

Watford Guide-Advocate

Volume XLVI—No. 38

WATFORD, ONT., FRIDAY, SEPTEMBER 10, 1920

\$2.00 PER YEAR IN ADVANCE
In United States \$2.50.

EAST LAMBTON FAIR WATFORD SEPT. 30 - - - OCT. 1

LOCAL HAPPENINGS

THE GUIDE-ADVOCATE welcomes all items of interest for this column. Call Phone 11, send by mail or drop them in GUIDE-ADVOCATE Letter Box.

Service at 3 p.m. next Sunday in the Baptist church.

Do you fall buying at Swift's. Save time and money.

A number of Watford people are attending the Toronto fair this week.

If you have an account against the Baseball Club, call on Jos. McManus and get your money.

The Baroness Macdonald, widow of the late Sir John A. Macdonald, died at her home in England on Sunday.

New P. S. Primer now in stock, also another supply of the New P. S. Composition and Grammar.—at McLaren's.

Mr. John Harlacher, a resident of Watford and Brooke some 25 years ago, died at his home in Uxby, Mich., on Sept. 1st.

Arrangements are about completed for the taking of the Dominion census in June of next year. 12,000 enumerators will be engaged in the work.

Tire users who figure cost per mile and freedom from trouble insist on Dominion Tires—our specialty. R. Morningstar.

The statutory allowance to jurors is now \$4 per day and 13c. per mile. This may be increased to \$5 per day by county councils and in districts by the Lieutenant-Governor.

Fine clothing at Swift's, ordered or ready made.

In renewing his subscription to the Guide-Advocate S. P. Morris, of Lacomb, Alta., says: I would not like to do without the home paper although I am away for so many years.

President Zavitz and Secretary Kenward canvassed the town last week for special prizes for the Watford Fall Fair and met with good success. There are some attractive items in the list.

An authority on the meat question says there is no need of concern over the meat supply, there is plenty for all. Well, this may be so, but it is not so much a question of supply as one of price that bothers most of us.

Mr. Lorne J. Williams, who for some time has filled the position of inspector of schools at Medicine Hat, has taken charge of the department of science in the Normal School at Calgary and moved with his family to that city.

When you get a Ford car you not only get a better car but a more comfortable car—backed with Ford service.—R. Morningstar.

The amount of rainfall during August amounted to 3.08 inches. For August of last year it was 3.75 inches. The maximum temperature for the month was 91 deg., the minimum 42, which is practically the same as in the year 1919.

Rev. T. D. Rayner, pastor, will conduct both services in the Cong'l church on Sunday. The sacrament of the Lord's Supper will be observed at the close of the evening service. All members are urged to be present. Cordial invitation to both services is extended to all friends.

The regular September meeting of Lambton's 149 I.O.D.E., will be held on Tuesday afternoon, September 21st, at 3 o'clock, at the home of Mrs. Ross Luckham. As this is the first meeting since the summer vacation there is a good deal of business to transact and a full attendance is requested.

By permission of the Board of Railway Commissioners the railways of Canada will raise their freight rates on Monday, Sept. 13th. Passenger rates will also be increased 20 per cent. This increase holds good until Dec. 31st, 1920, and the rates will return to the present level July 1st, 1921.

The prices are lower than city stores at Swift's.

Mr. Chester R. Schlemmer, Detroit, son of Mr. Harry Schlemmer, Watford, was married at Detroit on Saturday, Sept. 4th, to Miss Lydia E. Baumgarten of Highland Park, Mich. Both parties come from Ontario. Mrs. Schlemmer being a native of Dashwood, and Chester a Watford boy.

Polarine Oil bought at last year's prices enables us to sell any quantity at exceptional prices. Polarine needs no recommendation.—R. Morningstar.

The Epworth League will have charge of the service in the Methodist church next Sunday evening. There will be a bright song service also special music and a report of the summer school which a number of the young people attended during the summer will be given. All are welcome to enjoy this service with the young people.

Tomatoes are not being put down this season at the Petrolia canneries. It is stated that the canneries of this county have declined the tomato proposition this season. The reason assigned is the too great richness of the Lambton farms for the successful growing of this fruit. The vines grow so luxuriantly that the fruit fails to ripen properly.

WATFORD TAXES FIFTY MILLS

The by-law to levy taxes for 1920 was passed at the council meeting on Tuesday evening. The rate is fifty mills, made up as follows:—
County rate.....8 mills
Village rate.....13 7/10 "
Special Sidewalk Deb.....6/10 "
Wire Co. Deb.....1 8/10 "
Library Deb.....4/10 "
Public School maintenance.....16 5/10 "
High School maintenance.....9 "
Total.....50 mills

The New Goods at Swift's. Call and look though.

Prest-O-Lite Battery is second to none in quality and you save duty, as it is Canadian made.—R. Morningstar.

After a long summer vacation of over two months the local scholars as well as many others are happy once again. Schools re-opened for the 1920-21 term on Tuesday, Sept. 7th. New principals take charge in both schools, Mr. Murray Cameron at the high school and Mr. John A. Macdonald at the public school. These are the only changes on the staffs.

The town of Blenheim has purchased a new fire engine and equipment. The engine is a combination chemical and pumping outfit mounted on a 60 horse power chassis. The rig is said to be strictly modern and efficient. Something of this description would prove useful in Watford until such time as the waterworks system is constructed and in operation.

Special fares and trains will be given by the G. T. R. to visitors to the Western Fair commencing on September 11 and lasting until September 17, the passengers who journey to London will be allowed a fare and one-third. These tickets will be good to return until September 21. Special train will leave Watford at 9.47 a.m. on Sept. 14 and 15 and leave London same dates at 11 p.m., arriving at Watford 11.59 p.m.

"Say," said the irate visitor, "you had something about me in your paper that has gotta be corrected." "If the item was wrong," the editor smoothly replied, "we shall cheerfully do as you request." "I told one of your reporters I saw a beautiful goldfish perched on a twig on the side of my bedroom." "Well—" "And when the item came out in the paper it read "goldfish." "That isn't so bad." "Oh, isn't it, though? Well, ever since it was in the paper friends of mine have been hanging around our house thinking I had a private supply of something to drink in my cellar."

THE LATE MRS. JAS. SPALDING

Saturday, Aug. 28th, witnessed the death of one of Warwick's noblest women, Ellen, wife of the late Jas. Spalding, who for over half a century has lived on lot 27, con. 2, S. E. R., was called to rest.

Mrs. Spalding was born in Renfrew, Ont., August 7th, 1849. She was twice married. By the first union one son was born, Herbert W., of Regina, Sask. In December 1875, she was again married to the late Jas. Spalding, who predeceased her in January three years ago.

Mrs. Spalding was a woman of great love and devotion to her family. One of those quiet and beautiful characters that in a quiet way become so necessary and important in a community in which they live. Her absence will long be felt by a host of friends and neighbors, who have known her so long and valued her counsel and friendship so highly.

She leaves to mourn their loss, seven sons and two daughters as follows: Robert O., contractor, Watford; Mrs. G. T. Fuller and Wallace, Second Line; Freeman, with the Toledo Ry. & Electric Light Co., Toledo, Ohio; John W., at home; Thos. R., with the Pullman Co., Buffalo, N. Y.; Mrs. D. H. Carter, Armada, Mich., and Walter A., with The Pullman Co., Toronto, Ont. Also three brothers and three sisters survive, viz: Thos. Willoughby, Watford; Robert, of Warwick; Christopher, of London, Mrs. R. F. E. Freele, Strathroy; Mrs. Sarah Anne Spill, Smith Falls; and Mrs. Barbara Giff, Renfrew, Ont.

Mrs. Spalding was a willing worker for and attended the Methodist church. Deceased had enjoyed good health up to the time of her death. On Saturday evening she had performed her usual household duties, and about ten o'clock retired to her room. A few minutes later, Jack, who was alone with her at the time, heard a noise upstairs and receiving no response to his call, rushed upstairs, but life was extinct.

The funeral, which was the largest witnessed for some time, was held from the late residence on Tuesday, August 31st, at 2.30, to the Watford Cemetery, the pall bearers being five sons and one son-in-law. The services were conducted at the house and grave by Mr. Tiffin and Foster of Watford. Many floral tributes were received showing the high esteem in which deceased was held.

Those from a distance who attended the funeral were: Mrs. T. R. Spalding, Buffalo, Mr. and Mrs. Christopher Willoughby, and Mr. and Mrs. Jeffrey, London, Ont., Mr. and Mrs. R. F. E. Freele and Mr. Will Freele, Strathroy, Mr. David Carter, Mr. and Mrs. Manley Dudley, Armada, Mich., Misses Anna and Catherine MacCauley, Detroit, Mich., Mr. A. A. Gray, Toledo, Ohio.

PERSONAL

R.-D. Swift is in Detroit this week.

Miss Frances Weiser, of Detroit, is visiting at Mr. W. Cooke's, Sr.

Miss Gladys Shrapnell, Ingersoll, spent Labor Day at her home here.

Robert McLeay, Toronto, spent the week end with friends and relatives here.

Miss Florence Cooke, of Detroit, is spending her holidays at her home here.

Mr. Arthur Jackson, London, spent Labor Day with his aunt, Mrs. J. H. Jackson, Huron st.

Miss Louise M. Aitken has just returned from a visit with friends in Sarnia and Detroit.

Mr. and Mrs. Charles Burton, of London, spent the week end with Mrs. Woods, St. Clair st.

Mr. Robert O. Spalding is passing through a critical illness. At last reports he was improving slowly.

Mr. and Mrs. R. Munro and daughter spent the week end with their cousin, Miss Louise M. Aitken.

Mrs. William Ward returned home on Sunday evening from an extended visit in Saskatoon and Biggar, Sask.

Miss G. Davidson has returned to Mt. Brydges where she has charge of the continuation classes of the public school.

Mr. and Mrs. George Kingston, Sarnia, visited his parents, Mr. and Mrs. Paul Kingston, Wall st., this week.

Miss Lillie Coates, of Sarnia, was a week end visitor of friends in the vicinity.

Messrs. J. B. Cowan, S. E. Thompson and J. E. Fowler spent Labor Day fishing at Rondeau on Lake Erie.

Mr. and Mrs. L. H. Aylesworth spent the week end at their daughter's, Mrs. C. H. Butler at Blenheim.

Mr. J. E. Tait has gone to Sudbury after spending a few days at his home here.

Mrs. Lowry returned on Tuesday after spending two months at Toronto, Niagara Falls and Branford.

Mr. Frank Gibson, Paisley, was a Watford visitor last week.

Miss Adams was in Toronto this week visiting her sister-in-law, Mrs. Adgt. Adams.

Miss Frances Rogers, of London, spent the holiday with Mrs. A. J. Hagle.

Mrs. Lowery returned home Tuesday evening after several weeks' visit with relatives in Toronto.

Mr. and Mrs. Alex. Kelly, Sarnia, spent the week end at their daughter's, Mrs. J. W. McLaren.

Mr. and Mrs. W. J. Wilson, Detroit, are visiting friends in Watford and vicinity.

Miss S. Percival has returned from a three weeks holiday with friends in Hamilton, Burlington and Grand Bend.

Mrs. Neil McLean, who has been spending the holidays with her sister Mrs. Neil Bennett, returned to Sarnia on Monday.

Mrs. Vera A. M. Fuller and Miss E. Winnifred Swift returned Sunday from their trip to Europe and the Battlefields.

Miss Ruby E. Phillips, of Sarnia, called on her uncles, John and Reg. McIntosh, and other relatives during the week end.

Mrs. W. H. Rogers is spending a few weeks with Dr. and Mrs. C. L. Wallace, of Peterboro, and other friends in Coburg.

Petrolia Topic: Miss Mary Holmes returned to Watford on Monday, after spending her vacation at her home on the 12th line.

Mr. W. H. Shrapnell attended the meeting of the executive of the East Lambton Teachers' Association at Petrolia on Saturday.

Mrs. Johnston and daughter Leola, Ingersoll, Miss Alice Fitzgerald, London, and Mr. George Mead, Marshville, were the guests at Mr. W. E. Fitzgerald's over the week end.

Miss Ida Bell, London, spent the week end at her uncle's, Rev. S. P. Irwin. On Sunday evening she sang very acceptably a solo in Trinity church.

Mrs. Manley Blinn and two children, Clarence and Dorothy, Detroit, returned to their home on Tuesday after spending a week with her sister Mrs. A. W. Harrower.

Mr. George Mead, son of Rev. T. M. Mead, a former pastor of the Baptist church, Watford, is spending a few days in this vicinity. George was severely gassed while overseas and spent nearly two years in hospital.

Dr. and Mrs. A. Campbell and Mr. McEachern, of Elton, Mich., Mrs. Jean Karr and daughter, Catharine, of Forest, Mr. and Mrs. Rich. Lucas and daughter, Goldie, Mr. and Mrs. Fred Paisley and little son, Lloyd, of Brooke, were guests at Mr. and Mrs. Robt. Taylor's on Sunday last.

Mrs. H. Armstrong who has spent the past three months with her sister Mrs. Neil Bennett, returned to her home in Toronto on Thursday.

Mr. and Mrs. T. P. Elliott and son, Laughlin, of London, who are enjoying a motor trip through Ontario, spent Tuesday night of last week with Mrs. Elliott's mother, Mrs. S. Laughlin, Huron st., and left Wednesday for Petrolia and Sarnia.

Rev. and Mrs. T. DeCourcy Rayner and family have returned home after an enjoyable holiday. They motored to Parry Sound, going through the beautiful Muskoka district. Leaving the family with his brother, at Parry Sound, Mr. Rayner journeyed on by rail, via the scenic route through Northern Ontario and Algonquin Park, to Montreal, to meet his parents who have arrived from London, England. Returning with them to Parry Sound a family reunion after nearly fourteen years of separation was enjoyed at the home of his brother, Mr. W. J. Rayner, treasurer of the Parry Sound Iron Co. The return trip to Watford was taken over a different route. From Parry Sound by S.S. Waubic through the Georgian Bay to Penetanguishene, among the 30,000 Islands with magnificent scenery unsurpassed anywhere in Canada, then on by auto from Penetang to Watford, making a short visit at the Presbyterian Manse, Innerkip.

Mr. Rayner's cousin, Rev. H. Boldingbrooke, B.D. M. Rayner's parents will come to Watford to make their home at the end of this month.

WON ELECTRIC TOASTERS

Two rinks of Watford bowlers went to Petrolia Labor Day to take part in the annual bowling tournament.

The contest for the Corey Cup F. W. Rogers' rink composed of Rev. S. P. Irwin, E. A. Brown and Frank Lovell, won four straights defeating Sarnia and Florence in the finals, but lost to Ridgetown by one shot. They, however, brought home the second prize of four electric toasters.

The other rink composed of F. W. McLean, T. G. Mitchell and L. Orlo Jacklin with Dr. Siddall, skip, won two ends and lost two.

This is the third consecutive win for Ridgetown.

WATFORD COUNCIL

Watford, Sept. 7th, 1920.

Special meeting of Council at call of Reeve for regular and special business. Present—Messrs. Johnston, Harper, Doan and Stapleford. Minutes of former meeting were read, no objection offered, Reeve confirmed same.

Mr. F. W. Thorold, waterworks engineer, was present at request of Council to discuss matters relative to construction.

Stapleford—Harper, that we request engineer to immediately prepare plans and specifications for the necessary tenders for the construction of waterworks system. Tenders to be properly advertised and to be in by October 9th, 1920.—Carried.

Harper—Johnston, that bylaw No. 3, 1920, for levying and collecting rates and taxes be read first time.—Carried, and bylaw read.

Doan—Harper, that bylaw No. 3 be read second time and filled in.—Carried, and bylaw read and filled in.

Stapleford—Doan, that bylaw No. 3 for levying and collecting rates and taxes for 1920 be read third time and passed.—Carried, and bylaw read and passed.

Finance committee examined accounts and recommended payment.

Jas. Mains, 1 day labor cutting weeds..... \$4.00

L.J. Hastings, plank and iron for sidewalks..... 4.00

Joshua Saunders, for intakes 4.00

Richard Brock, phone re oil..... 1.55

S. James, draying ashes, soil and cement..... 23.50

Chambers Est., lumber ac., and repairing scales..... 27.75

Hydro Com., July & August..... 270.84

Treas., Bd. of E., Public S..... 725.00

High School..... 575.00

W.S. Fuller, Municipal World ac. 4.75

W.S. Fuller, phones 3.05, postage re voters' lists 2.50..... 5.55

J. F. Elliot, July and August salary 30.00, to pay D. Gillies labor 1.50, C. Pearce labor 1.50, W. Doan labor 1.00, Jos. McCormick for breaking stone 2.00..... 36.00

Wm. Lamb, cutting weeds..... 22.50

Guide-Advocate, printing..... 25.00

Absalom Lucas, labor repairing sidewalks..... 90.60

John Sharp, scraping street 5.00, to pay Jas. Phair for helping 2.50..... 7.50

Wm. Ward, labor on scales \$3. to pay N. Hawn, helping, \$3 6.00

Robt. Hollingsworth, putting in tile on Main st..... 33.75

N.B. Howden Est., supplies re scales..... 1.00

Harper—Doan, that accounts be passed and Reeve grant his order.—Carried.

Stapleford—Harper, that we adjourn.—Carried.

W. S. FULLER, Clerk.

CHOP STUFF

75 bush. to the acre was the average for oats on the Kenneth Ross farm in East Williams.

Mary Rapley Stevenson, born on the 4th line, Adelaide, 75 years ago, died at her home in Strathroy.

Caradoc township has a larger crop of potatoes and corn this season than in any year in the recollection of the oldest inhabitant.

Mr. W. R. Thompson has sold his farm of 95 acres on the 10th line, west, to James Mann of the 8th con. of Enniskillen, for \$10,800.

David Moore had his arm and shoulder drawn into a threshing machine at Carlingford and died before medical assistance could be procured.

The Charles Clark mill and feed business, established in Bothwell fifty years ago, has been purchased by Mr. Girard, who will conduct a grain, feed and grocery business.

The Mihell & Gill Co., merchants, Strathroy, in order to better the condition of their employees, will close their store every Wednesday afternoon the whole year round.

James Park, of Parkhill, and Miss Emily Wade, of Sarnia, were married last week by Rev. F. G. Newton at Sarnia. They were supported by Miss Hattie Wade and Mr. Herbert Baldwin.

Miss McKenna, the nurse who attempted suicide by cutting her throat with a butcher knife at the home of Paddy Foley, Euphemia, is reported to be improving, although her mind seems to have given way.

By the death of an uncle in Indiana, Miss Violet Plaine of Euphemia will receive a legacy of \$22,000. Miss Plaine was a namesake of her uncle's wife. It is thought Miss Plaine will spend the winter in Indiana.

At the last sitting of the division court in Glencoe, Mr. Gardiner of Walkers sued the township of Metcalfe for payment for work done on the Brooke and Metcalfe townline and was awarded judgment for \$30 and costs.

Claude, young son of Mr. Roger Barkley, Leamington, had his left arm severely injured Tuesday in an onion topper on Mr. J. A. Campbell's union farm in the Marsh. The arm was drawn into the machine up to the elbow and was badly bruised and lacerated.

The death of George Beaton, son of Mr. John Beaton, of Moore tp., occurred last Friday, following injuries received on the preceding Tuesday by falling off a horse he was riding. He was 16 years of age and his untimely death is regretted by a large circle of friends of the family.

The barn of William Hughes at Ayrin was destroyed by fire between four and five o'clock on Monday afternoon. It contained a splendid season's crop, 10 pigs, a calf, wagon, some harness and miscellaneous articles, all of which were consumed in the fire. The loss is quite heavy, with some insurance.

Jack McKenzie, a returned soldier in the employ of W. A. Brown, had the misfortune to break one of his ribs Tuesday afternoon on North Christina street, Sarnia, while delivering ice, when one of the wagon wheels came off. McKenzie was thrown from the rig and falling on the pavement broke a rib.

The little son of Mr. Hyatt, living near Leamington was pitched through the windshield of his father's car on Monday, sustaining many severe cuts about the face. Mr. Hyatt was driving along Erie street north near the fair grounds, and he ran into the back of a car in front of him which stopped suddenly. The force of the impact threw his son out with the above result.

The Glencoe Daughters of the Empire have purchased the north half of the Symes lot adjoining their property. This will give them ample room for a park, which they purpose establishing as a memorial to the veterans of the Great War. A memorial shaft will be erected in the centre of the square and rest and reading rooms will be built in the rear of the grounds.

Mrs. Joseph Nichols, of Fullarton, near Gould's Corners, was shot in the arm, shattering the bone, as she opened the door of a shed on a lot near her home. It appears that Norman Boyce, of Mitchell, has honey stored in the place, and fearing thieves, set a trap by placing a gun in such a position that when the door opened the gun would discharge. Sunday evening Mrs. Nichols was rounding up her chickens and a couple of them ran under the door of the shed. On opening the door the gun went off, the contents lodging in her arm between the wrist and elbow. Dr. Murray was called and rendered first aid. The practice of placing a gun in such position is contrary to law and just what steps are to be taken in the matter we have not heard.

The Path to Health

For many thousands of women the Path to Health has certainly been through Lydia E. Pinkham's Vegetable Compound. When this great remedy was first introduced, and for many years after, skeptics frowned upon its curative claims, but as year after year has rolled by and the little group of women who had been cured by it has since grown into a vast army of hundreds of thousands—doubt and skepticism have been swept away as by a mighty tidal wave, until today this purely vegetable medicine is recognized as the greatest remedy for woman's special ills in the world. This is because it is a wonderful tonic and reconstructor which acts directly and favorably upon the feminine organization and is a specific for that purpose.

Women in All Countries Depend Upon

Lydia E. Pinkham's Vegetable Compound

which is carried the "Hessian Fly" stage from its resemblance in size, color and shape to this seed. In this condition it passes the winter, fully protected by its position in the stem and safe from injury. In the following May the fly emerges and deposits its eggs for the production of a second brood. These eggs are laid upon the young spring wheat at one of the lower joints of the stem, and upon any of the fall plants that have escaped the previous attack and survived the winter. The effect of the work of the maggot is to cause a weakening and hardening of the stem at the point of attack, which results in the bending down or breaking off of the plant. The Hessian Fly stage is reached in due course and the insect remains in that condition till the crop is harvested. As the pest, when present, is usually very numerous, great damage is done to both the fall and spring crops and very serious loss is suffered by the farmer.

Remedies.—Prevention in this case is better than cure. It has been found that fall wheat may escape attack if sown not earlier than the 20th of September in southwestern Ontario, or a little earlier in other parts of the Province. The parent flies are on the wing at the beginning of September and by the dates mentioned, the period of egg-laying is over. This plan can be made more certain of success if a strip of wheat is sown at the beginning of the month to serve as a trap crop. The flies lay their eggs on these early plants before the main crop is above ground. By ploughing under this strip the brood is effectually destroyed and all danger is escaped.

After the crop of an infested field has been taken off, if practicable, the stubble should be burned; but if this cannot be done, it should be ploughed deeply under to prevent the flies, which are about to hatch out to reach the surface of the ground and escape for the production of another brood. Wheat should not be grown again on the same piece of ground for at least a couple of years. As many of the "Hessian Fly" remain in the straw, it is advisable to collect and burn the screenings from the threshing machine. By the adoption of these methods, which involve little trouble or expense, the farmer may be reasonably sure of getting a full return for his industry, as far as least as this Hessian pest is concerned.—Dr. C. J. S. Bethune, O. A. College, Guelph.

Your local fall fair is a good advertising medium for your stock. A better selection of a ram can be made early before breeders are nearly sold out. The ram will become accustomed to his new quarters and give greater satisfaction.

Increasing Value of Cows.

The farm cow that gives milk for human food stands first in value among animals on the stock farm. Not even the total value of all other

Average Price of Milk Cows Per Head Has Increased From \$58.25 in 1915 to \$91.95 in 1919.

cattle is equal to the value of the dairy cow. The average price per head of milk cows in this country has increased from \$58.25, since January 1, 1915, to \$91.95, the average for 1919, or a gain of 58 per cent. In five years, according to the Department of Agriculture.

Machine "Bags" Potatoes.

A machine recently invented by an Ohio farmer is calculated to overcome the last remaining difficulty in the way of handling the potato crop from seed to sacking, entirely by mechanical means. The new device is a bagger, mounted on a three-wheeled platform, which is attached to the mechanical digger. The bags are suspended from a standard erected on the platform and just high enough to allow the bottom of the bag to rest on the platform itself. In order to effect the filling of the bag the elevator at the rear of the digger is extended so that it will carry the potatoes to higher level than the top of the bag, where it delivers the newly-dug tubers into an inclosed screen which conveys them to the mouth of the bag. With his device, two men—one on the platform, to tie and shift the bags, and another following the digger to pick up small potatoes that fall through the conveyor—are able to accomplish work that would keep six men busy if hand picking had to be depended on.

Food Required by Chickens.

Experiments carried on for eleven months with 40 hens at the agricultural experiment station, Ames, Ia., show that the food required by hens to produce a dozen eggs costs from 18 to 19 cents.

Improvement of the herd comes through the sire. Therefore, make sure you get a right good one.

In selecting a sire attention must be paid to the average type of females in the herd.

SALT IN RATIONS.

Salt, Charcoal, Lime, Bonemeal and Wood Ashes for Swine.

Common salt (sodium chloride) plays an important part in the diet of most classes of farm animals. This will be better appreciated if we stop to consider that, of the minerals in the fluids of the body, salt is present in the largest amount. Salt does not contribute directly to the energy of the body as does the food consumed, but nevertheless, it is necessary in the proper nutrition of the body. Besides its physiological action, salt serves as an appetizer and increases the palatability of many foods. It also stimulates the secretion of digestive juices, promotes good circulation of the fluids of the body and prevents digestive disturbances.

Of the common classes of farm animals, namely horses, cattle, sheep and swine, the latter have the least need of salt. This is in all probability due to the difference in diet, that of swine usually consisting largely of grain, whereas other classes consuming large quantities of salt deplete the stomach and bowels, causing gases, diarrhoea, convulsions and paralysis, often resulting in death. Nevertheless pigs should have access to salt, the best means of providing it being to keep it before them at all times, in a covered receptacle if outdoors, a mixture of salt, charcoal, air-slaked lime, bonemeal and wood ashes or soft coal cinders.

For sheep salt is very necessary. Keeping it before them at all times is here again the most advisable course, for an irregular supply induces scouring. The salt tends to keep the sheep in a good state of health, and they are better able to ward off attacks of disease or internal parasites. Furthermore, sheep fed plenty of salt shear a better quality and heavier fleece than do those receiving no salt.

In the case of cows owing to their much larger size and the fact that they are giving daily large amounts of milk which contains considerable salt, a heavier ration of salt is needed. For cows being fed in the stable up to 2.5 ounces per day is recommended. While cows giving a heavy flow of milk require an abundance of salt, at the same time the dry, pregnant cows should not be overlooked as their requirements are even greater. Cattle on pasture usually require less salt than those in doors, and the amount necessary varies with the nature of the soil and vegetation. On this account it is advisable to have a supply before them at all times. Either rock salt or ground salt may be used, but in either case it should be placed in a receptacle in which it will be sheltered from the rain, or much of it will be lost. Young growing animals usually require a larger percentage of salt than do mature animals.

Horses are no exception in the matter of salt requirement. Here again it should be regularly supplied. A sack of rock salt in the corner of the manger where the horse can get it at will is the best means of provision. Horses at heavy work require more than those that are idle or at light work. An allowance of two ounces per day is generally recommended.—Experimental Farm Note.

Chinese Tendencies Prevail.

Chinese tendencies are everywhere noticeable in the vivid greens, blues, yellowish-red and burnt orange favored for the coming season. The hip-length mandarin cloak—or shall we call it a blouse, since it oftentimes answers this purpose?—is being worn at the southern resorts, and will be in the North. Of black or green or burnt orange satin, plain or covered at intervals with an allover embroidered design, and, with bordering bands of contrasting satin about the open throat and loose sleeves, it is admirably effective and is oftentimes worn over a short, straight, knife-plated skirt of oyster-white tussore. The couturier usually bears in mind the fact that the true Chinese cloak fastens on the right side.

Cow's Milk for Foal.

When beginning to give a foal cow's milk do so most gradually. If it is suddenly given a full meal, indigestion and troublesome results will be sure to occur, but if given in small quantities, and often, there should be no complaints. When once accustomed to a cow's milk there will be few or no dangers in feeding more liberally.

Brick-Laying Army Wanted.

Before the war there were 900,000 men employed in the building trade in England; now there are only 650,000. A great brick-laying army is wanted.

Time Has Tested It.—Dr. Thomas' Electric Oil has been on the market upwards of thirty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. It has no equal in the whole list of liniments. If it were double the price it would be a cheap liniment.

HESSIAN FLY HISTORY

Some Facts About This Enemy of the Wheats.

The Maggot Stage the Dangerous Period—Late Sowing to Evade Injury—Trap Crops Are Also Recommended—September Butter Packs Well.

(Contributed by Ontario Department of Agriculture, Toronto.)

EVERY year complaints are made of the ravages of this minute insect, especially in those parts of the Province where fall wheat is grown. In some places a large proportion of the crop may be destroyed, while in others the amount of injury may be slight.

The insect gets its name from the supposition that it was brought to America in straw carried by some Hessian soldiers, who were sent out from England during the Revolutionary war. These troops landed on Long Island in 1776, and three years later the wheat crops in the neighborhood of their camp were found to be seriously injured by the newly imported insect. This account of its arrival in America has been disputed by some investigators who declare that it occurred on this continent many years before. However this may be, the name of "Hessian Fly" has been universally adopted in all parts of the world where wheat is grown. It certainly received its scientific name (*Cecidomyia destructor*) from Thomas Say, a pioneer American entomologist, in 1820.

From Long Island it gradually spread throughout the State of New York and then southward, westward and northward, till it finally reached California in 1884. In Canada it was associated with the Wheat Midge during the years 1854 to 1857, when the wheat crops in this country were totally destroyed and the farmers were driven to despair. In 1856 the Bureau of Agriculture in Toronto offered prizes for the best essays on the insect enemies and diseases of the wheat plant. The highest award was made to Prof. H. Y. Hind, of Trinity College, Toronto, and his essay was officially published in 1857 and widely distributed among the farmers of this Province. The book is an admirable production, and is full of valuable information on these enemies of wheat which is just as useful now as it was some sixty years ago.

The Hessian Fly is a small two-winged gnat, about one-eighth of an inch in length and dark in color. Owing to its minute size and active habits it is seldom seen, and few, if any, of our farmers would be able to recognize it. The female fly lays from 100 to 150 eggs, depositing them in rows of four or five on the surface of the wheat leaf near the ground. From these small maggots soon hatch out and burrow beneath the sheaf and into the stalk where they absorb the juices of the plant. After a time the plants turn yellow and die, which is usually the first indication of the insect's presence.

After some time the maggot becomes full-grown, its skin hardens, turns brown, and it forms a puparium

THE F. F. DALLEY CORPORATIONS LTD., HAMILTON, CAN.

You can have all these helps on the farm.

IN the best lighted farm homes, brilliant, clean electric light floods every room, cellar, stairways, stables, and other buildings at the touch of a button. These folks also have running water in bathroom, laundry, kitchen and outbuildings by turning a tap. No one turns the separator, grindstone, fanning mill, or churn—the "F" Power and Light Plant does all these jobs as quickly and easily as it pumps water.

The womenfolk are not slaves to the wash tub, and there are no lamps to fill and clean—the "F" Plant ends such drudgery. They save time and labour by using an electric iron and vacuum cleaner. The farm help is contented, does more work and becomes attached to the place.

You can live under the same happy and prosperous conditions.

Call in the first time you are near and learn how the "F" Power and Light Plant will save dollars, and work for you.

INTERESTING VIEWS AND OPINIONS

A run on lunch room pie counters is predicted as the result of a ruling at Washington that mince pies may be seasoned with liquor.

If figures mean anything, aerial flying is much safer than automobilizing. According to statistics issued in England the first year of civil flying saw a record of 38,954 flights in which 70,000 passengers were carried. There was only one fatal accident.

The contract for the motor vehicle license markers for 1921 has been let by the Hon. F. C. Biggs, Minister of Public Works and Highways. The numbers will be hyphenated in groups of two, for instance, (19-73). The Canadian-born Secretary of State for New York state, Hon. Francis M. Hugo, originated this hyphenated scheme. It was found after exhaustive test, that numbers so broken into groups of two were much more readily and accurately seen and remembered.

The coal dealers are announcing that it is necessary to increase the price of coal to the consumer because of the increase in freight rates. The railways were compelled to increase freight rates because of the increase in wages to employees. The employees may soon find it necessary to ask further increase in wages because of the higher cost of coal. In that event the railways will probably announce a further increase in freight rates and the coal dealers a further increase in the price of coal. This is an illustration of what is called a vicious circle; but it is really a spiral, not a circle at all.

WARWICK.

The smart style suits for young men at Swift's.

Mrs. E. Cable, Detroit, visited her niece, Mrs. Sydney Barnes, last week. Miss Frances Rodgers, of London, visited friends around Birnam last week.

Mrs. John W. Smith is spending a couple of weeks in Dresden visiting friends there.

Mrs. W. M. Hamshaw, of Toronto, was a week end guest at the home of Mr. W. G. McKenzie.

Prest-O-Lite Battery is second to none in quality and you save duty as it is Canadian made.—R. Morningstar.

Clarence H. Leach went to Toronto yesterday to take a course in pharmacy at Toronto University.

Mr. James Corry of Windsor spent a few days this week at the home of Mr. J. E. Collier, second line.

Mr. Chas. Barnes and family and son, Sydney and family, picnicked at Lake Huron Beach on Labor Day.

Mr. and Mrs. Gregory and Master Neil, of Windsor, spent Wednesday with Mr. and Mrs. Peter Fleming.

Silks and Dress Goods at Swift's. Bought 18 months ago—big saving in price.

Miss Beatrice Edwards returned home Sunday after spending a couple of months with her brother, Orville, and other relatives at Biggar, Sask.

Mrs. Jones and daughter, Elgeretta, and Mrs. James Bryce, fourth line, have returned home from a week's visit with Mrs. Jones' sons in Toronto.

Mr. and Mrs. J. A. Newell, Miss Myrline Newell and Mr. and Mrs. Higby, of Orion, Mich., visited their cousins, the Misses Margaret and Emma Newell last week.

Men's Tweed Waterproof Coats, smart styles for young men—Swift's.

When you get a Ford car you not only get a better car but a more comfortable car—backed by Ford service.—R. Morningstar.

Mrs. H. J. Johnston and daughter, Marguerite, of Winnipeg, who have been spending the summer in Boston, New York and Pittsburgh, have been visiting Mr. Johnston's sisters, Mrs. Joynt and Mrs. Rapson, before leaving for home.

Rev. T. D. Rayner, pastor, will conduct the service in Zion Congregational church on Sunday afternoon at 2.30 p.m. The sacrament of the Lord's Supper will be observed. The next evening service will be held on Sept. 26th.

Harvest Thanksgiving services will be held in Grace church, 4th line, Warwick, St. Paul's church, Kerwood, and St. Ann's church, Adelaide, on Sunday, Sept. 19th, when the Rev. J. H. Whealen, B.A., Thedford, will preach Thanksgiving sermons.

4 dozen Ladies' and Children's Pullovers, all wool, special value.—Swift's.

G. F. Hall, son of Mr. and Mrs. John Hall, Warwick, left last week for Golden, B.C., where he will visit his aunt, Mrs. B. H. Bentley, before going on to Vancouver, where he expects to take a position on one of the ocean liners as wireless operator.

Jeremiah Thompson, 4th con.north, poses as a weather prophet and predicts that we are going to have a cool wave and some frost from the 14th to about the 18th and from the 20th to the last of the month it will be quite hot and wet.

Polarine Oil bought at last year's price enables us to sell any quantity exceptional prices. Polarine needs no recommend.—R. Morningstar.

Calvary church notes—Sunday School at 2 p.m., followed by a service conducted by the young people. An evening service will be held at 7.30, at which the pastor will speak. Everyone made welcome. A number of men are at work upon the closed shed at Calvary and expect to have it in good shape by Saturday.

An interesting meeting of the Warwick Women's Institute was held in the Town Hall on August 30th, at 8 p.m., with sixteen ladies present. The meeting opened by singing The Maple Leaf, followed by the Lord's Prayer. The minutes of the July meeting were read and adopted and general business dispensed with. This was followed by a meeting to make arrangements for the school fair. Next meeting will be held in the Town Hall on October 14th, at 2.30 p.m., when roll call will be answered by some helpful household suggestions.

USE THE GUIDE-ADVOCATE "WANT COLUMN" JOB PRINTING OF QUALITY AT THIS OFFICE

FARMERS

Farmers who find it difficult to purchase locally the varieties of seed grain or fruit trees they desire for fall planting, or various kinds of livestock, will find the local Manager of the Sterling Bank willing to obtain this information for them if possible, without obligation.

In addition to this, Sterling Bank Service to clients includes Banking by Mail facilities, selling of Money Orders, renting Safety Deposit Boxes, and the purchase and sale of securities through our Bond Department.

THE STERLING BANK OF CANADA

The Farmer-Banker Alliance

You go to your lawyer for legal advice; to the doctor for medical advice; why not to The Merchants Bank for financial advice?

If you want a loan to buy cattle, hogs or equipment—if you want information as to how to invest money—come to those who make a business of financial matters, and are in a position to give you sound and impartial advice.

THE MERCHANTS BANK

Head Office: Montreal, OF CANADA, Established 1864.
WATFORD BRANCH, F. A. MacLEAN, Manager.
ALVINSTON BRANCH, G. H. C. NORSWORTHY, Manager.

Many farmers use The Guide-Advocate "Want Column" regularly—for selling any stock or machinery or for securing anything they wish to purchase. The cheapest service anywhere—5 lines and under, 25c per week.

WEST ADELAIDE

West Adelaide Presbyterian church will hold their annual fowl supper and bazaar on Friday, Sept. 24th, followed by a good program. See posters next week for further particulars.

The West Adelaide Ladies Auxiliary held their last meeting at the home of Mrs. Simon Shrier, on Sept. 2nd. The next meeting will be held at the home of Mrs. James Watson on October 7th at 2.30 p.m. All the ladies of the congregation are welcome.

ARKONA

Mr. Curtis, Sparta, is visiting his brother here.

Mr. Bert Comp and Miss Ruth Comp, Stratford, Mrs. Will Wiley and son Cleland, Durand, Mich., Mr. and Mrs. Clarence Goodie and children, Durand, Dr. and Mrs. Bates and family, Durand, Mrs. S. Campbell, Texas, are visiting at Mr. W. J. Evans.

MORNINGSTAR—CLIFF

A quiet marriage was solemnized Wednesday afternoon, August 25th, at the home of the bride's sister, Mrs. Joseph Wilcox, 39 Grand ave., south London, when Miss Agnes Cliff, of Arkona, became the bride of Charles Morningstar, of Detroit. Rev. J. N. Norton, pastor of the Adelaide St. Baptist church, officiated. Mr. and Mrs. Morningstar left on a wedding trip to Chicago. They will reside on Euclid ave., Detroit.

ARKONA PARTY BADLY SHAKEN

Blinded by the rays of the sun to such an extent he could not see an approaching street car, Joseph Abbott, who lives near Arkona, turned his motor car south at the corner of Dundas and Talbot street at 4.45 o'clock Wednesday afternoon of last week at London, and was struck by a Ridout car, No. 108, going east.

The motor was hit directly between the front and rear wheels and pushed for 10 feet by the trolley. There were three occupants in the motor car besides Mr. Abbott, but other than a severe shaking up, escaped injury. Mrs. Abbott, Mr. Abbott's brother and his wife, were the other passengers.

The right front fender, right front tire and right shield were somewhat damaged, and a leak sprung in the radiator. The street car suffered a puncture in the front and the fender was twisted.

CHILDREN OF ALL AGES

Children of all ages—whether it be the new-born babe or the growing child—have to be constantly guarded as to their health. Upon the good health of the little one largely depends his strength and usefulness in after years. Baby's Own Tablets are the ideal home medicine for children of all ages. They are a gentle but thorough laxative which are absolutely guaranteed to be free from opiates or other harmful drugs and which may be given to the youngest child with perfect safety and beneficial results. Through their action on the bowels and stomach they banish constipation and indigestion; break up colds and simple fevers and make teething easy. Mothers, you can make your little ones well and keep them well by just keeping a box of the Tablets at hand and by giving an occasional dose to the baby to keep his little bowels regular and his stomach sweet. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

BORN

In Kerwood, on August 21st, 1920, to Mr. and Mrs. Meredith Morgan, a son.

In Forest, on Monday, August 30th, 1920, to Mr. and Mrs. Thos. Milner a daughter.

In Bosanquet, on Sunday, August 29, 1920, to Mr. and Mrs. Martin Milbourn, a son.

In Sylvan, on Friday, August 27th, 1920, to Mr. and Mrs. Peter McDonald, a daughter.

MARRIED

At the home of the bride's sister, Mrs. Jos. Wilcox, London, on Wednesday, August 25th, 1920, by Rev. J. N. Norton, Miss Agnes Cliff, of Arkona, to Mr. Charles Morningstar, of Detroit.

In Detroit, on Saturday, Sept. 4th, 1920, Chester R. Schlemmer, to Miss Lydia E. Baumgarten, both of Detroit.

DIED

In Brooke, on Monday, Sept. 6, 1920, John W. Bryce, in his 68th year.

In Strathroy, on Sunday, August 22, Charlotte Dunlop, beloved wife of James Smith, formerly of Arkona, in her 48th year.

IN MEMORIAM
In loving memory of Edna Peasley, who passed away one year ago September 10th, 1919.
Just a year ago she left us,
And we miss her so each day.
So strong, so full of life and health,
Why was she called away?
You are not forgotten, Edna,
Nor will you ever be.
As long as life and memory lasts
We will remember thee.
The happy hours we once enjoyed,
How sweet the memory still;
But death has left a vacant place,
The world can never fill.
—FATHER, MOTHER AND BROTHERS.

USES FOR PLAIDS IN JEWELRY FADS

May Afford Decoration for Chiffon and Other Fabrics.

Wool Jersey One of the Most Desirable for Plaided or Gathered Sport Skirts.

One of the most interesting developments of modern design is the subtlety with which plaids have been incorporated into its schemes.

Once upon a time plaids were plaids and no bones were made about it. Consequently the brilliant and startling woolsens were relegated to the children's wardrobe or to the realm of sports skirts.

Now plaids have become a motif in design which may be carried out in bead or silk embroidery and is as likely to be used in decoration of chiffon and other silken fabrics as it is in the cheerful and childish gingham and woolsens.

Wool jersey is one of the most desirable fabrics for the gathered or plaided sport skirt, and it is expected that later the cartridge silk which was left on the hands of the war department at the signing of the armistice and which is being dyed and utilized most successfully for dress purposes, will come into its own as a sports fabric, a use to which it is especially adapted. In this interesting silk there is an excellent choice of plaids among the many designs and plain colors.

With the plaid skirts, whether they are worn on the golf course or the street, the solid color blouse or coat, repeating either the most conspicuous or the most neutral tone of the plaid, is a foregone conclusion. With the suit coat, the trimming accessories, pocket flaps, scarf collar or revers are usually of the plaid. By contrast to this rule of plain above and plaid below, plaid taffeta blouses of an adorable crispness and smartness have been provided to add a gay touch to the plain navy blue gabardine suit.

Serge is embroidered in raised lines in a plaided pattern, either in color or in black, and this decoration is ap-

Decorations Sensational Rather Than Extravagant.

Throat Latch and Pendant With Matching Earrings Brings Forth the Most Comment.

The present mode of wearing all sorts of striking jewelry has passed the stage where it may merely be referred to as extravagant; now it has become positively sensational, according to a Paris fashion writer. Quantities of remarkable jewelry were seen everywhere during the season in the south of France.

The jewel which created the most comment was a throat latch and pendant with matching earrings. These were very large and were made of platinum and diamonds. The earrings and the pendant were the same size and of the same design, the delicate chain which held the three together being of platinum and brilliant to match the three pendants.

A famous Parisian beauty wore this extraordinary ornament with the simplest possible coiffure, the hair being brushed straight back and twisted into a low knot at the nape of the neck. Her dress was an extreme décolleté in black and she kept a sable coat on most of the time, as her back was absolutely nude to the waistline. No other jewels were worn, not even a finger ring, but the marvelous brilliancy of her throat latch and earrings was the more pronounced because of the severity of the remainder of the toilette.

Another striking novelty in jewelry is a double bracelet of onyx set with rows of pearls with little chains of pearls holding the two together. This, like many of the new bracelets, is worn above the elbow.

Very large earrings are much in vogue. They, like other present-day jewelry, are usually in combinations of black and white or white and one colored stone, green and white being the combinations most often chosen. The preference for green and white jewelry has brought the emerald into even greater prominence and, despite the fact that the prices of these stones have become almost fabulous, quantities of them are worn.

Watches are quite as elaborate in their design as earrings and bracelets.

FEMININE FANCIES

Scotch heather sweaters are prominent. The new Balkan blouse has a high collar.

Real laces are used on tailored lingerie.

Figured net is the latest lingerie material.

Figured voile is used for children's play frocks.

The entire hat today is expressed in the crown.

Shot taffetas are printed in pompadour patterns.

Eccentric trimmings are features of the overblouses.

Colored cotton embroideries are very charming.

The new up-and-down trimming is much in vogue.

Some tailored and Irish-trimmed negligees are of heavy, lustrous silk.

Black satin, draped with black tulle, is a wise choice for an evening gown.

A smart accessory is a dressy scarf of silk tissue, bordered in printed silk.

An all-white evening dress for second mourning is made of ring dot silk net.

Angora cloths in Scotch plaids, or with blazer stripes, are used for sport coats.

Entire capes of gray squirrel fur are among the most luxurious garments.

Bulgarian embroidery, in bright colors, is seen on some of the spring blouses.

Silo Has Many Advantages.

The farmer who has a silo can carry a maximum number of cows and supply his herd with a palatable, succulent feed of a uniform quality at any time during the year, conditions favorable to a large milk production.

Water During Hot Weather.

A cool drink of water is quite as refreshing to a horse as to his master during the hot weather. Make some provisions whereby the team can be given a bucket of water in the middle of the forenoon and afternoon.

Many children die from the assaults of worms, and the first care of mothers should be to see that their infants are free from these pests. A vermifuge that can be depended on is Miller's Worm Powders. They will not only expel worms from the system, but act as a health-giving medicine and a remedy for many of the ailments that beset infants, enfeebling them and endangering their lives.

Women of Canada Testify

Dacre, Ont.—"I am more than pleased with Dr. Pierce's Favorite Prescription. I was run-down and so nervous that I could not even stay in the house alone in the day-time and tried every kind of medicine I heard of but got no results. One of my friends advised me to take Favorite Prescription," said that it would cure me, and it did. After taking four bottles I felt like a new woman and it is also the very best medicine for a woman bringing up a family. I will recommend Favorite Prescription to any one suffering like I did."—MRS. JOSEPH BEAUDRY, R. R. 2.

WEAK AND NERVOUS

Tillsburg, Ont.—"I found Dr. Pierce's Favorite Prescription an excellent medicine for the ailments of women. I had become very weak and nervous. I was just miserable when I began taking the Favorite Prescription and it proved most beneficial. It so completely restored me to health that I have never had any return of this ailment. I do advise the use of Favorite Prescription by women who suffer with womanly troubles."—MRS. GEO. WALKER, P. O. Box 490.

Dr. Pierce's Favorite Prescription is made of lady's slipper root, black cohosh root, unicorn root, blue cohosh root and Oregon grape root. Dr. Pierce knew, when he first made this standard medicine, that whiskey and morphine were injurious, and so he has always kept them out of his remedies. Women who take this standard remedy know that in Dr. Pierce's Favorite Prescription they are getting a safe woman's tonic so good that druggists everywhere sell it in liquid or tablet form.

CLUB ROOT DISEASE.

Apply Lime After Diseased Crop Has Been Removed.

Club-root and related plants causes a considerable loss in the eastern provinces. Diseased roots are greatly swollen, distorted and sometimes rotted. Once established, the disease remains in the soil indefinitely unless precautionary measures are taken.

If the following precautions and practices are adopted, the disease can be greatly reduced, if not completely controlled:

1. Plant only on disease free soil—A comparatively new piece of land which has never been planted with turnips, cabbage, rape, etc., and which hence may be regarded to be absolutely free from the disease is preferable. Under no circumstances use a field which has previously produced a club-root infected crop unless it has been heavily limed and the lime has had three or four years in which to free the soil of the organism.

2. Liming is a good practice—Considerable benefit may be secured by applying three tons of air slacked lime or five tons of ground limestone any time before planting the crop; but the best results are obtained when the lime is applied immediately after the diseased crop has been harvested and a period of three or four years allowed to elapse before turnips or cabbages are again planted. Liming will not only control club-root, but turnips and cabbages do better on soils rich in lime than where lime is lacking. Acid reacting fertilizers encourage the disease.

3. Manure—Manure from stock fed on club-rooted turnips should not be used as it invariably carries the disease and infects the soil to which it is applied. Where possible, it is good practice to apply to the turnip crop only such manure as comes from stables where turnips have not been fed at all.

Rotation and Sanitation—Plant susceptible crops on the same soil not oftener than once in eight years. Destroy all diseased roots or boil them before feeding. Keep down all weed of the mustard family. Raise cabbage and cauliflower seedlings on disease free soil and never throw infected soil from seedling boxes where it may be spread to clean fields.—G. C. Cunningham, Pathologist for Root and Vegetable Crops.

The Railway Commission's order for increase in freight rates between Canada and the United States, came into force on August 26th.

FARM BUTTER AT FAIRS

Hints for Farmers' Wives With Dairy Exhibits.

Flavor in Butter of First Importance—Firmness Also a Strong Point—How to Cure and Pack in Best Condition for Showing.

(Contributed by Ontario Department of Agriculture, Toronto.)

"To show or not to show," that is the question many a woman thinks over as the time draws near for the holding of the annual fall fair.

There are some who would not miss the event, and make entries in many classes; while others are rather timid about exhibiting, especially if they are doing it for the first time.

Let us take the exhibiting of butter. Sometimes a woman goes home from the fair feeling rather hurt because some neighbor took more and higher prizes than she did. She thought that her butter was good, but the other must have been considered better by the one who was acting as judge.

There are times when a judge has to mark very closely to place the prizes.

Score cards are not used at all of our fairs, nor do all judges use the same score card, but the one proposed by the National Dairy Council reads as follows, as regards points awarded:

Flavor	45
Texture	15
Incorporation of moisture	10
Color	10
Salting	10
Packing	10
Total	100

The flavor of the butter is a very important point to consider. It should be clean and sweet without taint of any kind.

An objectionable flavor, no matter how slight, would prevent one receiving a full score. Some defects in flavor are more serious than others, but many of these could be avoided by taking a little more care.

The care in the stable and in the separator room is just as important as the churning or the holding of the butter afterwards.

If a judge should find two lots of butter with the same total score, he would give the higher place to the lot with the better flavor.

The texture of the butter is another point that is taken into consideration. Butter should have good body—firm and waxy.

You have cut butter that looked good and remained firm on the plate, but you have also seen just the opposite to this—butter that had a greasy appearance, the drops of moisture large and milky, and it became soft when left in the plate for a short time.

The judge comes across just as great contrasts when going through the exhibits and he scores accordingly.

To secure good texture it is necessary to make use of suitable temperatures and to work the butter in the right way. Cool the cream immediately after separating and churn it at a temperature that will bring the butter in nice firm granules in 20 to 30 minutes. (Too high temperature means soft butter and greater loss in the buttermilk.)

The temperature of the wash water should be such that it will not make the butter too hard or too soft for working. Work the butter by pressing it carefully and evenly. A sliding or cutting motion will tend to make the butter greasy. Overworking should also be avoided. Butter is worked to make it compact and to distribute the salt and moisture evenly. When butter is cut the surface should be close and the drops of moisture should be clear and very minute.

The color of the butter should be even and bright. If the butter is not worked enough the color will be uneven, although this is not noticeable at the time of working.

If the butter is too soft, the salt should be mixed through it, and the butter placed where it will come to a proper firmness before working. By doing this it will score higher for both texture and color than it would if worked in the soft state. The salt in the butter should be evenly distributed and thoroughly dissolved. It is better to have the butter salted very lightly than to have it over-salted. The popular butter at the present time has mild clean flavor, close body and light salting.

The finish or packing should also be considered. In fact, the judge will notice the appearance of the exhibit before he has had time to draw out a plug of butter on his trier. Let the prints be well made—solid, even, with clear-cut corners and the papers wrapped neatly.

Butter tubs and boxes require a lining of parchment paper, and corks should be in good condition, free from cracks or breaks in the glazing. The top of a large package should be smoothly finished and covered neatly with parchment paper.

Butter for exhibition should be

made two days or more before the fair to give it time to become set. It should be kept in a clean cool place on the farm, and be brought to the fair in the best possible condition.

Butter made and cared for in this way will score higher than it would if made the morning of the fair, as is sometimes the case.

Do not feel discouraged if you do not secure the prizes that you hoped to win. Try again, remembering the little rhyme which says,

"Good, better, best, never let it rest, Till your good is better, and your better, best."

—Miss Belle Millar, O. A. College, Guelph.

GREEDY WHITE GRUBS

Larvae of the Big May Beetle or "June Bug."

Wireworms Come From the Click Beetle—Rotation of Crops Best Remedies for These Insect Pests—Cider Making.

(Contributed by Ontario Department of Agriculture, Toronto.)

WHITE grubs are the larvae of the large dark brown May beetles, or "June Bugs," as they are commonly called, which are familiar to everyone.

The grubs breed for the most part in old pastures where the sod has not been broken up for some years. When fully grown they are thick, fat creatures, white in color, with the body partially curled up and the last segments of a darker hue from the food showing through the skin. They feed on the roots of the grass, and when this has been ploughed up they attack whatever plant may be grown. Three years are spent underground, then the beetles appear, often in great swarms, in the foliage of trees and shrubs. An old pasture, when broken up, is often found to be full of these grubs and they will attack the roots of any plants that are sown in place of their ordinary food which has been removed. Corn and potatoes will suffer severely, but clover is least affected by them and may be seeded down with rye. After the second year any crop will usually be safe. Deep ploughing in October before the weather becomes cold will expose the grubs and destroy many. Pigs and poultry, crows and other birds and skunks greedily devour them. Where an old field is large it would be well to compare, when broken up, a small portion at a time, and when that is cleared move them on to a fresh feeding ground.

Wireworms are the larvae of Click beetles, so called from their curious habit of springing up in the air with a "click" when laid upon their backs. The beetles are long and narrow, rounded above, with very short legs, and usually dull gray or black in color. The grubs are long and round, with a very hard skin, from which they get their name of Wireworms, and yellow or whitish in color. Their life history is very similar to that of the White Grubs, as they thrive in old pastures and take two or three years to mature. They feed upon the roots of any plants that may be grown where they are, and are especially injurious to corn and potatoes, in the latter of which they often burrow great holes. As in the case of the White Grubs, no treatment of the soil with poisons of any kind has been found effective. There is a prevalent idea that salt will kill them, but this is an entire mistake. The only remedy is a short rotation of crops, as in the case of White Grubs. Ploughing in August and cross-ploughing in September will destroy great numbers. Clean cultivation, leaving no weeds or other shelter for the beetles, in fence corners and elsewhere is also of importance.

Break up the old pastures is the advice all farmers should follow.—Dr. C. J. S. Bethune, O. A. College, Guelph.

Cider Making. Sweet cider is unfermented apple juice and hard cider is fermented apple juice. To get the juice the apples are either crushed or ground in a cider mill and the juice expressed from the pulp. The fermentation of apple juice, or any other fruit juice, is brought about by the development in it of yeast. Yeast cells are microscopic plants invisible to the naked eye and are always present on the surface of fruit. When the fruit is crushed to get the juice many of these cells get into the juice, and if these are not destroyed they will induce fermentation.

Hogs as a Side Line. Hogs as a side line, where they consume products that would otherwise be largely wasted, are profitable at all times. He is a very skilful manager who can make hogs pay at any time when they are kept as a specialty.

consequently, in the manufacture of sweet cider we must destroy the yeast cells that are present and prevent others from getting in. The surest way of doing this is to pasteurize the juice immediately after it is obtained from the fruit and store away in well-sealed containers. In the case of cider the pasteurization process means heating the juice to 170 degrees F. for ten minutes and then filling into containers that have been scalded and can be tightly corked. Care should be taken not to let the temperature get above 170 degrees F. during pasteurization or the character of the juice will be injured. The juice is then stored away at a low temperature to allow it to clear.

Hard cider is produced by allowing the fresh apple juice to ferment in the cask. The fermentation is naturally induced by the activities of the yeast cells that get into the juice from the surface of the apples. As, however, there are various kinds of yeast cells and also many mold spores liable to be on the fruit which may injure the quality of the cider, spoiling the flavor, it is a good plan to control the fermentation either by first pasteurizing the juice and then adding a good yeast to the raw juice as soon as obtained from the apples. The addition of this good yeast will hasten the desired fermentation and check the mold development.

The best temperature for fermentation is 75 degrees F.—Prof. D. H. Jones, O. A. College, Guelph.

A Cold Frame.

The surest way to have an early garden next spring is to prepare a hot-bed and a cold frame, or a combination of the two, during the coming fall. After the ground freezes hard, it will be impossible to dig a pit properly and construct the frame preparatory to making a hot-bed. The essentials are a framework of boards and sash or light canvas for a covering. Standard hot-bed sash are three by six feet in size, and the frame can be made to fit one, two, or more of these sash. The framework of boards should be 18 to 24 inches high at the back or north side, and 10 to 12 inches high in the front, or south side. The frame should be so arranged that the sash will not only slide on ways but also that they may be lifted or tilted at any angle for ventilation. The framework should be painted, and the sash should be given at least two coats of white

Getting a Cold Frame Ready.

lead and linseed oil, with a little drier added before the glass is put in. In glazing hot-bed sash the putty is first spread in the grooves on the sash bars, the glass then being bedded in the putty and well pressed down. The bottom light or glass in each row should be put in first; then the second light should overlap the first one about one-fourth of an inch; and so on until each section of the sash is filled, the last piece of glass being cut to fill out the remaining space. Each piece of glass is fastened in place by means of special glazing points driven into the wooden sash bar.

The hot-bed pit should be 12 to 14 inches deep, and just a trifle smaller than the framework of boards. The dirt removed from the pit is used to bank around the frame. The pit may be filled with leaves during the early winter to prevent the soil freezing, and the sash stored where they will be protected from the weather until time to start plants in the beds. If this part of the work is done now, there will be no difficulty in getting an early start for a spring garden.

Sterilize Pruning Tools.

A comparative study of protected and unprotected pruning wounds on apple trees, made at the Minnesota Experiment Station orchards, indicated that protection with wax or paint is of little value unless the wound is well made, and both wound and tools sterilized against disease. Paints and waxes often fail to prevent disease or decay, because infection may have reached the wound before the covering was applied.

Hogs as a Side Line.

Hogs as a side line, where they consume products that would otherwise be largely wasted, are profitable at all times. He is a very skilful manager who can make hogs pay at any time when they are kept as a specialty.

DOUBLE TRAGEDY

(From the Almont, Mich., Herald)

Thursday afternoon the whole community was shocked by the report that W. C. Dodge and his son, Mitchell, had been struck by an electric car as they were driving their auto into their own yard. The elder man was killed instantly but the son lived about three hours, though he did not regain consciousness. The Almont doctors were summoned, but nothing could be done. The auto was a total wreck, being struck squarely in the middle. No blame is attached to the electric road employees. It seems to be one of those unaccountable accidents that sometimes occur.

(Written by the well-known journalist, Chas. K. Farley (Carl Yelraf) a life-long personal friend of W. C. Dodge.)

Winchester Clement Dodge was born on the old home farm north of Almont in 1855, was educated at Almont in the public and high schools. After graduation he began teaching and taught almost continuously for 47 years. He gave up his school in 1917 in order that Mitchell might serve his country overseas. He was married to Ada Eastman in 1879 at Almont, Ont. One son, Glenn Winchester, died at the time of his graduation from the Lansing Agricultural College in 1908. One daughter, Beatrice, (Mrs. Geo. Hooper) survives. Mr. Dodge was a member of the Almont Congregational church and of the Masonic Order.

Mitchell Dodge was born at Imlay City in 1888. His boyhood days were spent on his father's farm. He was married to Lulu Thurston in 1911 and lived on his farm adjoining his father's. He went into service at Camp Custer and overseas with Co. "C", 536 Engineers as sergeant. Served in France and also in Germany with the army of occupation, and then attended the University at Beaune, France. He only recently returned to the farm. Mitchell was a member of the Cong'l church, Almont, and the Masonic Order also.

The double funeral was held at the farm home Sunday, August 22nd, Rev. M. J. Sweet of Pontiac and Rev. C. E. Taggett officiating. Six members of the Masonic Order acted as honorary pallbearers for Mr. Dodge and six of Mitchell's comrades of the American Legion acted in the same capacity for him.

Our community is very sad because of this double loss. Yet it is not unusual that this father and son who entered into each other's interests with such sympathy should go into the valley of the shadow together. The bereaved family must have a just pride in the noble lives they lived. Hundreds who sat under the instruction of Winchester Dodge remember him not alone as a teacher but as an inspiration to a noble and refined manhood and womanhood. He accepted schools where other teachers had failed because of the rough character of the pupils, and by his stalwart manhood and good discipline moulded them into groups of orderly and right-thinking citizens.

With the same spirit, appreciating order and righteousness, Mitchell Dodge entered the Great War, willingly giving his all to the cause of humanity. After the conflict he continued to prepare for a larger service. The world is richer and better because of these two lives. We mourn their departure. We believe they have found wider fields of service.

Attending the funeral from a distance were:—Mr. and Mrs. Geo. W. Hooper, Hamilton, Ont.; Frank M. Dodge, St. Louis; Cora Dodge Arbury, Detroit; Mrs. Coddington Bur-
