McGill University General Announcement.

SESSION OF 1896-97.

The sixty-fourth Session of the University, being the forty-first under the amended Charter, will commence in the autumn of 1896.

By virtue of the Royal Charter, granted in 1821, and amended in 1852, the Governors, Principal and Fellows of McGill College constitute the Corporation of the University; and, under the Statutes framed by the Board of Governors, with the approval of the Visitor, have the power of granting Degrees in all the Arts and Faculties in McGill College and Colleges affiliated thereto.

The Statutes and Regulations of the University have been framed on the most liberal principles, with the view of affording to all classes of persons the greatest possible facilities for the attainment of mental culture and professional training. In its religious character the University is Protestant, but not denominational; and while all possible attention will be given to the character and conduct of students, no interference with their peculiar religious views will be sanctioned.

The educational work of the University is carried on in McGill College, Montreal, and in the affiliated Colleges and Schools.

I.—MCGILL COLLEGE.

THE FACULTY OF ARTS.—The complete course of study extends over four Sessions, of eight months each; and includes Classics and Mathematics, Experimental Physics, English Literature, Logic, Mental and Moral Science, Natural Science, and one Modern Language, or Hebrew. The course of study is, with few exceptions, the same for all students in the first two years; but in the third and fourth years extensive options are allowed, more especially in favour of the Honour Courses in Classics, Mathematics, Mental and Moral Science, Natural Science, English Literature and Modern Languages. Certain exemptions are allowed to professional students. The course of study leads to the Degrees of B.A., M.A., and LL.D.

THE DONALDA SPECIAL COURSE IN ARTS provides for the education of women, in separate classes, with course of study, exemptions and honours similar to those for men.

THE FACULTY OF APPLIED SCIENCE provides a thorough professional training, extending over three or four years, in Civil Engineering

Mechanical Engineering, Mining Engineering and Assaying, and Practical Chemistry, leading to the Degrees of Bachelor of Applied Science, Master of Engineering, and Master of Applied Science.

THE FACULTY OF MEDICINE.—The complete course of study in Medicine extends over four Sessions of nine months each, and leads to the Degrees of M.D., C.M.

THE FACULTY OF LAW.—The complete course in Law extends over three Sessions of six months each, and leads to the Degrees of B.C.L. and D.C.L.

THE FACULTY OF COMPARATIVE MEDICINE AND VETERINARY SCIENCE.—The complete course of study extends over three Sessions of six months each, and leads to the Degree of D.V.S.*

II.—AFFILIATED COLLEGES.

Students of Affiliated Colleges are matriculated in the University, and may pursue their course of study wholly in the Affiliated College, or in part in McGill College, and may come up to the University Examinations on the same terms with the students of McGill College.

MORRIN COLLEGE, Quebec.—Is affiliated in so far as regards Degrees in Arts and Law. (Detailed information may be obtained from Rev. A. T. LOVE, B.A., B.D., Principal.)

ST. FRANCIS COLLEGE, Richmond.—Is affiliated in so far as regards the Intermediate Examinations in Arts. (Detailed information may be obtained from Rev. JOHN A. DRESSER, B.A., Richmond, P.Q.)

III.—AFFILIATED THEOLOGICAL COLLEGES.

Affiliated Theological Colleges have the right of obtaining for their students the advantage, in whole or in part, of the course of study in Arts, with such facilities in regard to exemptions as may be agreed on, and a number of Free Tuitions are granted by the Board of Governors to the students of these Colleges when matriculated in Arts.

THE CONGREGATIONAL COLLEGE OF BRITISH NORTH AMERICA, Montreal.—Rev. WILLIAM M. BARBOUR, D.D., 58 McTavish Street.

THE PRESBYTERIAN COLLEGE, Montreal, in connection with the Presbyterian Church in Canada.—Principal, Rev. H. MACVICAR, D.D., LL.D., 69 McTavish Street.

THE DIOCESAN COLLEGE OF MONTREAL.—Principal, Rev. Canon HENDERSON, M.A., M.D., 806 Dorchester Street.

THE WESLEYAN COLLEGE OF MONTREAL.—Principal, Rev. T. W. SHAW, M.A., LL.D., 228 University Street.

[Calendars of the above Colleges and all necessary information may be obtained on application to their Principals.]

*The complete Calendar, with information respecting all the Faculties, &c., may be obtained of J. W. Brakenridge, Esq., McGill College.

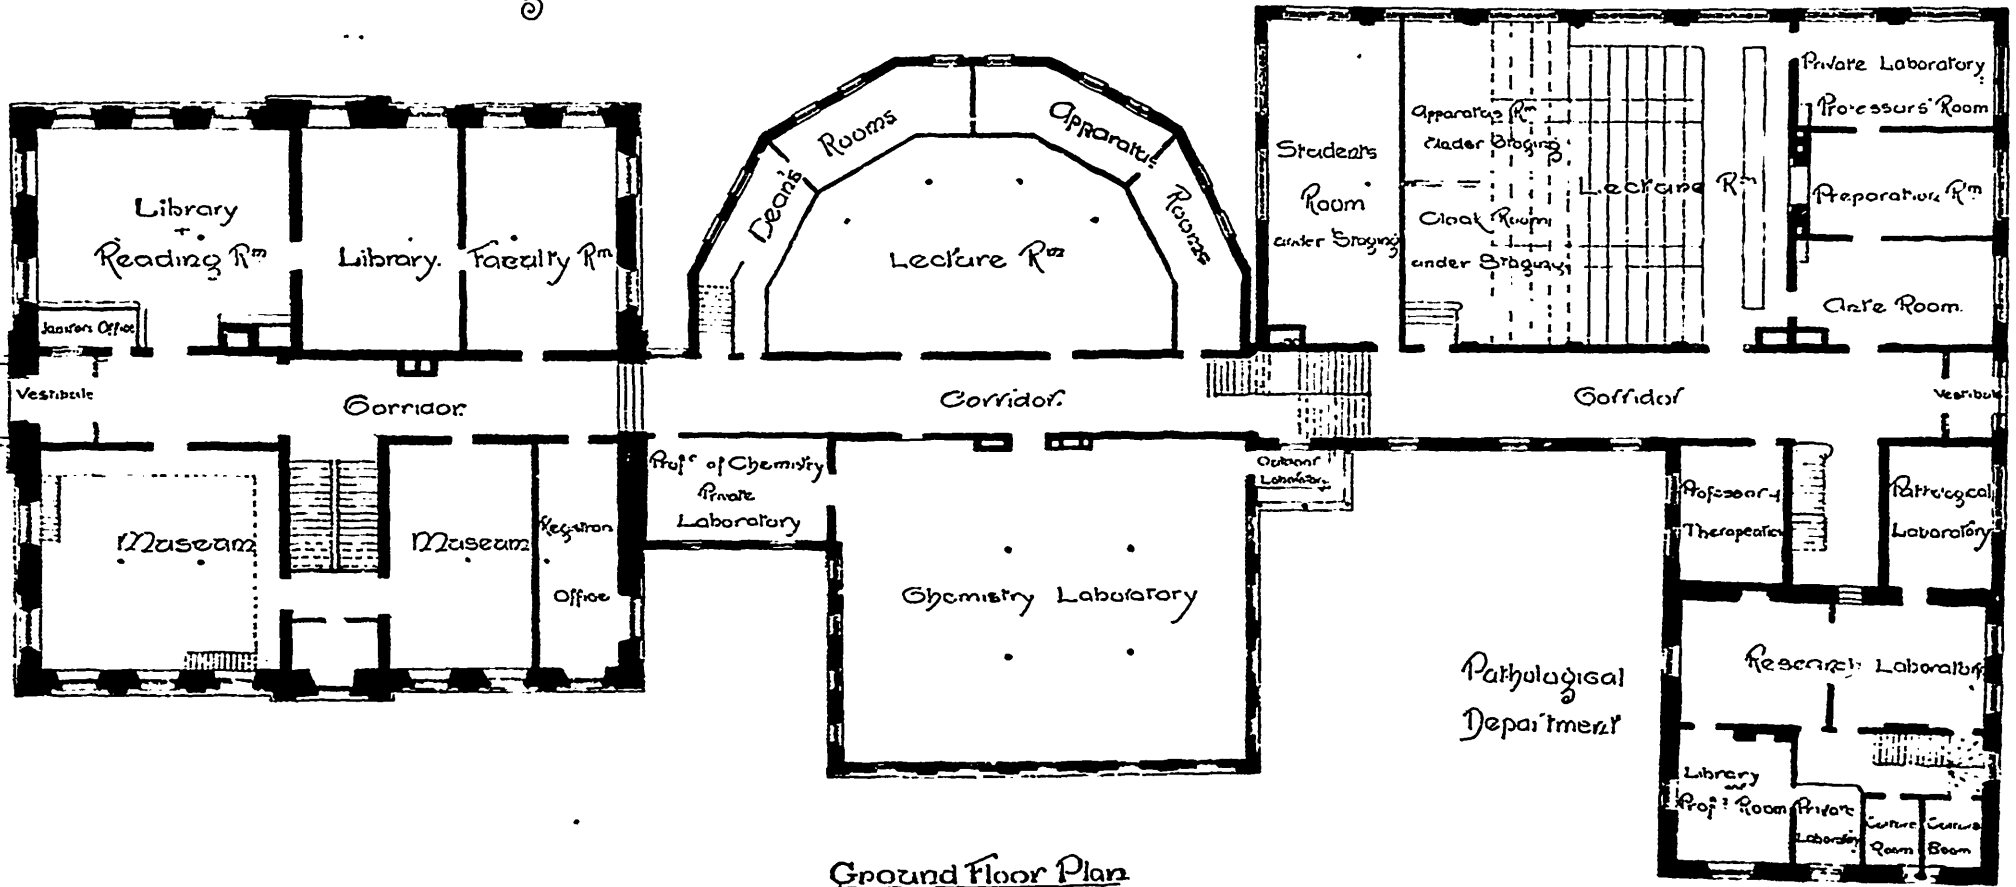

IV.—MCGILL NORMAL SCHOOL.

THE MCGILL NORMAL SCHOOL provides the training requisite for Teachers of Elementary and Model Schools and Academies. Teachers trained in this School are entitled to Provincial Diplomas, and may, on conditions stated in the announcement of the School, enter the classes in the Faculty of Arts for Academy Diplomas and for the Degree of B.A. Principal, S. P. ROBINS, LL.D., 39 Belmont Street, Montreal.

V.—AFFILIATED HIGH SCHOOLS, ETC.

The Trafalgar Institute for the Higher Education of Women, Simpson Street, Montreal; Principal, Miss Grace Fairley. The High School of Montreal, Metcalfe Street; Principal, Rev. E. I. Rexford, B.A. The Girls' High School of Montreal, Metcalfe Street; Lady Principal, Miss M. F. Findlay, B.A. Prince of Wales' College, Charlottetown, P.E.I.; Bishop's College School, Lennoxville; St. Francis College School; Miss Symmers and Miss Smith's School, Montreal; Eliock School, Montreal; Girls' High School, St. John, N.B.; Clarenceville Academy; Coaticook Academy; Cowansville Academy; Dunham Academy; Gould Model School; Huntingdon Academy; Inverness Academy; Knowlton Academy; Lachute Academy; Quebec High School; Quebec Girls' High School; Shawville Academy; Sherbrooke Boys' Academy; Sherbrooke Girls' Academy; Stanstead Wesleyan College; St. John's High School; Sutton Academy; Three Rivers Academy; Waterloo Academy; Waterville Academy.

WILLIAM PETERSON, M. A., LL.D., Principal.
ALEXANDER JOHNSON, M.A., LL.D., Vice-Principal.
ROBERT CRAIK, M.D., LL.D., Dean.
R. F. RUTAN, B.A., M.D., Registrar.
J. G. ADAMI, M.A., M.D., Director of the Museum.
F. G. FINLEY, M.B. (Lond.), M.D. (McGill), Librarian.

EMERITUS PROFESSORS.

WILLIAM WRIGHT, M.D., *Materia Medica*, 84 St. Famile Street.
DUNCAN B. MACCALLUM, M.D., *Midwifery*, 45 Union Avenue.
SIR WILLIAM DAWSON, C. M. G., LL.D., F. R. S., *Natural History*.

PROFESSORS.

ROBERT CRAIK, M.D., LL.D., Professor of Public Health, and Preventive Medicine, 87 Sherbrooke St.
G. P. GIRDWOOD, M.D., Professor of Chemistry, 82 University Street.
THOMAS G. RODDICK, M.D., Professor of Surgery, 80 Union Avenue.
WILLIAM GARDNER, M.D., Professor of Gynaecology, 109 Union Avenue.
FRANCIS J. SHEPHERD, M.D., Professor of Anatomy, 152 Mansfield Street.
FRANK BUTLER, M.D., Professor of Ophthalmology and Otiology, 123 Stanley Street.
JAMES STEWART, M.D., Professor of Medicine and Clinical Medicine, 285 Mountain Street.
GEORGE WILKINS, M.D., Professor of Medical Jurisprudence, and Lecturer on Histology, 508 Dorchester Street.
P. P. PENHALLOW, B.Sc., M.A.Sc., Professor of Botany, McGill College.
WESLEY MILLS, M.A., M.D., Professor of Physiology, McGill College.
JAMES CHALMERS CAMERON, M.D., Professor of Midwifery and Diseases of Infancy, 941 Dorchester Street.
ALEX. D. BLACKADER, B.A., M.D., Professor of Pharmacology and Therapeutics, and Lecturer on Diseases of Children, 236 Mountain Street.
R. F. RUTAN, B.A. M.D., Professor of Practical Chemistry, McGill College.
JAMES BELL, M.D., Professor of Clinical Surgery, 873 Dorchester Street.
J. G. ADAMI, M.A., M.D., (Cantab.) Professor of Pathology, 54 Durocher Street.
H. S. BIRKETT, M.D., Professor of Laryngology, 123 Stanley Street.
T. JOHNSON-ALLOWAY, M.D., Associate Professor of Gynaecology, 23 Mackay Street.
F. G. FINLEY, M.B. (Lond.), M.D. (McGill), Assistant Professor of Medicine and Associate Professor of Clinical Medicine, 503 Dorchester Street.
HENRY A. LAFLÈCHE, B.A., M.D., Assistant Professor of Medicine and Associate Professor of Clinical Medicine, 38 University Street.
GEORGE E. ARMSTRONG, M.D., Associate Professor of Clinical Surgery, 1157 Dorchester Street.

LECTURERS.

- T. J. W. BURGESS, M.D., Lecturer in Mental Diseases, Protestant Hospital for the Insane, Verdun.
- WYATT JOHNSTON, M.D., Lecturer in Bacteriology and Medico-legal Pathology, 74 Shuter St.
- W. S. MORROW, M.D., Lecturer in Physiology, 96 Park Avenue.
- JOHN M. ELDER, B.A., M.D., Lecturer in Medical and Surgical Anatomy and Senior Demonstrator of Anatomy, 4178 St. Catherine St.
- R. C. KIRKPATRICK, B.A., M.D., Lecturer in Clinical Surgery and Demonstrator of Surgery, 163 Mansfield St.
- C. F. MARTIN, B.A., M.D., Lecturer in Pathology and Demonstrator of Clinical Medicine, 33 Durocher St.

DEMONSTRATORS AND ASSISTANT DEMONSTRATORS.

- J. G. McCARTHY, M.D., Demonstrator of Anatomy, 61 Drummond St.
- D. J. EVANS, M.D., Demonstrator of Obstetrics, 939 Dorchester St.
- N. D. GUNNE, M.D., Demonstrator of Histology, 47 Union Avenue.
- J. J. GARDNER, M.D., Demonstrator of Ophthalmology, Phillips Square.
- G. GORDON CAMPBELL, B. Sc., M.D., Demonstrator of Clinical Medicine, 2475 St. Catherine St.
- W. F. HAMILTON, M.D., Demonstrator of Clinical Medicine, 801 Dorchester St.
- R. TAIT MACKENZIE, M.A., M.D., Demonstrator of Anatomy, 59 Metcalfe St.
- W. E. DEBBS, B.A., M.D., Demonstrator of Anatomy, 34 Park Avenue.
- JAMES A. HENDERSON, M.D., Demonstrator of Anatomy, 191 Bleury St.
- J. W. SCANE, M.D., Demonstrator of Physiology 4469 St. Catherine St.
- KENNETH CAMERON, B.A., M.D., Demonstrator of Clinical Surgery, 903 Dorchester St.
- C. G. L. WOLF, B.A., M.D., Demonstrator of Practical Chemistry, McGill College.
- E. J. SEWLE, B.A., M.D., Assistant Curator, 2101 Notre Dame St.
- J. A. SPRINGLE, M.D., Demonstrator of Anatomy, 410 St. Antoine St.
- W. I. BRADLEY, B.A., M.D., Demonstrator of Pathology, McGill College.
- W. H. JAMIESON, M.D., Demonstrator of Pathology, 96 Park Avenue.
- A. E. GARNOW, M.D., Demonstrator of Surgery and Clinical Surgery, 2706 St. Catherine St.
- F. M. FAY, B. A., M. D., Assistant Demonstrator of Pharmacology and Therapeutics, McGill College.
- J. D. CAMERON, M.D., Assistant Demonstrator of Physiology 2065 St. Catherine St.
- F. A. L. LOCKART, M.B. (Edin.) Assistant Demonstrator of Gynaecology, 59 Metcalfe St.

Announcement of the Faculty of Medicine.

SESSION 1896-97.

The Sixty-Fourth Session of this Faculty will be opened on Thursday, October 1st, 1896, by an introductory lecture at 3 p.m. Lectures for students of the first, second and third years will begin September 22nd. The lectures in final subjects will begin on October 2nd, at the hours specified in the time-table, and will be continued for six months.

The Medical School of McGill University was founded in 1822 as the "Montreal Medical Institution" by Drs. W. Robertson, W. Caldwell, A. F. Holmes, J. Stephenson and H. P. Loedel—all of them at the time members of the staff of the Montreal General Hospital.

Although founded in 1822, yet no session of the "Medical Institution" was held until 1824, when it opened with 25 students; in 1844 the number of students in the Faculty was 50; in 1851, 64, with 15 graduates; in 1872-3, 154, with 35 graduates; in 1892-3, 315, with 46 graduates; in 1894-95, 403, with 54 graduates.

There were no sessions held during the political troubles from 1836 to 1839, and it is owing to this fact that the present is the 63rd session of the Faculty. This is in reality the 66th session of the school, which is the direct continuation of the "Montreal Medical Institution."

In 1828, the "Medical Institution" was recognized by the Governors of the Royal Institution as the Medical Faculty of McGill University. At this time the lectures were given in a building on the site of the present Bank of Montreal. Later the school was removed to a brick building still standing near the corner of Craig and St. George streets.

In 1846, the lectures of the Faculty were given in the present central building of the University now occupied by the Faculty of Arts. On account of the inconvenience arising from the distance of the University buildings from the centre of the city, it was decided in 1850, to erect a Medical school building in Côté Street, provided with ample accommodation for Library and Museum, and furnished with a large dissecting-room and two lecture rooms; this building was occupied for the first time during the session 1851-2, and sufficed for the wants of the Faculty until 1872-73, when the present main building was provided by the Governors of the University.

In 1885, the building in the University grounds, erected by the Governors for the use of this Faculty, was found inadequate. A new building was then added, which, at the time, afforded ample facilities for carrying out the great aim of the Faculty,—that of making the teaching of the primary branches thoroughly practical.

Owing to the larger classes and the necessity of thorough laboratory teaching, the Lecture Rooms and Laboratories added in 1885, soon became insufficient in size and equipment to meet the requirements of the Faculty.

Mr. John H. R. Molson, with timely generosity came to the aid of the Faculty and in 1893, purchased property adjoining the college grounds and enabled the Faculty to erect new buildings and extensively alter and improve those already in use.

These buildings were completed and officially opened by His Excellency, the Earl of Aberdeen, visitor of the University, January 8th, 1895.

As will be seen on reference to the architect's plans on pages 34-35 the new buildings have been erected as an extension of the old ones, towards the northwest, partially facing Carlton road, and convenient to the Royal Victoria Hospital. They connect the Pathological building acquired in 1893, with the older buildings and comprise a large modern lecture room, capable of accommodating 450 students, with adjoining preparation-rooms and new suites of laboratories for Pathology, Physiology, Histology, Pharmacology and Sanitary Science. The laboratories, etc., in the older buildings, have been greatly enlarged and improved; the whole of the second floor has been devoted to the department of anatomy, and consists of dissecting-

room, anatomical museum and bone-room, preparation rooms, Professors' and Demonstrators' rooms, and a special Lecture Room.

On the ground floor the Library and Museum have been greatly enlarged: a room forming part of the Library has been furnished as a reading-room for the use of students, where the extensive reference library of the Faculty may be consulted.

On this floor are situated also the Faculty room, the Registrar's office, the special museum for Obstetrics and Gynæcology, together with Professors' rooms, etc. The chemical laboratories have been increased by including the laboratories formerly used by the department of Physiology.

In the basement are placed the janitor's apartments, cloak rooms with numerous large lockers, the Lavatory, etc., recently furnished with the most modern sanitary fittings.

Through the great liberality of the Honorable Sir Donald A. Smith in founding the "Leancoil Endowment," and of the citizens of Montreal and Medical Graduates in subscribing to the "Campbell Memorial Fund," the Faculty has been enabled to conduct and maintain the teaching of the different branches in a high state of efficiency.

The Faculty is glad to be able to announce that, by the liberality of the Honorable Sir Donald A. Smith in endowing the chairs of Pathology and Sanitary Science with one hundred thousand dollars, it is able to establish these departments on a footing fully commensurate with their importance and with the advances and requirements of modern medical science.

The attention of Practitioners is called to the Post Graduate and advanced courses established in 1896 in the hospitals and laboratories connected with the Faculty of Medicine. (See page 59.)

Lecture Rooms.

In the buildings now occupied by the Faculty this session, as will be seen by reference to the diagrams, in addition to the laboratories, dissecting room, etc., there are three large lecture rooms, two capable of comfortably seating about 300 students, and one for general lectures, examinations etc., capable of seating 450 students. These theatres are well ventilated and lighted by electricity, as indeed is the entire building. The seats are numbered and a lecture room ticket is given each student on enregistering and paying the sessional fee.

Rooms for Students Use.

Three cloak rooms are provided in convenient portions of the building and in addition commodious lockers can be procured provided with special locks at a nominal rental. A large well lighted reading-room containing newspapers, magazines and the current medical journals, is provided in the new block, and is managed by the students themselves. The original library has been refitted as a comfortable well lighted reading-room for students desiring to avail themselves of the reference works in the library of the Faculty.

Dissecting Room.

The Dissecting Room, which is situated on the second floor, is L shaped, one arm of which is 76 feet in length and 31 feet in breadth, and the other arm 45 by 32 feet. It is supplied with thirty dissecting tables and over 200 specially constructed lockers, and is well lighted for work during the day and night. In procuring appliances for the comfort and convenience of the students, no reasonable expense has been spared.

In connection with the dissecting room, there is a Bone room, and Anatomical Museum where students have an excellent opportunity of studying osteology, frozen sections, anatomical models and dry preparations. In connection with the bone room is a small but well arranged museum of comparative osteology. There are also rooms for the demonstrators of anatomy.

Physiological Laboratories.

The new Physiological Laboratories, which are situated on the upper floor of the new building, are supplied with the most modern apparatus for the practical teaching of this most important branch of the medical curriculum. They consist of one large room forty-five by thirty-five feet for undergraduate work and two smaller ones for more advanced work and private research. In addition there is a room set apart for a consulting library and for the special use of the Professor of this department. The Students' laboratory is arranged in such a way as to permit of students assisting at, and taking part in demonstrations.

Histological Laboratories.

The Histological Laboratory proper, is a large, well lighted room on the second floor of the new building. It is so arranged that over eighty

students can be present at the microscopical demonstrations. It is supplied with 50 microscopes. From the large number of microscopes employed, students will have special facilities in studying and making themselves thoroughly acquainted with the specimens that are the subjects of demonstration. In addition to the students' laboratory there is a smaller laboratory adjoining for the use of the professor and demonstrators and for special work.

Pharmacological Laboratory.

The Pharmacological Laboratory is a large room 45 by 35 feet, situated on the second floor of the new building and is now furnished with the necessary appliances for the practical teaching of pharmacology. In this room is placed a teaching museum of drugs and pharmaceutical preparations arranged according to their physiological action.

Chemical Laboratory.

The Chemical Laboratory is large, lofty, and well lighted, from three sides. It can accommodate comfortably 124 men, but only a much smaller number are allowed to work at one time. Each student, when entering on this course, has a numbered table in the laboratory assigned to him for his use during the session. Each table has its own gas and water fixtures, and is provided with shelves for its corresponding set of reagent-bottles, as well as a drawer and locker containing a modern set of chemical apparatus especially adapted for the work. This apparatus is provided by the Faculty, and supplied to each student without extra charge. The student is only required to pay for apparatus broken or destroyed.

The laboratory is ventilated by an electric fan and fully equipped for the various courses of study, thus giving to the student unsurpassed advantages for acquiring a sound and practical knowledge of medical chemistry.

Pathological Laboratory.

A large building of three stories, 47 by 40 feet, adjoining the College, recently acquired by the Faculty, thanks to the generosity of Mr. J. H. R. Molson, constitutes the Pathological Laboratory; it has undergone extensive alterations to fit it for the purpose. The uppermost floor has been converted into a work-room for the osteologist and curator; the second floor is one large laboratory for

classwork in Practical Pathology and Bacteriology ; upon the floor beneath, are two laboratories for research, a preparation room, professor's private room and library, and culture rooms; while upon the ground floor are rooms for the attendant, for storage and for keeping animals.

I.

MATRICULATION.

I. REGULATIONS OF THE FACULTY OF MEDICINE OF MCGILL UNIVERSITY.

Every Student before he can be enregistered as an undergraduate in Medicine, must present a certificate of having passed the Matriculation Examination of the Faculty of Medicine or Arts of this University, or of having passed some State or University examination accepted by this University.

Graduates in Arts of any recognized university and those who have passed the Entrance Examination of a Provincial Medical Council and thus become enregistered students in medicine of a province in Canada. are exempt from further preliminary examination.

Students from the United States who have passed a State or University examination fully equivalent to that required by this University, may at the discretion of the Faculty be admitted to study without further examination.

The Matriculation Examination of this University for Medicine is held twice each year, in June and September, at the same time as that for Arts and Science. (See Faculty almanack at beginning of this calendar.) The fee for this examination is five dollars payable on application to the Acting Secretary of the University, J. W. Brakenridge.

Papers for the June examinations will be sent to local centres on application to the Acting Secretary. An additional fee of four dollars, to meet local expenses, will be charged for such examination.

The September examinations are held just before the lectures in Medicine begin. These are held in McGill College, Montreal, only, and at these examinations alternative books in Classics will be accepted.

The subjects for examination are Classics, Mathematics and English, and one of the optional subjects as below.

COMPULSORY SUBJECTS.

Latin.—Cæsar, Bell. Gall. Books I. and II.; Virgil, Æneid, Book I., and Latin Grammar.

Mathematics.—Arithmetic (including metric system); Algebra, to quadratic equations inclusive; Euclid's Elements, Books I., II., III.

English.—Writing from Dictation. A paper on English Grammar, including Analysis. A paper on the leading events of English history. Essay on a subject to be given at the time of the examination.

OPTIONAL SUBJECTS.

(One only of these subjects is required.)

1. *Greek*.—Xenophon, Anabasis, Book I.; Greek Grammar.
2. *French*.—Le Bourgeois gentilhomme and French grammar.
3. *German*.—The first eighty pages of Joynes' German reader or equivalent and German grammar.
4. *Chemistry*—(As in Remsen's Elements of Chemistry, pages 1-160) and *Physics* (Gage and Fessenden's High School Physics).

II. REGULATIONS GOVERNING THE PRELIMINARY EXAMINATIONS OF CANADIAN AND ENGLISH LICENSING BODIES.

Students should bear in mind the fact that no degree in Medicine from a Canadian university carries with it a legal right to practice Medicine and Surgery in Canada, or in any other British possession. Each province in Canada has its own regulations regarding Entrance Examination, etc., and license to practice is conferred only on those who have complied with the regulations of the special province as to preliminary education, duration and course of study, etc. As the curriculum of professional studies of McGill University fully meets the requirements of all the Provincial Boards, attention will be called only to the regulations regarding Preliminary Education.

Each licensing body in England and Canada dates the period of beginning the study of Medicine from the time of passing the Entrance Examination accepted by it.

It is therefore of the highest importance that intending students should select that examination in preliminary education which will be accepted by the Licensing Board of the province or country in which they intend to practice their profession.

A. *To obtain a license to practice in England, India, or any other British Possession (Canada excepted).*

The Matriculation Examination in Medicine of this University, as described above, is accepted by the General Medical Council of Great Britain and Ireland. Graduates of this University desiring to enregister in England are thus exempted from any examination in preliminary education on production of the McGill Matriculation certificate together with a certificate that all the subjects of this Examination were passed at one time. Certificates of this University for attendance on lectures are also accepted by the General Medical Council.

B. *To obtain a license to practice in the Province of Quebec.*

No University Matriculation Examination is accepted by the College of Physicians and Surgeons of this Province. Graduates in Arts of any British or Canadian University are however exempted from examination, on presentation of their Diplomas.

Those who pass the Preliminary Examination described below, or Graduates in Arts who enregister as students in the C. P. & S., Quebec, on beginning their studies in Medicine, obtain on graduating from McGill University, a license to Practice in Quebec without further examination in any professional subject.

The requirements for this examination :

LATIN.—Cæsar's Commentaries, Bks. I., II., III., IV. and V.—Virgil's Æneid, Bks. I. and II.—The Odes of Horace, Bk. III., with a sound knowledge of the Grammar of the Language.

ENGLISH.—For *English-speaking* candidates.—A critical knowledge of one of Shakespeare's plays, viz., Anthony and Cleopatra for 1896, with English Grammar, as in Dr. Smith or Mason.

For *French-speaking* candidates.—Translation into French of passages from the first eight Books of Washington Irving's Life of Columbus, with questions of Grammar. Translation into English of extracts from Fénelon's Télémaque.

FRENCH.—For *French-speaking* candidates.—A critical knowledge of Molière's Le Bourgeois Gentilhomme, Fénelon's Aventures de Télémaque and La Fontaine's Fables, Books I., II., III., with questions of Grammar and Analysis.

For *English-speaking* candidates.—Translation into Eng-

lish of passages from Fénelon's *Télémaque*, with questions of Grammar. Translations into French of easy English extracts.

BELLES LETTRES AND RHETORIC.—Principles of the subject as in Haven's *Rhetoric*, or Boyd's *Rhetoric and Literary Criticism*. History of the Literature of the age of Pericles in Greece, of Augustus in Rome, and of the 17th and 18th centuries of England and France.

HISTORY.—Outlines of the History of Greece and Rome, with particular knowledge of the History of Britain, France and Canada.

GEOGRAPHY.—A general view, with particular knowledge of Britain, France and North America.

ARITHMETIC.—Must include Vulgar and Decimal Fractions, Simple and Compound Proportion, Interest and Percentages, and Square Root.

ALGEBRA.—Must include Fractions and Simultaneous Equations of the First Degree.

GEOMETRY.—Euclid, Books I., II., III. and VI., or the portion of plane Geometry covered by those Books. Also the measurement of the lines, surfaces and volumes, of regular geometrical figures.

CHEMISTRY.—Outlines of the subject as in Wartz or Roscoe's *Elementary Chemistry*.

BOTANY.—Outlines as in Laffamme or Spotton's text-book.

PHYSICS.—Outlines as in Peck-Ganot's *Physics*.

PHILOSOPHY.—Elements of Logic as in Jevon's *Logic* ; Elements of Philosophy, as in Calderwood's *Hand-book*.

The Examinations will be held in September, 1896, at Quebec, and in June, 1897, at Montreal. (See Almanac at front of this Calendar for exact date of examinations.) Applications to be made to Dr. Brosseau, Montreal, or Dr. Belleau, Quebec, either of whom will furnish schedule giving text books and percentage of marks required to pass in each subject

Examination Fee, 20 dollars. Should the candidate be unsuccessful, one half of the fee will be returned.

Of the four years' study *after* having passed the Matriculation Examination, three six months' sessions, at least, must be attended

at a University, College, or Incorporated School of Medicine, recognized by the "Provincial Medical Board." The first session must be attended during the year immediately succeeding the Matriculation. Examination, and the final session must be in the fourth year.

C. *To obtain a license to Practice in Ontario.*

To become an enregistered student of Medicine of the C. P. & S., Ontario, it is necessary to hold a degree in Arts of a recognized Canadian or British University, or to pass before beginning the study of Medicine, the prescribed examination in Preliminary Education. This Examination is the University Departmental Matriculation Examination of the Ontario Education Department with science added and compulsory.

The subjects of this Examination for 1896 are :

LATIN.—A paper on Latin Grammar.

Translation from English into Latin Prose, involving a knowledge of Bradley's Arnold's Exercises, 1-24 inclusive, and 49-65 inclusive.

Translation, with the aid of a vocabulary, of easy passages from unspecified Latin Authors.

1896. { VIRGIL, *Aeneid*, III.
 { CÆSAR, *Bellum Gallicum*, V, VI.

MATHEMATICS.—Arithmetic.

Algebra. (Elementary rules; easy factoring; highest common measure; lowest common multiple: square root; fractions; ratio; simple equations of one, two and three unknown quantities; indices; surds; easy quadratic equations of one and two unknown quantities.)

Euclid, Books I, II, III.

HISTORY AND GEOGRAPHY.—Great Britain and her colonies, from the revolution of 1688 to the peace of 1815, and the Geography relating thereto.

Outlines of Roman History to the death of Augustus, and the Geography relating thereto.

Outlines of Greek History to the battle of Chaeronea, and the Geography relating thereto.

ENGLISH.—I. Composition:—Nothing but an essay will be required; this shall be dealt with, rather as a test of the candidate's knowledge of English composition than as a proof of his knowledge of the subject written upon. Legible writing,

and correct spelling and punctuation will be regarded as indispensable, and special attention will be paid to the structure of sentences and paragraphs. The candidate should also give attention to the structure of the whole essay, the effective ordering of the thought, and the accurate employment of a good English vocabulary. About three pages of foolscap is suggested as the proper length for the essay; but quality, not quantity, will be mainly regarded.

2. Grammar and Rhetoric:—The examination will be chiefly on passages not prescribed. A liberal choice of questions will be allowed to the candidate.

3. Poetical Literature:—Intelligent comprehension of and familiarity with the prescribed texts will be required:

1896. *Coleridge*:—The Ancient Mariner.

Longfellow:—Evangeline, A Gleam of Sunshine, The Day is done, The Old Clock on the Stairs, The Fire of Driftwood, Resignation, The Ladder of St. Augustine, A Psalm of Life, The Builders, The Warden of the Cinque Ports.

The following selections from Palgrave's Golden Treasury:

Wordsworth:—The Education of Nature, A Lesson, To the Skylark, To the Daisy, and the following Sonnets: To a Distant Friend, "O Friend! I know not which way I must look," "Milton! Thou shouldst be living at this hour," To Sleep, Within King's College Chapel.

Campbell:—"Ye Mariners of England." Battle of the Baltic, Hohenlinden. The River of Liñc.

Coleridge:—Youth and Age.

PHYSICS.—An Experimental course in (a) Dynamics, (b) Heat, (c) Electricity, including an acquaintance with the Metric System of units. The courses are defined as follows:—

Dynamics: Definitions of velocity, acceleration, mass, momentum, force, moment, couple, energy, work, centre of inertia; statement of Newton's laws of motion: composition and resolution of forces; conditions for equilibrium of forces in one plane.

Definitions of a fluid, fluid pressure at a point, transmission of fluid pressure, resultant fluid pressure, specific gravity, Boyle's law, the barometer, air pump, water pump, siphon.

Heat: Effects of heat, temperature, diffusion of heat, specific heat, latent heat, law of Charles.

Electricity: Voltaic cell, Chemical action in the cell, magnetic effect of the current, chemical effect of the current, galvanometer, voltameter. Ohm's law, heating effect of the current, electric light, current induction, dynamo and motor, electric bell, telegraph, telephone.

CHEMISTRY.—Definition of the object of the science, relations of the physical sciences to Biology, and of Chemistry to Physics, Chemical change, elementary composition of matter. Laws of combination of the elements, atomic theory, molecules. Avogadro's Law. The determination of atomic weight, specific heat, nomenclature, classification. The preparation, characteristic properties, and principal compounds of the following elements: Hydrogen, Chlorine, Bromine, Iodine, Oxygen, Sulphur, Nitrogen, Phosphorus, Carbon, Silicon.

FRENCH.—Grammar.

Composition:—(a) Translation into French of short English sentences as a test of the candidate's knowledge of grammatical forms and structure, and the formation in French of sentences of similar character; and (b) translation of easy passages from English into French.

Translation of easy passages from unspecified French authors.

An examination on the following texts:

1896. { ENAULT, *Le Chien du capitaine*.
 { FEUILLET, *Ca Fec*.

The fee for this Examination is \$20.00. Full details may be obtained by application to Dr. R. A. Pync, Registrar, Cor. Bay and Richmond St., Toronto.

(D.) *To practice in the Maritime Provinces.*

The examination required by the Faculty of medicine is accepted in the provinces of Nova Scotia, New Brunswick, Prince Edward Island and Newfoundland.

Special matriculation examinations are held annually in New Brunswick and Nova Scotia, at dates stated in the Almanac, at the beginning of this Calendar.

II.

ENREGISTRATION.

The following are the University Regulations:—

All Students desirous of attending the Medical Lectures shall, at the commencement of each Session, enrol their names and residences in the Register of the Medical Faculty.

The said Register shall be closed on the last day of October for 4th year students, and on the 17th of October for first, second and third year students.

Fees are payable to the Registrar, and must be paid in advance at the time of enrolment.

The class tickets for the various courses are accepted as qualifying candidates for examination before the various Colleges and Licensing bodies of Great Britain and Ireland, and the College of Physicians and Surgeons of Ontario. The degree in Medicine of this University carries with it at the Licensing Boards of Great Britain the same exemptions in certain subjects as are granted to all colonial degrees.

To meet the circumstances of the General Practitioners in British North America, where there is no division of the profession into Physicians and Surgeons exclusively, the degree awarded upon graduation is that of "Doctor of Medicine and Master of Surgery," in accordance with the general nature and character of the curriculum, as fully specified hereafter. The degree is received by the College of Physicians and Surgeons of the Province of Quebec, provided the graduate from this university matriculated before the College of Physicians and Surgeons of Quebec, when entering on the study of medicine.

Any graduate therefore in medicine of the University, may obtain a license to practise in the Province of Quebec without further examination, if he has complied with the above regulations.

TIME TABLE FOR SESSION 1895-96.

Time Tables for the Session of 1896-97 will be issued with the Lecture Room ticket on enregistration.

III.

COURSES OF LECTURES.

The Corporation of the University, on the recommendation of the Faculty of Medicine, in 1894, consented to the extension of the courses of lectures in medicine over a period of about nine months instead of six.

By this means, (1) The students of the primary years have a more ample opportunity of becoming acquainted, by laboratory work, with those branches of study which form the scientific basis of their profession, and (2) the final students will be able to derive the greatest benefit from the abundance of clinical material provided in the two Hospitals.

By this arrangement while the actual number of didactic lectures per session will be decreased, there will be a corresponding increase in the amount of tutorial work and individual teaching in the laboratories for Chemistry, Physiology, Anatomy, Pathology and Hygiene as well as giving more time, during the last two years of the course, for the thorough study of disease in the wards of the Royal Victoria and Montreal General Hospitals.

The Faculty expects, by thus increasing the time that the different professors, lecturers and demonstrators devote to each student, to accomplish two very important ends: First, to do away with the injurious effects which result from attempting to condense the teaching of medicine and surgery into four or even five sessions of six months; Second, to give each student a sounder and more thoroughly practical knowledge of his profession than could be obtained by attending during even five sessions of six months each.

ANATOMY.

(DESCRIPTIVE AND PRACTICAL).

PROFESSOR, FRANCIS J. SHEPHERD.

J. M. ELDER, Lecturer on Medicine and Surgical Anatomy and Senior Demonstrator. J. G. MCCARTHY, R. TAIT MACKENZIE, W. E. DEEKS, J. A. HENDERSON, and J. A. SPRINGLE, Demonstrators.

Anatomy is taught in the most practical manner possible, and its relation to Medicine and Surgery fully considered. The lectures are

illustrated by the fresh subject, moist and dry preparations, sections, models and plates, and drawings on the blackboard.

The department of *Practical Anatomy* is under the direct control and personal supervision of the Professor of Anatomy, assisted by his staff of Demonstrators.

The methods of teaching are similar to those of the best European schools, and Students are thoroughly grounded in this branch.

Every Student must be examined *at least* three times in each part dissected, and no certificate is given unless the examinations are satisfactory.

Special Demonstrations on the Brain, Thorax, Abdomen, Bones, etc., are frequently given. Prizes are awarded at the end of the Session for the best examination on the fresh subject.

The Dissecting Room is open from 8 a.m. to 10 p.m. Abundance of material provided.

CHEMISTRY.

PROFESSOR, GILBERT P. GIRDWOOD.

The course in this subject is carefully graded. Students of the first year receive lectures on Chemical and Physiological Physics and the general principles and theories of the science. In the second year the course on chemistry is extended to embrace its application to physiology and medicine, and includes a course in Organic Chemistry. The lectures are fully illustrated by experiments, for which the department is equipped with all modern Lecture-room apparatus.

PRACTICAL CHEMISTRY.

PROFESSOR, R. F. RUTTAN.

DEMONSTRATOR, C. G. L. WOLF.

LABORATORY ASSISTANT, CHAS. STEVENSON.

Laboratory instruction in practical chemistry is given during each of the first three years of study throughout one term.

The first year's course illustrates the general principles of chemical action and the properties of typical elements. During the second year the course will include methods of qualitative analysis and the detection of poisons. In the third year a course of clinical and

sanitary chemistry will be given, in which the student will be made familiar with the application of chemistry to the diagnosis and prevention of disease. Special attention is directed to instructing the student in making accurate notes of his experiments and his conclusions. These notes are examined daily and criticised.

PHYSIOLOGY.

PROFESSOR, WESLEY MILLS.

LECTURER, W. S. MORROW.

DEMONSTRATOR, J. W. SCANE.

ASSISTANT DEMONSTRATOR, J. D. CAMERON.

The purpose of this Course is to make Students thoroughly acquainted, as far as time permits, with modern Physiology: its methods, its deductions, and the basis on which the latter rest. Accordingly a full course of lectures is given, in which the physical, the chemical and other aspects of the subject receive attention.

In addition to the use of diagrams, plates, models, etc., every department of the subject is experimentally illustrated. The experiments are mostly free from elaborate *technique*, and many of them are of a kind susceptible of ready imitation by the Student.

Laboratory work for Senior Students:—

(1.) During a part of the Session there will be a course on Physiological Chemistry, in which the Student will, under direction, investigate food stuffs, digestive action, blood, and the more important secretions and excretions, including urine. All the apparatus and material for this course will be provided.

(2.) The remainder of the Session will be devoted to the performance of experiments which are unsuitable for demonstration to a large class in the lecture room, or that require the use of elaborate methods, apparatus, etc., together with such as each individual of the class can conduct himself.

Laboratory work for Junior Students:—

This will be somewhat similar to the course for senior students, but simpler and anatomico-physiological rather than chemical; like the work for second year students its main object will be the illustration of important physiological principles.

HISTOLOGY.

PROFESSOR, GEO. WILKINS.
DEMONSTRATOR, N. D. GUNNE.

This will consist of a course of lectures and demonstrations with the Microscope, besides a short course in the preparation and mounting of specimens. As the demonstrations will be chiefly relied upon for teaching the Microscopic Anatomy of the various structures, the specimens under observation will then be minutely described. Plates and diagrams specially prepared for these lectures will be freely made use of.

PHARMACOLOGY AND THERAPEUTICS.

PROFESSOR, A. D. BLACKADER.
ASSISTANT DEMONSTRATOR, F. M. FRY.

The lectures on this subject are graded in the following manner :

During the primary course, attention will be directed chiefly to Pharmacology, including the important chemical and physical properties of the various drugs, and a brief consideration of their physiological action. Therapeutics will be considered only in outline. A complete museum of *Materia Medica* will afford the student opportunity for making himself acquainted with the drugs themselves. During the spring session, a course of demonstrations on Practical *Materia Medica* and Pharmacy will be given.

During the final course, the Physiological Action of Drugs will be dwelt upon at length, and attention will be given to the Therapeutic Application of all Drugs and Remedial Measures. Prescription writing, and the various modes of administering drugs will be explained and illustrated. During the course a series of lectures will be delivered in the theatres of the hospitals on special cases or groups of cases, illustrating important points in both General and Special Therapeutics.

MEDICINE.

PROFESSOR, JAMES STEWART.
ASSISTANT PROFESSORS, { F. G. FINLEY.
{ H. A. LAFLEUR.
DEMONSTRATORS, { C. GORDON CAMPBELL.
{ W. F. HAMILTON.

While the lectures on this subject are mainly devoted to Special Pathology and Therapeutics, no opportunity is lost of illustrating and explaining the general laws of disease. With the exception of certain

affections seldom or never observed in this country, all the important internal diseases of the body, except those peculiar to women and children, are discussed, and their Pathological Anatomy illustrated by the large collection of morbid preparations in the University Museum, and by fresh specimens contributed by the Professor of Pathology.

The College possesses an extensive series of Anatomical plates and models illustrative of the Histological and Anatomical appearances of disease, and the wards of the General and Royal Victoria Hospitals afford the lecturer ample opportunities to refer to living examples of very many of the maladies he describes, and to demonstrate the results of treatment.

CLINICAL MEDICINE.

PROFESSOR, JAMES STEWART.

ASSOCIATE PROFESSORS, F. G. FINLEY and H. A. LAFLEUR.

The instruction in Clinical Medicine is conducted in the theatres, wards, out-patient rooms and laboratories of the Royal Victoria and Montreal General Hospitals.

The courses include :—

- I. The reporting of cases by every member of the Graduating Class. A certain number of beds being assigned to each student.
- II. Bedside instruction for members of the Graduating Class.
- III. Two Clinics weekly in each hospital.
- IV. Tutorial instruction for the Junior Classes, in the wards and out-patient rooms of both hospitals.
- V. Instruction in Clinical Chemistry and Bacteriology.

SURGERY.

PROFESSOR, THOMAS G. RODDICK.

DEMONSTRATORS, R. C. KIRKPATRICK and A. E. GARROW.

This course consists of the Principles and Practice of Surgery and Surgical Pathology, illustrated by a large collection of preparations from the Museum, as well as by specimens obtained from cases under observation at the Hospitals. The greater part of the course however is devoted to the Practice of Surgery, in which attention is constantly drawn to cases which have been observed by the class during the session. The various surgical appliances are exhibited, and their uses and application explained. Surgical Anatomy and Operative Surgery form special departments of this course.

CLINICAL SURGERY.*PROFESSOR, JAMES BELL.**ASSOCIATE " GEORGE E. ARMSTRONG.**LECTURER, R. C. KIRKPATRICK.**DEMONSTRATORS, KENNETH CAMERON AND A. E. GARROW.*

The teaching in Clinical Surgery is conducted at the Montreal General and Royal Victoria Hospitals.

I. In the amphitheatre of each of these Hospitals lectures are given and operations are performed, and, whenever opportunity offers, fracture and dislocation are reduced and the proper dressings applied before full classes.

II. Small ward classes of about 10 men in each are taken through the wards by the surgeon in attendance or one of his assistants and instruction given at the bedside concerning the nature and management of surgical cases.

III. Beds are assigned to students in rotation, and each student is required to carefully study and report cases and to assist in the surgical dressing of the same.

IV. In the Out-patient Department students have an exceptionally good opportunity to study a great variety of injuries, to witness operations in minor surgery, to come into personal contact with patient and to take part in the application of a variety of surgical dressings and appliances.

MIDWIFERY.*PROFESSOR, J. CHALMERS CAMERON.**DEMONSTRATOR, D. J. EVANS.*

This course will embrace: 1. Lectures on the principles and practice of the obstetric art, illustrated by diagrams, fresh and preserved specimens, the artificial pelvis, complete sets of models illustrating deformities of the pelvis, wax preparations, bronze mechanical pelvis, &c. 2. Bedside instruction in the Montreal Maternity, including external palpation, pelvimetry, the management and after-treatment of cases. 3. A complete course on obstetric operations with the phantom and preserved fetuses. 4. The diseases of Infancy.

5. A course of individual clinical instruction at the Montreal Maternity.

Arrangements have now been made for a graded course in Obstetrics, instruction being given separately to third year and final students.

Particular attention is given to Clinical instruction, and a Clinical examination in Midwifery similar to that held in Medicine and Surgery now forms part of the final examination.

GYNÆCOLOGY.

PROFESSOR, WM. GARDNER.

ASSOCIATE PROFESSOR, T. JOHNSON-ALLOWAY.

The didactic course is graded and consists of from forty to forty-five lectures given at intervals alternating with the lectures on Obstetrics and extending throughout the session. The anatomy and physiology of the organs and parts concerned is first discussed. Then the various methods of examination are fully described, the necessary instruments exhibited, and their uses explained.

The diseases peculiar to women are considered as fully as time permits, somewhat in the following order:—Disorders of Menstruation; Leucorrhœa; Diseases of the External Genital Organs; Inflammations, Lacerations and Displacements of the Uterus; Pelvic Cellulitis and Peritonitis and Inflammations of the Ovaries and Fallopian Tubes; Benign and Malignant growths of the Uterus; Tumours of the Ovary; Diseases of the Bladder and Urethra. The lectures are illustrated as fully as possible by drawings and morbid specimens.

Clinical teaching, including out-patient and bed-side instruction, is given at both Royal Victoria and Montreal General hospitals by Professors Gardner and Alloway. A large amount of Clinical material is thus available for practical instruction in this department of medicine. Numerous operations are done before the class, and made the subject of remarks. In addition to the ward-patients each hospital conducts a large out-patient Gynæeological Clinic to which advanced students are admitted in rotation and instructed in digital and bimanual examination and in the use of diagnostic instruments.

Particular attention is thus given to Clinical instruction, and a Clinical examination in Gynæeology similar to that held in Medicine and Surgery now forms part of the final examination.

MEDICAL JURISPRUDENCE.*PROFESSOR, GEO. WILKINS.**LECTURER ON MENTAL DISEASES, J. W. BURGESS.**LECTURER ON MEDICO-LEGAL PATHOLOGY, WYATT JOHNSTON.*

This course includes Insanity, the subject being treated of in its Medical as well as Medico-Legal aspects. Special attention is devoted to the subject of blood stains, the Clinical, Microscopic and Spectroscopic tests for which are fully described and shown to the class. The various spectra of blood in its different conditions are shown by the Microspectroscope, so well adapted for showing the reactions with exceedingly minute quantities of suspected material. Recent researches in the diagnosis of human from animal blood are alluded to. In addition to the other subjects usually included in a course of this kind, Toxicology is taken up. The modes of action of poisons, general evidence of poisoning and classification of poisons are first treated of, after which the more common poisons are described, with reference to symptoms, post-mortem appearances, and chemical tests. The post-mortem appearances are illustrated by plates, and the tests are shown to the class. A short course of demonstrations on Medico-legal Pathology also forms part of the instruction in this department. This course includes post-mortem methods in medico-legal cases, the pathological conditions characteristic of the more important forms of violent death and the natural causes of sudden death which are liable to excite suspicions of homicide. The lectures are illustrated by specimens from the Coroner's Court.

OPHTHALMOLOGY AND OTOTOLOGY.*PROFESSOR, FRANK BELLER,**DEMONSTRATOR, J. J. GARDNER.*

This will include a course of twenty-five lectures on diseases of the Eye and Ear, both didactic and clinical. In the former, the general principles of diagnosis and treatment will be dealt with; including three lectures on the errors of refraction and faults of accommodation. At the clinical lectures given in the Hospitals cases illustrative of the typical forms of ordinary diseases of the Eye and Ear will be exhibited and explained to the class. In the out-patients' department of each Hospital students have excellent opportunities of gaining clinical experience.

BOTANY.*PROFESSOR D. P. PENHALLOW.*

The purpose of this course is to give students a good grounding in the principles of General Morphology, to advance their knowledge of the Comparative Physiology of animals and plants, and enable them to determine readily, such species of plants as may come under their observation. It comprises,—

1. Practical morphology—the determination and classification of type specimens of Bryophytes, Pteridophytes and Spermophytes. Special facilities for this course are offered by the morphological laboratory and the resources of the Botanic Garden.

2. A course of lectures on General Morphology and Classification, Histology and Physiology. The lectures are illustrated by the models and large collections in the Peter Redpath Museum.

3. Studies in Canadian Botany. This work is prosecuted by means of field-excursions which are held as often as opportunity is afforded during the autumn months.

4. A special collection of medicinal plants, now being formed at the Gardens, offers a valuable preparation in the course of Pharmacology.

ZOOLOGY.*W. E. DEEKS, LECTURER (Aristo).*

This course includes a systematic study of the Morphology and classification of animals, illustrated by Canadian examples and by the collections in the Peter Redpath Museum. It forms a suitable introduction to Comparative Physiology.

Students may take either Zoology or Botany, but their choice should be regulated by the requirements of the law in the provinces in which they intend to practice.

Students electing either subject, must continue therein for the session, except by permission from the Faculty.

Students desiring to take both Zoology and Botany during one session must apply for permission from the Faculty.

Students in Botany or Zoology will receive tickets to the Peter Redpath Museum, and to the Museum of the Natural History Society of Montreal.

PATHOLOGY.

PROFESSOR, J. G. ADAMI.

LECTURER IN PATHOLOGY, C. F. MARTIN.

DEMONSTRATORS, { W. I. BRADLEY.
W. J. JAMIESON.

LABORATORY ASSISTANT, E. W. HAMMOND.

The following courses constitute the teaching on this subject :—

1. A course of General Pathology for Students of the Third Year (optional for those of the Fourth). Lectures are delivered twice weekly throughout the year.
2. A course of demonstrations in the performance of Autopsies, for Students of the Third Year. The demonstrations are held once a week, from October until Christmas.
3. Demonstrations upon the Autopsies of the week for Students of the two Final Years. These are given during the session by Dr. Adami at the Royal Victoria Hospital, and by Dr. Wyatt Johnston at the General Hospital.

Practical Courses.

4. The performance of autopsies. Each student is required to take an active part in at least six autopsies. The autopsies are conducted at the General and Royal Victoria Hospitals by the Pathologists of these Hospitals and their assistants. In addition to the actual performance of the *sectio cadaveris*, students are expected to attend the practical instruction given in connection with each autopsy, in the method of preparation and microscopic examination of the removed tissues, so as to become proficient in methods of preparation, staining and mounting.
5. A practical course in Morbid Histology for Students of the Third Year. This class is held once a week during the winter months. Six sections are as a rule distributed at each meeting of the class so that each student obtains a large and representative series of morbid tissues, and upon an average twenty minutes are devoted to the description and examination of each specimen. Laboratory fee to cover cost of slides, reagents, microscope, etc., \$5.
6. A course of demonstrations upon Morbid Anatomy (Museum specimens) once weekly during the winter months, for students of the Fourth Year.

In addition to the above the staff of the department give instruction to the more advanced students who desire to undertake any special work in the laboratories. Classes in clinical pathology and microscopy are given from time to time, at the Pathological Laboratory and at the General and Royal Victoria Hospitals under the direction of the Professors of Clinical Medicine.

DEPARTMENT OF PUBLIC HEALTH AND PREVENTIVE MEDICINE.

PROFESSOR, ROBT. CRAIK.

SANITARY PHYSICS AND CHEMISTRY.	{ PROF. ROBT. CRAIK. { PROF. H. F. RUTAN.
BACTERIOLOGY AND PREVENTIVE MEDICINE	{ PROF. J. G. ADAM. { DR. WYATT JOHNSTON.

The Department of Public Health and Preventive Medicine has, owing to its endowment by Sir Donald A. Smith, been made one of the most important subjects of the third year.

The instruction will consist of two lectures per week, for the whole session, a systematic course in Bacteriology and Preventive Medicine, including Serum Therapy. will be followed by courses on the sanitary relations of water, soil, food and air, the use and relative value of disinfectants, domestic sanitation, including plumbing, heating, ventilation, the construction of habitations, etc. and will be illustrated by models and special apparatus. Lectures will also be given on personal hygiene, including bathing, exercise, etc., and on climate and health resorts. In addition to the course of systematic lectures, laboratory courses will be given in the Pathological and Chemical laboratories on Bacteriology, descriptive and sanitary Chemistry. The laboratory work will extend over a period of three months and will be given twice weekly.

A working museum and model room is being equipped this summer with working models and apparatus to illustrate the application of hygienic principles. Demonstrations will be given in the hygienic museum from time to time as required.

LARYNGOLOGY AND RHINOLOGY.

PROFESSOR, H. S. BIRKETT.

This course will consist of practical lessons in the use of the Laryngoscope and Rhinoscope. The instruction will be carried on with small classes so that individual attention may be insured. A

limited number of clinical lectures bearing upon interesting cases attending the clinic will be delivered during the session. These lectures will be, however, of an eminently practical nature.

MENTAL DISEASES.

LECTURER, T. J. W. BURGESS.

This course will comprise a series of lectures at the University on Insanity in its various forms, from a medical as well as from a medico-legal standpoint. The various types of mental diseases will be illustrated by cases in the Verdun Asylum, where clinical instruction will be given to groups of senior students at intervals throughout the session.

PRACTICAL MICROSCOPY.

This is an entirely optional course, in charge of Prof. Wilkins. It is intended especially for teaching the technique of Microscopy. Students will be shown how to examine blood, &c., also to cut, stain, and mount specimens. For this purpose they will have furnished them normal structures, with which they will be able to secure a cabinet of at least 100 specimens, which will be of great benefit when in practice. Reagents and everything, except cover-glasses and cabinet cases, provided. Fee \$8.

IV.

DOUBLE COURSES.

By special arrangement with the Faculty of Arts, it is now possible for students to obtain the double degree of B.A. and M.D., C.M., after only six years of study.

It has been decided to allow the Primary subjects (Anatomy, Physiology and Chemistry) in medicine to count as Honor subjects of the third and fourth years in Arts. It follows then that at the end of four years study a student may obtain his B.A. degree and have two years of his medical course completed.

The remaining two years of study are devoted to the third and fourth year subjects in Medicine.

The special provisions for Medical Students in the Arts course are as follows:

In the First Year, instead of the Chemistry appointed, a Medical

Student may substitute one half of the Course in Chemistry required of students in the First Year of the Medical Faculty.

[NOTE.—Should, in the future, the Chemistry in the Faculty of Arts be made equivalent to that of the Faculty of Medicine, it may be taken by any Student proceeding to the Medical Degree in lieu of the course in the Medical Faculty.]

In the Second Year. The remaining half of the Course in Chemistry of the Medical Faculty may be substituted for the Psychology of the First Term and the Mathematical Physics of the Second Year. The Botany Course of the Medical Faculty may be substituted for the Botany in the Arts Course.

[NOTE.—The Faculty of Medicine advises Medical Students who are following the Courses in Arts prescribed for the double degree, to take the subject of Psychology if possible.]

Third Year.—Physiology and Histology with practical work therein, or Anatomy with Practical Anatomy, together with the regular examinations therein in the Faculty of Medicine, may be substituted for two courses under the heading of "Science" in the curriculum of the Third Year in Arts.

[NOTE.—If a special course of Physics for Medical Students should be established, Natural Philosophy may not be compulsory.]

Fourth Year.—Students who have completed the Third Year in Arts and First Year in Medicine shall have the same privileges in the Fourth Year as Honour Students in this year, viz., they shall be required to attend two only of the courses of lectures given in the ordinary departments (or one course with the additional course therein), and to pass the corresponding examinations only at the Ordinary B.A. Examination. These courses should for Medical Students be in either Languages or Literature.

Students are recommended in the Third and Fourth Years to continue the study of subjects which they have already taken in the First and Second Years.

In order to obtain the above privileges, the student must give notice at the commencement of the Session to the Dean of the Faculty of Arts, of his intention to claim them, and present a certificate from the Registrar of the Medical Faculty that his name is entered on the books of that Faculty. He must produce at the end of the sessions in the first two years a certificate of attendance on the required lec-

tures and of standing at the corresponding examinations. In the Third and Fourth Years, he must produce certificates that he has completed each year of the Medical curriculum.

A certificate of Licentiate in Arts will be given along with the professional degree in Medicine to those who, previous to entrance upon their professional studies proper, have completed two years in the Faculty of Arts, and have duly passed the prescribed examinations therein.

V.

POST-GRADUATE AND ADVANCED COURSES.

The Faculty of Medicine in 1896 established post-graduate and special courses in connection with the Montreal General and Royal Victoria Hospitals and the various laboratories in the University buildings. These courses will be given again in 1897.

There will be two distinct sets of courses, one a short practical and clinical course for medical men in general practice who desire to keep in touch with recent advances in Medicine, Surgery and Pathology, and who wish special clinical experience in Gynæcology, Ophthalmology, Laryngology, etc. This course will last about six weeks, beginning about the beginning of May.

A special detailed programme will be prepared and will be sent on application in January next.

The other courses will be for those who have just completed their regular course in Medicine, and desire special Laboratory or Clinical teaching before beginning practice.

Arrangements have also been made to accommodate a limited number of such graduates who desire advanced and research work.

Commodious laboratories for advanced work have been equipped in connection with the Pathological and Clinical departments of both the Royal Victoria and Montreal General Hospitals, and in connection with the general laboratories for Pathology, Physiology and Chemistry, recently altered and extended in the new buildings of the Faculty.

Recent graduates of recognized universities desiring to qualify for examinations by advanced laboratory courses, or who wish to engage in special research, may enter at any time by giving a month's notice, stating the courses desired and the time at their disposal.

All the regular clinics and demonstrations of both hospitals will be open to such students on the same conditions as undergraduates in medicine of this University.

These laboratories will be open for graduates about May 1st, 1896.

Further details regarding courses, fees, etc., may be obtained on application to the Registrar after January, 1896.

THE POST GRADUATE COURSE OF 1896.

As announced in its last annual calendar, the Faculty of Medicine of McGill University gave this year a Post Graduate course of instruction in the various departments of Medicine and Surgery.

These courses began on Tuesday, May 5th, 1896, and extended over a period of six weeks.

The instruction consisted of :—

A. Evening Lectures on Recent Advances in Medicine, Surgery, Pathology, etc., four per week. The subjects discussed were as follows :

“Brain Tumors” (two lectures), by Prof. James Stewart.

“Anæmia,” by Prof. F. G. Finley.

“Some Forms of Dyspepsia,” by Prof. H. A. Laffeur.

“Brain Surgery” (two lectures), by Prof. James Bell.

“Recent Advances in Abdominal Surgery” (two lectures), by Prof. G. E. Armstrong.

“The Pathology of the Pancreas, of the Thyroid and of the Suprarenals” ; “Immunity and Vaccinations,” and “Referred Pain” (six lectures), by Prof. J. G. Adami.

“Serum Therapy and Malaria,” by Dr. C. F. Martin.

“Infant Feeding,” by Prof. A. D. Blackader.

“Modern Views of the Nervous System” (two lectures), by Prof. Wesley Mills.

“Ophthalmology” (three lectures), by Prof. Buller.

“Disinfectants and Disinfecting,” by Dr. Wyatt Johnston.

“The Medical Examiner for Life Insurance,” Prof. Wilkins.

B. General Clinics.—Clinics and bedside instruction were given in the wards of the Royal Victoria Hospital, in MEDICINE, by

Prof. J. Stewart and Drs. Martin and Hamilton ; in SURGERY, by Prof. J. Bell ; in the wards of the General Hospital, in MEDICINE, by Profs. Finley and Lafleur ; in SURGERY, by Prof. Armstrong.

These Clinics were given four days per week, during the afternoon.

C. Special Clinics.—In OPHTHALMOLOGY, including diseases of the Conjunctiva, Iris, Cornea and Retina, at the Royal Victoria Hospital, by Prof. F. Buller, and at the Montreal General Hospital, by Prof. J. J. Gardner. Special instruction in the use of the Ophthalmoscope was given at different times.

In GYNÆCOLOGY, at the Montreal General Hospital, by Prof. T. J. Alloway and Dr. Lockhart, and at the Royal Victoria Hospital, by Dr. A. E. Garrow.

In LARYNGOLOGY and the use of the Laryngoscope, at the Montreal General Hospital, by Prof. Birkett.

In EXTERNAL PALPATION AND ASEPTIC MIDWIFERY, at the Montreal Maternity Hospital, by Prof. J. C. Cameron and Dr. Evans.

In DISEASES OF CHILDREN, at the Montreal General Hospital, by Prof. A. D. Blackader.

In DERMATOLOGY, at the Montreal General Hospital, by Dr. G. G. Campbell.

In DISEASES OF THE GENITO-URINARY ORGANS, at the Royal Victoria Hospital, by Prof. James Bell.

In ORTHOPÆDICS, at the Montreal General Hospital, by Dr. C. W. Wilson.

D. Laboratory Courses.—In BACTERIOLOGY, by Prof. J. G. Adami, in the Molson Pathological Laboratory, McGill, three times per week for the whole session.

In CLINICAL MICROSCOPY of Blood, Sputum, Urine and Ejecta, in the Molson Pathological Laboratory, at McGill College, by Drs. Wyatt Johnston and C. F. Martin, three times per week for six weeks.

In CLINICAL CHEMISTRY, at the Chemical Laboratory, McGill College, by Prof. R. F. Ruttan.

In OPERATIVE SURGERY ON THE CADAVER, by Prof. Armstrong and Dr. Kirkpatrick, daily for five weeks.

Dissecting material was provided for those wishing to review their Anatomy, and instruction was given by Drs. Elder and

McCarthy during the first two weeks. For these laboratory courses a small extra fee of \$1 to \$3 was charged to cover cost of material, etc., where necessary.

E. Demonstrations.—**MORBID ANATOMY**, from *post-mortems* as they occur in the Royal Victoria and Montreal General Hospitals, by Prof. Adami and Dr. Wyatt Johnston.

MEDICAL AND SURGICAL ANATOMY (six demonstrations), by Drs. Elder and McCarthy.

NORMAL HISTOLOGY (five demonstrations), by Dr. Gunne.

TOPOGRAPHICAL ANATOMY (six demonstrations), by Drs. J. Elder and J. G. McCarthy.

PHYSIOLOGY OF THE NERVOUS SYSTEM (two demonstrations), by Prof. Wesley Mills.

RECENT METHODS IN URINALYSIS (four demonstrations), by Prof. R. F. Ruttan.

MEDICO-LEGAL AUTOPSY METHODS (two demonstrations), by Dy. Wyatt Johnston.

SCOLIOSIS AND ITS TREATMENT BY EXERCISE, by Dr. Tait Mackenzie.

THE ROENTGEN RAYS, by Prof. Girdwood.

SERUM THERAPY IN DIPHTHERIA, by Dr. A. S. Bazin.

The fee for the whole course, including hospital fees for both hospitals, was Fifty dollars.

Time tables were issued for each week.

VI.

QUALIFICATIONS FOR THE DEGREE.*

1st. No one entering after September, 1894, will be admitted to the Degree of Doctor of Medicine and Master of Surgery, who shall not have attended Lectures for a period of four nine months' sessions in this University, or some other University, College or School of Medicine, approved of by this University.

2nd. Students of other Universities so approved and admitted, on production of certificate to a like standing in this University, shall be required to pass all Examinations in Primary and Final Subjects in the same manner as Students of this University.

3rd. Graduates in Arts who have taken two full courses in General Chemistry, including Laboratory work, two courses in Biology including the subjects of Botany, Embryology, Elementary Physiology and dissection of one or more types of Vertebrata, may at the discretion of the Faculty be admitted as second-year Students, such courses being accepted as equivalent to the first-year in Medicine. Students so entering will, however, not be allowed to present themselves for examination in Anatomy, until they produce certificates of dissection for two sessions.

4th. Candidates for Final Examination shall furnish Testimonials of attendance on the following branches of Medical Education, † viz :—

ANATOMY.	} Of which Two full Courses will be required.
PRACTICAL ANATOMY.	
PHYSIOLOGY.	
CHEMISTRY	
PHARMACOLOGY AND THERAPEUTICS.	
PRINCIPLES AND PRACTICE OF SURGERY.	
OBSTETRICS AND DISEASES OF INFANTS.	
GYNÆCOLOGY.	
THEORY AND PRACTICE OF MEDICINE.	
CLINICAL MEDICINE.	
CLINICAL SURGERY.	
MEDICAL JURISPRUDENCE.	} Of which One Full Course will be required. ‡
GENERAL PATHOLOGY.	
HYGIENE AND PUBLIC HEALTH.	
PRACTICAL CHEMISTRY.	
BOTANY OR ZOOLOGY.	} Of which One Course will be required.
HISTOLOGY.	
PATHOLOGICAL ANATOMY.	
BACTERIOLOGY.	
MENTAL DISEASES.	

* It shall be understood that the programme and regulations regarding courses of study and examinations contained in this calendar hold good for this calendar year only, and that the Faculty of Medicine, while fully sensible of its obligations towards the students, does not hold itself bound to adhere absolutely, for the whole four years of a student's course, to the conditions now laid down.

† A course in medical, surgical and topographical anatomy will be given for students qualifying for the Ontario Medical College.

‡ Provided, however, that Testimonials equivalent to, though not precisely the same as these above stated, may be presented and accepted.

He must also produce Certificates of having assisted at six Autopsies, of having Dispensed Medicine for a period of three months, and of having assisted at twenty Vaccinations.

5th. Courses of less length than the above will only be received for the time over which they have extended.

6th. No one will be permitted to become a Candidate for the degree who shall not have attended at least one full Session at this University.

7th. The Candidates must give proof by ticket of having attended during at least eighteen months the practice of the Montreal General Hospital or of the Royal Victoria Hospital, or of some other Hospital of not fewer than 100 beds, approved of by this University. Undergraduates are required to attend the Out-Patient departments of the Hospitals during their second year.

8th. He must give proof of having acted as Clinical Clerk for six months in Medicine and six months in Surgery in the wards of a general hospital recognized by the Faculty, of having reported at least 10 medical and 10 surgical cases.

9th. He must also give proof by ticket of having attended for at least nine months the practice of the Montreal Maternity or other lying-in-hospital approved of by the University, and of having attended at least six cases.

10th. Every candidate for the degree must, on or before the 15th day of May, present to the Registrar of the Medical Faculty testimonials of his qualifications, entitling him to an examination, and must at the same time deliver to the Registrar of the Faculty an affirmation or affidavit that he has attained the age of twenty-one years.

11th. The trials to be undergone by the Candidate shall be in the subjects mentioned in Section 4.

12th. The following oath of affirmation will be exacted from the Candidate before receiving his degree :

SPONSIO ACADEMICA.

In Facultate Medicinæ Universitatis.

Ego, A——B——, Doctoratus in Arte Medica titulo jam donandus, sancto coram Deo cordium scrutatore, spondeo :- me in omnibus grati animi officiis erga hanc Universitatem ad extremum vitæ halitum perseveraturum; tum porro artem medicam caute, caste, et probe exercitaturum; et quod in me est, omnia ad ægrotorum corporum salutem conducere cum fide procuraturum; quæ denique, inter medendum, visæ vel audita silere conveniat, non sine gravi causa vulgatarum. Ita præsens mihi spondenti adsit Numen.

13th. The fee for the Degree of Doctor of Medicine and Master of Surgery shall be thirty dollars, to be paid by the successful candidate immediately after examination.

VII.

EXAMINATIONS.*

Frequent oral examinations are held to test the progress of the Student and occasional written examinations are given throughout the Session.

The Pass examinations at the close of each Session are arranged as follows:—

First Year.

Examinations in BOTANY or ZOOLOGY, HISTOLOGY, PHYSIOLOGY, ANATOMY, CHEMISTRY Theoretical and Practical.

Students who have taken one or more university courses in Botany or Chemistry before entering, may be exempted from attendance and examination. Students exempted in their first year subjects are allowed only a pass standing, but may present themselves for examination if they desire to attain an honor standing.

Marks obtained in examinations in first year subjects will count for both Pass and Honors in the Primary examinations.

Second Year.

Examinations in ANATOMY, CHEMISTRY, PRACTICAL CHEMISTRY, PHYSIOLOGY, HISTOLOGY, PHARMACOLOGY and THERAPEUTICS.

Third Year.

Examinations in PHARMACOLOGY and THERAPEUTICS, MEDICAL JURISPRUDENCE, PUBLIC HEALTH and PREVENTIVE MEDICINE (including BACTERIOLOGY), GENERAL PATHOLOGY, MENTAL DISEASES, CLINICAL CHEMISTRY, MEDICINE and SURGERY.

Marks obtained in third year subjects count for pass and honors in the final examinations.

Fourth Year.

Examinations in MEDICINE, SURGERY, OBSTETRICS, GYNAECOLOGY, CLINICAL MEDICINE, CLINICAL SURGERY, CLINICAL OBSTETRICS, CLINICAL GYNAECOLOGY, CLINICAL OPHTHALMOLOGY, and PRACTICAL PATHOLOGY.

By means of the above arrangement a certain definite amount of work must be accomplished by the student in each year, and an equitable division is made between the Primary and Final branches.

* See foot note *, page 63.

A minimum of 50 per cent. in each subject is required to Pass and 75 per cent. for Honors.

Candidates who fail to pass in not more than two subjects of either the first or second years may be granted a supplemental examination at the beginning of the following session.

Supplemental examinations will not be granted, except by special permission of the Medical Faculty, and on written application stating reasons, and accompanied with a fee of \$5.00 for each subject.

No candidate will be permitted, without special permission of the Faculty, to proceed with the work of the final year until he has passed the subjects comprised in the Primary examination.

No student will be allowed to present himself for his final examinations who has not certificates of having passed all his Primary examinations in this University.

Candidates who fail to pass in a subject of which two courses are required, may, at the discretion of the Faculty, be required to attend a third course, and furnish a certificate of attendance thereon. A course in Practical Anatomy will be accepted as equivalent to a third course of lectures in General and Descriptive Anatomy.

VIII.

MEDALS AND PRIZES.

1st. The "HOLMES GOLD MEDAL," founded by the Medical Faculty in the year 1865, as a memorial of the late Andrew Holmes, Esq., M.D., LL.D., late Dean of the Faculty of Medicine. It is awarded to the student of the graduating class who receives the highest aggregate number of marks in the different branches comprised in the Medical Curriculum.

The Student who gains the Holmes' Medal has the option of exchanging it for a Bronze Medal, and the money equivalent of the Gold Medal.

2nd. THE FINAL PRIZE.—A Prize in Books (or a Microscope of equivalent value) awarded for the best examination, written and oral, in the Final branches. The Holmes medallist is not permitted to compete for this prize.

3rd. THE THIRD YEAR PRIZE.—A Prize in Books awarded for the best examination, written and oral, in the branches of the third year.

4th. **THE SECOND YEAR PRIZE.** A prize in books for the best examination in all the branches of the second year in course.

5th. **THE FIRST YEAR PRIZE.** A prize in books for the best examination in all the branches of the first year in course.

6th. The "**SUTHERLAND GOLD MEDAL**," founded in 1878 by the late Mrs. Sutherland in memory of her late husband, Professor William Sutherland, M.D. It is awarded for the best examination in General and Medical Chemistry, together with creditable examination in the primary branches. The examination in medical chemistry is held at the end of the Session.

7th. The "**Clemesha Prize in Clinical Therapeutics**," founded in 1889 by John W. Clemesha, M. D., of Port Hope, Ont. It is awarded to the student making the highest marks in a special clinical examination.

IX.

FEES.

The total Faculty fees for the whole medical course of four full sessions including clinics, laboratory work, dissecting material and reagents, will be for hundred dollars, payable in four annual instalments of \$100 each.

For the convenience of the undergraduates the Hospital fees will hereafter be payable in the Registrar's office at the University. Ten dollars to be paid at the beginning of each of the last three sessions, viz., the second, third and fourth years. This will entitle each undergraduate to perpetual tickets for both the Montreal General and Royal Victoria Hospitals.

Partial students will be admitted to one or more courses on payment of special fees. An annual University fee of two dollars is charged students of all the faculties for the maintenance of college athletics.

It is suggested to parents or guardians of students that the fees be transmitted direct by cheque or P. O. Order, to the Registrar, who will furnish official receipts.

All fees are payable in advance, to the Registrar, and except by permission of the Faculty will not be received later than October 17th.

For Graduation Fees, see page 64.

For Hospital Fees, see pages 67, 75 and 76.

TEXT BOOK

ANATOMY.—Gray, Morris, Quain (Eng. Ed.).

PRACTICAL ANATOMY.—Cunningham's Practical Anatomy, Ellis' Demonstrations, Holden's Dissector and Landmark's.

PHYSICS.—Balfour Stewart.

INORGANIC CHEMISTRY.—Remsen, Wurtz's Elementary Chemistry.

ORGANIC CHEMISTRY.—Remsen.

PRACTICAL CHEMISTRY.—Odling.

PHARMACOLOGY and THERAPEUTICS.—White, Bruce, Wood, Hare and National Dispensary.

PHYSIOLOGY.—Foster and Shore's Physiology for Beginners, Mills' Textbook of Animal Physiology, Foster's Physiology, Mills' Class Laboratory Exercises.

PATHOLOGY.—Ziegler and Coats' Pathology.

PRACTICAL PATHOLOGY.—Delafield & Prudden, Payne, Boyce.

BACTERIOLOGY.—Abbott's Bacteriology.

HISTOLOGY.—Klein's Elements, Schäfer's Essentials of Histology.

SURGERY.—Holmes, Moulin, Walsham, Erichsen, Treves. American Text-book of Surgery, Da Costa.

PRACTICE OF MEDICINE.—Osler, Strümpell and Fagge.

CLINICAL MEDICINE.—Musser's Medical Diagnosis; von Jaksch Clinical Diagnosis.

MEDICAL JURISPRUDENCE.—Reese, Guy and Ferrier.

MENTAL DISEASES.—Insanity and its Treatment, Blandford, 4th Ed.

MIDWIFERY.—Lusk, and American Text Book.

DISEASES OF CHILDREN.—Smith, Goodhart and Starr.

GYNÆCOLOGY.—Thomas and Mundé, Skene, Garrigues.

HYGIENE.—Parks, Wilson.

BOTANY.—Gray's Text Book of Histology and Physiology

ZOOLOGY.—Shipley Invertebrata, Wiedersheim, Vertebrata.

OPHTHALMOLOGY.—Nettleship, Higgins, De Schweinitz.

OTOLOGY.—Pritchard, Dalby.

LARYNGOLOGY.—Watson Williams and Karl Seiler.

MEDICAL DICTIONARY.—Gould, Dunglison, Hoblyn.

XI.

MUSEUM.

PROF. J. G. ADAMI, DIRECTOR.

E. J. SEMPLE, ASSISTANT CURATOR

M. BAILLY, OSTEOLOGIST AND ARTICULATOR.

For the past fifty years, the rich Pathological Material furnished by the Montreal General Hospital has been collected here. The Faculty is also greatly indebted to many medical men throughout Canada and different parts of the world for important contributions to the Museum.

During the past few years, numerous and extremely important additions have been made to the Medical Museum.

It is particularly rich in specimens of Aneurisms. In addition to containing a large number of the more common varieties of these formations, there are specimens of such rare conditions as Aneurism of the Hepatic and Superior Mesenteric Arteries, Traumatic Aneurism of the Vertebral, together with several of the cerebral and pulmonary arteries. The most important collection probably in existence of hearts affected with "Malignant Endocarditis" is also found. The Faculty are indebted to Prof. Osler, late of this University, for this collection.

The Museum contains also a very large collection of different forms of calculi. The Faculty are mainly indebted to Prof. Fenwick for this collection.

During the past six years, M. Bailly, osteologist and articulator (lately with Trամond of Paris), has been engaged in arranging and mounting the very large number of specimens of disease and injuries of bones which have been accumulating for years. In this collection are to be found examples of fractures and dislocations of the spine, osteoporosis, congenital dislocation of the hip, fracture of the astragalus, multiple exostoses, &c., &c.

The Director of the Museum has much pleasure in acknowledging the receipt of the following objects for the year ending June 1st, 1896 :

(a) From the Pathological Laboratory of the Royal Victoria Hospital, eighty-one specimens, including :—

- Bone, Secondary cancer of parietal.
- Bone trephined for suppurative otitis media (2.)
- Femur, Cancer of, with spontaneous fracture.
- Bone, Tuberculous ulceration of parietal.
- Dura mater, cancer of.
- Acute suppurative lepto meningitis interna.
- Cerebellar abscess (2.)
- Abscess of left hemisphere.
- Heart, Subacute vegetative tricuspid endocarditis
- Pericardium, cyst attached to.
- Heart, Secondary sarcoma.
- Subpericardial and subendocardial ecchymoses.
- Aneurysm, Dissecting of aorta.
- Aneurysm, Multiple of aorta.
- Heart from case of pyohæmopericardium.
- Intrabronchial alveolar sarcoma.
- Lung, Primary cancer of
- Œsophagus, Primary cancer of
- Stomach, Secondary sarcoma of
- Stomach, Hour-glass constriction of
- Stomach, cancer of lesser curvature.
- Stomach, submucous ecchymoses of
- Duodenum: Submucous œdema of
- Cæcum, Tuberculosis of
- Ileum, round celled sarcoma of
- Colon, tuberculous ulceration of
- Resection of intestine, Murphy button (2.)
- Jejunum, Cancer of
- Kidney, large retention cyst.
- Kidney, congenital cystic.
- Bladder hypertrophic and sacculated.
- Liver, syphilitic
- Gall-bladder, Primary cancer and perforation of
- Spleen leukaemic.
- Spleen, secondary sarcoma of
- Ovary to show follicular cysts.
- Uterus and ovaries, Sarcoma of.
- Ovaries, Sarcoma of
- Tubo-ovarian cyst.
- Cervix uteri, Epithelioma of.
- Subcutaneous lipoma of heel.
- Aorta, Traumatic rupture of

(b.) From the Pathological Laboratory of the Montreal General Hospital, one hundred and fourteen specimens, including forty-seven cases from the Coroner's Court :—

- Skull, Old gunshot wound of

Asymmetrical skull.—Dr. Villeneuve.
 Skull and brain of homicide.—Dr. Villeneuve.
 Pachymeningitis interna hæmorrhagica.
 Bone, Psammoma of frontal.
 Dislocation of sterno-clavicular articulation.
 Bullet wound of cervical vertebræ : homicide.
 Mastoid abscess.—Dr. Armstrong.
 Ulna, Green stick fracture of
 Head of fetus, Punctured wound of
 Cervical vertebræ, Fracture of
 Food in larynx (3.)
 Lungs with empyema, Abscess of (3.)
 Thrombosis and pulmonary embolism.
 Calcified thrombus in pulmonary artery.
 Subendocardial lipoma.
 Heart, melanotic sarcoma.
 Heart, Gumma of

XII.

LIBRARY.

LIBRARIAN, PROF. F. G. FINLEY.

ASSISTANT LIBRARIAN, Miss M. R. CHARLTON.

The Library of the Medical Faculty now comprises upwards of fourteen thousand volumes, the largest special library connected with any medical school on this continent.

The valuable libraries of the late Professor Robert Palmer Howard, George Ross and Richard L. MacDonnell have been donated to the Medical Faculty. They consist of several thousand volumes, including a very complete collection of works on Diseases of the Chest.

The standard text-books and works of reference, together with complete files of the leading periodicals, are on the shelves. Students may consult any work of reference in the library between 9 a.m. and 5 p.m. A library reading room for the use of students is provided.

EXTRACTS FROM THE LIBRARY REGULATIONS.

I. During the College Session the Library is open daily (except Sunday; and general public holidays) from 9 a.m. till 5.30 p.m. On Saturdays the Library closes at 1 p.m. During vacation from 10 a.m. to 4 p.m.

II. The stack room is not open to students or to the public.

III. The books in the Library are classed in two divisions: 1st, those which may be taken from the Library; 2nd, those which may not, under any circumstances, be removed from the Library. The latter class includes all catalogues, dictionaries and encyclopædias.

IV. Students will be allowed to use regular text-books only in the Library. Any other book may be taken out at 5 p.m., to be returned between 9 and 10 a.m. the next day. If books so removed from the Library are not returned punctually a fine will be imposed, and if the delay be serious the student may be suspended from use of the Library at the discretion of the Librarian.

V. Students may take out books, subject to the above regulations, to the number of three volumes at one time.

VI. Books may be taken from the Library only after they have been especially asked for and charged at the delivery desk; borrow-

ers who cannot attend personally must sign and date an order, giving the titles of the books desired and the name of the person deputed to procure the same.

VII. Damage to, or loss of books shall be made good to the satisfaction of the Librarian and of the Library Committee. Writing or making any mark upon any book belonging to the Library is unconditionally forbidden. Any persons found guilty of wilfully damaging any book in any way shall be excluded from the Library, and shall be debarred from the use thereof for such time as the Library Committee may determine.

VIII. Silence must be strictly observed in the Library.

IX. Infringement of any of the rules of the Library will subject the offender to a fine or suspension of his privileges, or to such other penalty as the nature of the case may require.

The donations to the Library during the past year include ; a valuable addition to the Obstetrical and Gynæcological Department from Dr. J. C. Cameron, comprising sets of rare and valuable journals.

The Library is indebted to Dr. F. J. Shepherd for the gift of a very interesting collection of old letters from celebrated physicians as well as some old Montreal Medical Tariffs. Also to the Editors of the Montreal Medical Journal, for numerous unbound medical periodicals, etc.

The Libraries of the Surgeon-General's Office, U.S. Army, Boston Medical Library, Ontario Medical Library, have been most generous in their contributions. To the College of Physicians of Philadelphia, St. Bartholomew's Hospital, Middlesex Hospital, Association of American Physicians, Johns Hopkins Hospital, Rhode Island Medical Society, Association of American Physicians, Medical Association of Central New York, St. Thomas's Hospital, Geological Survey of Canada, and the Provincial Board of Health, the Library is also indebted for contributions.

The number of readers making use of the Library from June 1st, 1895, to June 1st, 1896, has been 4,875.

During the year 400 new books and periodicals and 1,100 pamphlets have been added.

XIII.

MCGILL MEDICAL SOCIETY.

This Society, composed of enregistered Students of the Faculty, meets once a week during the Spring Term, and fortnightly during the Winter, for the reading of papers and the discussion of medical subjects.

The Students' reading room has been placed under the control of this Society, in which the leading English and American Medical Journals are on file as well as the leading daily and weekly newspapers of the Dominion.

An extensive library of books of reference has also been established in connection with this society.

XIV.

COST OF LIVING, &c.

This will, of course, vary with the tastes and habits of the student, but the necessary expenses need not exceed those in smaller towns. Good board may be obtained from \$15 to \$20 per month. A list of boarding-houses, which are inspected annually by a sanitary committee, is prepared by the Secretary of the University, and may be procured from the Janitor at the Medical College.

XV.

LICENSED BOARDING-HOUSES.

1. All Students under 21 years of age, not residing with parents or guardians, shall reside in licensed boarding-houses, unless they produce written authority from parents or guardians to reside elsewhere.

2. Persons applying for a license to keep boarding-houses shall produce evidence satisfactory to the Principal as to their character and fitness, and the suitability of the house for the health and comfort of the Students. They shall also supply him with a statement of charges.

3. The keeper of every lodging-house shall deposit with the Secretary of the University, on or before September 10th, in every year, a

The General Hospital
- Springfield,
Massachusetts -

Buckeye Avenue
Springfield, Mass.

certificate as to the sanitary condition of the house from some competent officer or sanitary engineer recognized by the Principal.

4. A list of boarding-houses licensed under the above regulations shall be kept in the office of the Secretary, and shall be accessible to all members of the University and intending students.

XVI.

HOSPITALS.

The City of Montreal is celebrated for the number and importance of its public charities. Among these its public hospitals are the most prominent and widely known. Those in which medical students of McGill University will receive clinical instruction are : (1.) The Montreal General Hospital. (2.) The Royal Victoria Hospital. (3.) Montreal Maternity Hospital.

The Montreal General Hospital has for many years been the most extensive clinical field in Canada. The old buildings, having proved inadequate to meet the increased demand for hospital accommodation, have recently been increased by the addition of two surgical pavillions ; the Campbell Memorial, and the Greenshields Memorial, and of a new surgical theatre. The interior of the older buildings is now being entirely reconstructed on the most approved modern plans.

The Royal Victoria Hospital at the head of University Street, was opened for the reception of patients the first of January, 1894, and affords exceptional opportunities for clinical instruction and practical training.

Montreal General Hospital.

This hospital has been for many years the most extensive Clinical field in Canada.

It consists of a Surgical and Medical Department.

The Surgical Department has two large pavillions, containing four wards 135 feet long by 35 broad, with an intervening and connecting building in which is a large operating theatre of the most modern type, capable of seating over three hundred and fifty students. In connection with this are preparation, etherizing, instruments, sterilizing and surgeons' rooms, also smaller operating rooms. The Surgical pavillions, which were built three years ago, accommodate over one hundred patients.

The old part of the hospital, consisting of the Reed, Richardson and Burland wings, has during the past year been completely rebuilt and remodelled and forms the Medical Department. This part contains four wards, 100 feet by 40 and is arranged for 150 beds. In this building there are wards for Gynaecological and Ophthalmological patients, a number a private wards and laboratories for Clinical Chemistry. There is also a medical amphitheatre capable of seating 150 students and a gynaecological operating room fitted up in the most modern manner. The central part of the old building is for administration purposes.

A completely new and commodious out-door patient department has been provided on the ground floor of the Richardson wing, and there is ample accommodation for the various special departments as well as large rooms for general medical and surgical patients.

The Pathological Department is a completely new building and is provided with a post-mortem theatre and rooms for microscopical and bacteriological work, and also a mortuary and chapel. In this building students are offered every opportunity of perfecting their knowledge of morbid and pathological anatomy.

A large Fever Hospital under the management of the General Hospital has lately been built by the city and is situated at some distance off. It is under the medical charge of the physicians of the Montreal General Hospital, and at stated times small classes of students will visit the new hospital with the physicians in charge.

The old Fever Hospital on the grounds of the Hospital, has been completely remodelled, and is now used as a laundry and kitchen.

A much larger number of patients receive treatment in the Montreal General Hospital than in any other Canadian Hospital. Last year's report shows that between two and three thousand Medical and Surgical cases were treated in the wards, and the great proportion of these were acute cases, as may be gathered from the fact that the average duration of residence was only 24.02 days. Upwards of thirty-two thousand patients are annually treated in the out-door department of this Hospital.

Annual tickets entitling students to admission to the Hospital must be taken out at the commencement of the session, price \$5.00. These are obtained at the Hospital. Perpetual tickets will be given on payment of the third annual fee.

ROYAL VICTORIA HOSPITAL.

The Royal Victoria Hospital.*

This Hospital is situated a short distance above the University Grounds on the side of the Mountain, and overlooks the city. It was founded in July, 1887, by the munificence of Lord Mount Stephen and Sir Donald Smith, who gave half a million dollars each for this purpose.

The buildings, which were opened for the reception of patients on the first of January, 1894 were designed by Mr. Saxon Snell of London, England, to accommodate between 250 and 300 patients.

The Hospital is composed of three main buildings connected together by stone bridges; an Administration Block in the centre, and a wing on the east side for medical patients, in immediate connection with which is the new Pathological wing and mortuary, and a wing on the west side for surgical patients.

The Administration block contains ample accommodation for the resident medical staff, the nursing staff and domestics. The patients' entrance, the dispensary and admission rooms are also situated in this building.

The Medical wing contains three large wards, each 123 feet long by 26 feet 6 inches wide, one ward 40 feet by 26 feet 6 inches, and fifteen private and isolation wards averaging 16 feet by 12 feet, also a medical theatre with a seating capacity for 250, and three rooms adjacent to it for clinical chemistry and other purposes. North of this wing and in direct connection with it are the Pathological laboratories and mortuary.

In this wing are situated the mortuary proper, the chapel, a post mortem room capable of accommodating 200 students, and laboratories for the microscopic and bacteriological study of morbid tissues, some designed for the use of students and others for post graduation courses and special research. Special laboratories for Pathological chemistry, Experimental Pathology, Bacteriology and Photography are also provided.

The Surgical wing contains three large wards, each 123 feet long by 26 feet 6 inches wide, four wards each 40 feet by 32 feet, and seven private and isolation wards, averaging 16 feet by 12 feet; also a surgical theatre with a seating capacity for 250, with six rooms adjacent for preparation and after recovery purposes.

In this wing are also the wards for Gynæcology and Ophthalmology.

* Fees for this hospital are the same as those for the Montreal General Hospital (pp. 67.)

XVII.

CLINICAL INSTRUCTION

During the Session of 1896-97, two Medical, two Surgical, one Gynæcological and one Ophthalmological clinic will be held weekly in both the Montreal General and Royal Victoria Hospitals.

In addition, tutorial instruction will be given in these different departments in the wards, out-patient rooms and laboratories. Special weekly clinics will be given in the Montreal General Hospital on Dermatology and Laryngology and in the Royal Victoria Hospital on diseases of the Genito-Urinary system.

CLINICAL CLERKS in the medical and surgical wards of both Hospital are appointed every three months, and each one during his term of service conducts, under the immediate directions of the Clinical Professors, the reporting of all cases in the ward allotted him. Students entering on and after October 1893 will be required to show a certificate of having acted for six months as clinical clerk in medicine and six months in surgery, and are required to have reported at least ten cases in medicine and ten in surgery. The instruction obtained as clinical clerk is found to be of the greatest possible advantage to Students, as affording a true *practical* training for his future professional life.

DRESSERS are also appointed to the Out-door Departments. For these appointments, application is to be made to the Assistant Surgeons, or to the resident surgeon in charge of the out-patient department.

The large number of patients affected with diseases of the eye and ear, now attending the special clinics at both hospitals, will afford Students ample opportunity to become familiar with all the ordinary affections of those organs, and to make themselves proficient in the use of the ophthalmoscope, and it is hoped that every student will thus seek to gain a practical knowledge of this important branch of Medicine and Surgery. Operations are performed on the eye by the Ophthalmic Surgeon after the outdoor patients have been seen, and Students are invited to attend the same, and as far as practicable, to keep such cases under observation so long as they remain in the Hospital.

There are now special departments in both Hospitals for Gynæcology, presided over by Specialists in the branches. Students are thus enabled to acquire special technical knowledge under skilled

direction. The plan of teaching practical gynæcology for the past five years with marked success has been the limitation of the number of Students to two or three, who, in rotation, assist at the examinations, and receive instruction in the diagnosis and treatment of uterine diseases and the use of gynæcological instruments.

The Clinics at the Montreal General Hospital in Dermatology and Laryngology are very large and afford a practical training in affections of the skin and throat rarely obtained by medical students.

A special clinic for diseases of the Genito Urinary Organs has been established at the Royal Victoria Hospital.

Infectious diseases and Insanity will also be taught clinically, the former in the special wards for infectious diseases and the latter at the Verdun Hospital for the Insane.

The Montreal Maternity.

The Faculty have great pleasure in announcing that the Corporation of the Montreal Maternity have recently made very important additions to their building, and have still further improvements in contemplation. Students will therefore have greatly increased facilities for obtaining a practical knowledge of obstetrics. An improved Tarnier-Budin phantom is provided for the use of the students, and every facility afforded for acquiring a practical knowledge of the various obstetric manipulations. The institution is under the direct supervision of the Professor of Midwifery, who devotes much time and attention to individual instruction. Students who have attended the course on obstetrics during the autumn and winter terms of the third year will be furnished with cases in rotation, which they will be required to report and attend till convalescence. Clinical midwifery has been placed upon the same basis as Clinical Medicine and Surgery, and a final Clinical examination instituted. Regular courses of clinical lectures are given throughout the session. During the autumn and winter terms the Demonstrator of Obstetrics gives Clinical Demonstrations in the wards and instruction in operative work on the phantom. Students will find it very much to their advantage to pay special attention to their Clinical work during the spring term of the third year and the following summer. Two resident accoucheurs are appointed yearly from the graduating class to hold office for a period of six months each.

Fee for twelve months, \$12.00, payable at the Maternity Hospital.

XVIII.

STUDENTS' APPOINTMENTS

Montreal General Hospital—Seven Resident Medical Officers.

Royal Victoria Hospital—Six Resident Medical Officers.

University Maternity—Two Resident Medical Officers.

Clinical Clerk, Gynæcology.

“ “ Laryngology.

“ “ Diseases of Children.

“ “ Dermatology.

“ “ Diseases of Nervous System.

Out-door Dressers.

Dressers in Eye and Ear Department.

Medical Clinical Clerks.

Post-mortem Clerks.

Student Demonstrators of Anatomy, 4 third-year Students.

Prosectors to Chair of Anatomy, 4.

Assistants in Practical Histology Course, 2.

Assistants in Practical Physiology Course, 4.

Assistants in Practical Chemistry, 6.

XIX.

RULES FOR STUDENTS.

1. In the case of disorderly conduct, any Student may, at the discretion of the Professor, be required to leave the class-room. Persistence in any offence against discipline, after admonition by the Professor, shall be reported to the Dean of the Faculty. The Dean may, at his discretion, reprimand the Student, or refer the matter to the Faculty at its next meeting, and may in the interval suspend from classes.

2. Absence from any number of lectures can only be excused by necessity or duty, of which proof must be given, when called for, to the Faculty. The number of times of absence, from necessity or duty, that shall disqualify for the keeping of a Session, shall in each case be determined by the Faculty.

3. While in the College, Students are expected to conduct themselves in the same orderly manner as in the Class-room.

4. When Students are brought before the Faculty under the above rules, the Faculty may reprimand, impose fines, disqualify from competing for prizes and honors, suspend from Classes, or report to the Corporation for expulsion.

CLASS AND HONOR LISTS.

SESSION 1896-97.

The total number of students enregistered in the Medical Faculty during the past Session was 418, of whom there were from:—

Quebec	165	Prince Edward Island.....	21
Ontario	123	North-West Territories	2
New Brunswick	30	Manitoba.....	5
Nova Scotia.....	29	West Indies.....	3
United States.....	27	British Columbia.....	6
Newfoundland.....	3	Chili, South America.....	1
Cape Breton	3

Results of Examinations.

SESSION OF 1895-96.

PASS LISTS.

FINAL SUBJECTS.

The following gentlemen, 96 in number, have fulfilled all the requirements to entitle them to the degree of M.D. (C.M., from the University. In addition to the primary subjects, they have passed a satisfactory examination, both written and oral, on the following subjects: Principles and Practice of Surgery, Theory and Practice of Medicine, Obstetrics and Diseases of Women and Children, Pharmacology and Therapeutics, Medical Jurisprudence. Practical and General Pathology and Hygiene,—and also Clinical Examinations in Medicine, Surgery, Obstetrics, Gynecology and Ophthalmology, conducted at the bedside of the hospitals:—

Archibald, E. W., B.A.	Montreal, Que.
Argue, J. F.	Carp, Ont.
Ault, C. R.	Montreal, Que.
Bonnell, S.	Halifax, N.S.
Brathwaite, J. M.	Barbadoes, W.I.
Brunelle, P.	Lowell, Mass.
Carron, F. B.	Brockville, Ont.
Church, C. H.	Montreal, Que.
Church, H. M.	Montreal, Que.
Churchill, J. L., B.A.	Lockport, N.S.
Colquhoun, P., B.A.	Montreal, Que.
Corbett, F. A. F., B.A.	Parrishoro', N.S.
Craig, R. H.	Montreal, Que.
Crockett, A. P.	Fredericton, N.B.
Deacon, G. R.	Stratford, Ont.
Dewar, J. E.	Glen Sandfield, Ont.
Donahoe, M.	Cardigan Bridge, P.E.I.
Drum, L., B.A.	Quebec, Que.
Duckett, F. J.	Montreal, Que.
Elliott, F. B.	Maysair, Ont.
Ellis, G. H.	Dundas, Ont.
Ewan, R. B.	Montreal, Que.
Ferguson, J. A.	Smith's Falls, Ont.
Findlay, C.	Hamilton, Ont.
Fish, E. C., B.A.	Newcastle, N.B.
Fisk, W. M.	Abbotsford, Que.
Fraser, A. D.	Breadalbane, Ont.

Fraser, H. B., B.A.	Westmeath, Ont.
Foss, A. F.	Sherbrooke, Que.
Goltman, A.	Montreal, Que.
Grant, A. J.	Pembroke, Ont.
Grant, D.	Pictou, N.S.
Hartin, G.	Bell's Corners, Ont.
Healy, D. J.	Toronto, Ont.
Hogan, E. V., B. A.	Weymouth, N.S.

Hughson, E. R.	Blenheim, Ont.
Irvine, A. D.	Westmount, Que.
Johnston, F. E. L.	Delaware, Ont.
Keith, H. W.	Havelock, N.B.
Kelly, J. K.	Almonte, Ont.
Kemp, H. G.	Brighton, Ont.
Kendrick, W. N.	Austin, Minn., U.S.A.
Lambly, W. D.	Inverness, Que.
Lauder, S. E.	Durham, Ont.
Lee, F. J.	Port Hope, Ont.
Leslie, P. C.	Montreal, Que.
Lynch, D. P.	Chapleau, Que.
Martin, R. H.	Chatham, Ont.
Mason, R.	Dalesville, Que.
Mitchell, R. W., B.A.	Montreal, Que.
Moffatt, W. A.	Orms-town, Que.
Moles, E. B.	Arnprior, Ont.
Morse, L. R., B.A.	Lawrencetown, N.S.
Mowatt, W. B.A.	Montreal, Que.
Macartney, F. W.	Montreal, Que.
Macaulay, J. J. F.	River Dennis, N.S.
Macpherson, D.	Montreal, Que.
MacTaggart, D.D., B.A.	Montreal, Que.
McArthur, A. W.	Williamstown, Ont.
McDonald, H. K.	Pictou, N.S.
McEwen, D.	St. Elmo, Ont.
McGannon, A. V.	Brockville, Ont.
Patrick, D.	Montreal, Que.
Prescott, A. H.	Queensbury, N.R.
Robertson, W. A. T.	Howick, Que.
Robins, G. D., B.A.	Montreal, Que.
Ross, R. O., B.A.	Rossville, N. S.
Ryan, J. P.	Portage La Prairie, Man.
Ryan, E. J.	St. Kitts, W.I.
Secord, J. H.	Summerside, P.E.I.
Smellie, W.	Huntingdon, Que.
Shaw, R. B.	Core Head, P.E.I.
Slack, T. J.	Waterloo, Que.
Smith, S. R. B.	Brighton, Ont.
Smith, R. E. G., B.A.	Woodstock, N.B.
Smyth, W. H., B.A.	Montreal, Que.
Spearman, F. S.	Hemmingford, Que.
Stackhouse, O. C. S.	Lachute, Que.
Staples, C. A., B.A.	Stillwater, Minn.
Steeves, C. P., B.A.	Lower Coverdale, N.B.
Sutherland, J. A.	River John, N.S.
Tees, J., B.A.	Montreal, Que.
Tetreau, T.	Lawrence, Mass.
Thompson, F. L.	Perth, Ont.
Tupper, T. S.	Fredericton, N.R.
Warren, J. F.	Harper, Ont.
Wheeler, F. H.	Florenceville, N.R.
White, R.	Pembroke, Ont.
Wood, W. S.	Faribault, Minn., U.S.A.

THIRD YEAR SUBJECTS.

The following students have passed in all the subjects of the third year, viz. :—Pharmacology and Therapeutics, Hygiene, General Pathology, Bacteriology, Mental Diseases and Medical Jurisprudence :—

Barclay, J.	Kirby, H. S.	Prodrick, W. S.
Bearman, G. P.	Keenan, C. B.	Ritchie, A. A.
Brown, C. L., B.A.	Laidley, I. H.	Robert, G. C.
Burrell, R. H.	Lennon, H., B.A.	Robertson, A. R.
Campbell, I. G., D.V.S.	LeTouzé, J. R.	Robertson, H. M.
Delmage, F. W., B.A.	Lockary, J. L.	Robertson, D. McD.
Doyle, J. J.	Lyster, H. F.	Rogers, F. E.
Eberts, E. M. Von	Malloch, N.	Roy, J. J.
Foster, G. M.	Maloney, M. J.	Scanlan, H.
Foster, A. L.	Merkley, E. A.	Seaton, J. S.
Gilday, F. W.	Midgley, R. J.	Skells, A. A., B.A.
Gordon, G. S.	Morris, C. H., B.A.	Smith, H.
Gourley, T. A.	Morse, L. H., B.A.	Stanfield, H. M., B.A.
Gurd, C. C.	McCabe, J. A., B.A.	Sutherland, G. R.
Harding, E. S., B.A.	McCallum, E. C. D.	Thomas, J. E.
Harvey, F. C., B.A.	McDougall, J. G.	Thomas, H. W.
Hayden, E. W., B.A.	McElroy, A. S.	Thompson, J. A.
Hurdman, H. H. H.	McKinnon, F. W.	Tierney, J. A.
Jackson, F. S.	McLennan, A. A.	Trainor, J. B.
Johnston, W.	McNally, J. P.	Wainwright, S. F. A.
Johnston, J. A.	McRae, J. D.	Wainwright, F. R.
Jost, J. C., B.A.	Pallister, W. T.	Williams, E. J., B.A.
Kerr, R. A.	Pennoyer, A. R.	Wilson, F. W. E.

In addition to those in the above list who have passed in all the subjects of the third year, the following have passed in :—

HYGIENE.

Brears, C. F.	Lang, A. A. J.	O'Reilly, R. H.
Brown, W. K.	McDonald, D. J.	Palmer, A. J.
Dean, W. E.	McDougall, G. P.	Robert, A. N.
Fairie, J. A.		

PATHOLOGY.

Laing, A. L.	Long, C. B.	Palmer, A. J.
Lang, A. A. J.	McDougall, G. P.	Tozer, F. W.

PHARMACOLOGY AND THERAPEUTICS.

Ferguson, W. R.	Macdonald, D. J.	McRae, W. R.
Laing, A. L.	McLean, J. N.	Oppenheimer, S. S.
Long, C. B.	McLaren, R. W.	Tozer, F. W.
LaRue, H. A.		

MEDICAL JURISPRUDENCE.

Brown, W. K.	Laing, A. L.	O'Reilly, R. H.
Brears, C. F.	Lang, A. A. J.	Palmer, A. J.
Darche, J. A.	Long, C. B.	Robert, A. N.
Gadbois, F. A.	Macdonald, D. J.	Sparrow, C. J.
Gladman, E. A.	McLaren, R. W.	Tozer, F. W.
Howden, G. T.	McDougall, G. P.	

MENTAL DISEASES.

Brears, C. F.	Lang, A. A. J.	McRae, W. R.
Darche, J. A.	Long, C. B.	O'Reilly, R. H.
Fairie, J. A.	LaRue, H. A.	Palmer, A. J.
Gadbois, F. A.	Macdonald, D. J.	Robert, A. N.
Howden, G. T.	McDougall, G. P.	Sparrow, C. J.
Laing, A. L.	McLaren, R. W.	Tozer, F. W.

SECOND YEAR SUBJECTS.

The following students of the second year have passed in all of the subjects of the year, viz. :—Anatomy, Practical Anatomy, Chemistry, Practical Chemistry, Physiology, Practical Physiology, Histology and Materia Medica:—

Banfill, S. A.	Gladman, E. A.	Ogilvy, C., B.A.
Barclay, Jas.	Gillies, B. W. D.	Outhouse, J. S., B.A.
Barlow, W. L., B.A.	Grace, N.	O'Shaughnessy, L. J.
Bearman, G. P.	Green, F. W.	Pallister, W. T.
Bayfield, G. E.	Harvey, F. W., B.A.	Palmer, A. J.
Bell, J.	Hayden, E. W., B.A.	Patterson, F. P.
Blackett, J. W., B.A.	Houston, J. C.	Peters, C. A.
Brown, C. I.	Hudson, H. P.	Pittis, H.
Campbell, I. G.	Jackson, F. S.	Powers, M., B.A.
Corbet, G. G.	Johnston, J. A.	Ritchie, A. A.
Covert, A. M.	Lang, A. A. J.	Robertson, A. R.
Cushing, H. B., B.A.	Lockary, J. L.	Rose, W. O.
Delmage, F. W., B.A.	Lyuch, W. W.	Scannlan, M. H.
Dalpe, W. H., B.A.	Lyster, H. F.	Schwartz, H. J.
Darche, J. A.	Mooney, M. J.	Sihler, W. F.
Davidson, C.	Myers, D. A.	Smith, A. M., B.A.
Deane, R. B.	Macaulay, J. F.	Soden, A. E.
Dickson, S. M., B.A.	McDougall, G. P.	Telford, R.
Doyle, J. J.	Macdonald, D. J.	Thomas, H. W.
Duncan, R. G.	McElroy, A. S.	Tiffany, G. S.
Dural, J. L.	McKinnon, F. W.	Tozer, F. W.
Eberts, E. M. von	McLean, J. R., B.A.	Trites, C. B.
Finnie, J. H.	McLennan, P. A.	West, J., M.A.
Forbes, A. M.	McLeod, J.	Whittan, D. A.
Fraser, F. C., B.A.	McMurtry, A. L.	Wilson, F. W. E.
Gilday, F. W.	McRae, W. R.	

In addition to those in the above list who have passed in all the subjects of the second year, the following have passed in :—

HISTOLOGY.

Alley, G. T.	Fairie, J. A.	Mussen, A. T.
Bartlett, G. W.	Howden, G. T.	Patterson, R. U.
Beattie, R. F.	Jamieson, W. R.	Pigeon, W. H.
Brown, C. H., B. A.	Keenan, F. T.	Rutherford, R. M.
Campbell, V. B.	Lamb, J. A.	Robert, A. N.
Chisholm, J.	Loeb, A. A.	Stansby, F. C.
Corcoran, J. A.	Long, C. B.	Stockwell, H. P.
Fagan, G. A., B. A.	McDonald, P. B.	Walker, P., McH.

Haydon, C. H.	Morris, T. E.	Wood, D. F.

FIRST YEAR SUBJECTS.

The following students have passed in all the subjects of the first year. comprising : Anatomy. Practical Anatomy. Chemistry, Practical Chemistry. Physiology. Practical Physiology. Botany (or Zoology) Practical Histology.

Allen, W. C.	Gordon, A. H.	Nash, A. C.
Bowles, C. T.	Gray, C. F. A.	Nicholson, F. J., B. A.
Bradley, J. H.	Green, E.	Noble, E. C.
Burnett, W. B., B. A.	Jones, D. C.	O'Brien, J. R., B. A.
Burris, J. S.	Law, K.	Ross, S. A.
Cameron, L. G.	Levy, A., B. A.	Ryan, G. H. W.
Casselman, P. C.	Logie, A. E.	Shore, R. A. A., B. A.
Cram, W. J.	Love, R. H.	Sutherland, W. H.
Cummings, W. A.	Murphy, E. F.	Thompson, G. H.

Cunningham, A. A.	Macdonald, J. S.	Tooke, F. T., B. A.
Cuzner, G.	MacKenzie, C. A.	Turnbull, T.
Doull, A. E.	McDougall, A.	Whillans, H. A.
Drier, N. E.	McKay, J. G.	Wilkins, W. A.
Dyer, E. O., B. A.	McKechnie, W. C.	Witherbee, W. D.
FitzGerald, C. T.	McNally, D. A.	Wood, J. H.
Fourney, F. W., B. A.	McNaughton, F.M.A, BA	Woodley, J. W.
Galbraith, W. S.	McNiece, T.	

In addition to those in the above list who have passed in all the subjects of the first year, the following have passed in :—

BOTANY.

Babcock, J. R.	Gardner, R. L.	May, L. W.
Bonner, J. A.	Gilday, A. L. C.	MacKinnon, J. W.
Burnett, P.	Gillis, E. G.	McConnell, R. E.
Conroy, R. J.	Goodali, J. R.	Patterson, A., B.A.
Dandurand, L. H.	Howard, C. P.	Reynolds, F. L.
Dickson, W. H.	Martin, J. J.	Rochon, O. J., B.L.
Dixon, W. E.	Massie, J. C.	Thomas, J. W.
Fuller, G. F. L.		

ZOOLOGY.

Scadie, W. D.	Higgins, C. P.
---------------	----------------

ANATOMY.

Aylmer, A. L.	Darche, C. E.	MacKinnon, J. W.
Beadie, W. D.	Fuller, G. F. L.	McCombe, J.
Bonner, J. A.	Gillis, E. G.	O'Callaghan, M.
Brannen, J. P.	Higgins, C. P.	Patterson, A., B.A.
Brennan, F. A.	Leveque, J. T.	Reynolds, F. L.
Burnett, P.	Martin, J. J.	Rochon, O. J., B.L.
Burrows, A. E.	Massie, J. C.	Symmes, C. R.
Conroy, R. J.	May, L. W.	Weed, H. T.
Cunningham, F. J.		

CHEMISTRY,

Beadie, W. D.	Gilday, A. L. C.	Patterson, A., B.A.
Bonner, J. A.	Gillis, E. G.	Reynolds, F. L.
Brannen, J. P.	Goodall, J. R.	Rochon, O. J., B.L.
Burnett, P.	Howard, C. P.	Symmes, C. R.
Darche, C. E.	Massie, J. C.	Thomas, J. W.
Dixon, W. E.	May, L. W.	Weed, H. T.
Gardner, R. L.	McConnell, R. E.	

PRACTICAL CHEMISTRY.

Babcock, J. R.	Fuller, G. F. L.	MacKinnon, J. W.
Beadie, W. D.	Gardner, R. L.	McCombe, J.
Bonner, J. A.	Gilday, A. L. C.	McConnell, R. E.
Branneu, J. P.	Gillis, E. G.	Patterson, A., B.A.

Brennan, F. A.	Goodall, J. R.	Reynolds, F. L.
Burnett, P.	Higgins, C. P.	Rochon, O. J., B.I.
Burrows, A. E.	Leveque, J. T.	Symmes, C. R.
Cunningham, F. J.	Martin, J. J.	Thomas, J. W.
Darche, C. E.	Massie, J. C.	Weed, H. T.
Dickson, W. H.	May, L. W.	White, E. H.
Dixon, W. E.		

PRACTICAL HISTOLOGY.

Burnett, P.	Gilday, A. L.	McConnell, R. E.
Cunningham, F. J.	Higgins, C. P.	Patterson, A., B.A.
Darche, C. E.	Martin, J. J.	Stansby, F. C.
Fuller, G. F. L.	McCombe, J.	Symmes, C. R.

PHYSIOLOGY.

Beadie, W. D.	Gillis, E. G.	MacKinnon, J. W.
Bonner, J. A.	Higgins, C. P.	McCombe, J.
Brannen, J. P.	Martin, J. J.	Reynolds, F. L.
Brennan, F. A.	Massie, J. C.	Rochon, O. J., B. L.
Fuller, G. F. L.	May, L. C.	

HONOR LISTS.

MEDALS AND PRIZES.

THE HOLMES MEDAL is awarded to GEORGE DOUGALL ROBINS, B.A., of Montreal, Que.

THE FINAL PRIZE is awarded to GEORGE REGINALD DEACON, of Stratford, Ont.

THE CLEMESHA PRIZE is awarded to ROBERT OSWALD ROSS, B.A., of Rossville, N.S.

THE CLINICAL CHEMISTRY PRIZE is awarded to FREDERICK BURKE CARRON, of Brockville, Ont.

THE SUTHERLAND MEDAL is awarded to ARTHUR LYALL McMURTRY, of Bowmanville, Ont.

SECOND YEAR PRIZE is awarded to WILLIAM OLIVER ROSE, of Lakesfield, P.E.I.

THE SENIOR ANATOMY PRIZE is awarded to WILLIAM OLIVER ROSE, of Lakeville, P.E.I.

FIRST YEAR PRIZE is awarded to ALVAH HOVEY GORDON, of St. John, N.B.

THE JUNIOR ANATOMY PRIZE is awarded to LAUGHLIN GEORGE CAMERON, of Ottawa, Ont.

THE BOTANY PRIZE is awarded to THOMAS TURNBULL, of Stratford, Ont.

THE ZOOLOGY PRIZE is awarded to ALVAH HOVEY GORDON, of St. John, N.B.

FOURTH YEAR HONORS.

HONORS IN THE FINAL BRANCHES.

- | | |
|----------------------------|---------------------------|
| 1. Robins, G. D., B.A. | 10. Fisk, W. M. |
| 2. Deacon, G. R. | 11. McDonald, H. K. |
| 3. Kendrick, W. N. | 12. Fitchell, R. W., B.A. |
| 4. Archibald, E. W., B.A. | 13. Smith, R. E. G., B.A. |
| 5. Secord, J. H. | 14. Slack, T. J. |
| 6. Carron, F. B. | 15. Lynch, D. P. |
| 7. Moffatt, W. A. | 16. Ross, R. O., B.A. |
| 8. Argue, J. F. | 17. Shaw, R. B. |
| 9. Corbett, F. A. F., B.A. | |

HONORS IN MEDICINE AND CLINICAL MEDICINE.

- | | |
|----------------------------|-----------------------|
| 1. G. D. Robins, B.A. | 7. G. R. Deacon. |
| 2. J. F. Argue. | 8. { R. O. Ross, B.A. |
| 3. { E. W. Archibald, B.A. | { R. B. Shaw, B.A. |
| { W. A. Moffatt. | 10. R. W. Mitchell. |
| 5. { W. N. Kendrick. | 11. F. B. Carron. |
| { G. H. Ellis. | 12. J. K. Kelly. |

HONORS IN SURGERY AND CLINICAL SURGERY.

- | | |
|--------------------------|----------------------------|
| 1. W. N. Kendrick. | 12. E. V. Hogan, B.A. |
| 2. G. D. Robins, B.A. | 13. T. J. Slack. |
| 3. G. R. Deacon. | 14. W. A. T. Robertson. |
| 4. J. H. Secord. | 15. F. A. F. Corbett, B.A. |
| 5. E. W. Archibald, B.A. | 16. W. M. Fisk. |
| 6. W. A. Moffatt. | 17. J. F. Argue. |
| 7. { F. B. Carron. | 18. E. J. Ryan. |
| { P. C. Leslie. | 19. { R. W. Mitchell. |
| { R. O. Ross, B.A. | { D. Patrick. |
| 10. { H. K. McDonald. | |
| { C. P. Steeves, B.A. | |

HONORS IN OBSTETRICS AND CLINICAL OBSTETRICS.

- | | |
|---------------------------|----------------------------|
| 1. R. E. G. Smith, B.A. | 13. F. A. F. Corbett, B.A. |
| 2. G. D. Robins, B.A. | 14. L. Drum, B.A. |
| 3. E. W. Archibald, B. A. | 15. H. K. McDonald. |
| 4. W. N. Kendrick. | 16. { D. P. Lynch. |
| 5. J. K. Kelly. | { W. Mowatt, B.A. |
| 6. { G. R. Deacon. | 18. { W. M. Fisk. |
| { E. J. Ryan. | { T. Tetreau. |
| 8. W. A. Moffatt. | 20. { H. M. Church. |
| 9. { J. F. Argue. | { R. W. Mitchell, B.A. |
| { F. B. Carron. | { R. O. Ross, B.A. |
| 11. { E. V. Hogan, B. A. | 23. C. A. Staples, B.A. |
| { J. H. Secord. | |

HONORS IN PRACTICAL PATHOLOGY.

- | | |
|--------------------------|------------------------|
| 1. G. D. Robins, B.A. | 5. G. R. Deacon. |
| 2. E. W. Archibald, B.A. | 6. R. O. Ross, B.A. |
| 3. { W. N. Kendrick. | 7. F. B. Carron. |
| { W. A. Moffatt. | 8. C. P. Steeves, B.A. |

HONORS IN OPHTHALMOLOGY.

- | | |
|-------------------------|----------------|
| 1. J. H. Secord. | 3. W. M. Fisk. |
| 2. R. W. Mitchell, B.A. | 4. E. C. Fish. |

HONORS IN GYNÆCOLOGY AND CLINICAL GYNÆCOLOGY.

- | | |
|-----------------------------|---------------------------|
| 1. E. W. Archibald, B.A. | 17. W. M. Fisk. |
| 2. G. H. Ellis, | 18. { J. K. Kelly. |
| 3. R. B. Shaw. | { T. J. Slack. |
| 4. W. N. Kendrick. | 20. J. L. Churchill, B.A. |
| 5. F. J. Duckett. | 21. P. C. Leslie. |
| 6. J. H. Secord. | 22. { E. V. Hogan, B.A. |
| 7. G. R. Deacon. | { W. A. T. Robertson. |
| 8. D. P. Lynch. | 24. F. H. Wheeler. |
| 9. { F. A. F. Corbett, B.A. | 25. W. A. Moffatt. |
| { R. W. Mitchell, B.A. | 26. { J. M. Brathwaite. |
| 11. { S. Bonnell. | { A. D. Fraser. |
| { H. W. Keith. | |
| 13. { F. B. Carron. | |
| { L. Drum, B.A. | |
| { G. D. Robins, B.A. | |
| { R. O. Ross, B.A. | |

HONORS IN HYGIENE.

- | | |
|---------------------------|-----------------------|
| 1. G. R. Deacon. | 17. C. A. Staples. |
| 2. W. N. Kendrick. | 18. D. McEwen. |
| 3. R. O. Ross, B.A. | 19. D. P. Lynch. |
| 4. L. R. Morse. | 20. J. E. Dewar. |
| 5. R. E. G. Smith, B.A. | 21. F. W. Macartney. |
| 6. G. D. Robins, B.A. | 22. { F. L. Thompson. |
| 7. F. A. F. Corbett, B.A. | { H. K. McDonald. |
| 8. A. J. Grant. | 24. Drum, L. |
| 9. R. B. Shaw. | 25. { J. F. Argue. |
| 10. W. A. Moffatt. | { J. L. Churchill. |
| 11. C. P. Steeves. | { D. Grant. |
| 12. J. K. Kelly. | 28. F. J. Lee. |
| 13. E. C. Fish. | 29. { P. C. Leslie. |
| 14. J. H. Secord. | { R. W. Mitchell. |
| 15. G. H. Ellis. | { W. A. T. Robertson. |
| 16. W. H. Fisk. | { W. Smellie. |

THIRD YEAR HONORS.

PHARMACOLOGY AND THERAPEUTICS.

- | | |
|---------------------|---------------------|
| 1. { Laidley, I. H. | 14. Kirby, H. S. |
| { McDougall, J. G. | 15. { Gordon, G. S. |
| 3. Pennoyer, A. R. | { Rogers, F. E. |

- | | |
|-----------------------------|-----------------------------|
| 4. { Gurd, C. C. | 17. Gourley, T. A. |
| { Jost, A. C., B. A. | { Jackson, F. S. |
| 6. Lennon, E., B. A. | 18. { McKinnon, F. W. |
| 7. Keenan, C. B. | { Roy, J. J. |
| 8. { Skeels, A. A., B. A. | 21. { Delmage, F. W., B. A. |
| { Stanfield, H. M., B. A. | { Lockary, J. L. |
| 10. Corcoran, J. A. | 23. { Morris, C. H., B. A. |

LIST OF PRIZEMEN AND MEDALLISTS IN THE
MEDICAL FACULTY.

In 1855 the examinations were divided into Primary and Final, and prizes were established for the best Thesis and for the best Examination in the Primary and Final branches.

In 1865 the Holmes' Gold Medal was established in honour of Dr. Holmes, and is given for the best examination in both Primary and Final branches.

The following is the list with the present addresses of the recipients:—

1854. FOR GENERAL PROFICIENCY.—1st Prize—Robert Craik, Montreal.
2nd Prize—Thomas Simpson, Montreal.
1855. THESIS.—James McG. Stevenson, Bryanston, Ont.
Final Examination.—James McG. Stevenson, Lake Port, Mich.
Primary Examination.—Walter J. Henry.*
1856. THESIS.—Walter James Henry,* and W. J. Jones, Prescott, O.
Final Examination.—E. Leberge.*
Primary Examination.—*Hon. Levi R. Church, Montreal, Q.
1857. THESIS.—*Hon. Levi R. Church, Montreal, and D. T. Robertson
Lennoxville, Q.
Final Examination.—*Hon. Levi R. Church, Montreal, Q.
Primary Examination.—James Kerr.*
1858. THESIS.—Timothy F. English,* and W. F. Taylor, Peterboro', O.
Final Examination.—Wm. Harkin.*
Primary Examination.—Wm. Harkin.*
1859. THESIS.—Edward W. Smith.*
Final Examination.—James J. O'Dea, Stapleton, Staten Island,
New York.
Primary Examination.—Henry Warren.*
1860. THESIS.—J. W. Pickup.*
Final Examination.—Henry Warren.*
Primary Examination.—Joseph M. Drake,* and Fred. Sutherland.*
1861. THESIS.—Joseph M. Drake,* F. J. Austin, Sherbrooke, Q., and
D. L. Philip, Brantford, O.
Final Examination.—Joseph M. Drake.*
Primary Examination.—Thos. C. Walton Inspector U.S. Navy,
Annapolis, Md.

1862. **THESIS.**—R. M. Bucke, London, O.
Final Examination.—John A. Stewart.*
Primary Examination.—John J. Marston, Cheyenne, Wyoming.
1863. **THESIS.**—Wm. C. Gustin.*
Final Examination.—J. J. Marston, Cheyenne, Wyoming.
Primary Examination.—R. A. Kennedy,* and Peter A. McDougall, Ottawa, and C. F. Bullen.*
1864. **THESIS.**—W. W. Squire.*
Final Examination.—D. Howard Harrison, Winnipeg.
Primary Examination.—Kenneth Reid, New York.
1865. **HOLMES' GOLD MEDAL.**—E. P. Hurd, Newburyport, Mass.
Final Examination.—H. L. Vercoe*
Primary Examination.—George Ross,* and W. Gardner, Montreal.
1866. **HOLMES' MEDALLIST.**—George Ross, M.A.*
Final Examination.—William Gardner, Montreal, Q.
Primary Examination.—Clinton W. Kelly, Louisville, Ky.
1867. **HOLMES' MEDALLIST.**—Clinton W. Kelly, Louisville, Ky.
Final Examination.—C. W. Kelly, Louisville, Ky.
Primary Examination.—Wm. Henry Patterson.
1868. **HOLMES' MEDALLIST.**—T. G. Roddick, Montreal, Q.
Final Examination.—T. G. Roddick, Montreal, Q.
Primary Examination.—Andrew Harkness, Lancaster, O.
1869. **HOLMES' MEDALLIST.**—T. D. Lucas.*
Final Examination.—Andrew Harkness, Lancaster, O.
Primary Examination.—Alexander A. Henderson, Ottawa, O.
1870. **HOLMES' MEDALLIST.**—A. A. Henderson, Ottawa, O.
Final Examination.—O. H. E. Clarke, Chicago.
Primary Examination.—J. H. Mathieson, St. Mary's, O.
1871. **HOLMES' MEDALLIST.**—J. H. Mathieson, St. Mary's, O.
Final Examination.—H. P. Wright, Ottawa, O.
Primary Examination.—Thomas Kelly, Omaha, Neb.
1872. **HOLMES' MEDALLIST.**—Hamilton Allan, Tacoma, W. T.
Final Examination.—G. A. Starke, Milwaukee, Wis.
Primary Examination.—F. J. Shepherd, Montreal.
SPECIAL PRIZE FOR THESIS.—W. Oslor, Baltimore, Md.
1873. **HOLMES' MEDALLIST.**—Thomas Kelly, Omaha.
Final Examination.—D. A. Alguire, Cornwall, Ont.
Primary Examination.—J. D. Cline, R.A.*
1874. **HOLMES' MEDALLIST.**—J. D. Cline, R.A.*
Final Examination.—J. C. Cameron, Montreal.
Primary Examination.—S. J. Tunstall, R.A., Kamloops, B.C.
1875. **HOLMES' MEDALLIST.**—S. J. Tunstall, R.A., Kamloops, B.C.
Final Examination.—J. B. Benson, Chatham, N.B.
Primary Examination.—C. H. Murray, R.A.*; R. H. W. Powell, Ottawa, Ont.

1876. HOLMES' MEDALLIST.—Robert H. W. Powell, Ottawa, O.
Final Examination.—Chas. H. Murray, B.A.*
Primary Examination.—Alex. C. Fraser, Manitowoc, Wis.
 SPECIAL PRIZE FOR THESIS.—R. L. MacDonnell, B.A., Montreal.*
1877. HOLMES' MEDALLIST.—James Bell, Montreal, Q.
Final Examination.—W. D. Oakley, Streetsville, O.
Primary Examination.—H. N. Vineberg, New York.
1878. HOLMES' MEDALLIST.—H. N. Vineberg, New York.
Final Examination.—T. W. Mills, M.A., Montreal.
Primary Examination.—W. R. Sutherland, Montreal.
 SUTHERLAND GOLD MEDAL.—J. M. Lefebvre, Vancouver, B. C.
1879. HOLMES' MEDALLIST.—J. B. Lawford, London, Eng.
Final Examination.—A. W. Imrie, Detroit.
Primary Examination.—J. A. McDonald, Montreal.
 SUTHERLAND GOLD MEDAL.—W. L. Grey, Pembroke, O.
1880. HOLMES' MEDALLIST.—J. A. McDonald, Montreal.
Final Examination.—H. B. Small, Ottawa.
Primary Examination.—James Ross, B.A., Dundas, O.
 SUTHERLAND GOLD MEDAL.—H. W. Thornton, B.A., New Richmond, Q.
1881. HOLMES' MEDALLIST.—James Ross, B.A., Dundas, O.
Final Examination.—John W. Ross, Cohoes, N.Y.
Primary Examination.—R. J. B. Howard, B.A., London, Eng.
 SUTHERLAND GOLD MEDAL.—C. E. Cameron, Montreal.
1882. HOLMES' MEDALLIST.—R. J. B. Howard, B.A., London, Eng.
Final Examination.—Henry V. Ogden, B.A., Milwaukee, Wis.
Primary Examination.—George A. Graham, Hamilton, O.
 SUTHERLAND GOLD MEDAL.—Wyatt G. Johnston, Montreal, Q.
 MORRICE SCHOLAR.—Wyatt G. Johnston, Montreal, Q.
1883. HOLMES' MEDALLIST.—C. E. Cameron, Montreal.
Final Examination.—I. B. Loring, Chicago, Ill.
Primary Examination.—Ed. G. Wood, Mitchell, O.
 SUTHERLAND GOLD MEDAL.—R. F. Ruttan, B.A., Montreal, Q.
 MORRICE SCHOLAR.—R. F. Ruttan, B.A., Montreal, Q.
1884. HOLMES' MEDALLIST.—Wm. A. Ferguson, Bathurst, N.B.
Final Examination.—James P. McInerney, Kingston, N.B.
Primary Examination.—Smith Gustin, Bay City, Mich.
 SUTHERLAND GOLD MEDAL.—John Ecker, R.A., Montreal, Q.
1885. HOLMES' MEDALLIST.—Edwin G. Wood, Mitchell, O.
Final Examination.—Smith Gustin, Bay City, Mich.
Primary Examination.—Ed. J. Evans, La Crosse, Wis.
 SUTHERLAND GOLD MEDAL.—H. A. Lasseur, B.A., Montreal, Q.
1886. HOLMES' MEDALLIST.—Herbert S. Birkett, Montreal, Q.
Final Examination.—Walter W. White, M.A., St. John, N.B.
Primary Examination.—William I. Bradley, Sault St. Marie.
 SUTHERLAND GOLD MEDAL.—William I. Bradley, Sault St. Marie.

1887. HOLMES' MEDALLIST.—Ed. Evans, La Crosse, Wisc.
Final Examination.—Hen. i A. Lafleur, B.A., Montreal, Q.
Primary Examination.—A. E. Garrow, Ottawa.
 SUTHERLAND GOLD MEDAL.—John Creasor, Toronto, O.
1888. HOLMES' MEDALLIST.—N. D. Gunne, St. Marys, O.
Final Examination.—W. G. Stewart, Montreal, Q.
Primary Examination.—R. E. McKechnie, Montreal, Q.
 SUTHERLAND GOLD MEDAL.—C. W. Bissett, St. Peters, N.S.
1889. HOLMES' MEDALLIST.—Alex. E. Garrow, Ottawa, O.
Final Examination.—*Hugh McKercher.
Primary Examination.—Wm. Arthur Brown, Chesterville, O.
 SUTHERLAND GOLD MEDAL.—John C. Clemesha, Port Hope, O.
1890. HOLMES' MEDALLIST.—R. E. McKechnie, Nanaimo, B.C.
Final Examination.—E. J. Bowes, Soudan, Minn.; M. W. Murray, New Decatur, Alabama.
Primary Examination.—James Henderson, Warkworth, Ont.; Thomas Jameson, Rochester, N.Y.
 SUTHERLAND GOLD MEDAL.—Thomas Jameson, Rochester, N.Y.
 CLEMESHA PRIZE.—A. H. Coleman, Tacoma, Wash.
1891. HOLMES' MEDALLIST.—W. A. Brown, Chesterville, Ont.
Final Examination.—W. F. Hamilton, Sackville, N.B.
Primary Examination.—W. E. Deeks, Williamsburg, Ont.
 SUTHERLAND GOLD MEDAL.—J. A. Henderson, Orangeville, Ont.
 CLEMESHA PRIZE.—W. S. Morrow, Halifax, N.S.
1892. HOLMES' MEDALLIST.—Thomas Jameson, Rochester, N.Y.
Final Examination.—James Henderson, Warkworth, Ont.
Primary Examination.—A. Davidson, Burns, Ont.
 SUTHERLAND GOLD MEDAL.—A. Davidson, Burns, Ont.
 CLEMESHA PRIZE.—W. B. H. Massiah, Barbadoes, W.I.
1893. HOLMES' MEDALLIST.—W. E. Deeks, B.A.; N. Williamsburgh, Ont.
Final Examination.—John Alexander Henderson, Orangeville, Ont.
Primary Examination.—W. J. LeRossignol, B.A., Montreal, Q.
 SUTHERLAND GOLD MEDAL.—Walter J. LeRossignol, B.A.
 CLEMESHA PRIZE.—R. B. McKay, B.A., Toronto, Ont.
1894. HOLMES' MEDALLIST.—Andrew A. Robertson, B.A., Montreal, Q.
Final Examination.—Albert G. Nichols, M.A., Montreal, Q.
Primary Examination.—W. N. Kendrick.
 SUTHERLAND MEDAL.—G. D. Robins, B.A., Montreal, Q.
 CLEMESHA PRIZE.—Allan Davidson, Burns, Ont.

1895. HOLMES' MEDALLIST.—William A. Feader, Iroquois, O.
Final Examination.—Wm. G. Reilly, Ottawa, Ont.
Primary Examination.—C. B. Keenan, Ottawa, Ont.
 SUTHERLAND MEDAL.—C. B. Keenan, Ot'awa, Ont.
 CLEMESHA PRIZE.—W. W. Wickham, Summerside, P.E.I.
1896. HOLMES' MEDALLIST.—Geo. Dougall Robins, B. A., Montreal, Q.
Final Examination.—Geo. Reginald Deacon, Stratford, Ont.
 SUTHERLAND MEDAL.—A. L. McMurtry, Bowmanville, Ont.
 CLEMESHA PRIZE.—Robt Oswald Ross, B. A., Rossville, N.S.

EXAMINATION PAPERS, SESSION 1895-1896.

MATRICULATION EXAMINATION.

LATIN.

Examiner..... A. JUDSON EATON, M.A., PH. D.

NOTE.—In answering questions 1 to 6, candidates are requested to mark, by the usual sign, all *long vowels*.

I. LATIN GRAMMAR.

1. Decline *index, dies, opus, deus; idem*.
2. Give the Genitive Singular of *filius, ingenium*; the Vocative Singular of *meus*; and the Locative of *Roma, Philippi, Carthago*.
3. Decline the adjective *niger* in the singular; *tristis* in the plural.
4. Name the adjectives that take—*ius* in the genitive singular.
5. Compare the adjectives *brevis, facilis, malevolus, magnus*; the adverb *digne*.
6. How are the four conjugations distinguished? Inflect *sum* in the Imperfect Subjunctive; *arvo* in the Fut. Indic. Act; *rego* in the Pres. Subjunct. Act.; and *audio* in the Perf. Indic. and Pres. Imper. Act.
7. Give the principal parts of *augco, cresco, tego, tollo, obliviscor*.
8. What are *Final* and *Consecutive Clauses*? By what particles are they introduced? Give two examples of such Clauses.
9. Translate into Latin:—(1) five, eight, eleven, fifteen, twenty-two, sixty; fourth, ninth. (2) Who is more eloquent (*eloquentior*) than Cicero? (3) The farmer ploughs (*arvo*) his field with great care (*cura*). (4) Is it written? does he send? will he go? (5) These mountains are very high.
10. Translate into Latin:—(1) The bravest of all were the Belgae, who were the farthest away from the Roman Province. (2) Orgetorix prevailed on the Helvetii to go forth from their borders. (3) Peace and friendship were established with the neighboring States. (4) Informers disclosed this conspiracy to the Helvetii. (5) By burning all their dwellings they took away the hope of return.

II. CAESAR AND VIRGIL.

1. Translate:

Hoc proelio facto, reliquas copias Helvetiorum ut consequi posset, pontem in Ararē faciendum curat, atque ita exercitum transducit. Helvetii, repentino eius adventu commoti, cum id, quod ipsi diebus viginti aegerime confecerant, ut flumen transirent, uno illum die fecisse intelligerent, legatos ad eum mittunt: Cuius legationis Divico princeps fuit, qui bello Cassiano dux Helvetiorum fuerat. Is ita cum Caesare agit: "Si pacem Populus Romanus cum Helvetiis faceret, in eam partem ituros, atque ibi futuros Helvetios ubi eos Caesar constituisset atqui esse voluisset: sin bello persequi perseveraret, reminisceretur et veteris incommodi Populi Romani et pristinae virtutis Helvetiorum."—CAESAR, Bk. I.

2. Explain the grammatical construction of the words and phrases in italics.

3. Write out in the form of direct narration from *Si pacem* to *virtutis Helvetiorum*.

4. Translate:

Instructo exercitu magis ut loci natura deiectusque collis et necessitas temporis quam ut rei militaris ratio atque ordo postulabat, universis legionibus aliae alia in parte hostibus resisterent, sepibusque densissimis, ut ante demonstravimus, interiectis prospectus impediretur, neque certa subsidia collocari, neque quid in quaque parte opus esset provideri, neque ab uno omnia imperia administrari poterant. Itaque in tanta rerum iniquitate fortunae quoque eventus varii sequebantur.—CAESAR, Bk. II.

5. Derive *impeditio, collocari, iniquitate, cogo, detrimentum*.

6. Translate:

Defessi Aeneadae, quae proxima litora, cursu contendunt petere, et Libyae vertuntur ad oras. Est in secessu longo locus; in aula portum efficit obiectu laterum, quibus omnis ab alto frangitur inque sinus scindit sese unda reductos. Hinc atque hinc vastae rupes geminique minantur in caelum scopuli, quorum sub vertice late aequora tuta silent; tum silvis scena coruscis desuper horrentique atrum nemus imminet umbra. Fronte sub adversa scopulis pendentibus antrum; intus aquae dulces, vivoque sedilia saxo, nympharum domus. Hic fessas non vincula navas ulla tenent; unco non alligat ancora morsu. Huc septem Aeneas collectis navibus omni ex numero subit; ac magno telluris amore egressi optata potiuntur Troes harona, et sale tabentis artus in litore ponunt.—VIRGIL, Bk. I., 157-173.

7. (a) Write out, dividing into feet and marking the quantity of every syllable, and the principal caesura of each verse, the first four lines. (b) Give the principal parts of *frangitur*, *scindit*, *minantur*, *tenent*, *collectis*. (c) Account for the following ablatives: *cursu*, *obiectu*, *silvis*, *azo*, *morsus*, *navibus*, *sale*.

MATHEMATIC.

Examiner, A. JOHNSON, M.A., LL.D.
 Assistant Examiner, H. M. TORY, B.A.

1. Describe a parallelogram that shall be equal to a given triangle, and have one of its angles equal to a given angle.

2. Parallelograms upon equal bases and between the same parallels are equal.

3. If a straight line be divided into two equal and also into two unequal parts, the rectangle contained by the two unequal parts, together with the square on the line between the points of section, shall be equal to the square on half the line.

4. Divide a straight line into two parts, so that the rectangle contained by the whole line and one part shall be equal to the square on the other.

5. Prove that the straight line which bisects any chord of a circle perpendicularly passes through the centre of the circle.

6. Equal chords in a circle are equidistant from the centre.

7. Find the factors of (1) $9x^2 + 9x + 2$.

$$(2) \frac{1}{4}(ab - cd)^2 - (a^2 + b^2 - c^2 - d^2)^2.$$

$$(3) x^3 y^3 - 512.$$

8. Simplify $\frac{4}{x-1} + \frac{x-1}{x}$

$$\frac{\frac{1}{x-1} - \frac{1}{x}}{\frac{1}{x-1} - \frac{1}{x}}.$$

9. Solve the equations:

$$(a) \frac{1}{x-a} + \frac{2}{x-b} = \frac{3}{x-c}.$$

$$(b) 4x^2 - 25x - 21 = 0.$$

$$(c) \frac{4}{x} - \frac{3}{y} = 5.$$

$$\frac{6}{x} + \frac{3}{y} = 10.$$

10. The sum of $\frac{2}{3}$ of $\frac{3}{4}$ and $\frac{2}{3}$ of $\frac{2}{3}$ is equal to how many times their difference.

11. The whole time occupied by a train 150 yards long in crossing a bridge at the rate of 25 miles an hour is 20 seconds; find the length of the bridge.

12. Find the compound interest on \$1500 for 3 years at 5 per cent.

ENGLISH HISTORY AND ESSAY.

Examiners, { CHAS. W. COLBY, PH.D.
 { PAUL T. LAFLEUR, M.A.

(Answer *any three* of the following questions :)

1. Describe the steps by which English political freedom was won, 1200-1650.
2. What foreign possessions had England in 1170, 1360, 1763?
3. Write a short essay on the condition of Roman Catholicism in England, 1535-1688.
4. What dynastic title had the following sovereigns: Stephen, Henry VII, James I., George I.?
5. Make notes on Constitutions of Clarendon, Statute of Mortmain, Self-denying Ordinance, repeal of the Test and Corporation Acts, repeal of the Corn Laws.

ESSAY.

Write an essay of at least two pages on *any one* of the following subjects :

- A. Prevention of cruelty to animals.
- B. The best method for saving time.
- C. A great disappointment.

ENGLISH GRAMMAR AND ANALYSIS. (*N. B.—the Analysis is compulsory.*)

Examiner CHAS. E. MOYSE, B. A.

1. Give the plural of wife, cliff, court-martial, handful. Account for the sound of the final *s* in *books* and *tubs*. Write two words, each of which has two plurals of different meaning, one plural being English and the other Latin; give the meanings of the plurals. Write two words, each of which has two plurals, both plurals being English; give the meanings of the plurals.
2. Classify the following adjectives and pronouns: large, many, each, my, self, he, who. Give the inflections of those which are inflected.
3. Mention a weak intransitive and a strong transitive verb. Take the latter, and write the second person singular of the tenses of the Indicative mood in the passive voice. Distinguish between participles and adjectives. Parse *walking* in *walking-stick*.
4. Form a sentence showing the use of the conjunctive or relative adverb, and say what the adverb modifies. *John is taller than Charles*: what is *than*? Classify the following adverbs: badly, quite, no, thither.
5. Explain and illustrate the following terms: subjective complement, objective complement, compound subject, phrase.
6. Parse and analyse: .
 None judge so wrong as those who think amiss.

EXAMEN D'ENTRÉE.

Examinateur,..... M. INGRES.

Écrire en toutes lettres les nombres suivants : 21, 31, 35, 41, 44, 70, 71, 81, 98, 327, 1001.

Donner les temps primitifs de six des verbes suivants :

Aller, boire, courir, écrire, faire, joindre, mourir, partir, savoir, tenir, voir.

Traduire les passages suivants :

(a) Une des différences principales entre la République et la Monarchie, c'est que le remplacement du président vient à heure fixe ; les chances de la vie et de la mort introduisent l'imprévu et l'inattendu dans la monarchie.

Julien Simon.

(b) Au siècle où nous vivons, l'horizon de l'art est bien élargi. Autrefois le poète disait : le public ; aujourd'hui le poète dit : le peuple.

Victor Hugo.

(c) Le président des Etats-Unis est le plus accessible de tous les citoyens de la grande République du Nouveau-Monde.

Trois fois par semaine, il descend au salon du rez-de-chaussée, à la Maison-Blanche, et pendant une heure serre le main à tous ceux qui il prend fantaisie d'entrer. Il n'est pas d'homme au monde qui serre autant de mains que le président des Etats-Unis. Vous entrez au salon de la Maison-Blanche à l'heure de la réception publique, comme vous entrez à l'église à l'heure de l'office. J'y ai vu des nègres, des femmes revenant du marché qui avaient laissé leurs paniers dans l'antichambre, des gens de toutes sortes et de toutes conditions. C'est le spectacle le plus démocratique que l'on puisse imaginer.

Max G. Roll.

(d) Ah ! mes beaux dimanches de la banlieue (suburbs) lorsque j'avais vingt ans ! Ils sont restés en de mes plus chers souvenirs. Depuis, j'ai connu d'autres joies, mais rien ne vaut d'être jeune et de se sentir lâché pour un jour dans la liberté des grands bois.

Enile Zola.

(e) Les bons livres sont des amis, a-t-on dit, et personne plus que moi n'est disposé à les qualifier ainsi ; j'ajouterais même que, parmi ces amis il en est vers lesquels on se sent attiré par des sympathies nombreuses, qu'on serait tenté de voir en eux des parents dignes de tout notre respect et de tout notre amour.

Silvestre de Sacy.

Noter en toutes lettres.

the lungs; (*b*) the physical principles involved; (*c*) the relations of intra-thoracic and intra-pulmonary pressure in both phases of respiration.

5. *Intestine*: (*a*) Structure—gross and microscopic of the upper third of the small gut; (*b*) Digestion in the same.

6.—Write upon *one* of the following:—Structure and functions of (*a*) spinal cord; (*b*) ear; (*c*) larynx.

PHYSICS AND CHEMISTRY.

Examiners..... PROF. GIRDWOOD AND RUTAN.

1. How are the intensity and quantity of heat and electricity measured?
2. What is meant by the "Dew Point"? How may it be determined?
3. Describe and trace out the action of a galvanic current on a solution of Sulphate of Copper, using two electrodes of copper.
4. How is the atmospheric pressure measured? What causes variation? The sp. gravity of Chloroform is 1.52; what would be the average height of a Chloroform Barometer?
5. Give Avogadro's law and the law of diffusion of gases. Illustrate each with examples.
6. Explain fully the relations between acids, bases and salts. Classify acids.
7. Give equations showing a mode of preparation of:—(*a*) Hydrochloric acid; (*b*) Hydrogen sulphide; (*c*) Sulphur dioxide; (*d*) Nitric oxide; (*e*) Nitric acid.
8. Write a short synopsis of the chemistry of sulphur.

BOTANY.

Examiner..... I. P. PENHALLOW, M.A., Sc.

1. Describe fully the structure and functions of a prothallus, and show what plants exhibit the highest development of this body.
2. State as fully as you can, the distinguishing features of (*a*) an endogen; (*b*) an exogen.
3. Describe fully the reproductive process in (*a*) *Fucus vesiculosus*; (*b*) *Selaginella*.
4. Give a detailed account of the anatomy of a leaf, and show how such organs are removed from the tree on which they grow.
5. Give a detailed account of the distinguishing characteristics of (*a*) Saprophytes; (*b*) Parasites; (*c*) Chlorophytes.
6. Describe the principal characteristics of the chief divisions of the vegetable kingdom.
7. Give a concise account of the nature and sources of plant food.

N.B.—Special importance will be attached by the Examiners to the use of diagrams and references to experiments witnessed or performed by the candidates.

SECOND YEAR EXAMINATIONS.

HISTOLOGY.

Examiners..... { Prof. GEO. WILKINS.
N. D. GUNNE, M.D.

1. Describe a section through the Eyeball from before backwards, giving the minute anatomy of the parts cut.

2. Describe the structure of the Spleen.

3. What is the Portal Canal? Describe all the elementary structures that enter into its formation.

4. Describe and mention where found: Pacinian bodies; Hassal's corpuscles; cells of Purkinje; tubes of Bellini; pyramids of Ferrein.

CHEMISTRY.

Examiners, Profs. GIRDWOOD and RUTAN.

1. Describe the Spectroscope. How is it applied to analysis?

2. Describe fully one form of Vapour Density apparatus. What would be the molecular weight of a substance whose vapour density was 4.2 (air = 1), at a pressure of 6.4 millimetres and temperature of 27.3° C.

3. Compare the chemical and physical properties of the four Halogen acids.

4. What is the approximate percentage composition of the atmosphere? How may each constituent be detected?

5. What is the chemical composition of: (a) Quick lime; (b) Marble; (c) Chloride of lime; (d) Saltpetre (or nitre); (e) Blue vitriol; (f) Potash alum; (g) Epsom salts; (h) Rochelle salts.

6. Give the preparation and occurrence of Aluminium.

7. Classify the Monosaccharides, with examples. Give two characteristic reactions common to all.

8. Define and illustrate by examples and formulae: (a) Unsaturated hydrocarbons; (b) Mercaptans; (c) Glucosides; (d) Phenols; (e) Ketones; (f) Alkaloids; (g) Amide-acids; (h) Etherial salts.

9. Write a brief account of the chemistry of: (a) Chloral; (b) "Sulphuric ether."

10. Calculate the weight of Carbon Dioxide and water produced by the combustion of 250 grams. of Chloroform. What weight of Silver Chloride would be obtained from the Chlorine, Cl = 35.5, Ag = 108?

MATERIA MEDICA & PHARMACOLOGY.

Examiners..... { Prof. A. D. BLACKADER.
Dr. F. M. FRY.

1. Describe the characteristics of alkaloids, glucosides, and volatile oils, and give examples.

2. Name the various methods in which drugs may be employed to obtain their therapeutic effects.

3. State the physical properties of (*a*), ether; (*b*), chloroform. Describe the precautions to be taken before the administration of an anæsthetic. Mention the official preparations of chloroform.

4. Describe belladonna. State briefly its action upon the nervous system. Mention its principal official preparations.

5. Name the official salts of quinine; of morphine. State the action of quinine (*a*), on the nervous system; (*b*), on the blood.

6. State fully what is meant by the terms—drastic purgative, cholagogue, and hydragogue—and give examples of each.

PHYSIOLOGY.

Examiners..... { WESLEY MILLS, M.D.
F. G. FINLEY, M.D.

1. Indicate by diagrams (preferably) or otherwise the embryonic origin of the following:—(*a*), amnion; (*b*), allantois; (*c*), gut; (*d*), somatopleure; (*e*), splanchnopleure; (*f*), lungs; (*g*), pancreas; (*h*), liver; (*i*), brain; (*j*), eye; (*k*), ear.

2. *Heart*: (*a*), Phases of a cardiac cycle with estimated time of duration of each in man. (*b*), With what events do the cardiac sounds correspond in point of time? (*c*), Indicate (diagram) path of augmentor (accelerator) nerves. (*d*), Intrinsic nervous mechanism of the heart. (*e*), Causation of Heart-beat.

3. *Respiration*: (*a*), Afferent and efferent nerves. (*b*), Experimental demonstrations. (*c*), Nature and causation of the action of the respiratory centre. (*d*), Subordinate centres.

4. *Aplasia*: (*a*), Periods. (*b*), Blood pressure in each stage. (*c*), Explanations.

5. *Spinal Cord*: (*a*), Main divisions, with anatomical characteristics of each. (*b*), Mark by a diagram the tracts of ascending degeneration. (*c*), Indicate their relations to parts above and below.

6. *Eye*: Iris: (*a*), Structure. (*b*), Nerve supply and nerve centres (diagram). (*c*), Experimental demonstration. (*d*), Diagram of visual tract from retina backwards. (*e*), Experimental demonstrations of its correctness.

ANATOMY.

Examiners..... { PROF. F. J. SHEPHERD, M.D.
J. M. ELDER, M.D.
J. G. MCCARTHY, M.D.

1. The skull having been opened and the brain removed, give the dissection necessary to expose the Ciliary ganglion.

2. Name in order the parts it is necessary to remove to expose the Inacminate Artery.

ease can be developed, giving examples; also the modes of cure of disease by means of "bacteriotherapy."

3. Describe the specific micro-organism of Diphtheria, and state what is known as the causation of the symptoms of this disease.

4. What microbes are to be found causing the following conditions: Acute Pneumonia, Cholera, Erysipelas, the Bubonic Plague, Enteric Fever.

MEDICAL JURISPRUDENCE.

Examiners, { Prof. G. WILKINS.
WYATT JOHNSTON, M.D.

1. Mention the characteristic differences, for the purpose of identification, between the male and female skeleton.

2. How may burns cause death: immediately and remotely? How would you distinguish on the dead body burns inflicted during life from those made after death?

3. What are the signs of maturity of foetus? How would you prove *post mortem* that it had breathed?

4. What are the symptoms of Carbolic Acid poisoning? How would you treat such a case?

PHARMACOLOGY AND THERAPEUTICS.

Examiners..... { Prof. A. D. BLACKADAR.
Dr. F. M. FREY.

1. Compare the action of opium, chloral hydrate, sulphonal, and potassium bromide in producing sleep. State their several disadvantages, and write prescriptions for their administration.

2. Compare the action of digitalis, potassium citrate, benzoic acid, and buchu upon the urinary secretion.

3. Describe briefly the various methods in which mercury may be employed in the treatment of syphilis, and write suitable prescriptions. State the official preparations of metallic mercury.

4. State the physiological action on the nervous system of strychnine, atropine, camphor, acetanilid; and on the circulatory system of strophanthus, squills, aconite and nitro-glycerine.

GENERAL PATHOLOGY.

Examiners..... { Prof. J. G. ADAMI, M.A., M.D.
C. F. MARTIN, M.D.

(The first broad four other questions to be attempted.)

1. Describe the conditions that you would expect to find in the body of a man of sixty-five years of age, who had manifested during life the symptoms associated with general arterio-sclerosis?

2. Discuss the part played by the exudate in inflammation. To what extent is it possible to distinguish between the reaction induced by microbic and by simple irritants?

3. Under what various conditions may hypertrophy be acquired? Exemplify in each instance.

4. How would you distinguish between adenoma and carcinoma? What courses may a carcinoma of the uterus go in order to involve the trachea?

5. State what you know concerning the causation of and the histological changes produced in fatty degeneration. Under what conditions may hyaline and glycogenic degenerations be developed?

6. What may be the results of blocking of a branch of the coronary artery? Under what conditions may such blocking be brought about?

7. What is meant by Cohnheim's theory? Is this theory wholly satisfactory? What other factors may be suggested in order to explain the origin of carcinomata?

8. Define the following terms:—(1) Brown induration of the lung; (2) cyanotic atrophy of the liver; (3) teleangiectatic fibroma; (4) pus; (5) white infarct; (6) necrobiosis; (7) phagocyte; (8) chloroma.

PUBLIC HEALTH AND PREVENTIVE MEDICINE.

Examiners.....PROF. CRAIK and RUTAN.

1. What are the necessary determinations in a chemical analysis of potable water? Compare the composition of an "upland surface water" with well water.

2. What are the advantages and dangers of the "water carriage system"? What constitutes good plumbing?

3. "Ground air" and "ground water." Describe. Note influence on health of localities. How contaminated? How purified?

4. How would you characterize the climate of (a) Egypt, (b) Madeira, (c) Denver, Colorado, (d) Atlantic City, (e) the Lower St. Lawrence. For what chronic diseases is each suited?

5. Two cases of small-pox, one fatal, occur in a boarding school where a few day scholars are also received; mention the necessary measures for preventing the spread of the disease. State in what way these would be modified had the disease been (a) diphtheria, (b) scarlatina, (c) cholera, (d) typhoid, (e) tuberculosis?

FOURTH YEAR EXAMINATIONS.

OBSTETRICS & DISEASES OF INFANTS.

Examiners.....PROF. J. C. CAMERON, M.D.

1. Moulding: What are its conditions, mechanism and advantages?

2. How would you manage the third stage of labor in a normal case? Give your reasons for the various methods of procedure.

3. Hemorrhage during the third stage, give the causes, symptoms and treatment.

4. In a primipara, aet 40, menstruation ceased August 1st, 1895. The diagonal conjugate measures 9 c.m. By abdominal palpation it is made out that the foetus lies in the second position of the vertex, and that the foetal heart beat is 130. Describe your subsequent management of the case, giving your reasons for the measures you adopt.

5. Ophthalmia Neonatorum; what are its symptoms and terminations? What would be your treatment. (a) Prophylactic; (b) in the acute stage; (c) in the chronic stage.

THEORY AND PRACTICE OF MEDICINE.

Examiners { PROF. STEWART, M.D.
" FINLEY, M.D.
" LAELBUR, M.D.

1. Discuss the conditions that threaten a fatal issue in Typhoid fever, Diphtheria and Scarlatina. [30]

2. Discuss the causation of pain in the epigastric region. [40]

3. Give the clinical history of a case of Hypertrophic Cirrhosis, and describe the morbid conditions in the liver. [30]

4. Describe the physical signs of any three conditions producing an increase of precordial dullness. [30]

5. What symptoms and physical signs may result from an aneurism of the ascending thoracic aorta. Discuss the etiology and treatment of such a condition. [30]

6. Describe the results of muscular strain on the thoracic organs. [40]

7. Discuss the chief causes leading to Lateral and Longitudinal Sinus Thrombosis: Cerebral and cerebellar abscesses: and acute purulent meningitis. How would you recognise the onset of the conditions mentioned. [30]

8. Discuss the significance and management of convulsions occurring (a) In an adult who is suffering from lead poisoning; (b) In a rickety child aged 2 years; (c) In the course of chronic Interstitial Nephritis. [30]

9. Discuss the nature of the following case:

A girl, age 16, suffered from headache and vomiting: a week later coldness of the fingers of the left hand was complained of: complete paralysis of the left arm and paresis of the left leg set in, in the course of a few days. On examination when patient was admitted to the hospital, there was right facial paralysis with total left hemianesthesia of the face, arm, trunk and leg. The knee jerks were found exaggerated, especially the right. No disturbance of functions of any of the special sense nerves could be made out, and the urine was found to be normal. For a month there was no change in the patient's condition, except the development of right sided Ptosis. [40]

SURGERY.

Examiner,.....Prof. T. G. RODDICK, M.D.

1. Define the terms "Floating" and "Moveable" Kidney. Give the symptoms and treatment.
2. Enumerate the various kinds of Ulcer which occur on the tongue. State briefly the causes and characters of each.
3. What symptoms would cause you to suspect Tubercular Disease of the Knee Joint? What treatment, short of Excision, might you adopt?
4. Describe the Femoral Ring. Given a case of Hernia, what symptoms would indicate "Strangulation"? Under what circumstances is Taxis contra-indicated?
5. How do Ligature, Tortion and Acupressure act in arresting hemorrhage from a severed artery? What are their relative advantages under different circumstances?
6. Describe accurately the situation and extent of the skin incisions in performing the operations of: (a) Tracheotomy; (b) Lumbar Colotomy; (c) Inguinal Colotomy; (d) Suprapubic Cystotomy; (e) Lateral Lithotomy.
7. What are the diseases of the Testicle in which you would perform Castration? Describe the operation, and give the names and derivation of the arteries divided.
8. Describe the two most frequent Dislocations of the Shoulder Joint. State how they may be distinguished from each other and from other injuries about the joint.
9. What are the causes of Delayed Union and of Non-Union after fracture of a long bone? Describe the treatment you would adopt to obtain union in each variety.
10. Describe briefly the process of separation of Necrosed Bone when invaginated. What operative measures would you adopt for its removal? Name all the instruments required for such an operation.

 OPHTHALMOLOGY AND OTOTOLOGY.

Examiners, { Prof. F. BUTLER, M.D.
J. J. GARDNER, M.D.

1. Give the cause, prevention and treatment of Ophthalmia Neonatorum.
2. Atropine, Eserine, Cocaine; state the action of each of these on the eye, and what injurious effects may follow the local use of each of these drugs.
3. Give the diagnosis and treatment of Hypopion Keratitis.

4. Describe the usual tests of hearing power, and indicate how you would record the results of these tests.

5. Describe acute suppurative Otitis Media, and state the signs that would lead you to believe the Mastoid had become involved in such cases.

GYNÆCOLOGY.

Examiners,..... } Prof. WM. GARDNER.
 } Asst. Prof. T. J. ALLOWAY.

1. Obstructive Dysmenorrhœ, its causation and treatment.
2. Inversion of the Uterus, symptoms and diagnosis.
3. Diagnosis of Myoma of the Uterus from Cancer.
4. Discuss the causation of inflammation of the uterine appendages.
