THE PROTESTANT, AND EVANGELCAL WITTHESS.

The second control of the second of the seco

O let thy love my soul inflame! And to Thy service sweetly bind; Transfuse it through my inmost frame,

where they shall bestow their fruits and their goods. Their barns will not contain all their riches, the markets cannot be expected to absorb them, and how shall they be disposed of? Few, even if they could, will be inclined to bestow all upon themselves, and hoard for personal indulgence that which may provoke a proclamation of their folly. Many will recognize their obligation to the merchant, the mechanic, the doctor, and perhaps, the schoolmaster and the minister; and some will oven remember the poor. If there be in store a sufficiency to meet all claims from abroad, and all no cessities at home, there will be much ambition to discharge all legal demands, to triumph in a state of independence, and to owe no man any thing. Many will be auxious to add to former stores, and make provision for years to come; and some will propose to themselves, after they have been just, to be generous too, and to cast of their abundance into the treasury of the Lord. Now, it is well to be just; it is well to be independent;

be auxions to add to former stores, and make provision for years to one; and some will propose to themselve, after they have been just, to be generous too, and to case with the position of the treaspy of the collection of the proposed themselves and the collection of the proposed themselves are stored to the proposed to the proposed to control of the proposed to the proposed to the proposed to control of the proposed to the proposed to control of the propose

## Mr. Editor :

THE

THE

Drotestant & Evangelical Witness.

SATURDAY, SEPTEMBER 17, 1859.

The ground of rich and poor has again brought forth plentifully; and it is an anxious inquiry with many, where they shall bestow their fruits and their goods. Their barns will not contain all their riches, the markets cannot be expected to absorb them, and how shall they be disposed of? Few, even if they could, will be the plant of the same of the positional greatness. Every one knows that many persons cannot support two papers. Those who are so situated.

Truesday, the 27th of September inst., to commence at half-past 9 a.m. The members of the meeting are all requested to be present. Rev. Mr Prince will be be present at half-past 9 a.m. The members of the meeting are all requested to be present. Rev. Mr Prince will be present in the evening, service to commence at 7

Then. The death of the Rev. William Cros levan Minister, is announced in the Halifax papers leyan Minister, is announced in the Halifax papers.

He expired at Windsor on Friday last. The Sun says: The reverend gentleman was in his 72d year. A large portion of his life had been spent in the service of his Master. He is now gathered to the home of his fathers, but his memory will be fondly cherished by a large circle of friends in this and the

# CHAMBERS'S

EDUCATIONAL COURSE THE object of this Cownes is to furnish the friends of an improved system of Education with the Books required for carrying out their views in the actual business of the surgery and echool-room. It is constructed upon a theory which acknowledges that the human being possesses a physical, a moral, and an intellectual nature, each of which calls, this appropriate carrying out the period of infancy and youth, for its appropriate carroise, training and instruction. In the execution of their task, the Editors have endesvored to give a uniform tone and character to the works composing the series—the first time, they believe, anything of the kind has been attempted.

The volumes are uniform in size (foolscap 6vo), and are strongly bound in cloth lettered, at exceedingly moderate prices.

rices.

Of this series of Educational Treatises, upwards of eighty noises are now published; and it is the anylous decire of the Education that it should be completed as speedily as may be unsistent with the deliberation required for so impurtant an

INFART TREATMENT under two years of age.—A complete

ENPART TREATMENT under two years of ago.—A complete code of instruction, at once philosophical and practical, for the treatment of infunts under Two years of age, 2s INNANY EDUCATION From Two to Six years of age.—This volume is addressed to the Conductors of Nursertos and Infant Schoos. It lays down principles of training, and convey many of the lessons and rules of conduct which may be impressed on the mind is early childhood. Finar-Book of Ranshoo: a dapped to the intelligence of Children under Six years of age, 24d SECOND BOOK of RANSHOO: a regular Series of Lessons on the Consonants, for more advanced pupils, 3d SECOND BOOK of RANSHOO: a regular Series of Lessons on the Consonants, for more advanced pupils, 3d SECOND BOOK of COMMON TRINGS and ORDINARY COMPUCT.—This small volume communicates ideas of practical criticy, both in regard to the occumenty of person and of life, 2s MORAL CLAIS-BOOK.—A series of advanced Reading Lessons, descriptive of the Moral Duties of Life, illustrated by Illusterical and Biographical Ancedetes and other Navastives, with x selection of Scriptural Passages and Apothegas, 2s. 6d.

NGLISH COMPOSITION, INTRODUCTION to —Directions for Exercises in Composition, designed as preparatory to the Study of Grammatical Rules, 10d

Study of Grammatical Rules, 16d
INTRODUCTION to ENGLISH GRAMMAR. New Edition.—Intended to convey the Theory and Practice of English Grammar in as simple and Elementary a form as possible, to English Grammar in as simple and Elementary a form as possible, to English Grammar in as simple and Elementary a form as possible, to implicitly of manner being studiously aimed at, 3s-36
EVYMOLOGY, EXERCISES OR.—This volume presents distinct vocabularies of words from the Saxon, Latin and Greek, with appropriate examples and exercises, 3s
ELOCUTION, PRINCIPLES Of.—Besides treating the important subjects of Inflection, Medulation, and the Measure of Speech, there is added a copious selection of pieces in Proce and Verse, as examples in various styles of reading, 4s
ENGLEM LANGLAGE and LITERATURE, HISTORY of the .—Suitable to the more advanced classes in English Academies, 4s STRODUCTION to Arithmetic.—As a first book on the sub-ject, this work is limited to the expressly elementary, yet it includes all that is likely to be required by persons in ordi-nary circumstances, is, 6d.

ARTHMENTC: Theoretical and Practical.—This volume con-ducts the pupil from the first steps in the science of numbers to that stage when it becomes necessary to adopt the smore general symbols of Algebra, 3s.

ser to Arithmetic.—A sequel to the preceding Treatise, containing solutions of every question in which two or more operations are involved, 3s.

operations are involved, 3s.

Book-Keepixo by Single and Double Entry.—In the present Treatise, simplicity has been chiefly simed at; all unnecessary Technicalities in the phraseology and complexity
in the system of keeping the accounts having been studiously
avoided. An Appendix, containing Explanations of Mercantile Terms and Transactions, is subjoined, which will
serve in some measure as a guide to the business of the
Counting-room, 2s. 6d.

Single Entry. Two Books, sewed, 2s. 3d.
Doubly Entry. Two Books, sewed, 2s. 3d.

ALGEBRA: Theoretical and Practical —Containing all the subjects in theory and practice usually comprehended in an subjects in theory and practice usually comprehecimentary work, 4s. 9d.

Kry to Algebra.—A Sequel to the preceding Treatise, designed to assist the student of Algebra to surmount any difficulties he may encounter in this branch of his studies, price 4s.

Exercises and Problem— price 4s. XERCIERS and Problems in Algebra; with answers and hints to the Solutions. This Collection of Exercises is in-tended as a Supplement to the Algebra of Chambers's Edu-cational Course, and is arranged in Sections corresponding thereto, 4s.

therete, 4s.

Exercises and Problems in Algebra; without answers,

Containing the same Collection of Exercises as the preceding
but arranged so as to suit the opinions of such Teachers as
prefer using a Text-book without Answers, is 8d.

PLANE GENETRY.—Consisting of the first six books of Eacild, a book on the Quadrature and Rectification of the Circle, a book on Geometrical Maxima and Minima, an Esposition of the Method of Geometrical Analysis, an additional second and fifth book, and a Treatise on Plane Trigono-

Key to Plane Geometry.—Forming a Key to the Exercises in Plane Geometry, and may be used as a Sequel to the ordinary course of study contained in the Elements of Euclid, 3s. 3d.

nary course of study contained in the Elements of Euclid, 3a. 3d.

Solid and Spherical Geometry and Conic Sections.—This volume consists of Treatises on Solid Geometry, Spherical Geometry, Spherical Teigonemetry (these from Playfair's Euclid), the Projections of the Sphere, Perpendicular Projection, Linear Perspective, and Conic Sections, 2a. 3d.

PRACTICAL MATHEMATICS.—Containing Descriptive Geometry, Trigonometry, Mensuration of Heights and Distances, Mensuration of Surfaces, Land-Surveying, Mensuration of Solids, Guaging, Barometric Measurement of Heights, Levelling, Strength of Materials, Projectiles, Portification, Spherical Trigonometry, Astronomical Problems, Navigation, Geodetic Surveying, and other subjects, 3s.

KEY to Practical Mathematics—Containing Solutions of all the Exercises given in the preceding Treatise, 7s.

MATHEMATICAL TABLES.—These Comprehend the most important Tables required in Trigonometry, Mensuration, Land-Burveying, Navigation, Nautical Astronomy, &c., and particularly adapted to the above Treatises of Fractical Mathematics.—The Tables of Legarithms, Logarithmic Sines, &c., are carried to coven decimal places, 4s. 3d.

Redinkers of Krowledge.—In this work the child is introduced, in a progressive manner, to a knowledge of the external appearances in the natural and social world, and in simple language, esitable to juvenile minds. Hustrated by Wood Engravings, 1s.

Sciences, Introduction to the.—This volume presents, a Restematic view of Nature under the various sciences of As-

struted for the tron dogs, and to

The coming era of comparative engaphess ought to be regarded by agriculturists as their most advantageous time. Now is the best opportunity for clearing and fencing, draining and sub-soiling, manuring and planting orchards. When wages are \$30 a month, and lumber \$30 a thousand, many of these works cannot be done profitably at all; now is the opportunity, when men are travelling about the country, asking for employment, and every article of the firmament. It completely encircles the whole fabric of the skies and sends its light down upon country, asking for employment, and every article of growth and manufacture is at a depreciation. The high price of labour during the last six years has done much to injure Canadian farming, and we are sanguine that low rates will do as much to improve that later than the sanguine that the rates will do as much to improve that manufactured by the results of the skies and sends its light down upon us, according to the best observations, from no less than 18,000,000 of suns. These are planted at various distances, too remote to be more than feedone much to injure Canadian farming, and we are sanguine that low rates will do as much to improve it. The work lately done has been in great part slight and superficial; much ground has been passed over, but little cultivated in a thorough way. The excellent position which Canada occupies in regard to markets, since reciprocity was gained, the means placed at command during the last few years for forwarding here produce, have put an entirely different face on Provincial farming. Our agriculturists no longer live in the back woods unable to obtain cash for their produce, and compelled to take what will barely pay them for scratching the earth by the simplest process. A better price is paid for produce at this moment in Torouto than in most English towns, and the cash is always ready. Land is infinitely cheaper hear than in England, and though labour and manufactured goods are desere (the latter in consequence of misgovernment), their is no such great disparity as to place Canadian agriculture much lower in the scale than that of England. We believe that all the best known improvements in cultivation which can be employed profitably in Britain, can be introduced here to advantage. Very extensive schemes requiring great outlay of capital may be excepted, but all the operations which a well-to-do farmer can undertake with his own means, will prove as profitable here as in England. It does not lie within our province to position is not what it once was, one of disadis own means, will prove as profitable here as in Segland. It does not lie within our province to point out the improvements to be made. We desire merely to impress upon the farming population, that heir position is not what it once was, one of disadvantage, that they are so placed that any well devised appenditure in improving the cultivating of their arms will repay the cutlay. Our wealthy agriculturists, instead of sub-soiling and draining, which hey understand, are in the habit of putting their money into other kinds of business which they know sothing about, and generally are losers thereby. Canada will never be a great farming country till his tendency is checked—till the tillers of the soil out that they are engaged in a lucrative occupation, which while conferring independence and freedom term care and risk, is able to command the attachment of the most intellectual of maukind—Toronto Gibbe.

How Drought Benefits the Soil.

"Thy and het! Het and dry! How much every thing unflew for the sunt of rain;" exclaims the fairner, as the enoty clouds melt, day after day, from his sight. And it is a not some now presented in unny places in the country. We need not recall it for our readers—we would rather invite them to a brighter side of the picture. That sensons of drought are often of the material causes to rectore the constituence, but chemical science shows us that droughts are one of the material causes to rectore the constituence, but chemical science shows us that droughts are one of the material causes to rectore the constituence, of the material causes to rectore the constituence, or the material causes to rectore the constituence of the constituence

catending desper and despers as the drouth conituses and the societure is exhaled—a circulation of
water in the earth, the reverse of that which takes
place is wet weather. This progress to the surface
of the water is the earth, wanniests itself strikingly
in the drying up of springs and wells, and streams
which are supported by springs.

Not only is water thus brought to the surface of
the earth, but also all that the water holds in rolution. There are sails to iline and magnesis, of prisah and sods, or indeed whatever the subsoil or topstrate of the earth may contain. The water on
reaching the surface is evaporated, but leaves behind its lime and potsab, its phosphates, silicates,
carbonates, and sails——all indespensable to the
growth of the vegetable products of the farm. Rain
water, as it falls, will disolve but a very small portion
of some of those substances; but when it sinks into
the earth, it then becomes strongly imbured with
carbonic and from the decomposition of vegetable
matter in the soil, and thus acquires the property of
readily dissolving minerals on which before it could
have little effect.

Several experiments tried by Prof. Higgins, go to
show this action of drouth in bringing mineral matture from a depth to the surface of the soil. It one
case he placed a solution of chloride of barryin
Chloride of lime, sulphate of soda, and carbonate of
potsab, were experimented upon in like manner, and
upon the application of proper tests, the surface of
the soil was teeted with sulphure acid, and
withvered by the beat—seems suffering under a currain, "may produce at once abundant crops, but
train," any produce at once abundant crops, but
the coil showed their presence in large quantities,
drawn up by the rising of water from underneath, as
in the case of drouth.

The prohed earth—all vegetation dwarfed and

various distances, too remote to be more than fee-bly understood; but their light, the medium of

A New Motive Power Discovered.—A letter from Paris says that a new motive power has been discovered; which, upon experiment, has been discovered; which, upon experiment, has been discovered; which, upon experiment, has been discovery has been made by a young workman named Jacob, a turner in copper, and was the result of an accident. While seeking to increase the power of his turning lathe, a new means of power was suddenly revealed to him, whereby he has been able alone, without assistance, to construct a machine which increases two hundred fold the labor of one man, and may be increased to an unlimited extent. The inventor, who has hitherto worked at Escarbotla, has been of course sent for to Paris, and already nearly completed a machine applicable to every species of industry. If success should attend the experiment—for which it is understood, one of the great industrial capitalists furnishes the money—the discovery will put an end to all steam power and every other expensive action, and the result is waited for with the greatest anxiety in the manufacturing world. Already have the proprietors of the spinning works at Schaffhausen been induced to come to Paris in order to hear the first news of the success or failure of the trial. A New Morive Power Discovered .- A letter

### HOLLOWAY'S PILLS.

HIS GREAT HOUSEHOLD MEDICINE S. Animal ranks among the leading accessaries of life, as it is well must like the world that it cures many complaints other remocannot reach, this fact is as well established as that the Sun 18. Nature its the World, and are wenderfully adapted to this Climate 14. Machine to the World, and are wenderfully adapted to this Climate 14. Machine 15. Nature DISORDER OF THE LIVER AND STOMACH.

NERVOUS DISORDERS.

Any derangement of these delicate organs affects disastrously both the body and the mied. To the servous invalid Helloway's P. Eagland and Wales Pills are an article of vital successity. As they impart tone and vigor to the internal organs, and consequently to the servous system which pervades and connects them. Hence their arr. Affrica.—Oceania vellous curses of hysteria, low spirits, spasms, fits, headaches, servous twitchings, and other hindred complaints are all radically removed by the use of these havaluable Pills.

COMPLAINTS OF TOTAL AINTS OF

The quantity and quality of the bile are of vital importance to bealth. Upon the liver, the gland which secretes this fluid, the Pills operate specifically, infallibly rectifying its irregularities, and effectually curing jaundice, billous remittants, and all the varieties of disease generated by an unsatural condition of the organ, so often deranged in these latitudes.

	organ, so onen derangen in these intitudes.			
9 0	Holloway's Pills are the best remedy known in the world for the following diseases:

GEO. T. HASZARD, Agent for P. E. I.

DEPOSITORY OF INSTRUCTIVE AND AMUSING TRACTS.—This Illustrated Work resembles in some respects the Miscellany of Tracts published a few years ago, animing at a higher, though not less popular tone, and will entisfy, it is hoped, the new requirements of the day in regard to literary elagance—the papers being original compositions, propared expessity for the work by apopular and practiced writers. Each volume is illustrated with Wood-engravings, and has a nearly engraved Title-page.

In 6 vols., cloth lettered, at 2b. 4d. each.

In 2 vols., fairly boards, at 1b. 4d. each.

Each Volume complete in itself.
