all, this is the people's factory ; the people of Canada are paying for this. It is an attempt honestly made by the government to protect the farmers of Canada against the combine outside; and even if it does cost a little to keep it going, it seems to me that the people of the country ought to appreciate the fact that we are making this effort.

Mr. HENDERSON. The hon. minister has told us that this is an effort to protect the farmers. I would like him to tell me how he is going to protect the farmers by putting his twine on the market at a price just a shade below the price fixed by the great American trust. It is well known that the cost of twine is not what fixes the price; it is just what the great American trust chooses to fix it at ; and yet the minister fixes his price just within a shade of the combine price. Under these circumstances, I do not think that he is offering much protection to the farmer. The way to fix the price would be upon the basis of the actual cost of the material and labour. I believe the best twine made in the country is not pure manilla. I do not think the farmers want pure manilla. They want a twine composed of about 60 per cent manilla and 40 per cent sisal. The quantity of pure manilla twine used in this country is quite small as compared with the mixed twine. If you take 60 per cent of the cost of a pound of manilla fibre and 40 per cent of the cost of a pound of sisal, and remember that about 20 per cent of the whole thing is coarse oil, a cheaper article. you will bring the cost of the binder twine very much below the figure which the minister gives. That would be the true way to fix the price if you wanted to protect the farmer, and not simply to shade below the price of the combine.

Mr. SPROULE. There is a good deal of this twine sold in my section of the country; but the farmers got a bad impression of it because at first they could not get the twine they wanted, and later on it was sold to a private dealer for about half the money they paid. For instance, the farmer paid 10c a pound and the private dealer bought the balance for 5c, and the impression got abroad that the department were selling at too high a price to the farmer, and were losing on what was sold to the private dealer. With regard to the price, it is generally conceded that whatever the raw material costs, binder twine can be made at a fair profit for about 1c a pound ; so that if the raw material cost an average of 8½c. a pound, the government could sell it at 9½c and have a fair profit. I would suggest that if the government would allow a small commission to some person to go around among the farmers and take orders, they would sell a very much larger quantity of twine. The complaint of parties who took orders in my section was that they practically got nothing in the shape of a commission that would be a fair compensation for their labour, or they could have sold a great deal more of it. That might be done for the benefit of both the department and the farmers.

Some resolutions reported.

ADJOURNMENT—THE TRANSPORTATION COMMISSION.

Sir WILFRID LAURIER. I move that the House do now adjourn. My hon. friend yesterday asked me for some information in regard to the Transportation Commission. The Commission to-day is composed of Mr. Robert Reford, of Montreal ; Mr. Edward C. Fry, of Quebec, and Mr. J. H. Ashdown, of Winnipeg. It has not made a report. I think it made an interim report last year in regard to St. John. Mr. Reford, I am sorry to say, has tendered his resignation on account of illness. We have asked him to reconsider his determination, and have not heard from him since.

Mr. FOSTER. What business will be taken up to-morrow ?

Sir WILFRID LAURIER. The resolution of the Minister of Justice with regard to the appointment of judges to the Railway Commission, then the Census Bill, and then Supply, taking up the Public Works estimates.

Motion agreed to, and House adjourned at 6.05 p.m.

HOUSE OF COMMONS.

FRIDAY, February 3, 1905.

The SPEAKER took the Chair at Three o'clock.

OFFICIAL REPORT OF THE DEBATES.

Mr. GERVAIS presented the first report of the select committee appointed to supervise the official report of the Debates of the House during the present session as follows :—

Your committee recommend that their quorum be reduced from eight to five members.

H. GERVAIS,
Chairman.

FIRST READINGS.

Bill (No. 24) respecting the Kootenay, Cariboo and Pacific Railway Company.—Mr. Galliher.

Bill (No. 25) respecting the Walkerton and Lucknow Railway Company.—Mr. P. H. McKenzie.

Bill (No. 26) to incorporate the Sovereign Fire Insurance Company of Canada.—Mr. E. F. Clarke—by Mr. Osler.

Bill (No. 27) respecting certain patents of the Facer Solid Steel Car Wheel Company of Perth, Limited.—Mr. Caldwell—by Mr. Telford.

Bill (No. 28) to incorporate the Northwest Telephone Company.—Mr. Turriff.

Bill (No. 29) respecting the Canada Southern Bridge Company.—Mr. German—by Mr. Macpherson.

Bill (No. 30) respecting the Canada Southern Railway Company.—Mr. German—by Mr. Macpherson.

Bill (No. 31) respecting the Canada and Michigan Bridge and Tunnel Company.—Mr. German—by Mr. Macpherson.

Bill (No. 32) to incorporate the London and St. Clair Railway Company.—Mr. Calvert.

Bill (No. 33) respecting certain patents of Jean Effront—Mr. L. P. Demers—by Mr. Rivet.

Bill (No. 34) respecting the Nicola, Kamloops and Similkameen Coal and Railway Company.—Mr. Galliher.

Bill (No. 35) to incorporate the Georgian Bay and Seaboard Railway Company.—Mr. Grant—by Mr. Scott.

BOARD OF RAILWAY COMMISSIONERS.

Hon. CHARLES FITZPATRICK (Minister of Justice) moved that the House do go into committee to consider a proposed resolution respecting the Board of Railway Commissioners. He said : Before you leave the chair, I may venture to say a word or two in explanation of this resolution. I am sure there are a great many people in this country, and probably there are some in this House, who do not fully appreciate the extent and importance of the duties that have been assigned to the Board of Railway Commissioners by the Railway Act of 1903. In that view I venture to trespass upon the attention of the House for a few moments while I attempt to explain some of the features of the Act which deal with the most important of these duties. Generally, the Board has control over all railroads in Canada with the exception of government railways, and with respect to those railways they control the incorporation and organization of the company, the location of the line, the construction of the railway, and its management and control after it is in operation.

Hon. GEO. E. FOSTER. In what way do they control the incorporation ?

Mr. FITZPATRICK. They control the incorporation to this extent, that if the requirements of the Act are not carried out with respect to the incorporation of a company, the Railway Commissioners have power to intervene and see that the Act is complied with—to that extent only. Now speaking specifically, I may say that the board is called upon, in the first instance, after the company is organized, to see to the location of the line of railway, to control the grades, and curves, and general character of the construction; they have also the supervision over all plans, profiles and books of reference ; they are responsible for the location and construction being in accordance with the lines laid down by special Act. The board is called upon to act in the case of any omission, error or misstatement in any plan, profile or book of reference, and to correct the same ; also in cases of deviation which require to be made. In adition to that, they are called upon to deal with questions of expropriation of land, with the construction of branch lines, the control of crossings and junctions, interference with navigable waters, construction and operation of telegraph and telephone lines, drainage, farm crossings, fences, gates, cattle-guards, bridges and tunnels, stations and inspection.

Mr. FOSTER. Telegraph and telephone lines in connection with the railways.

Mr. FITZPATRICK. In connection with the railways. Perhaps I might read a paragraph I have on that point, with respect to the construction and operation of telegraph and telephone lines, they have power to interfere in so far as the lines run along the railway, and supervision over the rates and charges to be made for the transmission of messages and of agreements for the use of such lines by other companies ; placing wires across railways, construction, operation and maintenance of telegraph and telephone lines, for the distribution of light, heat and power along, upon, under or over highways or other public places, under power granted by parliament, if the company cannot get consent of the municipality in that regard. That is to say, if there is a conflict between a railway company and municipality, the Board of Commissioners

has authority to act between the two. Now with respect to the operation of railways. The board has a duty to be familiar with the first equipment, apparatus and appliances used or to be used upon all trains and upon the railway generally ; the accommodation, running and operation of trains, the causes and prevention of accidents ; reports of accidents must be made to the board by the railway ; the causes of fire, removal from the right of way of weeds and inflammable matter. They also make rules and regulations for the operation of trains and to make them uniform among all railways. Then I think the most important duty that is given to them is with respect to the tolls that railway companies are entitled to charge. I would like to draw my hon. friend's attention to section 255 of the Railway Act which practically makes it obligatory upon all railways in this country to submit their tolls for approval before they can collect either freight or passenger rates. In addition to that, the board is entitled and is bound to see to the enforcement of all penalties which are incurred. They also have charge of the supervision and approval of all amalgamation and traffic agreements.

Mr. LENNOX. Will the hon. gentleman say whether there is any distinction in their jurisdiction over Dominion railways that are incorporated by the Dominion and those incorporated by a province.

Mr. FITZPATRICK. This has reference of course only to Dominion railways, all railways under the control of the Dominion of Canada—perhaps I ought to add except government railways. I may also say that, by way of comparison, you will find that the Board of Railway Commissioners in this country exercise all the powers that are vested in England in the Board of Railway Commissioners which they have there, and in addition, all the powers with respect to control of railways that are vested in the Board of Trade in England ; that is to say, that our Board of Railway Commissioners in this country has as large powers as those two bodies have in England, and furthermore, if you want to go further in the way of comparison, you will find that our board has more ample powers than those that are conferred upon the Interstate Commerce Commission of the United States, or upon the railway commissions of the states. Then, I think I may safely say that this board has the largest powers of any tribunal I know of at the present time outside of the parliament of Canada, speaking as far as Canada is concerned. In England two commissioners are appointed each one with a salary of £3,000 sterling and in addition to the two commissioners that are appointed there are three ex-officio commissioners. These ex-officio commissioners are the Lord Chancellor of England, the Lord President of the Court of Sessions in Scotland and Lord Chancellor in Ireland, so that there are in reality five commissioners, two appointed and three ex-officio. The Lord Chancellor sits I presume when the cases have reference to English railways, the Lord President of the Court of Sessions in Scotland sits when the cases have reference to Scotch railways and the Lord Chancellor of Ireland sits in connection with Irish cases.

Mr. FOSTER. What is the deciding quorum ?

Mr. FITZPATRICK : A majority, I believe.

Mr. FOSTER. A majority of those present or a majority of the whole board ?

Mr. FITZPATRICK. A majority of those present. The Chief Commissioner with us is the most important person. The findings of the board on all questions of fact are conclusive in all courts in this country, but on questions of law the Chief Commissioner's opinion prevails. The Chief Commissioner, when a question is determined by the board to be one of law, has absolute control over the determination of that question.

Under these circumstances it is not necessary for me to say that it is exceedingly important that we should make a proper choice for this position. It is important to have a man of legal training and if possible of wide judicial experience. He should also be familiar with the necessities of the country, and it is most desirable that he should be as far removed as possible from all contact with the great railway corporations. It is important that we should get a man, who has not, recently at all events, been connected as counsel with one of our railway corporations. In the light of these requirements we think we have found a man who is prepared to accept the position, who is almost an ideal man for the place. The man to whom the position will be offered is Mr. Justice Killam, of the Supreme Court, This gentleman was educated for the bar in the province of Ontario, was called to the bar there and practised his profession in that province. He afterwards moved to the west settling in Winnipeg where he practised his profession several years, until 1885, when the government of Sir John Macdonald appointed him to the High Court of the province of Manitoba. He then became chief justice of Manitoba and within the last two years he was promoted to the Supreme Court of Canada of which court he is now a member. The legal profession, at all events, will agree with me when I say that he is a man qualified in all respects, by temperament, by reason of his intellectual qualities and by reason of his judicial experience, to fulfil the duties of this important office.

Mr. SPROULE. He has had no experience as a railway man.

Mr. FITZPATRICK. He has never operated a railway as far as my knowledge goes,

but I think he has had experience in railway matters in connection with the Supreme Court and also as a member of the bar and as a judge in Manitoba. In any event the result of our selection makes it necessary for me to bring in these resolutions. The resolutions are not intended to add anything to the position in so far as Mr. Justice Killam is concerned, but they are intended to widen the field from which we may be able to make our selection for this important office. I will now proceed to explain in what respect. At the present time the judges of our high courts are entitled to a retiring allowance. If a judge has been on the bench of the superior courts of this country for fifteen years he is entitled to retire at the expiration of that period on two-thirds of his salary. If he has been on the bench for thirty years he is entitled to retire on his full salary. If he has attained the age of seventy years and has been on the bench for 25 years he is entitled to retire on his full salary, and the same thing applies if a judge has reached the age of 75 years and has been 20 years on the bench. Mr. Justice Killam has been on the bench since 1885 and he has now 20 years of judicial service to his credit. He is 55 years of age and in ten years from this he will be entitled to retire, if he remained on the bench, at his full salary. The intention of the resolutions is to allow this time to count; that is to say that the time he would spend on the Railway Commission, if he is appointed for ten years, will count absolutely in the same way as if he had continued to occupy a seat on the bench. He would not gain anything by his transfer, but he would not be put in a position where he would lose any of the benefits and advantages he has now acquired.

Mr. SPROULE. He will gain a larger salary.

Mr. FITZPATRICK. He does get a larger salary. He gets $3,000 a year more, but at the same time he forfeits the right to his retiring allowance under the law as we now have it. I trust I have made my meaning clear. The intention is to make it possible for Mr. Justice Killam to accept the position which is now offered to him without in any way forfeiting the right to the retiring allowance which he has as a judge of the Supreme Court.

Mr. W. F. MACLEAN (South York). Mr. Speaker, the hon. Minister of Justice (Mr. Fitzpatrick), in presenting this resolution has pointed out to the House what he says the main object of the resolution is, namely, to widen the field from which the Chief Commissioner can be drawn. I think I shall be able to show the House that the main intention of this resolution is to circumscribe the powers of the commission, and to bring to the attention of the House just what the situation is to-day, I propose to read an extract from the 'Weekly Sun' published in the issue of last week. It is to the following effect:

Time Judgment was Rendered.

It is now seven months since various farm organizations presented before the Railway Commission, at a meeting held at Toronto, a statement of some of the grievances which farmers have to complain of in the matter of freight rates. The statement included complaints as to the rates on small fruits, apples, beans, cattle, and the rate on grain, as compared with grain products.

A short time after the hearing, the railway companies voluntarily conceded a good deal of what had been contended for in regard to the rate on small fruits; a small concession was also made on apples in boxes, and on pears when mixed with apples, and these concessions were subsequently approved by the Railway Commission. But nothing whatever has yet been done to the question of the rate on apples in barrels, and the vastly greater grievances (because a larger number are affected by them), in the rates on beans, grain, and cattle. The decision in regard to these more important matters should have been rendered long since. The resignation of Mr. Blair, whilst it upset the work of the commission in dealing with some cases, did not directly affect these, because all three commissioners heard the complaints entered at the Toronto meeting, and the two commissioners still on the board are legally competent to pronounce upon the same.

One great advantage that was hoped for from the appointment of the Railway Commission was that the new court, being a movable body, would be easily reached by the common people. That advantage certainly has been secured. The commission is easy of access. The hope was also entertained that the commission would be more prompt in rendering its decisions than the old Railway Committee of the Privy Council.

That hope is being rapidly dispelled, and if there is much longer delay in the cases mentioned it will be altogether dissipated. Justice to the farmers affected and justice to the Railway Commission itself demands a prompt decision on the farmers' cases heard at the Toronto sitting.

In other words a newspaper which represents the great farming interest of this country has pointed out that the farmers are disappointed with the workings of this commission and most of all that they are disappointed in the slowness with which it has acted and the slowness with which the vacancy created over three months ago has been filled. I think I shall be able to show that it will be in the interests of the country that the government should not go on with this measure, but that they should actually abandon it and forthwith proceed as the law now stands to appoint a commissioner. The other day the Prime Minister, when speaking to a Bill that was up in the House dealing with railway matters, or rather dealing with this very important question, said that the government were negotiating with a gentleman on the Supreme Court who was to take the position, and that the main cause of delay was that the judge wished to finish his judgments before he would undertake to work on the commis-

sion. It would have been a good thing if the late chief commissioner, the late chairman of the commission, had been guided in the same way and had finished up his judgments before abandoning his position. I do not think the prime minister told us all the facts when he made that statement; he neglected to tell us that the judge not only wished to finish his judgments, but that he wished to make special terms with the government before taking the position. These special terms are contained in this resolution.

What does this resolution propose? In substance it proposes to abandon the good old principle that no judge in this country should be promoted. The Minister of Justice (Mr. Fitzpatrick) is on record as always advocating that there should be no promotion of judges, 'once a puisne judge, always a puisne judge,' and his colleagues in the government have always supported that in theory and avoided it in practice. The result is that the judges of this country are beginning to think that they can so conduct themselves on the bench as to earn promotion and they are looking for promotion. Promotion of judges seems to be the order of the day. We are getting away from the old practice and holding before the judges the idea that they can in some way merit political preferment. Another way in which the sanctity of the bench is being violated is by the appointment of judges on political commissions. We had a commission of this kind in Ontario and a very fitting comment on it was passed by a newspaper the other day. This comment on the Gamey case is an example of the criticism to which the judges are exposed.

Gamey vs. Stratton

Ontario reverses the judgment of Boyd, chancellor, and Falconbridge, chief justice.

That was a case where judges were taken from the bench and asked to try a political case. They gave their decision and the result is that the people think a great deal less of the bench for their being employed in these cases. Caustic criticisms such as I have just read are passed on the conduct of judges, and in that way the respect that we all ought to have for our bench is reduced. Judges have to try a great many political cases connected with elections in this country and they will see as everybody will see --and judges are not more infallible than any one else—that in trying these political cases they are subject to the temptation, at least people will say they are subject to the temptation, of looking out for themselves and earning preferment or promotion if they can see a way of making their decisions suit the views of the party that may be in power. Once a puisne judge always a puisne judge is a good principle; a judge ought not to be looking for promotion to be the subject of special agreements and special legislation in his interest when it is proposed to translate him from one position to another. I am in favour of the judges of this country being better paid, and if the government had brought forward a resolution of this kind and at the same time had proposed to reduce the number of county judges in Ontario it would have met with my support, but I can only say this to the judges of this country that in the meantime while their salaries are so low as they are to-day, they will be much better occupied in giving their sole attention to the judicial cases that may be brought before them, trying to live within their incomes, leading the simple life and not at all hoping to get preferment by any conduct of their own on the bench. Unfortunately, after all the promises that have been made, with special legislation of this kind coming down, the feeling is becoming general in this country that every one has not the confidence in the bench that they ought to have by reason of these promotions, and if this is the case something wrong has taken place. Respect for the bench is being broken down by a political party that seems to be trying to advance its interests through the bench. Let them employ everything else they care to, but let the administration of justice be removed from political influences, and above all let there be no hope held out to the judges that better terms await them if they should happen to please that political party. If a judge sees fit to come down from the bench, as this judge who has been named here to-day is doing, among the common herd, let him take the chances of the common herd. Why should special legislation be passed for any man who comes from the bench among ordinary people and takes up an ordinary occupation? Here we have another case of class legislation on behalf of a man who comes from the bench. If you pass special legislation and make special provision for the chief of the commission, does it not follow that the same terms must be awarded to his colleagues on that commission? If this commissioner's pension is to be provided for, if he is to be made non-removable from office, why was it not proper for the second and third commissioners to be treated in a similar way? Who is a lawyer in this country that he should have special legislation either with regard to his removal from office or any other matter in which he may be concerned? The lawyers and judges have enough privileges in this country, and when judges come down among the common herd, in the ordinary rut, there should be no special legislation in their interest.

This brings me to the worst aspect of this proposal. Let me read clause 1 out of the proposed resolution:

Resolved, That if a judge of any Superior Court in Canada is appointed chief commissioner of the Board of Railway Commissioners for Canada he shall not be removed at any time by

the Governor in Council except upon address of the Senate and House of Commons.

Let us see what illustration of that proposal can be found in the record of the debate when we passed this Bill. The then Minister of Railways and Canals (Mr. Blair) at page 3,855 of 'Hansard' of 1903, speaking on the Railway Bill and on this very point, says :

The opinion of Council, in going over the Bill, was that it would be desirable to place the members of the commission very much in the same position as lieutenant governors under the British North America Act. It is a very cumbrous proceeding to invite the action of the Senate and House of Commons by an address. Cases might arise in which it would be very important and desirable that prompt action should be taken without waiting for a session of parliament.

Now, the serious thing in this Bill is that the chairman of this commission is to be put outside of the jurisdiction of parliament, where he was put by that Act. The great argument held out to the country from one end to the other in favour of the Act was that we were to have a chairman on that commission who could be removed from office by the Governor in Council, whose conduct could be discussed in the House, and who, if that conduct were found to be not in the public interest, could be removed from office forthwith by the government of the day. And yet, a year after all these assurances were given to the people, a Bill is introduced, the first clause of which proposes to put the chairman of this commission beyond the possibility of removal by the Governor in Council and beyond the control of parliament. That is the main object of this Bill. Its object is to emasculate the Act passed two years ago. And just to show you how powerful that measure is, let me read what Mr. Blair said on this point when he was dealing with the measure. He said :

When you come to read some of these clauses it may seem that the powers that are given—if they are pressed to the extremity of their literal meaning ; if an interpretation is going to be given to them by the board right up to the limit which their language would bear—it might seem that you are giving to the Railway Commission power which would enable them to crush the railways, or to do serious injury to the business interests of the country.

These great powers were given to this Railway Commission ; but now an effort is being made to put a man into the position of chairman of that body who will or will not exercise these great powers without being amenable to the criticism of parliament, or even the criticism of the Governor in Council. The powers of the commission are immense, I grant. There never was a tribunal so empowered as this one is ; but that being so, its powers ought to be kept under control, and it ought to be where parliament could regulate it and enforce the performance of its duties. But, instead of that, we have before us a proposal to put these great powers into the hands of a man——

Mr. COCHRANE. A Czar.

Mr. W. F. MACLEAN. A Czar who will not be amenable to parliament or to the Governor in Council, who can only be removed by an address from the Senate and House of Commons, which the man who created the commission said is a cumbrous method and hard to carry out, which, in fact, cannot be carried out. Here is the object of this Bill unfolded to us—not to widen the limits from which the chairman of the commission may be drawn, but to nullify what was expected to result from the passing of the Bill. When Mr. Blair brought down the Bill he also said this :

The Bill which we submitted last year contained, and the present Bill, when printed, will be found to contain a clause providing that the members of the commission are only removable on an address of both Houses of parliament to the Governor General. This, on full consideration, we concluded to change, and although the Bill when it is distributed will contain such a clause, it is an oversight which will be remedied in the committee. We propose that the members of the commission shall be removable in the same manner as the lieutenant governors of the provinces, namely, by the Governor General in Council for cause.

This vital principle of the Bill it is proposed, one year after it has been the law, to wipe out and abandon altogether.

Then the question comes up, in whose interest is this proposal made ? Why this change in policy ? Is there any possible doubt what the reason of it is ? The railways of this country have found out at last what the great powers of this commission are, and they have set about, in a very clever way, to have them 'cribbed, cabined and confined'—to have the powers of the commission reduced ; and they are out now looking for a judge, if they can get this amendment passed, to go on that bench who will be friendly to them. In the lobby here to-day, whom do you see ? You see the twin railway lobbyists, Mr. Charlie Drinkwright and Mr. Willie Rainwater, as I heard them called the other day. These are the two men who are to select a man to fill this position. They are the men who are engineering the lobby here to-day, to have a judge put on the commission who will not be amenable to parliament or to the Governor in Council, and who can only be removed from that position by an address of the Senate and House of Commons, which the late chairman of the commission said is a very cumbrous method. I want to tell the new men who have come into this House, especially the men from the west, that the promise made to the farmers and business men of this country was that this tribunal would be speedy in its methods and simple in its procedure, that the men in charge of its administration would be easily removed from office, and that absolute justice would

be done. Instead of that we are to have a chief commissioner who cannot be removed —who will be selected on the advice of the railway companies, as I believe, because they are the dominating influence in this country. There are no twenty men in this House who have the influence of a Drinkwater or a Wainwright in matters of this kind. I regret to say it, but these men have found out, on the advice of their solicitors, that this Railway Act does contain a large measure of protection to the people, and they have set about in this peculiar way to try to offset the merits of that Act. I say to the men representing the farmers, whether of the west or of Ontario, and the men representing the business interests of this country, that an effort is being made to-day by these resolutions to stifle that great piece of legislation, which ought to stand to the credit of the Liberal party, but which to-day, one year after its birth, they are proceeding to strangle. Now let me read what Mr. Blair's promises to the farmers were :

> In considering this, bearing in mind that it is the strength and pressure of the public opinion which has been aroused by what the farmers of the country have felt to be their particular grievance ; having regard to the enormous extent of these interests, not only in eastern Canada, but growing with such tremendous rapidity in our great west, I am satisfied that I speak with the approval of all my colleagues when I say, that the selection which we will make to occupy a place on this board, particularly in respect to the business interests of this country which are connected with transportation, will be such a selection as will commend itself heartily to the approval of the farming community, and will promote and further their interests.

If you want to tell me that the business and farming interests are to be protected and get speedy justice from the Railway Commission, by putting a man at the head of that commission who can only be removed by an address from parliament, you are asking the farmers to accept something they will not accept. What we want is a court which will render speedy justice, which will not be paralyzed by cumbersome procedure, and which will be composed of men responsible for what they do. Speaking on the question of responsibility, Mr. Blair made this statement, which will be found at page 3858 of the Official Debates of 1903:—

> I think that having declared that no commissioner shall hold these things, we can rely upon the Governor in Council enforcing it. It seems to me that the control of the government would be more effective than any other.

And he made that an argument in favour of the Bill, but now this control by the government is to be abandoned. What will the farmers think of this proposition when they recollect what they were promised ? Besides just look at the great powers vested in the chairman of this commission. He has not only the privileges I have mentioned, but in clause 8 still further powers are given him—powers that I have tried to have restricted, but so far have tried in vain. Clause 10 says:—

> Not less than two commissioners shall attend at the hearing of every case, and the chief commissioner, when present, shall preside, and his opinion upon any question, which, in the opinion of the commissioners, as a question of law, shall prevail.

Not only is he to be not removable by the act of the government and placed beyond criticism in parliament, but he is to be the sole judge on questions of law, and thus is to be more than equal to his two colleagues. The government are not even proposing to remove that power but are instead increasing the powers of this irresponsible man, and are placing the people in such a position that they will have no effective control. An hon. member the other day spoke of the procedure before this court and showed that it was very much like that followed in other courts. You will have to file your petition and there will be joinders and rejoinders and all that sort of thing which create indefinite delay. The Minister of Justice told us in reply that the chairman will have power to prevent any unnecessary delay, but who is to compel this irresponsible man to administer the law in such a way that it will be speedy and effective, if he cannot be removed. It may be his duty to do this, it may be his duty to see that the lives of the people are protected, but how is he to be compelled to do his duty? Hon. members are aware of what happened only yesterday at one of these railway crossings in the United States. Ten women were killed in one sleigh by reason of a bad crossing, and similar accidents are happening here every day, yet we are told that the chairman of this commission is to be made an irresponsible official and that the government, instead of proposing wiser legislation, intend putting the whole administration of the Railway Act in the hands of this irresponsible man, in whom is vested this extraordinary power of overruling his two colleagues on questions of law. What the intention of the government is was very fairly brought out the other day. We had the Minister of Railways and Canals and the Minister of Justice both telling the House that they considered all these matters affecting the safety of the people and their protection from railways should be left to the commission to decide, that parliament should wait and not interfere, and that this commission would do everything. And three days later they come down with a proposal to emasculate the Bill and give the head of the Railway Commission special powers over everybody else. I have not a word to say against Judge Killam as a man, a citizen and a judge; but I do object to the Railway Act being emasculated in this fashion, and I do not believe that such a

proposal will meet with the endorsement of the people.

Before this discussion is through, I intend to go into another feature of it, and that is the peculiar circumstances under which the late chairman gave up his place. If ever there was a shameful act committed in this country, it was the act of that man who himself had that law put through creating this Railway Commission, who subsequently resigned his cabinet position on account of some difference with his colleagues, and whom the government, we are told, with some idea of benevolence or conciliation, made chairman of the commission. They asked us to vote, and we voted readily some $50,000 to $75,000 to pay for the organization of that commission. It will cost at least $100,000 a year. We are paying about $4,000 or $5,000 rent to house that commission. We voted last year $22,000 to buy a special car in which this commission could travel about the country administering justice. Then, all at once, this man abandoned his office and left unsettled a lot of cases which were pending before it. If ever there was a disregard of public interest, it was that. If ever there was a man to whom ought to be meted out some kind of punishment, who deserves particular ignominy, it is that man who abandoned his office and refused to decide the cases that had come before him, and in which consequently to-day all the procedure will have to be gone over again. That was the most shameful act I know of in connection with the history of this country; and not a word of explanation has the government condescended to give us of that incident. I do not know the reasons which actuated Mr. Blair. I have my own suspicions, but is there anything worse in our history than such conduct, and then to have no explanation made of it, to have no reason given us why he left that commission in the manner he did without the slightest regard for the public interest? The government to-day should be engaged rather in making provisions to avoid a similar occurrence in the future. They should be engaged in framing some law which would prevent any man, who may in the future hold that position, from abandoning office and leaving a host of cases unsettled, as was done in this case. Instead of trying to pass this Bill through the House, the government should at once abandon it. They should rather seek, not on the bench, some competent man who will take the chairmanship of that commission, without requiring any special legislation to divest him of all responsibility. Let them man that commission properly and let judgments be given in those cases that are pending without further delay and thus do justice to the people. That is a reasonable proposition. But instead of that, they propose to emasculate the Act by making the man who is to be head of the commission utterly irresponsible to the government and the country. It may be all very well for hon. gentlemen in this House to be parties to legislation of this kind.

It is very fine to sacrifice public rights to corporation interests, which seems to be the impelling force in this matter; but, if anything has been proven by recent events, it is that the people do rise when they find that corporation interests are being placed ahead of public rights. The greatest assertion of the public determination to defend its own rights was that in the province of Ontario the other day. True, the people voted for cleaner methods in elections and in favour of cleaner public life and better conduct on the part of ministers of the Crown and other representatives. But it was also a rising of the people against a government that had abandoned public rights. Hon. gentlemen opposite may think that, just after an election and at the beginning of a new parliament, they can afford to strangle this law for the adoption of which they have taken so much credit. But the people will hold them responsible. And I want to tell hon. gentlemen who are new members of this House, on whichever side of the House they may be that they will be held responsible by the people if they support a measure of this kind. And I want to tell them also that, after the decision in Ontario there are no safe seats in this country for men who turn their backs upon the rights of the public. An hon. friend behind me asks me, how about North York. Did you ever see such a revolution as there was there ? Was there ever such a condemnation as that of a minister of the Crown who had been the constant foe of public rights ? And Hon. J. M. Gibson, formerly Attorney General, the man whose office above all others was consecrated to the maintenance of public rights and municipal rights, was snowed under. Five ministers identified with the attack upon the rights of the people were buried under the landslide. A great, a dominant party, was swept from power because they had forgotten the rights of the people. I call upon the men here who represent the farmers, I care not whether of the maritime provinces, Quebec, Ontario or the west, to stand for public rights, and I tell them that if they have the hardihood to vote for such a Bill as this, a Bill that emasculates the law by placing at the head of the commission an irresponsible appointee, and makes provision for him above all others in the community, they are not acting in the interest of the people who sent them here.

Mr. W. A. GALLIHER (Kootenay). My hon. friend from South York (Mr. W. F. Maclean) in his usual energetic way, has discussed this resolution at some length and with some warmth, and has held up certain bogeys with which he hopes to frighten

new members of the House. He speaks of this measure as being in the interest of corporations and against public rights. From his own argument I fail to see any justification for that conclusion. He knows little, personally I presume about Mr. Justice Killam. I have had the opportunity of practising at the bar with that gentleman, and I have had the honour of practising before him when he occupied the prominent position of a judge of the Supreme Court of Manitoba. I know his personal worth, and I know that as a lawyer he was considered among the first in the Dominion. As a judge he has been noted for his fairness and ability. That, I think, will not be disputed by any one who knows him. That he will be influenced in his new position in favour of the interests of corporations, I emphatically deny, basing that denial upon my personal knowledge of his character. Why my hon. friend (Mr. W. F. Maclean) has termed this proposed new appointee an irresponsible head of the commission I fail to see. It is true that if this Bill passes, his removal is taken out of the hands of the government. But it is put in the hands of what I consider a higher tribunal, the parliament of Canada. To appoint one under these conditions is hardly to make him the irresponsible head of the commission. If, as we all admit, we need at the head of this commission a man of ability, a man of honesty, a man of fairness, we have in this gentleman, if he is placed in that position, a man who fills the bill in every one of these respects. If he receives this appointment and performs his duties with equity and impartiality, in what way can the public interests be said to be sacrificed by the change proposed in this Bill? It is well enough to raise the cry that public interests are being sacrificed for the benefit of corporations but, for my part, I would certainly require more than the statement of my hon. friend from South York to convince me that that cry was justified. The hon. gentleman again raises the old cry that the chief commissioner has more power than the other two put together, because he is the judge of the law. Well, the object of appointing to this position of chairman of the commission a man learned in the law is that he may, in that position determine, in all cases in which the law is involved, what the law is. A layman however cognizant of facts or capable of marshalling facts, yet, when it comes to deciding what the law of the subject is, can hardly be expected to do the work of one trained in the law and experienced therein. The other two members of the commission have their duties to perform. A majority of the court must agree upon the facts of the case. That is an important point to remember. The majority have agreed upon the facts, it is right, in my opinion, that questions of law should be decided by the man who is capable of deciding what the law is. My hon. friend (Mr. W. F. Maclean) has referred to the late commissioner abandoning his office on pretty short notice. I agree that it was deplorable that, after all the trouble and expense gone to in making investigation into certain matters by the late chairman and his colleagues, those matters were left in an unfinished condition on his resignation. But I hope that my hon. friend does not blame the government for that gentleman resigning his position. It was quite within his right, if he saw fit, to retire from his position at any time, and the government could not prevent him from doing so. I agree with my hon. friend that it is something that ought not to have been done, and, in some respects I would go as far as he does in commenting on the facts. However there is another point in connection with it. We must remember, as I have suggested, the importance of having at the head of the commission a man in whom not only the government but this parliament and the people have confidence. Such a man is Mr. Justice Killam.

That gentleman occupies at the present time a seat on the Supreme Court bench. I agree with my hon. friend in his objection to the preferment of judges from one place to another, I object to that principle as thoroughly as he does. For instance, I deprecate holding forth an inducement to a judge on the bench that he may at some future time be promoted to a higher position on another bench. I agree with the hon. gentleman in that respect. But it is to be remembered, Mr. Speaker, that we are desirous of obtaining the best possible talent for the position of chief commissioner on that board. We believe, at all events, I do, knowing that gentleman well, that he possesses the highest qualifications, and I am sure the majority of us recognize his abilities, and believe that if Mr. Killam is appointed to that position we will have a man in every respect fitted for it. He will be abandoning what we all recognize as a life long position to take a position on the Board of Commissioners which may not be a lifelong position.

Now as we all know, a judge holds his position practically during life, or good conduct, and at a certain period he can retire and receive an allowance proportionate to the salary he has been getting. It is therefore a serious matter for a judge on the bench to consider whether he shall step down from that position and accept another position which may only last for a short time. I think it is not unreasonable to ask that some provision should be made for him in that regard. It is not a question of whether Mr. Killam or any other judge can be dismissed, for he can be dismissed. He cannot be dismissed perhaps, in as summary a manner as he could under the Act in its present form, but he can be dismissed by this parliament if his conduct as commis-

sioner is not fair, or if he is found incapable of performing his duties. Therefore, looking at the matter as I do, knowing this gentleman as I do, knowing his ability and his absolute fairness, I have no hesitation in saying that I believe he will fill that position, if appointed, both to the satisfaction of the farmers whose interest my hon. friend so laudably champions, and to the satisfaction of the country generally. For these reasons I shall have no hesitation in supporting the resolution.

Mr. T. S. SPROULE (East Grey). It has always seemed to me, since parliament met, that some explanation was due this House regarding the vacation of the position of Chairman of the Board of Railway Commissioners by the gentleman who held that post, but up to the present time we have had no explanation in this House. I think parliament was entitled to it, and especially so when this resolution was proposed. That appeared to me to be the proper time and opportunity to make an explanation. But the government has not vouchsafed the House any explanation; in fact, so far as parliament was entitled to it, they have treated parliament with contempt. Now I think that the government is not doing its full duty in keeping us in the dark in regard to that incident, so long as it persists in withholding an explanation.

I have nothing to say with regard to the qualifications or non-qualifications of Judge Killam, except this: that when it was first contemplated to appoint a railway commissioner, we were told that it was a sine qua non that the commission should be composed of three men, one of whom should be a railway expert. Now Mr. Justice Killam cannot fill the bill in that respect. Another member of the board was to be well versed in law, one whose qualifications and experience would enable him to perform satisfactorily his duties on that board. The third was to be a man of common sense. How far Mr. Justice Killam will come up to that standard, I do not know. But at any rate he is not a railway expert. Now one of the strong reasons why the government justified their selection of Mr. Blair for a commissionership, was that he was a railway expert in the highest sense of the term. We recognized all over the country that he was a man of experience, versed in the law, and one acquainted with parliamentary usages and parliamentary life. Now if these were essential qualifications for the chairman of that commission, certainly Mr. Justice Killam does not possess the whole of them.

But what chiefly strikes me in the government making this appointment is that they are weakening and lowering the dignity of the bench, and destroying the respect of the country in the judiciary, there is no doubt about that. If you have to take men from the bench to fill positions that can only be filled by a party government, the result will be to lessen the respect of the people for the bench. As my hon. friend from South York (Mr. W. F. Maclean) has said, you offer a temptation to those who are on the bench, and who are always looking for promotion to a situation with higher emoluments or something else, and when that promotion can only be made by the party in power, it seems to me you are holding out a temptation for the bench to pander to the political party in power. Now I think that is wrong. We have always been led to believe in the past, and the late Sir John A. Macdonald emphasized that principle in the strongest possible way, that when a man was raised to the bench he was put there, so long as he performed his duty, for the rest of his life. We should always respect the bench and look upon its occupants as the very embodiment of fairness, for that reason, if for no other. Well, then, what becomes of that principle in this case? It is a total abandonment of that principle, and the consequence I say, must result in lessening the respect we have for the bench.

Then this is legislation for one special class, the judges. Why don't we make a provision that this position may be filled from any other class in the community? But here we make a special provision for only one class in the community, the judges. We take a judge from a bench where he is entitled to a superannuation allowance after he is worn out in the service of the country, and where he is given a salary, perhaps, lower than he would otherwise get because of that superannuation allowance which he is to receive after he is worn out. But we put this gentleman in a position where there is a larger salary and a large superannuation allowance as well. I do not think that he is entitled to either the one or the other. If he abandons the bench to take a lower position he should be satisfied with the emoluments that go with that position, and not expect those that accrue to another position, not only accrue to it by virtue of the law now on the statute-book, but which would accrue to it in the event of an amendment to that law giving a larger salary to judges and with a larger superannuation. This gives him the advantage of both, and it is only for the purpose of one class, the judges. Now I think in that respect the principle is wrong, it is making a specialty of that one class, taking them out from the rest of the community, and holding out inducements to them that are not offered to any other class.

Then it deprives parliament of the right to remove these men. It is true they can be removed at the end of ten years, because the term of office expires at the end of that period. But it deprives parliament of the right to remove them except by impeachment, on an address from both Houses of parliament. Now, that cannot be done. In

the experience of Canada I do not know whether it has ever been done or whether any judge of this country has been called to account. At the present time I have no remebrance of it ever having been done. remembrance of it ever having been done. a position that parliament will not or cannot remove them, no matter whether they do their duty faithfully and properly or not. There is practically no redress and they remain in power for ten years or until the expiration of their term. The government take away that supervision that parliament only a few years ago regarded as one of the essential powers to be exercised as a controlling influence over the party who occupies that position. I think it is wrong. Then again, I would like to ask why it is found desirable or proper that service in the admiralty court should count in this case.

Mr. W. F. MACLEAN. Some gentlemen want to be called 'judge,' or 'your lordship.'

Mr. FITZPATRICK. No, I do not think it is at all necessary for the purpose of making the resolution applicable to the judges that this is introduced. When the resolution goes into committee I intend to drop that clause.

Mr. SPROULE. I think that makes it a little less objectionable. That is subsection 5.

Mr. FITZPATRICK. I think when we discuss this resolution in committee and my hon. friend (Mr. Sproule) thoroughly understands it he will see it is not objectionable.

Mr. SPROULE. These are my main objections to the resolution. I do not think the principle is a good one, and I do not think that by adopting the resolution we will be making the commission more effective than it has been heretofore.

Right Hon. Sir WILFRID LAURIER (Prime Minister). Mr. Speaker, I have heard upon the floor of this House more than once some extraordinary doctrines enunciated by my hon. friend from South York (Mr. W. F. Maclean)—but I think on this occasion he has fairly excelled himself. He has presented a doctrine which I think he has never heard before, which he has attributed to one party, but which he cannot justly attribute to either party in this country. The hon. gentleman has stated that it is a vicious principle that judges should be promoted from their first sphere of action, that it is a vicious principle that judges should ever be removed from positions to which they are first appointed. Once a puisne judge always a puisne judge. If we appoint a man to be a puisne judge then it is shut out from the government to appoint him the chief justice of the court of which he has been a member. If we appoint a man to be a judge in a lower court it is shut out from the government to appoint him to a higher court. I do not think that such a principle was ever proclaimed by any party in this country. I do not think that it should be admitted by any party, because I think it is a vicious and a wrong principle. If a man is appointed to the bench and if he is found to be a fit and proper person for a higher position, why in the world should he not be placed in the position for which he is fitted ?

Mr. W. F. MACLEAN. Because he will look for preferment.

Sir WILFRID LAURIER. Is there any reason why a judge should be prevented from looking for preferment ? Is there any reason why a judge should not look forward to be the chief justice of the court of which he is a member ? Is there any reason why a deserving man should not be rewarded whether he sits on the bench or occupies any other position ? Or, is a judge to be the only man who is to have no incitement to do good ? Shall virtue be his reward and his only reward ? Has that principle ever been supported? On the contrary, Sir John Macdonald made it a boast that he would select the best men for the positions he had to fill, and we shall see how he did it. Let us take some examples from the courts. The government of Sir John Macdonald promoted Mr. Justice Casault to the chief justiceship of the Superior Court of the province of Quebec. It was also the government of Sir John Macdonald which made Mr. Justice Stuart chief justice. Could any fault be found with the government of Sir John Macdonald on either occasion ? Could better men have been selected ? When Mr. Justice Casault was appointed chief justice of the Superior Court of the province of Quebec, could any other man have been found who was preferable to him ? According to the doctrine of my hon. friend which we have just heard and which has been endorsed to a certain extent by my hon. friend from East Grey (Mr. Sproule), though Mr. Justice Casault was the best man for the position, though he had proven by intelligence, fairness, education and experience that he was the best man for the position, yet once a puisne judge always a puisne judge. If that principle had been adopted the province of Quebec would have been deprived of the services which have been rendered on the bench by a most useful man in his sphere. Then, again, take another example which was afforded at the time the Supreme court was established. True, it was not established by Sir John Macdonald, it was established by Mr. Mackenzie, but the men who were appointed to the bench or most of them were taken from the benches of the provincial courts, Mr. Justice Taschereau was taken from the bench of the province of Quebec, Mr. Justice Strong from the bench of Ontario, Mr. Justice Richards from the bench of Ontario and Mr. Justice Henry

from the bench of Nova Scotia. They were all on the benches of these different provinces. Then, later on Mr. Justice Richards, upon having completed a career of great usefulness on the bench of the supreme court, was replaced. By whom was he replaced ? Did Sir John Macdonald, who had named Mr. Justice Richards as chief justice of the supreme court, go out of the supreme court for a new chief justice? Did he go out amongst the bar ? Sir John Macdonald chose as the successor of Chief Justice Richards, Mr. Justice Ritchie of the supreme court promoting him from the position of a puisne judge to that of chief justice. Later on Chief Justice Ritchie himself was removed and then another appointment was to be made. I forget whether it was made by the government of Sir John Macdonald or not ; at all events it was made by a government of the Conservative party who promoted Mr. Justice Strong to the position of chief justice. I am able to say, and everybody will admit that all these gentlemen were eminently fitted for the promotion which they received, and I have heard for the first time that either the government of Mr. Mackenzie or of Sir John Macdonald, ever did anything wrong when they selected men whom they thought best fitted for the positions and promoted them from the positions which they then adorned.

But, I go farther. My hon. friend stated also that judges should not be appointed on commissions ? Is that a principle of British justice ? Is it the position taken by my hon. friend that no judges may be appointed to be commissioners if there are facts to be investigated ? Let me refresh his memory with some facts which he has forgotten. When the Parnell commission was appointed to investigate a most important affair, who were the members chosen ? There were three judges taken from the bench and they were Mr. Justice Hannen, Mr. Justice Day and Mr. Justice Smith. I do not think in the face of these precedents that the position taken by my hon. friend is maintainable for a single moment. Then again, there was another case. We had thirty years ago a most important question, known as the Pacific scandal, to be investigated, and a commission was appointed by Sir John Macdonald. It was a political affair, the commission was organized to judge and to try a political offence, and who were the commissioners appointed? They were all taken, two of them, at all events were taken from the bench of the superior courts—Mr. Justice Pollette from the province of Quebec, Judge Gowan who was the judge of the county court in the province of Ontario and Mr. Justice Day was a retired judge. Not only that, but I would say to my hon. friend from East Grey, who also thinks that in these matters the example set by Sir John Macdonald was an example that we should always follow, that Sir John Macdonald went much farther. I remember, everybody remembers and hon. gentlemen on the other side of the House have not forgotten, they have no reason to forget—on the contrary they have good and sufficient cause to remember—that an eminent judge of the province of Nova Scotia on a certain occasion was promoted to be what ?—to be chief justice ?—no, Sir, but brought here as a member of the government of Sir John Macdonald, brought here as Minister of Justice. The late Sir John Thompson was a member of the superior court of Nova Scotia and he was taken from the bench and brought here to be a member of the government of Sir John Macdonald. Under all these circumstances I do not know whether the party then in power made a mistake, but, now, because it suits an hon. gentleman opposite to put a slur upon a most honourable man, the hon. gentleman wants to put forward a doctrine of this kind.

Mr. W. F. MACLEAN. Mr. Speaker, I rise to a question of order. The right hon. gentleman (Sir Wilfrid Laurier) says I have cast a slur on somebody. I have cast a slur on no one.

Sir WILFRID LAURIER. I leave it to the hon. gentleman to say if he did not cast a slur on him. If he says not, I shall withdraw the expression. He said that Mr. Justice Killam has been selected by two men who were here lobbying.

Mr. W. F. MACLEAN. I said that the lobby would see that they got a judge, and would use their interest with the government to get a judge appointed.

Sir WILFRID LAURIER. This is what I call putting a slur upon a most honourable man. Mr. Justice Killam has been for twenty years on the bench ; he was not appointed by the party now in office, but by the party of the hon. gentlemen opposite. He was appointed to the Supreme Court of Manitoba, and he was an ornament to the Supreme Court of that province. Nobody ever said a word against him. He was promoted by this government to be a judge of the Supreme Court, and I think it was a good promotion and a well deserved promotion. I think it was a wise action on the part of this government to bring him here to be a member of the highest court of the land, and nobody until this moment ever said a word against him. But, Sir, the hon. gentleman (Mr. Maclean) has propounded extraordinary doctrines to-day. Because we looked about to secure a good man to fill the place of chairman of the commission—the hon. gentleman will agree, I suppose, that there is no more important position in this country than that of chairman of the Railway Commission, and that we want a man of good character, a man of ability, a man of experience, to fill that position—because we looked all over the land to find such a man, the hon. gentleman criticises us. We thought that we had found such a

man in Mr. Justice Killam; we think so still, and I do not believe any one in this House or out of it will bring a charge and say that this is not a good appointment. But Mr. Justice Killam had to abandon a most important position, a position in which he had greater opportunities than he has now; he is a man like everybody else, he has a family to look after, and no one expects that while serving the country he should give up any advantage he now enjoys in order to make a change. Therefore, we introduce this resolution which provides, what? That he shall lose nothing by the change, that he shall continue to have the advantages he has to-day. Yet the hon. gentleman (Mr. W. F. Maclean), in his extraordinary logic, tells us that the farmers of this community will be less secure than they are at the present time, because, as he says, the chairman of the Railway Commission shall not be removed by the government, but by parliament. This is an extraordinary doctrine for a man who poses as a radical. My hon. friend says that to-day, because the chairman, under the law which we propose to amend, is removable by the will of the government—for we have only to pass an Order in Council to remove him—because we propose to put around him more security, more independence, and to say that he shall be removable solely on an address of both Houses, my hon. friend says we have emasculated the commission. This is extraordinary logic. By the enactment we now propose, the new chairman of the Railway Commission will be more secure, more independent of the government, more independent of everybody and more distinctly liable only to his own conscience than before. We thought last year, when we made the appointments to the commission, that it would be safe to have the members removable, as lieutenant governors are, simply by action of the Governor General in Council. We think yet that perhaps that is sufficient, but we say if we appoint a gentleman from the bench, then, in order to have the public possess the same confidence, and more, in that man, he should continue to have the same privileges that he would have if he remained a member of the bench. If we find a man, as Mr. Justice Killam is, eminently fitted for the position, and go to him and say: We want to appoint you to that position, and he says: But I have a good position, why should I leave it? I can serve the country in my present safe and secure position, in which I give satisfaction to the public; why should I go and try a new position that holds out no inducements to me? We come to parliament and say we have selected the man whom we think best for the position, and ask parliament to see that he shall be as secure in the new duties that he is to discharge as he was in the duties he is now discharging, and I am sure that parliament will agree to that very reasonable proposal.

Sir WILFRID LAURIER.

Then my hon. friend (Mr. W. F. Maclean) says that this is emasculating the Act, and is lessening the security which the farmers and the public generally have. If there was a scintilla of reason or common sense—if he will pardon the expression—in his argument, I could understand him, but if he will reflect a little he will agree with me that there is not a scintilla of common sense in his argument. If a man is removable by the government to-day and if he will be removable next year, after this law is passed, not by the government, but by the joint action of the three branches of the legislature of Canada, then certainly he has far more security for himself under the new condition, and if we pursue the logic of the thing to the end, we will see that the people themselves have more protection than they have at the present time. We thought last year that with our mode of dealing with the commission the public were amply protected, but nobody can find fault if to-day we make the protection still more secure.

Mr. FOSTER. In what way would both Houses of parliament remove the commissioner? What would be the method?

Sir WILFRID LAURIER. The method would be the same as in similar cases; there have been cases of impeachment before. A petition would be brought to this parliament, and this House, after having the matter investigated, would pass an address and, the matter being taken to the Senate, an address would be passed in the Senate.

Mr. FOSTER. And if they disagreed?

Sir WILFRID LAURIER. Then there is no impeachment.

Mr. W. F. MACLEAN. Would it be cumbrous?

Sir WILFRID LAURIER. Am I to believe that gentlemen on the other side of the House have come to this, that they have no more faith in parliamentary institutions? Are we to understand that because, possibly, a complaint is brought against a judge, and the two Houses disagree as to his impeachment, that we are to abandon that safeguard? Are we come to this, that the safeguard we give to the judges, that they are to be removed only by addresses of both Houses of parliament, is not a good and safe remedy to the public, because, forsooth, there may be disagreement? If this is the policy of hon. gentlemen opposite, it is not my policy. I believe, on the contrary, that the system which has prevailed in England, and which prevails here to-day, is the best possible policy to guarantee the independence of the judges, and I do not believe that hon. gentlemen will seriously advance any other opinion. These are the reasons why we have introduced this legislation, and I believe it will commend itself to the good sense and good judgment of gentlemen on both sides of this House.

Hon. JOHN HAGGART. Mr. Speaker, as to the appointment intended to be recommended by the government under this Bill I have no objection to raise. I know the gentleman perfectly well; he was a judge in Manitoba and afterwards became a judge of the Supreme Court of Canada. He is a gentleman against whose honour, whose integrity and whose ability, no man says a word. But that is not the question before the House at the present moment. The question before us is the consideration of this resolution. The Prime Minister seemed to be astounded by the doctrine laid down by the hon. member for South York (Mr. W. F. Maclean) as to the position the judges should occupy in this country. The position of a judge in the old country is this: Once he receives his appointment, if it is a county court judgeship or a puisne judgeship, to follow the words of the Minister of Justice, quoted by the hon. member for South York (Mr. W. F. Maclean), he always remains so. That was the doctrine advocated by Sir John Macdonald. I have heard him impress it on this House again and again.

Mr. FITZPATRICK. Lord Alverstone is an exception.

Mr. HAGGART. It is true that the practice was more honoured in the breach than in the observance, but I maintain that it is the principle which is followed in the great country which we admire so much, and whose record we regard with so much attention.

Mr. FITZPATRICK. I may say that the same rule applies in England as applies here. The present Chief Justice of England was formerly Master of the Rolls, and the late Chief Justice Russell was a Lord Justice of Appeal when he was promoted.

Mr. HAGGART. Sometimes a judge in England receives a promotion to the chief justiceship of the court to which he belongs; but the hon. Minister of Justice cannot mention an increase in which a county court judge or a judge of an inferior court, has been promoted to a higher court. The rule in England is that once a man is appointed to a judgeship, he must make up his mind to remain there for the rest of his life, unless he receives promotion for seniority, as I think it ought to be, or for some exceptional cause, in his own court. The rule is a good one. A judge, once appointed by His Excellency the Governor General, is not removable except by impeachment of the Senate and House of Commons. He is placed in that position in order to be independent of any influence, especially from the Crown, that could possibly affect his judgment. The people of Great Britain are so careful to protect the rights and liberties of their judges against any encroachment of the Crown that they insist that no communication shall take place between the government of the country and a judge of any of the courts. What do we meet with here to-day? A set of resolutions showing that bargaining has been going on for a couple of months between a judge of the Supreme Court and the government of this country. The judge is offered the position of chief commissioner. He refuses to accept it unless certain conditions are agreed to. These conditions are set forth in these resolutions. I do not blame the judge. He occupies an important position upon the bench. In that position he is entitled to retiring allowance, and from it he cannot be removed, except by impeachment from this House and the Senate. He tells the government that under the conditions attached to the appointment of a commissioner he will not accept the position, notwithstanding the increase of salary offered. It is a matter of agreement, then, between the government and the judge. Is that pardonable in this country? Is it pardonable or just or in the interest of freedom, that negotiations should be carried on for a couple of months between the government of this country and a judge who is perhaps trying cases in which the government are interested? In Great Britain such a thing would not be allowed; there resolutions of this kind dare not be introduced. As my hon. friend from South York has pointed out, the chairman of the commission has a different position from that of the other two commissioners. They are removable by the Governor in Council for cause, while he is not at all amenable to the government or to this House except under the cumbrous form of a charge being made against him; and that charge must be either that some corrupt influence has affected his judgment or that he has not sufficient intelligence to conduct the business of the court over which he presides. These are the only two reasons for the impeachment of a judge. Under the British North America Act a judge can be removed only by impeachment of both Houses. That is a part of our constitution which we have not the power to alter. I suppose that we would have the power at some future time to alter these resolutions if we thought proper or to make the conditions under which the chief commissioner is appointed, the same as those which apply to the other commissioners. But here is the odd thing about this matter: one commissioner holds his office on different conditions from the other two. Two are removable for cause by the Governor in Council, while the other one is removable only by impeachment of both Houses. Why should there be this distinction? As my hon. friend from South York says, if the government want to improve the commission, let them alter that provision which makes the chief commissioner virtually the dictator in two out of every three cases that come before them. Most of the questions are legal questions, and on these he has the sole

decision. But what I rise particularly to protest against is the fact of arrangements being made between the government and a judge for the purpose of taking him from the highest court in the land in order to make him the chief commissioner. As I said before, nothing can be said against the gentleman who is to be recommended for the appointment. He is capable in every respect of filling the position, because I have heard his brother judges and others speak of him as a man of noted probity, intelligence and knowledge of the law; and I have no doubt that if he is appointed to the position, he will fill it with dignity and with satisfaction to the country. But that has nothing to do with the question under discussion. I never before heard of resolutions such as those before the House, on which the government intend to introduce a Bill for the purpose of carrying out the bargain which they have made with the judge. That bargain is a bad one on principle. The true principle is that no judge, once he is appointed, should ever hope for promotion from one court to another. Once you depart from that principle you render a judge susceptible to political influence. I heard Sir John Macdonald give that as a reason for the non-promotion of Senator Gowan and Judge Clark, both of whom were perfectly qualified for positions in the Superior Courts. Once you depart from this principle, you will make every judge in the country use his political influence in order that he may be promoted rather than give his undivided attention to the honest fulfilment of the duties of his office.

Mr. FITZPATRICK. If that was the rule laid down, why then was Judge Landry promoted from the county court of New Brunswick to the High Court?

Mr. HAGGART. By whom?

Mr. FITZPATRICK. By Sir John Macdonald.

Mr. HAGGART. He never did it.

Mr. FITZPATRICK. The appointment was made by a government of which my hon. friend was minister.

Mr. HAGGART. Sir John Macdonald was dead.

Mr. FITZPATRICK. But you were alive.

Mr. HAGGART. It is the first time I have heard of it. I understood the Minister of Justice to say that Sir John Macdonald did it.

Mr. FITZPATRICK. That was my impression and I am sending for the book. At any rate he was created a county court judge, and afterwards was appointed by the government, of which my hon. friend was a minister, to the High Court of New Brunswick.

Mr. HAGGART. We will take the statement of the Minister of Justice for what it is worth.

Mr. FITZPATRICK. The hon. member for St. John knows all about it.

Mr. HAGGART. It is the first time I have heard of it.

Mr. FITZPATRICK. Ask the leader of the opposition. He has not forgotten it. These general rules are sometimes very awkward.

Mr. HAGGART. There are some principles of good government and righteousness which were observed in every province and throughout the Dominion but sometimes——

Some hon. MEMBERS. Oh, oh!

Mr. HAGGART. Let me say anyway, in all earnestness that the sound principle, when appointing a judge, is to let it be known that he is appointed for life, and never to have any communications with him for the purpose of preferment, especially for the purpose of taking him from his judgeship and making him the head of a Railway Commision, which is to a certain extent quasi judicial. We should never in any case, when appointing a judge, appoint him under special arrangements. I am glad to hear that the Minister of Justice intends dropping the last clause of the resolution in which this condition is extended to judges of the Admiralty and Exchequer Court. I do not know who the judges of the Admiralty and Exchequer Court are. I suppose there are three or four. I would like to know if there is a possibility of a vacancy soon occurring in the Railway Commission and if so who is likely to get it. If my memory is right, there are only two judges of the Admiralty and Exchequer Court.

Mr. FITZPATRICK. There are five.

Mr. HAGGART. There is Mr. Anglin and there are a couple not filled yet. There are two in Ontario, Mr. Anglin and Mr. Hodgins.

Mr. FITZPATRICK. Hodgins in Ontario, Routhier in Quebec, Macdonald in Nova Scotia, and Hunter in British Columbia.

Mr. HAGGART. Just fancy calling this a commission which is to serve the farmers and give them speedy justice. I knew what the result would be of passing this Act, which, as my hon. friend from South York (Mr. Maclean) says, vests the chairman of the commission with more powers than are to be found given a judge by any other Act in the civilized world. We were told that this Act was for the purpose of doing justice between the farmers and the railway monopolies. We were told that its object was to give cheap and speedy jus-

tice to the farmers. The result, I think, will be a disappointment. If the contrary should prove to be the case, I shall be very agreeably disappointed. The resolutions are the most extraordinary I have ever seen introduced into this House. They are for the purpose of carrying out a bargain made with a judge of the Supreme Court in order that he may consent to be removed from that court and placed in a better and more profitable position.

Mr. S. BARKER (Hamilton). My hon. friend the Minister of Justice and my right hon. friend the First Minister have dealt with this matter as if the only question for the House to consider were the fitness of Mr. Justice Killam for the particular position to which he is to be appointed. But that point, it seems to me, is one that has the least possible bearing on the question with which we are dealing. By this resolution, we are not asked to vote the appointment of Mr. Justice Killam. It is simply a general law which we are called upon to enact, and which will place it within the competence of the government of the day to select any judge from any Superior Court in Canada and appoint him to this commission. It is quite possible that in a year, or even less, Mr. Justice Killam, if appointed, may see fit to withdraw from this commission. He may get some other appointment, and then we will have negotiations entered into by the government with another judge of the Supreme Court or some other court mentioned in the resolution we are asked to pass. The result will be that we will have our judges looking forward to the possibility of getting the handsome salary of $10,000 instead of the $7,000 which they receive as judges of the Supreme Court or the lesser sum they receive as judges of some other court. Therein it appears to me is the vice of this resolution. I am not for a moment questioning the fitness of Mr. Justice Killam. Not one word has been said against him in that regard. No one has ventured to cast a slur upon that gentleman in any sense whatever. We all respect him, we all know his capacity, his sterling character. Nobody says a word against him. The remarks that have been made in this connection would have been equally made no matter who should be the judge the government might see fit to select. Therefore we should deal with this resolution exactly as it is, namely, as a proposition on the part of the government to acquire the power by statute of taking any judge from any Superior Court in Canada and appointing him to this office. There is the objection. Judges are human beings and might consequently be influenced by the possibility of getting such a promotion. I do not think that when a gentleman goes upon the bench he alters his nature very materially. He is still subject to all the human weaknesses that he had the day before his appointment; and if before his appointment he sought by political influence with the ministers—or worse still by political influence with gentlemen who have influence with ministers—to get an appointment upon the bench—and no one can doubt that sometimes such influences are used—that same gentleman would hardly hesitate to use similar influences to obtain a position which would give him a handsome increase in his salary. The very fact, as my hon. friend from Lanark (Mr. Haggart) points out, that negotiations have been going on in this case, shows the danger that may occur in other cases

A government having political questions before the Supreme Court for decision—matters, perhaps, involving the fate of the government—might negotiate with a judge for his acceptance of the very handsome salary involved in this commissionership. Surely, that ought to be avoided. Surely, it will not be pretented that Mr. Justice Killam is the only competent man in this Dominion to occupy the position of chief commissioner. We had nearly a year's discussion on the Railway Bill? I do not think it was hinted or even thought of by any person that Mr. Justice Killam was the man of all men who should get the appointment to the chief commissionership. We never heard a suggestion that a man should be taken from the Supreme Court or any other court. But it happens that, at this moment, it is convenient for the government to appoint Mr. Justice Killam. He is a capable man, undoubtedly, and would probably be a fitting man to hold the position. But it will hardly be said that there is only one man in this whole Dominion fit to occupy that position. And, if there is another man anything like equal to Mr. Justice Killam, surely the government should avoid the danger of appointing a judge from the bench, an appointment involving to him a very substantial increase of salary.

But, Sir, there is more, a good deal more, in the case. The resolution is proposed to enable the government to appoint a judge from any superior court in Canada. I presume that would include the judge of the Exchequer Court, Mr. Justice Burbidge. Now, very important questions are constantly coming before the Exchequer Court, cases between contractors and the government involving enormous sums of money. What would be said of the appointment of Mr. Justice Burbidge to this commissionership? What would contractors who had litigation with the government involving many thousands of dollars say, if a judge who might be seeking such a promotion from the government were asked to decide the questions between themselves and the government. Surely the very fact that such a man could be given a reward of that kind would detract from his usefulness. It

would create suspicion. Even if he were not appointed, many people would be inclined to think that he would be influenced by the expectation that such a reward might come to him. I have as high a respect for Mr. Justice Burbidge as for Mr. Justice Killam. I do not mean to say that either of these gentlemen would be influenced by such a consideration. But it is essential that the people should respect and have confidence in the courts, and it is of the utmost consequence, I think the minister will admit, that there should not be even a suspicion against the integrity of our judges. Therefore, I think the government makes a great mistake when it brings in a resolution of this kind, which cannot fail, it seems to me, to cast suspicion upon any judge who might possibly be available for such an appointment.

There is another feature of the measure. The government does not undertake always hereafter to appoint a judge from one of these superior courts. If they appoint a man, who is not a judge, whether a railway expert or a lawyer, or a combination of the two, that appointee may be a man equal in every respect or even superior, as the occupant of such a position, to Mr. Justice Killam. Yet, such a man, being appointed after this resolution is carried and becomes law, will be dealt with differently from a superior court judge. He will be dismissible by the government whereas an appointee from the Superior Court bench would not. Why such a distinction? Why should a thoroughly capable man appointed from any rank in life, if fit for the position, be put in a worse situation than another simply because that other had been a judge? This, it seems to me, is an invidious and unnecessary distinction. This resolution speaks of a 'Judge of any Superior Court in Canada.' I do not know whether the Minister of Justice can refer us to any Act which defines the meaning of 'Superior Court in Canada.' I know that the Revised Statutes of Canada have a definition for these words and that definition would not include the Supreme Court. But, there may be another Act.

Mr. FITZPATRICK. That point was considered in connection with the drafting of the resolution.

Mr. BARKER. I can only say that it would have been better to use some other words than these, because, under the interpretation clause of the Revised Statutes, the expression 'superior court,' applies to certain courts in the various provinces. This might cast doubt upon the question whether the very gentleman sought to be appointed would not be excluded by the wording of the resolution.

Mr. W. F. MACLEAN. We hope so.

Mr. BARKER. We do not want to pass a resolution which will not do what it is intended to do. I submit the point for the minister's consideration. My contention is, however, that there is no justification for the resolution unless the government tell us that throughout this whole Dominion they cannot find a man for this position without taking a man from the bench. Unless that is the case, the government should avoid interfering with the independence of the judiciary. It all comes to that, to my mind. I would not have any one suppose that I have any doubt of Mr. Justice Killam's capacity and integrity. But, an injury will be done to the judiciary of this country, if this resolution is passed.

Hon. GEORGE E. FOSTER (North Toronto). I have a few observations to make, but I promise the House I will not occupy much time. In the first place, the very fact of bringing down a resolution of this kind to fill a vacancy which formerly was filled by nomination of the government, I think, called for at least this courtesy to the House, that either the minister who introduced it or the First Minister who spoke upon it should have given some reasons why this position became vacant. This resolution is introduced because of the resignation of the former chief of the Railway Commission. That gentleman was an appointee of the present government. He was an appointee of the present government under somewhat peculiar conditions, and we must not forget to hold a government responsible for all its appointments, as well as for the grievances and losses which result from those appointments.

There was a peculiarity about the appointment of that gentleman to the head of the commission in its very inception. Here was a member of a government, on an equal plane with the other members of the government, who had charge of a special department, in the line of which department this appointment and this legislation lay. The members of that government had not sufficient confidence in their colleague, their representative, the Minister of the Railway Department, had not sufficient confidence in that minister to give him the place that he should have had in the inception, the negotiations and, I may say, the completion of certain business matters culminating in legislation which had to do entirely with that gentleman's department. Under those circumstances, no self-respecting man could have remained in the position which he occupied, and consequently there was a resignation. Now, this question arises, a pertinent question: If there were a Minister of Railways appointed because of his fitness for that position, because of his special knowledge with reference to railway matters, but who had so far forfeited the confidence of his colleagues that they would not entrust him with the negotiations of what fell particularly to his department, it must have been because they considered him

unfit to undertake these negotiations and carry them through to their fulfilment. If he were unfit for that, by what process of reasoning was he considered fit for taking the chairmanship of a great railway commission such as this ? Is the old evil the same evil to-day, that hon. gentlemen in the ministry look upon office, not as a sacred trust of the people, but as a plaster to bind up, and to heal, so far as they possibly can, the exigencies and the wounds of the party ? Now, I wish I could make that even more emphatic than I have. That parliament and that country are taking a step in a perilous direction when they lose sight of the fact that the offices of the country are a sacred trust for the good of the country, and are not simply means by which the exigencies of a party may be met and overcome. The initial difficulty in this appointment to that Railway Commission lay there, that it was to get the party out of a bad fix that they appointed to that office the man in whom they had declared their lack of confidence, that made him the chief officer of that commission, lauded him to the skies as the man especially fitted to take hold of it ; and within a few months we find him equally under that old delusion that an office of trust and emolument in the interest, and to be carried out for the good of the people, was to be looked on as a pawn upon the board for the especial interest only of one man, the office holder.

It was incumbent upon the First Minister or the Minister of Justice to say to-day what circumstances intervened of such overshadowing and overwhelming importance and urgency, that the responsible commissioner, having heard cases which could not be decided unless he remained to give the decision, and having heard them by dozens and scores, perhaps hundreds, involving grievances of the people which, for seven months, had been exposed before the tribunal and all the evidence collected, and that then, without a thought as to the people, without a thought as to the gravity of the questions, without a thought as to the results which would take place if he hurriedly left that office, without having made arrangements with his co-commissioners, but simply looking upon the office as a private appurtenance, left his position and brought all this damage and harm upon the country. It was incumbent upon the First Minister, it is incumbent upon the government, to give to the House the especial, the overwhelming, the urgent reasons that made it necessary for the chairman of the Railway Commission to act in the way he did. Does the country know of any such reason ? Has the world turned upside down suddenly since that gentleman left the chairmanship of the Railway Commission ? We have not heard that he has been called to give advice to the Czar of Russia, or to the Emperor of Germany, or even to the King of Great Britain. We find that there is great public concern in this matter. Why could he not have remained there for a fortnight, for three weeks, for a month, and done his duty ? That duty not being done, the fault for it not being done, is placed on the head of the men who made the appointment. And yet, Sir, these gentlemen think that parliament is so much of a dumb show that they do not need to act as sensible men ought to act, sensible men representing the government, and give a reason for the action in this matter. Either they were wrong in their choice, and they, therefore, have to take the responsibility, or there must have been some urgent reason, and it would be easy for these gentlemen to give that reason if such reason existed. So I say I am here, and I think we ought to stand here and say that we need an explanation on this point, and that for all the damage, and loss, and delay, which have occurred, this government must be held responsible, because incurred through the action of their own appointee.

So much on that phase of the subject. There is another point I wish to touch upon. I am here to assert that, so far as I have been able to read the cool judgment of the country, the commission appointed by hon. gentlemen opposite did not come up to the importance of the duties which were to be performed by that commission, did not go so far as the country thought they ought to go. I listened whilst my hon. friend the Minister of Justice read the almost autocratic powers which are placed in the hands of that commission. From the inception of the incorporation of a railway company, the principles upon which it ought to be organized, the conditions which ought to be attached to it, until you get out into that wonderfully complex work of fixing rates and tolls upon the traffic of a country like this, with its diversity of sections, its long hauls and its short hauls, and everything in connection with that, it seems to me that there is no set of duties you can conceive of, which require abler, stronger, more experienced and better versed men than those duties which are imposed upon the three railway commissioners by the law passed in 1903, under which we are now acting. Now, I do not say anything personally of the commissioners ; but I do say that the formation of that board in the first place did not, in its selection, meet the exigencies of the case, and did not meet the reasonable and, I think, well warranted expectations of the business men of this country.

What have you ? You have a gentleman as one of the commission who, though very estimable, perhaps, does not bulk before the public as being a man versed in large business affairs, in the great traffics of the country, in the currents of its trade and in all those complex problems of transport and distribution which meet the railway commissioners almost in every case. I leave

that to the sense of this House. But, there was another reason and a very good one. A colleague had to be provided for, a vacancy had to be made because there was some one else who wanted a vacancy made and between the government who wanted to make a vacancy and outside influences that wanted a vacancy to fill the unoffending and mild-mannered gentleman who filled the position of Minister of Inland Revenue at that time had to be got rid of and he could not be got rid of unless a place were found for him. There was a convenient place found and into it he went. Does any man sitting in this House believe really in his heart of hearts that you could not have gone through this country and found amongst its business men a better representative for this work than even that gentleman whom I personally respect very highly? I will not pursue the personnel of the commission further. I will say this that it struck the country that men of expert knowledge, men thoroughly well versed in the business and trade currents of the country and in technicalities of railway administration, were not the kind of men who were appointed upon that commission. I am in favour of a railway commission. I acknowledge that this is one of the most complex, one of the most difficult problems that ever was given into the hands of a set of men to carry out. It is not simply the farmers who have interests at stake but I have just as much solicitude in another way for the carriers of this country whose interests are at stake as well and when you come to adjudge between all the delicate questions, between the freight producers of this country far and wide and the freight and produce carrying portion of the community, when you come to adjust these delicate questions as to interests impigned, when all interests may be heard and equally as well all interests may be made better and may be helped by this commission what is the principle that should guide you? The very first thing that should have been done was not to find places for political adherents, that two of these places were found for and nothing else. The exigencies of party, the desire to provide a place for a man that they no longer wanted to keep in the cabinet; and the desire to find a place for another gentleman whom they despised in their hearts, from whom they had withdrawn their confidence and whose influence and power they dreaded at the time of the coming election, caused them to make these appointments. So much for that branch of the question.

Now, I want to go to another. I am not going to lay down any principle as to puisne judges, or county court judges, or promotions in any way. I am not an authority upon that subject. But, if I can give a common sense view I will leave it to the members of this House to say whether this principle is a good one to be adopted in this country. If from a junior county court judge up to the Supreme Court it is known that there is a possibility of promotion from the lowest to the highest, and that it can be got if you can bring the proper influence to bear upon the appointing party I want to know if that conduces to the stable and equable frame of mind that should characterize justice in this county? Why, Sir, a lawyer who is appointed as a judge has to leave behind him all party and political considerations. They should never again enter into his judgment. He becomes the protector of the grievances and the innocence and the rights of the people of this country in the sacred name and in the majesty of the law. He should put aside from himself all thoughts of political preferment, should give his whole attention to his justice and his law and his equity, and if he has promotions in view they should be promotions which come only naturally within the sphere of his own proper administration of justice. How different it is! If you establish one political office can you not establish another? Is this a political office or is it not? It is a political office. It is a political office just the same as a post office inspectorship is a political office, It is a political office just the same as the position of an officer of the Marine and Fisheries Department is a political office. Here you have a political office and you have the statement made to all these superior court justices that it is possible for any one of them at some time, if he can only bring the proper influence to bear to become the recipient of that office. Does that militate in favour of or militate against a proper and equitable administration of justice? If you can create one you can create another and you may have a series of political appointments to which judges may look for a betterment of their salaries and their positions, provided they can make sufficient court in order to get the appointments from whom these appointments come. In the matter of judges and in the matter of the appointment of the judges it has been a credit to our country in the past, and I hope it will always be that politics do not enter as an overwhelming consideration into the appointments of judges. They have been appointed for their fitness. When they went on the bench they were supposed to be dead to all the currents and excitements of political and party work, to have gone into the serene, staid and steady atmosphere where justice is administered and the laws are interpreted to the people of the country. You can quote all the precedents you like for having judges translated from a lower position to a higher in his own court and in his own sphere, but it is outside of that entirely when you create a separate political office and make it possible for judges to look to that office for a betterment of their salaries and positions.

That is why I think it is not the best thing to do and will not have the best influence upon the judiciary and justice of this country. Now, I want to ask my right hon. friend (Sir Wilfrid Laurier), a question: Did he and the hon. Minister of Justice (Mr. Fitzpatrick) sit down together and approach the question something like this: We have lost our dear chairman of the Railway Commission.

Mr. FITZPATRICK. By whose fault?

Mr. FOSTER—If anybody knows the government ought to. He was their servant.

Mr. W. F. MACLEAN. They are responsible.

Mr. FOSTER. We have lost our efficient chairman of the Railway Commission, now we must sit down and legislate on this business of a chief commissioner. What are the proper lines that we ought to lay down, what the conditions, what the salary in order to ensure that we shall get the very best talent we can get in this country to act as chief commissioner? Did they sit down and first make the legislation on general principles and then seek their man according to that legislation? I will warrant you that neither of them will rise in his place and state that that is the case. They are legislating from a particular point to the general. They do not legislate on general principles and then choose the particular person to fit into that broader legislation. There is every evidence that they went first to find out the terms on which they could get the judge to act and then after a month or six or eight weeks of pourparlers, more or less intimate and confidential, they found out the lowest terms the judge would accept and then made legislation to suit his demands. Let me put a question to my right hon. friend. He takes credit to himself for providing that this chief commissioner shall be removed even from the rude hand of a ruthless government and placed where he cannot be removed until parliament in both its branches acts. Is that a right principle? If so, why not apply it to any chief commissioner whether he be a judge or not. Does my right hon. friend mean to say that from this time forth no one but a judge of the Supreme Court shall be a chief commissioner? He will not take that ground because any good government looks over the whole field to see which is the best man. This government looks over the field and says Mr. Justice Killam; another government may look over the field and say: Here is the best man in Canada but he is not a judge of the Supreme Court. They will approach him and ask: Will you take the chairmanship—but he is told at the same time: My dear man, you are capable of filling this position, you are the ideal man in every respect, but you are not going to get as good a position as would be given to a chief commissioner if he happened to be a judge of the Superior Court; we cannot give you the emolument or the conditions that were given to the late chairman, because he was a judge and you are not. Why should he not have the same salary and the same consideration? I doubt very much if any self-respecting man, not a judge, will hereafter accept a chief commissionership when a judge for any reason, has vacated it, unless you give him as good a position as you gave to the former chief commissioner. You may have a lawyer who knows much more law than any judge, a man who has a wide knowledge of the business of the country, who could fill the position just as well or better than any justice of the Supreme Court, and why, in the name of common justice and fairness, should he not be paid according to the work done, according to his merit and according to the value of the man who does the work. I object to this legislation because it makes a distinction where there should be no distinction, and I ask the Minister of Justice if it would not be better for him to introduce legislation by which, no matter who the chairman of the commission shall be, he shall have the very same emolument, the very same conditions of affluence, safety and permanence as a judge would have if he were taken to fill that position. Surely there can be no getting away from that. It may be that four years out of the House makes some change in a man's way of looking at things, but I do not suppose that even with the perfection to which caucus government has gone in these latter days, my right hon. friend called in all his followers together and went over this resolution page by page and got them all to say: That is the perfect thing and we will stand by you in that. I imagine that most of the hon. gentlemen who sit opposite knew nothing about what these resolutions contained until they were brought down and placed on the order paper, and it did seem to me peculiar—may be it is inevitable—that the very moment they came out, everybody on the other side of the House felt that he had to stand by this and not urge a word in criticism of the resolutions. Not one of the vast surplusage of talent on that side of the House had a word of criticism. We saw the same thing the other day on the Seeds Bill, and to-day again on this resolution; no man seems to think he is there for any other purpose than to say 'ditto' to what the government says, Let us stand for every line, every dot and every vowel of what the government proposes to do. But are we not here to-day to make this measure as good as it can possibly be made? I do not wish to do anything but to make this as good as it can be made, but I deplore the discriminations which have been introduced into this legislation. I think you should make the same legislation

for your chief commissioner no matter who he may be, a judge or anybody else, for you certainly must contend that when you appoint a chief commissioner, you are getting a man who will fill the contract and do the work. If you get such a man you ought to make his position equally as good as that of his predecessor or his successor. I am also opposed to the principle that this chief commissioner, simply because he is a judge, shall only be displaced by the action of both Houses of parliament. When you have a chief commissioner who is not a Superior Court judge he will not be in that position ; the Governor in Council may dismiss him for cause ; but in the other case simply because he is a judge you make the other provision. I do not believe it will be found to work well, and I think the very same provisions that are in this legislation should be adopted for whatever man holds the office of chief commissioner, whether he be a layman or a judge from the Supreme Court. Now I am not going to carry my criticisms any further ; these are just the thoughts that came to me as I listened to the discussion and as I read the resolution. There is no use trying to import into this discussion a charge that we on this side are saying something against the judges. If the Minister of Justice had not mentioned Mr. Justice Killam's name no one would have known about the matter ; what we were discussing was simply the abstract resolution, no matter whether the appointee be a judge, a duke or simply a man of business. It is cheap party tactics to try to force on us the odium that we are objecting to the character of the judge. I am not going the least step in the direction of suggesting that Justice Killam would be influenced by the corporations, and it is idle to attempt to use that argument against us in any sense. In the first place, we want an explanation from the government as to why their appointee left the office in the way in which he did and with the haste with which he did. We have received as a parliament no explanation of that whatsoever. My second objection is to the distinctions in position which are made by this Bill where no distinctions exist in merit. I would have the chief commissioner placed on exactly the same plane and level as the other commissioners, whether he happened to come from the Supreme Court or was a man who had not been a judge previous to his appointment to the commission.

Mr. H. J. LOGAN. Mr. Speaker, I am sure that we have all enjoyed the eloquent remarks of the hon. leader of the opposition (Mr. Foster) upon this very important question, especially that part of his remarks in reference to the promotion of judges from inferior courts to superior courts. It requires a great stretch of imagination for us to believe that in the year 1893 the hon. gentleman who now leads the opposition was one of the cabinet ministers from the province of New Brunswick. It is a well-admitted fact that the judges in a province are generally appointed on the recommendation of the cabinet ministers from that province ; and on that occasion Mr. Justice Landry, who was then a judge of the county court of the county of Kent, was promoted to a superior court judgeship on the recommendation of the present hon. leader of the opposition. And yet, Mr. Speaker, we have been to-day for a considerable length of time lectured upon the enormity of the crime of promoting judges from an inferior court to a superior court.

Mr. A. JOHNSTON. It was in a moment of weakness.

Mr. LOGAN. My hon. friend who has said that it was in a moment of weakness, should have quoted another adage even older than that : 'Consistency, thou art a jewel.' If there is any man in Canada who should not have a single word to say about promotion from an inferior court to a superior court, that man is the present hon. leader of the opposition ; because I believe that that was one of the few cases, if not the only case, in the Dominion of Canada in which a county court judge has been promoted to the position of a superior court judge.

Mr. HAGGART. Perhaps the hon. gentleman can tell us whether it was Sir John Macdonald who made the promotion.

Mr. LOGAN. My hon. friend heard me say a moment ago that it was in the year 1893.

Mr. HAGGART. Then, the Minister of Justice was mistaken.

Mr. FITZPATRICK. I was mistaken ; but the hon. gentleman gave the explanation when he said that unusual things occur in New Brunswick.

Mr. LOGAN. I will admit that it was not the government of Sir John Macdonald; but it was a government of which the present hon. member for South Lanark (Mr. Haggart) was a distinguished member, that established the precedent by promoting Judge Landry, I believe a very eminent judge, to the Superior Court.

Mr. HAGGART. Perhaps the hon. gentleman does not know the fact. I do not know that the council were ever consulted in reference to the appointment of a judge.

Some hon. MEMBERS. Oh, oh.

Mr. LOGAN. I trust, Mr. Speaker, that there was not a bolt in 1893 as well as in 1896. I presume that the Governor General in Council made this appointment, and if my hon. friend from South Lanark was not present in council, and was not consulted in the matter, he would not presume to say that the hon. member for North Toronto

(Mr. Foster) was not consulted, he being the minister for the pronvince of New Brunswick at the time. Many instances have been cited here to-day of the promotion of puisne judges to chief justiceships, because of the eminent fitness which they have shown for the higher position. That practice has been fairly well established in this country. Many instances have been mentioned here to-day, not only in Canada but in Great Britain. If I mistake not, the Hon. Mr. Justice King, a gentleman than whom none better or brighter ever adorned a court, was promoted from the Supreme Court of the province of New Brunswick to become a judge of the Supreme Court of Canada, on the recommendation, I presume, of the hon. member for North Toronto, who was at that time the minister from the province of New Brunswick. We might go on giving other instances; but, after all, the question whether a judge should be promoted from an inferior position to a superior one, is a question whether he possesses those eminent qualifications to fit him for the higher position.

I regret that the hon. leader of the opposition to-day endeavoured to create a distrust and disrespect in this country for the Railway Commission. He stated that two of the appointments to that commission had been made for political exigencies and for nothing else. Well, Mr. Speaker, that commission is a semi-court of this country, and we should endeavour, it seems to me, to inculcate the idea in the minds of the people that that court is one which knows what it is doing, and will hold the scales of justice even as between all parties. When the commission was appointed, the Hon. Mr. Blair was made its chairman. Mr. Blair, I believe, was eminently fitted for that position. No man on the other side of the House up to to-day has ever risen to say that, from his knowledge of law and his experience in this House in connection with the Railway Act, he was not fitted to be chairman. The government, I know, were blamed, even by their own supporters, for appointing a man who had differed with them on a very important question; but the government rose to the occasion, and, though he did not agree with them in regard to the transcontinental railway project, they decided to appoint him, because they believed him to be the best man for the position; and my hon. friend the leader of the opposition did not complain of the appointment. But the time came when Mr. Blair suddenly, in the twinkling of an eye, while many cases were standing for judgment, resigned his position; and my hon. friend asks the government to-day for an explanation of Mr. Blair's resignation under these circumstances. I think the answer to the question, why did Mr. Blair resign, should be given by these hon. gentlemen. The government cannot explain it—there is no question about that. It is beyond explanation on this side of the House; but our hon. friends on the other side, who formed a partnership with a gentleman who said that he had persuaded Mr. Blair to resign, should explain to this House and to the country why it was that their political agent, their partner in political crime at that time, made that statement.

But no explanation comes from the other side. Mr. Blair was appointed by this government because they considered him the best man to fill the position. But why was he persuaded to resign, and how comes it that he did resign at so opportune a moment for hon. gentlemen opposite? What are the facts, as near as we can gather them, and no doubt they will all be public within a few months. The facts are that these hon. gentlemen opposite knew of Mr. Blair's resignation before the government were aware of it. They proclaimed to the world that inside of a certain forty-eight hours he would take the stump. Why was it that the chief Tory organ in the Dominion, the 'Montreal Star,' proclaimed that Mr. Blair would take the stump. How comes it that the 'Star' knew of Mr. Blair's resignation even before the government knew it. These are questions which hon. gentlemen opposite should answer in order that the people may be on their guard against similar political bombshells that may be sent out in any future campaign. But when Mr. Blair did resign he was elevated by these hon. gentlemen to the highest of political fame. They proclaimed him the saviour of Canada. They sang his praises ad nauseam. This country was made blue by their fulsome eulogies from one end of the country to the other. Not only did they sing his praises upon every platform and in every Tory newspaper in the land, with perhaps the possible exception of the 'Toronto World.'

Mr. MACLEAN. Hear, hear. A sound newspaper.

Mr. LOGAN. Not only did they do that but it is a fact, which I think will be proved in time, that these same gentlemen agreed that if the government should be defeated by their efforts assisted by the diabolical machinations of men who should have kissed the hand of the Prime Minister rather than have endeavoured to pierce his side, they would make him Minister of Railways. I repeat it is the duty of these hon. gentlemen to explain to this House and the country why Mr. Blair resigned from the railway commission.

At six o'clock, House took recess.

After Recess.

House resumed at eight o'clock.

SECOND READING.

Bill (No. 22), respecting the Calgary and Edmonton Railway—Mr. Oliver.

BOARD OF RAILWAY COMMISSIONERS.

Mr. G. W. FOWLER (King's and Albert). With the major portion of the resolutions before the House I have no fault to find. They are not in accord with my views respecting these matters, but they are in accord with the custom of the country as it has been ever since the Canadian colonies acquired the right of self government. But to the first portion of the resolutions I do object. I fail to understand why a resolution of this kind should be brought down to this House, particularly in view of the very explicit statements made to this House and to the country when the Bill to establish the Railway Commission was under discussion. I do not see why, because the chief commissionership is to be given to a judge of the Supreme Court, he should be treated differently from any other person who might be chosen for that exalted position. And I fail to see why it is necessary to take a judge from a Supreme Court bench to fill this office. Surely it speaks but ill for the talent and ability within the ranks of the Liberal party, if it is necessary for the government to go to the Supreme Court for a chief commissioner. There are hundreds of men within the Conservative party as well qualified for the position as is Mr. Justice Killam, however high his attainments may be. I have not a word to say against Mr. Justice Killam. I have not heard all this debate, but I believe I am right in saying that no member on this side of the House has made any attack upon him in any way. Mr. Justice Killam's character or legal attainments are not in question here. But what is in question is the proposal to make an exception of Mr. Justice Killam's appointment to the chief railway commissionership, and, as already pointed out it seems to me that great danger lies along this line. It would be much better if he were placed upon the same footing as any other person who might be offered this appointment. My own belief is that any judge appointed as puisne judge should have no opportunity even to become a chief justice, to say nothing of receiving political appointments. However, as I have said, it has been the custom to allow these promotions ever since this was a self governing country, so I do not quarrel with that part of the resolution.

I would not have spoken on this subject, had it not been for matters being dragged into this discussion which really have no place in it, though, perhaps, incidental to the subject. The hon. member for Cumberland (Mr. Logan), who spoke last, tried to connect the Conservative party with what he alleged to be a plot or conspiracy to defeat the Liberals in the late election. I wish to give a categorical denial to the charges that the hon. gentleman hurled at this side of the House. There is not one atom of truth in any of these statements. Not an ex-member or a member of this House on the Conservative side, or anybody having authority to speak for the Conservative party was mixed up in any way with a scheme, plot, conspiracy or whatever these hon. gentlemen choose to call it with Mr. Blair or any person on his behalf. They ask why did Mr. Blair resign his chief commissionership? Why Mr. Blair has told us. He says he resigned in order to reiterate his strong opposition to that most iniquitous scheme, the Grand Trunk Pacific Railway. But I would ask hon. gentlemen a question: Why did not Mr. Blair reiterate his strong objection to that Grand Trunk Pacific scheme? Let hon. gentlemen on the other side answer that particular question.

Mr. A. JOHNSTON. Ask Dave Russell.

Mr. FOWLER. If I were to ask anybody I would go to a person higher up than Mr. David Russell.

Mr. A. JOHNSTON. Ask Hugh Graham.

Mr. FOWLER. I would go to a person higher up than Mr. Hugh Graham, if I wished to find the person who had the authority and the personal knowledge to answer the question truthfully as it should be answered. We who read the newspapers remember an account of a certain interview between Mr. Blair and a certain person prominent in the Council of the Liberal party. And even the sanctity of the Sabbath day was invaded by these counter-plotters. They did not respect the holy calm of the Lord's day itself. And, Sir, if the secret history of that interview is ever written, if what took place is disclosed, nothing will be shown that should make any Conservative ashamed. If this investigation that the hon. gentlemen opposite are talking about is held, perhaps the two high contracting parties to that interview will be called before the investigating committee and will be asked to tell under oath just what passed in that particular interview on that particular Sabbath day. Plots! They say there was a plot that a certain prominent lawyer in Montreal and certain promoter in Montreal, both Liberals——

An hon. MEMBER. Oh, no.

Mr. FOWLER. Certainly. They are the arch plotters always. They say there was a plot between these gentlemen and Mr. Blair and some other persons, to do, what? To stab in the back the leader of this House; destroy his government and set up another. Well, it is not the first time by any means that we have heard of plots within the ranks of the Liberal party. I take up the Ottawa 'Free Press' to-night, the leading Liberal organ of the Capital, and I find there an account of a plot in the Liberal cabinet of Quebec, to stab in the back the premier of that province. Why, it is only a case of history repeating itself. If there was a plot to destroy the prime minister of the

Dominion, it is only another Liberal plot such as we have known before.

The honourable member for Cumberland (Mr. Logan) is a splendid exponent of political morality. If we are correctly informed, a gentleman answering to his description, and with just as much right to a vote in the late election as he has, presented himself at one of the polling booths in this city at the late Ontario provincial election and attempted to vote, it cannot be possible that a small city like this contains within its necessary narrow limits two gentlemen of such magnificent form and such perfect beauty of face as the hon. gentleman and his double—if he has a double. Therefore, we are forced to the conclusion that it was the hon. gentleman himself, the member for Cumberland who presented himself at that polling booth in the city of Ottawa and attempted to vote in the late election. Well, Sir, the hon. gentleman has told us that we should kiss the hand of the prime minister rather than attempt to pierce his side. I do not know what he meant by that, but I want to say that is not the kind of osculation that hon. gentlemen on this side prefer. It may suit the hon. gentleman to kiss the hand of the premier; it may suit the hon. gentleman to kiss the foot of the premier; it may suit him to kiss any other part of the anatomy of the premier he may prefer—but when it comes to a game of that sort, I think I am entitled to speak for my hon. colleagues, and to say that we wish to be counted out.

Mr. LOGAN. That is about your sort.

Mr. FOWLER. It seems to be about the hon. gentleman's (Mr. Logan's) sort, and he was the gentleman to whom I was referring.

Mr. LOGAN. Nice language.

Mr. FOWLER. I do not think the argument he put forward, or the argument he attempted to bring into this debate, has tended to the dignity of the debate. The hon. gentleman threw down the gauntlet; he gave the challenge to this side of the House; and if he has got the worst of it, he has only himself to blame. As far as I am concerned I propose to vote against this resolution.

Mr. A. C. BOYCE (West Algoma). Mr. Speaker, I am glad as a new member of the House to have had an opportunity of listening earnestly and carefully to the debate on these resolutions which have been offered by the hon. Minister of Justice (Mr. Fitzpatrick). They contain within them the elements of a great many deep principles which are involved and by which the country will judge this House. They contain a collection of principles which it is of the utmost importance that hon. gentlemen on both sides of the House should consider carefully before consolidating in a measure of this importance. I do not know that I can add much light to what has been enunciated in support of or in opposition to these resolutions, but I am constrained by the attitude which has been taken by hon. gentlemen opposite to add my quota, my mite in opposition to this legislation, because of the principles which are involved in them or rather because of the want of principle. The question at issue is not the irrelevant question which has been dragged into this discussion as to whether hon. gentlemen on this or that side of the House, or hon. gentlemen who have since passed from the scene, revered statesmen of Canada, or hon. gentlemen still in the House and holding prominent positions therein, have committed themselves to principles such as are inculcated in these resolutions. We are beside such questions at the present time. They are wholly extraneous, and foreign to the question under consideration. We should lift the plane of this debate a little higher, we should elevate it to the point of declaring that we are prepared to enunciate in concrete form on the statute-book or in the shape of a resolution the principle which we have always upheld and which certain hon. gentlemen on the other side of the House have always upheld and stood for, namely, that the judiciary of our land is separate and apart from all political influence, is entirely free from all influence and is uninfluenceable. If the belief be involved in this resolution that the judiciary is not to be free, as it has been free in the past, notwithstanding some errors and mistakes, which have been pointed out by certain hon. gentlemen opposite, errors capable of explanation in connection with particular circumstances, if there be involved in these resolutions of the hon. minister a desecration of those principles which are applicable to the judiciary and for which this country has long struggled and to which we have been committed, then I say we are lowering the plane and lowering the standard of the judiciary in Canada. It is not an answer, although it has been admitted and I am sorry to say it has been the only answer we have had so far from the other side of the House, to the very clear and forceable enunciation of the principles involved in the discussion on the part of the opposition that those on this side of the House, or certain other gentlemen who have been on this side of the House, have been guilty of similar acts, or have adhered to principles, or have made mistakes which are now deplored from this side of the House. The cry of tu quoque was ever a dangerous one. We have had it enunciated very recently in the provincial elections in the province of Ontario. We have seen the people rise in their might as against an hon. gentleman who had led the legislative assembly in the province for many years, and who, from the hustings, defended his own party on the cry that the

other side was just as bad. It was not an answer to the question as to whether the judiciary shall be impugned, as to whether efforts shall be made to lower the standard of the judiciary and to drag it into the political arena to say that such and such an appointment had been made in the past when such and such a party was in power, but I should have been glad personally had I been able to listen to arguments from the other side of the House in support of these resolutions along a higher plane than the mere throwing back of charges that similar mistakes have been made and similar principles enunciated by hon. gentlemen on this side of the House. To what purpose are these resolutions offered ? They are to the effect that from henceforth it can be said, by reference to the records of this House, that hon. judges, when they are, as we suppose, removed from political preferment and from hope of preferment, are as a matter of fact not so removed, that they are still open to further preferment, to be removed from the high positions to which they are promoted, and that they may look for greater preferment along political lines. I always had the idea, Sir, that when a gentleman from the bar was elevated to the bench he was removed from all political influence and from all political associations. I was under the impression, having great regard and respect for the judiciary, and desiring in every possible way to uphold it in its pristine purity, that when a member of the bar was elevated to the bench he was politically dead as far as political preferment or political associations were concerned, but here we have had introduced resolutions involving a reversal of that salient doctrine. We find that even so far as the chief justice of the supreme court is concerned he may, after he is elevated to that high office, look forward hopefully and may strive earnestly, and there is no objection to his doing so, for that preferment which can only take place by reason of political favours being granted to him by one government or the other. That, Sir, is an insidious principle to advocate, it is aiming a blow at the prop and pillar of the judicial system of this country, and it is a blow which I verily believe hon. gentlemen on both sides of this House, as well as the great people of Canada, will have reason in the future deeply to deplore and vainly to regret.

There have been chapters in recent history—hon. gentlemen on this side of the House have referred to them—where distinguished members of the judiciary, men who are entitled to the utmost respect, and for whom I as one entertain the most profound regard, have been dragged into the mire of politics merely by reason of the acceptance of political commissions such as is now to be put upon a chief justice of the Supreme Court of Canada. Is that an elevation of the standard of our judicial system ? Is it a thing to be encouraged. Is it a thing to be lauded to the skies, to be applauded by the hon. gentlemen who introduced this measure and are advocating it ? Is it not rather the commencement of the lowering of the standard of that judicial system for which we all entertain great veneration ? Sir, I desire to enter my feeble protest against such an interference as is now being made upon the judicial independence of this country, as has been well and cogently set forth by hon, gentlemen on this side of the House. I hope that this is not a question of political necessity, I hope that these resolutions do not grow out of expediency.

We had a challenge from the other side recently, from the hon. member for Cumberland (Mr. Logan) I think, to demand an explanation of the reason why the Hon. Mr. Blair resigned the chairmanship of this commission. Well, Sir, however strange, however ridiculous that challenge may be, I would ask hon. gentlemen opposite whether it would not be more pertinent to ask them to explain, whether it does not rather lie at their doors to answer the question why Mr. Blair was appointed to the chairmanship of the Railway Commission in the first place ? What were the necessities, what were the qualifications and what were the expediencies, if the necessity did not exist, for that appointment ? It was an extraordinary thing to contemplate. We see that hon. gentleman, finding that the government of which he was then a member was not in accord with his own ideas, resigned his portfolio in the government and that he then received probably the highest appointment within the gift of the government. I say it is an extraordinary thing to behold what is now taking place, as is apparent from these resolutions, a transaction, a negotiation between the government and a judge of the Supreme Court of Canada. That, Sir, is a principle which, having due regard to the upholding of our judicial system and the creation of that profound respect which we all have for it, cannot be encouraged and cannot be extended. It is the commencement of a danger that will increase, it is the first step towards creating a great difficulty in the future, it is sowing a seed which may spring up later on and produce a direful harvest. When it is necessary, when it is desirable or expedient for the government of the day to choose for this high position a judge of the Supreme Court to fill a political appointment, then I say there is the commencement of a state of things which it is undesirable to approve of or to continue.

If it can be said that this appointment might be made elsewhere, that there are other gentlemen, as undoubtedly the House knows well is the case, qualified for this exalted position, possessing perhaps more business qualifications than are possessed by the estimable gentleman whose name

has been mentioned, then why not make the appointment without regard to the judiciary? Why establish the precedent which will create emulation and rivalry and political aspirations among the members of the judiciary. Where is the necessity for it? And if the necessity does not exist why drag political expediency into the judicial system of this land? Sir, I would rather have heard from the Minister of Justice some explanation of these resolutions which would have shown them to rest upon a higher plane of public interest; I would like to have heard less of extraneous matter dragged in, and less of that which is not pertinent to the question involved. When one comes to consider the dangers that are involved by this appointment, one cannot but regard the resolutions as a menace to that system which we hold in the highest respect. There has been, and there is, a necessity for further strengthening the hands of the judiciary of this land; there is now an opportunity to demonstrate to this country that the judiciary stands supreme in the respect of the country, and cannot be assailed by the government of the day. I trust that hon. gentlemen opposite have not lost sight of that desirable principle. I hope that in the passage of these resolutions, respect will be paid to that principle; and it is much to be desired that, if the overthrow of the principle involved in this appointment is inevitable, the judicial system should be tampered with as little as possible in the creation of public offices. Sir, there is a time coming when this great Canadian people will need the solidity and the calm independence of the judiciary. As this great country grows, surely we need a stable, and independent judiciary, that cannot be influenced by political considerations. It is of vital necessity that its independence be preserved, no matter what other systems in our land become subject to political influence. I say that to interfere with the judiciary as these resolutions are doing is not a step towards that progress and towards the attainment of that true prosperity which we would like to see prevail in our country. I am opposed to the principle, opposed to it because of the absence of necessity for it, opposed to it because of the utter lack of expediency—if that fateful word has to be dragged into this discussion—and I am opposed to it because it is lowering to the dignity of the country and is aimed against and weakens the greatest safeguard that the people of Canada have to-day.

Mr. W. H. BENNETT (East Simcoe). After the charge that was made by the hon. member for Cumberland (Mr. Logan) this afternoon, that the present leader of the opposition, who will soon be in his seat to defend himself, had by some plan or scheme induced Mr. Blair to resign his position as chairman of the Railway Commission, I think that members on both sides of the House expected that the Prime Minister or the Minister of Justice would have risen in his place before this debate closed and stated officially that there would be a thorough investigation into the matter, and I kept my seat in the vain hope of seeing either these gentlemen or some other member of the House rise——

Mr. LOGAN. Will the hon. gentleman pardon me? I did not mention Mr. Borden, or refer to him in any way whatever this afternoon.

Mr. BENNETT. I am within the judgment of the House, and certainly the gentlemen on this side understood the hon. member as referring to Mr. R. L. Borden, and to no one else. The hon member went further, and stated that he was to be Minister of Railways in Mr. Borden's coming administration. That, I think, effectually clenches the statement. Be that as it may, the hon. gentleman made another statement which should have been either denied by the government or else the government should have claimed that they had no connection with it, and that there would soon be a complete investigation or a disclosure of the whole matter which would show who was at fault. If the government are going to shoulder the responsibility of that investigation, some member of the government should have risen and stated that it would be commenced. I have heard the Prime Minister in this House on more than one occasion threaten hon. gentlemen on this side of the House that if they dared to formulate charges which they had made, these charges would be investigated and probed to the bottom, either by a committee of this House or by judges, the highest in the land. The offences charged in these cases were not great in their nature, but were of a trifling character, and yet the Prime Minister in this case has permitted and allowed, since last December, charges to be made against three members of his cabinet, against the ex-Minister of Railways and Canals (Mr. Blair)—charges that have astounded the people of Canada—and yet after this House has been nearly a month in session there has come from him no intimation——

Sir WILFRID LAURIER. What members of the government?

Mr. BENNETT. I will come to that in a moment. The country was startled early in December by certain charges that were made in connection with the elections just passed. What was the nature of these charges? I am going to take newspapers favourable to the hon. gentlemen opposite and ministers of the Crown for the statements that were made in that connection. No hon. gentleman on that side of the House can deny that the Montreal 'Herald' is the leading Liberal newspaper in Montreal.

There is not a doubt about that. Further, that is the organ in which the Minister of Agriculture is largely interested financially ; it occurs to me that he has said that he is not interested in it, but we all know that the minister said in the House that while he had been a large stockholder in this newspaper he had transferred his stock to his brother when he became a minister. Be that as it may, no man will gainsay the fact that the Montreal 'Herald' is the leading Liberal English newspaper in Quebec, and that this government is anxious to enjoy all the good effects it can obtain from that newspaper's influence. Coming to the issue of the Montreal 'Herald' of December 5, what is stated ? After referring to this whole scandal—and it certainly was a scandal—it says :

> Nevertheless there is much to indicate that it deserves to take rank in Canadian history with the Pacific scandal of 1873, which also cost the Conservative party dear.

What was the scandal, as stated in the newspapers, as stated in the Montreal 'Herald' of December 5 ? Mr. Emmerson being interviewed as to some rumours then current—and it is strange to note that the interview given by him is telegraphed far and wide in this country and published, not only in the papers of Ontario and Quebec, but also in those of Manitoba—what was the whole scandal as related by Mr. Emmerson, and enlarged on by the papers ? It was that a gentleman who has been associated with hon. gentlemen in the past, the well-known lawyer, Mr. Greenshields, who was the most important figure in what is known as the Drummond County deal, a well-known friend of the government, who has on more than one occasion been a candidate in Quebec for hon. gentlemen opposite—this gentleman, Mr. Greenshields, associated with David Russell and other gentlemen had gone to certain members of the government, and these members of the government were specifically named. First and foremost was the Minister of Justice, the Minister of the Interior——

Mr. FITZPATRICK. I do not desire to allow that statement to go unchallenged for one-half second. I say it is absolutely untrue, and I defy the hon. gentleman to prove it, and it is not in the newspaper that he refers to.

Mr. BENNETT. If the hon. minister will calm himself——

Mr. FITZPATRICK. No man can remain calm in the presence of such a statement as that.

Mr. BENNETT. Will the hon. minister allow the statement to go first ? He challenged me to name the paper in which he was referred to. The hon. gentleman was referred to, and the Minister of Marine——

Mr. PREFONTAINE. I have to make the same statement as has been made by the Minister of Justice.

Mr. FITZPATRICK. And he dare not make the charge.

Sir WILFRID LAURIER. Make your charge.

Mr. BENNETT. On December 5 this appeared from Montreal in the Toronto 'World'——

Some hon. MEMBERS. Oh, oh.

Mr. BENNETT. The hon. the Minister of Marine and Fisheries may smile.

Mr. PREFONTAINE. Yes, I do.

Mr. BENNETT. Perhaps he will correct the statement when I have read——

Mr. PREFONTAINE. I do not care.

Mr. BENNETT. The despatch reads :

> Hon. Raymond Préfontaine said to-night that the reflections on himself, Mr. Fitzpatrick and Mr. Sifton, as published to-day in the 'Toronto World,' were not founded on fact. The whole article as far as it referred to the ministers was a fabrication of misstatements. As there was no definite charge, however, Mr. Préfontaine declined to discuss the matter in detail.

The minister did take some cognizance of it, and did rush into print. I do not blame him after the manner in which he was referred to. It was stated in the public print that there was a plan on hand by which these gentlemen were to retire. What was the plan ? The Minister of Justice was to resign from the government, the Minister of the Interior was to resign, each was to be paid $100,000, but, for some reason or other, the Minister of Marine and Fisheries (Mr. Préfontaine) was placed on the bargain counter at $75,000.

Some hon. MEMBERS. Oh, oh.

Mr. FITZPATRICK. And men of gentlemanly instincts can laugh at such stuff as that.

Mr. BENNETT. I will take the Montreal 'Herald' for the statements. It goes on to state—and Mr. Emmerson makes similar statements, which are all in the Montreal 'Herald, and if they are not true the Minister of Justice and these gentlemen should have had an investigation long ago and called upon the Montreal 'Herald' to do one of two things, either to retract the statements they have made or to make these statements good. Now, what are the statements made in the Montreal 'Herald' on these different occasions ? The statements are these : That a certain syndicate with a capital of $4,000,000 was formed. That this syndicate was going, as its members expected, to take over the work of constructing the government end of the projected Grand Trunk Pacific Railway ; that that proposition was laid before the premier himself,

and that that written proposition lay in the premier's hands for some days.

Mr. FITZPATRICK. The statement was never made by the 'Herald.'

Sir WILFRID LAURIER. The hon. gentleman is a member of parliament, and does he undertake to make statements of that kind? Does he re-echo those statements, or does he not? What is his object? Does he re-echo those statements?

Mr. BENNETT. I simply say this, that the Montreal 'Herald,' a Liberal newspaper, has made these statements?

Some hon. MEMBERS. No, no.

Sir WILFRID LAURIER. And, moreover, if the hon gentleman has any charges to make, let him make them like a man. Let him not go upon mere gossip. If he has charges to make, let him make them. There is not a word of truth in them.

Mr. BENNETT. The premier charges me with going upon mere gossip. Let me recall to his recollection a certain occasion when he did not do what I am doing—make a charge when the allegation and the denial could go out together. The right hon. gentleman, as leader of the Liberal party, in 1896 made the charge at Pembroke that Senator Drummond, now Sir George Drummond, had been instrumental in corrupting with a large sum of money the electors of this province, and that, as president of the Sugar Refiners' Association, he was in receipt of a large salary. The right hon. gentleman made that charge, not when Senator Drummond could be present to meet him face to face; and what was the answer of the Premier when afterwards he was challenged as to the truth or falsity of the statement? Not that it was true or that it should be investigated, but that other people had made the statement, and therefore he felt quite justified in going before the public and repeating it. Senator Drummond was not there to give a denial to the allegation; but the government are here to answer the charges of these newspapers if they please, and I am simply quoting what is in these newspapers, and what has been current in the country during the last few months.

Mr. FITZPATRICK. Mr. Speaker, are we not entitled to have the quotation made from the newspaper, with the date when it was made? Let us have some opportunity of ascertaining the truth or falsity of these statements.

Mr. BENNETT. I am reading from the Montreal 'Herald' of the 5th of December:

> Now, the statement is made that efforts were made, by threats and by the offer of money, to have three ministers resign. The prospective resignation of one of them, Hon. Mr. Fitzpatrick, was even announced by Conservative papers. But it seems the three ministers refused the offers of $100,000, or whatever sum may have been offered to them, and moreover declined to be frightened.

I am going to read something now that I hope will not shock the House. Everybody who knows the Minister of Justice will recognize this as a libel upon him, because it says that he penned this now almost historic telegram:

> Do your damnedest——

—which sounds so unlike the Minister of Justice to those who know him well that it seems improbable——

> ——was the telegram with which Mr. Fitzpatrick is said to have closed the incident when Montreal Conservative financiers undertook to secure his resignation, as they had announced.

Now, I am not making these statements of my own knowledge. I know nothing whatever of them. I do not know whether the Minister of Justice telegraphed that or not. I will sit down and let him deny it if he will.

Mr. FITZPATRICK. I never sent any such telegram. There is not one word of truth in it; and I wish to say, moreover, that because I do not stop and kick every cur that barks at my heels, it does not follow that I admit the veracity of it.

Mr. BENNETT. Where there is a little smoke there is always a little fire, and those who know the Minister of Justice know that he is pretty badly piqued when he acts as he does to-night. It is always the galled jade that winces.

Mr. SPEAKER. Order. I think, in view of the categorical denial of the two ministers referred to, that the hon. gentleman should not persist in continuing the discussion along the line that he does.

Some hon. MEMBERS. He has a perfect right.

Mr. BENNETT. Now, I have been challenged to name a single newspaper that has made any of these charges or allegations. There is the charge as it appears in the Montreal 'Herald' of December 5.

Mr. FITZPATRICK. No. What is the charge?

Mr. BENNETT. I have just read it. Surely the hon. gentleman has not been listening.

Mr. SPEAKER. I again call the hon. gentleman's attention to the fact that if a charge has been referred to, it has been categorically denied by the hon. gentlemen concerned, and their word should be accepted.

Mr. BENNETT. Mr. Speaker, if you rule that anything in a public newspaper cannot be read if a member denies the statement, I bow to your ruling.

Mr. SPEAKER. That is not the rule I am making at all. I understood the hon. gentleman again to refer to the charge as having been made, after the hon. members concerned had denied it. Under these circumstances, I think the hon. gentleman should accept their denial, and not persist in repeating the charge.

Mr. BENNETT. Well, Mr. Speaker, I bow to your decision. Now, let me state what is appearing in the public press as to the way in which the Department of Railways and Canals has been conducted under hon. gentlemen opposite and Mr. Blair. Surely that is a matter for inquiry by hon. gentlemen opposite. There is a paper in this city called 'Events,' in which on November 26 there appeared most startling statements which are worthy of inquiry by this House or by a Royal Commission. What are these charges :

In passing we might explain how Mr. Russell stole the St. John 'Telegraph.' After a certain political transaction, carried out under the Department of Railways and Canals, $25,000 was put into the St. John 'Telegraph' stock. A certain contractor put up another $25,000 and a small amount of stock stood in the name of A. G. Blair, $5,000 we believe. The total capital stock of the company was $75,000 and only $69,000 of this had been issued. Mr. Dave Russell bought $9,000 of it, and as the contributors of the $50,000 did not wish their names to be known in connection with the subscriptions their stock was given to Mr. Dave Russell to hold in trust, it being, of course the control of the paper which the owners of the $50,000 worth of stock desired to retain. Mr. Russell then proceeded to treat the paper as his own, and when the directors protested he turned them out. He then offered the paper for sale to the Liberals for $125,000. The reason he was enabled to achieve this daring theft of an important daily newspaper was the desire of the two men who had placed their stock in trust with Mr. Russell not to be publicly connected with the affair.

Is this the state of political morality in this Dominion to-day—that associated with the Minister of Railways and Canals is this gentleman, Mr. David Russell, of whom I have nothing good or bad to say, because I am not in a position to say it ; that he stands as an intermediary, a toll-taker, between contractors and the department, that from a certain contractor $25,000 was filched and was used to purchase stock in a newspaper, that the deal was put through by Mr. Russell, and that by it he cleared no less than $125,000. The ministers cannot ignore these charges which are going through the country, nor turn a deaf ear to them when they hear them in this House. The public will expect, after the charges are stated in this House, that the same shall be fully investigated. This paper goes on to say :

Why was Mr. Russell so anxious to have the nominating of Mr. Blair's successor in the Department of Railways and Canals ? The answer to this question is Abbey's Salts. Mr. Russell formed a partnership of some sort with Mr. Blair on the salts business. During the past three or four years Mr. Blair made about $80,000 out of it. Mr. Russell no doubt made much more, for Mr. Russell is clever. How ? For some years no dividend has been declared on the stock. Promises have been given but nothing more. Mr. Russell is an adept at promises. In the meantime every contractor under the Department of Railways and Canals was expected to take a few thousands of stock in Abbey's Salts.

An hon. MEMBER. What paper is that in ?

Mr. BENNETT. The 'Events' of November 26. It cannot be pretended that the government are not aware of that charge made by a Liberal journal in this city. Is it not then high time that they should announce that there will be an investigation into everything done in that department while Mr. Blair was at its head. But if you rule, Mr. Speaker, that I cannot go into these other matters by giving quotations from public newspapers connecting the names of ministers in connection with attempts made to bribe them by contractors, I must of course bow to your ruling. But the question discussed in this newspaper is surely worthy the consideration of the first minister. Surely he is not going to do what Mr. Ross did in the Ontario House when the Sullivan, Stratton, Gamey, investigation was up. What happened then ? For three hours Mr. Stratton was accused of all kinds of crimes, and after these three hours of accusation, Mr. Ross stood up in his place and said that the next day Mr. Stratton would reply. That was certainly not an evidence of innocence, and I hope that the right hon. the first minister will go further than Mr. Stratton did and announce that there will be a full investigation into the conduct of the Department of Railways and Canals as regards this very matter. Let us go a little further. It was stated in the papers—and I suppose no one will rise to take Mr. Blair's part, because evidently there is none so poor as to do him reverence—that Mr. Blair was to take the stump. Perhaps the right hon. gentleman will explain why he did not. That is a matter concerning which the House and the country desire an explanation and which is worthy of investigation. But the hon. member for Cumberland (Mr. Logan) made this afternoon a very savage attack against Mr. R. L. Borden, and I think, in Mr. Borden's absence, it is only fair that I should place on 'Hansard' the statement he made on the subject in connection with which the hon. gentleman made the charge he did.

Mr. LOGAN. I would beg to inform the hon. gentleman again that I never mentioned Mr. Borden's name or referred to him in any way this afternoon, and I shall leave to the unrevised 'Hansard' the proof of my statement.

Mr. BENNETT. Who then did the hon. gentleman give as his authority for the statement that Mr. Blair was to be taken into the cabinet to be formed by Mr. Borden ?

Mr. LOGAN. I do not propose to give my authority just now. The hon. gentleman will know it soon enough. We are not going to show our hand just now.

Mr. BENNETT. Then I presume the hon. gentleman is speaking on behalf of the government and there is after all going to be an investigation. If the right hon. the First Minister will say that there will be an inquiry, that will put an end to my remarks. But the hon. Minister of Railways and Canals (Mr. Emmerson) had something to say with regard to this matter in an interview which he gave the Montreal 'Herald;' and in that interview he certainly placed Mr. Borden in rather an unenviable light. On December 5, he gave the Montreal 'Herald' this statement with reference to Mr. R. L. Borden :

I have no hesitation in telling you all I know about it,' said Mr. Emmerson. I was in New York on the 18th of September, and a gentleman approached me at the hotel I was staying at and asked me if there was no chance of getting a contract for the construction of the transcontinental railway. The elections, he said, were coming off, and if a contract was obtained there would be lots of money to swell the campaign fund. I told him that the work would have to be done by Canadian contractors, and refused to have anything to do with him.

He told me that they were working through Montreal people and I knew afterwards that Montreal parties acted very suddenly and peculiarly during the campaign. At the hotel was J. N. Greenshields, of Montreal. The Montreal people were said to be friends of David Russell. During the elections David Russell, J. N. Greenshields, two Americans, Dr. Kennedy and a Mr. Green, said to be an Englishman, who resided in the States for some years, visited my province.

They were riding in a magnificent private car and at Fredericton Junction on October 22, met Mr. R. L. Borden, apparently by appointment. Mr. Borden went on board, having been met at the station by Mr. Dowling, private secretary of Mr. David Russell. During the run to St. John, Mr. Borden, Mr. Greenshields and others were closeted together.

In the province of Quebec 'La Presse' was captured. But this was only preliminary work. There was, so I am told, to be on nomination day some twenty-five Liberal members who would retire. In this way twenty-five Conservatives would be elected in that province by acclamation, and this would secure the return of the Conservatives, when R. L. Borden would have charge of the construction of the transcontinental line and the giving out of the contracts. In connection with the resignation of Mr. Blair it may be mentioned that four days afterwards there appeared in a New York financial paper that he was to be the head of a syndicate for which the capital had been secured to control the construction of the Grand Trunk Pacific. But something went wrong, and the plan of campaign fell through. 'That, said Mr. Emmerson, 'is what I know and what I have heard about it'.

If that is a correct report of Mr. Emmerson's statement—and I am not aware that he has contradicted it—he cast a reflection on twenty-five gentlemen who presumably have seats in this House from the province of Quebec ; and every hon. member from that province, in justice to himself, should demand from the government a full investigation and have the doubt cleared up whether or not they were parties to the infamous scheme by which they were to destroy this government, if at all possible, and had agreed to do this for a monetary consideration. I shall be very much surprised indeed if some hon. gentlemen from the province of Quebec do not demand a full and thorough investigation. But we have a further statement from another gentleman rather friendly to the government. I refer to the Speaker of the Senate. He said :

I heard on nomination day that the bombshell of the Tories was to develop as follows : 'The Tories, having secured the 'Presse,' were to keep the fact of having done so carefully from the public knowledge, and on nomination day Mr. Blair was to make extraordinary revelations. On the same day two or three ministers of the Crown were to be arrested for malfeasance in office. The next day the 'Presse' was to denounce the government and ask all honest men to turn out the Laurier government because of the revelations made by Mr. Blair. A certain number—as many as they could secure —of the Liberal candidates were to resign in disgust and allow as many Conservatives to be returned by acclamation.

Naturally Mr. Speaker Dandurand did not wish to make a wholesale accusation against the Liberal members from Quebec, and consequently did not state the number. Here then we have a statement made by a minister of the Crown and another made by the Speaker of the Senate, both published in a Liberal newspaper, and surely these are worthy of investigation. Then it is asked why did not the scheme succeed, and one newspaper thus answered that question:

The generally accepted theory is that the premier secured information which Mr. Blair was unwilling to have made public, and obtained it from Mr. Lambert Payne, formerly private secretary to Mr. Blair, and now to Mr. Emmerson.

What does that mean ? It is a statement in effect that Mr. Payne whilst secretary to Mr. Blair, became aware of certain actions in the department and had communicated these to Mr. Emmerson, and that the threat on the part of the first minister to expose Mr. Blair's conduct was sufficient to prevent his going on the public platform and making the expected denunciation.

Now, I desire to be perfectly fair and will add that I have seen in the public press an explicit denial by Mr. Payne, who is personnally known to many hon. members, especially to the older members,—and every one who knows him will accept his explanation that he in no way was a party to an exposure of Mr. Blair. There is the

matter as it is to-day before the public, set forth in the newspapers in the most positive and public manner, set forth in newspapers favourable to hon. gentlemen opposite and referred to in statements made by ministers of the Crown who were associated with the Minister of Railways and Canals (Mr. Emmerson). The stories have been rife for a year or two that the Minister of Railways and Canals was the object of a plot to effect his downfall. And it may be that the Minister of Railways and Canals has set broadcast these statements relative to other ministers with the hope of defeating or at least of injuring them. I do hope that some hon. gentleman on that side, clothed with authority and knowledge—and that would mean that it must be none other than the Prime Minister himself—will rise in his place and state positively that there shall be and will be a thorough, a complete, a searching investigation of the whole matter. Let that investigation be by any authority that is competent, whether by a commission, as hon. gentlemen opposite seem to prefer, or by a committee of this House. In that connection, perhaps the hon. member for Cumberland (Mr. Logan) knows whereof he speaks, because I notice that he is chairman of the Committee on Privileges and Elections. But, in view of the hon. gentleman's action in presenting himself as a would-be voter in the city of Ottawa, where he must have known that he was not entitled to vote—and I have heard no denial from him of this statement which has been repeated here—it is about time for the Prime Minister to ask him to withdraw from the chairmanship of that committee. In reference to the part played by Mr. R. L. Borden in this matter, I think it only fair in his absence to place on 'Hansard' the statement made by him, under date of Dec. 6th he gave this interview in Montreal :

> With reference to certain press statements respecting Mr. Blair's resignation as chairman of the Railway Commission, I wish to say that that resignation came as a great surprise to me. I did not directly or indirectly suggest to him or ask him to resign. I held out no inducement to him to resign. I had no interview with him upon the subject, nor did any one on my behalf approach him upon the subject. In short I had nothing whatever to do with his resignation, and I was thoroughly surprised when I heard of it.
>
> I had no connection with and I knew nothing of any negotiations respecting the alleged change of ownership of 'La Presse,' and I had nothing to do with such change, if it took place. I never had any interview or communication with any English or American capitalists, or with any other person, with respect to any proposed contracts for the building of the Grand Trunk Pacific. I never even heard of the alleged construction syndicate. No one approached me with any proposal respecting the construction of that railway. Any statement or suggestion to the contrary is utterly without foundation.
>
> I never received any contribution for any purpose from Mr. Russell or Mr. Greenshields or any gentleman connected with them, or from any English or American capitalists, nor did the Conservative party, so far as I am aware. Until the article in the 'Toronto World' appeared I had never even heard of any attempt by Conservatives to induce the withdrawal of Liberal candidates in the province of Quebec. It would astonish me beyond measure to learn that any such attempt was made or proposed.

Now, this question is before the House, and to-morrow's newspapers will place it before the country. And, while the government are strong in this House, while it is clear from the applause that greets every statement of the ministerial benches whether creditable or discreditable, it is evident that this government cannot be defeated in this House. Judging by that applause I cannot conceive that it would be possible to force the greater part of these who sit behind the ministers to vote against this government, no matter how odious or nefarious any act of theirs may be.

Some hon. MEMBERS. Order.

Mr. SPEAKER. I think the hon. gentleman (Mr. Bennett) should retract that statement.

Mr. BENNETT. Oh, very well : I withdraw it. As I cannot repeat that statement here I can only repeat it in other places, and I expect to do so on many occasions.

Some hon. MEMBERS. Withdraw.

Mr. BENNETT. I have gone through the province of Ontario, or parts of it within the last month, and have addressed many public audiences. And, I care not what public opinion in other provinces may be, I can tell the Prime Minister here to-night, that, unless an inquiry is made into the matter we have been discussing, public opinion in the great province of Ontario will be stronger against him even than it was on the 3rd of November last. I do not wish to harrow up the feelings of hon. gentlemen who had a trial of strength in the province of Ontario lately, and they know the result. The whole corps of officials and all the power and influence of this government were joined to those of the provincial government, and what was the result ? I need not harrow up the feeling of hon. gentlemen opposite by referring to the matter at length. They know that, against all the power of this government and of the local government, and against all the power of the Grand Trunk Railway Company, which carried free not only hundreds but thousands of voters who were expected to vote for the Liberals, this government received, in the great province of Ontario a rebuke that did not well please the Prime Minister and that to-day saddens him to recall. And another thing that he recalls with pain is that the old Liberal county of Huntingdon, for the first time in its history, went Conservative under the rule of the present Prime Minister of this Dominion.

Mr. A. JOHNSTON (Cape Breton). At the risk of prolonging this discussion which, perhaps, has already been prolonged too much, I desire to offer a few observations. Those observations will not be lengthy so far as they concern the hon. gentleman (Mr. Bennett) who has just taken his seat. He has played again the role with which he has made us familiar in past sessions in this House when he bandies about the names of ministers and prominent members on this side. I say to him and to those on his side of the House, that if he has any charge to make against any of the ministers whom he has been pleased to name, there is a proper way for him to present that charge. I will challenge him, I will dare him, to stand in his place and make a single charge against any hon. gentleman on this side, and I will give him the floor if he desires to speak. He has mentioned the name of the Minister of Marine and Fisheries (Mr. Préfontaine). Is he prepared to make a charge against that gentleman ? He has mentioned the Minister of Justice (Mr. Fitzpatrick). Is he prepared to make a charge against the Minister of Justice ? No, he is not. He is doing what we have seen him do in this House many a time before, using the names of men occupying prominent and responsible positions in this country, but not daring to make a charge against them. There is a proper course and an improper course in these matters, and the hon. gentleman has seen fit to take the improper course.

Mr. BENNETT. Does the hon. gentleman (Mr. A. Johnston) wish me to answer ?

Mr. A. JOHNSTON. I do.

Mr. BENNETT. I can tell the hon. gentleman that I have been elected to this House for four parliaments. My last majority was 383 and my smallest was 32. And, if the reputation of this government in Ontario goes as it has been going, my majority next time will be six hundred.

Mr. A. JOHNSTON. There, Mr. Speaker, is the same old story. I have been good enough to give the hon. gentleman an opportunity to justify the statements he has made. I am still prepared to give way to him if he is ready to make a charge against any member of this House. Let me repeat that he has seen fit on this occasion, as on former occasions, to adopt the improper course when he chooses to address the members of this House of Commons. All I have to say on this occasion is that the coward and the slanderer is abroad in this country.

Some hon. MEMBERS. Order.

Mr. A. JOHNSTON. I do not mean to say that the hon. gentleman is one.

Mr. SPROULE. I rise to a point of order. I ask the ruling of the Speaker whether such language is permissible, because it evidently refers to the hon. gentleman ?

Mr. SPEAKER. The term would have been objectionable if persisted in, but the hon. gentleman at once stated that he did not propose to apply it to the hon. gentleman (Mr. Bennett). Otherwise the term would have been out of order.

Mr. A. JOHNSTON. Understand me, well, Mr. Speaker, I do not intend to make that observation apply to any member occupying a seat in this House ; but I do say again that the coward and the slanderer is abroad in this country, and the sooner he is picked out and his picture held up to the people of this country, the better it will be for the country. Sir, I hope, and I am sure hon. gentlemen on both sides of the House will share that hope, that when hon. members venture to make insinuations of a very unsavory character with respect to members occupying seats in this House, if they have any charge to make, the proper thing for them to do is to make it. I will not pursue this subject any further. Now, why did Mr. Blair resign the chairmanship of the Railway Commission ? That is the question.

Mr. BENNETT. Hear, hear.

Mr. A. JOHNSTON. The hon. gentleman says, Hear, hear. I have no doubt that if he applied to hon. gentlemen occupying prominent positions in his own party he would be told very quickly the reasons why Mr. Blair resigned from the chairmanship of the Railway Commission. I propose, before I sit down, to call witnesses in this House on that matter, witnesses whom the hon. gentleman will be compelled to admit occupy prominent positions in the councils of the party of which he is a member. I propose to call as witness the 'Mail and Empire,' and I propose to call a greater witness still, the Montreal 'Star,' which conducted the campaign on behalf of the Conservative party which ended on the 3rd of November last. It was the leading organ of the Conservative party. I wonder why my hon. friend, who is anxious to know why Mr. Blair resigned, does not ask Mr. Hugh Graham, proprietor of the Montreal 'Star,' why Mr. Blair resigned. I am quite sure he would be told why. Is it not notorious all over this land that Mr. Graham was the one person perhaps in this country who was possessed of the information before it was announced to the public, that Mr. Blair was about to resign his position as chairman of the Railway Commission ? True it is that Mr. David Russell, who was one of the stalwarts of the Conservative party during the last campaign, has told us over and over again that he induced Mr. Blair to resign. He tells us so himself. Mr. Hugh Graham also tells the people of this country that he knew Mr. Blair was going to resign. Now, I have selected a few extracts at random from Conservative papers of about

the date of the resignation ; as nearly as I can find out, it occurred on the 18th or 19th of October last. I have mentioned the Montreal 'Star' as the leading organ of the Conservative party in the Dominion of Canada. Some people may take exception to that, but I think any hon. gentleman in this House who followed the history of the Conservative party during the past three or four years can reach no other conclusion than that the Montreal 'Star' was, during that time, the organ which was more intimately associated with the Conservative party than any other newspaper in this country. Now, we find a despatch from St. John, New Brunswick, in the Montreal 'Star' of October 19, and what does it say ?

To-day there is no other topic on the street. Conservatives are jubilant, Liberals dumbfounded.

My hon. friend from South York (Mr. Maclean), at an early stage of this debate, said that he was ashamed of the conduct of the ex-Minister of Railways and Canals, Mr. Blair, in resigning his position on the Railway Commission. He was ashamed of it ; but the Conservatives in the city of St. John were jubilant because of it, and the Conservatives in every other city in the Dominion of Canada were jubilant. My hon. friend from South York was alone among the Conservatives who was ashamed, as nearly as we can find out, of the action of the ex-Minister of Railways in resigning his seat on that board. The St. John 'Telegraph,' of which we heard so much, and which was quoted at great length in the campaign in Nova Scotia and New Brunswick—the St. John 'Telegraph' said :

The resignation of Mr. Blair at this time, and the announcement which accompanies it will lend new force and depth to the swelling tide of popular feeling which animates this great country to-day, and which the government is ignoring to its peril and to its undoing.

The government was ignorant according to this paper. Then the St. John 'Sun,' which is a leading organ of the Conservative party in the province of New Brunswick, has this to say :

It is useless to suggest that Mr. Blair's resignation has no political significance. Its chief public significance is political. Mr. Blair is too old and experienced a politician not to understand the effect of his resignation at this stage of the campaign. If he were retiring for purely private or professional reasons——

The St. John 'Sun,' the leading organ of the Conservative party in New Brunswick, knew at that time that Mr. Blair was not resigning for purely private or professional reasons. What then was he resigning for ? The leading organ of the Conservative party in New Brunswick evidently knew why he resigned. Why don't they tell us ? Why don't they take hon. gentlemen opposite into their confidence, if they are so anxious to ascertain why it was that he resigned ? The evidence is clear and distinct that they were aware of the reasons.

If he were retiring for purely private or professional reasons he would wait longer, as the premier must strongly desire him to do. But if Mr. Blair desires to strike one more blow at the project which he has declared to be full of peril to the nation, he knows that this is his great chance—his last one.

That is what they say. Then the St. John 'Star,' another leading organ of the Conservative party in New Brunswick and the Dominion of Canada, said :

The weight of his fighting ability and his influence thrown with the Conservative campaign against that policy——

That is against the policy of the government.

——against that policy at this time renders even more certain than it seemed yesterday the triumph of the policy of the people.

That is, the policy of the Conservative party, so-called. My hon. friend from South York is ashamed of the conduct of the ex-chairman of the Railway Commission ; the leading organs of the party of which he is a member are heartily proud of the conduct of Mr. Blair. Then there is the 'Citizen,' the leading organ of the Conservative party in the city of Ottawa. It says :

The people believe that these personal sacrifices have been prompted by patriotic motives, and that belief has stimulated the expectation that a man of Mr. Blair's acknowledged political power and weight in national life will not remain satisfied with a mere personal protest ; that his sense of obligation to the people will force him to come forward and make the consummation of this ruinous deal an impossibility.

That is the opinion of the Ottawa 'Citizen,' and yet my hon. friend from South York is ashamed of the conduct of Mr. Blair. Then there is the 'Mail and Empire.' Surely it will not be denied that this paper occupies a prominent position in the councils of the Conservative party ? What does it say ?

The incident is highly dramatic.

Highly dramatic, of course.

Here is a public man commanding the highest position in the gift of the government. In this office he might have remained for the remainder of his natural life. But a great issue is before us—an issue in respect of which he is well informed—and he lays aside his appointment and his emoluments in order that Canada may again be warned of the danger that lurks in the proposition we are now asked to endorse.

Hon. gentlemen opposite are anxious to ascertain why it was that Mr. Blair resigned. Why do they not read the 'Mail and Empire' in order to be perfectly informed as to his reasons for resigning. Now there are several other statements that might be called in evidence to give this country an idea as to the reasons for Mr. Blair's resignation. We might appeal to the evidence of those hon.

gentlemen of the Conservative party who pressed Mr. Blair with invitations to speak for them all over the country. Who are the gentlemen, who, according to the Montreal 'Star,' pressed him to speak in the city of Toronto? Did any hon. gentlemen from the city of Toronto do so? They pressed him to speak at Kingston, London, Brockville, Peterboro, Hamilton, Windsor, Chatham, St. Thomas, Niagara, St. Catharines, Quebec, Montreal, Three Rivers, St. John, Halifax, Moncton, Sussex, Fredericton, Amherst, Truro, Pictou and my own city of Sydney.

Mr. STOCKTON. If the hon. gentleman (Mr. A. Johnston) means to say that the Conservative party in the city or county of St. John asked Mr. Blair to speak during the election he is entirely mistaken.

Mr. A. JOHNSTON. I am simply, Mr. Speaker, giving the House the benefit of the information given the country and the public and which has been generally supplied to them by the leading organ of the Conservative party, the Montreal 'Star.'

Mr. STOCKTON. I am giving a denial of that statement, Mr. Speaker, and according to the ruling you made in respect to the hon. gentleman in front of me, that denial should be accepted. The statement is absolutely untrue.

Mr. A. JOHNSTON. I accept without any reservation whatever the denial made by my hon. friend (Mr. Stockton), but I want to point out to him that it is not a denial of any statement made by me. It is a denial of a statement made by the leading organ of the party of which he is a member.

Mr. BARKER. Mr. Speaker, I desire, as one of the representatives of the city of Hamilton, to give an equally explicit denial of the statement in regard to that city. There was no request whatever to Mr. Blair to deliver any speech at Hamilton.

Mr. A. JOHNSTON. I accept with equal cordiality the statement made by the hon. member for Hamilton (Mr. Barker) and it is another evidence of the unreliability of the statements that were handed out to the people of this country by this great organ of public opinion.

Mr. DANIEL. Mr. Speaker, I desire on behalf of my own constituency of St. John to make a denial similar to the one already made by my hon. colleague from the county (Mr. Stockton). The Conservative party in St. John made no attempt whatever to obtain the services of Mr. Blair or to induce him to deliver an address in the city of St. John.

Mr. A. JOHNSTON. I accept again, as I have accepted in the case of the hon. gentlemen who have preceded him, the denial of my hon. friend (Mr. Daniel). I followed the addresses delivered in the city of St. John somewhat closely during the campaign, I followed the addresses made by my hon. friend in his own campaign, and I did not notice during the progress of that campaign that he or his colleagues took any exception to the very many remarkable things that were said by members of the Conservative party, of Mr. Blair. I think he fully concurred in everything which was said about him owing to the benefits that were going to accrue to the Conservative party as a result of his conduct, and I think he was prepared to accept the full benefit that he expected would accrue to the Conservative party. A great many people in the hon. gentleman's own party will not hesitate to say that were it not for the position assumed by Mr. Blair in this country neither himself nor his colleague would have been elected.

Mr. HENDERSON. Mr. Speaker, I desire you to read the resolution before the House. I fail to see the connection between the hon. gentleman's remarks and the resolution.

Mr. A. JOHNSTON. Mr. Speaker——

Mr. HENDERSON. I think I am quite within my right in asking you, Mr. Speaker, to read the resolution.

Mr. SPEAKER. The hon. gentleman is quite within his right in asking to have the resolution read at any stage of the debate.

Mr. BRODEUR. Not during a speech.

Mr. HENDERSON. At any time. I understand it is my right.

Mr. BRODEUR. You cannot interrupt an hon. member.

Mr. SPEAKER. My recollection of the rule is that a request may be made at any time to read the resolution before the House. If the hon. gentleman desires to have the resolution read. I will read it.

Mr. HENDERSON. I have no desire to impose upon you, Mr. Speaker, the reading of this resolution, but I do not want to sit here and be imposed upon by a gentleman discussing a question which is not before the House.

Mr. SPEAKER. If it was not the desire of the hon. gentleman (Mr. Henderson) to have the resolution read, I do not think he should have asked to have it read.

Mr. HENDERSON. I would ask you to read it unless the hon. gentleman is called to order.

Mr. SPEAKER. I think there has been a good deal of latitude allowed in this debate on both sides. The hon. gentleman's remarks are perhaps somewhat irrelevant to the question, but there has been a good deal of latitude and I do not propose to call him any more strictly to account just at present.

Mr. A. JOHNSTON. I will be delighted to conform myself, Mr. Speaker, to any ruling you may make. My only apology for participating in this discussion is that I am simply following the lead of hon. gentlemen on the other side of the House. I think that the hon. member for South York (Mr. Maclean) is perhaps more than anybody else responsible for the turn which this debate has taken.

Mr. W. F. MACLEAN. In what way? You had better shelter yourself under some one else on the other side. I do not care to take the responsibility.

Mr. A. JOHNSTON. It is interesting, however, to have from hon. gentlemen opposite, even at this late date, a contradiction of the reports which were sent out by this great organ of the public, the Montreal 'Star.' I think, however, Mr. Speaker, it would have been a little better if these hon. gentlemen had risen in their places previously to November 3, last, and repudiated the utterances of this journal. They are willing to do it to-day, but they were not so ready to do it previously to November 3 last. However, I am quite prepared to accept their statements. My hon. friend from Cumberland (Mr. Logan), when addressing the House before six o'clock, made reference to the rumour set abroad in this country that Mr. Blair, in the event of the Conservative party coming into power was going to be a member of the next Conservative cabinet. Whether or not there was anything in the rumour, I do not know. I am not going to say I attached very much importance to that rumour, but I am here to assert with my hon. friend from Cumberland that there was such a rumour abroad and I am going to give the House a little bit of evidence just to point out that there was some reason for the faith that was in some people in this country. The Montreal 'Star' of October 25, had the following:

> It is now stated that after the election a splendid banquet will be given Hon. Mr. Blair in Windsor hotel in recognition of his great public services and his efforts to save the country from the disastrous effects of the government's Grand Trunk Pacific policy. The banquet which will be held on or about November 26th will be, it is stated, the most magnificent function of the kind ever held in Canada.

At the time that this announcement was made on the authority of the Montreal 'Star,' a great many Conservatives in this country said that the Conservative party were going to win on November 3, that Mr. Borden will be forming his cabinet about November 20, he will be taking into his cabinet Mr. Blair, as Minister of Railways and Canals and this magnificent banquet announced by the Montreal 'Star' will take place at that time to celebrate the entrance into the Conservative party and government of Mr. Blair. Of course, the Montreal 'Star' may be wrong again. Now it is highly probable, in view of the repudiation of hon. gentlemen opposite to-night, that the Montreal 'Star' was wrong again, and therefore it is that I am quite satisfied to allow the matter to drop. My hon. friend from South York (Mr. W. F. Maclean) is ashamed of the conduct of the ex-chairman of the Railway Commision. What does his leader, the leader of the Conservative party say with regard to this matter? Speaking at Sherbrooke in the province of Quebec, the night following the announcement of Mr. Blair's retirement, Mr. Borden said:

> I at one time like many of you here thought Mr. Blair mercenary, but now I admire him because he has been able to rise to the occasion to say 'although I have the salary, it is my country first.' He had exposed the Laurier government. He has shown the inner workings of their policy.

That does not compare with the opinion which the hon. member for South York (Mr. W. F. Maclean) has of Mr. Blair.

Why did Mr. Blair resign? That is a question which has been asked us frequently from the other side of the House this afternoon. The Montreal 'Star' of October 21 reports a speech delivered by Mr. Borden, at Woodstock, in the province of New Brunswick. The hon. member for Simcoe (Mr. Bennett) has assured this House that Mr. Borden knew nothing whatever about the movements of Mr. Blair. I accept the statement of the hon. member for Simcoe that Mr. Borden did not know, but if you read the report of his speech at Woodstock, as it appears in the 'Star', you will find this paragraph:

> Some one in the audience interrupted at this stage by saying: 'Emmerson will talk about Mr. Blair tomorrow night.'
>
> Like a flash Mr. Borden replied: 'I think the amusing part will be when Mr. Blair comes to talk about Mr. Emmerson.'

Evidently Mr. Borden expected that Mr. Blair was going to take a part in the campaign. Of course we are assured by hon. gentlemen on the opposite side of the House that he knew nothing about it, and I for my part am prepared to accept that explanation—it is another repudiation by hon. gentlemen opposite of the Montreal 'Star.' I have to apologize to the House for having perhaps transgressed the rules, but I have given my reasons for this transgression. It is somewhat comforting to us on this side that hon. gentlemen have nothing whatever to offer in opposition to the resolution now before the House. The government have proposed to the people of this country the appointment of a certain gentleman as chairman of the Railway Commission. Hon. gentlemen opposite have risen one after another vying with each other as to which would say the kindest things of the gentleman the government propose to appoint. It is naturally comforting to those of us who sit on the back

benches supporting the government, to know that the appointment they propose making to an important position is one that commends itself to the best judgment of gentlemen who sit not alone on this side of the House but on the opposite side as well.

Mr. H. H. MILLER (South Grey). Mr. Speaker, it was said by one of the Conservative members the other day that criticism is the life of parliament. I should think it is equally true that too much criticism causes sessions of parliament to live unnecessarily long and I should think that a great deal of the criticism of to-night has been wide of the mark. I sympathize with some of the remarks made to-night by the hon. member for East Simcoe (Mr. Bennett) especially when he stated that he did not think it likely that the reform government would be defeated by the votes of members of this House. I think he is perhaps in that regard deserving of some sympathy. I have wondered if this is where the shoe pinches and if this is at the bottom of the whole trouble. I also learned that the hon. member for East Simcoe marvelled that 25 Reform candidates refused to be bribed, refused to be bought and to play the traitor for the thousands of dollars that had been raised in the effort to bribe them to defeat the Laurier government. That is what I would have expected of 25 Reform candidates in the Dominion of Canada. I would expect they would refuse as they did, to be bought and bribed, preferring to preserve their good consciences and honour. I trust that had the same offer of a bribe been made to Conservative candidates, they would have resisted and refused in the same manner.

There is a vacancy in the chairmanship of the Railway Commission, and I believe the desire of the government is to fill that vacancy with a man well qualified to discharge the duties. I believe that is the desire of the people of this country. I hope that is the desire of the Conservative members of this House. I am glad to hear every one on either side who has spoken, express the highest opinion of the hon. Mr. Justice Killam. Every one seems to admit that he is a man of integrity and ability and the proper man to fill the position. The hon. member for South Lanark (Mr. Haggart) has said that there has been bargaining and he regrets that there has been bargaining. Sir, it is oftentimes necessary to bargain to obtain the services of a good man. It is never necessary to bargain to obtain the services of an indifferent, poor or incapable man. The acting leader of the opposition (Mr. Foster) has said that the services of Mr. Killam have been obtained upon the lowest terms. If that be true, that a man who is thoroughly capable, a man of the greatest integrity, has been arranged with, and that a bargain has been made whereby his services have been procured for the people, for the payment of the lowest price, then I should think the interest of the people of this country have been well and truly looked after and I believe the people will be thoroughly satisfied with the arrangement that has been made.

Mr. E. B. OSLER (West Toronto). These resolutions are to affect one particular case, they have covered one case which is probably an exception. No objection has been made, I do not think any objection could be made to the gentleman who has been named and who is being provided for in this resolution. Where I think the mistake has been made and where I think the government will be wise in changing this resolution is that they are providing not for this case alone but are making a general Act covering possibilities. Now if the gentleman who is named is appointed, we all hope that he will hold that position for very many years. Ten years or a longer time we hope will elapse before the necessity again arises of appointing a chairman of the Railway Commission. When that period arrives, it is in my judgment very unlikely that a judge of one of the superior courts will be again called upon to fill the position. But if that should happen ten years hence, it would be a very easy thing to provide for it by a special Act, as is being done in this case, and I think that would do away with all the objection there is to these resolutions. You are putting on the statute-book a law which will naturally be looked to by the judges of the court as containing one of the prizes that will possibly fall to them. I do not think that is necessary or wise ; it is not the proper position in which to place the judges. Let us deal with the one case before us that requires to be dealt with, and confine the resolutions to this particular case, and I believe every one will agree to them.

Mr. LOGAN. Before you put the question, Mr. Speaker, will you allow me to make a personal explanation ? On two or three occasions this evening reference has been made to my having offered to vote at the recent provincial election in the city of Ottawa, and, if you will allow me, I will state the facts. I happened to be a householder in this city, and as such my name was placed upon the assessment roll, and for that reason, I believe, was also placed upon the voter's list. I knew nothing about it, however, until a day or two before the provincial election, when I received a notice to the effect that my name was on the provincial voters' list, and asking me to vote at a certain poll. In the province of Nova Scotia, from which I come, if a man's name is on the list, having got there from the assessment roll, it matters not in a provincial election whether he lives in Nova Scotia or British Columbia, he has a vote. I am

now informed that the same is the case in Manitoba and Quebec. I did not give the matter any consideration; but knowing that that was the law in Nova Scotia, it never occurred to me that I had not a right to vote in the province of Ontario. Therefore I went to the poll to exercise my franchise, as I thought I had the right to do; and I am informed to-day by an eminent Ontario lawyer in this House that I had a right to vote. Whether I had or not, I thought I had, as I would have had under the law of Nova Scotia. But having been asked at the poll if I had been a resident of the province of Ontario for a certain length of time, I said I had not; and when it was pointed out to me that there was a residence qualification in this province, I withdrew. I make this explanation to show that there was no wrong intention on my part in this matter.

Motion agreed to, and House went into Committee.

On resolution 1,

1. Resolved, That if a judge of any Superior Court in Canada is appointed chief commissioner of the Board of Railway Commissioners for Canada he shall not be removed at any time by the Governor in Council except upon address of the Senate and House of Commons.

Mr. STOCKTON. I have not taken any part in this debate, and I do not intend to occupy the attention of the committee at any length now. This is somewhat special legislation. I am not objecting to the provision of the statute that the appointee shall be removable only upon an address of the two houses of parliament; but I do object to a distinction being made between an appointee who is not a judge and one who is a judge. I think for fair legislation that it is worthy of the consideration of the Minister of Justice to make the law applicable equally to all appointees.

Mr. FITZPATRICK. The suggestion which my hon. friend has just made is one that would naturally commend itself at first sight to any intelligent observer of what is going on. But let me point out to my hon. friend the conditions under which this legislation is introduced. It is found necessary to choose the man who above all men we deem to be the best qualified for this particular position. I think my hon. friend, with the knowledge he has of the profession, will come to the conclusion that the gentleman we have in our mind for this position is eminently well qualified to fill it.

Mr. STOCKTON. I think that.

Mr. FITZPATRICK. That opinion, I think, is concurred in by all those who have spoken in this debate. It has been suggested by the present leader of the opposition that something in the nature of a bargain was made between the government and this judge, and in the way he put it such a bargain would be in the last degree objectionable. I for my part heartily concur in all that has been said here to-day with respect to the necessity of keeping our judges free from all political entanglements. I am a firm believer in the doctrine of once a puisne always a puisne, although, as my hon. friend from South Lanark (Mr. Haggart) observed to-day, that doctrine has been more honoured in breach than the observance. My hon. friend knows that it has been set at defiance not only in this country, but quite recently in England, in the appointment of the present Lord Chief Justice, Lord Alverstone, who was previously Master of the Rolls. It was also set at defiance in the appointment of Lord Russell as Lord Chief Justice of England, he having been Justice of Appeal when appointed. And my hon. friend will remember the discussion which took place in the House of Commons in England in 1872, with respect to the appointment of Sir Robert Collier to the Judicial Committee.

Mr. BARKER. But I think that was universally condemned.

Mr. FITZPATRICK. My hon. friend will remember that marvellous letter of Lord Coleridge to the Lord Chancellor, in which he castigated the Lord Chancellor to such an extent that he had shortly afterwards to resign. What was the principle he contended for? It was the principle, practically consecrated by vote of the Commons of England when, on a motion of censure, Mr. Gladstone was almost defeated as a result of the appointment. What was the principle? It was that a judge should not be appointed to the highest court of appeal until he had some experience in a lower court. The principle then of once a puisne judge always a puisne judge was formally condemned. I have expressed my opinion—and it may be considered presumptious in me to have an opinion after what I have quoted—but I would, if I could, have inscribed over the entry to the judicial bench these words: 'Those who enter here leave all hopes of preferment behind.' That is my own view, but that is not the view which has been adopted. But, after all, one swallow does not make a summer, and it is not because I hold that view against the opinion of the people at large that my opinion should prevail. But let me answer something that fell from my hon. friend the leader of the opposition some few minutes ago. When he noticed how thin was the ice on which the hon. member for Lanark (Mr. Haggart) was skating, he found it necessary to depart from the principle that his hon. friend was contending for, and he said, with that capacity for refining and making nice distinctions which is so characteristic of his analytical mind: I admit that in principle, preferment in order of promotion on the bench is all right, but when you come to take a man from the bench and

appoint him to a position elsewhere, that is what I object to.

Mr. FOSTER. Hear, hear.

Mr. FITZPATRICK. But here again we have a number of precedents. Let me remind my hon. friend of the case quoted by the First Minister, the case of Sir John Thompson, who was taken from the bench and made Minister of Justice in the government of Sir John Macdonald. Let me remind him also of the case of Mr. Angers, who was taken from the judicial bench in my own province and made Lieutenant Governor, and also a case in my own family, which occurred in 1873, when a gentleman was taken from the bench in the province of Quebec and made Lieutenant Governor. These are all cases in which was followed the rule adopted in the present instance. But let me get down to the case in hand. Let me point out to the committee the conditions under which this appointment was made. The government was casting about for a man to replace Mr. Blair.

Mr. STOCKTON. I am not objecting to the appointment.

Mr. FITZPATRICK. I am not speaking to my hon. friend, but at the committee. When we were casting about for a proper person for this position, the man upon whom we fixed our mind was Mr. Justice Killam. He was approached and asked if he would accept. His answer was: Here I am now on the bench. I have served on the bench for twenty years. Ten years hence I shall have the right to retire with my full salary. I am now fifty-five years of age, and in addition to that I occupy a position from which I cannot be removed except upon an address from both Houses of parliament. Why should I give up that fixity of tenure in the office I hold and the advantages which will come to me as the result of my occupation of that office with respect to my retiring allowance, to take this position that you offer me?

Mr. SPROULE. For the $30,000 extra he will get.

Mr. FITZPATRICK. Allow me. That was his argument. He said: I have an acquired right to my position and the emoluments which will come to me at the time of my retirement. And we thought that was perfectly reasonable, and that we should not in any way interfere with the fixity of his tenure of office or his right to his retiring allowance at the expiration of his period of office. And this legislation is intended for nothing else than to enable us to give him that position under these conditions. There was no other bargain; and if that can be considered an ill-advised bargain, of course we are responsible for it, and perhaps I am responsible in a larger manner than any one else. But that is the extent of the bargain, and it does seem to me there is nothing extraordinary in it.

Mr. W. F. MACLEAN. The hon. gentleman is evading the whole question. This resolution says:

> That if a judge of any Superior Court in Canada is appointed chief commissioner of the Board of Railway Commissioners for Canada he shall not be removed at any time by the Governor in Council except upon address of the Senate and House of Commons.

The people were given a solemn pledge that the chairman of the Railway Commission would be removable by the Governor in Council and that his conduct could be discussed and criticised in this House. Now, however, the whole scheme is changed, and an effort is made to put an irresponsible man in that position—irresponsible as compared with the chairman under the present law. The whole argument of Mr. Blair, who introduced the Bill, and who was then a colleague of the hon. Minister of Justice, and who was sustained during the whole of the debate by his colleague, was that the chairman and every other member of the commission should be subject to removal by the Governor in Council. In that way he was to be responsible to the government and this House, and could be removed if he failed to do his duty. Now that position is reversed, and nobody is given any authority to compel him to perform his duties. What are his powers? The hon. gentleman read this afternoon what the powers of that commission are. They are very extensive, and a great obligation is put, not only upon the chairman, but on the other two commissioners. The point I make has not been answered in this debate, and I intend that it shall be before this measure goes through. What I contend is that the government have changed their policy. This afternoon the Prime Minister claimed credit for what he is doing to-day. But what he is doing to-day is reversing the policy for which he claimed credit and which he presented to the people not long ago for their endorsation. We were to have a tribunal competent to deal with all these disputes between railway companies and the people, and that tribunal was to be responsible to government and to parliament. Now, however, that the elections are over, and when the public expect the government to carry out its pledges, we are told that the chairman of this commission is to be irresponsible. Until the point I make is answered, this legislation shall not go through. It may be six months before this session is over, or before the consent of the Governor General can be had to this legislation, and as far as I can gather the gentleman named may not be prepared to take the position until this measure becomes law. Is this commission to remain for months unmanned, and those questions left unsettled with which it was appointed to deal?

Now, my charge is not that made by the hon. member for St. John city and county (Mr. Stockton) that this thing is wrong because it does not apply to all cases. My charge is that this is a reversal of policy. I protest against that reversal and against making the chairman of the commission an officer not responsible to the Governor in Council, so that we may criticise the government for his acts, as we criticise any other acts of the ministers. Instead of having a commission simple in its methods, quick in its action, and one that can sit in any part of the country, we are to have a court whose presiding officer is not responsible to the administration. That is the charge that I want answered. I do not raise the smaller issues raised by the hon. gentleman (Mr. Stockton) —if he will pardon me for so speaking. It is the complete reversal of policy, the setting at naught of the promises that were made two years ago, when this commission was established, when Hon. Mr. Blair, as shown by the record, declared that it would not do to have the chairman of the commission removable only by the cumbersome method of a joint address of both Houses of parliament. It is impossible, practically, to enforce such a means of responsibility. Suppose that a general election were being held which turned upon the administration of the law by this Railway Commission. It would be pleaded that the government was not responsible. And, if attempt were made to act through parliament, this doctrine of vested rights would be pleaded against any change in the policy of the commission. This is not the policy that was adopted when this commission was provided for by statute. The policy of that time is completely reversed. I do not care so much, for my part, for an explanation of these petty matters as to one man being treated differently from another, because he has been a judge ; it is the reversal of policy that I want explained. Still, as was pointed out by the leader of the opposition (Mr. Foster) there is an invidious distinction—a rule is made to apply to the chairman of the commission that does not apply to his colleagues. If the chairman is to be removed only upon joint address of the House of Commons and the Senate, why should not the same rule apply to the other members of the commission ? The argument used is that this is a special case. But what I object is that the government are using this special case to make a bad general rule. Under the law as it is, if the chairman of the Railway Commission is not doing his duty, that can be pointed out in this House, and an explanation demanded of the government. The law provides that the chairman may do this and shall do that ; but there is no clause of the law compelling the fulfilment of his duty, and it is left for this House, by holding the administration responsible to cause them to compel him to do his duty. And that is the great trouble with the laws we make. We see it cropping up every day. No penalties are imposed and obligations are not fulfilled. The only course is this cumbrous and ineffective course of removal upon address of both Houses of parliament. I ask the government to explain the reason for its reversal of policy and the destruction of the usefulness of this great commission.

Mr. STOCKTON. I was not here when the policy was laid down. I hope it is not going to take three months to go through with what we are doing in the matter. I certainly shall not be one to prolong the discussion. The case of Sir Robert Collier has been brought before the House by the Minister of Justice (Mr. Fitzpatrick). That case does not apply. The law there was that a man could not be appointed to the judicial committee of the Privy Council unless he held high judical office. To comply with the letter of the law, they made him a judge, and two days afterwards appointed him to the judical committee. It was practically a device to permit an evasion of the law.

Mr. FITZPATRICK. What about the chief justice ?

Mr. STOCKTON. Lord Alverstone was master of the rolls. I am not talking about that case, and probably would not go as far as the Minister of Justice has stated with regard to it. Now, the chairman of the Railway Commission is essentially a judge, and we must recognize that fact. It may be a small matter, as my hon. friend (Mr. W. F. Maclean) suggests, but I can see no objection to making him as independent of the government of the day as is the chief justice of the Supreme Court of Canada. But, suppose the first minister were to recommend the Minister of Justice as chairman of the Railway Commission. Under section 8, the Minister of Justice, after being so appointed, could be dismissed from his office by order of the Governor in Council, because he holds no high judicial office. Why put a judge in a better position than the Minister of Justice would be if he were appointed ? It is an invidious distinction, and therefore, I say, it is special legislation. I hope the Minister of Justice will make it general, if it is the policy of the government, and make it apply to the chairman of the commission no matter what his office before appointment.

Mr. FITZPATRICK. My hon. friend (Mr. Stockton), of course, sees at once the difference between my appointment—which, of course, is impossible—

Mr. STOCKTON. It was only an illustration.

Mr. FITZPATRICK. Of course, but even taking it as a matter of illustration—I have no acquired right to a retired allowance or to the position I occupy. But if you go to a judge and ask him to accept this position he is well entitled to say : Why should you make my position more precarious under

the new appointment than it is at the present time ?

Mr. STOCKTON. You can provide in the law that, if he is removed, he is to have a retiring allowance. You can make it a general law. I state to the Minister of Justice and to the members of this House that, as far as possible, all laws should be of general application.

Mr. FITZPATRICK. This is of general application with respect to a class of persons.

Mr. STOCKTON. It is a general law made to suit a particular case.

Mr. FITZPATRICK. My hon. friend (Mr. Stockton), I am sure will be willing to take a reasonable view of my difficulties, and will appreciate them, when he considers what fell from the lips of my hon. friend from South York (Mr. Maclean) and what fell from the lips of my hon. friend from North Toronto (Mr Foster). In the one case I was asked to make a special law for this particular individual ; on the other hand I am told not to do any thing of the sort in any direction or in any case.

Mr. STOCKTON. Well, I think it would be better legislation to make a special law for this particular case, which will just fit Judge Killam, if he is to be the man ; and then after that, have the law general.

Mr. W. F. MACLEAN. I object absolutely to that. I want what was promised to the people of this country, and I will insist on it, I want the chairman of that commission to be a responsible officer, under the doctrine of responsible government.

Mr. FITZPATRICK. Will my hon. friend define what he means by responsibility ?

Mr. W. F. MACLEAN. I will answer in the terms of his colleague, the hon. gentleman who put this Bill through the House. Mr. Blair said this : We are not going to make these men judges, this is not a court; it may have some of the functions of a court of law, but it is to be a business man's tribunal, not a court. He told us that business methods were to be adopted in it, there was to be a speedy settlement of cases, it was a kind of board of arbitration, which is much different. It is a board of arbitration such as they have in the United States. They are not courts there, they have certain functions of courts, but they are chiefly boards of arbitration and settlement. I still insist on what the public were promised. What the public expected was a responsible officer in the way that a Lieutenant Governor is responsible—to use the example of their own side when they brought down the Bill. They printed the Bill twice with the provision in it that these men were to be judges. But Mr. Blair pointed out that this was not a court of law so much as a commission to do certain things. But that idea was abandoned, and he apologized to the House that he had placed these men on the basis of judges, and he said : We want to have them on the basis of lieutenant governors who can be removed by Order in Council. I say that is what the people were promised, and by that I mean a chairman responsible to the people, responsible to parliament in a speedy way, and responsible to the Governor General in Council. But there is a reversion of policy. I want what the public were promised, I want to see a chairman there on the lines that the hon. gentlemen mentioned when they introduced the Bill. What reason have they for this change, the only legislation they are entitled to bring into this House to-day after the recent change of the law ? They told the member for Lincoln (Mr. Lancaster) the other day : We do not want any amendment to this law, we want to try it, let us work it out and introduce no changes. Now, one year after they have put it into motion, they introduce this radical change to meet a special case. As I said before, they are abandoning their own policy, they are abandoning the things which were in the public interest. I protest against it, I will protest unceasingly against a judge being made chief of this commission. It is not a court, it was never intended to be a court, and I emphasize that point and will continue to emphasize it. This is not a court, it is a commission.

Hon. N. A. BELCOURT. How does my hon. friend wish the commissioner to be responsible ? What does he mean by saying the commissioner is not going to be responsible ? Does he mean that he is not responsible to parliament or to the government ?

Mr. W. F. MACLEAN. He is not responsible—using the words of hon. gentlemen opposite to the Governor in Council.

Mr. BELCOURT. Do I understand him to wish that the resolution shall make the commissioner responsible to the Governor in Council ?

Mr. W. F. MACLEAN. I wish the law to remain as it is.

Mr. BELCOURT. But what is the law ?

Mr. W. F. MACLEAN. The hon. gentleman must read it for himself, he is a lawyer.

Mr. BELCOURT. I am putting the question in all fairness, I am asking what is it he wishes.

Mr. W. F. MACLEAN. I wish the law to remain as it is.

Mr. BELCOURT. That the commissioner shall be responsible to the Governor General ?

Mr. W. F. MACLEAN. As the Lieutenant Governor is, to use the words of those who introduced this Bill.

Mr. BELCOURT. I want to know what the hon. gentleman means ?

Mr. W. F. MACLEAN. I have told you very plainly. Again I say that the amendment changes the law. Does the hon. gentleman (Mr. Belcourt) not remember that we on this side of the House have all been warned off : Don't touch this legislation ? They now propose to reverse the policy, and why ? Something has gone wrong, they have had a bad experience with their first appointee, and that chairman has done something that he should not have done. He left the whole court in a mess—if I may use the term. The legislation that should have been introduced here to-day was legislation which would prevent the recurrence of such a thing, and there ought to be some kind of provision in the law that the man who accepts the high position as chairman of that commission cannot leave it as this chairman has done. The chances are that we are to have no railway commission for three months, until this legislation can get through, and possibly it will be three months before the government's consent can be had. In the meantime the country will be tied up, and in the meantime the great expenses of this commission, $50,000 to $100,000 will continue, and the car which the commission procured because they could not wait to have one built in Canada, is lying sidetracked now, I suppose. There is no administration of that law, and there is a complete change in the policy. Again I ask the right hon. gentleman why this reversion of policy.

Mr. STOCKTON. Section 8 of the Act says it is a court of record.

Mr. W. F. MACLEAN. It also says it is a railway commission.

Mr. BELCOURT. It is amusing to hear the hon. member for South York (Mr. W. F. Maclean), who is in his own estimation the champion of the people, taking the position he does to-night. As I understand it, the resolution will have the effect of making the chairman of the Railway Commission responsible to the two Houses of parliament. What my hon. friend wants now is to make him responsible to the Governor in Council only. Now, if that is consistent with the course which the hon. gentleman ever advocates in this House, and in his paper, he, the great champion of the people, I cannot understand his position. It is not consistent with his past, it is not consistent with the ideas which he constantly advocates.

Mr. W. F. MACLEAN. The inconsistency is over there.

Mr. BELCOURT.

Mr. BELCOURT. What does the hon. gentleman mean by saying that the chairman of the commission is not going to be responsible ? It means that according to him he won't be responsible to the Governor General. But by this resolution you are going to make the chairman responsible to the whole country.

Mr. W. F. MACLEAN. I want him responsible to the people directly.

Mr. BELCOURT. You are going to make the chairman responsible to the advisers of His Majesty, they all being responsible directly to the people of Canada, of whom the hon. gentleman constitutes himself the champion. You are going to the highest court in the land, the parliament of Canada. Surely the hon. gentleman will see how absurd and how inconsistent his position is.

Mr. W. F. MACLEAN. If the hon. gentleman will lecture those on his own side he will be consistent.

Mr. FOSTER. I hope the Minister of Justice will take the suggestion that has been made by my hon. friend from the county of St. John (Mr. Stockton). Perhaps the Minister of Justice will give me his view as to consistency in this respect. Did the minister make this first clause with this purpose in view, that as the chairman of the Railway Commission was a judicial officer, occupying the place of a judge quoad his jurisdiction in the matters that came before him, he thought he ought to be placed as a judge in the matter of dismissal ? Now if there is any principle underlying this Bill at all so far as the first section is concerned, that is the principle, there can be no other.

Mr. FITZPATRICK. No, that is not the principle.

Mr. FOSTER. Then there is no principle in the Bill. It is simply a piece of special legislation made to fit the case of the present selection for appointment. So far as this Bill goes, it asserts that the chairman of the commission being a judge, occupying the position of judge, it is best that he should have the protection of a judge, that is, he should not be liable to be dismissed by Governor in Council, but he should have the same security as a judge in that respect, and could only be displaced by parliament acting together. That is declared a good thing to have for the sake of the commission itself, as applied to the chairman. To be consistent you are bound to apply the same to every person who, from time to time, may be the chairman acting as a judge on that commission. Now then if that be the principle of your legislation, and if that is not the principle there does not seem to be any principle at all, why do you confine it simply to the

gentleman who is to be appointed in this case ? Why do you not have the same general safety and security of tenure of office for every chairman of the commission who must be from the duties imposed upon him, acting as a judge ? If you do not take that ground, what ground will you take ? You may take the position, as I stated at first, that you are not making legislation on principle, that you have a special case on hand, that you want a special man and that you cannot get him unless you put this legislation on the statute-book. If you come to that, then make it special entirely, and have it for this gentleman alone, but, leaving aside the difference of opinion that there may be as to whether the Governor in Council should have the power of dismissal or whether it should be parliament—we will not discuss that—if the government is of opinion that parliament should have this authority for the reasons which the hon. gentleman has given, then make it general so that it will apply to every chairman of the Railway Commission.

Mr. FITZPATRICK. The position which my hon. friend (Mr. Foster) has taken, as I understand it is this : The chairman of the commission, is by reason of the duties assigned to him under the Railway Act, a judge to all intents and purposes. Therefore, if he be a judge why not give to that gentleman who performs the duties of a judge the same fixity of tenure in office that a judge ought to have. There is a great deal to be said in favour of that, but that is not the view that is entertained by the government and that is not the object we have in view in proposing this resolution. If we had that object in view our resolution would fall absolutely short of our object. Our view is that we should open the door and extend the field of selection, that instead of being limited practically to a choice from laymen, as distinguishing them from judges, we should have the right to go to the judicial bench if we think it necessary in order to get a man for this office and we say that in order to get a man from the judicial bench we must take into account the conditions under which he fills his present office, and that if we wish to remove him from his present sphere to that other position we want to be in a position to tell him that as a result of the transfer from one place to another his present fixity of tenure shall not be interfered with.

Mr. STOCKTON. What is there to prevent you from doing that with a chairman who is not a judge ?

Mr. FITZPATRICK. We do not think it necessary because the chairman who is not a judge accepts the conditions as they exist. He accepts or he refuses. If he accepts he is not in any way interfered with in any right which he possesses at the time, because he has no office, but the other man has been placed in a more difficult position. He would be asked to accept conditions which entail forfeiture of a right which he already possesses and it is to prevent that that we want this legislation. It may be that we are not at one on this. We undoubtedly do not agree. My hon. friend from St. John (Mr. Stockton) takes the position that this ought to be made general legislation. We take the position that it should be made legislation not applicable to the individual, but applicable to a class of individuals.

Mr. W. F. MACLEAN. I have not yet had an answer to the question which I asked.

Mr. FITZPATRICK. I did not try to give an answer to my hon. friend (Mr. Maclean). I was speaking in answer to the hon. leader of the opposition (Mr. Foster).

Mr. MACLEAN. This legislation, it is clear to me, is an attempt to destroy the usefulness of this commission. We were promised a responsible chairman of the commission, we are now to get an irresponsible chairman and once started the series will be continued. There will never hereafter be a chairman of the commission who is responsible to the Governor in Council and whose conduct can with effect be discussed on the floor of this House. I am going to sit here and urge that the policy originally adopted should not be abandoned but that the chairman should be responsible to parliament directly through the Governor in Council, and that his conduct should be discussed in this House.

On resolution 2 :

Resolved, That if any chief commissioner of the Board of Railway Commissioners for Canada, having been at the time of his appointment as such chief commissioner a judge of any Superior Court in Canada, or having resigned his office as such judge for the purpose of accepting appointment as such chief commissioner, has continued in office as judge of one or more Superior Courts in Canada and in the said office of chief commissioner for periods amounting together to fifteen years or upwards, or has become afflicted with a permanent infirmity disabling him from the due execution of his office, and if such chief commissioner resigns his office, or if his term of office, or any renewed term of office, has expired, His Majesty may, by letters patent under the Great Seal, reciting such periods of office or such permanent infirmity, grant to such chief commissioner an annuity equal to two-thirds of the salary of the judicial office which he held at the time of his appointment as such chief commissioner, or which he resigned for the purpose of accepting such appointment, to commence immediately after his so ceasing to hold office as such chief commissioner, to continue thenceforth during his natural life, and to be payable by monthly instalments and pro rata for any period less than a year during such continuance.

Mr. FITZPATRICK. That resolution merely makes applicable to the chairman of the Railway Commission that which is now

applicable to a judge; that is to say that at the expiration of fifteen years he shall retire if he chooses on two-thirds of his allowance.

Mr. FOSTER. I have not examined that resolution with any care nor do I suppose I am capable of examining it without a good deal of trouble, but I would ask the hon. Minister of Justice if this section simply secures to the judges the retiring allowance which he should have if he remained a judge.

Mr. FITZPATRICK. That is it:

On resolution 3,

Resolved, That if any such chief commissioner of the Board of Railway Commissioners resigns his office or completes his term of service, original or renewed, therein, having, in either such case,

(a.) attained the age of seventy-five years, and continued in office as such judge and in the said office of chief commissioner for periods amounting together to twenty years or upwards, or

(b.) attained the age of seventy years, and continued in office as such judge and in the said office of chief commissioner for periods amounting together to twenty-five years or upwards, or

(c.) continued in office as such judge and in the said office of chief commissioner for periods amounting together to thirty years or upwards,

His Majesty may, by letters patent under the Great Seal, reciting such period of service, and, in cases (a) and (b), such chief commissioner's age, grant to him an annuity, payable as aforesaid, equal to the salary of the judicial office which he held at the time of his appointment as such chief commissioner, or which he resigned for the purpose of accepting such appointment, to commence immediately after his resignation as chief commissioner and to continue thenceforth during his natural life.

Mr. FOSTER. What does this do?

Mr. FITZPATRICK. This resolution is intended to cover the case that was provided for by the statute of two years ago; that is to say that a judge who has been thirty years on the bench, whatever may be his age, has the right to retire with full salary. If he is 75 years of age and has served 20 years he has also the right to retire with full salary, and if he is 70 years of age and has served 25 years on the bench he has also the right to retire with full salary.

Mr. LENNOX. All these are conditions that apply to judges as enacted a couple of years ago?

Mr. FITZPATRICK. Yes, except resolution No. 4.

Mr. STOCKTON. If there is an increase in the salary he gets the benefit of it.

Mr. FITZPATRICK. Exactly, that is No. 4. We have not read that yet.

On resolution No. 4,

Resolved, That if between the date of the appointment of any such chief commissioner or of his resignation of his office as such judge and the date of his resignation of, or retirement from, the office of chief commissioner, the salary attached to the judicial office which he held at the time of his appointment, or which he resigned for the purpose of accepting appointment as such chief commissioner, has been increased, the annuity to be granted to him hereunder may be increased in the same proportion.

Mr. FITZPATRICK. That is to provide that in the event of an increase in salary being given to the judges between the appointment to the chairmanship of the Railway Commission and the time of retirement therefrom, the judge who happens to be the chairman of the Railway Commission gets the benefit of the increase with respect to retiring allowance.

Mr. U. WILSON. Do you not think it is good enough now?

Mr. LENNOX. I am always disposed to be good enough to the judges, but having regard to the fact that the judge or chief justice who takes the position steps from a salary of $7,000 to $10,000, or some such figures, I think that this clause is unnecessary.

Mr. FOSTER. You are drawing it pretty fine there. I think the government capitulated.

Mr. U. WILSON. I think we are now doing more than we should for the judges by giving them their full allowance when superannuated, and I think it is going too far to do this. A man getting $7,000 a year and stepping into a position at $10,000 a year, if he holds that position for ten years has an increase of $30,000, and I think he might be well satisfied with that. I am against superannuation when it comes out of the pockets of the working people—the taxpayers of this country. There does not seem to be any inclination on the part of the government to take into account the people who pay the taxes. They seem to be anxious to heap more honours and pay on the officials. I am willing to have the officials well paid, but after you pay them for the services they render the country, I do not think you should provide for them in their old age. All people in the ordinary walks of life have to provide for their own old age, and I do not see why they should in addition have to make provision for the old age of other people. I would ask to have clause 4 struck out.

Mr. FITZPATRICK. The intention of the legislation is that the judge, after he leaves his present position and goes on the Railway Commission, should continue to enjoy all the advantages which will attach to his present office if he continued in it, and this would be one of the benefits.

Mr. U. WILSON. You must remember that you are giving him $3,000 a year more for the actual time spent in the service of his country. If he gets a superannuation

allowance of $7,000, is not that enough without adding any increase that may take place in the judges' salaries ? I might say that personally I think the judges are sufficiently paid now. I believe that the same kind of men would get the judgeships if you were to pay $10,000 as now get them, because it appears that no matter which party is in power the men who have the pull get the positions, and if a man is a kicker he is more apt to get a position whether he is fitted for it or not. As I stated last year, we had a vacancy in my own county, and any lawyer would have taken it at the present salary, but there is a continual desire on the part of the lawyers in this House to advocate an increased salary for the judges. A session or two ago we authorized the superannuation of judges on full pay. To my mind the whole thing was wrong, and it seems to me that if the people understood it fully, those members who voted for it would not again be elected. I may say that I think it helped me in my election. I had a majority three or four times what I had before, because I tried to explain the wrong-doings of this government.

Mr. LENNOX. I am sorry to hear my hon. friend (Mr. Wilson) speak as he has done about lawyers. I have noticed on many occasions that lawyers are made the butts of remarks that are not deserved.

Mr. FOSTER. They get revenge when it comes to fees.

Mr. LENNOX. I must say that, although there may be some justice in what the hon. gentleman says in some instances, it was not the prevailing rule when this was discussed before, that lawyers advocated large salaries for judges. They took occasion to point out that certain improvements were required in the judiciary, in the actions of some of the judges, &c., and perhaps these remarks were well founded. I also noticed that some gentlemen remarked this afternoon that the lawyers get the best of everything. I do not think they do in this world, although I think they will hereafter.

Mr. FITZPATRICK. That is not the popular belief, unfortunately.

Mr. LENNOX. Probably not. However, I do not think I succeeded in making myself understood a few moments ago. By the resolutions down to No. 4 we provide for what I think we might, in a general way, speak of as vested rights. We have made specific provision for the judges, and I think it is perfectly fair that a judge taking this position should not be deprived of any of the conditions existing at the present time for which we make provision, and in applying that rule to the circumstances with which we are dealing, I think that if a judge accepts the position of chairman of this commission he will be bettering himself by the addition of $3,000 a year to his salary during such time as he occupies the position, let us say, in round numbers, ten years. He is accepting a certainty, and is getting more than that ; he is getting also the contingencies in connection with the appointment to the new position, that is, if it should be found—and I do not think that this is beyond the range of possibility—that the position of chairman of the Railway Commission is a particularly onerous one, involving hard work—and I believe it will involve hard work—it may happen that we will raise the salary to even a higher point than it is to-day. He has that possibility in connection with the new position that he takes, and I submit that it is not fair to the people of this country, whom we represent, to give him the double possibility of an increase in his present salary and also of an increased retiring allowance due to the fact that the judges' salaries are raised because they are working hard in the services of their country. I do not see any justice in this. He is taking a new position with a definite increase of $3,000 a year, and he has the possibility of an increase in salary, and I do not see any fair-play in saying that he should also have the possibility of benefiting from an increase in the judges' salaries.

Mr. FITZPATRICK. If he retains his present office and an increase takes place in the judges' salaries——

Mr. FOSTER. How much ? Let us suppose a case.

Mr. FITZPATRICK. Say $2,000 to $9,000. If he retains his present position there are advantages connected with it which he would not enjoy as chairman of the Railway Commission. A judge of the Supreme Court would occupy an entirely different position with respect to judicial functions than the chairman of the Railway Commission ; he would not be obliged to go all over the country, as the chairman of the Railway Commission will in the exercise of his duty.

Mr. LENNOX. In a palace car.

Mr. FOSTER. With everything furnished, coloured porter, and all.

Mr. FITZPATRICK. We are getting down to details now. If he remained on the bench, he would be entitled to the increase if any increase comes. If no increase comes, nobody suffers ; but if an increase comes, why should he not get the benefit of it ?

Mr. U. WILSON. Because he gets a better office.

Mr. FITZPATRICK. Not a better office. the position of a judge of the Supreme Court is a very fine office.

Mr. U. WILSON. It is a very fine office, but why should he get the benefit of an increase of salary that may be given to the judges of the Supreme Court after he has left the

bench and has got another position in which he gets $3,000 a year more salary. While on my feet I may say that I am opposed altogether to the way the commission is constituted. I would like to see it composed, as was originally intended of one railway expert, one lawyer, and I should hope the whole three men of common sense. Then, I think questions of law should not be left to the chairman alone, but should be argued before the whole three as before a jury, and let the three men decide. It seems to me that the three men are more likely to do justice. What we want above all is to have men of common sense and business men on the commission. I am opposed to this gentleman getting the benefit of any increase to the salaries of the judges after he has left the bench.

Mr. FOSTER. Suppose the salary were raised from $7,000 to $9,000, he would then get the superannuation on the additional $2,000 ?

Mr. FITZPATRICK. He would get a superannuation on the basis of $9,000.

Mr. FOSTER. It is apparent, of course, to all of us that from the time he takes this office he gets $3,000 per year more than he is getting now ; he gets far and away more than he could lose by any stoppage of an increased superannuation allowance which would result from a problematical or actual rise of $2,000 in salary. The government capitulated on all other points ; I do not think there was any need of their capitulating on this point ; and when you come down to the hard facts of the case, and face the men who have to pay the money, however much these officials are paid, it is pretty hard to justify before them that you should give this man $30,000 extra during the subsistence of his office, and that he then should insist, and the government should go so far as to comply, that he should have the extra advantage, whatever it amounts to, of whatever rise of judges' salary there might be afterwards. All the contingencies that might be against him are provided for ; and if the country comes to believe, in the course of five years that $10,000 is not sufficient salary, he is not debarred from getting the larger salary which the country may think he shall get as chairman of the commission. $30,000 may be a slight matter for the minister but for myself, and to the taxpayers it is a very large amount, and I am opposed to that resolution 4, and I shall vote dead against it.

Resolution 4 agreed to.

Resolution 5 dropped.

Mr. FOSTER. I want to ask the Minister of Justice a question which I think is important. As I understand from an answer of the Prime Minister to a question the other day, it so happens that when the chairman of the commission is not able to sit with his brother commissioners and decide cases which have been heard previously by them, for any reason, such as death or sudden vacation of office, all these cases fall to the ground, and have to be gone over again. Is that so ? If it is, it is a great hardship.

Mr. FITZPATRICK. I think my hon. friend has stated the case in too general terms.

Mr. FOSTER. If certain contingencies would make all the evidence which has been taken practically useless, the trouble is not so much the cost of taking the evidence over again as the fact that there is delay in remedying grievances, and life and property in the meantime are at stake. Does the government intend to make any provision for that ? You have a man leaving an office of trust, as was said to-day, in the twinkling of an eye, saying, as it were, 'I do not care how many lives may be risked at dangerous crossings or how much property may be endangered, my own interest is involved now, and I will let the people's interest go.' If a man can leave the commission so quickly and on so slight grounds, or if death intervenes and he is taken away suddenly, there should be a saving clause somewhere to provide that the result of the previous evidence shall be saved and that the grievance shall be quickly remedied.

Mr. FITZPATRICK. As my hon. friend is aware, any two commissioners constitute a quorum. The difficulty arises from the fact that in some cases the evidence was taken before two commissioners one of whom disappeared. The other, who had not heard the evidence, could not act with the commissioner who had for the purpose of deciding the case. That difficulty occurs in courts of law every day.

Mr. BARKER. Could not that be remedied by having the evidence taken down by a shorthand writer, so that the incoming commissioner could read it ?

Mr. FITZPATRICK. I am willing to consider that.

Mr. LENNOX. You could not have that without legislation.

Mr. FITZPATRICK. It would require that. The difficulty was that two commissioners went away and took evidence in the cases that came before them, and after they came back one of them resigned. The question was put before the Department of Justice whether the commissioner who had not sat and heard the evidence could under the statute take up the cases and deicde them. Of course, there was nothing for us under the statute except to say that the commissioner who had not heard the evidence was not competent to decide the

case. The question is whether it is not possible to put something in the statute to meet that difficulty. That is a question that may fairly be considered. There are some cases that will require to be re-heard, all of which happened in the Northwest Territories. The evidence is all typewritten, but the difficulty is that one of the commissioners has not seen the witnesses or visited the localities.

Mr. LENNOX. That could be overcome by statute. There is another question I would like to ask the minister. That statute provides that as regards questions of fact all the commissioners are judges, but that there is only one judge on questions of law, and that judge was the commissioner who resigned. In other words the legal gentleman is to be sole judge on questions of law. But as regards cases which turn upon a point of law—

Mr. FITZPATRICK. I have not thought of that difficulty.

Mr. LENNOX. There is no way probably of getting over that difficulty because the sole judge of that particular point of the case has gone.

Mr. FOSTER. Before the resolutions are reported, will not the Minister of Justice give the committee the reasons assigned by the chairman for his hasty flight from that office.

Mr. FITZPATRICK. I now say, in the presence of the Prime Minister and with his authority, that not one member of the government had any knowledge of the intention of the commissioner to resign, and that the only information we had is that contained in his telegram to the First Minister, in which he said that he had resigned the office. It was naturally expected that in the interval, because some days elapsed before his resignation was accepted, he would do something towards disposing of the arrears. The telegram was sent the 18th October, 1904, and his resignation was accepted the 31st October, 1904.

Mr. FOSTER. Have you the telegram ?

Mr. FITZPATRICK. No, I have not got it here.

Mr. FOSTER. There was no explanation by him why he resigned ?

Mr. FITZPATRICK. Absolutely none. So far as the members of the government are concerned, his resignation came like a bolt from the blue, absolutely without any notice.

Mr. FOSTER. That is an answer certainly and the House was entitled to that.

Mr. FITZPATRICK. I ought to have given it at the beginning and I had it in my notes to give it. My right hon. friend, the Prime Minister, is prepared to bring down the telegram and lay it on the table.

Resolutions reported, read the second time and agreed to.

Mr. FITZPATRICK. I beg leave to introduce Bill (No. 36) to amend the Railway Act, 1903, based on these resolutions. I would ask leave to strike out clause 5 which has reference to the Local Judges in Admiralty, and I propose, when the Bill reaches the committee, to introduce an amendment to reach the difficulty which has been suggested this evening.

Motion agreed to, and Bill read the first time.

On motion of Sir Wilfrid Laurier, the House adjourned at 10.55 p.m.

HOUSE OF COMMONS.

MONDAY, February 6, 1905.

The DEPUTY SPEAKER took the Chair at Three o'clock.

PUBLIC ACCOUNTS COMMITTEE.

Mr. McISAAC moved :

That the Public Accounts of Canada for the fiscal year ending 30th June, 1904, and the report of the Auditor General, partial reports Nos. 1 and 2 for the same year, be referred to the Select Standing Committee on Public Accounts.

Motion agreed to.

QUEBEC HARBOUR COMMISSIONERS—AMENDMENT.

Hon. L. P. BRODEUR (Minister of Inland Revenue)—for the hon. Minister of Marine and Fisheries—moved for leave to introduce Bill (No. 37) to amend the Act relating to the Quebec Harbour Commissioners, 1899. He said : The object of the Bill is to extend the jurisdiction of the harbour commissioners of Quebec from St. Barnabé to Father Point in regard to pilots. To-day steamers have to stop at Father Point to take on the mails but the pilots go to St. Barnabé and Isle au Bic to go on the steamer. Under these circumstances the steamer has to stop twice. By extending the port of Quebec to Father Point we get rid of the double stoppage.

Mr. FOSTER. What is the distance ?

Mr. BRODEUR. Fifteen or twenty miles.

Motion agreed to, and Bill read the first time.

SEAMEN'S ACT AMENDMENT.

Hon. L. P. BRODEUR (Minister of Inland Revenue)—for the hon. Minister of Marine and Fisheries—moved for leave to intro-

duce Bill (No. 38) to amend the Seamen's Act. He said : The object of the Bill is to declare that section 18 of the Act shall not apply to British Columbia. I understand that it is very hard to find seamen there, and that sometimes they have to go to the United States to get them. I understand also that one of the reasons why they experience so much difficulty is the low fees paid to the shipping master. The fees are very low and it is expected that by providing that in British Columbia he may charge higher rates than are elsewhere permitted they may have a chance to get seamen without going to the United States.

Motion agreed to, and Bill read the first time.

NEW MEMBER.

Mr. DEPUTY SPEAKER. I have the honour to inform the House that the clerk of the House has received from the clerk of the Crown in Chancery a certificate of the election of R. L. Borden, Esq., for the electoral district of the county of Carleton in the province of Ontario.

SECOND READINGS.

Bill (No. 24) respecting the Kootenay, Cariboo and Pacific Railway Company.—Mr. Galliher.

Bill (No. 25) respecting the Walkerton and Lucknow Railway Company.—Mr. P. H. McKenzie.

Bill (No. 26) to incorporate the Sovereign Fire Assurance Company of Canada.—Mr. E. F. Clarke.

Bill (No. 27) respecting certain patents of the Facer Solid Steel Car Wheel Company, of Perth, Limited.—Mr. Caldwell.

Bill (No. 28) to incorporate the Northwest Telephone Company.—Mr. Turriff.

Bill (No. 29) respecting the Canada Southern Bridge Company.—Mr. German.

Bill (No. 30) respecting the Canada Southern Railway Company.—Mr. German.

Bill (No. 31) respecting the Canada and Michigan Bridge and Tunnel Company.—Mr. German.

Bill (No. 32) to incorporate the London and Saint Clair Railway Company.—Mr. Calvert.

Bill (No. 33) respecting certain patents of Jean Effront.—Mr. L. P. Demers.

Bill (No. 34) respecting the Nicola, Kamloops and Similkameen Coal and Railway Company.—Mr. Galliher.

Bill (No. 35) to incorporate the Georgian Bay and Seaboard Railway Company.—Mr. Grant.

QUESTIONS.

LENGTH OF LOBSTERS.

Mr. GANONG asked :

1. What is the present legal limit of length for lobsters that may be caught in the waters of the Bay of Fundy, between Point Lepreaux and the United States boundary ?

2. What was the legal limit of length for lobsters on October 1st, 1904, in these waters ?

3. If any change in the limit has been made, on what date was the change made, and on what date were the local fishery officers in that district notified of said change ?

4. On whose recommendation was the change made ?

Hon. L. P. BRODEUR (Minister of Inland Revenue) :

1. 9 inches.
2. 10½ inches.
3. October 14, 1904.
4. On that of the Minister of Marine and Fisheries.

LOBSTER CANNERIES.

Mr. GANONG asked :

1. How many licenses to can lobsters in district No. 1, New Brunswick, were issued in the year 1904 ; and to whom were they issued ?

2. How many applications have been received for licenses to can lobsters in district No. 1, New Brunswick, for the year 1905 ; and what are the names of the applicants ?

3. How many of said applicants have been granted licenses, and what are the names of persons to whom licenses have been granted for 1905 ?

Hon. L. P. BRODEUR (Minister of Inland Revenue):

1. None were issued in 1904.
2. Nine. J. Ingersoll, E. A. Holmes, Connors Brothers, Burnham & Morrell, J. W. Wooster, Frank McDonald, P. P. Russell, L. C. Guptill, D. S. Gaskill.
3. J. Ingersoll, E. A. Holmes, Connors Brothers, Burnham & Morrell.

NEW BRUNSWICK SOUTHERN RAILWAY.

Mr. GANONG asked :

1. Is it the intention of the government to acquire the New Brunswick Southern Railway, and make it a part of the government system ?

2. Has the present Minister of Railways, or any other person or persons in the interest of the government, had any negotiations, verbally or in writing, with any representative of the New Brunswick Southern Railway, with a view to acquiring that railway, and making it a part of the government railway system ?

3. If so, who were the parties so negotiating in the interest of the government, and with whom did they negotiate, representing the New Brunswick Southern Railway ; and what was the date of the last negotiations ?

Hon. H. R. EMMERSON (Minister of Railways and Canals):

1. Petitions have been received asking that the road be purchased, but there is no present intention to acquire the railway.

2. No, beyond the fact that petitions were received from many people in Charlotte county, asking the government to purchase the said road.

3. Answered by number one.

CIVIL SERVICE APPOINTMENTS.

Mr. SPROULE—by Mr. Henderson—asked:

1. How many permanent appointments, male and female, respectively, have been made to the Civil Service (inside division) in Ottawa since July 1st, 1896 ?
2. What is the present strength of the Civil Service in Ottawa (inside division), permanent staff, specifying whether male or female ?
3. How many temporary employees (specifying whether male or female) are on the pay-list for the inside division of the Civil Service at Ottawa for January, 1905 ?
4. How many of these have been appointed since July 1st, 1896 ?
5. In addition to the permanent and temporary clerks at present employed in the public service in Ottawa, how many artisans, labourers or other workmen employed at Ottawa were on the January pay-roll, specifying under which department these men were employed ?

Right Hon. Sir WILFRID LAURIER (Prime Minister). I have to inform my hon. friend that a motion will have to be made in order to get this information.

HALIBUT FISHERIES.

Mr. SLOAN asked :

1. Has the government any information as to whether American companies engaged in the halibut industry are encroaching in the waters under the jurisdiction of this government on the Pacific coast ?
2. Has the government taken any steps to secure control of Hecate Straits ?
3. If so, when, and with what results ?

Hon. L. P. BRODEUR (Minister of Inland Revenue):

1. Reports to such effect have reached the department, and every effort has been made to protect Canadian inshore fisheries on the Pacific, especially since the commissioning of the fisheries protection cruiser 'Kestrel.'

2. The question of a claim to territorial jurisdiction in Hecate strait is one which has formed the subject of some diplomatic correspondence and at present is in an unsettled state.

3. Answered by No. 2.

FENCING WIRE.

Mr. LEFURGEY—by Mr. Henderson—asked :

1. In view of the fact that much hardship and loss arises yearly to the farmers of Canada from the purchase of fraudulent and inferior wire for fencing, is it the intention of the government to institute such inspection of fence wire, whether made at home or abroad, as will safeguard the farmers from losses so arising ?

Right Hon. Sir WILFRID LAURIER (Prime Minister). I shall ask this question to stand because if my hon. friend (Mr. Lefurgey) were here I would have to observe to him that it is out of order as it contains a statement of fact. I shall allow it to stand in the meantime ; I simply call attention to it.

FISHERMEN FROM IRELAND.

Mr. LEFURGEY—by Mr. A. Martin—asked :

1. Has any action been taken by the government looking to the immigration of fishermen from Ireland and Scotland to Prince Edward Island to prosecute the cod fisheries off Cascumpec and other points, asked for last year by the Board of Trade of Alberton and West Prince, and promised by the minister ?
2. If so, what action has been taken ; and if none, why not ?

Hon. L. P. BRODEUR (Minister of Inland Revenue) :

1. No.

2. I promised to take the matter into consideration ; but have not yet succeeded in devising a practical scheme with a view to encouraging long-line fishermen to emigrate. In any arrangement reached, joint action with the Department of the Interior would be necessary.

YONGE STREET BRIDGE, TORONTO.

Mr. KEMP—by Mr. Alcorn—asked :

1. Did the Railway Committee of the Privy Council issue an order respecting the construction of a high-level bridge over the Esplanade at Yonge street in the city of Toronto ?
2. If so, what was the date of such order ?
3. What is the cause of the delay in proceeding with the work of constructing the bridge ?
4. Did the government, on or about October 8th, 1904, authorize a telegram to be sent to his worship the mayor of the city of Toronto, respecting said bridge, containing the words 'All right.' ?
5. If so, what was the nature of the communication to which this telegram was a reply ?
6. What action, if any, is the government taking to expedite the work?
7. When is it expected the work will commence ?

Right Hon. Sir WILFRID LAURIER (Prime Minister):

1, 2 and 3. The Railway Committee of the Privy Council passed an order in the month of December, 1903, to authorize the construction of a high level bridge over the Esplanade at Yonge street in the city of Toronto.

The powers of the Railway Committee of the Privy Council came to an end before that order had been ratified by the committee of the Privy Council, and therefore the committee had no power after this to pass an order confirming the order of the Railway Committee of the Privy Council. A Bill was introduced during last session to give authority to the Privy Council to pass an order to ratify the order of the Railway Committee of the Privy Council. When the session was over I was approached by Mr. Urquhart, Mayor of Toronto, to have this order taken into consideration, and I promised the mayor of Toronto that as soon as convenient the matter would be taken into consideration by the Privy Council, and that if the order was ratified I would in-

form him by telegram that it was all right. The order was passed on October 7.

4 and 5. The order was passed October 7, and the following day I telegraphed the Mayor of Toronto.

6. I have only to say that the government has absolutely nothing to do with that.

7. This is a matter between the Canadian Pacific Railway, the Grand Trunk Railway and the corporation of the city of Toronto.

STANLEY BRIDGE.

Mr. A. MARTIN asked :

1. What was the total expense of the survey of the Stanley Bridge Branch Line of Railway in Prince Edward Island ?

2. Have bills been presented to the government for damages sustained by persons on account of the cutting of timber and trampling of farmers' crops, which the government did not pay ? If so, what was the amount claimed by each person, and what is the name of each person ?

3. Have bills for damages of this nature been paid ? If so, what are the names of persons to whom paid, and what was the amount paid to each ?

4. Are there any bills of this nature which the government intends yet to pay ?

Hon. H. R. EMMERSON (Minister of Railways and Canals):

1. Total expenditure up to November 30, 1904, was $844.47.

2. Two claims for damages have been presented, which the government has not yet paid, viz.: John Mayne for $20, and the other, Austin J. McNeil for $120.

3. No.

4. Not aware of any that they intend to pay.

CHATHAM ARMOURY.

Mr. CLEMENTS asked :

1. Has the contract for the Chatham armoury been let ?

2. If so, to whom, and at what price ?

3. When does the government intend starting the erection of the same ?

4. What date does the contract call for the completion of the same ?

Hon. CHARLES HYMAN (Acting Minister of Public Works) :

1. Yes.

2. To John Pigott & Sons, $50,905.

3. Immediately.

4. August 30, 1906.

PRINTING OF VOTERS' LISTS.

Mr. Pringle—by Mr. Haggart—asked :

In what printing establishments were the ballots used in the last Dominion elections in Prescott, Russell, Carleton, Ottawa City, Glengarry and Stormont, printed ?

Right Hon. Sir WILFRID LAURIER (Prime Minister):

Prescott—Vankleek Hill 'Review.'

Russell—Russell 'Leader.'

Carleton—Rolla L. Crain Co., Ottawa.

Ottawa city—Ottawa 'Free Press.'

Glengarry—Alexandria 'News.'

Stormont—Cornwall 'Freeholder.'

THE CENSUS.

Mr. TAYLOR—by Mr. Sam. Hughes—asked :

1. Has the work in connection with the taking of the Census for 1901 been completed ?

2. If so, have the services of the staff engaged thereat been dispensed with ?

3. If not, how many are still retained, and in the service of the government ?

4. What has been the total expenditure in connection with the taking of the Census of 1901 up to 1st January, 1905 ?

Hon. SYDNEY FISHER (Minister of Agriculture):

1. The work in connection with the taking of the census for 1901 has been completed.

2. Yes, in so far as the taking of the census and the compilation are concerned ; but there are a certain number of the staff still in the service of the government working on tabular statements drawn from the compilation of the census. These are paid out of the General Statistics vote.

3. There are in all six persons so engaged.

4. $1,192,296.19.

INSPECTORS OF FRUIT.

Mr. TAYLOR—by Mr. Sam. Hughes—asked :

1. How many inspectors or other persons have been appointed or employed to attend to the enforcement of the Fruit Marks Act of 1901 ?

2. What amount has been paid for the services of said inspectors or other persons up to the 1st January, 1905 ?

3. What amount has been paid for travelling expenses for said inspectors or other persons up to 1st of January, 1905 ?

Hon. SYDNEY FISHER (Minister of Agriculture). I shall have to ask the hon. gentleman to move for a return, as the information is too voluminous to be given in an answer to a question.

CORNWALL BASIN DREDGING CONTRACT.

Mr. PRINGLE—by Mr. Bergeron—asked :

1. To whom was the contract for the dredging in the Cornwall basin given ?

2. Were tenders called for ?

3. How many tendered for the work ?

4. What was the amount per yard ?

Hon. H. R. EMMERSON (Minister of Railways and Canals):

1. To W. J. Poupore.

2. Yes, by poster.

3. Two.

4 Earth excavation, 50 cents per cubic yard; boulders, ¼ cubic yard and over, $2 per cubic yard.

THE WELLAND CANAL.

Mr. PRINGLE— by Mr. Bergeron—asked:

1. How much money has been spent in the past four years on the deepening of the Welland Canal ?

2. Who did the work ?
3. Were tenders called for ?
4. Was the work given to the lowest tenderer ?
5. Are tenders to be called for the work to be done this year ?
6. What price per yard has been paid to the contractors ?

Hon. H. R. EMMERSON (Minister of Railways and Canals):

1. $486,510 up to January 31, 1905.
2. Messrs. McGann & Finn, Hogan & McDonell, and Weddell, Battle & Manley.
3. Yes.
4. Yes.
5. No, the present contract covers it.
6. McGann & Finn, 38½ cents per cubic yard. Hogan & McDonell, rock, $2.75 per cubic yard. Weddell, Battle & Manley, $2.90 cubic yard.

PORT BURWELL WORK.

Mr. PRINGLE—by Mr. Sam. Hughes—asked:

1. To whom was the Port Burwell work let ?
2. Were tenders called for ?
3. If not, why not ?
4. What were the prices paid ?

Hon. CHAS. HYMAN (Acting Minister of Public Works):

1. The work was done by day labour.
2. No.
3. As the initial work to be done consisted entirely of the renewal of existing structures, it was not found possible to produce a definite specification so complete as to prevent the possibility of claims for extras.
4. For this a return should be moved.

SAULT STE. MARIE CANAL DREDGING.

Mr. PRINGLE—by Mr. Sam. Hughes—asked:

1. In what month in 1903 was the contract for dredging Sault Ste. Marie Canal given ?
2. If given in the fall, why was it given at a season when Canadian contractors were unable to take the work ?
3. Did United States contractors get the work?
4. What was the price ?
5. Was there such a rush to have the work done that Canadian contractors were excluded from doing the work ?

Hon. H. R. EMMERSON (Minister of Railways and Canals):

1. In November.
2. It was given in the autumn because parliamentary appropriations were not available until then, parliament having prorogued on October 24, 1903.
3. Yes.
4. Eighty cents per cubic yard.
5. It was necessary to let the work as early after the House prorogued to avail of the appropriation.

PRINCE EDWARD ISLAND RAILWAY.

Mr. LEFURGEY—by Mr. A. Martin—asked:

1. Has any survey been made for the proposed branch line of railway from some point on the main line of the Prince Edward Island Railway to some point on the coast at or near West Cape, and for which purpose an amount of $1,500 was placed in the estimates last year ?
2. If no survey has been made, why not ?
3. Is it the intention to make said survey ? If so, when ?

Hon. H. R. EMMERSON (Minister of Railways and Canals):

1. No.
2. Because the engineering staff was otherwise fully engaged.
3. The matter has not been recently considered.

THE AUDITOR GENERAL.

Mr. LENNOX asked :

1. Have any definite arrangements been made or steps taken to retain Mr. McDougall in the service of the country as Auditor General ?
2. What is the position of the matter, as regards the resignation of the Auditor General, or otherwise ?
3. Does the government propose at the present session to introduce legislation with a view to secure the harmonious and more efficient and satisfactory working of the Audit Office and the Treasury Board ?

Rt. Hon. Sir WILFRID LAURIER (Prime Minister):

1. No arangement, definite or indefinite, had to be made or steps taken to retain Mr. McDougall in the service of the country as Auditor General. Mr. McDougall occupies the same position now that he has done since his appointment.
2. The Auditor General has withdrawn his resignation.
3. The government do not propose to consider this question until the Minister of Finance has returned from Europe.

FISH HATCHERIES IN NEW BRUNSWICK.

Mr. WILMOT asked :

1. What number of parent fish were placed in the salmon pond at Carleton, St. John, N.B., and at what cost for each year since 1902 to date, inclusive ?
2. About what number of ova were produced, and what was the location of the hatcheries in which they were placed ?

Hon. L. P. BRODEUR (for the Minister of Marine and Fisheries):

1.

Year	Number.	Cost.
1903.	1,289	$3,825
1904.	1,022	3,334

2. Sixteen and a half millions of eggs. Gaspé, Quebec; Margaree, Nova Scotia; Bedford, Nova Scotia; Grand Falls, New Brunswick; Restigouche, New Brunswick.

RIVER THAMES IMPROVEMENT.

Mr. CLEMENTS asked :

1. Have the surveys for the River Thames from Lake St. Clair to the city of Chatham been completed for a fifteen-foot channel, as proposed by the government ?

2. If so, what has been the cost up to date for the completion of said plans, specifications and all other work in connection with the same ?

3. Is it the intention of the government to complete the work as per plans and specifications submitted, and when will the work commence ?

Hon. CHAS. HYMAN (Acting Minister of Public Works):

1. Yes.

2. The survey was made by the regular staff of the department, and there has been no other expenditure.

3. This question is under consideration.

STEAMSHIP SUBSIDIES.

Mr. ALEX. MARTIN asked :

1. Is any subsidy at present paid by the government to any line of steamers between any port in Prince Edward Island and the West Indies ?

2. What amount is paid in subsidies by the government for steamers running between other ports in the maritime provinces and the West Indies ?

3. Have any representations been made to the government or any member thereof in reference to the establishment of direct communication between the West Indies and Prince Edward Island ?

4. If so, what were they, and what does the government intend to do in the premises in order to stimulate trade and place the province on an equal basis in this respect with its neighbouring provinces ?

Rt. Hon. Sir WILFRID LAURIER (for the Minister of Trade and Commerce):

1. No.

2. $65,700 per annum on the St. John, Halifax, West Indies and Demerara service. $1,150 per round trip on the St. John, Halifax and Jamaica service.

3. Indirectly.

4. Matter under consideration.

CAPTAIN ST. LOUIS.

Mr. AMES—by Mr. Daniel—asked:

Has the Minister of Marine and Fisheries reinstated Captain Louis St. Louis, who was deprived of his certificate by the judgment of Wreck Commisioner Salmon in the 'Canada-Cape Breton' affair ? And if so, what were the reasons for the reinstatement of this officer ?

Hon. L. P. BRODEUR (for the Minister of Marine and Fisheries). There was no necessity to reinstate Captain St. Louis because he was never legally deprived of his certificate.

PROTECTION OF WOMEN AND CHILDREN.

Mr. AMES—by Mr. Daniel—asked:

Did the Montreal Society for the Protection of Women and Children present a petition to the Minister of Justice in May of 1903, asking for certain amendments to the Criminal Code, in effect that persistent wife beaters may be sentenced to be whipped, and that constables may enter without a warrant into a house where a woman is being assaulted ? If so, has the government taken this request into consideration, and do they intend taking action in accordance with the expressed views of the petitioners ?

Hon. CHAS. FITZPATRICK (Minister of Justice). In answer to my hon. friend, I beg to say that an amendment to the Criminal Code was suggested last year by Mr. Bickerdike. I did not think I ought to accept it, because it went very much too far; but when the amendments to the Criminal Code are being introduced this session, if the suggestion is moved in committee, I will take occasion to consider it then.

ST. IGNACE CHANNEL DAM.

Mr. MONK asked :

1. Did the government, at the written request of Messrs. François Arthur Marcotte, Edmond Angers and Gilles Godin, promise to have certain works done on the dam in the St. Ignace channel, in the Parish of Ste. Anne de la Pérade ?

2. Has a plan of the said works been prepared by J. L. Michaud, government engineer ?

3. If not, by whom was that plan prepared ?

4. Did Captain Edmond Angers, by letter dated the 7th March, 1904, and addressed to the department at Ottawa, demand the carrying on of the works in question ?

5. Was the money necessary for the execution of the said works voted by parliament ?

6. Were the said works executed ?

7. Why have the said works not been completed ?

8. When will the said works be done ?

Hon. CHAS. HYMAN (Acting Minister of Public Works):

1. Representations were made by the parties named to have certain works performed in the St. Ignace channel, in the parish of Ste. Anne de la Pérade, and upon a favourable report by the chief engineer.

2 and 3. A plan was prepared by Mr. J. L. Michaud, an engineer of the Department of Public Works.

4. The letter in question is not on record.

5. Yes.

6, 7 and 8. Yes. Before the execution of the works the plan prepared by Mr. J. L. Michaud was submitted to all riparian owners who signed an agreement to the effect that they would make no claim for any damages arising out of the performance of those works.

THE ENGLISH IMMIGRATION OFFICE.

Mr. MONK asked :

1. What is the total cost per year, for the past three fiscal years, of the office in England of Immigration Commissioner Preston ?

2. How many assistants are employed by the said Preston under pay by the Dominion government ?

3. What are the names and remuneration of each such assistant, respectively ?

4. What is the date of Mr. Preston's last report, and when will it be ready for distribution ?

Rt. Hon. Sir WILFRID LAURIER (for the Minister of the Interior):

1. For 1901-1902, $10,582.13 ; for 1902-1903, $31,688.98; for 1903-1904, $31,021.48.

2. There are fourteen assistants under pay by the Dominion government.

3.

C. F. Just, clerk, per month	$154 16
C. A. Allen, clerk, per month	83 32
W. G. Fincham, clerk, per month	52 72
Miss F. E. Gardner, clerk and accountant	52 72
Miss E. Godden, stenographer, per month	37 92
Miss B. Lock, stenographer, per month	34 26
Miss B. Ferrar, typist, per week	7 30
Miss K. Hales, typist, per week	7 30
Miss D. Fleetwood, typist, per week	7 30
Miss C. Priske, typist, per week	4 87
E. G. Everett, clerk, per week	10 67
E. Peddle, messenger	3 65
A. G. Hannell, clerk, per week	9 92
W. Webb, caretaker	6 08

4. June 30, 1904, and published in the report of the Department of the Interior.

RAILWAY COMMISSION.

Mr. MONK asked :

1. What have been the expenses incurred by the government in connection with providing official cars for the new Railway Commission, from the 1st February, 1904, to the 1st February, 1905 ?

2. What amount has the government expended for legal services to the said new Railway Commission during the above mentioned period, and to whom has the said amount been paid ?

3. What is the total amount expended in connection with the said new Railway Commission during the year ending 1st February, 1905 ?

4. How many final decisions has the Commission rendered during the same year ?

Hon. H. R. EMMERSON (Minister of Railways and Canals) :

1. $21,701.99.

2. $1,030 to A. George Blair, jr., $212.50 to Macdonald, Shepley, Middleton & Donald.

3. $79,600.50.

4. In contested matters 72 decisions have been rendered, and in non-contested matters 289 orders have been issued, making a total of 361 orders issued by the board for the year.

SURVEYS IN COUNTY OF JACQUES CARTIER.

Mr. MONK asked :

1. Did any engineers or officers of the government make any surveys in the county of Jacques Cartier, and especially in the parishes of Point Claire and St. Ann, during the months of October and November last ?

2. What was the cost of said surveys ?

3. With what object were such surveys made?

4. What report, if any, was made by the parties who made such surveys ?

5. How many were employed to make such surveys ?

Hon. CHAS. HYMAN (Acting Minister of Public Works) :

1. Party No. 9 of the Georgian Bay Ship Canal Survey, worked at St. Anne and along the north shore of Lake St. Louis towards Point Claire, during October and November. This section No. 9 extends from St. Anne to Montreal, and most of the work to be done is located in Jacques Cartier county.

2. Survey still in progress. Cost in October and November of party No. 9, including 4 days in September : $3,828.59.

3. The survey work done is in connection with the proposed Georgian Bay Ship Canal Navigation project from Lake Huron to Montreal, by way of the French river, Lake Nipissing, the Mattawa and the Ottawa rivers.

4. Survey not yet completed. Only the usual reports of the progress of the work received.

5. Party No. 9 was composed of 22 men in October and 21 men in November.

VOTERS' LISTS.

Mr. BOYCE asked :

1. Were all the voters' lists for the unorganized portions of East and West Algoma, East and West Nipissing, and Thunder Bay and Rainy River, used at the last parliamentary election, prepared and revised under the same statute law as the Ontario Voters' Lists Act, part 3, and by the same officers ?

2. If not, what lists were otherwise prepared and revised ?

3. Under what authority were such lists prepared ?

4. At what date ?

5. By whom were such lists prepared and revised ?

Rt. Hon. Sir WILFRID LAURIER (Prime Minister) :

1. All the voters' lists for the unorganized portions of East Algoma, West Algoma, the electoral district of Nipissing and the electoral district of Thunder Bay and Rainy river at the last parliamentary election were prepared and revised on the basis of the Ontario Voters' Lists Act, but not in all cases by the same officers therein defined.

2. Answered.

3. By an Order in Council under the authority of section 9 of the Franchise Act as amended in the session of 1901.

4. Date of the Order in Council, August 25, 1904.

5. In East Algoma the lists were prepared by Sheriff Jackson for Manitoulin Island, Collins Inlet, Killarney and White River Mouth, and by William Thompson of Blind river for the remaining parts of the unorganized districts which are on the mainland.

For West Algoma Jacob Stevenson was appointed to prepare the lists—the sheriff declining to act.

For Nipissing Sheriff Varin and his deputy Peter Groulx. For Thunder Bay and Rainy river Sheriff Thompson of the Thunder Bay district, and Sheriff Humble of the

Rainy River district; all with authority to appoint enumerators under them. The following were appointed to hear appeals: Judge McCallum for East Algoma; Judge O'Connor and Police Magistrate Quibell for West Algoma. Judge Valin and Leask, the senior and junior judge of Nipissing, and John Loughrin, stipendiary magistrate were appointed to hear appeals in the district of Nipissing. Judge Fitzgerald, Port Arthur, was appointed to hear appeals for Thunder Bay, and Judge Chappler of Rat Portage was appointed to hear appeals for the Rainy River district.

MUNICIPAL TELEPHONE SERVICE.

Mr. BOYCE asked:

1. What is the present status of the application now before the Board of Railway Commissioners of the town of Port Arthur and Fort William, to get access for their municipal telephone system into the Canadian Pacific Railway stations in the two towns?

2. Did the Board of Railway Commissioners decide that the Canadian Pacific Railway must allow the municipal telephone system in Port Arthur and Fort William to be connected with the railway stations on the payment of compensation? If so, has has the order been carried out?

3. Has the extent of the compensation to be paid to the Canadian Pacific Railway been determined? If so, by whom, and what is the amount? If not, who will determine it?

4. Is the government aware that the municipalities throughout Canada are anxiously awaiting the final settlement of this question, other applications being dependent upon the result?

Hon. H. R. EMMERSON (Minister of Railways and Canals). I must ask my hon. friend to make a motion.

SHELBURNE POSTMASTER.

Mr. JOHN BARR (Dufferin) moved:

For copies of all correspondence between the government or any minister, and any party or parties, concerning the dismissal of the postmaster at Shelburne, Ontario, on or about the 7th of March, 1903.

He said: My object is to ascertain why the postmaster was dismissed. In order that the House may understand the position, I need only refer to the history of the case. In 1867 Mr. Berwick was appointed postmaster at the village of Shelburne, Ont., and during 37 years, up to the year 1903, he filled that position with credit to himself and to the entire satisfaction of the community. He continued to occupy that position, not only during the time of the Conservative government, but also under the Mackenzie government, and there never was any complaint made against him. It is true that Mr. Berwick is a partner in a mercantile firm at Shelburne—one of these partners—and probably did employ some of his time in looking after the interests of his business. But during the distribution of mail matter he was almost always at his post and at all times he had an efficient assistant, quite competent to attend to the business should Mr. Berwick ever happen to be away. The best proof of the manner in which he conducted the post office is to be found in the fact that during all those years no complaint was made against him, until the year 1903 when, I understand, the charge was made that he had other business outside to attend to, and that there were good reformers who had not any business to look after, and who consequently should be looked after by the government. That I believe was the real cause of Mr. Berwick's dismissal. It may no doubt be charged that he was not always in the post office, but we must remember that Shelburne is but a village, and there are few village postmasters who are in their office the whole time. If they have an efficient assistant, that is considered quite sufficient, and I venture to say that the postmaster who is now at Shelburne is not more often in his place than was the late postmaster and probably has not as efficient an assistant.

But, early in 1903, an agitation was got up by a few—probably not more than a baker's dozen—every one of whom was an applicant for the office—to have a change made. And when the change was made and the new appointment settled, I venture to say the dozen agitators who had failed were just as much dissatisfied with the change as were any others in that village. So I do not think the government will gain any friends by the change. The agitation was carried on beneath the surface. No petition, so far as we knew, was circulated. The majority of the people using the office neither made nor heard of any complaint. But those who were anxious to obtain the office, gained the assistance of a senator, and probably of a member of the House, although both are outside of the riding and have no interest in the matter whatever except in promoting the welfare of their friends in the reform party; now could they have had any object in removing the postmaster who had grown gray in that service? And they succeeded in bringing about the change without the member then representing the county, without 99 out of a hundred of the people really interested knowing anything about it. Mr. Berwick had held the office for thirty-seven years was replaced without any reason given, so far as I know. No just cause was assigned—there was none to assign. These agitators succeeded in putting one of their party friends in the place that Mr. Berwick had occupied so long. Now, Mr. Speaker, if we are to have the American system adopted in Canada, the course taken by hon. gentlemen opposite in this matter is the one that is most likely to bring it about. It is well known that in all the various departments, this government are weeding out the Conservatives, so that in the very near future

not a Conservative will be left in the public service of the Dominion. But I wish to remind hon. gentlemen opposite of the signs of the times. They cannot shut their eyes to the fact that one province after another is going Conservative by overwhelming majorities—the latest by a perfect landslide. If the incoming government in Ontario were to follow the example of the hon. gentlemen opposite there would be a weeding out of officers that have not attended to their duties; and if they were to follow it completely, even men who had attended to their duties, as Mr. Edward Berwick did, would be dismissed on some excuse to make way for friends of the party in power. We have only to follow the example set by this government to have the spoils system established in this province. In my opinion, it was an evil day for this Dominion when that system was inaugurated ; but the government cannot blame Conservatives if the Liberals in Ontario are given a dose of their own medicine in the near future. We have no desire to follow that course ; we should regret to be driven to it ; but we cannot be blamed for following it, if it affords the only means by which we can protect our own friends. I know that the cry may be raised that Mr. Berwick had an interest in a store in Shelburne. But it cannot be shown that he in any way neglected the duties of the post office. As I have stated he was in his place day by day when the mail was delivered, and there was nothing in what he did to afford just ground for complaint. When the papers come down, I hope we shall learn who was the power behind the throne in causing the removal of Mr. Berwick without the member for the county or the great body of the people interested having any knowledge of what was going on.

Hon. Sir WILLIAM MULOCK—(Postmaster General)—There can be no objection to the order going. I think that when it is obeyed and the papers are brought down, it will appear that the change of postmaster to which my hon. friend (Mr. Barr) refers was not brought about by any political considerations. I think the hon. gentleman himself has given the explanation. I should infer, from his own admission that the reason for the change was that the postmastership at Shelburne had attained such importance as to entitle it to the undivided services of the person holding it. I speak now without any recollection of the facts. Perhaps I ought to apologize for not having informed myself ; but I failed to notice the motion on the paper in time. I have sent for the papers in the case, and had hoped that they would arrive before I needed to make my remarks. However, the hon gentleman from Dufferin (Mr. Barr) himself has stated that the village of Shelburne has grown a place of considerable importance. I presume that there are many merchants there competitors in business of the gentleman who held the postmastership. If such are the facts, I think it will be made clear by the papers in this case, when they are produced, that the change has been made in pursuance of the policy of the department that the postmastership of a place shall not be held by a person engaged in other business if the office itself furnishes sufficient emoluments to give the officer a living about on a par with the average earnings of the people there. You can well understand, Mr. Speaker, how a village postmaster who is carrying on the business of a general store has, by reason of his office, special advantages over his rivals. As long as the revenue is not sufficient to furnish a good living for the postmaster, that condition of affairs is not disturbed. But when the place grows in importance, and exception is taken to it by competitors, some attention must be paid to those objections. I think my hon. friend will find such to be the conditions in this case. I do not dwell upon his other statement, nor would I regard it as a sufficient reason for a change that this gentleman had held the office for thirty-seven years. A man who has held an office for thirty-seven years has been fairly successful. If it was only in 1903 that he was disturbed by this government, I think there was no undue haste to disturb him. After he had been for thirty-seven years in the enjoyment of that office, I have no doubt any action that was taken was for the reason that I have assigned, not on account of any political considerations.

Mr. BARR. If I may be allowed to reply —I regret the Postmaster General did not see fit to ask me to allow the motion to stand so that he might get information that would throw more light upon it. The very fact, as the hon. gentleman says, that a man had been thirty-seven years in the position, was sufficient to remove him——

Sir WILLIAM MULOCK. I did not make that statement.

Mr. BARR. I understood the hon. gentleman to say that might be sufficient. I find they have old men in the Senate, and in other offices, who are so old that they are not able to fill their positions properly. But as long as they are friends of hon. gentlemen opposite they are allowed to remain. I think the trouble was because that gentleman went to the polls and voted according to the dictates of his conscience, because I have heard that it was often intimated to him that if he did not change his way of voting, although he took no part in politics whatever, he would be removed. As to the size of the town, Shelburne is not larger today, indeed I think it is not as large as it was when hon. gentlemen came into office. It is only a village, and has not grown to great importance, and I never heard from that village any complaint from rival business men, nor is the hon. gentle-

man able to tell us that any petition came in against this postmaster. There may have been, but if so, the petitions were sent in without the knowledge of the free and independent electors there, and had they known it a contrary petition would have been sent in signed by a great many Reformers as well as Conservatives. I think I have given the true solution, namely, that he was engaged in business and had a partner in the store. Well, Mr. Speaker, you know that in small places like that postmasters often have other business, the post office business is so small that it does not occupy much of their time, and it frequently happens that they employ competent men to assist them. I say again, I regret that the hon. gentleman, finding himself unable to give the information, did not allow the motion to stand, because I would have been able to enlighten him on many points. His friends probably misled him. I think possibly he would not have made the change had he been cognizant of all the facts.

Sir WILLIAM MULOCK. I think my hon. friend would have done well to reserve his judgment. When he receives the papers I think he will have occasion to change his views. A large number of his own friends asked for it.

Motion agreed to.

NORTHWEST TERRITORIES PROVINCIAL AUTONOMY.

Mr. F. D. MONK (Jaques Cartier) moved for :

Copies of all correspondence between the government of Canada, or any member thereof, and the government of the Northwest Territories, or any of its members, in reference to the granting of provincial autonomy to the said Territories, since the date of the last prorogation of parliament.

He said : The object of this motion is to obtain the correspondence in regard to the autonomy of the Northwest Territories that took place since the last prorogation of parliament. We had two returns during the last parliament, bringing down only a part of the correspondence. The object of the motion is to complete it.

Motion agreed to.

POSTAL BUSINESS IN THE DISTRICT OF ALBERTA.

Mr. WM. J. ROCHE (Marquette) moved for :

A return showing in detail the business done during each of the past ten years, and also in the aggregate during the same period, in connection with the transmission of mail matter ; and with the issue and payment of money orders and postal notes at each post office in the provisional district of Alberta.

Hon. Sir WILLIAM MULOCK (Postmaster General). Perhaps my hon. friend would explain what he means by the statement 'Showing in detail the business done during each of the past ten years, and also in the aggregate during the same period, in connection with the transmission of mail matter.'

Mr. W. J. ROCHE. I want to get at the amount of business done in that provincial district in each post office for each year.

Sir WILLIAM MULOCK. Does the hon. gentleman mean the number of letters and the number of the various kinds of mail matter ?

Mr. W. J. ROCHE. Yes.

Sir WILLIAM MULOCK. I would point out to him that to give in detail what he asks for would be impossible, because there is no account kept of each piece of mail matter that passes through the post office. Every six months an enumeration is made of the business of an office for a period of about two weeks, and from these enumerations an estimate is formed of the amount of the mail matter of different kinds mailed at a particular office. Therefore this could only be an estimate.

Mr. W. J. ROCHE. It is the general business done that I desire to get at.

Sir WILLIAM MULOCK. The secretary of the department tells me that they would have to correspond with every postmaster in Alberta to get this information, and to get it as fast as the hon. gentleman wants it. Therefore there would be considerable delay involved in gathering the information.

Mr. W. J. ROCHE. I am anxious to get an idea of the business done so that it may be discussed when the question of autonomy comes up.

Sir WILLIAM MULOCK. Very well, I will give all information we can now. But if we have to correspond to get anything, it might be better to have a partial return made now, and give the rest later. I would suggest that we strike out the words 'in detail' and substitute the words 'an estimate of.'

Motion, as amended, agreed to.

INLAND AND CUSTOMS REVENUES, N.W.T.

Mr. W. J. ROCHE moved :

For a return showing the amount of revenue collected, (1) by the Department of Inland Revenue ; (2) by the Department of Customs, during each of the past ten years ; and also in the aggregate during the same period, at the following points in the Northwest Territories, viz.: Edmonton, Strathcona, Red Deer, Calgary, Medicine Hat, Maple Creek, Lethbridge, Coutts, Cardston and Macleod.

Hon. WILLIAM PATERSON (Minister of Customs). When the hon. gentleman says 'in the aggregate' does he mean to have the

Inland Revenue returns and Customs returns put together ?

Mr. W. J. ROCHE. No, separately, the aggregate for ten years.

Mr. PATERSON. That is year by year, and then total them up.

Mr. W. J. ROCHE. Yes.

Motion agreed to.

MOTIONS AGREED TO WITHOUT DISCUSSION.

Return showing the acreage in each township in the provisional district of Alberta, and in those parts of the provisional districts of Saskatchewan and Assiniboia lying west of range 13, west of the third meridian, in the Dominion Lands system of survey, that has been disposed of in each of the following ways : (a) acreage patented, either as homesteads or on sales ; (b) acreage not patented, but held under homestead entry or by purchase; and (c) acreage patented or reserved for railway land grants. Also the number of homestead entries made to date in the following land agencies : Edmonton, Red Deer, Calgary, Lethbridge, and so much of Battleford and Regina as lies west of range 13, west of the third meridian.—Mr. Wm. J. Roche.

Return of all lists of voters, as prepared by the enumerators, for the several polling subdivisions of the respective electoral districts in the Northwest Territories, and used in the recent general election for the House of Commons.—Mr. M. S. McCarthy.

Return showing the total number of acres of public lands undisposed of in the several and respective provisional districts of the Northwest Territories of Canada. Mr. M. S. McCarthy.

Statement showing the amounts expended from the 30th of June, 1902, up to the 1st of February, 1905, upon the two wharfs and approaches at Ste. Genevieve and Isle Bizard, in the county of Jacques Cartier ; also letters adddressed to the Minister of Public Works during the year 1904 in reference to the said expenditure, with estimates and statements connected therewith.—Mr. Monk.

Copy of the letter of resignation of the Honourable A. G. Blair, as chairman of the Board of Railway Commission and of all correspondence in reference to the said resignation.—Mr, Monk.

SECOND READINGS.

Bill (No. 10), respecting Labour Union Labels.—Mr. Ralph Smith.

Bill (No. 21), to amend the Act respecting the Safety of Ships.—Mr. Sinclair.

SUPPLY.

House in Committee of Supply.

Sir WILFRID LAURIER. We will take up Public Works.

Mr. FOSTER. Is the minister's report down yet ?

Sir WILFRID LAURIER. Yes, and the report of the Auditor General also.

Mr. MONK. When was the report of the Minister of Public Works brought down ?

Hon. CHARLES HYMAN (Acting Minister of Public Works). I expect to be able to lay the report on the table on Friday.

Sir WILFRID LAURIER. I was not correctly informed. I thought the report had been brought down.

Mr. FOSTER. I do not think we can go on with this until that report is down. Hon. members ought to have a chance to scan the report.

Sir WILFRID LAURIER. I think there is a good deal in the Auditor General's Report.

Mr. FOSTER. That is true, but the report of the minister needs to be studied somewhat by the members. We have acceded to the request of hon. gentlemen to proceed in some cases because we did not want to delay business entirely, but I do not think we can go on with the estimates of the Department of Public Works without that report.

Mr. HYMAN. Possibly I may be able to go on with the capital expenditures.

Mr. FOSTER. Those are just about as important as the others and I think a little more so. The Department of Public Works is a very important one, and hon. members have had no opportunity of seeing the report.

Sir WILFRID LAURIER. We might start and if hon. gentlemen opposite want to reserve any item we can reserve it for discussion later on.

Mr. FOSTER. We approach it without any knowledge ; we might be wasting time.

Sir WILFRID LAURIER. Well, there is nothing left but to adjourn the House then.

Mr. FOSTER. Is the hon. Minister of Militia and Defence (Sir Frederick Borden) ready with his ?

Sir WILFRID LAURIER. The report is not down either.

Mr. FOSTER. What have we besides ? When will we have the railway report ?

Mr. EMMERSON. I have not received the report from the Printing Bureau. It was promised for to-morrow.

Sir WILFRID LAURIER. To-morrow we will take up the Census Bill and the resolution in regard to apples. We will have enough for the day with those.

Mr. FOSTER. You are not ready with these to-day ?

Sir WILFRID LAURIER. No, we did not expect to take them up. Many members of the House would like to be present during the discussion of these questions and we set them for to-morrow.

Mr. FOSTER. To piece out the afternoon we might go on with these estimates, dis-

cuss the items and then allow a few to stand as we did with those of the hon. Minister of Militia and Defence, so that we can come back to any one of them.

Public Works—chargeable to capital—public buildings, Ottawa—Dominion Archives building, $45,000.

Mr. BERGERON. Explain.

Mr. HYMAN. This building is to provide a safe keeping place for the archives and public documents. It is to be erected just back of the Printing Bureau, on the extension of Mackenzie Avenue, on land owned by the government. The contract has been let to William McGillivray, of Ottawa, for $49,847.

Mr. FOSTER. How much has been spent on that work so far ?

Mr. HYMAN. There has been practically no expenditure ; the contract was let on September 29.

Mr. BERGERON. When will it be finished ?

Mr. HYMAN. September 30.

Mr. BERGERON. Is there to be another building erected where the National Gallery will be housed ?

Mr. HYMAN. Yes, another item in the estimates deals with that.

Mr. FOSTER. How much does the minister expect will be spent on this building by July 1 ?

Mr. HYMAN. About $35,000.

Mr. FOSTER. What is to be the total sum for building and equipment ?

Mr. HYMAN. For the building, $49,857. Then there are estimates for an elevator $6,000, heating $5,000, electric wires and fittings $2,500, fittings and furniture about $10,000, levelling of grounds, sidewalks and fences $2,000, and the usual percentage for contingencies, bringing the estimate of cost of the building to about $80,000.

Mr. FOSTER. $80,000 complete ?

Mr. HYMAN. Yes, it is to be a fireproof building.

Mr. FOSTER. What is the size of the building and how many stories will it have?

Mr. HYMAN. It will have three stories and a basement. The length will be 100 feet and the breadth 50 feet.

Mr. BERGERON. Is there much land belonging to the government in that part of Ottawa ?

Mr. HYMAN. There are a number of feet of land in that district. I think all of that land is practically vested in the Militia Department.

Mr. FOSTER.

Mr. BERGERON. My object was to ascertain whether this building could be utilized for some of the departmental offices that are now scattered all over Ottawa. I understand we are paying a large sum of money for rent, and if these offices could all be in the same building it would be a saving, and at the same time it would be more convenient because now when you want to visit different departments you have to travel all over Ottawa.

Mr. HYMAN. I do not think it will be possible in connection with this building. I may say that I have been asked by the librarian for permission to use one, and possibly two floors for the storage of a certain number of papers that are burdensome to the library, and it is proposed to use part of the building in this way, but I do not think the building could be used for any other purposes. It is to be a fireproof building and is to be used simply for storage.

Mr. FOSTER. The question arises as to the capacity of the library. We have not a very large library. It is a very complete one so far as it goes, but its storage capacity is, I believe, more than exhausted. In the erection of a building of this kind when you have your foundation it should be easy to run it up a couple of stories more and it might at least be a point to be considered whether there could not be provided in this building additional space for at least a portion of the books and papers now in the library that are seldom used, but that must be preserved. I do not think it would be well to have general offices in the museum because these are too different from the purposes of a musuem, but something must be done sooner or later to provide additional accommodation for the library. Has the minister considered that question ?

Mr. HYMAN. I have given it whatever consideration is possible, and I have no doubt that one and possibly two stories, one certainly, will be available for that purpose. I may say in this connection that I have also been asked by the librarian to take into consideration the raising of the roof of the portion of this building which is at present being used as a reading room. I have asked the chief architect to figure on this and draw a plan, in order that we may see if we could not in this way without injuring the architecture of the main building provide certain accommodation for library purposes. While I have not a full report from the chief architect I may say that he is of the opinion that it could be accomplished.

Mr. FOSTER. That would be rather for the extension of the book room.

Mr. HYMAN. For the extension of the book room for those books that might possibly be wanted. Then I am sure that we

will be able to arrange in the building that we are now discussing for the storage of those books which are not often called for. Thus, with the raising of the roof of the present reading room, and the accommodation provided in this new building I hope to overcome the crowded condition of the library which certainly makes everything very inconvenient.

Mr. FOSTER. What material is to be used in this building.

Mr. HYMAN. The walls of the basement are to be of stone and the remaining portions brick, with stone facings.

Mr. BERGERON. Have you the plans ?

Mr. HYMAN. I have not the plans here.

Mr. FOSTER. For the purpose suggested we want a building which will be permanent, and I should think it ought to be erected in the very best style so as to be architecturally an ornament to the city and a credit to the government. What kind of stone is the minister going to use ?

Mr. HYMAN. The foundation and trimmings will be of limestone and the roof of iron ; it is supposed to be an entirely fireproof building.

Mr. WHITE. Is it intended to use cement in the floors of this building ?

Mr. HYMAN. Yes, it is intended to use concrete.

Mr. HENDERSON. I would like the minister to inform us where all these public documents for which provision is now being made, have been stored during the last 20 or 30 years ? Will these public documents that are now stored be removed to the new building so as to have them all under the one roof ?

Mr. HYMAN. A portion of the Langevin block is used at the present time for the storage of a large number of papers ; but it is intended to remove from the different departments to this building, as far as possible, all the documents which ought to be safely kept.

Mr. HENDERSON. I understand that in the basement of this building there are vaults in which a large number of old records are stored. Am I correctly informed as to that ? If so, there ought to be considerable available space left for other purposes if these documents are removed.

Mr. HYMAN. I am not informed as to that. I have no doubt that when this building is completed and a search is made for documents, we shall find them stored in a good many unexpected places.

Mr. FOSTER. Where are the Dominion archives kept now ?

Mr. HYMAN. In the Langevin block.

Mr. FOSTER. In what way does the minister provide against their destruction by fire ? Has he simply a fireproof building, or has he vaults as well ?—because some of these documents are very precious and important?

Mr. HYMAN. There is to be a very large vault in the building for particularly valuable documents. But the building itself is practically one vault, divided into sections by fireproof partitions.

Mr. FOSTER. How much more would a stone building cost than brick ?

Mr. HYMAN. I am informed by the chief architect that that would depend very largely upon the style of architecture. A plain stone building would cost about 25 per cent more.

Mr. FOSTER. I am not an architect, but it struck me that for the Dominion archives we ought to have a really fine building, and one of stone instead of brick, which has a rather common look for a building of that kind, in which the richest treasures of learning and knowledge and history with reference to the country are placed.

Mr. HYMAN. I may say that the question of the archives building and the question of the museum building came before the department. The latter, being a building that would be visited by a great many more people than the former, we considered should be a stone building, and a first-class building in every way. The archives building is intended to be more of a store house, and in regard to it the question of safety was chiefly considered.

Mr. SAM. HUGHES. Are the walls to be hollow ?

Mr. HYMAN. No.

Ottawa—Royal Mint, $200,000.

Mr. BERGERON. How far has that building gone ?

Mr. HYMAN. The contract was signed on the 5th of January, 1905. The date for the completion of the contract is the 5th of January, 1907. It has been let to Messrs. Sullivan & Langdon, of Kingston. The amount of the contract is $263,194. It was let after public tenders were advertised for, they being the lowest tenderers.

Mr. BERGERON. I suppose there is no use now of talking about the use of that building ?

Mr. HYMAN. The matter has been before the House for a considerable time.

Mr. BERGERON. As we are going to coin money in Canada, I may say that an immense amount of American money is circulating through this country, and some people are trying to devise a means of getting rid of it. I was told the other day

that over $9,000,000 of American coin was circulating through Canada. I know how difficult it is to prevent this, but it seems to me that we might arrange with the banks when it reaches them not to put it back into circulation. There are also a great many American bills in the country. Every one who has travelled through the States knows that our dollar bills, which are worth their face value in gold, are not accepted there. If we are going to spend such a large sum of money in building a mint, it seems to me that it would be logical to find a means of preventing American money circulating in Canada and taking the place of our own Canadian coin.

Sir WILFRID LAURIER. My hon. friend will agree with me that that is a vast question which had better be postponed until the Minister of Finance is in his seat. I have reason to believe that before very long he will be with us. I understand that there are two sides to this question of the circulation of American money in Canada; but the question is one that deserves consideration, and if my hon. friend will bring it up at a later period, when the Minister of Finance is here, I have no doubt that it will receive some consideration.

Mr. BERGERON. I may tell the right hon. First Minister that I have been thinking of proposing an amendment to the Banking Act on that subject.

Mr. BARKER. What is expected to be the total expenditure on this building ? The amount of the contract is in excess of the sum here voted, therefore it is quite clear that further expenditure is contemplated.

Mr. HYMAN. There is, in the first place, the contract that has been let, amounting to $263,194 ; the estimate for heating is $15,000 ; for electric wiring and fittings, $6,000; for fittings and furnishings, $10,000; for vault doors and fitting, $15,000. The suggestion would naturally arise that a building of that character, in which would be stored large quantities of coin and gold dust, would require to be well fenced ; and no doubt a very expensive fence will have to be erected for the purpose of protecting that building. It is estimated that such a fence will cost about $25,000.

Mr. BERGERON. Why not take the fence around Major Hill's Park, which is of no use there ?

Mr. HYMAN. I shall take that into consideration. Adding contingencies, &c., $13,000, the total probable cost estimated by the department is $350,000. In addition to that there is the land which costs $21,250. It is a square piece of land on the corner of Sussex and Cathcart Streets and was purchased from the Canadian Pacific Railway. In addition the department are negotiating for the purchase of the property immediately adjoining—a small property—on which there is a house. We have not been able to come

to terms yet and do not want to take proceedings to dispossess the owner of the house until we find it absolutely necessary. The house no doubt will cost between $5,000 and $6,000.

Mr. SAM. HUGHES. Is the hon. minister taking any steps to prevent any other building being in close proximity to the mint. In the United States no building of any description is allowed within a certain distance of any government public building.

Mr. HYMAN. The lot on which this building is being erected is practically a square. It is bounded on one side by the river and on two other sides by wide streets.

Mr. FOSTER. Where is it ?

Mr. HYMAN. On the corner of Sussex and Cathcart Streets. It is on the river bank, almost directly opposite Nepean hill and the large convent on Sussex Street. It is in order to complete the square that the department want to buy this other piece of property, which will cost between $5,000 and $6,000. That piece of property will not be needed for building operations, but it is thought better not to allow any building too close to the mint.

Mr. FOSTER. How much land are you getting for that $21,000?

Mr. HYMAN. A little over 300 feet square.

Mr. FOSTER. Is there any building on it ?

Mr. HYMAN. No.

Mr. BLAIN. When were the plans first prepared ?

Mr. HYMAN. I do not know when the plans were commenced, but it must be at least two years since they were begun, and a considerable amount of work has been done on them.

Mr. BLAIN. When the question of erecting a mint was brought up by the right hon. the first minister some few years ago, he said that the total cost would be $200,000. My hon. friend now estimates in the neighbourhood of $375,000. Is that due to any changes in the plan ?

Mr. HYMAN. A great deal of care has been taken in the preparation of these plans and I do not think the matter is one in which the public would desire anything being done before every preparation was taken to have all the latest improvements. The architect of the department visited the United States and English mints and consulted with the best authorities in both countries. Every possible precaution is being taken to ensure the building being made sufficient for its purposes.

Mr. SAM. HUGHES. I understand that in the archives building the walls are solid. I do not care how thick a solid wall may be,

it will not prevent dampness. A wall should always be hollow.

Mr. HYMAN. Altogether the wall itself is not hollow, there is a casing inside of it of steel or iron and there is a space between that and the brick work.

Mr. BERGERON. Do I understand that the land purchased is 300 feet square and costs $21,250 ?

Mr. HYMAN. Yes, this land belonged to the Canadian Pacific Railway, who were not inclined to sell at all. The department then had the land valued by two or three valuators and the value placed upon it was in the neighbourhood of $19,000. The department asked the Canadian Pacific Railway to name a price. The company wanted $43,000. That seemed beyond the ideas of the department and we made them an offer of $19,000. On their refusal we took proceedings in expropriation. Shortly afterwards they approached the department and said they would accept $21,250.

Mr. SAM. HUGHES. When was the purchase completed ?

Mr. HYMAN. Negotiations went on during four or five months and the deal was only closed last month. The department felt it was better, considering the cost of expropriation, to give the extra amount.

Mr. SAM. HUGHES. When this matter was up a year or so ago, there was a proposition that this mint should be located at Vancouver. The hon. member for Vancouver used to demand that it should be there. That was one of the battle cries in his campaign. I do not see him in his seat, but possibly he is conveniently out of the House.

Mr. MACPHERSON. No, he is right here.

Mr. SAM. HUGHES. If I remember right that was one of the war cries in his campaign.

Mr. MACPHERSON. You need not shed any tears over his campaign.

Mr. BERGERON. Who were the arbitrators ?

Mr. HYMAN. Messrs. Taggart, Douglas and Wallace of Ottawa.

Mr. SAM. HUGHES. Why was it not located in Vancouver ?

Mr. HYMAN. This is the first time I have heard of any suggestion of that kind.

Mr. ARMSTRONG. How many tenders were submitted ?

Mr. HYMAN. There were four. $263,194 was the lowest ; $275,700 was the next, and $277,500 was the third lowest. The two last were by W. H. Davis and Holbrooke, Son & Wallace.

Mr. BLAIN. We understand that this is the contract for the building alone that has been awarded. Have tenders been received for the lighting and heating? I notice that there is a large amount for iron doors for the building. Is it the intention to ask for tenders for these items?

Mr. HYMAN. These questions have not been considered by the department as yet. It will be at least a year before that work will be done. In all cases when the sum involved is sufficiently large, or when, for any reason, it is in the public interest, tenders are called for. The usual course will be followed in this case.

Mr. BLAIN. What information can the hon. minister give us at this time about the course to be followed in regard to the vault doors and fittings, which the minister says, will cost about $15,000.

Mr. HYMAN. There can be no question as to that, in such a case, tenders will be called for.

Mr. BLAIN. Some years ago the Minister of Public Works stated to the House that he intended to have a general review of the construction of public buildings in Ottawa. I think he went so far as to secure an option or prices on some land adjoining the site of existing buildings, and indicated that a general report would be prepared as to the construction of new buildings that are necessary for the keeping of public documents and the efficient carrying on of the public service. May I ask if the minister has such a report ready or has it under consideration ? No year passes but we have an item in the estimates for the construction of some new building or the addition of a story to some building now in existence. It seems to me that this is rather an expensive plan. I think the House would be better informed and the country better served if a general policy were proposed for the construction of buildings in the capital. Of course, I understand that the building that we are now discussing is a building designed for a special purpose.

Mr. HYMAN. I am not sure that I understand exactly what the hon. gentleman (Mr. Blain) means. It would be almost impossible to make plans according to which buildings for the future should be constructed. The special needs and the site have to be considered in every case. So far as the construction of post offices and custom houses in various parts of the country is concerned, we are trying to follow the best plan and to have them all as uniform as possible.

Mr. BLAIN. The hon. gentleman (Mr. Hyman) has misapprehended my question. I refer to the statement made by the Minister of Public Works that he had learned the price of a property on Wellington street in front of these buildings and proposed at an early day to bring down a report showing

what properties were available and at what prices, and setting forth the policy of the government as to the purchase of property and the construction of buildings to meet the requirements of the public service.

Mr. HYMAN. I may say that I expected the discussion of that subject to come up on the item of rents of public buildings. If the hon. gentleman (Mr. Blain) has no objection I would be glad to have the matter discussed, and fully discussed, on that item. The sum paid as rent for buildings in Ottawa used for government purposes has grown to such proportions that it would be decidedly in the public interest to take action to provide a public building suitable for the requirements of the government service. I have had the matter under consideration to a certain extent. It is a very large question and involves a good deal of work. The officers of the department are now engaged in figuring out the floor space necessary for the departments in Ottawa at the present moment. Of course, we must also, as well as we can, provide for the future. I hope that it will be possible, before the supplementary estimates are brought down, to consider this matter more fully and to have a good deal of information to lay before the House. I hope also to receive suggestions from members of the House, so that we may reach a conclusion that will be satisfactory to the representatives of the people.

Mr. FOSTER. What is the material to be used in building the mint?

Mr. HYMAN. It will be a stone building, a rectangular parallelogram measuring 220 feet from north to south by 164 feet from east to west.

Mr. BLAIN. What kind of stone will be used?

Mr. HYMAN. Nepean stone, which comes from the neighbourhood. It is practically the same stone that was used in the construction of the parliament buildings.

Mr. BERGERON. I understand that this building, when completed will cost about $375,000. I suppose it is too late now to talk about whether the money should be voted or not, because the policy has already been decided upon and accepted by parliament. But I would be very glad if any of those who favoured the establishment of a mint at this time would explain the reasons by which that policy was supported. This is a very large amount of money to spend for a work that seems to me clearly unnecessary.

Mr. HYMAN. I was not a member of the government when the decision to construct a mint was arrived at. I have always understood that the Minister of Finance (Mr. Fielding) and the government gave very careful consideration to the whole question. The matter has been discussed in the House more than once, and I think that hon members on both sides have taken very strong grounds in favour of the erection of this building. I understand that there was no question about the necessity for it. From a departmental standpoint, the Department of Public Works is only asked to bring in plans and specifications.

Mr. BERGERON. Would some one who has had to do with this decision, tell us why they have taken that decision ? I was not here to hear their reasons. This institution is to cost in the neighbourhood of $375,000. Although the decision to construct has been taken, might I be allowed to ask the reason, since we are now voting the money ? This is a very large amount of money, and I have not heard at any time reasons given why we should have a mint in Canada. Without saying that the money is spent altogether uselessly, I may suggest that it is spent sooner than necessary.

Sir WILFRID LAURIER. I may say that parliament did not agree with the view just presented by my hon. friend (Mr. Bergeron) when the matter was up some years ago. In fact, I believe it was first brought up when my hon. friend occupied the seat he now occupies, and it has been discussed during the interval that he has been away from the House. I think he will remember that this matter was brought before parliament in 1899 or 1900, and more than once. At all events, whether my hon. friend was absent or present, this matter has been discussed in parliament more than once, and the idea taken by the government was that a mint had become necessary in view of the discovery of gold in the Yukon ; we thought the time had come when parliament should have power to coin our own money. From 1898 or 1899 the Yukon has produced gold ore to the extent of at least $10,000,000 a year. During all this time, that gold has gone to be coined in the United States, and we thought it good policy to have an institution where we could coin our own gold and put it into circulation in this country. My hon. friend is right perhaps in saying that the currency would be too limited to justify us in coining gold for Canada alone. But we have obtained from the Imperial authorities permission to coin for them also, and to issue coin for the United Kingdom. Therefore we are to coin not only for ourselves but we are to coin for the United Kingdom. This question has been discussed more than once in parliament, on these lines, and I never heard any objection taken to it. I have given to my hon. friend the chief reason that induced us to take the action we did, and that was the discovery of gold in the Yukon, which we thought ought to be minted in this country.

Mr. FOSTER. In what way would the minting of our gold here add to the production of gold in the Yukon ?

Sir WILFRID LAURIER. I do not know that it would add a single cent. But I suppose that my hon. friend is a National Policy man, that he wants to have Canada for the Canadians, and Canadian gold for a Canadian mint instead of Canadian gold for an American mint, as is the case at the present time. I should suppose that such a reason would appeal to my hon. friend.

Mr. MACPHERSON. I cannot allow this opportunity to pass without answering the suggestion of the hon. member for Beauharnois (Mr. Bergeron), that Canada does not require a mint. He says he does not see any particular reason why we require a mint. Let me give him a few facts that I am sure will apeal to him as a good Canadian. Let me tell him and this committee that the cities of Seattle, Tacoma and Spokane Falls have been built up as a result of the shipment of Canadian gold mined in Canada, which has gone to swell the coffers of merchants in the United States. I can tell him further that we are producing nearly $20,000,000 worth of gold every year, and with the exception of $1,500,000 that is produced west of the foot hills of the Rocky Mountains, that gold has gone into the United States to be minted. When a miner wants to sell his gold he goes where the people will buy it and mint it. There is no city in Canada outside of Vancouver where he can dispose of his gold, and if he did, he would probably be obliged to sell it for $1 an ounce less than he could get on the American side.

Mr. BERGERON. Will he bring it to Ottawa ?

Mr. MACPHERSON. I take it for granted that whatever government is in power will see to it that the gold produced in Canada will find its way to our own mint. Moreover, I suppose, they will arrange some scheme with the banks for the collection of the gold. People who live in the east can hardly conceive of the immense harm that has been done to Canada and Canadian institutions by the prevalence of just such a view as the hon. gentleman has expressed, that we have no real use for a mint. Of course I believe he expresses this view in good faith, not being conversant with the facts. If we had had a mint in Canada, or any place where gold could have been bought at its value, the city of Vancouver, instead of being a city of 40,000 inhabitants, would have been much more populous, because it would have received the benefit of the shipments of gold from the Yukon, and would have been a greater city than Seattle to-day. Seattle was built up, I can tell my hon. friend, from a city of 20,000 people, as it was when I first saw it, to a city of 120,000. Most of the prosperity which Seattle has enjoyed the last eight years has resulted from Canadian mined gold. Now, Sir, I think that every man in this country should be alive to the fact that we are a gold producing country. We have other things in this country besides wheat, and fowl, and barnyard hogs. Last year we produced in British Columbia alone $6,000,000 worth of gold, and the whole output in Canada was nearly $21,000,000. Let me tell my hon. friend that that $21,000,000 went over to the American side and is credited to the United States production of gold, making that country the second largest in the world, whereas if Canada was to receive her right proportion and mint her own gold, she would stand fourth as a gold producing country. I have given some of the reasons, there are others of a patriotic nature. I think it is high time that this country of 6,000,000 people should mint their own gold and silver. We can produce every known mineral I think on the earth, we produce gold in a great amount, and silver in almost unlimited quantities, and I believe the time has come when this gold should be coined in our own country, and bear a Canadian imprint. We have plenty of silver, and we shall see silver 50 cent pieces and $1 pieces of our own coining. When my hon. friend sees a gold piece with a beaver on one side and the name Canada on the other, I know his Canadian heart will swell with pride.

Mr. BERGERON. I desire first to thank my right hon. friend for the explanation he gave me. While the right hon. gentleman was speaking, I recalled to mind that this subject did come up in 1899 or 1900, and if I am not mistaken, politics did enter into the discussion of that question. Some of our friends from British Columbia were talking strongly on the lines the hon. gentleman (Mr. Macpherson, of Vancouver) has just suggested. The right hon. gentleman shows there was no politics in his scheme when he says that it was important to keep our own gold in Canada, to be minted here instead of letting it go over to the United States. Why is it that the government have waited four or five years to come to this decision and to build this institution, while our gold has been allowed to go over to the other side ?

My hon. friend from Vancouver says that instead of building up cities in the United States, Canadian cities will be built up by the construction of this mint. Surely my hon. friend is not serious. He knows very well that most Americans who come into our country in search of gold, on finding it take it home with them, and I do not think my hon. friend will find any means of preventing them from doing so. The Canadian mint here will be idle. There will be two or three superintendents and five or six clerks employed, we will spend a great deal of money and I intend to ask before I get through how much it will cost for oper-

ating. We will require to have a number of specialists. Having visited the mint in Philadelphia, I know the number of people who are employed there. I do not believe that we will coin very much money The establishment of this mint will not prevent money being coined on the American side. The hon. Postmaster General came to the rescue and spoke about the banks being called upon to help in the distribution of the gold. We know what has happened. The Bank of Commerce has a monopoly in the Yukon but that fact does not prevent Canadian gold from going to the United States. When the demand for a mint was first made in the House of Commons there was a population in Dawson City of 40,000. What is the population of Dawson City to-day? There are not 10,000 people in that city. Where is your immense production of gold? I cannot see the usefulness of such a building. It will involve the expenditure of a large amount of money uselessly. It will cost a great deal of money to keep up that institution every year and there is no reason for it. The political reason has disappeared. If the building were to be erected in Vancouver or even in Dawson City there might be some reason for it, but being located here in Ottawa it will serve no useful purpose because it will be a great deal shorter for a man coming out from Dawson City to go to the United States than to come here. My hon. friend talks about patriotism being stimulated by the establishment of this institution. If there were more patriotism there would not be nine million dollars of American coin in circulation in Canada to-day.

Sir WILFRID LAURIER. I hope we will be able to get rid of the American coin in Canada, of which my hon. friend speaks.

Mr. BERGERON. That will not do it. The banks are filled with American coin.

Sir WILFRID LAURIER. I do not find fault with that. If my hon. friend looks at the statutes he will know that the banks have been allowed to use American coin for their reserves of gold. That was necessary when we were a small nation, but we are growing. Does my hon. friend believe that we must for ever remain without our own mint and our own coin? There is in the highest sense a political reason for the establishment of a mint. Canada, to-day, with a population of six millions of souls, a larger population than that of Belgium, Sweden and Norway and many other nations and with a large production of gold, should have a mint of her own. As a commercial transaction I do not think there is any money in it. We will do well if we come out even, but whatever it may be as a commercial transaction, put it upon the ground stated by my hon. friend a moment ago—the political ground and I hope that he and his hon. friends will agree with the government that the mint will serve a useful purpose. It will assert that Canada is coming to the front. It will be an advertisement for Canada not only on this continent but everywhere. You will see our gold coins in Washington and New York and wherever you go in the United States or in Europe you will find Canada advertised as it is not advertised to-day. Our bank bills may be refused in the money markets of Europe and the United States, but when you have gold coin in your pocket it will be accepted everywhere and it will advertise Canada. In the Yukon we produce about $10,000,000 every year. That is the standard production of the Yukon now. In British Columbia, as I understand from the statement made a moment ago by my hon. friend from Vancouver (Mr. Macpherson), we produce $6,000,000—that makes $16,000,000—and in other parts of Canada we produce $4,000,000 making a total production of $20 000,000 of gold. I do put it to my hon. friend on the ground of his own political faith, on the ground that he has been preaching more than once recently: Does he not believe it is good policy that we should coin that gold ourselves in Canada? Where does it go to-day? It does not go to Europe. I do not think that any part of our gold goes to Europe, but I believe it all goes to the United States. Every ounce of that $20,000,000 of Canadian gold which is taken from the bowels of the earth goes to the United States. Let us have a mint here in Ottawa, that Washington of the North, and then we shall have something which is worthy of a nation. In the United States they have not one mint but several, one in Washington, one in Philadelphia, which is the oldest, one at San Francisco and one, I think, also at Denver. We will commence with one and as time goes on, we, like our neighbours, shall have more than one also.

Mr. ARMSTRONG. I understand that some years ago the estimated cost of this mint was $200,000; to-day it is $375,000. Why is there such a vast difference?

Mr. HYMAN. Of course, I presume, the hon. gentleman (Mr. Armstrong) refers to the question that another hon. gentleman spoke of a moment ago when something was said about the hon. Finance Minister having made a statement that it would cost $200,000. I have never seen such a statement. I presume the hon. gentleman has seen a statement of that character. I presume he spoke from memory. If such a statement was made by my hon. friend the Minister of Finance it must have been made without any calculation, because the plans of the department were not prepared in any careful way at that time. He was under a misapprehension if he made that statement. Great care has been exercised in preparing a plan which will provide a building that can be operated in the most economical way.

Mr. BERGERON. How much would it cost to heat the mint ? How many men will be employed ? How much will it cost for operating ?

Sir WILFRID LAURIER. We have not come to that yet. That is a fair question for the hon. Minister of Finance, but not for the Minister of Public Works.

Mr. FOSTER. The hon. Minister of Finance ought to be here when we are discussing this item.

Mr. BERGERON. How can we go back to the question when the hon. Minister of Finance is here ? This item will be passed.

Sir WILFRID LAURIER. I think we will find some way of satisfying the curiosity of my hon. friend, and I think he will find some way himself.

Mr. BERGERON. I will take the advice of my right hon. friend and wait until the hon. Minister of Finance is here.

Mr. BLAIN. On the question as to whether we were speaking from memory or not, I draw the attention of the hon. acting Minister of Public Works to page 5673 of the 'Hansard' of 1901. The hon. Finance Minister said that 'the building would cost $200,000.' Now, my hon. friend the acting Minister of Public Works comes forward and says it will cost $370,000.

Mr. HYMAN. No, I am sure my hon. friend does not want to misrepresent what I said. The contract for the building is $263,000.

Mr. BLAIN. That is in addition to the doors which will cost $15,000 ?

Mr. HYMAN. Yes, those are fittings.

Mr. BLAIN. The doors are fittings ?

Mr. HYMAN. Yes, the vault doors are fittings.

Mr. BLAIN. Are the windows fittings as well ?

Mr. HYMAN. No, they are under contract.

Mr. BLAIN. Perhaps the hon. gentleman would state what the total cost of the building will be. I do not mean the fittings I mean the cost of the building without the fittings. I understand the contract price is $260,000. That is $60,000 more than the hon. Finance Minister said it would cost. Then there is a considerable amount in addition as mentioned this afternoon by the hon. acting minister.

Mr. HYMAN. I have no doubt in the world that this very building which now costs by contract, $263,000, could have been built for about the sum that the Minister of Finance mentioned. Everyone knows that there has been a large increase in the price of building in the last three or four years, probably 25 to 30 per cent ; that I am sure will be accepted by the House as an explanation. Considering that the Minister of Finance made his statement without having all the details, and the plans before him. I thin he was wonderfully close in the estimate he gave, taking into consideration the difference in the cost of building. The hon. gentleman laughs. I am perfectly serious, and I am speaking of my own knowledge. In the last two years I have let contracts for buildings that cost 20 per cent more than they would have cost the year before. I do think that any member in the House with experience in building knows that the cost of building is not less than 20 per cent higher than in 1902.

Mr. BARR. I might ask if the banking interests in this Dominion have been consulted ? Probably they could give some light on this subject. It is certainly a large undertaking involving large expenditures and it seems doubtful whether due consideration has been given to the undertaking. The banking interests are probably best able to inform the House on questions of this kind and I would like to know if they have been consulted.

Mr. HYMAN. Does the hon. gentleman mean in regard to the principle of building the mint ?

Mr. BARR. Yes, the principle.

Mr. HYMAN. I understand the bankers have expressed themselves from time to time.

Mr. BERGERON. In favour of it ?

Sir WILLIAM MULOCK. There is a Bankers' Association, and on several occasions at their annual meeting according to newspaper reports which I have read, they discussed this question. I recollect now one prominent banker who was president of the Bankers' Association who expressed himself very strongly. I refer to Mr. D. R. Wilkie, manager of the Imperial bank. I think he was very strong in favour of it. Of course in all questions of this kind, as in all large questions, you will find differences of opinion, but the project is not without its advocates in the banking world.

Mr. BERGERON. It seems to me that I read a report which indicated that the vice-president of the Bank of Montreal, Mr Geo. Drummond, was certainly against the principle of establishing a mint in Canada.

Sir WILFRID LAURIER. My hon. friend (Mr. Bergeron) is perfectly right. The bankers were not unanimous, some favoured it and some did not.

Mr. BARKER. This question was up before and it was then said that this was not to be a purely Canadian mint, but a branch of the Royal mint. Now, as it is costing so much money, perhaps it would be interest-

ing if the first minister could tell us just what the distinction is. The gentleman from British Columbia (Mr. Macpherson) seems to think it is to be a Canadian affair, something that is to be of immense good to Vancouver, and to buy all the gold that will be produced in this country. When we find it is costing us nearly $400,000 we might know what the difference is between a branch of the Royal Mint and a purely Canadian mint.

Sir WILFRID LAURIER. The explanation is this : The mint is to be a Canadian mint of course, to coin Canadian gold, Canadian five dollar pieces, which as my hon. freinds know are not now coined. At the present time as my hon. friends know Canadian silver, 25 cent pieces, 50 cent pieces, &c., are all coined in England.

Mr. BERGERON. But this is only silver.

Sir WILFRID LAURIER. If we have gold coined, we get it coined in England Now we are going to do the reverse. Up to the present time the Royal Mint has coined British coins and Canadian coins ; the Royal Mint in Canada will coin Canadian coins and also English coins, the English sovereign, &c. In order to do this, the mint has to be a branch of the Royal mint ; that is the way it has to be done. This is what the Minister of Finance says. The advantage is this : We may not require for ourselves all the gold that we produce in Canada and that gold will be coined in Canada into British sovereigns and sent over for circulation to Great Britain, and in order to have this done the Canadian mint will be made by Royal proclamation a branch of the Royal Mint.

Mr. BARR. And it is to coin silver as well as gold ?

Sir WILFRID LAURIER. Yes.

Mr. BARKER. I did not think that part of the object of this building was to coin British coins for use in Great Britain.

Sir WILFRID LAURIER. Yes.

Mr. BARKER. Are we paying the money for that purpose ; is that our object ?

Sir WILFRID LAURIER. I understand that is expected—upon this point I speak under correction, as I am not perfectly sure, —that on the coin we make for the British public we make some profit. As to that, as I said, I speak under correction.

Mr. BERGERON. Of course I believe fully what my right hon. friend says, but I would ask if there is an arrangement with the British government to that effect ?

Sir WILFRID LAURIER. There is.

Mr. BERGERON. We have never had any Canadian gold coinage ?

Sir WILFRID LAURIER. No.

Mr. BERGERON. Our money is different from the English money; we have no pound or sovereign here? Will the mint here make the $5 gold pieces as in the United States ?

Sir WILFRID LAURIER. Yes.

Mr. BERGERON. And when they coin English coin it will be English pounds ?

Sir WILFRID LAURIER. Yes. We shall coin here Canadian dollars, $5 pieces, $10 pieces and $20 pieces in gold and we shall coin also the British sovereign.

Mr. HAGGART. But no English shillings ?

Sir WILFRID LAURIER. I do not expect that we will coin English silver, although we have the power to do so.

Mr. SAM HUGHES. Is there not a branch of the Royal Mint in Australia ?

Sir WILFRID LAURIER. I cannot speak positively as to that.

Mr. FOSTER. Yes there is. If this mint coins English sovereigns, which the English government of course guarantee to be of a certain fineness and value, will they take that coinage simply from our own management here or will they insist on having supervision as well ?

Sir WILFRID LAURIER. I understand they will insist on having supervision as well.

Mr. FOSTER. We have not yet got very clearly even after the speech from the hon. gentleman from British Columbia (Mr. Macpherson), and I wish we could get a little more clearly, information as to just what effect this mint is going to exert upon the production of gold into this country. The hon. member for British Columbia (Mr. Macpherson) seemed to have the idea that we are going to buy all the gold that comes from the earth. If we do that how are we going to dispose of it ? After all, gold in a sense is an article of merchandise, just the same as the barnyard hog of which my hon. friend thought so little. Will we have some coining arrangement to attach to the ear of the barnyard hog to give him currency ? A great deal of generalities are talked regarding this subject, but we cannot get any very explicit explanation. In the first place it is going to involve us in very large expense. When this first became a matter of real agitation in this country, if I understand rightly, the present Minister of Finance declared himself as opposed to it. Then the idea was advanced that it would be a good thing to have a Canadian coinage for patriotic reasons, and I think a good deal of weight should be attached to that sentiment.

The idea then was that it was to be an inexpensive operation. Well, we have the old difficulty again, that an idea is made operative by a statement of cost which is

reasonable, and afterwards it comes out that the cost runs away up above the original estimate. Here is an institution which, when built and manned, will cost at least $450,000. That is a good deal of money to pay; but that is not all, for there will be current expenditure as well. My right hon. friend knows that we make a round lot of money on our coinage by having it coined in the British mint. It is quite possible to have Canadian $10 or $5 pieces coined, with the Canadian maple leaf and beaver on them, instead of the head of the English King or the American eagle, if we desire it; and to have that circulated in Canada. and to require the banks to keep it. It would have been possible to have got all that and to have made an absolute profit on the transaction. But surely no one can argue that because you have a mint here, you are going to dispossess Seattle or any other United States coast town of the advantage which it has got largely from being the pioneer of that great movement towards the Yukon. The miner of the Yukon sells his gold as an article of merchandise; he can sell it in the United States or in Canada, and he will sell it in both countries, some in one and some in the other. But with an accumulation of gold production of $20,000,000, then $40,000,000, later $60,000,000, this mint cannot be a great receiving and buying centre which will absorb all that. Then what will you do with it? All the coinage we can use in the country is what the banks need. If we make it a condition that they shall take our own coinage, you can have some circulation of gold. But our people are very strongly predisposed to the circulation of bank bills, and they would put their gold very quickly into the banks and take out the bills for circulation. Then, my hon. friend knows that gold circulation is the most expensive circulation. It wears, and wears easily. In Great Britain, where gold goes into general circulation, the annual loss is enormous. Then, what are you going to do? The argument comes down to this, that we are going to pay pretty roundly for the sake of having a mint and coinage of our own. There may be something in that, and I am not going to controvert the views of my hon. friend on that point. The thing may have to come, and this may be the time for it. But we are greatly in want of many practical things in this country, and when we had to take half a million dollars from these pressing wants and put it into what is after all an ornament, with perhaps some slight advantage to Canada, I think it was a fair question whether we should have gone into this immense expenditure at the present time, or whether we could not have used our money to better advantage, at the same time having our gold coinage, which we could have got from London, just as London is going to take their gold coinage from us. Our coinage will go only so far as its reputation is established, and it will take time to make a Canadian stamped gold coin current in countries far distant from us. I imagine that supervision must come from Great Britain joined with our own, in order to impress widely the value of our coinage. But we might as well get rid of a great many of these floating notions that our mint is going to make our cities spring up like magic or provide a buying place for all the gold we produce.

Sir WILFRID LAURIER. I have no fault to find with the way in which my hon. friend has discussed this question. I think I would agree with him on almost everything he has said. But there is another aspect of the question. Nobody expects that the establishment of the mint will take all our output of gold. But the fact that we have a mint in Canada is bound to help the trade of Canada and to bring to Canada a trade which to-day goes to the United States. The miner in the Yukon or in British Columbia produces from the bowels of the earth many ounces of gold, and he has to find a market for it. He cannot find a market in Canada. At the present time every ounce of the $20,000,000 which is produced by Canadian miners from the soil has to go to Seattle. It cannot find a market anywhere else.

Mr. BERGERON. I understand that the Canadian Bank of Commerce is the authorized bank of the government there, and why should not this bank take the gold dust from the miners and as a matter of patriotism send it to England to have it coined into Canadian gold pieces and English gold pieces?

Sir WILFRID LAURIER. For this reason, that the Canadian Bank of Commerce, which has an establishment in Dawson city, takes the gold for commerce, and will sell it at the greatest profit; and the Bank of Commerce and all the other banks on the Pacific coast find it to their advantage to send the gold to their nearest market, which is Seattle or San Francisco, where it is bought and turned into coin. The gold must find its way to some mint.

Mr. BERGERON. Will they send it here?

Sir WILFRID LAURIER. Certainly they will. But at present they send it to Seattle. The consequence is that most of the purchases for the Yukon are made at Seattle. That is the place of exchange; the gold has to be exchanged for everything a miner requires. We get a large share of the trade, for certain reasons; but there is at Seattle, Tacoma and at other Pacific coast cities of the United States a large trade with the Yukon which we would get if the gold were to come here. With a mint at Vancouver, a great deal of the trade would go there. So that the establishment

of a mint will give a great impetus to our trade, and will give us a trade which we have not to-day. I think this reason should commend itself to the critical judgment of my hon. friend the leader of the opposition.

Mr. HAGGART. My idea of a mint is entirely different from that of the right hon. gentleman. If I am not mistaken, a mint in the United States or Great Britain coins gold free to the individual sending it. In the United States the gold is taken to the mint, not for the purpose of being sold, but for the purpose of being coined into money. The miner receives the full value of his gold in money. Then it goes, in the ordinary course of trade, to the country in whose favour is the balance of trade, for the purpose of paying that balance. And the making of mints will not cause a flow of gold in any particular direction. As soon as the mint coins the gold and hands it over to the individual, the gold will go in the end to where it is due and be used for the purpose of paying the balance of trade.

Sir WILFRID LAURIER. How are these balances paid in any part of the world? In the Yukon some years ago when there was no bank there, the miner brought his bag of gold to the counter where he exchanged it for something else. The gold was weighed and its value in goods given to him. But he would not follow the same process in the city of London. He would there bring his gold to the mint and would use the coins which he got in exchange for the purchase of what he required. The gold which is produced in Canada has to go somewhere to be coined. To-day we have a bank in the Yukon, and the miner goes to the bank and receives bank notes in exchange for his gold dust. But the bank has to send that gold dust somewhere, and I venture to say that every ounce of it goes to the United States because there it can be coined. Of course, the surplus will find its way to Europe or anywhere else where it may be required. But when we have a mint in Ottawa, the gold produced in Canada will be sent there to be coined. I dare say there will not be any profit to the government in the transaction, but we will gain by the fact of keeping in Canada a large portion of the trade which now goes to the United States.

Mr. BERGERON. What guarantee have we that the miner will bring his gold to the Canadian mint to be coined instead of sending it to Seattle? If the mint were established at Vancouver, as Mr. Maxwell, the late member for Victoria, urged, no doubt the Canadian nuggets and gold dust would be brought there to be coined. But there is no way of forcing the miner or the bank in Dawson City to send the gold down to the mint at Ottawa.

Sir WILFRID LAURIER. It is now nearly 6 o'clock and if you will pass the item, I will move that the committee rise.

Sir WILFRID LAURIER.

Mr. FOSTER. With the understanding that we may go back to the discussion.

Sir WILFRID LAURIER. Certainly.

Mr. BLAIN. I understood the First Minister to say that we would mint silver coin as well. In that respect he seems to differ with the Minister of Finance.

In the session of 1901 this question was put to the Finance Minister (Mr. Fielding):

Will the Branch mint in Canada make British silver coins as well as gold coins?

MINISTER OF FINANCE. No, there are reasons why we shall not undertake to make British silver coins. We make no profit in the production of gold coins, because gold is worth no more in the form of coin than in the form of bullion.

Then the Finance Minister went on to say:

If we could mint silver into British coins in unlimited quantity, we could make a great deal of money; but it would be entirely unreasonable to expect the British authorities to allow us to engage in that enterprise.

Sir WILFRID LAURIER. That is British silver, not Canadian silver.

Some resolutions reported.

On motion of Sir Wilfrid Laurier, House adjourned at 5.55 p.m.

HOUSE OF COMMONS.

TUESDAY, February 7, 1905.

The SPEAKER took the Chair at Three o'clock.

MEMBER INTRODUCED.

R. L. Borden, Esq., member for the electoral district of Carleton, Ontario, introduced by the Hon. Geo. E. Foster and Mr. F. D. Monk.

SELECT STANDING COMMITTEES.

Rt. Hon. Sir WILFRID LAURIER (Prime Minister). Mr. Speaker, I beg to move:

That the name of Mr. R. L. Borden, member for Carleton, Ontario, be added to the Standing Committee on Privileges and Elections, and the Standing Committee on Banking and Commerce.

I may inform my hon. friend (Mr. Borden), whom I welcome back to this House, that in anticipation of his early presence in the House we reserved for him places upon the Committees on Privileges and Elections and Banking and Commerce. These are the only two committees on which he served last year, and I hope they will be satisfactory to him again.

Mr. R. L. BORDEN (Carleton). They will be entirely satisfactory to me, Mr. Speaker, and I am very much obliged to my right hon. friend (Sir Wilfrid Laurier) for his welcome. I arrived a little later than I

intended, but I believe I am entitled to the sympathy of my right hon. friend (Sir Wilfrid Laurier), because I think he had once an experience of the same kind.

Sir WILFRID LAURIER. Oh, yes.

Motion agreed to.

Sir WILFRID LAURIER. I beg to move:

That the name of Mr. Fisher be added to the Committee on Private Bills.

I make this motion after consultation with my hon. friends on the other side.

Motion agreed to.

FIRST READINGS.

Bill (No. 39) respecting the Niagara, St. Catharines and Toronto Railway Company.—Mr. Calvert.

Bill (No. 40) respecting the Niagara-Welland Power Company.—Mr. Guthrie.

Bill (No. 41) respecting the Regina and Hudson's Bay Railway Company.—Mr. Scott.

Bill (No. 42) respecting the Vancouver, Westminster and Yukon Railway Company.—Mr. Macpherson.

Bill (No. 43) respecting the Lake Champlain and St. Lawrence Ship Canal Company.—Mr. Gervais.

REPORT PRESENTED.

Annual Report of the Geographical Board of Canada to June 30, 1904.—Sir Wilfrid Laurier.

CENSUS AND STATISTICS.

Bill (No. 5) respecting the Census and Statistics—Mr. Fisher—read the second time, and House went into Committee thereon.

Mr. R. L. BORDEN. Perhaps before we proceed to the consideration of this by sections, the hon. gentleman (Mr. Fisher) would give us what is usually given on the motion for the second reading—some explanation of the purport and scope of the Bill, and what evils it is intended to remedy.

Hon. SYDNEY FISHER (Minister of Agriculture). At the request of my hon. friend the leader of the opposition (Mr. R. L. Borden)—and I would also like to add a word of welcome to the House—I shall be very glad to give an outline of the intention of this Bill. It is a Bill practically to consolidate three actual laws—the Census law, the law of General Statistics and the law of Criminal Statistics. These three laws deal with the same subject. They, however, contain different provisions, and to a certain extent overlap each other; in some instances, to a slight extent, they conflict with each other in some details.

Mr. FOSTER. These two Acts form all the existing legislation?

Mr. FISHER. I know of no other, except one Act in connection with the formation of the province of Manitoba, the Act respecting the subsidies of the province of Manitoba, which requires that a census should be taken of the province of Manitoba each five years, and which is in no way conflicted with by the provisions of the Bill which I now propose to present to parliament. Apart from this, I know of no legislation except the three Acts I have quoted—the Census Act, the General Statistics Act and the Criminal Statistics Act. The Bill which I propose combines and consolidates these three Acts. It also provides machinery for a permanent census office. This is the chief novelty in the Bill. I ask for that on the ground of public utility and the more efficient administration of the department, and for the purpose of securing a better census in the future.

Mr. FOSTER. How about the expense?

Mr. FISHER. I believe it will be more economical too. My reasons for that are these. One of the greatest difficulties always found in the taking of the census is the necessity of organizing a staff, almost on the spur of the moment, of inexperienced people who have never had much of this kind of work before. The difficulties consequent on this hasty manner of operation would be avoided if there were a permanent census office. But, in addition to that, what I consider to be quite as important is the necessity, in the present stage of our development, of obtaining accurate statistics during the ten years that intervene between the taking of the censuses. Hitherto we have had no accurate statistics whatever for the whole Dominion except those taken in the census years. The result is that when investigations are made by students or public men, or others, requiring general information with regard to the Dominion, they have either to go back to the census year or get their information from whatever sources they can. At present, these sources are in a certain way official. The trade and navigation returns give information about trade matters, and the other departments do give certain other information; but there is no compilation of the figures given in the various departmental reports in a form available to the public at large except in the Canadian Year Book. This work is a compilation made from the various departmental reports for the year, but it only deals with what appears in those reports. I think it is in the interest of our country that we should have a more frequent taking of information in regard to our industrial and agricultural interests; and for that purpose I think it is necessary to have a permanent office which, while it takes a census of the population, and obtains detailed information on all the different subjects which have been contained in our census once in ten years, should also have the duty

of taking information at first hand on a portion of those subjects every year. I do not propose that a whole census should be taken every year; that would be quite out of the question. I do not propose that on any one subject statistics should be taken every year; but I do think that between the two censuses, there should be a periodic taking of information along various lines, and including each year a portion of the census information. For instance, certain agricultural statistics might be taken every second year, and certain other agricultural statistics in the alternate years. Certain industrial statistics might also be taken in the same way. Certain mortuary or hygienic statistics might be taken at intervals, whether every second year, every third year, or otherwise, according to the decision of the department and the facilities of the work. In this way a comparatively small staff would be able to work one year on one set of statistics and in another year on another set of statistics, and would secure for us, between the decennial censuses, in the aggregate, a large mass of important information. I think this is one of the most important objects, if not the most important, in having a permanent office, and in providing by this Act for the appointment of a permanent staff, and for giving them the authority to do in other years what they now have authority to do in the census year, each time the authority is given them designating just what information they shall collect. I may say that a work similar to this is being carried on and has been carried on for some little time in the United States. The United States census office secures a very large amount of information which our census office never has been in the habit of securing. The work in regard to the census is continued from year to year practically until the work for the next census begins. Compilations and tables are prepared from the census work of 1891, the work on which continues practically until the census of 1901 is commenced.

Mr. HAGGART. Is it simply a compilation on which these officers are at work in the United States, or do they actually get the information from the people?

Mr. FISHER. They do get what I may call interim information. They do not get it with the same exactitude, or by the personal investigation of enumerators as is done in the taking of the census.

Mr. HAGGART. How do they get it, then?

Mr. FISHER. They get it largely by correspondence, largely by issuing forms for the people to fill up and return through the post office.

Mr. FOSTER. The minister says that certain kinds of agricultural information will be taken in one year and certain other kinds in the alternate years, and that this information can be made useful for the decennial census. That I do not understand.

Mr. FISHER. That is not my idea. It is not to be made use of for the decennial census at all, but for the use of the people between the censuses.

Mr. FOSTER. As to that year.

Mr. FISHER. Yes, but we would not make use of that information at all for the decennial census. The information taken in the interval between each decennial census will not interfere in any way with the complete taking of the decennial census. The establishment of a permanent census office will not in any way decrease the necessity or the work of the decennial census except that it will decrease the expenditure in this respect, that the office being in permanent existence, we will be able to prepare for the taking of the information during the census year, and thus do the work more easily and effectively. With regard to the question put me by my hon. friend from Lanark (Mr. Haggart), the information taken between the census years would not be taken by enumeration, except in some instances. For instance, the census of Manitoba has to be taken once in five years. There was an Act requiring that on a certain day the census should be taken of the population in the Northwest Territories at the end of the five year period. That Act was for one definitely named year. That is only done once; and in view of the development of our new Territories in the west and of the fact that in Manitoba the census has to be taken every five years, it would be perhaps a good thing for Canada to take the census in the new provinces or in the Territories once in five years. That would have to be done by actual enumeration, but with regard to industrial information and even to a great deal of agricultural information, my idea is that that work should be done from the office here and done through the mails to a very large extent. Perhaps a little might have to be done otherwise, but I think nearly the whole of it could be done through the post office. Something of this kind might be done. A blank form might be sent to the various industrial establishments asking them to fill in the changes in their business since the census year. Those would be compiled and the results then placed at the command of the people.

Mr. R. L. BORDEN. Does the hon. gentleman propose to send out at certain intervals a return to be filled in by business men throughout the country?

Mr. FISHER. Yes.

Mr. R. L. BORDEN. Is there to be any mode of compelling these people to give the information?

Mr. FISHER. I propose to give the same powers to the office as are given under the

Census Act. Anybody who receives such a form would have to fill it in subject to the same penalties as at present for non-compliance.

Mr. R. L. BORDEN. It would be useless without that.

Mr. FISHER. Quite so. That is one of the reasons we need a new Act. The present one only gives that authority for the census year. I am satisfied that a system can be worked out by which we can get a great deal of local information at absolutely no expense. A large number of our best informed and leading men would be only too glad to give free information of the condition in their own locality in return for a redistribution of that information to themselves. For the last two years my department has been securing information with regard to fruit growing in Canada, without any authority or powers of execution, and we have been able to procure a very large amount—not sufficient to enable us to compile and publish it, but sufficient to guide us in our dealings with matters in that branch. We have been able without any expense to secure from men competent to give that information, a very large amount of what I might almost call statistical information. Not being complete, it could not be compiled and given to the public, but it is still a mass of information which is quite accurate, and which, if it were complete from the whole country, would be worth being compiled and published. I am satisfied, from my own personal knowledge, we could get the latest agricultural information with regard to crop areas and promises of harvest with practically no expense. That information we could compile, and publish the results. The only expenditure would be the preparing and printing of the forms to be sent out, and the work of the office in receiving them and compiling the returns, so as to make tables which would be suitable for study by the ordinary individual.

Mr. MONK. Has the hon. minister made any calculation of the expense to be incurred in connection with this law ?

Mr. FISHER. Yes.

Mr. MONK. I wished also to suggest that, as the carrying out of this law would probably involve a considerable expense, the minister should have proceeded by resolution.

Mr. FISHER. As I understand it, the rules of the House do not require the introduction of this measure by resolution. The expenditure will be provided for by an item in the estimates.

Mr. MONK. I cannot but believe that the minister is mistaken and that the very opposite is the case.

Mr. FISHER. I am not prepared to set myself up as a judge of that point. But I consulted the Department of Justice, and understood that it was not necessary in this case to proceed by resolution.

Mr. HAGGART. Does the hon. minister make provision for salaries in the Bill ?

Mr. FISHER. There is no provision for expenditure in the Bill. The Bill authorizes the department to incur certain expenses, but it does not indicate the amount. And, as I understand, it is only in that case that the question of proceeding by resolution arises.

Mr. MONK. I thought there was a clause in the Bill relating to the payment of money. I find that subsection 2 of section 42 provides :

> Such remuneration or allowances, and all expenses incurred in carrying this Act into effect, shall be paid out of such moneys as are provided by parliament for that purpose.

But, without any desire to retard the progress of this measure, the point I wish to make is that the minister has stated that officers would be employed to carry out the provisions of this Act. Of course, these officers will have to be paid. I think, therefore, it is only fair to raise the point of order, which I do. I think we had better adhere to the old rule and have the Bill founded upon resolutions previously adopted by the House. An hon. friend draws my attention to the fact that section 4 of the Bill provides that one or more enumerators are to be appointed for every census sub-district. This must involve expense. I think we cannot surround these enactments providing for the appointment of officials and the incurring of expense with too many precautions. The procedure I have suggested is according to the old traditions of the House.

Mr. FISHER. I quite agree with my hon. friend (Mr. Monk) that we cannot surround the expenditure of public money with too many safeguards. Had I supposed for a moment that this Bill required it I would have proceeded by resolution. I do not profess to be an authority on questions of procedure, but I would point out that the clauses to which my hon. friend refers are already in existence in the laws which are being consolidated by this Bill. I grant that under this Bill, there would be authority given for paying more than was paid under the old Acts. At the same time, the existing law does provide for the expenditure of money for the purpose of gathering statistics and carrying on a good deal of the work contemplated under this Bill. Therefore, if I may put it in that way, I think it is a mere question of degree and not a question of new expenditure. And I would point out that the expenditure under this Bill, of course, must be authorized by vote in the estimates when we reach that stage. I think my hon. friend's position is not tenable, but I must submit to the decision of the committee on that point.

Mr. WHITE. As I understand it the hon. minister proposes by this Bill, to repeal the Acts to which he has just referred. Of course, I do not know how it is proposed to pay these officers, but if it is proposed to make their salaries a charge on the public revenue, it seems to me clear that this measure ought to be proceeded with by resolution.

Sir WILFRID LAURIER. I would appeal to the experience of my hon. friend from North Renfrew (Hon. Peter White), who has had a great deal of experience in these matters, that the rule is that when a Bill is proposed, the chief object of which is the expenditure of public money it must be introduced by resolution. But when a Bill is promoted the chief object of which is not the expenditure of public money, but in which the expenditure is an incident, it may be introduced directly, but the clauses which provide for the expenditure of public money must be introduced by resolution.

Mr. WHITE. Quite so.

Sir WILFRID LAURIER. My attention has been very forcibly drawn to this distinction in connection with the Bill which the government will have to introduce for the admission of certain provinces into the confederation. When Manitoba was admitted as a province in 1870, the measure was introduced by Sir John Macdonald in the form of a Bill. Of course, there are certain clauses of the Act which provide for heavy charges upon the public treasury—the subsidy to the province for instance. Concurrently with the introduction of the Bill or subsequently to it, resolutions will be introduced to provide for the financial part of the measure.

Mr. WHITE. When a Bill is introduced any clauses of which refer to a charge upon the public treasury, the practice is that these clauses shall be printed in italics or inclosed in brackets so that members of the House may be appraised of their nature, and these clauses should not be discussed until after the resolutions have been introduced providing for these expenditures.

Sir WILFRID LAURIER. Hear, hear. Let me put this question to my hon. friend: Does not he think that the committee could deal with the Bill, and, when we come to any clause involving the expenditure of public money, it could be passed over and left for future discussion?

Mr. WHITE. I would not like to give an opinion upon that subject; but I think that the House should be apprised, by the sections being printed in italics or inclosed in brackets that resolutions must be introduced before those sections can be proceeded with.

Mr. R. L. BORDEN. I think that the course suggested by my hon. friend from Jacques Cartier (Mr. Monk) and supported by my hon. friend from North Renfrew (Mr. White) is the one that has always been followed. I remember a case arising three or four years ago though I cannot cite the name of the Bill at this moment. The Bill was introduced, but the discussion of the money clauses was postponed until resolutions had been passed in committee providing for the charge upon the public revenue.

Mr. DEPUTY SPEAKER. I think that, as the point raised is a most important one, I would beg leave to reserve my decision until to-morrow.

Mr. FOSTER. In the meantime what is to be done?

Mr. DEPUTY SPEAKER. I suggest that a motion be made, and the Bill be reported to the House.

Mr. R. L. BORDEN. The minister might go on with the rest of the explanations.

Mr. FISHER. If the point is pressed, it might be advisable simply to reserve the sections.

Mr. R. L. BORDEN. There is no objection to continuing the explanations.

Mr. OSLER. Could the minister state in general terms what is likely to be the annual cost of this project?

Mr. FISHER. That would depend largely on the amount of information obtained from year to year. I think myself that would grow. I am satisfied that as the public get the information they will ask for more and more of it, and I have no doubt that within a few years the cost will be considerably greater than what I now contemplate—I want to give fair warning of that. But my own intention is to commence on a comparatively small scale, as it is found desirable, taking at first those subjects concerning which information is most likely to be asked for by the public. I would not like at the moment to venture a figure of the probable cost. This current year, including what is paid out of civil government and two or three votes for general statistics and criminal statistics, the cost will amount to a little under $20,000 in the year. That is what is appropriated by parliament at the present time, and which would be included for the work we propose to carry on under the new law. But if general returns are made it would involve a considerable increase. I should think that, roughly speaking, next year I would have to ask nearly double, that is to say, it would add something like $15,000 a year to the present expenditure. The expenditure this year is a little over $18,500. I think we would have to provide for an expenditure the next fiscal year of fully $35,000. It might be a little over that, but I think I am safe in saying that $40,000 would cover the expenditure for a number of years to come.

Mr. FOSTER. Does the minister intend taking up any of the work in the statistical line which is now being carried out chiefly by the Department of Trade and Commerce. They are issuing statistical statements, and have a staff who are engaged upon that work. I do not know but that the Customs Department is doing something in the same line. Does he propose to amalgamate those with the statistical branch which he is creating?

Mr. FISHER. I have no intention of taking away from the other departments the work they are doing. If this work develops in the way I hope, I think all statistical work connected with the government service, so far as it deals with compilation, had better be done in one office. So far as the collection of information is concerned, some departments may have facilities for collecting certain classes of information which, if I were to undertake to do it in my department, would require the creation of new machinery, which would to a certain extent duplicate existing machinery. I would expect that the officers of the permanent census office would as far as possible get information from other branches of the service, making use of the information gathered by those other branches. But there is a good deal of census information which to-day is not procured by any department, and we would devote ourselves largely to obtaining that information.

Mr. OSLER. Clause 4 says there shall be appointed under the authority of the minster one or more enumerators. Now what would be the character of those men? Would they be permanent government officials?

Mr. FISHER. No. These enumerators would be appointed when a census was to be taken. As I explained a moment ago, most of the information taken between the regular censuses would not be obtained by correspondence. I also pointed out that such information as the taking of a census of the population in Manitoba, or in any other province where the law requires it, would have to be taken by enumerators. But the collecting of statistics in regard to production, in regard to industries, and that kind of thing, would not require to be done by enumerators—unless it was thought absolutely essential to get occasionally more definite information upon particular subjects. Then we would have authority, if it was thought wise and if we got the money to do it with, to appoint enumerators besides those of the census year. But that would be entirely dependent upon a vote of the House, because the money I am speaking of would not nearly meet the cost of appointing enumerators around the country to get information. My hon. friend will see that that clause deals with the appointment of enumerators for every census. The clause goes on to say :

> The minister may also employ from time to time such agents or persons as are necessary to collect for the office of statistics and information relating to such industries and affairs of the country as he deems useful and in the public interest, and the duties of such agents or persons shall be such as the minister determines.

That is the authority under which the information would be collected when it is necessary to collect it by agents. But in a general way, my idea is that that information should not be collected by agents, but should be collected by filling up forms through the post office.

Mr. BLAIN. May I ask the minister if he has considered that under the assessment law in the different provinces, the local governments collect all this information every year ? This could be obtained from the local governments without the expenditure of this large amount of money. For instance, in the province of Ontario every year assessors are appointed who take the number of children in a house, the number of horses, cattle and so on.

Mr. FISHER. If my hon. friend will turn to clause 16 of the Bill he will see that:

> Whenever in any province or territory any system is established or any plan exists for collecting agricultural, commercial, criminal, educational, manufacturing, vital or other statistics, the minister may, under authority of the Governor in Council, arrange with the Lieutenant Governor in Council of such province or territory, or with the organization possessed of such system or plan, for the collection and transmission of such information as is required by schedules prepared by the office under direction of the minister and approved by the Governor in Council for the procuring of such statistics.

That gives us the authority.

Mr. BLAIN. May I ask the hon. minister if it is his intention to adopt that for the province of Ontario ? The hon. gentleman is well aware that in Ontario the assessment is made every year. Therefore, may I ask the hon. minister if he intends to have enumerators in Ontario in addition to those who are now doing this work, or are we to understand that in Ontario there will be no new enumerators appointed ?

Mr. FISHER. Wherever the statistics can be obtained from an existing organization the intention is, under the powers of this Bill, to utilize that existing organization, and in no case, under such circumstances, to create a new organization to do the same work.

Mr. DANIEL. I would like to ask the hon. minister what method he proposes to adopt to collect the vital statistics especially in the eastern provinces. In the province of Nova Scotia at present I believe they have no Registration Act, and I would like to know how he expects to collect the statistics there or in New Brunswick, or if

he intends really to have a system to collect the vital statistics of the whole Dominion, so that we can get them fully and correctly.

Mr. FISHER. Clause 15 of the Bill gives that power, and it would be my intention to utilize that power for that purpose.

Mr. DANIEL. Is it the intention of the hon. minister to take action in the direction of collecting the vital statistics of the Dominion ?

Mr. FISHER. I may say in general terms that while I have not formulated any plan of doing that at the moment, I think it is perhaps one of the earlier classes of information that we ought to attack. The vital statistics are at present pretty well collected in most of the provinces. Wherever they are we would utilize the provincial machinery for that purpose, and simply get the information from the authorities who have collected it. Wherever that was not done in a province or in any other way than provincial we would feel it necessary to obtain that information.

Mr. W. F. MACLEAN. Does that mean that the hon. minister proposes to perform duties that the provinces are doing for themselves and impose upon the people of the Dominion an expense that is not justified ? The provinces have the power to collect these statistics and in my own province they are doing it. If it goes abroad that where a province fails to do that which it ought to do the Dominion is ready to pay the cost out of its own exchequer, there will be an abandonment of a great many matters which belong to the provinces and the whole load will be imposed upon the Dominion. I hope the hon. minister will consider that before he embarks upon a proposition of that kind.

Mr. MONK. In this connection perhaps my hon. friend the Minister of Agriculture will allow me to remind him that in the province of Quebec, as the hon. minister knows, we collect many statistics and the scope of these statistics has been enlarged a little by perfecting our system of vital statistics. My hon. friend knows that under our municipal system, the secretary treasurer of each municipality is obliged to furnish to the government every year a very large quantity of information particularly concerning the agricultural districts. It does not cost anything, as my hon. friend from Beauharnois (Mr. Bergeron) reminds me. My own feeling is, without having studied very carefully my hon. friend's Bill, that it would give us a great deal of relief if my hon. friend would allow that Bill to stand over, at any rate, for one year. It is surprising the amount of money we have spent in order to take the last census. My hon. friend is aware that we have spent, I think, $1,250,000, or somewhere near that sum—a great deal more than we ever spent before. It seems a very large sum to spend to find out the population of the country that scarcely amounts to six million souls, and from what I have seen, census taking costs more in Canada than it costs in any other country, having regard to population, except, perhaps, India, because in India there is a prejudice and fear on the part of the natives in regard to the enumerators and census officers, which certainly does not exist here. I would submit to my hon. friend that he might, instead of enacting this Bill this year, bestow some consideration on the system of census taking which is known as the de facto system and which is the system prevailing in England. I was astonished some time ago upon reading in a review how easily and how promptly the census was taken in England and at what a comparatively small cost as compared with what our census costs us here. Papers, formulas, or blanks are distributed, and the whole census in England is taken in the space, I think, of one or two days, at least the principal portions of it. Each citizen is obliged to make a return under severe penalties. This is the de facto system as opposed to our own system which is the de jure system. I have noticed that this last census has cost us a great deal more than any other census which has been taken. We take it every ten years and after the little word of explanation my hon. friend has given us of this Bill, it is reasonable to conclude that we are laying the foundation for an expenditure during the next ten years of from $35,000 to $45,000 a year. I think it is well for us to pause, because we have so much to do with the little money at our disposal, so many improvements that are absolutely necessary. Our constitution provides for a decennial census, and for my part I would like to spend a little more every ten years to get correct information than to make the census a permanent burden upon our resources.

Mr. FISHER. My hon. friend (Mr. Monk) has brought into the discussion two points which I will not elaborate upon just now. One is the cost of the last census and the other is the question of the de facto as compared with the de jure census. In regard to the former we have discussed that a good deal, we have threshed it out pretty well and I am not going to deal with it just now. In regard to the de facto and de jure census I may say that the de jure system was deliberately adopted in Canada at the commencement of our census taking, at the time of confederation, I think, in fact, before confederation, and it has been continued from that time to this. At the time at which I was charged with the duty of taking the last census, I discussed pretty thoroughly with a number of individuals whom I thought informed upon this question the advisability of proposing a change

from the de jure to the de facto system. While theoretically a little attracted myself personally to the de facto system I came to the conclusion that in this country and under the circumstances and conditions of our census taking it would be unfortunate, and that it would not be at all advisable to attempt to introduce the de facto system because the change necessarily would to a certain extent vitiate comparisons between the information gathered under one census taken de facto with the same information gathered in another census taken de jure. But, more than that and I think far more important was the fact that under the system which is pursued in England when the census returns are taken, as my hon. friend says, de facto, taken in one day, or one night, there is very little information got. There is simply the counting of heads, or noses, and some vital or mortuary statistics. There is nothing taken in regard to the industries of the country. There is no information gathered as to the productions of the country, as to houses, factories, as to plant, machinery or investments in these factories, as to the amount of the product that is turned out, or as to the agricultural productions of the country. The census taken in England is taken cheaply. It is taken in one night but it only gives the actual figures of population and some vital or mortuary statistics.

Our census is taken on an entirely different system.. The census in the United States is on a larger scale than ours, but it is on the same principle, and I venture to think that, especially in this a rapidly growing and progressive country, one of the most important parts of a census taking is the collection of information as to our industrial, agricultural, fishery and forest productions, to furnish information to people who want to invest money or to settle in this country and also to furnish information to those who are engaged in the active life of this country as to openings and the possibilities of development in their own lines of business. I would be sorry indeed to think that our census should be changed to a census such as that taken in England, even to make that saving to which my hon. friend alludes. The two things are totally different, and with census taking of the kind we have here, the de jure system works out on the whole the most satisfactorily. Under our social system here there are a great many people who are away from home at any particular date. If these people were to be enumerated only where they were at that date, the information gathered would be in many cases misleading as we have to take not only the actual counting of the people, but also all this other information to which I have alluded, and we can easily take the number of people even though they might not be under the roof in which they ought to be numbered on that particular date. Our census is not taken in a night, but it is taken during a very short period, of two or three weeks, during which the information is gathered by a comparatively small number of enumerators. If the work was done as it is in England we would have to depend entirely on the people filling up correctly a paper left at their houses, and I think we would be led astray by the results even in the number of the people alone, but to get the other information, would be quite impossible.

Mr. SPROULE. Are you not introducing the same principle here where you send out papers and expect parties to make returns ?

Mr. FISHER. We expect selected parties not everybody. In the case of industrial establishments all the information is obtained from the people actually engaged in the management of the industry who would be able to give us the information we want. We are not going to every household, but only to the people who will give information about the industries and who can also give it about other things.

Mr. SPROULE. You would have to send them to a class of people intelligent enough to understand. There are not sufficient instructions accompanying these schedules to enable every one to understand them, and therefore they will not be correctly answered.

Mr. FISHER. I think my hon. friend does not quite understand me. In the case of industrial establishments of course the form would have to be sent to every establishment; in the case of other information a great deal of it would have to be gotten from an official or individual in the community who would give the information in general terms. That information would not be absolutely accurate; it would be sufficient to give the information, but not sufficiently accurate for census purposes. We cannot expect, without actual enumeration, absolute accuracy, but in general statistical work we can get by such a system as I have indicated information sufficiently accurate to serve between the census.

Mr. SPROULE. Do we not get much of this information already through the Statistical Branch of the Department of Trade and Commerce ? Then too, much of it is obtained from the Bureau of Industries, that is carried on for the province of Ontario which makes these returns annually, while the Department of Trade and Commerce makes its returns every month. It seems to me this is duplicating this work.

Mr. FISHER. I have not under my hand at the moment the report of the Department of Trade and Commerce, but unless I am mistaken that is compiled to a large extent simply from the customs returns and does not give the production. I do not think it goes into industries at all; I know it does not go into agricultural, forestry or mineral

production. I am speaking now subject to correction, but I think it is purely in regard to the movement of trade and is prepared almost entirely from the trade tables of the Department of Customs.

Mr. SPROULE. I understood it was to extend not only to the Department of Trade and Commerce, but to the Department of Minerals and to the various other branches of industry. That is my remembrance of what was told the House when the Bill was passed. This information was to be collected and a certain number of parties in the office were to be permanent officials to collate these figures and to publish them in such a shape that they could be issued from month to month and distributed throughout the country. I am not prepared to say if the production was to be given. That information we in Ontario, get from the Bureau of Industries. I think we have a permanent staff in connection with the census working for the whole ten years.

Mr. FISHER. We have a staff which is working on statistics and which prepares the year book annually, practically nothing else.

Mr. SPROULE. How many years is it since the census was taken ? We are now in 1905 and it was taken in 1901. The work of the census has all been done and yet you still have that staff ?

Mr. FISHER. As I said in answer to a question by the hon. member for Leeds (Mr. Taylor) yesterday, the work of the census as a census has been finished. There is still a small staff which is working on general statistics trying to work out tables and information from the census compilations. That is a portion of census work which is practically permanent and which the office that I am now about to create will be doing all the time from one census to another. Such information as is contained in former census volumes has been prepared and finished ; but there is a constant desire to make comparisons and to draw tabular information from these regular compilations of the census which would supply work for a considerable staff from one census to the other. That work would be done all the time by this office. But besides that, I want to get corroborative or corrective information between the censuses. There is an infinite variety of information of great service to the community to be made up from the census returns and from tables which have perhaps never been included in the census volume, but which can be and ought to be taken for the statistical information of the people at large, and which ought to be issued from time to time. As I have said, there is a little of that work now being done in my office, and, if this Bill passes, there may still be a little of it done by the general statistics staff ; but I want to provide a machinery by which that can be done better and by which interim information can be collected between the censuses.

Mr. SPROULE. It certainly seems to me that this Bill will duplicate many of these offices. We have already a mines branch in connection with the geological survey which collects mining information; we have a staff collecting information for the Yearbook ; and we have a staff connected with the Department of Trade and Commerce collecting much of the information which the hon. minister proposes to use in this new department. If we add another branch to these three, shall we not be rather multiplying the work ? You might possibly consolidate the work, and make one staff do the work now done by three or four ; but unless you do that, it seems to me that you will be increasing the expense, very materially without obtaining any compensating return therefor.

Mr. FISHER. With regard to the Yearbook staff, that is in my department and will be consolidated with this. With regard to the mines branch referred to by my hon. friend, I confess that I am not very familiar with what information they are issuing.

Mr. SPROULE. They give the output.

Mr. FISHER. That would be included in the work proposed here. My memory of the Trade and Commerce returns is that they are simply a compilation of trade statistics.

Mr. BLAIN. I understood the hon. minister to say that the annual expense of this proposed office will be between $35,000 and $40,000 per year—say $40,000. In ten years that will amount to $400,000. Are we to understand that when the time comes for taking the general census, the cost of that work will be decreased by that amount as a result of the introduction of this Bill ?

Mr. FISHER. No, I do not think so.

Mr. BLAIN. Are we to understand, then, that the cost will be increased by that amount ?

Mr. FISHER. I mean to say that when the census year comes, the census will have to be taken, and that the work connected with this office will only decrease the cost of that work in so far as the staff of this permanent office will be more complete and better prepared for the census work.

Mr. BLAIN. I suppose some calculation has been made. Perhaps the hon. minster could say about what amount that would be ?

Mr. FISHER. I would not like to venture a statement on that point. I believe it would somewhat decrease the cost of taking the decennial census. I could not just say how much until I have had experience.

Mr. KEMP. So far as my knowledge goes, I have not heard that there is any de-

mand from the public or from the members of this House for any more statistics of this character. It may be that some of the work proposed by this Bill could be done by strengthening some of the departments that already exist. We have now a duplication of statistics, as in the Trade and Navigation returns and the report of the Department of Trade and Commerce. We are overloaded with statistics; we have more statistics than any member of this House can digest. It is a very difficult matter to know how to dispose of the various books that come to us during the recess, in such a manner that they will be useful. Moreover, we are spending an enormous amount of money on the census. While the census of 1881 cost $456,904.19 and that of 1891 cost $570,115.54, the census of 1901 has cost up to the 7th of March, 1904, $1,179,376.01, and notwithstanding that the complete census is not yet at the disposal of members of this House or ready for distribution to the public. No later than this afternoon I inquired for the last volume or the last two volumes, and I was told that there are certain portions not yet completed ready for distribution, although four years have passed by since the census was taken. It seems to me that there is a good deal of theory in this Bill; and, considering the tremendous cost of taking the census and the immense amount of statistics we already have, and the duplication of statistics that takes place at present, it seems to me that we ought to hesitate about adopting such an elaborate plan as that laid before us in this Bill.

Mr. PRINGLE. I fail to see the necessity for this enormous expenditure. I do not think the hon. Minister of Agriculture has considered fully the very valuable statistics we now have in our different provinces and territories. For instance, in the province of Ontario we have almost every statistic that could possibly be required. We have the annual report of the Ontario Bureau of Industries, in which you will find all the agricultural statistics which could conceivably be obtained in our province; and I understand that there are similar reports in the province of Quebec and the other provinces. Then, we have reports in regard to the industrial industries of the province. In fact, our province has an army of inspectors going about obtaining statistics in regard to the different industries of the country, and their reports are very full and complete. We have also our annual report as to population, births, marriages and deaths.

We also have reports regarding the mining industries of Ontario and covering in fact all the industrial, agricultural, and mining life. As I understand the proposition here, under subsection 2 of section 4, is that the minister takes to himself the right to employ from time to time such persons as are necessary to collect statistical information, and he tells us that, according to his interpretation of that section, he will inquire from parties who are friendly throughout the different provinces and they will give him the information. But such information cannot be as valuable as that which we find in the reports issued by the different provincial authorities. We are going to add an expenditure in the next ten years of half a million dollars, according to the statement of the hon. minister, for reports which are not authentic and which are to be obtained from the friends of the minister throughout the Dominion, and this, in spite of the fact that we have to-day in the different provinces, authentic reports of a similar character which are issued yearly. I quite agree with my hon. friend from Jacques Cartier (Mr. Monk) that this Bill should stand over until we have the opportunity to look more carefully into it. Take up the last report for the province of Ontario issued by the Ontario Bureau of Industries, and you will find the minutest details given regarding the crop production. You will find that they take up the question of fruit trees and live stock, and labour and wages, and give statistics on all these points. Then take up the factory inspector's report and you will find that it gives the number of employees, the output of the various industries, and so on. Take up the report with regard to the mines and you will find similar information in detail.

Mr. FISHER. What I said was that at present we are spending a little under $20,000 on this kind of work and we would have to add to that $20,000 more. The addition I am proposing is $20,000, or $40,000 in all per annum.

Mr. LALOR. Did the hon. minister not say that that would be liable to increase every year?

Mr. FISHER. It may. As the demand for information increases, the expenditure will be apt to increase. If there is no demand for this information, the expenditure will not increase. I am proposing an increased expenditure of $20,000 a year. As regards what my hon. friend from Cornwall has said, while it is true that the province of Ontario has the report of the Bureau of Industries, there is no such report in any other part of the Dominion. I think that Nova Scotia and New Brunswick, give some vital and mortuary statistics and that Manitoba furnishes some agricultural statistics. As regards the reports of the industries in Toronto, there is not an army of officers going around collecting these reports. They are largely the results of correspondence and are sent in by individuals from different parts of the country. With regard to the report of the inspector of factories, it deals mainly with the conditions of the factories from a hygienic and safety point of view, but I do not think it gives the details of

their production. The province of Quebec does not collect statistics of this kind. It does collect certain mortuary and vital statistics, and has a report of the factory inspector on the conditions of the factories. Those we will certainly make use of. My hon. friend from Toronto (Mr. Osler) says there is no demand for this measure. I would reply, there is a constant demand in my office for just such information as it is proposed we shall get by virtue of this Bill.

Mr. OSLER. The information published by the province of Ontario is regarded as fairly complete.

Mr. FISHER. I believe so.

Mr. OSLER. Does the Ontario government employ outside men at salaries as the hon. minister proposes? It seems to me that one of the weaknesses of this Bill is clause 4 which gives the minister power to appoint an unlimited number. Such appointments will no doubt be made through political influence, and I do not believe that such discretion should be vested in the hands of the minister. While I am not quite aware how the Ontario government obtain their information, I do not think they have any such agents. I think they get it through officials in the parliament buildings. I think that this clause giving the minister that power is a very dangerous one, and I do not believe it is one under which reliable information would be obtained. My understanding of the Ontario procedure is exactly the same as his own, and the same as I would propose to pursue under this Act. At the same time, if it were necessary, under certain circumstances or in order to collect certain classes of information, to appoint a special commissioner, that ought to be done.

Mr. FISHER. I would call my hon. friend's attention to a clause of the General Statistics Act that perhaps, he has not noticed. Clause 3 of that Act provides that the Governor in Council, on the report of the Minister of Agriculture as to the persons to be appointed, may appoint officers, clerks or other employees necessary for the purposes of the Act. And, under another section, I have power to collect practically any kind of statistics I want.

Mr. OSLER. Then why ask specifically for that power here ?

Mr. FISHER. This is a consolidation of the three laws that I have spoken of, but it gives me the added authority of collecting information in the same way that I now collect census information, by making it the legal duty of parties to give me the information on demand.

Mr. COCHRANE. Will the hon. minister please read the clause under which he claims to have power to collect these statistics ?

Mr. FISHER. I read from chapter 59 of the Consolidated Statutes, section 1 :

1. The Minister of Agriculture shall, from time to time, subject to the approval of the Governor in Council, make such rules and regulations, and prescribe such forms as appear necessary and expedient for the purpose of collecting, abstracting, tabulating and publishing vital, agricultural, commercial, criminal and other statistics ; and such rules, regulations and forms, when assented to by the Governor in Council and published in the 'Canada Gazette,' shall have the force of law.

That enables me to decide what information I shall collect. Then section 3 provides:

3. The Governor in Council, on a report of the Minister of Agriculture as to the fitness of the persons to be appointed, may, from time to time, appoint such officers, clerks and other employees as are necessary for the purposes of this Act ; and such officers, clerks or employees shall hold office during pleasure. The Governor in Council may also appoint temporary clerks or employees for an indefinite period,—the term of whose service shall cease and determine upon notice given to them by the Minister of Agriculture, when such portion of the statistical labours for which they were so engaged, and for which they were employed, is terminated.

This clause gives me power to employ clerks and others to tabulate the information which the other clause gives me power to collect. The section of this new Bill we are now discussing gives me practically no more power than I have now.

Mr. OSLER. It gives the minister more direct power.

Mr. FISHER. It gives it in a more concise and definite form.

Mr. OSLER. It gives the minister the personal power.

Mr. FISHER. I have the personal power under the old Act. The Governor in Council can do it.

Mr. BARR. So far as the province of Ontario is concerned, I think the collection of information under the provincial authority is much more exact and much cheaper than it can possibly be under this measure. As I understand it, in the province this information is largely collected by the assessors and county clerks. By these officers vital statistics and statistics relating to agriculture and other industries can be collected at a minimum of expense. And the information must be exact, for the assessors go about and get the information at first hand and report it to the Bureau of Statistics. It seems to me that there is a good deal of haziness about the methods to be followed under this Bill. So far as the other provinces are concerned, I suppose the conditions are much the same as in Ontario. Under the Bill clerks are to be appointed, but there is nothing to show what machinery is to be used to gather the statistics. Is it intended to get the facts from the assessors, or will the facts be collected by agents specially employed ? In the latter case, I believe it will be impossible

to obtain reliable statistics. I do not see why the machinery now in use in the province is not quite sufficient, except for gathering the facts called for by the decennial census.

Mr. FISHER. The hon. gentleman (Mr. Barr) probably was not present when I answered a similar objection. If he will turn to section 16 of the Bill, he will see that I take power to obtain from provincial or other organizations any information they may have. But this information may be in different form in different provinces, and work must be done in the offices here to correlate it, compile and tabulate it as information concerning the whole Dominion.

Mr. KEMP. But it seems to me that this information that the minister speaks of can be much more conveniently and more cheaply acquired through the local governments than through the Dominion government. The provincial governments are more closely in touch with municipalities and the municipal officers than is the government of the Dominion. It has been said that Ontario has taken the pains to publish statistics that other provinces have not published. Is not that itself evidence that these other provinces do not think it worth while to compile this information ? It seems to me that this is a work for which the provincial authorities should be responsible, and they can vary the form of the publication to suit the conditions of their several provinces.

Mr. FISHER. What my hon. friend (Mr. Kemp) says may be perfectly true. At the same time, information may be collected by one provincial government on certain lines and by another provincial government on totally different lines. This prevents the figures being taken as national figures relating to the whole Dominion. It seems to me it is the duty of this parliament to provide information regarding the whole country, information which people outside will look upon, not as Ontario information, or Nova Scotia, or Quebec, or British Columbia information, but as information about Canada. And the more of that kind of work we do, consolidating our Dominion into one country and giving information of a national character, the more are we doing to make Canada a nation in the eyes of the world.

Mr. BLAIN. Do I understand the minister to say that when this Bill becomes law it will have no special application to the province of Ontario ?

Mr. FISHER. Not at all, I did not convey that impression at all.

Mr. BLAIN. Perhaps I did not understand the minister. In clause 16 it is provided that wherever such information can be procured through the local government it will be procured, and the minister tells us without any additional cost. It has been pointed out this afternoon that every possible information that could be procured even by special commissioners is already compiled by the Ontario government. For instance, in the Statistical Year Book, published by the hon. gentleman's own department, I find given the number of horses in Ontario, not every ten years, but every year, in 1897, 1898, 1899, 1900, and so on every year; also the number of milch cows in the province of Ontario, the number of sheep, the number of hogs, the number of poultry, and so on, the details given from every county, and taken every year. My hon. friend now says that under this Bill he will use that information as far as possible. May I ask the minister what other information he will be able to get from the province of Ontario that he would send out to the people.

Mr. FISHER. I would point out to my hon. friend that there is nothing in the report of the Bureau of Industries of Ontario in regard to industrial productions, a very large item in our census work, and a large item in the information which is constantly asked for from my department and other departments. That would have to be obtained from the province of Ontario as well as other provinces. But independently of that, the portions of this Bill which deal with the collecting of information are only a part of it. It also gives power and authority to compile, and tabulate, and correlate information on these points which has been got from Ontario, and to put it along with the information on similar points got from the other provinces, so as to give information for the whole Dominion.

Mr. BLAIN. I suppose the hon. gentleman knows that so far as Ontario is concerned it is all tabulated.

Mr. FISHER. I think it is to a large extent, although it may not be tabulated in certain lines, in such a manner that it would work into similar information gathered from other provinces. It might have to be changed in the tabulation and compilation, in consequence of the information which is got from other provinces, that being local in its character.

Mr. BLAIN. The agricultural statistics in the province of Ontario are pretty well tabulated. May I ask the hon. gentleman what way he will take to collect other information from a county such as I represent, the county of Peel ?

Mr. FISHER. I am not aware that there are any industrial establishments in his county.

Mr. BLAIN. There are.

Mr. FISHER. Well, my idea would be to send to those industrial establishments, supposing this work was being done within a few years of a census—send them a copy of the schedules which they them-

selves filled up at the time of the census, and ask them to fill up another form showing the changes, the increases, the additions, decreases, subtractions, and so forth. That would be the information concerning that industrial establishment for the year when that form was filled up. That would not require any agent, it would simply require us to send a form from the office here to the establishment to be filled up. I take power to require that that should be done, the same as I have power to require that it should be done in the census year, by enumerators, and it is a necessary part of the Act. All these returns would be sent into the office here to be tabulated and compiled.

Mr. BLAIN. After all that is done, what does the hon. gentleman propose to do with the information ?

Mr. FISHER. To compile it.

Mr. BLAIN. And publish it, send it out ?

Mr. FISHER. Yes, there would be no object in getting the information unless it was put into the hands of the public, as a special report of this office.

Mr. MACDONELL. The hon. gentleman has given us an idea of the proposed expenditure for enforcing this Bill, which will be an additional expenditure. Might I ask him what was the cause of the great increase in the cost of taking the last census over that of 1891 ? In 1891 the cost was $570,115.54, whereas the census of 1901, taken under and by the present government, cost $1,079,376.01. A short time ago attention was drawn to the fact that the increase between the cost of the census of 1881 and that of 1891 was comparatively small, a little over $100,000 ; whereas the increase between the two last census was over half a million dollars. I would like to ask if there is any explanation of that ?

Mr. FISHER. As my hon. friend is a new member of the House and consequently has not heard the debates upon this question, I will give him a short resume of the reasons. They have, however, been thoroughly exposed in the former parliament, and therefore I will not develop them at great length. The increase was due mainly to three causes. First and most important, was the larger amount of information obtained, which necessitated a great deal more labour on the part of the enumerators, and a great deal more work in the office here in compilation. Secondly, the collection of every detail in the census, not only in the thickly populated parts of Canada, but also in the outlying portions of the country. For the first time in the history of census taking in Canada that was done, we enumerated the people and everything in detail all over the country. The questions were asked in various schedules that were sent with enumerators, even as far as the territories adjoining the Arctic ocean, in the Yukon, and in every part of the outlying and unorganized territories of the older provinces. In the former census that was not done, there was less expense in the enumeration of the people, and less details were given ; but in the previous census those things were only estimated in the office here. In the census of 1901, all those details were covered by the enumerators, and the actual facts were obtained by definite questions put on the spot to the people themselves. In the third place, these additional details involved a large increase in the cost of compilation in the office here at Ottawa, because these figures had to be again examined on the schedules, and put together by the compilers and made up into tables. In the former census that was not done. Another reason was the greater cost of living, the cost of wages, which was much greater in 1901 than in 1891.

The result was that we had to pay higher prices to the enumerators for all their work and all the expenses in connection with the census were largely increased by the difference in the cost of living and the cost of supplies generally in the one year over that of the other. Another reason was in regard to the compilations. In the census of 1901, partly because of certain curious facts deduced by the figures of the census in comparison with the former census and partly because we wished that the final results of the census of 1901 should be absolutely accurate, we checked and rechecked all the compilations so as to make sure that there should be no errors. In the former census, after the first compilations were made, there was no further checking. They were issued and the result was that we found that there were a large number of grave and serious errors in the census of 1891. A census taken in that way was not sufficiently accurate to meet the demands of the people of this country, it was not sufficiently accurate to justify the expenditure that was made upon it, low as that expenditure, comparatively was, and was not of a character which I wished to father as a presentment to the people of this country of the work of my department. Under these circumstances the compilations and the work of checking over and making up the final returns were more expensive than that of the census taken before the last or the census of 1881 either. These are the four main points of the reasons for the difference. I am not prepared at the present moment to go into the question in any further detail.

Mr. W. F. MACLEAN. There is need in the country for a department like this, but it must be well administered. I quite agree with what has been said that a similar office in the United States has rendered valuable service to the people there and especially in the way that there is a great development of trade. Statistics of this kind help to promote trade. But, it all depends upon

the methods. If the methods which the hon. minister proposes to introduce are as prosy as his speeches, I do not hope for much from the measure, but if he will get a move on, organize this department with a very moderate expenditure to begin with and cut off some of the other expenditures in other departments of a somewhat similar character it may be that some good will be effected. But, as I said, it all depends on the organization. For instance, if he proposes to put into this office mere partisans when the universities of this country are in a position to turn out clever young men fully trained for work of this kind, the object which he has in view will not be accomplished. If he would make it a non-partisan department, if he would get the best possible clerical and statistical service that can be got in the country, and devote it in an energetic way to the presentation of this information, as they do in the United States, a considerable amount of good could be done. But, he ought to be able after what has been brought out here to-day almost to establish this new department out of the savings from other departments that are more or less engaged in collecting information of this kind. I must say that I sympathize largely with the object he has in view, but it all depends on the methods he employs and the kind of men he puts into this service. It may be made a mere office for expending public money, but it can be made an office that would promote the trade of the country and that would advance our industrial and agricultural interests, by furnishing them with information. The way to get that information is largely by pursuing a system like that which he has outlined to this House, that is to take up one department one day and some other department on another. It all depends on the vigour with which these statistics are prepared and presented to the public. There is nothing more interesting to the people engaged in trade than the bulletins that come from the census office in Washington to-day. One day they take up one interest, another day another and really a lot of valuable information is contained in these bulletins, but again, I say, we do not want prosy methods collecting this information and presenting it to the public.

Mr. FISHER. I appreciate my hon. friend's views and I will tell him that my speeches may be a little prosy, I am quite willing to press the passage of this Bill through the House as fast as hon. gentlemen opposite will allow me. No one wants more hasty methods in that respect than myself. My hon. friend has spoken about the work done in the United States. I have all the reports of the debates and the statements upon which the permanent census bureau was established in the United States. They have guided me to a large extent in what I have said here this afternoon. It is well to learn by the experience of other countries all we can. Exactly the same condition of affairs as exists to-day in Canada existed in the United States, until a permanent census bureau was established and after it is established here I believe the same results will be brought about here as have been brought about there. I would like to say to my hon. friend that I quite agree with the view he expressed in regard to university graduates. We ought to take as generally as we possibly can well trained minds for important public work. I have done that in the patent branch of my department. I have appointed examiners who are university graduates in some applied science. When I came into office I found that the men who were doing that work did not have a university training, and as vacancies occurred I added to the staff men with a scientific training in the work in which they are engaged. I would be quite prepared to adopt the same system in carrying out the provisions of this Bill.

Mr. W. F. MACLEAN. It would be an encouragement to our universities to turn out high class technical men if the state would avail itself of their services. Unfortunately we have been appointing men to many of these offices who are not technically trained and the consequence is that men who are trained in our universities go outside for employment. I would like to see these young men retained here and the universities encouraged to turn out high-class technical men. Toronto university is turning out graduates who are first-class men in mathematics, statistics, calculation and compilation, and if the government would encourage them the universities would turn out a still better class of men and devote more attention to these special subjects.

Mr. BENNETT. The hon. minister will remember that last session, or perhaps the session before, when his estimates in connection with the census were being discussed a letter was read from a gentleman named Mr. McCraney, who, for a considerable period was, I think, the Liberal member for Halton county, Ontario. In that connection Mr. McCraney alleged that gross frauds had been perpetrated in one of the counties of British Columbia. I have not charged my memory with the name of the county. In that circular which he caused to be mailed to every hon. member of this House—I know I received one—this gentleman made the charge substantially that in all ways, shapes and forms the accounts had been padded and speaking of that particular riding, he said that the cost of the census was double what it should honestly have been. Does the hon. minister remember that case and has he made an inquiry as to the action of the enumerators and the census officer ?

Mr. FISHER. I confess that I do not remember the case. The question of the expenditure in connection with the census was taken up in the Public Accounts Committee

of this House in the year succeeding the census. It was dealt with by several investigations before the Public Accounts Committee. That is the proper place to discuss it. No motion in regard to it was made in this House and no discussion in regard to that particular case that I remember of occurred.

Mr. BENNETT. The letter referred to was published by Mr. McCraney and it, of course was actionable, it being sent throughout the country. It certainly was read in the House and the hon. minister must have heard of it although he may not remember it now.

Mr. FISHER. I may have although I do not remember it.

Mr. BENNETT. Does the minister remember a case in East Simcoe where it was shown that three enumerators had each charged $3 a day for hotel expenses, when as a matter of fact they had not paid out a single cent? That case was exposed among many others, of what might be called not only deliberate overcharging but deliberate theft. During the campaign last November I made that statement publicly on the platform and reiterated it time and again. There is not a hotel in Orillia that charged $3 a day, and it was notorious that these men had simply each pocketed $6 and charged it up to the country. The worst of it is that the chief enumerator for the riding certified the accounts knowing that they were false and wrong and acts of petty thieving. If the minister wishes to look into this I shall give him the names and he can ask for a return of the amount. It is a small thing, but when you consider that there are two hundred constituencies with twenty or thirty enumerators in each constituency, if you have this petty thieving in each riding the amount involved must be very great.

Mr. FISHER. That whole question was threshed out in the Public Accounts Committee two or three years ago. The hon. gentleman (Mr. Bennett) and all his friends had abundant opportunity of bringing it up in the House if they had chosen. I have not the details in my memory at the moment and I cannot discuss the cases which are finished so far as the department are concerned. I cannot now go into it.

Mr. BENNETT. After we made the exposure in the committee it was not our business to prosecute these men or to ask for the money; it was the business of the minister and his department. If the department has not taken action I am going to recall this and other cases and hope the minister will look into them.

Mr. SPROULE. In addition to that there were two or three cases where enumerators had charged horse-hire in their accounts and when they were brought before the committee and put on oath swore that they paid no horse-hire and had no need to do so. This was brought to the attention of the government and mentioned in this House. When that was done by the opposition I assume had done all their duty and it lay with the government to ask for an explanation or a refund from these men.

Mr. FISHER. I do not remember any such case.

Mr. BENNETT. Let me call the attention of the minister to another case mentioned by the hon. member for East Hastings (Mr. Northrup). There was simply a scandalous state of affairs in that riding with regard to overcharging by enumerators. Surely the minister remembers the East Hastings cases brought up by the hon. member (Mr. Northrup)?

Mr. FISHER. I do not remember the case under that description.

Mr. BENNETT. That is the case of Mr. Hurley. I cannot say without referring to the evidence that Mr. Hurley did anything wrong, but I know that in the case of the enumerators there were gross over-charges.

Mr. FISHER. I remember the case of Mr. Hurley who was examined before the Public Accounts Committee. I do not remember any details on which a prosecution could be based.

Mr. BENNETT. I did not charge my memory with the details for every riding, but I remember East Simcoe and I say that there there were cases of deliberate thieving.

Mr. FISHER. The amounts were sworn to by the enumerators, initialled by their superior officers and paid on these statements.

Mr. BENNETT. Then the mere fact that they have sworn to the statements and that the enumerator has initialled them is all there is to it. I shall give the minister the three names as I do not wish them to go on 'Hansard.' I made the statement publicly in the town of Orillia. The worst of it all is that the chief enumerator must have been a party to it. I have discharged my duty and if the minister does not wish to ask for a refund well and good.

Mr. FISHER. Will the hon. gentleman give me the names?

Mr. BENNETT. Yes. I may tell the minister that as the administration of the criminal law in Ontario will now be in other hands there may be some criminal prosecutions in connection with cases of that kind.

Mr. FOSTER. Could the minister give the staff and the salaries in each of the departments that he is amalgamating?

Mr. FISHER. The present staff of the Statistical Branch which is the only staff we have is: One chief clerk, $2,500; one first-class clerk, $1,900; three second-class

clerks, $1,100 each. These are on the Civil Government list, on the staff of the department. Then in addition we have paid from the General Statistical Vote, officers who are not members of the civil service, one at $1,800 ; one at $900 ; one at $700 ; one at $500 ; one at $4,000 (Mr. Blue) ; one at $2,000 (Mr. Savard) ; two at $1,200, and one at $600. That comes to $18,650 a year for salaries. I think that for the work I have spoken of, as a commencement—I would not like to bind myself to any term of years—but I think that about double this expenditure annually would be sufficient for several years. That is not all for salaries but for the work altogether. I do not think the expenses for stationery, &c., would be very great but there would be considerable printing in connection with the issuing of the bulletins and the report, which would be included in the extra expenditure.

Mr. COCHRANE. I would like to ask the minister when the census will be completed ? I received a letter from a medical gentleman in my riding asking information which he and everybody else supposed was obtained when the census was taken, and when I sent to the department for it, I was told that that part was not compiled yet. When is it likely to be done ?

Mr. FISHER. It is all in the hands of the Printing Bureau at the present time.

Mr. COCHRANE. When the party which I have the honour of supporting was in power, we heard a great deal time and again from hon. gentlemen opposite about the delay in taking the census. You have had an opportunity of taking the census and it will be hoary with age, if not with respectability, before you get it out, and it cost three times as much as it did in 1891.

Mr. FISHER. I may say to my hon. friend that the information which has been issued up to the present time has been got out much more promptly than it was in the previous census.

Mr. COCHRANE. But up to the present time it is not out. You have only got it in the hands of the printer, and, perhaps, when I ask for it next session, you will say it is somewhere else.

Mr. FISHER. The volume which I laid before this House at the beginning of this session of 1905 contains the same information, and much more, which was contained in the volume of the last census which was laid on the table in 1897, or two years later in relation to the census year.

Mr. COCHRANE. It is wonderful how correct the minister's memory is in regard to that, but how, when he is asked in regard to his own work, he forgets. I want to call his attention to what occurred in the riding which I have the honour to represent. One of the enumerators for the village of Brighton was appointed from one of the townships outside, and his horse-hire cost more than his wages ; and in the village of Hastings, with a population of less than a thousand, the enumerators all charged horse-hire in addition to their pay—I suppose because they were sworn to. The said parties were not asked to refund.

Mr. BLAIN. When may we expect the full returns to be printed and ready for distribution ?

Mr. FISHER. As I stated just now, the second volume contains all the agricultural, mineral and forestry compilations ; and the third volume, which is still in the hands of the printer, contains the industrial and the other compilations. I cannot really tell when that volume will be finished—I hope before the end of the session. The whole information of this census will be contained in four volumes. These four volumes will contain a great deal more information than was contained in the four volumes of the last census. The last volume of the previous census, which contained the agricultural statistics, was not issued till the year 1897. The same information, which is contained in the second volume of this census, was laid on the table of the House at the beginning of this session.

Mr. LENNOX. I have listened very attentively to what has been said this afternoon, with a desire to ascertain certain things definitely. I wish to take this question, whether we should have this new department or not, seriously into my consideration ; and I admit that, although I have given the matter my most minute attention, I have not yet got all the information I need. We have had a great deal of information from the hon. minister, but it is something like that in the census—it will take probably more work to classify and rearrange it than it does even to get the information from the minister. But we are yet at the threshold of this matter, and, as we have half an hour before we rise for dinner, that time might be usefully employed by the minister in giving us some necessary information. Just what we want, definitely and clearly, is : What is the need of this legislation ? What call has there been for it ? What additional income will it bring to the people of Canada ? What increased facilities will it afford to the people of Canada for making a livelihood, and that kind of thing ? Nobody is in a better position to give that information than the minister, and I ask him to use the half hour now at our disposal to give to the House and the country a clear and distinct statement of just in what way Canada will be benefited by having this large additional expenditure cast upon the people.

Mr. FISHER. Well, Mr. Chairman, I suppose, in deference to my hon. friend's question, I shall have to run the risk of offending the hon. member for South York (Mr.

Maclean), who objects to my speaking at length ; but I think I can give the hon. gentleman the reasons in a much shorter time than half an hour. I gave it fully in the early part of the debate, but the hon. gentleman was not in the House.

Mr. LENNOX. Excuse me ; I heard every word the minister said this afternoon. He told us the condition of things in the province of Ontario and all the other provinces ; but he has not told us of the difficulties that have arisen or of the remedy that will be brought about by this measure. He has told us, it is true, that some people have made application to his office for certain information which it is difficult to give ; but that is very far from the kind of information which the country wants as to the necessity for this large increase of expenditure. What I want is something that I can lay before my constituents, saying to them : 'I am a great friend of the Minister of Agriculture ; we are engaged in the same general calling, and I want to justify him before the people.' What I want is something in two or three pages with which I can show the reason there is for what the minister wants to do.

Mr. FISHER. I think I can gratify my hon. friend to a certain extent, though I cannot promise to a complete extent. We want to give the people of Canada information in detail between the census years in regard to the industrial and agricultural productions of the country—statistics which will be of later date than those contained in the census. We do not want the people to have to go back, as at the present time, five years, or, as it will be next year, six years, or, as it may be, nine years, to get that information. We want to have it between times, so that they will be able to study the economic conditions of this Dominion with later information than we now have.

Mr. R. L. BORDEN. Will my hon. friend allow me to ask a question just there ? He has taken the census in 1901, and he has certain information as to that year placed before parliament and the people in 1905. By this method he proposes to obtain certain information as of the year 1902 or the year 1903. Well, if the information as to the year 1901 is placed before the people of this country in 1905, at what date may we expect the information ascertained in 1902 and 1903 to be placed before them ?

Mr. FISHER. I believe that by an organization of this office we shall be able to get the census information before the public more rapidly than it has been got in the past. The information we will obtain will not be quite so much in detail as that which is obtained at the decennial census, but it will be put in the hands of the public in less than two years from the time it is collected. The information which we got for the census of 1901 was only concluded in 1905, or four years later, and that is still two years' quicker work than was done in the case of the census of 1891.

Mr. R. L. BORDEN. I understand the hon. minister to say that he will be able to publish this supplementary information in a year and a half from the time it was taken. We will thus have in the middle of 1903 information as to 1902, but we have not got until 1905, information as to 1901.

Mr. FISHER. I hope that this office, when established and the work done by a permanent staff, will be able to turn out the information much quicker than at present.

Mr. R. L. BORDEN. Or it might lead to some more rapid method of compilation so far as general results are concerned.

Mr. KEMP. How long will the hon. minister leave the manuscript in the hands of the Printing Bureau before handing it over to a private printing office where the work would be done promptly ?

Mr. FISHER. By law we are required to have the work done in the Bureau, but the Bureau has the privilege of giving it out to other people.

Mr. LENNOX. I would like to know what the difficulty or disease is which the minister proposes to remedy. We have a census taken every ten years. What additional benefit are we going to get by what is now proposed and which is going to cost us half a million dollars. What specific advantage, for instance, is going to accrue to the farmers ?

Mr. FISHER. They will benefit by getting information regarding their business which they are not able to get now. The work, for instance, done by the Bureau of Industries in Ontario is so much appreciated by the farmers that they are willing to contribute all the information they can give, by filling in the forms and sending them to the Bureau at Toronto, and are quite satisfied to get the bulletins in return.

Mr. COCHRANE. Why should the farmers of Ontario contribute for the obtaining of the same information from the other provinces which they are giving themselves without charge ?

Mr. FISHER. The farmers of Ontario are sufficiently public spirited to want the information for the whole Dominion. They have at present no means of getting that information except as regards their own province.

Mr. LALOR. Of what nature is the agricultural information to be obtained from the farmers ?

Mr. FISHER. Very largely the kind of information given in the report of the Bureau of Industries in Ontario.

Mr. LALOR. Is it information as to the number of horses, sheep and cattle raised, or what class of information ?

Mr. FISHER. That information is included in the reports of the Bureau of Industries of Ontario. Also the areas of crops and the average crop production, the number of animals and the increases of animals. That is the character of the information to be obtained and distributed. That is the character of the information that to-day is set forth in the reports of the Bureau of Industries of Ontario, which hon. gentlemen familar with that province have stated is of great value and is accurately and well collected.

Mr. LALOR. Then, if I understand the minister aright, he will gain this information simply by sending circulars indiscriminately to the farmers and asking them to reply ; and if the farmers do not happen to reply, or if, say, one-third of the farmers of the province do not happen to reply, he will have practically no information at all.

Mr. FISHER. That is the way that to a very considerable extent the information is obtained by the Bureau of Industries of Ontario. Yet, it has been obtained successfully and accurately, so that those who are familiar with it accept it with confidence as being accurate. I do not see why information cannot be got for the rest of the provinces in the same way.

Mr. R. L. BORDEN. If the information is already collected for the province of Ontario, what object has the minister in trying to collect it again ?

Mr. FISHER. My hon. friend (Mr. R. L. Borden) will see that this information is gathered by the provincial government of Ontario. The same is done to a certain small extent by the provincial government of Manitoba. But it is not collected anywhere else in Canada. We want to obtain information for the whole Dominion. If the information is already gathered for the province of Ontario, then, under section 16 of the Bill, we are empowered to make use of it. We will not duplicate it. But, where the information has not been obtained, we will have to do the same work as has been done for the province of Ontario. But, even in Ontario, the figures cover only the facts for that province, and neither the people of Ontario nor any others have the figures for the whole Dominion. We know, for instance, how many horses there are in Ontario, but we do not know how many there are in the Dominion.

Mr. SPROULE. How is the minister going to collect that information ?

Mr. FISHER. Just as it is collected in the province of Ontario.

Mr. LALOR. But let me call the minister's attention to the fact that the information for Ontario is not collected as he proposes to collect it elsewhere. The information for Ontario is collected by the assessors, whereas the minister proposes to collect it by sending circulars indiscriminately to the farmers in the different localities. In the one case the information is authentic and reliable, and in the other it will not be.

Mr. BARR. It is the fact not only that the statistics in Ontario are carefully collected, but also that they are sent broadcast to the farmers. Every member of the agricultural society in the province of Ontario, and, I believe in the province of Manitoba as well, receives, week by week or month by month, the bulletins containing this complete and accurate information. And not only farmers but business men and men of all classes, have that information. And I cannot see in what way the minister proposes to increase the volume of our knowledge by the information he proposes to gather.

Mr. FISHER. I do not expect to increase that knowledge so far as the province of Ontario is concerned ; but I want to try to get the same information for the rest of the Dominion and compile it with the knowledge we get from Ontario and make a national return covering the whole Dominion. My hon. friend from Haldimand (Mr. Lalor) says that this information collected by the provincial government of Ontario is furnished by the assessors. He is quite correct, to a certain extent, but not altogether, as I am informed. Some of it is collected by the assessors, but a good deal is collected by direct communication with the farmers in the way I have suggested.

Mr. LENNOX. The hon. member for Haldimand (Mr. Lalor) has assisted me in getting a partial reply from the minister as to the benefit to the farmers of Canada to be secured by collecting and disseminating this information. I understand the minister to say that, by reason of what he proposes to do, the farmers will obtain more promptly, certain statistical information. He gives an illustration of that by saying that information will be given, earlier than is now possible, as to the number of horses in the country, the number of acres under cultivation, the number of acres devoted to other uses and so on. But what, I ask the minister is this : Assuming that he is correct, how is that going to benefit the farmers ? Is there any other way that he can suggest, beyond the one he has mentioned, by which the farmers will benefit in the result of this measure ? If there is no other way, I am content to let the matter drop. But I want to be definite about it ; to be able to say that I asked the minister to state all the benefits that would accrue from his plan and that I had a direct answer to my question.

Mr. FISHER. I thought I answered that completely a few minutes ago when I said

that the farmer wants information about his business which he has not got, but which will be collected and prepared for his use by the machinery I propose to establish under this measure.

Mr. LENNOX. The minister does not seem to distinguish exactly the point we put. He is assuming that certain information is necessary. Granting that we shall get certain information at an earlier day than we otherwise could—not very much earlier—I ask what dollar will the farmer make that he does not make to-day ? I have been unable, as yet, to see that the minister has explained that point. It may be owing to my density—

An hon. MEMBER. Hear, hear.

Mr. LENNOX. In answer to the hon. gentleman who says hear, hear, I may say that I, at least, am trying to bring out information of interest to the people. But I have been unable to see what pecuniary benefit this will be to the people of Canada, and I spoke of the farmers merely by way of illustration. The minister has not yet explained that point so far as I can see.

Mr. FISHER. I must grant to my hon. friend (Mr. Lennox) that the actual dollars and cents value of statistics is rather difficult to define. We take a census every ten years. We issue reports from the several departments. I believe all this is a necessity of civilized government, and that the more of that information we can give the people concerning the business of the country the better it is for the people. And the sooner that information is before the people, and the better the shape in which it is furnished, the better they will be able to prosecute the enterprises in which they are engaged. I do not think I can particularize more than that.

Mr. HAGGART. The minister does not seem to grasp the full meaning of his own Bill. He is adopting a system that is partially in use in the United States. What good would the information now published under the United States system be if it were published a year or two later than it actually is under their present system ? The statistical information which is gathered in the United States by means which the minister proposes to adapt to Canada, is used immediately in the United States, where it is furnished within a week or two after the result is known. For what purposes is it furnished ? For commercial purposes, for railway purposes. You know the amount of corn which is likely to be cropped in a given year long before it is marketed ; the same with wheat, the same with cotton. The farmer in the United States knows the condition of the market every month. The Minister of Agriculture does not seem to know, to understand, or to grasp the object of this Bill he has introduced. The object of the Bill is to furnish to the mercantile class, to the farmers, and to the producers throughout the country, information as to the amount produced every month during the year. When he has possession of that information he knows what price to ask for his grain, or whether to hold it any longer. But the minister says, Oh, this information is supplementary to the census, and it will be gathered a year or two afterwards.

Mr. FISHER. I think perhaps my hon. friend did not comprehend me when I spoke about the time the information would be given out. I meant that to refer to inter-census work to be done on a large scale. The office I speak of would issue interim bulletins much more frequently that that, information regarding crop returns, for instance, and matters of that kind, regarding which information would be given out from time to time as soon as it was obtained and compiled.

Mr. HAGGART. The hon. gentleman stated also that this was a statistical Bill, an amalgamation of the census and statistics branches, that he was following the lines of the census law of the United States, the object of which he did not seem to understand. Then the minister speaks of the statistics gathered from the different provinces. What will be the result of the plan that he proposes to follow ? For instance, Ontario at the present time furnishes these agricultural statistics, so does Manitoba ; but as respects the other provinces, these statistics are to be procured at the federal expense. What will be the result ? The result will be that Ontario will say to this government, if you get this information at the expense of the Dominion for the other provinces while we have to pay for our own, we will drop our work, and you must pay for it the same as you do for the other provinces. All these things must be considered. The hon. gentleman brags about his census returns that he says he sent down to the printer so early that we will get it all in 1905, whereas the late government did not get their returns published till after 1897. He forgets to tell us the cost of the census of ten years ago, which was about half million dollars, and that of twenty years ago about $400.000, while his census up to the present time has cost about $1,200,000.

At six o'clock, committee took recess.

After Recess.

Committee resumed at eight o'clock.

Mr. TAYLOR. Mr. Chairman, I would like to inquire where we are. I understand that you reserved your decision on a point of order until to-morrow. Has it been decided that we shall proceed with the Bill before we get your decision as to the point of order ?

Mr. DEPUTY SPEAKER. I understand that there was a kind of agreement entered into that the money clauses would not be taken up until the decision was rendered to-morrow.

Mr. TAYLOR. And that we shall go on with the other clauses ?

Mr. DEPUTY SPEAKER. Go on with the others, if there is no objection.

Mr. FISHER. Clause 1 is a mere title clause, and that is generally left until the end. I would, therefore, ask you, Mr. Chairman, to proceed with clause 2.

Mr. SPROULE. Before you proceed with clause 2, I would like to have a little more information on this Bill, because it seems to me we are not going to realize what the hon. minister told the House we might expect to realize ; that is, by adopting this method suggested now we would materially reduce the cost of taking the census at each decennial period, and that we would get the census much more correctly taken than at the present time. In answer to a question, I understood the hon. minister to say that one of the ways in which this would be accomplished would be the education of certain parties to do the work. In order to ascertain whether that might be accomplished or not I inquired whether it was intended to educate the enumerators. I understood the hon. minister to say that it was not, that there were only certain parties in the office who would be working at the census from year to year between the ten-year periods. So that the parties, above all others, who, in my opinion, would require education to get the work correctly and expeditiously done—the enumerators—would not be touched by any provision of this Bill. I did not understand the hon. minister to say that they would be in any way touched.

Mr. FISHER. No ; I do not think so.

Mr. SPROULE. Then, in what respect are we to decrease the cost ? I cannot understand that. There is another question. On what particular lines are we to benefit from it, and what statistics are we likely to gather under this system that we have not already under the system in operation at the present time ? The hon. minister spoke about the importance it would be to the farmer to know what he was raising and how it would affect the market. Our answer is that you get all that in the report of the Bureau of Industries, a copy of which I have here, for Ontario at least. You get the information from two sources ; one is through direct inquiry of the farmer, to whom a schedule is sent which he fills out himself, and the other is from the assessment. The assessors go around and take this all down when the assessment schedules are made out ; and, therefore, you have this information, which I take to be approximately correct. The Bureau of Industries issues reports on the condition of the crops, the yield per acre of peas, oats, wheat, barley, potatoes, turnips, and every one of these lines ; the number of acres that are under crop, the yield per acre, and the amount in value that it represents. The Bureau of Industries also gives statistics of horses, cattle, sheep, swine, poultry and everything else. This information is all gathered here and is all before the public to-day in the report which is issued from year to year. It could not be expected that this proposed method of collecting the information would give it to the farmer and the country much earlier than it is given at the present time, because, although the crop reports are monthly, the yield can only be given yearly in any event. The only advantage to the farmer would be to know how much is raised of these various crops from year to year. That information is all given in the report of the Bureau of Industries. That relates to the farmer, to everything the farmer raises, everything he has to sell, how much wool is raised, the number of horses, sheep, cattle, grain, &c. Then it is said that this proposed system will collect information respecting lines of manufactured goods. Well, take the report of the Department of Inland Revenue. We have the amount of malt, spirits and tobacco manufactured, the number of pounds of leaf tobacco raised, the different kinds of grain used, and the product as well. That is contained annually in the report of the Minister of Inland Revenue ; so that we get a portion of the statistics there that apply to certain lines of manufactures which will not be found in the report of the Bureau of Industries. Well, then, we turn to the Deparment of Mines, and we have here, at least in Ontario, and we have in another form in the Dominion as well, a report of the mineral products of the various mines. We have a report of the product of every mine in the country. We have a report of the production of gold from 1898 to 1902. Of gold, the production was as follows :—1898, $375,000 ; 1899, $428,000 ; 1900, $297,000 ; 1901, $244,000 ; 1902, $229,000 ; and we have also a return of the production of silver, lead, copper, nickel, iron ore, pig iron, steel, molybdenite and zinc. The output of all these mines is found in the report of the Bureau of Mines. That is an annual statement, and I do not know how the output of these mines can be ascertained by this new bureau which it is proposed to establish and presented to the people at any earlier date than we have it in the report of the Bureau of Mines. We have the statement not only in regard to these lines, but also in regard to coal oil, or petroleum and the products of oil, brick, tile and everything else. That information is collected already and given annually to the people. Then we come down to something that interests the wage-earners of the country. But we have the report of the Department of Labour, which is published monthly.

We have as well the report of the Bureau of Industries in Ontario showing the prevailing rate of wages for farmers and other labourers. We have the very same thing collected, collated and presented to us in the monthly bulletin or paper that is got out by the hon. Minister of Labour (Sir William Mulock). It relates to the labourers and builders of the country, and shows how the people are employed. Now, then, we come down to commerce, and we want to know what is being produced and handled from month to month during the year. We have the product of the dairy—the cheese factories, the butter factories, eggs, poultry and all those lines. Thus we have these figures in the report of the Bureau of Industries of Ontario, and in the report of the Minister of Trade and Commerce in regard to exports from month to month, while the vital statistics are collected both in the province and also at Ottawa in connection with the Health Department. Thus it seems to me that in all these lines we have a surplus of statistics at the present time ; whether they are published in the most convenient form for analysis or used from month to month, I am not prepared to say, but as we have so many statistics now that I imagine this Bill is comparatively unnecessary. It will also involve a great additional outlay and the creation of an increasing number of highly paid officials. I do not know whether we make the very best use of the various collections of statistics that we have now, and I am not prepared to say that we are justified in adding much to our present expenditure for the collection of statistics.

Mr. FISHER. I am unable to agree with my hon. friend (Mr. Sproule). I would rather look upon a great deal of what he has brought forward as an endorsation of the objects of this Bill. He says, for instance, that there is certain information about labour, wages, &c., in the report of the Ontario Bureau of Mines, and we have also a labour bureau here which issues under the authority of the Dominion government—and I think that the publication of the 'Labour Gazette' has been endorsed both by the House and the country—a compilation and statement of the condition of wages and labour in this country. Just as that report of the Labour Bureau is for the whole Dominion of Canada, while the report of the Bureau of Industries is for the province of Ontario alone, so the work that will be done under this Bill in regard to the several branches of industry referred to would be for the whole Dominion. The information to which the hon. gentleman referred is for the province of Ontario, but we want to get that information for the whole country. Then too, the report of the Bureau of Industry deals only with the agricultural and to a certain extent the mineral productions of the province, although the report of the Bureau of Mines in Ontario gives certain information about the mining and mineral production in that province.

Mr. SPROULE. And the Geological Survey gives it for the whole Dominion.

Mr. FISHER. The report of the Geological Survey does not deal very much with the actual production of minerals. The Geological Survey report is a report on scientific geological work more than on the production of minerals although it does deal with these figures to a certain extent. My hon. friend (Mr. Sproule) spoke of the returns of the Department of Inland Revenue. It is true that on certain lines the department gives a good deal of information in reference to articles connected with excise and taxation through excise, but it does not give the information about any other products, and the information which it does give us is with relation to the taxation more than with relation to the production. Incidentally it gives some statements in regard to the products that enter into the production of liquor, cigarettes, &c., but still after all this is done in the Department of Inland Revenue with an eye to and in relation with the collection of revenue and not in connection with the products of industry.

Mr. SPROULE. So long as the information is given what difference does it make what the connection is ?

Mr. FISHER. It gives that information and we would be able to make use of it for tabulated statements that might be drawn up in connection with the same subject, but not particularly with the production of revenue. My hon. friend will agree with me that the questions of tabulated statistics is practically interminable. It is possible to deal with a certain set of figures in many different ways according to the object that the student for instance, may have in view. The figures collected by the Department of Inland Revenue are dealt with by that department for the purposes of the revenue, but that particular set of figures might not help the person who is studying the culture of barley for malting purposes. But still they would be identically the same figures in the original collection of information. My hon. friend says that certain labour statistics are collected by the provincial government of Ontario and certain other statistics of a different character altogether by the inspectors of factories in the different provinces, figures that are collected chiefly from a hygienic standpoint, having in view the safety of the operatives in factories, and yet these figures can be made use of in the reports of the Bureau of Labour here, and so collated as to show the condition of the workmen all over Canada. With the new system we will be able to furnish information on many subjects from a Dominion or national standpoint, using the information that is collected by the provincial auth-

orities and also that collected by various associations such as dairy associations which might collect various statistics in regard to the production of cheese and butter.

Mr. BLAIN. Is Ontario the only province that collects agricultural statistics ?

Mr. FISHER. The province of Manitoba does a little, but not nearly so much as Ontario. I am not aware that any other province collects any.

Mr. BLAIN. I see here in the statistical year-book a table of live stock in Manitoba, giving the value each year. For 1897, 1898, 1899 and 1900 there is a complete statement of the value of stock in the province of Manitoba. The hon. gentleman's Bill would not encroach upon that ?

Mr. FISHER. Not so far as Manitoba is concerned.

Mr. BLAIN. Are we to understand that that information is published only for Ontario and Manitoba ?

Mr. FISHER. I know of no other. I do not think the hon. member will find it in regard to Quebec, the maritime provinces, British Columbia or the Territories, and the extent of agricultural information gathered in the province of Manitoba is not as great as that gathered in the province of Ontario. I have already referred to the point mentioned by my hon. friend from East Grey (Mr. Sproule), and I rather take most of what he has said to be an endorsation of a good deal of what is in this Bill.

Mr. SPROULE. That is not the interpretation that I intended to have put upon it. I said what I did because I have heard at different times almost the same line of reasoning with regard to other plans for collecting statistics. When we were asked to incur the expense of getting statistics for the Year-Book, we were told that it was for exactly the same purposes for which the hon. minister says we are now justified in incurring this expense. When it was proposed to have a monthly report from the Department of Trade and Commerce, we were told that it was in order to furnish statistics for the mercantile community. When the establishment of the Bureau of Labour was proposed, we were told that statistics were required from time to time to inform the wage earners of the country of the conditions of wages and labour, in different localities. The same argument has been put forward with regard to all these proposals, and the question that presented itself to my mind was whether we had not reached the limit of expenditure for the purpose of collecting and publishing statistics. The hon. minister says that figures can be arranged in a great variety of ways. I have no doubt that they can ; but is that any justification for going on to devise other ways of arranging them in order to spend money ? I do not think it is.

Mr. FISHER. If this Bill were going to repeat what has already been done, my hon. friend's argument would be quite right ; but it is not. It is taking up work in other directions. The Trade and Commerce Reports, for instance, do not deal in any way with agriculture ; they deal only with trade and commerce, and with external commerce. They are compiled practically from the Trade and Navigation returns, besides containing reports of our agents abroad. But they do not give any information about our home production. My hon. friend says this is exactly the argument that was put forward when the Year Book was established and when the Labour Bureau was proposed. I quite agree with my hon. friend. Parliament decided to establish the Year Book and the Labour Bureau for specific purposes, and this Bill has a specific purpose in another direction. There is at present no provision for compiling the kind of information for the whole country that this Bill makes provision for. It is exactly on the same principle as the establishment of the Year Book and the Labour Bureau, and in that sense I venture to think that what my hon. friend has said is rather favourable to the principle of the Bill.

Mr. SPROULE. If I could see in what way it would benefit the country, I would be ready to support it, because I am in favour of correct statistics. The hon. minister does not propose to deal with all the products of the country at the same time, but he proposes to deal with one line in one year and with another line in another year. I do not see how that is going to be of any great benefit to the country at large. I could see how it might be of some use to ascertain all the products of the country over three or four years. The statistics must include everything, I think, to be of any great value. What I would like to understand is in what particular way this is going to benefit us ? What particular phase of it can we utilize, and thereby make more money ? We cannot follow the markets any more closely, we cannot diversify our pursuits any better, I take it. If the information which we are getting from various sources to-day is as reliable as the proposed information will be, I do not see that it is going to be of much if any value. If I thought it was going to be an improvement, I would commend the establishment of a new system.

Mr. TAYLOR. I would like to ask the hon. minister, from what class of the community has the demand come for this legislation ? Has it come from the manufacturers, from the merchants, from the labouring classes, from the farmers ? The only class that has made any demand, so far as

I can see, is some gentlemen who want positions varying from $4,000 a year down, for the purpose of compiling some statistics. I have listened to the hon. minister very attentively, and he has failed to answer the question propounded by my hon. friend from South Simcoe (Mr. Lennox), as to what value these statistics, when gathered, will be to the great tax-paying class of the country, the farmers. Are they making any demand for this legislation, and in what way is it going to benefit them ? The hon. minister has signally failed to answer that question. I understood the hon. minister to say that he wanted to gather for the whole Dominion such information as that published in the province of Ontario by the Bureau of Industries.

How is my hon. friend going to get this information from the maritime provinces and the province of Quebec ? Does he think he will get it by sending out circulars ? Will the parties to whom these circulars are sent tell him how many cheese factories there are in the province of Quebec. In my opinion, in no other way can the information be gathered except through the municipal assessors. If you have a province in which there are no assessments taken, you cannot get the information unless you send out a staff of your own. All I can see in this Bill is to furnish the minster with a pretext for employing a staff a few weeks before the election and sending them out to find how many grit and tory votes there are in the various constituencies. The hon. gentleman tells us that he will send out schedules to the manufacturers and will have a law passed compelling the manufacturers to answer the questions contained in these schedules. But why did he not compel them to do this in the last census ? Many of them replied to his questions by saying: It is none of your business. He wanted them to divulge the secrets of their business, to tell the public how much goods of a certain kind they manufactured, how much money was invested in their business, what wages they paid per day; and lots of manufacturers refused to answer. But even if he had these schedules filled up, what benefit would that be to the manufacturers generally ? I can see no benefit to any class of our community from this expenditure of $20,000 the first year and double that amount the next year. You certainly cannot gather the information the hon. minister requires, except by employing a staff in each municipality to go from house to house and collect it. I am confident that our farmers will see no advantage to them in any such expenditure. That will not make their land produce an extra bushel of wheat or a cheese factory turn out an extra pound of cheese. The hon. minister should answer the question put him by the hon. member for Simcoe (Mr. Lennox) and tell us what benefit these statistics will be to the farmers, when gathered, and also from what class of the community comes any demand for this legislation.

Mr. FISHER. We have had demands from all classes of the community and all parts of the country for the information we propose gathering.

Mr. TAYLOR. Will the hon. minister lay these demands on the table?

Mr. FISHER. Surely the hon. gentleman does not want me to lay on the table the letters received by the department during the last ten years.

Mr. TAYLOR. We will take one year.

Mr. FISHER. Those demands come in all shapes and forms. Sometimes they are for information we are able to give and frequently for information not at our command. In the second place, the demand has not come from anybody seeking positions. There has been no demand for this particular measure, but I am introducing it in order to meet demands for information which we have not now the power or the machinery to collect. This measure is a consolidation of three Acts now on the statutes, and very little additional machinery or power is required to carry out the object I have in view. The three Acts are for three different purposes, and are here consolidated into one, which will cover the whole ground and add some necessary powers to make them complete. I have the power to-day, under the General Statistics Act, to appoint agents all over the country to collect information, and have only to ask parliament to vote the money. Under the Census Act, I have the power every ten years to appoint enumerators and make a census.

Mr. INGRAM. Does the law give the hon .gentleman the right to take the census every six years in the Northwest?

Mr. FISHER. Yes, and we are extending that power to the new provinces which are to be created. The intention is to take one census between each decennial census for those new provinces just as we are required to do by the Manitoba Act for Manitoba.

Mr. TAYLOR. But the five year census in Manitoba is simply to count the heads of the population for the purpose of ascertaining the amount that province is to receive per head.

Mr. FISHER. Yes, but this measure goes further and extends to the new provinces to be created in the Northwest Territories.

Mr. TAYLOR. How is the hon. gentleman to get information from the other provinces which do not make a report as the Ontario Bureau of Industries does? When the office is fully equipped, how is he going to find out for instance, how many cheese factories they have in New Brunswick, and

how many horses and cattle? How is he going to get it for the other provinces ?

Mr. FISHER. These statistics for the province of Ontario to which my hon. friend (Mr. Taylor) refers are gathered largely by correspondence—by sending out forms——

Mr. TAYLOR. No, no.

Mr. FISHER. My hon. friend must not shake his head. These facts are not all taken from the assessors' returns by any means. Certain of them are, but not all. Some are secured by sending out circulars with questions and requests that the answers to these questions be given. There will be no difficulty in dealing with the subjects my hon. friend referred to in the case of such industries as the cheese and butter factories. That information, I know by experience—having tried to get it in individual instances and for particular localities—can be got perfectly well without an enumeration—it can be got in complete and accurate form. Similar information can be got in regard to other industries, just as it can for factories or dairy products.

Mr. INGRAM. Does the hon. minister mean to say that the information for Ontario is got by sending out circulars ?

Mr. FISHER. I understand that a good deal of that information is got in the way I have outlined.

Mr. INGRAM. I understood the minister to say that he would issue circulars promiscuously and so get that information. But that is not the way the information is secured for the Ontario Bureau of Industries. That information is obtained from municipal officers, who report to the bureau in response to its circulars. How else, for instance, would the hon. Minister of Agriculture obtain the assessment of a municipality ? Will he take it on a report of some farmer ? He must get such information, if he gets it at all from the municipal officers. And so all along the line, as described by the hon. member for East Grey (Mr. Sproule).

Mr. FISHER. If my hon. friend (Mr. Ingram) will allow me a moment ; He is right to a certain extent. The Bureau of Industries of Ontario publishes much information obtained from municipal officers. And the same kind of thing can be procured in the same way in the other provinces. In the province of Quebec there is a vast mass of municipal information available. I believe the same is true of some, if not all, the maritime provinces. This Act contemplates the collection of that information for these provinces in the same way that such information is collected in Ontario by the Bureau of Industries.

Mr. INGRAM. The hon. gentleman's (Mr. Fisher's) department already obtains information in that way. He sends out circulars from time to time asking concerning the success or failure of certain crops, for instance, and, on the strength of the replies to these circulars, he prepares a bulletin. But, the hon. gentleman, as we understand him, says he is going to establish a Bureau of Industries for the whole Dominion for $35,000. The hon. gentleman can no more do that than the sun can shine at mid-night. This is simply the thin end of the wedge, and, in the course of a year or so, instead of $35,000, we shall find an expenditure of $135,000. Up to this time the difficulty that this House has had, and that the country has had, is that the statistical year-book is laid on the table and is distributed among the people far too late. And, when you inquire into the cause of this delay, you find it in the fact that the government has starved the statistical department it already has. Sufficient force is not employed to expedite matters and push the year-book out in good time. Yet, the hon. minister is establishing a department that will conflict with the department he already has. Why not spend the money in improving the existing department instead of establishing another ? Coming from Ontario, and as a representative of Ontario, I do not see why we in that province who pay for collecting and publishing our own statistics, should be called upon to assist in publishing statistics for the rest of the Dominion.

Mr. FISHER. I am sorry to have my hon. friend (Mr. Ingram) say in effect, that, so long as Ontario gets certain information the people of Ontario do not care whether the rest of the Dominion gets it or not.

Mr. LENNOX. He did not say that.

Mr. FISHER. The hon. gentleman (Mr. Ingram) thought that the information secured for the province of Ontario was sufficient for that province. I believe that a large number of people in Ontario, as well as in the rest of the Dominion, want to get the same kind of information about the whole Dominion as is now collected for Ontario—information concerning our national industries and productions. For that reason, I think, it is necessary that this work should be done under the Dominion government. Each province now collects a certain amount of information. Ontario collects a great deal, Manitoba a certain amount, Nova Scotia, Quebec and the rest, a certain amount. But the information gathered varies, the method of making up the tables varies. When the Dominion office is established and collects that information from provincial and local sources, through assessment rolls, reports of municipal secretary-treasurers or in any other way, it will be able to collate that information in tables covering the whole Dominion. I am quite sure that the people of Ontario are as anxious to have that information as are those of any other part of the Dominion.

Mr. LAKE. I think the Minister of Agriculture (Mr. Fisher) was scarcely fair to the Northwest Territories when he made the statement that agricultural statistics were collected only in the provinces of Ontario and Manitoba. For many years past the Department of Agriculture of the Northwest Territories has been collecting agricultural statistics, statistics which have proven accurate and which are of very great use not only to the farmers, but to all classes of the community. Especially have they been of use to us in making arrangements with the railway companies for carrying out our grain and in other matters of that character.

Mr. A. MARTIN. I think this committee should be very slow to pass a measure such as that now under consideration. I do not think that the minister has shown that the information he proposes to collect will be of any great service to the country. And, in any case, it is clear that he cannot collect that information at the expense he proposes. Statistics about Canada, to be useful, must be had promptly. There is no use in having the facts about last years crop presented to us next year. To be of service those figures must be had within a month or two; and surely the minister does not seriously tell this committee that he can accomplish the collection and publication of statistics on this basis for any such sum as he has named. From the experience we had in connection with the last census, I think the committee may well hesitate long before handing over to the disposal of the minister any sum as he suggests for the carrying out of the purposes of this measure.

The census taken five years ago shows, I think, the need of this committee going slow in placing a large sum of money at the disposal of the hon. gentleman. I have here the Auditor General's Report for the year after the census was taken. I turn over a few leaves, and when I see how lavish the hon. gentleman has been in the expenditure of public money, I am astonished, and yet I know what it all means. For instance, take page D--143, and what will he find there? 'Commissioner for the county of Inverness, N.S., Mr. J. G. McRae, $289.67; overpayment, $150.' What became of that $150? $150 was paid to that commissioner over what he ought to have got. I was running an election in my riding at that time, and I know what every one of these appointments of commissioners meant, I know why this large expenditure of money became necessary. I would like to know whether there was an attempt made to recover that $150 from this man. In opening this book I have struck this account at random, but there is enough here to show that this committee had better go slow in voting money to be spent by the hon. gentleman. Have we any reason to suppose that this information which he is going to collect will be forthcoming in time to be of any service to this country? We have no assurance that it will be.

Mr. LENNOX. Section 2 is a very important one, and I wish to call the attention of the minister to a question involved in the consideration of this clause.

In this Act, unless the context otherwise requires, the word 'minister' means the Minister of Agriculture, and the word 'office' means the census and statistics office.

Well, this is an important question, it is important for us to consider whether the minister who administers this Act is to be the Minister of Agriculture. To make plain what I am aiming at, I will refer to a line in the next section.

There shall be a permanent office under the Minister of Agriculture to be called the census and statistical office.

Now, I say that the time has come in Canada when, having regard to the large amount of money invested by the farmers in their operations, we shall have a whole, able-bodied Minister of Agriculture all to ourselves. The Minister of Agriculture himself has dealt with this question. It may be that he had in view some other Minister of Agriculture, and he thought that it might be proper to divide him. But in this case, on behalf of the farmers of this country, I protest in all seriousness against dividing our Minister of Agriculture. Mark Twain, I think it is, tells us about the cannibals of some south sea islands who, as showing their appreciation of the missionary, came out of a 'restaurant' smacking their lips, and saying he was a good, tender missionary, and they wished they had more of him. So far as I am concerned, having regard to the fact that the Minister of Agriculture has in the past been so distracted from the concerns of the great producing class in this country, I think we should take this matter seriously in hand now, and that we should consider, not whether we shall enlarge the duties of the Minister of Agriculture, but whether we shall not insist, so far as we can in a parliamentary way, on having some gentleman to represent the agricultural interest of this country who will be content with the glories attaching to that office, without desiring to grasp a large measure of glory from some other source. Now, to show the position we are in in regard to agriculture, I will quote from the mouth of a witness that cannot be disputed, I will take the liberty of reading from a most authentic source. Take the 1st volume of the census of 1901, which according to the minister himself is as much ahead of any other census that has ever been compiled as the Bible is ahead of the Toronto 'Globe.' I presume no pains are spared there to point out the imperfections of the former census and the perfection of the last one.

Provision has been made for the first time in a Dominion census for collecting figures of farm values——

This will be information to the public.

——and it can be premised that the data obtained will present a striking confirmation of the greatness of our agricultural industry, and of the leading place it occupies in the development of national life.

That is what I claim for the agricultural interests of this country. We are told by Mr. Blue that agriculture represents an investment of 72 per cent of the entire investment of capital in the Dominion of Canada. We find that out of a total population of Canada of 5,371,315, the urban population was 2,021,397, while the rural population was 3,349,516. I took occasion nearly a year ago to point out to the Minister of Agriculture the importance of not having his time distracted from agricultural concerns by the multiple, and in some cases useless things dumped into his department; and perhaps I cannot do better than quote the hon. gentleman's own language which I find on the Hansard of last year, page 3736. We were discussing the manner in which the agricultural affairs of Canada were conducted by the Imperial Institute in Britain, and the minister said :

The Board of Trade in England is one of the departments of government that is something like the Department of Agriculture here.

That is his own comparison.

It has a large number of branches connected generally with trade and commerce, and I think it is a department where they put a lot of different things that they do not quite know what to do with.

It is something like the Department of Agriculture in this country. Patents, trade marks and various things have been put into the Department of Agriculture here, although they have nothing whatever to do with agriculture. The Board of Trade seems to be an omnibus department.

What I do say, and I hope I will have the serious consideration of the hon. Minister of Agriculture, is that it is time that we had a department devoted purely to agricultural concerns, having regard to the enormous interests that are involved, and if it is said that the hon. Minister of Agriculture will not have enough to do if he devotes his attention solely to agriculture, I may say that he can well spend a portion of his time in listening to the farmers of this country discussing the various practical questions that arise, and that they will give enormous interests that are involved; and him a large amount of practical and valuable information. Mr. Clancy, then in the House, said :

He tells us that it is under the Board of Trade, which is an omnibus department, a sort of receptacle for worthless articles—things which are not good enough to keep, but which it is hard to throw away.

And the minister apparently concurred in that view. Then the member for South Simcoe calls the hon. minister's attention to it in another way. He says :

I wish to speak to the Minister of Agriculture as a farmer talking to a farmer. I presume the hon. gentleman is a practical farmer, and to that extent there is a bond of sympathy between us.

Then, skipping a few lines :

I think it was the president of the Board of Trade with whom we had all the difficulty in regard to the embargo on Canadian cattle; and therefore I think the Minister of Agriculture should have approached this proposition with a good deal of suspicion on behalf of the farmers of Canada.

That seems to be emphasized to-day, having regard to the position of matters, when we find an ex-Minister of Agriculture in the old country urging what is not exactly fair in the interest of the farming community of this country. Then it is pointed out that this department is like a department in England—

——which takes up everything that nobody else wants to have anything to do with.

The gentleman who held that view at that time—and I had the honour of calling that matter to the hon. minister's attention in that way—has been much more impressed with it since. I have been through the recent Ontario campaign, and what did we find there ? We found that the very matter for which the Prime Minister of Ontario, who has just resigned, took especial credit was the creation of, as he called it, a Minister of Agriculture for the province of Ontario. That was not the creation of a Minister of Agriculture for the province of Ontario. Previous to the time that he spoke of we had a Department of Agriculture in which other things were taken up as well, we had a Commissioner of Agriculture whose duties were not simply confined to agriculture, and if it was necessary in the province of Ontario to separate the departments and assign a minister solely to the interests of agriculture, how much more necessary, Mr. Chairman, must it be when the interests of the whole Dominion are at stake ? I submit that this is a matter which requires the immediate attention of the government. It involves no additional expense. Already we have a Department of Trade and Commerce collecting certain statistics, the hon. minister of Agriculture is collecting certain statistics as well, and there is no reason in the world why the duties now assigned to the Minister of Agriculture, outside of those which are purely agricultural, should not be assigned to some other department. I believe that I will be within the judgment of hon. members of the House on both sides——

An hon. MEMBER. No.

Mr. LENNOX. I may not probably be in the judgment of one, but one swallow does

not make a summer—I will, at all events, be in the judgment of the great tribunal to which I turn with very much more regard than to hon. gentlemen on the other side, I shall be in the judgment of the people of Canada when I demand on behalf of the agriculturists of this country that a new order of things shall be inaugurated, and that instead of distracting the attention of the minister from the great duties which should be his and which, I am sure, he is anxious to discharge, he shall concentrate his attention solely upon agricultural questions.

Mr. WALSH. May I say a word as representing an agricultural constituency ? I do not think I need bring to the attention of the hon. Minister of Agriculture (Mr. Fisher) the condition in which agriculture, or the production of horses and cattle, is in my county, because I think he is perfectly well aware of it. If this information is to be collected in the same way the last census was taken, I must say, as representing that county, that I think we would be much better without it. The returns for agriculture have only been given some four years after the census is taken. If they were correct they were too late, but, as they were not correct, I can only hope that the people will look on them as ancient history, and that they will not judge our county according to the census as given. We have what we consider amongst the best farmers in the Dominion of Canada in our county, and we believe that our cattle are amongst the best, but the return given here would indicate that we are much behind our neighbours. I would like to read an article which shows that I am not speaking simply because I am in the House. I shall read this article from our local paper, a journal which, some years ago, members of the government appreciated very highly, although they may not appreciate it so highly now. I refer to the Huntingdon 'Gleaner,' and the article that I would like to read is in regard to the last census. The date of his paper is 5th January, 1905. It says :

The census was taken in the spring of 1901 and we have only now the final volume, which relates to agriculture. Examination of the figures, we regret to say, shows they are not merely ancient history, but unreliable. The figures for dairy factories establish this. For instance we are assured there are no creameries in the county of Beauharnois (!), that there are twelve in Chateauguay, and eight in Huntingdon, and that Chateauguay sold nearly double the quantity of creamery butter that Huntingdon did. This is absurdly misleading. The figures for cheese are more approximately correct. The census declares six factories in Beauharnois made 364,000 lbs. of cheese, 14 in Chateauguay 1,112,000 lbs., and 19 in Huntingdon, 1,464,000 lbs. That the information here conveyed is erroneous can be shown in another way. The report declares there are 13,691 milch cows in Chateauguay and 18,489 in Huntingdon, yet the quantity of butter and cheese made by the two counties is about equal, the figures being : Chateauguay 2,053,000 lbs., Huntingdon 2,084,000. Either the extra 4,798 cows with which Huntingdon is credited over Chateauguay must be what the Hon. Mr. Fisher terms 'robber cows,' or this census is not worth the paper it is printed on.

If that is a sample of the census we are going to get, I, on behalf of the agriculturists in the county of Huntingdon, object to this money being spent.

Mr. DEPUTY SPEAKER. Shall the section be adopted ?

Mr. FOSTER. We want an explanation of that Huntingdon business.

Mr. FISHER. I am not in the position off-hand to explain a matter of that kind. I can only say that a while ago my attention was drawn to another statement in the Huntingdon 'Gleaner' which I did investigate, and which I found to be inaccurate according to the census returns and according to the facts. This statement I have not seen before, but I will investigate it and report.

Mr. FOSTER. I would imagine that according to the practical agreement we came to, the minister had better move that the committee rise.

Mr. FISHER. I hope that facility will be given to the consideration of the Bill clause by clause when we next go into committee.

Progress reported.

PACKING AND SALE OF CERTAIN COMMODITIES

Hon. SYDNEY FISHER (Minister of Agriculture) moved that the House go into committee to consider the following proposed resolution:

Resolved, That it is expedient to amend the Act respecting the packing and sale of certain staple commodities, by inserting the following sections after section 4 :—

4a. When apples are packed in Canada for export for sale by the box they shall be packed in good and strong boxes of seasoned wood, the inside dimensions of which shall not be less than ten inches in depth, eleven inches in width and twenty inches in length, representing as near as possible two thousand two hundred cubic inches.

2. Every person who offers or exposes for sale, or who packs for export, apples by the box otherwise than in accordance with the foregoing provisions of this section shall be liable, on summary conviction, to a penalty of twenty-five cents for each box of apples so offered or exposed for sale or packed.

4b. When apples are packed in boxes or barrels having trays or fillers wherein it is intended to have a separate compartment for each apple, then the provisions of sections 4 and 4a shall not apply.

Mr. SPROULE. Would the hon. minister explain the purpose of these resolutions ?

Mr. FISHER. I may say that the purpose is to introduce a Bill to define the size

of boxes for the packing of apples. We have under a clause of the Staple Commodities Act, Chap. 26, Edward VII, 'An Act respecting the packing and sale of certain commodities,' provision for the size of barrels for apples. Of late years our export trade in apples has been turning towards the use of boxes instead of barrels. For some time there was a considerable variety in the dimensions of the boxes used. A little over a year ago the fruit growers and exporters asked for a standard box. At that time resolutions were passed by the fruit-growers' associations in the different provinces, adopting what is known as the British Columbia box, the size of which is given in this resolution and I think I am safe in saying that there was a practically unanimous expression of opinion that this size was the most convenient, the most suitable and the one that would meet the demands of all parts of the country most completely. The Bill simply provides for the adoption of this standard and it also provides that the standard shall not apply to boxes where what are called 'fillers' or pasteboard partitions are included, because there is a trade in this country in very choice apples both for export and sale in Canada and these apples are put into boxes like egg boxes with pasteboard compartments all through. Such a box requires to be a little larger to contain the same amount of fruit as the other boxes and its dimensions would depend considerably upon the size of the fruit selected for packing in a certain box. Therfore these boxes are omitted from the provisions of the Act.

Mr. INGRAM. I see that the hon. minister here deals only with boxes. Is it not a fact that some provinces have different sized apple barrels?

Mr. FISHER. Not to-day. The law fixes a standard size of apple barrels.

Mr. INGRAM. I understood that one province to-day ships in a barrel of a different size from the other provinces.

Mr. FISHER. Not since the passage of the Act of 1901, the Act we are now amending, chapter 26 of 1901, 'An Act respecting the Packing and Sale of certain standard commodities.' The size of apple barrels is determined by the provision of section 4 of that Act to which this amended clause is intended to be added. The dimensions of the minimum barrel represent as nearly as possible 96 quarts. That is the minimum size, they can use a large size if they choose.

Mr. INGRAM. That is the point I am getting at; some do use larger barrels. There are two classes of barrels used; that is why I asked the question.

Mr. FISHER. The amendment does not apply to barrels at all except that clause 4b, the last part of the resolution, says that when apples are packed in boxes or barrels having trays or fillers, the provisions of this Act shall not apply.

Mr. LEFURGEY. Would it not be better to have the barrels all of one size, to adopt a standard size for all Canada and make it compulsory?

Mr. FISHER. The minimum size is fixed, and if people choose to use a larger barrel they will suffer a loss. Shippers are trying to get to the standard barrel as rapidly as they can. When the Act was passed, in 1901, it was thought best to leave the possibility of using a larger barrel if they chose, because at that time differnt sizes of barrels were used. Boxes, however, are not used to any very great extent and it is thought that a standard box can very soon be adopted.

Mr. LEFURGEY. Will the minister tell me to what extent boxes are being used for the exportation of apples to the old country?

Mr. FISHER. I could not give the number of barrels or the quantity of apples exported in boxes but I may say that it is increasing from year to year very considerably. I am only making a guess but I am quite sure that not 10 per cent are sent in boxes. I doubt if 5 per cent of all the apples sent last season went in boxes.

Mr. LEFURGEY. Has the shipment of apples in boxes been satisfactory? Have the apples been largely bruised?

Mr. FISHER. I think the trade in boxes has been very satisfactory. Apples shipped in boxes have as a rule returned better results than those shipped in barrels.

Mr. LEFURGEY. I understand that a few years ago in the United States, where the experience has been far greater than with us, a commission went thoroughly into the matter of box shipping versus barrel shipping, and reached the conclusion that the use of boxes was not satisfactory to the apple trade, and highly recommended barrels.

Mr. FISHER. That has not been the observation of our own fruit shippers at all, and in that respect I think we have not a great deal to learn from the United States.

Mr. LEFURGEY. What particular call is there, then, from the people of Canada for the box to replace the barrel?

Mr. FISHER. It is not proposed to require the box to replace the barrel. Nobody is trying to force anybody to substitute the box for the barrel. We are simply providing a standard box for those who choose to ship in boxes.

Mr. BARR. Will the hon. minister tell us which is the cheaper, the barrel or the box? During last year it is a fact that barrels were very scarce.

Mr. FISHER. I have no information on that point. The box as indicated in these dimensions has only one-third of the capacity of the standard barrel.

Mr. HENDERSON. The hon. minister tells us that he is providing for a standard box. I do not so understand the resolution, because it does not provide for a box of a uniform size. If we are going to have a standard box, one which may be used for measurement, we ought to make it uniform. It would be more convenient for packing in railway cars and in steam vessels than boxes of all sizes. We have provided for a strawberry box of uniform size, and if apples are to be sold by the box, I would strongly advise the minister to require that all the boxes shall be of the same size, so that the matter will be clearly understood both by the buyer and the seller.

Mr. FISHER. We are following in this proposed amendment the principle adopted in the law already in force in regard to the barrel, that is, that it shall not be less in size than a certain dimension.

Mr. SPROULE. In both cases I think there is this defect, that if you want to compare prices per barrel, the barrels ought to be all of the same size, and for the same reason the boxes ought to be all of the same size. Then people will know what the market is.

Mr. FISHER. As a matter of fact, it is found that the shippers try to get the smallest barrel that will pass, and the same would probably be the case with regard to the box. If we provide positively that the box shall be of such and such measurement and no other, a person using a box a little larger than that measurement might be punished for an infraction of the law; but if a person sees that the box is not smaller than the permissible size, he may use one a little larger if he chooses. It is thought that there should be that degree of elasticity and freedom in regard to the size of the box or barrel. I may say that the resolution of the Fruit Growers' Association asked that a minimum size of box should be made law.

Mr. A. MARTIN. The hon. minister has mentioned one fruit growers' association. There is more than one fruit growers' association in Canada, and unless a Bill of this nature is asked for by a large majority of the fruit growers' associations, I would hesitate before giving it my support. One objection I have to it at first sight is that the size of the box is not uniform. However, I would rather trust the opinion of the fruit growers' associations in different parts of the country on this point, and if the minister could give us any information as to the number of associations he has corresponded with, and as to their opinions with regard to this measure, that would go some distance in enabling us to come to a conclusion with regard to it.

Mr. BARR.

Mr. FISHER. I am informed that these dimensions are the dimensions of the standard British Columbia box, which has been adopted after full discussion by the fruit growers' of that province, that the question was discussed by the Ontario Fruit Growers' Association, who passed a resolution endorsing and adopting that box, that that was followed by a resolution of the Nova Scotia Fruit Growers' Association and the Prince Edward Island Fruit Growers' Association, and that the details were worked out by the officers of my department at the request of the fruit growers' associations who desired to get a uniform standard.

Mr. DEPUTY SPEAKER. I think the details of this measure had better be discussed in committee.

Mr. M. S. SCHELL. I may say that I heartily appreciate the provision made in this Bill for a uniform box for the export of apples; and in answer to my hon. friend from Halton (Mr. Henderson) I may say that there will not be any difficulty about getting the shippers to use boxes of practically uniform size. When apples are sold by the box in Great Britain, each box will naturally be expected to contain about the same quantity, and it will be in the interest of the shippers to use a box that will approach as nearly as possible to the size provided for in this Bill. Regarding the size that is suggested, my opinion, from experience in the handling of apples in boxes to a considerable extent, is that a better size would be a trifle shorter and a trifle wider, namely, twelve and a half inches wide by eighteen inches long rather than eleven by twenty. That would give practically the same space and contain the same quantity, and as near as possible represent a bushel. The boxes made in that way would be a little bit stronger with the same weight of lumber. In our experience of shipping in boxes, the desire is to get the lumber as light and also as strong as possible. I am not saying this so much in a spirit of criticism as for the purpose of giving my opinion after an experience in shipping many thousands of boxes, which I have done because I was unable to get sufficient barrels. We found that this size made a stronger and a better looking box and one in every respect more suitable than the size indicated in the Bill. Of course I know that the Fruit Grower's Association have suggested this size, which is largely owing to the fact of their having used this size, especially in the Niagara District. The firm which made this size of boxes sold them almost entirely in that district, and the shorter and wider box was not used there to any considerable extent, if at all. I merely throw this out as a suggestion, in case the hon. minister is not perfectly convinced that the size stated in the Bill is the right size. I think we should endeav-

our to have the best possible box because boxes are going to be used in the future much more than they were in the past. The difficulty in getting barrels and their increased cost is becoming a very important factor in the export trade of apples, and I believe that the day is coming when the boxes will be much more largely used. As yet the trade in England, especially in Liverpool, seems to prefer the barrel, but on the other hand, Glasgow and Hamburg seem to be much more ready to accept the box ; and I may say that this last season we got decidedly the best returns from the boxes we exported to Glasgow. I think it would be advisable to have the dimensions varied a trifle because then the box will be stronger. It is hardly necessary that I should enter into an explanation why it is stronger except that the shorter box does not bulge at the sides or the bottom and top so readily. I must congratulate the minister on the outworking of the Fruit Marks Act. With regard to the minimum size of the barrel and the working out of the Act touching the handling and packing of the fruit and its quality, it was a step in the right direction.

Motion agreed to, and House went into Committee on the resolution.

Mr. SPROULE. Is it the intention to make this provision regarding the boxes apply to fruit for sale in this country as well as for export ? The section reads 'Expose for sale or for export.'

Mr. FISHER. The clause as printed here in the resolution was intended to cover the same point as section 4 with regard to barrels. In section 4 the wording is a little different, and my hon. colleague the Minister of Justice says he would interpret it to mean only when packed for export, but subsection 3 is worded just the same as the resolution and what would apply to sales in Canada as well as for export.

Mr. FOSTER. The minister does not intend to do that.

Mr. FISHER. I am not quite prepared to say. The resolutions, as passed by the Fruit Grower's Association were intended to apply to the sale in Canada as well as to the sales for export.

Mr. FOSTER. That would be unjust.

Mr. FISHER. But I may say that the Act at present, so far as barrels are concerned, does not apply to sales in the country, but only for export. Under these circumstances, I think I must consider the matter asking the House to concur in that resolution.

Mr. FOSTER. I should think the minister might say at once that he would amend it so that it would not be open to that construction. Surely the minister is not going to incorporate in the law a provision which will prevent a farmer from taking apples in a box of any size or capacity up from his farm and selling them wherever he likes. What the minister means to say, I take it, is : Every person who offers for export, or who exposes for sale for export, or who packs for export, apples by the box otherwise than in accordance with the foregoing provisions.

Mr. FISHER. Yes.

Mr. A. A. WRIGHT. I would like to say a word with reference to the packing in boxes and the shape of the boxes. As a retailer of thirty-two years experience, I think I ought to know something about the selling of apples. When you sell apples by the barrel you have a great deal more difficulty than when you sell them by the box, for two reasons : Every consumer is not able to buy a barrel, but there are few who would not buy a half barrel or box. Another thing is that when a man buys a barrel of apples and puts it in his cellar, if it is warm there, the result probably is that before the barrel is half used the apples spoil with the heat, or shrink and become practically valueless. If the apples are packed in a box, you have a better package to sell and to expose for sale. As to the shape of the box, I think that the nearer you get to a cube the better. For example, everybody must have noticed—and every retail dealer knows—that formerly we bought most of our oranges from Mediterranean countries. They were packed in boxes, but the boxes were of miserable quality and not of good size. But when oranges began to come from California, we found them to reach this market in boxes of fine quality and uniform size, and nearly square so that they presented a good appearance when the cover was taken off and the fruit exposed in the window or on the shelf. The trade in oranges and lemons from Mediterranean countries has become almost extinct in this market. If any one will notice as he walks along Sparks Street or Bank Street and passes the windows of the retail grocers, he will see that nearly every one of the boxes containing oranges bears the name of Stewart, a packer in California who has made a world-wide reputation in the sale of oranges. If the box is longer than it is broad, there is a partition which divides it into two compartments each nearly cubical in form. If you take a box of prunes that comes from Oregon or California you will see that the same method is followed. The boxes are good, the packing neat and nice, and every box, when the cover is taken off and the fruit exposed in the window or on the shelf, makes a good appearance. If you can get apples packed in boxes, the nearer you can approach this size and style of box the better for the retail trade, and I believe, for the packer and the grower also. And if you fix a minimum size, I do not think there is any danger of the packer making a larger box—he is not given to that kind of

thing. I would like to have it understood that a uniform size should be established and, if that is done, the box should be nearer square than oblong.

Mr. FISHER. My hon. friend opposite (Mr. Sproule) has drawn my attention to the wording of this clause and I feel that that wording must be changed. But I would not venture, at the moment to propose the exact change to be made, therefore I think it would be better to ask the committee to rise and report progress and ask leave to sit again so that at a future sitting, I can bring in the wording properly drawn up.

Mr. HENDERSON. Before the motion is put, I would like to ask the minister when he will be likely to move the House again into committee on this resolution. Shall we have time to communicate with our constituents before that is done ?

Mr. FISHER. Yes, I will not ask for committee again for a few days.

Progress reported.

ADJOURNMENT—BUSINESS OF THE HOUSE.

Sir WILLIAM MULOCK moved the adjournment of the House.

Mr. FOSTER. Will the hon. minister (Sir William Mulock) say what business we shall take up to-morrow ?

Sir WILLIAM MULOCK. To-morrow is a private members' day.

Mr. FOSTER. But, if we get through with private members' business ?

Sir WILLIAM MULOCK. If we get through with that, we shall probably go into supply, and, in that case, take up the estimates of the Minister of Public Works. There will be no objection, I suppose, to making some progress ?

Mr. FOSTER. On the same principle as the last day ?

Motion agreed to, and the House adjourned at 9.50 p.m.

HOUSE OF COMMONS.

WEDNESDAY, February 8, 1905.

The SPEAKER took the Chair at Three o'clock.

OFFICIAL REPORT OF THE DEBATES.

Mr. H. GERVAIS (St. James, Montreal) moved that the first report of the Select Committee appointed to supervise the official report of the Debates of this House during the present session, which is as follows :

Your committee recommend that their quorum be reduced from eight to five members.

be adopted.

Mr. FOSTER. What is the number of that committee ?

Mr. GERVAIS. Fifteen.

Mr. FOSTER. And you reduce the quorum to what ?

Mr. GERVAIS. To five.

Mr. FOSTER. Why ?

Mr. GERVAIS. I understand that this has been the rule for the last three years.

Motion agreed to.

CERTIFICATES TO MASTERS AND MATES.

Mr. E. A. LANCASTER (Lincoln and Niagara) moved for leave to introduce a Bill (No. 44) respecting certificates to masters and mates of ships. He said : Perhaps I should inform the House that this Bill is intended to take the place of the Bill (No. 3) which I introduced in the earlier part of the session, which now stands for a second reading. As there are objections to one clause of that Bill, I propose this as a substitute ; it is practically the same Bill with the objectionable clause removed. When the order for the second reading of Bill (No. 3) is reached I shall allow that order to drop.

Motion agreed to, and Bill read the first time.

QUESTIONS.

STAFF OF RAILWAY COMMISSION.

Mr. FOSTER asked :

1. How many persons are now upon the staff of the Railway Commission ?
2. What are their names, and what salary and allowance does each receive ?
3. How many persons now constitute the staff of the Grand Trunk Pacific Railway Commission ?
4. What are their names, and what salary and allowance does each receive ?
5. Who selects the engineers in charge of each of the surveys of the Grand Trunk Pacific Railway in the district east of Winnipeg ?
6. Under whose direction and supervision are engineering parties made up and managed, and to whom do the engineers report ; and have any interim or other reports been received ?

Hon. H. R. EMMERSON (Minister of Railways and Canals) :

1. Twenty-one exclusive of the commissioners.

2. A. D. Cartwright, $3,000 per annum ; J. E. Duval, $2,200 per annum ; E. A. Primeau, $1,800 per annum ; James Hardwell, $3,500 per annum ; Geo. A. Mountain, $4,800 per annum ; A. G. Blair, jr., $2,500 per annum ; E. C. Lalonde, $2,200 per annum ; J. H. Tessier, $1,800 per annum ; T. L. Simmons, $1,800 per annum ; G. A. Brown, $2,000 per annum ; L. J. Lewis, $600 per annum ; B. Chevrier, $800 per annum ; L. M. Cameron, $550 per annum ; F. C. McGee, $800 per annum ; C. E. McManus, $800 per annum ; Jno. W. Thompson, $800 per annum ; H. W. Messenger, $900 per annum ; Norman Ham, $900 per annum ; T. Chandler, $700 per annum ; D. Langelier, $500 per annum ; Wm. Woodruff, $60 per month. No allowances are made except actual reasonable travelling expenses when travelling on government business.

3. Thirty exclusive of the commissioners.

4. H. D. Lumsden, $500 per month ; M. J. Butler, $375 per month ; A. W. H. Stimpson, $125 per month ; C. J. Jones, $80 per month ; Fred. Dillon, $80 per month ; A. L. Ogilvie, $150 per month ; R. L. Landry, $70 per month ; Alice Seed, $25 per month ; R. M. J. McGill, $125 per month ; Jos. Clement, $100 per month ; R. H. Lang, $60 per month ; H. A. Collins, $85 per month ; John Neighorn, $75 per month ; R. Ronan, $70 per month ; D. Lefebvre, $20 per month ; P. E. Ryan, $208.33 per month ; R. F. Uniacke, $150 per month ; Jos. H. Roy, $100 per month ; O. P. Schreiber, $60 per month ; Fred. McCourt, $70 per month ; Percy Wright, $30 per month ; F. W. White, $100 per month ; Geo. O'Reilly, $15 per week ; A. T. Gow, $150 per month ; W. R. Saults, $75 per month ; R. Lagimodiere, $60 per month ; A. Beaudry, $70 per month ; G. Heidmann, $80 per month ; P. Larocque, $70 per month ; John O'Malley, $50 per month. No allowances are made except actual reasonable travelling expenses when travelling on government business.

5. The engineers in charge of parties are appointed by the board upon the recommendation of the chief engineer.

6. The engineering parties were made up in the first place by the board, on the recommendation of the chief and district engineers, and changes in same are made upon the recommendation of the chief of parties and the district engineers and approved by the chief engineer. The engineers in charge of parties report to the district engineers, who report to the chief engineer, and he reports to the board. Interim reports are received from time to time from the parties in the field and district engineers.

INSPECTION OF FENCE WIRE.

Mr. LEFURGEY—by Mr. Lancaster—asked :

In view of the fact that much hardship and loss arises yearly to the farmers of Canada from the purchase of fraudulent and inferior wire for fencing, is it the intention of the government to institute such inspection of fence wire, whether made at home or abroad, as will safeguard the farmers from losses so arising ?

Rt. Hon. Sir WILFRID LAURIER (Prime Minister) : If the hon. member for Prince were present, I would have to observe to him that this question is out of order, as it contains a statement of fact, which is contrary to the rules. However, I have no objection to answer the question, and to inform the hon. gentleman that it is not the intention of the government to appoint such an inspector.

TRANSCONTINENTAL RAILWAY EMPLOYEES.

Mr. GERVAIS asked :

What is the total number of officers, civil engineers and other employees now engaged in the surveys of the Transcontinental Railway, and works connected therewith, under the Transcontinental Railway Construction Commission ?

2. What is the name and place of residence of each of the above persons at the time of appointment ?

3. What are the functions and salaries of each of the above ?

Hon. H. R. EMMERSON (Minister of Railways and Canals) : As the answer to this question would be a very voluminous one, I would ask my hon. friend to put it in the form of a motion. It involves a list of the axemen, roadmen and all other employees all over the service.

CORNWALL CANAL DREDGING.

Mr. PRINGLE—by Mr. Lancaster—asked :

1. To whom was the contract for dredging at the head of the Cornwall canal given ?
2. Were tenders called for ?
3. If so, in what manner ?
4. If by advertisement, in what papers ?
5. How many tendered for the work ?
6. Was the work given to the lowest tenderer?

Hon. H. R. EMMERSON (Minister of Railways and Canals) :

1. W. J. Poupore (Limited).
2. Yes.
3. By newspaper advertisement.
4. Montreal—'Herald,' 'Witness,' 'La Presse,' 'Le Canada ;'
Ottawa—'Free Press,' 'Danebrog,' 'Le Temps ;'
Cornwall—'Freeholder ;'
Morrisburg—'Herald ;'
Prescott—'Journal ;'
Kingston—'Canadian Freeman,' 'British Whig ;'
Toronto—'Globe,' 'Star,' 'News ;'
Peterboro—'Times.'
5. Five tenders were received.
6. The lowest tenderer having withdrawn, the contract was awarded to the next lowest.

MONTREAL HARBOUR SHEDS.

Mr. AMES asked :

1. Have any claims for extras been made by Messrs. P. Lyall & Sons in connection with their contract for the construction of two-story sheds in the port of Montreal ?
2. If so, what was the amount and the grounds alleged in each case ?

Rt. Hon. Sir WILFRID LAURIER (Prime Minister) : I would ask my hon. friend to move for the papers, in order that he may get the information he wants.

PENNY BANKS.

Mr. HENDERSON—by Mr. Lancaster—asked :

1. How many charters have been granted by the Governor in Council under the Penny Bank Act of 1903 ?
2. Have any of the said banks so chartered transmitted statements of their business to the Minister of Finance, under section 33 of the said Act ?
3. If any such statements have been sent, what are the names of the banks so reporting, and what is the name of the place where the chief office of each is situated ?

Rt. Hon. Sir WILFRID LAURIER (Prime Minister) :

1. One.
2. The bank so chartered has not yet received the certificate of the Treasury Board permitting the institution to carry on business under the Act, and accordingly no statements under section 33 have been received.
3. Answered by 2.

COMMUNICATION WITH PRINCE EDWARD ISLAND.

Mr. A. MARTIN asked :

1. When was the winter boat 'Stanley,' now in conjunction with the steamship 'Minto' attempting to maintain communication between Prince Edward Island, built, and how long has she been in the public service ?
2. To what extent has the 'Stanley' been weakened by time and contact with heavy ice.
3. Has she been strengthened ? If so, when, and in what respect ?
4. When was she inspected, and what was the report of the inspector ?
5. Has the government considered the necessity of building a new boat ? If so, would she be ready for service in the winter of 1905-6 ?

Hon. J. RAYMOND PREFONTAINE (Minister of Marine and Fisheries) : In this case I think it would be better for the hon. gentleman to move for a return.

THE RAILWAY COMMISSION BOARD.

Mr. BLAIN asked :

1. What was the date of the first sitting of the Railway Commission Board ?
2. What amount has been paid in salaries to each commissioner ?
3. What amount has been paid to date in connection with the Railway Commission Board other than salaries ?
4. How many private secretaries are employed by the board, and what are the names, and the salary paid to each ?

Hon. H. R. EMMERSON (Minister of Railways and Canals) :

1. The first public sitting of the Railway Commission Board was on the 9th of February, 1904.
2. Hon. A. G. Blair, $9,045.31 ; Hon. M. E. Bernier, $8,300.99 ; Mr James Mills, $8,300.99.
3. $37,965.55.
4. None.

I. C. R.—RECEIPTS AND EXPENDITURES.

Mr. FOSTER asked :

1. What are the total receipts and expenditures of the Intercolonial Railway, including all branches, for the current year up to December 31, 1904 ?
2. What amount has been expended on the Intercolonial Railway and its branches, including the purchase of railway lines, from capital account, for each year from 1896 to 1904, inclusive ? What amount since June 30th, 1904 ?

Hon. H. R. EMMERSON (Minister of Railways and Canals) :

1. Working expenses, $4,104,018.93 ; receipts, $3,621,263.91.

	Year.	Amount.
2.	1897	$ 145,142 00
	1898	252,367 20
	1899	1,081,929 94
	1900	1,796,348 29
	1901	3,633,836 57
	1902	4,621,841 05
	1903	2,254,266 68
	1904	1,880,856 60
	From June 30th, 1904 to December 31st 1904	733,221 29

GRAND TRUNK PACIFIC COMMISSION—STAFF AND SALARIES.

Mr. FOSTER asked :

1. What are the respective dates of appointments of the commissions and working staff of the Grand Trunk Pacific Railway Commission ?
2. What is the total amount expended thereon to December 31, 1904, under the heads, (a) salaries of commissioners ; (b) salaries of staff ; (c) expenses ; (d) rental of quarters ?

Hon. H. R. EMMERSON (Minister of Railways) : I shall have to ask the hon. gentleman to move for a return.

Mr. FOSTER. Will the hon. gentleman allow me to make the motion now ?

Sir WILLIAM MULOCK. Give notice.

WORN SILVER COINS.

Mr. FOWLER—by Mr. Lancaster—asked:

Is it the intention of the government to take any steps in the near future towards calling in and redeeming at the face value worn silver coins ?

Rt. Hon. Sir WILFRID LAURIER (Prime Minister) : This matter is under consideration.

EXPORT OF HAY.

Mr. LEFURGEY—by Mr. A. Martin—asked :

How many tons of hay were exported from the province of Quebec to Boston, U.S.A., for the months of October, November and December, 1904, respectively ?

Hon. WILLIAM PATERSON (Minister of Customs). The customs returns of exports as compiled show the countries to which goods are exported from Canada, but do not show the ports of destination. I am therefore unable to answer the question just as the hon. gentleman asks it, but the answer which I am able to give him now will perhaps suit his purpose. The quantity of hay exported from the province of Quebec to the United States during the months of October, November, and December respectively was as follows : October, 3,927 tons ; November, 2,508 tons ; December, 4,327 tons.

MONTREAL HARBOUR SHEDS.

Mr. H. B. AMES (St. Antoine, Montreal) moved :

For copies of all correspondence exchanged since the 1st of October last between (a) P. W. St. George, government superintendent engineer, Montreal Harbour sheds, and the Honourable Minister of Marine and Fisheries, and between (b) the Honourable Minister or the Deputy Minister of Marine and Fisheries and the Harbour Commissioners of Montreal, regarding the plans, specifications or contracts for the new sheds in the port of Montreal.

He said: My object in asking for the correspondence is that its production may tend to reassure the commercial interests of Montreal and the country generally, which are much perturbed by certain disquieting rumours to the effect that the decision of the government in favour of two-story sheds may be changed. I hope that we shall have some explanation from the hon. the Minister of Marine and Fisheries (Mr. Préfontaine), on this occasion, of a reassuring character and that the correspondence, when produced, may be of such a nature as will lead us to conclude that the government will adhere to its intention, and the contracts be completed as given out. In order that hon. members may understand that it is not without some reason I have felt compelled to move for this correspondence, let me point out the reasons which have led us to think that possibly the government may be contemplating some changes regarding the construction of steel sheds in the port of Montreal. In answer to a question of mine put on January 25 in this House, the hon. Minister of Marine and Fisheries said that, at his instance, Mr. P. W. St. George, the government engineer on the construction of sheds in the port of Montreal, had prepared independent plans, and that these had been submitted to the minister and were now under consideration. And we are able to obtain some idea as to the main feature of these plans from a statement made by Mr. Reford the other day at a meeting of the Harbour Board, when he asked that no further progress be made by that board because the government had under consideration certain other plans for one-story sheds. As reported in the Montreal 'Herald,' Mr. Reford said :

The Shipping Federation had appealed to the Minister of Marine and Fisheries, and Mr. St. George's plans for one-story sheds were being investigated.

Further, on November 15 last, the Harbour Commissioners received from the Deputy Minister of Marine and Fisheries a letter from which I shall read the following extract :

I have the honour to forward herewith, copy of a letter received from the engineer appointed by this department to inspect the contract for the new harbour sheds, accompanied by memorandum and alternate plans, representing that the sheds now contracted for are not suitable for the requirements of the port and proposing some alterations therein ; and I am instructed by the minister to request you to lay the whole question before the Harbour Commission for their discussion and opinion.

And, as a further indication that there is an element of doubt in this matter, I would refer to a report of a recent meeting of the Harbour Commissioners at which the chief engineer of the port of Montreal stated that it would be hardly possible to have the first group of sheds, given out under the contract, completed by June 1, and that the second group could not possibly be finished in the time called for in the contract, namely, July 15, showing that in the fulfilment of the contract there was evident delay. And my hon. friend from Jacques Cartier(Mr. Monk) stated to this House a few days ago, he had reason to believe that that delay was owing to uncertainty as to whether the present plans would be continued or new plans adopted of an entirely different character.

These are the indications we have that the work of construction is at present being somewhat delayed in view of the uncertainty prevailing as to whether the original plans will be carried out in their entirety. I wish to more especially address my remarks to the members of the government, speaking as a representative of the commercial interests of Montreal. As such I sincerely trust that the government have no intention of reversing their previous decision. My right hon. friend, the first minister, will remember that when there was laid before this House on June 11, 1903, the estimate upon which this House voted $3,000,000 to be advanced to the Harbour Commissioners for the construction of steel sheds, it was distinctly specified that the sheds were to be two-story; and it was on that basis and on that estimate prepared by the Harbour Commissioners that this House concurred in the Bill empowering the government to advance

$3,000,000 to the Harbour Commissioners. The subsequent Act, 3 Edward VII., c. 36, distinctly stipulates that the estimates, plans and specifications should be submitted to the Governor in Council and that before the work could be gone on with the approval of the Governor in Council was necessary. The commissioners, realizing how necessary it was that they should show good reason for the plans they might approve, actually took the entire summer in their preparation. Their engineer was occupied four months preparing these plans. He had made extensive studies, travelled through a number of cities, and finally produced his plans of two-story sheds. These were considered by the Harbour Commissioners at the end of September last, at meetings to which all parties interested were invited to be present. There were present representatives of the shipping, the Board of Trade, the Chambre de Commerce, the Corn Exchange and the Cartage companies, and in fact all those particularly interested in the Port of Montreal. The Harbour Commissioners, in a number of successive sittings, gave these interested parties a full hearing and finally decided to recommend two-story steel sheds, and this recommendation was sent to the government on or about November 1. The government also took careful steps before giving the approval required by law. The Minister of Public Works and the Minister of Marine and Fisheries went to Montreal and sat with the Harbour Commissioners and heard all the interested parties. On a subsequent occasion the Prime Minister himself, and one of his colleagues were present at a meeting of the Harbour Commissioners and again heard the representations of the parties interested. After keeping these plans nearly two months in Ottawa, after having them inspected by the engineer of the Department of Marine and Fisheries and an engineer of the Department of Public Works, these plans, on recommendation made by the Ministers of Fisheries and Public Works, were finally approved by Order in Council dated December 21, 1903, and were duly signed and transmitted to the Harbour Commissioners. In due course the Commissioners called for tenders. It was stipulated in the Order in Council that the commissioners should not give out contracts without the approval of the Governor General in Council. Consequently when they decided to give a contract to Messrs. Peter Lyall & Co., it was sent to the government and ratified by it, so that the government stands absolutely pledged to the plan of two-story sheds. It was upon this basis that the money was voted, the Order in Council issued, and the contracts let for the 15 sheds to be finished at three different dates. It is therefore, to say the least, surprising that there should now be any question whatever as to whether these plans shall be adhered to. I wish to point out to the ministry that it will be a very serious matter for the Port of Montreal and the shipping interests generally if the plans should be abandoned and replaced by plans for single-story sheds.

It must be remembered that the space available in the port of Montreal is comparatively limited. The upper harbour of Montreal, where the great bulk of the commerce is done, lies between St. Mary's current and the foot of the rapids below the bridge. It is necessary that this space should be utilized to the fullest possible extent. One of the principal objects in adopting the two-story shed plan was that they might have, as it were, the double wharf space. Another advantage of the two-story sheds is that they will be able to keep the through freight and the package freight separate. The through freight is increasing in volume every year. The railway companies demand and require practically the entire surface of the wharf for their business. And it is proposed that the package freight shall be handled on the second story, leaving the first to the railways. There will be no clashing of interests, while there will be a saving of time, and a reduction to the minimum of danger to life and property. It is necessary to point out that the whole tendency throughout the large ports of the world is in the direction of two-story and even three-story sheds. I could name a dozen or fifteen of the large ports that have been equipped with two-story sheds and some even with those of three stories. And if the port of Montreal were restricted to sheds of one-story it would certainly greatly diminish its power to handle its incoming and outgoing freight. So, I sincerely trust the government will not go back on its previous decision. I admit that the plan of two-story sheds is not absolutely acceptable to all concerned. Some companies that have small ships coming to the port of Montreal, and some cartage companies that are afraid of the incline, prefer the one-story shed. But I would point out the fact that the tendency in the port of Montreal is to have larger ships year by year coming to do the business. In 1894 the average vessel that came to Montreal was 1,500 net tons; in 1900, the average 2,000 net tons, and in 1904, 2,400 net tons. So, you will see there has been an increase within the decade of 60 per cent in the net tonnage of the freight-carrying vessels. The average tonnage of an Allan liner is 6,645 tons gross; of a Dominion liner 7,117 gross, on the line that runs from Liverpool to Glasgow and 5,000 on the Antwerp line; of the Canadian Pacific Railway liners 7,060 gross, and of the Reford liners 2,400 net or about 3,700 or 3,800 gross. I would point out that most of the objections to the two-story shed and most of the arguments in favour of the single-story shed come from those who are interested in the smaller boats. But there is ample provision for these boats in other portions of the harbour, and there is no need why they should claim to remain in that portion of the harbour

where two-story sheds should be built. And so I have moved for the return in the hope that the Minister of Marine and Fisheries (Mr. Préfontaine), speaking for the government, may take occasion to allay the anxiety that prevails amongst the commercial elements of the city of Montreal as to the possible change of front on the part of the government with reference to the two-story sheds in that port. I move for it also in the hope that, when this correspondence is brought down, we may find that this which I have cited simply means that the Minister of Marine and Fisheries (Mr. Prefontaine), with his usual courtesy, has opened a discussion with the interested parties, but with no intention whatever of changing the original decision at which the government has arrived.

Hon. RAYMOND PREFONTAINE (Minister of Marine and Fisheries). I have much pleasure in stating at once that there is no objection whatever to the production of the papers. They will be laid on the table without delay. As regards the anxiety of which the hon. member (Mr. Ames) has spoken as existing among the business people of Montreal, I must admit that there is such anxiety. But it exists not on account of the one-story sheds but on account of the two-story sheds. That is the position in which the question stands at this moment. So far as the department is concerned, we approved of the two-story shed after a good deal of consideration by the different bodies of Montreal and by the Minister of Public Works as well as by the Minister of Marine and Fisheries. But it was discovered afterwards that the effect of having two-stories would not be to give the satisfaction that the shipping conference expected from this work. The shipping conference really represents the maritime interests of the port of Montreal. They unanimously began an agitation to have the plans remodelled. Their difficulty was that there were too many columns in the first story of the sheds and that these columns were too near together. They were set at about 15 feet centres. It was thought that the lower story or at least a part of it, would be practically useless by reason of the presence of these columns. The question of modifying the plans was referred to me as minister responsible for the execution of these works, of course, under the superintendence of the Harbour Commissioners of Montreal. I referred the question to the engineer in charge appointed by the government. He had many conferences with the shipping federation, and he came to the conclusion that if the plans of two-story sheds were maintained, the difficulty caused by the too numerous columns could not be avoided, and there should be one-story sheds at least on those piers which were supposed to be used by the largest steamship companies. Mr. St. George prepared plans therefore, and showed that with the one-story shed and the absence of columns he could get more space than with the two-story sheds. So, I might say with good reason that it is not a change of front on the part of anybody, but simply a change of the inside disposition of the sheds. As I am not an engineer, and am not supposed to know these things, I referred the whole matter not only to the shipping federation but to the Harbour Commissioners. That was as far back as November or December last. The construction has gone on since that time. The question has been decided whether the sheds are to be two-story or one-story. But the Harbour Commissioners have acknowledged through their chief engineer, that these columns which were supposed to be absolutely necessary to carry the second story are not necessary at all or at least one-third of them. On consulting a competent architect they have been given this advice. This consultation was by the Harbour Commissioners themselves. They did not consult the superintending engineer of the government, but consulted Mr. Marchand, a young architect of great talent, one who has had a great deal of experience and who is now directing the construction of some of the most important buildings in Montreal. The result was that I had a communication this morning from the Harbour Commissioners themselves, asking for a change of plan as regards the columns of the first story, which would involve a cost of $35,000, thereby admitting that the plans first made out were not what they should have been. I may repeat that this is not a question of two stories or of one story ; it makes practically no difference to the marine and shipping interests of Montreal whether there is one story or two stories. But they want one of the stories at least to be useful for the heavy freight they desire to bring into Montreal.

Now, as regards the assertion made by the hon. gentleman that it was only the owners of small steamers who were opposing the two story plan, quite the contrary is the fact. They want to get the most space possible in the first story, and if it was found impossible to do away with some of the pillars, then they want the shed to be reduced to one story. Others, including all the owners of the large steamers, are really discouraged, and the correspondence will show they stated in the most formal way that if the first story were to be constructed in that way it would be perfectly useless, and they would be driven from the port of Montreal. In face of such representations I think we were perfectly right in trying to conciliate the opposing views and bring them to an understanding. I must say that the shipping conference, when they approved of the original plan, did not notice, for one reason or another, how disadvantageous would be the first story with columns of about 15 feet centre. Of course if that objection had been discovered sooner, this discussion about taking away

some of the columns would not have arisen. I am quite sure that the question will be settled satisfactorily to the business men in Montreal and to the shipping federation especially, composed of those who are particularly interested in having the sheds made in such a way as to prove most advantageous to the port of Montreal.

The papers and all the correspondence will be laid before the House. But I am quite sure this is not the last time this subject will come before the House at the present session, because other measures will be brought down which will permit a full discussion of the whole question. It is not an ordinary question. When I tell you, Mr. Speaker, that this question has been agitating the business men of Montreal for the last ten years, it is not strange that some difficulties and some misunderstandings should have arisen regarding the construction of these sheds. There will probably be some difficulty until they are finished, which will not be for three or four years. But I do not think that anything has been done by the Harbour Commissioners or their officers, or by the government, in any way to jeopardize the usefulness and advantages to be derived from the construction of these sheds.

Motion agreed to.

CUSTOMS RULINGS RE DUMPING CLAUSES.

Mr. KEMP moved :

For copies of all circulars or instructions, regulations and rulings made by the Customs Department, together with any Orders in Council, relating to section 19 and subsections thereto of the Act to amend the Customs Tariff, 1897, assented to August 10th, 1904, commonly known as the ' dumping clause.'

Hon. WILLIAM PATERSON (Minister of Customs). I suppose the hon. gentleman does not mean all the rulings, but only the general rulings under which the decisions are given.

Motion agreed to.

INTERCOLONIAL RAILWAY—TRAIN SERVICE, N.S.

Mr. R. L. BORDEN (Carleton, Ont.). Before the Orders of the Day are called, I would like to bring to the attention of the Minister of Railways and Canals (Mr. Emmerson), if he were here, a telegram which I received a few moments ago from a gentleman whom I well know :

Springhill Junction, N.S., Feb. 8, 1905.

Three trains stalled here for over 12 hours many passengers without food, please bring matter up in parliament.

I have discharged the gentleman's request by bringing the matter to the attention of the government. I had a somewhat similar experience myself, but I did not suppose it could be controlled, because the storm was very severe at the time. I trust the Prime Minister (Sir Wilfrid Laurier) will bring the matter to the attention of the Minister of Railways and Canals. will send him over the telegram.

Hon. H. R. EMMERSON (Minister of Railways and Canals). Mr. Speaker, the hon. leader of the opposition (Mr. R. L. Borden) has read a telegram in reference to the stalling of trains at Springhill. I may say that about one o'clock I received a telegram from a gentleman signing himself R. A. Mcntyre, stating in effect what is contained in the telegram sent to my hon. friend. He states here that several trains were stalled and he wishes provision made for feeding the passengers. I communicated at once with Mr. Pottinger, who is in the city, and in reply to the message he says :

I have telegraphed down for an explanation. It was probably due to a severe storm that we had on both Prince Edward Island and the mainland, as you will see by two telegrams inclosed. Will let you have further particulars as soon as I can get them.

One of the telegrams to Mr. Pottinger is as follows :

Snow storm with high wind set in at Halifax last night. No. 70 stuck at Rockingham ; D. A. R. special hauled out, arrived Richmond five twenty. Special with cattle and meats for mail steamer stuck at Rockingham, reached Halifax seven forty. Steamer waited. Halifax yard badly blocked. Nothing could be done after two o'clock. Took three engines to take cattle to Deepwater.

The superintendent of the Prince Edward Island Railway telegraphed Mr. Pottinger to this effect that :

The storm of last night is still raging ; is extremely severe. All trains tied up till storm abates. We anticipate much trouble to clear the track.

The difficulty seems to have come upon them suddenly. Mr. Pottinger has wired to Springhill Junction in respect to looking after the passengers. My attention only having been called to it at one o'clock I could do nothing in the matter, but I have taken these steps since that time.

MONTREAL HARBOUR COMMISSION.

Mr. R. L. BORDEN (Carleton, Ont.). I would like to direct the attention of the Prime Minister (Sir Wilfrid Laurier) to question number 5 on the order paper :

1. Have any claims for extras been made by Messrs. P. Lyall & Sons in connection with their contract for the construction of two-story sheds in the port of Montreal ?

2. If so, what was the amount and the grounds alleged in each case ?

3. Were the said claims admitted and approved by the Harbour Commissioners and by the Chief Engineer ?

4. Were the said claims recommended for payment by the government superintendent engineer for the Montreal Harbour sheds ?

5. Were the said claims in dispute submitted to the Minister of Marine and Fisheries ? If so, what amount did he award to the contractor in each case ?

The right hon. gentleman asked my hon. friend who moved it (Mr. Ames) to make a motion for a return. If the Prime Minister will examine the question, he will see that nearly every one of the inquiries can be answered by yes or no, except the one involving the grounds alleged in each case.

Right Hon. Sir WILFRID LAURIER (Prime Minister). The hon. gentleman will see that everything depends upon the inquiry number 2 concerning the amount and the grounds alleged. Therefore the report of the engineer and the correspondence will be necessary. There are different grounds, and there is a report upon each.

MOTIONS AGREED TO WITHOUT DISCUSSION.

Copies of all forms and instructions issued to the returning officers in the several provinces and territories for use in the recent geneneral election for the House of Commons.—Mr. Barker.

Copy of the voters' lists for the constituency of Macdonald, supplied to the Clerk of the Crown in Chancery prior to the general elections of 1904. Also for copies of the voters' lists supplied by the Clerk of the Crown in Chancery to the returning officer for Macdonald constituency for the same elections. And for copies of voters' lists supplied to the various deputy returning officers by the returning officer in the constituency of Macdonald.—Mr. Staples.

RESIGNATION OF MR. BLAIR.

Mr. FOSTER. The right hon. Prime Minister or the hon. Minister of Justice promised, the other day, to lay on the table the telegram and letter of resignation of Mr. Blair, as chairman of the commission.

Sir WILFRID LAURIER. The resignation of Mr. Blair ?

Mr. FOSTER. The telegram and letter of resignation of the chairman of the commission.

Sir WILFRID LAURIER. The hon. member for Jacques Cartier (Mr. Monk) has moved for an order for it and the whole correspondence will be brought down. I expect to have it to-morrow.

COMMUNICATION BETWEEN PRINCE EDWARD ISLAND AND MAINLAND.

Mr. ALEX. MARTIN (Queen's, P. E. I.) Mr. Speaker, before the Orders of the Day are called I wish to call the right hon. Prime Minister's attention to a question which I referred to the other day ; that is in regard to the present communication between Prince Edward Island and the mainland. The steamers have stopped. The communication is now had between the Capes and by sailing boats. When the boats reached Cape Tormentine there is not such a thing as a special train to carry the mails and passengers to Sackville. This has been a grievance in the province for years. The boats are necessarily irregular at the Capes because the crossing at the Capes depends on the state of the wind and of the ice. When they reach Cape Tormentine the regular train generally has left, and the passengers and mails have to be detained there for twenty-four hours in some cases, merely because the government has not thought proper to put a special train on between Cape Tormentine and Sackville. The expenditure in that direction would not be very large. It is only during a short period that it would be necessary, but the inconvenience and loss sustained by the people of Prince Edward Island every year is a very serious matter. While I tell the right hon. Prime Minister and the hon. Postmaster General that in the reading room we find the last papers there a week behind time they will understand how inconvenient the situation is. I have a telegram to-day to ask to bring this question to the attention of the Postmaster General every day until we get a remedy. I hope this duty will not be imposed on me for any length of time.

INTERCOLONIAL RAILWAY—STATION AGENT AT FREDERICTON.

Mr. O. S. CROCKET (York, N.B.). Mr. Speaker, before the Orders of the Day are taken up I would like to ask the hon. Minister of Railways and Canals (Mr. Emmerson) when we might expect the correspondence to be brought down in regard to the dismissal of Odbur White from the position of station master on the Intercolonial Railway at Fredericton. I moved for this correspondence on Thursday, January 26. At that time I understood the hon. minister to state that there was only one letter received from Mr. White and the minister's reply, and I would like to know from the hon. minister when we might expect these papers.

Hon. H. R. EMMERSON. I trust that the impatience of my hon. friend (Mr. Crocket) will be satisfied very soon. For some reason or other the papers only came under my notice yesterday, and this morning I gave instructions to have them copied at once so that we may expect an immediate return. I am also searching to see whether there are any other letters or any references to the matter in any letters which have from time to time been received from the officers of the Intercolonial Railway in connection with railway matters generally.

RUMOURED APPOINTMENT OF HON. S. N. PARENT TO TRANSCONTINENTAL RAILWAY COMMISSION.

Mr. J. G. H. BERGERON (Beauharnois). Mr. Speaker, before the Orders of the Day are called I would like to ask a question of my right hon. friend the Prime Minister (Sir Wilfrid Laurier). I would not like to increase his troubles particularly since that painful amputation in Ontario of his right arm, but another one of his limbs is very much attacked just now in the province of Quebec, and there are many rumours floating around, one of them to the effect that one of the ministers of the Crown has gone to Quebec to try and patch up the trouble. In support of that rumour this statement has appeared in some of the papers and it has been said since then on high authority that:

The Hon. S. N. Parent, Premier of Quebec, will shortly accept a seat on the National Transcontinental Railway Construction Commission. At present he represents the government on the Grand Trunk Pacific directorate.

There was an idea prevailing in the city of Montreal this morning from the reports I have received, that a solemn promise was made by the present government, if not personally by the right hon. Prime Minister himself, that if Mr. Parent tries to fix up his government for the session he will be appointed to the construction commission when the session is over, and that the premier will then be succeeded by Mr. Gouin. I do not know if my question can be answered now, but if it could it would do a great deal to alleviate the trouble that seems to exist in the minds of certain people around the city of Montreal.

Rt. Hon. Sir WILFRID LAURIER (Prime Minister). It would be uncharitable of me were I not to alleviate the heroic statements that oppress my hon. friend at this moment. His arm seems to be sound and all right.

Mr. BERGERON. I have lost nothing yet.

Sir WILFRID LAURIER. The trouble seems to be elsewhere. I have no objection to say to my hon. friend that there has been no promise made by the government in any way whatever.

ICE JAM IN THE ST. LAWRENCE.

Mr. ANDREW BRODER (Dundas). Before the Orders of the Day are called I wish to again refer to a matter which I took the liberty of referring to on Monday, January 30, and to again call the attention of the government to the ice jam in the St. Lawrence near Woodland in the county of Stormont. The jam extends from that town westward for about seven miles, completely fills up the open current and the water has risen to such an extent that it has driven people from their habitations and that they have been obliged to remove their cattle from their stables although the banks are high. The water at Morrisburg which is 12 miles from the commencement of the ice bridge is within 16 or 18 inches of running over the lock gates, up current. I call the attention of the government to this condition of things hoping that they will see fit to send some expert there to see whether it will be possible to alleviate the difficulty. The officials who are there, no matter what their ability might be, have no appliances to deal with the situation, and it seems to me that the matter is so serious and threatens such danger to a considerable number of people living adjacent to the river, that some cognizance should be taken of the condition of affairs; the winter is so cold and the ice bridge has formed so early in the winter that it is a very serious matter, because if this weather continues much longer it will prove disastrous. During the past 18 years there have been four ice bridges formed in the river. The ice bridge 18 years ago did a good deal of damage, but the difference between the previous ice bridge and the present is that the previous bridges formed later in the year, and the spring coming shortly afterwards broke them up. But this bridge has formed six weeks earlier than in previous years and it is certainly a very serious condition of things. The people are very much alarmed at the conditions and are looking to the government for some cognizance to be taken of the conditions. I hope the Minister of Railways and Canals will send an expert to see if something cannot be done. I know that it is a difficult matter to deal with and I understand from those who have had some experience that it is not possible to dynamite the ice owing to the formation of what is called anchor ice, the ice and the snow particularly going under the surface forms a bottom that is not solid enough to permit the use of dynamite. But I think the government should take some action.

Hon. H. R. EMMERSON (Minister of Railways and Canals). The difficulty referred to by my hon. friend (Mr. Broder) has certainly been receiving the attention of the officers of the Department of Railways and Canals. The chief engineer, at the very outset, took steps to remedy as far as possible any difficulty that might arise. He has, however, brought to my attention a question as to whether the difficulty is not due very largely to those who have developed water-powers along the canal. There is a suspicion among the officials of the department that possibly if the power developers were to take proper steps—and of course it would put them to some expense—the difficulty might very largely be obviated. How far this may be true I know not, but it is thought that possibly a good deal of the difficulty arises from that cause. Whatever the difficulties may be, they are receiving the attention of the chief engineer, and

the department is attempting to do whatever lies within their scope. Injuries to the canal and to adjacent properties are being guarded against as far as possible.

Mr. BRODER. I think the difficulty is not caused by any people having to do with the water-powers. From what I learn from local people the ice forms in the bay, and then, when a wind storm blows from the east for any length of time, it lowers the water in the bay by a foot or two and the ice breaks loose from the bay, swings around, catches on the opposite side and the bridge is formed in that way. I was told by a gentleman in the locality that he was told by a man in the employ of the American company developing power at Messina, on the opposite shore, that they cut the ice loose and floated it out to avoid trouble. I am telling this only on the authority of a reliable man who had it from a man who said that he was engaged in the work. If this statement is true it is a matter that no one but the government can deal with. Those who know the situation say that if piers were built in the bay to hold the ice and prevent it from floating out, the dangers would be altogether avoided. It seems to me that the engineers of the department could easily look into that matter although it is a question that would be of an international character, because the bay is on American soil.

Mr. SAM. HUGHES (North Victoria). I had the honour last session, and I think a previous session also, of drawing the attention of the first minister to the fact that owing to the cutting of the Hay Lake channel approaching Sault Ste. Marie, the water in the natural international channel has been lowered two feet and the water on the sills of the canal had been lowered to the same degree. The government last session, promised to take action in the matter. Has anything been done ?

Sir WILFRID LAURIER. We have appointed an international commission composed of American and Canadian engineers to investigate the matter.

Mr. SAM. HUGHES. The Chicago Drainage canal too ?

Sir WILFRID LAURIER. Everything connected with international waters. It is a question very much larger than my hon. friend's question implies.

LABOUR UNION LABELS.

House in Committee on Bill (No. 10) respecting Labour Union Labels—Mr. Ralph Smith.

On section 1.

Mr. HAGGART. The expression 'Labour Union' means every association of labourmen and women ? Does this labour union require to be registered, incorporated or anything of that kind ?

Mr. RALPH SMITH. No. There is no provision at all for the incorporation of trades unions in this country. They can register under the Trades Unions Act, as they can in England.

Mr. R. L. BORDEN. I had not the advantage of being present when this Bill received its second reading ; but I think it would be desirable to have some intimation from the Prime Minister as to the view the government takes of the Bill. It is one involving rather important provisions, and I would like to bring to his attention what, of course, is already familiar to him, that on all important matters of legislation, it is not only the duty of the government to have a policy, but in modern constitutional practice it is the duty of the government to originate such legislation and place it before the House. In 'Anson on the Law and Custom of the Constitution,' second edition, at page 139, it is laid down that 'every important measure of legislation is now brought forward upon the responsibility of the cabinet.' In 'Todd's Parliamentary Government in England,' second volume, at page 367, the practice is also laid down as follows:—

> By modern constitutional practice, ministers of the Crown are held responsible for recommending to parliament whatsoever laws are required to advance the national welfare, or to promote the political or social interest of any class or interest in the commonwealth.

Further on it is said :

> But it has only been by degrees, and principally since the passing of the Reform Acts of 1832, that it has come to be an established principle, that all important Acts of legislation should be originated, and their passage through parliament facilitated, by the advisers of the Crown.

Again, on the same page :

> But the growing interest which, of late years, has been exhibited by the constituent bodies upon all public questions, and the consequent necessity for systematic and enlightened legislation for the improvement of our political and social institutions, and for the amelioration of the laws, in accordance with the wants of an advancing civilization, together with the difficulty experienced by private members in carrying bills through parliament, have led to the imposition of additional burthens upon the ministers of the Crown, by requiring them to prepare and submit to parliament whatever measures of this description may be needed for the public good ; and also to take the lead in advising parliament to amend or reject all crude, imperfect, or otherwise objectionable measures which may at any time be introduced by private members.

Further on :

> Bearing this in mind, it must be admitted that the rule that all great and important public measures should emanate from the executive has of late years obtained increasing acceptance.

I make these references, which are no doubt quite familiar to the right hon. gentle-

man, not so much for the purpose of emphasizing the point which I might make, that a measure of this great importance ought to be introduced, if at all, and put through parliament by the government, but more especially for the purpose of pressing the somewhat subordinate point, that when a measure of this kind is introduced by a private member—a measure which has already on at least one occasion, if not two, passed the House of Commons and been defeated in the upper chamber—we should at least have some declaration of the policy of the government in order that we may have the benefit of the experience and wisdom of the gentlemen who sit on the treasury benches in regard to a measure of so much very great importance.

Sir WILFRID LAURIER. I have no exception to take to the principle which has been enunciated by my hon. friend, that all important measures in this age should be introduced and carried on the initiative of the government, the government taking the responsibility of them. But there are measures which may be of importance to some persons, but which the government do not feel called upon to take charge of, because they do not, as a government, share the views held by the supporters of those measures. As to this measure, while the government recognizes its importance, it is not one of those on which they feel called upon to take the initiative or to introduce as a ministerial measure. As to the second principle laid down by my hon. friend, that when a measure of this importance is introduced the government should state what their policy is upon it, I have to observe that measures are often introduced into this House on which the government, as a government, does not feel called upon to exercise any action of their own. There may be measures, as often happens, on which members of the government have independent opinions ; some may favour the measure and others may not. Of course, if the measure is of such importance that public opinion absolutely requires the government to take action upon it, the government must take the responsibility of accepting or refusing to accept the measure. As to this particular measure, the course of the government is perfectly clear, because it does not come before the House for the first time. If my recollection is right, it comes for the third time, certainly for the second, and it has been passed by this House before under exactly similar circumstances to those under which it now comes before it ; that is to say, introduced by a private member. On this measure the government do not feel called upon to take action, but they leave it to each individual member to deal with according to his own judgment.

Mr. SPROULE. That seems a very extraordinary course for a government to take, because the government must be responsible for every measure that passes this House. They are there for that purpose. The very fact that a measure is allowed to pass the House is an evidence that the government are in favour of the principle of the measure. That is the only interpretation that could be reasonably put upon the government's action. If the government are not in favour of the principle of the measure, they may allow it to pass if they have not the moral courage to say so, and then have it killed in the Senate. If the government are in favour of the principle of this measure under these circumstances, the government are responsible for the measure, because they certainly could bring the upper and lower Houses into accord, or else they ought to abandon it. So that the government must be equally responsible for the measure, whether it goes through or is killed.

Sir WILFRID LAURIER. If the government must be held responsible for the measure, I suppose it must ; I cannot help that. My hon. friend says we are responsible. I have no objection to my hon. friend saying so ; that is his right ; but even if it be the right of my hon. friend to think that we are derelict in our duty in not accepting or rejecting this measure, that is a point on which I must take issue with him. But I have to say to my hon. friend, whether he thinks we are wanting in moral courage or not, that we are disposed not to affirm this measure or to oppose it, but to say to those who support us generally that on this question we have no advice to offer them. If my hon. friend says that in taking that position we are wanting in moral courage, we cannot help that ; but he has to show his moral courage by saying whether he will support or oppose this measure.

Mr. SPROULE. I am quite sure that if the responsibility rested here, the leader of the opposition and his followers would be prepared to do so.

Sir WILFRID LAURIER. They have the opportunity now. The opposition have opposed more than one measure brought in by the government.

Mr. HENDERSON. I must confess that I am more surprised than I ever was——

Sir WILFRID LAURIER. I do not think so.

Mr. HENDERSON—at anything, by what I have heard from the right hon. First Minister. We have now arrived at the stage where a government with a large following behind them are afraid to say that they have a mind of their own. They dare not express their opinion ; they dare not tell their followers what is right and what is wrong ; they leave the question to be decided by them. I think it is a well recognized principle of legislation that the government should have a policy, not only on every Bill that

comes before this House, but on every resolution, and they should be prepared to stand up and declare what that policy is, for the guidance of the members of this House. How is the House to know what the government desire? The government is the body that is responsible for the legislation of the country. Surely the first minister is not going to allow this Bill to pass without indicating in some way whether he thinks this legislation should or should not pass. To my mind it would be a most extraordinary condition—an entirely new condition of things in this House. We do look for something with more backbone in it than a simple declaration from the government that, although they are responsible they do not propose to state what their opinion is.

Sir WILFRID LAURIER. I am very sorry, Mr. Speaker, that I have fallen so low in my friend's estimation. I am not surprised, however; and, even at the risk of losing still more of such good opinion of the government as he may have—it is not very much I admit—I have to say to my hon. friend that, on this occasion I will not give him any advice. In the first place, I am sure, that, if we were to give him advice he would not follow it. And in the second place, I understand him too well; I am too old a bird to be caught by such chaff as that. I can only tell him that the government will do on this occasion as it did before and leave the matter to the members of the House, to be dealt with as they please.

Mr. W. F. MACLEAN. But the Prime Minister (Sir Wilfrid Laurier) forgets that he created, at large expense to the country, a Labour Department; and alongside of him sits the Minister of Labour (Sir William Mulock), here is a question of great importance to the working classes of this country and to the labour unions. They come here to-day with a proposition which they think is in their interest; and we are only within our rights in asking the Minister of Labour to state the policy of the government in regard to this Bill. If they believe in responsible government which they have always put forward in theory, but avoided in practice, the Minister of Labour is bound to state the policy of the government in regard to this question which is of such great importance to so large a portion of the community.

Sir WILLIAM MULOCK. I suppose my hon. friend from South York (Mr. W. F. Maclean) in a mild way is endorsing the doctrine enunciated by the leader of the opposition (Mr. R. L. Borden) when he suggested that measures of importance should originate with the government. If we were to follow the view of the leader of the opposition, what would become of the functions of such hon. members as my hon. friend from South York? There is one of his measures on the paper to-day—there is one every day. And if we proposed to assist the judgment of the House and to determine the question by the will of the majority no one would be louder in denunciation of our course than would the hon. gentleman himself. We propose to leave the House greater liberty. We want to have the benefit of the unbiased opinion of every hon. member in the House on measures of this character. As the Prime Minister (Sir Wilfrid Laurier) has said this is not a measure on which public opinion is divided. None of the members of this House, I presume, have mandates from their constituents as to how they shall vote upon questions of this kind. From time to time questions arise after the election of a new parliament upon which no previous public opinion has been expressed, and it has ever been the practice of parliament to allow freedom of action to individual members on questions of this kind. This is the first time since I entered parliament when any government has been asked not to allow liberty to members in reference to a measure of this kind. And, in deference to the liberty of the hon. member for South York, I must stand in defence of the old practise.

Mr. R. L. BORDEN. The rule laid down by Todd in another portion of the work which I have just quoted covers the point just adverted to by the Postmaster General:

> By modern practice, no sooner does a great question become practical or a small question great, than the House demands that it shall be 'taken up' by the government. Nor is this from laziness or indifference. It is felt, with a wise instinct, that only thus can such questions in general acquire the momentum necessary to propel them to their goal, with the unity of purpose which alone can uphold their efficiency and preserve their contistency of character.

In England, where this doctrine is carried out, private members are not debarred from introducing measures of great importance. If a measure of great importance is introduced by a private member and attracts the attention of parliament and the country, it is the practice there for the government, if they approve the policy embodied in the legislation, to take it up as a government measure and in that way procure its enactment. And my hon. friend from South Lanark (Hon. Mr. Haggart) suggests that that is especially the case where the measure referred to has already received the sanction of the House of Commons, as this measure has, I believe, on two occasions.

Sir WILLIAM MULOCK. Some person must determine the importance of the measure. Who shall determine it? It cannot be the opposition that shall determine whether or not the government shall regard the measure as of sufficient importance to declare its policy upon it. The government must determine that question. My hon. friend (Mr. R. L. Borden) quotes the hon.

member for South Lanark (Mr. Haggart) as saying that because this measure has twice received the practically unanimous approval of this House, we should therefore make it a party question here. If there were force in that observation there would be no necessity for the government to guide the opinion of the House, for the House has already twice expressed its opinion. The House appears to have an opinion ; it is not drifting ; it is not at the mercy of every wind. Its opinion has been crystallized in a Bill passed by the House on two occasions.

Mr. W. F. MACLEAN. The hon. gentleman (Sir William Mulock) forgets that, this measure having been blocked by the Senate, another constitutional question arises. An irresponsible portion of this parliament sees fit, against the declared policy of the hon. gentlemen opposite to block popular legislation. Gentlemen opposite are on record as being against any such interference with legislation ; in fact they are the gentlemen who made reform of the Senate one of the planks of their platform. They say this measure has twice been passed in this House with practically unanimous approval. That means that it had the approval of these hon. gentlemen themselves. Therefore, it is incumbent upon them, I take it, to find out why this legislation, which has received the endorsement of this House does not go through the other branch of the legislature. As to what the Minister of Labour (Sir William Mulock) has said in regard to my position—that, if the government were forced to take up the questions that I have taken up in the House, I would not get a hearing—I would say that private members have to bring these proposals forward because the government refuses to do it. The only way to bring these ideas before the public and make them grow in the public mind is for private members to bring them forward. So, his argument is not apposite to the question before the House. Again I say, it is the duty of the Minister of Labour to tell the labour organizations of this country—a very large and respected element in the community—what is the opinion of the government in regard to this question and why, when the House of Commons favour such a proposition we cannot secure the endorsation of the other branch of parliament.

Sir WILLIAM MULOCK. My hon. friend (Mr. W. F. Maclean) can readily obtain the opinion of any member of this House on this proposition ; he can exercise his right to challenge a vote upon it. We do not propose to deprive him of his rights and take away his occupation by adopting the suggestion of the hon. leader of the opposition.

On section 2,

2. Every labour union which before the passing of this Act, has adopted or used, or which hereafter adopts or uses a label to designate, make known or distinguish any goods, wares, merchandise or other product of labour as having been made, manufactured, produced, prepared, packed, handled or put on sale by such labour union, or by a member or members thereof, may register such label in the Department of Agriculture, by leaving two copies, counterparts or facsimiles thereof with the minister, or his deputy, along with one application for the registration of the label, and by filing therewith a declaration made by the president, secretary or other officer of such labour union, specifying the name of the labour union on behalf of which label is being registered, the class of merchandise and a description of the goods to which it has been or is intended to be appropriated, and stating that, to the best of his knowledge, information and belief, the labour union on behalf of which the application for registration is being made has the right to the use of the same, that no other person, firm, labour union, association or corporation has the right to such use, either in the identical form or in any such near resemblance thereto as may be calculated to deceive, and that the facsimiles or counterparts are true and correct ; and, thereafter such labour union shall have the exclusive right to use such label for the purpose aforesaid.

Mr. HAGGART. You are giving an entity to some labour union and to the chairman or somebody else connected with it, who have no existence in law. I understood the hon. gentleman, when he introduced the Bill, to make the statement that the secretary or president of a labour union in Great Britain, although it is not registered at all, has the rights he is asking for here.

Mr. RALPH SMITH. That is what I understand.

Mr. HAGGART. Has the Minister of Justice looked into the question ? You are here giving a legal entity to a party who cannot be sued and against whom you can have no claims for damages.

Sir WILLIAM MULOCK. Yes you can.

Mr. HAGGART. I thought that the finding of the courts in the old country declaring that these unions could be sued and made liable was considered an extraordinary thing and struck terror into the labour unions. But in England they are registered and here there is no registration.

Mr. RALPH SMITH. It has been clearly proven in the old country that the unions, whether registered or not, are liable in law. In the Taff Vale case, a decision was given against a union which had no incorporation and was not registered at all, and three weeks ago, a judgment was given in British Columbia against the Rossland Miners' Union, a non-incorporated body, and the whole of its assets were taken under that judgment. We have any number of instances, especially in the old country, of individual members of unions being liable for any breach of law.

Mr. OSLER. What were the assets of the Rossland Mining Company ?

Mr. RALPH SMITH. They had a large amount in the bank and a very valuable hall.

Mr. OSLER. I understand that it was an American Association, and that the funds were sent at once across the line, and the judgment was of no value whatever.

Mr. RALPH SMITH. The union was simply affiliated with an American union, but its funds and property were appropriated as a result of that judgment.

Mr. HAGGART. Read clause ten :

Nothing in this Act contained shall enable any suit, action, garnishee, interpleader or other proceedings to be brought, had or maintained against the labour union, except for the purposes of this Act.

Thus in case this Act might give them an entity, they are made exempt by clause 10. What has the Minister of Justice to say to that ?

Mr. FITZPATRICK. When that clause is reached, we will consider it.

Mr. HAGGART. We are dealing with it now in connection with the clause before us.

Mr. OSLER. The hon. member for Nanaimo stated the other day, without any reservation, that a similar law has been in operation in England, during twelve years.

Mr. RALPH SMITH. They can register in England under the Copyright Act. That is the only difference.

Mr. OSLER. I would like to have the opinion of the Minister of Justice as to whether that is an essential difference or not.

Mr. FITZPATRICK. I must confess that I have looked only somewhat hastily over the Bill, and should be glad indeed if the promoter would point to me any similar legislation in any country. There is no such legislation that I know of anywhere, and there are some provisions which it will be my duty to oppose when we reach them.

Mr. OSLER. I have been trying to find out in the library the Acts referred to as being in operation in England or in the United States, and have not been able to find any. He told us that exactly similar legislation has been passed in no less than 31 states of the Union. If this statement be accurate, it would facilitate the passage of this Bill for us to have copies of these Acts. I have not been able to find any nor have I been able to find any one who can tell me where to get them.

Mr. RALPH SMITH. I reiterate the statement I made, that there are provisions in the English Copyright Act for the Registration of Labour Unions, and that this Bill has been copied from a similar measure which is in operation in 31 states of the Union. The lawyer responsible for the Trades Congress of Canada copied this Bill from a similar one in operation in these 31 states, and I should think it would be an easy matter to find them.

Mr. OSLER. Could the hon. gentleman give the year they were passed ?

Mr. RALPH SMITH. No, I took my statement from the lawyer who drafted the Bill.

Mr. OSLER. I am not asking this because I oppose the Bill, but because I have very great difficulty in forming an opinion. The leading manufacturers are so strongly against it, that one can hardly believe that they would take the position they do unless they had some very good grounds. On the other hand, the trades unions are just as strong in its favour. I would be very much relieved if I could find that a similar Bill has been in operation in Great Britain for 12 years and is now in operation in 31 states in the Union and that there is no great outcry against it.

Mr. R. L. BORDEN. It is under a general provision of the English Copyright Act that similar rights are conferred upon labour unions.

Mr. RALPH SMITH. Yes, a provision in the English Copyright Act.

Mr. R. L. BORDEN. Has the hon. gentleman at hand the particular provision in that Act?

Mr. RALPH SMITH. No. As I have already said, I introduced this Bill entirely relying on the statements made and the information given by the lawyer who had it in hand. But it would be an easy matter to find that out. I think it was in 1892 that the unions of England asked the British parliament to make the registration of labels possible, and an amendment for that purpose was made to the Copyright Act.

Mr. INGRAM. I understand the object of this legislation is to guarantee that the goods are union made goods, are of good material, and of good workmanship.

Mr. RALPH SMITH. That is the object.

Mr. INGRAM. A document has been put into my hands—and I suppose other hon. gentlemen have received it, relating to this matter. As the House is aware, it is a common thing when legislation of any kind is introduced that may be objectionable in some quarter, and that occurs almost every session, for the interested parties who oppose the legislation to furnish the members with information to be used against such legislation. Now this document has been sent to me, signed by the officers of the Canadian Manufacturers' Association, incorporated. They represent in this document

that certain advertisements have appeared in the Toronto 'World' March 24, 26 and 30 last. In looking over those advertisements I noticed that the men are asking for a label to be put on goods that are of good workmanship, and good material, in respect to which union wages are being paid. Now, I have looked over the Toronto 'World' of those three dates, and I do not find any such advertisement in it. I want therefore to say that if the Manufacturers' Association has placed this document in the hands of members for the purpose of influencing them against this so-called objectionable legislation, and has done it under a false statement, then I say this House should censure the Manufacturers' Association. On other occasions I have read documents furnished to members of this House which were not correct statements of facts in regard to legislation. I think hon. gentlemen on both sides should frown down conduct of that kind. So far as this Bill is concerned, I know it has passed the House on previous occasions; and while I am willing to support any reasonable legislation on behalf of organized labour, at the same time I believe that labour unions should be just as responsible for their conduct as are manufacturing institutions whose goods they propose to put the union label on.

An hon. member has this moment drawn my attention to the fact that in the Toronto 'World' on April 2, there does appear in fact an advertisement such as mentioned by the Manufacturers' Association. Therefore, I withdraw my first statement, and acknowledge that they were justified in issuing this document.

I was saying that if the labour unions throughout the country want this kind of legislation they should be registered, they should be incorporated, so that they may become responsible for any agreement or arrangement they may make with the manufacturers. Unless they are prepared to assume their fair share of responsibility, they ought not to ask for unreasonable legislation. If they are willing to do that, then I see no reason why they should not be granted legislation giving them the right on certain terms to use the union label, which would be a guarantee to the consumers that whatever articles bore that label were of good workmanship and material, and of first class quality.

On section 4,—cancellation of label—transfer of right to label.

Mr. OSLER. This gives the right to a labour union to have their label cancelled at almost any time. It seems to me this will produce complications when a union becomes merged with another.

Mr. RALPH SMITH. The intention of the section is to provide that any union that has been using a label may become affiliated with another union of the same craft. But I would like to remind the hon. member for Toronto (Mr. Osler) that this label will not be used, as the hon. gentleman will see by another section of the Bill, without the consent of the manufacturers. In the discussion of this Bill we are acting on the assumption that the label can be used against the wish of the manufacturer when we are making it impossible to compel the use of the label against the wish of the manufacturer. The Bill does not oblige the manufacturer to use it, so that whatever changes occur in the operation of the label the union must have the consent of the manufacturer. Without that consent he can simply refuse to put the label on the article.

On section 5,

The exclusive right acquired for a label, when registered, shall be valid for the term of twenty-five years, but may be renewed before the expiration of the said term, by the labour union which has registered the same or by its transferee, for another term of twenty-five years, and so on from time to time; but every such renewal shall be registered before the expiration of the current term of twenty-five years.

Mr. SAM. HUGHES. I notice that the hon. gentleman who is supposed to look after the interests of justice in this House and to see that legislation is properly controlled is absent.

Mr. HYMAN. My hon. friend the Ministre of Justice went to the library for the purpose of looking up the Acts to which reference has been made.

Mr. SAM. HUGHES. Then the Bill had better stand. The Bill should not be passed in his absence.

Mr. OSLER. Would it not be well to postpone the discussion of this Bill? If we have evidence that this Bill is in operation in Great Britain, and in thirty-one states, and if we can compare the clauses that will facilitate the passage of the Bill enormously, and I think it will be a satisfaction to a great many hon. members of this House if we can have that information before we discuss the Bill.

Mr. RALPH SMITH. If there were no such law in England or in the United States, I would like the committee to supoprt this principle apart from whether or not there are any precedents in existence. If the thing is right why should we not pass it? If it is reasonable why should we not pass it? What does the Bill ask for? Certain manufacturers who are using the label of the labour union are asking this House to register the label so that they may be protected in the use of it from manufacturers as well as labour unions. If the manufacturer sees fit to work with the labour union and he places the union label on his manufactured articles, what objection can there be to that? If this Bill made any

compulsory provision for the use of this label I could understand the objection, but there is no such compulsion. It cannot be operated unless the manufacturer agrees and the moment he disagrees with anything that is done by the union he can discontinue the use of the label. The manufacturer who is working with the members of the union is asking for this. If the hon. member for West Toronto (Mr. Osler) had been present when I explained the provisions of the Bill, he would have known that eighty or ninety of the manufacturers of this country have asked for the recognition of the Union Label.

Mr. OSLER. The hon. gentleman who has just taken his seat, when he introduced this Bill, made this statement:

> In asking for this legislation, we are not asking for anything new. Only after very serious consideration would I bring before this House any proposition for which no precedent could be given. This legislation was passed in England twelve years ago. In that country, the unions connected with any manufacturing interest can create a design, have it registered as a trades union label under the Copyright Act. And I have here a list of the states of the neighbouring union in which this principle of the union label is established by law, and in that list are the names of no less than thirty-one states.

When the hon. member introduced this Bill one of the chief reasons he gave for it was that he had a precedent, which was well established in Great Britain and the United States. Now, he says that it does not matter whether that is the fact or not. I say it matters to this extent that if we have the evidence that this Act has been in operation in Great Britain for 12 years and in 31 states for various periods, we have very good grounds for assuming that there is no fear such as the manufacturers express that the Act is going to seriously affect their business. I for one would be very much more able to make up my mind in connection with this Bill if the Acts to which the hon. member referred were laid before the House before the Bill was discussed.

Mr. RALPH SMITH. I would again, in so far as I am concerned, say that I believe the principle is right and I ask the House to pass the Bill. I do not rely upon the fact that this legislation may be operating in other places. I think it is a reasonable thing, and if it is right I ask the House to pass the legislation. It has passed the House twice before in the hands of a private member.

Mr. NORTHRUP. I was very much struck with the remarks made by the hon. gentleman who has introduced this Bill (Mr. Smith). He pointed out several times that he cannot see how there can be any objection to this Bill because it is not compulsory for any manufacturer to place this label upon his goods. That, to my mind, shows that the hon. gentleman has not the faintest conception of what the main design of his own Bill is, because nobody but himself thinks that is a matter of the slightest importance. The point is not that this label is to be put on the manufacturer's goods without his consent. I am not aware that any manufacturer is going to complain because this label is put on his goods. The difficulty is that the label is to be kept off his goods. I think the hon. gentleman entirely misunderstands the objection there is to this Bill. But, the objection shortly is that it hardly seems fair that an unincorporated body assuming no responsibility whatever should be given what every hon. member of the House must know is a most powerful means of boycotting. It is wholly apart from the question for the hon. member to state that the manufacturer is not compelled to place this label on his output. The object is to protect the manufacturer so that he will not be injured by the label not being put on his goods.

Mr. RALPH SMITH. I would like to ask my hon. friend (Mr. Northrup) if one manufacturer agrees that the label shall be placed on his goods what objection any other manufacturer can have?

Mr. NORTHRUP. I can quite understand the circumstances under which one manufacturer perhaps wisely has occasion to have the labour union in his factory, because he will be entitled to have the union label on his goods, while another man might be paying just as good wages, employing just as many and as worthy men as those who belong to the union. But, they do not belong to the union and he cannot have this label put on his goods. Are we going to say that you shall boycott this manufacturer without any possibility of redress since there is no organized incorporated body from which he can obtain damages?

Mr. RALPH SMITH. Will the hon. gentleman tell us what injury will be done to the manufacturer who is not operating the label by the fact that it is operated by another manufacturer?

Mr. NORTHRUP. It again seems to me that the hon. gentleman is wholly ignoring the gravest objection to his own Bill. Nobody complains in the slightest that under the provisions of this Bill the label has to be put on some manufacturer's goods without his consent. Let them placard the goods from top to bottom if they like. The other class now that we refer to, the class of manufacturers who cannot get the label on their goods, and I think the hon. gentleman can see that if one manufacturer has this label on his goods and another cannot get that label on his goods, although he may have as good men and have as many hands, paying them as high wages, because his hands do not happen to belong to the labour union one man has an advantage that another has

not. One man can be injured by not being allowed by law to use the union label, and if he can, there should be some correlative of responsibility on the part of those who are placed in a position to inflict this injury upon him.

Mr. RALPH SMITH. I cannot understand how it is that a manufacturer cannot have that label on his goods. If he is paying the same wages, as my hon. friend says he is, why can he not have the label on his goods ?

Mr. NORTHRUP. Because my hon. friend provides by this Bill that three or four individuals who form themselves into a Union can get a label that nobody else can use.

Mr. RALPH SMITH. My hon. friend must remember that if this manufacturer is running his business in a manner satisfactory to his men he will have no difficulty in getting his men to combine for the purpose of creating a design, and having a registered label. What is to prevent it ?

Mr. INGRAM. Supposing the label is given to the manufacturer to use on condition that he carries out a certain agreement or arrangement ; then something turns up and he violates the agreement and justly so perhaps because the workmen may not have carried out their part of the contract. The label is withdrawn from him and the very moment the label is withdrawn from the manufacturer, then the boycott is instituted and it injures the manufacturer. That is where the injustice comes in, in the legislation proposed. Both workmen and manufacturers must be reasonable, and where there is a responsibility each party should bear their fair share of responsibility in order to have the Act work smoothly. Does the Act ensure that ?

Mr. RALPH SMITH. There is nothing to prevent a boycott now. If a combination of men working with the manufacturer authorize him to use a label now without it being possible to register the label, they can withdraw the use of that label if they see fit. What is to prevent them ? Nothing in the Bill will make it more possible than at present. How can they boycott them ? They can advertise that the goods have not been made by union labour, and if the public sentiment of this country will induce people to refuse to purchase goods because they are not made by union labour that is evidence that the sentiment is in favour of trades unions. This is only a moral influence. Every day we see in advertisements : ' These goods are made by white labour,' or ' by union labour.' What objection can there be to that ? It is a simple principle. One man says : I agree to supply the conditions of employment asked by the trades unions. The union says in reply : We have a design and label and will place it on the articles you produce because the conditions of employment are satisfactory. If the employer supplies the conditions he will have no difficulty in getting the benefit of the label.

Mr. NORTHRUP. I think possibly that by discussing this matter we can agree. We both recognize that a boycott is perfectly possible, we all recognize that they have existed that they do exist and will probably exist in the future. My hon. friend however, wants to invent new machinery to make a boycott as simple and practicable as possible. There are some who think that a boycott is not in the best interests of the country and is not the best form of modern commercial and industrial warfare. Those of us who represent the people of Canada, the overwhelming majority of whom do not belong to unions, think that a boycott being undesirable, it is our duty not to take any steps to make this undesirable method of carrying on an industrial dispute any easier. My hon. friend (Mr. Smith) is right from his point of view in making it as easy as possible ; those of us who do not believe with him are reasonable in declining to assist to set up conditions under which those who desire to establish a boycott can do so as effectually and as harmlessly to themselves as possible.

Mr. CALDWELL. The manufacturer is not afraid to grant his men a right in the way of a label, but he is afraid that by granting anything of this kind he may give to his employees a monopoly or a weapon that they may hold over him. The manufacturer is not afraid to grant to his workers fair play, but sometimes an irresponsible body is not very thoughtful when it comes to strikes and things of that kind. Take a manufacturer who is manufacturing a good article. His people insist upon his putting on their label ; he may grant that request but when he has marketed his goods and his goods are finding a ready sale, then the employees may say, for some reason : We will remove that label unless you grant us some particular point upon which we have disagreed. That label may have become identified with that particular line of goods and it might be a great hardship to the manufacturer to have that label removed, and yet of course the Bill says that the manufacturer may use his own judgment as to whether he shall have the union label or not. The manufacturer is not afraid to grant a label, but he is afraid of that label being used to injure him. The union is not a responsible body while he is responsible.

Mr. INGRAM. If the manufacturer had violated any agreement then probably he should suffer for the violation of that agreement. I would go so far as to say that, but the withdrawal of the label from his goods, particularly if they are established in the market with the label attached would be sufficient to injure him if nothing more, because those who have been in the habit of buying goods with that label might with-

draw their patronage when the label is withdrawn from the goods. So far as the Manufacturers' Association and the workmen are concerned, I am one of those who believe that the workman has a right to sell his labour at as high a price as he can get. He has a right to ask for reasonable protection through legislation just as much as the manufacturer has. I do not know of any greater monopoly than the legal profession; they are surrounded by every possible safeguard.

An hon. MEMBER. What of the doctors?

Mr. INGRAM. There is some justification for the doctors, because life and death are involved, but our legal gentleman are pretty well guarded and they can fairly well boycott the public generally. I do not think they ought to be too particular about passing a little legislation to help the workingman. I think that this Bill should be put in such a shape that it cannot be used for an unreasonable boycott, or a means of unreasonably boycotting a manufacturer who is endeavouring to do what is right.

Mr. RALPH SMITH. What would the hon. gentleman propose as an amendment?

Mr. INGRAM. I would not like to propose an amendment as I am not handling the Bill.

Mr. HAGGART. I would suggest that the union should be incorporated.

Mr. INGRAM. Perhaps it might be well to require that the union be registered and then incorporated so that it would become responsible for any action that might be taken. I think that would be one strong step towards meeting the objections of those who are opposed to the legislation.

Mr. ARMSTRONG. I would like to ask the promoter of the Bill what effect this would have on the position of the manufacturers and workmen in the constituency which I represent. We have in East Lambton some fifteen manufactories employing about 400 workmen. There is not a labour union or a branch of the labour union in the constituency to my knowledge. The hon. gentleman has admitted that there are boycotts, that railroad men connected with unions in distributing goods throughout the country have instituted boycotts, and that in other ways the goods manufactured by any firm might be boycotted. I would ask the hon. member what effect this Bill would have upon the position of the labouring men and manufacturers who are not connected with a labour union in any way?

Mr. RALPH SMITH. They would be in exactly the same position as they are in now. The union is operated at the present time very extensively in this country and the hon. gentleman admits that there is no such thing as a boycott.

Mr. R. L. BORDEN. The hon. gentleman who is promoting this Bill has told us that legislation of this character exists in thirty-one states of the American union. Would he be good enough to supplement that information by informing the House how long it has existed in these states and what the effect of its operation has been, whether or not any of the evils which have been referred to to-day have been found to prevail in consequence of this? I think information of that kind would be very useful to us.

Mr. RALPH SMITH. I understand that union labels in these states have been operating for some years, and none of the unions are registered. Of course, there is very strong opposition to the existence of the union label in the United States, just as there is in this country, on the part of the manufacturers and other employers; but I have heard of no complaint about the label itself. It is considered a legitimate measure of defence on the part of the unions. Hon. gentlemen talk about a boycott. It is true, a labour union may boycott; but no labour union in any country has ever been in a position to boycott to the same extent that an employer has. There is nothing to prevent an employer in this country saying to his workman, 'I will not employ you, because you belong to a labour union.' Why should not the labour unionist, in the same way, if he has sufficient influence to bring to bear on his employer, say to him, 'We will insist on your employing none but union men?' I stand for neither of these positions. I may say that I am in favour of the incorporation of labour unions. I recognize that if they are to have the strength they ought to have, they must be intelligent and responsible bodies. I pressed this view before the unions, but they are afraid of incorporation. They have not confidence in the judges of the country. Probably that feeling emanates from the United States. But that is the feeling of the labour men—that they cannot get justice at the hands of the judges, and therefore they are not in favour of incorporation. But, speaking for myself, I would make provision in any Bill of this kind for the incorporation of trade unions. I believe in making them responsible. I believe in making it unlawful for them to interfere with any employer because he chooses to employ non-union men. I believe in all this; but there is nothing at all in this Bill that will bring about a condition of boycott that does not exist to-day, and there is nothing in the laws of this country that will prevent an employer creating a boycott as is done in hundreds of cases, by saying to the men, 'I refuse to employ you because you are a member of a trades union.' My hon. friend has nothing to say about that, although it is a very serious boycott to a man who has to depend on his labour to live, to be turned out of a factory.

Mr. BERGERON. There may be a reason for that.

Mr. RALPH SMITH. There may be, and there may be a reason for a labour union boycotting a manufacturer; but my hon. friend does not recognize that. To prevent a boycott in any position in life is impossible. Why should not I, who am working for one man, say to my friend who is working for another, 'There are better conditions existing where I labour than where you are; why don't you get together and organize, and create in your factory the same conditions that exist in mine?' Is it not legitimate to use a moral influence on the community in order to bring about an organization that will result in proper and reasonable conditions for these men? Can there be any objection to that? I cannot see any. I cannot see that this Bill places any power in the hands of the labour unions that they have not already. They simply say, 'Certain manufacturers agree with us to use a label on their goods, and we want that to be registered so as to prevent fraud by others using it who have no right to do so.'

Mr. FITZPATRICK. Do I understand my hon. friend to say that he is prepared to amend this Bill to make it applicable only to labour unions which are properly incorporated under the law?

Mr. RALPH SMITH. I say that I am in favour of that, but I have explained that the influences pressing for this legislation are not favourable to it.

Mr. FITZPATRICK. It would remove some of our difficulties if it were made applicable only to incorporated unions.

Mr. RALPH SMITH. Will the hon. gentleman say that he would support the Bill if that provision were made?

Mr. FITZPATRICK. I have not said so far that I oppose it. I am seeking for light.

Mr. RALPH SMITH. Would the members of this House say that they would approve of this Bill if it were made applicable only to incorporated unions?

Mr. FITZPATRICK. It seems to me that that would materially alter the feeling of the House towards it.

Mr. W. F. MACLEAN. Would it not follow that manufacturers' associations would also have to incorporate themselves? As I regard the agitation, honours to-day are even. The employers are moving along their particular line and the unions along theirs. Each makes a move, the one to check the other; but out of it all great benefit will come both to the employers and to the men employed. I have no objection to this. It all tends to hasten the day when labour disputes will be settled by arbitration rather than by legislation or by strikes. If this move on the part of the unions is legalized, there will be another move made by the employers, and if the unions must be registered, so must be the employers, so that both parties will be responsible for what they do. We must handle these questions, but we ought to do so in the light that arbitration and conciliation is the goal towards which we are moving for the settlement of labour disputes, rather than these special cases of a move from one side and a counter move from the other. I would like to see the fullest consideration given to the Bill, and the side of the men receive fair consideration as well as the side of the employers.

Mr. NORTHRUP. Is it not a striking commentary on this Bill that the hon. gentleman who has introduced it has just told the committee that he is supporting a measure of which he does not approve?—that he would personally like to see eliminated from it the objectionable feature which is exciting adverse comment on both sides of the House; but that he feels compelled, under the pressure which he has referred to, to press a measure of which he does not approve? Would it not be possible to let this Bill stand until he consults the forces behind him, to see if it cannot be so amended as to meet the views of both sides of the House and his own views? Then he would be in a position to say, 'This is a Bill which I think ought to be passed,' and would have more right to press for it than he has to-day.

Mr. RALPH SMITH. I am surprised at the position taken by the hon. gentleman. What is he here for? to represent his own views or the views of his constituents? Every member of this House has his own individual opinion, but he is here to support the opinion of his constituents, and not his individual opinion. That is exactly what I said. I tried to influence the national unions of this country in favour of the incorporation of trades unions, and I have said that I would support that, but they would not support it. But am I to abandon this measure because they do not do everything I want on this question? I do not think that would be a reasonable position.

Mr. W. F. MACLEAN. I must say that I do not quite see the force of the legal profession, every one of whom has a label upon himself, and belongs to the closest corporation I know of, opposing others who wish to be labelled. In every province they have their trades unions and their trade labels. If a man should attempt to practise the profession of law and not wear the union label, they immediately boycott him and he is put out of business by the law itself.

Mr. RALPH SMITH. He cannot get a living.

Mr. W. F. MACLEAN. No, he cannot. It is trades unionism up to the hilt. The lawyers all hang out the union shingle. Even when they die or marry, we have a notice in the paper that Mr. So-and-So, of Osgoode Hall, has died or has married. Even the dentists and horse doctors and the cow doctors of this country have all got the trade label, and I have no hesitation in saying that what is fair for one is fair for another. If the workingmen want some measure of this kind, provided it is fair legislation and treats everybody equitably, I do not see any reason why they should not have it.

Mr. NORTHRUP. For once the hon. member for South York (Mr. Maclean) has given expression to some views which are somewhat in accord with those held by most members of this House. The only reason I can find for my hon. friend giving expression to those views is that he has not the faintest idea of what he is talking about. If he had for a moment stopped to consider what he was about to say and really grasped the ideas he was giving expression to, he would have probably hesitated and begun to doubt whether he was really speaking words of wisdom. Every member on this side will agree with every word he has said in so far as he has pointed out the advantage of protection, by means of incorporation or otherwise, of the various branches of industry, Lawyers, doctors, dentists, even undertakers, have seen the wisdom of protection, and we would all like to see the trades unions recognize the advantage of protection in some way by means of incorporation. My hon. friend has rather cast a slur upon the learned professions for having done what they had a perfect right to do, and at the same time he would have the trades unions deprive themselves of the advantages which the learned professions would be only too glad to extend to them. There is not a lawyer in the country who would not do everything he could to assist the trades unions to become incorporated within the shortest delay possible ; and when my hon. friend next endeavours to draw distinctions between one class and another, he should try and understand where to draw the line of distinction and to remember that protection will be a benefit to all, and if these other branches are more fortunate than some it is because they have recognized fully the benefits to be derived from protection.

Mr. W. F. MACLEAN. My hon. friend on my left did not make that statement some time ago, but, on the contrary, opposed the Bill on principle, without any reference whatever to the subject of incorporation. He said that there was a bad principle in this Bill, but now he is hedging and taking refuge, and says that the principle is all right, only it ought to be applied to incorporated companies.

Mr. NORTHRUP. I did not say the principle was all right—not at all.

Mr. INGRAM. Some years ago the government issued a commission to inquire into the sweat shops, and found a very serious condition of things existing. Certain manufacturers, who wanted to take an unfair advantage of their competitors, housed poor men and women in miserable shops without sanitary conditions in order that they might get cheap labour, and these cheap goods were put on the market to compete with those of respectable manufacturers who paid good wages and employed their work people in decent shops. The result of that commission was a decision to put a stop to competition of that character by legislation which would protect the working classes by compelling the manufacturers to give them decent places to work in and decent wages. That is the main object of any legislation of the kind now proposed. No manufacturer who wants to do a fair and legitimate business will encourage the sweat shops which were proven to have existed to a great extent in this country. It is in the interests of every decent respectable citizen to have that kind of thing changed, and any legislation which will do away with it, and which will not work injustice to any respectable manufacturer, the House should be willing to pass.

Mr. CLARE. I happen to be one of the manufacturers who employ considerable union labour. In my business I have never had any difficulties with my men and the union with which we do business. I think that the manufacturers and the labouring classes would improve their positions very materially if they would try and come together. We would then not have measures of this kind on our statutes, but as things are it is probably necessary that we should have them. I understand from the hon. gentleman who introduced the Bill that the position of the men is going to be exactly the same if this Bill is passed as it is at present ; but there is one objection to which I wish to refer, and that is the objection pointed out by the hon. member for East Elgin (Mr. Ingram). Suppose a manufacturer of iron goods incorporates the union label in the pattern as part of it instead of pasting it on. To do that puts him to considerable expense, and should there be afterwards any difficulty between him and the union, he may have a large stock of goods on hand which will have to be destroyed. There should be some provision to get over a difficulty of that kind.

Mr. RALPH SMITH. That is a matter entirely of agreement between the manufacturer and the union, and it would be the business of the manufacturer to provide against any contingency of that kind before agreeing to use the label.

Mr. OSLER. I think if the hon. member for Nanaimo would consent to a clause providing for incorporation of these unions, that

would cover almost entirely the objections to the Bill. There may be other objections which the manufacturers could point out, and which would necessitate the Bill being very carefully drafted. Personally, I would like very much to see an Act passed which would work as well as apparently does the English Act; and if the hon. member is willing to add a clause to the effect that the unions shall be incorporated, that will do away with the objections generally expressed to the measure.

Mr. W. F. MACLEAN. Is this not the place for the Minister of Labour (Sir William Mulock) to come in and show us a way out of the difficulty? He has the assistance of his deputy minister, who has made a special study of all these questions and is ready to advise him, and of a staff of officers who are skilled in unravelling these labour tangles; but instead of the Minister of Labour leading the House on questions of this kind, as he should, he sits there dumb as an oyster——

Mr. FOSTER. And not nearly as tasty.

Mr. W. F. MACLEAN. Surely he can advise his supporter from Nanaimo (Mr. Smith) how to get out of this difficulty. My hon. friend from West Toronto (Mr. Osler) has suggested that a little consideration and a little conciliation applied to the problem would immediately smooth the way—and no one is so competent in the matter of conciliation as the distinguished member for North York and Minister of Labour (Sir William Mulock). Surely, after what has been said, we shall hear from him.

Mr. A. JOHNSTON. What is the difficulty?

Mr. W. F. MACLEAN. The hon. gentleman (Mr. A. Johnston) has his senses and can hear what is said. I cannot furnish him what he ought to supply for himself.

Sir WILLIAM MULOCK. I am afraid my hon. friend from South York (Mr. W. F. Maclean) is the last person in this House to admit that any person could advise as to what course he should pursue here. I, therefore, would not venture to take such a liberty with him. He knows the situation of the Bill before the House. The hon. gentleman (Mr. Ralph Smith) who is in charge of it has moved the Bill. If any hon. gentleman desires to amend it, there is opportunity to do so. It is not a government question. Every hon. member is at liberty to advance his views, and you, Mr. Chairman, I am sure are only waiting to receive amendments. The hon. member for South York (Mr. W. F. Maclean) has been first on one side of the question and then on the other, and now he is trying to get out of his difficulty by dragging me in to do his work. I cannot so invade the hon. gentleman's preserve.

Mr. OSLER.

Mr. DEMERS (St. John and Iberville). (Translation). Mr. Chairman, no privilege can be granted but to a person who exists physically or morally. The trades-unions cannot be sued unless they are incorporated. It has been so decided by the Ontario courts in a case of 'The Metallic Roofing Company of Canada v. Local Union No. 30, Amalgamated Sheet Metal Workers' International Association, 5, O. L. R., 424 (D.C.)' It was held that:—

> The right to maintain an action or the liability to be sued can only be by or against persons as individuals, or as a corporation or a partnership, or where individuals are carrying on business in a name other than their own, or where they have been given the capacity to own property and to act by agents. A local union of workmen, a purely voluntary association, without such capacity, are not liable to be sued; and a writ served upon the agent was therefore set aside. Taff Vale R. W. Co. vs. Amalgamated Society of Railway Servants, 1901, A. C. 426, distinguished. Where it clearly appears that the association sued is not an entity, which may be sued by the name it bears, it is more convenient to set aside the service of writ on a motion made therefore than to allow the case to proceed at the trial with a certainty of its ultimate dismissal.

The same decision was rendered in the case of 'Krug Furniture Company vs. Berlin Union of Amalgamated Wood Workers, 5, O. L. R., 463, Meredith, J.' The judgment was the same, that is to the effect that a trades-union could not be sued if it were not incorporated; that the members should be proceeded against individually, and the action should be dismissed if it had been taken against the association.

The question has been decided also in England, by the Appeal Court in 1901, in a case of 'Linaker vs. Pilcher and others,' reported in volume '84, Law Times Reports,' new series, page 421. In this case the action was held valid because it had been entered against the trustees of the trades-union, but notwithstanding that decision the courts in the province of Ontario have persisted in dismissing the law suits brought against the non-incorporated trades-unions.

There is no doubt but that is the law in the province of Quebec.

I would favour the idea of granting rights to the trades-unions provided these associations exist legally. I think it would be absurd to confer such privileges upon an indeterminate class of men. The exercise of a privilege requires that a person should exist physically and morally. For those reasons, Mr. Chairman, I move in amendment, seconded by Mr. Leblanc, that the following words: 'duly incorporated,' be added after subsection (a) of section first.

It is easy for the trades-unions to obtain incorporation; we have a law to that effect; it is chapter 131 of the Revised Statutes of Canada. According to that law trades-unions may be brought into legal existence without any heavy costs. Why should they

not submit to the law as the other public bodies do ?

My honourable friend from York (Mr. Maclean) has told us that the lawyers, for instance, enjoyed certain rights and privileges. This is very true, but the lawyers have a law which has brought them into legal existence as a body. I am in favour of the workmen, and I wish their unions nothing but prosperity. I recognize the fact that the workmen compose amongst our people a class which is numerous and worthy of protection. Yet, if we are to protect their rights, it is necessary that the unions which they form should have a judicial standing, and I propose this amendment in order that the rights which this parliament is about to confer upon them may have their full effect.

Mr. Chairman, as I have just stated in French, I am favourable to the principle of this measure. But, if we are going to grant a privilege, we must grant it to somebody, to some person who exists physically or morally. If you do not grant it to an individual, you must grant it to a corporation, to a body that will exercise the rights granted and that can be brought before the courts in case of any question arising as to the exercise of that right. It has been decided in Ontario, in the case I have just quoted, that the trades unions cannot be brought before the courts—you must sue the members individually. It has been decided in England that if they have trustees that may be sued. It is very easy for the trades unions to be incorporated under the Federal Statute chapter 131. Incorporation does not cost much, and I do not see why we should not decide that this privilege of using a Union label shall be given to some person or corporation, instead of giving it to all workers. If we give it in this general way, we do not know who will be the proprietors. That is why I move as an amendment to add the words 'duly incorporated' after the words 'working women' in the second line of subsection (a). I think that, with such an amendment no objection could be raised to the Bill ; because, when the labour unions are incorporated they will be entitled to their distinctive mark just as any other corporation is. The hon. member for South York (Mr. W. F. Maclean) has said that all the high classes have privileges. That is true. But these classes are incorporated. The lawyers have privileges, but, they have duties also ; and they enjoy these privileges because they are incorporated. And by this amendment I ask that if the workingmen are to receive these privileges they shall also be incorporated. We must recognize their right, but we must follow the ordinary rule of law.

Mr. W. F. MACLEAN. I would like to ask the learned and hon. member (Mr. L. P. Demers) a question. He says that the lawyers are incorporated and are responsible. Will he say that if a person feels aggrieved by a lawyer he has any recourse against the corporation to which that lawyer belongs ? I think not.

Mr. L. P. DEMERS. That is no answer. The legal corporations have duties and privileges. They can be sued before the courts, but an incorporated union can not.

Amendment (Mr. L. P. Demers) agreed to.

Mr. FITZPATRICK. If the committee intend to adopt the amendment suggested by my hon. friend from St. John and Iberville (Mr. L. P. Demers), a very superficial examination of the Bill will show that it will be necessary to amend several sections to make them conform to the amendment.

Mr. AMES. As I understand it the interpretation clause is amended and that where 'labour union' is mentioned subsequently in the Bill it means an incorporated Labour union.

Mr. RALPH SMITH. Certainly.

Mr. R. L. BORDEN. I do not understand that these words should be inserted just where the hon. member for St. John and Iberville proposes. If these words are to be added, in order to give them proper significance, they should be just before the word 'association.' If the hon. gentleman (Mr. Ralph Smith) who is in charge of the Bill intends to assent to this amendment it seems to me a little more consideration might be given to the exact form of the amendment to carry out the idea that has been suggested.

Mr. RALPH SMITH. I do not agree with the amendment at all ; but that is not the question. If this House will not pass this Bill without the amendment, then I want the Bill with the amendment. If it comes to a vote, I will vote against it. But if the House will pass the Bill with that amendment, then I want that amendment.

Mr. FITZPATRICK. I think it is desirable that we should have time to consider the effect of this amendment on the other clauses of the Bill. In the first place, we ought to try to give effect to the evident intention of the House. I think, therefore, the wiser course would be for the hon. member to move that the committee rise.

Mr. RALPH SMITH. I move that the committee rise, report progress and ask leave to sit again.

Progress reported.

ADJOURNMENT—I. C. R. TRAIN SERVICE, NOVA SCOTIA.

Sir WILFRID LAURIER moved the adjournment of the House.

Hon. H. R. EMMERSON (Minister of Railways and Canals). I have received some information with respect to the question raised by the leader of the opposition

(Mr. R. L. Borden), and I feel it is but due to the Intercolonial management that I should give the information.

Mr. W. F. MACLEAN. Have the passengers been fed yet ?

Mr. EMMERSON. At the time the telegram came, the train was in Moncton where the passengers could readily get fed. Perhaps the difficulty was that some of them did not want to purchase a meal. This telegram is dated Moncton, February 8, and is addressed to Mr. Pottinger :

The storm which set in night before last at Halifax extended yesterday as far as St. John and Newcastle, it is now about over west of Moncton, but continues east and is particularly bad east of Springhill. Number 34——

which is the through express from Montreal east.

——which left here 14 o'clock yesterday and numbers 2, St. John to Halifax, and 26, C. P. R., now stuck at Springhill. 84, Moncton to Springhill local, with two engines from here yesterday evening, now stuck at Evans. 33, through express west, left here last night about two hours late, and is doing fairly well. 10, night express from St. John last night, 2 and 34 arrived here about noon, 10 and 2 cancelled and transferred to 34, being held. 9, night express, Halifax to St. John, with two engines stuck one mile west of Londonderry ; 1, 3 and 4 cancelled. Apple train stuck all night at Windsor Junction, steamer waiting this train, will leave Windsor Junction about noon. Halifax yard is in very bad shape. All cars have to be moved one by one, a consolidated and five shunting engines working trying to get 20, now at Point Tupper, through. 19 cancelled.

I may say to my hon. friend that the gentleman who sent the telegram, a Halifax gentleman I believe, had reached Moncton, and no doubt had had a good meal before we heard of his telegram in this House.

Mr. R. L. BORDEN. I am very glad he has progressed so far. I did not mention the matter by way of criticism of the Intercolonial, as I stated I had had a somewhat similar experience, which I had found under the circumstances to be unavoidable.

Motion agreed to, House adjourned at 5.55 p.m.

HOUSE OF COMMONS.

THURSDAY, February 9, 1905.

The SPEAKER took the Chair at Three o'clock.

THE GRAND TRUNK AND CANADA ATLANTIC RAILWAYS.

Mr. EDWARD M. MACDONALD (Pictou) moved for leave to introduce Bill (No. 45) respecting the Grand Trunk Railway Company.

Mr. EMMERSON.

Mr. W. F. MACLEAN. Explain.

Mr. MACDONALD. The purpose of this Bill is to authorize the Grand Trunk Railway Company to acquire bonds and preference and common shares of the Canada Atlantic Railway Company, and to hold the same, either by themselves as a company or in the names of trustees, also to provide that the company may guarantee the payment of the principal and interest of the bonds so acquired, and to be held by them, not exceeding the amount of £3,292,200 sterling.

Mr. W. F. MACLEAN. I would like to ask the hon. member whether it is a fact or not that the Grand Trunk has acquired the Canada Atlantic ?

Mr. MACDONALD. I am not in a position to say anything further than what is proposed by the Bill, which is an empowering one ; and what is proposed will appear in its various provisions.

Motion agreed to, and Bill read the first time.

Mr. E. M. MACDONALD moved for leave to introduce Bill (No. 46) respecting the Canada Atlantic Railway Company.

Some hon. MEMBERS. Explain.

Mr. MACDONALD. This Bill proposes to repeal section 3 of chapter 90 of 1903, and empowers the company to issue bonds to the amount of £3,292,200, to be secured by mortgage on the company's property. There are provisions securing the bondholders under previous mortgages, and the rights of all parties holding previous mortgage rights are protected.

Motion agreed to, and Bill read the first time.

FIRST READING.

Bill (No. 47) respecting the Montreal Park and Island Railway Company.—Mr. Geoffrion.

QUESTIONS.

MILITARY BUILDINGS AT FREDERICTON.

Mr. CROCKET asked :

1. Were tenders called for the construction of the stables on the officers' barrack grounds at Fredericton, N.B., referred to on page V—62 of the Auditor General's Report ?
2. If so, what publication was made of the call, what tenders were received, and what were their respective amounts ?
3. Were tenders called for the construction of the sergeant-major's quarters at Fredericton, N.B., referred to on the same page of the Auditor General's Report ?
4. If so, what publication was made of the call, what tenders were received, and what were their respective amounts ?

Hon. CHAS. HYMAN (Acting Minister of Public Works):

1. Yes.

2. The call for tenders was published in five newspapers. One tender only was received, that of C. J. B. Simmons for $2,210.
3. Yes.
4. The call for tenders was published in five newspapers. One tender only was received, that of C. J. B. Simmons for $2,118.

Mr. CROCKET asked :

1. When was the contract let for the rebuilding of the drill hall at Fredericton, N.B.; to whom was it let ; and at what price ?
2. Were tenders called for ? If so, what publication was made of the call, what tenders were received, and what were their respective amounts ?
3. What date does the contract fix for the completion of the work ?

Hon. CHAS. HYMAN (Acting Minister of Public Works) :

1. Contract signed on the 7th December, 1904. Awarded to C. J. B. Simmons. Amount of contract, $12,955.
2. Yes, the call for tenders was published in fifteen newspapers. Four tenders were received, namely :—C. J. B. Simmons, $12,955 ; Willard Kitchen, $13,387.74 ; John Maxwell and Chas. A. Hall, $14,000 ; J. D. McLaughlin, $15,300.
3. November 15th, 1905.

FREE MAIL DELIVERY.

Mr. URIAH WILSON asked :

1. What is the total cost of free mail delivery in towns and cities of Canada where such system is utilized ?
2. Does the Post Office Department keep any record of the number of letters, newspapers, parcels, &c., so delivered ?
3. If so, how many of each such were delivered ?
4. If not, what is the estimated number of each, the estimate to be taken from the usual process of enumeration by the Post Office Department ?
5. What is the estimated cost per letter, per paper, per parcel, &c., delivered in the above towns and cities ?

Hon. Sir WILLIAM MULOCK (Postmaster General) :

1. Salaries of letter carriers..	$415,241 42
Cost of uniforms, &c.. ..	17,253 69
Conveyance of letter carriers by street railway..	10,253 14
Total..	$432,748 25

2. No.
3. Answered by No. 2.
4 and 5. The department is not in a position to furnish an estimate in reply to these inquiries.

GRAND TRUNK PACIFIC ROUTE.

Mr. W. J. ROCHE asked :

1. Has the Grand Trunk Pacific Railway Company proposed or submitted to the government any plan of the route of the Grand Trunk Pacific Railway west of Winnipeg, in the province of Manitoba ?
2. If so, has such plan been approved by the government, or disproved, wholly or in part ? If disproved, for what reason ?
3. Does the line proposed or submitted as aforesaid run to the north or to the south of the Canadian Northern Railway, in the province of Manitoba ; and within what distance of said railway ?

Hon. H. R. EMMERSON (Minister of Railways and Canals) :

1. No.
2 and 3. Answered by No. 1.

SCHOOL LANDS SOLD.

Mr. LAKE asked :

1. How many acres of school lands have been sold at public auction in the provisional districts of Alberta, Assiniboia and Saskatchewan, respectively, by the government, from the 1st January, 1900, to the 31st December, 1905 ?
2. What were the highest and lowest prices obtained per acre ?
3. What was the average price per acre obtained in each provisional district ?

Rt. Hon. Sir WILFRID LAURIER (Prime Minister) :

1. Alberta, 304 acres (1 sale).
Assiniboia, 143,431·65 acres.
Saskatchewan, 237·53 acres.

ALBERTA.

2. 1 sale, $19 per acre.

ASSINIBOIA.

Highest price, $37.50.
Lowest price, $7.20.

SASKATCHEWAN.

Highest price, $107.
Lowest price, $40.

3. Alberta, $19.
Assiniboia, $9.69.
Saskatchewan, $86.54.

CANADIAN PACIFIC RAILWAY EXEMPTION.

Mr. LAKE asked :

1. Have any steps been taken by the government, in pursance of the resolution of April 2nd, 1901, to obtain an authoritative interpretation of the meaning of the Canadian Pacific Railway contract in relation to the exemption of the lands of that company from taxation in the Northwest Territories ?
2. If so, what is the present state of any legal proceedings that may have been entered upon ?
3. Has any decision been given as to the right of boards of school trustees and of municipalities to collect taxes on these lands from the Canadian Pacific Railway ?

Hon. CHARLES FITZPATRICK (Minister of Justice) : By arrangement, three test cases were brought—two by municipalities and one by the school district of Springdale—against the Canadian Pacific Railway in a Manitoba court. These were decided in favour of the Canadian Pacific Railway, but an appeal was taken to the Court of Appeals in Manitoba. Two of the appeals were successful, and one unsuccessful, and the cases were taken to the Supreme

Court of Canada where they are now pending. If my hon. friend wishes to pursue his inquiry further, I have with me the printed factums of the appeals to the Supreme Court which he may look over if he desires.

Mr. R. L. BORDEN. When is it expected the appeals will be heard ?

Mr. FITZPATRICK. They were heard at the last sitting of the court, and I expect judgment in about a fortnight.

REPORT PRESENTED.

Annual report of the Department of Public Works for the year ending 30th June, 1904.—Mr. Hyman.

TRANSPORTATION COMMITTEE.

Mr. DANIEL. Before the Orders of the Day are called, would the Rt. hon. First Minister tell us when we shall have the preliminary report of the Transportation Committee ?

Sir WILFRID LAURIER. It will be brought down very shortly.

SAFETY OF SHIPS.

House in Committee on Bill (No. 21) to amend the Act respecting the safety of ships—Mr. Sinclair.

On section 1,

1. Subsection 1 of section 7 of chapter 77 of the Revised Statutes, intituled An Act respecting the safety of ships and the prevention of accidents on board thereof, as amended by section 1 of chapter 63 of the statutes of 1903, is amended by striking out the words ' or in any covered space not included in the cubical contents forming the registered tonnage ' in lines 11 and 12 of the said subsection.

Mr. SINCLAIR. The purpose of the Bill is to enable sheltered deck vessels or steamers to carry timber between the main and the sheltered deck. At present they are prohibited doing so between the 12th October and 16th March. They are allowed to do so in the summer season, and I can see no good reason why they should not be permitted to fill in this space with lumber in the winter season also. The law requires of course that a ship shall not be overloaded, but the Plimsoll mark regulates that. Other descriptions of cargo are allowed between the main and the sheltered deck, but not timber, and my object is to allow the same privilege to shippers of lumber. This space consists of about eight or nine feet according to the construction of the vessel, and under the law vessels are allowed to carry only three feet of timber so that there are five feet not occupied at all. It would not in any way interfere with the navigation of the vessel or increase the danger to the crew if the whole space were filled up.

Mr. R. L. BORDEN. It is a little difficult to hear what the hon. gentleman has said.

Mr. FITZPATRICK. I did not gather exactly what is the space to which he referred. And before he concludes his explanation, I would like to know what was the reason of the legislation in the first instance—whether or not the amendment which the hon. gentleman now proposes is in any way inconsistent with any provisions of the Imperial statutes applying to ships generally throughout the empire. I would also remark that it seems to me desirable, when a Bill of this character is proceeded with, that we should have the Minister of Marine and Fisheries in his place to give the subject his consideration. I know there has been a good deal of discussion of matters of this kind in the maritime provinces ; and while, I do not profess to have very much knowledge of the reasons pro and con, I know that there has been a difference of opinion in some quarters.

Mr. SINCLAIR. The leader of the opposition (Mr. R. L. Borden) was not in his place when I introduced the Bill. I explained that it was necessary to get the consent of the Board of Trade of England in order to have this Bill become law in Canada. I understand that the policy of the government is not to make any changes in this law unless concurred in by the Board of Trade. I laid the matter before the Department of Marine and Fisheries, and communication is now being had with the Board of Trade, to see if the proposal is satisfactory to them. I do not propose to push the Bill through its final stages until word has been received on the subject, but I would ask the House to put it through the preliminary stages, so that if the consent of the Board of Trade is obtained it can be pushed through this session. The shelter deck is a growth. It was first a roof over the deck to carry cattle. Then the roof was extended the whole length of the deck, and finally the sides were built up with the ordinary steel frame and plank, and the whole became part of the ship as much as any other part. But the law remained the same, prohibiting the carrying of timber, except to the height of three feet on the main deck. What I propose is to permit that timber be carried between the main and shelter decks, that is, eight feet above the main deck. There is no reason why it should not be allowed, especially as we permit the ship to carry cattle and other things during the winter season. There is nothing about deals or lumber to make them dangerous to carry during the winter season. We allow the ship to be filled with apples or cheese or other products, but we do not allow it to carry deals or boards except under these restrictions. It pays a certain class of ships out of business in Canada for part of the year. These vessels in the North Atlantic trade, when October 12 comes, have to go out of business because they are not allowed to carry deals in this space.

Mr. R. L. BORDEN. Is there any Imperial statute with the terms of which this inactment is inconsistent ?

Mr. SINCLAIR. The Imperial statute is the same as our own which we are attempting to amend. If the amendment carried here, I presume the amendment will be made in England similar to this.

Right Hon. Sir WILFRID LAURIER (Prime Minister). In the absence of the Minister of Marine and Fisheries (Mr. Préfontaine) I may explain that this matter has engaged his attention. But, as stated by my hon. friend (Mr. Sinclair) it is not intended to push this Bill to a finish unless we know whether or not it is approved by the Board of Trade of England. I believe the Bill will meet with universal favour and will be a help to navigation. Still, my hon. friend only proposes to take it through committee and then let it stand until we have an answer from England.

Mr. R. L. BORDEN. I am inclined to think it would be better to let the Bill remain in committee until we receive the information from England. I do not think that will delay it at all.

Progress reported.

CERTIFICATES TO MASTERS AND MATES.

On the order :

Second reading of Bill (No. 3) to amend the Act respecting Certificates to Masters and Mates of Ships.—Mr. Lancaster.

Mr. LANCASTER. I am willing to drop that order, because I introduced a Bill yesterday to take its place.

Mr. SPEAKER. Dropped.

CRIMINAL CODE AMENDMENT.

On the order :

Second reading of Bill (No. 23) to amend the provisions of the Criminal Code, 1892, with respect to common bawdy houses.—Mr. Bole.

Mr. HAUGHTON LENNOX (South Simcoe). I would like to call the attention of the Minister of Justice to this amendment, if he has not already considered the subject. I presume that all the members of the House wish to confine the amendments of Acts to as narrow limits as possible. I do not wish to enter into a long discussion of the legal aspect of this matter, but I have collected authorities bearing upon it, and I think that it would be better to allow the Bill to stand. I would be very glad to submit to the Minister of Justice the authorities to which my attention has been directed, that he may see whether the amendment is necessary. My own opinion is that it is not necessary. Our Act differs from the English Act in that it defines what constitutes this class of offence. This is not a convenient time to go into the discussion. If the minister agrees with me this Bill might be allowed to stand.

Mr. SPEAKER. Stands.

EARNINGS OF THE CANADA EASTERN RAILWAY.

Mr. O. S. CROCKET (York, N.B.) moved:

For copies of all correspondence had between the government, or any department or member thereof, and the Alexander Gibson Railway and Manufacturing Company, or any other corporation or corporations, or person or persons, not included in the return brought down on the twenty-ninth day of July, 1904, in reference to the purchase and taking over by the government of the Canada Eastern Railway ; and of all other papers in the possession of the government, or any department thereof, not included in the said return of July, 1904, in reference to the purchase and taking over of the said railway, and the cost thereof. And also for a return showing, (1) the number of officials and employees in the service of the said railway at the time of its transfer to the government, with their names and their respective salaries or wages ; (2) the number of officials and employees now in the service of the said railway, with their names and their respective salaries or wages ; (3) the cost of the operation of the said railway from the date of its transfer to the government until the first day of February, 1905, and the gross earnings of the said railway during the same period.

Hon. H. R. EMMERSON (Minister of Railways and Canals). There is no objection to the motion, but the information asked for in the last line with respect to the gross earnings of that railway during the past year it would be impossible to give, because it is all part of one system. The motion should be amended.

Mr. CROCKET. Do I understand the minister to say that it is impossible to give the House a statement of the gross earnings of the road from the time it was taken over until February 1?

Mr. EMMERSON. It is impossible for this reason, that the separate earnings of that portion of the Intercolonial are not made the subject matter of bookkeeping, any more than the earnings of that portion of the road between Newcastle and Campbellton is kept separate. The earnings of any portion are included in the earnings of the whole, and it would be difficult, as I understand the bookkeeping of the Intercolonial, to make such a return.

Hon. JOHN HAGGART. Then they have a system of bookkeeping on the Intercolonial if the statement of the minister is correct, which is entirely different from that of any other railway in the world.

Mr. EMMERSON. It was the one established by the hon. gentleman (Mr. Haggart), I think.

Mr. HAGGART. No. I have not the slightest doubt that the information could

be obtained, notwithstanding the statement of the minister. There is no railroad having a proper system of bookkeeping with respect to which he cannot get information concerning a part of it, whether of a station or of any other portion of the road; the minister can get all the earnings if he takes the trouble and orders it to be done. It is absurd to say that on an important line of railway which was taken over by the Intercolonial, a branch line virtually of the Intercolonial, there is no separate account kept of the receipts and expenditures of that branch line. There ought to be in the first place a separate account kept of that portion of the road; if such separate account is not kept its bookkeeping is different from that of any other railroad in the country. On the Intercolonial you can find out the receipts and expenditures of any portion of it.

Mr. SAM. HUGHES. I think the minister is surely in error in stating that these earnings cannot be returned. Surely that branch line must make returns to the Audit Department every few days, although they may be included in the total returns of the Intercolonial. Then let him ask his Audit Department to furnish him separate returns for this branch line, and it can be done in twenty minutes, returns from every station on that road. All he would have to do would be to take the through-freight and the local freight, by collecting the mileage on the through-freight he could apportion in a very short time the earnings derived from the branch.

Mr. EMMERSON. It would be an easy matter to give the freights collected at any particular station on that portion of the Intercolonial, as it would be easy to give the amounts collected on either incoming or outgoing freights at any station on the Intercolonial. But while it might be possible to do that, and figure out on the mileage basis as compared with the whole, the proportionate amount that would be due, that would take some time. I do not think the accounts are kept separate. Of course there is no objection to the return, but it would be a work of time to get that done. This matter I think has been before the House before in connection with that portion of the Intercolonial between Lévis and Ste. Rosalie, or Montreal, and it has been stated time and again that under the bookkeeping on the Intercolonial, which is similar, as I understand it, to the bookkeeping on the other Canadian systems, there is no separate account kept of the earnings on any single portion.

Mr. SAM. BARKER. The hon. gentleman (Mr. Emmerson) can do this, he can give absolutely the earnings on the purely local traffic. It would not be a matter of great labour to the department to take the through-traffic for this very small business that has been going on, apparently, on this road, and divide it upon the mileage basis upon the main line of the Intercolonial. I think he will find that the Audit Department of his road will do that in a very short time. As it is important that we should know at this stage of the history of the road acquired by the government just what it is doing, I think the House ought to require this return.

Mr. R. L. BORDEN. I understand that the minister (Mr. Emmerson), though he did state at first that it was impossible to collect the information, he afterwards qualified it. I think perhaps he is inclined to exaggerate the difficulty a little, and that it would be better that the motion should be passed in its present form.

Mr. EMMERSON. I am quite willing.

Motion agreed to.

MOTIONS AGREED TO WITHOUT DISCUSSION.

Return showing the number of box and flat cars added to the equipment of the Intercolonial Railway for each year from 1900 to 1904, inclusive; the total number on January 1, 1900, and on January 1, 1904, respectively; and the number in use on roads off the Intercolonial Railway on January 1, 1900 and 1904, respectively.—Mr. Foster.

Return showing the number of inspectors or other persons employed to attend to the enforcement of the Fruit Marks Act of 1901. The names of the said inspectors or other persons, and the salaries paid to each, respectively. The total amount paid to said persons on account of salaries up to the 1st of January, 1905. Also the amount paid to said persons for travelling and other expenses up to 1st January, 1905.—Mr. Taylor.

PACKING AND SALE OF CERTAIN COMMODITIES.

House again in committee to consider certain proposed resolutions respecting the packing and sale of apples.

Hon. SYDNEY FISHER (Minister of Agriculture). This resolution was before the Committee of the Whole a few days ago, and I think the principle was fully accepted by the House. There was, however, a doubt expressed as to whether the size of the apple box herein defined should apply only to the export trade or to internal commerce as well. I asked the committee to rise and report progress, and ask leave to sit again, for the purpose of finding out exactly what was the desire of the fruit men in this respect, and also how other parts of the Act were likely to affect them. I find that the size described for the barrels, which is already defined in the Act, is for export, and I also find that while a large number of the fruit men would be very glad to have this box defined for the internal trade also, the majority of them I think desire to take only one step at a time,

and to define the size only for the export trade. My own view is that if it is applied to the export trade, practically, the boxes made will be made for the interior trade also and they may be adopted if they wish. If anybody chooses for his own purposes to use boxes for the internal trade he can do so. Under these circumstances I wish. to amend the resolution so as to make it perfectly and absolutely clear that it applies only to the export trade, and I think that can be done by making some slight amendment in the first line of subsection 2 which reads thus :

Every person who offers or exposes for sale, or who packs for export, &c.

I think by striking out the comma after the word ' sale,' striking out the word ' who ' and inserting a comma after the word ' packs,' the object will be accomplished. It will then read thus :

Every person who offers or exposes for sale or packs, for export, apples, &c.

I think that will make it perfectly clear that it applies only to the export trade. The rest of the resolution indicates that it applies to the export trade only. I am informed that another amendment would be desirable. A good many people have already ordered boxes and they are being made to-day by the box-makers for the current season. The contracts have been entered into and I think under these circumstances it would be well to add a clause to this resolution saying that it shall only come into effect on, say, the first of July, 1906 instead of coming into effect on the passage of the Act. That would give full warning and give an opportunity both to the packers and to the box-makers to adapt themselves and the conditions of their trade to the provisions of the Act as thus amended. I would therefore propose that a new clause should be added as follows :

The provisions herein contained shall come into force on the 1st July, 1906.

Mr. BLAIN. May I ask the hon. minister if boxes of the dimensions mentioned in the hon. gentleman's resolution are used by other countries exporting apples to England and to what extent ?

Mr. FISHER. In reply to my hon. friend I would say that there are other countries which define the size of their boxes. I might say that Tasmanian apples, which are very largely used in England and which come into competition with our own apples, are packed in boxes of this size, and that this size has been found the most convenient for the trade in England. Our people have thought that by adopting the same size their apples would appeal more to the market in England than if they had a different size. This size has been found acceptable to the British trade. It is a size which has been used in British Columbia for many years and to-day a great many of the packers in Ontario, at least, are using it. The fruit growers' associations of Ontario, the maritime provinces and Quebec have passed resolutions in favour of this size.

Mr. R. L. BORDEN. I would not think that the amendment proposed by the hon. Minister of Agriculture to subsection 2 of section 4a would alter the clause very much. I would like to have the opinion of my hon. friend the Minister of Justice as to the effect of striking out the comma. It is proposed to amend this section by striking out a comma in one place, inserting it in another and eliminating the word ' who.'

Mr. FITZPATRICK. My hon. friend the Minister of Agriculture showed me his suggestion immediately before the resolution was called and I did not have time to consider it very carefully, but so far as a resolution of this kind is concerned I must confess that I like to have time to think what I am going to do. I would not like to commit myself.

Mr. SPROULE. It does not seem to differ very much from that which was originally proposed. It certainly is confusing. It would not be easily understood by the common people. Surely if we can use the English language in a manner to be understood we had better do so rather than to leave the section in this ambiguous form.

Mr. FISHER. I would like to ask my hon. friends opposite whether they consider that the section as proposed with this amendment is not clearly understood.

Mr. SPROULE. I think it is not.

Mr. R. L. BORDEN. I would think there is a great doubt about it. I think there would be exactly the same doubt as there is at present. I do not think the proposed amendment alters the legal sense at all. My hon. friend the Minister of Justice will tell the hon. Minister of Agriculture that punctuation according to most legal authorities is not regarded at all in the interpretation of statutes. There may be some few cases in which it has been taken into consideration as a final resort, but it is very easy to make this plain without resorting to any such expedient. You can simply add a clause stating that it is not intended to apply to apples offered for sale in Canada. It is perfectly easy to make it plain and there is no reason why it should remain ambiguous.

Mr. FITZPATRICK. It was at one time considered unwise to use any punctuation at all, the idea being to begin a document and go right through without any punctuation whatever, but if my hon. friend the Minister of Agriculture desires to restrict the application of that clause to sales for export we might allow the resolution to pass with the understanding that the committee shall consider an amendment to that effect.

Mr. BARKER. I am not quite sure whether I know what the hon. minister is trying to do, but I would suggest these words instead of commas:

Every person who packs and offers or exposes for sale and export, &c.

Mr. COCHRANE. Why do you want the word 'sale' in at all?

Mr. FISHER. I cannot see myself the slightest doubt as to the meaning of the words proposed. What my hon. friend from Hamilton (Mr. Barker) proposes is simply a different form of saying the same thing, as I understand it. I cannot see that there can be the slightest doubt as to the meaning of the words I have proposed. Sec. 4a says:

When apples are packed in Canada for export for sale by the box, &c.

The words are not exactly the same but they mean distinctly that it is only for export, and the words that I have suggested in clause b would indicate clearly that the clause as amended should only apply to the export trade. If there is any doubt about the matter or any doubt as to the wording then certainly the clause had better stand entirely as it is and we will have the law clerk of the House, or some person who is authorized to draw such clauses, draw a clause to carry out our meaning.

Mr. MONK. Who has asked for this legislation?

Mr. FISHER. It has been asked for by the fruit growers' associations throughout the whole of Canada practically.

Mr. MONK. I object for my part to legislation of this kind as being altogether too paternal, and I have no doubt whatever that it will cause serious inconvenience, at any rate, in the province of Quebec and on the island of Montreal where there is an immense production of apples.

The committee will remark that this Bill comes into force only on July 1, 1906. Who knows but that the conditions of trade will be completely altered then, and so that boxes two or three inches larger will be better suited for the British trade? I believe it is much better for a matter of this kind to be settled entirely by the usages and by the requirements of trade which are of a continually changing character. We are not going to export apples to England only; we may export apples to other countries where such a box as that defined in this resolution may not be a suitable box at all, and in that case the exporter will be absolutely bound by these regulations respecting the export to England. What certainty have we that within a year, apples packed differently in boxes of a different design, will not have a better sale than those packed in the box clearly defined in this resolution. I do not think this is a matter for legislation, with all due respect to the Fruit Growers' Association, and I think it would cause serious inconvenience to a large number of people who pack apples for export on the Island of Montreal and who will find it difficult to conform to these regulations. One of the causes given by Edwin Williams in his book on the degeneration of British trade, for that misfortune is that the English manufacturer would not conform to the requirements of the markets in the different countries with which he traded, either in the packing of goods, the making out of accounts or in the different usages of trade in the different countries. It strikes me that my hon. friend (Mr. Fisher) is here laying down a hard and fast rule for the export of apples to England. The matter would be regulated by the requirements of the trade; if the apple exporter knows that a box of the dimensions mentioned is the most suitable for the export of apples to England, he will conform to that legislation without the Dominion legislature interfering in these details.

Mr. FISHER. I appreciate what the hon. gentleman (Mr. Monk) has said, but I must tell him and tell the committee that the idea which he has promulgated here is directly contrary to what has been the growing and strong opinion of the trade. The trade, not only the apple growers but the men who pack the apples, have found it necessary to define as clearly as may be the dimensions of the packages which they use. The Act that we propose to amend already contains a provision which defines the smallest barrel of apples which will be allowed in the trade. That Act was passed by this House deliberately after discussion, and on the demand of the apple trade, so that no smaller barrel than that particularly defined could be used. The same demand has occurred in regard to the boxes, because to-day and for some years past the box has been growing in favour as a measure or receptacle for the export trade of apples. The same requirement is needed in regard to boxes as has been adopted in regard to barrels. My hon. friend says that he wishes the usage to control the size of the box. Usage has in days gone by controlled it in regard to the barrel. Canadian apples were shipped in barrels of all sizes, and the result was that the trade in England when they ordered a thousand or 2,000 barrels of Canadian apples did not at all know how many pounds or bushels of apples they were going to get. That was one of the difficulties they had to contend with in handling Canadian apples. They expressed their dissatisfaction with that condition of affairs, and the people engaged in the trade here recognized that it was to the advantage of the Canadian trade to have a defined package so that the purchaser would know as nearly as possible what he was getting, or at any rate would know

that he was not getting less than a defined amount, and they asked that the size of the barrels should be defined. I wish to point out here that this is not an exact size but a minimum size. That is the case in regard to barrels in the Act of 1901, sec. 4, which we are about to amend. The trade has been labouring under great disadvantages by reason of the varied sizes of packages, and the trade has the minimum size defined with regard to the barrel. In the last few years the trade has found that the box is a more profitable package to use than the barrel, but the box has varying sizes. The people of Nova Scotia, Quebec, Ontario, and British Columbia who have been sending apples in boxes have been using different sizes of boxes. They found that the particular box here defined was the one that was closest to the general use and that it was the best average of all those that were in use. It was also the box that was already in use in British Columbia and largely in use in Ontario. It was the box that was already in use by our chief rivals in the English apple trade, the Tasmanian shippers. The trade therefore decided, after careful consideration and discussion, and recommended by formal resolution, that this particular size of box should be adopted, and that resolution has been embodied in the proposed legislation. I am only proposing this at the formal request of the people concerned and I think it is well that parliament should try to carry out that request. My hon. friend (Mr. Monk) says that this may interfere with some people in the Island of Montreal. I may say that the fruit growers of the Island of Montreal are largely members of the Fruit Growers' Association of the province of Quebec. I could name a number of men there who are members of that association, and I have no reason to suppose that they were not quite in sympathy with the resolution passed by the Fruit Growers' Association of Quebec, asking that this should be done. Certainly if they were not in sympathy they did not go far enough to challenge the resolution because it was passed, as I understand, unanimously. Under these circumstances I feel that I am not only justified but called upon in the interests of the trade to propose a definition of the size of the box, the definition herein contained as the result of a long and full discussion. It has been adopted in the nature of a compromise, as being the box that comes nearest to all the different varieties of boxes that have been used in the past. My reason for postponing the coming into force of this amendment is simply because I am told that certain box manufacturers have already made a considerable number of the boxes for next year and a considerable number of packers have on hand boxes which they ordered for last year's crop, but which in consequence of the crop not being so large as was expected they now have on hand, and they would like to use these boxes for their next year's crop, whereas if this amendment came into force, they would not be able to use those boxes. I think that is a concession to the condition of the trade which we ought to make. But my hon. friend evidently does not understand the situation when he expresses the view that we should not to-day legislate for a box for a year hence. One of the most important things in the trade is that the packers, box-makers and fruit growers should know some little time before hand the kind of boxes they are going to use.

Mr. HENDERSON. Is this box intended to approximate in size to the bushed measure ?

Mr. FISHER. It is believed by those who have measured it carefully that three of these boxes will contain exactly the same amount of fruit as the barrel which is defined in the other part of this Act.

Mr. HENDERSON. I would say to the minister that I do not intend to enter into a discussion as to whether this is the proper size for a box or not ; but I would remind him that only the day before yesterday he told us that we would have time to communicate with our constituents on this matter, and now he has suddenly and, I think, rather unfairly sprung this on the committee. I wrote immediately to a party from whom I knew I would get reliable information, but no opportunity has been given me to get that information. I think the hon. gentleman should not press this matter so hastily. He tells us that the fruit-growers have approved of this. Well, I would like to have the opinion of the fruit-growers in the county which I have the honour to represent. I know that they have an association to deal with all matters of this kind. I do not propose to oppose the measure as it stands, because I might make a mistake ; but I would like to know that their views are fully represented in it, or they may differ from other associations from whom the minister has received information. I trust that he will not press the matter to a final issue until we have had an opportunity of hearing from those whom we represent.

Mr. INGRAM. The hon. minister is doing in this box legislation exactly what he did in the barrel legislation. In the barrel legislation he specified a minimum size, and it works like this. The cartage and the freight are exactly the same for the larger as for the smaller barrel, and when the apples are placed on the market the larger barrel has an advantage over the smaller. The reason the minimum barrel was adopted was that the manufacturers of barrels made that size and did not wish to change their machinery. The hon. gentleman is

pursuing a similar course with respect to the boxes. There will be two or three sizes, and the same difficulty will be experienced. Why should there not be uniform barrels and uniform boxes, so that all parties would be placed on the same footing when entering the British market?

Mr. FISHER. I beg to thank the hon. member for Halton (Mr. Henderson) for reminding me that he desired the other night to have this matter left over until he could communicate with his constituents. I had forgotten that for the moment, and I have no hesitation at all in acceding to the request that the resolutions should not be proceeded with now, and that abundant opportunity be given to all to hear from their constituents or from any others interested in the matter. At the same time, if any one wishes to make any further suggestions. I shall only be too glad to hear them before the committee rises.

Mr. MONK. I wish to make this suggestion. It is possible that the Fruit-Growers' Association may have passed a resolution recommending that boxes of this size be used, and I understand that it is a matter of importance to my hon. friend to communicate the views of the association, which can be done easily through the newspapers or otherwise, to parties engaged in the export of apples. But has the association actually gone so far as to demand that a law should be passed defining the size of these boxes? Since my hon. friend has consented to put off the consideration of this measure, I would ask him if he would have any objection to lay on the table of the House the communications of the Fruit Growers' Association?

Mr. OSLER. Are all the apples shipped in the same sized boxes?

Mr. FISHER. No. At the present time there is no standard box. The consequence is that there is some variety in the sizes of the boxes used. The fruit-growers and the shippers have asked that we should, as far as possible, define a minimum box, so that they would not be getting smaller boxes.

Mr. OSLER. That would mean that there would be boxes of different sizes?

Mr. FISHER. We expect, and it has been the result in the case of the barrel, that when a minimum is fixed, the box or barrel makers will take that as their standard, so that in ninety-nine cases out of one hundred that will be the size used. At the same time, if anybody chooses to use a larger box or barrel, he can do so.

Mr. BLAIN. I would like to draw the minister's attention to a statement that was made by the hon. member for Prince (Mr. Lefurgey) when this matter was under consideration before. He said that the question whether barrels or boxes were the best had been considered by a commission which had been appointed in the United States, and that the report of the commission was in favour of barrels for export rather than boxes. Might I ask the hon. minister if he would be good enough to look into that, and bring before the House whatever information he can obtain on that point?

Mr. CHISHOLM. In the county which I have the honour to represent a great many apples go to waste every year, because the growers pick the apples and leave them on the ground in piles awaiting the buyers who are to classify them and put them into barrels. It has been very difficult to get barrels, and the result has been that many apples have been frozen on the ground. The farmers could make the boxes themselves and avoid delay and loss caused by waiting for barrels. It is important that this question of boxes should be settled as soon as possible. I am satisfied that many thouands of dollars' worth of apples were lost in the county I represent last year, because the farmers were not able to take care of them themselves. And I would suggest that more fruit inspectors be sent out to instruct the farmers in this matter. I would further like to suggest that some arrangement be made as soon as possible to avoid such an enormous loss. If our farmers had an idea of the size and the kind of boxes required, they would no doubt be in a position shortly to make the boxes themselves, and it would be well to have a standard box, not merely for export, but also for our internal trade, for we have a great market in our own country, especially in the Northwest.

Hon. SYDNEY FISHER (Minister of Agriculture). I am very glad to hear the remarks of the hon. gentleman. The difficulty of getting boxes and barrels in certain seasons depends largely upon the size of the crop. When there is a very large crop, the box and barrel makers are not always able to meet the demand. Unfortunately the apple crop varies very much from year to year. In some years we have an enormous crop and in other years a much smaller crop, and our box and barrel makers are at a loss to know what stock to prepare in advance, as of course they do not care to have a large quantity left on their hands at the end of the season. As regards what my hon. friend says about teaching the farmers how to pack, my department has already taken steps in that direction. For two or three years back we have had at the exhibitions, where we could reach the fruit growing sections, an expert actually doing the work of packing apples so as to illustrate the best method. That was done in connection with the demonstration of the Fruit Marks Act, so as to teach the people how to pack the apples themselves under that Act and the best way of handling their fruit. As regards the packing

by the farmers themselves instead of selling to packers, that is a matter of trade and commerce with which I do not think the department ought to interfere. All we can do is give the people information and let them judge for themselves how they should conduct their own business.

Mr. MACLEAN. I would like to point out that when there is a large stock you can easily make boxes, but not barrels. The last year or two, the packers could not get barrels on account of the difficulty of splitting staves and drying them, but boxes can be made almost while the apples are being handled.

Mr. FISHER. All the more reason for the change.

RAILWAY ACT.

Bill (No. 36) to amend the Railway Act, 1903—Mr. Fitzpatrick—read the second time.

Mr. SPEAKER. When shall the House go into committee ?

Mr. W. F. MACLEAN. I am quite willing that we should go into committee now provided that the Minister of Justice will give one or two days' notice of the third reading, as I have two or three amendments to propose.

Mr. FITZPATRICK. What my hon. friend really wishes, I presume, is to move, by way of amendment, the different clauses of the Bill now in his name on the order paper.

Mr. W. F. MACLEAN. Yes.

Mr. FITZPATRICK. I think it would be advisable to thresh them out in committee. There are some features in one of the clauses of his Bill which I think ought to be discussed.

Mr. W. F. MACLEAN. I am not quite ready to go on now, but will be on Tuesday.

REVISION OF THE STATUTES.

Mr. R. L. BORDEN. I would like to ask my hon. friend the Minister of Justice what the present position is of the revision of the statutes.

Mr. FITZPATRICK. It is nearing completion, and there is an item in the estimates which I have kept over so as to be in a position to give some explanation to the House. I am waiting to get a report from the commissioners and my expectation is that the work will be practically completed this session.

Mr. A. C. MACDONELL. What statutes are comprised in the revision ?

Mr. FITZPATRICK. All the statutes to the present year, and it is intended to ask leave to include the statutes of this session.

DRAWBACKS ON RAW MATERIALS IN THE UNITED STATES TARIFF—SUPPLY.

Hon. WILLIAM PATERSON (Minister of Customs) moved that the House go into Committee of Supply.

Mr. W. F. MACLEAN (South York). I wish to draw the attention of the government to an economic revolution, as it is described in 'Le Canada,' which has taken place in the United States and greatly affects our country. That revolution is in connection with the recent change made in the United States regarding drawbacks. In the 'New York Tribune' of Sunday, February 5, there is a special from Washington dated February 4, which says :

> Free hides, wool, lumber, in a word free raw and partially manufactured materials of every sort and description are now at the disposal of American manufacturers engaged in the export trade, as the result of the far-reaching drawback decision of Attorney General Moody, the text of which was published in the 'Tribune' of February 3rd.

I want to read one or two clauses from the decision. The Attorney General of the United States has given this opinion :

> In my opinion, where it is proposed to export a product manufactured in the United States from a combination of domestic material and foreign material which has paid duty, and the customs officials can identify the foreign material and can ascertain to their satisfaction, by the evidence of books of account or otherwise, the quantity or measure of the foreign material actually present in the completed article, the exporter is entitled to receive a drawback of ninety-nine per cent of the duties paid upon the imported material thus ascertained to be actually present in the completed article.

And, as I have read, this is now held in Washington to apply to every article imported into the United States for use in the production of goods to be exported. In other words, a great revolution has taken place in the trade of that country, which vitally concerns the people of Canada. And to make still clearer what the American government is aiming at, I wish to read a speech of the late Mr. McKinley that was quoted by the Attorney General of the United States and on which this recent order is based. I may say, also, that this is a reversal of two previous decisions, and is now considered to be final. The speech of Mr. McKinley in 1890 was, in part, as follows :

> The Bill proposes that the American citizen may import any product he desires, manufacture it into the finished article, using in part, if necessary, in such manufacture, domestic materials, and when the completed product is entered for export, refunds to him within one per cent of all the duty he paid upon his imported materials. That is, we give to the capital and the labour of this country substantial free trade in all foreign materials for use in the

markets of the world. We do not require that the product shall be made wholly of the foreign material. Already under special provisions of laws and regulations of the Treasury Department, parts of the finished product made here and attached to the finished article does not deprive the exporter of his drawback. We have extended this provision, and in every way possible liberalized it, so that the domestic and foreign product can be combined, and still allow to the exporter ninety-nine per cent upon the duty he pays upon his foreign material intended for export; which is, in effect, what free traders, and our political opponents are clamouring for, namely free raw material for the foreign trade. And if you are desirous of seeing what you can do in the way of entering the foreign market, here is the opportunity for you.

It completely, if the provision be adopted, disposes of what has sometimes seemed to be an almost unanswerable argument that has been presented by our friends on the other side—that if we only had free raw material we could go out and capture the markets of the world. We give them now within one per cent of free raw material, and invite them to go and capture the markets of the world.

Mr. Springer—Will the gentleman permit me to ask if that also applies to wool?

Mr. McKinley—Yes; it applies to anything which they choose to import for purposes of manufacture.

Here, then, is the completion of the policy as outlined by Mr. McKinley in 1890, when the tariff was revised. And it has now been sustained by the opinion of the Attorney General of the United States and put in execution by the Secretary of the Treasury. He has issued an order, dated February 4, addressed to all collectors of customs instructing them that the opinion of the Attorney General is authorized by the Treasury, and that this drawback of 99 per cent is to go into effect immediately. As I have just said this is a great revolution. The object, as Mr. McKinley pointed out, is to capture all the foreign trade of the world. That this is a matter immediately affecting Canada is proven by the fact that the decision was given in connection with the drawback on an article imported into the United States from Canada—our wheat known as No. 1 hard. The object of the legislation as applied to that article is to allow the American millers to bring in Canadian wheat from our Northwest on the payment of a duty of 25 per cent per bushel, use it in their mills, mix it with the wheat of the United States and export the product, receiving a drawback of 99 per cent of the duty that had been paid. And what Secretary Shaw, of the Roosevelt cabinet said on that point is as follows:

It is, of course, impossible to say now just what effect this drawback ruling will have, but it will probably result in the consumption of several thousand, or perhaps several hundred thousand bushels of our domestic wheat in foreign markets that would otherwise have been thrown upon our own markets at a reduced price or not sold at all. I think it is safe to say that more than $100,000,000 worth of our foreign trade to-day depends upon drawbacks for its being.

He gives an illustration bearing out this idea by showing that by reason of a drawback the American manufacturers are in a position to capture the locomotive trade of the world and that as a matter of fact, they are capturing it to-day. The correspondent of the 'Tribune' who is very well informed—and he is evidently inspired because the 'Tribune' is the official organ of the administration—goes on to say:

The officials of the Treasury Department do not believe that the drawback allowed on Canadian hard wheat will cause any reduction of the customs revenue. None of that cereal is being imported now, they say——

——I dispute that, by the way——

——and the only effect that can be brought about will be the increased sale of American soft wheat, which goes into the manufacture of exported flour. The best of the domestic wheat remains in this country and will stay here, drawback or no drawback. The cheaper grades are used with the Canadian wheat to make the flour that is demanded by the foreign trade. Heretofore these grades have not found a ready market in this country, for unless they are mixed with hard wheat they do not make a good bread-making flour.

The wheat raisers of the Northwest are raising some objection to a reduction in the price of the better grades of grain, and it is conceded that they have some grounds for this apprehension. But the amount of hard wheat raised on this side of the border is small, when compared with the output of the soft grain fields, and the interests benefited by the allowance are believed to be tremendously larger than those injured. The most strenuous objectors to the drawback ruling will be the millers of the Dominion of Canada. Their flour, which is now shipped to Liverpool, London, Glasgow and the other great markets of the United Kingdom, will soon meet a vigorous rival in the product that will be ground by the mills of Minneapolis, St. Paul, Chicago, St. Louis and other cities. If the American millers take away a good proportion of the trade now held by the Canadian manufacturers through the operation of the drawback concession, it may have a serious effect on the labour problem of the Dominion. If these labour interests are strong enough, it is suggested by the Treasury Department officials an effort may be made to pass an export tax law for Canada. Nothing short of such a drastic measure could interfere with the new flour trade American mills hope to acquire across the Atlantic.

Now, the trend of opinion in the United States is all in the direction of taking away from Canada the export market that we now have for our hard wheat. Our hard wheat is the best in the world. The Americans on the contrary produce any amount of wheat of lower grade. They are not in a position to export that wheat unless they can get the Canadian wheat to mix with it. But, getting the Canadian wheat, as they now propose to get it, they intend to take away the market we now have. We have a splendid and growing trade in our hard wheat and

the flour produced from it. Canadian mills are doing a large and growing trade. Canadian railways are carrying the product of this wheat for export, and Canadian transportation interests get the benefit of all freight and other charges. And Canadian workmen get all the work in connection with it. And yet we read that the policy of the American government and the American millers is to take our wheat into their country, grind it there and export it, thus depriving us of the export trade we have, depriving our railways of the business of transporting it and our men of the wages to be earned in grinding and handling it. And they say that there is but one thing that will stop them from doing this, and that is what they call a drastic measure, namely that Canada may put on an export duty in the case of such wheat.

The other day in Montreal, at a meeting of the Board of Trade, Mr. Meighen, who is president of that body, made a statement dealing with this very question. He said there was a danger of Canada losing this trade, and he went so far as to say that he was in favour of an export duty on Canadian wheat—not so wide as had been proposed, but certainly an export duty on Canadian wheat that was to be used to be mixed with American wheat in order that a market might be found for low grade American wheat. Now is it not a matter of national policy, a matter of extreme national peril that the government ought to consider—and it is for this reason that I direct to it the attention of the House.

Now I am not afraid to say—I am speaking altogether for myself—that I am ready to declare myself in favour of an export duty on wheat going out of this country to be ground in the United States. I think I can give good reasons for it. First of all, the work ought to be kept in this country. In the next place, I contend that if you grind Canadian wheat in Canadian mills you get the offal, as it is called, for use in Canada for feeding cattle. If the wheat is exported the offal goes abroad and never comes back, but when you grind the grain in the country and sell the bran and shorts to Canadian farmers, it is used in our own country for feed and manure, and add to the productiveness of the land, and in every way the Canadian is benefited. But if you send the raw product away the country is being depleted of its natural wealth, the productiveness of the land is being reduced, and the Canadian Northwest will be brought to the condition in which we find many of the northwestern states of the United States to-day, they are unable to produce hard wheat, and I contend that is largely due to the fact that the raw products have been sent out of that country, and no return has been made to the land to maintain its productiveness. A minister of the present government who was in the Northwest recently said, not long ago when he came back, that the impression made upon him by his visit was that an enormous effort will have to be made by the people there if they wish to maintain the fertility of their soil, and to control the wheat market. It has been found now that the wheat belt keeps moving north, keeps moving backwards, and the day may come when we will not have enough hard wheat of our own to mix with our own cheaper varieties. Therefore, not only is it in the interest of the Canadian workingmen and Canadian capital invested in mills, but it is in the interest of the farmer in our Northwest, that something should be done to secure the grinding of our own wheat in our own mills. I say now, notwithstanding what has been argued by some, that the Canadian farmer in the Northwest will benefit by this drawback. Perhaps for a time he will get a higher price for his product, but I contend that in the long run it will be found to be an injury. That western country is for the benefit of all Canada, and every wheat raiser in the Northwest must desire to see eastern Canada built up by these mills, and eastern workingmen kept busy, and that business may be found for our railways.

But the principle of an export duty is not confined to wheat, it touches upon and concerns a large number of other articles. For instance, we have in the province of Ontario the greatest supply of nickle ore in the world. To-day a large number of men are employed in developing those ores; but by reason of our present laws, and in line with the policy of the American government, we are allowing that nickle matte, that is to say, the article which has undergone the first process to be exported to the United States and refined in that country, so that for one dollar that we pay in wages here to Canadian workmen, twenty dollars are paid in wages to the United States workmen. I do not think that is in the interest of this country, and if an export duty on that nickle matte going out of this country would keep it here so that it should be refined in Canada, I think it ought to be done. Then with regard to our pulp wood, we are exporting to-day enormous quantities to the United States to be used in paper mills there, and enormous quantities are sent to the old country. Now an export duty on pulp wood would keep that industry in this country.

The Minister of Agriculture said the other day that he desired to see the cattle embargo removed from our cattle in the old country. I disagree with him there, because his policy is to have the lean cattle of Canada go into the British market. But farming is taking a new turn in these days. A good farmer does not seek simply to raise grain and sell it, but if he is wise he will raise grain and feed it to his cattle and sell only the finished product. If he is wise, the farmer, instead of selling the milk

from his cows, will use separators and make the butter himself and use the skim-milk for feeding pigs and hens, and thereby increase his profit. The same principle runs through many other industries; and the whole tendency is to produce the finished products in this country, even on the farm. If we in Canada can produce some finished product on a farm which will bring a higher price and furnish more labour for Canadians, we ought to do it.

Now we come to another thing. I was reading this morning a little pamphlet of Mr. Nicholl's, of Toronto, who deals with the great development of the water-powers of Niagara. Under the law of the province of Ontario, those who are about to turn out this enormous development of electrical energy at the falls, are free to export fifty per cent of their product to the United States; so that power generated on the Canadian side of the falls, is by law, as it stands to-day, to be exported into the United States, there to be used to build up immense industrial concerns. An export duty on electrical energy would prevent that. This is another instance of the new policy of encouraging commerce that has been adopted by the United States government. I say the time has come when we as Canadians, especially since we have embarked upon the national policy, ought to keep our own markets for our own manufacturers, and our own work for our own work people. We may be forced by reason of this new policy in the United States to adopt, and extensively to adopt, the principle of export duties. It has been applied with marvellous success in the province of Ontario with regard to saw-logs. Not long ago we exported all our saw-logs, we rafted them across the lake to mills in Michigan, where they were cut up and where American workmen, and American machinery and American capital found large profits. But by reason of an agitation carried on in that province a change was made, and a law was passed that all the saw-logs cut off the Crown lands must be manufactured into lumber in Canadian mills.

Proposals of that kind are being made from day to day. The people are thinking about these things and to give the government some idea of what is going on and to enable the people of the country who are interested in this new legislation in the United States to express their views I am directing attention to it to-day. The government have told the country that they are about to appoint a commission on tariff questions. I hope the powers of that commission will be wide enough to enable them to investigate matters of this kind and to go into the question of how far this new doctrine of drawbacks in the United States will affect Canadian trade. I think when they find out how extensive it is they will be very much interested. Even the shoe trade will be interested because the Americans have made this rule so wide that not only the leather but the shoes made from the leather of imported hides are entitled to this drawback. Woollens made in the United States from imported wool are entitled to this drawback and will come into competition with Canadian woollens. This goes all through the export trade, and therefore when the government go into this question they will find that they will not only have to take up the question of tariff revision having regard to the duties imposed under the Customs Act, but they will have to take up the question in connection with drawbacks and probably the only way to meet this new system of drawbacks in the United States is to have recourse to an export duty. One argument I have read during the last few days against the imposition of an export duty is this. In London, England, they are putting up the largest mills in the world for the grinding of flour out of Canadian wheat, and I have been asked: Would you put an export duty on wheat that goes over to the old country to be ground in London? I would. Large mills would be worth just as much to the mother country and to Canada if they were located on the Lake of the Woods. If we can grind our own wheat in our own country and give work to Canadian workmen retaining the shorts and the bran for feeding Canadian cattle we ought to do so. We can do that without injuring the farmers in the Northwest Territories a single bit. I know that the great cry will be that you are going to injure the Canadian farmer in the Northwest. But, in bringing up the question as I do here to-day, those who represent that country and that interest will have an opportunity either now or later on to discuss the question and to present their views. I believe that the Canadian public will demand that in order to preserve our export trade and to hold our own against this new and revolutionizing policy of the United States we shall do something in this country and do it very shortly. It is simply to bring the question before the government and before the people that I take this opportunity of introducing it to the House. I would have given notice of it but I only got hold of the Montreal paper a few minutes ago with that heading on it. I am speaking altogether from my own point of view, but from a close study of the way trade is moving in this country and in other directions it is constantly coming home to us that the people of the United States, the millers, and manufacturers of the United States, assisted by a most active and progressive government and a government that is protectionist up to the hilt, have brought about a revolution in trade matters that is of the most vital interest to the people of this country.

Mr. G. H. PERLEY (Argenteuil). Mr. Speaker, without going into the merits of

the question raised by my hon. friend for South York (Mr. Maclean), I wish to correct one statement which he made and which I would not like to have appear on 'Hansard.' That is that the province of Ontario put an export duty on saw-logs. That was not a correct statement of the facts, as the province of Ontario has no power to impose an export duty. What the province of Ontario did was to put into its regulations that saw-logs cut on the Crown domain must be manufactured in the province of Ontario. Of course, a private individual who has some timber on his own land can cut that timber and export it if he sees fit. I would like to make this explanation because in the United States the question was raised as to whether this was an export duty within the meaning of the law over there.

Mr. W. F. MACLEAN. It must have been a slip of the tongue because my own understanding of the matter is exactly in accordance with the statement of my hon. friend from Argenteuil (Mr. Perley). It was an Act of the Ontario legislature in connection with the licensing of the cutting of timber on Crown lands, but it had the desired effect.

POLITICAL CRISIS IN QUEBEC.

Mr. J. E. E. LEONARD (Laval). (Translation). Mr. Speaker, the press of this country has published, for the last few days, all sorts of rumours to the effect that a crisis is preying upon the Quebec cabinet and that three of the ministers have resigned.

'Le Journal' of this morning announces that the hon. the Minister of Inland Revenue has been charged by the prime minister (Sir Wilfrid Laurier) to go down to Quebec with a message of peace. Here is what the paper says:—

> Quebec, February 8.—Hon. L. Brodeur, Minister of Inland Revenue, and Senator Dandurand have arrived at Quebec this morning with a message of peace, which they brought from Ottawa, on the part of the federal government. As representing the Ottawa government, Messrs. Brodeur and Dandurand have had a conference with Hon. Messrs. Gouin and Turgeon, on the one hand, and Hon. Messrs. McCorkill and Archambault representing the prime minister, Mr. Parent, on the other hand.
>
> Hon. Mr. Brodeur delivered his message on the part of Sir Wilfrid Laurier and his colleagues of the ministry, a message in which a program for reconciliation had been traced.

I am sorry the prime minister is not at his seat at this moment, but perhaps the hon. Minister of Justice (Mr. Fitzpatrick) is aware of what is going on. I would be much pleased—and so would many a member of this House—to hear from the honourable minister as to whether Hon. Mr. Brodeur has been charged by the government or by the prime minister to go and settle the difficulty which prevails in Quebec since a few days, and as to whether the government has received any communication from the Minister of Inland Revenue on this subject.

Mr. FITZPATRICK. (Translation). Forsooth, my hon. friend understands how desirous I would be to satisfy his curiosity. Unfortunately, Hon. Mr. Brodeur is now absent from the House. I have every reason to believe that he will be here tonight. Should my hon. friend be willing to repeat his question, I think the Minister of Inland Revenue would be in a position to give him an answer.

Mr. LEONARD. (Translation). Has he been charged to go to Quebec and deliver a message of peace ?

Mr. FITZPATRICK. (Translation). My hon. friend will get an answer directly from the minister who is concerned in this, and not through the newspaper fuss, which he deems so important.

Motion agreed to, and House went into Committee of Supply.

Hon. WILLIAM PATERSON (Minister of Customs). If the hon. gentleman (Mr. Foster) is agreeable we will take up the Trade and Commerce estimates—steamship subsidies.

Mr. FOSTER. I thought it was understood that we should go on with the estimates of the Public Works Department. It is very inconvenient, as the hon. minister will see, when we have an idea that he is going on with certain estimates to be launched into something else.

Mr. PATERSON. If you are ready to go on with the Public Works estimates all right. I thought you were waiting for the report.

Mr. FOSTER. We are ready to go on, as I intimated, on the same conditions as those under which we proceeded before if it is quite agreeable to the hon. Acting Minister of Public Works (Mr. Hyman). His report came down to-day.

Hon. CHARLES HYMAN (Acting Minister of Public Works). Yes.

Mr. FOSTER. So that relieves the situation as his report is down.

Victoria Memorial Museum and other buildings, $250,000.

Mr. HYMAN. This vote of $250,000 is to make provision towards the erection of the Victoria Memorial Museum. The contract has been let; the building is being erected on what is known in Ottawa as the Stewart property, which was acquired about two years ago for the purpose of this memorial. The building is intended to be used for the Geological, Natural History and Fishery Exhibits which are in

the possession of the government and for the Art Gallery. These different collections are now stored in different places entirely unsuitable and inadequate for the purpose. The contract has been let to Mr. George Goodwin, Ottawa, for $950,000. The estimated cost in addition to that of the building is for heating, $50,000 ; electric wiring and fixtures, $60,000 ; fittings and furnishings, about $100,000, with the usual allowance for contingencies bringing up the total estimate made by the architect to about $1,250,000.

Mr. INGRAM. Before we proceed with the discussion of a Public Works item, I would ask the minister if there is no report of his department later than the one which I hold which is only up to June 30, 1903 ?

Mr. HYMAN. I have here a report which was laid on the table of the House this afternoon which is up to June 30, 1904. I shall be happy to send it to the hon. gentleman.

Mr. BLAIN. When will this building be completed ?

Mr. HYMAN. The time given for the completion of the building is four years.

Mr. BLAIN. Does the hon. gentleman not regard this as a large amount of money ?

Mr. HYMAN. There is no doubt about it.

Mr. BLAIN. I mean to be expended in this way ; it is a much larger amount than was proposed when the plans were first prepared. Were the plans completed altogether by the architect of the department ?

Mr. HYMAN. The plans were made by the department.

Mr. SPROULE. How many tenders were there, and will the minister give us the different tenders ?

Mr. HYMAN. There were five tenders for the building running from $950.000 to $1,349,500. The tenders were as follows :

Geo. Goodwin, $950,000 (accepted).
M. Connolly, $1,157,955.
Holbrook & Sutherland, J. C. Low, $1,239,000.
Stuart & O'Leary, $1,319,314.
Sullivan & Langdon, $1,349,500.

Mr. SPROULE. It was awarded to the lowest tenderer then ?

Mr. HYMAN. Yes.

Mr. FOSTER. Was there not some delay or difficulty as to the signing of the contract with Mr. Goodwin ? How was that finally arranged ?

Mr. HYMAN. There was delay in the signing of the contract, but there was no arrangement made. Mr. Goodwin was notified by the department immediately that the contract had been awarded to him by Order in Council, and for some time he did not sign the contract. No arrangement was come to and no change was made in the contract.

Mr. INGRAM. When this item was brought up on the 24th of March, 1904, it was stated that a part of the vote was for the purpose of a fireproof office and other buildings. How have they progressed, these offices and other buildings that the item of $170,000 was supposed to partly cover ?

Mr. HYMAN. I presume that was for the archives building which was passed the other day and which I explained fully then. It is being built on the property owned by the government just in rear of the Printing Bureau.

Mr. INGRAM. Of this vote of $170,000 of which $73,500 was paid for the Stewart estate, the balance was said to be for the fireproof office. There was no explanation as to where it was to be located and we have heard nothing of that since. Now there is no part of this money that hon. gentleman speaks of, this $950,000, to go for offices, it is simply for the Victoria Memorial Museum.

Mr. HYMAN. The first item in this vote, Dominion Archives Building, is for a fireproof building. It is in another part of the same vote.

Mr. INGRAM. What connection had it with this vote in 1904 ?

Mr. HYMAN. It is all in one item, item 115.

Mr. INGRAM. So that item, 115, covers them both ?

Mr. HYMAN. Yes, this is only a part of the item.

Mr. FOSTER. What kind of a building is this to be, what material, &c. I think that with a building of that size and costing this amount we should have the plans before us so that we might understand something of the proposed building. It seems a little blind really to go into an expenditure of over a million without seeing the plans. Although I am not an expert and although many others on this side may not be experts, still it is always a fair thing to ask that the profile of the building or something that will give an idea of what it is proposed to build, should be before the House.

Mr. HYMAN. I shall be very glad to lay a plan on the table. I think I have a picture of the building that possibly would give more information than anything else that could be laid before the House. I shall place it on the table to-morrow.

Mr. FOSTER. Now as to the material and the general character of the building.

Mr. HYMAN. The building is designed to be 420 feet long. The main building will

be 219 feet long by 53 feet deep, and there will be a wing at either end 54 feet by 143 feet 6 inches. There will be a tower rising 58 feet. The building is to be four stories with a basement and subbasement except the tower which of course has an additional story and an additional elevation. The general height from the ground line will be 106 feet, and from the ground line to the top of the tower, 220 feet. The walls are to be of stone. The intention is to use Nepean stone, like that in the Parliament buildings, with brown stone facings. The roof is to be of non-combustible materials.

Mr. HAGGART. Is the building to be fire-proof ?

Mr. HYMAN. Practically fire-proof. The floors will all be of cement.

Mr. INGRAM. How does it come that the hon. gentleman has made a change in the size of the building ? When the item was first brought in, the statement made by the minister was that the main building was to be 208 feet long and the wings 126 feet.

Mr. HYMAN. At that time I presume the whole plan of the building was not prepared.

Mr. FOSTER. What is the general plan of the inside ?

Mr. HYMAN. It is very hard to describe it.

Mr. FOSTER. That illustrates why we should have the plans and profiles here at the time the vote is going through.

Mr. HYMAN. The hon. gentleman understands that it is impossible to bring all the plans of the building here.

Mr. FOSTER. We ought to have something. The House does not know anything about it. It is all right in the noddle of the architect and in the mind of the minister, but neither should expect the House to vote such a large sum of money without seeing any plan or profile. Useful suggestions might sometimes be made by members of the House. At any rate, the House is voting the money, and we would like to see, as nearly as we can, an outline of what is proposed by the government.

Mr. HYMAN. The eastern wing from basement to attic is to be occupied by the fisheries museum and the art gallery ; the amphitheatre by the furnace room in the basement, the lecture hall and gallery above, and the geological survey library at the top. Exclusive of the tower, main hall and amphitheatre, the building is to be divided as follows : The basement and second floor into offices, and the ground, first and third floors each into four large museum rooms.

Mr. FOSTER. The offices are for what ?

Mr. HYMAN. The geological survey. I will bring down to-morrow an outline of the building, which will give practically all the information desired.

Mr. FOSTER. Is provision made for storing everything that we have in the old museum ?

Mr. HYMAN. Yes.

Mr. FOSTER. I imagine that the amount we have stored now, however large it is, is not all that we shall have to provide for in the future years. The collections are every year being added to, so that I should imagine that the provision for extra store room ought to be very considerable.

Mr. HYMAN. The department in considering that question took this into consideration, that having the new building, and having all the specimens properly stored, the increase would possibly be larger than it is at present, and therefore we have allowed room for storing everything that we possess at the present time and room for practically as much more.

Mr. FOSTER. What floor space would be taken by the present collections, distributed on the new plan ?

Mr. HYMAN. I have not exactly the number of square feet of floor space of the building.

Mr. FOSTER. How was the purchase of this land made—through an agent ?

Mr. HYMAN. I understand that it was purchased at auction, at a Master in Chancery sale.

Mr. FOSTER. Then there was no commission to be paid ?

Mr. HYMAN. There was one commission to Taggart.

Mr. FOSTER. Why was there a commission ?

Mr. HYMAN. He was to be paid a commission for obtaining a site.

Mr. FOSTER. Who paid the commission? Did it come out of the purchase price, or was it in addition to the purchase price ?

Mr. HYMAN. I suppose to all intents and purposes we paid it, although when the property was put into Chancery the price placed upon it was $75,000, and the department bought the property for enough less to pay the commission.

Mr. FOSTER. Is it the general practice of the department in getting sites for public buildings to employ a broker and pay him a commission ?

Mr. HYMAN. It is, in a great many instances, and the sites have to be got in that way. During the short time I have been in the department I have found great dif-

ficulty in obtaining sites. The very moment that it is known that the government are after a site, an attempt is made to advance the price. So that we must of necessity employ an agent to obtain options. I acknowledge that in certain instances which have come before me the commisison has appeared to be large; but it must be remembered that by using the services of an agent the department has purchased the property at considerably less than it would probably otherwise have done. I have endeavoured in these matters to deal with an agent as an ordinary business man would.

Mr. FOSTER. I think that is reasonable in most cases, and probably the minister gets the properties much cheaper by employing an agent, provided he does not let it be known before his agent gets to work that he is after the property. I imagine that information of that kind soon filters out in a city like Ottawa, and that those who have properties that are eligible, soon find out that the government are in the market and look upon the agents as emissaries of the government. What other sites were under consideration and were other options got?

Mr. HYMAN. I do not know that we went to the extent of getting any other options but there were several sites discussed. One is the property which the government have since acquired for the mint—the proposed extension down Mackenzie avenue. There was also a property of Bronsons' facing on the driveway, under consideration.

Mr. FOSTER. The face of the building will be right at the foot of the street?

Mr. HYMAN. Yes, the building is being placed so that Metcalfe street will strike the front of it.

Mr. BLAIN. Here is a contract for $950,000 and the total cost, when completed, will be $1,250,000. That means that the minister will deal with six or seven contractors before he is through with the building. The electric lighting is estimated to cost about $50,000, and he will receive tenders for that. Would it not be much better for him to have a plan made out comprising everything and call tenders for the building and equipment complete rather than deal with a number of separate contractors? One advertisement could be sent throughout the country to cover the whole matter. Such an advertisement would reach more people and bring out more tenders, and the sub-contractors would have to deal with the original contractors instead of with the government.

Mr. HYMAN. That would not be possible. The heating and electric lighting work may not be proceeded with for several years. It is not the policy of the department to call for tenders for the heating until the building is practically roofed in, and I do not think that any one would care to tender for the electric lighting contract when the work could not be begun for at least two years from the date of the tender. No one would care to discount the labour market and the market for material so far ahead.

Mr. BLAIN. When my hon. friend estimated that the lighting would cost about $50,000, he must have made some calculations on which to base that estimate. And as regards looking into the future, he must realize that if the building will be four or five years in construction, the contractor will have to look considerably ahead just as would the contractor for the lighting. If a contractor can look ahead in the case of a contract reaching to the amount of $950,000, surely he can look ahead in the case of a contract amounting to only $50,000. The usual way of letting contracts for buildings generally throughout the country is to ask one man or firm to contract for the whole thing and let the party putting up the building deal with only one contractor. It would be a saving to the public treasury if the hon. gentleman would adopt the up-to-date policy rather than the antiquated policy in the erection of public buildings.

Mr. LENNOX. In saying that it is not advisable to commit the government to prices as regards the electric lighting. Has the hon. minister regard to the possibility that there may be a change in the conditions within two years?

Mr. HYMAN. I said it would be almost impossible, when it would take four years to complete the building, to enter now into contracts in detail for the heating, lighting and electric work. There is a vast difference between entering into a contract for the construction of a building and into comtracts for heating and lighting. The contractor for the construction will buy immediately all the material he requires and can fix immediately his prices for almost everything, but he would not care to lay in to-day a stock in hand for heating and electric lighting which he would only require to use four years hence. I have had considerable experience in my own private business in the construction of buildings, and I cannot recall one single instance in which I called for a tender for everything in the one contract. The usual course is to ask for tenders for the building and then, when the building is nearing completion, to call for tenders for the equipment.

Mr. LENNOX. There may be a good deal in what the minister says but the department should be consistent. I understood him to say that owing to possibly changed conditions, it would be inadvisable for the department to commit itself to fixed prices now.

Mr. HYMAN. I said nothing of the kind. What I said was that a contractor would hesitate making a contract two years ahead at fixed prices.

Mr. LENNOX. If the hon. gentleman means anything, he must mean that by committing ourselves at this time we would have to pay higher prices because in four years hence the conditions may be changed and the contractor, if called upon to fix prices to-day, and take chances on the future, he would make them higher than he otherwise would. So, by delaying and by watching the position and taking advantage of the improvements in electrical appliances in the meantime, we should get more satisfactory conditions and lower prices. That may be true; it very likely is true. But, if it is true, I call the attention of the minister to the position taken by some other members of the cabinet, notably in the M. P. Davis contract. In that case, though electricity was more in its infancy—if we may use that term—than it is to-day, and though changing conditions were likely to lower prices, the government gave a contract to run for eighty-four years. What was good in one case ought to be good in another. And if the government is right in the present instance, they must have been far wrong in the case of the Davis contract. I will not go into that, but merely cite it as an illustration. I may have occasion to give the government the pleasure, as I did last session, of hearing me on that subject.

Mr. BLAIN. As to the question whether the policy the minister adopts is the up-to-date one or not, I would simply call his attention to the fact that in the most recent and up-to-date buildings in Montreal the contract was let, not only for the building, but for the lighting and heating at one time.

Mr. FITZPATRICK. Which was that?

Mr. BLAIN. The Board of Trade building.

Mr. MONK. They are all that way.

Mr. FITZPATRICK. No. What about the Canadian Pacific station?

Mr. MONK. Exactly the same way.

Mr. FITZPATRICK. Not at all. I know something about that.

Mr. BLAIN. I understand that the government erected some steel sheds in the city of Montreal at a cost of some $3,000,000. May I ask if these were not let under one contract to be completed for occupation?

Mr. MONK. Of course; to Mr. Peter Lyall.

Mr. BLAIN. As to the time to arrange for the lighting and heating equipment for a building costing a million and a quarter of dollars, every one knows that the proper time is when the building is being constructed—that is the cheapest way to do it, and it is the way followed by those who are up-to-date. It is all very well for hon. gentlemen opposite to let a contract for a building at $950,000, and say: After that is done we will put in further advertisements and call in other friends and give them a contract for the electric lighting. When that is done they will call in other supporters and give them a contract for the heating. And so on. I suppose that is very good political policy, but I do not think it is a policy that will commend itself to the people of this country, nor do I think it a policy that will protect the public treasury.

Mr. HYMAN. As to the contract for the sheds, the hon. gentleman (Mr. Blain) knows as well as I do that that contract was let by the Harbour Commissioners of Montreal. I presume the hon. gentleman desires to be fair, and, that being the case, he will admit that the question of providing electric light for a lot of iron sheds is entirely different from the lighting of a building of the character of that we are now discussing. As to what the hon. gentleman says about calling in a lot of friends of the government, he knows perfectly well that, in items such as this, the whole thing is done by tender. He knows it is all open to public competition, tenders being called for by advertisement in the public press. The whole question is one in which I must be guided by the opinion of the chief architect of the department. He has had experience, and he tells me that the plan we have adopted of calling for the main tenders first and the others afterwards is distinctly in the public interest. It is clear I could not refuse to follow the advice of the chief architect in such matters unless I had very strong evidence that he was wrong.

Mr. INGRAM. That is not the point that we want to get at—or that I want to get at, at least. Session after session we are asked to vote sums on the strength of statements which afterwards turn out to be incorrect, and the House is led to vote sums which, if hon. members were made aware of all that was involved, probably would not be voted. The hon. gentleman (Mr. Sutherland), whom the acting Minister of Public Works (Mr. Hyman) succeeded, pledged himself and the department that in all cases of new work he would place before the House the estimated cost, so that the House might know the total of the sums it would be called upon to vote for the service. But I understood the hon. gentleman (Mr. Hyman) to say that he does not intend to carry out that undertaking, but will leave the matter open, so that he can come down year after year and ask for any sums he may think well in order to carry on works that have been begun. I object to that way of doing business, and I think we have good reason to object. This is the first session of a new parliament, and we should understand what the course of the government is going to be in

this matter. During the recent Dominion election a really alarming state of affairs developed. We found Liberal candidates declaring that they had secured large sums of money to be expended in the constituencies for which they sought to be elected. I think the hon. gentleman (Mr. Hyman) himself was a sinner in that respect. My opponent was able to tell me and the people that he had secured several thousands of dollars for public works in the constituency. Having the estimates before me, and having studied them pretty carefully, I found no mention of such votes. Yet this candidate could have the presumption to say that he had secured thousands to be expended in that constituency. We want that all stopped. When a public work is proposed, we want to know what is the estimated cost, in order that we may vote the money intelligently, and in order that the public may judge intelligently the votes we give. I see some hon. gentlemen on the other side who, when they sat on this side and when we were in power, condemned in the strongest language the very things that they approve of to-day. The hon. minister has competent engineers and other officials to advise him and to give him information. He should give us estimates that will guide us in judging of the reasonableness of the votes he asks us to give. The course that is now followed has been pursued for years, and it is time that it should be changed.

Mr. HYMAN. I have no fault to find with a good many of the remarks which the hon. gentleman (Mr. Ingram) has made. But he is entirely wrong—though I am sure he does not wish to be unfair—when he suggests that I have refused information or have failed to give estimates of the expected cost of any public work. When the vote was first called for I gave the estimate of the total cost of this building when completed. I gave it in detail. I am carrying out—I remember well the complaint that he refers to made by the Minister of Public Works (Mr. Sutherland)—and I am endeavouring to carry out that very principle. I told the House that the contract for the building was $950,000. I gave the House, in the first place, the detailed estimate of the cost prepared by the architect of the department. It is estimated the heating will cost $50,000. What more information can I give the House ? The plans and details for heating have not been made at the present time, but the estimate has been made by an experienced officer of the department. It is estimated that the electric wiring and fixtures will cost $60,000 ; fittings and furniture, $100,000 ; which, together with the usual contingencies, will make the total cost of the building $1,275,000. I am sure the hon. member for East Elgin (Mr. Ingram) does not wish to be unfair, he cannot charge me with keeping back any information I have. This information has been handed to me by the officers of the department. The contract is made in the regular way, and what more can be expected ? In regard to the hon. gentleman's remarks as to what may have been stated by candidates in the election contest, I do not suppose that he means to hold the government responsible for all the remarks made in the heat of the election contest, either in the press or on the platform.

Mr. INGRAM. The titular minister deliberately told the House last year that in performing any new work, he would place an estimate before this House of the cost of the work, that is, what he pledged himself to do. Do I understand the acting minister pledges himself that he will continue that policy?

Mr. HYMAN. As long as I am permitted to remain in the Public Works Department I shall always be glad to give the House the fullest information I possess in regard to any work that is proposed. The hon. gentleman will understand that these things are to a large extent in the hands of the officers of the department. But I do not propose to ask the House to vote any money without giving to the fullest extent the estimates of the necessary work as made by officers of the department. If it is afterwards found that an estimate has to be exceeded, I shall give an explanation of the reasons. The hon. gentleman will understand that it frequently happens that when an estimate has been made as carefully as possible, it has been found necessary afterwards to change the work in some manner which may affect the original estimate. That occurs in the Public Works Department almost daily, that we have found it impossible to carry out a work for an amount which the officers estimated in the first place.

Mr. INGRAM. If the statement made by the absent minister had been borne out today by the acting minister, we would have no reason to complain. When the titular minister introduced this item in the first place, he said that there would be a frontage of 280 feet, and that the two wings would be 126 feet in length. He said that he had not charged his memory with all the plans, but he intended to lay the plans on the table, but he did not do it. That showed that the plans were in existence at the time, and he knew what the measurements were. So we find that before the department has decided upon what they really intend to build they come down here and make a loose statement that is not borne out by the actual facts in the contract submitted to the House.

Mr. HYMAN. There may be some misapprehension. As a matter of fact this building, as shown by the plans which the hon. member for North Toronto (Mr. Foster)

has in his hands, is one main and two wings. The main part of the building is 219 feet, and the two wings are to be added to that length. I have no doubt the Minister of Public Works, in giving the dimensions of the building, possibly gave only the width of the main building.

Mr. BERGERON. What is to be done with the building which is presently known as the Geological Survey building ?

Mr. HYMAN. We will not require to decide that question for three or four years.

Mr. FOSTER. On the question of contingencies and superintendence, for which there is an estimate of $40,000, how much of that is for contingencies and how much for superintendence? Could he give a little more detailed statement as to the expenditure of that $40,000.

Mr. HYMAN. No, I have not those details. But it has been the custom in the department for many years to add to the cost a certain percentage for contingencies.

Mr. FOSTER. What division is made of that ?

Mr. HYMAN. I have no division made of that. In this case there is an officer of the department who has general supervision of the work. It is a very large building, and his time will be charged to that particular work, to contingencies.

Mr. FOSTER. That system is still kept up?

Mr. HYMAN. Yes.

Mr. FOSTER. What was the purchase price realized at auction for the property?

Mr. HYMAN. $73,250.

Mr. FOSTER. I see by the Auditor General's Report that a commission of two and a half per cent was paid by the government.

Mr. HYMAN. Yes.

Mr. FOSTER. So there was no deduction from the price paid to the vendor, but the commission was paid by the government ?

Western departmental block—addition, $85,000.

Mr. HYMAN. This is a vote for the purpose of erecting a building to connect the Department of Customs in the western block with the Department of Inland Revenue. I think most of the members of the committee know the situation of the Customs wing, and it is intended to create offices by connecting these two wings, and it will also add materially to the appearance of the block. There is now a courtyard there used for storage purposes, but when the connection is made it will leave this store room and add materially to the appearance of the building. It will make practically four sides to the building instead of three. The plans are being prepared but they are not ready yet. I hope to be able to advertise for tenders at an early date. The estimated cost of the buildings proper is $90,000, heating, $8,000; electric wiring and fixtures, $5,000; fittings, furniture and contingencies, $12,000, about $115,000 altogether. The building will be used for general government offices. The Department of Inland Revenue has been complaining for a long time that many of their valuable instruments are not properly housed. Instead of renting other buildings the intention of the government is to endeavour to complete this in time so that it can be used by that department. And, the Department of Public Works will also avail themselves of a portion of this building. There has never been any proper draughting room for the officers in the department and it was thought better to provide sufficient accommodation for these two departments.

Mr. R. L. BORDEN. How many offices will this give ?

Mr. HYMAN. The intention is to extend the present wing and the dimensions of the extension will be 83 x 36. There has been no decision arrived at as to the exact division of these offices.

Mr. FOSTER. How many stories will there be ?

Mr. HYMAN. Three stories available for offices. The intention is to use the whole of the top flat as a draughting room for the Public Works Department. At the present time a part of the staff is on the top flat and a part in the cellar. The light is very bad and it is almost impossible for the staff to properly do the work they are called upon to do. The intention is to have one draughting room covering the whole area of this building.

Mr. FOSTER. I infer from what the hon. minister says that after that $115,000 is expended—and it is a large amount of money—the new space that is created in that building will be all taken up by the present officers of two of the departments and the work which they are carrying on.

Mr. HYMAN. Practically, I said that.

Mr. FOSTER. That is what practically will be the case. Then it will not relieve the congestion and it will not make any less the rentals necessary for the work of the departments as they are now being carried on in rented buildings in Ottawa. The point I wish to get at is that after you expend $115,000 you do not seem to relieve any of the congestion that is now attempted to be relieved by the renting of buildings outside, but immediately the two older departments simply swarm and fill up all this

new space. Of course, the officers of the department ought to have sufficient room in which to fairly carry out their work, but it seems to me that an expenditure of $115,000 ought to do something more than merely enable more conveniences to be given to the work of two departments. One of these departments is not a very largely growing department. The Inland Revenue Department is a routine department very largely, and I do not suppose that it is increasing its staff or requires to increase its space very much. The Department of Public Works is employing a large number of people, there is no doubt about that, but the hon. minister knows—if he does not know it now he will find it out—that whenever new space is allowed there is a scramble in the department for every man to get double room or treble room or more if he can get it. That is going to absorb all this space. I hope the hon. minister will see that a sufficient amount of pressure is brought to bear to prevent the number of offices from expanding unnecessarily and to get out of this large expenditure some relief for the congestion outside. It is a matter that almost startles a man who has been out of the House for four or five years. When we were here we used to do some renting and a certain amount of money was paid outside for rented buildings. To-day one can hardly walk about any street without stumbling upon some place which bears upon it the impress of a public department, and we are paying an immense amount of money for the rent of these buildings. If these departments are permanent, then it would be much better for the government to incur the initial expense of building for the permanent work of these departments than to pay through the nose expensive rentals in different parts of the city. Besides that you would get your people more closely together, more under your supervision and their work would go on better under these circumstances than when they are distributed all through the city. While you use a certain amount of the space in this way it seems to me that with three or four stories and an expenditure of $115,000 you ought to take care of some of the men who are now dispersed in rented buildings throughout different parts of the city. Have the Department of Public Works and the Department of Inland Revenue any outside rentals ?

Mr. HYMAN. Yes.

Mr. FOSTER. I do not mean outside warehouses, but I mean buildings for departmental or staff work.

Mr. HYMAN. The Georgian Bay canal survey work is not being done in the department.

Mr. FOSTER. Of course, that is rather special work.

Mr. HYMAN. I do not know if the Department of Public Works has anything else outside except the workhouse.

Mr. TAYLOR. How about the Department of Inland Revenue ?

Mr. HYMAN. I think the Inland Revenue Department have.

Mr. FOSTER. Will this extension allow of these offices being brought in ?

Mr. HYMAN. I am afraid I cannot promise the whole. The main difficulty in connection with the Department of Inland Revenue, is that they have a large number of instruments which are supposed to be in use in the department, but they have not been able to use them up to the present time because of the congested quarters in which these instruments are placed. The expenditure is a large one, I am prepared to admit, for the small amount of room that is being provided, but unfortunately in making this expenditure we have to take into consideration the order of things which at present exists. We must use the same material, we must follow the same method of construction as that which was followed in the old building, and that is a very expensive piece of construction. In addition to the two departments I named I forgot to mention that it is intended to provide some extra room for the Customs Department. I would ask the committee to bear in mind that while we are not really housing any of the outside departments, we are preventing the renting of any other outside buildings by providing for the officials of these three departments. I know, as far as the Department of Public Works is concerned, that in their present crowded state it is almost impossible for the officials of the department to properly perform their work. They are crowded in every nook and corner of the building and I am in hopes that when we get the draughting room away we will be able to give some part of the department room in which they can perform their work properly.

Mr. FOSTER. In providing this new building will the improved system be carried out there of having your officers not working in separate rooms but working in large rooms where they can work with the greatest economy of space and where they are under supervision ?

Mr. HYMAN. In this particular case those going into the top flat of this building will all be in one room and it is our desire to carry out that practice as far as possible. The way in which the old buildings are laid out, I think, is ridiculous. We find branches of departments in which men who are doing the same work are housed in some corner or in separate rooms. My own idea is that large rooms should be provided so that proper supervision may be had over the clerks and more businesslike methods may

prevail in the departments. As to the wider question of housing the whole of the public service and providing for the departments that are in outside buildings I hope to be able to lay a good deal of information on that subject before the House at a later date. As far as I am concerned if I have anything to do with the construction of a new building for that purpose the very plan which the hon. gentleman suggests will certainly be carried out in its entirety. I feel that better work could be got from the officers of the departments and that better supervision could be maintained if they were housed in the way that the hon. gentleman suggests instead of men being stowed away in every nook and corner of the buildings.

Mr. FOSTER. One more suggestion and I shall have finished my criticism on this point. There are two methods of procedure, one is to build larger and perhaps add at the same time to your force, but space could also be greatly economized by dispensing with the supernumerary and useless workers. Has the minister really put his business mind to a thorough revision of the working economy of the staff, officers and workers in the Public Works department? I do not want to make any rash assertion, but I venture to say that if the minister were conducting a business of his own and if he had to live on the margin of his profit and went into the matter in a business way he would so arrange the work there that it could be effectually carried on with a far less number of staff and workers than it is now carried on in the department. That may be true in regard to most of the departments. The old system of having them cooped up in separate rooms lends itself to a poor method of work, so far as results are concerned, but along with his extension of space I hope the minister will put some of his business energy into a revision of the staff to see that none but those who are actually necessary are there and that every man who is there is doing his fair share of work. I do not say that slightingly of the civil service, but at the same time where you have hundreds and thousands of men employed it sometimes happens that you have more labour than can be wisely or economically employed, so that by a little pruning the space may be economized.

Mr. HYMAN. I must remind my hon. friend (Mr. Foster) that the work of the Public Works Department is very onerous, and that the increase in the number of clerks does not at all correspond with the increase in the work. I am endeavouring to exercise whatever supervision is possible.

Mr. HAGGART. It is not possible for me to be here to-night, and as we are within two items of the vote for the Montreal, Ottawa and Georgian Bay Ship Canal, on which there will be considerable discussion, I would ask if the minister would fix a day on which we can discuss it?

Mr. HYMAN. I would be glad to adopt the suggestion. Would Tuesday do?

Mr. HAGGART. Any day as long as we understand it.

Mr. HYMAN. I suppose that any day will do so long as I give a day's notice?

Mr. HAGGART. Certainly.

At Six o'clock, committee took recess.

After Recess.

Committee resumed at eight o'clock.

Quebec harbour improvements, $157,000.

Mr. BERGERON. How does the Quebec Harbour Commission stand with the government now?

Mr. HYMAN. This work is not being done by the Harbour Commission, but by the department.

Mr. BERGERON. Is it not about time that the government took hold of all these works? I see by the orders before us that the Minister of Marine and Fisheries wants to put a stop to the existing conditions in the harbour of Montreal, so that the works will be carried on by the minister who is directly responsible to parliament. I understand that in Quebec the commission is completely behind, and I think there should also be a change there. It is entirely wrong for us to spend money with nobody responsible for it. Where is the line of demarcation between what the government spends and what the Quebec Harbour Commisison spends in the same harbour?

Mr. HYMAN. I am unable to draw the exact line of demarcation. I see no reason why the harbours of Montreal and Quebec should be singled out and dealt with in a different way from other harbours. It may be in the interest of the public that another policy should be adopted. That is a pretty large question, on which there might be a profitable discussion; but I do not suppose there is any desire to discuss it in this particular item.

Mr. BERGERON. What is the particular work for which we are voting this money?

Mr. HYMAN. This is for an enlargement of the Louise embankment at Quebec. It is a work that has been going on for two or three years. It is intended more particularly to increase the accommodation for the landing of ocean steamers, and we are waiting for the completion of this work in order to put up proper sheds to provide the necessary accommodation. If the hon. gentleman saw the condition of affairs that I saw at Quebec at the time I visited the harbour, he would realize the necessity for this work. There

were landed no less than three large boat loads of immigrants, some of whom were practically without accommodation, and it was impossible for the officers of the department to handle them properly. I am sure this work is an absolute necessity.

Mr. BERGERON. I understand that it is a work which under ordinary circumstances should be done by the Quebec Harbour Commission.

Mr. HYMAN. I presume that the government undertook to do the work themselves instead of advancing the money to the Harbour Commission.

Mr. BERGERON. When this work is completed, will the government collect the dues, or will the Harbour Commission collect them ?

Mr. HYMAN. I am not prepared to discuss that question. I presume that the hon. gentleman understands that the Department of Public Works has nothing to do with the collection of dues. The moment this work is completed it is transferred to the Department of Marine and Fisheries.

Mr. BERGERON. What will the whole work cost when it is finished ?

Mr. HYMAN. $400,000 odd.

Mr. BERGERON. We are spending practically half a million dollars on this work when we have at Quebec a commission which is supposed to collect dues and which is not paying interest on the money which the government has lent it. We have two masters in the harbour of Quebec, and all the money comes from the treasury of Canada. This is a state of things which I am sure cannot last very long. We cannot discuss the principle of the matter on this item, but I want to raise my voice against such a state of things.

Mr. MONK. Has the hon. minister a copy of the Order in Council changing the attributions of the Department of Public Works and passing a portion of them over to the Department of Marine and Fisheries ? Is not the harbour of Quebec included in the works which have been handed over to the Department of Marine and Fisheries ?

Mr. HYMAN. The harbour of Quebec has always been under the Marine and Fisheries Department. But the contract for the actual building of the wharf comes under the Public Works Department. Notwithstanding that these works are in the harbour, they have not been transferred from the Public Works Department to the Marine and Fisheries Department. The contracts having been let under the Public Works Department the work has continued under their charge.

Mr. MONK. But there are works executed by the government and there are works executed by the Harbour Board. In Montreal we have a large wharf at the end of St. Mary's current within the jurisdiction of the Montreal Harbour Board. Under the changes recently made those works are under the control of the Department of Marine and Fisheries.

Mr. HYMAN. The hon. gentleman (Mr. Monk) is in error. Those works are still under the control of the Public Works Department. When the transfer was made, existing works—that is, works under contract, including this work and the work in Montreal to which he refers—were left with the Public Works Department until completion, when they will be placed under the Marine and Fisheries Department.

Mr. MONK. The River St. Lawrence channel was transferred ?

Mr. HYMAN. Yes.

Mr. MONK. When this work in Quebec is handed over by the Public Works Department, will it be under control of the Marine and Fisheries Department, or under the control of the Quebec Harbour Board?

Mr. HYMAN. That, I presume would be a matter of policy with the Marine and Fisheries Department. We transfer it to that department.

Mr. MONK. The hon. minister does not happen to have any copy of the Order in Council?

Mr. HYMAN. No, but I remember the terms very well. I am sure these works were especially excepted under the transfer.

Mr. FOSTER. How much has been expended on this work and during what years?

Mr. HYMAN. The total is $195,000 for the years 1902-3, 1903-4 and 1904-5.

Mr. FOSTER. Has the minister a plan of the Quebec harbour with the works under the Harbour Commissioner and showing the work now being carried on?

Mr. HYMAN. I have not the plan here, but I shall be glad to lay it on the table, if the hon. gentleman desires it. He will understand that it is practically impossible to bring the plans for all these works; they are too bulky.

Mr. FOSTER. I know that the hon. gentleman (Mr. Hyman) is kindness itself in telling us what he will do at some time in the future. But this is a very peculiar—what shall I call it?—mix up. We have a Harbour Commission in Quebec with its jurisdiction and its duties. We have given it advances of money which have been expended by that commission under its powers. Those advances amount to some three millions, I think.

Mr. HYMAN. Five millions in round numbers.

Mr. FOSTER. Five millions of money has been advanced to the Quebec Harbour Commissioners on which, if I am correctly informed, not a cent of interest has ever been paid. And after all this money has been spent, the government jumps into the puddle and commences work within the area covered by the Harbour Commission's jurisdiction, constructs a work there and hands it over to the Marine and Fisheries Department. Who has the administration of Quebec harbour now ?

Mr. HYMAN. The commissioners.

Mr. FOSTER. The commissioners make the rules, take care of the shipping, collect the dues, and with the money, pay their officials and their help. Then—for what reason I do not know—but probably the government stood aghast at the amount of the advances that had been made to the Quebec Harbour Commission and did not wish to make another advance of half a million to be spent by their commissioners—the government makes an appropriation and carries out an enlargement of the harbour with the public funds but with no charge against the Harbour Commission. It seems to me that before this was decided upon, the time had come for the government to consider its whole policy with regard to the harbour and the commission. Is this a bankrupt commission? Though it has paid nothing, is there no hope that it can pay anything. Sometimes it is good business policy to make advances to complete a work with the hope that out of the trade it developes you may get not only interest on the last advance but interest on previous advances as well. There may have been reasons why this money should have been advanced, but one would naturally suppose that it ought to be expended under the Harbour Commissioners, who had made the expenditures so far, and ought to know better than any one else what parts of the harbour needed improvement and how the money should be applied. In that way the work would have been carried on with continuity and uniformity. But this course that has been followed is evidently an expedient to relieve the Harbour Commission—or the conscience of the government I do not know which. Instead of making any decision they defer even an examination of the question and carry out a policy which is mere patch-work. It is not a uniform and consistent policy by any means. Its lack of uniformity and consistency is all the greater when contrasted with the treatment of the harbour of Montreal, the harbour of Toronto, the harbour of St. John, the harbour of Halifax or any other harbour that I know of in the Dominion. Half a million is being expended and we are now asked to vote a couple of hundred thousand. I think the minister should have had plans here so that we might understand what is being done in its relation to previous improvements of the harbour. I confess I cannot from memory understand the geographical situation, nor can I understand how it joins with or will affect previous works in the harbour. But the minister ought to have those things here. We have been very lenient with him in allowing those things to go on without the plans. I do not want to be unreasonable, but I think in these cases the minister should be supplied with them and have them ready for us. Evidently the House cannot tell what it is doing.

Mr. HYMAN. I have told the House that it is an extension of the deep water landing. I cannot give all the plans, nor do I desire to withhold any information from the House.

Mr. FOSTER. A department like the Department of Public Works ought to have the profiles at least all ready to be spread on the table. These things are not costly, neither are they hard to carry around. When Sir Hector Langevin was administering that department fifteen years ago, he never came down to this House without the most perfect information, everything he had you could get from his book, or you could see his plans on the table. My hon. friend comes down here now with a few scraps of paper and large votes. He ought to have more scraps of information and smaller votes.

Sir WILLIAM MULOCK. It is entirely reasonable that all the information asked for should be given. I think we cannot give too full information as to the manner in which the people's taxes are being spent. But I can hardly agree with my hon. friend in his statement that Sir Hector Langevin was always prepared to give here all the information that the hon. gentleman is now asking for. Whilst I quite approve of what the hon. gentleman wishes to get, I cannot recollect that we ever had a Minister of Public Works who laid upon the table plans of proposed buildings. Occasionally it occurs, but I think my hon. friend will remember that it was rather the exception than the rule.

Mr. FOSTER. I do not mean that all the voluminous drawings necessary for the work proposed should be brought here, but what we call the profiles we should have.

Sir WILLIAM MULOCK. Sir Hector never brought down the elevations.

Mr. FOSTER. In justice to my old colleague, Sir Hector, there have been Ministers of Public Works on both sides, but I never knew a Minister of Public Works in this House who was so explicit in details, and who in his book had so many of these little plans ready, so that you could see by his putting the book on the table exactly every line upon which he was spending money. I do not mean that all the working plans and things like that should be brought

down, but a superficial view, so that we can tell exactly where it joins on to the present works and how far it goes.

Mr. BERGERON. How many gentlemen are there in the Harbour Commission of Quebec ?

Mr. HYMAN. I understand there are eight.

Mr. BERGERON. The Harbour Commission, I think, is dependent on the Department of Public Works.

Mr. HYMAN. No, it never has been.

Mr. BERGERON. Of course it was until lately, at least so far as Montreal is concerned.

Mr. HYMAN. The approval of plans and advancing the money belonging to the Public Works Department, but the actual control of the Harbour Commission is vested in the Marine and Fisheries Department, both in Quebec and Montreal, and everywhere else.

Mr. BERGERON. We are entitled to get some information about these commissioners, either from the hon. gentleman or from some officer in his department. I remember the criticism made in this parliament many years ago to the effect that it was an extraordinary state of things that this commission should be allowed to spend money without being responsible for it. I think the Minister of Marine and Fisheries will insist in his proposed Bill that they shall be responsible. I would like to know the names of the Harbour Commissioners there, and the names and number of the employees who are in receipt of a salary, or hold an office in the Harbour Commission of Quebec.

Mr. STOCKTON. I have listened with much interest to the information that was given by the minister and elicited by my hon. friend from North Toronto (Mr. Foster). Now it appears that this very large amount of money is to be given to the Quebec harbour board, which is not responsible to the government of Canada at all, and that the money is given without any control by the government as to the management of the harbour. It does seem to me that the time has come when the government should have some well defined policy with respect to all the harbours of our country—Montreal, Quebec, St. John and Halifax, and all other harbours requiring aid from the government. In St. John the people have spent $800,000 of their own money for the purpose of providing terminal facilities for the export trade of Canada, and I think the minister will admit that very slight encouragement thus far has been given to that port, in view of the expenditure the people have made of their own money. We are needing certain improvements, as the minister knows, in the harbour and port of St. John. There are certain reasons which have been given to me by the minister why certain work has not been done before, and which reasons are satisfactory. But it does seem to me that when we expend money in one port without having any control over its expenditure, or rather over the commission having charge of the harbour, we should extend some greater consideration to a port where the people have expended $800,000 of their own money to make it suitable for the export trade of this country.

Mr. HYMAN. Of course the discussion has broadened a good deal from the question before the chair, although I admit the hon. gentleman is quite in order in discussing it in connection with this vote. But I think possibly he might do better to discuss the general question of harbours on some estimate of the Department of Marine and Fisheries, at which time he will be able to get all the information.
