187. And suppose the said *first* accepted Bill should be found by a Stranger, who demands the Money in the Name of him to whom it is made payable, or that the true Possessor should have assigned it to another, and taken up the Value, yet neither can have any Demands on the Acceptor, if previous thereto he has paid it to whom it was payable, though without the accepted Bill, under proper Security and Indemnification.

188. If a Bill of Exchange be lost by him, with whom it was left for Acceptance, or that he hath by Mistake given it to a wrong Person, or by any other Change or Intention, the Possessor cannot obtain a Return of his Bill, neither accepted nor unaccepted, he that lost it is obliged to give the Person to whom it was payable, or to his Order, a Note of Hand for Payment of its Amount on the Day it becomes due, upon Delivery of the *second*, if it arrives in Time, or if not, upon the said Note, which in all Cases is to have the Law and Privilege of a Bill of Exchange; and, if the Acceptor refuse this, the Holder must immediately protest for Non-acceptance, and when due must demand the Money, though he has neither Note nor Bill, which, if refused, a Protest must be regularly made for Non-payment.

Where an original Bill is lost, and another cannot be had of the Drawer, a *Novi's* Law of Protest may be made on a Copy, especially where the Refusal of Payment is *Novi's* Law of Bills of Exch. P. 88. but merely for another Cause.

189. The Possessor of a Bill should be careful that it be sent to the Place of Payment in Time for its Recovery, and not detain it to the last Moment, as the irregular Arrival of the Post may hinder it from getting there till after due, in which Case, a Protest will be insignificant in Regard to its Recovery of the Drawer, as this was not timely demanded; and therefore he that constitutes himself another's Agent, and receives Bills to solicit their Recovery, and neglects demanding Payment when they are due, or, if refused, omits protesting, will be obliged to make good the Damage that shall accrue through his Remissness.

190. He that is Possessor of a Bill, which only says, *pay*, without mentioning the Time when, or that it is without a Date, or not clearly and legibly written, payable some Time after Date, &c. so that the certain precise Time of Payment cannot be calculated or known, must be very circumspect, and demand the Money whenever there is any probable Appearance of the Time's being completed that was intended for its Payment, or that he can demonstrate any Circumstance that may determine it, or make it seem likely when it should be paid.

191. When a Person hath a Bill sent him to demand Acceptance, with Directions to hold it at the Order of the *second*, and if the same is not produced, properly indorsed, at the Time it becomes due, nor the *first* asked for, the Possessor of this may demand Payment thereof, on giving Security to produce the indorsed Bill

\* But if a Bill, lost by the Possessor, should afterwards come into the Possession of any Person, who shall have paid a full and valuable consideration for it, without Knowledge of the Circumstance of its having been lost, the Drawer and the Acceptor, if the Bill was accepted, or the Drawer, if it was not accepted, must pay it, when due, to such a fair Possessor, so that *Maria's* Law seems very doubtful, and the Provision of the Statute of Will. III. may in many Cases be useless, to the Loser of the Bill.

Bill, and in Case of Refusal he may protest for Non-payment, and such a Protest is of Validity against the Drawer; but yet, if he that hath the Bill omits to demand Payment, and to protest, he is no Ways culpable nor responsible, but the Detainer of the indorsed Bill may thank himself for his Carelessness.

192. Though a Bill be not indorsed, or the Indorsement not right, but something wanting in it, yet the Possessor is allowed to demand Payment, and the Acceptor is obliged to make it, upon Delivery of the two Bills, if he will under his Hand and Seal oblige himself to procure the third properly and truly indorsed.

193. If, through Mistake, the Words and Figures describing the Sum in a Bill of Exchange differ, the former are to be preferred, until further Advice clear up the Disagreement; as it is more natural to suppose that a Man may mistake in making a few Figures than in Writing several Words, and the former at the Top of the Bill only serving to express an Abbreviation of the latter wrote at Length in the Body, and are indeed the very Substance of it, and therefore more particular Regard ought to be had to them than the others; and for the same Reason, though the Sum figured in the Letter of Advice and Bill do agree, the Words in the Body of the Bill should determine the Affair, at least till the Certainty can be known.

194. And if the Name of the Person to whom the Bill is payable should be altered, erased, or interlined before Acceptance, this will not justify the Acceptor's Refusal to pay it when due to the Person whose Name has been so mended or interlined, as he must or ought to have taken Notice of such an essential Particular, when he accepted the Bill, and should have started the Objection and satisfied himself about it before accepting, as this obliges him to a Compliance, even though he should aver that the Amendment or Interlining was made after, except he can prove it, which it will lie upon him to do.

195. If the Direction on a Bill of Exchange be forgot, but the Remitter advise his Correspondent on whom it was intended to be drawn, the Possessor may demand Acceptance, and in Case of Refusal protest against the Drawer, and recover the Charges of him; and in Case the Person drawn on have a Letter of Advice from the Drawer, desiring him to accept such a Bill, he may safely do it, though it comes without a Direction.

196. Another Method of exchanging, very different from all those before-mentioned, is that by Bills on Marts and Fairs, and though the *English* have very little Concern in these Negotiations, I have thought it not foreign to my Design of giving my Readers a general Notion of Exchanges, to describe the Nature of those particular ones; which I shall do in speaking of a few of the most considerable, and from these a just Idea may be formed of all the Rest.

197. There are many Fairs in *Europe*, where Business for very great Sums is transacted; as at *Lyons, Rheims, Rouen, Bourdeaux, Troyes, St. Denis, Dieppe, Toulon*, &c. in *France*; *Francfort*, upon the *Main*, *Leipzig* and *Naumbourg*, in *Germany*; *Bolzano*, in the *Ferol*; and *Novi*, subject to the *Genoise*; with divers others unnecessary to be mentioned here; and, as I proposed, I shall limit what I have to say concerning them in Regard of Bills, to those of *Lyons, Frankfort, Leipzig*, or *Leipzig*, and *Naumbourg*, being the most considerable of all others.

198. There are yearly four Fairs at *Lyons*, in which each hath his Payment of Bills, bearing the Name of the preceding Fair; the first is that of the *Epiphany* which alway begins in *January*, the *Monday* after *Twelfth-Day*; the second is *Easter* Fair, beginning on *St. Nisier's* Day, in *April*; the third is *August* Fair, which begins on *St. Dominick's* Day in that Month; and the fourth is the Fair of *All-Saints*, beginning on *St. Hubert's* Day, in *November*; and as each Fair has its Payment, the major Part of the Bills on this City are not made payable in Fair Time; and though they should be, they will only be discharged afterwards in the Payment of that Fair, which Payments are regulated as follows, *viz.*

199. The Payment of the *Epiphany* begins the first, and ends the last of *March*; that of *Easter* begins the first, and ends the last of *June*; that of *August*

Fair, com  
the second

begins the first, and ends the last of *September*; and that of *All-Saints* begins the first, and ends the last of *December*; so that when Bills are drawn to be paid at one of these appointed Times at *Lyons*, that is not yet begun, the Drawer says, *Pay this my first of Exchange, &c. in the next Epiphany Payment, or in the next Easter Payment, &c.* but if the Payment is already begun, the Bill must then be drawn payable *in this current, or Present Payment of Epiphany, or this current Payment of Easter, &c.*

200. It was customary formerly to make the Bills drawn from *Amsterdam* and elsewhere, on the Payments of *Lyons*, in golden Crowns of the Sun; but as this Specie has been long since decried in *France*, the present usage in Exchange is to draw for the Payments of *Lyons*, as is practised on all other Parts of that Kingdom, *viz.* in Crowns of sixty Sous.

201. The Bills, drawn in the above Manner, are to be accepted in the six first Days of the Payment they are made payable in, and the Person they are drawn on is not obliged to declare whether he will or will not accept till the sixth Day, but after that Day, the Bearer may protest them for Non-acceptance, though he should detain them during the whole Time of that Payment, to see whether any one offers to discharge them; however the Protest should immediately be forwarded to the Remitters; and if any one pays a Bill of Exchange in the Time of the Payment, before the sixth Day, or if this be a Feast the Day following, it will be at his own Risk.

202. The Bearers of Bills not satisfied by the last Day of any Payment, must protest them on the third Day after the Payment finishes, otherwise they will lose their Right against the Drawers; but if this is done in Form and in the Time prescribed, the Holder may afterwards refuse Payment from any one that offers it, and take his Reimbursements on the Drawer, both for Principal and Charges.

203. And the said Possessors of Bills are obliged to take their Reimbursement on the Drawers or Indorsers in a Time limited, *viz.* For all Bills drawn from any Part of *France*, in two Months; those which are from *Italy, Switzerland, Germany, Holland, Flanders, and England*, in three Months; and those which are drawn from *Spain, Portugal, Poland, Sweden, and Denmark*, in six Months, to be counted from the Date of the Protest; and in Default thereof they will lose their Rights against the Drawers or Indorsers.

204. *FRANCFORT* has two annual Fairs of great Resort, *viz.* the first is the Fair of *Easter*, beginning the *Sunday* before *Palm-Sunday*, that is, fifteen Days before *Easter*; and the second is the *September Fair*, which commences the *Sunday* preceding the Birth of the *Virgin Mary*, which is the 8th of *September*, if this Feast happens on *Monday, Tuesday, or Wednesday*; but if it falls out on *Thursday, Friday, or Saturday*, then the Fair does not begin till the *Sunday* following, or on the *Sunday* which that Festival may fall on.

205. Each of these Fairs lasts fifteen Days or a Fortnight; the first Week is appointed for accepting, and the second for paying the Bills of Exchange; the Acceptance payable in Fair-Time is made from the *Monday* of its Opening to the *Tuesday* of the succeeding Week at nine o'Clock in the Morning, after which Hour, the Possessor of a Bill is no longer obliged to wait for Payment, but should protest, or at least note it for Non-acceptance, which indeed he may do from the Moment that Acceptance is denied.

206. Bills on these Fairs were formerly accepted verbally, but they must now be accepted in Form as other Bills are, by Subscription of the Acceptor's Name, with the Day of its Acceptance; and when a Bill thus accepted is not satisfied before *Saturday Noon* in the Week of Payment, the Bearer is obliged to protest it for Non-payment, by carrying it to the Notary established for that Purpose, between two o'Clock and Sun-set, that he may note it, after which he must send the Protest *per first Post*.

207. *LEIPZICK* has three Fairs yearly; the first being called the *New-Year's Fair*, commences on the first of *January*, or on the 2d, if the first be on a *Sunday*; the second is at *Easter*, beginning always on the *Monday* three Weeks from that

Feast; and the *third* begins the first *Sunday* after *St. Michael*, whether that Day happens on a *Sunday* or not.

208. These Fairs are opened on the appointed Days by the ringing of a Bell, and which rings again eight Days after to finish them; so that these eight intermediate Days between the two Ringings is properly the Fair, and the Acceptance of Bills is demanded on the first or second of these Days; but if the Persons on whom they are drawn have a Mind to defer their Acceptance till the Week of Payment, they may; which Week begins immediately after the Bell has rung to end the Fair, and lasts till the fifth Day following inclusive; so that the Bills on the *New-Year's Fair* ought to be paid the 12th of *January*, and those on the Fairs of *Easter* and *Michaelmas*, the *Thursday* in the Week of Payment, otherwise to be duly protested.

209. It is permitted to the Holders of the Bills to protest them for Non-acceptance, immediately on Refusal, but not to return them; on the contrary, they are obliged to keep them till the Fair is entirely finished, to see if any one offers Payment; and as what is called the *Convoy of Nuremberg* departs from *Leipsick* at ten at Night of the protesting Day, there is no Room to make one after that Hour, and the Possessors will forfeit their Right against the Drawers if they let the Time slip.

210. *NAUMBURG* holds a very considerable Fair yearly on the Feast of *St. Peter* and *St. Paul*, which is commonly reckoned as the fourth of *Leipsick*, because the Generality of the Merchants attending the one have Recourse to the other: This Fair begins on the Festival of the said two Saints, being always the 29th of *June*, and it only lasts eight Days; Bills are accepted on the first and second Days of the Fair, and ought to be paid on the 3d of *July* at furthest, or protested for Non-payment; but it is not customary to return them with the Protest till after the 5th of the said Month, on which Day the Fair ends; and if the Bills are not then paid, the Holder may send them back by the first Post.

211. As the preceding Exchanges differ from all others, I shall here add a few necessary Observations for the Government of those who engage therein; as it is certain that the greatest Part of those who take Bills on Fairs do it with the lucrative View of employing their Money to greater Advantage than common, either by negotiating the said Bills when the Time of the Fairs or Payments approaches, or by sending them to the Places drawn on to be recovered and remitted them, which is commonly done with a considerable Profit; but as there is indisputably a much greater Risk in taking Bills on Fairs, than on Places where their Goodness or Validity must be immediately known, those who take them on the former, cannot act with too much Caution in Regard of the Drawers.

212. And the Reason is very apparent to any one who seriously reflects on such Negotiations; for suppose I take a Bill of Exchange upon *Lions*, payable at three *Uances*, dated the 22d of *April*, I can immediately send it forward, and in a little Time have the Advice of its Acceptance, when I have two Debtors or Securities, *viz.* the Drawer and Acceptant; whereas if I take a Bill of the same Date, payable in the Payment of *Easter Fair* which finishes the 31st of *July*, and is the same Day, as the last of *Grace* or *Respite* to the above mentioned Bill taken at three *Uances*, and whose Success, whether it will be accepted or not, I cannot learn till about the 13th or 14th of *July*, because, as I have before observed, the Bills drawn upon the Payments of *Lions* are only accepted during the six first Days of Payment; now if from the 22d of *April* to the Beginning of *July* the Drawer of my Bill fails, I have great Reason to believe it will neither be accepted nor paid; whereas if that drawn at the three *Uances* is not accepted, I shall know towards the 8th or 9th of *May*; and may have my Recourse against the Drawer, who may be in a better Condition then to give me Satisfaction or Security than on the 13th or 14th of *July*, or the 10th or 11th of *August*, after getting my Bill with Protest for Non-payment; and this may suffice for what regards the Payments and Exchanges on Fairs.

213. I have already quoted sundry Acts of Parliament in Force, relative to Inland Bills of Exchange, which have greatly altered their Nature from what it was before their Existence; I shall now introduce some new Cases which have

been tried in our Courts of Law, in which very singular and unprecedented Circumstances have occurred; and have so greatly perplexed not only the Gentlemen at the Bar, but even the learned Judges on the Bench, that final Decisions will be solicited, upon Cases made out expressly for that Purpose, from the supreme Tribunal of the Kingdom, the House of Lords. But before we proceed to these recent Trials, it will be necessary to notice in their Order, a few Decisions prior to them; and which are nevertheless of the first authority, and of unshaken Validity.

214. A Writ of Error was brought on a Judgment by *nil dicit* in an Action against the Drawer of an Inland Bill of Exchange, and it was objected that since the Act of 9 Will. III. no Damage shall be recovered against the Drawer upon a Bill of Exchange, without a Protest, and therefore the Action lies not, there being no Protest.

But *Holt C. J.* The Statute never intended to destroy the Action for Want of a Protest, but only to deprive the Party of recovering Interest and Cost upon an Inland Bill against the Drawer without Notice of Non-payment by Protest: For before the Statute, there was this Difference between Foreign and Inland Bills of Exchange; if a Bill was Foreign, one could not resort to the Drawer for Non-acceptance or Non-payment without a Protest, and reasonable Notice thereof: But in Case of an inland Bill, there was no Occasion for a Protest; but if any Prejudice happened to the Drawer, by the Non-payment of the Person drawn upon, and that for Want of Notice of Non-payment, which he to whom the Bill is made ought to give, the Drawer was not liable; and the Word *Damages* in the Statute, was meant only of Damages that the Party is at of being longer out of his Money by the Non-payment of the Drawer, than the Tenor of the Bill purported, and not of Damages for the original Debt: And the Protest was ordered for the Benefit of the Drawer; for if any Damages accrue to the Drawer for Want of Protest, they shall be borne by him to whom the Bill is made; and if no Damage accrue to him, then there is no Harm done him, and a Protest is only to give a formal Notice that the Bill is not accepted, or is accepted and not paid; and if in such Case the Damage amount to the Value of the Bill, there shall be no Recovery, but otherwise he ought not to lose his Debt; but that ought either to appear by Evidence upon *Non Assumpsit*, or by special Pleading; and the Act is very obscurely and doubtfully penned, and we ought not by Construction upon such an Act to take away a Man's Right. And the Judgment was affirmed *per totam Curiam*.

215. In an Action on the Case on an Inland Bill of Exchange brought by the Indorser against the Drawer, it was objected, that there was no Averment of the Defendant's being a Merchant; but it was answered and resolved by the Court, that the Drawing of the Bill was a sufficient Merchandising and Negotiating to this Purpose.

216. Acceptance of a Bill of Exchange after the Day of Payment past is usual. *L. Raymond, 304. 47. 4.*

So Acceptance for the Honour of the Drawer, &c.

217. To intitle the Party to an Action at Law in *England* against the Acceptor of a Bill, it matters not whether there be a Protest; but to intitle the Party to a Recovery against the Drawer beyond the Seas or elsewhere, there must be a Protest before a Notary Publick.

218. A Bill may be accepted for Part, when the Party on whom it was drawn had no more Effects of the Drawer's in his Hands; though whenever this happens, there must be a Protest for Non-acceptance, if not for the whole Sum, yet at least for the Residue; and after Payment of such Part there must be a Protest for the Remainder, as the receiving Part of the Money upon a Bill does no Ways weaken it. *Trin. 20 Car. II. in B. R.*

219. It is asserted by *Marius, Scarlet, Molloy*, and others that have treated of Bills of Exchange, that any Time before the Money comes due, the Drawer of a Bill may countermand the Payment although it hath been accepted, and this is usually made before a Notary, though if it comes only under the Party's Hand, they allow it to be sufficient, and in Case of Discount, or Payment before it is due, they suppose the Acceptor liable to pay it again in Case of a Countermand; from

from all which I must dissent, as this absolutely oversets the Validity of all Acceptances.

220. When a Bill beyond Seas is accepted, and not complied with when due, the Protest for Non-payment by a Notary is sufficient to shew in Court here, without producing the Bill itself; but if a Bill in England be accepted, and a special Action grounded on the Custom be brought against the Acceptor, at the Trial the Plaintiff must produce the Bill accepted, and not the Protest, otherwise he will fail in his Action at that Time; therefore it is most secure that a Bill once accepted be kept, and only the Protest for Non-payment be remitted abroad.

221. If a Bill is not accepted to be paid when due, but for a longer Time, the Person to whom the Bill is made payable must protest the same for not being accepted according to the Tenor, yet he may however admit the Acceptance; nor can the Acceptor, if he once subscribes the Bill for a longer Time, revoke his Acceptance, or blot out his Name, although it is not according to the Tenor of the Bill; for by this Act he hath made himself Debtor, and owns the Draught made by his Friend upon him, whose Right another Man cannot give away, and therefore cannot discharge the Acceptance; and this Case will admit of two Protests, if not three, viz.

1. One Protest must be made for Non-acceptance, according to the Time the Bill is payable at.
2. For Non-payment when due according to the Bill's Tenor.
3. If the Money be not paid according to the Time that the Acceptor subscribed for.

Per L. C. J.  
Pemberton  
inter Price  
& Shute.  
Pasc. 33  
Car. II. in  
B. R.

222. A Bill was drawn payable on the 1st of January, and the Person to whom it was directed accepts it to pay on the 1st of March, with which the Servant returns to his Master, who, perceiving this enlarged Acceptance, strikes out the 1st of March, and puts in the 1st of January, and at that Time sends the Bill for Payment, which the Acceptor refuses; whereupon the Possessor strikes out the 1st of January, and inserts the 1st of March again: In an Action brought on this Bill, the Question was, Whether these Alterations did not destroy the Bill? and ruled, that it did not.

1 Salk. 126.

223. A Bill of Exchange, payable to a Person or Bearer, is not assignable, so as to enable the Indorsee to bring an Action, if Payment be refused; but when it is made payable to a Person or Order an express Power is given thereby to assign, and the Indorsee may maintain an Action; and the first is a good Bill between the Indorfer and Indorsee.

Caribew's  
Rep. 460.

224. The Acceptance of a Bill, although after it is become due, is binding to the Acceptants, an Action is maintainable thereon; the Effect of the Bill being the Payment of the Money, and not the Day of Payment.

2 Show. 1.

225. When a Bill of Exchange is accepted, it is good Ground for a special Action upon the Case, but it doth not make a Debt, &c.

1 Salk. 23.

226. *Indebitatus Assumpsit* doth not lie against the Acceptor of a Bill of Exchange, because his Acceptance is a collateral Engagement, though it will lie against the Drawer; and a general *Indebitatus Assumpsit* will not lie on a Bill of Exchange for Want of a Consideration; and therefore there must be a special Action upon the Custom of Merchants, or an *Indebitatus Assumpsit* against the Drawer for Money by him received to the Plaintiff's Use.

Ibid. 125.

227. In the Case of *Bromwich and Lades*, it was said by the chief Justice *Treby*, that Bills of Exchange were of such general Use and Benefit, that upon an *Indebitatus Assumpsit*, a Bill of Exchange may be given in Evidence to maintain the Action; and by Mr. Justice *Powell*, that upon a general *Indebitatus Assumpsit* for Monies received to the Use of the Plaintiff, such Bill may be left to the Jury to determine whether this was for Value received or not. In this Case the Declaration was on the Custom of Merchants, and a general *Indebitatus Assumpsit* thereon. See the Declarations and Exceptions to it, in Case of *Bellais and Hester*, in 1 *Lutwich*, 1589.

228. If a Bill of Exchange is drawn on two or more Persons in these Terms To Mr. A, B. and C. D. Merchants, in London, they ought both to accept the Bill; for the Acceptance of only one is not complying with its Tenor, and it should be protested; but if it come directed to A. B. and C. D. or to either of them; or thus, To A. B. or in his Absence to C. D. in this Case, the Bill being accepted by either, it is sufficient.

229. Bankers' or Goldsmiths' Notes are not to be accounted Cash till received. *Luc. 109.* As for Example, A. draws a Note upon a Goldsmith, and sends a Servant to receive the Money, and to invest it in Exchequer Bills; the Servant got B. to give him Money for the Note, with which he purchased the Exchequer Bills ordered; and two Days afterwards the Goldsmith failed; it was adjudged that A. must answer the Money to B. as the Property of the Note was not transferred to B. there being no Indorsement; and he could not have sued upon it, it being only in the Nature of a Pledge or Security to him.

It was the received Opinion, and certainly founded on the Custom of Merchants in the City of London, that Draughts on Bankers, payable to A. B. or Bearer on Demand, ought to be carried for Payment on the very Day they are received, and when it is considered that great Part of the Payments for the Purchase of Shares in the public Funds or Stocks are paid by the Purchasers in Draughts upon their Bankers at the Instant of making the Transfer of the Stock, I still think it advisable to take the Draughts for Payment without Delay, and not to part with the Receipt for the Transfer till the Banker has honoured the Draught.

But in Point of Law, it has been lately said from the Bench, that if the Possessor of a Draught on a Banker does not keep it longer than *twenty-four Hours* after he receives it, before he tenders it for Payment, and within that Time the Banker stops Payment, the Drawer is obliged to pay the Money. The Case was as follows. The Plaintiff took the Defendant's Draught on his Bankers, *Brown and Collinson*; the next Morning they stop Payment, and the Defendant refuses to give Cash for his Draught, alleging, that if the Plaintiff had presented it for Payment as soon as possible after he received it, the Bankers would have paid it. *Earl Mansfield* observed, that the Whole rested upon Custom; and the Question to be determined was, Whether the Plaintiff was obliged to go to the Bankers on the Day he received the Draught, for if he had, it appeared he would have been paid? His Lordship said, it was unreasonable to suppose, that a Tradesman should be compelled to run about the Town with half a Dozen Draughts from *Charing Cross* to *Lombard Street*, and other Places, on the same Day. The Jury were to consider that *twenty-four Hours* was the usual Time allowed, and the Plaintiff kept it no longer from being paid, for the next Morning the Town was alarmed by the Bankers stopping Payment. The Jury however found for the Defendant.—*Sittings at Guildhall after Easter Term, 1782.* And upon a new Trial, the Court of King's Bench confirmed the Verdict.

230. A Note is no Payment where there was an original and precedent Debt due, but shall be intended to be taken, upon Condition that the Money be paid in a convenient Time; but the taking a Note in Writing for Goods sold may amount to Payment of the Money, because it is Part of the original Contract. *Milb. 2 Ann. 3 Salk. 119.*

231. A Servant of Sir Robert Clayton and Mr. Alderman Morris, but at that Time actually gone from their Service, took up two hundred Guineas of Mr. Monck, a Goldsmith (who knew nothing of his being discarded) without any Authority from his *quondam* Masters, who refusing to satisfy Mr. Monck for the same, he brought an Action against Sir Robert and Mr. Morris, and being tried at Guildhall, it was ruled *per Keeling* Chief Justice, that they should answer, and there was a Verdict for the Plaintiff; and though there were great Endeavours used to obtain a new Trial, yet it was denied; the Courts at *Westminster* being fully satisfied that they ought to answer, for this Servant had frequently received and paid Cash for them; and they were obliged to comply, and paid the Money.

W.* setting forth the Custom of Merchants; and held the Action lay.

<sup>2</sup> Geo. II. Cap. 25. S. 1. 243. By this Statute it is enacted, that if any Person shall forge, or procure to be forged, or assist in forging, any (*inter alia*) Bill of Exchange, Promissory Note for Payment of Money, Indorsement, or Assignment of any Bill of Exchange, or Promissory Note for Payment of Money, or any Acquittance, or Receipt for Money or Goods; or shall utter or publish, as true, any such forged Bill, &c. knowing the same to be forged, with an Intent to defraud any Person, every such Offender shall be guilty of Felony without Benefit of Clergy. And,

<sup>7</sup> Geo. II. Cap. 22. 244. By this Statute, if any Person shall falsely make, alter, forge, or procure to be falsely made, &c. or assist in falsely making, &c. any Acceptance of any Bill of Exchange, or the Number or principal Sum of any accountable Receipt for any Note, Bill, &c. or any Warrant, or Order for Payment of Money, or Delivery of Goods, or shall utter or publish any such false Acceptance, Bills, &c. with Intent to defraud any Person; every such Offender shall suffer as a Felon, without Benefit of Clergy.

Notwithstanding these positive Laws, the absurd and mischievous Custom of making inland Bills payable to fictitious Persons; that of one Person indorsing another's Name; and even drawing in feigned Names had prevailed so generally, and got to such a Height, probably from an Idea that an Indictment for Felony would be easily quashed, upon proving that no Fraud was intended—as to make it necessary to proceed with the utmost Caution, and at the same Time with becoming Firmness in the Courts of Law, to support the Honour and Credit

dit of mercantile Transactions within the Realm, and the Dignity of the Legislature, whose Statutes were thus openly violated with Impunity.

From the Rule in Law therefore, that in an Action against a Drawer or Acceptor of a Bill, payable to Order, there must be Proof of the Signature of the first Indorser, and of all those to whom an Indorsement has been specially made: has arisen the Question which has so long agitated the commercial World on the Subject of *Indorsements, in the Name of fictitious Payees.*

A BILL payable to the Order of a fictitious Person, and indorsed in the fictitious Name, is not a Novelty among Merchants and Traders. A Case of that Kind appears to have been brought to Trial upwards of twenty Years ago. It was an Action by the Indorsee against the Acceptor of a Bill of Exchange, payable to *Butler and Co.* and their Order, and indorsed in that Name. The Plaintiff was so far from proving it to have been indorsed by any Persons using that Firm, that his own Witnesses said, they believed it was indorsed by *Cox*, the Drawer. It also appeared, that there was a House of *Butler and Co.* with whom *Cox* had Dealings; but it was proved that the Bill in Question, had never been in their Hands; it was admitted that the Bill was a true one, and the Defendant had regularly accepted it; it appeared further, that the Acceptor had expressly promised to pay, at the Time the Holder had discounted the Bill; but it was insisted, that the Indorsement being fictitious, the Plaintiff had failed in making out an essential Part of his Title. *Lord Mansfield* observed, that the intent of the Bill was only to enable *Cox* to raise Money, and the reason why it was not made payable to his Order, was, that there were other Bills payable at that Time to his Order, and if this had been so too, there would have been too many in the same Name in Circulation at the same time, which would have had the Appearance of *fictitious Credit*; that Names were often used of Persons who never existed: the Defendant, by his Acceptance, and promising expressly to pay the Bill, had enabled *Cox* to put it in Circulation, and having so done, he should not avail himself of an Objection that the Plaintiff had not completely made out his Title.

But in the Years 1786, 1787, and 1788, two or three Houses, connected together in Trade, entering into Agreements far beyond their Capitals, and apprehending that the Credit of their own Names would not be sufficient to procure Currency to their Bills, adopted, in a very extensive degree, a Practice, which before had been found convenient on a smaller Scale. So long as the Acceptors or Drawers could either procure Money to answer their Bills, or had Credit enough with the Holder to have them renewed, the Subjects of these fictitious Indorsements never came in Question. But when the Parties could no longer support their Credit, and a Commission of Bankruptcy became necessary, the other Creditors felt it their Interest to resist the Claims of the Holders of these Bills, and insisted that they should not be admitted to prove their Debts; because they could not comply with the general Rule of Law, which requires Proof of the Hand-writing of the first Indorser. The Question came before the Lord Chancellor by Petition: He directed Trials at Law, and several have been had: Three against the Acceptors in the King's Bench, and one against the Drawer in the Common-Pleas; though not all expressly by that Direction.

In the first Case against the Acceptor, besides the general Counts for Money paid by the Plaintiff to the Defendant's Use, and Money had and received by the Defendants to the Plaintiff's Use, there were also two special Counts laid on the Bill itself. The first was in the Terms of the Bill—"that the Defendant and others drew a Bill of Exchange on the Defendant, payable to *Grigson and Co.* or Order, three Months after Date, which the Defendant accepted; and that *Grigson and Co.* indorsed it to *Lewis and Potter*, who indorsed it to the Plaintiff." The second Count stated it to be, "a Bill drawn as above in Favour of certain Persons trading under the Firm of *Lewis and Potter*, or Order, and indorsed by *Lewis and Potter* to the Plaintiffs." The Circumstances proved at the Trial were these—That there was a House of Trade at *Nottingham* under the Firm of *Harris, Harries and Plant*, of which the Defendant was one of the Partners; and that the Defendant alone carried on Business in *Wood-Street*, and resided in *London*; that the Body of the Bill, as well as the Signatures of the Drawers and Acceptors, were in the *Hand-writing* of the Defendant;

that no such House of Trade as that of *Grigson* and Co. was concerned in the Transaction, but that the Defendant had drawn the Bill payable to *Grigson* and Co. at the Request of *Lewis* and *Potter*; that the Indorsement in the Names of *Grigson* and Co. was fictitious, and that before the Bill came due, the Defendant knew that to be the Case; but it did not expressly appear, whether he knew it, at the Time the Bill was drawn: that the Indorsement of *Lewis* and *Potter* was in the Hand-writing of one of the Partners of that House, and that they received the Bill from the Defendant and delivered it to the Plaintiffs: that the Value of the Bill was paid to the House of *Lewis* and *Potter* in Draughts on Bankers, which were afterwards paid in Cash; and that the Defendant had Credit given him in Account with *Lewis* and *Potter* for the Value of the Bill.

To this Evidence, the Defendant's Counsel demurred, as not supporting any Count in the Declaration.

LORD KENYON, in giving the Opinion of the Court, said, that in deciding this particular Case, they did not wish to have it understood that they meant to infringe on the Rule as applicable to Cases in general; for that generally speaking, there was no Doubt but the Indorsee of a Bill of Exchange, payable to Order, must in deriving his Title, prove the Hand-writing of the first Indorser. But that this Decision proceeded on the special Circumstances of this particular Case; that the Defendant, at the Time of entering into this Engagement, knew that there were no such Persons as *Grigson* and Co. and, therefore, that in Point of formal Derivation of Title, that which is usually done, could not be done in this Case. That on the first Count of this Declaration, the Opinion of the Court did not proceed, neither was it necessary to say any Thing on the second; though if it had been necessary to resort to that, he himself had an Opinion on it. But the Counts on which the Judgement of the Court was given, were those for *Money paid* and *Money had and received*. In Lord Chief Justice *Raymond's* Time it had been decided, that a general *Indebitatus Assumpsit* might be maintained to recover Money for the Value of a Bill of Exchange, which was not paid. That Case, indeed, had been on a Bill payable to Bearer; but the Doctrine of that Case was a sufficient Foundation for the Opinion of the Court in the present, and had been recognized in a subsequent Case, by each of the Judges of this Court. "That to give such a Bill is, as it were, an Assignment of so much Property, which becomes Money had and received, to the Use of the Holder of the Bill." Here the Defendant, being a Debtor to the House of *Lewis* and *Potter*, drew a Bill, which he delivered to them, and drew it in Terms, which could not be proved in a formal Manner: he was not only privy to the Transaction, but the very Negotiator of it; and by drawing it, put himself into a *Situation* to pay, what he was in Conscience bound to pay; therefore it was an Appropriation of so much Money to be paid to the Person who should become the Holder of the Bill.

*Grant v. Vaughan.*

*Ware v. Lewis*

In the next Case, the first Count stated the Bill of Exchange to be drawn by *Livefay* and Co. on the Defendants in favour of *Lawrence Ashworth*, who was also a fictitious Person, and by him indorsed to the Plaintiffs. The second Count stated the Bill to be payable to the *Bearer*; the third payable to the Order of the Drawers, and indorsed by them to the Plaintiffs; then followed the Money Counts. An Attempt was made on Behalf of the Defendants, to distinguish this Case from the former, because there was no Evidence that in Point of Fact, they received any Value for the Bill, and that therefore, they could not be liable on the Money Counts. But the Court said, that the Acceptance of the Defendants was alone Evidence that they had received Value from the Drawers, and that on the Demurrer to Evidence, the Court might draw the same Inference which would have been drawn by the Jury. Three of the Court also thought, that the Plaintiffs might recover on the second Count, which stated the Bill as drawn payable to *Bearer*.

*Mint v. Gilson.*

The next Case was against the Acceptor, having also a Count in which the Bill was stated to be drawn payable to *Bearer*; and the Court being of Opinion that it was decided by the foregoing, gave Judgement for the Plaintiff without hearing any Argument, and added, they understood it had been agreed to turn it into the Shape of a special Verdict, that it might be carried up to the House of Lords. On the Authority of these two last Cases against the Acceptor in the King's Bench,

was decided the Case against the Drawer in the Common Pleas, the Circumstances of which we shall here recite.

The Plaintiff stated that the Defendant, on the 5th of *April* 1788, drew a Bill of Exchange, directed to *Livefay* and Co. by which he required them, three Months after Date, to pay to Mr. *George Chapman* or Order 1551*l.* Value Received, and delivered the said Bill to them, and "authorized them to negotiate and indorse the same, in the Name of *George Chapman*, and thereby to raise Money thereon," for the Use of the said Persons so using the Names, Stile, and Firm of *Livefay* and Co. and then averred, that when the said Bill was so made as aforesaid, or at any Time afterwards, "there was no such Person as *George Chapman*, the supposed Payee in the said Bill of Exchange, but that the said Name was merely fictitious," to wit, at *London*, &c. which said Bill of Exchange afterwards, to wit, &c. by one "*Andrew Goodrick*, being a Person thereunto in that behalf lawfully authorized by *Livefay* and Co. upon Sight thereof was accepted," according to the Usage and Custom aforesaid. And the said Persons so using the Names of *Livefay* and Co. being so authorized as aforesaid, afterwards and before the Payment of the Sum of Money therein contained, or if any Part thereof, and before the Time thereby appointed for such Payment, to wit, &c. "negotiated and indorsed the said Bill of Exchange, in and with the Name of the said *George Chapman*, and by that Indorsement, in the Name of the said *George Chapman* appointed the Contents of the said Bill of Exchange to be paid to the said Plaintiffs, and thereby raised Money thereon, for the Use of the said Persons so using the Names, &c. of *Livefay* and Co." and then and there delivered the said Bill of Exchange so indorsed to the said Plaintiffs, "who thereupon on the Credit thereof, advanced to the said Persons," so using the Name, &c. of *Livefay* and Co. the Sum of Money in the Bill mentioned.

The Circumstances stated in a special Verdict on this Case were these, that *Emett*, who was a Partner with *Livefay* and Co. in the spinning of Cotton at *Clithero*, wrote his Name on a Blank Piece of Paper, with a Shilling Stamp on it; and delivered it to *Livefay* and Co. for the Purpose of drawing a Bill of Exchange, for such Sum, payable at such Time, and to such Person or Persons as they should think fit.

That *Livefay* and Co. on the 5th of *April*, 1788, drew on this Paper, above the Name of *Emett*, a certain Writing, directed to *Livefay* and Co. in Words and Figures following, viz. *Clithero*, *April* 5th. 1788, 1551*l.* "Three Months after Date, pay to Mr. *George Chapman* or Order, Fifteen hundred and fifty one Pounds, value received, as advised, *John Emmet*." That the Occasion and Manner of giving this Paper Writing were as follow: on the fifth of *April*, *Livefay* and Co. were indebted to *Thomas Jeffery* in the Sum of 1512*l.* 9*s.* on a Bill of Exchange, which became due that day, and which had been previously given for Goods sold by *Jeffery* to them. One *Richard Collis*, Clerk to *Jeffery*, on that Day applied to the House of *Livefay* and Co. for Payment of that Bill: he there saw *Anstie*, one of the Partners, who informed him, that they could not conveniently then pay the Money, but requested him to take a Bill on their House for the Sum, at three Months Date, and the Interest in the mean Time, and gave him the Blank above-mentioned, with the Name of *Emett* written on it, to be filled up by one of the Clerks of the House.

That one *Ludlow* a Clerk to *Livefay* and Co. filled up the Paper, in the Manner as above set forth, that immediately afterwards it was carried to *Andrew Goodrick* another Clerk of the House, who was authorized by *Livefay* and Co. to accept it, which he accordingly did, in the Names of *Livefay* and Co. that with the Authority of *Livefay* and Co. the Name of *George Chapman* was then indorsed on the said Paper Writing, which being so filled up, accepted, and indorsed was then delivered to the said *Collis*, who then delivered up the Bill for 1512*l.* 9*s.* to the said *Livefay* and Co. That the said *Thomas Jeffery* afterwards negotiated the said Paper Writing with the Plaintiffs, and received the full Amount from them, only deducting a Discount at four and a half per Cent. and delivered the same to the said Plaintiffs. That the same was duly presented for Payment to *Livefay* and Co. who refused to pay it, of which *Emett* had due Notice. That there

there was no such Person as *George Chapman*, the supposed Payee of the said Paper Writing, being merely fictitious: That *Emett* gave no further or other Authority than as before set forth, and knew nothing of this Transaction; That the Plaintiffs had then no Knowledge, that the said *George Chapman* was a fictitious Person, or of the Circumstances under which the said Paper Writing was drawn, accepted and indorsed; but that the said *Thomas Jeffery* had full Knowledge of the whole of the said Transactions.

In the pronouncing the Judgment of the Court of Common-Pleas on this Case, Lord *Loughborough* said, the special Circumstances above stated in the Declaration would, in his Opinion, have been sufficient to have entitled the Plaintiff to recover, if the Case stated in the special Verdict had not in two or three Instances, varied from them.

The Case of *Minet* and *Gibson* has been argued before the House of Lords, and now waits the Opinion of the Judges. The Circumstances stated in the special Verdict are these:

*Livesay* and Co. made a certain Instrument in Writing directed to the Defendants, requiring them, three Months after Date to pay to *J. White* or Order, 721*l.* 5*s.* *Livesay* and Co. knew, at the Time of making it, that no such Person existed as *J. White*, mentioned in the Bill; an Indorsement in Writing was afterwards made by *Livesay* and Co. purporting to be the Indorsement of *J. White*, and requiring the Contents of the Bill to be paid to *Livesay* and Co. or their Order: *Livesay* and Co. afterwards indorsed, by *A. Goodrick*, by Procuration of *Livesay* and Co. to the Plaintiffs for a full and valuable Consideration, when the Plaintiffs became the Holders of the Bill; the Defendants afterwards accepted, with the full Knowledge that no such Person as *J. White*, mentioned in the Bill, existed, and that the Name of *J. White*, so indorsed thereon, was not in the Hand-writing of any Person of that Name. The Defendants at the Time of making and accepting the Bill had not, nor had they at any Time since, any Money, Goods, or Effects, of or belonging to *Livesay* and Co. or of the Plaintiffs in their Hands.

Beside the Money Counts, the Declaration contained seven special Counts on the Bill. The first, stated that *Livesay* and Co. made a Bill of Exchange, directed to the Defendants, requiring them, three Months after Date, to pay 721*l.* 5*s.* to *John White*, or Order; *Livesay* and Co. well knowing that no such Person as *J. White* existed; on which Bill an Indorsement was made, purporting to be the Indorsement of *J. White* named in the Bill, requiring the Contents to be paid to *Livesay* and Co. or Order; that *Livesay* and Co. by one *Abraham Goodrick*, by Procuration of *Livesay* and Co. indorsed to the Plaintiffs, and that the Defendants accepted it; knowing that no such Person as *J. White* existed, and that the Name of *J. White*, so indorsed, was not the Hand-writing of any Person of that Name.

The second Count, after stating the Drawing of the Bill as in the first, proceeded thus; *Livesay* and Co. knowing that *J. White* was not a Person dealing with or known to *Livesay* and Co. and using the Name of *J. White* on the Bill as a nominal Person only, and intending not to deliver the same to him, or to procure the same to be actually indorsed by him: on which Bill a certain Indorsement was made, requiring the Payment to be made to *Livesay* and Co. and that *Livesay* and Co. indorsed to the Plaintiffs, without having delivered the Bill to *J. White*, and without any actual Indorsement or Assignment of the Bill by *White*.

The third Count stated, that the Bill was made payable to themselves, *Livesay* and Co. by the Name and Description of *J. White*.

The Fourth, treated it as a common Bill, payable to *J. White*, or Order, and stated that *J. White* indorsed it to the Plaintiffs.

The Fifth, as payable to Bearer, and that the Plaintiffs were the Bearers.

The sixth payable to *J. White*, or Order, with an Averment that, when the Bill was made, there was no such Person as *J. White*, the supposed Payee, but that Name was merely fictitious; by Reason whereof the Sum mentioned in the Bill became and was payable to the Bearer thereof; according to the Effect and

Meaning of the Bill, averring also; that the Plaintiffs were the Bearers and Proprietors thereof.

The Seventh Count stated, that there was a Partnership, or House, of certain Persons using Trade, as well in the Name and Firm of *Livesay* and Co. as in the Name and Firm of *J. White*; that the last-mentioned Persons made a certain other Bill, the Hand of one of them on their joint Account, and in their Copartnership Name and Firm of *Livesay* and Co. being thereto subscribed, and directed it to the Defendants, requiring them, three Months after Date, to pay to the said last-mentioned Copartners, by the Name of *J. White*, or Order, 721*l.* 5*s.* and that the said last-mentioned Copartners afterwards, by a certain Indorsement in Writing, appointed the Contents to be paid to the Plaintiffs, and delivered the Bill, so indorsed to them.

One Observation naturally presents itself to the Mind on the Inspection of this Record: The two first Counts state in Substance, all the Circumstances found by the special Verdict, yet Judgement was given for the Plaintiffs, not on one of these, but on the fifth Count, which states the Bill as payable to Bearer: It appears singular, that a Court of Justice should decide, that a Man should have a Right to recover on a general Count, supported by special Circumstances given in Evidence, and that these very Circumstances, when stated specially on the Record, should not be considered as sufficient to sustain the Action.—It seems impossible to account for this apparent Inconsistency in any other Way than by adverting to the Declaration in the Case of *Vere* and *Lewis*, and the Judgement given upon it; in that, there is no Count which states the Circumstances specially; but the Court being of Opinion, that the Plaintiff was entitled to recover, thought the Count which states the Bill as payable to Bearer, was a sufficient Foundation for their Judgement, and a like Count appearing in the Case of *Mines* and *Gibson*, they gave Judgement on that, without adverting to the two Counts, which stated the special Circumstances of the Case.

This Inconsistency being pointed out by the Counsel for the Plaintiff in Error, in the House of Lords, as one Ground of impeaching the Judgement of the Court below, it was observed in Answer, that there being in Fact, but one Cause of Action, the Plaintiff could have Judgement only on one Count, and consequently Judgement was necessarily entered for the Defendant on all the rest; and if upon the whole Record there appeared a sufficient Cause of Action, but the Judgement was entered on the wrong Count, the Court of Error would rectify it.

Independently of the Rule which requires the Proof of the Hand-writing of the first Indorser, one preliminary Objection has been made to the Holder's Right of Recovery in any Form of Action against the Drawer or Acceptor: The very Act of indorsing on a Bill, a Name which belongs to Nobody, is, it is said, in itself a *Felony*; it has a general Tendency to defraud, though the Fraud be pointed against no particular Individual; and in all Cases which have arisen, has actually defrauded the Holder of the Bill, by imposing on him the Idea of a Security which does not exist. The Act too of sending the Bill into Circulation with a fictitious Name on it, it is said, is a *Felony* in him, who is privy to the Transaction.

Whether each or either of these Acts be in Reality a *Felony*, admits of considerable Doubt, and is one Point "On which the Opinion of the Judges is required by the House of Lords." Should that Opinion be given in the Affirmative, the Advocates on the Part of the Defendant to the Action insisted, that the Holder of the Bill could not recover against either the Drawer or the Acceptor, because he could not make Title, through the Medium of a *Felony* in another: a *Felony* contaminates a Transaction, and the Civil Remedy is completely merged in it, by the Policy of the Law, to prevent, as much as possible, Crimes from going unpunished.

The Case of *Peacock* and *Rhodes*, they said, could not be cited in Opposition to this Doctrine; for in that Case, the Bill having been regularly indorsed by the Payee, and having, though after having been stolen, come to the Hands of the Plaintiff for a good Consideration, he was only under the Necessity of proving the Hand-Writing of the first Indorser, and was not bound to make any Part of

his Title through the Person who stole the Bill : But here the Plaintiff deriving his Title through the Indorsement which was a Forgery, was necessarily barred of his Action. To this it was answered, that this Proposition with respect to the Effect of the Felony was not true to such an Extent ; it was true indeed, that a civil Action could not be maintained, where the Cause of Action was grounded wholly on an Act of Felony ; as if one stole a Horse or Money, the Owner could not maintain Trover, or Money had and received against him, because the civil Remedy was merged in the Felony ; If the Horse came into the Hands of another Person, under Circumstances which would not amount to a Change of Property, the original Owner might recover him from that Person ; though, therefore, the Felony might be an Answer to an Action against either the Drawer or Acceptor, where it appeared the Defendant was guilty of the Felony ; yet that would not preclude the Plaintiff from recovering against the other, if he did appear to be guilty.

The Advocates on the other Side of the Question in the House of Lords, professing not to impeach the Judgement of the Common-Pleas, in the Case of *Collins* and *Emett*, in which the Defendant was perfectly innocent of the supposed Felony, were satisfied to maintain, that where the Fact of the Felony could be fixed on the Defendant, that was a Bar to a civil Action.

In a Transaction of this Kind, it is apprehended, that, whoever in Fact makes the fictitious Indorsement, both the Drawer and Acceptor must in general be guilty of publishing the Bill with that Indorsement on it, knowing it to be fictitious.

In such a Case, whether this amounts to a Felony, is certainly a preliminary Question ; for, though independently of that Question, the Plaintiff might be intitled to recover, yet if in Fact, it shall be decided to be Felony, he must necessarily be precluded from his Action, because if he were to recover at all, he must recover against the Felon himself.

But it may happen that the Acceptor may not know that the Bill he accepts, is attended by any Circumstance different from those attending Bills in the usual Course of Business ; as where the Bill is brought him for Acceptance by a third Person, either before the Indorsement is made or afterwards, without Intimation of the Payee's being fictitious : The Drawer too, even in common Cases, may be so far unaffected with the Felony, that he may not be guilty of publishing the Bill with a false Indorsement on it, knowing it to be false, for it may be carried out of his Hands before the Indorsement is made : and in some Cases, as in that of *Collins* and *Emett*, the Person appearing as the Drawer may be perfectly ignorant of the Transaction.

In any of these Cases therefore, in which the Defendant may appear to have acted without Knowledge of the Circumstances, the Question of Felony cannot be considered as preliminary to the Decision on the Plaintiff's Right of Action : If the Adherence to the Rule which requires Proof of the Hand-writing of the first Indorser, be so rigid, that the Plaintiff can in no Form of Action recover without it, that is, of itself sufficient without the Intervention of the Felony : If an Action in any Form can be sustained, in which that Rule may be dispensed with, then it is not through the Felony that the Plaintiff derives his Title, and consequently he cannot be affected by the Decision of that Question.

If this reasoning be well founded, it follows that whatever that Decision may be, the general Question is still open to Discussion ; if in the Affirmative, then in those Cases only where the Defendant is innocent ; if in the Negative, then in all Cases.

In Support of the Judgement on the fifth Count, which states the Bill as being drawn payable to Bearer, it has been urged that in stating an Agreement or a Deed in pleading, it is sufficient to state the legal Operation of it, though there might be a verbal Variance between that and the Instrument itself : as where a Lease is made jointly by B. Tenant for Life of C. and him in Remainder or Reversion, in Fee ; during the Life of C. this may be stated as the Lease of Tenant for Life, and the Confirmation of him in Remainder or Reversion ; that being then the legal Operation of the Deed : and, for the same Reason, after the Death of C. it may be stated as the Lease of the Person in Remainder or Reversion, and the Confirmation of B.

So here, it was said, though the Bill appeared on the Face of it, to be payable to Order, yet as no Body existed who could give such Order, the Engagement must be to pay the Bill, which was, in Effect, to render it payable to the Bearer.

If, however, Recourse must be had to the Intention of the Parties, it would seem that it is only in the Case of a blank Indorsement in the Name of the fictitious Payee, that the Bill must be considered as in Effect payable to Bearer; where the Indorsement is special, as it was in the present Case, the Intention to be attributed to the Parties is, that it should be payable to the Order of him to whose Order it is made payable by the fictitious Indorsement, and then the third Count would have been better adapted to support the Judgment than the fifth.

But it was objected that this Argument was not applicable to the present Case; for though it must be admitted that a Deed must be stated according to its legal Operation; yet that Operation must appear on the Face of the Deed itself, without any collateral Circumstances to explain it, contrary to the evident meaning of the Words.

With respect to the joint Lease of Tenant for Life, and him in Remainder or Reversion, if the several Interests which they had in the Land did not appear in the Deed, yet the operative Words of the Lease were not of that fixed and determinate meaning that they could not admit of a different Construction, if collateral Circumstances require it, in Order to give them Effect: But the Words "payable to Order" and "payable to Bearer" were so peculiarly appropriated to the distinct Species of Bills in which they were respectively used, that the one could by no Possibility be construed to mean the other.

A still stronger Objection to the Judgment's being supported on this Count, arises from a Question put to the Counsel by the Lord Chancellor, whether an Action could be maintained on this Bill against an Indorser. That an Action may be maintained against an Indorser of such a Bill can admit of no Doubt: It is from the Frame of it payable to Order, and transferable by Indorsement: and in an Action against an Indorser, no Question could arise about the fictitious Payee, because, as will be seen hereafter, in that Action the Plaintiff derives no Part of his Title, through any of the Parties to the Bill who proceeds the Defendant: But a Bill payable to Bearer, being transferable by Delivery, cannot regularly be indorsed; and it seems, from the Question, to have been supposed that no Action could be maintained against the Indorser; though no Doubt was entertained but that it might, even when it was held that a Bill payable to Bearer could not be the Subject of an Action by the Indorsee, against the Acceptor or Drawer. If therefore, the Judgment were affirmed on this Count, it would follow that the same Instrument must, in one Case, be considered as a Bill payable to Bearer, and in another, as a Bill payable to Order, both of which it cannot be: But the Difficulty suggested with Respect to the Period when the Bill shall be said to cease to operate as payable to Bearer, and assume the Character of a Bill to Order, admits of an easy Solution: As against the Drawer and Acceptor it operates as the one; as against the Indorser, it operates as the other.

So general seems to be the Opinion that there ought to be a strict Adherence to the Rule which has given rise to this Question, that the Count which states the Bill in its own Terms, appears to have been abandoned on all Sides: The Plaintiff's Counsel in the Case of *Tatlock* and *Harris* abandoned it; the Advocates on the same Side in the House of Lords abandoned it: The Court of King's-Bench professed, that on it their Opinion did not proceed; and the Lord Chancellor in his Address to the House on the Subject of the Questions to be referred for the Opinion of the Judges, seemed to think it could not be supported by the special Verdict.

One general Objection was made to all those Counts which were founded on the Bill itself: It is only in Favour of the Custom of Merchants that the Practice is founded of declaring on those Instruments as Specialties, and if such a Bill was not within the Custom of Merchants, then the Plaintiffs could not recover on those Counts: That such a Bill was not within the Custom of Merchants, it was argued, appeared from this; that in no Book on the Subject was there to be found any Allusion to a Bill of this Kind; the Usage had provided, and the Law had acknowledged two Sorts of Bills, which were sufficient to answer every Purpose of Trade, where the Parties had no sinister View; if it was wished to facilitate the

Circulation of the Bill, it might be made payable to Bearer; if to confine it within certain Limits, it must be made payable to Order; but this was a new Invention to enable Men to raise Money by a Fraud, and it could not be pretended, that this was within the Custom of Merchants.

To this it was answered, that the Custom of Merchants is not to be confined to those Particulars which are to be found in any mercantile Book; nor is the Novelty of the Thing a sufficient Reason to reject it; it had not been done all at once; that every Thing which makes a Part of the Law and Custom of Merchants at this Day, was established: it was not without considerable Struggles that Bills, payable to Bearer, obtained the same Privileges as those payable to Order: new Facts laid the Foundation of new Rules; and unless the Decision on the Question of Felony could preclude all further Discussion, there could be no Inconvenience in its being determined now for the first Time, that where a Bill was drawn in the Name of a fictitious Payee, and accepted, the Drawer and Acceptor should by the Custom of Merchants, be answerable for the Money to a Holder by a fair Consideration.

That such a Holder, in substantial Justice, ought to recover against either the Drawer or the Acceptor, there can be no Doubt: He has parted with his Property, on the Faith of their Security; and it is not very gracious in them to tell him, that because, by their Contivance perhaps, he has one Security less than he supposed, he shall not have the Advantage of those which really exist.

Such is the Substance of the Arguments on both Sides of this important Cause, and as far as I can recollect, the Points proposed for the Opinion of the Judges are these\*.

First, Whether the Publication of the Bill by the Defendant with the fictitious Indorsement on it, he knowing at the Time that it was fictitious, amounts to a Felony?

Secondly, if that be not Felony, whether the Facts found by the special Verdict support the Judgment on the Count, which states the Bill as payable to Bearer?

Thirdly, if Judgment on that Count cannot be supported, whether it can be supported by any other Count founded on the Bill as a Specialty?

Fourthly, Whether on any of the other Counts which state all the particular Circumstances of the Case, the Plaintiff be entitled to recover?

It was also suggested by the Lord Chancellor, that if on the first Point, the Opinion of the Judges should be in Favour of the Defendant in Error, and on the others against him, another Question might not still be considered, whether, when the Defendant to the Action was privy to the Fraud, the Plaintiff might not recover in an Action of Deceit?

245. LETTERS OF CREDIT being a Species of Bills of Exchange, and equally binding with them, I shall speak of them under this Head, as the proper Place for it; and presume it will be needless to counsel my Readers to be very circumspect in giving them, as their Honour and Credit is as much concerned for the punctual Re-payment of whatever Sums are advanced in Consequence thereof, as they would be for the Discharge of a Bill of Exchange:

246. These Letters are of two Sorts, *viz.* *General* and *Special*, and both given to furnish travelling Persons with Cash as their Occasions may require; they are commonly open or unsealed, and contain an Order from the Writer to his Correspondent or Correspondents, to furnish the Bearer with a certain Sum, or an unlimited one; and the Difference between them is, that the former is directed to the Writer's Friends at all the Places where the Traveller may come (though it is not customary to give separate Letters to each Place) and the other directed to some particular one; obliging himself for the Re-payment of whatever Monies shall be advanced in Compliance with the Credit given, on producing a Receipt or a Bill of Exchange, which he thinks proper to have, from the Person credited.

247. If any Money is advanced on either Species of these Letters and Bills of Exchange given for the Sum on the Person who wrote them, he is obliged to accept and pay the same; and in Case of Refusal he may be compelled thereto, rather

\* *As to the Law of Bills of Exchange, 8vo. London, 1790.* A most valuable Tract, as it includes the Arguments in the latest Cases decided by our Courts of Justice.

rather than the Drawer, as the Remitter in the Loan of his Cash had more Regard to his Correspondent's Sufficiency than the Drawer's, whom it is probable he knew nothing of; therefore, in this Respect, the Person giving the Credit is to be reputed as the Drawer,

248. And as the Giver of these Letters is so obliged for the punctual Repayment of the Money advanced, I repeat that he ought to be very cautious to whom he gives them, more especially those without Limitation, as, in the Hands of a dishonest Person they may prove his Ruin; and as it is hardly possible that he that requests the Credit should be ignorant of what Cash he shall want, at least with a little Difference, I think the Compliment, for it can be nothing else, of an unbounded Credit should be excused, being really of no Service either to him that pays, or him that receives it.

249. Advice by Post should always follow a Letter of Credit, and Duplicate of it accompany such Advice; and it would be prudent therein to describe the Bearer, with as many Particulars as possible, for Fear he should lose, or be robbed of his Creditentials, and a Stranger reap the Effects of them. These Letters are wrote in various Forms, and though a Copy may be superfluous to most of my Readers, yet the Prospect of its being serviceable to some few, I hope, will plead my Excuse for adding it here.

S I R,

London, the 3d of January, 1791,

THIS is designed to accompany (or kiss your Hands by) Mr. John Steevens, and to request your furnishing him with a thousand Dollars of your Money (or with as much Cash as he shall require of you, if you give an unlimited Credit) for which please to take his Bills on me, or on any other he shall think proper to draw them; and I do hereby oblige myself for the punctual Discharge, and remain,

Sir, your most humble Servant,

To Mr. Thomas Richardson,  
Merchant, in Leghorn.

W. B.

250. The Time of paying Bills is always settled between the Drawer and Remitter, sometimes on a certain fixed and appointed Day, or at Sight, or so many Days after Sight, or so many Days, Weeks, or Months after Date; at Usance, half Usance, Usance and half, and two or three Usos or Usances.

251. A Bill payable at a certain Day, is due on the Day mentioned, according to the Stile of the Place it is drawn on, not where it is drawn from; so that a Bill from *Amsterdam*, made payable at *Hamburg* on the last Day of *November*, is to be understood that Day of *Old Stile*, and *vice versa* for a Bill drawn in the same Manner from *Hamburg* to *Amsterdam*.

252. If Bills are made payable at some Days after Sight, their Acceptance is dated on the Day they are presented, and from thence the Days of their running are counted; but, if they are made payable at Sight, they are to be satisfied without any Days of Grace to be allowed.

253. If a Bill be made payable some Weeks after Date or Sight, the Weeks must be reduced into Days, and in counting these, the Almanack should be consulted; and if a Bill is drawn to be paid one or two Months after Sight or Date, then the Day of Payment falls on the same Day in the succeeding Month, &c. from that in which the Bill was presented or dated, although the Months differed in the Number of their Days. *As for Example*, A Bill dated the 7th of *January*, and payable a Month after Date, is payable the 7th of *February*, not the 8th, and a Bill dated the 30th of *January*, to be paid a Month after Date, becomes due on the last Day of *February*, though this Month hath not so many Days in it as the other.

254. And when a Bill is dated according to the *Old Stile*, payable a Month after Date in a Place where the *New Stile* is observed, it does not always fall due a Month after the *Old Stile* Date, as will be proved by supposing the Bill dated the 25th of *April*, O. S. payable a Month after Date, in a *New Stile* Country, and it does not fall due on the 25th of *May*, O. S. which is the 5th of *June*, N. S.

N. S. but on the 6th, for when the Bill was dated it was the 6th of *May*, N. S. which ought to be well observed, as this will make a Difference of two Days in Leap-Years, and of three in others.

255. A Bill made payable a Month after Date from the 28th of *February*, falls due on the 28th of *March*; but if it be dated *ultimo Feb.* then it is not due till the *ultimo March*, and the same in *June* and *July*, as the one hath 30, and the other 31 Days.

256. Bills made payable here at Sight have no Days of Grace allowed; but if it is but one Day after Sight; the Acceptor may claim them, though this ought not to be practised in Countries where the Respite Days are many.

257. To reckon the precise Time of a Bill's Payment, made payable after Date, it is necessary to calculate the Difference between the Old and New Stile, and to know what Usance is in every Country; and for my Reader's Information herein, the following Places observe the *New Stile*, viz. *London, Amsterdam, Dordrecht, Haerlem, Leyden, Rotterdam*, and all the *United Provinces of Holland*; as also *Middleburgh, Ulliffingen in Zealand; Antwerp, Bruges, Dornick, Gbent, Ryssel, Brussels, Valenciennes*, and all *Brabant, Flanders, and Artois; Paris*, and all *France; Spain, Portugal*, and all *Italy; Augsburgh, Crembs, Lints, Vienna*, and several Places of the Empire; *Breslaw*, and all *Silesia; Colne, Dantzick, Koningsburgh, Thorne* and all *Poland*.

258. The Places that observe the *Old Stile* are,

*Russia*, the Electorate of *Brandenburg, Denmark, East-Friezeland, Frankfurt on the Main, Geneva*, and the Protestant Cantons of *Switzerland, Hamburg*, and all *Holsten; Lubeck*, and all *Meclenburgh; Leipzick, Magdeburgh, Naumbourg*, and all *Saxony; Riga, Stockholm*, and all *Sweden; Strasburgh, &c.*

The *Papish* Electorates and Principalities of *Germany* observe the *New Stile*, and the *Protestant* ones continue the *Old*; and as the Reason of this Difference may not be so generally known, I beg leave to intrude so much on the Patience of that Part of my Readers who are acquainted with it, as to inform those that are not, which I will do in a few Words.

JULIUS CÆSAR, desirous of rectifying the erroneous Computation of Time that had prevailed till then, undertook the Reformation; and as the Year was corrected by him, the *Vernal Equinox*, which reduces Day or Night to an equal Length all over the Globe, except just under the Pole, happened in 325 to fall upon the 21st of *March*; and from this the *Nicene Council*, being then sitting, regulated the Terms for the Observance of *Easter*. But Pope Gregory XIII. observing in the Year 1582, that the *Equinox* was changed from the 21st to the 11th of *March*, ordered ten Days to be deducted from the Calendar, and the 11th to be counted the 21st; which Edict was generally observed by the Nations acknowledging the Supremacy of the See of *Rome*, but it did not obtain universally, as most of the *Protestant* Countries continued to reckon their Time as formerly; and this gave Rise to the different Ways of Computation that now obtain in *Europe*, distinguished by the *Julian* and *Gregorian* Calendars; and I have only to add, that since the Time of Pope Gregory, the *Equinox* has changed a Day, viz. from the 11th to the 10th of *March*, so that the Difference between *Old* and *New Stile* is eleven Days. *Great-Britain* and *Ireland* adopted the *New* or *Gregorian Stile* by Act of Parliament, in the Year 1752.

259. USANCE from *London* to any Part in *France* is thirty Days, this being declared to be a Month in Regard of Exchanges in that Kingdom, whether the Month has more or fewer in it.

Usance from *London*, to *Hamburg, Amsterdam, Rotterdam, Middleburgh, Antwerp, Brabant, Zealand,*

*Flanders*.—And from these Places to *London*, is one Calendar Month after the Date of the Bill.

Ufance from *London* to *Spain*,

*Portugal*,—And from these Places to *London*, is two Calendar Months after Date.

Ufance from *London* to *Genoa*,

*Leghorn*,

*Milan*,

*Venice*,

*Rome*—And from these Places to *London*, is three Months.

The Ufance of *Amsterdam*,

Upon *Italy*, *Spain*, and *Portugal*, two Months.

Upon *France*, *Flanders*, *Brabant*, *Geneva*, and upon any Place in the Seven *United Provinces*, is one Month.

Upon *Frankfort*, *Nuremberg*, *Vienna*, *Augsburgh*, *Cologne*, *Leipzig*, and other Places in *Germany*; upon *Hamburg* and *Breslau*, is fourteen Days after Sight, two Ufances twenty-eight, and half Ufance seven.

Ufance from *Dantzick*, *Koningsberg*, and *Riga*, upon *Amsterdam*, is at one Month's Sight, though it is common to draw from the first at forty Days' Date, and from the others at forty-one, but oftener at ten and eleven.

And from *Amsterdam* on the said Places, at a Month's Date, without mentioning Ufance; though sometimes at forty and forty-one Days; and sometimes on *Breslau* at six Weeks Date.

260. Most Nations have generally agreed to allow the Acceptor of a Bill some small Time for Payment, beyond that mentioned in the Bill, termed Days of Grace, or Respite: but they as generally disagree in the Number, and Commencement of them.

At *London*, *Bergamo*, *Vienna*, three Days are allowed; at *Frankfort*, out of the Fair Time, four; at *Leipzig*, *Naumbourgh*, and *Augsburgh*, five; at *Venice*, *Amsterdam*, *Rotterdam*, *Middleburgh*, *Antwerp*, *Cologne*, *Breslau*, and *Nuremberg*, six; at *Naples*, *Denmark*, and *Norway*, eight; at *Dantzick*, *Koningsberg*, and in *France*, ten; at *Hamburg* and *Stockholm*, twelve; in *Spain*, fourteen; at *Rome*, fifteen; at *Genoa*, thirty. At *Leghorn*, *Milan*, and some other Places in *Italy*, there is no fixed Number of Respite Days. *Sundays* and other Festivals are included in these Days at *London*, *Naples*, *Amsterdam*, *Rotterdam*, *Antwerp*, *Middleburgh*, *Dantzick*, *Koningsberg*, and in *France*; but not at *Venice*, *Cologne*, *Breslau* and *Nuremberg*: At *Hamburg* and in *France*, the Day on which the Bill falls due makes one of the Days of Grace, but no where else.

261. At *Venice* no Bills are permitted to be paid by Indorsement, so that they must be payable to a certain Person, and not to Order, or to the Procuration of him intended to receive them; and in Places where there are Banks, if Bills fall due when these are shut, there are always some Days of Grace allowed the Acceptor after their Opening.

262. It was formerly agreeable to the Laws of *Portugal*, and I believe is still so to those of *Italy*, though certainly quite contrary to Justice and Honesty, for an Acceptor to be freed from this Obligation in Case of a Drawer's Insolvency before Payment; but as some remarkable Trials on this Subject in the first-mentioned Kingdom seem to have altered the Laws for the better, I shall acquaint my Reader both with the Occasion and Success of them.

263. Some few Years ago, a Gentleman from the City of *London*, drew some Bills on his Correspondent at *Lisbon*, and died two or three Days after insolvent; the Bills were accepted, but on Advice of the Drawer's Death and Insolvency, Payment was refused; and the Acceptor, sheltering himself under the then subsisting Law, stood a Trial on being sued; but the Judge, having a Regard to the Custom of Merchants, gave a Sentence against him, and he paid accordingly. However, some Time after a Merchant at *Amsterdam* drew two Bills on another at *Lisbon*, which were indorsed by one here, to two several ones there, and were both punctually accepted; but the Drawer failing, and the Indorser likewise, the Acceptor refused Payment, which obliged the Possessors to sue him for the Value,

and this they did in separate Suits, carried on before different Judges, whose Opinions were so opposite, that one of the Holders had a Sentence in his Favour, and the other against him; upon which new Suits were commenced, and finally determined for them, who accordingly recovered not only the Principal and Charges of the Bills, but those of the Law-Suits also; which seems to have fixed the Point before contestable, and now placed it on a Par with what is observed in the other Parts of *Europe*. And though there are some few in *Italy* who value themselves on the Protection of the Laws to screen them from a Payment under the afore-mentioned Circumstances, yet they thereby irreparably prejudice their Character, and must not expect any future Credit; so that those who have any Regard for either, act more like Merchants and honest Men, and discharge their Acceptances whilst they are able.

264. In the Territories of the King of *Denmark*, no Bills must be made payable after Sight for a longer Term than two Months; and whatever protested Bills are not sued for in six Months from the Protest's Date, shall lose their Right as Bills of Exchange, and thenceforward be only regarded as a Book Debt, and all Law-Suits concerning them must be concluded within a Year. It hath long since been determined by a settled Rule among the Merchants at *Copenhagen*, and confirmed by a Judgment in the highest Court, that the Charges on all protested Bills shall be six *per Cent.* for Exchange and Re-exchange, with  $\frac{1}{4}$  *per Cent.* for Provision; and by a Placard of the 26th of *Nov.* 1731, Bill-Bonds, which are a Sort of Inland Bills, and ordered in Lieu of Notes of Hand, were introduced; they must be on stamped Paper, and drawn at three Months, but not to continue longer than four; they have a Right when protested like Foreign Bills of Exchange, to bear an Interest of  $\frac{1}{2}$  *per Cent.* Monthly, and must be sued for within a Month after due.

265. Since I began on this Subject of Bills, a small Dispute has happened at *Legborn* about their Payment, which I shall just mention for my Reader's Information. It has always been customary at that Place to pay them in Gold; but *Zechins* have lately been so scarce there, as to bear a Premium of two or three *per Cent.* above Silver; to avoid which Expence several tendered Payment of their Bills in the last-mentioned Metal, and not being admitted, some of them were returned protested, which occasioning a little Confusion in their Commerce, an Application was made to the Regency, who, as I understand, determined that Bills should be paid as usual; however, some here still pretend to have an Insertion in all they take for their Payment in Gold, which Innovation I presume will wear off, as the Cause that occasioned it ceases. And having treated of every Particular relative to Bills, but their Form, that now naturally challenges a Remark.

266. Bills of Exchange should be written in a fair Hand, cleanly, and without Mistakes: their Stile admits of several Variations; as one or more Bills are granted of the same Tenour; Difference in the Time and Place of Payment; or according to the Species it is to be made in; which the following Forms may serve to illustrate.

London, the 18th of *January*, 1791.

Exchange for 50l. Str.

AT Sight of this my only Bill of Exchange, pay to Mr. *John Rogers*, or Order, fifty Pounds Sterling, Value received of him, and place the same to Account, as *per Advice* (or *without further Advice*) from

When Bills are drawn at *Ufance*, or for many Days Date, the Acceptance must be at the Bottom of the Bill, as in that immediately preceding; but when they are drawn payable at so many Days sight, the Acceptance must express the Day it is made; and an Indorser may divide a Bill, and make Part of it payable to one, and Part to another, which is done in the following Manner: *A.* possessing a Bill for 200*l.* Sterling, indorses on the first 122*l.* payable to *B.* and on the second 78*l.* payable to *C.* and sends the first to *B.* and the second to *C.* so indorsed, and on their presenting them to the Party the Bill is drawn on, he accepts the first for the 122*l.* and the second for the 78*l.* in Conformity to their Indorsements.

In *France*, by an Ordinance of the King, in *March*, 1673, it is directed, that the Nature of the Value received for Bills of Exchange shall be inserted in them, and expressly mentioned, whether it was in Money, Merchandize, or other Effects, to prevent several Abuses that had crept into this Branch of Commerce, by the bare Insertion only of Value received; for it was common to give a Note, in Payment of a Bill of Exchange, both expressing Value received. And this Method was found to be of great Prejudice to Trade, by occasioning many Failures, which the afore-mentioned Arret was intended to prevent. And in Consequence thereof, there are four Sorts of Bills of Exchange in that Country, *viz.* the first expressing simply, *Value received*; the second, *Value received in Merchandize*; the third, *Value in himself*; and the fourth, *Value understood*. The first and second need no Paraphrase, being both alike in their Negotiation, and their Distinction only answering some Ends that may occur between the Drawer and Deliverer, in Case of any Failure or Fraud. The third Sort is, when a Merchant draws a Bill of Exchange on one who owes him Money, which he sends to his Friend or Factor, to procure Acceptance and Payment; and as the Acceptor is a Creditor of his, an Inconvenience might accrue to him, should he insert Value received, as his Friend or Factor might pretend that it belonged to him, appearing by the Bill that the Drawer had received the Value. The fourth is, when a Person taking a Bill of Exchange from one on whose Credit he cannot rely, gives the Drawer his Acknowledgement of receiving the Bill, whose Value he obliges himself to satisfy, on having Advice that the Bill is paid; but if the Bill returns protested, it is again exchanged for the Note, the Drawer defraying the Charges. The Times for which Bills are made payable are also four, *viz.* At so many Days Sight, eight, ten, fifteen, &c. and the Time does not commence running till the Day after it is presented and accepted; so that a Bill drawn payable at ten Days Sight, and accepted the last Day of *April*, is not demandable till the 11th of *May*, and the Reason is, that the Day of Acceptance which is the 30th of *April*, is not counted, but the Reckoning begins only on the 1st of *May*; the 10th of *May*, on which the Bill expires, is not counted neither, because that the 10th does not finish till Midnight, and consequently an Action cannot be brought against the Acceptor till the 11th of *May*, which begins the Moment succeeding that on which the 10th finishes; and in Effect, if one begins to count from the 1st of *May*, and continues to the 10th at Midnight inclusive, there will be found no more than ten whole Days, which is the Time the Acceptor had to pay the Bill in.

The second Method of drawing Bills, is to make them payable at a Day certain. For Example—a Drawer gives his Bill to be paid on the 1st of *May*, which, according to what is said in the preceding Case, is not demandable till the second, as the Day of its falling due is never counted.

And there is no Obligation to procure Acceptance to a Bill of this Tenour, at the Time goes on whether accepted or not; but it is otherwise with the foregoing, payable at so many Days Sight; though it is certainly more advisable to get it accepted, as by this Means another Debtor is added to the Drawer, which becomes a new Security.

The third Time of Bills is at *Ufance*, which is according to the Places drawn on, double *Ufance*, or two *Ufances*, &c. and tho' there is no more Obligation to procure Acceptance to this than to the preceding one, as the Time runs on from the Day of its Date, yet the same Reasons subsist for soliciting its Acceptance as occurred then.

And there having been formerly many Disputes about the Time of Bills falling due that were drawn payable at *Ufance*, double *Ufance*, &c. the King by this Ordinance has regulated it for the future, by making *Ufance* to be thirty Days, whether the Months have more or less in them, the thirty Days to be counted from the Day the Bill is dated, and not to be demanded till that succeeding the Expiration of the thirtieth, as has been observed in those Bills payable at so many Days Sight, and at a Day certain; but these Laws are only binding in *France*, on such Bills as are payable there, but not on those drawn from thence on other Countries, where different Usages and Customs are practised.

The fourth Sort of Terms of Bills, is, when Merchants draw them payable at *Lyons* in the Fair-Time, which they term Payment, and which they have four Times a Year, as has been before mentioned.

When Honesty reigned among the Merchants, these Bills payable in Payment at *Lyons*, were never accepted by Writing, he on whom they were drawn only said verbally, SEEN, and the Bearer noted it in his Book accordingly. The *Lyonnois* practised this for a long Time without any Accident; but Integrity became slack by the Corruption of the Times, and some Bankers having denied that Bills had been presented them, the Merchants for a greater Security now have them accepted in Writing.

It was necessary that the Bankers and Merchants of *Lyons*, to establish this Disposition in the Acceptations, and to restrain many other Abuses committed in their City, should seek a Remedy, and therefore they proposed a Regulation to the Governor; &c. thereof, the which was approved of, and allowed by an Arret of Council, and registered in the Parliament of *Paris* in the following Words, viz. "That the Acceptations of the said Bills of Exchange shall be made by Writing, dated and signed by those on whom they are drawn, or by Persons duly empowered by a Procuracion, of which the Minutes shall remain with the Notary; and all those which shall be made by Factors, Deputies, and others, not furnished with Procuracions, shall be null and of no Effect against him on whom they are drawn, save the Recourse against the Acceptor."

This Regulation, which was only for the City of *Lyons*, proved a sufficient Remedy for the Abuse that was committed by the Want of Acceptance to Bills; but this did not in any Shape remedy those arising from a conditional Acceptance in these Words, *Accepté pour repondre au Temps*, accepted to answer in Time, for this is the same as saying nothing, and is contrary to the publick Surety; because a Merchant of *Paris* or other Places, drawing a Bill of Exchange on his Correspondent at *Lyons*, who shall have no Effects of his in Hand, and who only accepting it with the Circumstance, *To answer in Time*, not being willing to advance for his Friend, when the Season of the Fair, or Payment is come, if Remises are made to him, he pays a Creditor with a Debt, if he has the Opportunity, or else the Contents of the Bill are discharged at the End of the Payment; but, if he has no Provision made him, he lets the Bill be protested; so that a Merchant who does not understand this Custom, and who has paid his Money three Months before, comes upon the Drawers or Bearers of Orders, who very often have failed in the mean Time; whereas if he on whom the Bill is drawn, accepts purely and simply when it is presented him, he in whose Favour it was, would have had immediate Security, and its Payment when fallen due.

And however suitable to the Interest of the *Lyonnois* this Practice might be, as they generally accepted without Effects in Hand, yet as it placed them on a different Footing from every other Trader in the Kingdom, it was judged but reasonable by other Merchants to find out a Method that should put them all on a Level, and oblige those of *Lyons* to a pure and simple Acceptation; but though this was observed by some considerable Bankers, who drew their Bills, or took them with the Insertion of such Words as would not admit of Evasion in the Acceptor, yet this did not answer the Intent, as many of *Lyons* would not accept the Draughts on them in any other Manner than that formerly mentioned; therefore to remedy the Inconvenience and Disorders which this occasioned in Trade, and to place all his Majesty's Subjects on a Level, he directed by his Ordinance, "That all Bills of Exchange shall be accepted by Writing purely and simply; abrogating the Custom of a verbal Acceptance, or by these Words, *Veu sans*

“ acceptor, seen without accepting, or accepted to answer in Time, and all other conditional Acceptations, which shall be deemed a Refusal, and the Bills may be protested.”

I mention those Circumstances, in which I think most *European* Nations are interested, as there is hardly one from whence a considerable Trade is not carried on with *Lyons*, either in the Commercial or Banking Way.

And though the happy Improvement of our own Silk Manufactures has very considerably lessened for some Years past, our trading Engagements with that powerful City, yet there still remains such an Intercourse, that the Knowledge of transacting Business there may occasionally concern many of my Readers.

I have now done with Bills of Exchange, and exerted my Endeavours to reduce every necessary Observation on them into as small a Compass as the Nature of the Subject would permit, consistent with rendering myself intelligible, and the Rules, I have laid down, clear and practicable; and though I might, without incurring an Imputation of Prolixity, have swelled a Discussion of this important Article into a Volume instead of a Chapter, I hope, I have left nothing unsaid that could contribute to my Purpose of clearing up every Difficulty which might arise to my Readers in their Exchanging Business; having carefully collected and communicated the Sentiments of the best Writers in all Languages on this Topick, so far as they were agreeable to that Experience which a long Practice in this Branch of Business has furnished me with; and I flatter myself that I shall not be accused of Vanity if I assert, that my Labours herein, and Endeavours to have every Section such as to stand the strictest Scrutiny, have by far exceeded those of other Writers that have gone before me, who either have superficially run over the Matter, or blindly propagated the Errors of one another, through Ignorance or Sloth, which I have studied to rectify, and I flatter myself with Success.

Before I treat of Arbitrations, I shall say something of *Brokers*, as a proper Appendage to the preceding Discourse, though they are not so much concerned in the Exchanges of Money and Bills as they were formerly; the Revolutions that happen in Commerce as well as Politicks, having thrown the greatest Part of that Business into the Hands of the Bankers in *London*, and in most of the capital Cities of *Europe*.

### Of Brokers.

**B**ROKERS are Persons sworn and authorised by the Magistracy of the Place where they act, and such are always regarded in Preference to others, who interfere in these Negotiations without being licensed; as Credit is given to the personal Evidence, and to the Books of sworn Brokers in all Courts of Justice, and out of Court, in all Cases of Arbitration or Compromise, though it is not admitted from the others; and in most Places, those who illegally exercise the Function, are fined for acting without Permission.

The Number of Sworn Brokers in *London* is unlimited; at *Amsterdam* there are three hundred and seventy-five *Christians*, and twenty-two *Jews*, acting in Trade and Exchanges; besides which, there are many who practise, as they do here, unsworn and unlicensed. The Number of these at *Amsterdam*, is more than double that of the *Sworn* Brokers, and they go by the Name of *Ambulatory* Brokers, and it is to be observed, that a Merchant runs great Risks in employing them, for in Case of Ligation, the Bargains and Contracts they have made are liable to be rendered null and void.

It is the Duty of Brokers to be *diligent, faithful, and secret*, whether their Dealings be in Exchange, or Purchases and Sales, as they are Mediators in all Negotiations; and those licenced may properly be called *Publick* ones, from the Nature of their Business, which leads them to a general Employ between Merchants, Traders, and Remitters. They are called at *Amsterdam*, as well as here, *Brokers, Courtiers* or *Mackelaers*, though on the Coasts of *Provence*, and

up the *Levant*, they are termed *Cenſur*: and at *Paris*, the Exchange Brokers have, for about a Century paſt, barter'd this Appellation for that of Agents; and to render the Office yet more honourable, about fifty Years ago the Quality of King's Counſellor was added to it, though the Buſineſs is the ſame, however the Denomination may differ.

Thoſe who exerciſe the Function of Brokers ought to be Men of Honour, and capable of their Buſineſs; and the more ſo, as both the Credit and Fortune of thoſe that employ them may in ſome Meaſure be ſaid to be in their Hands, and therefore they ſhould avoid Babbling, and be prudent in their Office; which conſiſts in one ſole Point, that is, to hear all, and ſay Nothing; ſo that they ought never to ſpeak of the Negotiations tranſacted by Means of their Invention, or relate any ill Report, which they may have heard againſt a Drawer, nor offer his Bill to thoſe who have ſpread it.

Before offering any Bills of Exchange, which a Broker is commiſſioned about, he ought to aſk the Perſon he applies to, whether he wants Bills for ſuch a Place, or hath Money to diſpoſe of? and if the Merchant queries whoſe the Bills are which he has to negotiate, he ought not to inform him, till his Reply lets him know whether he wants any or not.

When a Merchant has diſcovered his Intentions to draw, or that he has Bills to negotiate, the Broker ſhould offer them, purely and ſimply, without any Exaggeration in their Favour or Diſfavour; and if he to whom they are propoſed refuſes them, with ſaying they do not ſuit him, it would be not only improper, but impertinent in the Broker, to aſk the Reaſon of ſuch a Refuſal, and the Height of Imprudence in him to amplify their Goodneſs, or the Solvency of their Owner, in Order to induce the Refuſer to change his Intentions, and take them; on the contrary; he ought to take Care never to deceive the contracting Parties, but to be ſincere in all his Actions, without uſing any Artifice to attain his purpoſed End in his Negotiations; and above all, he ſhould avoid offering Things for which he has no Authority, as he may be taken at his Word, and have the Negotiation remain for his own Account, to his no ſmall Diſadvantage, if known, both of Purſe and Credit; and the ſame may happen in Purchaſes and Sales, as in Exchanges.

A Broker ſhould take Care in making an Agreement between two Perſons, to be well aſſured of the Place to be drawn on, and when it is; where there is a ſettled Uſance, he has Nothing to treat of but the Price; though, in Caſe the Parties agree on an Exchange for a Place where the Time of the Bill's Running is uncertain, that of Payment muſt be fixed, with every other Requiſite to conclude the Bargain.

When a Broker has adjusted a Remittance, he muſt enquire of the Remitter to whom he will have the Bills payable, and ſhould always carry ſome Slips of Paper on a Poſt-Day in his Pocket, on which to note it, as alſo the Sum agreed for, the Time of Payment, to whom payable, from whom the Value is to be received, at what Price the Exchange was concluded, and the Day it was agreed on, which Memorandum he muſt give the Drawer, and enter a Duplicate thereof in his Book, that may ſerve as a Teſtimonial, in Caſe of any Diſpute between the contracting Parties.

It is the Broker's Obligation to call for the Bills, and carry them in Time to the Remitter, though this is a good Deal out of Uſe in this great Metropolis, where the Merchant commonly ſends a Clerk with them, to leſſen the Broker's Trouble.

A prudent Merchant will never attach himſelf entirely to one Broker for fixing the Price of the Exchange, nor will prefer one to another in the Execution of his Commiſſion, either though Favour or Friendſhip, but he who offers the moſt beneficial Terms ſhould be the Agent on that Occaſion; and by ſuch Behaviour he diſobliges Nobody, but rather ſtimulates an Emulation in them to procure his Advantage.

It is a great Fault in a Merchant whoſe Credit is not well eſtabliſhed, when he has a Mind to draw, to make Uſe of a Broker who is but young in, or ignorant of his Buſineſs; and he who draws in Virtue of a Letter of Attorney

for another's Account is obliged to declare it to the Broker, who must in Consequence contract in the Name of the Constituent, and not in his who gave the Order.

An Exchange once concluded with the Broker, or by his Mediation, ought to be carried into Execution; as it is both unfair and illegal for either the Drawer or Remitter to retract their Words given. And if a Broker concludes any Thing either without or exceeding Orders, more especially at an inferior Price, the Merchant has just Reason to resent it, though the Broker offers Satisfaction, as his Credit is concerned, and may be hurt beyond a Possibility of Reparation.

The Bills of young Beginners may be offered by a Broker, but if he frequently tenders such as are notoriously in Disrepute, he must greatly suffer in his Reputation; more especially if he takes on him to recommend them; and if he submits to be employed by one he knows to be insolvent, or near being so, and endeavours to draw or remit for him, when certain that his Bills will not be answered, or he as a Remitter not comply with his Engagements, he ought to be severely punished for his Knavery; and his being deprived of any future Business is the least he can expect, though the Punishment is not adequate to his Deserts.

A Broker should never ask more, nor admit less, than what the Law and Custom allows him; this for Exchanges in London is always one *per Mil.* for each of the Parties concerned, though on Purchases or Sales *per Cent.* and at Amsterdam the Tariff is settled at three Stivers for a hundred Guilders, the Half payable by the Drawer, and the other Moiety by the Remitter, as follows, *viz.*

	<i>l. s. d.</i>
A thousand Ducats on <i>Venice</i>	4 0 0
A thousand Dollars on <i>Genoa</i> or <i>Leghorn</i>	4 0 0
A thousand Ducats on <i>Madrid</i> , or any other Part of <i>Spain</i>	4 0 0
A thousand Cruzados on <i>Lisbon</i> , or any other Part of <i>Portugal</i>	4 0 0
A hundred Pounds Sterling on <i>London</i> , or any other Part of <i>England, Scotland, or Ireland</i>	1 10 0
A thousand Crowns on <i>Paris</i> , or any other Part of <i>France</i>	1 10 0
<i>Though when the Exchange was very high, Brokerage was in Proportion, and formerly Guild. 4. 10 St. were paid on negotiating the thousand Crowns.</i>	
A thousand Rixdales on <i>Francfort, Leipzick, or Breslaw</i>	3 10 0
A hundred Livres de Gros, or six hundred Guilders, on <i>Dantzick, Koningsberg, Anvers, Lisse, and all Flanders and Brabant</i>	0 18 0
A thousand Daelders on <i>Hamburg</i> , computed 1666 $\frac{1}{2}$ Guilders,	2 10 0
A thousand Guilders on <i>Rotterdam</i> , and other Parts of <i>Holland</i>	1 10 0
A thousand Guilders Bank Money changed into Current	1 0 0
A thousand Guilders of Gold changed into Silver, and <i>per contra</i>	1 0 0
Five hundred Livres de Gros for an <i>East-India</i> Action	6 0 0

And in Proportion on other Places of Exchange; not but that some Brokers impose on People they find ignorant of the above-mentioned Regulations and Customs, but this is a Fraud, which no honest Man will be guilty of.

At *Paris* Brokerage is  $\frac{1}{2}$  per Cent. and at *Lyon* forty Sols is commonly given for three thousand Livres *Tournois*, Half by the Taker and half by the Giver of the Bill; and at this last Place, any one is permitted to exercise the Function of a Broker, it being a free City.

At *Venice* Brokerage is  $\frac{1}{4}$  per Mil. at *Genoa*  $\frac{1}{2}$  per Cent at *Leghorn*  $\frac{1}{4}$  per Mil. at *Bologne* 1 Sol per hundred Crowns; and in all other Banking Cities according to what Government has settled.

What we have already advanced, is sufficient with Respect to the Transactions of Exchange Brokers in general, and to give an Idea of the Nature of their Business in foreign Countries, which is all that is necessary; for every Merchant travelling to or residing in any great mercantile City in *Europe* must make

make himself Master of the local Laws and Regulations of the Place with respect to Brokers, and act accordingly: for these are liable to vary with the Policy and Circumstances of every Country, and therefore all printed Treatises upon such Subjects may become obsolete and useless. But the same Reasons should oblige the BRITISH MERCHANT to study all the Laws and Regulations respecting Brokers in his own Country, on which Account we shall enter into a Detail on that Head, and give ample Information to the very Time of our Publication: What Alterations happen afterwards, it will be easy for him to add, and thereby to make this Treatise, the Standard for his Transactions with Brokers.

*Of Exchange and Stock Brokers in England.*

VARIOUS Classes of Brokers are comprehended under the general Title of EXCHANGE BROKERS, viz. Insurance Brokers, Ship Brokers, East-India Brokers, Stock Brokers, Auctioneers, &c. all of whom, if they transact Business within the Jurisdiction of the City of London, must be duly sworn and admitted to act as Brokers by the Lord-Mayor and Court of Aldermen, otherwise they are liable to a Fine and Suspension, upon Information given to the said Court, that they transact Business without being so duly admitted.

Having already treated of Exchange Brokers, in the limited Sense of that Title, we shall proceed to INSURANCE BROKERS, whose peculiar Business it is to bring together the Parties wanting to insure Ships and Merchandise from the Perils of the Sea, and the Insurers or Underwriters: to settle the Premium, to pay or receive the same for the Parties concerned, to fill up the Policies, attest them, &c. They are likewise often called upon to draw up Charter-Parties, particularly when they are to contain any special Conditions, as those Conditions often relate to, and are connected with the Insurance.

SHIP BROKERS are employed in buying and selling Ships and Cargoes, either by private Contract, or by public Sale, the latter is said to be by CANDLE, on Account of the Custom of lighting an Inch of Candle at these public Sales, and suffering the Bidders to bid no longer than till the Candle is burnt out, in other Respects they do not differ from common Auctions. In Time of War, the Business of Ship Brokers is considerably increased by the Sale of Prizes taken from the Enemy.

EAST INDIA BROKERS transact the Business by Commission of purchasing the Commodities sold at the Company's public Sales, and they are employed by the Wholesale Dealers in Linen, Silk, Teas, Spices, Drugs, China, &c.

STOCK BROKERS are Persons who confine their Transactions to the buying and selling of Property in the public Funds, and other public Securities for Money; and they are employed by the Proprietors or Holders of the said Securities. Of late Years, owing to the prodigious Increase of the funded Debt of the Nation, commonly called the STOCKS, they are become a very numerous and considerable Body, and have built, by Subscription, a Room near the Bank, wherein they meet to transact Business with their Principals and with each other, and to prepare and settle their Proceedings before they go to the Transfer-Offices at the Bank, the South-Sea and India-Houses, thereby preventing a great deal of Confusion at the public Offices, where the Concourse of People is so great during the Hours of transferring Stock, that if the Business was not prepared before-hand, it would be impossible to transact it within the given Time.

But if the Business of Stock Brokers, was confined solely to buying and selling the real Property of their Employers in the Funds, there would not be Half the Number that now follow this Profession. It is therefore necessary to take Notice that the Interest which Foreigners have in our Funds, particularly the DUTCH, gave rise to Time Bargains, that is to say, to Contracts for purchasing and selling any Quantity of Stock to be delivered or adjusted at a future Time. The usual Times for which Bargains, founded on real Property, and intended to be settled *bona fide*, were made, were from three Months to three Months, four

\* Every Man his  
Art and Mystery of  
Religion, 1791.

Times within the Year, viz. in *February, May, August, and November*; and these Periods of settling the Accounts of such Time Bargains were called the *RESCOUNTERS*, from a *Dutch* mercantile Term for adjusting Accounts Current between Merchant and Merchant. The Impossibility of ascertaining whether the Commissions from Abroad given by Letters from Foreigners, or by their Correspondents here, to Brokers to buy and sell Stocks for Time, were founded upon real Property or not, gave Birth to *Stock-jobbing*, or Dealing in the Funds upon Speculation, and the Persons that play at this Game, for Gaming it is of the first Magnitude, whether Principals or Brokers, are called *Stock-jobbers*.

They purchase or sell for a given Time, frequently without being possessed of any Property in the Funds they bargain for, merely upon Speculation. For instance: A. imagines that a Peace, or some other advantageous national Event will raise the Price of any given Fund within the Space of three Months considerably above the Price of the Day on which he makes his Time Bargain: On this Principle he gives his Broker Orders to buy a large Quantity to be taken and paid for three Months from that Date; when the Time expires, if the Stock has risen according to his Expectation, instead of taking it, for probably it has been bought of a Person who had it not to deliver, he receives from the Broker the Difference in Money, between the Price on the Day the Bargain was made, and the Price at the Expiration of the three Months, and this is his Profit: If, on the contrary, the Stock has fallen below the Price of the Day on which he purchased for three Months, he must pay the Difference, and this will be a losing Account. It is computed that the Bargains on *Stock-jobbing* Accounts made in the Course of a Year, exceed by many Millions, the Transfers made at the Books of real Property, and the Conclusion is apparent, that great Fortunes are made and lost by *Stock-jobbing*. It is to be observed likewise, that the Brokers job for their own Account, which occasions frequently Failures at the *Stock-Exchange*.

The whole Business of *Stock-jobbing* being contrary to Law, and many Persons acting as Brokers therein, who have never been admitted as Exchange Brokers by the Lord-Mayor and Court of Aldermen, it is our Duty, in the next Place to give the Form of Admission of regular Brokers, the Regulations to which they are subject, and Abstracts of the Laws in Force concerning them, and *Stock-jobbing*; after which, if any further Information is wanting, we must beg Leave to refer the Reader to a well-known Treatise on the Funds, entitled, *Every Man his own Broker*\*, as it would far exceed our Limits, and go beyond the Plan of this Work, to discuss the whole Art and Mystery of *Stock-jobbing*.

All Persons, who shall act as Brokers within *London*, shall be admitted by the Court of Mayor and Aldermen, under such Directions for their good Behaviour as the Court shall think fit; and shall, upon their Admission, pay to the Chamberlain *forty Shillings*; and shall also Yearly pay *forty Shillings* upon the 29th of *September*, for the Use of the Mayor and Commonality and Citizens of the City of *London*.

The principal Regulations established by the said Court, in Virtue of the Powers vested in them by the said Statute are,

That every Broker upon his Admission is solemnly sworn, truly and faithfully to execute and perform the Office and Employment of a Broker between Party and Party, in all Things appertaining to the Duty of the said Office and Employment, without Fraud or Collusion; to the best of his Skill and Knowledge.

That he do enter into a personal Bond, under the Penalty of five hundred Pounds, the Condition of which Bond recites the Duties sworn to in the Oath of Admission, which, if well and truly performed, then the Obligation is void, otherwise it remains in full Force.

A Silver

\* *Every Man his own Broker*; or, A Guide to Exchange-Alley, explaining the Nature of the Funds, the Art and Mystery of *Stock-jobbing*, &c. by T. Mortimer, Esq. the Eleventh Edition, *London*, printed for *Robinson*, 1791.

A Silver Medal is likewise delivered to him, having the King's Arms on one Side, and the Arms of the City of London on the Reverse, with the Broker's Name, and he is ordered to produce the same upon every Occasion, when he is required to shew his Qualification.

6 Ann. C. 16.  
Sect. 5.

If any Person shall take upon him to act as a Broker, or employ any under him to act as such within the said City, not being admitted, every such Person shall forfeit to the Mayor and Commonalty, &c. for every Offence Twenty-five Pounds, to be recovered by Action of Debt in the Name of the Chamberlain, in any of her Majesty's Courts of Record.

Sect. 10.

Every Person employed as a Broker, Solicitor, or otherwise, in behalf of any other Person, to make any Bargain, or contract for the buying or selling of any Tallies, Orders, &c. or Interest in any joint Stock erected by Act of Parliament, or Letters Patent, or Bonds of any Company thereby erected, who shall take any Money or Reward exceeding *two Shillings and Sixpence* for every hundred Pounds, and so in Proportion, for his Service in soliciting or procuring such Contract or Bargain, shall forfeit *Twenty Pounds* with Costs, to such Person as will sue for the same in any of her Majesty's Courts of Record at *Westminster*.

7 Geo. II.  
C. 8. S. 1.

All Contracts upon which any Premium shall be given for Liberty to put upon, deliver, accept, or refuse, any public Stock or Securities, and all Wagers, Puts, and Refusals, relating to the present or future Stock or Securities, shall be void: and all Premiums upon such Contracts or Wagers shall be restored to the Person who shall pay the same, who shall be at Liberty, within six Months from the Making of such Contract, or laying such Wager, to sue for the same, with double Costs; and it shall be sufficient for the Plaintiff to allege, that the Defendant is indebted to the Plaintiff, or has received to the Plaintiff's Use, the Money or Premium so paid, whereby the Plaintiff's Action accrued according to the Form of this Statute, without setting forth the special Matter.

Sect. 2.

Persons, who by this Act shall be liable to be sued, shall also be obliged to answer upon Oath such Bill as shall be preferred against them in Equity, for discovering any such Contract or Wager, and the Premium given.

Sect. 4.

Every Person who shall make any such Contract, upon which any Premium shall be given for Liberty to put upon, deliver, accept, or refuse any public Stock or Securities, or any Contract in the Nature of Puts and Refusals, or shall lay any Wager, except such who shall *bona fide* sue, and with Effect prosecute, for the Recovery of the Premium paid by them, and also except such as shall discover such Actions in any Court of Equity, shall forfeit *Five hundred Pounds*. And all Persons negotiating or writing such Contracts, shall likewise forfeit *Five hundred Pounds*, which Penalties may be recovered by Action of Debt or Information, in any of his Majesty's Courts of Record at *Westminster*; one Moiety to his Majesty, and the other Moiety to them who shall sue for the same.

Sect. 5.

No Money or other Consideration shall be voluntarily given or received for the compounding any Difference, for the not delivering or receiving any public Stock or Securities, but all such Contracts shall be specially executed; and all Persons who shall voluntarily compound such Difference, shall forfeit *One hundred Pounds*, one Moiety to his Majesty, and the other Moiety to them who shall sue for the same.

Sect. 6.

No Person who shall sell Stock to be delivered and paid for on a certain Day, and which is refused and neglected to be paid for, shall be obliged to transfer the same; but it shall be lawful for such Persons to sell such Stock to any other, and to receive or recover from the Person who first contracted for the same, the Damage which shall be sustained.

Sect. 7.

It shall be lawful for any Person, who shall buy Stock to be accepted and paid for on a future Day, and which shall be refused or neglected to be transferred; to buy the like Quantity of such Stock of any other Person, at the current Market Price, and to recover and receive from the Person who first contracted to deliver the same, the Damages sustained.

All Contracts which shall be made for the buying or transferring of Stocks, Geo. II, C. 8. S. 2 whereof the Person on whose Behalf the Contract shall be made to transfer the same, shall not, at the Time of making such Contract, be actually possessed in his own Right, or in the Name of Trustees, shall be void: and every Person on whose Behalf, and with whose Consent any Contract shall be made to sell Stock, whereof such Person shall not be actually possessed in his own Name or in the Name of Trustees, shall forfeit *Five hundred Pounds*, one Moiety to his Majesty, and the other Moiety to them who shall sue for the same; and every Broker, or Agent, who shall negotiate any such Contract, and shall know that the Person, on whose Behalf such Contract shall be made, is not possessed of Stock, shall forfeit *One hundred Pounds*, one Moiety to his Majesty, and the other Moiety to them who shall sue for the same.

Every Person receiving Brokerage in the buying and disposing of Stocks, Sec. 9. shall keep a Broker's Book, in which he shall enter all Contracts, with the Names of the principal Parties; and such Broker, who shall not keep such Book, or shall wilfully omit to enter any such Contracts, shall forfeit *Fifty Pounds*, one Moiety to his Majesty, and the other Moiety to them who shall sue for the same.

Nothing in this Act shall extend to any Contracts for the Purchase or Sale of Sec. 10. Stock, to be made with the Privity of the Accountant General of the Court of Chancery, in Pursuance of any Decree or Order of the said Court.

Nothing in this Act shall hinder any Person from lending Money on Stock, so Sec. 11. as no Premium be paid more than legal Interest.

The above Act was made perpetual by 10 *Geo. II. C. 8.*

It was hardly possible to frame an Act, better calculated to suppress the pernicious Practice of Stock-jobbing; yet it is shamefully violated, and that daily, with Impunity, justifying the Remark made by Foreigners, "That we have the best Laws of any Nation in the World, and the worst executed." However, the Merchant and the nonied Man may learn one useful Lesson from attending to the Regulations concerning Brokers, and the Statute against Stock-jobbing, which is, that he can have no Remedy whatever for any Fraud or Collusion, unless he employs a licensed Broker. And that he may know which are licensed, he need not have Recourse to a Sight of the Silver Medal, a List of the admitted Brokers being annually printed by Order of the Lord-Mayor and Court of Aldermen, which is hung up in one of the Walks of the *Royal Exchange*, and in *Guildball* and at most of the reputable Coffee-houses near the Exchange.

### *Of the Par of Monies.*

**M**OST of what has hitherto been written concerning the Par of Coin is obscure and confused: the greatest Part of the Authors who have published any Thing about it give the Par of Monies no longer current; however it is a Thing not over difficult, as it only consists in making the Comparison between the intrinsic Value of the Gold and Silver Coins of each Country, and the Price they pass current at; it is therefore necessary that the exact Weight and Standard of such Monies be first known. The celebrated Sir *Isaac Newton* published a Tract of the Standard of foreign Coins, which was printed at the End of Mr. *Arbutnot's* Work; but so many Alterations have since been made in the Monies of *France*, *Spain*, and some other Countries, that it is necessary to examine the last Arrets that have been published about them to clear up this Particular. As for Example: The King of *Spain*, by a Royal Decree, raised the Pistole from thirty-two to thirty-six Rials of Plate, and by a subsequent Decree, it was ordained that the Dollars should be current in his Dominions at nine and  $\frac{1}{2}$  Rials instead of eight, which they passed at before, and these have since been raised to ten, and the Pistole to forty Rials: Which Observation might be extended to several other Species, but this would be both

tedious and useless, we shall therefore give such Examples only as will sufficiently and clearly demonstrate the Method by which all others may be found out.

*The Par of Gold Coin between London and Amsterdam.*

Of  $1\frac{1}{2}$  Mark of Gold of the Standard of 22 Carats are made in *England*  $44\frac{1}{2}$  Guineas, as Sir *Isaac Newton* demonstrated to the Lords of the Treasury on the 21st of *September*, 1717; each *Guinea* being then current at 21 Shillings and Sixpence Sterling, but since it has been lowered to 21 Shillings. At present 1000 new *Holland Ducats* weigh 14 Marks 1 Ounce and  $11\frac{1}{2}$  Engels; each Mark is of the Standard of 23 Carats and a little more than 7 Grains, from whence it follows, that there is as much pure Gold in 1000 Ducats as in  $451\frac{6}{7}$  Guineas. Commonly in the Payments that are made among the Citizens, a Ducat passes in *Holland* for 5 Guilders and 5 Stivers current Money, and according to this Proportion, an *English Guinea*, or 21 Shillings Sterling, is worth 11 Guilders and 12 Stivers current Money, of *Holland*; or 9480 $\frac{2}{7}$  Shillings Sterling are equal in Value to 5250 Guilders; or one Pound Sterling to about 36s. 11d. de Gros current Money; or if the Agio be reckoned at  $4\frac{1}{2}$  per Cent. it will be found very near 35s. 3d. de Gros Bank Money.

*The Par between London and Amsterdam of Silver Money.*

According to the afore-mentioned Report made by the said Sir *Isaac Newton*, in the Year 1717,  $11\frac{1}{10}$  Ounces of pure Silver, and  $\frac{2}{7}$  of an Ounce of Alloy made 62 Shillings Sterling; in *Holland* 200 Pieces of 3 Guilders weigh 25 Marks, 5 Ounces  $11\frac{1}{2}$  Engels, and are of the Standard of 11 Penny-weights; or in 1052 $\frac{1}{7}$  Shillings Sterling there is as much fine Silver as there is in the said 200 Pieces of 3 Guilders, and the Value of 20 Shillings Sterling in 1717, was near to 38 Sch. current Money of *Holland*.

If the Comparison be made by Ducatons, or by *Holland Rixdales*, instead of 3 Guilder Pieces, it will be found very near the same Value; for if it be true, as I am informed, that 200 Ducatons weigh 26 Marks 3 Ounces 15 Engels, and their Standard is  $11\frac{1}{2}$  Pennyweight; and if 200 Rixdales weigh 22 Marks 6 $\frac{1}{2}$  Ounces of the Standard of 10 $\frac{1}{2}$  Pennyweight; when the 3 Guilder Pieces are fixed at 60 Stivers, the intrinsic Value of the Ducaton will be 63 Stivers 3 $\frac{1}{2}$  Deniers, and the Rixdale. 50 Stivers and almost 2 Deniers.

*The Par between France and Holland for the Gold Coin.*

A Mark of Gold Money, worth at present in *France* 720 Livres, is exactly 30 Louidors, and the Standard 21 Carats 7 or 7 $\frac{1}{4}$  Grains, we will take the Medium when, at 21 Carats 7 $\frac{1}{4}$  Grains, each Louidor ought to weigh 5 $\frac{1}{4}$  Engels; those coined in the Year 1731 weigh 5 Engels and 10 Axen, which we may deem the true Weight. In 1000 *Holland Ducats* there is then as much pure Gold as in 466 $\frac{2}{3}$  Louidors. If the Ducat is counted at 5 Guilders 5 Stivers current Money, a Louidor, or 24 Livres *French*, is worth of *Dutch* Money 11 Guilders 5 Stivers, and the 3 Livre Crown almost 56 $\frac{1}{2}$  de Gros current Money; or 64 *French Livres* were, in 1731, of an equal Value with 30 *Dutch* current Guilders, and 16 *French Crowns* of 6 Livres are at a Par with 15 three Guilder Pieces; or 30 Ducats of *Holland* are worth 14 Louidors. The Proportions I here give are sufficiently exact; for if 1000 current Guilders are reduced into *French* Money, there will be found by the said Proportions only  $\frac{1}{3}$  of a Louidor, or  $\frac{1}{7}$  of a *French Livre*, less than by the intrinsic Value;  $\frac{1}{7}$  of a *French Livre* are  $\frac{1}{3}$  of a Guilder.

If the Agio of  $\frac{1}{4}$  per Cent. upon the Bank Money be taken, the Value of 3 *French Livres* will be a small Matter less than 53 $\frac{1}{2}$  de Gros Bank Money.

The Weight of 1000 Louidors of the Sun is 33 Marks, 1 Ounce of the Standard of 21 Carats, 7 Grains, *Koophandel van Amsterdam, 2de Deel, pag. 111. ed.*

*The Par between France and Holland of the Silver Money.*

The King of *France*, by an Arret of the 25th of *May* 1726, fixed the Mark of Silver Money at 49 Livres 16 Stivers, and since that Time, I believe no Alteration has been made, the Standard is almost 11 Pennyweights, and that of the ancient Crown of 9 to the Mark was of 10 Pennyweights and 22 Grains, *Traité des Changes Etrangers, par Mr. Dernis, Paris 1726.* At present in *France* there are 6 Livre Crowns of  $8\frac{1}{2}$  to the Mark, and it is said that the Standard is 11 Pennyweights. In making the Calculation it will be found, that in 200 three Guilaer Pieces there is as much pure Silver as in  $213\frac{3}{4}$  French Crowns of 6 Livres, or each of these Crowns is worth pretty near  $56\frac{1}{2}$  Stivers current Money of *Holland*; this is very near the same Value which we have found in the Gold.

The Silver Pieces of 24 Sols, coined in *France* 1726 and 1727, only weigh  $3\frac{1}{2}$  Engels, and the Value in *Dutch* Money is  $10\frac{1}{2}$  current Stivers.

Almost all Authors who have treated of a Par, have taken for a Foundation that the ancient Crown of 3 Livres or of 9 in a Mark, by the Arret of the 16th of September, 1666, Mr. Dernis, Pag. 4. was worth 100d. de Gros of *Holland*, or that the Mark of 11 Pennyweights French Money was worth 22 Guilders 10 Stivers; but at present by the Pieces of 3 Guilders the Value of the said Mark is found to be 23 Guilders 7 Stivers, or that of a Crown of 3 Livres  $103\frac{1}{2}$ d. de Gros current Money; upon which Footing the Calculation may be made in the present Time; for it should be stated by the Rule of Three inverted; if, when the Mark of Money is fixed at 27 Livres, the Par is  $103\frac{1}{2}$ d. de Gros, how much will the Par be if the Mark is worth  $49\frac{1}{2}$ . But it is easier to make the Calculation by the Crowns, because it is found at present that there are  $16\frac{1}{2}$  Crowns, of 3 Livres in a Mark; so it is said if  $16\frac{1}{2}$  Crowns are worth 23 Guilders and 7 Stivers current *Dutch* Money, how much shall one Crown be worth; and it will be found as aforesaid, a little more than  $56\frac{1}{2}$ d. de Gros. In the Beginning of the Year 1726 the Par was at  $67\frac{1}{2}$ d. de Gros; it may be seen then, that it is very easy to find the Par, whether the King of *France* rises or falls the Price of the Coin. In Case that it changes not only the Weight but the Standard, the direct Rule of Three ought to be stated by saying, The ancient Standard is to the Par that is found, as the new Standard is to the Par sought for.

*The Par between Lisbon and Amsterdam for the Gold Coin.*

By an Ordinance of Mons. the Count de *Daun*, it is seen, that the old Louidor of *France* weighed at *Milan* 5 Pennyweights and 12 Grains, and the Cruzado of *Lisbon* 8 Pennyweights and 18 Grains; 1000 of the said Louidors weighed in *Holland* 21 Marks 1 Ounce and 15 Engels, or each Louidor 4 Engels  $11\frac{1}{2}$  Azen; according to this Proportion, the Cruzado ought to weigh 6 Engels  $29\frac{1}{2}$  Azen; if the Standard is reckoned, with Sir *Jhuac Newton*, at 21 Carats 7 Grains, as the ancient Pistoles of *Spain* and *France* were, *Koophandel van Amsterdam, 2de Deel, Pag. 111 and 831*, there will be found as much pure Gold in  $358\frac{1}{2}$  Cruzados as in 1000 Ducats of *Holland*; and putting the Ducat at 5 Guilders and 5 Stivers, the Value of a Cruzado will be 14 Guilders 13 Stivers and 1 Denier current Money; and because the Cruzado passes at *Lisbon* for 4800 Reis, 400 Reis are worth  $48\frac{1}{2}$ d. de Gros current Money, or a little more than  $46\frac{1}{2}$ d. de Gros Bank Money, if the Agio be taken at 5 per Cent. or  $47$ d. de Gros, if the Cruzado weigh 7 Engels, as it is commonly reckoned. This may be done by a yet shorter Method; for by the Ducat it is found, that a Mark of the said Cruzados is worth in *Holland* 338 Guilders 9 Stivers; and it is said, if 160 Engels are worth 338 Guilders 9 Stivers, how much shall 7 Engels and  $29\frac{1}{2}$  Azen be worth? In a Book printed at Amsterdam, 1630, intitled

titled, Sleutel des Koopmans, Pag. 318, it is said that the Par is  $63 \frac{1}{3} d.$  de Gros.

*A new Method to avoid the great Fractions.*

In calculating the Par, or in making the Comparifon between Coins, great Fractions frequently intervene. As for Example: We have found in 210  $\frac{1}{2}$  English Crowns of 5 Shillings Sterling, as much pure Silver as in 213  $\frac{1}{3}$  French Crowns of 6 Livres, or 1 Crown of 6 Livres has as much fine Silver as  $\frac{210 \times 5}{213}$  of an English one of 5 Shillings, but the working of this with fo great a Fraction being very troublefome, it may be changed for a lefs Fraction that fhall be almoft of the fame Value, which may be expreffed as in the following Problem,

PROBLEM.

A great Fraction being given to find another, whereof the Denominator is lefs than a certain Number given, fo that the Value of the Fraction that has been found, is the neareft that can be to that given.

I change the Fraction given into another whose Numerator is Unity, and I do the fame with the Fraction which is found in the Denominator, and fo on.

I neglect for a Moment the Fractions of Fractions that are found at the End, and by that will be had all familiar Fractions, which are alternatively the one too big and the other too little, as may be feen in the fubfequent Example.

The Fraction given being  $\frac{210}{213}$ , it is demanded which is the Fraction moft like it whose Denominator is lefs than 100.

But as I think our Author's Solution of his Problem is neither fo correct nor clear as it fhould be, I have attempted to make it plainer and more exact, though before I proceed to the Operation, it will be neceffary to premife the following Lemma.

To find a Denominator to a given Numerator which fhall make it the neareft Fraction to a larger Fraction before given, let the firft given Fraction be denoted by  $\frac{n}{d}$ , and the Numerator to the new Fraction be  $a$ , and its Denomiuator  $x$ , then

we have  $\frac{a}{x} = \frac{n}{d}$  therefore  $nx = ad$  and  $x = \frac{ad}{n}$  which put into Words gives this

Rule.

Multiply the Numerator of the new Fraction into the Denominator of the large one, which then divide by the Numerator of the great Fraction, and you will have the Denominator you fought for your new Numerator: Now in Regard to the Problem, firft find the Fraction whose Numerator is Unity, that fhall be

equal to  $\frac{1}{213}$ , which by the foregoing Lemma will be expreffed  $\frac{1}{1 \times \frac{213}{210}} = \frac{1}{213 \frac{1}{210}}$

if now you reject from the Denominator, the Fraction of Fractions, there is  $\frac{1}{213}$  the neareft (though too great) to  $\frac{1}{213}$  when the Denominator muft not exceed 4. But as the Problem admits an higher one, we repeat the Operation, thus

$\frac{1}{2 \frac{1}{213 \frac{1}{210}}}$  where you only fubftitute for  $\frac{1}{213 \frac{1}{210}}$  its Value altered by the faid

Lemma to  $\frac{1}{213 \frac{1}{210}}$  and rejecting  $\frac{1}{213}$  we have  $\frac{1}{2 \frac{1}{213}} = \frac{2}{5}$  which is too great, but the neareft of any whose Denominator does not exceed 50, to the given Fraction; but the Work may be by the Condition of the Problem repeated again

$\frac{2}{5 \frac{1}{213}}$  and for  $\frac{1}{213 \frac{1}{210}}$  writing  $\frac{1}{213}$  found as before, we have  $\frac{2}{5 \frac{1}{213 \frac{1}{210}}}$  from

which leaving out  $\frac{1}{213}$ , there is  $\frac{2}{5 \frac{1}{213}} = \frac{2}{\frac{1}{213}} = \frac{2 \times 213}{51}$  which is too big, though it

is the Fraction sought: for if the Work be again repeated, you will have a Denominator which shall be 817.

N. B. It appears by Inspection that the higher the Denominator is, the near you approach to the Truth, for there is less omitted in the Denominator, so at last the Work would converge into the given Fraction.

Note also, that by the said Lemma you may find a Fraction of a given Denominator, which shall be nearest equal to a higher given Fraction; and as this is of a peculiar Use in fractional Works, I shall give the Rule it may be performed by.

Multiply the new Denominator into the Numerator of the first given Fraction, then divide by the great Denominator, and rejecting the Remainder as inconsiderable, your Quotient shall be your new Numerator. By this you may prove the foregoing Work, for if you chuse a Denominator 51 and would find a Numerator to make it nearest to  $\frac{1147}{7793}$ , then  $\frac{51 \times 3147}{7793}$  gives 20, as before found.

A Comparison of some COINS.

<i>London</i> 30 Guineas,	<i>Paris.</i> worth 31 Loidors	<i>French Mon.</i> 100l. St.	<i>French Mon.</i> less 21 $\frac{1}{2}$ Sols	<i>Crowns.</i> 1000 of 3 Liv.	<i>English Mon.</i> more 1 $\frac{1}{2}$ St.

Though Mr. Ricard has not explained the foregoing Tables, I have judged it necessary to do it, that they may thereby be rendered useful.

In the first Line, the 20 *English* Crowns are not worth quite 57 Guilders, therefore at that Rate 100l. Sterling must produce less than it would have done had the 100 Shillings and 57 Guilders been exactly equal, and for the same Reason must make something more Sterling Money; and to calculate the Deficiency of the Guilders, first find what Part of a Guilder  $\frac{1}{2}$  of a Stiver is, which is easily discovered to be  $\frac{1}{2}$  of  $\frac{1}{16}$ , or  $\frac{1}{32}$ , or  $\frac{1}{64}$ , and then the Stating will be,

As 100l. —  $\frac{1}{32}$  — 5l.  
Or as 20l. —  $\frac{1}{16}$  — 1l. to  $\frac{1}{64}$ .

Therefore the Guilders are only 56  $\frac{1}{64}$ . And by the same Reasoning, the true Differences of the 2d Line in the *first*, and of the third Line in the *second* Table may be discovered; but the others being of a different Nature; the Method for them may be demonstrated by the third Line in the *first* Table, where 76 *French* Crowns of 6 Livres are worth a little more than 375s. Sterling; therefore 100l. Ster. must accordingly make the *French* Money less, and to find the real Value of 456 Livres in Shillings Sterling, say,

Fr. Cro.	d.	Fr. Cro.
As 1000 of 3 Livres	— $3\frac{1}{2}$ or $\frac{11}{4}$ of a Shill.	— 76 of 6 Livres to the Sum sought.
3)3000	3	3)456
8)1000	125	8)152
	125	19
Then $\frac{13 \times 19}{125 \times 48} = \frac{247}{6000}$ which must be added to 375 Shillings to make the true Value of 456 Livres.		

*A Comparison between fine Gold and Silver.*

I shall not treat here of the Comparison made between Gold and Silver by the ancient *Greeks* and *Romans*, but commence my Account of it much nearer our own Times. *Agricola* \* says that a hundred Years before he wrote, or about 1440, one Part of pure Gold was given in *Germany* for thirteen similar Parts of pure Silver †. In the Year 1457, it was regarded as a settled Price, that had, notwithstanding the several Alterations in the Coins, subsisted for some Time; the giving 24 Pennings of *Landsberg* Money for a Guilder of the *Rhine* †, 100 of these Pennings weighing a Mark of *Erfurt*, the Standard was  $2\frac{1}{2}$  Pennyweights †; if the Mark of *Nuremberg* weighed at that Time 152 Engels †, the Mark of *Erfurt* would be about 149 Engels that Weight †, or the Guilder of the *Rhine*  $23\frac{1}{7}$  of fine Silver. In the Year 1461, the Mark of Silver at *Erfurt* contained  $7\frac{1}{7}$  *Rhenish* Guilders †, or the Value of the said Guilder a little less than  $21\frac{1}{7}$  Engels pure Silver. In the Year 1528, a Mark of fine Gold of *Nuremberg* was worth 95 Guilders of the *Rhine*, and a Mark of fine Silver a little more than  $8\frac{1}{2}$  Guilders of the *Rhine* called golden Ones not coined †; so that 11 Marks of pure Silver were worth one Mark of pure Gold. In the golden Guilder of the *Rhine* there were  $2\frac{1}{2}$  Engels that Weight, of fine Gold †, or the Guilder of the *Rhine* at that Time was esteemed as  $1\frac{1}{4}$  Ounce of pure Silver; from that Time to the present, the Price of Gold in Regard to that of Silver is augmented in these Parts, about  $\frac{1}{4}$ : An Author asserts, that in 1390, Gold, in Respect to Silver, had four Times less Value than in 1687 †, but the Error proceeded from this, that he made no Difference between the present *Holland* Guilder and the ancient one of the *Rhine*.

In 1717, the coined Silver in *England* was on such a Footing, that  $15\frac{1}{11}$  Marks of pure Silver was of the same Value with a Mark of pure Gold; in *France* 15 Marks of fine Silver was reckoned as a Mark of fine Gold; in *Holland*  $14\frac{1}{2}$  Marks; in the *East-Indies*, in some Places, 12 Marks; as in the Kingdom of *Siam* in 1688. *Description du dit Royaume par M. de la Loubere*, P. 221, *Amst.* 1770. And in *China* and *Japan* about 10 Marks. Supposing the Value of Silver to be settled, that of Gold it is seen was greater in *England* than elsewhere; Strangers made their Payments in that Metal; but because Silver was more valuable abroad, the *English* sent their's to Foreigners; and for this Reason the Silver Coin became so scarce at Home, as to occasion the diminishing the Value of the Guinea, by lowering it to 21 Shillings, as has been before observed; for by Trade, Gold and Silver would naturally pass from those Countries where their Value was less, to them where it was higher.

In 1000 *Dutch* Ducats there are 334 Carats  $9\frac{1}{2}$  Grains of pure Gold, and if these are worth 5250 Guilders, how much shall 24 Carats be worth? and the Answer will be 367 Guilders and 7 Stivers, the Value of a Mark of pure Gold in Coin. We have before found by the *Dutch* 3 Guilder Pieces that a Mark of 11 Pennyweights pure is worth 23 Guilders and 7 Stivers current Money; and the Mark of fine

12 Deniers.

Silver has been found worth a little less than 25 Guilders and  $9\frac{1}{2}$  Stivers. In the same Manner it is said, if 21 $\frac{1}{2}$  Carats of pure Gold are esteemed in France at 720 Livres, how much shall 24 Carats be worth? and, if 11 Pennyweights of fine Silver are worth 49 $\frac{1}{2}$  Livres, how much shall 12 Pennyweights be worth? By Division it will be found as follows; supposing that in the English Silver Coin there had been no Alteration made since 1717.

In  $\left\{ \begin{array}{l} \text{England 15 Marks 1 Ounce } 13\frac{1}{2} \text{ Engels,} \\ \text{France 14 Marks 5 Ounces } 13\frac{1}{2} \text{ Engels,} \\ \text{Holland 14 Marks 6 Ounces 4 Engels,} \end{array} \right\}$  fine Silver for 1 Mark of fine Gold.

From whence it is seen that Mr. *Dernis*, Page 2, and Mr. *Wiertz* are not exact, because they say, that the Proportion between pure Gold and Silver in *Holland* is fixed at 14 $\frac{1}{2}$ ; and it is also found in this last-mentioned Author, Pag. 491, that the Mark of fine Gold is fixed in *Holland* at 355 Guilders current Money, which is very true, but if the Value of a Ducat is taken to be 5 Guilders 5 Stivers, as it commonly passes, there is an Agio of 6 per Cent. in the Specie of Ducats; I know very well that these rise and fall a Trifle; but the Agio on Gold must not be neglected, otherwise the Ducat is never worth above 4 Guilders 19 Stivers.

This I think sufficient to give an Idea of the Par of Monies, and I shall finish it with an Instance of an arithmetical Question abbreviated, concerning *Spanish Wool*; as it is something curious, and may be instructive.

It is known to all concerned in that Trade, that the Wools of *Germany* and *Poland* are sold at *Amsterdam* with an Allowance of fifteen Months' Discount, and one per Cent. for prompt Payment; for which the Merchants deduct exactly a Tenth; and for those of *Spain* 24 lb. are always allowed for Tare on 175 lb. besides a Deduction of twenty-one Months' Discount, and one per Cent. for prompt Payment; and in Order to investigate a shorter Method for calculating these Abatements on the *Spanish Wools* than has hitherto been practised, without neglecting the Fraction which is often found in the Tare, our Author, Mr. *Samuel Ricard*, invented the following Rule.

Rule.

1st. Multiply the Pounds by the Price, and from the Product subtract a quarter Part, and the Remainder will be expressed by *A*.

2d. Take 1 per Mil. from *A*. and the 10th must be deducted; the Remainder will be *B*. The Difference of *A. B.* will be the Sum sought for, which will surpass the true Answer upon 11000 Guilders about half a Stiver.

3d. To correct this, there must be taken away from the Guilders of *B.*  $\frac{1}{4}$ . and subtract as many Deniers as there are of Guilders for the Remainder, and it will come to about 1 $\frac{1}{2}$  Denier too little on 1,000,000 Guilders' Worth of Wool.

Example.

It is demanded how much ought to be paid for some Bales of Wool, which weigh, after the Tare marked on the Bales is deducted, 9975 lb. Tare 24 lb. on 175 lb. and each lb. at 31 $\frac{1}{2}$  Stivers, with twenty-one Months' Discount, and one per Cent. for prompt Payment? The Answer is 11,772 Guilders, 6 Stivers, and 12 Deniers.

Monsieur de  
Traité des  
Arbitrages.  
M. J. P. Ri-  
card, le Né-  
gocié d'Amster-  
dam, P. 640.

**A**RBITRATION, a Construction of the French Word *Arbitrage*, in Exchanges, has been variously defined by the several Authors who have treated of it.

One says it is a Combination or Conjunction made of many Exchanges, to find out what Place is the most advantageous to remit or draw on.

Another describes it, by saying it is only the Foresight of a considerable Advantage which a Merchant shall receive from a Remittance or Draught, made on one Place preferably to another.

A third construes it to be a Truck which two Bankers mutually make of their Bills upon different Parts, at a conditional Price and Course of Exchange.

According to a fourth, it is the Negotiation of a Sum in Exchange, once or oftener repeated, on which a Person does not determine till after having examined by several Rules, which Method will turn best to Account.

And though these several Distinctions are couched in different Terms, they seem, if rightly considered, to have the same Meaning, whereof some may be counted the Text on which the others serve as Comments or Expositions.

Before any Person applies himself to the Study of this Subject, it is necessary that he should be well skilled in all the practical Operations, in Regard to the reducing of the Sterling Money of *England* into the foreign Monies of Exchange, and of Account of all Places of *Europe*, according to the direct Courses of Exchange established for these Purposes, and *vice versa*.

Also, that he should be acquainted with the Methods of converting Sterling Money into the Monies of Exchange, and of Account, of all other Places of Commerce, wherewith *England* has no direct established Courses of Exchange, but is under the Necessity of making Use of the intermediate Exchange of other Places : Together with the Nature of the *Agios*, and the Manner of converting their Bank Monies into Current, and the Reverse.

That he should be able to calculate the Par of all foreign Monies throughout *Europe* with those of every distinct Country, either according to the direct, or intermediate Exchange, which makes a much greater Variety of Cases, than those who are not thoroughly acquainted with this extensive Subject can imagine.

It is necessary likewise, as a preliminary to the Practice of Arbitration of Exchanges, to know the intrinsic Value of foreign Coins, according to the most accurate *Affays* which have been made for that Purpose.

Finally, it is requisite to understand the general natural Causes of the Rise and Fall of the Courses of Exchange between Nation and Nation, or between one trading City and another in the same Nation.

Arbitrations are divided by the Writers on them into Simple and Compound, of which I shall succinctly give some Examples, and endeavour, as plainly as I can, to illustrate such Rules for their Operation as may render it easy both to the Apprehension and Performance; my Predecessors having consigned me this Task by unamiably leaving the Solution of their Questions too much in the Dark to be comprehended by most of their Readers, as they have contented themselves with replying to the Queries, without shewing their Method of performing, and have thereby rendered abortive their pretended Design of conveying Instruction; which could no otherwise be done than by a Delivery of their Ideas and Conceptions in such a Manner as might leave them open, and easy to be followed and practised.

A Simple, or Single, *Arbitration*, is to be wrought by the Direct, or Inverted, Rule of Three; and to distinguish which of these Rules is to be used in working any Question relative thereto, it must be observed:

1. That an Arbitration must be cyphered by the direct Rule of Three when the *first* Term of Stating is more than the *third*, and that the Quotient is less than the middle Term. And,

2. This Rule must be used when the *first* Term is less than the *third*, and the Quotient is more than the middle one.

And the two following Remarks will shew when the Indirect, or Inverted Rule, is to be followed.

1st. The Question must be worked by the Inverted Rule of Three when the *first* Term is less than the *third*, and the Quotient less than the middle Number.

2d. The Operation must be by this Rule, when the *first* Term is more than the *third*, and the Quotient more than the middle Term.

And whether the Arbitrations be simple or compound, a Price of Exchange must always be supposed, when a Reimbursement is ordered on any other Place than that from whence it is directed.

Whatsoever Number of Figures enter into a compound Arbitration Question, the first and last must be of the same Species, and the Rules must be commenced by the Species sought for.

These Maxims being well understood, and applied to the Examples, will facilitate the Operation of the Rules of Arbitration to those who pay any Attention to them.

And as the Use of some Characters instead of Words will considerably abbreviate the Work in the Solution of the subsequent Examples, I have employed them to this Purpose, and shall here explain them once for all.

× signifies multiplied by, as  $10 \times 54$ , is 10 multiplied by 54.

A Number above a Line, with another under it, specifies that the uppermost must be divided by that beneath, or the Numerator by the Denominator, from whence  $\frac{24 \times 67 \times 19}{15 \times 28 \times 12}$  signifies, that 24 multiplied by 67, multiplied by 19, must

be divided by 15 multiplied by 28, multiplied by 12; and  $\frac{54}{234\frac{11}{11}}$  denotes, that

54 is to be divided by 234, increased by  $\frac{11}{11}$ .

= signifies equal to, as  $10 = 5 \times 2 = 8 \times \frac{5}{4}$ .

This premised, I proceed to my proposed

FIRST EXAMPLE.

A. of Lyons orders B. of Cadiz to draw upon him at 76 Sols per Dollar, provided at the same Time he can remit him on London, at 42d. Sterling also per Dollar, but as B. drew at 75 $\frac{1}{2}$ , it is demanded at what Exchange he may remit on London to complete this Order; and this is answered by the Direct Rule of Three as follows:

6 K

If

82 : 6  
10 : 12 : 1

And the most compendious Method by abridging the Numbers I shall thus shew.

If  $\left. \begin{matrix} 64 \\ 374 \end{matrix} \right\}$  are equal to  $\left\{ \begin{matrix} 340 \text{ Mar.} \\ 100 \text{ Groots} \end{matrix} \right\} \left\{ \begin{matrix} 16 \text{ Sols} \\ 15 \text{ Mar} \end{matrix} \right\}$  must be equal to  $\left\{ \begin{matrix} 85 \text{ Maravadis.} \\ 4 \text{ Groots, then} \end{matrix} \right.$   
*Quest* 60 Sols as before. But to reduce the Work lower still, it appears that you may divide a Member on each Side of the last Equation by 4. and another on each Side also by 5, therefore feu will have 4 Sols 17 Mar.

$\frac{3}{4}$  Mar. 1 Groot, wher  
 4 multiplied by 3 is in the same Ratio, or Proportion, to  $17 \times 1$  or 17; as  $64 \times 375$  is to  $340 \times 100$ . But as the Answer was found by multiplying 60 into the last Ratio (or  $\frac{340 \times 100}{64 \times 375}$ ) so it may be likewise had by multiplying the 60 into the foregoing Ratio, viz.  $\frac{17}{12}$  whence we have the Work brought into this final Com-

pass  $\frac{60 \times 17}{12}$ , which may be yet more contracted, as 60 and 12 are commenfurable

by 6, and will become  $\frac{10 \times 17}{2} = 85$ , the same as before. This well observed fully explains the Method for contracting the most extensive compound Arbitrations, as well as these simple ones. The Manner of stating the compound ones I shall give in another Place.

Fourth EXAMPLE.

B. of Amsterdam gives an Order to E. at Cadix, to remit on Hamburg at 124 Gros Lubs for 1 Ducat of 375 Maravadis, and to draw for him at 126 Groots de Gros for the said Ducat. It is demanded at what Price the Exchange will be between Amsterdam and Hamburg? Answer at  $32\frac{1}{7}$  Stivers per Daalder of 32s. Lubs.

For  $\frac{31}{114}$  Gros Lubs = 1 Ducat.  
 1 Ducat = 126 Groots of Amsterdam —  $8\frac{1}{2}$  Lubs.

$$\begin{array}{r} \frac{31}{114} 1008 (32\frac{1}{7} \text{ Answer.}) \\ \underline{93} \\ 78 \\ \underline{62} \\ 16 \end{array}$$

The four preceding Examples may suffice to shew the different Methods of Working by the Direct, Inverted, and Double Rule of Three; but those that follow being more complex, and their Operations more difficult to be reduced into as small a Cyphering as what has been just now done, and the common Practice shews, I have borrowed the Assistance of the following Tables from Mr. Samuel Richard, as he did the Principles of them from another, of which he himself gives the subsequent Account.

"It is some Years since, that Monsieur John Henry Lafosky delivered a Memorial into the late Duke of Orleans's Hands, then Regent of France, succeeded by a Second, presented by the Marquis de Grancey; in both which he offered to communicate to the Publick a very short and useful Method for calculating of Arbitrations, which he termed *The principa' Part of Arithmetick*; provided his Royal Highness would be pleased to appoint him Secretary to the

" Council

of 60 Sols,  
 per Dollar;  
 will than 488  
 to recom-  
 inverted Rule

Lyon, at 64  
 him at 1000.  
 Price the Ex-

= Groots.

And

" Council of Trade. In the mean Time, he kept the Demonstration of his Pro-  
 " blem a Secret, though with Offers to disclose it, if the Regent would conde-  
 " scend to grant him a private Audience. In the first Memorial there was a  
 " Fragment of three Tables for the Exchanges, between *France, Spain, and*  
 " *Holland*; and in the second there was also a Part of three other Tables, for the  
 " Exchanges of *Genoa, Lyons, and Venice*; but whether a Want of Friends or  
 " other Reasons impeded his Success, he never was able to obtain his Request.  
 " The Copy of these Memorials is fallen into our Hands, and we have disco-  
 " vered the true Foundation, not very difficult to be found out: I observe in this  
 " Method, 1<sup>st</sup>, That the Author from the over Care he took to hide the Origin  
 " of his Tables, fell into an Inconvenience, that induced him to alter or change  
 " his own Rule. 2<sup>dly</sup>, That it requires more Tables, and these greatly extended,  
 " to suffice for Use on the principal Places of Exchange. 3<sup>dly</sup>, If any one would  
 " calculate with Exactness, he cannot expect Profit and Loss in the same Table,  
 " and to remedy these Defects, we have composed the following Tables, which  
 " may serve for all Parts, that can be proposed, if the Trouble is only taken to  
 " put them into the Table Number IV. which is no ways difficult to be effected,  
 " and not to make a Secret of this Projection, we have placed the Numbers  
 " so clearly, that a Mathematician will immediately perceive the Source.  
 " Our Manner then is such, that all Persons may do it, without over much  
 " Attention, provided they are Masters only of the first four Rules of Arith-  
 " metick, and it will even suffice that they know Addition and Subtraction in  
 " entire Numbers. If any one is desirous of extending or making the Table  
 " Number I. greater, it is only necessary for him that makes the Calculation  
 " to have a Knowledge of the Coins used in Exchanges."

*A Rule for what is received, and for what is given.*

If the Money of the Place remitted to is fixed, and the Exchange varies in  
 that from whence the Remittance is made, then it must be written *given*; as for Ex-  
 ample, a Merchant at *Amsterdam* remits on *London, Paris, Cadix, &c.* in which  
 three last Places, the Coin is fixed, with Respect to the first; but if the Specie  
 of the Place remitting is fixed, and that the Exchange of those, where the Re-  
 mittance is made to, rises and falls, as from *Amsterdam* on *Dantzick, Coning-  
 bergb, &c.* it ought to be written *received*.

TABLE IV.

Amsterdam, Antwerp, Paris, &c.

Amsterdam and Antwerp. | Antwerp and Paris.  
Amsterdam and Paris. | Number fixed 6489.

If you take for Paris, London, Cadix, or Venice, this makes no Alteration, and the fixed Number shall be the same.

Amsterdam, Venice, and Lyons.

Amsterdam and Venice. | Amsterdam and Lyons.  
Venice and Lyons. | Number fixed 6489.

Amsterdam, Paris, and Hamburg.

First Case.

From Amsterdam on Hamburg and Paris.  
From Hamburg on Paris and Amsterdam.  
From Paris on Amsterdam and Hamburg.

Amsterdam and Hamburg. | Amsterdam and Paris.  
Hamburg and Paris. | Number fixed 1470.

This may serve likewise for Amsterdam, Hamburg, and Venice; but you must take half of the Deniers Lubs, which are given at Hamburg for a Ducat, and instead of Paris, you must read from Venice.

Second Case.

From Amsterdam on Paris and Hamburg.  
From Hamburg on Amsterdam and Paris.  
From Paris on Hamburg and Amsterdam.  
Amsterdam and Paris. | Amsterdam and Hamburg.  
Paris and Hamburg. | Number fixed 8250.

Amsterdam, London, Paris, &c.

Amsterdam and London | Number fixed 291.  
London and { Paris, | Paris,  
                  { Venice, | Venice,  
                  { Genoa, | Genoa,  
                  { Legborn. | Legborn. } and Amsterdam.

Amsterdam, London, and Spain.

Amsterdam and London. | Amsterdam and Spain.  
London and Spain. | Number fixed 1104.

Amsterdam,

But if and the f

That is must be re There no more t fitions.

Ber

Genoa,

For the 21 1/2.

*Amsterdam, London, and Lisbon.*

<i>Amsterdam and London.</i>		<i>Amsterdam and Lisbon.</i>
<i>London and Lisbon.</i>		Number fixed 4270.

*Amsterdam, Genoa, and Venice.*

<i>Amsterdam and Genoa.</i>		<i>Venice and Amsterdam.</i>
<i>Genoa and Venice.</i>		Number fixed 6454.

*Amsterdam, Dantzick, and Hamburg.*

<i>Amsterdam and <math>\frac{1}{4}</math> Dantzick.</i>		<i>Dantzick and Hamburg.</i>
<i>Amsterdam and Hamburg.</i>		Number fixed 2510.

*Amsterdam, Lisbon, and Lyons.*

<i>Amsterdam and Lisbon.</i>		<i>Lyons and Amsterdam.</i>
$\frac{1}{4}$ <i>Lisbon and Lyons.</i>		Number fixed 6489.

But if the Change from *Lisbon* on *Lyons* exceed 567 Reis, take  $\frac{1}{4}$  instead of  $\frac{1}{8}$ , and the fixed Number will be 3479.

*Amsterdam, Paris, and Spain.*

<i>Amsterdam and Paris.</i>		<i>Spain and Amsterdam.</i>
$\frac{1}{4}$ <i>from Paris and Spain.</i>		Number fixed 2876.

That is, whatever *French Livres* are given or received for a *Pistole* of *Spain* must be reduced into *Sols*, and the quarter Part taken.

There might be chosen many other Places, but to be short, we have taken no more than two particular Cases, which we have in the 7th and 8th Propositions.

*Berlin, Amsterdam, Genoa, Turin, Geneva, Frankfort, and London.*

<i>Berlin and Amsterdam.</i>		<i>Turin and Genoa.</i>
<i>Amsterdam and Genoa.</i>		<i>Geneva and Frankfort.</i>
<i>Turin and Geneva.</i>		<i>London and 10 Times Berlin.</i>
<i>Frankfort and London.</i>		Fixed Number 8193.
Provision.		
Profit.		

*Genoa, Venice, Florence, Leghorn, Novi, Milan, Amsterdam, and London.*

$\frac{1}{4}$ <i>of Leghorn and Novi.</i>		<i>Genoa and Venice.</i>
<i>Milan and Amsterdam.</i>		<i>Venice and Florence.</i>
<i>Amsterdam and London.</i>		<i>Florence and Leghorn.</i>
Provision.		$\frac{1}{4}$ <i>Milan and Novi.</i>
Profit.		Number fixed 9549.

For the Provision at  $\frac{1}{4}$  per Cent. the fixed Number is 14 $\frac{1}{2}$ ; and at  $\frac{1}{8}$  per Cent. 21 $\frac{1}{2}$ .

An Explanation of the Tables.

N<sup>o</sup>. II. is for London; N<sup>o</sup>. III. is for Hamburg; if the Exchange is found in the 8ths and 16ths: N<sup>o</sup>. I. is for all other Places; and for Hamburg when the Exchange is in Shillings,  $\frac{1}{4}$  Shillings, and  $\frac{1}{8}$  Shillings, N<sup>o</sup>. IV. serves to the Numbers that must be added together, viz. all those that are found on the same Side.

The 5th and 6th are for Profit and Loss. If it is found that the Sum of the Addition of the Side in which to find that given is less than the other Sum of the Side where what is received is, it must be sought for in the Table of Profit, N<sup>o</sup>. V. and when there is a Loss, in that of N<sup>o</sup>. VI. And that the Use which may be made of these Tables may the easier be comprehended, I shall here add some Examples.

First EXAMPLE.

A. of Amsterdam remits on London to B. at 34s. 5 $\frac{1}{2}$  Groats, what B. remits for the Account of A. to Cadix at 49 $\frac{1}{4}$ d. Sterling per Dollar. If the Merchant at Cadix remits the Produce on Amsterdam at 121 $\frac{1}{4}$  Grts. of Holland per Ducat of 375 Maravedis; it is demanded how much A. hath gained or lost exclusive of the Charges.

Solution by the Tables.

He gives  
 34s. 5 $\frac{1}{2}$  Grts. 2654  
 49 $\frac{1}{4}$ d. 3457  
 Fixed Number 1104  

---

 7215

He receives  
 121 $\frac{1}{4}$  7335  
 7215  

---

 120  
 2 $\frac{1}{4}$  per Cent. gained.

The Operation.

d, Maravedis.  
 If 49 $\frac{1}{4}$  Mar. 272  
 If 375 121 $\frac{1}{4}$  Grts.  

---

 2  
 243  

---

 2

d.  
 240 will give 1312 $\frac{1}{4}$  Maravedis.  
 1312 $\frac{1}{4}$   

---

 115 $\frac{1}{2}$   
 The frac  
 first Examp  
 Example, an

OF ARBITRATIONS OF EXCHANGE.

Now the 2d and 3d Terms multiplied, and divided by the first in the Order they now stand, will be expressed as follows :

$$\frac{243 \times 261120}{2 \times 199 \times 375}, \text{ which gives } 425 \text{ Groots.}$$

Now the Difference between 34r. 5 Gts.  $\frac{1}{2}$  and 425 Gts. is  $11 \frac{1}{2}$  Gts. therefore

$$\frac{11 \frac{1}{2} \text{ Gts.}}{34r. 5 \frac{1}{2} \text{ Gts.}} \times 100 = \frac{23}{827} \times 100 = 2 \frac{8}{10} \text{ nearly.}$$

By the Double Rule of three

d.	M.	d.	Groots.	Mar.
49 $\frac{1}{2}$	375	240	121 $\frac{1}{2}$	272
4			2	
<hr/>			<hr/>	
199			243	
<hr/>			<hr/>	
4			2	

You may now express the last three Terms divided by the first two, thus,  
 $\frac{240 \times 243 \times 272 \times 4}{199 \times 375 \times 2} = 425$ , as before.

Second EXAMPLE.

A. of Amsterdam remits to B. of Dantzick, at 276 Grofs of Poland, for one Livre of Grofs, the which B. remits on Hamburg at 115  $\frac{1}{2}$  Grofs for 1 48 Shillings Lubs; if Hamburg remits what it amounts to, to A, at 33  $\frac{1}{8}$  Stivres per Daalder of two Marks Lubs: it is demanded how much per Cent. A. has gained or lost, omitting the Charges.

Solution by the Tables.

A. gives 115 $\frac{1}{2}$	7115	A. receives	
N <sup>o</sup> . fixed 2510	<hr/>	$\frac{1}{2}$ 276 is 138	7888
	9625	33 $\frac{1}{8}$	1699
	<hr/>		<hr/>
	9587		9587

39 or  $\frac{1}{8}$  per Cent.

By the Rule of Three.

Grofs	Shillings Lubs	Grofs	
if 115 $\frac{1}{2}$	48	276 will give	114 $\frac{1}{7}$ , then
Shil. Lubs	Sti. of Amsterd.	S. Lubs	
If 32	33 $\frac{1}{8}$		114 $\frac{1}{7}$

This ordered according to the foregoing Example will produce 118  $\frac{9}{10}$  Stivres, which taken from the 120 Stivres first given, there remains 1  $\frac{1}{10}$  Stivres, therefore

S. S. S.  
as 120 — 1  $\frac{1}{10}$  — 100 to  $\frac{1}{10}$ , the Loss per Cent.

By the Double Rule of Three.

Grofs	S. L.	Grofs	Stivres of Amsterd.	S. L.
115 $\frac{1}{2}$	32	276	33 $\frac{1}{8}$	48

The fractional Terms being reduced into improper Fractions, as these in the first Example, the Operation then will be entirely similar to the last in the said Example, and gives 118  $\frac{9}{10}$  Stivres, as before.

6 M

Third

Now

Third EXAMPLE.

Two Persons *A.* and *B.* at *Paris*, have Occasion for Money at *Cadiz*; *A.* remits directly, and gives 18 Livres 3 Sols *per Spanish* Pistole; *B.* chuses the Way of *Holland*, and orders to be remitted him from *Amsterdam* at 121½ Groots for a Ducat of 375 Maravedis; *Amsterdam* reckons ½ *per Cent.* Charges, and draws for his Reimbursement at the Rate of 56½ Groots *per French* Crown of 60 Sols; it is demanded which of the two Methods proved most advantageous.

Answer; his who remitted directly.

Operation by the Tables.

<p><i>A.</i> gave 56½      3990          ½ of 36 Sols is 90 ½      6067  <hr style="width: 100%;"/>         10057</p>	<p><i>B.</i> gave 121½ Groots 7326          ½ <i>per Cent.</i>      22          Fixed Number      2876  <hr style="width: 100%;"/>         10224  <hr style="width: 100%;"/>         10057</p>
<p>Seek in Number VI. 167</p> <hr style="width: 100%;"/> <p>3¼ <i>per Cent.</i></p>	

Otherwise,

By reflecting on the Nature of the Question, it appears, that what *Amsterdam* reckons for Charges may be considered to increase the Number of Sols so much more than *B.* would otherwise have paid for the 375 Maravedis; therefore first say, if 100 — ½ — 60, or if 10 — ½ — 6, or if 5 — ½ — 3 must give ½, which *B.* must pay at *Amsterdam* for his Charges for every 60 Sols in the Value of the 375 Maravedis. But instead of finding the Sols *B.* must pay, excluding the Charges, and then computing the Charges, and adding them to the Sols last found for *B.*'s whole Payment, you may by Parity of Reason say,

	Groots	Sols	Groots
As 56½ —————	60½ —————	121½ —————	to 129 ¼ Sols paid by <i>B.</i>
for a Ducat.	Lastly, to compare whether <i>A.</i> or <i>B.</i> has succeeded best, say,	the Maravedis in a Pistole	Sols
If 18 — 3 —————	1088 —————	129 ¼ will give 387	
Maravedis, which <i>B.</i> would have got instead of 375, had he changed as <i>A.</i> did;	therefore it is manifest, that in receiving only 375 he had less than <i>A.</i> for the same	Sum of <i>Paris</i> Money by 14 Maravedis; and to make a Calculate <i>per Cent.</i> it will	
Mar.	Mar.		
be as 375 —————	to 14 —————	100 to 31½, the Answer.	

Fourth EXAMPLE.

A Merchant of *Hamburg* orders us to draw for his Account on *Dantzick*, at 270 Grots of *Poland* for 1 Livre de Grots, and to remit the Amount on *London* at 35 Schillings *per* Pound Sterling, or at other Rates which may be more advantageous for him, provided he can draw on *Dantzick* at 261 Grots of *Poland*; it is demanded at how much he ought to remit to follow the last Order? Answer, at 36 Schillings 2½ Grots.

Solution

Sch  
If 34

*Solution by the Tables.*

Take the Half of the Grofs of *Poland* according to the Order, and the Exchange will be 135 and 130½

Order } 135      7793  
           } 35 Schil. 2721

10514  
 130½ 7645

2869 this must be sought for in the Table for *London*; and the Schillings and Groots of Grofs, which correspond with this Number will be found to be 36 Schillings 2½ Groots.

*By the Rule of Three*

In this Question it is obvious that as the Grofs of *Poland* given for a Livre de Grofs decrease, the Schillings given for a Pound Sterling must proportionably increase, to follow the Condition of the last Order; hence the Question is an inverted one in the Rule of Three, and thus stated.

Grofs of *Poland*      Schilling 3s      Grofs of *Poland*  
 If 270 ————— 35      261, wherefore

$\frac{270 \times 35}{261}$  gives 36 Schillings, and the Remainder multiplied by 12 for Groots, and the next by 2, for half Groots, at each Time dividing by 261, brings out 2½ Groots nearly.

Fifth EXAMPLE.

There is an Order to *A.* of *Amsterdam* to draw on *Paris* at 53½ Groots per Crown, and remit on *London* at 34 Schillings 1 Groot per Pound Sterling, or at other Prices which might be as profitable to him who gave the Order. If they can draw at 56½ and remit at 34 Schillings 7½ Groots; it is demanded whether he can comply with this Commission, and how much this differs per Cent. Answer, our Correspondent receives more than he first ordered about 3 per Cent.

*Solution by the Tables.*

	S.	Groots
34 Schil. 1 Groot 2606	34	7½ 2675
56½ Pence      3990	53	7½ 3793

*A.* receives by the Exchange 6196 and by the Order 6468  
 6468

128 seek in the Table of Profit, and you

will find about 3 per Cent.

*By the Rule of Three.*

Groots	S. Groot	Groots Sch.	Groots	
As 53½	34	1	56½ to 35	8      the Rate at
which <i>A.</i> might remit per Pound Sterling to <i>London</i> , when he drew on <i>Paris</i> at				
56½ Groots per French Crown; but he only remitted at 34s. 7½ Gts. therefore				
in remitting this last Sum he gained 1 Schil. ½ Grt. the Difference between 35				
Schil. 8 Gts. and 34 Schil. 7½ Grts. and to find what that comes to per Cent, say,				
Sch.	Grts.	Grts.	Grts.	
If 34	7½	12½	100	will bring out the Answer.

Sixth

*Solution*

Sixth EXAMPLE.

There is an Order to draw on *Frankfort* 100 Rixdollars current Money of *Amsterdam* for 128½ Rixdollars of *Frankfort*, and to remit on *London* at 35 Schillings Bank Money per Pound Sterling, on Condition that the *Agio* shall be 5 per Cent. If after this our Correspondent writes to us, to omit executing his Order, if not already done, unless he receive 2 per Cent. more from *London* than he had ordered; If they can only draw on *Frankfort* at 135 Rixdollars that Money for 100 Rixdollars of *Amsterdam*, it is demanded, at how many Schillings the Remits must be made to follow the last Order? Answer, 34 Schillings 4½ Groots.

Solution by the Tables.

128½	7586	135	7793
5 per C.	212	2 per C.	86
35 Schil.	2721		
	10519		7879
	7879		

2640 This Number seek in the Table for *London*, and you will find 34 Schillings 4½ Groots correspond thereto.

For a different Solution, it is easy to conceive that when the *Agio* is high the less *Frankfort* Money is given for current Money of *Amsterdam*, the Exchange being by Banco Money, consequently the less Banco Money must be remitted to *London* per Pound Sterling; whence it is clear, that the Way to get 2 per Cent. from *London* by remitting at the same Rate as before, you must consider the *Agio* as so much less; therefore instead of 95, we have 97 Rixdollars Banco Money of *Amsterdam* for 128½ Rixdollars of *Frankfort*, at which Rate I find the Bank Money of *Amsterdam* equal to 135 Rixdollars of *Frankfort*; thus,

Rixd. of Frank.      Rixd. Banco of Amst.      Rixd. Frmk.

If 128½      97      135 will give  
 101½. But by the Question there are only 100; therefore the Remittance on *London* must be made accordingly less, by saying,

	Schil. Banco	Rixd.
As 101½	35	100 to the Sum sought
103		
306		
1017		
10476	Sch. Groots.	
	Now $\frac{35 \times 100 \times 100}{10476}$	will give 34 4½ the Answer.

Seventh EXAMPLE.

*T.* of *Berlin* remits for his proper Account to *U.* of *Amsterdam*, a certain Sum of Bank Money, at 133 Rixdollars for 100 Rixdollars Bank Money of *Amsterdam*, ordering him to remit the nett Produce to *A.* of *Genoa*; *U.* effects it at 96 Groots per Dollar of 5 *Genoese* Livres. *A.* on his Part remits this to *B.* who lives at *Turin*, at 128 Sols of *Piedmont* for one Crown of *Genoese* Money of 7½ Livres, who takes Bills on *Geneva* at 84 *Piedmont* Sols for one Crown current of *Geneva*, and remits them to *C.* who in his Turn remits the Amount on *Frankfort* to *D.* at 130 Rixdollars of *Frankfort* for 100 Crowns current of *Geneva*, who finally takes Bill at 132 Batz Money of *Frankfort* for one Pound Sterling, 1 Rixdollar at *Frankfort* makes 22½ Batz, the which he remits to *T.* himself: If the five Committioners, namely

OF ARBITRATIONS OF EXCHANGE.

namely, *U. A. B. C.* and *D.* deduct each  $\frac{1}{4}$  per Cent. for their Provision; it is demanded at what Rate the Exchange must be between *Berlin* and *London* so that *T.* gains 3 per Cent. Answer,  $6\frac{1}{4}$  Rixdollars per Pound Sterling.

*Solution by the Tables.*

	133	7728	128	7561
	96	6312	130	7628
	84	5732	Numb. fixed	8193
	132	7695		<hr/>
	$\frac{3}{4}$ per C.	128		23382
5 Provisions at $\frac{1}{4}$ per C. each	73			
	<hr/>			
	27668			
	<hr/>			
	23382			

4286 This sought in Table I. there will be found  $60\frac{1}{4}$ , wherefore take  $\frac{1}{4}$  and it shall be your Answer,  $6\frac{1}{4}$  Rixdollars.

*Otherwise.*

The general Method for such extensive Questions is as follows: The Investigation whereof I shall clearly shew before I conclude this Subject.

- 1 Pound Sterling at *London* = 132 Batz Money of *Frankfort*.
- 22  $\frac{1}{2}$  Batz Money of *Frankfort* = 1 Rixdol. Money of *Frankfort*.
- 100 Rixdol. Money of *Frankfort* =  $99\frac{1}{4}$  Rixdol. Mon. the Provision deducted.
- 138 Rixdol. Money of *Frankfort* = 100 Crowns current of *Geneva*
- 100 Crowns current of *Geneva* =  $99\frac{1}{4}$  Crowns current at *Geneva*, the Provision deducted.
- 1 Crown current of *Geneva* = 21  $\frac{1}{4}$  Sols of *Piedmont* at *Turin*.
- 100 Sols of *Piedmont* =  $99\frac{1}{4}$  S. of *Piedmont*, the Provision deducted.
- 4  $\frac{1}{4}$  Sols of *Piedmont* = 1 Crown of *Genoa*.
- 1 Crown at *Genoa* = 152 Sols of *Genoa*.
- 28 Sols at *Genoa* = 1 Livre at *Genoa*.
- 100 Livres at *Genoa* =  $99\frac{1}{4}$  Livres at *Genoa*, the Provision deducted.
- 5 Livres at *Genoa* = 3  $\frac{1}{2}$  Groots Banco of *Amsterdam*.
- 100 Groots Banco of *Amsterdam* = 1 Crown of *Amsterdam*.
- 100 Crowns Banco of *Amsterdam* =  $99\frac{1}{4}$  Crowns Banco of *Amsterdam*, the Provision deducted.
- 100 Crowns Banco of *Amsterdam* = 133 Rixdol. of *Brandenburgh* at *Berlin*.
- how much = 1 Pound Sterling at *London*.

Eighth EXAMPLE.

C. of Genoa remits for his own Account to D. of Venice, a certain Sum at 104 Marchetti for 4 Livres of Genoa, ordering him to remit the nett Produce to E. at Florence; D. effects it at 75 Crowns d'Or of Florence for 100 Ducats of Venice. E. takes Bills on Leghorn at 119 Sols for 6 Livres of Florence, which he remits to F. who takes others on Novi, at 175 Dollars for 100 Crowns de Marc of Novi, who remits them to G. who in his Turn remits them to H. of Milan at 180 Sold. Imp. for a Crown de Marc, who makes a Remifs at Amsterdam to I. of 52 Sols of Milan, whereof 140 are worth 106 Soldi Imp. for a Guilder of Amsterdam, who finally takes Bills on London at 34 Sch. per Pound Sterling, which he remits to C. himself, for whose Account all these Negotiations were made. If six of the Correspondents deduct each  $\frac{1}{2}$  per Cent. for Charges, it is demanded at what Price the Exchange was between Genoa and London, if C. finds that the Money he has been in Disburse for 6 Months has brought him in an Interest after the Rate of 8 per Cent. per Annum. Answer, 55<sup>6</sup>/<sub>100</sub>d. Sterling per Dollar of 5 Livres.

Solution

OF ARBITRATIONS OF EXCHANGE.

*Solution by the Tables.*

$\frac{1}{2}$ of 175 is $87\frac{1}{2}$	5909	114	6659
	52	75	5240
	34	110	7244
Fixed Number	9549	$\frac{1}{2}$ of 180 is 90	6031

After having found the Exchange, which is here between *London* and *Genoa* 58 $\frac{1}{2}$  d. Sterling for a Dollar, it must be seen how much *per Cent.* ought to be gained by the Exchange, which the Example tells us is 3 *per Cent.* *per Annum.* We see, besides this, that *C.* has been in Disburse 6 Months; so it ought to be worked by the direct Rule of Three, and say,

If 12 Months gain 8, how much shall 6 gain?

The Answer will be 4, that is to say 4 *per Cent.*

Afterwards there is to be observed what has been said before of the certain and uncertain Price, and of the direct and indirect Rule in our Example. *Genoa* gives the Price certain, then it must give to *London* 4 *per Cent.* less than it has received, and consequently it must be wrought by the indirect rule of Three, and say,

If 100—give 58 $\frac{1}{2}$  d.—how much shall 104 give?

OF ARBITRATIONS OF EXCHANGE.

Having solved the two preceding Problems in the most concise Method that I believe is possible, except by Tables; I shall now demonstrate in their Explanation how to perform, in the same Manner, all Questions relative to Arbitrations. And first, I shall deduce the Rule for stating them from the second Example of the Double Rule of Three preceding the Tables, where the first Term is fixed; the second shewing what different Money was given for it; the third, how much of the same Specie as the second is given for the fourth; then what Quantity of the Specie of the fourth, for a fifth Term given, which is of the same Name as the first Term. Now as all such Questions, exceeding five given Numbers, may according to that Excess be called Questions of the Treble, Quadruple, Quintuple, &c. Rule of Three, for whose Stating I derive the Rule from the foregoing Remark, which will be exactly similar or agreeable to it; only I shall, for Brevity's Sake call the first Term, the first Antecedent; the second Term, the first Consequent; the third Term, the second Antecedent; the fourth Term the second Consequent, &c. and now express the Rule.

The first Antecedent must be a fixed Exchange, and of the same Denomination with the last Consequent; the second Antecedent must be of the same Name as the first Consequent; the third Antecedent of the same Specie as the second Consequent; and so on, always making the Antecedents of the same Name or Specie as their preceding Consequent, which you cannot but do if you follow the Conditions of a given Question, and if you have so done you will find your last Term of the same Specie with the first, and then the Demand or Answer will be of the same Name as the last Consequent but one: if you find your Work stand otherwise, most likely you have mistaken the first Term. The Question being thus prepared, it is plain that the Sum of the Antecedents must be regarded as equal to the Sum of their Consequents, as each Antecedent is supposed equal to its respective Consequent; therefore their Products must be accordingly so; for Instance, if

5 = 2 more 3, and  
 6 more 4 = 10, and  
 7 more 5 = 8 more 4  
 then 5 x by both 6 and 4, x by both 7 and 5 = 600 = 10 x by both 2 and 3;  
 by both 8 and 4;

but as one of the Antecedents in every Question is unknown, whilst all the Consequents are otherwise, we have an unknown, though supposed, Quantity multiplied by the known Antecedents, = to the Product of the Consequents, therefore the unknown Quantity, or Answer, is found by dividing the Product of the Consequents, multiplied by one another, by that of the Antecedents, multiplied in the same Manner. For Example; suppose the Case were, what unknown Quantity x by 59 would be equal to 472, then I say 472 divided by 59 gives the sought Quantity, viz. 8. Now in order to contract the Work, it is plain that it is the same thing whether you divide a Product, which had divers Multipliers, or you divide one of the Multipliers, which will admit it, by that Number, and then multiply

by the rest (Instance  $\frac{2 \times 3 \times 12}{6} = 12 = \frac{12}{6} \times 2 \times 3$ ) It is likewise evident, that if

any two Numbers be divided by the same Number, their Quotients will be in the same Proportion as the Numbers were. Instance 12 divided by 4 is 3, and 20 divided by 4 is 5; wherefore as 3 is to 5, so is 12 to 20; which was to be shewn. Hence it follows, that, if when a Question is stated you can divide any Antecedent and Consequent, though they are not Opposites, by the same Number, the Equality is still kept up; and thus you must continue to do, till you can find no Antecedent and Consequent commensurable by the same Number, then ordering this last Equation as above directed, you will have the Solution; and note, that the last Consequent, to which the Answer is sought, is subject to the Division as the rest; for the Product of the last, multiplied by the other Consequents, is still the same, whether the last or any other is divided by the same Number; this may be seen by the last Instance but one, if you call 12 the last Consequent; and from what has been said, I infer, that every Antecedent after the first must be of the same Denomination, as

Having

well as the same Specie, as its preceding Consequent; and that if any Antecedent or Consequent consists of different Denominations, you must, to retain the Equality, either reduce both them and their respective Consequents and Antecedents into the same Denomination, or otherwise make the lower Denomination an aliquot Part or Parts of the higher, as *3l. 3s.* Sterling would be  $3\frac{1}{20}$  and then the others remain unaltered; and *note*, that in the second given *Examples*, where the Antecedents and Consequents are scratched, they have been divided, and the Quotients stand towards the left, separated by a point, *but*, *4. 18*; and what has been here said in Regard to the Questions of Money, holds good also for those concerning Weights and Measures, which may be wrought exactly by the foregoing Rules.

## EXAMPLE.

If 100lb. at *London* be equal to 106lb. at *Lyons*, and 30lb. at *Lyons* are worth 32lb. at *Paris*, and 113lb. at *Paris*, made 90lb. at *Frankfort*, and 12lb. at *Frankfort* are given for 18lb. at *Venice*, and 125lb. at *Venice* are the Value of 97lb. at *Cadiz*; then how many lb. at *Cadiz* are equal to 60lb. at *London*? Answer  $51\frac{7}{10}$ .

Being stated and contracted according to the preceding Rules, the Work will stand thus.

100 lb. at <i>London</i>	=	106 lb. at <i>Lyons</i> .
5. 20 lb. at <i>Lyons</i>	=	4. 24 lb. at <i>Paris</i> .
113 lb. at <i>Paris</i>	=	3. 90 lb. at <i>Frankfort</i> .
1. 4. 18 lb. at <i>Frankfort</i>	=	3. 18 lb. at <i>Venice</i> .
19. 184 lb. at <i>Venice</i>	=	97 at <i>Cadiz</i> , then
how many lb. at <i>Cadiz</i>	=	60 at <i>London</i> .

With the preceding, I finish the Examples of Arbitrations, having therein given an Instance of every Case that can happen in this curious Branch of Arithmetick, so that any Addition would be superfluous, and unnecessarily encroach on my Reader's Time, without adding any thing to his Instruction; which I believe he will find more truly promoted in this short Tract, than he would by consulting the many Volumes published on the Subject; as he has here the Reasons for all the Operations proposed, added to the Solutions, which other Authors have contented themselves with giving alone.

I have only one Remark to add to this Chapter, which is, that those who are well skilled in this Business generally agree to support their Correspondent's Commission free on all Sides; wherefore, when it is considered what Opportunities the Merchant, or Remitter of general Credit and Correspondence has, the Benefits, by a judicious Combination, or Comparison of the Exchange throughout *Europe*, are far more considerable than most People imagine. Those, who are shrewd Exchangers themselves, generally make Choice for these Negotiations of Correspondents not less so; and then they are certain of the Profits they have in View, for they know that their Orders will lie by unexecuted till the advantageous Crisis arrives.

## Concerning Bankruptcy.

*Felix quem faciunt aliena pericula cautum*

THE preceding Chapters contain the whole Theory and Practice of Commerce; and I hope I have been so plain and explicit in them as to render myself intelligible, and to answer my Design of conveying Instruction to those who have given themselves the Trouble of seeking it in this Work.

I have now gone through every Branch of Commerce, and purposely reserved this Catastrophe of an imprudent or mistaken Conduct to the last, as the properest Place for it. And I could wish that the Misfortunes, consequent to an ill judged and indiscreet Course or Management, did not render this additional Chapter necessary for the Guidance of those who have unhappily incurred the Want of it, through the gloomy Vale of Trouble: For could Trade be always carried on with that Credit which is necessary to support it, and with that Success which every one hopes for, by adventuring in it, it would be the most pleasant as well as the most beneficial Employ that any could undertake; but as we are all subject to the uncertain fluctuating State of Humanity; our Serenity will sometimes be interrupted, and our Calms and Sunshine be obscured and ruffled by the Clouds and Tempests of Adversity, as well in this as in all other Walks of Life, and the smooth Paths of Business will often become rugged and strewed with thorny Troubles, to the utter Change of the pleasing Scene, by introducing inevitable Losses and Misfortunes, instead of the Advantages we flattered ourselves with the Hopes of reaping from our commercial Engagements. Thus the best-laid Scheme may be overlet by some intervening Occurrence, for a trifling Accident frequently demonstrates the Weakness of our Judgement, and the Shallowness of our Designs; though whilst we submit our Actions to the Directions of Prudence, and suffer our Steps to be guided by *her*, we may justly be said to act like reasonable Men; and however Providence, for our Punishment, may dispose otherwise, we certainly take the best and likeliest Method of securing to ourselves that Success and Prosperity which we are soliciting: and in Order to guard against their Reverse, permit me to intrude so long on your Patience as to expatiate a little on the Subject of Bankruptcy, and to shew you the Causes which naturally drive Men to split on that Rock, where so many Thousands have been wrecked, reminding you of my Motto, where you will see the great Poet from whom I have taken it, pronounced that Man happy who has been made wife by the Misfortunes of others.

Mr. Savary says, in his *Parfait Negociant*, that the Failures of Merchants oftener proceed from *Ignorance*, *Imprudence*, and *Ambition*, than from *Malice* and *Design*; and I am entirely of his Opinion, more especially in this Kingdom: For, whoever reflects on the Consequences of Fraud and Deceit under a Statute of Bankruptcy here, I should think would avoid it with the utmost Care; as he not only exposes himself to the Penal Laws, but can never expect to be cleared by his Creditors, though he should not be convicted under the former, and consequently is rendered incapable of making any Thing his own for the future. But as I hope none of my Readers are of this Number, I shall direct my Advice to those on whom I am in Hopes it may prevail, and endeavour to guide them from running on the aforementioned Shoals, by persuading them to aim at the Dissipation of the Fogs of *Ignorance* by the Sunshine of Learning; to correct *Imprudence*, and to banish *Vain-Glory* or *Ambition*. The first may be done by a strict Application to Business, whilst under the Tuition of a Merchant in an Apprenticeship; or if this has been neglected, and my Reader comes into Trade without such usual Form and Instruction, I hope this Work will supply the Deficiency, not only by teaching every one how to act in the Branch of Commerce he has elected, but by displaying to him a general Trade, that he may have all the Variety possible to chuse out of: Sound Judgement and common

Sense duly applied, will be too hard for *Imprudence*; and *Ambition*, I should think, would be checked by displaying the fatal Consequences of it; and thus a Failure proceeding from all or any of the above-mentioned Causes may be prevented; though still there remains one, from which no Foresight or Care can defend us, I mean the immediate Dispositions of Providence; whereas the above are but secondary, to which we ought cheerfully to submit with a perfect Resignation, and never murmur nor repine at any of his Dispensations, in a full Assurance that he will afford Support and Comfort under the Affliction, to every one who sincerely trusts in him, and, when he sees convenient, will give a happy Release from it. It is true these are hard Lessons to Mankind, and rendered more irksome by the barbarous Treatment the Unhappy too commonly meet with; for though it is natural to imagine, that a Man who has been truly honest in all his Dealings, and esteemed for his Integrity, should on a Reverse of Fortune meet with that Pity and kind Usage he has shewn to others under similar Distresses; yet Experience convinces us that this is rarely the Case; on the contrary, it is generally found that though Friends may seem many and staunch in the time of prosperity, yet on a Change of Circumstances they will drop off like blasted Fruit, quite forgetful of Favours shewn to and Kindnesses done them, and at the Time you become Bankrupt in your Fortune, you will certainly find them so in Affection and Returns of Gratitude: Favours seem no longer regarded than while you are in a Capacity to continue them, and Obligations are thrust among the Number of the Non-entities, or at least are become such unfashionable Things, as only to be owned by the Conscientious and Benevolent.

Acts of Beneficence are not to be expected from Creditors, whose Losses generally sour their Tempers, and keep their Resentments warm against the unhappy Occasion of them, even to the Extinction sometimes of Humanity. But one should think that the Lamentations of a fallen Familiar and Intimate, frequently heightened by the Tears of a tender Wife, and affecting Cries of their innocent Children, would be prevailing Objects to excite Compassion from those who have always experienced a courteous and gentle Treatment from the unhappy Sufferers; but Philanthropy is almost lost among us, and Mankind are grown so degenerate, as to become insensible to the Distresses of others; the unfortunate Man is now equally shunned with the infected one, and the best Usage he finds is Coldness and Reserve from almost every individual of his Acquaintance, whilst the worst is swelled to an immoderate Height by the Insults offered him; Contumelies and Reproaches are thrown out against him; and Abuses, Invectives and unmerited Aspersions are frequently added to complete the Catalogue, and augment his Miseries; few regard him, fewer still care for him, and the Paucity of those who protect or assist him, is reduced to the lowest Degree of Comparison. This is generally the Case with those whom Fortune has prostrated and laid low; though there is still a small Remnant of Men among us, who are actuated by every tender Sentiment of Humanity, and, as Opportunities offer, exercise every social Virtue; whose Compassion at least is extended to all afflicted Objects, and their Charity stretched to the utmost Limits that Prudence and Discretion can warrant; they remain uninfluenced by the Example of their Neighbours, and continue fixed and immovable in the Principles of Goodness and Benevolence; but these Guardian Angels are scarce, and even when found can, at best, only alleviate, and in some Degree mitigate and take off the sharp Edge of Affliction, but they cannot restore lost Credit and Reputation; this is only to be done by the Man himself, and the sole means is the making all the Satisfaction to his Creditors that his Abilities will permit, either at present or in future, till his whole Debts are discharged; for so long as any Part of these remain unpaid, that Obligation subsists. This Lesson, Honesty and a just Reflection on Things will teach men; and as the Miseries subsequent to, and attendant on a Failure, are extensive, it is natural to suppose the bare Description will render every other Persuasive superfluous, for avoiding the Causes of such great Unhappiness; therefore, I shall conclude this Introduction with my best and sincerest Wishes, that none of my Readers may ever experience it, by adding one to the Number of the Unfortunate.

Of Bankruptcy in England.

The Derivation of the Word *Bankrupt* I have given under that of *Banks* and *Bankers*; and though, according to our Laws such Insolvents are generally esteemed a crafty, fraudulent, deceitful, and extravagant Sort of Persons, yet Experience evinces the Unjustness of this Assertion, and that many unhappily fall into this Dilemma through the Badness of Trade, or some inevitable Accident, without bringing it on themselves either by Extravagance or Knavery. The Laws of Bankruptcy in England are therefore justly considered as Laws calculated for the Benefit of Trade, and founded on the Principles of Humanity as well as Justice; and to that End, they confer some Privileges not only on the Creditors, but also on the Bankrupt himself. On the Creditors, by compelling the Bankrupt to give up all his Effects to their Use, without any fraudulent Concealment: On the Bankrupt, by exempting him from the Rigour of Common Law, whereby his Person might be confined at the Will of his Creditor, though in Reality he had no Effects to satisfy the Debt: Whereas the Law of Bankrupts, taking into Consideration the sudden and unavoidable Losses to which Men in Trade are liable, has given them the Liberty of their Persons, and some pecuniary Allowances, upon Condition they surrender up their whole Estate to be divided among their Creditors\*. But still it is cautious of encouraging Prodigality and Extravagance by this Indulgence to Debtors, and therefore it allows the Benefit of the Laws of Bankruptcy to none but actual Traders; since that set of Men are, generally speaking, the only Persons liable to accidental Losses, and to an Inability of paying their Debts, without any Fault of their own. I shall give a Transcript of the Acts now in Force, and of the best Reports and Pleadings I can collect on the Subject; and shall in the first Place shew,

*What Persons may, or may not, be Bankrupts.*

- 13 *Edw. C. 7.* Any Person using the Trade of Merchandize by Way of Bargaining, in Grofs or Retail, Exchange, Rechange, Bartery, Chevifance, or otherwise,
- 21 *Jac. 1. C. 19.* Or, seeking his Trade or Living by buying and selling, being a natural-born Subject;
- 21 *Jac. 1. C. 19 S. 15.* Or, an Alien, or being a Denizen, may become Bankrupts.
- 5 *Geo. II. C. 30 S. 39.* Bankers, Brokers, and Factors, may be Bankrupts. An Inn-keeper as such can be no Bankrupt. Nor one victualling the Fleet, though he sells the Overplus to Merchants.
- Skinner, 276. 291. 3. Mod. 327. 328. 1 Show. 96. 268. 1 L. v. 309. Mich. 1 W. and M. in B. R. The Case of Sir Thomas Littleton, Mr. Papillon, & al. 1 Fern. 687. Roym. 375. 1 Syd. 411 per Justices. Chan. Mich. 1787. 1 Sul. 110.* A meer buying and selling brings not a Man within the Statute (for buying and selling of Land will not make a Man liable to be a Bankrupt) but it is intended of such who gain the greatest Part of their Living both by buying and selling of personal Effects. Having a Share in a Ship; being a Farmer, or keeping a Boarding-School, makes not a Bankrupt; Buying only, or selling only, makes not a Bankrupt, but buying in *England*, and selling in *Ireland* does. *John Ashley* went from *England* in 1720, and resided in *Barbadoes* till 1735, where he was a Factor and a Planter, and traded to *England*, by sending Goods from his Plantation, and receiving Goods back again bought in *England*, and he disposed of Goods sent from *England* in *Barbadoes*, for Merchants in *England* as a Factor, and being greatly indebted came to *England* in 1737, and committing an Act of Bankruptcy, a Commission issued, and upon a Question, whether he was within the Statutes of Bankrupts; upon the Authority of *Bird* and *Stegewick* (where a Gentleman of the *Temple* going to *Lisbon*, turning Factor, trading to *England*, and breaking) was adjudged a Bankrupt.

Where a Man buys and sells under a particular Restraint, as a Commissioner of the Navy, or a Farmer, he is not a Seller within the Statute.

Sir *Anthony Bateman* had been a great Merchant, and was Mayor of *London*, but had left off Trade fifteen Years; the Court held he could not be a Bankrupt upon a Debt contracted after; but the Jury found him so upon such Debt, and a new Trial was refused.

If a Trader contracts Debts and leaves off his Trade, he is still liable to be a Bankrupt for those Debts, but not for those he shall contract afterwards.

If a Man whilst a Trader owes a Debt of 100*l.* to *A.* and leaving off his Trade borrows another 100*l.* of the same person, and then pays him one of the 100*l.* without mentioning, whether in Satisfaction of the former or the latter Debt, yet it shall be applied to the former, and the Creditor shall never charge him with a Commission of Bankruptcy for that which remains. Resolved *per Holt*.

A Farmer, as such, cannot be a Bankrupt; but if he deals in buying and selling Potatoes, Wool, &c. as a Trader in those Commodities, he may be a Bankrupt.

No person who shall adventure any Money in the *East-India* Company, or *Guinea* Company, or any joint Stocks of Money by them raised for carrying on the Trade by the *East-India* Company or *Guinea* Company to be managed; or who shall adventure any Money in any Stocks for managing the Fishing Trade, called the Royal Fishing Trade; nor any Member of the Bank of *England*, on Account of his Stock; nor Persons having Shares in the *London* or *Royal Exchange* Insurance Companies, shall be Bankrupts in Respect thereof.

No Farmer, Grazier, or Drover of Cattle, or any Receiver-General of Taxes granted by Act of Parliament, shall be deemed a Bankrupt.

Those Persons who live on their Manual Labour only, as Husbandmen, Labourers, bare Handicrafts-men, &c. are not within the Statutes; but such as buy Wares, and convert them into saleable Commodities, and so get their Living by Buying and Selling, may be Bankrupts; as a Shoemaker, who buys Leather and sells it in Shoes; an Ironmonger, buying Iron and causing it to be wrought into Wares; a Nailor, Locksmith, &c.

A Carpenter in *London* has been adjudged a Bankrupt, but not as a working Carpenter.

A Clothier that buys Wool, and has it made up into Cloth, or works it into Cloth himself, may become a Bankrupt; but a Taylor who makes Garments only, as a Servant to his Customers, cannot be a Bankrupt, though a Salesman may.

It is held, that a Vintner, Brewer, Baker, Weaver, Dyer, Tanner, &c. may be Bankrupts.

Members of Parliament, being Merchants within the Description of the Statutes relating to Bankrupts, are made subject to the Bankrupt Laws; but are not liable to Arrest, except in Cases made Felony by those Laws.

An action of the Case will lie, for saying, of a Merchant, Mercer, Grocer, Shoemaker, Dyer, Weaver, Corn-Master, or Baker in *London*, a Milliner, or any other Tradesman that gets his Living by Buying and Selling, that he is a Bankrupt.

*What makes a Man a Bankrupt.*

- 1st, To depart the Realm, or
- 2d, To begin to keep House, or otherwise,
- 3d, To absent himself.
- 4th, To take Sanctuary.
- 5th, To suffer himself wilfully to be arrested, for any Debt or Thing not grown due, or for a just Consideration.
- 6th, To suffer himself to be outlawed
- 7th, To yield himself to Prison; and
- 8th, To depart from his Dwelling-house to the Intent or Purposes to defraud or hinder a just Creditor or Creditors of his or their just Debts or Duty.

- 9th, Willingly or fraudulently to procure himself to be arrested, or his Goods, Money, or Chattels, to be attached or sequestered.
- 21 Jac. I. C. 15. 10th, To make any fraudulent Grant or Conveyance of his Lands, Tenements, Goods or Chattels, to the Intent, or whereby his Creditors may be deluded or delayed in the Recovery of their just Debts.
- 21 Jac. I. C. 19. 11th, Being arrested for Debt, shall after his Arrest lie in Prison two Months upon that or any other Arrest or Detention for Debt. These to be Lunar Months. 12th, Procuring any Protection; as that of Foreign Ambassadors, the Verge of the Court, or any other than that of Privilege of Parliament. 13th, Being arrested for 100l. or more, of just Debt or Debts, and escaping out of Prison.
- Palm. 325. 14th, If a Man conceals himself in his House but a Day or an Hour, to delay or defraud his Creditors, it makes him a Bankrupt. 15th, If a Merchant-Trader indebted keeps in another Man's House, or on Ship-board; it is adjudged a keeping in his House; but the withdrawing must be on Purpose to defraud Creditors; and if a Man goes sometimes at large so as he may be met with one Time or other, it will excuse him. 16th, Neglecting to make Satisfaction for any just Debt to the amount of one hundred Pounds, within two Months after Service of legal Process for such Debt, upon any Trader having Privilege of Parliament.
- 5 Geo. II. C. 30. S. 24. 17th, Paying or giving Security to a petitioning Creditor whereby he shall privately have more in the Pound than the other Creditors, constitutes a fresh Act of Bankruptcy, supercedes the Commission obtained by such favoured Creditor; and another Creditor by Petition, shall have a new Commission granted; and the first petitioning Creditor shall be obliged to refund the Sum or Sums he had partially received from the Bankrupt, and shall be excluded from all Benefits whatever under the second Commission; his whole Debt being forfeited.
- 4 Geo. III. C. 35. 18th, Any Member of Parliament being a Merchant and owing more than 100l. to any one Creditor, and not paying, receiving, or compounding with such Creditor, or not giving Bond with two sufficient Sureties to be approved by a Judge of the Court in which the Action is brought, within two Months after he has been served with a Summons for that Purpose, shall be accounted a Bankrupt. If a Man commits a plain Act of Bankruptcy, as keeping House, &c. though he after goes abroad, and is a great Dealer, yet that will not purge the first Act of Bankruptcy: but if the Act was not plain, but doubtful, then going abroad, and trading, will be an Evidence to explain the Intent of the first Act; for if it was not done to defraud Creditors, and keep out of the Way, it will not be within the Statute. If after a plain Act of Bankruptcy committed, he pays off, or compounds with all his Creditors, he is become a new Man.

shall be an Act of Bankruptcy, and the first Commission shall be superseded, <sup>5 Geo. II. C. 30. S. 24.</sup> and a new one granted.

To prefer a Bill or Petition to the King, or any of his Courts, to compel the Creditors to compound, or give further Time, is an Act of Bankruptcy.

In Respect to the Attachments and Sequestrations, they must be of the Party's immediate procuring, and not by his mere *Default* or *Laches* to make him a Bankrupt within the Stat. 1 Jac. I. C. 15. And what Sales and Conveyances made by Persons, shall be deemed fraudulent within the Statute to make them Bankrupts may be considered two Ways;

1. Either such as are made long before a Person becomes a Bankrupt, &c. or;
2. Such as are made some short Time before; for what is done after the Time of Bankruptcy is totally void.

If a Trader finding himself in a sinking Condition with Respect to his Fortune makes a Conveyance of all his Land and Goods to Trustees, for the Payment of his real Debts, and then absconds; this Conveyance, though it may be truly and honestly intended, shall not excuse him, for his very absenting makes him a Bankrupt; but if he does not abscond, and declares his Intention to pay his Debts, and the Trustees act accordingly, paying proportionably as far as it will go; such a Conveyance, without other Act, shall not make him a Bankrupt, as here is no Fraud.

Before the making the Statute 5 Geo. II. C. 30. one *Norcourt*, who had long followed the Business of a Goldsmith, on *Michaëmas* Day 1726, after shutting up his Shop, and contemplating his Inability to pay what he owed, made an Assignment to one *Small*, of two Leases, and also of two Thirds of his Stock in the Wine Trade, which he was concerned in with one *Oudley*, being about the Value of 300*l.* and this he did to give a Preference to his Creditor *Small* (though without his Knowledge) and to secure his Debt, who in Friendship had then lately advanced him a considerable Sum of Money. *Norcourt* never opened his Shop again, but went off the very next Day, and was afterwards found a Bankrupt, and to have become such the Day after *Michaëmas* Day; and on taking out the Commission all his Estate was assigned by the Commissioners to one *Man*, an Assignee.

On this, *Small*, who was the Assignee of these Leases, and likewise of the two Thirds in the Wine Trade, brought his Bill against *Man*, the Assignee in the Commission, and against *Oudley*, the Partner in the Wine Trade, to oblige them to account; it was here objected for the Defendants, that this Assignment made by the Trader when it was resolved by him that he would be a Bankrupt the next Day, and to prefer this Creditor to all others, by which the equal Distribution of his Effects intended by the Statute is prevented, must be a void Assignment; besides it being made without the Privity of *Small*, &c. is therefore fraudulent; after all which, *Small* comes to have this established, and through Partiality to be assisted in a Court of Equity, which, if allowed, will effectually set aside such Parts of several Statutes as give an equal Distribution of the Bankrupt's Estate to all his Creditors.

*Master of the Rolls*. This is a Case of Consequence, as it affects Trade in general, and as it tends to frustrate the Statutes made for the equal Distribution of Bankrupts' Effects; but I still think the Assignment made by *Norcourt* to *Small* the Plaintiff is good, and that he is entitled to an Account of this Wine Trade against the Defendant *Oudley*,

As to the Matter of Bankruptcy, that is a Term not known to our common Law, but introduced by Statutes; the 3d of *Hen. VIII. C. 4.* which is the first, is very imperfect, the next of the 13th of *Edw. C. 11.* is more large, and that Statute has been since enlarged by several subsequent ones: Now these Statutes do ascertain what Acts make a Bankruptcy, and there can be no such Thing as an equitable Bankruptcy, it must be a legal one.

There may be just Reason for a sinking Trader to give Preference to one Creditor before another; to one that has been a faithful Friend, and for a just Debt, for Money lent to him in Extremity, when the rest of his Debts might be due from him as a Dealer in Trade, wherein his Creditors may have been Gainers; whereas the other may not only be a just Debt, but all that such a Creditor has in the World to subsist upon; in this Case, and so circumstanced, the Trader honestly

may, nay, ought to give the Preference; and in such Case, it is not the Time when the Assignment was made by the Trader that is material, provided it be before the Bankruptcy, but the Justness of the Debt is very material.

The Objection, that *Small* the Assignee did not know of this Assignment seems rather an Advantage to him, for this shews, that there was no Fraud nor Importunity used by the Assignee; and oftentimes, upon the Account of mere Importunity, a Trader has, when in Trouble, been prevailed upon to make such Assignment.

And as to the Creditor, the Assignee's coming into Equity, I admit that every Person who comes here, ought to come with an innocent and just Cause; and the now Plaintiff, for what appears, does so; however, what distinguishes the present Case in his Favour is, that the Assignment being of a *Close in Action*, he could in the Nature of the Thing apply no where else for Relief, or to have the Benefit of the Assignment, but in Equity.

As to Precedents, the same was done in the Case of *Cock* and *Goodfellow*, where the Assignment was made by Mrs. *Cock*, just before her Bankruptcy, and in Trust for her own Children; and as to Part, it was but a Direction to the Trustee to assign her Stock in the Bank, &c. and Lord *Macclesfield* declared, that this was so far from being an Act of Fraud in Mrs. *Cock*, though it was for her own Children, that it seemed to be just and commendable. So in the Case of *Jacob* and *Shepherd*; the Trader *Shepherd* was on the Brink of Bankruptcy, and the Deed brought ready engrossed to him, which he executed a little before his Bankruptcy, to give a Preference to some of his Creditors; indeed I doubted this, but on an Appeal, the Lord Chancellor *Macclesfield* ordered a Trial, to be informed when the Trader became a Bankrupt: and the Execution of the Deed being found to have been before the Bankruptcy, the Decree was in Favour of the Deed. The like happened in Sir *Stephen Evans's* Case, who having executed a Deed immediately before his Bankruptcy, and with a View to prefer some Creditors, the same prevailed. So that according to these Precedents, I must decree in Favour of this Deed, giving a Preference to the Plaintiff.

*Narceur's*  
Case, *Nich.*  
1727.

With respect to plain Acts of Bankruptcy, after what has been stated, no Doubts can arise; but there are some delicate Circumstances, to which it is highly necessary for all Merchants and Traders to pay strict Attention, lest they should inadvertently commit an Act of Bankruptcy, which may subject them to temporary Disgrace; and considerable Expence before the Commission can be superseded.

Any keeping House for the Purpose of delaying a Creditor, even for a very short Time, will be an Act of Bankruptcy.

*Cellett* v.  
*Friseman*

Thus upon a Rule to shew Cause why a new Trial should not be granted, it appeared that at the Trial, the only Question that arose was concerning the Act of Bankruptcy alledged to have been committed by *Falch*; as to which the Facts were as follows: *Falch* being in bad circumstances, on the Evening of the 7th of *January*, 1786, expressed his Concern to his Clerk, and his Fears that he should not be able to answer a Bill which would become payable the next Day; and desired him to come earlier than usual the next Morning, and be in the Way; in Case the Holder of that Bill should enquire for him, to deny him. In Fact, that Bill-holder did call the next Morning before nine o'Clock, and presented a Bill for Payment, when the Clerk gave him the Answer as he was directed, that his Master was not at home. Afterwards however, in the Course of the same Day, *Falch* appeared in Public, and having procured some Money from a Friend whom he met, he sent for the Bill and paid it before five o'Clock that Day. The learned Judge directed the Jury to find their Verdict for the Plaintiffs, in as much as the Act of Bankruptcy was compleat, by the Denial of a Creditor with Intent to delay him, notwithstanding the Jury, which was a special one, suggested to him at the Time, that by the Practice of Merchants in the City of London, the Payer of the Bill has the whole of the Day on which it becomes due till five o'Clock to pay it in. However, the Judge repeating to them his Opinion upon the Point of Law, they found their Verdict accordingly.

The Court of King's Bench in delivering Judgement against the Rule for a new Trial argued the Point of Law very amply, each of the Judges assigning his Reasons

Reasons for supporting the Direction of *Judge Buller*, who tried the Cause, to the Jury; and the Sum of the whole Argument appears to have been comprised in the following Observations of *Judge Ashurst*. "I have always understood the general Rule to be, that when a Trader commits an *unequivocal* Act of Bankruptcy, nothing that passes afterwards can explain it away." The Conversation with the Clerk or the Evening preceding the Denial, and the Denial consequent upon it, clearly proved an Intention to delay the Creditor; and *Earl Mansfield's* Opinion was cited, who had directed the Jury to find a Verdict for the Plaintiff in a Case still more remarkable, with Respect to the Delicacy of mercantile Credit, than the present. The Circumstances were these: A Bill having become due, and the Acceptor being pressed for Payment, desired the Holder to call upon him the next Morning at a Friend's House in *Bridge-Street*, and he would pay him; the Holder went accordingly, and the Acceptor, at his own Request, was denied to him. Upon being asked by his Friend, if he was aware that he had been committing an Act of Bankruptcy; he answered with Surprise in the Negative, and said that he did not mean to do so, and went afterwards and paid the Bill. His Lordship said, that if the Jury were satisfied that the Denial had been with a View to delay the Creditor at the Time, it was an Act of Bankruptcy; and if so, it could not be purged by paying the Bill afterwards.

It was observed also by the Court, that the Term of "purging an Act of Bankruptcy" is frequently perverted, and had often been complained of by *Lord Mansfield*, who, on several Occasions, took the Opportunity to declare, that it can only mean, that, if the Act done be in itself *equivocal*, other Circumstances may be called in to explain it; but, if the Act be a clear *unequivocal* Act of Bankruptcy, it cannot be purged or explained away by subsequent Circumstances. See the Speeches of the Judges, in a valuable Treatise intitled, *The Bankrupt Laws*, by *William Cooke, Esq.* Second Edition, 2 Vols. 8vo. London, 1788.

*Of the Commission and Commissioners, and how they may examine the Bankrupt, his Wife, and others.*

A Commission of Bankruptcy can issue only upon the *Petition and Affidavit* 5 *Geo. II. C.* of a Creditor or Creditors, and not unless the single Debt of such Creditor, <sup>30. S. 23.</sup> or of two or more, being Partners, petitioning, amounts to 100*l.* or unless the Debt of two Creditors, so petitioning, shall amount to 150*l.* or unless the Debt of three or more Creditors, so petitioning, shall amount to 200*l.* and also upon such Creditors, giving Bond to the Lord Chancellor, Keeper, or Commissioners of the Great Seal, in the Penalty of 200*l.* conditioned for proving their Debts, as well before the Commissioners, as on a Trial at Law, as also for proving the Party Bankrupt at the Time of taking out the Commission, and farther to proceed on such Commission as by the Statute directed.

One petitioned for a Commission of Bankrupt against *Lee*, and his Debt <sup>1 *Pier Will.*</sup> (amounting to 100*l.*) appeared to consist of Notes, made payable by the Bankrupt <sup>782. Hil. Term 1721.</sup> to other Persons, who had indorsed them to the Petitioner, and to have been bought in by him: at ten Shillings in the Pound; upon which it was objected, that a Creditor coming by his Debt in this Manner was not entitled to sue out a Commission; but Lord Chancellor *Macclesfield* ruled, that though the Petitioner had thus gained the Notes, he was a Creditor for the full Sums of them, and may sue out a Commission accordingly.

A Commission of Bankruptcy is not a Matter discretionary, but to be granted <sup>1 *Fern. 152.*</sup> *de jure*; and it has been adjudged, that if all the petitioning Creditors for a Commission should agree to have it discharged or superseded, it may be granted; and in Case other Creditors, that were not Petitioners, should pray a Renewal of the Commission, or a Revocation of the *Superseas*, it may be granted. <sup>A German B. *Jewel's* Case.</sup>

After a Commission is issued forth, and dealt in by the Commissioners, they <sup>1 *Jac. I. C.*</sup> may proceed though the Bankrupt die. <sup>15. S. 1.</sup>

The Commission shall not abate by the Death of the King; and Commissions shall be renewed on the Death of the Commissioners, upon paying half <sup>2 *Show. Cases*</sup> <sup>193.</sup> <sup>5 *Geo. II. C.*</sup> <sup>30. S. 45.</sup> Fees.

The

13 *Eliz.* C. 7. The Commissioners are appointed under the Great Seal, and ought to be Men, as the Lord *Coke* says, of Wisdom, Honesty, and Discretion; as they have Power over the whole Estate, Freehold, Copyhold, Goods, Debts, Chattels, and Effects of the Bankrupt.

Ditto. The Commissioners may sell the Bankrupt's Land by Deed inrolled; they may sell his Goods without Inrolment, but not Land.

1 *Vent.* 360. The Commissioners may send for and examine such Persons as have, or are suspected to have, any of the Bankrupt's Goods, Wares, or Debts in their Custody, Power, or Use, and who are, or be suspected to be indebted to the Bankrupt, and to examine them on their Oaths, or otherwise, as they shall think fit, touching the Premises; and if any refuse to be examined, or do not discover the whole Truth, they shall forfeit double the Value of the Goods concealed, to be distributed by the Commissioners, as the rest of the Bankrupt's Estate.

1 *Jac.* I. C. 15. S. 10. The Commissioners have Power to commit Persons refusing to appear to be examined, or appearing, who refuse to be examined on Interrogatories.

5 *Mod.* 308. One *Bracey* was committed by the Commissioners for refusing to be examined, and the Warrant concluded, that he shall be committed until he conform to the Authority of the Commissioners; the Words of the Statute 1 *Jac.* I. C. 15 are "until he submit to the Commissioners, and be by them examined."

1 *Jac.* I. C. 15. S. 11. This was held to be a void Commitment, and *Bracey* was discharged upon an *Hab. Corp.*

1 *Jac.* I. C. 15. S. 11. Witnesses to have their Charges, to be taxed by the Commissioners, and paid out of the Estate; and being guilty of Perjury, or Subornation of Perjury, indictable and punishable according to the Stat. 5 *Eliz.* against Perjury.

S. 15. The Commissioners shall declare to the Bankrupt how they have bestowed his Lands and Goods.

21 *Jac.* I. C. 19. The Commissioners empowered to examine the Bankrupt's Wife, touching the Estate.

They may by their Warrant appoint their Officers to break open the Bankrupt's House, Shop, &c.

5 *Gr.* II. C. 30. S. 16. 17. Commissioners may examine all Persons, as well by Word of Mouth, as on Interrogatories; relating to the Trade, Estate, and Effects of the Bankrupt, or any Act or Acts of Bankruptcy committed, and may reduce into Writing the Answers on verbal Examinations, which shall be signed by the Examinant, and in Case of a Refusal to answer, or not fully answering all lawful Questions, or refusing to sign the Examination, not having a reasonable Objection to the Wording thereof, or otherwise to be allowed by the Commissioners, they may commit till the Party complies; but the Question refused to be answered must be stated in the Warrant of Commitment.

If a Warrant of Commitment be insufficient in Form, and a *Hab. Corp.* be brought; the Court or Judge before whom the *Hab. Corp.* is brought, shall make a new Commitment to the same Prison, unless it appears that the Party had before complied.

5 *Gr.* II. C. 30. S. 43. Commissioners are incapable of acting till they have taken an Oath that they will faithfully, impartially, and honestly behave in the Execution of the Commission, which Oath they are to administer to each other, and keep a Memorandum thereof by them, signed, among the Proceedings.

*The Oath is as follows:*

**I** A. B. do swear, that I will faithfully, impartially, and honestly, according to the best of my Skill and Knowledge, execute the several Powers and Trusts reposed in me, as a Commissioner in a Commission of Bankrupt, against E. F. late of, &c. and that without Favour or Affection, Prejudice, or Malice.

So help me God.

No Time is generally limited for the taking out the Commission, though the sooner doubtless the better for the Creditors; and the *Proviso* in the Stat. 21 *Jac.* I. C. 19. as to particular Cases, mentions, that the Commissioners must be sued within five Years after the Time when the Party became a Bankrupt.

A. took

*A.* took out a Commission of Bankruptcy against *B.* and kept it for six Months without doing any Thing therein; he then executed it; and the Party was found a Bankrupt: On a Petition to supercede this Commission, it was said by *A.* in Excuse for keeping it so long by him unexecuted, that he was not at first certain his Proof was sufficient to find *B.* a Bankrupt; but it appeared afterwards there were good Grounds for a Commission, and that he was found to be a Bankrupt accordingly.

In this Case the Lord Chancellor said that it was very wrong in *A.* to keep the Commission thus long in his Pocket; and until he had sufficient Proof of the Bankruptcy he ought not to have taken out the Commission, which; by having been kept so long private, might have been the Means of drawing in Multitudes of People to give Credit to the Bankrupt, and of furnishing him with Opportunities of defrauding many; wherefore he superceded the Commission; and it being objected that this would only bring a fresh Expence upon the Bankrupt's Estate by the Charge of another Commission; his Lordship replied, he would take Care that the former Commission should not be at the Charge of the Bankrupt's Estate.

A Commission, at the Complaint of 15 Creditors, was issued on the Statute of Bankrupts, against Alderman *Backwell*, who died shortly after; and these Creditors having a Judgment, and supposing thereon they might have better Remedy than their Proportion would amount to on the Commission, they stuck to that, and the Heir of the Bankrupt paid their Debts; and no other Creditors appearing then to prosecute, the Commission by their Consent was superceded; after which, thirty other Creditors sued for a Discharge of the *Superfedecus*, which, after being argued before Lord Chancellor *Jefferies*, was done, and his Lordship renewed the Commission; for the Reasons, that when a Commission is granted, it is not for the Benefit of the Petitioners only; but expressly for the Benefit of all the Creditors.

If there is a joint Commission against two Partners, though one of them should die, the Commission may still proceed; but if one of the joint Partners be dead at the Time of taking out the Commission, it abates, and is absolutely void, because they must be each found Bankrupts. And where a joint Commission is prosecuted all the Partners must be included, for a joint Commission against two of several Partners cannot be sustained;

Therefore, in an Action brought by *Allan* and others, as Assignees of *Marlar* a Bankrupt, together with *Down* surviving Partner of *Pell*, against *Hartley* and *Francis*, upon a Bill of Exchange due from the Defendants to the House of *Marlar*, *Pell* and *Down*, an objection was taken at the Trial of the Mode of proving the Assignee of *Marlar* intitled to join in the Action with *Pell*, the Solvent and surviving Partner. To support their right they first produced a Commission against *Marlar*, *Stewart*, and *Boyd* as Partners, but that failed them, because on the evidence it appeared that the Commission as to *Boyd* was fraudulent, he not having committed any Act of Bankruptcy, but by Contrivance. The Plaintiffs next produced a Commission against *Marlar* and *Stewart* only, to which it was objected that there was no such Partnership, the Firm being *Marlar*, *Stewart* and *Boyd*. The Plaintiffs then offered in Evidence, a Plea in an Action brought three Years before, upon the same Bill against the present Defendants, in which they had pleaded that *Marlar* was a Bankrupt, and therefore the Action not maintainable by *Marlar*, *Pell* and *Down*. To this Plea there had been a Demurrer, but upon the Argument, the Parties consented that no Judgment should be given, and the Plaintiffs discontinued.

It was contended by the Plaintiffs' Counsel that the Defendant having pleaded that *Marlar* became a Bankrupt, and the Demurrer having admitted that Fact, it was Evidence against the same Defendants, being in Truth their own Allegation. Mr. Justice *Buller*, who tried the Cause, non-suited the Plaintiffs. The Court was moved to set aside the Non-suit; and after hearing the Argument of Counsel, Lord *Mansfield* said, the Plaintiffs came as Assignees, and to support their Claim they set up two Commissions. There is no Doubt there may be a Commission

against one Partner separately, without making the Rest of the Partners Bankrupts. So there may be a Commission against all the Partners in a House, and under such Commissions both the joint and separate Estate will be assigned, and the different Classes of Creditors will have the Shares allotted to each. But the Objection to one of the present Commissions is, that it was taken out against three Partners, and only two are found to have committed Acts of Bankruptcy. Such a Commission is void to all Purposes, for it cannot be void as to one, and valid as to the Rest, and no Instance is cited to the Contrary. The Objection to the other is, that it is a Commission against two of three Partners. A Commission may be joint or several, but this is neither; on the Ground of the Plea, it appears that no Judgment was given, and no use made of the Plea. There is no Case to show that the Pleadings of Counsel are Evidence of the Facts alleged. An Answer in Chancery is Evidence, for there it is presumed a Man speaks upon Deliberation, what is true and upon Oath; but a Bill is fictitious, it does not aver Facts as true, but suggests them, and calls for Answers to ascertain them. It may be withdrawn or amended, and decides nothing: "Let the Rule for shewing Cause why the Nonsuit should not be set aside, be discharged."

A Commission having issued against one *Hugbes*, on a certain Day at eleven o'Clock in the Morning, the Commissioners met, and proceeded to declare him a Bankrupt, and the Declaration was signed by them between three and four o'clock in the Afternoon, and the Assignment of the Bankrupt's Goods executed by Six, at which Instant the Commissioners had Notice, that the Bankrupt died that Day at one in the Afternoon, which was the first Notice they had of his Death: On a Bill brought against an Assignee under the Commission, for an Account of such Goods of the Bankrupt, as had come to his Hands, the Defendant pleaded the Commission, and the Proceedings thereon; and the Lord Chancellor *Talbot* held the Plea to be good.

*Talbot's*  
Chan. Cafe.  
184.  
*Hill*. 1735.

For the Meeting of the Commissioners in Order to declare the Party a Bankrupt, and whatever is done in Pursuance of the Commission, shall be taken to be a Dealing in it, if never so minute; and the rather, for that the Statutes of Bankrupts, being remedial Laws, are to be beneficially construed in Favour of the Creditors; and therefore my Lord would not overthrow this Commission, and all the just Right of the Creditors claiming under it.

A Commission of Bankruptcy was taken out against a Person, and upon the Bankrupt complaining, that one of the Creditors had come in under the Commission and proved his Debt, yet he had arrested the said Bankrupt, who in his Petition prayed to be discharged; and here Lord Chancellor *King* observed, that it had been the Construction of the Court of Equity upon the latter Statute, which discharges the Bankrupt of his Debts, on his procuring a Certificate, signed by four Fifths of his Creditors and allowed by the Chancellor, that where a Trader becomes a Bankrupt, and any one of his Creditors comes in on the Commission, to prove his Debt, though with Design only to oppose the Bankrupt's Certificate, nevertheless this Proceeding of the Creditor is an Election to take his Remedy for his Debt under the Commission; and, if pending that, the Creditor sues and arrests the Bankrupt, it is taken to be an Oppression: Therefore he ordered the Creditor at his own Expence to discharge the Bankrupt out of Custody. But he said, if such Creditor would wave having any Benefit under the Statute, stay a reasonable Time, and there was an Improbability of the Bankrupt's being able to gain his Certificate, signed by four Fifths, in Number and Value, of his Creditors, or allowed by the Court; in such Case, if the Creditor should apply to the Court, declaring his Consent to wave any Right or Share of the Bankrupt's Estate under the Commission, and praying that he might sue the Bankrupt; it would be reasonable and proper for the Court to give Leave to such a Creditor to proceed at Law against the Bankrupt for his Debt.

to serve him, and *Hale* was prevailed on to be an Assignee, though the Bankrupt's Estate proved to be only a few Shillings, and some desperate Debts.

*Salkeld* thereupon petitioned that he might be discharged out of Execution, since *Hale*, at whose Suit he was taken, had come into the Commission and proved his Debt, and not only so, but was the Assignee under it. That though *Hale* had proposed waving all Benefit and Advantage accruing from the Commission, yet this was now too late, he having come in under it, proved his Debt, and consented to be an Assignee, which was a plain Election to proceed this Way, and such Election being once made, could not be waved afterwards. But by Lord Chancellor *Parker*: This Commission was plainly sued out fraudulently by the Bankrupt's Relation, to discharge the Bankrupt out of Custody; the Proposal is fair on the Creditor's Side to wave any Benefit under the Commission, and therefore ought to be accepted; and the Creditor cannot be said to elect to be satisfied out of an Estate, when there is no Estate, which more particularly distinguishes this Case. I will not discharge this Bankrupt to the Prejudice of a Creditor, where it appears, on the Face of the Thing, that the Commission was sued out in Favour of the Bankrupt himself, by his Relation, and not for the Service and Advantage of the Creditors.

*Of the Bankrupt's Surrender, Examination, Discovery, Allowance, and Certificate; and of entering the Proceedings, &c. of Record.*

AFTER the Commissioners named in a Commission of Bankruptcy sued for, have, in Consequence of Proofs made to them, found any one to be a Bankrupt; they make and sign the following Declaration, *viz.*

WE whose Names are hereunto subscribed, or underwritten, being the major Part of the Commissioners appointed for the Execution of the Commission of Bankruptcy, awarded against *C. D. &c.* upon the Oath and Examination of divers Witnesses, do conceive, or have found, that the said *C. D.* the — Day of *January* last, or before the suing forth of the said Commission, was and did become a Bankrupt, within all or some of the Statutes, made concerning Bankrupts; and accordingly we declare him to be a Bankrupt, and to have been so from that Time.

G. H.  
I. K.  
L. M.

*But the Commissioners are generally cautious in declaring the Bankruptcy from a certain Time, but leave it to a Trial at Law, in Case there be any Question or Doubt of it; and this is to secure themselves from Actions that may be brought against them.*

Also it is here observed, that the Declaring of the Commissioners, whether he be a Bankrupt or not, doth not acquit or charge him, unless in Truth it were so.

And after they have declared the Party a Bankrupt, they then make out the following Warrant for seizing his Effects.

WHEREAS the King's Majesty's Commission under the Great Seal of Great-Britain, grounded upon the several Statutes made concerning Bankrupts, bearing Date at *Westminster* the same Day with this our Warrant [or according to the Date] had been awarded against *A. B. of, &c. Dealer and Chapman*, directed to us who have hereunto set our Hands and Seals, together with *F. C. Esq;* and *D. S. Gentlemen*; and we being the major Part of the Commissioners named and authorised by Virtue of the said Commission, having begun to put the said Commission in Execution, upon due Examination of Witnesses, or other good Proof upon Oath before us taken, have found that he the said *A. B.* did for several Years last past trade and deal as a *Chapman*, and by such his Dealings became indebted to *C. D. of, &c. Hatter*, in the Sum of one hundred and eighty

6 S

Pounds,

Pounds; and being so indebted as aforesaid, he the said *A. B.* became Bankrupt  
 to all Intents and Purposes, within the true Intent and Meaning of the several  
 Statutes made against Bankrupts, some or one of them, before the Date and  
 suing forth of the said Commission; these are therefore, by Virtue of the said  
 Commission, and the several Statutes therein mentioned, to will and require,  
 authorize and impower, you, and every of you, to whom this our Warrant is  
 directed, forthwith to enter into and upon the House and Houses of him the  
 said *A. B.* and also into all other Place or Places, belonging to him the said  
*A. B.* where any of his Goods are, or are suspected to be, and there seize all the  
 ready Money, Jewels, Plate, Household Stuff, Goods, Merchandize, Books  
 of Account, and all other Things whatsoever belonging to him the said *A. B.* and  
 such Things as you shall so seize you shall cause to be inventoried and appraised,  
 by honest Men of Skill and Judgment, and the same you shall return to us  
 with all convenient Speed, and what you shall so seize you shall safely detain  
 and keep in your Possession until we shall give you Order for the Disposal  
 thereof; and in Case of Resistance, or of not having the Key or Keys, or any  
 Door or Lock belonging to any Place or Places of him the said *A. B.* where  
 any of his Goods are, or are suspected to be, you shall break open, or cause  
 the same to be broken open, for the better Execution of this our Warrant.  
 Given under our Hands and Seals this 24th Day of *January*, in the Year of  
 our Lord 1791.

To *G. H.* our Messenger, and  
 also to *J. K.* his Assistant.

*J. H.*  
*J. W.*  
*A. H.*

To all Mayors, Bailiffs, Constables, Headboroughs, and all other his Ma-  
 jesty's loving Subjects, whom we require to be aiding and assisting in the  
 Execution of this our Warrant, as Occasion shall require.

5 Geo. II. C. And likewise send a Summons to the Bankrupt, which is also his Warrant of  
 30. S. 2. Protection from Arrests during the forty-two Days allowed for his Examination,  
 or the farther Time granted for finishing it, being forty-nine Days, the Form of  
 which is as follows:

**W**HEREAS a Commission of Bankrupt on the 24th Day of *January*,  
 1791, issued under the Great Seal of *Great Britain*, against you *A. B.* of  
*Essex* Dealer and Chapman; and whereas the major Part of the Commissioners  
 in the said Commission named and authorized, have declared you to be a Bank-  
 rupt; We the said Commissioners do hereby summon and require you the said  
*A. B.* personally to be and appear before the Commissioners in the said Com-  
 mission named, or the major Part of them, on the Day of In-  
 stant, at nine in the Morning, and on the and Days of next,  
 at three in the Afternoon, at *Guildhall, London*, then and there to be examina-  
 ed, and to make a full and true Discovery and Disclosure of all your Estate and  
 Effects, according to the Direction of the Acts of Parliament now in Force  
 concerning Bankrupts; and particularly the Act passed in the fifth Year of his  
 late Majesty's Reign, entitled, *An Act to prevent the committing of Frauds*  
*by Bankrupts*; and herein fail not at your Peril. Given under our Hands  
 Day of 1791.

To *A. B.* the Bankrupt.

*J. H.*  
*J. W.*  
*A. H.*

As soon as the Warrant of Seizure is executed, and the Bankrupt has received  
 his Summons from the Commissioners, he ought in Prudence to surrender himself  
 at their first Meeting, as well to shew his Willingness of complying with the Sta-  
 tute as to secure himself from Arrests and Imprisonment, though his appearing at  
 the said Time is not absolutely required.

And after such Surrender, the Bankrupt shall, at all reasonable Times, before the Expiration of the forty-two Days, or such further Time as shall be allowed him to finish his Examination, be at Liberty to inspect his Books, Papers, Writings, and Accounts, in the Presence of his Assignee or Assignees, or any Person appointed by them, and shall have Liberty to bring with him such Persons as he shall think fit, not exceeding two at a Time, to make out such Extracts and Copies from thence as he shall think fit, the better to enable him to make a full and true Discovery of his Estate and Effects; and in Order thereto the said Bankrupt shall be free from all Arrests, Restraint, or Imprisonment of any of his Creditors in coming to surrender, and from the actual Surrender of such Bankrupt for and during the said forty-two Days, or such farther Time as shall be allowed him for finishing his Examination.

Provided the Bankrupt was not in Custody at the Time of such Surrender, and in Case he shall be arrested for Debt, or on any Escape Warrant in coming to surrender himself, or after his Surrender within the Time afore-mentioned, that then upon producing such Summons, under the Hands of the Commissioners or Assignees, to the Officer who shall arrest him, and making it appear to such Officer, that the Summons was signed by the Commissioners or Assignees, and giving the Officer a Copy thereof, he shall be immediately discharged; and in Case any Officer shall detain such Bankrupt, after he shall have shewn such Summons to him, and made it appear it was signed as afore said, in his Custody, such Officer shall forfeit and pay to the Bankrupt for his own Use, the Sum of five Pounds for every Day the Officer shall detain him, to be recovered by Action of Debt in any of his Majesty's Courts of Record at Westminster, in the Name of the Bankrupt, with full Costs of Suit.

A Commission of Bankrupt issued against *Philips de Fries* in the Month of July 1732, and he was declared a Bankrupt, and required to surrender himself to the Commissioners; and when the Messenger executed the Warrant of Seizure, the Bankrupt, without Resistance, delivered up his Keys and Effects to him, and promised to submit to the Commissioners, and comply with the Directions of the Act.

The Summons was not served upon him till the first Day mentioned for his Surrender in the *Gazette*, and three Days after executing the Warrant of Seizure, and about an Hour after the Service of the Summons, and before he surrendered himself, he was arrested, and thereupon he petitioned the Lord Chancellor, amongst other Things, to be discharged; and the Petition came to be heard before he had surrendered himself; and upon the Hearing, Lord Chancellor King so far considered what he had done, and which was all that he could then do, as a Compliance with the Act, that he held he ought to be discharged, but dissuaded the Bankrupt from suing the Officer for the Penalty; and thereupon an Order was made accordingly by Consent.

Every such Bankrupt, after Assignees shall be appointed, is to deliver upon Oath or Affirmation, before one of the Masters of Chancery, or Justice of Peace, unto such Assignees, all his Books of Accounts and Writings, not seized by the Messenger of the Commission, or not before delivered up to the Commissioners, and then in his Power, and discover such as are in the Power of any other Person, that any Ways concern his Estate; and every such Bankrupt, not in Prison, shall after such Surrender be at Liberty, and is required to attend such Assignees upon Notice in Writing, in Order to assist in making out the Accounts of the Estate.

If the Person against whom the Commission is taken out, is in Prison or Custody, the Commissioners grant their Warrant to the Warden of the *Fleet*, or Marshal of the King's Bench, or to any Person who has the Bankrupt's Body in Custody on meise Process, to bring him to be examined before them.

But if the Bankrupt is in Execution, and cannot be brought before the Commissioners, then the acting Commissioners shall from Time to Time attend the Bankrupt in Prison or Custody, and take his Discovery as in other Cases.

And

It is undoubtedly the Obligation of every Person, who is so unfortunate as to have a Commission of Bankruptcy taken out against him, to behave in every Respect with the greatest Integrity, and to do all Things in his Power to serve his Creditors, as well by his Assistance in settling his Accounts, which he should carefully place in the clearest and truest Light, as by his diligent Attendance on the Assignees, and putting them in the best Method of securing and recovering his Effects; for the Loss of his Creditors should not be augmented through his Neglect, as a Man has it always in his Power to be honest, though he cannot command Fortune, or very often prevent Misfortune; however, as Honesty is not a constant Attendant on all Bankrupts, the Law has furnished the Commissioners with a sufficient Power to oblige them to submit to an Examination, and to make them be just in it. For

11 *Edw. C. 7.*  
17 *Jac. I. C. 17.*  
21 *Jac. I. C. 19.*

5 *Geo. II. C. 30. S. 1.*

If the Bankrupt shall refuse to be examined, or not give a full and satisfactory Answer to every Interrogatory ministered to him by the Commissioners, it shall be lawful for them to commit the said Offender to some strait or close Imprisonment, there to remain until he shall better conform himself. And,

If the Bankrupt shall not, within forty-two Days after Notice for his Surrendering in Writing, left at the usual Place of his Abode, or on Personal Notice if the Bankrupt be in Prison, and Notice given in the *London Gazette*, that such a Commission is issued, and of the Time and Place of Meeting of the Commissioners, surrender himself to them, and sign such surrender, and submit to be examined from Time to Time upon Oath, by and before such Commissioners, and in all Things conform to the several Statutes already made and now in Force concerning Bankrupts, and also upon such his Examination, fully and truly disclose and discover all his Effects and Estate, real and personal, how and in what Manner, and to whom and upon what Consideration, and at what Time or Times he hath disposed of, assigned or transferred any of his Goods, Wares, Merchandizes, Monies, or other Estate and Effects, and all Books, Papers, and Writings relating thereto, of which he was possessed, or in, or to which he was any Ways interested or intitled, or which any Person or Persons had or hath, or have had in Trust for him, or for his Use, at any Time before or after the issuing of the said Commission, or whereby such Person, or his Family, hath, or may have, or expect any Profit, Possibility of Profit, Benefit, or Advantage whatsoever, except only such Part of his Estate and Effects as shall have been really and *bona Fide* before sold or disposed of in the Way of his Trade and Dealings, and except such Sums of Money as shall have been laid out in the ordinary Expences of his Family; and also upon such Examination, deliver up to the said Commissioners all such Part of his Goods, Wares, Merchandizes, Money, Estate, and Effects, and all Books, Papers, and Writings relating thereto, as at the Time of such Examination shall be in his Possession, Custody or Power, his necessary Wearing-Apparel, and that of his Wife and Children only excepted, then he, the said Bankrupt, in Case of any Default and wilful Omission, in not surrendering and submitting to be examined as aforesaid, or in Case he shall remove, conceal, or embezzle any Part of such his Estate, real or personal, to the Value of twenty Pounds, or any Books of Accounts, Papers, or Writings relating thereto, with an Intent to defraud his Creditors, and being thereof lawfully convicted by Indictment or Information, shall be deemed and adjudged to be guilty of Felony, and shall suffer as a Felon, without Benefit of Clergy, or the Benefit of any Statute made in Relation to Felons; and in such Case, such Felon's Goods and Estate shall go and be divided among the Creditors, seeking Relief under Commission.

*Ditto, S. 3.*

Though it is lawful for the Lord Chancellor, Lord Keeper, or Commissioners of the Great Seal, to enlarge the Time for such Person's surrendering himself, and discovering his Effects, as the said Lord Chancellor, &c. shall think fit, not exceeding fifty Days, to be computed from the End of the said forty-two Days, so as such Order for enlarging the Time be made by the Lord Chancellor, &c. six Days, at least, before the Time on which such Person was to surrender himself, or make such Discovery as aforesaid.

such Grievan

OF BANKRUPTCY.

When the Bankrupt has past his last Examination, and his Certificate is signed by four Fifths of his Creditors in Number and Value, who have proved their Debts, and have each owing to them 20*l.* or upwards, the Commissioners then certify to the Lord Chancellor, that the Bankrupt hath in all Things conformed to the several Statutes made and now in Force concerning Bankrupts, and the said Bankrupt having made Oath that the signing his Certificate was obtained fairly and without Fraud, and due Notice having been given of his said Conformity in the *London Gazette*, and no Objection made by any of the Creditors to the Allowance thereof, his Lordship is pleased to allow the Certificate in the following Manner :

529  
5 Geo. III. C.  
30, S. 12.

May 10, 1791.

WHEREAS the usual Notice hath been given in the *London Gazette* of Tuesday the Day of \_\_\_\_\_ and none of the Creditors of the above-named A. B. have shewn any Cause to the contrary, I do allow and confirm this Certificate.

Thurlow, C."

When such Certificate is allowed, the Bankrupt is discharged of his Debts, and is not liable to be sued or arrested for any one entered into before his Failure, although he should be taken in Execution or detained in Prison in Consequence of a Judgement obtained before his Certificate was allowed and confirmed; and it shall be lawful for any one or more of the Judges of the Court wherein Judgement has so been obtained, on the Bankrupt's producing his Certificate allowed and confirmed, to order any Sheriff, Bailiff, or Officer, Gaoler or Keeper of any Prison, who hath or shall have such Bankrupt in his Custody, by Virtue of any such Executions, to discharge him without Payment of any Fee or Reward.

Ditto, S. 13.

A Bankrupt having his Certificate allowed, and having slipt his Time of Pleading at Law to a Debt precedent to the Bankruptcy, is not to be relieved in Equity.

Ex Parte Goodwin 2 Vern. 696.

A Bankrupt after his Certificate was allowed, was sued for a Debt due before his Bankruptcy; the Court on the Circumstances of the Case did relieve, though it will not relieve on a Matter purely of mispleading.

Trin. 1715. Blackwall v. Combr.

A Certificate discharges not only the Person of the Bankrupt but also his Estate subsequently accrued.

Tr. Ark. Rep. 257. Pl. 138.

The Preamble to this Act states, That many Bankrupts are confined in Prison, notwithstanding they have delivered up their Effects. And, that Bankrupts; for Fear of being arrested and thrown under long Imprisonment, abscond and secrete themselves from their Homes, or go abroad into foreign Parts, to the great Distress of their Families, and the Detriment of the Kingdom: For Remedy whereof it is enacted,

12 Geo. III. C. 47.

That Bankrupt who was in Custody on or before 25th March, 1772, for any Debt due before Commission issued, and who conforms to the Bankrupt Laws, and never was committed for Contumacy, or Non-compliance with these Laws; any Judge of the Court whence the Process issued against the said Bankrupt, on his Petition may summon Plaintiff to appear to shew Cause, why he should not be discharged from his Imprisonment; Bankrupt first making Oath that Debt did not accrue before issuing Commission, and Plaintiff not appearing, or not proving that Bankrupt concealed any of his Effects, or did not conform himself to the Laws against a Bankrupt, the Judge shall by Warrant or other Instrument, discharge him from Imprisonment for any Debt due before Commission issued; and he shall not be liable to be arrested for any Debt due or contracted before such Commission issued. And, if arrested, shall be discharged in like Manner as aforesaid from every such Arrest.

Sect. 3

Bankrupts included in Stat. 12 Geo. III. C. 47. S. 3. having not as yet returned Home, or not being able to Act in their Occupations, from some certain Circumstances of their Case, such Persons, though they have not gained a total Discharge from their Creditors, or their Debts under their Commissions, may apply by Petition or Motion to the Court of Chancery, setting forth such Grievance and Circumstance they may lie under, relative to such Commission,

14 Geo. III. C. 77. Sect. 63.

sion, which Petition, &c. the Court is to refer to a Master; and, upon Report or Hearing thereof, shall direct the Commissioners to certify the Proceedings under the Commission, and Court shall make such Order thereupon for the Relief of such Bankrupts, as shall seem proper.

16 Geo. III. Bankrupts on or before the 22d Jan. 1776, who have duly conformed, sur-  
C. 38. S. 69. rendered, and submitted, and who have not been guilty of Contumacy, nor discharged under their Commissions, may petition and move the Court of Chancery, upon this Grievance of the Case: Which Matter the Court may refer to a Master, and, upon Report, the Chancery may direct the Commissioners to certify Proceedings, and order their Discharge or Relief.

18 Geo. III. Bankrupts who have not obtained their Certificates, and Discharge from their  
C. 52. S. 75. Debts under the Bankrupt Acts, or being imprisoned before the 28 Jan. 1778, and against whom Commissions have been awarded, who have duly conformed, and not been committed by Commissioners for Contumacy, and are in Prison for Debt, or secrete themselves for Fear of their Creditors, and shall be first, may apply to the Judge of the Court where Process issued, to summon Plaintiffs, to shew Cause why Bankrupts should not be discharged, on making Oath that the Debt accrued previous to the Commission; and on satisfying the Judge, that they fully disclosed and delivered up their Estate and Effects, and upon also making it appear to him, that they had duly conformed, and that the Commissions were not fraudulently obtained, hereupon, the Plaintiffs not proving any Concealment, the Judge may discharge Bankrupts, on their entering common Appearances; and if they be afterwards arrested, such Judge may order them, upon Summons, to be discharged, which Sheriffs and their Officers are to do on Notice; but Bankrupts in all other Respects remain subject to the Law.

Bankrupts before 28 Jan. 1778, who have conformed, and not been committed for Contumacy, and yet not discharged, for Want of their Certificate, may, within twelve calendar Months from the Date of the Commission, petition or move the Court of Chancery, on the true Circumstances of the Case; which Court may order the Commissioners to certify Conformity, or Non-conformity; whereupon Court of Chancery is to direct an Advertisement in the Gazette for allowance of Certificate (though same be not signed by four-fifths in Number and Value of Creditors) and if no sufficient Cause be shewn within the Time limited by the Advertisement, the same is to be allowed and the Bankrupt ordered Relief and Discharge\*.

A Creditor petitions against the Allowance of a Bankrupt's Certificate, upon which the Bankrupt gives him a Bond for Payment of his whole Debt, in Consideration of withdrawing his Petition, and in Consequence of his so doing the Bankrupt obtains his Certificate; but refusing afterwards to comply with his Bond, the Creditor put it in Suit against the Bankrupt, who pleaded the Act of Parliament, and that the Bond was obtained in Order to procure his Discharge; but he could not be relieved in Equity against the Bond.

A joint Commission was taken out against the Defendant and Partner, and their Certificate was allowed; and the Defendant was now sued by the Plaintiff for a Debt due on his separate Account, and arrested; to which the Plaintiff pleaded, that the Cause of Action arose before that of Bankruptcy, and therefore moved that he should be discharged out of Custody, upon filing common Bail, which was allowed; it being held, that the Statute of the 5th of Geo. II. which says, *that in Case in any such Bankrupt shall afterwards be arreſted, prosecuted, or impleaded for any Debt due before such Time as he became Bankrupt, such Bankrupt shall be discharged upon common Bail*, is in general Words, that the Bankrupt shall be discharged on common Bail, from all Debts owing by him before the Bankruptcy, and makes no Distinction between a joint and separate Commission.

Three Commissions of Bankrupt issued at the same Time, one against A. separately, one against B. separately, and a joint one against A. and B. as Partners in Company; and the Certificates on the two separate Commissions were confirmed

\* These are the most recent Statutes made in Favour of Bankrupts.

And the c  
follows:

by the Lord Chancellor, and delivered to the Bankrupts, and four Fifths in Number and Value of the Company Creditors signed a Certificate for the Bankrupt's Discharge on the joint Commission :

But at the Time the joint Certificate was to have been confirmed, one of the joint Creditors applied by Petition to the Lord Chancellor ; suggesting that *A.* had lost more than five Pounds at Gaming in one Day, within the Year before the Commission issued, and therefore was not entitled to be discharged ; and the Lord *Macclesfield* not only refused to confirm the joint Certificate, but ordered the former separate Certificate of *A.* to be recalled and disallowed, and allowed the joint Certificate as to *B.* only.

And being a Matter of great Consequence to *A.* who as soon as his Certificate was allowed, had engaged very considerably in Trade, he ordered his Case to be stated, and took the Opinion of the most eminent Counsel thereon ; and the Questions arising from this Case, were,

1st, Whether it was in the Power of the Lord Chancellor, after a Certificate was duly allowed and delivered to the Bankrupt, and enjoyed by him for several Months, to recall the same *ex Officio*, and deprive the Party of the Benefit of the Discharge.

If the Bankrupt has lost five Pounds at one Time, and the Fact shall be proved before the Allowance of the Certificate, I think the Certificate ought not to be allowed by the Commissioners of Bankruptcy, or by the Great Seal ; but if the Bankrupt hath conformed in all Things, and his Certificate hath been allowed, without any Objections made upon the Account of Gaming by the Creditors, I conceive there is not a Power given to the Great Seal to recall the Certificate.

*S. Cowper, 14 June, 1725.*

2dly. Whether a separate Certificate discharged the Partner from joint Debts ; and the Answer of a great and learned Person, was this,

I was clearly of Opinion at first, that the Bankrupt's separate Certificate, so long as it continued in Force, discharged the Bankrupt, not only from such Debts as were owing from the Bankrupt on the separate Account, but likewise such as were owing on the Partnership Account ; so I continue in the same Opinion. I also concur in Opinion with Mr. *Cowper*, that the Lord Chancellor cannot legally recall the Certificate after it is once confirmed, upon the Account of a Fact which was never proved, or ever objected, before the Allowance of the Certificate.

The Opinion of another most eminent Person to these Questions, was as follows :

1st. As to the Chancellor's Power of recalling the Certificate, he says thus— This is a Question of considerable Difficulty ; but I am rather of Opinion that such a Confirmation cannot be revoked, so as to prevent the Bankrupt's Discharge, because, by the Statutes, conforming to the Acts, and a Certificate confirmed, is made an actual Discharge of the Bankrupt's Debts due at the Time of his Bankruptcy ; and a Revocation, after the Debts are once extinguished, seems to come too late.

And as to the second Question, whether a separate Commission discharged joint Debts ? his Answer was this :

As the Statute extends expressly to all Debts, I am of Opinion that Partnership Debts, being Debts of *A.* the Certificate is equally a Discharge to those Debts as well as others.

There was another Question which arose on this, and being equally interesting with the preceding ones, I have chosen to give the whole at large, for the Satisfaction and Information of my Readers, and it was this, *viz.*

The said *A.* before his Bankruptcy being a Merchant in *London*, and in the Way of his Trade, at the Time he became a Bankrupt, was indebted to several Persons in *Virginia*, and other Plantations : And the Question was, whether his Certificate when confirmed here, would discharge him against such Debts, in Case he went into those Parts ?

And the Opinion of the late Lord *Talbot*, when he was a Counsellor, was as follows :

The

Lord Talbot's  
Opinion,  
when Coun-  
sel, as to  
Plantation  
Debits.

The Effects of *A.* in the Plantations are liable to the Commission here, and the Right to them is vested in the Assignees; and it seems reasonable that this Certificate should be equally extensive as to his Discharge: However as the Laws of *England*, made since *Virginia* and the other Plantations were settled, do not extend to them unless they are expressly named, and as the Laws relating to Certificates do not expressly extend to the Plantations, I am of Opinion, that a Certificate confirmed here will be no Discharge to *A.* if a Suit is commenced against him in *Virginia*, or the other Plantations.

C. Talbot, Dec. 24, 1723.

Another  
Opinion.

And there was also the Opinion of another great Man to this Purpose:

I am of Opinion, that the Act of Parliament will not extend to any of the Plantations, unless they had been particularly mentioned; they being governed by particular Laws and Constitutions of their own making.

In the Year 1732, a Commission of Bankruptcy issued against *Richard Jackson*, Tea Merchant, and an Assignment was made of his Estate to *Thomas Wright* and *James Huey*, in Trust for his Creditors.

Ex Parte  
*Jackson*, be-  
fore Lord  
*Hardwicke*,  
in 1744.

Upon his Examination he made a Discovery of his Estate and Effects, and four Parts in five of his Creditors signed his Certificate; but the Commissioners did not think proper to sign it.

Afterwards he set up the Trade of a Distiller, and in Consequence of such Trading, he became indebted to several Persons, and particularly to one *Thomas Serrel* in 100*l.* and upwards.

On the 31st of *June* 1739, *Serrel* sued out another Commission of Bankruptcy against him, and he submitted to such second Commission, and obtained his Certificate, which was allowed by the Lord Chancellor on the 5th of *June*, 1740.

He then returned to his first Trade, of a Tea Merchant, and contracted Debts to the Amount of several hundred Pounds.

In *May* 1740, *Wright* and *Huey*, the Assignees in the first Commission preferred a Petition, in the Names of themselves and all the Rest of the Creditors under the said first Commission, in order to set aside the second Commission and his Certificate, which was advertised in the *Gazette* to be allowed, unless Cause was shewn to the contrary.

And pending this Petition, viz 24 *May* 1740, a Notice was published in the *London Gazette*, for a Meeting of the Creditors under the first Commission, who afterwards met those under the second Commission; and these latter agreed to give the former a Sum of Money to withdraw their Petition, which they accepted, and withdrew their Petition accordingly; and the Bankrupt having had his Certificate confirmed, continued his Business as before.

But two of his Creditors under the first Commission, on the 17th of *December* 1743, preferred a Petition to the Lord Chancellor, setting forth the Matters before mentioned, and that *Jackson* had not made a fair Discovery of his Estate, and had prevailed on the Assignees under the first Commission not to attend their Petition, by Means whereof the said Bankrupt, to their great Surprise, had obtained his Certificate.

That they were advised, that the second Commission was obtained fraudulently, and that the issuing of the same under those Circumstances was irregular, and that the said Certificate was obtained in order to prevent the Creditors under the first Commission from recovering their Debts, though they were assured the Bankrupt was then able to pay them.

They therefore prayed that the Commission might be supereded, and that all Proceedings under the same, with the Bankrupt's Certificate, might be set aside.

But his Lordship ordering the Parties to attend, and that the Proceedings under both Commissions should be produced; and the Petition coming on before his Lordship, after being learnedly argued by the Gentlemen at the Baron both Sides, he, was pleased for the following Reasons, among others, to dismiss the Petition:

1st. Because the Parties had acquiesced in the Allowance of the Certificate under the second Commission, from the 5th of *June* 1740, being the Time of *Jackson's* obtaining

staining such Certificate, to the 17th of December 1743, and had never made any Complaint of the same.

That there had been a Meeting between the Assignees and several of the Creditors, under the first and second Commission; and that the Petition, which was intended to be presented to the Court for staying the Bankrupt's Certificate under the second Commission, was by the Consent of the Assignees and Creditors under the first Commission, who were present and had publick Notice in the *Gazette* to meet the Assignees and Creditors under the second, and circular Letters sent them for that Purpose; and that they had agreed, that such Petition should be withdrawn, in Consideration of a Sum of Money paid by the Creditors under the second Commission, to the Creditors under the first Commission; and that this was in the Nature of an Acquiescence and Consent from the Creditors of the first Commission, that *Jackson* should have his Certificate under the second Commission.

3dly. That it did not appear to him, but that the Petitioners were well acquainted with the Steps that were taken by the Assignees and Creditors in the first Commission, in Regard that they had not denied the same by their Affidavit, but had only sworn that they did not know, remember, or believe, that they ever consented to the withdrawing of the Petition, preferred by the Assignees as aforesaid, to set aside the Certificate under the second Commission; and that if the Assignees had done amiss, the Creditors had a Remedy against them.

4thly. That *Jackson* had, under the Sanction of the Court, carried on a considerable Trade, and that it would be contrary to the Justice of a Court of Equity, to prejudice innocent Persons, who might have been induced to give future Credit, believing him to be a free Person, on having such Certificate; and the Consequence would be, that all his Dealings from that Time must opened and unravelled.

When a Bankrupt has in all Things conformed himself to the Acts made concerning Bankruptcy, he shall be allowed by the Assignees *5l. per Cent.* out of the nett Produce of all the Estate that shall be recovered in and received; provided the said nett Produce, after such Allowance, shall be sufficient to pay the Creditors ten Shillings in the Pound, and so as the said *5l. per Cent.* shall not amount in the whole to above *200l.* and in Case the nett Produce, after deducting the following Allowance, shall be sufficient to pay the Creditors twelve Shillings and Sixpence in the Pound, the Bankrupt in this Case shall be allowed *7l. 10s. per Cent.* so as that such Allowance shall not amount in the whole to above *250l.* And in Case the nett Produce, after the following Allowance is deducted, shall be enough to pay the Creditors fifteen Shillings in the Pound, the Bankrupt shall be allowed *10l. per Cent.* provided it does not amount in the whole to above *300l.* But if the said Bankrupt's Estate is not sufficient to pay the Creditors ten Shillings in the Pound nett, as aforesaid, then, and in such Case, the Bankrupt shall only be allowed so much as the Assignees and Commissioners shall think fit, not exceeding *3l. per Cent.*

The Commissioners shall, upon lawful Request made to them by the Bankrupt, not only make a true Declaration to him of the employing and bestowing all his Lands, Tenements, Hereditaments, Offices, Fees, Goods, Wares, Money, Chattels, and Debts paid and satisfied to his Creditors; but also make Payment of the Overplus of the same, if any such shall be, to the said Bankrupt, his Executors, Administrators, or Assigns; and the Bankrupt, after full Satisfaction of his Creditors, shall have full Power and Authority to recover and receive the Residue and Remainder of the Debts to him owing.

*Lord Hardwicke* directed, that a Bankrupt who had paid *14s. 6d.* in the Pound, who had his Certificate, and a Release from his Creditors of all further Demands, shall stand in the Place of the Assignees to get in the Remainder of the Debts, on giving a proper Indemnity to the Assignees, that they might not be called to an Account for such Money so received. *Tr. Atk. Rep. 145. Pl. 84.*

And though the Bankrupt shall have obtained his Certificate, and the same has been duly confirmed, it does not put an End to his Duty of Attendance, as he is obliged to give it upon every reasonable Notice in Writing delivered to him, or left at his usual Place of Abode, by the Assignees, thereby requiring him to attend them,

them, in Order to make up, adjust, or settle any Account or Accounts between such Bankrupt, and any Debtor to, or Creditor of him, or to attend any Court or Courts of Record, in Order to be examined touching the same, or for such other Business as the Assignees shall judge necessary, for getting in the Bankrupt's Estate and Effects; and for which Attendance the Bankrupt shall be allowed the Sum of two Shillings and Sixpence *per Diem* by the Assignees, to be paid out of the Estate; and in Case such Bankrupt shall neglect or refuse to attend, or on such Attendance shall refuse to assist in such Discovery, without good Cause to be shewn to the Commissioners for such his Neglect or Refusal, to be by them allowed as sufficient, such Assignees making due Proof thereof upon Oath, before the said Commissioners, they the said Commissioners are hereby empowered and required, to issue a Warrant directed to such Person or Persons as they shall think proper, for apprehending such Bankrupt and him committing to the County Jail, there to remain in close Custody without Bail or Mainprize, until he shall duly conform to the Satisfaction of the said Commissioners, and be by them, or the special Order of the Lord Chancellor, or otherwise by due Course of Law discharged; and the Jailor is thereby required to keep such Person in close Custody within the Walls of the Prison, until he be duly discharged as aforesaid.

*5 Geo. II. c. 30. S. 9.* In Case any Commission of Bankruptcy shall issue against any Person, who after the 24th of June, 1732, shall have been discharged by Virtue of this Act, or shall have compounded with his Creditors, or delivered to them his Effects, and been released by them, or being discharged by any Act for Relief of Insolvent Debtors, then the Body only of such Person conforming, shall be free from Arrest and Imprisonment; but the future Estate of such Person shall remain liable to his Creditors; the Tools of Trade, necessary Household Goods, and necessary Wearing Apparel of such Bankrupt, and his Wife, and Children excepted, unless the Estate of such Person shall produce clear fifteen Shillings in the Pound.

*Ditto, S. 12.* Nothing in this Act shall give any Advantage to any Bankrupt, who shall upon Marriage of any of his Children have given above the Value of 100*l.* unless he shall prove by his Books, or otherwise, upon his Oath or Affirmation before the Commissioners, that he had remaining other Estates sufficient to pay every Person to whom he was indebted their full Debts; or who shall have lost in one Day the Value of 5*l.* or in the whole the Value of 100*l.* within twelve Months next preceding his becoming Bankrupt, at Cards, Dice, Tables, Tennis, Bowls, Billiards, Shovel-board, or Cockfighting, Horse-races, Dog-matches, or Foot-races, or other Game, or by bearing a Share in the Stakes, or betting, or that within one Year before he became Bankrupt, shall have lost 100*l.* by Contracts for Stocks, or Shares of any publick Funds, where such Contract was not to be performed within one Week from the Making, or where the Stock was not actually transferred.

*Ditto, S. 14.* Upon Certificate under the Hands and Seals of the Commissioners, that such Commission is issued, and such Person proved before them to become Bankrupt, it shall be lawful for any of the Justices of any of his Majesty's Courts of King's Bench, or Common Pleas, or Barons of the Exchequer, &c. and they are required, upon Application made, to grant their Warrants for apprehending such Person, and him to commit to the common Jail of the County, where he shall be apprehended, there to remain until he be removed by Order of the Commissioners; and the Jailor to whose Custody such Person shall be committed, is required to give Notice to one of the Commissioners, of such Person being in his Custody; and the Commissioners are empowered to seize the Effects of such Bankrupt, the necessary Wearing-Apparel of such Bankrupt, or of his Wife or Children, excepted, and his Books of Writings, which shall be then in the Custody of such Bankrupt, or of any other Person in Prison.

*Ditto, S. 15.* If any Person so apprehended shall, within the Time allowed, submit to be examined, and conform as if he had surrendered, such Person shall have the Benefit of this Act, as if he had voluntarily come in.

*Ditto, S. 41.* Upon Petition of any Person, the Lord Chancellor may order such Commissions, Depositions, Proceedings, and Certificates to be entered of Record; and in

*Abr. Equity Cases.* 54.

*Allen's Case.*

A Legacy given to a Bankrupt before his Bankruptcy was assigned.

If a Bankrupt convey to his Children, or other Persons, any of his real or personal Estate, except the same shall be purchased, or conveyed, or transferred to his Children in Consequence of Marriage, or some valuable Consideration, the Commission shall over-rule.

Commissioners may assign all Debts, due, or to be due to the Bankrupt, which shall fully vest the Property in the Assignee, and he may sue in his own Name.

The Commissioners by Bargain and Sale, indented and inrolled in one of the Courts of Record at *Westminster*, may grant any Lands or Hereditaments, of which the Bankrupt hath an Estate in Tail, in Possession, Reversion, or Remainder, except whereof the Gift of the Crown, the Reversion or Remainder shall be in the King, and the Commissioners may redeem Mortgages upon Lands or Goods.

A Man devised his Lands in Mortgage to be sold, and the Surplus to be paid his Daughter, who married a Man who soon after became Bankrupt and died; upon a Bill brought by the Assignees against the Wife, to have the Land sold and the Surplus paid to them, the Court dismissed the Bill.

As to the Sale of Lands in a Bankrupt's own Possession at the Time of his Failing, the Case of *Allen*, in the *Chancery*, 1 Jac. I. is a very remarkable one; and was as follows: *Edwards*, a Citizen of *York*, who had served the Office of Sheriff there, being indebted to *Allen*, *Haberfley*, and others of *London*, for Wares sold, became a Bankrupt; upon which *Allen* and *Haberfley*, and some other Creditors of *London*, by a Petition to the Lord Chancellor, procured a Commission of Bankruptcy against the said *Edwards*, to certain Commissioners therein named; who, by Deed of Bargain and Sale inrolled, sold all the Bankrupt's Lands to *Allen* and *Haberfley* for 400*l.* the Land being then worth 2400*l.* but was sold so cheap on account of many Incumbrances on it, made long before *Edwards* was a Bankrupt, or became indebted to *Allen*, or any of the *Londoners* who sued out the Commission.

After this Sale, the Commissioners, *Allen*, and the other petitioning Creditors, upon full Consideration had of the Bankrupt's Estate, which stood encumbered with a Mortgage, Statute, and Leases, made an Agreement with the Bankrupt and his Friends to this Effect; viz. That the Creditors would take ten Shillings in the Pound for their due Debts, and *Smith* and *Wood* were the Bankrupt's Securities for Payment of the same; and it was agreed, that *Allen* and *Haberfley* should convey the Bankrupt's Land to them for their Security, which Agreement was certified by the Commissioners: and they did also certify, that *Allen*, after this Agreement refused to comply therewith, and sought the Advantage of Law, to the great Loss and Hindrance of the rest of the Creditors, and to the Undoing of *Edwards*, his Wife, and Children.

In Execution of this Agreement, twelve Pounds ten Shillings was paid to one of the Creditors, and Books were drawn and ingrossed by one of the Commissioners ready for perfecting the Assurance; notwithstanding all which, *Allen* retreating the Agreement with *Haberfley*, preferred a Bill against *Edwards* and others, complaining, that the Mortgage, Statute, and Leases were all fraudulent, and the Money being paid was kept on Foot by Practice, to prejudice the Creditors, and the Sale made by the Commissioners: Whereupon *Edwards*, *Smith*, and *Wood*, preferred a cross Bill against *Allen* and *Haberfley*, for the Performance of the Agreement of ten Shillings in the Pound, and to convey the Land to *Smith* and *Wood* according to the Agreement.

At the Hearing of the Cause upon *Allen's* Bill, the Lord Chancellor, finding it confessed, that of the Mortgage Money there was but thirty Pounds unpaid, ordered that *Allen*, paying the thirty Pounds, should have the same conveyed to him and *Haberfley* & al. and the Statute to be discharged, which was done accordingly and a Decree made, that *Allen* and *Haberfley*, and their Heirs, should enjoy the Lands according to the Sale of the Commissioners, free from the Incumbrances and Charges of the Statute, and the Person who had it was left to the

the Law; but upon another Motion, his Lordship had stayed the *Liberate*, after Extent upon that Statute; and so it rested.

*Allen* having gotten the Incumbrances thus cleared by the Court of *Chancery*, fought to hold the Lands for the 400*l.* only, which were worth 2400*l.* although he had covenanted with the Commissioners in the Bargain and Sale, that if the Lands were sold for more than 400*l.* within three Years, he would pay the Overplus towards the Satisfaction of the Creditors; and all Incumbrances being discharged within the three Years, as aforesaid, yet he would hold the Land for 400*l.* and pay no more for it.

In another Term, *Allen* gets a Commission out of *Chancery*, to the Sheriffs of *York* there, to put him in Possession of the Land, upon the said Decree in *Chancery* made for him; and *Allen*, with the Under-Sheriff, call *Edwards's* Children all out of Doors in Frost and Snow, that they were intreated to facear themselves in a Mash Fat, and when some of the Tenants of the Land would have taken them in, and relieved them, *Allen* threatened to turn them out of their Tenements if they did so; and did turn one of the Tenants out of his House, who entertained them but one Night. Also *Allen* took divers Cattle and Goods for them in the *Kings-Bench* Court, *Allen* procured an Injunction out of *Chancery*, and staid all the Suits as long as the old Man lived, who shortly died; and *Edwards* and his Wife at *London*, following the Suit to be relieved against *Allen*, died both together of the Plague, leaving seven poor Children behind them.

The Lord Chancellor, being informed of this Extremity by Petition and Affidavit, gave Direction that the Bill which *Edwards, Smith*, and *Wood* preferred upon the Agreement of ten Shillings in the Pound, should be revived in Behalf of the poor Children; and his Council assigned *Wood* their Guardian to prosecute, and *Francis Moore* to be of their Council *in Forma Pauperis*.

This Cause coming to Hearing, and the Agreement appearing confessed by *Allen's* Answer, and proved by the Certificate of the Commissioners, and divers Witnesses; the covetous and unconscionable Dealing of *Allen* likewise appearing plainly, by the Covenant which they took of *Allen*, the Lord Chancellor decreed *Allen* should pay the Overplus of the Value of the Lands above 400*l.* if they should be sold for more; and the uncharitable and unchristian Usage of *Allen* towards the poor Children of *Edwards*, being all Infants not able to help themselves, considered, did decree, that *Allen* and the Rest should be satisfied with ten Shillings in the Pound for their Debts, according to the Agreement certified by the Commissioners; but no Abatement to be made of the 400*l.* paid for the Land, nor of the 30*l.* paid for the Mortgage; and withall, that *Allen* should have reasonable Allowance for Coats of Suit; and for this Purpose his Lordship made a Reference to Sir *John Tindal*, a Master in *Chancery*, to cast up the Estate of the Bankrupt and the Debts, and to certify what Overplus he found for the Relief of the poor Children.

Sir *John Tindal* often heard the Cause, and the Allegations of *Allen* and his Council, and in the End made a Certificate of the Estate real and personal of the Bankrupt, and of the Debts, and made all Allowances as by the Order was directed, and gave to *Allen* for Coats of Suit two hundred Marks, and to *Haberley* a hundred Marks, and seventy Pounds to all the Creditors that sued out the Commission; and for the Residue, did propose it as his Opinion, that *Allen* should keep the Land, and pay the Overplus of the Value thereof above the 400*l.* or part with the Land to *Smith & al.* who would pay *Allen* and the other Creditors according to the Report. and yield the Overplus to the Children, amounting to 600*l.* or thereabouts.

On reading the Master's Report, the Lord Chancellor gave Time to *Allen* to make his Election, whether he would keep the Land and pay the Money, or part with the Land and receive the Money; And as *Allen* made no Election, but insisted upon the Advantage, to have the Land for 400*l.* worth 2400*l.* and would render nothing to the Creditors, nor to the poor Children:

The Lord Chancellor did now decree, that *Allen* should receive the Money mentioned in the Report, which was much more than in Equity was any Ways due unto him, and convey the Lands according to the Report; and for not performing this Decree, *Allen* was committed to Prison. *This Cause began the 1 Jac. and ended 11 Jac. 1.*

*W. Jones,*  
Rep. 103.  
4 Car. 1. B. R.  
*Audley and*  
*Hobly.*

It is laid down as a Rule, that where the Owner of Lands, &c. by his own Act may not controul a Gift or a Charge; there, if he becomes a Bankrupt, the Gift or Charge may not be defeated: so that if a Man bargain and sell Lands, and before Inrolment becomes a Bankrupt; and the Deed afterwards is inrolled; in that Case, the Land may not be sold by the Commissioners of Bankrupts, but the *Bargainee* shall hold the Land discharged from the Commissioners. And where a Person gives Lands, upon a precedent Condition, to be performed by the *Dowry*, and becomes a Bankrupt, after which the Condition is performed, this defeats the Power of the Commission.

Although the Commissioners in the aforementioned Case cannot sell the Land, where the Party before Inrolment becomes a Bankrupt, according to the Rule laid down by *Jones*, yet it is said, if he makes a Feoffment of Lands, and a Letter of Attorney to give Livery, and then becomes Bankrupt before the Seisin is delivered, these Lands may be sold by the Commissioners. The Reason of the Difference is, in the first Case the *Bargainee* is in by the Bargain and Sale, by Relation from the Execution thereof, and not by the Inrolment; and the Bankrupt could not by his own Act defeat this; but no Estate in the other Case passeth at all till the Livery be executed; and then in this last Case, his Letter of Attorney is revocable, and his becoming a Bankrupt before the Estate is executed, is *quasi* a Countermand or Revocation in Law.

In Ejectment, upon a special Verdict, the Question was, whether the *Vendee* or *Bargainee* of the Commissioners upon the Statute of Bankrupts, of Lands by Deed indented, may by his Lessee maintain an Ejectment before the Inrolment of the Deed, although it be inrolled after the Action brought; Here it was said by the Court, that there is a great Difference between this Case and the Case of a Bargain and Sale by the Statute 27 Hen. VIII. Cap. 10. of Uses; for the Estate there passeth by the Contract, and the Use is executed by the Statute: Then comes the Statute of Inrolments, Cap. 16. of the same Year, which enacts, That *no Estate shall pass without Inrolment of the Deed indented, and that within six Months, the Words of the Act being, unless it be by deed indented and inrolled, and therefore the Contract is with the Party that had the Estate, and the Deed is appointed to be inrolled within a certain Time.*

*Perry v. Bowers,*  
1 Term 1790,  
197.

But here the Commissioners have not any Estate, only a Power which ought to be executed by the Means prescribed by the Statute, with the Circumstances thereby directed; that is, not only by the Deed indented, but inrolled also: And if they do not pursue the Act according to their Power, there is no Execution or Effect to pass the Estate; and it would be very dangerous to make any other Construction, as no Time is limited by the said Act for the Inrolment; for it were inrolled any Time after seven, or twenty Years, or a longer Time, it shall relate as well to the making of the Deed, as any shorter Time; and Judgment was given for the Defendant.

1 Feat. 361.

The Case being argued by *Saunders*, as reported in *Ventris*, he pleaded, that in the Case of Inrolment of a Bargain and Sale, the Deed itself passeth the Use, and the Statute of Inrolment obstructs the Operation of it till Inrolment; but when that is done, it passeth by the Deed: That here needs no Relation to avoid the Mischief of mean Assignments from the Bankrupt, because he is restrained from the Time of his first Act of Bankruptcy; and on the other Side, the Mischief would be very great, if there should be a Relation from the Inrolment, in Regard the Statute limits no Time for the doing of it, so that it may be inrolled many Years after; and if this should relate to punish *mesne Trespasses* the Inconvenience would be very great, for such Trespasses are, until the Inrolment, expedit to the Actions of the Bankrupt.

That generally in Cases of common Law, there is no Relation, as in the Case of Feoffment and Livery, but stronger in Case of a Grant of a Reversion, where the

the Attornment is but the Assent of the Tenant; yet it shall not relate to the Grant: It would be hard if Relation should be admitted to make a Man liable to Trespasses; and it has been much doubted, whether a Bargainee before an actual Entry can maintain Action of Trespass.

*Per Curiam*, where Executors sell by Authority given by Will, the Vendee is in the *Per* from the *Divisor*, but here in the *Post*, and by the Statute; and it must be very inconvenient to admit of Relation, because no Time is fixed for the Inrolment.

The Judges in this Case afterwards gave their Opinions, that Sale by Commissioners of Bankrupts, if of Lands, ought to be by Deed inrolled, and is void if otherwise; and that this depends upon the different Penning of the Statute from that of Inrolment; they likewise held, that here shall be no Relation.

A Sale of intailed Lands by the Commissioners shall be good against the Bankrupt and his Issue, and bar Persons in Remainder or Reversion, as much as if himself had suffered a common Recovery. A Case has been put on this Clause of the Statute 21 Jac. I. If Lands are settled on *A.* and *B.* his Wife, before Marriage, for their Lives; and after their Deceases, to the Use of the first Son of their Bodies lawfully begotten, and to the Heirs Male of such first Son; and for Want of such Issue, to the Use of the second Son, &c. in Tail Male, and so to the tenth Son; *A.* becomes a Bankrupt before he hath a Son; whether the Commissioners may sell these Lands, and make a good Estate to the Purchaser? It is held they may; for though *A.* is here not Tenant in Tail, but a bare Tenant for Life, the Words in the Statute being, that the *Bargain and Sale shall be good against all and every other Person or Persons whatsoever, whom the Bankrupt might cut off and debar by common Recovery, or otherwise from any Remainder, Reversion, Rent, Profit, Title, or Possibility*: It seems this Bargain and Sale shall be good; for *A.* the Father, before Issue, by his bare Feoffment, might destroy the contingent Estate; as it is in *Archer's Case*, 1 Rep. 67. But was the Settlement made so, as to support the contingent Remainder, as is usually done, so that the Father could by no Means debar it by any Act he could do, then it would make a greater Question; and yet if the Commissioners could not sell in such Case, as Settlements are generally made now, the Act in this Point might be easily eluded: However this is to be understood in voluntary Settlements.

In Consideration of Marriage, a Man makes a Conveyance to the Use of himself and his Wife; afterwards he becomes a Bankrupt, on which a Commission is taken out, and the Lands are sold by the Commissioners; the Sale has been adjudged good. It is observed in this Case, that within half a Year after the Settlement, the Party became Bankrupt; so as there seems to be a Fraud in the Conveyance; but it is not expressed in the Pleading, as it might have been; and this is not in Dispute upon a special Verdict, but comes in Question on a Point of Pleading, which is to be strongly taken against him that pleads it; and he does not express any valuable Consideration, as he might have done; as Consideration of a Portion, or Performance of Articles made on Marriage, or that the Wife had joined in selling some Part of the Land.

A Settlement was made by the Husband, for a Jointure of his Wife, reciting, that the Wife had joined with the Husband to sell Part of her former Jointure, in which he and she were Tenants for Life, the Remainder in Tail to the first and tenth Son, Remainder to his Heirs: By *Hale C. J.* at a Trial at Bar, this is not fraudulent, though he alone, having no Issue, might bar this contingent Remainder.

And a Man may settle Lands on his Son, before he be a Bankrupt; and if it be not by Fraud and to deceive Creditors, it shall be good, and the Fraud must be found by the Jury. The Statute saith, *The Sale of the Commissioners shall be good against such Offenders, and he is no Offender till he is a Bankrupt.*

If a Man purchases Lands after the Time of his Trading, and his being in Debt, and doth purchase it in the Name of his Wife or Children fraudulently, this will be liable to Sale by the Commissioners: Though it is otherwise, if it be purchased before he comes to be a Merchant. Also any Sale of Lands or Goods by a Bankrupt before he comes to be in Debt, or before his Trading,

*Atch. Rep.* is without Question good; and so are all the Acts he doth, before he comes to appear to be a Bankrupt.

*34 Stat. 157.*  
*174. Langlan v. John Nevil 100. Wylf. 1 Cr. 68.*  
In Case a Bankrupt hath Lands in Right of his Wife, they may be sold during the Coverture; and if she be a *Feme Sole* Merchant in *London*, she becoming Bankrupt, the whole shall be sold; and it shall be counted the Husband's Folly to suffer her to trade, and her Trading shall be looked upon as his; so that she and her Estate in Trade shall be affected by his Bankruptcy. But the Dower of a Bankrupt's Wife shall never be sold, unless she marries one that is a Bankrupt.

*1 Jac. 1.*  
It is clearly held, that if two Persons are jointly seized of Lands, and one becomes a Bankrupt, his Moiety may be sold by the Commissioners: even though he be dead, and the Survivorship shall not take Place.

*Grey v. 89. 90.*  
And where two Women are joint Tenants of a Lease for Years, and one takes a Husband who becomes a Bankrupt; the Commissioners may sell the Interest of a Moiety: And yet this has been questioned; for Chattels real are given to the Husband, if he survive; but if he die before the Wife, she shall have them. If two joint Tenants are disseised, it is likewise a Question, whether the Commissioners shall sell on the Bankruptcy of one of them; for before Entry he could not grant his Moiety, though he might release it.

*Stow 147.*  
As to Lands descended or devised to the Bankrupt after his Bankruptcy, the Commissioners may sell the same: as they may all Offices of Inheritance, such as Warden of the *Fleet*, Keeper of a Forest, &c. but no judicial Office, or Office of Trust which is annexed to the Person, and may not be executed by a Deputy; for if such Officer absents, he forfeits his Office, and then the King's grant is over.

*Blind v. 110.*  
As for Lands mortgaged, or Estates on Condition, by 21 *Jac. 1* Chap. 19. if a Merchant makes a Feoffment on Condition, that upon paying a certain Sum he may re-enter, and then becomes a Bankrupt, the Commissioners may tender the Money at the Day, and make Sale of the Land. But where Lands are mortgaged to a Bankrupt, as of a Feoffment in Fee, in Consideration of a Sum of Money, to be paid to him and his Heirs, provided that if the Feoffor do not pay such a Sum on such a Day, then the Feoffor is to make it an Estate absolute: The Feoffee becomes a Bankrupt, and the Money is not paid on the Day; the Commissioners cannot by this Act force the Feoffor to make an absolute Fee, though *Chancery* will compel him.

*1 Chan. Cafe. 71.*  
*2 Lex. 97.*  
By the Statute, the Commissioners are enabled to perform the Condition, &c. of a Mortgage; but if the Mortgage is forfeited, it has been formerly a Question whether the Commissioners might dispose of the Equity of Redemption; but Serjeant *Newdigate* said it had been ruled in *Chancery*, that Commissioners may assign an Equity of Redemption.

Where the Equity of Redemption of Lands mortgaged was conveyed over to a third Person by a Bankrupt, after his Bankruptcy, though before the Assignment of his Estate by the Commissioners; Lord Chancellor *Talbot* held that nothing passed by this Conveyance; for Creditors after Bankruptcy are in Nature of Purchasers, and have a prior Equity to any other Persons.

*Talbot's Case, 68. 93.*  
And as the Statutes concerning Bankruptcy are found on supposed Frauds of the Bankrupts; and consequently intended to put them under Disabilities to prejudice their Creditors; so his Lordship decreed, that the Mortgagee should re-convey to the Plaintiff, the Assignee, upon Payment of the Principal and Interest.

*Barrard. Rep. 13. 12. Feb. 1740.*  
In general, no Person shall be allowed to come into Equity for a Redemption, but he that has no legal Estate of the Mortgager; and where there are proper Persons as Assignees to get in the Estate of a Bankrupt, a Court of Equity will not suffer the Creditors to bring in a Bill in order to redeem or recover that Estate, unless the Assignees under a Commission make Default or collude with a Debtor, when a Creditor may bring his Bill, in order to take Care of the Estate, and charge the Assignee with such Collusion.

*21. Jac. 14. C. 15. S. 11.*  
If a Bankrupt, before his Bankruptcy, sells his Goods to other Persons, and yet keeps and disposes of the same as if they were his own, such Goods shall be sold by the Commissioners; and accordingly it hath been always so adjudged:

*Toplady*; an

And if a Man, with an Intent to support the Credit of a Bankrupt, suffers him to have his Goods in his Custody, and to dispose of them, the Property of these Goods shall be accounted to be in the Bankrupt, and not in the true Owner; for the Owner shall lose his Right, as a Punishment for his false Dealing herein, and of the Mischiefs that may grow by such Devices to evade the Laws; and the Law cannot take Notice of such private Things done between the Parties, but will judge of them as they appear to be.

If one becomes a Bankrupt after an *Extent* and before the *Liberate*, and the Commissioners sell the Goods to the Creditors; It has been adjudged they cannot be sold. Though the Words of the Statute are, *That the Commissioners have Power to sell the Goods which were his at the Time that he became a Bankrupt*; notwithstanding he becomes a Bankrupt before the *Liberate*; and although the Property remains in the *Conusor* until the Delivery by that *Writ*; yet the *Extent* has bound the Goods so, that when the *Liberate* comes it defeats this, and divests the Property of the Goods out of the *Conusor*, as to any mean Act or Incumbrance, from the Time of the *Extent*.

In this Case, all the Court resolved, and severally delivered their Opinions, that those Goods extended before the Party became a Bankrupt, and delivered by the *Liberate* after he was a Bankrupt, could not be sold by the Commissioners; because they being extended, are *quasi in Custodia Legis*, so as the *Conusors* have not any Power to give, sell, or dispose of them; and they are as Goods gaged or distrained, which cannot be forfeited by Outlawry, or taken in Execution, from the Person that has them in Gage, or by Way of Distress, without Payment of the Money, for the Goods are bound by the Test of the *Writ* of *Extent* or Execution sued.

They also held, when the *Writ* of *Liberate* is sued out, it has Relation to the *Writ* of *Extent*, and they are as but one *Extent*; and the Goods are so bound by the *Extent* and Appraisalment, that the *Conusor* hath no more Property in them but *secundum quid*, that is, if the *Conusor* refuse to accept them; for it is a conditional *Writ* to deliver the Goods to the *Conusor*, if he will accept thereof, and when he accepts them, they are bound *ab initio*. And they all conceived, that the Statute being with an Exception, when Execution or an *Extent* is served or executed; that this is to be accounted the Execution of an *Extent*, when the Goods are appraised, and the *Writ* returned; but so long as they remain in the Hands of the *Conusor*, they may be sold; but when they are delivered by the *Liberate*, and the *Extent* is returned served, the Goods are not subject to any other Execution, nor the power of the Commissioners, to meddle with them.

An Execution was sued by a Person, the Money levied, and in the Sheriff's Hands, and the Man became a Bankrupt: *By the Court*; the Money recovered in the Hands of the Sheriff is not assignable by the Commissioners to the Creditors, for it is in *Custodia Legis*.

But it is nevertheless held, that the Assignees of the Commissioners may bring a *fiere facias* against the Defendant, in Case the Money lie in his Hands, in Order to try the Bankruptcy, and so gain the Money recovered by the Bankrupt.

One *Thompson* had a Judgement against *Watkins* for 600*l.* and the 19th of June sued out a *fiere facias* thereupon, which the 30th of June was delivered to the Sheriff in the Morning, and *Watkins* having Notice thereof, in the Night of the same Day departed from his House, and thereby became a Bankrupt; the 1st of October the Sheriff levied 400*l.* of the Goods of *Watkins*, and paid it to *Thompson*, and the Commissioners assigned it in the Hands of *Thompson* to the Plaintiff, as the Goods of *Watkins* in his Hands, for which an Action on the Case was brought, and a special Verdict on it found; and being learnedly argued on both Sides, a Judgement was finally given for the Defendant.

In an Action of Trespas brought by the Assignees of Commissioners of Bankruptcy, for taking of their Goods; on Not guilty pleaded, the Jury found a special Verdict, the Substance of which was as follows, viz. One *Toplady*, a Vintner, on the 28th of April became a Bankrupt, against whom a Judgement was formerly obtained; the Judgement Creditor sued out a *fiere facias*, and the Sheriffs of London by Virtue thereof, on the 29th of April seized the Goods of the said *Toplady*; and after the Seizure, but before any *Venditioni exponas* came, an *Ex-*

tent, which is a Prerogative Writ, issued out of the *Exchequer*, against two Persons who were indebted to the King, and by Inquisition, this *Tophady* was found to be in Debt to them, whereupon Part of the Goods mentioned in the Plaintiff's Declaration, were seized by the Sheriff, and sold, and the Money paid, &c. but before the said Sale, or any Execution of the *Exchequer* Process, a Commission of Bankruptcy was had against *Tophady*, and the Commissioners assigned the Goods to the Plaintiff.

The Question here was, whether this Extent did not come too late? Or whether the *fieri facias* was well executed, so that the Assignees of the Bankrupt's Estate could not have a Title to those Goods, which were taken before in Execution, and so in Custody of the Law? The Court adjudged, That the Extent, though a Prerogative Writ, and likewise the Assignment by the Commissioners of Bankrupt, came too late, because the Execution being well executed, the Goods were made liable to the Judgement Creditor.

*Lachmere v. Thorswood & al.*  
3 Mod. 236.

A Person that is a Bankrupt, becomes *Felix de se*; it has been a Question, whether the Commissioners may assign the Goods to be sold for the Creditors, or if the King shall have them? And it was resolved for the Creditors: For though it is adjudged in *Lady Hale's Case*, in *Plowden*, that when two Titles come together, *viz.* the King's and that of a Subject, the King's Title shall be preferred; yet the King by the Acts of Parliament has given away his Title to the Creditors: And nevertheless this may admit of a Dispute, the Judges never contriving a Statute to give away the King's Right, but wherein he is mentioned. In a Question whether the Creditors by a Commission shall have the Goods of a Person outlawed; It is conceived the King shall have them by Outlawry, &c.

*See Mr. Jones Rep. 203. and Sir Simon Nevil's Case, 111. 3 Car. 1.*

In the *Chancery*, it has been decreed, that Money overpaid on an usurious Contract, as where a Sum is lent to a Person in necessitous Circumstances, at six or eight per Cent. who afterwards becomes a Bankrupt, shall be accounted for and refunded, notwithstanding the Agreement of the oppressed Party to allow such Payment, and the Securities therefore to be delivered up. But in the Case of Money lost at Gaming and paid, the Court will refuse Relief, where it cannot be recovered at Law; for there the Plaintiff in Equity is *particeps Criminis*.

*Bosquet v. Duffwood, Talbot's Case, 38, 41.*

*Of uncertain and contingent Estates, and which do or do not centre in the Bankrupt.*

THESE are several, which I shall mention in Order, beginning with the Bankrupt's Wife; and, first, concerning her *Dower*.

*Dower* is a Portion which a Widow hath of the Lands or Houses of her Husband after his Decease; and by the common Law it is a third Part of the Lands which the Husband died seized of, either in *Fee Simple* or *Fee Tail*, which she is to enjoy during Life.

By the Custom of *Kent* called *Gavelkind*, the Widow is entitled to the half Part of the Husband's Estate, either in *Fee Simple* or *Fee Tail*, *quandiu remanet Sola et Casta*, so long as she remains single and continent; but if she marries, or is guilty of Incontinency, then she forfeits such Estate.

1 Inst. 113. b.  
2 Peer Will. 634.

Lord *Coke* says, that all Kinds of *Dower* were instituted for the Wife's Subsistence during her Life; which Right of *Dower* is not only a *legal* but a *moral* Right, as it was held by Sir *John Trevor*, Master of the Rolls, in the Case of *Lady and Lord Dudley*.

Sir *Jof. Tybott's* Argument and Resolution.

Secondly, the Relation of Husband and Wife, as it is the nearest, so it is the earliest; and therefore *the Wife is the proper Object of the Care and Kindness of her Husband. The Husband is bound, by the Laws of God and Man, to provide for her during his Life; and after his Death the moral Obligation is not at an End, but he ought to take Care of her Provision during her own Life.* This is the more reasonable, as during the Coveture, the Wife can acquire no Property of her own. If before the Marriage she had a real Estate, this by the Coveture ceases to be her's and the Right thereto, whilst she is married, vests in the Husband; her personal Estate becomes his absolutely, or at least is subject to his Controul; so that unless she has a real Estate of her own, which is the Case but of few, she may, by his

Death, be destitute of the Necessaries of Life, unless provided for out of his Estate by a Jointure or Dower. As to the Husband's personal Estate, unless restrained by special Custom, which very rarely takes Place, he may give it all away from her; so that his real Estate, if he had any, is the only Plank she can lay hold of to prevent her sinking under her Distress. Thus is the Wife said to have a moral Right to her Dower.

The Husband, on the Contrary, has no Right to a Tenancy by the Courtesy, but from positive Institutions or Provision of the Laws: His Right does not arise from the Relation of Husband and Wife, for then every Husband would have it, which is not so; nor doth he want it, if it be not his own Fault, or at least his Misfortune. During the Coverture, he is Master not only of his own, but of his Wife's Estate; and by his Industry and provident Care, may acquire Property sufficient, without any Part of her Estate, to maintain himself after her Death: So that the Husband's Tenancy by the Courtesy hath no moral Foundation, and is therefore properly stiled Tenancy by the Courtesy of England; that is, an Estate by Favour of the Law of England.

Dower also is a legal Right created by Law, which settles the Quality of the Estate out of which the Wife's Dower arises, and likewise ascertains the *Quantum* thereof. The common Law says, the third Part is *rationabilis Dos*; and a special Custom, which is *lex loci*, enlarges or abridges the common Law of Dower, and gives the Whole, Half, or less than a Third.

The common Law likewise ascertains Dower, with respect to the Nature and Quality of the Husband's Estate. 1 Inst. 33. b.

It says, the Wife's Dower must come out of such an Estate as would descend to the Issue of the Husband by that Wife; and gives Dower of the Husband's *Seisin*, though not actual, or reduced into Possession; it annexes Privileges to Dower as not to be liable to Distress for the Husband's Debts to the King, much less for any due to the Subject; with several other Privileges. Again, the Law fixes the Age when a Woman is dowable; and, by the Way, fixes it at such a Time, as, by the Course of Nature, at least in this Part of the World, it seems impossible she should have Issue, or be pregnant, *viz.* at nine Years old. But it is not so favourable to a Tenancy by the Courtesy, which it allows only in the Case of a *Seisin* in Deed; it annexes no Privileges thereto. And though the Husband may be Tenant by the Courtesy of a common Sans Number, of which the Wife is not dowable, yet that is because of its Indivisibility; in which Case if Dower was allowed, it would be injurious to other Persons, and the Lands be doubly charged. Thus the Law, where it can justly do it, prefers the Title of Dower to that of Courtesy.

Dower is also an equitable Right, and such a one as is a Foundation for Relief in a Court of Equity. It arises from a Contract made upon a valuable Consideration, Marriage being in its Nature a Civil, and in its Celebration a sacred Contract; and the Obligation is a Consideration moving from each of the contracting Parties to the other; from this Obligation arises an Equity to the Wife in several Cases, without any previous Agreement, as to make good a defective Execution of a Power, a defective Conveyance, or supply the Defect of a Surrender of a Copyhold Estate; in all which the Court relieves a Wife, and makes a Provision for her, where it is not unreasonable, or injurious with Respect to others. Indeed in the Case of the Husband, Marriage, as it is a legal Consideration, so it is an equitable one; but then it is not carried so far in his Favour, as in her's; and in the Cases before-mentioned, the Court would not supply a defective Title for the Husband; at least it has not been done.

A Bill was brought by a Widow, to be endowed of an Equity of Redemption, though the Mortgage was made in Fee before the Marriage, upon her paying a Third of the Mortgage Money, or keeping down a Third of the Interest. And his Honour the *Master of the Rolls*, after citing several Authorities, declared, that the Plaintiff, being the Widow of the Person entitled to the Equity of Redemption, of the Mortgage in Question, which was a Mortgage in Fee, hath a Right of Redemption; and accordingly decreed her the Arrears of her Dower from the Death of her Husband, she allowing the Interest of the Third of the Mortgage Money, unsatisfied at that Time, and the Dower to be set out if the Parties differed.

Cases in  
Chancery,  
Lord Falkner,  
138. At-  
torn. Gen.  
v. Sec. Mich.  
9 Geo. II.  
1 Fern. 316.  
Lady Bodmyn  
v. Vandebendy,

A Woman is not entitled to Dower where the Husband purchases an Estate with a Trustee; but if the Trustee die in the Life-Time of the Husband, the Joint Tenancy between the Husband and the Trustee will survive to the Husband, and then the Wife will be entitled to Dower.

The Defendant for 4400*l.* purchased of Lord Bodmyn the Reversion after the Death of Lord Warwick, of Lands of near 1000*l.* per Ann. and for Protection of the Estate, and to prevent the Plaintiff's Dower, the Defendant upon his Purchase took an Assignment of a Term for Years, which was vested in Trustees to secure the Payment of certain Annuities, and afterwards in Trust to attend the Inheritance, and likewise took an Assignment of an ancient Statute that had been kept on Foot for the Protection of the Estate.

The Plaintiff had recovered Dower at Law, but was prevented from taking out Execution by Reason of the Term and Statute.

To be relieved against which, and to be let into the Possession of her Thirds, was the End of the Plaintiff's Bill.

The Defendant insisted he was a Purchaser, and that he ought to have the Benefit of this Term for the Protection of his Purchase.

Cases in Parl.  
69.

But the Plaintiff's Bill was dismissed, and upon an Appeal to the House of Lords, the Decree of Dismissal was affirmed.

The Wife of a Bankrupt, of a Person *non compos mentis*, or of an outlawed or excommunicated Person, or of a Person committing Felony, is not barred of her Dower.

And in Case of the Bill for taking away the Estates of the South Sea Directors in the Year 1720, all the Wives of their Husbands were entitled to their Dower, and received Satisfaction for the same.

But the Wife of a Person guilty of High-Treason, or of an alien Jew, is not dowerable; and if the Wife herself commits High-Treason, or Felony, or if she elope from her Husband, and lives with the Adulterer willingly, without being reconciled to her Husband, she shall lose and forfeit her Dower; but if the Husband be reconciled, and she live with him again, she shall be endowed.

If a Wife levies a Fine with her Husband, and they join in the Sale of an Estate to a Purchaser, she is barred of her Dower.

By the Statute of the 27 Hen. VIII. Cap. 10. Sect. 6. it is enacted, that where Persons have purchased, or have Estate made of Lands and Hereditaments, &c. to them and their Wives, and to the Heirs of the Husband, or to the Husband and to the Wife, and to the Heirs of their two Bodies begotten, or to the Heirs of one of their Bodies to be begotten, or to the Husband and to the Wife for Term of their Lives, or for Term of Life of the Wife, for Jointure of the Wife; every Woman having such Jointure shall not claim any Dower of the Residue of the Lands that were her Husband's.

S. 7.

And then it provides, that if any such Woman should be lawfully evicted from her Jointure, or any Part thereof, such Woman shall be endowed of as much of the Residue of her husband's Tenements, as the Lands so evicted shall amount unto.

S. 9.

Provided also, that if any Wife shall have Lands, assured after Marriage in Jointure, except the Assurance be made by Act of Parliament, she may at her Liberty, after the Death of her Husband, refuse the Lands, to her assured in Jointure, and demand her Dower according to the common Law.

#### Wife's Title to her Free-Bench.

**FREE-BENCH**, is that Estate in Copyhold Lands which the Wife hath on the Death of her Husband for her Dower, according to the Custom of the Manor; and in several Manors there are various Customs with Respect to such Estate; and in some Places the Wife hath the Whole of the Lands, in others the Half, and in others the Third: and I shall cite the following Case:

Parker v. Edib  
Bleke.  
Hil. 15 Car.  
13 Car. Roll.  
1002.  
3 Cro. 568.

This was an Action of Trespass, and upon a special Verdict it was found, that the Land was Copyhold of Inheritance of the Manor of Cheltenham in Gloucestershire, whereof Arthur Bleke, late Husband of the Defendant, was seized in Fee.

And in this Manor there was a Custom, that if a Copyholder, seized in Fee of a Copyhold Tenement, died, leaving a Wife at the Time of his Death surviving him, that she should hold the said Copyhold Land during her Life, and for twelve Years after.

And by Virtue of the Stat. 13 *Eliz.* he was found Bankrupt; and by Indenture dated the 5th of *April* 10 *Car.* and inrolled within the six Months, they sold the Copyhold Lands to the Plaintiff *Alexander Parker* and to *William Sothorne* and their Heirs, for 600*l.* paid for the Use of the Bankrupt's Creditors.

And the Jury by Virtue of a private Act of Parliament, made 1 *Car.* found, that by the Custom of that Manor, the Wife of the Copyholder should have Dower, and may have a Jointure assigned for her Life; and that a Copyholder of Inheritance may grant for his Life, and twelve Years after.

And that all Women then living, and late the Wives of any of the Copyholders of the said Manor, dying Tenants, should and may enjoy the customary Lands of their now, or late Husbands, and be Tenants for their Lives, and twelve Years after, as if that Act had never been made.

And that all the Customs and Usages heretofore used and allowed within the said Manor concerning the enjoying any customary Lands, &c. by any Widow of any customary Tenant, or any after-taken Husband of such Widow, or the Heir or Heirs of such Wife, hereafter taking Husband, or concerning the Descending of any such Lands to any other Person or in any other Form than is before expressed, shall be void; and that all other lawful Usages and Customs, heretofore used within the said Manor, which were not repugnant and contrary to the true Meaning of that Act, should be and remain good and effectual to be ratified by that Act.

And the Jury found, that at a Court Baron of the said Manor, held the 1st of *April* 12 *Car.* it was found by the Homage, that *Edith* survived her Husband, and ought to enjoy the said Tenements for her Life, and for twelve Years after; and that upon a Presentment the 1st of *April*, 12 *Car.* and before the Admission of *Alexander Parker* and *William Sothorne*, the said *Edith* was admitted Tenant of the Tenements aforesaid, according to the Custom of the Manor, and by Virtue of such Admission she entered.

And this was very well argued at the Bar by *Glyn* for the Plaintiff, and *Moreton* for the Defendant, where two Points were insisted on.

1st. Whether by the Bargain and Sale made by the Commissioners, by Virtue of the Statute of Bankrupts, the Estate of the Copyholder was vested in the Bargainee before Admittance; for then the said *Arthur Blecke* did not die Tenant, and so it is not within the Custom, that his Wife should have Widow's Estate.

2dly. Admitting he died Tenant, and the Widow had such an Estate vested in her, whether the Vendees, by the Bargain and Sale to them before made, shall not afterwards divest the Estate of the *Feme* by Relation, and then the Plaintiff hath a good Title.

And it was argued that the Bargain and Sale binds the Copyholder, and bars his Estate; and that he is no Copyholder after the Bargain and Sale enrolled; and the Bargainee by the Statute is only barred to take the Profits until Admittance, which is for the Lord's Benefit, in Respect to the Fine due to him thereupon. 2dly, It was held, when the Bargainee is admitted by the Lord, it shall vest in the Bargainee, and shall have Relation to the Bargain and Sale, and shall divest the Estate which the *Feme* claimed by the Custom, as in the Case of 7 *Edw.* VI. *Brook*, Title *Involments*. Where one Joint Tenant bargains and sells, and before the Inrolment the other dies, and afterwards the Deed is inrolled within the six Months, yet the Moiety only passed. And it is like the Case where one bargains and sells by Indenture, and takes a Wife and dies, and afterwards the Deed is inrolled within six Months, the *Feme* shall not have her Dower; and so the Case 22 *Eliz.* where a Mortgagee dies, his Heir being in Ward to the King, the Condition is afterwards performed, the Wardship shall be divested. *Jones* and *Bramston* doubted of the Point, until they saw the Record finds the Act to be particularly, that she ought to be the Wife of a Tenant, and it is not intended, that, after the Sale of a Copyhold he should die Tenant, and he did not die Tenant, because the Bargain and Sale took his Estate from him, and ousted him of

the Copyhold. Wherefore they agreed Judgment should be entered for the Plaintiff.

Having exhibited these Cases concerning the Wife's Dower and Free-Bench, I shall now mention some concerning *separate Settlements* before Marriage, and Provisions of Parents after.

*Separate Settlements*

ARE frequently made before Marriage; and the fittest and securest Manner of making them is as follows:

The intended Wife names Trustees of her own; and that Part of her Fortune or Estate, which she or her Friends think fit to settle for such separate Use, is, with the Privity and Consent of the intended Husband, and who ought always to be made a Party to the Deed, conveyed or assigned to such Trustees for her sole and separate Use and Benefit, and to and for such Uses, Intents, and Purposes, as the said intended Wife, by Deed or Deeds in Writing, or by her last Will, shall direct or appoint: And there is a particular Agreement that such separate Estate shall not be subject in any Respect to the Debts, Control, or Engagements of the Husband; but that the Trustees are to pay and apply such separate Estate, or the Rents or Interest thereof, into her own proper Hands, or to permit her, or her Assigns, to receive the same for her own separate Use, exclusive of her Husband, as she shall appoint.

And by this Deed the intended Husband usually covenants with the Trustees, that they shall quietly enjoy such separate Estate or Money; and he consents to the Settlement; and he agrees that any Deed or Will that she may make, according to that Deed, shall have its full Effect; and that he will not obstruct the Execution of the same.

These separate Provisions are also frequently made by Deed or Will, by Parents to their Daughters that are married, as a Provision for their Support and Maintenance, in Case any Misfortunes or Losses may happen to their Husbands; and if they are secured in this Manner, they are effectual against any of the Husband's Creditors, or any Incumbrance or Act of Bankruptcy.

And the Reason why Settlements should be made in this Manner will appear from the following Cases.

2 Chan. Rep. 18. *Howard and Hooker.*

A Widow makes a Deed of Settlement of her Estate, and marries a second Husband, who was not privy to that Settlement; and it appearing to the Court, that it was in Confidence of her having such an Estate that the Husband married her, the Court set aside the Deed as fraudulent.

2 Chan. Rep. 79.

So where the intended Wife the Day before her Marriage entered into a Recognizance to her Brother, it was decreed to be delivered up.

1 Vern. 17. *Coburn and the Earl of Devon.* *Jan. 1688.*

So where a Conveyance was made by the Wife before her Marriage to Trustees in Trust, that they should permit her to receive the Rents and Profits of the Estate, and act in every Thing as she, whether Sole or Covert, should appoint, the Lady being crazed in her Understanding, endeavoured to run away from her Husband, and stirred up her Creditors to sue him; and the Conveyance appearing to be without the Husband's Privity, the Lord Chancellor held it to be in Derogation of the Rights of Marriage; and decreed the Possession of the Estate to the Husband, and a Conveyance from the Trustees to the Six Clerks, that it might be Subject to the Order of the Court.

2 Vern. 17. *Edmond and Denington.*

A Woman, on Agreement before Marriage with her Husband, being to have a Power to act as a Feme Sole; and the Husband dying, and she marrying again, the second Husband, not being privy to the Settlement on the first Marriage, it was decreed, that the second Husband should not be bound by the Settlement made on the former Marriage. A Case cited to be decreed.

1 Vern. 208. *Hunt and Matthews.* *Feb. 1689.*

But when a Widow, before her Marriage with a second Husband, assigned over the greatest Part of her Estate to Trustees, in Trust for Children by her former Husband; and though it was insisted, that this was without the Privity of her Husband, and done with a Design to cheat him, yet the Court thought that a Widow may thus provide for her Children, before she put herself under the Power of an Husband; and it being proved that *Sool.* was thus settled, and that

that the Husband had suppressed the Decree, he was decreed to pay the whole Money, without directing any Account.

*William Davison* having devised a Legacy of 600*l.* to his Son, payable at twenty-one, for which he had obtained a Decree, and 537*l.* reported due; before he received the Money he became a Bankrupt, and the Commissioners assigned the Legacy and Benefit of the Decree.

The Bill was brought by the Assignees to have the Benefit of the Decree, which the Defendants, the Executors, demurred, insisting that a Legacy was not within the compass of the Provision of any of the Acts made against Bankrupts, to be assigned to the Creditors.

But the Demurrer was overruled; and said that the Act of Parliament ought to be taken in the most beneficial Sense for the Advantage of the Creditors.

*Wills in Favour of a Bankrupt's Wife, &c.*

*J. S.* Married his Daughter to one *Bennett*, a Tradesman in *London*, who was extravagant and in Debt; the Father makes his Will, and devises the Premises in Question, being Lands in Fee, to his Daughter, the Wife of *Bennett*, for her separate Use, exclusive of her Husband, to hold to her and her Heirs; and that her Husband should not be Tenant by the Courtesy, nor have these Lands for his Life in Case he survived his Wife, but they should, upon the Wife's Death, go to her Heirs.

Soon after this, the Testator dies, and *Bennett* becoming a Bankrupt, the Commissioners assign the Lands to the Defendant *Davis*, in Trust for the Creditors; and upon *Davis's* bringing his Ejectment, the Bankrupt's Wife, by her next Friend, prefers her Bill against *Davis*, the Assignee and Husband, to compel them to assign over his Estate to her separate Use.

It was objected on Behalf of the Defendant, that he being a Creditor, and having the Law on his Side, it would be hard to take that Benefit from him; and that, though the Testator might intend these Lands for the separate Use of his Daughter, yet that this Intention was not executed according to Law, as the Premises were not devised to Trustees for the separate Use of the Wife, and according to Law the Husband, during the Coverture, was entitled to his Wife's Estate in her Right; and it was farther urged, that the Case of a Devise of a Legacy or of a Term to the Wife for her separate Use might be good, because these remained in the Executor until Assent, and Equity would not compel the Executor to assent, whereby the Intention of the Testator should be disappointed, but would continue the Executor a Trustee for the Feme Covert. Whereas in the present Case, the Devise being of Lands in Fee to the Wife, who by the Will only had an immediate Title thereto, the Husband must consequently be entitled to the Profits in her Right.

That there was no Trust, the Testator never having intended to trust the Husband, and the Wife could not be a Trustee for herself; besides, the Husband could not be a Trustee for the Wife, they both being but one Person.

On the other Hand, the Plaintiff's Counsel would have read *parole Evidence*, to prove that the Testator did not intend these Lands should be liable to the Husband's Debts; but the Court would not permit such Evidence to be read, it being in the Case of a Devise of Land, which by the Statute must be all of it in Writing.

As to the chief Point, the Master of the *Rolls* took it to be a clear Case, that it was a Trust in the Husband, and that there was no Difference where the Trust was created by an Act of the Party, and where by the Act of Law.

If I should devise that my Lands should be charged with Debts or Legacies, my Heir, taking such Lands by Descent, would be but a Trustee; and no Remedy for these Debts and Legacies but in Equity: So in the principal Case, there being an apparent Intention that the Wife should enjoy these Lands to her separate Use: by that Means, the Husband, who would otherwise be entitled to take the Profits in his Right during the Coverture, is now declared and made a Trustee for his Wife; and admitting the Husband to be a Trustee, then the Argument of the Creditors having the Law on their Side, was immaterial; as if the Bankrupt had been a Trustee for *J. S.* his Bankruptcy should not in Equity affect the Trust Estate;

Estate; and that though the Husband, the Bankrupt, might be Tenant by the Courtesy, yet he should be but a Trustee for the Heirs of the Wife. Also when the Testator had a Power to devise the Premises to Trustees, for the separate Use of the Wife, this Court, in Compliance with his declared Intention, will supply the Want of them, and make the Husband Trustee. And the Defendant, the Assignee, who claiming under the Husband can have no better Right than the Husband, must join in a Conveyance for the separate Use of the Wife, which was decreed accordingly.

2<sup>d</sup> Nov. 1761.  
Fog. Term.  
1769.

Lord Mordaunt  
v. Debraugh.

The Defendant's Testator by his Will devised 800*l.* to be paid within six Months after his Death to one Mr. *Dwyne*, in Trust, that he should lay it out and invest it in a Purchase for the Benefit of the Wife of *I. S.* and to settle it so, as after the Death of his Wife it might come to her Children, and the Interest in the mean Time to be paid to such Persons as ought to receive the Profits. *I. S.* becomes a Bankrupt, and the Plaintiff, as Assignee under the Statute, would have the Interest of this Money decreed to him, during the joint Lives of Baron and Feme.

*Per Curiam:* This not being any Trust created by the Husband, or any Thing out of his Estate, but given by a Relation of the Wife's, and intended for her Maintenance, it is not liable to the Creditors of the Husband, and the Plaintiff hath no Title thereto as Assignee of the Commission of Bankruptcy; and therefore decreed it should be paid to *Dwyne* the Trustee, to be laid out in Land, and settled according to the Will.

The Case of *Drake* and the *Mayor of Exeter* was cited, where there was a Lease for twenty-one Years, with a Covenant for Renewal at the End of the Term; the Lessee became Bankrupt; adjudged, the Assignee under the Statute should have no Benefit of that Covenant.

*Jacobson & al.*  
*v. Williams.*

*Walker Wallinger* by his Will left to his Niece *Elizabeth Tayleur*, an Infant, 1000*l.* payable after the Death of the Testator's Wife, and at his said Niece's Age of twenty-one Years, if she should so long live.

1<sup>st</sup> Per Will.  
383. Case 100.  
Mich. Term.  
1717. L. C.  
Gouyer, Abr.  
Cases in Eq.  
54.

The Niece married *I. S.* without the Knowledge or Consent of her Father; *I. S.* being at that Time much in Debt by Judgment and otherwise; and gained the young Gentlewoman's Consent by the Influence of a Maid Servant, whom he had bribed to his Interest. The Niece was about eighteen Years of Age.

Soon after the Marriage, *I. S.* became a Bankrupt, and the Commissioners of Bankruptcy assigned over all the Estate and Effects of the Bankrupt to the Plaintiffs, in Trust for the Creditors, who brought their Bill for this Legacy; the Testator's Widow being dead, and the Niece being about twenty-one Years old, and consequently the Legacy due; and the Bankrupt had two Children by his Wife then living.

This Cause coming on before Baron *Price*, in the Absence of the Lord Chancellor, the Baron, in Regard to the Creditors, did decree the Legacy and Interest to be paid to the Plaintiffs.

But upon an Appeal from that Decree to the Lord Chancellor, his Lordship declared, that sofar as the Plaintiffs, the Assignees of the Commission, claimed under the Bankrupt, they ought not to be in a better Case than the Bankrupt himself; and since, if he had brought a Bill for his Legacy, the Court would not have allowed it him, without obliging him at the same Time to make some Provision for the Wife and Children; so, for the same Reason, when these claiming under the Bankrupt, and who must be exactly in the same Case as he himself would have been in, come for Equity, they ought to do Equity, which would be to provide for the Wife and Children of the Bankrupt, from whom they derived their Claim. But with Regard to the Interest of the Money, as the Bankrupt commonly was allowed to receive that, so the Assignees ought to receive the same during the Bankrupt's Life; also if the Bankrupt's Wife should die without Issue, then the Bankrupt would have been allowed to receive the whole Money, and therefore in such Case the Assignees should be allowed to receive it also.

However his Lordship said, that as a Judge had been of a contrary Opinion, he would take Time to consider of it.

And on the Cause coming on again, the Case of *Taylor* and *Wheeler* was cited; and it was moreover observed to the Court, that the Bankrupt had in this Case gained his Certificate and was discharged, and that the Assignment made to the

Complainants being before the Legacy was vested, if they could not now supply the Assignment, by making a new one, the Consequence was that the Legacy was vested in the Bankrupt.

But the Lord Chancellor replied, that this not appearing in the Pleadings, he would take no Notice of it; nevertheless at another Day, the Fact being made to appear by a Petition with the Certificate of the Commissioners, and the Allowance of the Lord Chancellor *Harcourt* annexed, the Court said it was clear, the Commissioners could not assign this Possibility of Right which the Bankrupt had to the Portion, and consequently the Assignees being Plaintiffs in the Bills, and entitling themselves under this Assignment, and this Assignment being void, with respect to such Possibility\*, therefore the Bill must be dismissed, but without Costs, because the Plaintiffs were Creditors.

\* *But the Reason given above, viz. because the Bankrupt, the Husband, could not have come to his Wife's Portion without the Assistance of a Court of Equity, which would not have decreed it to him, but on his making some Provision for his Wife, seems to have been the best Foundation for this Decree; since a Possibility or contingent Interest is certainly assignable by the Commissioners. Thus in the Case of Higden vers. Williamson, first heard at the Rolls, Mich. 1731, and afterwards affirmed by Lord Chancellor King, in Mich. 1732. The Case in Effect was, an Estate was devised to be sold, and the Monies arising from such Sale to be divided among such of the Children of A. as should be living at his Death: A. had several Children, one of whom, viz. B. became a Bankrupt, and the Commissioners assigned over his Estate; after which B. got his Certificate allowed; and then A. died: Declared that his Share of this Money, which on A.'s Death belonged to B. should be paid to the Commissioners; for that not only the latter Statutes relating to Bankruptcy mentioned the Word Possibility, but also because the 13 Eliz. Cap. 7. Sect. 2. empowers the Commissioners to assign all that the Bankrupt might depart with; and here B. in the Lifetime of A. might have released this contingent Interest. Besides, the 21 Jac. 1. Cap. 19. enacts, that the Statutes relating to Bankrupts shall be construed in the most beneficial Manner for Creditors.*

Afterwards, in Trinity Term 1718, the Wife of I. S. by her next Friend, having brought a Bill, setting forth her having been seduced into this Marriage, and the Husband's Bankruptcy, together with the Certificate for his Discharge, prayed that the Money might be put out to her separate Use for her Life, and afterwards for her Children; to which the Husband putting in his Answer, and declaring himself sensible of his having injured his Wife, in Manner as above, submitted to what was desired by the Bill, only prayed the Arrears of Interest.

On the other Hand, the Assignees opposed the Bill, insisting, that the Commissioners might still make a new Assignment of this which was now and not before vested.

But by Lord Chancellor *Parker*, the Commissioners have executed their Power, and the Debts which the Husband, the Bankrupt, owed to the Creditors before the Bankruptcy, are now extinct by Act of Parliament; and this Portion is as a new-acquired Estate by the Husband in Right of his Wife; wherefore since the Husband agreed to this Prayer of his Wife's Bill, which is but a reasonable Reparation for the Wrong he had done her, decree the Husband the Arrears of Interest, deducting the Costs, and let the Legacy be laid out in a Purchase; and in the mean Time let the Wife have the Interest for her separate Use, &c. by which Means the whole Legacy was saved to the Wife, and to her separate Use.

#### Of Marriage Bonds, and Articles before Marriage.

**MARRIAGE BONDS** are frequently given before the Espousals, by Persons who are engaged in Trade or Business, and where it would be inconvenient to lay out the Portion in Land, because the Woman's Fortune is supposed to be added to the Husband's, and to be invested in the Stock in Trade, in Order to be there managed by the Husband for the mutual Support of themselves and their Children.

And these Bonds must be given to two Trustees, to be named and appointed by the intended Wife, or one of them by her, and the other by the Man, and according to the Portion or Fortune, which the Woman brings her Husband, the Husband

band becomes bound, to pay at his Decease, to the Trustees, or the Survivor of them, or the Executors or Administrators of such Survivor, the Sum agreed between them in Trust, and for the sole Use and Benefit of the Wife, in Case she shall survive him; or Part for the Wife, and Part for the Children, as the Parties shall agree between themselves; and in Case the Wife shall not survive the Husband, and there shall be no Children, then the Bond is usually declared to be void.

The Reason of giving this Bond to Trustees is in Order to support the Demand against the Estate of the Husband; and it is effectual against his real as well as personal Estate, but it must not be made to the intended Wife in her Name, before Marriage, because upon the Marriage, the Husband and Wife are become one Person in Law; and whatever Securities might be given to her before Marriage, unless they were supported by Trustees, would, on such Marriage, revert back again, and be merged in the Husband's Fortune, and be unsafe for the Wife.

A Marriage Bond is of no greater Effect or Force than any other Bond Debt; but as the Wife is frequently Executrix to her Husband, and the Law usually throws the Right of Administration upon her, whenever she is either Executrix or Administratrix, she as well as any other Executor or Administrator has a Right to pay her Bond Debt first, and preferable to all other Bond Debts, or Debts of an equal or inferior Degree.

But if the Husband becomes a Bankrupt in her Life-time, this has been adjudged to be such a contingent or uncertain Debt, that her Trustees cannot come in as Creditors to prove such Debt under such Commission, which the following Cases will illustrate:

A Husband who was a Trader, in Consideration of a Marriage, and of a Portion, gave a Bond to his Wife's Trustees, to leave the Wife, if she survived him, 1000*l*. The Obligor became a Bankrupt; and it was objected, that in Lord *Cowper's* Time it had been ordered, in Case of Bond given on so valuable a Consideration, that the Money computed upon the Distribution to be the Share of the Obligee in this Bond, shall be put out at Interest, and the Creditors have such Interest during the Life of the Husband, the Bankrupt; and if the Husband should die, leaving the Wife, the Money to be paid to the Wife; but, if the Wife should die in the Life-time of her Husband, then the Money to be paid to the Creditors.

On the other Hand, Lord *Macclesfield* was said to have doubted of this, wherefore this Case coming again in Question before the then Lord Chancellor *King*, his Lordship ordered the Precedents made in Lord *Cowper's* Time to be left with him.

And his Lordship was of another Opinion, conceiving, that no Part of the Bankrupt's Estate should wait, or be deferred from being distributed; the Act ordering that the Bankrupt's Estate should be distributed within Months; especially that the Distribution should not wait, as in the present Case, for a Debt which was neither *debitum in presenti*, and never might be *debitum in futuro*, in regard the Wife might die in the Life-time of her Husband; besides the Husband, after his Certificate allowed, might go to his Trade again, and become a solvent Person able to pay off his Bond: The Court resolved, that the contingent Creditor should not come in for a Distribution, neither should the Money be referred in Favour of such Contingency.

But his Lordship declared, that though the Debt was contingent when the Obligor became a Bankrupt, yet if the Contingency happen before the Distribution made, then such contingent Creditor should come in for his Debt; so if such Contingency happened before the second Dividend made, the Creditor should come in for his Proportion thereof, though after the first Dividend.

The Obligor on a Bottomree Bond became Bankrupt before the Return of the Ship, and the Ship did not return before the Distribution made; whereupon it was held that the Obligee should have no Benefit of the Distribution upon the Commission. And,

Whereas it was objected, that this Bond would be barred, after the Bankrupt's Certificate allowed, which could not be unless it was then done;

*Per Curiam*: This cannot be, if the Obligor is careful in declaring upon his Bond; indeed if the Party declares upon the Bond only, he shall be barred; otherwise, if he sets forth as well the Condition as the Bond in the Declaration; for then

then it must appear, that the Cause of Action did not accrue at the Time of the Obligor's becoming a Bankrupt.

But the above Case is since altered, and the Obligee in any Bottomree Bond shall be admitted to claim, and after the Loss or Contingency shall have happened, to prove his Debt or Demands in Respect of such Bond, in like Manner as if the Loss had happened before the Time of the issuing of the Commission of Bankruptcy against the Obligor, and shall be entitled unto, and have and receive a proportionable Part, Share, and Dividend of the Bankrupt's Estate, in Proportion to the other Creditors of such Bankrupt, and in like Manner as if such Loss and Contingency had happened before such Commission issued. <sup>19 Geo. II.</sup>

And this Act makes it the same with the Obligors and Obligees on a Policy of Insurance.

One *Blanchard*, a Cabinet-Maker, married the Sister of *Calliford*, who had <sup>*Blanchard v. Calliford.*</sup> 500*l.* Portion secured by Land. *Blanchard*, on his Marriage, gives a Bond to leave his intended Wife, if she survived him, 500*l.* or a third of his Estate, at her Election.

*Blanchard* became a Bankrupt; Bill by the Assignees to have the 500*l.* raised by a Sale; and decreed accordingly: But with this, that the Wife should come in as a Creditor upon the 500*l.* Bond; and what shall be paid in Respect thereof, to be put out at Interest, and received by the Creditors, during the Life of the Husband, and if the Wife survived then the Money to be paid to her.

*J. S.* indebted by Bond to the Wife of *A.* became a Bankrupt; the Husband comes in and claims the Debt, pays the Contribution-Money, but dies before any Dividend was made; the Wife survives, but dies also before any Distribution. <sup>*Mich. 1710. 2 Vern. 707.*</sup>

Lord Chancellor directed the Distribution to be made to the Executors of the Wife, and not to those of the Husband; repaying to the Husband's Executors what he had advanced for Contribution.

The Husband's paying the Contribution-Money did not alter the Property of the Debt, but it remained a Chose in Action, and survived to the Wife.

The Plaintiff brought an Action of Debt against the Defendant for 800*l.* where- in the Plaintiff declared, that *William Donalson* in his Life-time, viz. the 6th of <sup>*James Tully, Frances Sparks and Christopher May, Executors of William Donalson.*</sup> *May, 1704*, by his Bond then dated, obliged himself, his Heirs, &c. to the Plaintiff *Tully*, and one *Philip Rusby*, whom the Plaintiff survived, in the said Sum of 800*l.* &c. with Condition, that if the Heirs, &c. of the said *William* should pay to the said Plaintiff *Tully* and *Philip*, or the Survivor of them, or the Executors, &c. of the Survivor of them, 400*l.* within two Months after the Death of the said *William*, in Case one *Martha Latimer* should marry the said *William*, and should happen to survive him; in Trust for the Benefit and Behoof of the said *Martha*, her Executors, &c. then the Obligation should be void, &c. and the Plaintiff in Fact says, that after the making the said Bond, the said *Martha* married the said *William Donalson*, and that after the said Marriage, the said *Philip Rusby* died, and the Plaintiff survived him; and that the said *William* made his Will, and appointed the Defendants his Executors; and afterwards, the said Will not being revoked, died; and the said *Martha* survived him, and is yet alive: and that after the Death of the said *William Donalson*, the Defendant *Frances* proved the said Will in due Form of Law; that the said *Frances* and *Christopher*, or either of them, did not pay to the Plaintiff the said 400*l.* within two Months after the Death of the said *William*, according to the said Condition, whereby the Bond became forfeited; and the Action arose to the Plaintiff, to demand of the said Defendants the said 800*l.* but the Defendants the said 800*l.* though often requested, have not yet paid, &c.

The Defendants, after praying Oyer of the Bond and Condition, which was granted, plead in Bar, that the said *William Donalson*, after making the Bond, for seven Years, before and after that Time, exercised the Trade of a Biscuit Baker, and got his Living thereby, and became indebted to Sundries in the Sum of 200*l.* and more, and became a Bankrupt, and was declared such by the Commissioners, and had his Certificate allowed.

This Case was learnedly argued both for the Plaintiff and Defendant, and the Cause coming on in *Michaelmas Term 1728*, Judgement was given by the whole Court upon

upon the Merits, that the Plaintiff's Debt was not barred by the Matter comprised in the Plea, because it was not within the 7 Geo. I. Cap. 31.

*In the Matter of James King, a Bankrupt, on the Part of Ann King his Wife.*

The said *Ann King*, by her Petition in *January 1742*, set forth, that on the 16th of *Feb. 1731*, by Articles tripartite made before her Marriage with *James King*, between *James King* the elder, and the Bankrupt, of the first Part; *James Sutton*, and the said *Ann King*, by the Name of *Ann Sutton*, his Daughter, of the second Part, and *Robert Sutton* and *John Complin*, of the third Part; reciting the intended Marriage, it was, amongst other Things, covenanted and agreed, that the same *James Sutton* should, within three Months after the Marriage, pay the said *James King* the younger 1000*l.* as her Marriage Portion; and if *James* and *Ann* should have Issue living at the Death of *James Sutton*, that then his Heirs, &c. should pay to the said *James King* the younger, the further Sum of 1000*l.* if he should be then living; but if *King* should die before the last 1000*l.* became payable to him, then the same should in like Manner be paid to the said *Robert Sutton* and *John Complin*, &c. in Trust, to place out the same at Interest, on such Securities as the Trustees, with the said *Ann King*, should approve of, and should pay the Interest to be made thereof to her, during her Life; and after her Decease, for the Maintenance and Education of the Children of the said *James* and *Ann King*, till they should attain twenty-one, and then to be paid to them in such Parts and Proportions as the said *James* and *Ann King* should appoint; and for Default of such Appointment, to be divided equally between them.

And in Case they had no Issue, then to such Person or Persons as the said *James King* the younger should by Deed or Will give or appoint the same unto; and in Default thereof, the same was to be paid to the Executors or Administrators of the said *James King*.

And by the same Articles, *James King* the younger covenanted, that if he received the said 1000*l.* payable after *James Sutton's* Death according to such Covenant, that then the Heirs, &c. of the said *James King* the younger, would, within three Months after his Decease, pay to the said *Robert Complin* and *John Sutton*, &c. 1000*l.* to be by them employed in such Manner and Form, and for such Uses, Intents, and Purposes as were before expressed and limited, touching the 1000*l.* payable after the Death of *James Sutton*.

The Articles were executed by all Parties, and the Marriage soon after took Effect.

In *January 1739*, *James Sutton*, the Father died; and *James* and *Ann King* having Issue a Daughter named *Ann*, who was then living, *James King* became entitled to the 1000*l.* after *James Sutton's* Death, and the Executors of *Sutton* accordingly paid him the same; and he gave them a Discharge for it.

In *January 1741*, *Robert Sutton*, one of the Trustees, died; and a Commission of Bankruptcy issued against *James King*, and he was duly found a Bankrupt, and his Estate was assigned to *Edward Grace*, *Thomas Garaway*, and *Timothy Dunham*.

That she apprehended that *John Complin*, the surviving Trustee, ought to be allowed the 1000*l.* so paid to her Husband *James King*, by *Sutton's* Executors, in the Nature of a Debt under the Commission, by Virtue of the Covenant in the Articles, and that a proportionable Part of *King's* Estate, in proportion to what was to be paid to his other Creditors, might be paid to the Trustees, to be disposed in such Manner as might answer the Intention of the said Articles.

That she had applied to *Complin*, and had requested him to prove the said Debt of 1000*l.* before the Commissioners, and to be admitted a Creditor for the same; but that he pretended, though his Name was mentioned as a Trustee in the Articles, yet that he had never executed them; and refused to act in the Trust, whereby she and her Daughter were in Danger of being totally deprived of the Benefit of the 1000*l.* intended as a Provision for her by the said Articles.

She therefore prayed his Lordship, that she might be at Liberty to name a new Trustee in *Complin's* room; and that such new Trustee might be admitted a Creditor under the said Commission for the said 1000*l.* and might be paid a Dividend

In Proportion with the Rest of *James King's* Creditors, and that the Money to be received by such new Trustee, by Virtue of such Dividend, might be placed out at Interest, in such Manner as that she might receive the Interest thereof during her Life, in Case she survived her Husband; and that the principal Monies to be received for such Dividend might go and be paid to such Child or Children of her by *James King*, as should happen to be living at the Death of the Survivor of them, in Case there should be any such Issue; and in such Manner as was directed by the Articles; or that his Lordship would make such other Order, as to him would seem meet.

And on the 21 *Jan.* 1742, this Petition came on to be heard before his Lordship, and was learnedly argued by Counsel on both Sides; And the Cases of *ex parte Cazakot, Holland and Calliford, Tully and Sparks*, were cited; and on the first Hearing, his Lordship gave the Gentlemen who were Counsel for the said *Ann King*, further Time to speak to it, and in the mean Time to search for Precedents; and upon this Petition coming on again before his Lordship, and no other Precedents to the Point appearing, his Lordship was pleased to be of Opinion, that he could not relieve the Petitioner *Ann King*; and therefore he ordered such Petition to be dismissed.

*Debts due to, and from the Wife, when single.*

**MILES** brought Debt against Husband and Wife, upon a Bond entered into by the Woman when single. The Defendants jointly plead in the Bar, that the Plaintiff ought not to have his Action, &c. and say, that after the Inter-marriage, *Williams* the Husband became a Bankrupt, and a Commission issued against him, and he submitted, and in all Things conformed himself to the Statute of the 4 *Anne*, and to all other Statutes relating to Bankrupts; and therefore the aforesaid *John and Eleanor*, by Virtue of the aforesaid Statute, say, that the Action aforesaid arose to the said *Miles*, before the said *John Williams* became Bankrupt; and that they were ready to verify, and therefore they demanded Judgment, if the said *Miles* ought to maintain his Action. The Plaintiff demurred, and shewed for Cause, that the Debt arising upon the Bond made by the Wife solely, was not discharged by the Statute mentioned in the Defendant's Plea; and also that the Plea ought to have concluded to the Country. The Defendants joined in Demurrer. And after several Arguments in this Case, *Parker* Chief Justice, having stated the Record at large, delivered the Resolution of the Court.

The two great Questions which have been made in this Case are these:

1. Whether this, being a Bond given by the Wife *dum sola*, be such a Debt as shall be discharged by the Bankruptcy of the Husband, by Virtue of the Statute of 4 *Anne*, Cap. 17. mentioned in the Plea?
2. Whether the Defendants have well concluded their Plea or not; it being to the Judgment of the Court, and not the Country?

As to the first we are all of Opinion that it is a Debt within the Act.

The Words of the Clause upon which it depends, are, *That the Bankrupt shall be discharged from all Debts by him due and owing, at the Time he became Bankrupt*; and then in Case he be sued for any such Debt, the Act directs, that he shall, and may plead in general, that the Cause of Action did accrue before he became a Bankrupt.

Upon these Words the immediate Question is, whether this was a Debt due, and owing by the Husband, at the Time he became Bankrupt?

It was said, and, I think, admitted at the Bar, *That a Debt due by the Wife, and one due to the Wife, dum sola*, must fall under the same Consideration.

This is very reasonable, and therefore I have considered how far a Debt due to the Wife would be within this Act, to be assigned by the Commissioners of Bankruptcy. And in Order to understand this, it is necessary to go back to the former Acts.

And those of 13 *Eliz.* Cap. 7. and 1 *Jac.* I. Cap. 15. give the Commissioners Power over the Bankrupt's Body, Lands, &c. and to assign all Debts due, or to be

due, to and for the Benefit of the Bankrupt, and the same to be recovered in the Name of the Assignees.

Now I take the Intention of these Laws to have been, that the Bankrupt having been guilty of a Fraud should not be trusted any more with the Management of his Estate, &c. So that upon this Intention, all those Effects and Debts, which he could take in, or turn into Money, the Assignees were designed to have in as full a Manner, either by Action or otherwise, and that in their own Names.

The best Rule of construing Acts of Parliament, is by the common Law, and by the Course which that observed in like Cases of its own, before the Act.

Thus it is in the Statute *de Donis*, which enacts, that Tenant in Tail *non habeat potestatem alienandi Tenementa*, to prevent their coming to the Issue; and that a Fine levied by him, *ipso jure sit nullus*. Now,

The Effects of this Statute being a Disability to alien to the Prejudice of others, therefore the Law ranks the Person incapacitated thereby, *with Bishops, and other Ecclesiastical Persons, and with Husbands*, who were by the Common Law disabled to alien to the Prejudice of their Successors and Wives.

And, therefore, though the Words be, that the Tenant in Tail shall not have Power to alien, and that his Fine shall be void, yet it has been construed, *that a Fine by Tenant in Tail is not merely void, but makes a Discontinuance*, thereby putting the Issue to his *Formedon*; and that other Alienations either put the Issue to his Action, or allow of his Entry, just as the Law stood before in Relation to Bishops, &c.

At Common Law it is a general Rule, *that no body can have an Action but a Creditor*, or, if he be dead, *his Representative*: But there are two Cases wherein this Rule fails, *viz.* in the Case of Forfeiture, and of an Assignment to the King. For though a *Chose in Action* cannot be assigned to a common Person, yet it may to the King. And in both these Cases, the King, or his Grantee or Assignee, may sue for these Duties in their own Name, 21 Hen. VII. 19. Though generally the Grantee sued in the King's Name; but that was only in order to take Advantage of the King's Prerogative.

Now let us see, how far the Wife's Debts were liable in these Cases.

In the Case of Forfeiture, as by Outlawry, &c. the Debts of the Wife were always extended and seized.

The Case of Assignment of Debts to the King, in *Hob. 2. 253.* is an Authority in Point; and notwithstanding the 7 Jac. 1. Cap. 15. which makes Assignment of Debts void, other than such as grew due originally to the King's Debtor *bona fide*. For the Purpose of that Law was, that no Debtor of the King should procure another Man's Debt to be assigned, which was the common Practice. But this says the Book, is his own Debt, though not to his own Use, which he may himself release and discharge, and by the same Reason may assign. This proves two Things.

*First*, That the Husband might assign these Debts by the common Law.

*Secondly*, That he was not restrained from doing it, by the Statute, because they were the Husband's own Debts.

This Reason concludes to the Case at Bar.

*First*, As it is the Husband's own Debt within the Words of the Act.

*Secondly*, That as the Husband might assign it, *ergo*, so might the Commissioners.

Besides, it is to no Manner of Purpose, and can serve no good End, to say, that such Debts are not assignable: For if they should be left in the Husband, as soon as he recovers them, the Commissioners must have the Money, and apply it to the Use of the Creditors.

But in Order to confine the Sense of the Words, *Debts due and owing to him*, it has been objected,

*First*, That the Statute does not extend to Debts due to a Bankrupt, as Executor.

*Response*. This is true; but it is for this particular Reason, because they are appropriated to pay the Debts of the Testator: And if they were assigned, it would be a Wrong, *viz.* a *Devotavit*.

for a Share.

*Secondly*, It has been objected, that the Statute does not extend to Debts due to the Bankrupt jointly with another.

*Resp.* The Case cited for that Purpose from 1 *Lev.* 17. is not determined; such Debt might be assigned to the King by any one of the Creditors; and so it is adjudged, *Mich.* 19 *Hen.* VI. And it would be forfeited by the Outlawry of one.

However, that Case is not before us. Thus far is plain, that a Debt due from him and another would be within this Act of 4 *Anne*, for it is so declared by the declaratory Act of 10 *Anne*, which provides at the same Time, that the Discharge of the Bankrupt shall not extend to discharge the other joint Debtor. Cap. 15 S. 3.

But this of a Husband and Wife is a different Case; for it is his Debt, as he is one with her.

But it is contended, that the Bankruptcy ought not to give the Husband a better Right to his Wife's Debt, and bar her of her Contingency by Survivorship.

*Resp.* It does not give him a better Right; for his Release for a Consideration to himself alone would have barred her of the Contingency; and this is a Consideration in Law, and amounts to the same Thing.

Besides, that is answered by the Fiction of Law whereby the Statute of 1 *Jac.* Cap. 15. and this Statute has made it as a Debt, and new Security to the Assignees. Suppose a Bond was made to *A.* in Trust for *B.* who becomes a Bankrupt, the Assignees may bring the Action in their own Name, though *B.* must have brought it in the Name of his Trustee.

*Objected.* The Husband must join with his Wife in this Action, but the Assignees cannot do it.

This is answered as before, and by the Cases of Forfeiture and Assignment to the King. But to put another Case:

Suppose a Bill of Exchange be made to the Wife, *dum solt*, the Husband may assign it, and the Assignee shall bring the Action in his own Name.

This Reasoning holds stronger, in the Case of Debts due from the Wife, for,

*First*, Certainly it is the Husband's Debt, and the Action must be brought in the Debt and *Detinet*. It is admitted to be the Husband's Debt after Judgement; and it were hard to say, that a Judgment of Law charges a Man with a Debt, who was not chargeable with it, when that Judgment was given against him.

*Secondly*, If the Intent of that Act be considered, and the Question asked, *Cui bono?* it will appear still stronger. The Persons concerned in this Matter, are *First*, The Bankrupt; *Secondly*, the Creditors; *Thirdly*, the Wife.

As to the Bankrupt, if an Action be brought against him on such Bond, what Execution can the Plaintiff have? If he takes a *Fieri facias*, or *Elegit*, as soon as he finds Goods or Lands, the Commissioners ought to seize them; this would be wholly in effectual; and if he takes a *Capias*, it will only serve to lay the Bankrupt up in Prison, when all his Estate wherewith he should make Satisfaction, and deliver himself, is taken out of his Power. And that is the Reason of his being discharged, *viz.* because his Ability to pay is entirely taken from him.

And this distinguishes it from the Case of an Executor, and shews that he ought not to be discharged as to the Testator's Debts, for he retains his Ability to pay them, by keeping the Effects which he has as Executor; and the Commissioners cannot meddle with them, because they are appropriated.

It was insisted at the Bar, that he ought to be discharged from all his Debts, because he is not only obliged to part with all his Estate, liable to pay those Debts, but all whatsoever wherewith he might pay his Debts; as for the Purpose, *Copyhold Lands, which are liable to no Execution.*

*Secondly*, As to the Creditor:

It cannot be for his Benefit that this Debt should not be within the Act; for the Bankrupt's whole Estate will be otherwise disposed of, and his Action against the Bankrupt can be worth nothing; but if this Debt be within the Act, then may he come in for his Dividend.

The Consequence of the contrary Opinion is, that you take from him every Thing wherewith his Debts may be paid, and at the same Time will not let him in for a Share.

*Thirdly*,

*Secondly*

*Thirdly, As to the Wife :*

It will be a Discharge to her, at least a temporary one; *viz.* during the Husband's Life. But though it be not necessary to give any Opinion upon that, yet I think it will amount to a perfect Release, and the Wife will be discharged for ever.

But no Harm can arise from this, for the Creditor is supposed to have had his Dividend, and the Debt is paid in Consideration of Law.

A Case may possibly be put, where a Woman being in Debt may make over all her Effects in Trust, and then marry a Bankrupt, and by that discharge all her Debts, and yet preserve her Estate; but that would be a fraudulent Conveyance, as against Creditors, *quoad* as much of the Estate as would satisfy their Debts, and for that they might have Remedy.

*It was objected,* that this Discharge is a personal Privilege, and not communicable to the Wife.

*Resp.* It is a necessary Consequence that it must extend to her, because every Thing in the Husband's Power is assignable, and all her Estate is in his Power. *1 Inst. 46. b.* *If the Husband be possessed in a Term for Years in the Right of his Wife, it may be sold on a Fi. Fa. and yet it is not actually transferred to the Husband by Intermarriage.*

For these Reasons, we are all of Opinion, that this is the Husband's Debt, within the Meaning of the Statute.

As to the second Question, *viz.* whether the Plea be good or not? We are likewise all of Opinion, that it is ill, *not to conclude to the Country.*

A Liberty of Pleading generally is given to the Bankrupt, and so he may avoid the Hazard of pleading specially; but then he must take upon him the Proof of his Conformity to the Statute in every Particular: Or if he thinks fit to plead the Matter specially, then he must set forth every Point; and by it he has every Advantage against the Plaintiff, that he must reply to one Particular only, upon which Issue must be taken. Here the Defendant has pleaded the Matter specially, but not set forth the Whole, and therefore it is ill for that Reason; for by the express Words of the Act, this is to be pleaded, so as that the whole Merits may be tried.

There are several Cases at common Law, where a Man shall conclude his Plea to the Country, though there be no Affirmative and Negative, to prevent the Inconvenience that would arise by going on to a Replication, as in 33 H. VI. 21. *to a Fine, quod Partes finis nihil habuerunt; & de hoc pmit se supra Patriam.*

So in Dower, *ne unques seisse de Dower, & de hoc, &c.*

And the Reason of this is, for that it would be inconvenient to go on to a Replication, because to reply generally would leave it too large and comprehensive, and to reply any particular Kind of Estate, would be too narrow, and consequently immaterial.

This Statute has found a new general Issue in this Case; and this was the Foundation of Judgement in *Bird and Lacy's Case, Mich. 6 Anne, C. B. Rot. 321.* that a Plea upon this Act was well concluded to the Country; and if so, it cannot conclude to the Court.

It may be observed on the Statute of Sewers, 23 Hen. III. Cap. 5, that by these Words of that Act, a general Replication is expressly given, to avoid the Forcing the Plaintiff to a single Point; and so the Mischief which would be in this Case is prevented; thus it must have been in this Act, if it had not been the Intention of it to make the Plea a general Issue.

For this Fault in the Plea, which is shewn for Cause of Demurrer, and which would put a Difficulty upon the Plaintiff, not intended by the Statute, Judgement must be given for the Plaintiff.

A *Feme sole* is a Mortgagee in Fee for 800*l.* and marries a Tradesman, who becoming a Bankrupt, a Commission of Bankruptcy is taken out against him, and the Commissioners assign over all his Estate, real and personal; afterwards the Husband dies, and the Writings relating to this Mortgage being in the Assignees' Hands, the Widow of the Bankrupt brings a Bill in Equity against the Assignees, for these Writings, and to have the Benefit of the Mortgage.

This Cause came on to be heard, and, for its Difficulty, was ordered to be

Articles w

or agrees to c

spoke to again, when his Honour delivered his Opinion solemnly for the Plaintiff, the Wife.

But afterwards, being dissatisfied with that Opinion, he ordered the Decree to be stayed, and to be attended again by Counsel.

Whereupon his Honour gave his Opinion, that if there had been any Articles before the Marriage, purporting, that this Mortgage Money should continue in the Wife, as her Provision, or should be assigned in Trust for her, there would have been a specifick *Lien* upon the Mortgage, and have preserved it from the Bankruptcy.

Also it might have been a Matter of different Consideration, if the Assignees had been Plaintiffs in Equity, and desired the Aid thereof, to strip an unfortunate Widow of all that she had in the World; towards the doing of which, Equity would hardly have lent any Assistance; because the Assignees claiming under the Bankrupt Husband, could be in no better Plight than the Husband would have been; and if the Husband had in Equity sued for the Money, or else prayed that the Mortgage might be foreclosed, Equity, probably, would not have compelled the Mortgageor to have paid the Money to the Husband, without his making some Provision for his Wife, by an Application to the Court against the Husband, and the Mortgageor might have prevented the Payment of the Money to the Husband, unless some Provision were made for her.

But in the present Case, the Widow was Plaintiff against the Assignees, so that she, and not the Creditors, sought the Aid of Equity.

And here being in the Mortgage Deed, a Covenant to pay the Mortgage Money to the Wife, this Debt, or *Chose in Action*, was well assigned by the Commissioners to the Assignees, and vested in them, like the Case of *Miles and Williams*, last cited, where a Bond made to the Wife, *dum sola*, was adjudged to be liable to the Husband's Bankruptcy, and assignable by the Commissioners.

Wherefore if the Right of the Debt was vested in the Assignees, as plainly it was, though the legal Estate of the Inheritance of the Lands in Mortgage continued in the Wife, yet this was not material; it being no more than a Trust for the Assignees, like the common Case where there is a Mortgage in Fee, and the Mortgagee dies; here the Mortgage Money belonging to the Executors, though the Heir takes the legal Estate by Descent, yet he is but a Trustee for the Executor, for the Trust of the Mortgage must follow the Property of the Debt, else the Mortgageor would be in a very hard Case, liable to be sued by the Assignees of the Commissioners upon the Covenant; and also in an Ejectment by the Wife of the Mortgagee; whereas the latter Suit would be enjoined in Equity.

Then it was insisted, that here were Articles entered into before the Marriage of the Bankrupt and his Wife, by which the Husband covenanted to settle the Wife, in the Manor of *Dale*, or to leave her 1000*l.* within three Months after his Death.

But in this Agreement it appeared, that the Husband had his Election all his Life-time, and that if the Wife had brought her Bill in Equity against the Husband, she could not have compelled him to do the one or other; neither could she, upon such Bill, or otherwise, have compelled him to give any farther or better Security for the Payment of this 1000*l.* because she had that Security which she at first agreed to take, and the Court could not better it against her own Agreement.

But upon another Point, *viz.* as to 200*l.* Part of the Wife's Portion, on a Note given by the Husband at his Marriage, signifying his Consent that the Wife should have this 200*l.* the Court held the same was specifically bound thereby; so that with Respect to this only, the Plaintiff was relieved, and the Bill, as to the Rest, dismissed.

*Of the Rights which are vested in the Bankrupt's Children by Virtue of Marriage-Settlement, and Trustees for supporting contingent Remainders.*

**I**F a Man before Marriage with his Wife makes a Settlement, or enters into Articles with Trustees to make such Settlement upon his Wife, and conveys, or agrees to convey, such Estate to Trustees, to the Use of himself or his Assigns,

for the Term of his Life, without Impeachment of Waste; and, after the Determination of that Estate, to the Use and Behoof of *A. B.* and *C. D.* and their Heirs during the Life of the Husband, upon Trust, to preserve the contingent Uses and Estate therein after limited, from being barred, destroyed, or prevented; and for that Purpose to make Entries and bring Actions as Occasion shall require; but, nevertheless, to permit and suffer the Husband and his Assigns, during his Life, to receive and take the Rents, Issues, and Profits of the same Premises to his and their own Uses; and from and after the Decease of the Husband, to the Use of the Wife for Life; and afterwards to the Use of the first and other Sons of their Bodies according to Priority, and their Heirs Male; and for Default of such Issue, to the Daughters and their Heirs equally; with proper Provisions for raising Portions for Daughters and younger Children, as is usual in Marriage Settlements; though the Remainder in Fee is limited to the Bankrupt, for Want of Issue Male or Female; yet if such Person becomes a Bankrupt, and has a Wife and Children, or Children and no Wife, though this is an entailed Estate, yet it is not such an Estate as he can lawfully or equitably bar by a Fine or common Recovery, and consequently he will be only Tenant for Life, and his Wife will enjoy the Jointure, and his Children his Estate after his Death; and the Creditors cannot defeat such an Estate.

But if he dies without Children, and becomes a Bankrupt, and there are no Remainders over, but the Remainder in Fee is in him, *Query*, whether a Court of Equity would not, after confirming his Wife's Jointure, direct and enable the Trustees, in Conjunction with him, to bar the Estate Tail, for the Benefit of his Creditors: But there have been Instances where Trustees have joined with the Husband, and defeated the legal Estate by a Recovery; but Acts of this Kind have been always looked upon as the highest Breaches of Trust; and if a Purchaser was to buy the Estate, or a Mortgagee to lend any Money upon it, with Notice of the Trust, he would be unsafe in so doing. And as this is a Matter of great Consequence to Families, I shall for that Reason cite the following Cases.

See the subsequent Case of *Basset v. Chapman*.  
*Pye v. George*,  
*1 Peer Will.*  
*Rep. 128.*  
*Salk. 680.*  
*Mish. 1710.*

It was declared by the Lord Keeper *Harcourt*, that where there were Trustees appointed by Will to preserve contingent Remainders, and they, before the Birth of a Son, joined in a Conveyance to destroy the Remainders, this was a plain Breach of Trust, and any Person taking under such Conveyance, if voluntarily, or having Notice, should be liable to the same Trusts.

And though it was objected, that this had been only *obiter* said in Equity, and that there never was any Precedent of a Decree in such a Case:

Lord Keeper said, it was so very plain and reasonable, that if there was no Precedent in this Case, he would make one.

But this was the principal Case, which was, that there was a Son born before the Conveyance by the Trustees, and the Estate being in Mortgage, the Son came into Equity, after the Death of Tenant for Life, to redeem.

Agreeably to what was thus declared by Lord *Harcourt*, it has been since expressly decreed by Lord Chancellor *King*, assisted by Lord *Raymond* and Chief Baron *Reynolds*, in the Case of *Manfell vers. Mansell*, December 1732, hereafter mentioned; which was the Case of a voluntary Settlement, and where the Court unanimously delivered it as their Opinion, that Nothing in common Justice, Sense, and Reason, could be a plainer Breach of Trust, than that those who were appointed Trustees, to the Intent to preserve the Estate to the first Son, and for that Purpose only, should directly contrary to their Trust, join in the Destruction of the Settlement.

But where there is Tenant for Life, Remainder to the first Son, &c. and no Trustees to preserve contingent Remainders, in such Case, if Tenant for Life by Fine or Feoffment destroys the Remainders, there being no Trustee, there can be, consequently, no Breach of Trust; and this being the Law, Chancery will not interpose.

But then as this was a Hardship at Law, to prevent which the Method of appointing Trustees was invented, so it is reasonable that the Trustees, when they let in this Hardship by violating the Trust reposed in them, should themselves be liable for the same; but if the Conveyance be voluntary, or if there be Notice of the Trust, such Trust shall follow the Land.

One after Marriage makes a voluntary Settlement of his Lands to himself for Life, Remainder to Trustees to support contingent Remainders, Remainder to his first, &c. Son in Tail successively, Remainder to himself in Fee; and contracting Debts, he after makes a Conveyance of his Estate to other Trustees, for Payment of these Debts.

The Creditors bring a Bill, and, *int' al*, insist, that the Trustees for preserving contingent Remainders should join in the Sale to destroy the contingent Remainders: And this came on by Consent before Sir Joseph Jekyl, who took Time to consider of it, alledging, that though in the Case of Sir Thomas Tippin, where Trustees had joined in cutting off Remainders created by a voluntary Settlement, the Court, on a Bill brought by a remote Relation, had refused to punish them, as distinguishing betwixt a voluntary Settlement, and one made on a valuable Consideration; yet he had not known a Precedent where the Court ever decreed the Trustees to join in destroying the contingent Remainders; this being the Reverse of the Purpose for which they were at first instituted.

But this Cause coming on in August 1717, and a Precedent being shewn where such a Decree was pronounced, his Honour decreed, that the Trustees should join to destroy the contingent Remainders, and be indemnified, it being at the Suit of the Creditors, and for raising of Money for Payment of Debts.

NOTE, Sir Thomas Tippin's Case was, where, upon a Marriage, Settlement was made by a third Person to the Use of the Husband for ninety Years, Remainder to Trustees, during the Life of the Husband, to support contingent Remainders; Remainder to the Wife for Life, Remainder to the First, &c. Son of the Marriage, Remainder to the Heirs of the Body of the Husband, Remainder to the right Heirs of the Husband: There was no Issue of the Marriage, and the Remainder in Fee being contingent, in Regard the Limitation to the Husband was for Years only, and the Estate not moving from the Husband (for if it had, the Remainder limited to the right Heirs of the Husband, would have been the old Reversion) the Trustees joined to destroy this contingent Remainder.

And on this Case being cited, it was said by the Master of the Rolls, that if a Son had been afterwards born, it would have been a Breach of Trust; but this Remainder to the right Heirs of the Husband, being a remote Limitation, and not within the Consideration of the Settlement, and voluntary, Equity would not punish it as a Breach of Trust.

This Cause came on, upon an Appeal to my Lord Chancellor King, from the Decree of the Master of the Rolls.

Edward Vaughan seized in Fee in 1683, devised Lands to his Sister Dorothy, afterwards the Plaintiff's Mother, for Life, Remainder to Trustees to preserve contingent Remainders, Remainder to the Use of her first, and other Sons in Tail Male, Remainder to the Use of his Cousin Edward Mansfell in Fee, and charges the Estate with a Debt of 1200*l.* and dies.

The Plaintiff's Mother intermarried with Sir Edward Mansfell, and in 1685; they, with the Remainder-man in Fee, joined in a Feoffment, with a Covenant to levy a Fine to Trustees to the Use of the Plaintiff's Father in Fee; and this is expressed to be to the Intent that the Fee simple might be vested in him, for the raising of Money for the Payment of the Debts of Edward Vaughan the Testator, whose Inheritance it was, by demising, selling, or mortgaging the Estate; or any Part thereof, and for other good Causes and Considerations; a Fine is levied accordingly at the grand Sessions in Caermartenshire, where the Lands lay. About a Year after, the Trustees to preserve contingent Remainders, reciting the Will, Feoffment, and Fine, convey the whole Estate by Lease and Release to the Plaintiff's Father in Fee, Dorothy being then with Child, and then the Plaintiff is born; after, the Father makes the Plaintiff Tenant for Life, &c. and then dies.

The Plaintiff brought his Bill to have the Benefit of Mr. Vaughan's Will, and insisted on the Breach of Trust; and that the Parties who claim under the Fine and Feoffment, being Parties to the Breach of Trust, ought not to take Advantage of it.

The Defendant in his Answer insisted on the Fine and Feoffment.

The Master of the Rolls decreed for the Plaintiff for so much as was not alienated *bonâ fide*; and this Decree was confirmed in Mich. Vacation, 6 Geo. II. by

Lord Chancellor King, assisted by Lord Chief Justice Raymond, and Lord Chief Baron Reynolds, as before mentioned.

At the Rolls,  
Mich. 1698.  
Parker v.  
Dyke.

A Man had devised Lands, which were in Mortgage to be sold, and the Surplus of the Money to be paid to his Daughter; the Daughter married a Man who soon after became a Bankrupt, and the Commissioners assigned this Interest of the Wife's. The Husband died, and the Assignees brought this Bill against the Wife and Trustees, to have the Land sold, and the Surplus of the Money paid to them. But the Court would not assist in stripping the Wife, who was wholly unprovided for, of this Interest, but dismissed the Bill.

#### Of Possibilities.

5 Geo. II.  
S. 1.

BY this Statute it is enacted, that the Bankrupt is to discover to the Commissioners upon Oath, such Estate and Effects as he may have any Profit, or Possibility of Profit, Benefit, or Advantage whatsoever by.

1 Peer Will.  
382.

And a Possibility is defined to be such an uncertain Thing as may or may not happen; but it must be such a Right, according to the Case of *Higden and Williamson*, as a Person may lawfully depart withal, and which, by some Deed or Writing, he may have a Possibility one Time or other to enjoy.

But if a Bankrupt has Relations, who may possibly provide or not provide for him, as they shall think fit; this uncertain Possibility is no Part of the Bankrupt's Estate: and if he obtains his Certificate, will not pass to his Creditors; because he had it not in his Power to part with his Relation's Fortune, nor could he tell what his Will or Intention might be, or whether he would give him any Thing or no.

1111. Term,  
1701.  
Faulson v.  
Grant. 2 Vern.  
Rep. 432.

*William Davidson* having devised a Legacy of 600*l.* to his Son, payable at twenty-one, for which he had obtained a Decree, and 637*l.* reported due; before he received the Money he became a Bankrupt, and the Commissioners assigned the Legacy and Benefit of the Decree.

The Bill was brought by the Assignees to have the Benefit of the Decree; to which the Defendants, the Executors, demurred; insisting that a Legacy was not within the Compass of any of the Acts made against Bankrupts, to be assigned to the Creditors.

But the Demurrer was overruled; and said, that the Act of Parliament ought to be taken in the most benificial Sense for the Advantage of the Creditors.

#### Of Interests which have been determined not to center in the Bankrupt.

Mich. 1690.  
Moyse v. Litt-  
le. 2 Vern.  
Rep. 194.

THE Defendant, upon Marriage of his Son, settles Lands upon himself for Life, Remainder to his Son for Life, &c. and covenants, during his own Life, to pay his Son 15*l.* per Ann. The Son becomes a Bankrupt; the Plaintiff, as an Assignee, brings the Bill against the Defendant, the Father, to have the Benefit of this Agreement, and to compel Payment of the 15*l.* per Ann.

*Per Curiam*: An Assignee, under a Statute of Bankrupt, is not entitled to have the Performance of an Agreement made with the Bankrupt; and that it was so adjudged in the Case of *Drake and the Mayor of Exeter*. And therefore dismissed the Bill.

*Coates*, possessed of a Lease for Years, contracted with the Committee of the Company for a new Lease, and paid Part of the Fine; and, by *Coates's* Consent, a new Lease was made to *Mosse* by the Company, and to him executed. *Coates* was at the Time of Treaty a Bankrupt. The Question was, whether the Commissioners could assign the Lease to the Prejudice of *Mosse*, and *Drake's* Case was cited.

The Lord Keeper ordered that the Plea and Demurrer be ousted, and the Benefit thereof saved till the Hearing; he doubted of the Lease: There were other Matters for the Benefit of *Mosse* also in the Plea.

*Of the Creditor, who are such; and therein of proving their Debts, and how Notice of their Meeting is to be given; and of Debts due to the Crown.*

EVERY one to whom the Bankrupt is indebted, either on Bonds and Notes, or by Book-Debts or simple Contracts, by Recognizances, Statute Staple, or Judgments, Specialities with Penalties, Attachments, and Securities where no Execution is sued out, is a Creditor, and has a Right to a Share in the Bankrupt's Estate.

Creditors on Bonds or Notes, by Book-Debts or simple Contracts, are equally entitled to a Dividend under a Commission of Bankruptcy, with Creditors by Judgment, Statute, &c. and Creditors that have Debts due to them payable at a future Day, may petition, or join in petitioning, for a Commission.

But Creditors upon contingent or uncertain Debts, or upon Bottomree Bonds, could not come in as Creditors, or prove their Debts, till such Contingency happened, before passing the subsequent Act, viz.

And as Merchants and other Traders frequently lend Money on *Bottomree*, or at *Respondentia*, and cause their Vessels with their Cargoes to be insured; and where Commissions of Bankruptcy have issued against the Obligor, or the Assurer, &c. before the Loss of the Ship or Goods has happened, it hath been made a Question whether the Obligee, or the Assured, should be let in to prove their Debts, or be admitted to have any Benefit under such Commission, which may be a Discouragement to Trade: For Remedy whereof, it is enacted, that from the 29th of October, 1746, the Obligee in any Bottomree or Respondentia Bond, and the Assured in any Policy of Insurance made *bond fide* upon a valuable Consideration, shall be admitted to claim; and after the Loss or Contingency, to prove the Debt thereon, in like Manner as if the same had happened before the Issuing of the Commission of Bankruptcy; and shall receive a proportionable Dividend with the other Creditors of the Bankrupt's Estate; and after the said 29th of October, every Bankrupt shall be discharged from the Debt on such Bond and Policy of Insurances as aforesaid, and shall have the Benefit of all the Statutes against Bankrupts, in like Manner as if such Loss or Contingency had happened, and the Money payable thereon had become payable before the Time of the issuing of such Commission.

Creditors may come in within four Months after issuing the Commission, and until a Dividend be made, and shall be at Liberty to prove their Debts under the Commission, without paying any Contribution or Sum of Money whatsoever, for or on Account of such Debt.

Creditors, upon what Securities soever they be, come in equal, unless such as have obtained actual Execution, or taken Pledges for their just Debts before Bankruptcy.

A Creditor, though he hath Security, may come in and prove his Debt, because possibly his Security may prove deficient; and every Creditor is to swear, whether he has a Security, or not; and if he has a Security, and insists upon proving his Debt, he must deliver up the Security for the Benefit of the Creditors at large, under the Commission, unless it be a joint Security for the Bankrupt and another Person; for then he may come in for his whole Debt under the Commission, without being compelled to deliver up such joint Security, as he is intitled to get in what he can from the Co-Security.

Where a Creditor proves a Debt under the Commission, and also proceeds at Law for the Recovery thereof, and detains the Bankrupt in Custody on the Action; his only Relief is to petition the Chancellor, that the Creditor or Plaintiff may make his Election, either to abide by the Commission, or to proceed in his Action; whereupon he will be ordered to make such Election within a limited Time, usually about a Week; and whichever Remedy the Creditor chuses, he will be at liberty to assent to, or dissent from the Certificate: But if the Election be to proceed by Law, the Creditor must waive all Dividends under the Commission. See *Greene's Spirit of the Bankrupt Laws*.

If a Man trade with a Bankrupt between the Act of Bankruptcy and the Commission sued out, whether by Delivery of Goods, or Payment of Money,

7 D

without

without Notice of the Act of Bankruptcy, the Bankrupt keeping open Trade, such Person shall come in as a Creditor for such Goods or Money.

*Special Cases of Debts that may be proved under the Commission.*

2 Ves. Rep.  
49.

**ANNUITY.** Lord *Hardwicke* referred it to the Commissioners to settle the Value of an *Annuitant's* Life, and that she be admitted a Creditor for such Valuation, and the Arrears of the Annuity, and not for the whole Purchase Money.

**Apprentice.** The Commissioners may allow a gross Sum out of the Estate for binding him to another Master, but the Court alone can order him to be admitted a Creditor; accordingly, Lord Chancellors, *King*, *Talbot*, and *Hardwicke*, ordered an *Apprentice*, whose Master became a Bankrupt, to be admitted as a Creditor under the Commission, on Account of the Apprenticeship received by the Master, only for the remaining Sum thereof, after deducting for the Time he lived with the Bankrupt.

**Bail.** If *A.* is Bail for *B.* either to bring his Body, or to pay the Condemnation Money, and *B.* becomes Bankrupt, he may come in as a Creditor.

If the Bail be liable, that is, if he has justified himself as such, before his Principal becomes Bankrupt, though he be not *fixed* till *after*, yet it seems he is well entitled to make his Claim forthwith, and to *prove*, as soon as he has paid the Condemnation Money.

**Children.** A Child living with and maintained by a Parent, who receives the Earnings of the former, may be admitted a Creditor under her Father's Commission, but with Caution:

parte  
*Macklin*  
2 Ves. 675.

Thus, upon a Petition on the Part of Miss *Macklin* to be let in as a Creditor on the Estate of her Father a Bankrupt, for the Money he had received from the Managers of the Theatres on her Account, offering an Allowance thereout for living with, and being maintained by him, during the Time of her acting upon the Stage: It was alledged on her Part, that the Court is so far from giving the Father all the Earnings of the Child, as not to suffer a Father to be eased of the Maintenance of a Child, who has a Fortune, but will let the whole Interest accumulate, and the Father maintain the Child, unless unable to do so.

The Lord Chancellor said, he was under some Difficulty for the Sake of the Precedent; for if it is true, that this Question is the same as it would have been between the Daughter and the Father, if he had not been a Bankrupt, and could answer to an Action for himself; whether after all this Transaction the Daughter could in an Action have recovered against the Father all this Money, as Money had and received to her Use? He said, it might be dangerous in *London* to lay it down as a general Rule, that if a Father having several Children, who earn Money which he receives, becomes Bankrupt, every Child can come and claim his Debt for that Money so had and received while they lived together, and were Part of his Family. A Father frequently sends out his Son to work as a Journeyman, and his Earnings are taken to be his Father's. Here, said his Lordship, the Father, Mother, and Daughter were all Actors and lived together; the Father received the whole. It is extraordinary to say, that after a Length of Time, this shall be all called back, because of an Act of Bankruptcy. He reserved it therefore to the Commissioners to inquire, how much the Father received to the Child's Use, unless as to so much as was a Covenant with the Daughter herself.

**Relations.** Debts of near Relations to the Bankrupt, especially Securities, as Bonds, Bills, &c. are generally looked upon with a jealous Eye by the other Creditors, therefore great Care should be taken by the Commissioners to be satisfied of the Validity of the Demand. And such Creditors should take every Precaution to establish the Validity by proper Vouchers, if called upon. *Green's Spirit of Bankrupt Laws.*

**Servants.** The Commissioners generally recommend to the Assignees to pay the Whole of the Wages of menial Servants; but where the Wages of Clerks, and other superior Servants are very large, and the Arrears long, they should prove their Debts, and come in as common Creditors. *Ibid.*

One seized of Lands in Fee, owes a Debt by Statute, and afterwards becomes a Bankrupt, and the Creditor by Statute extends the Lands; then a Commission of Bankruptcy is sued out; and whether the Lands should be liable to the Statute Creditor, was the Question.

*Sir George Rossland, & al. against — Per Will. 1. Easter Term, 1706.*

This was referred by Lord Chaucellor to the Judges of the *Common Pleas*, who held that a Creditor by the Statute, and a Statute not sued, and executed before the Bankruptcy should come in only *pro rata*, though there were Lands in Fee bound by the Statute.

In February 1716, the Defendant *Fletcher*, being seized in Fee of some Lands in *Bedfordshire*, borrowed 1500*l.* of the Plaintiff *Orlebar*, one of the Masters in *Chancery*. On a Judgement afterwards, viz. August 20, 1717, the Defendant *Fletcher* articted with the other Defendant, the Duke of *Kent*, to sell the Premises to the Duke in consideration of 5000*l.* to be paid down, and 650*l.* to be paid at *Christmas* then next; the Duke to be let into Possession at *Michaelmas*; subsequent to which Transactions, the Defendant *Fletcher* becoming a Bankrupt, the Plaintiff Mr. *Orlebar*, brought his Bill against the Duke of *Kent*, *Fletcher* the Bankrupt, and the Assignees under the Commission, praying that the 650*l.* remaining in the Duke's Hands might be paid to the Plaintiff towards Satisfaction of his Judgement.

*Mab. 1721. Orlebar v. Fletcher and the Duke of Kent. Per Will. 1. 1737. Case 212.*

In the principal Case the Court said that the Duke could not be deemed a Purchaser until he had paid the 650*l.* which remaining in the Duke's Hands, was Part of the personal Estate of the Bankrupt, and must be liable to his Creditors.

Wherefore, *per Curiam*, let the Assignees convey the Premises in Fee to the Duke of *Kent*, in the same Manner as the Bankrupt had articted to do, they standing in his Place; and in Consideration of this, let his Grace pay the 650*l.* to the Assignees, for the Benefit of the Creditors; and as to the Plaintiff Mr. *Orlebar*, the Judgement Creditor, he must come in for a Proportion only with the Rest of them.

*A.* draws a Bill payable to *B.* on *C.* in *Holland* for 100*l.* *C.* accepts it; afterwards *A.* and *C.* become Bankrupts, and *B.* receives 40*l.* of the Bill out of *C.*'s Effects, after which he would come in as a Creditor for the whole 100*l.* out of *A.*'s Effects. *B.* permitted to come in as a Creditor for 60*l.* and the Master directed to see whether the other 40*l.* was paid out of *A.*'s Effects in *C.*'s Hands, or out of *C.*'s own Effects; if the latter, then *C.* is a Creditor for this 40*l.* also, but if out of *A.*'s Effects, then the 40*l.* of the 100*l.* is paid off.

*Ex parte Roswicks. 2 Peer Will. 1. 1728. Lord Macclesfield.*

*A.* gives a Promissory Note for 200*l.* payable to *B.* or Order; *B.* endorses it to *C.* who indorses it to *D.* *A.*, *B.* and *C.* become Bankrupts, and *D.* receives five Shillings in the Pound, on a Dividend made by the Assignees against *A.*; *D.* shall come in as a Creditor for 150*l.* only out of *B.*'s Effects, and if *D.* paid Contribution Money for more than 150*l.* it shall be returned.

*Ex parte LeFebvre. 2 Peer Will. 407. Easter Term, 1727. L. C. King*

*Francis Venaker*, Esq. Son and Heir, and also Executor of *Nicholas Venaker*, his Father, Plaintiff, sued the Commissioners and Assignees of a Statute of Bankruptcy against one *Sbelbury*, to be let in to pay his Contribution Money, and to have a proportionable Benefit of the Bankrupt's Estate with the Rest of the Creditors.

*Francis Venaker, Esq. v. Esau, Neph. Esq. & al. Finch's Rep. in Chan. S. 60. 11th 1672. 25 Car. 11.*

The Case was, that *Sbelbury*, who was a Scrivener, and Agent for the Plaintiff's Father, had got several thousand Pounds of the Father's Money in his Hands, for which he had only *Sbelbury*'s single Bonds, on some of which he got Judgement and Execution on *Sbelbury*'s Goods, which were appraised, and Part thereof came to the Father's Possession in his Life-time, or to his Bailiff after his Death, and were sold by them. That a Commission of Bankruptcy was sued out against the said *Sbelbury* by the Defendants, who pretended that *Sbelbury* had committed an Act of Bankruptcy before the Father had obtained any Judgement against him.

That *Lesjon* and *Nash* had brought several Actions against the now Plaintiff and his Trustees, in three of which Actions they were non-sued; that in another Action he had obtained a Verdict for 920*l.* since which the Plaintiff, before any Assignment of the Bankrupt's Estate, hath offered to pay his Contribution Money, being a Creditor for above 6000*l.* The Commissioners insist that they found *Sbelbury* a Bankrupt before the Father's Judgement, and the Assignees say that they have recovered against the Plaintiff 53*l.* Damages, in an Action of *Trover*, for *Sbelbury*'s

Goods

Goods in his Hands, &c. But now the Counsel for the Plaintiff offering that he should stand in his Father's Stead, and be accountable for all that the Father had received of the Bankrupt's Estate, and that he should pay a reasonable Proportion of Contribution-Money, so that he may be let into the Statute, which Officers the Court decreed should be accepted, and he admitted a Creditor accordingly.

*E. H. v. John  
Kest & al.  
1701, Rep.  
316. Mich.  
1677. 29  
Car. II.*

The Plaintiffs lived in Gloucestershire, where also one *Blithe* lived, who owed them Money, and having committed some Acts of Bankruptcy, he afterwards came to an Account with the Plaintiffs, and sold them several Parcels of Goods in Satisfaction of their Debts.

The Defendants lived in London, to whom also the said *Blithe* was indebted, and they having employed a Person to discover his Estate in the Country, and how it had been disposed of, and to procure the same to be distributed equally amongst all his Creditors; it was at last agreed amongst them, that the Plaintiff should waive the Disposal of the Goods to them already made by the said *Blithe*, and that they should have an equal Distribution with the Defendants, in Proportion to their respective Debts; and for that Purpose, that a Commission of Bankruptcy should be taken out at London, and executed there, and all the said Debts put in *Hotchpot*.

Accordingly a Commission was executed at London, but without giving Notice thereof to the Plaintiffs, or any Commissioners sent into the Country, to join with the others therein, in Order to a perfect Discovery of the said *Blithe's* Estate, as agreed on.

And afterwards the Defendants prevailed with the Commissioners in London, within a Month after the Execution of the Commission, to make an Assignment and Dividend of the said Bankrupt's Estate, contrary to the said Agreement: intending thereby to exclude the Plaintiffs; and now refuse to let them come in for their Shares, though they have offered to pay their Contribution-Money, and Proportion of the Shares of Commission; but have brought Actions of *Trove* for the Goods so sold and delivered by the said *Blithe*.

To be relieved against which Actions, the Plaintiffs have brought this Bill; and that the said Agreement might be performed, and the Dividend made amongst the Defendants be set aside, and that the Plaintiffs may be let in to have an equal Distribution with them.

All which Matters appearing to the Court, though the Defendants denied the said Agreements, yet such Relief was decreed, as the Plaintiffs had prayed.

*Mich. 7. Geo.  
II. Brassly v.  
Dowson, K. B.  
before Lord  
Raymond.*

An Action was brought by the Plaintiff, an Assignee under the Commission of Bankruptcy, against the Commissioners of Land-Tax. In this Case, one *Farrow* was a Collector of the Land-Tax, and had collected a great deal of Money for the publick Use, and on July 7, 1731, absconded and became a Bankrupt; and on the 16th of the same Month and Year, the Commissioners brought their Warrant, and seized his Goods, &c. after a Commission was taken out, and the Assignees appointed. This Case was tried before Lord *Raymond*, and Verdict given for the Plaintiff, subject to the Opinion of this Court.

Serjeant *D.* The only Question in this Case is, whether the Act of Bankruptcy so took away the Property of the Goods before Assignment, as to make them cease to be his?

*C. J.* If an Extent be issued out, nay, only one *testud*, before the Goods, &c. are assigned, that Extent will be good.

*D.* That is a Prerogative Case, but this is in the Case of a private Person. In *C. B.* in London, 3 *Geo. II.* *Andrews* and Sir *Matthew Decker's* Case was tried at *Nisi Prius*, before Chief Justice *Eyre*, and the Action was brought against Sir *Matthew* for a false Return to a *Fieri Facias*, viz. *nulla bona*. It appeared on Evidence, that Goods of the Defendant were in the House at the time of the Return, but that the Party whose Goods were to be taken, became a Bankrupt before the Writ was delivered to the Defendant, and that a Commission was issued against him, but his Goods were not assigned over by the Commissioners. Here the Commission was held to be sufficient Proof of his being a Bankrupt.

Serjeant *D.* altered till *A* good; so in rupts; so Si tioners of the Crown. By Money which Estate; and 3 *Lev.* 69. *D.* This 18. it appear Parish, which to return to the Money co the Receiver.

*C. J.* In the a private Pers before an Assi the Bankrupt's Power of Dispo from the Tim self; and there and the Execu the Money ow in a Case of a p were not dispo Commission w Case? And it applied to the therefore it is imagine that t 3 *Geo. II.* shou rent in this Ca the *Tost* of it;

No Commissi to a Bankrupt, t Years in Arrear moved; but if t off the Premises rupt's Creditors. Also if there

Rent, he can on

Serjeant *E.* This Case concerns the Crown, and therefore the Property is not altered till Assignment, and an Extent in Aid executed before the Assignment is good; so in 3 *Keb.* 14. The Crown is not bound by Statutes relating to Bankrupts; so Sir *William Jones* 203. An Extent and a Warrant from the Commissioners of the Land Tax, alters only the Manner of collecting the Money of the Crown. By the Statute of 3 *Geo.* II. fol. 25. if any Collector refuses to pay the Money which he has collected, any Commissioner may commit him, and seize his Estate; and this is a new Law, and shall control all the former Resolutions. 3 *Law.* 69. 191, *S. C.*

*D.* This Case does not concern the Crown; for by the Statute 3 *Geo.* II. fol. 18. it appears that the Seizure of the Collector's Estate is for the Benefit of the Parish, which is answerable for the Money at all Events; therefore the Parish is to return to the Commissioners substantial Men to be Collectors and Assessors, and the Money collected comes not to the Crown till it is paid into the Hands of the Receiver.

*C. J.* In this Case are two Questions; the first is, whether, if this be the Case of a private Person, what Effect an Act of Bankruptcy has on the Goods, in that Case, before an Assignment? In the Case of a private Person, there is no actual vesting the Bankrupt's Estate before Assignment, because the Commissioners have only a Power of Disposal; but after Assignment they vest to many Purposes by Relation from the Time of the Bankruptcy, as to avoid the Acts done by the Bankrupt himself; and therefore I think, if a Judgment be given against one before a Bankruptcy, and the Execution be completely executed by Sale of the Goods and Payment of the Money over before the Assignment, that the Execution will be good. But here, in a Case of a private Person, the Execution would not be completed, for the Goods were not disposed of by the Officer before the Assignment; and then I think this Commission will over-reach it. So the Question is, whether this is a Prerogative Case? And it seems to me that it is; for though the Money when levied is to be applied to the public Use, yet it is always considered as Money of the Crown; therefore it is always recovered by the Prerogative Power; and I think it hard to imagine that the summary Remedy given to the Commissioners by the Statute of 3 *Geo.* II. should put the Crown in a worse Case than it was before; and if an Extent in this Case had been sued out, the Goods would have been bound even from the *Test* of it; and there could be no Relation.

The Question here is, whether this Warrant can have the same Effect as an Extent would have had? As to the Parish being liable, that makes it not less the Money of the Crown than before, for that is only giving the Crown a double Security for the Money. And in the Case of *Box* and *Norton*, it was held that an Extent and Execution, after Assignment, would be good. The other Judges said little to it. See *Salkeld* 111. contrary to *Andrew's* Case cited by *Darnall*, and *per Curiam*. It was ordered to stand over.

*A.* sells Land to *B.* who afterwards becomes a Bankrupt, Part of the Purchase Money not being paid. *A.* shall not be bound to come in as a Creditor under the Statute, but the Land shall stand charged with the Money unpaid, though no Agreement for that Purpose. 1 Vern. 267.  
M. b. 1684.  
Chapman v.  
Tanner.

If there be an Act of Bankruptcy committed, and a Creditor obtains a Judgment subsequent to it, the Judgment is hereby avoided. East. Term.  
13 W. III.

*A.* and *B.* were Sureties for *C.* for the Payment of some Money, and had Counter-Bonds to save them harmless; the Money was not paid at the Day, and the Sureties paid it, and afterwards *C.* became Bankrupt; the Question was, whether they were Creditors within the Statute, and it was resolved that they were; and so it has been determined in several subsequent Cases. Holt at N. P.  
2 Cr. Rep.  
127.  
Oj. ra & al.  
v. Churchman.

No Commission of Bankruptcy can remove or carry away any Goods belonging to a Bankrupt, till all the Rent due to a Landlord is paid, although there be several Years in Arrears, provided the Landlord seizes for Rent before the Goods are removed; but if the Landlord does not seize before the Commission takes the Goods off the Premises, he must then come in as a Creditor with the Rest of the Bankrupt's Creditors.

Also if there are not sufficient Goods upon the Premises to pay the Landlord's Rent, he can only take what Goods there are, and after they are appraised and sold,

as the Law in Cases of Distress for Rent directs, then the Landlord may come in as a Creditor for the Rent remaining due, with the Rest of the Creditors.

All Debts due to the Crown are preferable, and to be paid before any others, except where an Estate or Interest is incumbered, conveyed, or assigned, prior to such Debts due to the Crown; and in the Case of a Landlord, where a Year's Rent is to be retained before an Extent can take Place.

And in the Case of a Commission of Bankruptcy, if an Extent is taken out the same Day and executed with the Commission, the Extent shall take Place, and carry away the Effects before the Commission; and according to the Case of *Brassy and Dawson*, hereafter mentioned, an Extent shall take Place before the *Teste* of the Writ, though not executed till some Days after a Commission of Bankruptcy; and notwithstanding an immediate Assignment has been made of the Estate and Effects.

But if an Assignment is made before the Execution, or the *Teste* of the Extent, such Assignment takes Place before the Crown, and the Crown can then only come in as a Creditor, *pari passu*, with the Rest of the Bankrupt's Creditors; which the following Cases will make appear.

*Monk v. Clayton.* 3 *Kib.* 14.  
*Eggest.* 24.  
*Car.* 11.  
*Mod. Rep.* 93. pl. 1.

Mr. Solicitor prayed the King's Process might take Place against the Assignee of Commissioners, the Defendant being a Bankrupt; which by the Court cannot be, unless Seizure be made and returned by Inquest before the Assignment; also this being not an immediate Debt, but in Aid of Receivers, who were jointly bound with *Monk*, the Court refused to deliver Money, till an Inquest be returned of this particular Debt, though *Clayton* himself was Sheriff, and would return none; and an *Adjournatur* till Notice to the King's Attorney.

*Monk v. Clayton.* *Mich.* 24.  
*Car.* 11.

Mr. Attorney *Finch* prayed, that Money of the Plaintiff's, being a Bankrupt and an immediate Debtor to the King by Returns of Money from the Commissioners of the Excise, which in Truth was from one *Thistlewait*, a Collector, might not be delivered out of the Court to the Assignees of the Commissioners. On *Norwich's* Case, 4 *Car.* 1. in the *Exchequer*, that the King in such Case shall be first satisfied; contrary, where his Debt is but in Aid of another. But it was not allowed, but the Money ruled to be delivered to the Assignees, and that the King may, by *Scire Facias* against them, recover it.

*Special Cases of Debts that cannot be proved under the Commission.*

3 *Wils. Rep.* C. B. 270.  
7 *Geo. I. C.* 31.

**D**EBTS payable upon a Contingency, which may possibly never happen, cannot be proved.

3 *Wils. Rep.* C. B. 272.

One having only a Cause of Action, cannot come in and prove it as a Debt. Creditor, during Bankruptcy, having a Verdict with Damages and Costs, in Assault and Battery, before Bankruptcy, but not Judgment till after Certificate, cannot, in the Opinion of the Court of *C. B.* come in under the Commission; such Demand not being a proveable Debt, because not due at Time of Bankruptcy.

*Ibid.* 13. 530.

Resolved, that the Acceptor of a Bill of Exchange, drawn on him by Bankrupts, who promised to indemnify him, before their Bankruptcy, could not, on his being sued and charged in Execution, come in as a Creditor under the Commission; because no Debt was due or owing from the Bankrupt to the Acceptor, until he was charged in Execution; and his Body being in Prison upon Judgment and Execution for a certain Sum, was held by the Court of Common Pleas to be the same Thing as if the Acceptor had paid the Debt and Costs due on the Bill; and then, and not before, the Bankrupts became indebted to the Acceptor, which was after the Bankruptcy.

*Ibid.* 270.

If *A.* has a Bond of Indemnity from *B.* and the Condition be broken, and afterwards *B.* becomes Bankrupt before *A.* has been sued or damaged, though *A.* had a good Cause of Action against *B.* before the Act of Bankruptcy; yet as *A.* had not been damaged by paying any certain Sum of Money, by Reason of *B.*'s Breach of the Condition, *A.* cannot possibly swear to any Debt due and owing from *B.* at the Time of the Act of Bankruptcy.

Lessor cannot prove a Penalty incurred by his Lessee for ploughing up Meadow Ground, as a Debt under a Commission of Bankruptcy.

*Note*, every Man is to subscribe his Debt, and the Commissioners are to enquire whether the Debts were contracted during the Trade.

*Where Copartners are Bankrupts, having joint and separate Estates and Creditors.*

**O**F two Partners, Brewers, the one becomes Bankrupt, and the whole Debt was assigned over; but it was resolved that the Assignee should only recover a Moiety, because only one Moiety past by Assignment. Rushworth v. Hodson. 2 Show. Rep. 103. Easter Term. 32 Car. II. Nelson. Luceo. 85. 219 135. Gibson. Peer North C. J 1 Mod. Rep. 215. Fin. Term, 28 Car. II. in B. R. At Nisi Prius, C. J. Holt. 13. Will. III. C. in B. R. 446.

If there are Accounts between two Merchants, and one of them becomes Bankrupt, the Course is not to make the other, who perhaps, upon stating the Accounts, is found indebted to the Bankrupt, to pay the whole that was originally intrusted to him, and to put him, for the Recovery of what the Bankrupt owes him, into the same Condition with the Rest of the Creditors, but to make him pay that only which appears due to the Bankrupt on the Foot of the Account, *otherwise it will be for Accounts betwixt them, after the Time of the other's becoming Bankrupt*, if any such were.

If there be several joint Partners, and a Person has Dealings generally with one of them in Matters concerning their joint Trade, whereby a Debt becomes due to the said Person, it shall charge them jointly, and the Survivors of them: But if in Case the Person had rather deal with one of them upon his own separate Account, he must make his Agreement specially; in which Case the Debt shall be only his and his Executors, and shall not survive.

If one or more of the joint Traders become Bankrupt, his or their Proportions only are assignable by the Commissioners, to be held in common with the Rest who were not Bankrupts.

If there be an Act of Bankruptcy committed, and a Creditor obtains Judgment, subsequent to it, then a Commission is taken out; now the Judgment is thereby avoided.

If there be several joint Traders, Payment to one of them is Payment to all. So if they all, except him to whom the Payment was made, were Bankrupts, the Payment is only unavoidable as to his Proportion. And if there be four Partners, whereof three are Bankrupts, and their Shares assigned, and a Payment is made to him

*Whitney v. Paulin.*  
2 Vern. Easter Term, 1691.

*A. and B. became Partners in some Iron-Mills, and some Time after A. alleged that B. had not brought in his Proportion of the Stock, and had wasted the joint Stock for which he brought a Bill against him to be relieved, and the Matter by Consent was referred, and the Referee awarded that B. should, in Consideration of the above Allegations being proved, deliver to A. what remained of the Joint-Stock, and the Lease of the Iron-Mills to be by him enjoyed to his own Use, and general Releases to be given; which award, after Exceptions taken to it, was afterwards confirmed and decreed by the Court. B. was afterwards found a Bankrupt, and the Plaintiff, being a Creditor to him by Bond, had an Assignment made to him by the Commissioners, and brought a Bill to have an Account of B.'s Estate that came to the Hands of A. and alleged, if any such Award was made, it was after such Time as B. became a Bankrupt; but there appearing no Fraud in the obtaining of the Award, and the same being in an Adversary Cause, and the Award afterwards excepted to, &c. although B. might be then a Bankrupt, yet not being known so to be at the Time of the Award, the Court decreed such Award ought to stand. *Quere*, if the Decree upon a Rehearing was not reversed?*

*Richardson v. Go down, &c.*  
1 Vern. 292.  
Trit. Term, 1703.  
See the Case of *Gifts and Deficiency* post.

*A. B. and C. were Partners in Trade, and C. embezzles the Joint-Stock, contracts private Debts, and becomes a Bankrupt; The Commissioners assign the Goods in Partnership, and A. the Plaintiff, brought a Bill for an Account, and to have the Goods sold to the best Advantage, and insisted that out of the Produce of them, the Debts owing by the Joint-Trade ought first to be paid; and that out of C.'s Share, Satisfaction must be made for what he had wasted; and that the Assignees could be in no better a Case than the Bankrupt, and were entitled only to what this third Part would amount unto, clear, after Debts paid, and Deductions for his Embezzlement. And the Court seemed to be of that Opinion; but sent it to a Master to take the Account, and state the Case.*

*A. and B. being joint Traders, a Commission of Bankruptcy issued against them; their separate Creditors applied by Petition, that they might be let in for their Debts upon the respective separate Estates of the Bankrupts under that joint Commission, as the separate Estates were of small Value, and would not bear the Charge of taking out two new Commissions against them respectively.*

*Ex parte Crowder.*  
2 Vern. 706.  
Mich. Term, 1715.

*The Lord Chancellor ordered them to be let in to prove their separate Debts, upon the joint Commission, they paying Contribution to the Charge of it; and directed, that as the joint or Partnership Estate was first to be applied to pay the Partnership Debts; and as separate Creditors are not to be let in upon the joint Estate, until all the joint Debts are first paid; so likewise the Creditors to the Partnership shall not come in for any Deficiency of the joint Estate, upon the separate Estate, until the separate Debts are first paid.*

*Ex parte Cook.* 2 Petr Will. 500.  
Mich. Term, 1728. L. C. King.

*Two joint Traders becoming Bankrupts, there is first a joint Commission taken out, and the Commissioners assign the real or personal Estate of them both, or either of them; and afterwards separate Commissions are taken out against them, and an Assignment is made by the Commissioners of these Commissions to other Assignees, and these apply by Petition to the Court, that they might be at Liberty to sue at Law for the separate Estates; but the Lord Chancellor decreed, that the Assignment made by the Commissioners upon the joint Commission, passes as well the separate as the joint Estate of the two Bankrupt Partners; therefore the Assignees on the separate Commissions can make nothing of their Action at Law, and he would not suffer them to spend the Estate in vexatious Suits there; but if they would join in a Bill in Equity for an Account of the separate Estates, he would not hinder them.*

2 Vern. 7. 6.  
*Ex parte Crowder*, as mentioned before.

*It is settled, and is a Resolution of Convenience, that the joint Creditors shall be first paid out of the Partnership or joint Estate, and the separate Creditors out of the separate Estate of each Partner; and if any Surplus of the joint Estate, besides what will pay the joint Creditors, it shall be applied to pay the separate Creditors; and if a Surplus of the separate Estate, beyond what will satisfy the separate Creditors, it shall go to supply any Deficiency that may remain as to the joint Creditors; but, for the Ease of both Parties, let it be referred to a Commissioner*

in each Commission, to take an Account of the whole Partnership Effects, and the separate Estate and Effects of each of the Partners; and if the Commissioners find any Thing difficult, they are to state it specially; and with Regard to the Surplus of the Partnership Effects, beyond what will pay the Partnership Debts, and the Surplus of the separate Effects, if any, above what will pay the separate Debts, each Side to apply to the Court for such Surplusses.

If there are two joint Traders, and one of them becomes a Bankrupt, the Commissioners cannot meddle with the Interest of the other, for it is not affected by the Bankruptcy of his Companion.

The Defendant *A.* being indebted to the Plaintiffs, became bound to them in several Bonds; and the said *A.* and the Defendant *B.* were for several Years Copartners, by whose Articles of Copartnership, *A.* was entitled to two Thirds of the whole Stock, and *B.* to one Third: The said *A.* and *B.* became Bankrupts, and a Commission was awarded against them; the Commissioners of the said Bankrupts assigned all their Estate to the Defendant *C.* and others, refusing to let the Plaintiffs, Creditors of the Bankrupts, come in, and intend to divide the Estate among the joint Creditors of both the Bankrupts, by Reason whereof the Plaintiff's Debts will be utterly lost.

The Defendant insists, that it was agreed by Indentures of Copartnership, that all such Debts as should be owing on the joint Account, should be paid out of the joint Stock, and at the End of the Partnership, each Copartner take and receive to his own Use his Share of the joint Stock; and that the joint Stock or Trade should not be charged with the private or particular Debts of either of the Partners, but that each should pay their private Debts out of their particular Estates not included in the joint Stock; that if both of the said Parties should be living at the End of the first three Years, of the six Years, that the said *B.* should come in joint Partner accordingly; and during the said joint Trade, the Copartners became jointly indebted to the other Defendants, *C. &c.* in 600*l.* and that *A.* became indebted to the Plaintiffs as aforesaid, without the Consent of *B.* and the Money due upon the said Bonds was not brought into the Account of the joint Stock; and the said *A.* was only a Surety, and received none of the Money; and the Defendant insisted that the joint Creditors ought first to be paid out of the Estate in Partnership, and that the Commissioners have no Power to grant the joint Estate to pay the Plaintiffs, they being separate Creditors of *A.* and if a Surplus of the joint Estate, after the joint Creditors paid, then the Plaintiffs can have but a joint Moiety of such Surplus towards their Satisfaction, the said *B.*'s Moiety not being liable to pay the said *A.*'s separate Debts; and the Debts then claiming were the proper Debts of the said *A.* and yet, after all the joint Debts are paid, there will be an Overplus, so that thereby the said *B.* will be discharged, and have Money paid unto him; but if the Plaintiff and other separate Creditors of *A.* be admitted to the joint Estate, there will not be sufficient to pay the joint Creditors, so that thereby not only *B.*'s Estate will be applied to pay *A.*'s Debts, but will be liable to the joint Creditors. But there can be no Division of the joint Estate, whereby to charge any Part thereof with the private Debts of either Party; and till the joint Debts are paid, and till Division made of the Surplus, both Parties are alike interested in every Part of the said joint Stock; that the Commissioners have no Power by the Commission to administer an Oath to the Plaintiffs for Proof of their Debts, they claiming Debts from the said *A.* only, and the Commission is against *A.* and *B.* jointly, and not severally; and therefore cannot admit the Plaintiffs Creditors.

The Court declared, that the Estate belonging to the joint Trade, as also the Debts due from the same, ought to be divided into Moieties, and that each Moiety of the Estate ought to be charged, in the first Place, with a Moiety of the said joint Debts; and if there be enough to pay all the Debts belonging to the joint Trade, with an Overplus, then such Overplus ought to be applied to pay the particular Debts of each Partner; but if sufficient shall not appear to pay all the joint Debts, and if either of the said Partners shall pay more than a Moiety of the said joint Debts, then such Partner is to come in before the said Commissioners, and be admitted as a Creditor for what he shall so pay over and above the Moiety; and was decreed accordingly.

Four Bookfellers entered into Partnership for carrying on a joint Trade, and being then all in *Holland*, according to the Custom of the Country, appeared before a Notary, and executed Articles of Copartnership, declaring jointly and separately, that each had advanced 24600 Guilders, Total 98400 Guilders, which Sum was to pay all the Debts they had then contracted, as mentioned in an Inventory; but no Debts should be paid not mentioned in the said Inventory, nor any Debts which either of the Copartners might contract on his own private Account; that a Sum agreed on between them should be allowed for Maintenance; and that all Losses and Gains should be equally shared and borne, with other usual Covenants.

The Copartnership was carried on from *November 1725* to *May 1728*, when one of the Partners, for a Sum agreed on to be paid him, quitted and released his Claim to the other three, between whom the Articles were continued and carried on, on the first Conditions, and one of them was intrusted with the Goods in Shop and Warehouse.

But he became profuse, and embezzled the Copartnership Stock, and applied the same to his own Use, and suffered the Partnership Debts to be unpaid; and having contracted private Debts on his own Account, became a Bankrupt, and a separate Commission was taken out against him.

The Messenger took Possession of the Partnership Goods, and the Commissioners executed an Assignment to the Defendants, who in Consequence thereof took Possession of the Partnership Goods and Books, and received several of the Partnership Debts, and were getting in the Rest, with an Intention to apply them to the Payment of the separate Creditors, whereas the Goods are Copartnership Goods, and ought to be applied to the Copartnership Debts; and to make the Plaintiffs Satisfaction for what the Bankrupt had embezzled for his own separate Use, and the Residue to be divided into equal Parts, two Thirds to the Plaintiff, and one Third to the Bankrupt, to which he is entitled, and is to be Part of his separate Estate, this was the Prayer of the Plaintiff's Bill, as that the Defendants may be restrained from selling any Part without the Plaintiff's Concurrence.

The Assignees admit the Bill, and the Articles, that they have taken Possession and sold some of the Stock without Consent of the Plaintiffs, and have set forth an Account in the Schedule to their Answer, of the Stock, and submit to apply the Estate as the Court shall direct; and his Lordship was pleased to decree as follows:

Lord Talbot's  
Decree.

1. That it should be referred to Mr. *Lighbourn* to take an Account of the Partnership Debts received by the Plaintiffs in *Holland*.
2. To take an Account of the Partnership Estate in *England*, received by the Assignees, or any for their Use.
3. To take an Account of the Partnership Debts owing by the Bankrupt and the Plaintiffs.
4. To cause an Advertisement for the joint Creditors of the Bankrupt and Plaintiffs to come in and prove their Debts.
5. To take an Account of what Embezzlements the Bankrupt has made of the Copartnership Estate; and in taking Accounts, Plaintiffs and Defendants to be examined on Oath, to produce all Books, &c. and to have all just Allowances.
6. That what the Master shall certify the Copartnership Debts shall amount to, shall, in the first Place, be paid by the Plaintiffs and Defendants to the joint Creditors, in Proportion to their Debts, as far as the Copartnership Estate in their Hands will extend.
7. That if it shall appear any of the Partnership Estate remains in the Plaintiffs and Defendant's Hands after the Partnership Debts are paid, then the Master to divide the same into three Parts.
8. And the Plaintiffs are to take two Thirds; and out of the Bankrupt's one third Part, they are to take what it shall appear he has embezzled of the Partnership Estate.
9. And if there shall be any Residue of the Bankrupt's third Part, after the Partnership Debts, and the Bankrupt's Embezzlements are satisfied, then the same is to be paid to, or retained by, the Assignees, for the Benefit of the Bankrupt's separate Creditors.

10. The Master may state any Thing specially; and all Parties are to be paid their Cofts of this Suit out of the copartnership Estate, to be taxed by the Master.

On the 11th of September, 1742, a joint Commission issued against *Peter Powell* and *Peter Powell* the Younger, of *Exeter*, and the Commissioners executed an Assignment of the Estate and Effects to the Assignees that were chosen; and they, by Virtue of the said Assignment, possessed themselves of all the joint and separate Estate of the Bankrupts. Dec. 23, 1742, Lord Hardwicke's Order.

And the said Bankrupts, having several separate Creditors, they the said Creditors, in a Petition to the Lord Chancellor, set forth their said several separate Debts, and that they had applied to the Commissioners to be admitted Creditors, which they refused, as this was a joint Commission, and they therefore prayed, that they might come in and prove their Debts under the said joint Commission, and that the Commissioners might take joint and separate Accounts of the joint and separate Estates; and that what should be found on such Accounts to belong to the separate Estates, might be applied by the Assignees towards Satisfaction of the respective separate Creditors; and that the Petitioners might be paid their Cofts of the Application by the Assignees.

Upon which Petition, his Lordship ordered as follows:

1. Let the Commissioners give Notice in the *London Gazette*, appointing a Time and Place, when and where the separate Creditors of each of the Bankrupts are to be at Liberty to prove those Debts under the joint Commission.

2. Let the Commissioners take separate Accounts of the joint and respective separate Estate of the Bankrupts, come to the Assignee's Hands, or of any others by their Order, or for their Use, distinguishing the joint and separate Estate of *Peter Powell*, as also the joint and separate Estate of *Peter Powell* the younger, from each other.

3. That what on such Account shall belong to the Bankrupt's joint Estate, shall be employed by the Assignees towards Satisfaction of the joint Creditors; and in Case there shall be any Surplus of the joint Estate, after all the joint Creditors shall be paid their whole Demands, then the Moiety of the Surplus is to be carried to the Account of the separate Estate, and to be applied to satisfy the separate Creditors respectively.

4. And if there is any Surplus of the separate Estates, after all the separate Creditors shall be paid their whole Demands, then such Surplus of the separate Estates, or either of them, is to be carried to the Account of the joint Estate, and to be applied towards Satisfaction of the joint Creditors; and let the respective separate Estates bear a proportionable Part of the Charge of suing out the Commission, and executing it, to be appointed by the Commissioners; and let the Cofts of this Application be paid the Petitioners by the Assignees out of the Bankrupt's separate Estate; and let it be referred to *Mr. Bennett* to tax the Cofts, if the Parties cannot agree.

On this Day a separate Commission of Bankruptcy was taken out against *William Crispe*, by *William Perritt*, Plasterer. *Crispe* was a Partner with *Edward Burnaby*, Esq. and Captain *Barbett*, in the Undertaking of building *Ranelagh Amphitheatre*; and this Debt which amounted to 426*l.* or thereabouts, was Part of a Sum of Money due to *Perritt*, for Plasterer's Work done in and about the said Amphitheatre. Feb. 1742. The Case of Mr. William Crispe.

*Crispe* petitioned the Lord Chancellor to supersede the Commission, insisting that this was a joint Debt, and that he did not owe *Perritt* any Thing on his separate Account; and on the 18th of Feb. 1742, this Petition was heard before his Lordship, and on hearing Counsel on both Sides, and it not then appearing to his Lordship whether *Crispe* was, or was not, a Bankrupt, his Lordship did order the Commissioners to execute a provisional Assignment, and did direct an Issue to be tried in an Action of Trover before Lord Chief Justice *Willes* in *London*, wherein the said *William Crispe* was to be Plaintiff, and such Assignee Defendant, and in which the Point of Bankruptcy would come in Question.

And on the 19th of June, 1743, the Cause was tried at the Sittings in *London*, and by a special Jury, between the said *William Crispe*, Plaintiff, and *William Perritt*, who was chose Provisional Assignee, Defendant.

And the issuing the Commission, the joint Debt of *Perritt*, the Assignment, and an Act of Bankruptcy committed by *Crispe*, were proved: And after his Lordship

ship had clearly and fully summed up the Evidence to the Jury, it appearing to them to be a joint Debt, they were pleased to give a Verdict for the Plaintiff *Crispe*, with 10*l.* Damages, and 40*s.* Costs, and did not find him Bankrupt for this Debt. But a Point of Law arising, the last Clause made in the 10th Year of *Queen Anne* was read, which declares, that the Discharge of any Bankrupt by Force of any Acts relating to Bankrupts; from the Debts owing by him, at the Time he became Bankrupt, shall not be construed, nor was intended or meant, to release or discharge any other Person or Persons, who was or were Partner or Partners with the said Bankrupt in Trade, at the Time he became Bankrupt, or then stood jointly bound with him for the said Debts, from which he was discharged; but that notwithstanding such Discharge, such Partners or joint Obligors with such Bankrupts, shall be and stand chargeable with, and liable to pay such Debts, and to perform such Contracts, as if the said Bankrupt had never been discharged for the same.

And the Case was drawn up, and approved of by the Lord Chief Justice for the Opinion of the Court of *Common Pleas*.

Where the Question was, whether a separate Commission can be taken out for a joint Debt, which was learnedly spoke to on both Sides, but the Court came to no Opinion.

*Feb. 1743.* And it came again to be argued before the Lord Chief Justice *Willes* on the same Question; when after hearing the Reasons offered *pro* and *con*, by the learned Counsel, the Court gave Judgement, and the Lord Chief Justice delivered his Opinion, and his Lordship, Mr. Justice *Abney*, and Mr. Justice *Burnet*, were all of Opinion, from the Cases which had been cited, and the Reasons and Precedents that had been laid before them, that the Commission was regularly issued, and that a joint Creditor had a Right to take out a separate Commission, and therefore made the following Rule:

*May 1743.* *William Crispe* against *William Perritt*: Ordered, that the Verdict found for the Plaintiff be void, and that a Verdict be entered for the Defendant.

And on the 11th of *May*, 1744, *Perritt* preferred his Petition to the Lord Chancellor, setting forth the several Steps and Proceedings, and the Determination of the Court in this Case, and *Crispe* having, pursuant to his Lordship's Order of the 18th of *Feb.* 1742, deposited 100*l.* in the Bank, in the Name of the Accountant-General, to be placed to the Credit of this Matter, and in Order to stay all Proceedings under the Commission, he therefore prayed his Lordship to discharge his Order of the 18th of *Feb.* 1742, and that the Commissioners might be at Liberty to proceed in the Execution of the Commission, and that the 100*l.* paid into the Bank by *Crispe*, might be paid to him towards the Costs which he had been put to, on Account of suing out the Commission, and Proceedings at Law.

And on the 24th of *May*, 1744, such Petition was heard before his Lordship, and his Lordship after hearing Counsel on both Sides, ordered that the major Part of the Commissioners named in the said Commission should be at Liberty to proceed in the Execution thereof, and that the 100*l.* paid into the Bank of *England* should be paid to *Perritt*, as Part of the Bankrupt's Estate and Effects.

And on the 26th of *May*, 1744, *Crispe* was declared a Bankrupt in the *Gazette*,

*How far the Commissioners shall overreach the Acts of a Bankrupt, from the Time of the Act of Bankruptcy committed.*

1st, AS to the Bankrupt's receiving Debts due to him from his Debtors.

2dly, As to his selling his Goods *bonâ fide*.

3dly, As to his selling and mortgaging his Lands.

4thly, As to his mortgaging or pledging his Goods.

5thly, As to his paying Debts.

*1 Jac. I. C. 15.* And, first, A Bankrupt may receive his Debts after the Act of Bankruptcy, from such Debtors as do not know him to be a Bankrupt, and the Payment will be good.

*2 Show. 522. Cases in Chan. 156. Wag. Assand Road. 1 Jac. I. Cap. 15.* 2dly, All Persons buying Goods of a Bankrupt, not knowing him to be so, and paying for them *bonâ fide*, shall be received in the Equity of the *Proviso*,

And the Reason is, that if it was otherwise, it would be a great Prejudice to Trade, inasmuch that it could not be carried on with Safety, and the Law would be a Snare for the innocent and fair Contractor, who cannot possibly have any Notice of the Act of Bankruptcy; as the following Abstract clearly determines.

The Preamble observes, that many Persons within the Description of, and liable to the Statutes concerning Bankrupts, frequently commit secret Acts of Bankruptcy unknown to their Creditors, and other Persons with whom they have Dealings; and after committing thereof, continue to appear publickly, and carry on Business, by buying and selling Goods, drawing, accepting, and negotiating Bills of Exchange, and paying and receiving Money on Account thereof in the usual Way of Trade, and in the same open Manner as if they were solvent and not become Bankrupt: And as the permitting such secret Acts of Bankruptcy to defeat Payments really made in the Cases and Circumstances above-mentioned, where the Persons receiving the same had no Notice of, or were privy to their having committed any Act of Bankruptcy, will be a Discouragement to Trade, and a Prejudice to Credit in general: *It is therefore enacted*, that after the 29th

of October, 1746, no real Creditor of a Bankrupt, in Respect to Goods sold to, or Bills of Exchange really drawn, negotiated, or accepted by such Bankrupt in Course of Dealing, shall be liable to refund to the Assignees of the Bankrupt's Estate, any Money, which before the suing forth of such Commission was really in the Course of Trade received by him of such Bankrupt, before he had Knowledge or Notice of his becoming a Bankrupt, or being in insolvent Circumstances.

3dly, If a Man sells or mortgages his Lands, the Bankruptcy will over-reach it, although the Purchaser had no Notice of the Bankruptcy, if the Commission issued within five Years after the Act of Bankruptcy, because this is a Mischief which does not immediately concern Trade, and he who buys Lands, does it at his Peril, subject to all such Incumbrances as Lands are liable to.

4thly, If a Man mortgages or pledges his Goods after an Act of Bankruptcy, the Commission will over-reach it, because the Mortgage or Pawning Goods does not immediately concern Trade as Buying and Selling does, and he who takes a Pawn does it at his Peril.

5thly, If a Bankrupt pays Debts after the Bankruptcy, the Assignee may recover the Money again, if it were otherwise, it would be in the Power of the Bankrupt to prefer such Creditors as he should think fit, which is contrary to the Design of the Statutes concerning Bankrupts, which is to put all Creditors upon a Footing.

*A remarkable Case, tried under a second Commission of Bankruptcy.*

ON this Day a Commission of Bankruptcy issued against *William Kell of London*, Merchant, who was found a Bankrupt, and submitted to the Statutes, and finished his last Examination, but never obtained his Certificate under such Commission.

Afterwards he set up the Trade of a Distiller near *Maidenhead* in *Berkshire*; and becoming acquainted with one *Ashley*, they entered into Copartnership, on the 1st of *August*, 1741, to carry on the Trade of distilling and rectifying Melasses Spirits, for five Years or thereabouts; and during this Copartnership, *Ashley* took off all, or most of the Spirits which *Kell* distilled.

Afterwards some Disputes arising between them, and *Kell* being Debtor to *Ashley* on a separate Account, exclusive of the Copartnership, *Ashley*, on the 2d of *July*, 1742, took out a second Commission against *Kell*, and was chose sole Assignee of his Estate and Effects; but *Kell* having in all Respects submitted to the Statutes relating to Bankrupts, *Ashley* and the Rest of *Kell's* Creditors signed his Certificate under this second Commission, which was duly confirmed and enrolled; and *Ashley* sold back to *Kell* several Parcels of his Household Goods, and Part of his Stock in Trade, as a Distiller; for Part of which Goods *Kell* paid *Ashley* in Money, and for the Remainder, amounting in Value to 100*l.* or thereabouts

abouts, *Kell* gave *Ashley* a Bond for 100*l.* dated the 28th of *October*, 1742, payable in six Months with Interest, at five *per Cent.* and *Ashley* promised to deal with *Kell* afterwards.

Then *Kell* again set up the Trade of a Distiller on his own Account, and *Ashley* dealt with him, and paid him for two Parcels of Spirits, after the Rate of 4*s.* per Gallon to the amount of 88*l.* 16*s.*

On the 4th and 28th Days of *April*, 1743, *Kell* sent *Ashley* two other Parcels of Spirits, at the same Price, amounting to 184*l.* 4*s.* and *Kell's* Bond of 100*l.* being then due to *Ashley*; and *Kell* being unwilling that his Bond should be out against him, he desired *Ashley* to pay himself out of the Goods, for the Bond and Interest due to him, and only give him the Balance for the Spirits.

But instead of so doing, *Ashley* in *Easter Term*, 1743, brings an Action against *Kell* for the 100*l.* and Interest due on the Bond, and holds *Kell* to Bail; and at the same Time by the Messenger under the Commission, seizes the Spirits, amounting to 184*l.* 4*s.* as Assignee under the second Commission, and he insisted to retain the same, in Trust for himself and the other Creditors of *Kell*, under the second Commission, by Virtue of the ninth Clause of 5 *Geo.* II. *Ashley* proceeded in his Action, and *Kell* by Way of Set-off to the Debt pleaded, that before the bringing of this Action, *Ashley* was indebted to him in a much larger Sum, *viz.* in 184*l.* 4*s.* for Goods sold and delivered, out of which Sum *Kell* was willing to allow the Principal and Interest due to *Ashley* on his Bond; and upon this Issue was joined.

*Mich. Term.* Pending this Action *Kell* filed a Bill in Chancery against *Ashley*, and prayed that *Ashley* might discover, whether he had not agreed to purchase such Goods of him, and if such Goods did not come to his Possession; and to be relieved in several other Matters complained of in such Bill, and that *Ashley* might be enjoined from proceeding in such Action.

To this Bill *Ashley* put in his Answer, in which he denied the Spirits were ever sold to him, or that he ever promised to pay for them, and he insisted upon his Right of retaining them as Assignee under the second Commission by Virtue of the above-mentioned Clause; *Kell's* Effects under the second Commission not amounting to pay fifteen Shillings in the Pound; but whether such Goods were, or were not, rightly seized, he was advised was a Matter ought to be tried at Law, where *Kell*, if at all, had his Remedy; and the Court did not think proper to grant an Injunction, but sent the Parties to Law, and then *Ashley* proceeded in the Cause.

And on the 30th of *November*, 1743, it was tried before the Lord Chief Justice *Lee*, at *Guildhall*.

And upon the Argument of this Cause, it was insisted by the Counsel for *Ashley*, that these Goods were not the Property of *Kell*, and therefore that he could not sell them; but that they came to *Ashley*, as Assignee under the second Commission.

That *Ashley* had the Spirits, but not as a Buyer, and that by the afore-mentioned Clause *Kell's* future Effects were liable, he not having paid fifteen Shillings in the Pound; and consequently that the Goods belonged to the Assignee, either under the first, or second Commission.

But by *Kell's* Counsel, it was insisted that *Kell* was never discharged by the Act of 5 *Geo.* II. after 24 *June*, 1732, except by the last Commission, and therefore possibly could not be within the Intent of that Act, having but once had the Benefit of it.

That supposing *Kell's* future Effects had been liable to his Creditors by the afore-mentioned Clause, that *Ashley* could not in any Manner seize them as Assignee under the second Commission; and if he had a Right, he must have proceeded in a legal Way, and have brought his Action against *Kell*; and then *Kell* would have pleaded his Certificate in Discharge of his Person, and let *Ashley* have taken Judgement against his Goods, as in the Case of an insolvent Debtor; but that this was by no Means *Kell's* Case, he not being within the Meaning of the Clause of the Act, as having but once had Relief.

And his Lordship, after having with great Judgment stated the Cause, and summed up the Evidence, to the Jury, was clearly of the same Opinion with the

the Gentlemen who were Counsel for *Kell*, that his Case was not within the Intent and Meaning of that *Clause*, and that the taking of the Goods by *Ashley*, as Assignee, was illegal; and the Jury, concurring with his Lordship, found the Plea of the Defendant *Kell* to be true, as was alledged, and therefore gave a Verdict for him.

But the L. C. J. gave *Ashley* Leave to move, if he thought proper, in Arrest of Judgment, within six Days of *Hilary* Term then next; and *Ashley* not moving in Arrest of Judgment in all *Hilary* Term, the L. C. J. ordered the *Posita* to be delivered to the Defendant *Kell's* Attorney, who thereupon taxed the Costs at 30*l.* and took out Execution against *Ashley* for such Costs, which *Ashley* paid the said Attorney.

And after *Ashley* had paid *Kell's* Costs, in *Easter* Term following, *Ashley* moved in Arrest of Judgment, and a Rule was made for *Kell's* Attorney to attend with the *Posita*.

And the same Arguments were made use of before the Court of *King's-Bench*, by the Counsel on both Sides, as were at the Trial of the Cause; but the whole Court were also of Opinion that the Verdict was right, and entirely concurred with the L. C. J. *Lee* in his Judgment, and therefore they discharged the Plaintiff's Rule.

And in *Trinity* Term, 1744, *Kell* brought an Action in the Court of *Common-Pleas* against *Ashley*, for the Balance of the Sum of 184*l.* 4*s.* due for the Spirits.

And on the 23d of *June*, 1744, this Cause was tried at *Guildhall*, before the L. C. J. *Willes*, where the same Arguments were made use of by the Counsel both for Plaintiff and Defendant, as were insisted on before the L. C. J. *Lee*; at the first Trial, and before the Court of *King's-Bench*, on the special Argument of this Cause; but the L. C. J. *Willes*, upon stating it, and fully summing up the Evidence to the Jury, was clearly of the same Opinion with the L. C. J. *Lee*, and the Court of *King's-Bench*, and was pleased to make this Observation, *viz.* That by the very Clause in the Act of Parliament, the Effects of a Bankrupt that had received the Benefit of the Act, according to that Clause, remained liable to his Creditors, as before the making of the Act; but that it could never be supposed that they were liable to be seized in a summary Way, without a legal Trial, by an Assignee, because nothing was vested in the Assignee but what the Bankrupt had before he was a Bankrupt, and *Kell* had not received the Benefit of the Act.

And the Jury being of the same Opinion, they therefore gave a Verdict in this Action for the Plaintiff *Kell*, for 54*l.* 18*s.* besides Costs of Suit; being what was proved to be the Value of the Spirits, after some Allowances were made for Waste and Leakage, and after the Bond of 100*l.* and Interest was paid by *Kell* to *Ashley*.

*Of Factors and Executors becoming Bankrupts, having Effects of other Persons in their Hands.*

IF a Bankrupt is a Factor, although he has the Possession of the Goods of his Principal, and the Power of immediately selling them and taking the Money; yet that is not a Possession within the Meaning of the Statute of '21 Jac. I. C. 19. S. 11. nor will the Case be altered, if the Factor acts upon a *del Credere* Commission.

The *Bonnels* were considerable Merchants in *London*, and had two Bales of Silk consigned to them by *Altenory* and *Alteory* from *Leghorn*; but before the Ship sailed, Advice arrived there, that the *Bonnels* had failed; and thereupon *Altenory* and *Alteory* altered the Consignment of the Silk, and made it to the Defendant.

On which the Plaintiffs, being Assignees under the Statute against the *Bonnels*, brought their Bill for a Discovery and Relief.

Upon the first Hearing, the Court ordered all Letters, &c. to be produced, and that the Parties proceed to a Trial in Trover, to see whether the first Consignment, notwithstanding the altering thereof, and new Consignment made before the

*Wijeman v. Pander*  
2 Fern. 303.  
Hilk 1650.

the Ship failed, vested the Property of those Silks in the *Bonnels*; and upon the Trial and Verdict being given for the Plaintiffs, the Cause now came on upon the Equity reserved.

The Court declared, the Plaintiffs ought not to have had so much as a Discovery, much less any Relief in this Court, in Regard that the Silks were the Goods of two *Florentines*, and not of the *Bonnells*, nor the Produce of their Effects; and therefore, they having paid no Money for the Goods, if the *Italians* could by any Means get their Goods again into their Hands, or prevent their coming into the Hands of the Bankrupts, it was but lawful for them so to do, and very allowable in Equity.

And it was decreed, that if any Thing was due from the *Italians* to the *Bonnells*, that should be paid the Plaintiffs; but they should not have the Value of the Silks, by Virtue of the Conignment or Verdict, and put the *Italians* to come in as Creditors under the Statute of Bankrupts.

*Est v. Milward.*  
Sittings after  
Mich. Term,  
1783.

An Action was tried at *Guildball*, before Mr. Justice *Buller*, in which it appeared the Plaintiffs were Merchants in *London*, and in *June*, 1783, had a Quantity of Wheat consigned to them from *Ostend*; the Sale of which they intrusted to one *Farrer*, as their Factor.

The Factors in the Corn Trade, like those in the Linen Trade, receive a *del Credere* Commission, besides their Factorage, and never communicate the Names of the Purchasers to the Owners, except in Case of the Factor's Failure. *Farrer*, on the 9th of *June*, 1783, sold 211 Quarters of the Plaintiff's Wheat to the Defendant *Milward*. On the 16th of *June*, *Farrer* being about to stop Payment, gave up the Wheat under his Care to the Plaintiffs, and sent them the Names of the Buyers. On the 20th of *June*, *Farrer* stoped Payment; and, a short Time afterwards, his Creditors executed a Deed of Composition. On the 21st of *June*, the Plaintiff delivered the Defendant *Milward* a Bill of Parcels of the Wheat sold to him by *Farrer*, as their Factor; and desired him to accept a Bill, at a Month, for the Amount, which he refused, insisting that he had a Right to set off a Debt due to him from *Farrer*, against the Price of the Wheat.

Mr. Justice *Buller*, in his Charge to the Jury, declared the Doctrine laid down by Lord Chief Justice *Lee*, in *Scrimshire v. Alderton*, to be Law; and the Plaintiff recovered a Verdict.

Again, one *Murray*, of *Belfast* in *Ireland*, in 1782, consigned a Quantity of Linens to *Bate* and *Henkell*, of *London*, to be disposed of by them, as his Factors, upon a *del Credere* Commission. *Bate* and *Henkell* sold the Linens for 192l. 14s. and, before they received the Money, became Bankrupts. The Assignees afterwards received the Money of the Purchaser, which *Murray* demanded of the Assignees, who refused to pay it, insisting that he should come in as a Creditor under the Commission. *Murray* presented a Petition to the Lord Chancellor, praying that the Assignees might be ordered to pay him the Money the Linens sold for, after deducting the Commissions and Charges, and a small Sum due from *Murray* to the Bankrupts, on another Account.

His Lordship, after hearing the Point of Law argued, was clearly of Opinion, that the Purchaser not having paid for the Linens previous to the Bankruptcy, *Murray*, the Consignor, was intitled to receive the Price of the Linens; and accordingly ordered the Assignees to pay him the Money.

*Copman v. Gallant, before Lord Cowper.*  
1 P. W. Will.  
314. Trin.  
Term, 1716.

*A.* made a Bill of Sale of some Leases and personal Estate to *B.* and *C.* in Trust to pay *A.*'s Debts; *B.* at first acted in the Trust; but afterwards *C.* took the whole into his Possession, and acted alone, and became a Bankrupt.

And *A.* brought a Bill against *C.* and others, to bring *C.* and his Assignees to an Account, touching the personal Estate of *A.* so assigned, in Trust for the Payment of his Debt as aforesaid.

And his Lordship, declaring that he thought the 21 Jac. I. S. 10. to govern this Case, dismissed the Plaintiff's Bill with Costs.

But further Argument being granted on the Case, his Lordship held that it was not within the above-mentioned Clause and Statute, in Regard this Assignment was with an honest Intent, viz. for the Payment of the Debts of the Assignor.

And therefore he ordered the Assignees of *C.* to account for all the Estate of *A.* which the Court declared should not be liable to the Bankruptcy of *C.*

The Plaintiffs brought an Action against the Defendants for Money had and received to the Plaintiffs' Use; and the Case was as follows:

The Plaintiffs being concerned as Partners in a large Quantity of Tar, consigned it to *Richard Scott*, who was their Factor, and Brother to one of the Plaintiffs, between which two Brothers there had been mutual Dealings, and Accounts which were at that Time unsettled.

The Ship arrived in the *Thames*, with the Goods from *Carolina*, on the 22d of *May*, 1739, of which the Factor had before received a Bill of Lading; and on the 28th of *March* following, he sold the said Tar to Mess. *Cornelius* and *Jeremiah Owen*, who agreed to pay for it in Promissory Notes, payable in four Months after the Delivery of the said Goods, and that a Debt of 31*l.* at that Time owing to the Buyers from the Factor, upon his own private Account, should be deducted out of the Purchase Money.

On the 1st of *April*, 1740, the Owners paid the Factor in Part, by giving him one Promissory Note of 66*l.* 13*s.* 4*d.* and another of 102*l.* 6*s.* 8*d.* which, with the 31*l.* due to them from the Factor, amounted to 200*l.*

On the 3d of *April* following, the Factor, *Richard Scott*, committed an Act of Bankruptcy, and on the 4th a Commission issued against him, on the Petition of one of the Defendants, and the three Defendants were chosen Assignees, to whom the Bankrupt delivered up the said two Notes, received from the Buyers in Part of Payment for the Tar, and the said Assignees afterwards received the Money for them.

The Defendants, as Assignees, likewise confirmed the Sale of the Tar to the said *Owens*, and settled the Account with them, and received the Balance, being 358*l.* 4*s.* and there being a Bounty allowed by Act of Parliament, at so much *per Ton*, payable to the Importer of this Tar, the Defendants, as Assignees, did also receive that Bounty, amounting to the Sum of 299*l.* 8*s.*

The Assignees insisted that they, as such, were entitled to all this Money, and that the Plaintiffs must come in as Creditors under the Commission; and the Plaintiffs insisted, that the Bankrupt, being their Factor, could be only considered as a bare Trustee, and therefore that the Notes delivered up to them by the Bankrupt, though payable to him or Order, were the Notes of the Plaintiffs, and that the Defendants receiving the Money for those Notes, and also the remaining Part of the Money for the Tar, and the Bounty due to the Importer of that Tar, they received those Monies for the Use of the Plaintiffs.

This Cause was tried by a special Jury, and the Damages were computed at 358*l.* 10*s.* and a Verdict was given for the Plaintiffs, subject to the Opinion of the Court upon this Question:

Whether the Plaintiffs were entitled to such Sum of 358*l.* 10*s.* given by the Verdict, or to any, or what Part thereof?

And the principal Cases which were cited by the Plaintiffs, were those of *Cope-man* and *Gallant*, herein before-mentioned; the Case of *L' Apostree v. Le Plaistier*, which was tried before Lord *Holt*, where an Action of Trover was brought against an Assignee in a Commission against one *Levi*, to whom the Plaintiff had delivered some Diamonds to sell; and this being a Question depending upon the Clause of 1 Jac. c. 19. S. 10 and 11, it was made a Case for the Court of *King's-Bench*; and it appearing that the real Property of the Diamonds belonged to the Plaintiff, and that the Bankrupt had only a bare Authority to sell them for his Use, therefore the Court were of Opinion they were not liable to his Bankruptcy.

The Case of *Burdett* and *Willett* was also cited, where, in the Court of *Chancery*, it was decreed, that the Factor was only in the Nature of a Trustee for his Principal, and that delivering Goods to him did not alter the Property of the real Owner; and upon the Argument of this Case, the Court took Time to consider of it, and some Time afterwards gave their Judgment for the Plaintiffs, viz. That the Plaintiffs should be at Liberty to enter up that Judgment for the Debt and Costs, deducting thereout the 31*l.* due from the Factor to the *Owens*.

*Jonathan Scott and Francis Richardson, Plaintiffs, Robert Sarman & al. Defendants. In the Common Pleas.*

In like Manner, if Bills of Exchange or Goods are sent to a Merchant for a particular Purpose, and the Merchant breaks, having the Bills of Exchange or the Goods in his Possession, they do not pass by the Assignment.

Neither does the Statute extend to the Case of an Executor or Administrator becoming Bankrupt; for the Property they may possess as such, cannot be assigned by the Commissioners.

*Hill v. Mill.*  
*Moh. Rep.*  
*Mick.*  
*3 W. and M.*  
*Com. 185.*  
*1 Strou. 223.*  
Motion for a Prohibition to the Ecclesiastical Court from granting Administration to *A.* where *B.* was named Executor by the Testator, for that *B.* was a Bankrupt.

*Holt C. J.* The Ordinary is not to grant Administration, where an Executor is named; and Bankruptcy is no material Disability; he acts *en autre Droit*, and the Testator had intrusted him; but in Case of *non sane Memory*, there is no absolute Necessity to grant Administration.—A Prohibition granted.

If an Executor becomes Bankrupt, a Legatee is to be Creditor.

Neither does Assignment pass Property which may be stopt in *Transitu*.

If a Merchant consigns Goods to a Trader, and before their Arrival the Consignee becomes a Bankrupt; if the Merchant can prevent the Goods getting into the Bankrupt's Hands, the Commissioners' Assignment will not affect them.

If Goods are delivered to a Carrier or Hoyman, or the Master of a Vessel, to be delivered to *A.* and the Goods are lost by the Carrier, the Consignee can only bring the Action; which shews the Property. But, though such Goods are actually delivered to a Carrier to be delivered to *A.* and while the Carrier is upon the Road, and before actual Delivery to *A.* by the Carrier, the Consignor hears that *A.* his Consignee, is likely to become a Bankrupt, or is actually one, and countermands the Delivery, and gets them back into his own Possession again, no Action of *Trover* would lie for the Assignees of *A.* because the Goods, while they were in *Transitu*, might be so countermanded.

The Commissioners cannot assign the Benefit of an Agreement made with a Bankrupt.

*Meyer v. Little, 2 Fern. Std. quere.*  
Where the Defendant, on Marriage of his Son, settles Land on himself for Life, Remainder to his Son for Life, &c. and covenants, during his own Life, to pay his Son *15l. per Annum*; the Son becomes a Bankrupt; the Plaintiff, as Assignee, brings a Bill against the Father, to have the Benefit of this Agreement, and to comp. A Payment of the *15l. per Annum. Per Cur.* An Assignee under a Statute of Bankruptcy is not entitled to have the Performance of an Agreement made with the Bankrupt; and said that it was so adjudged in the Case of *Drake v. the Mayor of Exeter*; where the Court held, that, if a Lessor covenants with his Lessee and his Assigns to renew his Lease, and the Lessee becomes a Bankrupt, and the Commissioners assign this Covenant, the Assignees cannot have any Relief against the Lessor.

Commissioners cannot assign future Earnings arising from the Labour of the Bankrupt.

*Chippendale v. Tomlinson, R. R. Trin. 25 Geo. III.*  
*Chippendale* brought an Action of *Assumpsit* for Work and Labour as an Attorney. The Defendant pleaded that the Plaintiff was a Bankrupt, and averred that the Commission was still in Force.

The Plaintiff replied, that the Work and Labour was done after the Commissioners' Assignment, and for the necessary Support of himself and Family. Rejoinder, that the Plaintiff had not obtained his Certificate; and thereupon a Demurrer.

Lord *Mansfield* said, the only Question is, whether the Assignees of a Bankrupt are entitled to the Profits arising from his personal Labour?

*1 Atk. 253.*  
Mr. Justice *Buller* observed, that the Case in *Atkins* did not support the Doctrine laid down at the Bar; for Lord *Hardwicke* there says, "All his future personal Estate is affected by the Assignment;" by which he evidently meant, that, if the Assignees claim it, the Bankrupt must deliver it up; and so far the Assignment affects it: But no other Person can have the same Plea. It is certain, Lord *Hardwicke* meant to go no further than the Case in *Strange*, which is decisive of his Meaning; therefore he was of Opinion with the Plaintiff, for whom Judgment

WHEN a named the Person appoint a Trust, and all chuse an Assignee Meeting the said Meeting if from abroad Debts at this qualified to chosen by the have an Assignee Bankrupt's Estate

The Commission if they see Creditors for duly qualified or displaced, or Assignees Delivery to which shall be distributed shall be. An to remove such the Assignment

Assignees as they think skillful Accomperon to col Security.

Assignees though, if the Suit in Equity the *London Gazette* Consent of the ing such Suits the Charges; may take an Assignees vote that they of a Hazard.

And the the Creditors Meeting of the in the *London* and any Person Arbitration; Value of such Difference, and pound and ag

on the Demurrer was accordingly pronounced. See the Case referred to by Judge Buller, 2 *Strange* 1207, *Ajbley v. Kell*.

*Of chusing Assignees, and of their Power and Duty.*

WHEN any Commission of Bankruptcy is issued out, the Commissioners therein; *Co. II. C. 30. S. 26, 27.* named, or the major Part of them, shall forthwith, after they have declared the Person Bankrupt, cause Notice to be given in the *London Gazette*, and shall appoint a Time and Place for the Creditors to meet; which for the City of London, and all Places within the Bills of Mortality, shall be at *Guildball*, in order to chuse an Assignee, or Assignees, of the Bankrupt's Estate and Effects; at which Meeting the Proof of any Creditor's Debt, that shall live remote from the Place of the said Meeting, shall be admitted by Affidavit, or if Quakers, by Affirmation, or if from abroad, by Letters of Attorney; and all Creditors who shall so prove their Debts at this Meeting, and whose Debts amount to 1*l.* or upwards, shall be qualified to vote in the Choice of Assignees; and he, or they, that shall be so chosen by the major Part in Value of the Creditors then proving their Debts, shall have an Assignment from the Commissioners, or the major Part of them, of the Bankrupt's Estate and Effects.

The Commissioners have Power immediately to appoint one or more Assignees, *Ditto, S. 30.* if they see Cause, for the better securing and preserving the Bankrupt's Estate; which Assignee, or Assignees, may be removed or displaced at the Meeting of the Creditors for the Choice of Assignees, if the major Part of them then met, and duly qualified, shall think fit; and such Assignee, or Assignees, as shall be removed or displaced, shall, within ten Days after Notice given in Writing by the Assignee or Assignees chosen by the Creditors of the said Choice, make an Assignment and Delivery to the said Assignee or Assignees of all the Bankrupt's Estate and Effects which shall have come to their Hands and Possession, on Penalty of 200*l.* each, to be distributed among the Creditors, in the same Manner as the Bankrupt's Estate shall be. And the Lord Chancellor has Power, on the Petition of any Creditor, to remove such Assignees as shall have been chose by the Commissioners, to vacate the Assignment, and to cause a new one to be made.

Assignees have Power to order the Bankrupt's Attendance on them as often as they think convenient for the Benefit of the Estate, and may have some skilful Accountants to settle his Books of Accounts, and employ some faithful Person to collect and get in the Debts; but for this last they ought to have Security.

Assignees may bring Actions at Law without the Consent of the Creditors; *Ditto, S. 38.* though, if the Suit in Law is a Matter of Consequence, or which may produce a Suit in Equity, they shall summon all the Creditors to a Meeting, by Notice in the *London Gazette*, and lay before them the true State of the Case, and take the Consent of the major Part in Value of the said Creditors in Writing, to the bringing such Suits, and that a sufficient Sum remain in the Assignees' Hands to defray the Charges; and in Case they apprehend that they shall not have sufficient, they may take an Agreement under the Creditors' Hands to indemnify them, and oblige themselves every one to pay his Share, in Proportion to their respective Debts; for Assignees are not obliged to bring any Suit in Law or Equity, though the Creditors vote that they should, unless they are indemnified, where there is any Appearance of a Hazard.

And the Assignees may, with the Consent of the major Part in Value of the Creditors who shall have duly proved their Debts, and be present at any Meeting of the said Creditors, pursuant to Notice to be for that Purpose given in the *London Gazette*, submit any Difference or Dispute between the Assignees and any Person or Persons whatsoever, relating to the Bankrupt's Effects, to Arbitration; the Arbitrators to be chosen by the Assignees, and the major Part in Value of such Creditors, and the Party or Parties with whom they have the Difference, and to perform the Award of such Arbitrators, or otherwise to compound and agree the Matters in Dispute, in such Manner as the Assignees, with such

such Consent as aforesaid, shall think fit; and the same shall be binding to all the Creditors.

**Sec. II.**  
**C. 30. S. 35.** The Assignees, by and with the Consent of the major Part of the Creditors in Value, who shall be present at a Meeting to be had for that Purpose, of which Notice shall be given in the *London Gazette*, may make Composition with any Person or Persons, Debtors or Accomptants to the Bankrupts, where the same shall appear necessary and reasonable, and to take such reasonable Part as can upon such Composition be gotten in full Discharge of such Debts and Accounts.

**Ditto, S. 28.** Assignees should be careful in examining the Nature of the Bankrupt's Debts, to prevent the Statute of Limitation from taking Place. Where it shall appear to the major Part of the Commissioners, that there has been mutual Credit given by the Bankrupt and any other Person, or mutual Debts between the Bankrupt and any other, at any Time before he became Bankrupt, the major Part of the Commissioners, or the Assignees of the Estate, may state the Account between them, and one Debt may be set against another, and what shall appear to be due on either Side, on the Balance of such Account, and on setting such Debts one against another, and no more, shall be claimed or paid on either Side respectively.

**Ditto, S. 32.** Before the Creditors shall proceed to the Choice of Assignees, the major Part in Value of the Creditors present, shall, if they think fit, direct how, and with whom the Monies to be received out of the Bankrupt's Estate shall remain, until the same be divided; to which Rule such Assignees shall conform as often as 100*l.* shall be got in.

**Ditto, S. 33.** Assignees are obliged, at some Time after the Expiration of four Months, and within twelve Months from the Time of the Commission's issuing, to cause at least twenty-one Days public Notice to be given in the *London Gazette*, of the Time and Place they and the Commissioners intend to meet, to make a Dividend or Distribution of the Bankrupt's Effects; at which Time the Creditors who have not before proved their Debts, shall then be at Liberty to prove them; which Meeting, for *London* and all Places within the Bills of Mortality, shall be at the *Guildhall*; and at such Meeting the Assignees shall produce to the Commissioners and Creditors then present, just and fair Accounts of all their Receipts and Payments touching the Bankrupt's Estate and Effects, and the Particulars of all that shall remain outstanding, and shall, if the major Part of the Creditors then present require it, be examined upon Oath before the Commissioners, touching the Truth of such Accounts. And the Assignees shall be allowed to retain all such Sums as they shall have paid or expended in suing out and prosecuting such Commission, and all other just Allowances on Account of their being Assignees; and the major Part of the Commissioners shall order such Part of the nett Produce of the Bankrupt's Estate, as by such Accounts, or otherwise, shall appear to be in the Hands of the Assignees, as they shall think fit to be divided forthwith among such of the Creditors who have duly proved their Debts under the Commission, in Proportion to their several and respective Debts; and they shall make such their Order for a Dividend in Writing under their Hands, and shall cause one Part of such Order to be filed amongst the Proceedings under the Commission, and shall deliver unto each of the Assignees a Duplicate of such their Order, likewise under their Hands; which Order of Distribution shall contain an Account of the Time and Place of making such Order, and the Sum total or *Quantum* of all the Debts proved under the said Commission; and the Sum total of the Money remaining in the Hands of the Assignees to be divided, and how much in particular in the Pound is then ordered to be paid to every Creditor under the Commission; and the said Assignees, in Pursuance of such Order, and without any Deed or Deeds of Distribution to be made for that Purpose, shall forthwith make such Dividend and Distribution accordingly, and shall take Receipts in a Book to be kept for that Purpose for each Creditor, for the Part or Share of such Dividend or Distribution; which they shall make and pay to each Creditor respectively; and such Order and Receipt shall be a full and effectual Discharge to such Assignees.

And the Assignees are further obliged within eighteen Months after issuing of the Commission, to make a second Dividend of the Bankrupt's Estate and Effects, in Case the whole was not divided on the first Dividend, and shall cause Notice to be inserted in the *London Gazette* of the Time and Place the Commissioners intend to meet to make a second Dividend, and for the Creditors who shall not before have proved their Debts, to come and prove them; and at such Meeting the Assignees shall produce upon Oath their Accounts of the Bankrupt's Estate and Effects; and what upon the Balance thereof shall appear to be in their Hands, shall by the like Order of the major Part of the Commissioners be forthwith divided among such of the Bankrupt's Creditors, as shall have made due Proof of their Debts, in Proportion to their several and respective Debts; which second Dividend shall be final, unless any Suit at Law or in Equity shall be depending, or any Part of the Estate standing out that cannot have been disposed of, or that the major Part of the Creditors shall not have agreed to be sold or disposed of in Manner aforesaid; or unless some other or future Estate or Effects of the said Bankrupt shall afterwards come to, or vest in the said Assignees; in which Case the Assignees shall, as soon as may be, convert such future or other Estate or Effects into Money in Manner aforesaid, and shall within two Months next after the same shall be converted into Money, by the like Order of the Commissioners, divide the same amongst the Creditors who shall have made due Proof of their Debts.

It is the Duty of the Assignees to make a Dividend as early as possible after the Time given by the Statute for Creditors to come in, and prove their Debts. And if they neglect making a Dividend and keep the Money in their own Hands, they will be liable to pay interest for it.

This Question as to Interest arose in a Case where a Commission issued in 1766, <sup>Trow v. Townshend</sup> against *Beale* and others, Copartners; and *Townshend*, *Ruffel* and another were in Chancery chosen Assignees. *Beale* and his Partners having carried on the Negotiation of Bills of Accommodation to a very large Amount, with several Persons who were also Bankrupts, the Assignees of *Beale* deferred proceeding under the Commission, in Order that the several Holders of the Bills might prove their Debts and receive Dividends under the other Commissions, before they made any Claim on the Estate of *Beale*. In Fact, no Dividend was ever made. The Clerk of the Commission was dead and all the Papers were lost. *Townshend* had received a considerable Part of the Bankrupt's Effects. *Ruffel* had also received some small Part, but he died in 1773.

In 1782, the Creditors renewed the Commission, and this Bill was brought by the Creditors against *Townshend* and the Executors of *Ruffel*, for a Discovery of the several Facts, and for an Account of the Money received by them.

It appeared by *Townshend's* Answer, that he kept the Money he received as Assignee, in common with his own at his Banker's; but he swore that he generally had there more than the Amount of such Receipts; and the only Question in the Case was, whether *Townshend* and the Executors of *Ruffel* should be charged with Interest for the Money kept in their respective Hands.

Lord *Loughborough*, the Seals in Commission, "As to *Ruffel's* Executors, they cannot be looked upon in the Light of Assignees, and as Executors, are not required to pay till called upon; and though the Plaintiffs might charge *Ruffel's* Estate in Respect of the Money retained in his Hands in his Life-time, yet, as the Sum is comparatively small, it is scarcely an Object. But with Regard to *Townshend*, I was surprised to hear it argued that the Assignees were not to make a Dividend, or to take an active Part in settling the Bankrupt's Affairs, unless called upon by the Creditors. And as to the Idea of discouraging honest Men from taking upon themselves the Office of Assignees, no honest Man can ever have any Difficulty. The Effect of giving in to such Doctrine would be, that it would be canvassed for as an Office, and no honest Man would ever be appointed. There is nothing so likely to make the Bankrupt Laws reprobated, or to bring about their Annihilation. This is the grossest Case that Imagination can make. The Assignees' only Excuse is, that they could not make a Dividend, because they had been so very negligent. They never called upon the Clerk of the Commission, and he is now dead, and all the Papers are lost. And the Expences of a Suit are brought upon the Estate by their Neglect. Now what Ground is there for not changing

charging them with Interest? The Money being mixed by *Townsend* with his own, it is just as clear that a Profit has accrued, as if it had been specially placed out. *Townsend* was employed in Trade, and knew how to make the most of Money. Money is Part of a Merchant's Stock in Trade: a circulating Capital on which Profit arises. The Sum in the Banker's Hands was fluctuating, and he must have been an unthrifty Merchant if he did not make great Profit of the Money by discounting Notes, &c. Since the Year 1768, the Sum of 1936*l.* has been so employed by him. If the Court should suffer him to do this, when the very Nature of the Trust reposed in him, required that he should not keep it in his Hands, when will there be a sufficient Ground to charge Assignees? *Townsend* must therefore pay the Interest at 5 per Cent. and pay all the Costs of this Suit, and also all the subsequent Costs arising from the Enquiry in the Master's Office, which has been occasioned by his Neglect.

Let this Case serve as a Precedent and a Warning to tardy Assignees, who but too frequently deserve the severest Censures, and even Punishment, for delaying Dividends to the great Injury of the poorer Classes of Creditors under Commissions of Bankruptcy.

If Creditors want to inspect the Assignees' Accounts, and are refused by them, the Court, on Petition, will oblige the Assignees to shew their Accounts according to the Directions of the Statutes.

If an Assignee is guilty of a Breach of Trust, by misapplying the Creditor's Money or keeping the Money in his Hands, when he ought to have divided it, the Court, on a Petition and Proof being made, will Order an Account to be taken before the Commissioners, and a Dividend to be made; and if any manifest Delay or Neglect appears in them, will oblige them, as we have seen to pay Interest and Costs.

If Assignees attempt to sell Estates at an under-Value, or enter into any clandestine Agreement either with the Bankrupt or any other Person, the Court, by Application, will by Order restrain them from selling such Estates or Interests, or remove them.

If Assignees have had Suits in Law or Equity, on Application to the Court the Court will Order the Commissioners to settle the Accounts, allowing them all reasonable Costs and Charges, and direct the Assignees to make a Dividend of the Residue.

The Court on a Petition will Order the Commissioners to enquire into the real Consideration of Debts and Notes, and of usurious Contracts; and will Order the Assignees to be restrained from making any Dividend, till the Commissioners shall have made their Certificate to the Court; and if there appears to have been more than legal Interest received, or any unfair Transactions, with Regard to the obtaining or swelling such Debt, the Court, on bringing a Bill, will, by Decree, reduce such unconscientious Demand to the Sum which is really due.

If an Assignee dies, the Trust devolves to the surviving Assignee, or to such new Assignee as the Court shall join to the surviving Assignee, if the Creditors shall petition for the same; and the Executor or Administrator of the deceased Assignee must pay the Money in his Hands to the surviving Assignee, and such additional Assignee, if appointed; or account before a Master in *Chancery* for Assets come to his or her Hands because the Commissioners cannot take an Account of Assets.

But if the Bankrupt's real Estate is conveyed to Assignees, and one of them dies, this is a Joint-Tenancy, and goes to the Survivor; and he may alone sell such an Estate to the Purchaser; but if both die before any Conveyance is made, then the Heir at Law of the Survivor must convey to such new Assignees as the Court shall appoint, or join with such new Assignees in Conveyance to a Purchaser.

If Money is overpaid in Pursuance of an usurious Contract, the Assignees have a Right to demand and recover it, notwithstanding the Agreement of the oppressed Party to allow such Payments. The two *Cottons* became Bankrupts, and their Assignees brought a Bill against *Dashwood*, as Executor of Sir *Samuel Dashwood*, who had in his Life-time, lent several Sums to the Bankrupts upon Bonds bearing 6 per Cent. Interest, and had taken Advantage of their necessitous Circumstances,

cumstances, and compelled them to pay 10 per Cent. to which they submitted, and entered into other Agreements for that Purpose, and continued paying at the said Rate of 10 per Cent. from the Year 1710 to 1724; it was decreed at the Rolls, that the Defendant should account; and that for what had been really lent, legal Interest should be computed and allowed; and what had been paid, over and above legal Interest, should be deducted out of the Principal at the Time paid, and the Plaintiffs to pay what should be due on Account; and if the Testator had received more than was due with legal Interest, that was to be refunded by the Defendant, and the Bonds to be delivered up.

A Bankrupt, before he became such, having made a Mortgage of his Estate, the Assignees of the Statute bring an Ejectment for the Recovery of the Lands comprised in the Mortgage; the Mortgagee refuses to enter, but suffers the Bankrupt to take the Profits, and to fence against the Assignees with this Mortgage. Ld. Keeper ordered, the Mortgagee should be charged with the Profits from the Time of the Ejectment delivered.

*Assignee's Right to a Mortgage made by a Bankrupt. Chapman v. Turner. 1 Vern. 276. Mich. Term. 1684.*

*An Assignee dying in Debt by Bond.*

THE Assignees under a Commission taken out against *I. S.* petitioned that *I. N.* the Daughter and Administratrix of *I. D.* who was the surviving Assignee under the Commission, should account before the Commissioners, for the Bankrupt's Effects come to her Hands; and an Affidavit was made, that *I. N.* had confessed she believed that her Intestate, the Assignee, kept the Bankrupt's Money in a separate Bag, with a Note in it, shewing it to be such; and also that the Assignee left Lands of Inheritance, descended to *I. N.* the Heir, which would be Assets by Descent, to answer the Covenant entered into by the Assignee for himself and Heirs, with the Commissioners, duly to account for the Bankrupt's Effects.

*Ex parte Markland. 2 Peer Will. 546. Trin. Term, 1729. L. C. King.*

But against the Petition it was urged, that this Matter was not fit to be ended in a summary Way, but by a Bill to determine it; for that *I. N.* the Heir and Administratrix of the Assignee, had made an Affidavit, that she never confessed the Assignee, her Father, kept the Bankrupt's Money in a separate Bag or Place, nor did she believe the Fact to be so; that the Assignee the Father, died indebted by Specialty and otherwise several thousand Pounds beyond all his Assets: that she has paid some Bonds, and Actions were depending upon others; that it was in her Election to prefer which of the Specialties she pleased, and the Commissioners were not proper to determine in a summary Way, whether the Payments already made by the Administratrix, or which she should make, were, or would be, good and legal; or if they should make such Determination, this could be no way binding to the other Creditors; therefore the Order now desired, that the Daughter and Administratrix of the Assignee should account with the Commissioners, would be of no Use; since the Creditors might bring their Action, or Bill in Equity against the Daughter and Administratrix of the Assignee; for which reason Ld. Chancellor ordered the Petition of the new Assignees to be dismissed, and directed them to bring their Bill.

Though Assignees are generally chosen from among the Creditors, and those commonly to whom the Bankrupt is most indebted, yet they may be made, notwithstanding they are no Creditors, nor any Ways concerned in the Commission, provided the major Part in Value of the Creditors appoint them.

And Assignees may bring Actions for Debts due to the Bankrupt in their own Names, &c. for they shall have the same Remedy as the Bankrupt himself might have had against his Debtors. But if the Commission of Bankruptcy be not taken out within six Years, the Time directed by Law for suing of Debts, then the Defendant in an Action may plead the Statute of Limitations: In Case the Commission be taken out within six Years, and the Assignment made within that Time, the Statute preserves the Debt by the Assignment, it being to relieve Creditors against Fraud.

*2 Cr. 105. 1 Sand. 37. Jones v. Pope.*

It is a constant Practice to make an Assignment of the Debts and Estate of the Bankrupt to Assignees in Trust for themselves, if Creditors, and the other Creditors; it has been held, that where a Commission of Bankruptcy is taken out, the Bankrupt's Goods do not thereupon belong to the Commissioners, for until

*1 Salk. 108. 111.*

an Assignment thereof is made, the Property is not transferred out of the Bankrupt; but it is said, the Assignee is in by Relation from the Time of the Bankruptcy, so as to avoid all *mesne* Acts, but not so as to be actually invested with the Property.

*Of Removing Assignees.*

§ Geo. II. C. 59. S. 31. **I**F an Assignment of a Bankrupt's Estate already made by the Commissioners, or hereafter to be made, pursuant to the Choice of Creditors should be found necessary to be vacated, and a new Assignment made of the Debts and Effects unreceived, and not disposed of by the then Assignees, to other Persons, to be chosen by the Creditors as aforesaid, it is lawful for the Lord Chancellor, Lord Keeper, or Commissioners of the Great Seal, upon the Petition of any Creditor, to make such Order therein as he or they shall think just and reasonable; and in Case a new Assignment shall be ordered to be made, then such Debts, Effects, and Estate of the Bankrupt shall be thereby effectually and legally vested in such new Assignee or Assignees, and it shall be lawful for him or them to sue for the same in their Names, and to discharge any Action or Suit, or give any Acquaintance for such Debts, as effectually to all Intents and Purposes as the Assignees in the former Assignments might have done; and the Commissioners shall cause publick Notice to be given in the two *London Gazettes* that shall immediately follow the Removal of such Assignees; and the Appointment of such others as are relaid, that such Assignees are removed, and such others appointed in their stead, and that such Persons as are indebted to the Bankrupt's Estate do not pay any Debts to the Assignees removed; and if an Issue is directed to be tried in the Time of the old Assignees, the Court, on Petition, will order the same Issue to be tried by the new ones.

If an Assignee himself become Bankrupt, that will be a sufficient Ground for his Removal. Or if the Commissioners act improperly in the Choice of Assignees.

And where an Assignee is removed on Account of his own Bankruptcy, Lord *Hardwicke* was of Opinion, that he and his Assignees must join with the Commissioners in executing an Assignment to the new Assignees.

If there is any Injustice committed by Assignees, and that they, with the Bankrupt's Consent, will admit of sham Debts being proved, the Court will remove such Assignees, and order the Consideration of such Debts to be inquired into, and all Parties to be examined upon Interrogatories, and appoint new Assignees, and direct the Commissioners to see what is really due from the Bankrupt's Estate to his Creditors; and after the Assignees are chosen, will order Costs of the Parties so unjustly acting, to be taxed by a Master and be paid by them.

If Assignees live at a great Distance from the Bankrupt's Estate or Effects, whereby such Estate or Effects may be incumbered with heavy Charges, or occasion a Neglect in getting in such Effects; upon the Application of the Majority of the Creditors who have proved their Debt under the Commission, and proving the same by Affidavit, the Court will discharge such Assignees, and direct a new Assignment to be made to such other Assignees as the Creditors shall appoint, and direct that the old Assignees shall join in such new Assignment.

If it appears that there are Accounts between the Bankrupt and the Assignees, and although there may be Notes or Bonds subsisting, so as to entitle them to prove their Debts, yet if upon the Balance of such Accounts, the Assignees appear to be Debtors to the Bankrupt's Estate, the Court will for such Reason remove them.

If there appears Partiality or Unfairness in the Choice of Assignees, the Court, on Petition will remove them.

If it appears that Assignees have prevented Creditors from proving their Debts, to make Number and Value for the Bankrupt's Certificate, and for that Purpose have contested such Debts, and have refused to admit them; the Court will for such Unfairness remove the Assignees, and admit such Creditors to prove such Debts as shall appear to be justly due to them.

*Penalties on Persons concealing Effects, and pretended Creditors swearing falsely; and Allowances made to the Discoverers of Bankrupts' Effects.*

BY this Statute it is enacted, for the better Discovery of a Bankrupt's Estate, <sup>5 Geo. II. c. 21.</sup> that all and every Person who shall, after the Time allowed to such Bankrupt, voluntarily make a Discovery of any Part of such Bankrupt's Estate, not before come to the Knowledge of the Assignees, shall be allowed <sup>5 per Cent.</sup> and such further Reward as the Assignees, and the major Part of the Creditors in Value, present at any Meeting of the Creditors, shall think fit.

And every Person who shall have accepted of any Trust, or Trusts, and shall wilfully conceal or protect any Estate, real or personal, of any Person or Persons becoming Bankrupt, from his Creditors, and shall not, within forty-two Days next after such Commission shall issue forth, and Notice thereof be given in the *London Gazette*, discover and disclose such Trust and Estate, in Writing, to one or more of the Commissioners or Assignees of such Bankrupt's Estate, and likewise submit himself to be examined by the Commissioners, in and by the said Commission authorized, if thereunto required, and truly discover the same, shall forfeit the Sum of one hundred Pounds of lawful Money of *Great Britain*, and double the Value of the Estate, either real or personal, so concealed, to and for the Use and Benefit of the said Creditors.

And whereas many Abuses have been committed by pretended Creditors of Bankrupts, be it enacted, by the Authority aforesaid, that if any Person, at any Time hereafter, shall, before the acting Commissioners in any Commission of Bankruptcy, or by Affidavit or Affirmation exhibited to them, swear or depose that any Sum of Money is due to him or her from any Bankrupt, which Sum of Money is not really due or owing, or shall swear or affirm that more is due than is really due or owing, knowing the same to be not due or owing, and that such Oath or Affirmation is false and untrue, and being thereof convicted by *Indictment* or *Information*, such Persons shall suffer the Pains and Penalties inflicted by the several Statutes made and now in Force against wilful Perjury, and shall moreover be liable to pay double the Sum so sworn or affirmed to be due or owing as aforesaid, to be recovered and levied as other Penalties and Forfeitures are upon penal Statutes, after the Conviction, to be levied and recovered; and such double Sum shall be equally divided among all the Creditors seeking Relief under the said Commission.

Where any Person shall fraudulently swear, or being a *Quaker* affirm, before the major Part of the Commissioners in a Commission of Bankruptcy, or by Affidavit or Affirmation exhibited to them, that a Sum of Money is due to him from any Bankrupt, which shall in Fact not be really and truly owing, and shall, in Respect of such fictitious Debt, sign the Certificate of such Bankrupt's Discharge, in every such Case, unless such Bankrupt shall, before the major Part of the Commissioners have signed such Certificate, by Writing signed by him, and delivered to one or more of the Commissioners, or of the Assignees of his Estate and Effects, disclose the Fraud, and object to the Reality of such Debt, such Certificate shall be null and void, and the Bankrupt shall not be intitled to his Discharge, or to any of the Benefits or Allowances given to Bankrupts by the Act of 5 *Geo. II.*

Where any Creditor of a Bankrupt resides in foreign Parts, the Letter of Attorney of such Creditor, attested by a Notary Publick in the usual Form, shall be a sufficient Evidence of the Power by which any Person thereby authorized shall sign the Bankrupt's Certificate.

*Of superseding Commissions.*

THE Reasons for superseding Commissions are many and various; as, 1<sup>st</sup>, If there is not a Debt due to the petitioning Creditor; in which Case the Court will order the Commissioners to enquire into the Nature of the Debt, and to certify the same to the Court; and if there is not a sufficient Foundation for the Debt, the Court will supersede it.

2dly, If the Party insists he is no Trader, the Court usually directs such Facts to be tried; and if on such Trial it appears to the Court that he is not a Trader, the Court will for such Reasons supercede the Commission.

3dly, If the Party against whom the Commission is issued, appears to be an Infant, the Court, on full Proof of such Infancy, will supercede the Commission.

4thly, If, after the issuing a Commission, the Party makes a Satisfaction, or gives a sufficient Security for performing it to all his Creditors, and they in Consequence give him a Release, these Motives, on Petition to the Court, will induce it to supercede the Commission.

5thly, If a Bankrupt conveys all his real Estate to Trustees for the Benefit of his Creditors, and they accept of this Conveyance, the Court, in this Case, will order the Creditors to deliver up their Securities to the Bankrupt, and that the Bankrupt shall deliver up all the Title Deeds, and join in the Conveyances; and that the Trustees shall proceed in the Trust, and that the Bankrupt shall pay the Charges of the Commission, deducting the Money out of the Assignees' Hands.

4 Geo. II.  
Vol. 123.

6thly, If a Bankrupt makes a private Agreement with his Creditor, and prevails on him to take out a Commission, in Consideration of being paid his whole Debt, or at least more than the Rest of his Creditors, the Court, on Proof made thereof, will order the Commission to be superceded, and award a new one; and the Person receiving such Goods, or Satisfaction, shall lose his whole Debt and the Money received, and pay the same to such Persons as the Commissioners shall appoint, in Trust for the Bankrupt's Creditors, in Proportion.

7thly, If a Person has not a Mind to be a Bankrupt, and is conscious that he is no Trader, nor has committed any Act of Bankruptcy, or does not owe any Debt sufficient whereon to ground a Commission, he may, if he supposes a Commission is going to be taken out against him, enter a Caveat in the Secretary's Office against it; or if it has issued, he may petition the Court that no such Commission may be executed against him, or that it may be superceded; and, upon hearing the Merits of such a Petition, the Court in some Cases determines the Point, and in other Cases directs an Issue at Law to try the same.

8thly, If a Commission taken out in an adverse Manner is superceded, and the Party on the Trial is not found Bankrupt, the Court, according to the Nature of the Case, frequently will order Costs to the Party against whom the Commission is taken out, or may, if they think proper, assign over the Bond given to the Lord Chancellor.

#### *Costs of Commissions, how to be settled and paid.*

5 Geo. II. C.  
39. S. 25.

**T**HE Creditors who shall petition for a Commission of Bankrupt, shall be obliged, at their own Costs, to prosecute the same, until Assignees shall be chosen; and the Commissioners shall, at the Meeting appointed for the Choice of Assignees, ascertain such Costs, and by Writing shall order the Assignees to reimburse such petitioning Creditors out of the first Effects of the Bankrupt that shall be got in; and every Creditor shall be at Liberty to prove his Debt without paying Contribution.

Ditto, S. 42.

There shall not be paid out of the Estate of the Bankrupt any Monies for Expences in Eating or Drinking of the Commissioners, or of any other Persons, at the Times of the Meeting of the Commissioners or Creditors; and no Schedule shall be annexed to any Deed of Assignment of the personal Estate of such Bankrupt; and if any Commissioner shall order such Expence to be made, or eat or drink at the Charge of the Creditors, or out of the Estate of such Bankrupt, or receive above 20s. each Commissioner for each Meeting, every such Commissioner shall be disabled to act in any Commission of Bankrupts.

Ditto, S. 46.

All Bills of Fees or Disbursements demanded by any Solicitor, employed under any Commission of Bankrupt, shall be settled by one of the Masters of Chancery; and the Master who shall settle such Bill shall have for his Care in settling the same, as also for his Certificate thereof, 20s.

*Concerning the Duty of, and Remedy against Gaolers, where Bankrupts or Witnesses are committed, and suffered to escape.*

**I**N Case the Commissioners appointed in any Commission of Bankruptcy, <sup>Geo. II. C. 30. S. 18.</sup> should, in Virtue of their Power, commit the Bankrupt or any Person or Persons to Prison, for not conforming to the Acts relating to Bankrupts; and if the Gaoler or Keeper of the Prison to which such Bankrupt, Person, or Persons shall be so committed, wilfully suffer such Bankrupt, Person, or Persons, to escape from such Prison, or to go without the Walls or Doors thereof, until he or they shall be duly discharged, such Gaoler or Keeper shall, for such his Offence, being duly convicted by Indictment or Information, forfeit five hundred Pounds, of lawful Money of *Great-Britain*, for the Use of the Creditors of such Bankrupt.

And the Gaoler or Keeper of such Prison as aforesaid, shall, upon Request of <sup>Ditto, S. 19.</sup> any Person, being a Creditor of such Bankrupt, and having proved his Debt under the Commission, and producing a Certificate thereof under the Hands of the Commissioners, which they are hereby required to give *gratis*, forthwith produce and shew such Person or Persons so committed as aforesaid to any such Creditor requesting the same; and in Case such Gaoler or Keeper of such Prison shall refuse to shew, or shall not forthwith produce such Person or Persons so committed as aforesaid, and being in his actual Custody at the Time of such Request, to such Creditor of the Bankrupt requesting to see such Person or Persons committed as aforesaid, such Gaoler or Keeper of such Prison shall forfeit for such his wilful Refusal or Neglect, the Sum of 100*l.* of lawful Money of *Great-Britain*, for the Use of the Creditors of such Bankrupt, to be recovered by Action of Debt in any of his Majesty's Courts of Record at *Westminster*, in the Name of the Creditor requesting such Sight of such Prisoner.

And for every other such Offence shall forfeit the Sum of 200*l.* for the Use of <sup>Geo. I. C. 24.</sup> the Bankrupt's Creditors, as aforesaid.

*Concerning Privilege of Parliament.*

**B**Y Stat. 4 *Geo. III.* Cap. 36. the Stat. 5 *Geo. II.* Cap. 30. concerning Bankrupts is further continued to *September 29, 1771*, and from thence to the End of the then next Session of Parliament. And with Respect to Persons intitled to the Privilege of Parliament not paying their Debts, the following Act was made, intituled, 'An Act for preventing Inconveniences arising in Cases of Merchants, and such other Persons as are within the Description of the Statutes relating to Bankrupts, being intitled to Privilege of Parliament, and becoming insolvent.'

Stat. 4 *Geo. III.* Cap. 33. Sect. 1. Whereas Merchants, Brokers, Factors, Scriveners, and Traders, within the Description of the Statutes relating to Bankrupts, having Privilege of Parliament, are not compellable to pay their just Debts, or to become Bankrupts, by Reason of Freedom of their Persons from Arrest upon Civil Process; and some Doubts have also arisen, whether in Cases of Bankruptcy, a Commission can be sued out during the Continuance of such Privilege: To remedy which Inconveniences, and to support the Honour and Dignity of Parliament, and good Faith and Credit in commercial Dealings, which require, that in such Cases, the Laws should have their due Course, and that no such Merchants, Bankers, Brokers, Factors, Scriveners, or Traders, in Case of actual Insolvency, should, by any Privilege whatever, be exempted from doing equal Justice to all their Creditors; be it enacted, &c. that from and after the 1st Day of *May, 1764*, it shall be lawful for any single Creditor, or two or more Creditors, being Partners, whose Debt or Debts shall amount to 100*l.* or upwards, and for any two Creditors whose Debt shall amount to 150*l.* or upwards, or any three or more Creditors whose Debts shall amount to 200*l.* or upwards, of any Person or Persons deemed a Merchant, Banker, Broker, Factor, Scrivener, or Trader or Traders, within the Description of the Act of Parliament

Parliament relating to Bankrupts, having Privilege of Parliament, at any Time, upon Affidavit being made and filed on Record in any of his Majesty's Courts at *Westminster* by such Creditor or Creditors, that such Debt or Debts is or are justly due to him or them respectively, and that every such Debtor, as he or they verily believe, is a Merchant, Banker, Broker, Factor, Scrivener, or Trader, within the Description of the Statutes relating to Bankrupts, to sue out of the same Court Summons, or any original Bill and Summons, against such Merchant, Banker, Broker, Factor, Scrivener, or Trader, and serve him with a Copy thereof; and if such Merchant, Banker, Broker, Factor, Scrivener, or Trader, shall not, within two Months after personal Service of such Summons, Affidavit of the Debt or Debts having been duly made and filed as aforesaid, pay, secure, or compound for, such Debt or Debts, to the Satisfaction of such Creditor or Creditors, or enter into a Bond in such Sum, and with two such sufficient Sureties, as any of the Judges of that Court out of which such Summons shall issue shall approve of, to pay such Sum as shall be recovered in such Action or Actions, together with such Costs as shall be given in the same, he shall be accounted and adjudged a Bankrupt from the Time of the Service of such Summons; and any Creditor or Creditors may sue out a Commission against any such Person, and proceed thereon in like Manner as against other Bankrupts.

Sect. 2. Provided always, and it is hereby declared, that this Act shall not extend, or be deemed or construed to extend, to any such Debt or Debts as aforesaid contracted before the 8th Day of *March*, 1764; any Thing herein before contained to the contrary thereof in any wise notwithstanding.

Sect. 3. And be it further enacted, by the Authority aforesaid, that if any Merchant, Banker, Broker, Factor, Scrivener, or Trader, shall, after the last Day of this Session of Parliament, commit any Act of Bankruptcy, that then, and in such Case, any Creditor or Creditors as aforesaid may sue out a Commission of Bankruptcy against any such Merchant, Banker, Broker, Factor, Scrivener, or Trader; and the Commissioners in such Commission, and other Persons, may proceed thereon in like Manner as against other Bankrupts; any Privilege of Parliament to the contrary notwithstanding.

Sect. 4. Provided nevertheless, and be it enacted, that nothing in this Act shall subject any Person intitled to Privilege to be arrested, or imprisoned during the Time of such Privilege, except in Cases made Felony by the Acts relating to Bankrupts, or any of them.

HAVING now made every necessary Remark on the Laws and Practice for and against an *English* Bankrupt, I shall add, how those under such unhappy Circumstances are treated in *France* and *Holland*; as it may unfortunately happen for my Reader, that the Course of his Dealings may lead him into some unlucky Engagements with such insolvent Persons; and it will then be natural for him to be desirous of knowing how far the Laws of the Country will protect the Debtor from the Creditor's Suit; and what Steps these latter ought to take for the Securing or Recovery of their Property: In Order therefore to give my Reader this Satisfaction, I shall observe to him, that in *France* a considerable Distinction is made between a *Bankruptcy* and a *Failure*; the former being understood to be voluntarily and fraudulent, whilst the other is supposed to be by Constraint and Necessity, caused always by some unforeseen and unavoidable Accident; but as *Savary* has made a very just and nice Distinction between the Signification of these two Terms, I shall give my Reader the Sense of his Observations thereon. He says, the Publick seldom makes the Difference it ought on these Occasions, but confounds the Distinctions, which are in their Nature very apparent, and are made such in all the King's Ordinances relative to those Affairs. The Trader who has failed, or stopped by Reason of his Incapacity punctually to comply with his Notes of Hand, Bills due, or immediately to return the Money he had received for those come back protested, and is obliged to this Demand by some unforeseen Accident, or Loss in Trade, and reduced to the Necessity of asking Time of his Creditors for the Payment of the Whole, or what he can,

of his Debts, is not to be placed on a Footing with the Bankrupt, who by Fraud and Treachery has secured to himself a Provision for Futurity, at the Expence of his Creditors, to whom he gives up the trifling Remains of his ransacked Fortune in Payment of his Clearance; and though this Man's Villainy continues undiscovered, he always remains infamous in the Eyes of the Publick; whilst the other, who complies as far as he is able, is restored to Credit, though he continues incapable of enjoying any publick Post till the whole of his Debts are paid with Interest.

Although a Merchant be never so skilful and assiduous in his Business, though he keeps his Affairs under the best Regulation, and has set out in the World with a handsome Fortune; though he has observed all possible Application, and made Prudence his Guide in the Management of his Trade; and though he has omitted no Circumstance that might naturally attract and secure Success, yet if all is not accompanied by *good Luck*, he is not sure to prosper in his Enterprize and Undertakings; for Fortune very frequently determines all contrary to Expectation, as she is whimsical, and often favours the silly and ignorant, whilst the best and most capable Men are experiencing her Frowns: This is what no one as yet has been able to account for; and Experience demonstrates, that Misfortunes are daily happening to Merchants, whose Probity, Expertness, Prudence, and Capacity, render them worthy of Compassion, and undeserving this Reverse of Fortune, that exposes them to Misery and Contempt. Though, seeing Men, who follow the most approved Maxims in their Business, do not always meet a correspondent Success, but on the contrary are exposed to Mishaps and Losses, or supposing them considerable Gainers by their Trade, and they have more than sufficient to discharge their Debts, yet their Effects may undesignedly be so dispersed, that they may be incapacitated to answer an immediate Demand made by some inexorable Creditors, who will give no Quarter, or listen to the Calls of Benevolence and Humanity; I say, seeing Men of Integrity are exposed to these unjust Resentments of uncompassionate Creditors, the *French Laws* have provided a Means, by granting Letters of Respite, or Arrets of Parliament, to protect them from these unrelenting Tempers; which I am now about mentioning.

*Letters of Respite* are always granted by the King, and *Arrets of general Protection* by the Parliament, and sometimes by the King's Council, both tending to defend an honest Debtor from the Prosecutions of his Creditors, during the Term for which they are granted; and to allow him Time to liquidate his Effects, in Order to pay his Debts, or to agree with those to whom he is indebted; and that he may obtain the said Protection, he must strictly observe and submit to the King [Lewis XIV]'s Ordinances of *August 1669*, and *March 1673*; and to his Majesty's Declarations of the *23d of December 1699*, and that of *September 1664*; which enjoin the following Particulars.

1st. *Letters of Respite* are never granted but on important Considerations, to begin with Proofs and authentick Accounts, which ought to be explained in the said Letters, and affixed under the counter Seal; with a State of his Effects, which the *Grantee* must certify to be a true one, as well of his Moveables and Immoveables, as of Debts, under Pain of suffering the Penalties mentioned in the aforesaid Ordinances; and he must take Care to be very exact herein; because if he is found fraudulent in any one Particular he will forfeit the Protection of the said Letters, although they have been granted peremptorily with all his Creditors, and he will not only be unable to procure others, but he shall not even after this be admitted to the Benefit of ceding or giving up his Effects to his Creditors, which is only denied to one convicted of Fraud and Deceit.

2d. This State, so drawn up and certified, ought to be deposited at the Registry or Rolls of the Consular Jurisdiction, if there is one at the Place of his, the Debtor's, Residence, if not, at the Town-House; of which Deposit he must take a Certificate, to be fixed to the Petition he presents to the King, Council, or Parliament, for obtaining the *Letters of Respite* or *Protection*; and immediately after the Sealing and Expedition of the *Letters*, the *Grantee* ought to deliver into the Office, as well of the Judge to whom they are addressed, as that of the nearest Consular Jurisdiction, a Duplicate of that State, whose Truth has been so certified, of whose Deposit he ought to procure Certificates from the

different Registers, and give a Copy to each of his Creditors, as well of the State as of the Certificate, at the Time of notifying the Letters, which are only valid in Regard of those to whom a Copy has been given, and therefore he remains exposed to the Prosecutions of them who have been forgotten or neglected in the Delivery of the said Copies.

3dly. If he who obtains Letters is a Merchant, Banker, or Shopkeeper, he is obliged, besides the Formalities before recited, and under the said Penalties, to deliver into the Judge's Office to whom the Letters are addressed, his Books and Accounts, of which he must take a Certificate from the Register, and also give a Copy of it to each of his Creditors, when the Letters are notified to them; but previous to this Deposit, he ought to shew them to his Creditors, that they may examine them if they please, and see whether the State of his Affairs delivered into the Office be a true one, and in all Respects conformable to his said Books and Accounts; but he is not obliged to make this Offer till the Letters are notified, as it is only from the Moment of their Notification, that his Failure is esteem'd, known, or published, and that if he presented his Books before having obtained and published the protecting Letters, his Creditors, knowing thereby the bad State of his Circumstances, might Value themselves on that Discovery, to make him Prisoner, even whilst he was soliciting the Arret, which by this Means would be rendered unserviceable, as the Violence offered him in the Arret could not be repaired by it, for Want of its having a retroactive Effect.

4thly. To enjoy the Benefit of the Time granted by the Letters, the Debtor ought to notify them to his Creditors, and others concerned in his Failure, who live in the same Place with him, in eight Days from their Date, but to those residing at a Distance, to be counted from the eight, at one Day for every five Leagues; and, as was before observed, they only protect from the Suits of those to whom they are intimated; not that the Omission to notify them to some of the Creditors within the said eight Days renders them null and void, but because that in Regard to the Creditors neglected or forgotten, they are ineffectual till after their Notification; though the Vigilance which the other Creditors have used to preserve the Effects of their common Debtor, is nevertheless equally serviceable to those who are ignorant of the Letters, and to those who have acted either by Opposition, or otherwise endeavoured to preserve their Dues and make their Reasons valid.

The Design of the Arret's being notified in eight Days from its Date, is to afford the Creditors an Opportunity of deducing and offering their Reasons against it, if they have any; and that they may be admitted to make Proof of the Cheat, Fraud, and Knavery of their Debtor, if they suppose, and are capable of proving it; and it is not otherwise either reasonable or just, that he who has obtained the Letters should remain Master of the Time for notifying them, as he might greatly abuse that Liberty, either by absconding the best of his Effects, or making new Purchases, and then retiring with them into some foreign Part where his Creditors cannot reach him; and this he may easily do, if iniquitous enough to attempt it; as his Creditors not knowing that he was possessed of his Protection, and consequently not suspecting the bad State of his Affairs, would naturally take no Precaution to prevent either his Fraud or Flight.

5thly. A Merchant, after obtaining these Letters, is not at Liberty to pay any one Creditor in Preference to another; nor no longer Master, but a Depositary or Trustee, of his Effects, which ought to be divided equally among them, and they participate of the bad Fortune of their common Debtor, without procuring an indirect and particular Advantage to any one of them; as this Preference is not only unjust and odious, but, if discovered, renders the Letters unprofitable to him that has obtained them, by their becoming null, for his having acted so contradictorily to the Intent and Purpose of them.

And besides this Penalty so justly ordained against the Treachery of a Debtor, who, either through Inclination or Fear, so unequally treats his Creditors, to whom he owes an unbiassed Justice, and a Part of his remaining Effects proportionable to their Credits, the neglected or forgotten Creditors, and who have been only paid a Part, whilst others have received their whole Debts, have a Right, if they have sufficient Proofs, to demand a Drawback of as much as will be sufficient to

put them all on a Level, according to the common Contract which has been regulated and agreed between them and their Debtor; for as the Ordinance disposeth, that those Creditors who shall have received any Effects within a small Space before a Bankruptcy, shall be obliged to restore them to the Stock; there is a much stronger Reason for their doing so who have received them after a Failure is become known and publick.

6thly. The Letters always order the Judge to whom they are directed, that in proceeding to their Accomplishment, the Creditors being called, he give to the Grantee such Time as he shall deem reasonable for the Payment of his Debts; which however must not exceed five Years, except with the Consent of two Thirds of the Hypothecated Creditors; and in the mean Time the Letters grant him six Month's Delay to solicit their Accomplishment, during which Term the attempting his Person, or moveable Furniture serving his Use, is prohibited.

7thly. He cannot be excluded from obtaining the Arret under the Pretext of Renunciations, which he has or might make in past Acts and Contracts.

8thly. Those who have obtained Letters of Respite, &c. cannot value on them when they are accused of Bankruptcy, when they are actual Prisoners, or that the Seal is put on their Effects.

9thly. Second Letters of Respite, or Arrets, are never granted, at least without new and considerable Causes whereof he ought to make a Beginning with Testimonies and Proofs, as has been said before.

10thly. There are many Cases in which Letters of Respite, &c. are not to be obtained, *viz.* for Pensions, Aliments, Medicines, House-hire, Crops of Corn, Servant's Wages, Hire of Workmen and Journeymen, Balances of Guardians' Accounts, necessary and voluntary Deposits, Couzenage, Reparations, Damages and Interests adjudged in criminal Matters, Management of Publick Money, Bills of Exchange, Merchandizes seized at Marts, in Fairs, Markets, and publick Ports, Fresh-Water Fish, dry and salted, Securities judicial and extra-judicial, and of joint Bondsmen, Funeral Charges, Arrears of Ground-Rent, Obligations of Long Leases, Merchandizes and Effects bought of the *East-India* Company, or Things sold of Use to it.

11thly. It must be remarked, that from the Moment the aforesaid Letters are obtained and notified, the Grantee forfeits his Honour, and is thereby not only rendered incapable of aspiring to any Post, or publick Employ, but is disseized of them all from that Period, if he is then in Possession; and can only be restored to his lost Credit and Reputation by Letters of Rehabilitation, granted by the King, which places them in the same Condition with Regard to Honour, and Capacity of enjoying publick Employment, that they were in at the Time of their Misfortunes; but these have never been obtained, as has been before observed, till their whole Debts are paid, with Interest; and under these Circumstances they are sometimes, though rarely, granted to Bankrupts also.

What I have said concerning those trading People, who have obtained Letters of Respite, or general Protection, will suffice to shew how far, and on what Conditions they are valid; and I should now proceed to inform my Reader how those Bankruptcies and Failures are treated in *France*, who have not been able, either through Surprise or Neglect, to obtain the said Letters: But as the Wife's Fortune or Jointure is equally regarded under any of these Circumstances, I shall mention the Proceedings thereabout, prior to the others, as the Knowledge of that Circumstance makes a necessary Part of this Subject.

It is the Usage and Custom of some Places in that Kingdom, for Women on their Marriage with Men in Trade, to become Partners with their Husbands for one-third or half the Fortunes they bring; except it is otherwise agreed in the Marriage Articles, and the Wife thereby expressly renounces the said Use or Custom; and such Renunciations are registered, and published, by fixing it in Writing to the publick View, at the Place of the Consular Jurisdiction, if there be any there, if not, at the Town-House, under the Penalty of its being null, as it is valid only from the Day of its Registry and Publication; and that my Reader may judge of the Motives of the King's Ordinance enjoining this Circumstance, he may please to observe that in Consequence of the Copartnership, the Woman, on the Husband's

band's Failure, is obliged to come in as a Creditor in common with the others in this Manner, *viz.* Supposing she brought a Fortune of 4000 Livres, the Half is put into the joint Stock, and the other Moiety secured to her own Use, by Marriage Articles, but remaining in the Husband's Hands, and he failing, her 2000 Livres Stock sinks with his, and she comes in as a common Creditor, for the other 2000 Livres. On the contrary, a Woman renouncing the Copartnership in the Manner above recited, and bringing 4000 Livres Dowry, generally has in Lieu of the expected Profits from Trade; a Sum, suppose 10,000 Livres, joined to her Fortune, and settled on her by Marriage Contract; and in Case the Husband afterwards becomes a Bankrupt, she is entitled to an equal Share of his Effects, with all his other Creditors, proportionable to the said Sum, so that she is greatly benefited by her Renunciation, in Case the Husband proves unfortunate; but as the Publication of this Circumstance was not formerly made obligatory, many People, knowing the Custom of the Place, were drawn in to trust a Man who had married a rich Woman, with much more than they would have done, had they been acquainted with her Renunciation; as they conjectured she had greatly augmented his Stock, and consequently that their Credit was well founded, and a Compliance from the Debtor would be both punctual and sure; when, in Reality, the matrimonial Agreement was quite the Reverse, and a Change of Circumstances open to them the Fallacy of their Expectations, by exposing the little Foundations they had to support the Reason of what were only ideal and ill-grounded; and to avoid a Continuance of such Deceptions, the King published the afore-mentioned *Arret* in *March* 1673, so that not one now can be imposed on in this Matter except through Indolence, or wrong Information, but may take such Steps in their Dealings with Traders under either of the afore-said Circumstances, as they shall deem prudent, and not run any unwarrantable Lengths in their Credit, through a mistaken Notion of a larger Fund for Payment than there truly is; and thus much I thought proper to mention on this Subject before I treated on the *French* Laws concerning *Bankruptcy* and *Failures*, where protecting Letters have not been obtained, which I shall now go through with as much Brevity as the Nature of the Thing will admit of.

It has been remarked, in a preceding Part of this Chapter, that from the Moment Letters of Respite, &c. are obtained and notified, the Grantee is deemed to have failed; and those, whose unexpected Misfortunes have too suddenly reached them to leave Room for procuring such a Safeguard, and obliged them to abscond, their so doing, and the consequent sealing up of their Effects, by Order from the Judge, who has been petitioned so to do by some Creditor, is esteemed a Declaration of their Stopping, or Failing; and as there is a Distinction made in all the King's Ordinances, before remarked, between the Man who has by a Chain of unhappy Events been reduced to these Distresses, and he who has brought them on himself through Debauchery or Design, I shall mention the Laws in Force, in Regard both to the one and the other, and begin with those concerning the innocently unfortunate first, in whose Favour an Ordinance was made at *Paris*, the 12th of *March*, 1678, in the following Words, *viz.*

*By Order of the King.*

**M**ONSIEUR the Provost of *Paris*, or Monsieur the Lieutenant Civil, upon what has been presented to us, by the King's Attorney, that it has for some Months past been perceived, by the Requests that have been presented us, that many Merchants, Bankers, and other Traders, have been obliged to retire from this City, and to abandon their Effects and Families, and have determined to know the true Causes of their Retreat, and examine whether it might be presumed, that the Knavery and Design of committing fraudulent Bankruptcies had made them take that Resolution, it has been found, that it has been more through ill Luck than Knavery; and that many foreign Bankers and Merchants, who have failed and broke, have carried away, and diverted large Sums, which were owing to the Bankers and Merchants of this and other Cities of the Realm, which has reduced and put them in a Condition, not to have ready Money sufficient to

acquit the Bills of Exchange, daily falling due, although they have more, or as much in Effects, as in Debts: And as it is just, severely to punish fraudulent Bankruptcies, according to the Rigour of the Ordinances, it is not less so to hinder that Merchants and Bankers who have trusted their Money with Strangers, under the good Faith or Credit of Trade, should not be treated in the same Manner as if they had committed a Cheat; and that their precipitated Absence to avoid a Prison, and the consequent Charges hindering their Return to Trade, and Re-establishment of their Credit, require that some Provision be made in it. And we, having Regard to the Request of the King's Attorney, do ordain, that all Merchants, Traders, Bankers, and others, concerned in Commerce, who, without Fraud, find themselves in a Condition unable to discharge their Debts, whether for Bills of Exchange or otherwise, by Reason of the Losses they have met with, may appear before us by Petition, to which they shall tack Duplicates of two Accounts, which they shall sign and affirm to be true; the one of the Value of their Effects, and the other of their Debts; in Virtue of the Ordinance which shall be put at the Bottom of the Petition, they shall summon all their Creditors the following Day to appear before us, to agree among themselves, or two Merchants, or other Persons they know, who shall examine the Accounts, and make a summary Inventory, and value and appraise their Effects, in an amicable Manner; and to agree together on the Terms and Times of Payments, and Remittes if any are made, and sell the said Effects in a friendly Way, if possible; and after having heard the Merchants which shall have been named, proceed to the Confirmation of the Contract, which shall have been passed, in all Things appertaining to it, the Whole without Expence or Application of the Seal, though without Prejudice to the Creditors, who shall become Accusers of a fraudulent Bankruptcy, and to the King's Attorney to prosecute extraordinarily, and demand the Sealing of the Effects of those who shall have absented themselves, or become Bankrupts, embezzled, hid, and concealed their Effects in Prejudice to their Creditors, upon which Petition let Justice be done. And the present Ordinance shall be read, published, and affixed, where Need shall be, &c.

And in Consequence of this Ordinance, a Merchant who finds himself in the unhappy Situation it treats of, and, to avoid the Violence which some of his Creditors may offer him, has absconded, if prudently advised, will by some Friend solicit a safe Conduct from them for fifteen Days, or a Month, that he may appear and render an Account of his Actions; and after having obtained it from the greatest Part, if there is any one who refuses to sign it, he ought, before discovering himself, to petition the Judge and Consuls, or other Royal Judges, or even the Parliament; and it would be still better, in order to evitate all Tricks and Shifts, to solicit the Confirmation with those who have signed, and a Permission to summon the Refusers for to decree and ordain, that it shall be allowed by them, and in the mean Time they shall be prohibited attempting his Person or Effects; upon which Petition a Sentence or Arret will be given, granting his Demands; the which being carried to the Registry, it ought to be noted to the dissenting Creditors as soon as possible.

If all the Creditors are not resident in the same Place with him, but several of them in other Towns of the Realm, he must write them to come, or send their Procurator to some one of their Friends to attend the Assemblies of the Creditors who are present, that they may have no Reason to complain of him. The second Thing this unfortunate Trader ought to do on his Return Home, if he has the Seal put on his Goods and Effects, is to request the taking it off in an amicable Manner; but if this is refused, it must be ordained by the Authority of Justice. And the third Thing is, that from the Moment he receives his Books again, he must make out a general State of all his Effects, as well what he owes as what is due to him, to deliver to his Creditors, when they assemble to examine his Affairs; and this is in Conformity with the second Article of the Eleventh Title of the Ordinance in 1673.

Having drawn out his Accounts in the most exact Manner, he must put the following Certificate at the Bottom of them, *viz.*

7 M

I Tho

*I The underwritten do certify to all whom it may concern, that the State here above of all my Effects, as well Debtor as Creditor, contains the Truth; and that I have not omitted any Thing, or made Use of any Persons, or Names in it, that are not my true and lawful Creditors; in Faith of which I have signed the Present, the 29th of May, 1750.*

And it is not sufficient that he has drawn out this State, but he must also strike a Balance for the greater Ease of his Creditors, that they may see with a Cast of an Eye the Truth of his Affairs, and what they have to expect; and he must likewise put underneath the said State, an Account of all the Losses that have happened to him, whether by Shipping, Bankruptcies, or otherwise, the Interests that he has paid, and his House Expences, that he may justify his Conduct to his Creditors, in Case he has not Effects sufficient to pay them their whole Due, that they may have nothing to reproach him with.

When he is ready to render this Account to his Creditors, of his Conduct and their Estate, he must convoke an Assembly of them, by Summons sent in Writing to each of them, and being all met, his Behaviour to them ought to be free from Affectation, either of too great Dejection or Arrogance, but with such Concern and Humility as a just Reflection of his Circumstances will naturally excite; and although some of them should so far degenerate from Reason and good Manners as to be abusive and slanderous in their Treatment of him, it ought not to exasperate him to make correspondent Returns; but command his Passion, by reflecting that it is not every one has Philosophy enough to bear Losses with Temper and Equality of Mind; and it is probable what they suffer by him, though he could not help it, may reduce them to the same Condition with himself; therefore Allowances ought to be made, and no injurious Language returned from the unhappy Sufferer, though such a Shock is certainly not the least of his Misfortunes; however, he ought to submit without murmuring; and, together with the State of his Affairs, he ought to deliver the Creditors his Books, that they may compare the one with the other; but in Case no one will take them under his Care, the Insolvent may then deliver them into the Registry, as was before ordered to be done, by those who had procured Letters of Respite, &c.

At the first Meeting of the Creditors there is seldom much done, the greatest Part of the Time being generally employed in Complaints and Injuries against the Failed; and, at most, Directors or Assignees are chosen to take Care of the common Interest of the Creditors, to see and examine the Books and Papers of the Debtor, and to fix the Days of Meeting to consult about the Affair.

It is to be remarked, that while this is transacting, each Creditor in particular endeavours, as much as he can, to get himself paid the full of his Debt; the Engagement in which he stands with his Debtor, renders him ingenious and fertile in Inventions to incline him to consent to his Demand; one by threatening to prosecute him as a fraudulent Bankrupt, and asserting that it will not be difficult to bring Proof of his Knavery; another menaces him with his Determination of hindering his Composition by his Influence and Interest; whilst a third flatters and caresses him, laments his Misfortunes, and affecting a Generosity, offers him his Purse, protests never to forsake him, that he may depend on his using all his Industry and Power to facilitate his Accommodation, that it is unreasonable he should be deposed of all his Effects, and heartily pities both him and his Family; in fine, he makes Use of every soft and coaxing Expression which he thinks may influence his Debtor, and incline him to distinguish this Flatterer from the Rest of his Creditors, by satisfying him at their Expence. But if unable to prevail, and the Lamb's Skin has been of no Service to him, he quickly puts on the Lion's, and there are no Sorts of Threats or Injuries he leaves unused to the unhappy Debtor, who, combated by Hopes and Fears, sometimes falls into the Snares laid for him, and quits those just Rules of putting all his Creditors on the same Footing, and by so doing, completes his own Ruin; for the Fawnings and Menaces of Creditors can in no Shape operate to the Prejudice of an honest Bankrupt, who has punctually

punctually directs.

But have hint the C assembled by the Plu the State c they may p siderable, i tors' Delit Meeting, elected, th consular J if there is

4thly, If have sold to Quality, as

punctually rendered an exact Account of his Conduct and Affairs as the Law directs.

But having hitherto only mentioned the Duty of the Debtor, I shall proceed to hint the Obligation of the Creditors; and the first Step they ought to take when assembled about their common Affairs, is to elect some among them for Assignees by the Plurality of Votes, who are Men of Probity and Capacity, to see and examine the State of their Debtor's Affairs, and to make their Report about them; and that they may proceed with the greater Order and Regularity, if the Failure is very considerable, it is advisable that they chuse a Notary to receive the Acts of the Creditors' Deliberations, and for this it is necessary to assign the Place, and Days of their Meeting, that no one may pretend Ignorance; and for the Security of those elected, the Act of their Nomination ought to be approved and confirmed by the consular Jurisdiction, if there is one, or in the Royal, or in the Parliaments if there is any in the Town or City where the Failure has happened.

The Power which the Creditors ordinarily gave to the Assignees, is

- 1st, To proceed in taking off the Seal, if it has been put on.
- 2d, To describe and inventory all the Debtor's Effects, as well active as passive, which shall be found belonging to him; and also his Books, Letters, and other Papers and Instructions which can serve to the Eclaircissement of his Affairs.
- 3dly, To see and examine the State which he shall have given in, in his Books and Accounts, and whether they have been regularly kept according to the Ordinance.
- 4thly, To sell the Merchandize and Household Goods of the Bankrupt, and pay the Money into the Hands of the Notary that shall have been chosen, or to any other that the Creditors shall direct.
- 5thly, To recover all the Debts, and to undertake all the necessary Proceedings towards it.
- 6thly, To examine the Transactions, Contracts of Composition, Bonds, Promissory Notes, Bills of Exchange, and other Proofs of those who pretend themselves Creditors of the Failed: From all which Things to make a good and faithful Report to the general Assembly of Creditors, which shall meet for that Intent.

And the Assignees of a Failure ought to observe the following Maxims:

1st, They ought never to abuse the Authority given them by the Creditors, in favouring the Bankrupt to their Prejudice, from a Motive of private Interest, as this would be wanting in that Honesty which ought religiously to be observed by those who are charged with the Management of joint Affairs.

2dly, As it often happens that the Creditors of a Bankrupt are not all Inhabitants of the Town of his Residence, but of several others in the Kingdom, who desire their Friends to assist at the Assemblies, only to see what passes, without a Power of engaging them in the Resolutions of the Creditors: This Maxim ought to be observed; *never to admit any one to their Meetings who are not Bearers of special Powers, for Consent; and agreeing to all that shall be deliberated and done by Plurality of Votes; though this Plurality is not to be counted by the Number of Persons, but the Import of their Debts; or in other Words, not by Number but Value, and the Creditors to whom three Fourths of the whole is owing, shall decide this and every other controverted Affair.*

3dly, The Assignees having got their Power authorized in the accustomed Manner, ought in the first Place to take with the Commissary a Copy of all the Opponents to what is sealed of the Failure, and to make them assign a certain Day and Hour in his House, for to come and see, and consent to the taking it off; and whereas in these Meetings, each Opponent has his Attorney, so that sometimes there may be thirty of them, it ought to be settled and ordained, that the ancientest shall plead for all the Opponents, in Order to evitate the great Expences that would otherwise occur, from each Opponent's having one to plead for him.

4thly, If, on inventorying, any Creditor claims the Merchandize that he should have sold to the Debtor he must give a Description of it, as well in Respect to the Quality, as of the Quantity and Colours, whether both Ends are uncut, and the

Lead untouched whereon is imprinted the Mark and Tickett on which is wrote the Name of the Reclaimant, and which gives him a Right to the pretended Return; this being the Custom always practised and observed on such Occasions, in Order to prevent unhappy Conteſts, which might ruin both the Debtor and Creditor in Expences.

5thly, The Inventory and Deſcription of the Merchandizes, Houſehold Goods, and Papers appertaining to the Failed being made, the Aſſignees ought diligently to ſee and examine the Books and Entries of the Bankrupt, in Order to find out whether the State which he has given in be conformable to them, before they proceed to the Sale; and they ſhould make a Calculation as near as poſſible of the Value of his Effects, which they ſhould report to the Creditors at the next Aſſembly, that it may there be diſcuſſed, whether it will be moſt for their Intereſt to put the Effects into the Debtor's Hands, under proper Clauſes and Conditions, or to diſpoſe of them entirely, and part their Produce among them.

6thly, But before they proceed to the ſaid Deliberation, the Debtor ought to juſtify his Conduct to them, and clearly prove how his Loſſes have ariſen; as it would be imprudent to truſt a Man with the Management of their Affairs, by returning him his Goods, of whoſe Integrity they ſhould have the leaſt Suſpicion.

7thly, After having examined the Conduct of the Debtor, they ought alſo ſtrictly to ſcrutinize the Pretenſions of every Creditor, to ſee that their Demands are juſt, as on theſe occaſions Tricks and Cheats are too frequent.

8thly, In examining the Books and Papers, the Aſſignees ſhould carefully remark, whether the Bankrupt has not made any illegal Sales or Ceſſions of his Effects; which becomes ſo, if they are not tranſacted at leaſt ten Days before the Failure is publickly known, and all Agreements or Conveyances whatſoever, made or done within theſe Limits, become null and void by all the King's Ordinances; although all the Acts and Obligations of them are paſt before a Notary Publick, and the Effects ſhall return again to the Stock, and be divided with it among his Creditors.

9thly, After the Aſſignees have exactly performed all Things before-mentioned, and made the neceſſary Remarks upon the Vouchers and Evidences concerning the Debt of each Creditor, they ought to draw out an exact Balance of all the Effects, in Order to give the Creditors an Inſight into the Debtor's Affairs, and thereby make them capable of judging how to act moſt for their mutual Benefit, and to determine whether it would be moſt advantageous for them to return him all, and wait a reaſonable Time for the Recovery of their entire Dues, or to adjust the Payment with a certain Loſs, or to ſell all and divide the Produce.

And the preſenting the ſaid Balance to the Aſſembly, which the Aſſignees ſhall convoke for that Purpoſe, ought to be done by the moſt capable among them for explaining it; and he ought to be ſo circumſpect in his Behaviour on the Occaſion, as to give no Offence by exclaiming againſt either the Bankrupt or any of the Creditors, for either real or imaginary Offences, as this is contrary to the Rules both of Prudence and good Manners; for theſe Complaints ſhould only be made to the ſuppoſed Offenders by themſelves, and not in a general Aſſembly, it being ſcandalous and may move the Paſſions of ſome, who may not have all the Honesty and Civility that could be wiſhed, to be influenced by the Outcry and unreaſonable Violence, to turn the Meeting into a Crowd and Rout, and fruſtrate the Deſign of their aſſembling, by diſperſing them with Noiſe without coming to any Reſolution.

If it is judged neceſſary by a Majority of the Creditors to appoint ſome one to recover Debts that may appear to be in Danger, it is lawful for them to do it provisionally, notwithstanding any Oppoſition or Appeal by the fewer Number; and it is equally conformable to the King's Ordinances, to pay off any Mortgage or Rent-Charge, as theſe carry Intereſt, with the ready Money that ſhall be found in Caſh, although the Minority ſhould be againſt it; and this Minority is always to be underſtood not to exceed one Fourth Part of the Creditors in Value, ſo that when three Fourths of them conſent to any thing, the Oppoſition of the one Fourth is not to be regarded.

What has been said hitherto, only regards the Person who breaks through adventitious Losses and Misfortunes, and who consequently merits the charitable Attention of his Creditors; and I proceed to speak of the Treatment that the fraudulent *French* Bankrupt has to expect from the Laws of his Country, and every one unhappily concerned with him.

The Bankrupt, who becomes so with the premeditated Intention to cheat, and unjustly rise up with the Effects of those who have trusted him, deserves not only the Aversion of all his Creditors, but of the Publick, and merits an exemplary Punishment; a fraudulent Bankrupt being worse and more infamous than a Highway Robber, as Travellers generally go provided to defend themselves from these latter, though it is not so easy to guard against an Attack from the malicious Designs of ill-intentioned Men.

The fraudulent Bankrupts are *those* who embezzle and convey away their Effects to feigned Creditors, that by their Means they may bring their real ones to greater Concessions, and benefit themselves by the Sums thus iniquitously obtained; *those* who put their Effects under Cover of fictitious Names, by false Sales of their Estates or Goods, and by pretended Cessions, or Conveyances of them; in fine, *those* who destroy or hide their Books, Records, Papers, or Documents, to hinder an Account of their Effects from coming to the Knowledge of their Creditors, must also be reputed and counted among the Number of fraudulent Bankrupts.

There is nothing so pernicious or dangerous to the State and Publick, as fraudulent Bankrupts; for which Reason, a Punishment sufficiently severe, and adequate to the Crime, is hardly yet discovered; notwithstanding there are many Ordinances subsisting, which decree exemplary Chastisements to those who maliciously, and in Fraud of their Creditors, become Bankrupts, though till the Time of *Henry IV.* this Crime was not punishable with Death; but the Frequency of it in that Prince's Reign, induced him to change the more lenitive Laws of his Predecessors, into the severe one now mentioned.

#### *Of Bankruptcy in Holland.*

**E**XPERIENCE daily demonstrates that it is in Places of the greatest Commerce that Failures and Bankruptcies most frequently happen; and the Reason is not difficult to be discovered, as it is clear that among a great Number of Merchants, it would be a Sort of Miracle if all of them were equally successful in their Enterprizes; if it were otherwise, to commence Merchant, and lay a Foundation for Riches and Prosperity, would be the same Thing. But God has so disposed the Affairs of this World, that we often see one Merchant ruined and undone by the same Trade which has enriched another; and on the contrary, that Traffick which has been productive of great Wealth to some, has proved ruinous and destructive to the Estates and Fortunes of others. But not to dwell on these Reflections, I shall mention the Distinction made here between two Sorts of Bankruptcies, Failures, or Breakings, which are three synonymous Words, and though they frequently express the same Thing, the one however is more soft, and less heavy or burthensome than the other; for the Name of a Bankrupt is opprobrious and odious to all honest Men, and is only applied to those who become so to enrich themselves at their Creditors' Expence, or those who give Room to suspect the Honesty of their Intentions, when they stop lightly, or for trivial Causes; instead of its being only said that such a one has been unfortunate, or had the Misfortune to break, when it is seen that he is reduced by insupportable Losses, which every honest Man is exposed to, by a great Number of unforeseen Accidents; but if he designs always to continue his Integrity, and not wound his Conscience in detaining for himself his remanent Effects, which are justly his Creditors', he will make no Difficulty to deliver them up his Books, to communicate to them the true State of his Affairs, and to commit himself to their Mercy and Discretion.

So that in my Opinion the Chamber of the desolate Funds, called in *Dutch*, *de Kamer van de desolate Boedels*, which we have in this City, *Amsterdam*, was not established for this last Sort of Persons, but with the sole View to prevent the

Knavery of those who in Breaking would detain to themselves the greatest Part of the Effects they possess, and frustrate their Creditors' Endeavours to secure them; for when an honest Man has the Misfortune to fail, he makes no Difficulty of declaring it to his Creditors, and frankly to communicate the State of his Circumstances and Effects; and if his Creditors find that the Losses and Disasters which he alleges to have been the Occasion of his Stopping are true, and that his Integrity stands unimpeached, they frequently agree on Terms settled among themselves, leaving him something wherewith to endeavour his Re-establishment; but if it happens that any of the Creditors refuse to sign this Agreement, he is obliged to declare his Affairs at the Chamber afore-mentioned, which, after the Formalities in the following Ordinance, will oblige the Refusants to subscribe the Agreement, if it has been settled between the Insolvent and two Thirds of the Creditors for three Quarters of the Debt, or three Quarters of the Creditors for two Thirds of the Debt, as will be seen in the subsequent Ordinance.

*Instructions and Orders for the Commissioners of the desolated or ruined Estates.*

**T**HE States of Holland and West-Frisse make known, that it has been remonstrated to us by the Burgo-masters and Regents of the City of *Amsterdam*, that they thought proper, some Years ago, to establish in the said City a Chamber for the desolate Estates, under certain Regulations, as was then convenient; that they, the Remonstrants, having seen such abundant Fruits and good Effects, that they were in the Design, not only to continue it, but were desirous also to provide for it by a more particular and ample Ordinance, drawn up on a Plan which the Commissioners of the said Chamber have made, and which they have found to be advantageous and necessary, by the Experience they have had, according to the Terms of the Copy which has been delivered us, and hereafter inserted; that to the End so good a Work might have a greater Force and Virtue, the Remonstrants have prayed, that we would be pleased to give our Approbation and Grant, in the best and most ample Form, containing the said Instructions and Order as follow:

I.

In the first Place, there shall be yearly appointed, on the 4th of *February*, by the Lord Justices, five fit Persons, for the Direction of the Chamber, of which two shall be taken from among the old *Echivens*, which I think may be translated *Aldermen*, and the others to be expert in Trade.

II.

Of these Commissioners there shall be at least two continued for three successive Years, but not for any longer Time; and touching the Election and Continuation of others, it shall be done as is customary in the other Banks and Chambers directed by Commissioners.

III.

The said Commissioners shall assemble daily to attend all the Affairs which may happen in Relation to the insolvent Funds or Estates.

IV.

When there are any insolvent Estates in the said City, or its Jurisdiction, either by Death, or Failure of some Person, and that it shall have come to the Knowledge of the said Commissioners, they shall immediately go with their Secretary, who shall be ordered thereto, and in their Presence, or others appointed thereto, exactly inventory all the Effects, and put them in good and safe Custody, to the Creditors' greater Advantage, and as they judge they ought to be; they shall also secure, without Delay, the Books and Papers appertaining to the said Estates.

The E  
shall give

## V.

The Effects being so inventoried and secured, with the Books and Papers, they shall give Order, that two or more Persons be appointed Trustees of the said Funds, who by Letters or Exports, if it is necessary, shall endeavour to secure all the Estates, Effects, and Debts, belonging to the said Funds, whether within or without the Jurisdiction of that City, or of this Country.

## VI.

This being done, there shall be let pass at least six Weeks, or more, at the Discretion of the Commissioners, without proceeding to the Sale of any of the Effects; but the same Time shall be left to the insolvent Person, or to the Relations of the deceased, to the End that in the said Space, they may find some Method to settle with the Creditors; nevertheless the said Trustees shall be using their Endeavours during that Time to recover whatsoever is due to the Insolvent, and to procure and promote the Creditors' Advantage.

## VII.

And to the End that in such Compositions every Thing be done in Order, all Merchants or others who have already failed, or become insolvent, or that shall hereafter fail or become insolvent, and their Heirs, may convoke or summon all their Creditors before the Chamber of the desolate Funds, by Citation of Bills fixed up, or by Letters of Advice to those who live without the District of this City; and that in Presence of the said Commissioners, or the greatest Part of them, they may, after a sincere Opening and Declaration of the State and Condition of their Stock, as also a true State of their Debts and Dues, undertake and draw up a Commission or Agreement, for the Payment of what they owe, totally, or in Part, in ready Money, or in such a Time, giving Security, as they are able, and that the Parties shall think reasonable.

## VIII.

And the Minority of the Creditors shall be obliged to follow and conform themselves to the Majority; the which shall be three Quarters of the Creditors for two Thirds of the Debt, or two Thirds of the Creditors for three Quarters of the Debt.

## IX.

But those who have Securities or Pledges, shall not be admitted to the Agreement; but only those who have been Securities, who alone shall have a personal Action for their Indemnity, and the same Right, and of the same Nature with personal Creditors.

## X.

All those who pretend to be Creditors of an insolvent Estate, shall also be obliged to justify their Debts before the Commissioners of the desolate Funds, who in Case of Dispute shall determine it, whether the Failed has agreed or not.

## XI.

No Agreement begun between the Failed, or anyone on his Part, and the Creditors shall be made nor concluded, but with the said Commissioners' Consent.

## XII.

The Agreement between the Insolvents, or their Heirs, on the one Part, and their Creditors on the other, being made under sufficient Security, and signed by  
the

the Creditors, or the greatest Part of them; the Parties agreed, and their Effects, shall be discharged from the said Chamber, and restored to their former Liberty, to trade, receive, and pay, in the same Manner as before their Failure, after paying the said Commissioners all the Expences occasioned on Account of their said Affairs, at their Discretion; so that in the mean Time they shall not satisfy any one of their Creditors to the Prejudice of the others, under Penalty of forfeiting the said Agreement:

## XIII.

And the Failed and his Securities shall be obliged to furnish and put into the said Commissioners' Hands, as soon as the Agreement shall have been passed as aforesaid, on the Day and on the Terms therein contained, for the Security and Advantage of the Creditors, the Sums they shall have promised, *pro rata*, of what they owe, to the End that the said Creditors may receive their Sum from the said Commissioners when they shall come to sign the Agreement.

## XIV.

Nevertheless, if it is found that the Insolvent or his Heirs have acted knavishly and fraudulently, in, or after making the Composition, either by having hid his Books, Letters, or Papers, removed their Effects, Merchandises, or Debts, conveying them away to defraud their Creditors; or that they have underhand agreed with some one of the Creditors on other Conditions: Such shall not only have their Agreement set aside, but shall be corrected and punished according as the Case requires.

## XV.

And those who shall pretend to be, and make themselves pass for Creditors, without being so, by an Understanding with the Insolvents, or from their own Motive, against their Knowledge, or that demand a greater Sum than their Due, in order to wrong the Creditors, and Benefit the Insolvent, they shall be punished as Cheats, and besides be condemned to pay, as their own Debt, all the Creditors.

## XVI.

The aforesaid Time of six Weeks, or more, at the Commissioners' Discretion, being past, without their having been able to mediate an Agreement, the Trustees shall proceed directly to the Sale of the Effects, as well moveable as immoveable, as also the Stocks and Credits, provided that the Immoveables are not sold without the Consent of the Echevins, and between the 1st of *November*, and the 2d of *February, dans les douze Nuits*. But the Merchandizes, Furniture, and other Effects, may be sold publickly, and at Auction, at the Discretion of the said Commissioners, without Prejudice to the Rights of the Secretaries and Keeper. But in Case there should be among the Effects some Merchandize, which it should be thought proper to keep for some Time unsold, either upon Account of an apparent Rise or Price, or for some other Reason alledged by the Trustees to the Commissioners, then the Sale of the said Merchandize, may be retarded for some Time, but not otherwise.

## XVII.

All this being performed, the Commissioners shall appoint a Day for their Sitting on the Acts of Preference and Concurrence, by which Day all the known Creditors inhabiting this City shall be summoned by the usual Citation, those Abroad by Letters of Advice, and the unknown by Bills fixed up; with a convenient Interval of Time, to the End that on the said Day they may come to give in their Names and their Acts of Pretension, whether they be for a Preference or Concurrence.

## XVIII.

The fixed Day being come, the Commissioners shall first proceed to examine the Debt, and the Preference of every one of the Creditors present, who shall endeavour to agree on this Subject: If this cannot be done, the Creditors, who cannot agree together, shall each be ordered to deliver into the Commissioners' Hands, in the Space of fourteen Days, according to the State of Affairs, a distinct Demand, with the necessary Pieces and Documents properly inventoried, on Penalty, that if, in the aforesaid Time, any one shall be found that has not furnished the said Demand, he shall be held and regarded as desisting from his Pretension, and Right shall only be made on the Demand, and on the Evidences delivered by the other Pretenders: Those also, who in the said fourteen Days have furnished their Instruments and Proofs, may demand, in other fourteen Days after, a Copy of the Pretensions and Deeds of every one of those who have produced them, to the End that in other fourteen Days following, they may write to debate and contradict, without allowing any longer Time for it; but after the said Time of twice fourteen Days, the Thing shall be held to be in a Condition to be judged, and the Commissioners shall decree upon the Instruments which shall be till then delivered.

## XIX.

The Preference being regulated and determined, those who think themselves aggrieved thereby, may appeal in ten Days after the Publication, or after they have had Knowledge of it, to the *Ejfebevis*, in Conformity with the thirteenth Article of the eighteenth Chapter of the Ordinance, and the Instruments shall remain in the Secretary's Hands until the said Time is past, or till the Appeal is renounced; so that the Impetrant, or Petitioner, must, after having received Appointment from the Auditor, dispose so, that they be put, all perfect and concluded, in ten Days after the Demand, into the *Ejfebevis*'s Hand, to be adjudged *ex iisdem actis* A BENE VEL MALE, under Penalty of a Nonsuit, or dropping the Appeal; and the Sentence of the *Ejfebevis* shall be provisionally executed, without Diminution, and without Prejudice of more ample Pleadings.

## XX.

The Commissioners shall afterwards proceed to a Repartition, without attending that all the Money be fallen due or come in; but those who are to be preferred to others shall be admitted, in Order to receive their Debt, on giving an Acquittance and Security, or else on receiving it from the Hands of the Commissioners, according to the State of the Affairs of the Effects; and the remaining Money shall be distributed and paid to the other Creditors *pro rata*, under a parallel Security, which shall be given in the Secretary's Office. Nevertheless the Creditors, who in Right, as shall be found in the Sequel, ought to be first, as also those who have not been able to learn the Settling of the Preference and Concurrence soon enough, may demand a fresh Day to appear in, to the End that they may be heard, at their Expense, on the Preference and Concurrence.

## XXI.

If a Tenant of any House he inhabits, happens to fail between the Month of *May* and the first of *December*, in this Case the Proprietor, or he that let the House, shall retake it for the Years the Lease has yet to run, and so discharge the Estate; so that he shall only have the Right of Preference upon the Effects which shall be found in Kind in the House, for the Hire of the current and preceding Year, and for no longer; and for what might be due to him before that Time, he shall equally concur with the other Creditors.

## XXII.

But the Failure happening between the first of *December* and the Month of *May* following, the Rent shall remain for Account of the desolate Funds for a Year, commencing from the Month of *May*, except the Proprietor shall think proper to retake upon him the said House for the said Year.

## XXIII.

And as the Advantage of the Creditors consists in having the Affairs of an Estate soon finished, and that honest Men may have their own the soonest possible, the Creditors that would prove their Debts, or that would reclaim some Effects from the Estate as their Property, shall henceforth proceed in the first Instance before the said Commissioners in the following Forms against the Trustees, who in this Case shall be Defendants, and who on the contrary shall proceed as Plaintiffs against those who shall be found to be Debtors, or responsible to the Estate.

## XXIV.

The Creditors who would prove their Debts, and all others reclaiming any Effects of the Estate, as their own, shall be obliged to enter their Action against the Trustees in the Time, or at latest before the Sitting for the Preference and Concurrence, and before the Sale and Removal of the said Effects; and to this End they shall appoint the Trustees three Days before by sending them their Demands with the Citation, as also a Copy of all the Instruments and Papers of which they intend to make Use; and in Case the Plaintiffs do not appear on the Day appointed, they shall be nonsuited, and the Instance discharged with Condemnation of Charges, which the Plaintiffs shall pay before they can make a new Instance.

## XXV.

But if any one has arrested the Effects, which he maintains to be his, he shall be obliged to cite the Trustee within the third Day of the Arrest, and to establish his action under Penalty of a nonsuit.

## XXVI.

The Trustees being cited or appointed as before, and not appearing, there shall be Default against them; and on having a second Citation, and not appearing, the Commissioners shall judge upon the Demands and Papers of the Party appearing alone, and those summoned shall be condemned to the Expence of the Process, *propter contumaciam*.

## XXVII.

The Parties summoned appearing, the Cause must be pleaded and determined forthwith, without giving or taking a Day to reply, except some strong Reasons induce the Commissioners to permit it.

## XXVIII.

If the Trustees summon any one in the Manner aforesaid, and afterwards they do not appear themselves, they shall be nonsuited; with the same Advantages to the person summoned as is before mentioned; and in this Case the Trustees shall be obliged to pay the Expence out of their own Pockets.

But the

## XXIX.

But the Parties summoned not appearing, the first Default shall be granted, with a second Citation for the Week following, and on Non-appearance the second Time, the Citation being duly made, a second Default shall be granted, with a provisional Assignment, and a third Citation to see to change the Assignment into a definitive Condemnation, or to establish a Right in some other Manner.

## XXX.

But if the Parties summoned appear, they may conclude and finish their Cause in Pleading, or take a Day in the following Week, on which Day the Cause coming again to be considered, it must of Necessity be then determined and concluded, if the Commissioners have not Reason to order otherwise.

## XXXI.

The Trustees having arrested any Person or Effects, shall be obliged, at the Instance of the arrested or interested Person, to bring the Prosecution in three Days before the Commissioners, to make their Demand and join Issue; upon which, the Person arrested or interested must answer, or that he takes a Day to do it, without derogating from the provisional Determination, under Security, if the Thing is found to be so disposed; but the Person arrested or interested, not making any Prosecution, the Arrest shall be brought back and prosecuted the next *Vierſubar*, according to Custom.

## XXXII.

The Cause being prepared and pleaded, the Commissioners shall dispose of the Provision, or Principal, according to the State wherein it is found, and if either the one or the other Party will appeal, the Cause shall be carried and prosecuted before the *Eſchevins*, on the *Rolle Privilegié*, privileged List or Catalogue, who shall determine it, and the Execution shall be done by Provision, without Prejudice of more particular Pleadings.

## XXXIII.

The Creditors of any insolvent Funds, being discontented with the Proceedings and bad Management of the Trustees, may make their Complaints to the said Commissioners, who shall cite the Trustees, hear them, and settle Affairs; proceeding according to the Exigency of the Case.

## XXXIV.

The Persons whom the said Commissioners shall establish Trustees of the insolvent Estates, shall be obliged to give them sufficient Security for all their Administration, at the Discretion of the said Commissioners, that they may have Recourse against the Securities, in Case of any Misdemeanor of the Trustees, unless these latter were elected from among the Creditors.

## XXXV.

The Trustees, or Assignees from among the Creditors, having received any Money belonging to the Estate, must not keep it with them, but shall immediately deliver it to the said Commissioners.

## XXXVI.

## XXXVI.

And those who shall be called or advertised, shall be obliged to appear not only at the End of their Administration, but at all Times, before the said Commissioners, to give in their Accounts and Proofs; and being called for this Purpose, they shall be obliged to appear on the first Order, on Pain of three Guilders Mult if they have a second Summons, and of six Guilders at the third; and if notwithstanding they fail to appear, and do not give in any Account, they shall be called a fourth Time on Penalty of Imprisonment, after that the said Commissioners have communicated it to the *Etschevins*.

## XXXVII.

And at the End of the Trustees' Administration, when the Commissioners shall discharge them from their Trusteeship, they shall grant them what they think proper for their Trouble.

## XXXVIII.

Any one of this City or its Jurisdiction, being desirous to make a Cession of his Effects, the said Commissioners shall provisionally put them in Security, under the Care of the Persons whom they shall establish for that Purpose, as soon as the Letters of Cession shall have been delivered to the Creditors, and they shall have enquired about the Validity of the Cession, to the End that they may give Advice to the *Etschevins*.

## XXXIX.

And to prevent as much as is possible, all the Abuses and bad Practices which are daily perpetrated by many Persons, in the Petition and Solicitation of the Letters of the Burgo-Masters of this City, to the noble, high, and mighty Lords the States of *Holland*, to obtain the *Safety of the Body*, and the Continuation of it; the said Commissioners shall make an exact information of the State and Condition of the Premises, to let the Burgo-Masters know it, and to serve them for Information and Advice.

## XL.

Any one being summoned, he shall be obliged to appear before the Commissioners, and in Default shall pay six Stivers Mult for the first Time, twelve Stivers for the second, and twenty-four Stivers for the third; after which the said Commissioners shall acquaint the *Etschevins* with it, and send to fetch the Persons by one of their Substitutes.

The Remainder of this Ordinance relates only to the Government of the Clerks and Trustees belonging to the said Chamber, and is immaterial to this Discourse. The Laws concerning Bankrupts being but few, and generally ill observed in other Countries, I shall not enlarge on this Subject.

---

OF THE  
GENERAL COMMERCE  
OF THE  
WORLD.

THE Commerce of the Ancients was at first carried on by Barter, which still subsists even in several Parts, though of the most uncultivated ones, of *Europe*; as in *Siberia*, and the *Danish* and *Muscovite Laplands*; and it was but in the last Century, that the *English*, *French*, and *Dutch* Traders first carried their Merchandize to *Archangel*, and there trucked them with the *Russians*, for the Products of that vast Empire. Many Nations on the Coast of *Africa*, almost all of *America*, and some of *Asia*, have preserved this Method of giving what is superfluous to them, for that which they have not, or at least not in Plenty.

It is not precisely known when *Commerce* commenced by Purchase and Sales, or when it began to make Use of Gold, Silver, or Copper Money; as the first Species were those of Wood, Leather, and Iron; and even at this Day a certain Value is fixed on different Shells and Cocoa-Nuts in several Parts of both *Indies*, and given in Payment of such Merchandize, Drugs, and Commodities as they want.

The oldest Examples found of this Commerce in the Sacred History are in the Time of the Patriarch *Abraham*; profane Authors place the *Epocha* under the Reigns of *Saturn* and *Janus* in *Italy*; and the ancient *Gauls*, as *Julius Caesar* reports in his *Commentaries*, attribute the Invention to the God *Mercury*.

The *Egyptians*, *Phenicians*, and *Cartaginians*, are cited as the first, ablest, and most daring Traders of Antiquity, by many great Authors; but being contested by others, the Reader is referred, for their different Sentiments, to the historical Preface.

And it did not appear to the Ancients, that an Application to Commerce was unworthy the Attention of the most illustrious Persons; even *Solomon*, that sage and powerful Monarch, did not disdain an Engagement therein, but often, as before mentioned, joined his Merchant Fleets with those of the King of *Tyre*, in a Voyage to *Ophir*, from whence they brought him those precious Metals and Commodities as rendered him, though governing but a small State, the richest Prince in the World.

Under the *Assatick* and *Grecian* Monarchies, Ancient History discovers to us, from Time to Time, the Traces of a Commerce cultivated by different Nations, though it seems principally to have flourished under the *Roman* Government; and one may judge, by the Testimony of Historians, and that of antique Inscriptions, how many considerable Colleges, or Companies of Merchants, were established in different Cities. The Destruction of the *Roman* Empire by the Irruption of a Multitude of barbarous Nations, affected Commerce by suspending its ordinary Operations for a Time; but it afterwards revived, and by little and little made a new Progress, more especially in *Italy*.

It was from thence that the *Pisians*, *Genoese*, and *Venetians*, whose numerous Fleets spread themselves in all the Ports of the *Levant* and *Egypt*, to load Silk,

Spices, and other Merchandises of those Countries, which for a long Time possessed the almost sole Distribution of them to *France*, *Germany*, and the other States of *Europe*.

About the End of the fifteenth Century, the greatest Part of this Traffick passed from them to the *Portuguese*, after these latter had opened a new Navigation in the Ocean, and were established in divers Parts on the Coasts of *Africa*, *India*, and *Arabia*.

The *Portuguese* did not possess these different Branches of Commerce for above an hundred Years, or thereabouts; for the *Dutch*, at the Beginning of the seventeenth Century, shared them with them, and very soon after stripped them of them almost entirely.

The *English*, *French*, *Danes*, and even the *Hamburgers*, excited by the Example of their Success, made also some Establishments in the *Indies*, and on the Coasts of *Africa*, though much less considerable ones, excepting those of the *English*, who have a very extensive Commerce in those Parts.

In fine, *America*, which the *Spaniards* discovered a little While after the *Portuguese* had secured a Way to the *East* by the *Cape of Good Hope*, became a fresh Object of a vast and important Trade to all the Nations of *Europe*, though it is true, that the first Conquerors of this New World have always possessed the best and richest Part of it, and preserve the Traffick to themselves with an extreme Jealousy; but besides that the *English*, *French*, *Portuguese*, and *Dutch*, have many flourishing Colonies, as well among the Islands as on the Continent, it is certain that it is, though undesignedly, full as much for other Nations as for themselves, that the *Spaniards* send their Flota or Galleons yearly to load the Treasure of *Mexico* and *Peru*.

Commerce is a Profession, in general, not less honourable than profitable, and is at present divided into that by Land and by Sea, in Gross and by Retail, for which every Country furnishes something peculiar to itself; as the various States, or even the different Provinces of them, have neither one Sun nor Clime equally suited to all Sorts of natural Productions; besides, the Diversity of Men's Genius, and Humour in general, and of Nations in particular, influences their Application to some Sorts of Works and Employs rather than to others; so that a mutual Communication becomes necessary by the Intervention of Commerce, that what is wanting to some, may by this Means be supplied by others; and it is of no small Consequence to those who embrace the mercantile Profession, to inform themselves exactly of what is to be found among their Neighbours, as well as to make themselves perfectly well acquainted with the Products and Manufactures of their own Country. But not to enlarge on the Merchant's Qualifications, which I have already spoke to, I shall proceed to open to him the promised Scene for Practice, and begin, as it is natural, with the Trade of my own Country, the Extent and Value of which may claim this Preference, at least from an *English* Author.

The united Trade of *England*, *Wales*, *Scotland*, and *Ireland*, does jointly contribute to form that considerable Commerce which the Subjects of the *British* Crown carry on, whether domestick or foreign.

ENGLAND.

The commodious Situation of our Country, both for long and short Voyages; the many excellent Ports proper for the Construction of an infinite Number of Vessels built there; the Ability and Intrepidity of our Pilots and Sailors; a Soil fertile in Fruits, Corn, and Pasturage; our Hills enclosing Diversities of Metals, and Minerals; Cattle of all Sorts; and more especially the Sheep producing those precious Wools, of whose Exportation we are justly so jealous; Manufactures of almost every Species, and the greatest Part of them superior to those of other Countries; our Colonies in *America*, and our Settlements so rich and flourishing in the *East Indies*, give us at least as much as to any other Nation, wherein to prove our Genius for Trade, and demonstrate that we have not been idle in it.

*Voltaire*, in his tenth Letter concerning the *English*, says, that Trade which has enriched them, has contributed to make them free; and that this Freedom has in its Turn extended their Commerce.

This proves that the fundamental Maxim of our Country is a very just one, viz. that Trade is the Nursery of Sailors, that Sailors are the Soul of the Navy, that the Navy is the Security of Commerce, and that these two united produce the Riches, Power, and Glory of *Great-Britain*.

Under *Henry* the VIIIth, the Trade and Navigation of these Kingdoms began considerably to augment, and has since always gone on increasing. We then engaged in a considerable Commerce to the *Levant*, and made frequent Voyages to *Guinea* and *Brazil*; but the *English* were not sensible of what they were capable in commercial Affairs, till towards the Middle of *Queen Elizabeth's* Reign, whose Protection and Encouragement animated her Subjects to the Formation of different Trading Companies, and the Establishment of divers Manufactures in her Capital, on the Ruins of those of the *Low Countries*, which rendered the Traffick of *England* so flourishing as to have it soon carried to *Archangel*, and extended to all the Ports of the *Mediterranean*. It also reached the richest Coasts of *Africk*, as well as the *East* and *West-Indies*, and there took such a deep Root, and was settled on such solid Foundations, as to remain immoveable, and to stand in less Need of Aggrandisements, than of Moderation.

Although our domestic Trade is very considerable, and of great Advantage to the Inhabitants, the foreign vastly exceeds it; and it is not because that *England* cannot subsist without it, Providence having abundantly blessed us with every Necessary of Life, but as foreign Trade occasions an Employ for all Sorts of Artists, furnishes Work for the Poor, and augments our Manufactures, proving an efficacious Means of enriching the Nation, strengthening the State, and rendering it formidable to the neighbouring Powers, that we are animated to engage so deeply in it.

It is for this that the *English* extend their Traffick to all Parts of the World where any is carried on; and there is no Nation under the Sun that drives so great a Trade with their own Products and Merchandizes. This renders us powerful in our Marine, augments the Number of our Sailors, enriches our People, and procures us all that the Universe can furnish to satisfy the Imagination, or content the Appetite. In a Word, it is by foreign Trade that *England* is become the Support of its Friends, and the Terror of its Enemies; and whilst the Commerce of our Neighbours, the *Dutch*, consists chiefly in the Transportation of Merchandizes, not their own, from one Country to another, our's is principally furnished and supported by the redundant Products of our Soil and Industry.

Our Commerce, like that of all other Kingdoms, is composed of Inland and Maritime, though with great Difference in Regard to the Profits it leaves, as our foreign Trade certainly exceeds that of any other State in the World, in the three Articles of which it consists, viz. Exportation, Transportation, and Importation; *France* can pretend to little more than the First of these; *Spain*, *Italy*, and the two Northern Crowns, to the First and Third; and *Holland* only vies with us in the Second.

OUR Country furnishes the exporting Branch of Commerce with Butter, <sup>Exportation.</sup> Corn, Cattle, Cloth, and many other Woolen and Cotton Manufactures, Iron, Lead, Tin, Copper, Leather, Copperas, Coal, Allum, Saffron, &c. besides a Variety of Fabrications of Lincens, Steel, Paper, Crockery, and other Articles of modern Invention and Improvement.

The neighbouring Kingdoms have many Times owed their Preservation to our Supplies of Corn, and our Horses are generally esteemed for their Beauty, Strength, and Paces; neither our own Fleets, nor those of any Strangers at Amity with *Great-Britain*, want any foreign Supplies for their Victualling, having Abundance of Beef, Pork, Biscuit, and fresh Provisions always ready, besides the vast Quantities carried to the *European* and *West-Indian* Markets.

Our Iron is exported, manufactured in Guns, Carcasses, Bombs, &c. and our Cloths and Woollens are sent to most Parts of the World, though not in those Quantities as formerly; many Princes having settled Manufactories of their own, to the no small Prejudice of our's; and the Value of our Exports in the Articles of Cloth, Northern Dozens, Rashes, Kerfies, Bays, Serges, Flannels, Perpetuances,

Says, Stuffs, Frieze, Pennistone, Stockings, Caps, Blankets, Rugs, &c. I fear does not exceed the two Millions *per Annum* that Dr. *D' Avenant* and Mr. *King* supposed some Years ago they amounted to; according to their Calculation, that the yearly Produce of Wool in *England* was about two Millions Sterling, and this worked up to produce in Exports eight Millions; of which they computed, six Millions for Home-Consumption, and the other two for Exportation.

The other Exports from hence, of Hops, Flax, Hemp, Hats, Shoes, Ale, Beer, Cyder, Herrings, Pilchards, Salmon, Oysters, Saffron, Liquorice, Optick Glasses, and Mathematical Instruments, Works of Horology, Ribbons, Toys, &c. are prodigious, and of a Value almost incredible.

The Vestments, Shoes, Hats, and Household Stuffs, carried from hence yearly, only to *America*, is supposed to be worth at least 200,000*l.*—This must amount to a much larger Sum since the Conquests from the *French* in *America*.

*England* produces yearly 5,000,000 Chaldrons of Sea-Coal, and the Mines would furnish much more if wanted, near a Million and a half Pounds of Tin, a thousand Fodders of Lead, eight hundred Furnaces of Iron, and as many Tons of Allum; of all which great Quantities are exported, to the Value at least of 500,000*l.* *per Annum*.

We transport also annually from our Plantations in *America*, besides what we consume ourselves, of Sugar, Indigo, Tobacco, Cocoa-Nuts, &c. about 400,000*l.* and our Fish, Pipe-staves, Mafts, Beaver, &c. from the Northern Parts do not produce a much less Sum.

It would be tedious and difficult to enumerate our Transportations and their Value from *Denmark*, *Sweden*, *Spain*, *Portugal*, and other Parts in the *Straits*, *Turkey*, *Guinea*, &c. but the most considerable of all is that of the Commodities brought from the *East Indies*, of which it is supposed of late Years, we have transported to the Value of 500,000*l.* *per Annum*, in Pepper, Salt-Ire, Callicoes, Mullins, Silks, Drugs, Diamonds, &c. after having retained a Sufficiency for our own Use and Consumption.

Importation.

THE Article of IMPORTATION, or the bringing hither such Goods as we consume among ourselves, is very great, though not equally advantageous from all Countries. But this will appear more evidently hereafter in the Statement of the Commerce carried on by *Great-Britain* with different foreign Nations. And that this Statement may be made with as much Accuracy as the Nature of the Subject, and the Secrecy of late Years so strictly observed by the Administrators of our commercial Affairs, will admit.—I shall divide it into two Branches; *Domestic Trade* and FOREIGN COMMERCE and under each give a general Sketch of what each County in *Great Britain* and *Ireland* furnishes towards, carrying on both; either by its natural Products or its Manufactures.

GREAT-BRITAIN was thought by the Ancients, to be the largest Island of the then known World; and though the latter discovered ones of *Madagascar* and *Japan* vie with, and by some are supposed to exceed it, yet the Uncertainty of their Dimensions still leaves a Doubt, whether the Magnitude of our Isle is not superior to them, and yet equal to what it was formerly accounted.

It was at first called *Albion*, and by the *Romans* *Britannia*, though I think the Etymology of both the Words is still unsettled.

The Situation of its Southern Part, *viz.* *England* and *Wales*, is between the 17th and 22d Degrees of Longitude, and the 50 and 56th Degrees of Northern Latitude; being in Shape triangular, and the longest Side from *Berwick* North, to the *Land's End* S. W. three hundred eighty-six Miles; from *Sandwich* E. to the *Land's End* W. by S. two hundred seventy-nine Miles; and the Perpendicular from *Berwick* to *Portsmouth* N. and S. three hundred and twenty Miles; containing by Computation about 39,938,800 Acres, and 1,219,932 Houses; is almost ten Times as big as the *United Netherlands*; less than *Italy* by near one Half, and in Comparison with *France*, is as thirty to eighty-two.

According to a Catalogue exhibited by *Camden* to King *James I.* it was parcelled out into 6,284 Parishes; but Mr. *Chamberlaine*, in his *Magna Britannia Notitia*, says, there are, in all, nine thousand nine hundred and thirteen Parishes, seven hundred and fifty great Towns, and twenty five Cities; though the anony-

mous Author of *The present State of Great-Britain* differs from both, by making the Cities to be twenty-eight, the Market Towns seven hundred and ninety, and the Parishes to be ten thousand six hundred and three.

The Counties in this District are fifty-two, forty in *England*, and twelve in *Wales*, whose Products ought now to be considered; but as our Wool and Woollens are the most staple Commodities of our Isle, and the Neglect or Abuse of those excellent Laws in Force concerning them has been so ineffectual to the keeping the one at home, and detrimental to the Sale of the other abroad, I should, previous to my said Intention, give some Account of the Statutes relating to the Cleansing, Paeking, Carding, &c. of the first, having at P. 78 and *seq.* done it for what regards its Running, and for the good Government of all Manufacturers and their Dependants, concerned in the latter; but as they are many and very extensive, it is impossible to reduce them within those small Bounds I have limited myself to for the Remainder of this Work, so must content myself with observing, that the Legislature's Care of these Particulars began very early; for though formerly the Exportation of Wool was not only licensed, but the principal Trade of this Country, and the greatest Branch of our King's Revenues yet as soon as we had learnt the manufacturing of it ourselves, and experienced the Advantages arising from this Improvement, by a comfortable Employ for our distressed Poor, and the Encrease of our Commerce, the Prohibition of its Export was judged necessary, and enforced by many good Laws, in Order to secure the Benefit to ourselves, and prevent other Nations from reaping it, as they had so long done to our Prejudice; the Statute therefore of 27 *Edw.* III. declared the Transporting it Felony, and many others in successive Princes' reigns have mitigated or enhanced the Penalties, as Circumstances and the Times have required; they have also guarded against Frauds and Abuses in the Combing, Spinning, Winding it, &c. that crept in, during its infant State; by several penal Laws to the guilty Transgressors of them.

In regard to Manufactured Wools, the *Acts* are still more ample and extensive, and regulate their Lengths, Breadths, Weights, &c. besides the many other Particulars necessary to be observed in their Fabrication, as conducive to their Perfection and Goodness. Abstracts of which have been given in their proper Place. I shall now begin my proposed Description of the Counties in the Manner following:

1. *Bedfordshire.*

THE Products of this County are principally consumed at Home, though it occasionally furnishes something for abroad, in Corn and Woollen Manufactures. Its Manufactures of Straw Hats, and other Things made of that Material, at *Dunstable* and *Luton*, and of Bone-Lace, employ several thousands of the Inhabitants, and are worn by Multitudes of the principal Ladies in *England*; Fullers Earth is found at *Woburn* and *Aspley*, and Butter made in many Places, and sent up fresh in Lumps to *London*.

2. *Berkshire*

Produces much more for Exportation than the preceeding County, as the Woollen Manufactures at *Reading*, *Farringdon*, *Newbury*, &c. are very considerable in Cloth, Druggets, Duroys, Serges, Shalloons, and Stuffs; and at the first of these Towns has been established for some Years past a most extensive Fabrick of Canvas, or Sail Cloth, which is brought to such Perfection as to equal in Goodness any that was formerly imported from *Holland* or *France*, to the no small Advantage of the neighbouring Poor, who in large Numbers are thereby employed. And whilst it so plentifully supplies the exporting Branch of Commerce, it is not barren in Products for Home Consumption, as it has Corn, Cattle, and Wood, especially Beech and Oak, in Abundance: This County, with *Gloucestershire* and *Wilts*, send yearly to *London* about six thousand Ton of Cheefe, the Half by Land Carriage, and the other Moiety by Barges, from *Lechlade*, *Abingdon*

*Abingdon, Newbury, and Reading, and in Return are furnished with Salt Butter in Firkins from that City to supply the Deficiency of their Dairies.*

### 3. Buckinghamshire

Affords but little for foreign Markets, as its sole Manufacture is of Bone-Lace at *Olney and Newport-Pagnell*; and its Products confined to Corn, Cattle, and Wool, except some lump Butter sent up fresh from hence, *Oxfordshire, Northamptonshire, Bedfordshire, Hertfordshire, and Essex*, and in Pots from *Derbyshire*, to *London*, in such Quantities as to amount in the whole at least to 100,000 Firkins per Annum, which are consumed within the Bills of Mortality.

### 4. Cambridgehire

Has no Manufacture except of Malt, Paper; and Baskets, but its Growth of Corn, Hops, and Saffron is very considerable, and the latter esteemed in Quality inferior to none. There is likewise found near *Sturbridge* very good Pipe and Potters Clay; and Cattle are plenty, though their Dairies produce no more Butter or Cheese than suffices for their own Consumption, as that Butter called *Cambridge Butter* receives its Denomination only by coming from thence, being first brought there from other Parts.

### 5. Cheshire;

So justly famous for its Cheese, of which, with *Lancashire, Part of Shropshire, and Staffordshire*, it sends up to *London* yearly above seven thousand Tons; all these are of a thick Make, yet very different in their Size and Quality, though all are without Distinction in Town called *Cheshire Cheeses*. These Counties, but more especially *Lancashire*, likewise sell great Quantities for *Leeds, Sheffield, York, and Newcastle*, besides what is consumed in *Manchester*, and shipped at *Liverpool* for *Scotland, the Straits, &c.* being not less than fifteen or twenty hundred Tons. *Nantwich, Middlewich, and Northwich*, afford large Quantities of Salt; *Macclesfield* is noted for its Fabrick of Buttons, as *Congleton* is for Gloves; Cattle are plenty, Corn not scarce; and in many Parts of the County are found Metals and Millstones. It has some Coal Mines, and Salt-Works.

### 6. Cornwall.

The hilly Part of this County appears unfruitful to the Eye, but encloses great Treasures in those seemingly barren Mountains; as there is yearly dug out of them an immense Quantity of Tin and Copper, both excellent in Quality; and the latter is found to be as good and as fit for every Purpose as the *Swedish*; or any other heretofore imported, and is as successfully used in all our Battery Works as any foreign was formerly; which induced the Government to encourage their Proprietors by laying a Duty some Years since upon all outlandish black Laten, and Metal prepared, which are Plates of Brass fitted for small Manufactures of the Clock, Kitchen, &c. And our Tin, as well in Quantity as Quality, greatly exceeds all other Mines that have been yet discovered, though they have been worked from Time immemorial, as we read that the *Phœnicians* drove a very considerable Trade in it, with the then Inhabitants; and the Plenty of the Mineral, having continued equal through so many Ages, seems to indicate the Stock to be inexhaustible, and will in all Probability last till the general Conflagration melts that and all Things in a Mass together: In the Interim, the Advantages it produces to the County, and indeed to the Nation, are very considerable, from the large Quantities exported; and for the better Regulation of a Business in which so great a Number of Men are employed, there are many ancient Laws in Force, first made, and Franchises granted by *Edw. I.* relating solely to them, by which they are incorporated in four Divisions, *viz. Foymore, Blackmore, Trewarnail, and Penwile*; in each of which stannary Courts are held, for the Decision of Disputes and

Correction of Irregularities, and sometimes Parliaments of the whole Society under the Lord Warden.—The Valleys are rich in Corn and Pasture, and its Seas afford almost all Sorts of Fish in the greatest Plenty, more especially Pilchards, taken on its Coasts at two different Seasons of the Year; and sometimes in such Abundance, that the Natives not having Salt sufficient for their Cure, make use of great Quantities to manure their Grounds, besides an annual Exportation commonly of fifty thousand Hogheads; and it is only in this County that I can remember to have seen or heard of any Conger being taken in *England*.

Here are some small Quantities of Quicksilver found in the Mines, and Slates sufficient to furnish every Demand for them. Tin, Copper, and Slates are exported to foreign Countries.

#### 7. *Cumberland.*

The Manufactures of this County are Rugs, Chair Seats, and Carpets in Imitation of *Turkey Work*, Pennifons, Half-thicks, Duffels, &c. At *Penrith* are made large Parcels of Leather, and from *Whitebaven* are shipped great Quantities of Salt and Coals: Copper is found in Plenty at *Newland* and *Keswick*, and at the latter there is black Lead; the only Place, as some say, though I believe erroneously, for it in *Europe*: Here are likewise good Lead Mines, and the plain Part of the Country produces Corn, as the hilly Part does Grass; the celebrated Fish Charr, is caught in its Meer called *Ulles Water*, which also borders on *Westmorland*, and no where else but in *Lancashire*, in *England*. Here in several Parts are good Dairies, and this, with *Northumberland*, sends up to *London* yearly about fifteen thousand Firkins of Butter, which are chiefly shipped at *Newcastle*, though some from *Blyth*; and these two Counties produce besides, between two and three thousand Firkins, which are sent directly into *Kent*. At *Carlisle* is a good Fabrick of fine Linen, in which about twenty-five Weavers are employed all the Year through; and large Parcels of Leather are also made in this City and Suburbs.

The *Ile of Man* lies about ten Leagues distant from this County, in the *Irish Sea*, but furnishes nothing for Trade.

#### 8. *Derbyshire.*

The Manufactures of this County are only woven Stockings of several Sorts, with some Felt, Castor, or Beaver Hats; it is very fertile in Corn and Cattle, sending a good deal of Pot Butter to *London*, as mentioned under *Buckinghamshire*; and jointly with *Nottinghamshire*, and Part of *Staffordshire*, about 2000 Ton of Cheese yearly; this is sent down the *Trent*, from *Burton*, &c. and the *Derwent*, from *Derby* to *Gainsborough* into the *Humber*; being of a thin Sort, and sold in *London* under the Denomination of *Warwickshire* Cheese.—Here are Quarries of Free-Stone and Marble, Abundance of Mill, Lime, and Whet-Stones, with some Chrystal and Alabaster, green and white Vitriol and Alum. Its Mines are stored with Coal, Iron, principally used by the Nailers, and in the small Manufactures in *Birmingham*, &c. and Lead, the latter being very plenty, and the best in *England*; the *Peak* is famous for producing it, and its other Wonders, as *Derby* is for Sir *Thomas Lombe's* Engines erected here on the River *Derwent*, for making organzined or thrown Silk, and for whose Introduction the Parliament in 1732 gave him 14,000*l*. It contains 26,586 Wheels, and 97,746 Movements, which works 73,726 Yards of Silk Thread every Time the Water-Wheel goes round, which is thrice in one Minute, and 318,496,320 Yards in the twenty-four Hours; one Water-Wheel gives Motion to all the other Wheels and Movements, of which any one may be stopped separately, which is very extraordinary in so complicated a Machine; one Fire Engine conveys warm air to every individual Part of it, and one Regulator governs the whole Work.

#### 9. *Devon-*

9. *Devonshire*

Affords many Things similar to the Products of its adjoining County, *Cornwall*, as Tin, Lead, Copper, Pilchards, &c. though not in the same Abundance; and though it is more fruitful than that, yet its Riches are the Effects of its Manufactures, which consists in Serges, Kerseys, Druggets, Shalloons, Long-Ells, &c. and Bone-Lace; so great a Quantity of the first is made in the Neighbourhood of *Exeter*, as to furnish the Market of that City with 10,000*l.* worth weekly; here are also made some Broad Cloth, mixt or Medleys, and from its Ports are sent more Fishermen to *America* than from any other County in *England*.

10. *Dorsetshire*

Is noted for its Beer, and yields great Plenty of Corn, Cattle, and Hemp, which latter was so abundant near *Bridport*, as to occasion, many Years ago, a Fabrick of Cables for the Royal Navy to be erected there. The Isles of *Portland* and *Purbeck* produce Free-Stone, Marble and Tobacco-Pipe Clay; and the Sheep bred in this County are innumerable, so that it is said, that within the Circumference of six Miles round the Town of *Dorchester* only, there are six hundred thousand constantly feeding. They are reckoned amongst the largest and best brought to the *London* Market, and scarce inferior to the *Baylead Downs* Mutton.

11. *Durham*

Produces great Quantities of Coals, shipped at *Sunderland*, some Lead, Iron, Allum, and Grindstones; at *Darlington* it has a Fabrick of various Stuffs, and sends yearly to *London* about ten thousand Firkins of Butter.

12. *Essex*

Is a very fertile County, and very abundant both in its Products and Manufactures; the former consisting in Cattle, Corn, and Hops, but principally in Oylsters and Saffron, of both which it produces a great Quantity, and the best of the Sort in the World; it is likewise famous for suckling Calves, and from whence the *London* Markets are principally supplied with this agreeable Food; some Cloths, Stuffs, and Perpets are made here, but its Fabricks for Baize are unequalled in any Part; and most of the Inhabitants of *Bocking*, *Braintree*, *Coggeshall*, *Chebmsford*, *Billerica*, *Bishop-Stortford*, *Waltham*, *Rumford*, *Halstead*, *Witbam*, and innumerable smaller but populous villages, are chiefly employed in sorting, oiling, combing, or otherwise preparing the Wool for the Looms, or manufacturing it.—At *Colchester* alone are made at this present from six to seven hundred Pieces of Baize Weekly, called therefrom *Colchester* Baize; and at *Bocking*, *Dunmore*, &c. about four hundred Pieces per Week of that Sort called *Bocking* Baize; extra of mock *Colchester*, which are not a few; and the former have been so much in Demand since the Peace with *Spain*, for whose Markets they are fittest, as the latter are for *Portugal*, as to occasion a Rise of ten Shillings per Piece in Price on the best Sort of them more than they usually went at before the War. A large Quantity of fresh Butter is sent to *London* from this County, and in Lieu thereof they take from thence, and from *Suffolk*, in Firkins, what suffices for their Consumption.

13. *Gloucestershire*

Brings Sundries both to the home and foreign Trade, as it plentifully produces Cattle, Wool, Iron, Steel, Corn, Cyder, Salmon, Bacon, and Cheese, of which latter it clubs its Share to make up the six thousand Tons mentioned in *Berkshire*; and its Wool from the Sheep of *Cotswold*, is the finest in *England*, and only inferior to that of *Andalusia*; they are likewise in such Quantities that even the Flocks, much less the Sheep, are hardly to be counted; from this Wool many plain white Cloths for Dying are made through all the County, as also Variety of worsted Stockings, besides Yarn knit Hoic. *Tewkesbury*, besides its woollen Fabricks,

Fabricks (which are very considerable) is famous for Mustard Balls, as *Stroud* is for its Fulling Mills and Scarlet Dye,

14. *Hamp or Hautshire*

Is also very abundant in Sheep, which furnish Wool for its many Fabricks of Shaloons, Kerseys and other Stuffs; its Products are Iron, Corn, and Timber, and is more particularly noted for the Excellency of its Honey and Bacon.

15. *Hart or Hertfordshire.*

The principal, and indeed almost the only Product of this County, is different Sorts of Corn, of which great Quantities are ground here into Meal, or made into Malt, and so sent to supply *London* Markets; Manufactures it has none; and what the Dairy affords of Butter is brought to Town fresh, and Salt Butter purchased on cheaper Terms in its Room, as is practised in all the Counties circumjacent to *London*.

16. *Herefordshire.*

*Leominster* (or *Lempster*) in this County is noted for its Woods, as *Kyneton* is for its Fabrick of narrow Cloths; its Product consists of Corn, Wool, Salmon, and Cyder, of which latter great Quantities are consumed both at home and abroad.

17. *Huntingdonshire*

Affords but little matter to treat of, as it is destitute of Manufactures, and its Products limited to Cattle and Corn.

18. *Kent.*

The sole Manufacture of this County I believe is Thread, except what is cast of its Iron into Cannon, Bullets, Furnaces, Pots, Boilers, Plate Iron, Bomb-shells, Hand-Grenades, &c. and its Products are, some Corn, Woad, Madder, Hops, Fullers-Earth, Iron, Burstone, Flax, and great Quantities of *Kentish* Cherries and Pippins.

19. *Lancaeshire,*

Being a County very fertile both in Wool and Flax, affords Employ for the Natives in large Manufactures of Cloths and Linens established there, of which the principal ones are at *Manchester*, *Bolton*, and their Vicinage, where are likewise made Rugs, *Turkey-work* Chairs, Pennistons, Duffels, &c. and at *Rochdale* and its Neighbourhood, as well as the aforementioned Towns, are also made Cottons and Fustians of various Sorts, Kerseys, Tickings, and, aboveall, large Quantities of Baize, in Imitation of *Bockings*, and shipped off directly for the *Portugal* Markets as such. Its Products are Rock Salt, some Black Lead, Charr, and Cannel Coal, which does not only serve for a delightful Fuel, but for making Utensils and Toys, as fine to look on as the highest polished Jet, and so free from leaving any Tinge, that the whitest Linen may be rubbed on it without receiving any Soil; this County and *Somersetshire* produce the largest Oxen in *England*, and its Dairies afford plenty of good Cheefe, as has been mentioned in the Description of *Cheshire*.

20. *Leicestershire*

Is famous for Sheep with the largest Wool in *England*, and though the Quantity of it is very great, yet it is here employed in no other Fabrick than that of a Variety of woven Stockings; besides which, their sole Manufacture is of Felt, Cutor, and Beaver Hats. Its Products are Sea Coal; and Beans and Peas abound here

here to a Proverb. It sends, jointly with *Warwickshire*, above five hundred Tons of Cheese by Land to *London*, and is supposed to produce above a thousand Tons more, sold to *Birmingham* and other large Towns, and sent into *Northamptonshire*, *Hertfordshire*, &c. besides two or three hundred Tons remitted from thence to *Sturbridge Fair*.

21. *Lincolnshire*,

Though one of the largest Counties, is destitute of any Manufacture, as the Inhabitants sell their Wool unwrought to their Neighbours, and principally employ themselves in the grazing Trade, and fattening Cattle, with which the *London Markets* are plentifully supplied; it also sends up annually, jointly with the Isle of *Ely*, from *Holbeich*, about twenty-five thousand Firkins of Butter, on the River *Cam*, to *Cambridge*, and from thence to *London* by Land Carriage; and there is likewise brought yearly in the same Manner to the said City from *Spalding* and *Peterborough* about two thousand Firkins, being the Produce of the Fens.

22. *Middlesex*,

In which is situated the celebrated City of *London*; and though it is the smallest County but four in *England*, it is certainly the richest and the most opulent in Trade, not only of this, but of every other Kingdom of *Europe*. This County has few Manufactures out of its Metropolis, though those of *Spital-fields*, &c. are very extensive, and brought to great Perfection; so that I may venture to assert, that our Artisans now equal if not exceed the *French* in the Beauty of their Silk Fabrick, and still continue their wonted Superiority in the Woollen ones; for though our Rivals can carry these cheaper to Market than we can, and consequently rob us of a considerable Share of that Trade we should otherwise possess alone, yet this does not proceed from any Defect in the Capacity of our Artificers, but from their working so much cheaper in that Kingdom, and the Neglect or Abuse, as formerly observed, in the working up our Woollens here, which calls for a strict Inspection and Regulation. This great City is in a Manner the Centre of both the inland and foreign Trade, and consequently the Transports to it by Land and Water are vast and inconceivable; the Concourse of Waggons, Horses, and other Carriages for the one, with Ships, Lighters, &c. for the other, continually coming in and going out, are innumerable, and must give a Foreigner a very exalted Idea of that Commerce which employs them.

23. *Monmouthshire*

Is one of those Counties that affords little worth Regard in Trade, as its only Manufacture is of Flannels at *Abergavenny*, and its Products nothing else but Cattle and Corn.

24. *Norfolk*

Has a justly celebrated Fabrick of all Sorts of Stuffs at *Norwich*, of which there is yearly sold to the Value of 100,000*l.* besides what the Manufacture of Stockings here and in other Parts of the County may import; its Products are Cattle, Corn, Wool, and Herrings, which latter abound like the Pilchards in the *Wesb*, and are taken in equal Quantities; so that commonly as many Barrels of these are shipped in a Year as there are Hogheads of the others; these employ a great Number of Hands in their Cure, so that in Catching, Salting, Smoaking, &c. the greatest Part of the Inhabitants of *Yarmouth* are engaged, and the Ships belonging to the Place find good Freights in carrying them abroad. This is a great Dairy County for Butter, making yearly about sixty thousand Firkins, which is sent weekly to *Downham* upon the River *Cam*, and so by Water to *Cambridge*, from whence it is carried by Land to *London*.

25. *Northamptonshire,*

Though one of the finest Counties in *England*, furnishes but very little for Trade, as it has no Manufactures but of Worsted and Yarn Stockings, and its Products consist of Corn, Cattle, Wool, Salt-petre, and some Butter sent up fresh and in Lumps to *London*, as has been already mentioned.

26. *Northumberland*

Is so abundant in Coals, that all *Europe* might be supplied from it; *Newcastle* sends yearly to *London* about six hundred thousand Chaldrons, and for their Conveyance keeps upwards of five hundred large Ships continually employed, to the no small Improvement of our Marine, as this dangerous Navigation proves a continual Fund of good Sailors, than which none are stouter nor better. Here are large mines also of Lead and Iron, which latter is of the same Nature with what comes from *Derbyshire*, and like that chiefly used by the Nailors, &c. Grindstones are found in some Parts; and the River *Tyne* is so abundant in Salmon, that great Quantities are pickled and shipped off from *Berwick* and *Newcastle* for foreign Markets: I have already said that this County, with *Cumberland*, sends about fifteen thousand Firkins of Butter to *London*, and between two and three thousand more into *Kent*, the former shipped at *Newcastle* and *Blyth*.

27. *Nottinghamshire*

Has no other Manufactures than some woven Stockings, but produces Corn and Coal in plenty, with some Lead. *Worksop* is noted for Liquorish; *Mansfield* for Malt; and near *Nottingham* is found Tobacco Pipe and Potters Clay. This Shire brews fine Ale in great Abundance, and clubs its *Quota* of the two thousand Ton of Cheese, mentioned in *Derbyshire*, to be shipped for *London*.

28. *Oxfordshire*

Can boast of no greater Manufactures than the preceding County; it has only one at *Witney* for Blankets; *Banbury* is noted for its fine Cheese, *Henley* for Malt, and *Burford* for Horse-Saddles. It is a very great Corn County, and one of those that plentifully supply *London* with fresh Butter of an excellent Quality.

29. *Rutlandshire*

Feeds an infinite Number of Sheep, whose Wool is said to partake of the Redness of the Soil, and these are the only Commodities of the County.

30. *Shropshire, or the County of Salop,*

Abounds in Corn, Coals, and Iron; has some Pipe and Potters Clay, and makes Flannels and plain white Cloths for Dying; the Fabricks of these are principally at *Shrewsbury*, where is also every *Thursday* a Market held for *Welch* Cottons, of which great Quantities are bought for *London*, and a large Quantity of excellent Cheese is likewise sent there, as hinted in the Description of *Cheshire*.

31. *Somersetshire.*

Few Counties produce so great a Variety, both for home and foreign Markets, as here is Corn in Plenty; Lead, Copper, Lapis Calaminaris, Crystal, Coals, and Wood for dying. The Oxen in this County equal in Size those of *Lincolnshire*, and the Sheep are as numerous as in *Dorsetshire, Wilts, &c.* which affords the Natives a sufficient Supply of Wools for their large Manufactures of almost all Sorts of Woollens, such as Broad Cloth, mixt, or Medleys, Serges, Druggets, Duroys, and Stuffs of many Denominations; Stockings, both Worsted and Yarn, Kerseys, Shaloons, &c. At *Cheddar* are made those celebrated Cheeses, which excel the *Parmesan*, to an unprejudiced Taste; and extra of these, this County with

Northamptonshire,

the northern Part of *Wiltshire* sends yearly to *Morden*, or *Magdalen Hill Fair* near *Winchester*, about fifteen hundred Tons, which is sold in one Day; this Fair is held annually on the 25th of *July*, and is the greatest for this Commodity in *England*.

### 32. *Staffordshire*

Produces Corn, Coals, Free-stone, Marble, Alabaſter, Copper, Lead, and Iron, of which latter, Nails, and other ſmall Wares are made: *Burton* is famous for its Ale; and this County does not contribute the ſmalleſt Share to the two thouſand Ton mentioned under *Derby* and *Nottinghamſhires* to be ſent to *London*, beſides what its Dairies furniſh for *Yorkſhire*, &c. as is obſerved in deſcribing *Cheſhire*.

### 33. *Suffolk*

Is a great Dairy County, and ſends yearly to *London* forty thouſand Firkins of Butter upon an Average, which is ſhipped at *Ipswich* and *Woodbridge*, and ſome few from *Aldborough*; beſides which it makes about ten thouſand Firkins more, that are ſold at *Colcheſter*, and other Parts of *Effex*. Of the Cheeſe it produces a thouſand Tons, a little more or leſs, is annually brought to Town, with which the Royal Navy is ſerved; ſome Part is ſold into *Kent* and *Suffex*, and the Reſt to Shipping, &c. as none is eat in *London*; a great deal is ſent direct, from hence to *Newcaſtle*, as ſome is alſo from that City. The Navy in Time of War takes yearly for Victualling from ten to twelve thouſand Firkins of Butter, and about five or ſix hundred Tons of *Suffolk* Cheeſe, though in Time of Peace the Conſumption is not above one Fourth of either: The Land Forces are fed with *Cheſhire*, *Warwick*, or *Glouceſterſhire* Cheeſe, of which between eighty and a hundred Ton was iſſued *per Annum* in the late War.—This County is very fruitful in Cattle, and feeds great Multitudes of Sheep, notwithstanding which the Conſumption of Wool is ſo great in its Fabriks, as to oblige the Manufacturers to ſeek an additional Supply from *Lincolnſhire*: Cloths are made at *Sudbury*, and Variety of Stuffs at *Stow Market*; alſo Says and Perpets, beſides large Parcels of Linen; and its Products are Corn, Hemp, and Fullers-Earth.

### 34. *Surrey*,

Being very barren in the Middle, affords but few Products or Manufactures, though it is ſaid that ſome Broad Cloth, mixt, or Medleys, are made at *Ryegate*, and ſome Kerſeys at *Guildford* and in its Neighbourhood. Iron is found of the ſame Quality with that of *Suffex*; and it is on a Hill near *Mickleham* that Box grows in greater Plenty than in any one Spot in *Europe* beſides.

### 35. *Suffex*

Yields great Quantities of Iron, chiefly uſed in Founderies for Cannons, Bombs, &c. and it has ſome Manufactories of Glaſs. Its Products are Cattle, Wool, and Corn, more eſpecially Oats, of which its Crops are incredibly great. The *Engliſh* Ortolan (or Wheat Ear) is peculiar to this County; and a *Suffex* Carp, *Arundel* Mullet, *Chicheſter* Lobſter, and an *Amerley* Trout, are ſo peculiarly noted for their Excellence, as to challenge a Remark in every Treatiſe on this Shire.

### 36. *Warwickſhire*

Feeds large Flocks of Sheep like thoſe of *Lincolnſhire*, though the greateſt Part of their Wool is ſold, and only ſo much retained as to manufacture ſome woven Stockings, and at *Coventry* Tammys, or *Coventry* Ware, and Plaiding; Hats of Felt, Caſtor, and Beaver, are alſo made here. *Birmingham* is famous for its curious Works in Iron and Steel, ſupplied by the Mines of this County, which alſo produces Coals, Corn, and Cheeſe in plenty. Of this latter, joined to what comes from *Leiceſterſhire*, above five hundred Tons are ſent yearly by Land to *London*, and ſome ſmall Quantities from hence by Barge to *Oxford* and *Abingdon*;

besides which these two Counties produce at least a thousand Tons, which is disposed of in the Manner mentioned under *Leicestershire*.

37. *Westmorland.*

The Products of this County are but few, though what the Soil denies is supplied by the Industry of the Natives; as at *Kendal* and *Kirby-Lonsdale* the Manufactures of Cloths, Druggets, Serges, Rugs, Penistons, Duffels, Cottons, Hats, and Stockings, are very considerable; so that notwithstanding its terrene Infertility, that of its Looms furnishes a very handsome Part, both to the home and foreign Trade.

38. *Wiltshire*

Being one of the principal Counties in *England* for the Woollen Manufactures, I shall here make a Summary of what I have said concerning them in the others; and in doing it, shall join some of the celebrated Mr. *Daniel De Foe's* Remarks on these Fabricks, in his *Complete English Tradesman*, to what Experience, and some other Authors have furnished me with.

This and the other large and populous Counties of *Somerset*, *Gloucester*, and *Devon*, have Manufactures so exceeding great as to employ above a Million of People in them; and this will appear to be far from an Exaggeration, if it is considered, that besides the populous Cities of *Exeter*, *Salisbury*, *Wells*, *Bath*, *Bristol*, and *Gloucester*, the largest Towns, and a greater Number of them than any other Part of *Great-Britain* can shew, and of which some exceed in Magnitude the great northern Towns of *Leeds*, *Wakefield*, *Sheffield*, &c. such as *Taunton*, *Devizes*, *Twerton*, *Credton*, *Bradford*, *Trowbridge*, *Westbury*, *Froom*, *Stroud*, *Biddesford*, *Barnstaple*, *Dartmouth*, *Bridgewater*, *Blandford*, *Wimbourn*, *Sherborn*, *Cirencester*, *Minehead*, *Pool*, *Weymouth*, *Dorchester*, *Honiton*, *Malmesbury*, *Warminster*, *Tedbury*, *Weybury*, and many others too numerous to be inserted, as they amount to about a hundred and twenty Market-Towns, and more than thirteen hundred Parishes, are all employed either in Spinning, Weaving, or some other preparatory Branch of the Woollen Manufactory; and notwithstanding the Assistance is so great, and the Hands so many, yet it is by some affirmed that they purchase yearly thirty thousand Packs of Wool, and twenty-five thousand Packs of Yarn ready spun from *Ireland*.

It has already occasionally been observed, that the interior or middle Parts of *England* do also supply their Share of Wool, as *Leicester*, *Northampton*, and *Warwickshires* feed a prodigious Number of large Sheep, like those of *Lincolnshire*, for the *London* Market, whose Wool being of an extraordinary long Staple, and exceeding fine, is carried, or the greatest Part of it, weekly, on *Tuesdays* and *Fridays*, to *Cirencester* Market, which borders on *Gloucestershire* and *Wilts*, being not less in Quantity than five hundred Packs per Week, and is there bought by the Combers, and Carders of *Tedbury*, *Malmesbury*, and most of the Towns on that Side of the aforesaid two Counties, extra of what the Clothiers purchase themselves, and distribute among the Poor of the neighbouring Parts for Spinning; which being performed, the Yarn is dispersed as far as *Froom*, *Warminster*, and *Taunton*, and so made to supply the Manufacturers of the West Country.

That Part of the *Leicestershire* Wool, which remains undisposed of in this Manner, is carried northward to *Wakefield*, *Leeds*, and *Halifax*, where it is mixt and worked up with the Wool of those Counties not esteemed in general so fine as the southern ones produce, though the Fleece from the Wolds, or Downs, in the *East Riding of Yorkshires*, and the Bishoprick of *Durham*, is an Exception to the above Remark, as it is very fine and of a good Staple, more especially from the Banks of the *Tees*, which are for a considerable Space of a rich Soil, and the Sheep deemed the largest in *England*: It is hither that all the best wool of the neighbouring Territories is brought; and the coarser Sort, with that from *Scotland*, carried into *Halifax*, *Reekdale*, *Bury*, and the manufacturing Towns of *Lancashire*, *Westmorland*, and *Cumberland*, and there employed in the coarser Fabricks of those Counties,

ties, as Kerseys, Half-thicks, Yarn Stockings, Duffels, Rugs, *Turkey-work* Cloths, and many other useful Manufactures, which those Parts abound in.

But it must not be understood from what I have here mentioned of the aforesaid Manufactures, that they are confined to the Places there quoted, as they flourish in many other Parts of the Kingdom, and are taken Notice of in the several Counties and Places where they are established. The Products of this Shire are, besides its Sheep and Wool, a little Fullers-Earth, many of the famous Rabbits of *Auburn Chafe*, and a large Quantity of Cheese, as mentioned under *Berkshire* and *Somersetshire*.

#### 39. *Worcestershire*

Is not among the Number of the most considerable Counties, either for Products or Manufactures; it abounds in Corn, Cattle, Cyder, and Perry; at *Droitwich* are Salt Works; at *Stowerbridge* those for Iron and Glass; Broad Cloth, mixt or Medleys, Frize, various Sorts of Stockings, &c. are made at *Worcester*; Stuffs for Hangings and Printing, with some Linsey Woolsey at *Kidderminster*, and Seamen's high crowned Caps, called *Monmouth Caps*, at *Bewdly*.

#### 40. *Yorkshire*,

The largest Shire in *England*, has a proportionable Share both of the foreign and home Trade of it, which it carries on from the several good Ports lying in the County: Its Products are various, according to the Difference of the Soil, which in so large a Tract must be much more fertile in some Parts than others. At *Wakefield* are Coals, at *Knareborough*, *Ripley*, and *Pontefract*; Liquorice. In the *North-Riding*, the Hills enclose Lead, Copper, and Pit Coal; in the *East-Riding* is Allum, and about *Sheffield* Iron, which is there wrought into various Cutlery Wares. At *Rippon*, *Leeds*, *Hullifax*, *Wakefield*, *Bradford*, and *Hathersfield*, are large Manufactories of broad and narrow Cloth, mixt, called Dozens, Kerseys, and some Shalloons; *Doncaster* is noted for Stockings, Gloves, and knit Waistcoats, as *Rippon* is for Spurs; and in several Parts are found Freestone, Fullers-Earth and jet. This is a great Dairy County, and sends a hundred thousand Firkins of Butter yearly to *London*, of which about fifteen thousand are shipped on the River *Tees*, from the Port of *Stockton*; fifty-five thousand is the average Quantity, one Year with another, brought into the City of *York*, and sent down the *Humber* in Keels, to be reshipped at *Hull*, and the remaining thirty thousand are sent from that Place, *Malton*, *Whitby*, and *Scarborough*. Among other Products of this County particularly, as well as others, that of Horses should not be forgot, which brings large Sums of Money into the Kingdom, there being few Princes in *Europe* who are not supplied from *England* with Saddle-Horses for their own Use, and for the Officers of their Armies.

This finishes the Counties in *England*; and I now proceed to those of *Wales*, of which the Commercial Description will be short, as they afford but very little towards the Support or Increase of Trade.

#### 1. *Anglesey*

Is an Island encompassed on all Sides by the *Irish* Sea, except on the S. E. where it is parted from *Caernarvonshire* by the River *Menay* or *Menia*; it produces Cattle and Corn in plenty, with good Store of Mill-Stones to grind it.

And within the last seven Years, a new Source of Wealth, highly profitable to the Individuals who are the Proprietors, and very beneficial to the Nation has sprung up from the Soil of this District, in the rich Mines of Copper which have been discovered, and wrought to such Perfection, that this valuable Manufacture in Plates, or what they call Sheets, for sheathing the Bottoms of Ships, and covering of Buildings in the Room of Slates is become a considerable Article of Exportation, and of Home-Consumption.

The Rivalry between the new *Anglesey* Copper Company, and that of the *Cornish* Miners, long since established, occasioned some sharp Contests and Ligations at

at first;

at first; but they are now happily subdued and a Union of Interests has taken place, to the Advantage of both.

2. *Brecknockshire,*

Like the preceding, affords Cattle and Corn, with some Otter Furr; and *Brecknock* hath a good Trade for Clothing.

3. *Cardiganshire,*

Besides the afore-mentioned Products of Corn and Cattle, has good Mines of Lead, some Copper, and a little Silver, though no Manufactures of any Sort.

4. *Caermarthenshire*

Affords more Plenty of all Things than the preceding Counties, as it abounds in Corn, Cattle, and Salmon; has Pits of Coal, and Mines of the best Lead; besides which the Dairying Business, having been greatly improved of late Years in *South-Wales*, but more especially in this Part of it, the Town of *Caermarthen*, is become the Staple for it, and from thence are shipped about fifteen thousand Firkins of Butter for *London* yearly.

5. *Caernarvonshire*

Has plenty of Cattle and Corn, though no other Commodities, nor any Manufactures for Trade; so shall pass on to

6. *Denbighshire,*

Which in many Parts is very fruitful, more especially in Rye, Goats, and Sheep. *Denbigh* is noted for Glovers and Tanners. Near *Moinglatb*, and in several other Parts, are good Lead Mines; and large Parcels of Flannels are sold at *Wrexham* Market, with Huckaback Linen to the Value of 500*l.* weekly: Blankets are also made in this Part of the Country, and some Stockings both of Worsted and Yarn.

7. *Flintshire.*

This County has plenty of Cattle, which affords the Inhabitants greater Quantity of Milk for their Dairies than is possessed by their Neighbours, and of which they make more Butter and Cheese than they want. Here is likewise Lead, Pit Coal, almost sufficient to supply *Dublin* Market; Mill Stones, and Honey enough to make good Store of *Metbeglin*, a Beverage which the Natives are very fond of.

8. *Glamorganshire,*

Of which the South Part is so fruitful as to be called the Garden of *Wales*, yet its Products are confined to Cattle and Corn, and the Natives' Attendance thereon is their sole Employ.

9. *Merionethshire*

Can boast only of Sheep for its Products, and wrought Cotton for its Manufactures; so that it affords nothing for Englargement in its Description.

10. *Montgomeryshire*

Is a delightful County, though noted for nothing but its Breed of Horses and Goats; so that like many other Shires of this Country it might be passed over unremarked, did not my proposed Method require the contrary.

11. *Pembrokeshire,*

Though a very pleasant County, and abounding with all the Necessaries of Life, brings nothing to Trade, except some of the largest Salmon in *Britain*, taken near

near *Cardigan*, in the River *Tyvy*, and consequently affords no Room for enlarging.

### 12. Radnorshire

Makes some Cheese, and breeds some Horses, with which it drives a small Trade, though hardly worth Regard.

To the preceding Account of *England* and *Wales*, I must add this Observation; that besides the Products and Manufactures therein mentioned, several of less Import are dispersed in many Parts of the different Counties, as of Tanners, Pot-*ters*, &c. which all together produce Commodities to a very considerable Value; More especially the Manufactures of Porcelain at *Bow*, *Chelsea*, and *Worcester*, the two latter for ornamental, and the former both for this, and useful China, which are brought to such Perfection, as in many Respects to equal, and in some to exceed, the original Fabricks of the *Indies*.

Having finished my promised Description of the Southern Part of *Great-Britain*, with Respect to its Products and Manufactures, my intended Method now leads me to do the same by the Northern Part called *Scotland*, which is bounded on the South by the *Irish* Sea and *England*, from which it is divided by *Solway* Firth, and the Rivers *Eske* and *Kerrow*, on the West Border, by the *Cheviot* Hills, in the middle Marches; and by the lower Parts of the River *Tweed* on the East Border. On the East it is bounded by the *German* Sea; on the North by the *Deucalidonian* Sea: and on the West by the great *Western* Ocean.

Its Situation is by some supposed to be from  $54^{\circ} 54'$  to  $58^{\circ} 32'$  of Latitude, and from  $158. 40'$  to  $17^{\circ} 50'$  of Longitude; though by *Stratboc's* Maps the Latitude is made to be from  $55^{\circ} 11'$  to  $59^{\circ} 20'$  and the Longitude from  $10^{\circ} 5'$  to  $16^{\circ} 0'$ .

Authors likewise differ as much about its Extent as they do in Regard to its Situation, though the Generality of them conclude it to be from the *Mull* of *Galloway* in the South, to *Dungsbayhead* in *Catbness*, North, about 215 *Scots* and 257 *Italian* Miles; and between *Buchaness*, on the East Sea, and *Ardnamurchan* Point on the West, near 140 *Scots* or 168 *Italian* Miles; and though it be thus long and broad, yet the Sea running up into the Land in some Places, and the Land thrusting out into the Sea in others, leaves no one House above forty or forty-five Miles distant from the latter.

The Division of it is into thirty-one Shires and two Stuardies, of which I shall briefly speak in alphabetical Order, and then give an Account of their Products and Manufacturers together.

### 1. Aberdeen.

This Shire is far from being unfruitful, as the Plains produce all Sorts of Corn, and the Mountains good Pasturage; the neighbouring Sea affords Plenty of Fish, and a sufficient Matter of Reproach to the Natives for their Negligence, in permitting the *Dutch*, for so many Years, uninterruptedly to reap those immense Gains they have done from these Coasts, without being animated by their Example, at least to Share the Profits with them, which I hope they will now be taught to do, by the Establishment lately made for this Purpose. Hitherto they have contented themselves with the Salmon, Trout, and Perch Fishery, in which the Rivers of this Shire abound almost to a Prodigy; and here are likewise found many Shells with Pearls of a large Size and good Colour. The Women in this County are noted for spinning a fine Linen Yarn, which they sell to the Fabricks of *Aberdeen* in great Quantities; and is there manufactured into Cloth of a very good Quality, as is also done at *Strathbogy*; large Parcels of worsted Stockings are also made here, and of these, some so fine, as have been sold for fourteen, twenty, and thirty Shillings a Pair. They pickle and pack in Barrels great Quantities of Pork for Exportation, as they do Meal and Corn; and indeed the Inhabitants of this City may justly be deemed universal Traders.

2. *Aire*

Contains the three great Bailiwicks of *Scotland*, viz. *Carrick*, *Kyle*, and *Cunningham*, which differ in the Fertility of their Soil, though none of them are barren: they produce Corn and Cattle, as the preceding Shire does, but not in such Plenty; and the Inhabitants, being an industrious People, are many of them employed by the Merchants of *Glasgow* and other Places, in their Herring Fishery. The River *Aire* abounds with Salmon and Trout; as *Lady-Isle*, about five Miles from the Town of *Aire*, does with Fowl and Rabbits; and from *Irwin* great Quantities of *Scotch* Coal are exported for *Ireland*.

3. *Argyle*.

This Shire is generally fitter for Pasture than Tillage, though it produces Corn in great Plenty; its Rivers afford Abundance of Salmon, as its Coasts do of Herring, Coal, and Whittings; *Lorn* is the pleasantest and most fruitful Part of it, and the Inhabitants are more given to Fishing and Hunting than to any Manufactures.

4. *Bamff*

Is very fertile, and the Generality of the Country well furnished with Grass and Corn, as the Rivers are with Salmon, of which here is a very advantageous Fishery. In *Balvenie* is found the Stone of which Allum is made; and near *Strathblya*, such a Quantity of those for Lime, that they build their houses with it, extra of what they sell, which brings in great Profit; as their Commerce of fat Cattle, and fine Linen, disposed of in their weekly Markets, does at the Village of *Keith*. In *Balvenie* there is a Rock of very good Whet-stones and Hones, sufficient to supply the whole Isle; and as they are so abundant, the Neighbours cover their Buildings with them instead of Slates.

5. *Berwick*

Was originally a *Scotch* Town, and has never to this Day been accounted any Part of *England*; it has divers Customs distinct from those of either Kingdom; and is privileged as a Place of Liberty of itself; it was formerly the chief Town of the *Merse*, or *March*, which is still called the Shire of *Berwick*.

This County is very fruitful in Corn and Grass, with the former of which and Salmon, *Berwick* carries on a great Commerce; as *Duns*, famous for the Birth of *John Duns Scotus*, does for a weekly Market for Cattle and other Things, so that it has the best Trade in this County.

6. *Butbe, Bute, Boot*

Is a small Island near the Coast of *Argyle*, about ten Miles long, and a Shire of itself, whose Sheriff has also under his Jurisdiction the Island of *Glotta* or *Arran*; both these Isles are tolerably fertile, and their Produce of the same Nature with that of the other *Western* Islands; *Bute* is besides famous for its Herring Fishery, as *Arran* is for the Salmon, taken in its several Rivers, and for the Herrings, Cod, and Whittings on its Coasts.

7. *Caitbness*

Being the northernmost Part of *Scotland*, and lying low on the Coasts, produces only Corn, though the Mountains abound with Sheep, Goats, and black Cattle; of which latter large Drovers are sent to *England*, and chiefly disposed of in the Counties of *Norfolk*, *Suffolk*, and *Essex*; it is supposed by some that Lead, Copper, and Iron, may be found in these Parts, though as yet no Mines have been opened of either; and whatever the Indications may be of these Riches, no one has hitherto attempted a Search after them, either through a Want of Faith or Funds, or both.

## 7 T

8. *Clack-*

## GENERAL COMMERCE OF THE WORLD.

8. *Clackmannan,*

Though but a small, is a fertile County, both in Corn and Pasturage, and likewise abounds in Salt, and produces more Coals than any Part in *North-Britain*, which are exported to *England, France, and Holland.*

9. *Cromartie*

Is a woody Country, and noted only for the Pearls found in the Waters of *Corron*; so pass on to

10. *Dumbrion or Dumbarton,*

Of which as little can be said, in Regard of its Products, as of the preceding County; the Lowlands yielding Corn, as the Uplands do Pasturage, besides which nothing is found here to promote Trade.

11. *Dumfries, with the Stewarty of Annandale.*

The Soil of this County is more suited for the Grazer than the Farmer, and a tolerable Trade is carried on by the Natives in Cows and Sheep. Near *Wacopdale* the People make Salt of Sea Sand, which is a little bitterish, supposed to proceed from the Nitre with which it is impregnated. *Dumfries* is a considerable trading Town, well filled with Merchants, as its Port is with Shipping, though the Woollen Manufacture that formerly flourished here is now decayed.

12. *Edinburgh, or Mid-Lothian.*

This Tract of Land is plentifully furnished with all Necessaries for Life, and some for Trade, as it produces Corn and Cattle of all Sorts, Abundance of Cod, Lime-stone, and Salt; and near the Water of *Leith* is a Mine of Copper. *Edinburgh*, the Capital of this Shire, and of *Scotland*, is a noble City, though built on a Spot incommodious for Trade, so that *Leith* is the Port to it, from whence, as may reasonably be supposed, a very great Traffick is carried on; though this might be vastly increased, had the Temper of the People led them to the Continuance and Establishment of Manufactures; but those they had before the Union are mostly laid aside, as the Inhabitants are more conveniently supplied since with all Sorts of Commodities from *England.*

13. *Elgin*

Takes its Name from the *Royal Burgh* so called, and is a very fruitful Part of the Country, as well in Corn as Cattle; *Leffie* may properly be called its Harbour, not lying far distant, and is a Place of good Business. At a Village called *Germach*, are annually pickled and exported from eighty to a hundred Laits of Salmon, all taken in the few Summer Months, and within the Space of a Mile.

14. *Fife*

Is an excellent Spot of Ground, abounding with Grain and Pasture, and in some Places with Lead Ore and Coal; its Seas are well filled with Fish, as well those guarded with Scale, as Shell. At *Dumfermline* is a Manufacture of Diaper and other Sorts of good Linen, which is the Sole Employ of its Inhabitants, and those of the neighbouring Towns.

15. *Forfar, or Angus,*

Has several Quarries of Free-stone and Slate, with which a good Trade is driven; near the Castle of *Inner Markie*, are Mines of Lead; and Iron Ore is found in Plenty near the Wood of *Dalbogne*. The higher Ground, called the *Brae*, supports Abundance of red and fallow Deer, with Roebucks, and Fowls; and the Salmon Fishery here is very considerable.

16. *Haddington.*

Contains *East Lothian*, which, like the other Part of *Lothian*, is a fine Country; the chief Towns are *Dunbar* and *Haddington*, of which the former had once a large Herring Fishery, where they cured them in the same Manner as at *Yarmouth*, though not with the same Perfection for their Preservation, so that this Business is now come to Decay; as has been the Fate of a considerable Woollen Manufacture that once flourished at *Haddington*, when, before the Union, *English* Cloth was prohibited in *Scotland*; but when that was once concluded, the Clothiers from *Worcester*, *Gloucester*, *Wilts*, *Somerset*, and *Devonshire*, poured in their Goods so fast, and underfold the *Scots* so much, as reduced them to a Necessity of quitting their Fabricks, for the greatest Part; and at this Place to content themselves with Spinning, Dying, and Weaving of another Sort.

17. *Inverness*

Abounds in Iron, and with it its necessary Concomitant, large Woods of Fir and Oak; other Parts of the Shire are very fertile; and at the Town of *Inverness*, there are Manufactures of Linen and Plaids, whose weekly Market is plentifully supplied with Butter, Cheese, and Goats Milk, though all very bad, and shamefully nasty in their Kinds; up the River is a very great Salmon Fishery, which, when cured, is embarked at this Town, being conveniently situated for Trade.

18. *Kincardin.*

This County is fruitful in Corn, Pasturage, and Timber, having above five Millions of Fir Trees, besides vast Numbers of many other Kinds, planted in less than a Century past. *Paldykirk* has an annual Fair, continuing three Days, where the principal Commodity sold is coarse Cloth, commonly transported to the *Netherlands*.

19. *Kinross*

Is a small Tract of Ground, in which there is nothing remarkable, but a Lough abounding with Pikes, Trouts, and all Sorts of Water-Fowl.

20. *Lanerk.*

The chief City of this Shire is *Glasgow*, and the best Emporium of the West of *Scotland*, though *Lanerk* is the County Town; the Country abounds with Coals, Peat, and Lime-stone, but most advantageously with the Lead Mines belonging to the *Earl of Hopton*, near which large Pieces of Gold have been found after hasty Showers, and Lapis Lazuli dug up without much Difficulty. *Glasgow* is, in Regard of its Trade and Grandeur, only inferior to *Edinburgh*, having a considerable Number of Merchants residing here, and no small Fleet of Ships belonging to them for executing their commercial Projects, as well in *America* as elsewhere. Their Share in the Herring Fishery brings great Advantages to the City, as they have a Method in their Cure that makes them equal to the *Dutch* ones; here are some Sugar-Bakehouses, a Manufacture for Plaids, and another for Muslins and various Linens, of which large Parcels are sent abroad.

21. *Linlithgow, or West-Lothian.*

This County in general abounds with Corn-Fields, Meadows, and green Hills, which afford Pasturage for large Flocks of Sheep and other Cattle; the Rivers and neighbouring Seas abound with Fish; and here is Plenty of Coals, for Fuel and Exportation; at *Preston Pans*, and elsewhere are made great Quantities of Salt. At *Linlithgow* is a large Manufacture of Linen, and the Water is experienced to be of such an extraordinary Nature for Bleaching, as to induce many People to bring their Linnen for Whiting here, to the no small Advantage of the Place.

22. *Nairn.*

The Soil of this County is fruitful and rich, the lower Part bearing Plenty of Corn, whilst the upper Parts flourish with Pastures fit to graze Cattle for fattening and the Pail; and indeed here is nothing wanting that any other Part of the Kingdom produces.

23. *Peebles, or Tweeddale;*

Enjoys a temperate Climate and a clear Air; its Mountains are clothed in a beautiful Verdure that affords Pasture for large Flocks of Sheep, bearing an excellent Wool, of which the greatest Part is sold into *England*; the Rivers abound with Salmon, and the Vallies near them are fruitful in Corn and Grass. Here are some Coal Mines, with Plenty of Turf for Fuel; and the Lake called *West-Water* produces such Quantities of Eels and other Fish, about *August*, that during a West Wind they shoot in such Shoals into a small River running from the Lake, as sometimes to overthrow the People who go in to catch them.

24. *Pertb*

Is very fruitful in Grain, more especially in that Part of it called *Gowry*, which is very remarkable for its noted Corn Fields, as the River *Keith* is for its fine Salmon Fishery. *Culrofi* is noted for its Trade in Coals, Salt, and Girdles. The *Ochil* Hills are said to abound with Metals and Minerals, particularly with good Copper, and *Lapis Calaminaris*, and at *Glen Lion* with Lead. At *Pertb*, the second Town in *Scotland* for Dignity, is so considerable a Manufacture for Linen, as to supply all the neighbouring Territory in some Branch of it; and as the *Tay* is navigable up to the Town for Ships of good Burthen, they here embark vast Quantities of it for *England*; this River also furnishes the Town with fine Salmon in prodigious Quantities, which is carried to *Edinburgh*, and other Parts where this Fish is wanting, besides barrelling up large Parcels for Exportation, as the Merchants of this Place carry on a very considerable foreign Trade.

25. *Renfrew.*

This is in general a more pleasant than fertile County, though it furnishes sufficient Necessaries for the Natives, and that Part bordering on the *Clyde* is very fruitful. At *Greenock* is the chief Seat of the *Western* Herring Fishery; and at *Paisly*, and for three Miles above it, in the River *Whitecart*, are found many Pearls esteemed for their Size and Beauty.

26. *Rosb.*

Is fertile in Corn, except toward the Shore next *Murray* Firth; though it abounds with Woods and Pasture, which furnishes Food for its numerous Herds of Cattle, Goats, and Deer. At *Loch-cw* great Quantities of Iron were formerly made, and a little farther North *Loch-Brien* runs into this County, and is celebrated for its noble yearly Fishery of Herrings, whose Quantities are inconceivable, except by Eye-witnesses of them: The Rivers of this County produce fine Pearls, and the District of *Tayn* is a very fruitful pleasant Country.

27. *Roxburgb,*

Fruitful in Corn and Pasturage, abounds also in Herds of Cattle of the best Breed in *Scotland*, both for Size and Goodness. *Kelso* is a Town of good Trade, as are several others in this County.

28. *Selkirk*

Produces but little Corn, the Country being fitter for the Grazing Trade than the Plow; and accordingly the Inhabitants principally subsist by it, as they raise and feed great Quantities of Cattle, which they send to *England* for Sale.

Is very fruitful of Sheep and as its Manufactures and proves enabled to

Though expected Goats, and Knag by the are sometimes Mines, Qu is Part of the yet is very a more especially Part of the and Sheep Sh

29. *Stirling, or Striveling*

Is very fertile both in Corn and Grass, which feeds and fattens large Flocks of Sheep and Black Cattle. Its Rivers very plentifully supply it with Salmon, as its Mines do with Peat and Coals; at *Stirling* there is a very considerable Manufacture of Serges and Shalloons, which in Make and Dye are very good, and proves a great Support to the poor People employed in it, as they are thereby enabled to live very comfortably.

30. *Sutherland, including Strathnavern*

Though a northern Province, is more fruitful in Corn and Pasturage than could be expected from its Situation; it abounds with Fish, Fowl, Sheep, black Cattle, Goats, and Deer; here is one Sort of Bird peculiar to the Country, which is called *Knag* by the Natives. This Shire abounds with Lakes and small Rivers, in which are sometimes found Pearls of great Value; as also in Silver, Iron, and Coal Mines, Quarries of Free-stone, &c. but all very much neglected: *Strathnavern* is Part of the County, and being very mountainous, produces but little Corn, yet is very abundant in all Sorts of Cattle, as its Lakes and Rivers are in Fish, more especially Salmon; they have Iron also here, and both this and the other Part of the Shire export very considerable Quantities of Salt Beef, Hides, Deer; and Sheep Skins, Tallow, Butter, Cheese, Cod, Salmon, Wool, &c.

31. *Wigtown*

Comprehends also the West Part of *Galloway*, which produces excellent Wool, and brilk hardy little Horses, called after the County, *Galloways*; the Rivers abound with Salmon, and both Parts having several good Harbours, they might carry on a much better Trade than they do, was the Industry of the Inhabitants correspondent with the Products of the Country.

Besides the thirty-one preceding Sherifdoms, which send Members to Parliament, there are two Stewarties, viz. *Kirkcudbright* and *Orkney*, the former being in its Products similar to *Wigtown*, just now mentioned (of which it is a Part;) though the latter is very different, and consists of the Isles of *Orkney* and *Sbetland*, which being many, their Soils are various, though in general they are fertile, notwithstanding they lie so far North, and are fruitful in Corn and Cattle. The Author of *The present State of Great-Britain*, says, that in *Pomona* (the largest of the *Orcaides*) there are several Mines of good white and black Lead, and that its Lakes and Rivulets abound with Salmon; Salt is made at *Sanda*, and from these Islands together are yearly exported large Quantities of Butter, Tallow, Hides, Barley, Malt, Oatmeal, Fish, salted Beet, Pork, Rabbit Skins, Otter Skins, white Salt, Stuffs, Stockings, Wool; Hams, Quills, Down, and Feathers. The Isles of *Sbetland* differ very much from the *Orkneys*, as they have but little Corn of their own Growth, so are obliged to import it from the others, though they have Abundance of Fish on their Coasts, and an equal plenty of Cattle on their Lands: They have Manufactures of coarse Cloths; Stockings, and knit Gloves for their own Use, and some they sell to the *Norwegians*.

And from this Description of the Products, and Manufactures of the different Shires may be collected, that *Scotland* furnishes to the trade of *Great-Britain* large Quantities of Wool, wrought, and unwrought; Hemp and Flax, crude and worked up into Lincens coarse and fine; Hollands, Cambricks, Muslins, Callicoes, Dornick, Damasks, &c. Plaids (in which they excel all Nations both in Fineness and Colours) Iron, Copper, and Lead both white and black; Pearls, Coral, and sometimes Ambergris; great Quantities of Fish, such as Whales, Herring, Salmon; Cod, Ling, Turbots, Mackarel, and sometimes Sturgeon; among these may also be reckoned Otters, as they are Amphibious Creatures, and produce a Wool which serves for various Uses. *Scotland* also affords Fullers-Earth, some Sperma Ceti (found on the Coast of the *Orcaides*) Coal, Marble, Agate, Crystal, &c. different Sorts of Grain, Cattle, Butter, Cheese, Timber, &c. of which some are sent to different Markets, as will be remarked when I speak of the Imports and Exports of this

Kingdom, which I shall do subsequent to the short Description I have to give of the Counties in *Ireland*, to which I am now led in the Prosecution of my Scheme.

**IRELAND.** *Ireland* is divided into four Provinces, *viz.* *Connaught*, *Leinster*, *Munster*, and *Ulster*; and these again subdivided into Counties, of which *Connaught* contains *Galway*, *Letrim*, *Mayo*, *Roscommon*, *Slego*, and *Thomond*; *Leinster* consists of *Catberlagh*, *Dublin*, *East-Meath*, *Kildare*, *Kilkenny*, *King's County*, *Longford*, *Queen's County*, *West-Meath*, *Wexford*, and *Wicklow*; *Munster* is composed of *Cork*, *Kerry*, *Limerick*, *Tipperary*, and *Waterford*; *Ulster* contains *Armagh*, *Antrim*, *Cavan*, *Down*, *Downgal*, *Fermanagh*, *Londouderry*, *Louth*, *Monaghan*, and *Tyrone*; of all which briefly and in Order.

#### 1. *Galway*

Is a County very fruitful to the Farmer, and not less advantageous to the Shepherd; its chief City is called after the County, and is a Place of great Trade, being finely situated for carrying it on, in a Harbour capable of containing a large Fleet of Ships, called the Bay of *Galway*.

#### 2. *Letrim*,

Though a very hilly Country, produces Plenty of a rank Sort of Grass, which feeds almost an infinite Number of Cattle, so that Grazing is here the principal and indeed almost sole Employ.

#### 3. *Mayo*.

A District very different from the preceding, as it is very fertile, and remarkably rich in Cattle and Deer, besides being celebrated for its producing a large Quantity of fine Honey.

#### 4. *Roscommon*,

Being a plain Country, is suited to the Plow, and with very little Labour becomes fruitful, and yieldeth Plenty of Corn.

#### 5. *Slego*,

Though not abounding in Grain, is a very plentiful County both for breeding and feeding Cattle; so that besides the Advantages arising from the fattening them, the Fleece and the Pail proclaim the Riches of the grazing and dairy Trade. *Slego* had in the Year 1723 eighteen Ships, with 880 Tons, belonging to its Port.

#### 6. *Thomond*

Is a very fruitful Soil, abounding both in Tillage and Pasturage; besides which it enjoys the Advantages of a commodious Situation for Trade and Navigation.

#### 7. *Catberlagh*.

This County enjoys a Diversity of Soil, all contributing as well to Pleasure as Profit; its terrene Fertility being blended with the advantageous Products of the Woods; and the Beauties of *Ceres* and *Faunus* contributing by their Contrast to form a delightful Landkip.

#### 8. *Dublin*

Produces Corn and Grass in Plenty, and consequently cannot be destitute of Cattle, though it is of Wood, so that the Fuel is only Peat dug here, and Coal brought from *Wales* and other Parts of *Great-Britain*. The City of *Dublin* is the Capital of *Ireland*, and esteemed the best built of any one in the three Kingdoms, next to *London*; it carries on a great Trade, has large Manufactures, and in the aforesaid Year 1723, had 1834 Vessels, with 90,758 Tons, appertaining to it.

#### 9. *East-*

9. *County of Dub*

Is a County very rich, pleafant, and populous, affording an Employ for the Grazier, Farmer, and Manufacturer, carrying on a good Trade, more efppecially from the chief Town of *Trim*.

10. *Kildare,*

Not unlike the preceding, being rich and abundant in all Neceffaries of Life, and furnifhing Sundries for Trade.

11. *Kilkenny,*

In Plenty of all Things, is inferiour to no other Part in this Kingdom; the chief City, bearing the County's Name is very large and ftrong, and the moft populous, rich, and beft trading inland Place in *Ireland*.

12. *King's-County*

Is a Spot not near fo fertile as fome others, and therefore affords but little to be laid in its Favour.

13. *Longford,*

Though a fmall, is a very rich and pleafant Country, abundant in Products, both for the home Confumption and Sale.

14. *Queen's-County.*

This is a poor County, full of Woods and Bogs, productive of very little Corn, though it is fomewhat more abundant in Cattle, to which its whole Riches are confined, with the Exception of what their Timber produces.

15. *Wefl-Meath*

Abounds in Plenty of all Things, and for Fertility and Populoufnefs is inferior to no County in this Kingdom, which enables it to furnifh Trade with feveral Commodities.

16. *Wexford,*

Like the preceding County is very fruitful, and produces Plenty of Corn and Grafs; it likewife abounds in Cattle; and *Wexford*, the Borough Town, was formerly reckoned the Chief City in all *Ireland*; and though it is not fo now, it yet continues a Place of good Trade, having a very commodious Haven at the Mouth of the River *Uren* or *Slany*, to which belonged, in 1723, twenty-one Ships, with 640 Tons.

17. *Wicklou*

Must neither be counted fertile, nor barren, being of a middling Nature, and confequently its Products do not greatly increafe or improve Commerce; its Port, of this Name, however had appertaining to it, in 1723, twenty-one Ships, with 799 Tons.

18. *Cork.*

It is, including *Defmond*, the largeft County in *Ireland*, though counted very wild and woody; it has feveral good Trading Towns, as *Youghill*, *Kinfale*, *Roffe*, *Baltimore*, but above all, the Capital of the County, *Cork*, which is a Place from whence great Exports are made, having a very Commodious Harbour, and being otherwife conveniently fituated for that Purpofe; it had, in the Year 1723, fix hundred and ninety Ships, with 36,526 Tons, belonging to it; *Youghill* fifty-one Ships, with 2153 Tons; *Kinfale* forty-four Ships, with 2214 Tons; *Roffe* twenty-feven Ships, with 1591 Tons; and *Baltimore* thirty-eight Ships, with 1193 Tons.

19. *Kerry*

Has its Mountains generally covered with Wood, and its Vallies enriched with Corn Fields; *Dingle* is the chief Town, well situated for Trade and Navigation, on a large Bay of the same Name, and the westernmost of any Note in all the Kingdom, and had, in the above-mentioned Year, appertaining to it, six Ships, with 288 Tons.

20. *Limerick*

Is a fertile Country and well inhabited, being mountainous towards the West, and the Rest plain. *Limerick*, the Capital, is an elegant, rich, and populous City, whose trade is very considerable; for though its Distance from the Sea is about fifty Miles, yet Ships of Burthen may come up to the very Walls, and in the aforesaid Year it had belonging to it seventy-one Vessels, with 3443 Tons.

21. *Tipperary*

Towards the South is exceeding fruitful, though the other Parts of it not so; its Products furnish something towards Trade, though it has no Place well situated for carrying any on.

22. *Waterford*,

A most delightful Country, whether considered in Regard to Riches or Pleasure; and *Waterford*, the chief City, and the second for Bigness in the Island, is very wealthy, populous, and well situated for Trade, in which it is very considerably engaged; and its Exports are as large in Leather, Butter, &c. as most in the Kingdom; it stands at a good Distance from the Sea, yet Ships of a large Burthen may come up to, and safely lie at the Key, of which it had of its own, in 1723, 176, with 7554 Tons.

23. *Armagh*.

This County, for Richness and Fertility of Soil, is supposed to surpass any in *Ireland*, though being destitute of Places of Trade within itself, its Product serves to swell the Number of those that integrate the Commerce of its better situated Neighbours; it is, however, fully employed in the manufacturing Linens, which supply its Want of the exporting Business.

24. *Antrim*

Is sufficiently fruitful, and is one of the five Counties that are fully employed or embarked in making Linens: its chief Town *Carrickfergus*, or *Knockfergus*, is very rich, populous, and a Place of good Trade, being commodiously situated for it on a Bay of the same Name, with an excellent fine Harbour; to which we may add *Belfast*, about eight Miles distant, seated at the Mouth of *Lagen*-Water, as it is a thriving Town, and daily improving, having three hundred and seventy Sail of Vessels, with 9180 Tons, appertaining to it in 1723.

25. *Cavan*

Affords little worth Regard in a Work of this Nature, as the sole Employ of the Inhabitants is spinning Thread for the Linen Manufactures in other Parts.

26. *Down*.

A very fertile Spot in general, though some Parts are incumbered with Woods and annoyed by Bogs; here are some Towns with a pretty good Trade, lying on *Carrickfergus* Bay, &c. but the principal Employ of the Natives is the Linen Manufacture, carried on to as great a Height in this as in any other County of the Kingdom.

27. *Downgal*

Is a fine District in the Inhabitants to Advantages. as the Year, 1 king Linens

27. *Donnegal*

Is a fine champagne Country, and with many more Havens than any other District in the Kingdom; so that its Situation for Trade naturally encourages the Inhabitants to improve and fall more into it, than other Parts destitute of similar Advantages. *Killebegs* had six Vessels, with 355 Tons, belonging to it so far back as the Year, 1723; and a large Quantity of Thread is spun in this County for making Linens in its Neighbourhood.

28. *Fermanagh*.

So like to *Queen's-County*, that one Description may serve for both.

29. *Londonderry*.

A County something champagne, and very fruitful in Corn, Cattle, &c. it has some Places of Trade, though none of so much Consequence as *Londonderry*, which in 1723, had fifty-eight Ships, with 2281 Tons, belonging to it, and *Colevaine* thirty-four, with 796 Tons: this is a Part of the County very considerable for its Linen Manufactures, in which the major Part of the Inhabitants find a full Employ.

30. *Louth*

Is a County abounding in Forage, and otherwise sufficiently fruitful, carrying on a very good Trade, from the many Towns it has well seated for commercial Engagements, as *Drugheda*, *Dundalk*, *Carlingford*, &c. of which the first had in the aforesaid Year a hundred and eighty-five Vessels, with 4715 Tons, and *Dundalk* two hundred and thirty-two Ships, with 4302 Tons, appertaining to them.

31. *Monaghan*.

Only to be mentioned for Method Sake, as it is a Territory covered with Hills, and these with Woods, without any Scite or Products for Trade, except what the Natives procure in spinning Thread for the Linen Fabricks of other Parts.

32. *Tyrone*.

This is a rough and rugged Country, but withal sufficiently fruitful, though without affording any Thing particular to remark in Regard to Trade, except its extensive Linen Manufacture, which affords the Natives a very comfortable Support.

From the preceding Account of the Shires, may be collected that the Products and Commodities of *Ireland* are, Cattle, Hides, Tallow, Suet, great Quantities of Butter and Cheese, Wood, Salt, Honey, Wax, Furs, Hemp, Linen and Woollen Cloth, Frizes, vast Store of Wool, coarse Rugs, Pipestaves, Hoops, Salmon, Herrings, Pilchards, Lead, Tin, and Iron, of all which I shall remark what serves for Exportation, when I come to speak of the foreign Trade of this Kingdom in its proper Place; but shall, previous thereto, treat of the general Traffick of *Great-Britain*, in the Method I formerly proposed, *viz.* by dividing it into the home and foreign; though in this some Difficulty occurs, as they are too much blended to admit of an easy and nice Separation. Our home Trade, which is certainly the greatest in *Europe*, being considerably encreased by our Importation of many foreign Commodities, as Wines, and Brandies, Oranges, Lemons, Raisins, Almonds, Figs, Spices, Anchovies, Capers, and Olives, all consumed within Land, and mostly by a retail Trade; raw and thrown Silk, Linen and Cotton Yarn, *Spanish* Wool, &c. all manufactured here; Materials for Dying, such as Woad, Madder, Sumach, Orchil, Indigo, and Cochineal; Oil, both edible and for cleansing our Woolens, &c. These and many more imported Commodities, are mixed with our Products and Manufactures to the Supply of our Tradesmen's Shops, and the constituting that one immense Article called the *home Trade*. I might here expatiate on the Sub-

ject; and add, that all those Goods used in our Fabricks, do not only pass through the Hands of the Weaver to that of the Shop-keeper, as raw Silks are first dyed, spun, and thrown, before they are woven, and so lose their Species to become an *English* Manufacture; Cottons pass pretty near the same Transformation; and almost all these consumed amongst us. But the principal Branch of our home Trade, and in which an infinite Number of Hands are employed, is our Woollen Manufacture, whose Importance will be demonstrated, by explaining the many different Steps taken towards its Perfection; for though on a transient View it seems soon and easily performed, yet the *Apparatus*, rightly regarded, will be found to be very considerable, and almost equal to the Manufacture itself, as the Materials must be differently prepared, and pass through so many Hands before they come to the Finisher, and after him to the Tradesman.

The Wool and Oil have been already mentioned as the great Principles of the Manufacture in general, as these are brought by different Channels to the Artisan, and indeed pass a long Way in the ordinary Channel of Trade, before they meet at the Clothier's House.

The best Oil for this Purpose comes from *Gallipoli*, and most of the imported Wool from *Ireland* and *Spain*, the Quantity of that from *Turkey* and *Barbary* being but small; though the principal Fund of this Manufacture is the Produce of our own Sheep. This Wool takes a great many different Turns through many Hands, and appears in a Variety of Shapes; suffers several Operations and Changes, before it arrives at the Clothier's; and in these various Alterations, or Mutations of its Species, it may justly be said to be for some Time the Employ of different Tradesmen, and thereby considerably to augment our home Trade.

The Wool is first taken from the Sheep's Back, either by the Shearer, Farmer, or Fellmonger, and generally sold to the Staplers, who are a considerable Set of Tradesmen scattered over the Kingdom in order to make these Purchases, and who afterwards convey it to the first Part of its Manufacture, by selling it for Combing and Carding. This Operation is succeeded by the next, that of Spinning; though previous hereto, an occasional Branch of Business intervenes, I mean that of Carriage, which is far from being inconsiderable, as none of the Wool is spun where it grows; and thus it must be sorted, oiled, combed, carded, spun, and otherwise prepared, before it becomes fit for the Loom, which I mention to shew the Greatness of this Business; though the whole must not be called a home Trade, as it furnishes a principal Branch of our Exports to all Parts of the World.

Another Part of our home Trade is that inconceivable Branch of Land and Sea Carriage; the Process of the Coal Trade from the Mine to the Consumer: The Portage of Butter, Cheese, and all other Commodities, from Place to Place, but more especially of Corn, Malt, and Meal is prodigious; and though this is neither Buying or Selling, Making or Manufacturing, Planting, or Reaping, yet it must be reckoned a Part of Trade, as carried on by those who are justly called Tradesmen; and were it possible to calculate the immense Sums of Money which this Business annually produces, the Number of Men, Cattle, and Ships that it constantly employs, with the consequentially necessary Retainers, of Ship-Carpenters, Wheelwrights, &c. my Reader might form some Idea of the Vastness of this Commerce, and the Importance of the People who carry it on.

Besides which, our Country furnishes for home Consumption, as well as Exportation, many Things too tedious to be enumerated in the Limits I have prescribed myself, so should now commence my Account of our foreign Trade: But as its Advantages to *England* have been contested, by Men even of Genius and Parts, and an extended Trade by them denied to be beneficial to us, I shall endeavour to prove the contrary, and to remove any Doubt that may still remain with some People about it; though I should have thought the successful carrying it on above two Centuries, should have rendered this needless. The Author of *Ways and Means* has taken Notice of this Proposition, and being more equal to the Talk of Replying than I can presume to be, I shall join his Sentiments to my own on the Subject, as I think they carry Conviction with them.

The Cavillers against Commerce seem to do it out of a bigotted Zeal for the landed Interest, asserting, that our own native Product is both sufficient for our Support at home, and to defend us against our Enemies from abroad; they imagine, and therein

do

do not err, and Necessary we consume Lead, Lead and from the more careful the Welfare

But when the Duties upon the Spirits began to of this illicit T of Commerce in this Place, I procal Benefit

do not err, that our own Soil plentifully supplies us with the common Wants and Necessaries for Life, such as Food or Raiment; they think, that extra of what we consume at home, our Fishery, and the Exportation of our Woollens, Tin, Lead, Leather, &c. may fetch us such Goods from abroad, as are of absolute Use; and from these Considerations are always warm in what regards the Land, but more careless and indifferent in the Concerns of Trade, than is consistent with the Welfare, and perhaps compatible with the Safety of the Kingdom.

If the following Particulars are duly considered and attended to, it will plainly appear, whether we are able to subsist by our own native Strength or not; as first, it should be strictly examined what is the real Value of the Fish we cure, either at home, or in our Plantations; and what our Woollen Manufactures, Tin, Lead, Leather, &c. may really yield us in the Markets abroad: For though the annual Exportation of these Commodities is a certain Wealth to the Nation, yet a Deduction must be made from the Profits, for the necessary Import of the Materials for building and rigging of Ships, *Spanish* Wool to improve our finer Sort of Drapery, raw Silk, dying Drugs, Salt-petre, Salt for our Fishery, and many other Commodities, without which several of our Manufactures could not be carried on; and besides these, our Luxury and Depravity of Manners have introduced among us the Use of many Things from abroad, as Wine, Oil, Fruits, Spices, fine Linens, Silks, Jewels, &c. which it would be difficult now to pass without, Custom becoming a second Nature. It is true, a Restraint might be laid by sumptuary Laws, but as these have been so long discontinued, they are become almost Strangers to our Constitution, and could not be revived without Murmur and Repinings; so that the Proof of the Advantages arising from Commerce would not be difficult, or that these Advantages are not to be slighted as immaterial to the national Welfare.

I will allow that a rich Soil may not only nourish its Inhabitants, but enable them with the Overplus to purchase a little foreign Luxury, provided they be moderate in their Appetites, and a small Share will satisfy and content them; ancient Frugality must be restored, Rents be admitted in Kind, and Landlords contented to live among their Tenants.

I could add much more in Support of the Argument proposed, but must content myself with having offered the few preceding Remarks in its Favour, and shall now pass forward to my intended Account of our foreign Trade;

And I begin first with *France*.

*Of the Commerce between Great-Britain and France.*

**N**O commercial Subject whatever has undergone so much investigation, so strict a Scrutiny, nor such severe Censures as the trading Intercourse between *France* and *Great-Britain*. The Contention lasted upwards of One Hundred and Fifty Years, and has at length terminated in a Treaty of Commerce, an Event no one commercial Writer would have ventured to predict; and which the Editor of this Work, alone, presumed to advise as a political Measure of the first Importance, if practicable; at the same Time, thinking it highly improbable, from the Prejudices subsisting in both Kingdoms against each other, and the firm Persuasion of the Subjects of *Britain*, that no Plan of Commerce beneficial to them could be proposed. On the other Hand, the French Government shewed no Desire to enter into any Negotiation of the Kind, whilst a considerable clandestine Trade was carried on from their Coasts to ours, in those valuable Articles Teas, Wines, Brandy, Laces and Cambrics, prodigious Quantities of each being smuggled into *Great-Britain* and *Ireland*, to the great Detriment of the public Revenue, and of the Trade and Manufactures of these Kingdoms.

But when the wise Measures adopted by the *British* Government in lowering the Duties upon the Importation of Teas, and the Regulations respecting Wines and Spirits began to take Effect to such a Degree as nearly to suppress the chief Branches of this illicit Trade; the Ministry of *France* began to think seriously of a Treaty of Commerce with *Great-Britain*. Political Causes, which we cannot enter into in this Place, likewise contributed to change the System of Commerce for the reciprocal Benefit of both Countries.

From the Year 1663, to 1778, we read of nothing but heavy Complaints from all our commercial Writers, concerning the Losses sustained by *Great-Britain* by the lawful and unlawful Trade with France; the Balance of which in some Years, during Times of profound Peace, was stated to amount to more than 1,000,000*l.* Sterling, against us, independent of the Specie carried out of the Kingdom, to support *English* Families residing in *France* and occasionally visiting *Paris*.

The great Alteration therefore which has been effected by the following Treaty of Commerce, redounded to the Honour of the *British* Ministry under whose Administration it was concluded; and it is earnestly to be wished it may be renewed at the Expiration of the Term stipulated. At present indeed, the *Box*, of the People in *France* consider it as too favourable to *Britain*; but we hope the more enlarged Ideas of Policy and Commerce which their *new* Government has introduced, will be the Means of continuing the friendly Sentiments now entertained by the moderate and reflecting Part of the Inhabitants of both Countries for each other; and lay the Foundation for a permanent Peace of very long Duration, which must be much more for the Interest and Prosperity of these once rival Nations, than those repeated Wars, most of them springing from commercial Causes, which so often disturbed the Repose of Europe, and exhausted the Treasures of the contending Powers; not to mention the inhuman Effusions of Christian Blood, in direct Contradiction to the mild Principles of that Religion which the Rules of both Countries professed to believe and follow, and in open Violation of the most solemn Treaties profanely made, in the Name of the Holy, Blessed and Undivided Trinity; signed, sealed and ratified by Christian Sovereigns; and declared to be perpetual.

Hitherto the subsequent Treaty has met with a better Fate, and therefore it is with Pleasure we lay before our Readers an authentic Copy.

*Treaty of COMMERCE and NAVIGATION between his Britannic Majesty, and the Most Christian King, signed at Versailles, the 26th of September 1786.*

**H**IS Britannic Majesty, and his Most Christian Majesty, being equally animated with the Desire not only of consolidating the good Harmony which actually subsists between them, but also of extending the happy Effects thereof to their respective Subjects, have thought that the most efficacious Means for obtaining those Objects, conformably to the 18th Article of the Treaty of Peace, signed the 6th of September 1763, would be to adopt a System of Commerce on the Basis of Reciprocity and mutual Convenience; which, by discontinuing the Prohibitions and prohibitory Duties which have existed for almost a Century between the two Nations, might produce the most solid Advantages on both Sides, to the national Productions and Industry, and put an End to *Contraband* Trade, no less injurious to the public Revenue, than to that lawful Commerce which is alone intitled to Protection; for this End, their said Majesties have named for their Commissaries and Plenipotentiaries, to wit, the King of *Great-Britain*, *William Eden*, Esq. Privy Counsellor in *Great-Britain* and *Ireland*, Member of the *British* Parliament, and his Envoy extraordinary and Minister Plenipotentiary to his Most Christian Majesty; and the Most Christian King, the *Sieur Joseph Matthias Gerrat de Rayneval*, Knight, Counsellor of State, Knight of the Royal Order of *Charles III.* who, after having exchanged their respective full Powers, have agreed upon the following Articles.

ARTICLE I. It is agreed and concluded between the Most Serene and Most Potent King of *Great-Britain*, and the Most Serene and Most Potent, the Most Christian King, that there shall be a reciprocal and entirely perfect Liberty of Navigation and Commerce between the Subjects of each Party, in all and every the Kingdoms, States, Provinces, and Territories, subject to their Majesties in *Europe*, for all and singular Kinds of Goods, in those Places, upon the Conditions, and in such Manner and Form as is settled and adjusted in the following Articles.

ART. II. For the future Security of Commerce and Friendship, between the Subjects of their said Majesties, and to the End, that this good Correspondence may be preserved from all Interruption and Disturbances; it is concluded and agreed that if at any Time there should arise any Misunderstanding, Breach of Friendship, and Rupture between the Crowns of their Majesties, which God

forbid! which Rupture shall not be deemed to exist, until there calling or sending Home of the respective Ambassadors or Ministers, the Subjects of each of the two Parties residing in the Dominions of the other, shall have the Privilege of remaining and continuing their Trade therein, without any Manner of Disturbance, so long as they behave peaceably, and commit no Offence against the Laws and Ordinances; and in Case their Conduct should render them suspected, and the respective Governments should be obliged to order them to remove, the Term of twelve Months shall be allowed them for that Purpose, in Order that they may remove with their Effects and Property, whether entrusted to Individuals, or to the State. At the same Time, it is to be understood that this Favour is not to be extended to those who shall act contrary to the established Laws.

ART. III. It is likewise agreed and concluded that the Subjects and Inhabitants of the Kingdoms, Provinces, and Dominions of their Majesties shall exercise no Act of Hostility, or Violence against each other, either by Sea or by Land, or in Rivers, Streams, Ports or Havens, under any Colour or Pretence whatsoever, so that the Subjects of either Party shall receive no Patent, Commission, or Instruction for arming and acting at Sea, as Privateers; nor Letters of Reprisal as they are called, from any Princes or States, enemies to the other Party; nor by Virtue, or under Colour of such Patents, Commissions, or Reprisals, shall they disturb, infect, or any Way prejudice or damage the aforesaid Subjects and Inhabitants of the King of Great-Britain, or of the Most Christian King; neither shall they arm Ships in such Manner as is above said, or go out to Sea therewith. To which End, as often as it is requested by either Party, strict and express Prohibitions shall be renewed and published in all the Territories, Counties, and Dominions of each Party wherefoever, that no one shall in any wise use such Commissions or Letters of Reprisal, under the severest Punishment that can be inflicted on the Transgressors, besides being liable to make full Restitution and Satisfaction to those to whom they have done any Damage; neither shall any Letters of Reprisal be hereafter granted by either of the said high contracting Parties, to the Prejudice or Detriment of the Subjects of the other, except only in such Case wherein Justice is denied or delayed; which Denial or Delay of Justice shall not be regarded as verified, unless the Petitions of the Person, who desires the said Letters of Reprisal, be communicated to the Minister residing there, on the Part of the Prince against whose Subjects they are to be granted, that within the Space of four Months, or sooner, if it be possible, he may manifest the Contrary, or procure the Satisfaction which may be justly due.

ART. IV. The Subjects and Inhabitants of the respective Dominions of the two Sovereigns shall have Liberty, freely and securely, without Licence or Passport, general or special, by Land or by Sea or any other Way, to enter into the Kingdoms, Dominions, Provinces, Countries, Islands, Cities, Villages, Towns walled or unwalled, fortified or unfortified, Ports, or Territories whatsoever, of either Sovereign, situated in Europe, and to return from thence, to remain there, or to pass through the same, and therein to buy and purchase as they please, all Things necessary for their Subsistence and Use, and they shall mutually be treated with all Kindness and Favour. Provided, however, that in all these Matters they behave and conduct themselves conformably to the Laws and Statutes, and live with each other in a friendly and peaceable Manner, and promote reciprocal Concord by maintaining a mutual and good Understanding.

ART. V. The Subjects of each of their said Majesties may have Leave and Licence to come with their Ships, as also with the Merchandizes and Goods on board the same, the Trade and Importation whereof are not prohibited by the Laws of either Kingdom, and to enter into the Countries, Dominions, Cities, Ports, Places, and Rivers of either Party, situated in Europe, to resort thereto, and to remain and reside there, without any Limitation of Time; also to hire Horses, or to lodge with other Persons, and to buy all lawful Kinds of Merchandizes, where they think fit, either from the first Maker or Seller, or in any other Manner, whether in the public Market for the Sale of Merchandizes, or in Fairs, or wherever such Merchandizes are manufactured or sold. They may likewise deposit and keep in their Magazines and Warehouses, the Merchandize brought from other Parts, and afterwards expose the same to Sale, without being in any wise obliged,

unless willingly and of their own Accord, to bring the said Merchandizes to the Marts and Fairs. Neither are they to be burthened with any Impositions or Duties on Account of the said Freedom of Trade, or for any other Cause whatsoever, except those which are to be paid for their Ships and Merchandizes, conformably to the Regulations of the present Treaty, or those to which the Subjects of the two contracting Parties shall themselves be liable. And they shall have free Leave to remove themselves, as also their Wives, Children and Servants, together with their Merchandizes, Property, Goods, or Effects, whether bought or imported, wherever they shall think fit, out of either Kingdom, by Land and by Sea, on the Rivers and fresh Waters, after discharging the usual Duties; any Law, Privilege, Grant, Immunities or Customs, to the contrary thereof in any wise notwithstanding. In Matters of Religion, the Subjects of the two Crowns shall enjoy perfect Liberty. They shall not be compelled to attend divine Service, whether in the Churches or elsewhere; but on the contrary, they shall be permitted, without any Molestation, to perform the Exercises of their Religion privately in their own Houses, and in their own Way. Liberty shall not be refused to bury the Subjects of either Kingdom who die in the Territories of the other, in convenient Places to be appointed for that Purpose; nor shall the Funerals or Sepulchres of the Deceased be in any wise disturbed. The Laws and Statutes of each Kingdom shall remain in full Force and Vigour, and shall be duly put into Execution, whether they relate to Commerce and Navigation, or to any other right, those Cases only excepted, concerning which it is otherwise determined in the Articles of the present Treaty.

ART. VI. The two high contracting Parties have thought proper to settle the Duties on certain Goods and Merchandizes, in order to fix invariably the Footing on which the Trade therein shall be established between the two Nations. In Consequence of which they have agreed upon the following Tariff, viz.

1st. The Wines of France, imported directly from France into Great-Britain, shall, in no Case, pay any higher Duties than those which the Wines of Portugal now pay. The Wines of France, imported directly from France into Ireland, shall pay no higher Duties than those which they now pay.

2d. The Vinegars of France, instead of Sixty seven Pounds, five Shillings and three Pence; and twelve twentieths of a Penny Sterling, per Ten, which they now pay, shall not for the future pay in Great-Britain any higher Duties than Thirty two Pounds eighteen Shillings, and ten Pence, and sixteen twentieths of a Penny Sterling, per Ten.

3d. The Brandies of France, instead of Nine Shillings and six Pence, and twelve twentieths of a Penny Sterling, shall for the future, pay in Great-Britain, only Seven Shillings per Gallon, making four Quarts English Measure.

4th. Oil of Olives, coming directly from France, shall for the future, pay no higher Duties than are now paid for the same, from the most favoured Nations.

5th. Beer shall pay reciprocally a Duty of Thirty per Cent. ad Valorem.

6th. The Duties on Hardware, Cutlery, Cabinet-ware and Turnery, and also all Works, both heavy and light, of Iron, Steel, Copper, and Brass, shall be classed; and the highest Duty shall not exceed Ten per Cent. ad Valorem.

7th. All Sorts of Cottons manufactured in the Dominions of the two Sovereigns in Europe, and also Woollens, whether knit or wove, including Hosiery, shall pay, in both Countries, an import Duty of Twelve per Cent. ad Valorem; all Manufactures of Cotton or Wool, mixed with Silk excepted; which shall remain prohibited on both Sides.

8th. Cambricks and Lawns shall pay, in both Countries, an import Duty of five Shillings, or Six Livres Tournois, per Demi-Piece of Seven Yards and three Quarters, English Measure; and Linens made of Flax or Hemp, manufactured in the Dominions of the two Sovereigns in Europe, shall pay no higher Duties either in Great-Britain or France, than Linens manufactured in Holland or Flanders, imported into Great-Britain, now pay. And Linen made of Flax or Hemp, manufactured in Ireland or France, shall reciprocally pay no higher Duties than Linens manufactured in Holland, imported into Ireland now pay.

9th. Saddlery shall reciprocally pay an import Duty of *Fifteen per Cent. ad Valorem.*

10th. Ganzas of all Sorts shall reciprocally pay *Ten per Cent. ad Valorem.*

11th. Millinery made up of Mullin, Lawn, Cambrick, or Gauze of every Kind, or of any other Article admitted under the present Tariff, shall pay reciprocally a Duty of *Twelve per Cent. ad Valorem*; and if any Articles shall be used therein, which are not specified in the Tariff, they shall pay no higher Duties than those paid for the same Articles by the most favoured Nations.

12th. Porcelain, Earthen-ware, and Pottery, shall pay reciprocally *Twelve per Cent. ad Valorem.*

13th. Plate-Glass, and Glass Ware in General shall be admitted, on each Side, paying a Duty of *Twelve per Cent. ad Valorem.*

His *Britannic* Majesty reserves the Right of countervailing by additional Duties on the under-mentioned Merchandizes, the internal Duties actually imposed upon the Manufactures, or the import Duties which are charged on the Raw Materials; namely, on all Linens or Cottons, stained or painted, on Beer, Glass-Ware, and Iron.

And his most *Christian* Majesty also reserves the Right of doing the same, with Regard to the following Merchandizes; namely, Cottons, Iron, and Beer.

And for the better securing the due Collection of the Duties payable, *ad Valorem*, which are specified in the above Tariff, the said contracting Parties will concert with each other, as well the Form of the Declarations to be made, as also the proper Means of preventing Fraud, with Respect to the real Value of the said Goods and Merchandizes.

But if it shall hereafter appear, that any mistakes have inadvertently been made in the above Tariff, contrary to the Principles on which it is founded, the two Sovereigns will concert, with good Faith, upon the Means of rectifying them.

ART. VII. The Duties above specified are not to be altered but by mutual consent; and the Merchandizes not above specified shall pay, in the Dominions of the two Sovereigns, the Import and Export Duties payable in each of the said Dominions, by the most favoured *European* Nations, at the Time the present Treaty bears Date; and the Ships belonging to the Subjects of the said Dominions, shall also respectively enjoy therein all the Privileges and Advantages which are granted to those of the most favoured *European* Nations.

And it being the Intention of the two high contracting Parties, that their respective Subjects should be in the Dominions of each other upon a Footing as Advantageous as those of other *European* Nations; they agree, that in Case they shall hereafter grant any additional Advantages in Navigation or Trade, to any other *European* Nations, they will reciprocally allow their said Subjects to participate therein; without Prejudice, however, to the Advantages which they reserve, *viz.* France in favour of *Spain*, in consequence of the 24th Article of the Family Compact, signed the 10th of *May*, 1761; and *England* according to what she has practised in Conformity to, and in Consequence of the Convention of 1703, between *England* and *Portugal*.

And to the End that every Person may know, with Certainty, the State of the aforesaid Imports, Customs, Import, and Export Duties, whatever they may be, it is agreed that Tariffs, indicating the Imports, Customs, and established Duties, shall be affixed in publick Places, as well in *Rouen*, and the other trading Cities of *France*, as in *London*, and the other trading Cities under the Dominion of the King of *Great-Britain*; that Recourse may be had to them whenever any Difference shall arise concerning such Imports, Customs, and Duties, which shall not be levied otherwise than in Conformity to what is clearly expressed in the said Tariffs, and according to their natural Construction. And if any Officer, or other Person in his Name, shall, under any Pretence, publickly or privately, directly or indirectly, demand, or take of a Merchant, or of any other Person, any Sum of Money, or any Thing else, on account of Duties, Imports, Search, or Compensation, although it be under the Name of a free Gift, or under any other Pretence, more or otherwise than what is above prescribed; in such Case,

the

the said Officer, or his Deputy, if he be accused and convicted of the same before a competent Judge, in the Place where the Crime was committed, shall give full Satisfaction to the injured Party, and shall suffer the Penalty prescribed by the Laws.

ART. VIII. No Merchandize exported from the Countries, respectively, under the Dominion of their Majesties, shall hereafter be subject to be inspected or confiscated, under any Pretence of Fraud or Defect in making or working them, or of any other Imperfections whatsoever; but absolute Freedom shall be allowed to the Buyer and Seller, to bargain and fix the Price for the same, as they shall see Good; any Law, Statute, Edict, Proclamation, Privilege, Grant, or Custom to the contrary notwithstanding.

ART. IX. Whereas several Kind of Merchandizes, which are usually contained in Casks, Chests, or other Cases, and for which the Duties are paid by Weight, will be exported from and imported into *France* by *English* Subjects; it is agreed, that in such Cases, the aforesaid Duties shall be demanded only according to the real Weight of the Merchandizes; and the Weight of the Casks, Chests, and other Cases whatever, shall be deducted in the same Manner as has been, and is now practised in *England*.

ART. X. It is further agreed, that if any Mistake or Error shall be committed by any Master of a Ship, his Interpreter or Factor, or by any other Person employed by him, in making her Entry or Declaration of her Cargo, neither the Ship nor the Cargo shall be subject, for such Defect, to Confiscation; but it shall be lawful for the Proprietors to take back again such Goods as were omitted in the Entry or Declaration of the Matter of the Ship, paying only the accustomed Duties, according to the Placart, provided always that there be no manifest Appearance of Fraud. Neither shall the Merchants, or the Masters of ships, or the Merchandize, be subject to any Penalty, by Reason of such Omission, in Case the Goods omitted in the Declaration shall not have been landed before the Declaration has been made.

ART. XI. In Case either of the two high contracting Parties shall think proper to establish Prohibitions, or to augment the Import Duties upon any Goods or Merchandize of the Growth or Manufacture of the other, which are not specified in the Tariff, such Prohibition or Augmentations shall be general, and shall comprehend the like Goods and Merchandizes of the most favoured *European* Nations, as well as those of either State; and in Case either of the two contracting Parties shall revoke the Prohibitions, or diminish the Duties in favour of any other *European* Nation, upon any Goods or Merchandize of its Growth or Manufacture, whether on Importation or Exportation, such Revocations or Diminutions shall be extended to the Subjects of the other Party; on Condition that the latter shall grant to the Subjects of the former, the Importation and Exportation of the like Goods and Merchandizes under the same Duties; the Cases reserved in the 6th Article of the present Treaty always excepted.

ART. XII. And forasmuch as a certain Usage, not authorized by any Law, has formerly obtained in divers Parts of *Great-Britain* and *France*, by which *French* Subjects have paid in *England* a Kind of Capitation Tax, called, in the Language of that Country, Head-money; and *English* Subjects a like Duty in *France*, called *Argent de Chef*; it is agreed, that the said Impost shall not be demanded for the future, on either Side, neither under the ancient Name, nor under any other Name whatsoever.

ART. XIII. If either of the high contracting Parties has granted, or shall grant any Bounties for encouraging the Exportation of any Articles, being of the Growth, Produce, or Manufacture of his Dominions, the other Party shall be allowed to add to the Duties already imposed by Virtue of the present Treaty, on the said Goods and Merchandize, imported into his Dominions, such an Impost Duty as shall be equivalent to the said Bounty. But this Stipulation is not to extend to the Cases of Restitutions of Duties and Imposts, called *Drawbacks*, which are allowed upon Exportation.

ART. XIV. The Advantages granted by the present Treaty, to the Subjects of his *Britannic Majesty* shall take Effect, as far as relates to the Kingdom of *Great-Britain*, as soon as Laws shall be passed there, for securing to the Subjects of his Most Christian Majesty the reciprocal Enjoyment of the Advantages which are granted to them by the present Treaty.

And the Advantages granted by all these Articles, except the Tariff, shall take Effect, with Regard to the Kingdom of *Ireland*, as soon as Laws shall be passed there, for securing to the Subjects of his Most Christian Majesty, the reciprocal Enjoyment of the Advantages which are granted to them by this Treaty; and in like Manner, the Advantages granted by the Tariff shall take Effect, in what relates to that Kingdom, as soon as Laws shall be passed there, for giving Effect to the said Tariff.

ART. XV. It is agreed, that Ships belonging to his *Britannic Majesty's* Subjects, arriving in the Dominions of his Most Christian Majesty, from the Ports of *Great-Britain*, or *Ireland*, or from any other foreign Port, shall not pay Freight Duty, or any other like Duty. In the same Manner *French* Ships shall be exempted in the Dominions of his *Britannic Majesty*, from the Duty of five Shillings, and from every other similar Duty or Charge.

ART. XVI. It shall not be lawful for any foreign Privateers, not being Subjects of either Crown, who have Commissions from any other Prince or State, in Enmity with either Nation, to arm their Ships in the Ports of either of the said two Kingdoms, to sell what they have taken, or in any other Manner whatever to exchange the same; neither shall they be allowed even to purchase Victuals, except such as shall be necessary for their going to the nearest Port of that Prince from whom they have obtained Commissions.

ART. XVII. When any Dispute shall arise between any Commander of a Ship and his Seamen, in the Ports of either Kingdom, concerning Wages due to the said Seamen, or other civil Causes whatever, the Magistrate of the Place shall require no more from the Person accused, than that he give to the Accuser a Declaration in Writing, witnessed by the Magistrate, whereby he shall be bound to answer that Matter before a Competent Judge in his own Country; which being done, it shall not be lawful for the Seamen to desert their Ship, or to hinder the Commander from prosecuting his Voyage. It shall moreover be lawful for the Merchants in the Places of their Abode, or elsewhere, to keep Books of their Accounts and Affairs, as they shall see fit, and to have an Intercourse of Letters, in such Language and Idiom as they shall chuse, without any Molestation or Search whatsoever. But if it should happen to be necessary for them to produce their Books of Accounts for deciding any Dispute or Controversy, in such Case, they shall be obliged to bring into Court the entire Books or Writings, but so as the Judge may not have Liberty to take Cognizance of any other Articles in the said Books than such as shall relate to the Affair in Question, or such as shall be necessary to give Credit to the said Books; neither shall it be lawful, under any Pretence, to take the said Books, or Writings forcibly out of the Hands of the Owners, or to retain them, the Case of Bankruptcy only excepted. Nor shall the Subjects of the King of *Great-Britain* be obliged to write their Accounts, Letters, or other Instruments relating to Trade on Stamp Paper, except their Day-book, which, that it may be produced as Evidence in any Law-suit, ought, according to the Laws which all Persons trading in *France* are to observe, to be indorsed and attested *Gratis* by the Judge under his own Hand.

ART. XVIII. It is further agreed and concluded, that all Merchants, Commanders of Ships, and others, the Subjects of the King of *Great-Britain*, in all the Dominions of his Most Christian Majesty in *Europe*, shall have full Liberty to manage their own Affairs themselves, or to commit them to the Management of whomsoever they please; nor shall they be obliged to employ any Interpreter or Broker, nor to pay them any Salary, unless they shall chuse to employ them. Moreover, Masters of Ships shall not be obliged in loading and unloading their Ships, to make Use of those Persons who may be appointed by public Authority for that Purpose, either at *Bordeaux*, or elsewhere; but it shall be entirely free for them to load or unload their Ships by themselves, or to make Use of such

Person or Persons in lading or unlading the same as they shall think fit, without the Payment of any Reward to any other, whomsoever; neither shall they be forced to unlade into other Ships, or to receive into their own, any Merchandize whatever, or to wait for their Lading any longer than they please. And all the Subjects of the Most Christian King shall reciprocally have and enjoy the same Privileges and Liberties, in all the Dominions of his *Britannic* Majesty in *Europe*.

ART. XIX. The Ships of either Party being laden, sailing along the Coasts of the other, and being forced by Storm into the Havens or Ports, or making Land there in any other Manner whatever, shall not be obliged to unlade their Goods or any Part thereof, or to pay any Duty, unless they, of their own Accord, unlade their Goods there, and sell some Part thereof. But it shall be lawful, Permission having been first obtained from those who have the Direction of Maritime Affairs, to unlade and sell a small Part of their Cargo, merely for the End of purchasing Necessaries, either for victualling or refitting the Ship; and in that Case, the whole Lading shall not be subject to pay the Duties, but that small Part only, which shall have been taken out and sold.

ART. XX. It shall be lawful for all the Subjects of the King of *Great-Britain*, and of the Most Christian King, to sail with their Ships, with perfect Security and Liberty, no Distinction being made who are Proprietors of the Merchandizes laden thereon, from any Port whatever, to the Countries which are now, or shall be hereafter at War with the King of *Great-Britain*, or the Most Christian King. It shall likewise be lawful for the aforesaid Subjects, to sail and traffick with their Ships and Merchandizes, with the same Liberty and Security, from the Countries, Ports, and Places of those who are enemies of both, or of either Party, without any Opposition or Disturbance whatsoever, and to pass directly not only from the Places of the Enemy aforesaid to neutral Places, but also from one Place belonging to an Enemy, to another Place belonging to an Enemy, whether they be under the Jurisdiction of the same, or of several Princes. And as it has been stipulated concerning Ships and Goods, that every thing shall be deemed free, which shall be found on board the Ships belonging to the Subjects of the respective Kingdoms, although the whole Lading, or Part thereof, should belong to the Enemies of their Majesties, contraband Goods being always excepted, on the stopping of which, such Proceedings shall be had as are conformable to the Spirit of the following Articles; it is likewise agreed, that the same Liberty be extended to Persons who are on board a free Ship, to the End that, although they be Enemies to both, or to either Party, they may not be taken out of such free Ships, unless they are Soldiers, actually in the Service of the Enemies, and on their Voyage for the Purpose of being employed in a military Capacity, in their Fleets or Armies.

ART. XXI. This Liberty of Navigation and Commerce shall extend to all Kinds of Merchandizes, excepting those only which are specified in the following Article, and which are described under the Name of Contraband.

ART. XXII. Under this Name of contraband, or prohibited Goods, shall be comprehended Arms, Cannon, Harquebusses, Mortars, Petards, Bombs, Grenades, Sauciffes, Carcasses, Carriages for Cannon, Musket-Relts, Bandoleers, Gun-powder, Match, Salt-petre, Ball, Pikes, Swords, Head-pieces, Helmets, Cutlasses, Halberts, Javelins, Holsters, Belts, Hories, and Harness, and all other like Kind of Arms and warlike Implements, fit for the Use of Troops.

ART. XXIII. These Merchandizes which follow shall not be reckoned among contraband Goods, that is to say, all Sorts of Cloth, and all other Manufactures of Wool, Flax, Silk, Cotton, or any other Materials, all Kinds of wearing Apparel, together with the Articles of which they are usually made, Gold, Silver, coined or uncoined, Tin, Iron, Lead, Copper, Bras, Coals, as also Wheat and Barley, and any other Kind of Corn and Pulse, Tobacco, and all Kinds of Spices, salted and sinoaked Flesh, salted Fish, Cheese and Butter, Beer, Oils, Wines, Sugar, all Sorts of Salt, and of Provisions which serve for Sute-nance and Food to Mankind; also all Kinds of Cotton, Cordage, Cables, Sails, Sail-cloth, Hemp, Tallow, Pitch, Tar and Rosin, Anchors, and any Parts of Anchors, Ship-masts, Planks, Timber of all Kinds of Trees, and all other

Things proper either for building or repairing Ships. Nor shall any other Goods whatever, which have not been worked into the Form of any Instrument, or Furniture for Warlike Use, by Land or by Sea, be reputed contraband, much less such as have been already wrought or made up for any other Purpose. All which Things shall be deemed Goods not contraband, as likewise all others which are not comprehended and particularly described in the preceding Article; so that they may be freely carried by the Subjects of both Kingdoms, even to Places belonging to an Enemy, excepting only such Places as are besieged, blocked up, or invested.

ART. XXIV. To the End that all Manner of Dissentions and Quarrels may be avoided and prevented on both Sides, it is agreed, that in Case either of their Majesties should be engaged in a War, the Ships and Vessels belonging to the Subjects of the other shall be furnished with Sea-letters, or Passports, expressing the Name, Property, and Bulk of the Ship, as also the Name and Place of Abode of the Master or Commander of the said Ship, that it may appear thereby, that the Ship really and truly belongs to the Subjects of one of the said Princes; which Passports shall be made out and granted, according to the Form annexed to the present Treaty: they shall likewise be renewed every Year, if the Ship happens to return Home within the Space of a Year. It is also agreed, that such Ships when laden are to be provided not only with Passports as above-mentioned, but also with Certificates containing the several Particulars of the Cargo, the Place from whence the Ship sailed, and whither she is bound, that so it may be known whether she carries away any of the prohibited or contraband Goods specified in the 22d Article of this Treaty; which Certificate shall be prepared by the Officer of the Place from whence the Ship shall set sail, in the accustomed Form. And if any one shall think fit to express in the said Certificates the Person to whom the Goods belong, he may freely do so.

ART. XXV. The Ships belonging to the Subjects and Inhabitants of the respective Kingdoms, coming to any of the Coasts of either of them, but without being willing to enter into Port, or being entered, yet not willing to land their Cargoes, or to break Bulk, shall not be obliged to give an Account of their Lading, unless they are suspected, upon sure Evidence, of carrying prohibited Goods, called contraband, to the Enemies of either of the two high contracting Parties.

ART. XXVI. In Case the Ships belonging to the said Subjects or Inhabitants of the respective Dominions of their most Serene Majesties, either on the Coast, or on the high Sea, shall meet with any Men of War belonging to their most Serene Majesties, or with Privateers; the said Men of War and Privateers, for preventing any Inconveniences, are to remain out of Cannon-Shot, and to send their Boats to the Merchant-Ship which may be met with, and shall enter her to the Number of two or three Men only, to whom the Master or Commander of such Ship or Vessel shall shew his Passport, containing the Proof of the Property of the Ship, made out according to the Form annexed to this present Treaty; and the Ship which shall have exhibited the same, shall have Liberty to continue her Voyage, and it shall be wholly unlawful any Way to molest or search her, or to chase or compel her to alter her Course.

ART. XXVII. The Merchant Ships belonging to the Subjects of either of the two high contracting Parties, which intend to go to a Port at Enmity with the other Sovereign, concerning whose Voyage and the Sort of Goods on board, there may be just Cause of Suspicion, shall be obliged to exhibit, as well on the High Seas, as in the Ports and Havens, not only her Passports, but also her Certificates, expressing that the Goods are not of the Kind which are contraband, as specified in the 22d Article of this Treaty.

ART. XXVIII. If, on exhibiting the above-mentioned Certificates, containing a List of the Cargo, the other Party should discover any Goods of that Kind which are declared contraband, or prohibited by the 22d Article of this Treaty, and which are designed for a Port subject to his Enemies, it shall be unlawful to break up or open the Hatches, Chests, Casks, Bales, or other Vessels found on board such Ships, or to remove even the smallest Parcel of the Goods, whether

ther the said Ship belongs to the Subjects of the King of *Great-Britain*, or of the Most Christian King, unless the Lading be brought on Shore, in the Presence of the Officers of the Court of Admiralty, and an Inventory made by them of the said Goods; nor shall it be lawful to sell, exchange, or alienate the same in any Manner, unless after due and lawful Process shall have been had against such prohibited Goods, and the Judges of the Admiralty, respectively shall, by Sentence pronounced, have confiscated the same; saving always as well the Subjects as the other Goods found therein, which by this Treaty are to be accounted Free; neither may they be detained on Pretence of their being mixed with prohibited Goods, much less shall they be confiscated as lawful Prize; and if, when only Part of the Cargo shall consist of contraband Goods, the Master of the Ship shall agree, consent, and offer to deliver them to the Captor who has discovered them, in such Case the Captor having received those Goods, as lawful Prize, shall forthwith release the Ship, and not hinder her, by any Means, from prosecuting her Voyage to the Place of her Destination.

ART. XXIX. On the contrary it is agreed, that whatever shall be found to be laden by the Subjects and Inhabitants of either Party, on any Ship belonging to the Enemies of the other, although it be not contraband Goods, shall be confiscated in the same Manner as if it belonged to the Enemy himself; except those Goods and Merchandizes which were put on board such Ship before the Declaration of War, or the general Order for Reprisals, or even after such Declaration, if it were done within the Times following; that is to say, if they were put on board such Ship in any Port or Place within the Space of *two Months* after such Declaration, or Order for Reprisals, between *Archangel, St. Petersburg, and the Scilly Islands*, and between the said Islands and the City of *Gibraltar*; of *ten weeks* in the *Mediterranean Sea*; and of *eight Months* in any other Country or Place in the World; so that the Goods of the Subjects of either Prince, whether they be contraband or otherwise, which, as aforesaid, were put on board any Ship belonging to an Enemy before the War, or after the Declaration of the same, within the Time and Limits abovementioned, shall no Ways be liable to Confiscation, but shall well and truly be restored, without Delay, to the Proprietors demanding the same; provided nevertheless, that if the said Merchandizes be contraband, it shall not be any Ways lawful to carry them afterwards to the Ports belonging to the Enemy.

ART. XXX. And that more abundant Care may be taken for the Security of the respective Subjects of their Most Serene Majesties, to prevent their suffering any Injury by the Men of War or Privateers of either Party, all the Commanders of the Ships of the King of *Great-Britain*, and of the Most Christian King, and all their Subjects shall be forbid doing any Damage to those of the other Party, or committing any Outrage against them; and if they act to the contrary, they shall be punished, and shall moreover be bound in their Persons and Estates, to make Satisfaction and Reparation for all Damages, and the Interest thereof, of what Nature soever.

ART. XXXI. For this Cause, all Commanders of Privateers, before they receive their Patents or special Commissions, shall hereafter be obliged to give, before a competent Judge, sufficient Security by good Bail, who are responsible Men, and have no Interest in the said Ship, each of whom shall be bound in the whole for the Sum of *thirty-six thousand Livres Tournois*, or *fifteen hundred Pounds Sterling*; or if such Ships be provided with above one hundred and fifty Seamen and Soldiers, for the Sum of *seventy-two thousand Livres Tournois*, or *three thousand Pounds Sterling*, that they will make entire Satisfaction for all Damages and Injuries whatsoever, which they, or their Officers, or others in their Service, may commit during their Cruize, contrary to the Tenour of this present Treaty, or the Edicts made in Consequence thereof by their most Serene Majesties, under Penalty likewise of having their Patents, and special Commissions revoked and annulled.

ART. XXXII. Their said Majesties being willing mutually to treat, in their Dominions, the Subjects of each other as favourably as if they were their own Subjects, will give such Orders as shall be necessary and effectual, that the Judgments and Decrees concerning Prizes in the Courts of Admiralty be given conformably

conformably to the Rules of Justice and Equity, and to the Stipulations of this Treaty, by Judges who are above all Suspicion; and who have no Manner of Interest in the Cause in Dispute.

ART. XXXIII. And when the Quality of the Ship, Goods, and Master shall sufficiently appear, from such Passports and Certificates, it shall not be lawful for the Commanders of Men of War to exact any further Proof under any Pretext whatsoever. But if any Merchant Ship shall not be provided with such Passports and Certificates, then it may be examined by a proper Judge, but in such Manner as, if it be found, from other Proofs and Documents, that it truly belongs to the Subjects of one of the Sovereigns, and does not contain any contraband Goods, designed to be carried to the Enemy of the other, it shall not be liable to Confiscation, but shall be released, together with its Cargo, in Order to proceed on its Voyage.

If the Master of the Ship named in the Passports should happen to die, or be removed by any other Cause, and another put in his Place, the Ship and Goods laden thereon, shall nevertheless be equally secure, and the Passports shall remain in full Force.

ART. XXXIV. It is further provided and agreed, that the Ships of either of the two Nations, retaken by the Privateers of the other, shall be restored to the former Owner, if they have not been in the Power of the Enemy for the Space of *four and twenty* Hours, subject to the Payment, by the said Owner, of one *third* of the Value of the Ship retaken, and of its Cargo, Guns, and Apparel; which third Part shall be amicably adjusted by the Parties concerned; but if not, and in Case they should disagree, they shall make Application to the Officers of the Admiralty of the Place where the Privateer which retook the captured Vessel shall have carried her.

If the Ship retaken has been in the Power of the Enemy above *four and twenty* Hours, the shall wholly belong to the Privateer which retook her.

In Case of a Ship being retaken by any Man of War belonging to his Britannic Majesty, or to his Most Christian Majesty, it shall be restored to the former Owner, on Payment of the *thirtieth* Part of the Value of such Ship, and of its Cargo, Guns, and Apparel, if it was retaken within the *four and twenty* Hours; and the *Tenth* Part, if it was retaken after the four and twenty Hours; which Sum shall be distributed as a Reward, amongst the Crews of the Ships which shall have retaken such Prize. The Valuation of the *Thirtieth* and *Tenth* Parts above-mentioned shall be settled conformably to the Regulations in the Beginning of this Article.

ART. XXXV. Whensoever the Ambassadors of either of their said Majesties, or other their Ministers having a public Character, and residing at the Court of the other Prince, shall complain of the Injustice of the Sentences which have been given, their Majesties shall reciprocally cause the same to be revised and re-examined in their Councils, unless their Councils should already have decided thereupon, that it may appear, with Certainty, whether the Directions and Provisions prescribed in this Treaty have been followed and observed. Their Majesties shall likewise take Care that this Matter be effectually provided for, and that Justice be done to every Complainant within the Space of *three Months*. However, before or after Judgment given, and pending the Revision thereof, it shall not be lawful to sell the Goods in Dispute, or to unlade them, unless with the Consent of the Persons concerned, for preventing any Kind of Loss; and Laws shall be enacted on both Sides for the Execution of the present Article.

ART. XXXVI. If any Differences shall arise respecting the Legality of Prizes, so that a judicial Decision should become necessary, the Judge shall direct the Effects to be unladed, an Inventory and Appraisalment to be made thereof, and Security to be required respectively from the Captor for paying the Costs, in Case the Ship should not be declared lawful Prize; and from the Claimant for paying the Value of the Prize; in Case it should be declared lawful; which Securities being given by both Parties, the Prize shall be delivered up to the Claimant. But if the Claimant should refuse to give sufficient Security, the Judge shall direct the Prize to be delivered to the Captor, after having received from him good and sufficient Security for paying the full Value of the said Prize, in Case it should be

adjudged illegal. Nor shall the Execution of the Sentence of the Judge be suspended by Reason of any Appeal, when the Party against whom such Appeal shall be brought, whether Claimant or Captor, shall have given sufficient Security for restoring the Ships or Effects, or the Value of such Ship or Effects, to the Appellant, in Case Judgment should be given in his Favour.

ART. XXXVII. In Case any Ships of War or Merchantmen, forced by Storms or other Accidents, be driven on Rocks or Shelves, on the Coasts of either of the high contracting Parties, and should there be dashed to Pieces and shipwrecked; all such Parts of the said Ships, or of the Furniture or Apparel thereof, as also of the Goods and Merchandizes as shall be saved, or the Produce thereof, shall be faithfully restored, upon the same being claimed by the Proprietors, or their Factors, duly authorized, paying only the Expences incurred in the Preservation thereof, according to the Rate of Salvage settled on both Sides; saving at the same Time, the Rights and Customs of each Nation, the Abolition or Modification of which shall however be treated upon, in the Cases where they shall be contrary to the Stipulations of the present Article; and their Majesties will mutually interpose their Authority, that such of their Subjects, as shall be so inhuman as to take Advantage of any such Misfortune, may be severely punished.

ART. XXXVIII. It shall be free for the Subjects of each Party to employ such Advocates, Attornies, Notaries, Solicitors, and Factors as they shall think fit; to which end the said Advocates, and others above-mentioned, shall be appointed by the ordinary Judges, if it be needful, and the Judges be thereunto required.

ART. XXXIX. And for the greater Security and Liberty of Commerce and Navigation, it is further agreed, that both the King of *Great-Britain*, and the Most Christian King shall not only refuse to receive any Pirates or Sea-Rovers whatsoever into any of their Havens, Ports, Cities or Towns, or permit any of their Subjects, Citizens or Inhabitants, on either Part to receive or protect them in their Ports, to harbour them in their Houses, or to assist them in any Manner whatsoever; but further they shall cause all such Pirates, and Sea-Rovers, and all such Persons who shall receive, conceal, or assist them, to be brought to condign Punishment, for a Terror and Example to others. And all their Ships, with the Goods or Merchandizes taken by them, and brought into the Ports of either Kingdom, shall be seized as far as they can be discovered, and shall be restored to the Owners, or the Factors duly authorized or deputed by them in writing, proper Evidence being first given in the Court of Admiralty, for proving the Property, even in Case such Effects should have passed into other Hands by Sale, if it be proved that the Buyers knew, or might have known, that they had been piratically taken. And generally all Ships and Merchandizes of what Nature soever, which may be taken on the High Seas, shall be brought into some Port of either Kingdom, and delivered into the Custody of the Officers of that Port, that they may be restored entire to the true Proprietor, as soon as due and sufficient Proof shall have been made concerning the Property thereof.

ART. XL. It shall be lawful, as well for the Ships of War of their Majesties, as for Privateers belonging to their Subjects, to carry whithersoever they please, the Ships and Goods taken from their Enemies, without being obliged to pay any Fee to the Officers of the Admiralty, or to any Judges whatever; nor shall the said Prizes, when they arrive and enter the Ports of their said Majesties, be detained or seized; neither shall the Searchers, or other Officers of those Places, visit or take Cognizance of the Validity of such Prizes; but they shall be at Liberty to hoist Sail at any Time, to depart, and to carry their Prizes to the Place mentioned in the Commissions or Patents, which the Commanders of such Ships of War shall be obliged to shew: on the Contrary, no Shelter or Refuge shall be given in their Ports to such as have made Prize upon the Subjects of either of their Majesties; but if forced by Streets of Weather, or the Danger of the Sea, to enter therein, particular Care shall be taken to hasten their Departure, and to cause them to retire from thence as soon as possible, as far as it is not repugnant to former Treaties made in this Respect with other Sovereigns or States.

ART. XLI. Neither of their said Majesties shall permit the Ships or Goods belonging to the Subjects of the other, to be taken within Cannon Shot of the Coasts, or in the Ports, or Rivers of the Dominions by Ships of War, or others having Commission from any Prince, Republic, or City whatsoever, but in Case it should so happen, both Parties shall employ their united Force to obtain Reparation of the Damage thereby occasioned.

ART. XLII. But if it shall appear that the Captor made Use of any Kind of Torture upon the Master of the Ship, the Crew, or others who shall be on board any Ship belonging to the Subjects of the other Party, in such Case, not only the Ship itself, together with the Persons, Merchandizes, and Goods whatsoever, shall be forthwith released, without any Delay, and set entirely free, but also such as shall be convicted of so enormous a Crime, together with their Accomplices, shall suffer the most severe Punishment suitable to their Offences, this the King of *Great-Britain*, and the Most Christian King, mutually engage shall be observed, without any Respect of Persons whatsoever.

ART. XLIII. Their Majesties shall respectively be at Liberty, for the Advantage of their Subjects trading to the Kingdoms and Dominions of either of them, to appoint therein national Consuls, who shall enjoy the Right, Immunity, and Liberty, belonging to them, by Reason of their Duties and their Functions; and Places shall hereafter be agreed upon, where the said Consuls shall be established, as well as the Nature and Extent of their Functions. The Convention relative to this Point shall be concluded immediately after the Signature of the present Treaty, of which it shall be deemed to constitute a Part.

ART. XLIV. It is also agreed, that in whatever relates to the lading and un-lading of Ships; the Safety of Merchandize, Goods and Effects, the Succession to personal Estates, as well as the Protection of Individuals, and their personal Liberty, as also the Administration of Justice, the Subjects of the two high contracting Parties, shall enjoy in their respective Dominions, the same Privileges, Liberties, and Rights, as the most favoured Nations.

ART. XLV. If hereafter it shall happen through Inadvertency, or otherwise, that any Infraction or Contraventions of the present Treaty should be committed on either Side, the Friendship and good Understanding shall not immediately thereupon be interrupted; but this Treaty shall subsist in all its Force, and proper Remedies shall be procured for removing the Inconveniences, as likewise for the Reparation of the Contraventions; and if the Subjects of either Kingdom shall be found guilty thereof, they only shall be punished and severely chastised.

ART. XLVI. His *Britannic* Majesty and his most Christian Majesty have reserved the Right of revising and re-examining the several Stipulations of this Treaty, after the Term of *twelve* Years, to be computed from the Day of passing Laws for its Execution in *Great-Britain* and *Ireland* respectively; to propose and make such Alterations as the Times and Circumstances may have rendered proper or necessary for the commercial Interests of their respective Subjects: and this Revision is to be completed in the Space of *twelve* Months; after which Term the present Treaty shall be of no Effect, but in that Event, the good Harmony and friendly Correspondence between the two Nations shall not suffer the least Diminution.

ART. XLVII. The present Treaty shall be ratified and confirmed by his *Britannic* Majesty, and by his Most Christian Majesty, in two Months, or sooner, if it can be done, after the Exchange of Signatures between the Plenipotentiaries.

In Witness whereof, we the under-signed Commissaries and Plenipotentiaries of the King of *Great-Britain*, and the Most Christian King, have signed the present Treaty with our Hands, and have set thereto the Seals of our Arms. Done at *Versailles*, the 26th of *September*, 1786.

FORM

ART.

FORM of the PASSPORTS and SEA-LETTERS which are to be granted by the respective Admiralties of the Dominions of the two high contracting Parties to the Ships and Vessels sailing from thence, pursuant to the 24th Article of the present Treaty.

N. N. To all who shall see these Presents, Greeting, Be it known that we have granted License and Permission to N. of the City or Place of N. Master or Commander of the Ship N. belonging to N. of the Port of N. burthen Tons, or thereabouts, now lying in the Port or Haven of N. to sail to N. laden with N. the said Ship having been examined before their Departure, in the usual Manner, by the Officers of the Place appointed for that Purpose. And the said N. or such other Person as shall happen to succeed him, shall produce this License in every Port or Haven which he may enter with his Ship, to the Officers of the Place, and shall give a true Account to them of what shall have passed or happened during his Voyage; and he shall carry the Colours, Arms, and Ensigns of N. during his Voyage.

In Witness whereof, we have signed these Presents, and set the Seal of our Arms thereto, and caused the same to be countersigned by N. at Day of in the Year, &c. &c.

No Person conversant in mercantile Affairs can possibly read the foregoing prolix Treaty, without prefiging what must follow; many of the Articles being drawn up, in vague, and indefinite Terms, requiring Explanation and Comments; accordingly, it had not been long ratified and confirmed by the respective Sovereigns, and by Laws enacted in Great-Britain and Ireland, for the Purpose of carrying it into effectual Execution, before Complaints, Disagreements, and even open Disputes expressed by some of the trading Cities of France, particularly Rouen, where it was first published, threatened its total Overthrow; happily however, by the good Conduct of the Ministers at the Head of the commercial Departments of both Nations, an Explanation took Place, the following Year, in the Form of a Convention; Copy of which is hereunto annexed.

CONVENTION between his Britannic Majesty and the Most Christian King, signed at Versailles, the 15th of January, 1787.

THE King of Great-Britain, and the Most Christian King, being willing, in Conformity to the 6th and 43d Articles of the Treaty of Navigation and Commerce, signed at Versailles the 26th of September, 1786, to explain and settle certain Points which had been reserved; their Britannic and Most Christian Majesties, always disposed more particularly to confirm the good Understanding in which they are happily united, have named for that Purpose, their respective Plenipotentiaries, to wit, on the Part of his Britannic Majesty William Eden, Esq. Privy-Counsellor in Great-Britain and Ireland, Member of the British Parliament, and his Envoy Extraordinary, and Minister Plenipotentiary to his Most Christian Majesty, and on the Part of his Most Christian Majesty, the Count de Vergennes, Minister and Secretary of State for the Department of Foreign Affairs, and chief of the Royal Council of Finances; who, after having communicated to each other, their respective full Powers, have agreed upon the following Articles.

ART. I. Their Majesties having stipulated in the 6th Article of the said Treaty, "that the Duties on Hard-ware, Cutlery, Cabinet-ware, and Turnery; and on all other Works, both heavy and light, of Iron, Steel, Copper and Brads, shall be classed; and that the highest Duty shall not exceed Ten per Cent. ad Valorem." It is agreed that Cabinet-ware, and Turnery, and every Thing that is included under those Denominations, as also Musical Instruments, shall pay Ten per Cent. ad Valorem.

All Articles made of Iron or Steel, pure or mixed, or worked or mounted with other Substances, not exceeding in Value, sixty Livres Tournois, or fifty Shillings per Quintal, shall pay only Five per Cent. ad Valorem; and all other Wares as

Buttons, Buckles, Knives, Scissars, and all the different Articles included under the Description of Hardware and Cutlery, as also all other Works of Iron, Steel, Copper, and Brass, pure or mixed, or worked or mounted with other Substances, shall pay *Ten per Cent. ad Valorem*.

If either of the two Sovereigns should think proper to admit the said Articles, or only some of them, from any other Nation, by Reason of their Utility, at a lower Duty, the Subjects of the other Sovereign shall be allowed to participate in such Diminution, in order that no foreign Nation may enjoy in this Respect, any Preference to their Disadvantage.

The Works of Iron, Steel, Copper, and Brass above mentioned, are not to be understood to extend to Bar Iron, or Pig Iron, or in general, to any Kind of Iron, Steel, Copper, or Brass, in the State of the raw Material.

ART. II. Their Majesties having also stipulated in the 6th Article, "that for the better securing the due Collection of the Duties payable *ad Valorem*, which are specified in the Tariff, they will concert with each other the Form of the Declarations to be made, and the proper Means of preventing Fraud, with Respect to the real Value of the Goods and Merchandizes:" It is agreed that each Declaration shall be given in Writing, signed by the Merchant, Owner, or Factor who answers for the Merchandizes at their Entry, which Declaration shall contain an exact List of the said Merchandizes, and of their Packages, of the Marks, Numbers and Cyphers, and of the Contents of each Bale or Case, and shall certify that they are of the Growth, Produce, or Manufacture of the Kingdom from whence they are imported, and shall also express the true and real Value of the said Merchandizes, in order that the Duties may be paid in Consequence thereof. That the Officers of the Custom House where the Declaration may be made, shall be at Liberty to make such Examination as they shall think proper of the said Merchandizes, upon their being landed, not only for the Purpose of verifying the Facts alleged in the said Declaration, that the Merchandizes are of the Produce of the Country therein mentioned, and that the Statement of their Value and Quantity is exact, but also that of preventing the clandestine Introduction of other Merchandizes in the same Bales or Cases: provided nevertheless that such Examinations shall be made with every possible Attention to the Convenience of the Traders, and to the Preservation of the said Merchandizes.

In Case the Officers of the Customs should not be satisfied with the Valuation made of the Merchandizes in the said Declaration, they shall be at Liberty, with the Consent of the principal Officer of the Customs of the Port, or of such other Officer as shall be appointed for that Purpose, to take the said Merchandizes according to the Valuation made by the Declaration, allowing to the Merchant or Owner an Overplus of *Ten per Cent.* and refunding to him the Duties he may have paid for the said Merchandizes. In which Case, the whole Amount shall be paid without Delay, by the Custom House of the Port, if the Value of the Effects in Question shall not exceed *Four hundred and eighty Livres Tournois*, or *Twenty Pounds Sterling*; and within *Fifteen Days* at latest, if their Value shall exceed that Sum.

And if Doubts should happen to arise, either respecting the Value of such Merchandizes, or the Country of which they are the Produce, the Officers of the Customs at the Port, shall come to a Determination thereupon, with all possible Dispatch; and no greater Space of Time shall be employed for that Purpose, in any Case, than eight Days, in the Ports where the Officers who have the principal Direction of the Customs reside, and *Fifteen Days* in any other Port whatsoever.

It is supposed and understood that the Merchandizes admitted by the present Treaty, shall be respectively of the Growth, Produce, or Manufacture of the Dominions of the two Sovereigns in *Europe*.

To oblige the Traders to be accurate in the Declarations required by the present Article, as also to prevent any Doubt that might arise on that Part of the 10th Article of the said Treaty, which provides, "that if any of the Effects are omitted in the Declaration delivered by the Master of the Ship, they shall not be liable to Confiscation, unless there be a manifest Appearance of Fraud" it is understood, that

that in such Case, the said Effects shall be confiscated, unless satisfactory Proof be given to the Officers of the Customs, that there was not any Intention of Fraud.

ART. III. In order to prevent the Introduction of Callicoes manufactured in the *East Indies*, or in other Countries, as if they had been manufactured in the respective Dominions of the two Sovereigns in *Europe*; it is agreed that the Callicoes manufactured in the said Dominions for Exportation from one Country to the other respectively, shall have at the two Ends of each Piece, a particular *Mark* woven in the Piece, to be settled in Concert by the two Governments; of which Mark the respective Governments shall give nine Months' previous Notice to the Manufacturers, and the said Mark shall be altered from Time to Time, as the Case may require. It is further agreed, that until the said Precaution can be put in Execution, the said Callicoes mutually exported shall be accompanied by a Certificate of the Officers of the Customs, or of such other Officer as shall be appointed for that Purpose, declaring that they were fabricated in the Country from whence they were exported, and also that they are furnished with the Marks already prescribed in the respective Countries, to distinguish such Callicoes from those which come from other Countries.

ART. IV. In settling the Duties upon Cambricks and Lawns, it is understood that the Breadth should not exceed for the Cambricks, *seven-eighths* of a Yard, *English Measure*, about three Quarters of an Ell of *France*, and for the Lawns one Yard and a Quarter, *English Measure*, one Ell of *France*; and if any hereafter shall be made of a greater Breadth than what is above mentioned, they shall pay a Duty of *Ten per Cent. ad Valorem*.

ART. V. It is also agreed that the Stipulations in the 18th Article of the Treaty shall not be construed to derogate from the Privileges, Regulations, and Usages already established in the Cities or Ports of the respective Dominions of the two Sovereigns; and further, that the 15th Article of the said Treaty shall be construed to relate only to Ships suspected of carrying, in Time of War, to the Enemies of either of the high contracting Parties, any prohibited Articles, denominated contraband; and the said Article is not to hinder the Examinations of the Officers of the Customs, for the Purpose of preventing illicit Trade in the respective Dominions.

ART. VI. Their Majesties having stipulated by the 43d Article of the said Treaty, that the Nature and Extent of the Functions of the Consuls should be determined, "and that a Convention relative to this Point should be concluded immediately after the Signature of the present Treaty, of which it should be deemed to constitute a Part," It is agreed that the said ulterior Convention shall be settled within the Space of two Months; and that, in the mean Time, the Consuls-General, Consuls, and Vice-Consuls shall conform to the Usages which are now observed, relative to the Consulship, in the respective Dominions of the two Sovereigns; and that they shall enjoy all the Privileges, Rights and Immunities belonging to their Office, and which are allowed to the Consuls-General, Consuls, and Vice Consuls of the most favoured Nations.

ART. VII. It shall be lawful for the Subjects of his *Britannic Majesty* to prosecute their Debtors in *France*, for the Recovery of Debts contracted in the Dominions of his said Majesty, or elsewhere, in *Europe*, and there to bring Actions against them, in Conformity to the Practice of Law in use, in the Kingdom; provided that there shall be the like Usage in Favour of *French Subjects*, in the *European* Dominions of his *Britannic Majesty*.

ART. VIII. The Articles of the present Convention shall be ratified and confirmed by his *Britannic Majesty*, and by his Most Christian Majesty, in one Month, or sooner, if it can be done, after the Exchange of Signatures between the Plenipotentiaries.

In Witness whereof, we the Ministers Plenipotentiary have signed the present Convention, and have caused the Seals of our Arms to be set thereto.

Done at *Verailles* the 15th *January* 1787.

stance of a  
contrary i  
ceed from  
6

In Conformity to the said Treaty and Convention, the *British* Parliament passed an Act for consolidating certain Duties of Import, payable at the Custom-house, under various Denominations of Old and New Subsidies, &c. &c. *Et. Sc.* into one simple Rate, either by the Piece, by Weight, or *ad Valorem*; which Regulations will be given under the Head of CUSTOMS, reserved, in this Edition, for the last Article, that every, the most recent, Regulation made by Parliament or the Ministry, to the very Moment of sending the final Sheets to the Press, may, for the Benefit of our Merchants, and Traders, be included.

*Of the Commerce between Great-Britain and Holland.*

I Am now going to open a very beneficial Branch of Commerce, and shall take the same Method to investigate the Advantages or Disadvantages arising from it, as I have done with the preceding; not knowing of any truer Method for discovering them, than what the Custom-house Entries afford, which have hitherto been my Guide through this intricate Maze of Business; though I shall not here particularize the different Articles as I did in the foregoing.

Before the *Dutch* War; *viz.* from *Michaelmas* 1662 to *Michaelmas* 1663, our Imports from *Holland* exceeded our Exports there 386,160*l.* 4*s.* and from 1668 to 1669 the Balance in our Disfavour was again 323,636*l.* 1*s.* And I do not find any Account how Matters stood between us from 1669 to 1696; but from *Christmas* 1699, to the same Time in 1704, the Estimate of Exports exceeded our Imports by 7,618,668*l.* 0*s.* 2*d.* 1/2. From which Accounts may be observed, that in the Years 1663 and 1669, our Dealings with the *States* were inconsiderable to what they were after the Beginning of the first War, and have continued to be ever since, as well in Number and Variety of Commodities, as in the Value. For in the first Years above-mentioned, our Exports thither were confined to only forty-five Articles of rated Goods, whereas in the last Year, *viz.* 1704, they were increased to at least a hundred and twenty or a hundred and thirty; and so proportionably in those paying *ad valorem*, without reckoning the Out-Ports, whose Customs, *Dr. Darcenant* says, bear Proportion to those of *London*, as 1,268,093*l.* is to 346,081*l.* which would add to the above Account near two Millions more for the five Years; and the said Gentleman, still bringing the Calculation lower, *viz.* from 1698 to 1705, remarks, that the Excess on our Side has been some Years a Million and a Half, but by a Medium taken of these seven Years 1,388,102*l.* 6*s.* 8*d.* 1/2. *per Annum*, which, according to the common Notion of these Things, is so much Money got clear of the Nation. But the Doctor dissenting from this too generally received Opinion, and supposes that nothing can be more fallacious than to conclude, that because a Country takes off more of our Commodities than we do of their's, that our Dealings with that Country are always beneficial to us, though prejudicial to them, and that when this happens, there is a constant Superlucration on our Side; but his Observation is with this Restriction, that our Goods thus exported serve for the Transportation Trade to those who take them from us, and not for a Support of luxury and Voluptuousness. For he grants, as every one must, that if they are consumed where they are first carried, they must prove a dead Loss to their new Proprietors; the *Dutch* are in the first Case, where our Products and Manufactures, Plantation and *East-India* Goods, furnish Materials for a great Part of their Trade with other Nations, by which they are so far from being Sufferers, that, on the contrary, the more they take from us, the more they enlarge their universal Traffick, and consequently encrease their Riches; and *extra* of these Reasons, it would be absurd to imagine, that if *Holland* was so great a Loser yearly as the Balance of Trade amounted to, that they either would, or indeed could continue it, as they have for so long done; nay, if they were in any Shape Sufferers by it, they are too politic a Nation to proceed in a bad Course; for this would be a glaring Instance of an Imprudence which that circumspect People are never guilty of; the contrary is therefore apparent, and their Motives for continuing the Trade proceed from the Advantages they reap by it.

But Sir *William Temple's* Sentiments on this Subject are so finely expressed, in his Observations upon the *United Provinces*, P. 231. Cap. 6. of the 5th Edition, that I could not pass them by without transcribing: "The vulgar Mistake, says he, "that Importation of foreign Wares, if purchased with Native Commodities, and "not with Money, does not make a Nation poorer, is but what every Man that "gives himself leisure to think must immediately rectify, by finding out, that "upon the End of an account between a Nation, and all they deal with abroad, "whatever the Exportation wants in Value to balance that of the Importation, "must of Necessity be made up with ready Money.

"By this we find out the Foundation of the Riches of *Holland*, as of their Trade, "by the Circumstances already rehearsed. For never any Country traded so much "and consumed so little; they buy infinitely, but it is to sell again, either upon Im- "provement of the Commodity, or at a better Market. They are the great Masters "of the *Indian Spices*, and of the *Persian Silks*; but wear plain Woollen, and feed "upon their own Fish and Roots. Nay they sell the finest of their own Cloth to "France, and buy coarse out of *England* for their own Wear. They send abroad "the best of their own Butter into all Parts, and buy the cheapest out of *Ireland* "or the North of *England*, for their own Use. In fine, they furnish infinite "Luxury, which they never practise; and Traffick in Pleasures, they never "taste."

The principal Articles of our Exports to *Holland* are, Woollens of several Sorts, Lead, wrought Bras and Iron, Melasses, Cotton, Printed Linens, Quicksilver, wrought Silk, Butter, Morkins, Rice, Copperas, Allum, Pimento, Tin, Tobacco, Sugars, Gold and Silver Coin and Bullion, Drugs, and *East-India Goods*; besides which, our smaller Exports are Skins, Woods, Leather, Glue, Wool, wrought Plate, Gloves, Hats of several Sorts, Watches, Earthen-Ware, Garters, Bellows, Cheese, Catlings, Lantern Leaves, Rape Cakes, Haberdashery, Scots Pearls, Pewter, Elephants' Teeth, Glass, &c. And the principal Imports from thence are Linens, Silks, Threads, Spicery, Incles, Battery, Stockfish, Whale-Fins, Madder, Hemp, Flax, Rhenish Wine, Safflower, Paper, Bugles, and Iron Wire. The lesser Imports are Snuff, Wainscot, *Russia Mats*, Smalts, Argol, Seeds, Packthread, Metal prepared, Steel, Spa-Water, Wine, Quilts, Hair of several Sorts, broken Glass, Stone Pots, Bulrushes, Brick-stones, Terras, Quern-stones, Twist, Indigo, Verdigris, Weed Ashes, Cinnabar, Spelter, Oker, Pencils, Geneva Hones, Iron, Plates, &c. all which we suffer to be imported and consumed amongst us for the same Reasons that we prohibit the Merchandize of *France*, viz. because these latter take so little from us, whilst the *Dutch*, by the large Extractions they make, pay much more to the Rents of our Lands and the Labour of our People, than we do to their's. And it is certain, that the *United Provinces* are the greatest of all our foreign Markets; and the most likely to continue so; as the Products of their Country are not any Thing near sufficient to feed or clothe their Inhabitants; so that it is not in the Power of Industry or Art to free them from a Dependence for both on their Neighbours; whilst those Princes, who govern a more extended Country, may, as most of them do, daily improve in Growths and Manufactures. It is true, *France* has for some Years past interfered with us in this Trade, though I believe very little to our Prejudice; and I think it may be esteemed on as good a Footing now, as it was when the Calculations I have quoted were made; and must remain so, at least in general, as many of the principal Goods which constitute that Branch of Commerce can only be supplied by us, and some of them are as much demanded for *France* as they are for *Holland*.

## Of the Trade between Great-Britain and Germany.

OUR Commerce with this Country will appear to be but little when its vast Extent and Populousness are considered; as Dr. *Davenant* makes the Medium of a seven Years' Dealing with it, viz. from *Christmas* 1698 to 1705, to be in Exports 838,791*l.* and Imports 677,521*l.* per Ann. though indeed he accounts for the Smallness of it in a very reasonable Manner, by acquainting us, that the *Dutch* supply that People now with those fine Cloths, Stuffs, Says, Serges, &c. manufactured here, which our Merchants used formerly to export to *Hamburg*, and other Parts of the *German* Empire, otherwise our Dealings there would certainly be much more considerable than they are, and increase our Advantage by augmenting the Employ of our Shipping in their Carriage; and this would certainly have occurred, as the Importation of so large a Quantity of *German* Linens must have been answered by an adequate Quantity of our Woollen Manufactures, had not we been intercepted in that Traffick by our *Flemish* Neighbours, with Goods of our own manufacturing, taken immediately from the Premises; and this in Part proves that *Holland* is no Sufferer in the Overbalance we seemingly have against them in our mutual Dealings.

It is true, our late Improvements in the Linen Fabricks have supplanted the *German*s in some Part of their's, since the before-mentioned Calculation; but on the other Hand, this Branch of Business must have rose in their Favour, and it has gone on sinking in that of *France's*, and is certainly rendered more beneficial to us both by the Alteration; our Imports of Linen being repaid by an Export of Woollens, and therefore the Increase of one is consequentially the Augmentation of the other. Our Exports there, are Cloths, Baize, Stuffs, Frize, Flannels, Kerseys, Hats, Hose, doub. Dozens, Logwood, Pipes, Cochineal, wrought Iron and Bras, Haberdashery, Silk mixed, Silk wrought and unwrought, Sugar, and ditto refined, Painters' Colours, Turners' Wood, wrought Plate, Leather, printed Linen, Callicoes, and other *India* Goods; Rice, Ginger, Pimento, Pepper, Tobacco, ditto cut, Drugs, Coffee, Allum, Pewter, Cotton, Wool, Lead, Litharge, Tin, Apothecaries' Stuff, Copperas, Orchal, Chalk, Glafs, Gluc, Lantern Leaves, Silver Coin, Coney Wool, Fustick, Blankets, Cabinet Ware, &c. And we import from thence, Linens, Spa and Bourn Water, *Russia* Mats, Rags, Smalts, white Copperas, melting Pots, Pearl, Weed and Potashes, Fenugreek, Sturgeon, Canvas, broken Glafs, Hartshorns, Drugs, Flax, Tow, Quills, Bristles, &c.

## Of Great-Britain's Commerce with Spain.

I Now go from the northern to the southern Regions, in order to give an Account of our Trade with this Kingdom, being the next of Importance to those already mentioned; and I wish I could say it still continued in that flourishing and advantageous Condition it was formerly carried on; but an aggregate Number of Events have happened within these fifty Years, or since the Emperor *Charles II.*'s Reign, to alter the Nature and Manner of it, by its being loaded with higher and additional Duties than it was in that Prince's Time; and the Introduction of *French* Commodities more encouraged, since a Monarch of the House of *Bourbon* sat on the Throne. But what has given a still greater Blow to our said Trade, is his setting up a Multiplicity of Fabricks, for the manufacturing such Goods as the *Spaniards* were formerly supplied with principally from us: For though the favouring those from *France* undoubtedly hurts us, I cannot think it did in the Article of our *Colchester* Baize, as the *British Merchant* seems particularly to intimate; for these stand as a remarkable Instance of the invaluable Quality of that Fabrick, which hitherto no Nation has been able to imitate; and Mr. *King* seems to be under another Mistake in Regard to the Value of these Baize, when he supposes them once to have rose from seventeen to twenty-four Pence the *Flemish* Ell, as they are never bought by Measure, but by the Piece; it being the *Bocking* Baize, made indeed at *Colchester* as well as at that Place, only that are sold by Measure, and are only fit for the *Portu-*

*tugal* Market, whilst the *Colebeſter* Baiſe are ſolely vendible in *Spain*; and the fineſt of them are ſtill in almoſt as much Eſteem as ever in that Country, though the Poverty of the People diſabled them from going dreſſed in the ſame Manner their moſt affluent Condition permitted them, ſo that the Generality are now obliged to content themſelves with the Products of their own Looms, ſet up in *Arragon*, &c.

His Catholick Maſtey *Philip V.* began before his Death to encourage the Manu- factories of Cloth, which had for many Years been carried on in his Kingdom, though to very little Purpoſe, till the Duke *de Ripperda*, then Prime Miniſter, revived the Eſtabliſhments, and improved them by introducing a great many Clothiers from his own Country, *Holland*, to whom his Maſtey continued his Proteſtion, notwithstanding the ſaid Nobleman afterwards fell into Diſgrace. And, in Order the better to promote his Intentions, he granted the Fabricators many Privileges, and to animate them to an Increate and Improvement, he wore them himſelf, clothed his Troops with them, and prohibited the Importation of any from abroad, which Mandate was for ſome Years obſerved with Rigour; and though I never heard it was repealed, yet our Cloths are now, and have been for ſome Years paſt, admitted to an Entry at *Cadiz*, as well as other Sorts of Woollens that were included in the Prohibition; but the Quantity is ſmall in Reſpect to what it formerly was, and this Commerce has entirely ceaſed in moſt other Parts of *Spain*, where the Diſ- patch formerly was very conſiderable; and the principal Part of what is now in- troduced there as well of Cloth as other Woollens, ſerves for their Transport Trade to their *American* Colonies, with the Exception of our fine Baiſe, beſt *Sandford* Ells, and a few other fine Goods, inimitable, as I before obſerved, by the *French*, which are ſtill uſed and worn by the *Spaniards* in *Old Spain*.

*Don Ferdinand VI.* ſtrictly followed his Father's Steps, and greatly improved on his Schemes and Maxims; ſo that Manufactures of various Sorts are now ſettled in *Spain*, whereas his Father, only left that of Cloth in Being; and this Prince, being leſs influenced by *French* Counſels, had naturally the Good of his Country more at Heart.

I ſhould now proceed to give an Account of the preſent State of our Trade with that Country; but previous hereto, I hope it will be agreeable to my Readers, that I inform them on what Footing our Treaties with that Crown have placed us, as ſome of them are in very few Hands, though the Knowledge of them may prove both inſtructive and advantageous.

The Baſis on which the ſeveral Treaties of Commerce ſubſiſting between *Great-Britain* and *Spain* are founded, is that concluded between the two Crowns at *Madrid*, on the 17<sup>th</sup> of *May*, 1667; and as this is indeed the Subſtance of all the ſubſequent ones, I ſhall juſt give the Heads of the Articles immediately relative to Trade.

ARTICLE IV. Stipulates a free Trade of Commerce to the Subjects on both Sides, as well by Land as Sea, &c.

ART. V. Agrees that no Customs ſhall be paid in either Kingdom by the Subjects of the other, but ſuch as the Natives pay.

ART. VI. Tables or Liſts of the Duties ſhall be put up at the Doors of the Cuſtom-houſes, &c. that Merchants may know what they have to pay, and not be impoſed on.

ART. VII. Permits the *Engliſh* freely to import all Kind of Goods, without being enforced to declare to whom, and for what Price they ſell them; nor ſhall they be moleſted for the Errors of Maſters or others, in the Entry of the ſaid Goods, nor obliged to pay Duties for more than they land; and Prize Goods ſhall be eſteemed as *Engliſh*.

ART. VIII. Grants Leave for the *Engliſh* freely to carry *East-India* Goods into *Spain*, and that they ſhall have all the Privileges granted to the *Dutch* by the Treaty of *Munſter*, 1648.

ART. IX. And the Privileges granted to the *Engliſh* reſiding in *Andaluſia*, 1645, to be general to all of that Nation, reſiding or trading, in any Places whatſoever within his Catholick Maſtey's Dominions.

ART. X. No Ships appertaining to the *English*, navigating in the King of *Spain's* Dominions, shall be visited by the Judge of Contraband, or any other Officer; nor shall any Soldiers or armed Men be put aboard them; nor shall the Custom-house Officers of either Part search any Ship, until they have landed all their Cargo, or such Part of it as they intend; but in the Interim Officers may be put aboard, not exceeding three, to see that no Merchandise be landed without paying Duties, but this without any Expence to the Ship. And when the Master shall declare his Intention of landing his whole Cargo, and shall have made his Entry accordingly, and afterwards other Goods unentered are found aboard, eight working Days shall be allowed to work, to commence from the first Day of Delivering, to the End that the concealed Goods may be entered, and Confiscation prevented; and if in the Time limited, the Entry be not made, then the unentered Goods only shall be confiscated, and no other Punishment inflicted.

ART. XI. Agrees, that neither Party shall be obliged to register or pay Customs for any other Goods than those they shall unlade.

ART. XII. Settles, that when those Goods which are landed and have paid Customs, are afterwards carried to some other Part in the same Dominions, they shall pay no new Duties.

ART. XIII. All Ships may enter freely in any Port or Road of either Prince, and depart when they please, without paying any Duties for their Cargoes, provided they do not break Bulk.

ART. XIV. In Case the Ships belonging to the Subjects of either Party shall be met by Men of War or Privateers appertaining to the other Party, these shall send their Boat aboard the Merchant Ship, and be satisfied with examining his Passports, without coming within Gunshot.

ART. XV. If any prohibited Goods shall be exported from either of the Kingdoms, by the respective Subjects of the one or the other Party, only such Goods shall be confiscated, without any further Punishment, except the Delinquent shall carry out of his *Britannic* Majesty's Dominions, the proper Coin, Wool, or Fullers-Earth; or shall carry out of the Dominions of the said King of *Spain*, any Gold and Silver, wrought or unwrought; in either of which Cases, the Laws of the respective Countries are to take Place.

ART. XVII. No Merchant, Pilot, Master of a Ship, Mariner, Ships, or Merchandise, shall be embargoed or detained, by any general or particular Order whatsoever.

ART. XVIII. Merchants and Subjects, of the one and the other King, may use all Kinds of Fire-Arms for their Defence, according to the Custom of the Place.

ART. XIX. The Captains, Officers, and Mariners, of the Ships belonging to either Party, may not commence an Action for their Wages, nor may be received under any Pretext whatsoever, into the Service or Protection of either King; but if any Controversy happen between Merchants and Masters of Ships, or between Masters and Mariners, the composing thereof shall be left to the Consul of the Nation; though he who shall not submit to this Arbitrament, may appeal to the ordinary Justice of the Place.

ARTS. XXI, XXII, and XXIII. Allow Freedom of Trade to Places in Amity or Neutrality with either Party, that they shall not be disturbed therein, and that in this Case, if any contraband Goods be found in them, they only shall be confiscated, and no other.

ART. XXIV. Shews what are contraband Goods, which I have already described in a former Part of this Work.

ART. XXVI. All Goods belonging to the Subjects of either Party, which shall be found laden on the Ships of Enemies, shall be confiscated.

ART. XXVII. The Consuls which shall hereafter reside in any of the King of *Spain's* Dominions, or the *Spanish* Consul residing in *England*, shall have, and exercise the same Power and Authority in the Execution of his Office, as any other Consul hath formerly had.

ART.

ART.

ART. XXVIII. Secures the Subjects on either Side from being molested or disturbed on Account of their Religion, so long as they give no publick Scandal or Offence.

ART. XXIX. All Merchandise shall be paid for in both Countries only in such Coin as shall be agreed for.

ART. XXX. And all Merchants, Factors, &c. of both Nations shall enjoy their Houses, Warchouses, &c. during the Time for which they have hired them, without any Impediment.

ART. XXXI. The Subjects of the said confederate Kings shall employ those Advocates, Proctors, &c. that they shall think fit; and they shall not be constrained to shew their Books and Papers, if it be not to give Evidence, for the avoiding Controversies and Law Suits, neither shall they be embargoed, detained, or taken out of their Hands upon any Pretence whatsoever, and they may keep their said Books and Accounts in whatever Language they please.

ART. XXXII. In Case the Estate of any Person shall be sequestered or seized on by any Court of Justice, within the Dominions of either Party, and any Estate or Debt happen to lie in the Hands of the Delinquents, belonging *bona fide* to the Subjects of the other, the said Estate or Debts shall not be confiscated, but restored to the true Owners.

ART. XXXIII. The Estates of those who die in either Country respectively shall be preserved for the lawful Heirs of the Deceased.

ART. XXXIV. The Goods and Estates of his *Britannic* Majesty's Subjects, who shall die in *Spain*, without making their Wills, shall be put into Inventory, with their Papers, Writings, and Books of Account, by the Consul, or other publick Minister, to be kept for the Proprietors and Creditors; and neither the *Cruzada*, nor any other Judicatory whatsoever, shall intermeddle therein: which also in like Case shall be observed in *England*, towards the Subjects of the King of *Spain*.

ART. XXXV. That a decent and convenient Burial-place shall be granted and appointed, to bury the dead Bodies of the *British* Subjects who shall die in *Spain*.

ART. XXXVI. If any Difference hereafter happen between their *Britannic* and Catholic Majesties, six Months' Space shall be allowed their respective Subjects, to withdraw their Effects, without giving them in that Time any Molestation or Trouble, or retaining their Goods or Persons.

ART. XXXVIII. The *English* and *Spaniards* to have reciprocally all Privileges granted, or to be granted, to any other Stranger.

Subsequent to the foregoing Treaty many others have since been made, especially after the last long War, at *Utrecht*, the 13th of *July*, and 9th of *December*, 1713, and another on the 14th of *December*, 1715, which last being scarce, and consequently not easy to be obtained, I here insert it *verbatim*, as it is not long.

*Treaty of Commerce between Great-Britain and Spain, concluded at Madrid, the 14th of December, 1715.*

**W**HEREAS since the Treaties of Peace and Commerce lately concluded at *Utrecht*, the 13th of *July*, and the 9th of *December*, 1713, between his Catholic Majesty, and her late Majesty the Queen of *Great-Britain*, of glorious Memory, there remained still some Differences about Trade and the Course thereof; and his Catholic Majesty and the King of *Great-Britain*, being inclined to maintain and cultivate a firm and inviolable Peace and Friendship, in order to attain to this good End, they have by their two Ministers, underwritten, mutually and duly qualified, caused the following Articles to be concluded and signed.

I. The *British* Subjects shall not be obliged to pay higher or other Duties, for Goods coming in, or going out of the several Ports of his Catholic Majesty, than those they paid for the same Goods in King *Charles II.*'s Time, settled by Schedules

duties and Ordonnances of the said King, or his Predecessors: And although the *Gracias*, commonly called *Pie del Fardo*, be not grounded on any Royal Ordonnance, nevertheless his Catholic Majesty declares, wills, and ordains, that it be observed, now and hereafter, as an inviolable Law; which Duties shall be exacted and raised, now and for the future; with the same Advantages and Favours to the said Subjects.

II. His Majesty confirms the Treaty made by the *British* Subjects, with the Magistrates of *St. Andro* in the Year 1700.

III. His Catholick Majesty permits the said Subjects to gather Salt in the Isle of *Tortugas*; they having enjoyed this Liberty in the Reign of King *Charles* the Second, without Interruption.

IV. The said Subjects shall pay no where any higher, or other Duties, than those paid by the Subjects of his Catholic Majesty in the same Places.

V. The said Subjects shall enjoy all the Rights, Privileges, Franchises, Exemptions, and Immunities whatever, which they enjoyed before the last War, by Virtue of the Royal Schedules or Ordonnances; and by the Articles of the Treaty of Peace and Commerce made at *Madrid* in 1667, which is hereby fully confirmed; and the said Subjects shall be used in *Spain*; in the same Manner as the most favoured Nation, and consequently all Nations shall pay the same Duties on Wool and other Merchandises coming in and going out by Sea: And all the Rights, Privileges, Franchises, Exemptions and Immunities, that shall be granted and allowed to the said Subjects, the like shall be granted, observed, and permitted to the Subjects of *Spain*; in the Kingdoms of his Majesty the King of *Great-Britain*.

VI. And as Innovations may have been made in Trade, his Catholic Majesty promises on his Part to use his utmost Endeavours to abolish them, and for the future to cause them to be avoided: In like Manner the King of *Great-Britain* promises to use all possible Endeavours to abolish all Innovations on his Part; and for the future to cause them by all Means to be avoided.

VII. The Treaty of Commerce made at *Utrecht*, the 9th of *December*, 1713, shall continue in Force; except the Articles that shall be found contrary to what is this Day concluded and signed, which shall be abolished and rendered of no Force; and especially the three Articles; commonly called explanatory; and these Presents shall be approved, ratified, and changed on each Side; within the Space of six Weeks, or sooner, if possible: In Witness whereof, and by Virtue of our full Powers, we have signed these Presents at *Madrid*, the 14th of *December*, in the Year 1715.

(L. S.) *M. de Bedmar.*  
(L. S.) *George Bubb.*

After this Treaty, Affairs of State and new Embroils have occasioned the making several others since the Rupture in 1718, though they all proved ineffectual to prevent the War in 1739, which being now happily over, it is to be hoped the Peace that has succeeded will remain established for a long Term, and her cheerful Smiles lull both Nations into a Forgetfulness of the past Troubles and Distresses, that War brings with it, more especially to the mercantile Part of them; and as the Treaty concluded on this Occasion at *Madrid*, the 5th of *October*, N. S. 1750, not only settled the Peace in general, but also in particular the Disputes depending between the two Crowns, in regard to the *Assiento* Contract; and as it is the last, and consequently of most Importance for my Readers' Government, I shall give them the Articles of it, and with them finish this Topick.

WHEREAS by the XVth Article of the Treaty of *Aix-la-Chapelle*, it has been agreed between their *Britannic* and Catholic Majesties, that the Treaty of the *Assiento* for the Commerce of Negroes, and the Article of the annual Ship, for the four Years of Non-Enjoyment, should be confirmed to *Great-Britain*, upon the same Foot, and upon the same Condition, as they ought to have been executed before the late War; and their respective Ambassadors of their said Majesties having agreed, by a Declaration signed between them on the 17<sup>th</sup> *June*,

1748, to regulate at a proper Time and Place, by a Negotiation between Ministers, named on each Side for that Purpose, the Equivalent which *Spain* should give in Consideration of the Non-Enjoyment of the Years of the said *Asiento* of Negroes, and of the annual Ship, granted to *Great-Britain*, by the Xth Article of the Preliminaries signed at *Aix-la-Chapelle*, on the 1<sup>st</sup> April, 1748.

Their *Britannic* and Catholic Majesties, in order to fulfil the said Engagements of their respective Ministers, and to strengthen and perfect more and more a solid and lasting Harmony between the two Crowns, have agreed to make the present particular Treaty between themselves, without the Intervention or Participation of any third Power; so that each of the contracting Parties acquires by Virtue of the Cessions which that Party makes, a Right of Compensation from the other reciprocally: And they have named their Ministers Plenipotentiaries for that Purpose, viz. his *Britannic* Majesty, *Benjamin Keene*, Esq. and his Catholic Majesty, *Don Joseph de Carvajal and Lancafer*; who, after having examined the Points in Question, have agreed on the following Articles:

ARTICLE I. His *Britannic* Majesty yields to his Catholic Majesty, his Right to the Enjoyment of the *Asiento* of Negroes, and the annual Ship, during the four Years stipulated by the XVIth Article of the Treaty of *Aix-la-Chapelle*.

ART. II. His *Britannic* Majesty, in Consideration of a Compensation of 100,000*l.* Sterling, which his Catholic Majesty promises and engages to cause to be paid either at *Madrid* or *London*, to the Royal *Asiento* Company, within the Term of three Months at latest, to be reckoned from the Day of signing this Treaty, yields to his Catholic Majesty all that may be due to the said Company for Balance of Accounts; or arising in any Manner whatsoever from the said *Asiento*; so that the said Compensation shall be esteemed and looked upon as a full and entire Satisfaction on the Part of his Catholic Majesty, and shall extinguish from this present Time, for the future and for ever, all Right, Pretension, or Demand, which might be formed in Consequence of the said *Asiento* or annual Ship, directly or indirectly, on the Part of his *Britannic* Majesty, or on that of the said Company.

ART. III. The Catholic King yields to his *Britannic* Majesty all his Pretensions and Demands in Consequence of the said *Asiento* and annual Ship, as well with Regard to the Articles already liquidated, as to those which may be easy or difficult to liquidate; so that no Mention can ever be made of them hereafter on either Side.

ART. IV. His Catholic Majesty consents that the *British* Subjects shall not be bound to pay higher or other Duties, or upon other Evaluations for Goods, which they shall carry into, or out of the different Ports of his Catholic Majesty, than those paid on the same Goods in the Time of *Charles* the Second, King of *Spain*, settled by the Schedules and Ordonnances of that King, or those of his Predecessors. And although the Favour or Allowance called *Pie del Fardo* be not founded upon any Royal Ordonnance, nevertheless his Catholic Majesty declares, wills, and ordains that it shall be observed now, and for the future, as an inviolable Law; and all the above-mentioned Duties shall be exacted and levied, now and for the future, with the same Advantages and Favours to the said Subjects.

ART. V. His Catholic Majesty allows the said Subjects to take and gather Salt in the Island of *Tortugas*, without any Hindrance whatsoever, as they did in the Time of *Charles* the Second.

ART. VI. His Catholic Majesty consents that the said Subjects shall not pay any where higher, or other Duties, than those which his own Subjects pay in the same Place.

ART. VII. His Catholic Majesty grants, that the said Subjects shall enjoy all the Rights, Privileges, Franchises, Exemptions, and Immunities whatsoever, which they enjoyed before the last War, by Virtue of Schedules or Royal Ordonnances, and by the Articles of the Treaty of Peace and Commerce made at *Madrid* in 1667; and the said Subjects shall be treated in *Spain*, in the same Manner as the most favoured Nation, and consequently, no Nation shall pay less Duties upon Wool and other Merchandises, which they shall bring into, or carry out of *Spain* by Land,

than the said Subjects in or carry out by Immunities, which also be granted to his *Britannic* Majesty contents that his *Britannic* Majesty

ART. VIII. Part, to abolish and to have the to use all possible future.

ART. IX. the Treaty of the present Treaty 1713; those shall be abolished Treaty of *Utrecht*

ART. X. A which may have which no other being thus accounted most serene King Treaty of reciprocal said Majesties, reckoned from

These Treaties Peace, signed a

Our Exports *Spanish* Cloth, Leather, wrought Lead, Shot, Cannon Shoes, wrought Silk mixed, and and Ship-Chamber Barley Meal; Tobacco, Drugs, and Piment Goods, &c.

The Imports Oil, Silk, before fins, Oranges, Olives, Saffron, wrought Silk, I believe may have lately been our Favour; but staple Commodities at least in such Territories obliged an equal Calamity can be supplied State, they always yielding more must be altered tioned among one, and I think

than the said Subjects shall pay upon the same Merchandizes, which they shall bring in or carry out by Sea; and all the Rights, Privileges, Franchises, Exemptions, and Immunities, which shall be granted or permitted to any Nation whatever, shall also be granted and permitted to the said Subjects; and his *Britannic Majesty* consents that the same be granted and permitted to the Subjects of *Spain* in his *Britannic Majesty's* Dominions.

ART. VIII. His *Catholic Majesty* promises to use all possible Endeavours on his Part, to abolish all Innovations which may have been introduced into Commerce, and to have them forborn for the future. His *Britannic Majesty* likewise promises to use all possible Endeavours to abolish all Innovations, and to forbear them for the future.

ART. IX. Their *Britannic* and *Catholic Majesties* confirm by the present Treaty the Treaty of *Aix-la-Chapelle*, and all the other Treaties therein confirmed, in all their Articles and Clauses, excepting those which have been derogated from by the present Treaty: As likewise the Treaty of Commerce, concluded at *Utrecht* in 1713; those Articles excepted, which are contrary to the present Treaty, which shall be abolished and of no Force; and namely the three Articles of the said Treaty of *Utrecht*, commonly called *explanatory*.

ART. X. All the reciprocal Differences, Rights, Demands, and Pretensions, which may have subsisted between the two Crowns of *Great-Britain* and *Spain*, in which no other Nation whatever has any Part, Interest or Right of Intervention, being thus accomodated and extinguished by this particular Treaty; the two said most serene Kings engage themselves mutually to the punctual Execution of this Treaty of reciprocal Compensation, which shall be approved and ratified by their said Majesties, and the Ratifications exchanged in the Term of six Weeks, to be reckoned from the Day of their Signing, or sooner, if it can be done.

*In Witnes whereof, &c.*

These Treaties are confirmed by the second Article of the definitive Treaty of Peace, signed at *Paris*, *February* 10th, 1763.

Our Exports now to *Spain*, including the *Canary* Islands, are long, short, and *Spanish* Cloth, Stuffs, Baize, Hats, Perpets, Silk and worsted Hosiery, Butter, Cheese, Leather, wrought Iron, Bras, Bell Metal, Linens plain and printed, Pewter, Tin, Lead, Shot, Copper, Sail Cloth, Haberdashery Wares, Clock Work and Watches, Shoes, wrought Silk, wrought Plate, Gunpowder, Cordage, Logwood, Brazillito, Silk mixed, and sewing Silk, Glafs, Copperas, Prints, Train Oil, Toys, Cabinet and Ship-Chandlery Wares, Wax, Lantern Leaves, Flax, Fans, Wheat, Beans, Barley Meal; Thread, Tobacco, Canvas, Cambricks, Lawns, Bed-Ticks, Sugar, Drugs, Pimento, Pepper, Spice, Staves, Brimstone, Deer Skins, *East-India* Goods, &c.

The Imports from thence are Wine, Almonds, Anniseed, Cumminseeds, Soap, Oil, Silk, before the Extraction was prohibited, Iron, Wool, Indigo, Figs, Raisins, Oranges, and Orange Juice, Lemons, Chestnuts, Small-nuts, Pomgranates, Olives, Saffron, Barilla, Kelp, Kid-Skins, Capers, Umber, Anchovies, Sponges, wrought Silk, Cochineal, Cork, Whisk Brooms, and, formerly, Brandies, which I believe may pretty near balance that Trade, *extra* of the Corn and Meal, which have lately been very considerable, and I think must be regarded as a Balance in our Favour; but these being only accidental Articles, are not to be reckoned as staple Commodities, nor placed on the Credit Side in this Account of Commerce, at least in such large Quantities, as a lost Harvest in that and the neighbouring Territories obliged them to call for; I say, supposing their Dearth to happen when an equal Calamity has befallen the other southern Countries; for when they can be supplied from *Sicily*, *Sardinia*, *Naples*, *Turkey*, *Barbary*, or the *Ecclesiastical State*, they always prefer those solid Grains before our's, as well on Account of its yielding more Flour, as because their Mills are set for grinding hard Corn, which must be altered when a soft Sort is to supply the Deficiency. I have not mentioned among the preceding Imports, the Article of Plate, which is no small one, and I think is a certain Indication of the Balance of that Trade being in our

GENERAL COMMERCE OF THE WORLD.

our Favour; and would certainly be much more so, were the Customs on our Goods collected in Spain according to the preceding Treaties, which include and inforce the Schedules granted the English by several successive Monarchs: But to shew that they are levied on a much higher Valuation, and very differently from what is therein stipulated and agreed, I here add an Account of the Imposts on Merchandise, drawn up at Cadix, the 17th of February, 1750, by a Gentleman, whose Capacity in Mercantile Affairs is exceeded by few, and this induces me also to subjoin his Sentiments, which please to take in his own Words.

Particulars of the Impost on Merchandise entered in this Custom-house.

GOODS according to their different Species pay 11, 5, 10; or 4 per Cent. Almojarifazgo Goods charged with 11 per Cent. Almojarifazgo pay Duties as follows:

Branches.		Decimals.
N <sup>o</sup> . 1	11 per Cent. with $\frac{1}{4}$ in Plate, which is $\frac{1}{4}$ Part more	0,12375

lessened, an

In Order to comprehend the Calculation of these Duties, here is a small Specimen of the Model of the Spanish Book of Rates, as it stood before the late War, and the Innovations made in the Valuation of some Articles of your Manufacture.

5 Anafotsblancos la Pieza	6000 40	White Hunfcoats, they are now rated at 7000
5 Dichos negros la Pieza	5000 40	Black ditte 6000
11 Bayetas de <i>Ingalaterra</i>	10000 $\frac{4}{7}$	Baife 12000
10 Curtidos de <i>Irlanda</i> cada uno	680 $\frac{4}{7}$	<i>Irish</i> Hides 1496
11 Duroys la Pieza	2000 40	Duroys 3000
11 Pannos finos de <i>Ingalaterra</i> la Pieza	24,000 40	Fine <i>English</i> Cloths, Var. now rated at 1768 each
11 Dichos entre finos	17,000 40	Second Cloths 816 ditto
11 Dhos Comunes	14,000 40	<i>Yorkshire</i> Cloths 510 ditto

The first Column specifies the Almojarifazgo, the second the species of Goods, the third the Value, Rate, or Aforo, as called here, the fourth the Abatement per Cent. or Gracia, called *Pie de sardo*. Besides that Gracia, there is an Abatement of 25 per Cent. allowed by the King, called *la quarta Tabla*. The Duties are thus calculated, viz.

100 Pieces white Hunfcoats entered in this Custom-house, 40 deducted for the Gracia, being 40 per Cent. as afore-mentioned, 60 Pieces valued according to the Aforo, or Rate above-mentioned, at 6000 Maravedis, make 360,000, from which Sum deducting 90,000, or the  $\frac{4}{7}$  Part for *la Quarta Tabla*, there remains 270,000 Maravedis. As the Almojarifazgo is 5 per Cent. and all the Branches appertaining to it as afore-mentioned, amounting to 25  $\frac{4}{100}$  per Cent. before the late War, therefore 270,000 at 25  $\frac{4}{100}$  per Cent. are Mars. 69,795; which at 64 Mars. the Value of each Real Plate, are R. Pla 1090  $\frac{1}{2}$ ; the full Amount of the Duties on 100 Pieces of white Hunfcoats is at 7000 Maravedis, whence  $60 \times 7000 = 420,000 - 105,000$  the *Quarta Tabla* = 315,000 at 27  $\frac{4}{100}$ , the actual Duties per Cent. are 87,727,5 Mars. at 64 are R. Pl. 1370  $\frac{1}{2}$ ; the Amount of the Duties 100 Pieces white Hunfcoats must now pay. The Difference is, R. Pl. 280  $\frac{1}{2}$ ; they now pay more than was levied before the late War, which is near 25  $\frac{1}{2}$  per Cent. Augmentations on the Duties then established.

In the Treaty of Commerce between the Crowns of *Great-Britain* and *Spain*, concluded at *Madrid* the 17<sup>th</sup> May, 1667, the Schedules and Immunities granted to the *British* Subjects trading to these Ports are, I think, inserted. If a new Treaty be attempted, the said Schedules may be inserted therein verbatim, to enforce the Execution. The View of the *British* Court, in the Treaty concluded at *Utrecht* in 1713, seemed to be, that their Merchandise should not pay more Duties than 10 per Cent. on their real Value, to be ascertained in a new Book of Rates, which was mutually agreed between the two Courts to be formed. But the Bishop, [I suppose the Bishop of *Bristol*, who was then Ambassador and Plenipotentiary, is here meant,] did not understand Duties; for the Expression in the said Treaty, *But it is to be understood that this is not to extend to the Albavalas, Cientos, and Millones*, destroyed the whole Purport of the Treaty, and rendered the forming a new Book of Rates quite useless. The Merchants versed and knowing in the Nature of the Duties, did therefore solicit that the Customs and Aforos should remain on the same Footing they were upon in King *Charles II.*'s Time, though some Articles were over-rated, which was accordingly executed by the Treaty of *Madrid*, 1715. Since the late War the Duties are augmented as afore-mentioned, and what is much more grievous, the Aforo or Valuation of the Merchandise is greatly increased; wherefore our Consul at the Head of this Factory applied to our Ambassador at *Madrid*, to solicit, if seemingly to him convenient, that the Goods should be dispatched in the Custom-houses in like Manner as they were before the War: Nothing favourable has resulted, for the Goods are charged upon the extravagant new Footing. If the Aforo or Valuation of a few Articles of the *British* Products was lessened, and the Innovations, introduced since the War, were abolished, the

proposed End of the *British* Court, to pay no more than 10 per Cent. on the real Value of the Goods, may be accomplished, although no Alteration be made in reducing or abolishing any Branch of the Duties actually levied: Which appears to me to be the easiest Method, as an Attempt to strike off any of the Branches of the Duties might be powerfully resisted by those to whom they were appropriated, or the Managers thereof. Some Instances are offered to make this Matter more plain. A Piece of Baife, upon a Medium of the Value of the Quality for this Market, shipped in *London*, will not cost, including the Charges, above 7*l.* 8*s.* 9*d.* which is equal to fifteen Ducats, or a hundred and sixty-five Reals Plate; each Piece was rated before the War at 10,000 Maravedis; the Gracia  $\frac{1}{2}$ , and  $\frac{1}{4}$  for the Quarta Tabla, being deducted, and the Duties at 28*per Cent.* as they then stood, being charged, each Piece paid R. Pl. 22*per Cent.* which is 13*per Cent.* on the real Value. Yet a Piece of Baife is now rated at 12,000 Mars, and the actual Duties of 30*per Cent.* being charged, after deducting the Gracias, each Piece must now pay R. Pl. 28*per Cent.* which exceeds 17 per Cent. on the real Value. Whereas if the Aforo of Baife was at 7000 Mars, then each Piece would pay as the Duties now stand, R. Pl. 16*per Cent.*, or only 10 per Cent. on the real Value. In like Manner other Goods may be valued according to their regular and common Cost put aboard, and not at the Price they are regularly sold for; because the Duties and Charges on the Sale make a Part of the Price of Sale. If this Idea be approved, a Table for the Rates of all Goods imported from his Majesty's Dominions may easily be framed, and formed so that the Duties shall not exceed 10 per Cent. on the real Value. The following is a Specimen of such a Table, viz.

Almojarifazgo	Goods	the Aforo	the Gracia.
11	Baife, each Piece	70000	$\frac{1}{4}$
11	Long Ells, each Piece	2900	40
11	Fine Cloths, each Piece	24000	40 as before the War.
11	Second Cloths, ditto	17000	40 as before the War.
11	Yorkshire Cloth, ditto	10000	40
11	Estamenas, each Piece	6000	40 as before the War.
5	Broad Camlets, ditto	5000	40
5	Huncoats, each Piece	5000	40
10	Hides, each	680	$\frac{1}{4}$ as before the War.

Merceries according to Invoice, &c.

*Of the Trade between Great-Britain and Portugal.*

OUR Trade with this Kingdom is generally esteemed of great Value; and the Importance of it to both Nations being very considerable, therefore ought to be cultivated by them with mutual Ardour; as the Portuguese take off a large Quantity of our native Commodities, and we in Return consume a greater one of theirs than all the Nations in Europe put together; though that People appear in some Measure insensible of the Advantages arising to them from this Commerce, and seem to have forgot the little Dispatch they had for their Wines, the greatest Product of their Country, when Peace and low Duties made those of France to be the general Consumption.

The English Factory at Lisbon published a Memorial in the Month of July 1729, by which it appears, and seemingly beyond Contradiction, that the Balance of Trade with that Kingdom was against us; and as I have no Reason to think there has been any favourable Alteration in it since, I shall give my Reader a Copy of the said Memorial, as it was communicated to me by one of the Gentlemen principally concerned in drawing it up, with the Remarks made by that considerable and judicious Body of Traders on it.

Portugal

*Portugal* loses by her Trade with the several other Nations from whom she receives Commodities, *extra* of the *English*, as will be shown in an Estimate, when I come to treat thereof

2,964,000,000

The *English* pay for the Balance of their Trade with *Portugal* as per the above Estimate

55,900,000

2,908,100,000

Part of which goes directly to *Italy*, and the Rest, mostly, by the Way of *England*, on Account of the Conveniency of the Exchange, and of Shipping

By the preceding Estimate, made favourable to the *English* Trade, as the Consumption of their Commodities is set down rather more than less, and their Exportation of the *Portuguese* Products as moderately computed as is possible both in Quantity and Price; it plainly appears,

1st. That the Balance of Trade between *Great-Britain* and *Portugal*, is in Favour of *Portugal*, who annually gains by the same, and the *English* lose Rs. 55,900,000.

2dly. That consequently that Trade cannot occasion the Extraction of Gold from *Portugal*, since the liquid Produce of all the Commodities consumed there, is not sufficient to pay for those which they take from *Portugal*.

3dly. That therefore the Gold, which annually goes from thence, is to pay other foreign Nations the Balance of their Trade; since the *Portuguese* cannot pay them in the Product of their own Country much above the quarter Part of the Value of what they consume of those foreign ones.

4thly. That the King of *Portugal* receives every Year a very considerable Sum from the Duties on the *English* Trade, which are much higher in Proportion than those on the Commodities of other Nations, being on the Importation Rs. 396,000,000 and on the Exportation 212,350,000, which amounts annually to R. 608,350,000.

Besides these Truths so clearly demonstrated, there are many others which well deserve to be considered; such are the following:

No Nation, besides the *English*, take off the *Portuguese* Wines, nor can be supposed ever to do it, since those who want this Commodity are supplied much better from *France*, and from other Parts, and at more moderate Prices; and as *England* reduce the Duties on the *French* Wines to an Equality with those on the *Portuguese*, this Branch of Trade, which is so advantageous to them as to amount yearly to above a million eight hundred thousand Mil-Reis, paid them in ready Money, by the *English*, would be entirely lost to them: The same Thing, a little more or less, is evident with Respect to other Fruits, since the *English* take off above ten Times the Quantity which all other Nations together do.

And though this Branch of Trade is much less considerable, yet it amounts by the Estimate to 170,000,000 Reis, and being, the same with their Wines, the Growth of their Country, that whole Sum which the *English* pay for it is just so much Gain to *Portugal*. It is remarkable, that, notwithstanding the considerable Sum of Money, which the Commodities exported by the *English* amount to, they are never indebted to the *Portuguese*, paying them always ready Money; whereas on the contrary, these last are always indebted to the *English*; and this Truth naturally leads to the following Considerations: That *Portugal* has always in Possession a very large Stock belonging to the *English*, which, considering the Nature of the Sales in this Country, and the Custom and Method of the Shopkeeper's Payments, may safely be computed, Allowance being made for what is sold for ready Money, to amount to above the In-port of one Year's Sales, so that by a moderate Computation the *English* have constantly a dead Stock in *Portugal*, consisting of Goods in the Custom-house and their Warehouses, and in Debts outstanding, of 2,500,000,000 Reis or upwards. The *English* certainly furnish the *Portuguese* with the most useful and necessary Goods, their own Corn for the present excepted, and at such moderate Prices as no other

other Nation can afford to do: If at this Time they bring them none of their Corn, there being a Scarcity of it, they have done it formerly, and no Doubt will do it again when they can spare it: and since *Portugal* cannot subsist without a constant Supply of that Commodity from abroad; should there happen to be a bad Harvest in *Spain*, or a Rupture between those two Crowns, the *English* by the Power of their Navy, and the Quantity of their trading Ships, are the only Nation which can at all Times effectually furnish and secure what foreign Corn is necessary to *Portugal*.

To the above Remarks on the Trade of *Portugal*, I shall take the Liberty to add the following of my own, as consequential to those so justly made by the Merchants there. And,

1<sup>st</sup>. If they are such as may be relied on, Mr. *King's* Calculations on that Commerce must have been very croneous, or it must have been greatly altered in the few intervening Years, between his Estimate and the *Lisbon* Merchant's; as he supposes, in his Dedication, P. 3, Vol. III. that our Exports to *Portugal* were then increased from about 300,000*l.* a Year to near a Million and a half, whereas by the preceding Estimate it may be seen, than in the Year 1729, the nett Produce of every Thing sold in that Kingdom did amount to but little more than one half of the foregoing Sum.

2<sup>dly</sup>. But if Mr. *King's* Calculations are right, as I am inclined to believe, when I consider they were made by some Gentlemen eminent both for their Capacities and Honour; I must conclude so great a Difference in so short a Space must have proceeded from large Quantities of our Woollens, &c. being carried into *Portugal*, with the View of introducing them afterwards, through that Channel, into *Spain*; and I cannot otherwise account for the Disparity between two Estimates made by different Sets of Gentlemen, equally to be credited and relied on.

It is, however, certain, that our Trade with that Kingdom was in the last Century almost destroyed by the Encouragement given to Manufactures of their own; though indeed the Blow came from hence at first; as one *Courteen*, an *Irishman*, and a Servant in the then Queen of *England's* Family, afterwards Queen Dowager, carried over in the Year 1681 several Clothiers and Baïse-Makers into *Portugal*, who immediately began to exercise their Professions, particularly at *Port Alegre* and *Covillban*, though with various Success, as the latter were soon dismissed, on its being found that the Staple of their Wool was too short for the Manufacturing of Baïse, but the others were continued, and brought the Fabrick of their Cloths to such Perfection, that in *June* or *July* of 1684, among some sumptuary Laws then made, his *Portuguese* Majesty prohibited the Importation of any foreign ones, which continued in Force, till by the Treaty of 1703 with that Crown, it was agreed to rescind the prohibitory Decree, and permit the free Importation of all Woollens, as before the making it; which the subsequent Abstract of the said Treaty will demonstrate.

ART. I. His sacred Majesty of *Portugal* promises, both in his own Name, and that of his Successors, to admit for ever hereafter into *Portugal*, the Woollen Cloths, and the Rest of the Wollen Manufactures of *Britain*, as was accustomed till they were prohibited by the Laws; nevertheless upon this Condition,

ART. II. That is to say, that her sacred Royal Majesty of *Great-Britain* shall, in her own Name, and that of her Successors, be obliged for ever hereafter, to admit the Wines of the Growth of *Portugal* into *Britain*; so that at no Time, whether there shall be Peace or War between the Kingdoms of *Britain* and *France*, any Thing more shall be demanded for these Wines by the Name of Custom or Duty, or by whatsoever other Title, directly or indirectly, whether they shall be imported into *Great-Britain* in Pipes or Hogheads, or other Casks, than what shall be demanded for the like Quantity or Measure of *French* Wine, deducting or abating a third Part of the Custom or Duty. But if at any Time this Deduction, or Abatement of Customs, which is to be made as aforesaid, shall in any Manner be attempted and prejudiced, it shall be just and lawful for his sacred Royal Majesty of *Portugal* again to prohibit the Woollen Cloths, and the Rest of the *British* Woollen Manufactures.

ART. III. The most excellent Lords the Plenipotentiaries promise, that their above-named Masters shall ratify this Treaty.

(L. S.) *John Metbuen.*

In Consequence of this Treaty, our Woollens have ever since been currently admitted into *Portugal*, and we now send there, Cloths of all Sorts, Baize, Perpets, Stuffs, Hats, Hofs, &c. We send likewise Iron, wrought Bras, Lead, Pewter, Shot, stained Paper, and other stationary Wares, Sail Cloth, Linen, Glafs, Earthen and Cabinet Wares, Gun-Flints, Toys, Millinery and Turnery Wares, Painter's Colours, Butter and Cheese, Gunpowder, Cordage, wrought and mixed Silk, Clock-work and Watches, Garters; Haberdashery Ware, all Sorts of Corn and Meal, wrought Plate, Lantern Leaves, Leather, Logwood, Copperas, Apothecaries' Stuffs, Drugs, Glue, Rice, Bees-Wax, &c. And our Imports from thence are those mentioned in the last quoted Estimate.

Great-Britain's Trade with Italy, including under this Denomination Venice, Naples, and Sicily, Genoa, Leghorn, Ancona, &c.

THE above-mentioned Cities are of all the maritime ones of *Italy* the most considerable, that carry on the most extensive Trade, and where the greatest Number of Ships arrive.

*Turin, Milan, Florence, Bologna, Modena, Reggio, Parma, and Lucca*, are also deeply engaged in Commerce, but as they are situated within Land, they are obliged to value on the Assistance of the maritime ones for carrying it on; and as the Commodities sent from hence to them are in a Manner alike to all, I have joined them together, and intend to treat on the *Italian Trade*, as if the whole had been one Kingdom and not subject to separate Princes.

I have always heard the Trade of *Italy* reckoned at a Million and a half to two Millions Sterling per Annum; those that made it most, have never exceeded the last Sum, and those who have made it least, have never put it under the former, and occasionally it may be much more, as in the last War, and according as their Harvests prove good or bad.

Our Exports to *Italy* are, all Sorts of Cloths and other Woollens, Hats, Hofs, Silk, mixed and wrought, horological Works and Watches, Gunpowder, Leather, Pewter, Bras, Tin, Lead, Shot, Cochineal, Coney Wool, Coals, refined clayed and Muscovada Sugars, Redwood, Logwood, Brazil Wood, Litharge of Lead, Lantern Leaves, Butter, Cheese, Coffee, Bugles, Tobacco, Ginger, Jesuits-Bark, Indigo, Pepper, Pimento, Rhubarb, Sarsaparilla, and other Drugs, China Ware, Callicoes, and other *India Goods*, Glafs and Earthen Ware, Pipes, wrought Plate, and, when their Harvest fails, Corn; Herrings, Salmon, Pilchards, Stockfish, Poorjack, &c. And in Return, *Venice*, and that State, sends us Currants, Hemp, Brimstone, Glafs Beads of different Sorts and Sizes, many Drugs, sometimes Rice, Oil, &c. *Naples* remits here large Quantities of *Belvidere* and *Lipari* Fruit, Oil, Brimstone, Manna from *Calabria*, Argol, Essences, &c. And from *Palermo*, the Capital of *Sicily*, and *Messina*, a Place of still greater Trade there, we receive chiefly Silks, Salt, some Wine, Argol, Cantharides, Juice of Liguorice, Shumach, Manna, and Hemp. *Genoa* makes Returns principally in Paper, Velvets, Damasks, Tabbies, and Brocades; though not so much of either Species as formerly, Oil, Marble, Roch Allum, Lemons, Essences, and Perfumes, Vermicelli, Rice, Coral, Cotton, &c. From *Leghorn* we receive Oil of *Gallipoli* and *Florence*, Wine, Soap, Straw Hats, Cotton and Cotton Yarn, Goats Hair, and Skins, Shumach, Brimstone, Cream of Tartar, Valonia, Marble, Anchovies, Soap, Galls, Juniper Berries, Olives, Coral, and Coral Beads, Verdigris, Argol, Drugs, Silks thrown and raw, &c. all which occasion a Circulation in Trade, well worthy our Attention and Regard, more especially as it leaves a considerable Balance in our Favour.

Of the Trade carried on by Great-Britain with Turkey and Barbary.

THE *Turkey Trade* is carried on by a Company of Merchants, incorporated by Queen *Elizabeth*, under the Title of the *Levant*, or *Turkey Company*, and whose Charter was confirmed by her Successor, King *James I.* with the Addition of many new Privileges, and a Form of Polity observed ever since. This Company is of a very particular Institution, as the Members are not obliged to contribute any Thing to a general Fund, so that it may more properly be

termed a simple Association, of which the Partners have nothing in common but their Charter and Government, every one trading on his own Stock, though obliged to submit to the Regulations of the Company, and contribute his Share of the necessary Expences about it.

The Troubles of the Kingdom under *Oliver Cromwell* gave Rise to no small ones in this Company, as many Members were thrust in, unqualified in the Manner that the Charters of *Queen Elizabeth* and *King James* required; but on the Restoration *King Charles* endeavoured to re-establish its *quondam* Reputation.

His Charter was dated the 2d of *April*, 1662, and contains, besides the Confirmation of that granted by *King James*, many new Articles about their Polity, or the Amendment of it.

The Company is established in a Body politick, capable of making Laws for their Government, with a Seal, under the Name of the *Governor and Company of English Merchants trading to the Levant Seas*.

The Number of its Members is not fixed, as every one properly qualified may be admitted, though they are generally about three hundred.

The principal Qualification for Admittance is, being a Merchant, and not a Tradesman or Retailer, bred either under a Father, or by serving a regular Apprenticeship to some other. Those who desire to become an Associate, must pay the Company twenty-five Pounds Sterling if they are under twenty-five Years of Age, and double that Sum if they are above; and must swear, on their Admission, to send no Goods to *Turkey* but on their own Accounts, and to consign them only to such as belong to the Company or their Factors.

The Company is governed by itself, and determines Affairs by a Plurality of Voices, in which the Merchant trading for 1000*l.* has an equal Vote with him that trades for an hundred Times as much; and for its better Management, there is a Court settled in *London*, consisting of the Governor, Sub-Governor, and twelve Assistants, who ought all to live in the City or Suburbs; there is also a Deputy-Governor in all the Towns and Ports of *England*, where any Members of the said Company reside.

It is this Assembly at *London* who send the Ships, and regulate the Tariff for the Prices, which the *European* Goods carried to *Turkey* are to be sold at, as well as the Quality of those to be brought back; it also raises the Taxes on the said Merchandises, when the necessary Presents, or other common Expences in Regard of this Trade, require it.

It presents the Ambassador to the Throne for Approbation; and also nominates the Consuls of *Smyrna* and *Constantinople*, whose Pensions the Company pays, therefore never permit either these latter, or the former to raise any Contributions on Ships or Goods under the Pretext of being to defray the Expences of some necessary Gift or other extraordinary Charges, and by this Means avoid the Disorders which other Nations not governed by such wholesome Laws fall into, to the no small Detriment of their Commerce.

The Company also nominate and pay their principal Officers, such as the Minister, Secretary, Chancellor, Interpreters, and Jannisaries, and this to the End that they shall not raise or impose any new Sum on the Merchants' Ships, or Goods.

In extraordinary Cases, the Consuls, and even the Ambassador himself, have Recourse to two Deputies of the Company, who reside on the Spot; or if the Affair be very important, they assemble the whole Nation, who regulate and determine the Presents that are to be given, the Voyage to be made, and every other Circumstance necessary to be treated of; and in Conformity to the Resolutions then taken, the Deputies order the Treasurer to supply the Money, Goods, or *European* Curiosities agreed on; and this Treasurer is established by the Company, and his Cash arises from the Taxes and Imposts, which they themselves have thought proper to lay on Goods to discharge the common Expences of the Association.

It is true, however, that the Ambassador and Consuls may act alone on all these Occasions; but besides its being a tacit Clause in the Pensions paid them, to do nothing

nothing without the Deputies' Advice, they choose rather to conform to this Rule than otherwise, for their own Discharge.

The Places reserved to this Company for their Trade, are the States of the Republick of *Venice*, in its Gulf, those of *Ragusa*, and all the Grand Signor's Dominions; the Ports of the *Levant* and *Mediterranean*, excepting those of *Cartagena*, *Alicant*, *Denia*, *Valencia*, *Barcelona*, *Marsilles*, *Toulon*, *Genoa*, *Leghorn*, *Civita Vecchia*, *Palermo*, *Messina*, *Malta*, *Majorca*, *Minorca*, *Corfica*, and all other Ports and Places of Commerce on the Coasts of *France*, *Spain*, and *Italy*. And the Fine for those caught in Trade, and not Members in the Company, is 20 per Cent. on the Value of the Lading so taken.

26 *Geo. II.*

By the Act of 26 *Geo. II.* any Subject of *Great-Britain* may be admitted a Member of this Company, on requesting it of the Governor or Deputy-Governor, within thirty Days after making such Request, and paying twenty Pounds, and taking an Oath to be faithful to his Majesty and the Company.

This Trade to be carried on in *British* and Plantation-built Ships only, navigated according to Laws; and the Goods may be configned to any Freeman of the Company, their Sons, or Apprentices, being his Majesty's Christian Subjects.

No Goods or Merchandises, coming from the *Levant* without a clean Bill of Health, and liable to retain the Infection of the Plague, shall be landed in *Great-Britain* or *Ireland*, or in the Isles of *Guernsey*, *Jersey*, *Alderney*, *Sark*, or *Man*, unless it shall appear to the Satisfaction of his Majesty, his Heirs, or Successors, or of his or their Privy-Council, that such Goods have been sufficiently opened and aired in the Lazarets of *Malta*, *Ancona*, *Venice*, *Messina*, *Leghorn*, *Genoa*, and *Marsilles*, or one of them.

Great Complaints having been made of the Decay of the *Turkey* Trade during the late War began in 1756, by the Importation of *French* Cloth into *Turkey*, the following Act passed, which was to be in Force no longer than the Continuance of the War:

32 *Geo. II.*

The Preamble sets forth, That the Importation of Woollen broad Cloth of the Manufacture of *France* into any Places within the *Levant* Seas, by *British* Subjects, is not only a Discouragement and Prejudice to the Woollen Manufactures of *Great-Britain*, but is also a Means of affording Relief to the Enemy, and thereby enabling them to carry on the War; to prevent such destructive Commerce for the future, it is enacted, that no Woollen Goods of the Manufacture of *France* shall be carried into any Place in the *Levant* Seas by any Subjects of this Realm.

No Woollen Goods of this Kingdom shall be imported within the Limits of the Company's Charter, except directly from this Kingdom by a *British* Subject, unless the Importer shall produce to the Ambassador, Consul, or Vice-Consul, or other proper Officer appointed by the Company at the Place where such Goods shall be imported, a Certificate upon Oath from the Exporter or Shipper at the last Place of Exportation, that the same were brought or received from *Great-Britain*; and in such Certificate shall be described the Name of the Ship and Master, and the Time when the Goods were imported into such last lading Port from *Great-Britain*; which Certificate shall be attested by the *British* Consul or Person acting in his Absence, residing at such last lading Port; and the Shipper shall also produce the Bill of Lading from *Great-Britain*; and the Consul shall take Notice in his Attestation of such Bill being produced to him.

The Consul, &c. upon granting such Certificate, is to enter a Duplicate thereof in a Book which is to be signed by the Shipper of the Goods, he taking the Oath required before making out such Certificate, which Book is to be received as final Evidence in all Disputes respecting Certificates, and may be examined gratis.

Where the Consul, &c. shall receive Information upon Oath, setting forth good Reason to suspect the Authenticity of the Certificate, he is to signify the same to the Importer, and take Security in double the Value of the Goods, which becomes forfeited if it shall appear no such Certificate was granted; such Security to be assigned to the Informer for his sole Benefit.

As often as any such Objection shall be made to the Certificate, the Consul, &c. is to transmit Notice thereof to the Consul where such disputed Certificate shall be alledged to have been granted, requiring an Attestation under his Hand and Seal, whether such Certificate was granted by him; which Attestation the Consul is to transmit by the first Opportunity; and upon Receipt thereof is to be laid before the Importer: If the Certificate be thereby verified, the Security shall be immediately cancelled; but if not, the Penalty to be levied by Distress and Sale of Goods, and be applied as before directed.

All Woollen Goods without such Certificate, except imported directly from England, shall be deemed *French*; and his Majesty's Ambassador, &c. is required to confiscate the same.

Every Merchant, &c. being a Subject of *Great-Britain*, or residing under the Protection of the *British* Ambassador, &c. within the Limits of the Company's Charter, shall, before the Exportation of any Goods, make Oath before the said Ambassador, &c. that the same were not purchased with the Produce of, or taken in Barter for, the Woollen Manufactures of *France*.

Every Person who shall import into *Great-Britain* any Goods of the Growth or Manufacture of *Turkey*, within the Limits of the Company's Charter, shall make the same Oath before the Commissioners of the Customs, &c. except such Goods as shall have been condemned as lawful Prize.

If any Certificate shall be lost, the Master of the Vessel must make Oath before the *English* Consul, &c. of the Purport of such Certificate, of the Loss of it, and that it hath not been disposed of to any Persons whatsoever; and the said Master, or the Consignee of the said Goods, is also to give Security, in the Penalty of double the Value of the Goods, for procuring a Duplicate of the Certificate: thereupon the Consul, &c. shall grant a Licence for importing the Goods.

But prize Goods, condemned, of any Country whatsoever, may be imported, on producing a Copy of the Sentence of Condemnation, signed by the Person who condemned the same.

To prevent Raw Silk, Mohair, Yarn, &c. from being imported into this Kingdom, purchased by the Woollen Manufactures of *France*, and imported from *Leghorn* and other Places in *Italy*, contrary to the Act of Navigation, &c. it is enacted, that if any Raw Silk or Mohair Yarn, or any Ship or Vessel bringing the same into *England, Ireland, Wales, the Islands of Guernsey, or Jersey, or Town of Berwick upon Tweed*, shall be seized as forfeited by any Acts of Parliament, the Person who shall make the Seizure may not release or abandon the same, or delay to proceed to Judgement for the Condemnation thereof, without first acquainting, in Writing, the Governor, Deputy-Governor, Treasurer, or Husband of the said Company, or their Secretary, of such his Intention, and delivering at the same Time a Copy of the Schedule of such Seizure: And in Case the said Governor and Company, or any Committee thereof, shall within seven Days after give Bond, or offer to give Bond, under the common Seal of their Corporation, in the penal Sum of 1000*l.* with Condition for indemnifying such Officer, &c. against all Costs and Charges, in Case such Ship or Goods shall not be adjudged forfeited; then such Officer, &c. shall not voluntarily abandon such Seizure without the Consent of the said Company or some Committee thereof; but shall proceed to Judgement concerning the Legality thereof.

Any Member of the Company shall be admitted to give Evidence, either for the Plaintiff, Relator, or Defendant upon the Trial.

The Commerce of this Company is undoubtedly a very beneficial one to this Nation; as may be seen by the following curious Calculation taken from the *British Merchant*, and there quoted with a View to instruct the Reader in the whole Process of the Cloth Manufacture, from its Commencement to its Consumption; and to show the Advantages arising from the *Turkey* Trade, by its taking off so large a Share of our Woollens, and thereby contributing proportionably to the Subsistence of our People.

GENERAL COMMERCE OF THE WORLD.

♣ Clothier buys at Market fifty Packs of Wool, picked and sorted, at 10*l.* per Pack. l. s. d.  
500 0 0

With which Wool he makes 100 broad Cloths, and the Manufacture thereof in Carding, Spinning, Weaving, Milking, Dressing, &c. as they are usually brought to, and sold white at *Blackwell-Hall*, will amount to about the first Cost of the Wool 500 0 0

So that these 100 Cloths are sold by the Clothier to the Merchant at 10*l.* per Cloth 1000 0 0

And the Merchant pays for the Dying of the said 100 Cloths, viz. one third Part in Grain Colours, at 7*l.* and two thirds in ordinary Colours, at 30*s.* per Cloth 333 6 8

Alfo for Setting, Drawing, Pressing, Packing, &c. 1*z.* per Cloth 75 0 0

The said 100 Cloths will cost the Merchant 14*l.* 1*s.* 8*d.* per Cloth on board, which amounts to 1408 6 8

And to repay him their Costs and Charges here and abroad, with a bare Allowance for Insuranc, and the Interest of his Money, they cannot purchase less, I should think, than twenty-two great Pounds of *Sberbaffee*, or *Persia* fine raw Silk, for every Cloth. Thus he probably receives for the said 100 Cloths, 2200 Pounds wt. of the said raw Silk.

Now, if the half Part of this Silk is wrought up in plain coloured Tabbies, the Manufacturers will receive 1*z.* 7*d.* per lb. 747 1 8

And if the other half Part is wrought up into rich flowered Silks broaded, the Manufacturers will receive 1*l.* 19*s.* 9*d.* per lb. 2186 5 0

And the additional Charge of Dying, suppose but of  $\frac{1}{4}$  Part of the said Silk, into Grain Colours at 9*s.* per lb. 123 15 0

Then the Costs and Charges of 100 Woollen Cloths; shipped from *London* to *Turkey*, and the Manufacture of the raw Silk brought from thence, in Return thereof, must amount to 4465 8 4

The Freight of the said 100 Cloths, and of the said 2200*lb.* of raw Silk is computed at 40 12 6

Her Majesty's Customs on the said 2200*lb.* of raw Silk is 156 15 0

*English* Factors' Commissions abroad on the Sale of the Cloth, and on investing the Returns in Silk, aforesaid, computed at 100 0 0

It is hereby represented to the View of every Reader, that every 2200*lb.* wt. of raw Silk imported from *Turkey*, and manufactured here for our Consumption, without paying any Thing to the Merchants' or Mercers' Gain, pays to the Landholders, the Labourers, and the Crown, the Sum of 4762 15 10

If any Thing is to be added for the Mercers' or Merchants' Gain, and we may depend upon it they will not be at the Trouble of driving their Trades for nothing, we may very well affirm, that the whole Cost of this Manufacture for Consumption cannot be less than the Sum of 5000*l.* So that 2200 Pound Weight of *Turkey* raw Silk manufactured here, pays the Sum of 5000*l.* to the Subsistence of our own People.

This Account takes the Returns upon 100 Cloths exported to *Turkey*, and makes them pay 5000*l.* to the Subsistence of our People. But we have exported annually two hundred Times as many Cloths for *Turkey*, and receive for about half that Quantity of Cloth, the same Kind of Returns in raw Silk for our own Consumption; and consequently our own Consumption of *Turkey* Silk, paid for the Subsistence of our own People the Sum of 500,000*l.* per Annum, besides what is paid by the other half of that Trade; but if the Consumption of 5000*l.* Value of *Turkey* Silk manufactured pays 500*l.* to the landed Interest for the Wool that is exported to *Turkey* in Manufacture, then the annual Consumption of 500,000*l.* Value of that Silk must pay 50,000*l.* per Annum to the landed Interest.

And yet this is not all that the landed Interest receives annually by Means of this half Part of the *Turkey* Trade; the Crown and the Subjects, who receive nine Times

Times as much receive to the Consumption pays a fifth directly one t exported, an Clothes and F landed Interest

It will be o is not paid to and a Part to then considerin Dying Goods, be well said to

It is therefo Silk, 500*l.* is p 333*l.* 6*s.* 8*d.* v on that Manuf and 2186*l.* 5*s.* lours; add to abroad, and M of every 5000*l.* Silk wrought in and I think th preserved, and *England*.

Times as much for Customs and Labour, pay perhaps a ninth Part what they receive to the landed Interest for Clothes and Provision; by which Means the Consumption of *Turkey* Silk, manufactured in *England* either directly or indirectly, pays a fifth Part of its whole Value to the landed Interest, that is, it pays directly one tenth Part of the Value of the Silk by the Woollen Manufacture exported, and as much more by enabling the People to purchase necessary Clothes and Provisions, of which much more than a tenth Part is paid to the landed Interest.

It will be objected here, that the 10*l.* above-mentioned upon a Pack of Wool, is not paid to the landed Interest, since a Part of it is paid to the Shepherd's Wages, and a Part to the Labour of Picking and Sorting this Wool: It is very true; but then considering how much of the Product of the Land is exported to purchase Dying Goods, the tenth Part of the Price of the whole Silk Manufacture may be well said to be paid for the Product of the landed Interest.

It is therefore evident, that of every 5000*l.* Value of Manufacture from *Turkey* Silk, 500*l.* is paid for the Manufacturing of the *English* Wool that is sent abroad, 333*l.* 6*s.* 8*d.* to the charge and labour of Dying 75*l.* to other Labour bestowed on that Manufacture, 747*l.* 1*s.* 8*d.* for manufacturing one Half of our Returns, and 2186*l.* 5*s.* of the other, besides 123*l.* 15*s.* for dyeing the same in Grain Colours; add to this the Freight of 40*l.* 12*s.* 6*d.* besides the Charges to Factors abroad, and Merchants and Mercers at home, and it will appear that near 4000 of every 5000*l.* Value, or that near 400,000 of every 500,000*l.* Value of *Turkey* Silk wrought in *England*, is paid to the Labour of the People bestowed upon it; and I think this enough to show, that such a Trade ought to be carefully preserved, and that it claims a Share in the Regard of every Gentleman in *England*.

This Calculation, though made only on one Particular of the *Levant* Company's Exports, may be adapted to any other Branch of it, or indeed to any other Trade where the Returns are improved to the Increase of our Manufactures, and Employ of our People.

Our Exports for *Turkey* are Cloths, Serges, and other Woollens, Tin, Lead, Pepper, Cochineal, Indigo, Iron and Glass Ware, Leather, Sugar, &c. which I have here computed at near half a Million yearly; and though Mr. *Savary* in his Time complains that the *French*, by their ill Management in their Dying and Manufacturing their Cloths, had lost the greatest Part of the considerable Trade they before had in those Parts, which he says the *English* had secured, yet Mr. *King* takes Notice many Years after, that from a trifling Commerce the *French* carried on, they in the Year 1713 at last equalled us, and I fear have once more surpassed us in the *Levant* Traffick; so that I cannot imagine our *Turkey* Company do now export near the Value above mentioned.

The Returns we have from thence, are raw Silk, Grogam Yarn, Cotton and Cotton Yarn, Wool, Goats Hair, Coffee, Dying Goods, Drugs, Gall, &c.

#### Of Great-Britain's Trade to Africa.

THIS Trade, like the preceding, has for many Years past been carried on by a Company with an exclusive Charter, granted at first by K. *Charles II.* the 18th of December 1661, in Favour of his Brother *James*, then Duke of *York* and *Albany*, for the Term of a thousand Years, with full Power to trade all over the western Coast of *Africa*, from the Port of *Sallee* in South *Barbary*, to the Cape of *Good-Hope*; but these Letters Patent were afterwards revoked by his Majesty, with the Duke's Consent, and regranted in 1663; by a fresh Charter, which, in Consideration of the many illustrious Persons engaged in it, had several new Privileges added, and divers Regulations made, besides those before established for its Government.

Its principal Associates were Queen *Catharine* of *Portugal*, then his Majesty's Consort, Queen *Mary* of *France*, his Mother, the afore-mentioned Duke of *York*, *Henrietta Maria*, Duchess of *Orleans*, his Sister, Prince *Rupert*, and most of the prime Nobility of *England*; the Rest of the concerned, charged with the Direction

of

of the Company's affairs, were chosen from among the principal Merchants of *London*, more especially those who had carried on that Trade which the Company were now put in Possession of. And that a proper Title might be given to this illustrious Association, correspondent to the Dignity of its Constitutents, it was called the *Royal African Company*; and the following Privileges were granted it, and composed its Charter.

I. That *It* should be erected into a Body Politick, both in Name and Effect, and in this Quality should be capable in Law, to have, get, acquire, receive, possess, and enjoy, all Manors, Lands, Hereditaments, Rents, Liberties, Privileges, &c. which any other of his *Britannic Majesty's* Subjects might till then possess and enjoy.

II. That *It* should have a common Seal, of which the Impression on one Side should be an Escutcheon bearing an Elephant, with two Negroes for Supporters, and on the other Side, his Majesty's Portrait.

III. For *Its* Government there shall yearly be chosen, by a Plurality of the Persons named in the Charter, and other Adventurers interested in the Company, a Governor, Deputy, and Sub-Governor, with twenty-four or thirty-six Assistants, at their Election, or as they shall think proper.

IV. That the Governor and his Deputy, with seven of the twenty-four, or thirteen of the thirty-six Assistants, are authorized to take on them the Care and Management of the Company's Affairs, whether for buying or selling the Goods and Merchandise proper to be sent to *Africk*, or that shall come from thence; or in fitting out Ships, making Settlements, and choosing Factors necessary for the well-governing their Trade.

V. The Governor, Sub-Governor, and Assistants, when elected, shall take the Oaths, before the then Lord Chancellor, Keeper of the Seals, or Lord Treasurer, except the Governor be of the Royal Family, in which Case he shall be exempt from the said Oath.

VI. It shall be permitted to the said Governor and Assistants, to hold Courts and Meetings whenever they think proper, and a competent Number being so assembled, may make, ordain, constitute, and establish Laws, Ordinances, and Regulations, for the Government of their Company; and after making, to revoke and disannul them, in Order to form others more convenient; and to impose and inflict Penalties on the Violators of them, either by Fines or Imprisonment, provided that the Laws and Penalties are just, and agreeable to the Laws of *England*.

VII. The Partners and Adventurers may grant and transfer all or any Part of the Stock which they shall have in the Company, to whomsoever they please, provided the said Cessions and Transfers be made in full Court, and registered.

VIII. That the Company may put to Sea, such and as many Ships as they shall judge convenient for their Trade, and furnish them with Artillery, Ammunition, and other warlike Stores for their Defence.

IX. That the Company shall have the Possession and Property of all the Gold and Silver Mines that are, or shall be found, in all the Extent of their Grant; and that *It* only shall deal there, exclusive of all other *English* Traders, in all Merchandize, the Growth of the said Countries, as well as in the Traffick of the Negroes.

That it may equip such, and as many Vessels as it pleases, to send on Discoveries; more particularly of those Places that are hereby granted, and to make the necessary Settlements.

XI. That the said Company shall, nevertheless, pay all the Customs, Subsidies, and Imposts, that are due and payable, as well on the Exports of Goods and Merchandise sent to *Africk*, as on those that shall be imported from thence.

XII. That only the Company's Ships, or those to whom the Governor and Assistants shall give Permission in Writing, may trade in *Africk* within the Limits before prescribed, or bring any of those Merchandises to *England*, under Penalty of Seizure and Confiscation of the said Ships and Goods, &c.

XIII. That the Factors, Masters of Ships, Sailors, and Members of the said Company, may not trade secretly, or otherwise, for their own Account, in any

of the said Part  
nalties of Seizure

XIV. His *Britannic* Majesty reserves to himself and Successors, a Liberty of coming in, at any Time when he shall think proper, as Sharer in the Company's Adventures, upon joining and bringing in a proportionable Fund to that already made by the other Partners; in which Case they shall be admitted to have a Part in the Profits and Losses that it shall acquire or suffer, in Proportion to the Sums that they shall have brought in.

XV. The Company, or its Governors and Assistants, may nominate Captains and Governors, to command in the Colonies that shall be established in the Extent of *Its* Grant; to which Governors and Captains, his Majesty grants Power to command the military Forces that shall be there; to muster them, and to do and execute all that is permitted by the Laws of Arms; either without, for the Defence of the said Colonies against any foreign Invasion, or within, to appease any domestick Troubles and Seditions.

XVI. That to explain what has been said in the IXth Article concerning the Gold Mines, his Majesty reserves to himself, his Heirs, and Successors, two Thirds of the said Mines, on supplying two Thirds of all the Charges that shall occur, for the Working and Transporting of the said Gold; the other Third remaining in Property to the Company, on contributing likewise *Its* one Third to the Expences.

XVII. The Company shall have the Enjoyment of all the Privileges of the City of *London*, as full as any other Company of Merchants, established by Letters Patent of his *Britannic* Majesty, or his Predecessors, may or can enjoy.

XVIII. In fine, his Majesty ordains, as well for himself as for his Heirs and Successors, that all Admirals, Vice-Admirals, Generals, Commandants, Captains, Justices of the Peace, Comptrollers, Collectors, Searchers, and all other Officers and Ministers whatsoever, that they be aiding and assisting to the Adventurers in the *Royal African Company*, their Factors and Agents, whensoever they shall be required; his said Majesty intending, that all contained in the present Charter and Letters Patent shall have its full Effect, and that whatsoever may have been omitted, or less clearly explained than his Majesty intended, shall be supplied or interpreted in Favour of the said Company.

This Charter of *Charles II.* of 1663, was afterwards confirmed by new Letters Patent of the same King, under the date of 27th of *September*, 1673; which were followed two Years afterwards by a Proclamation, in which his Majesty orders the Execution of the Article by which was granted to the Company an exclusive Privilege, upon all the Coasts of *Africk*, prohibiting all his Subjects, that were not Members of it, to trade there.

In fine, neither the Letters Patent, nor the Proclamation, having been sufficient to hinder the Interlopers from disturbing the Company's Trade, *It* had Recourse to the Protection of *James II.* whom *It* had the Honour to see twice among the Number of *Its* Associates; from whom *It* obtained, in the first Year of his Reign, a new and more severe Proclamation, to exclude all the *English* who were not Members of the Company, or that should not have obtained *Its* Permission, from all Trade on the Coasts of *Africk*; which last Proclamation was on the 1st of *April*, 1685.

In consequence of these Grants, the Company commenced, and carried on a considerable Trade; but the vast Charges they were at, in building and supporting their Fortifications, and their great Expence in maintaining and salarizing their Factors and Troops, the frequent Embroils and Altercations they have had with different Nations about their Commerce, and Knavery of some, and Mismanagement of others of their Dependents, obliged them frequently to solicit a national Assistance, and, being greatly in Debt, at last to petition Parliament for Relief, who having taken the State of their Case into Consideration, determined on making a new Company, for extending and improving the Trade to *Africa*; which they did by the following Act:

23 Geo. II.  
P. 547.

The Preamble sets forth, That the Trade to and from *Africa*, being very advantageous to *Great-Britain*, and necessary for the supplying the Plantations, and Colonies belonging thereto, with a sufficient Number of Negroes, at reasonable Rates, ought for that Purpose to be free and open to all his Majesty's Subjects: It is therefore enacted, That it shall be lawful for all the King's Subjects to trade to and from any Place in *Africa*, between the Port of *Sallee* in *South Barbary*, and the Cape of *Good-Hope*, without any Restraint whatsoever, save as herein after expressed.

P. 548.

All his Majesty's Subjects who shall trade to and from *Africa*, between Cape *Blanco* and the Cape of *Good-Hope*, shall for ever hereafter be deemed a Body Corporate and Politick, in Name and in Deed, by the Name of *The Company of Merchants trading to Africa*, and the same Name shall have perpetual Succession, and a common Seal; and they shall sue and be sued, and do any other Act, which any Body Corporate or Politick as such, may lawfully do.

All the *British* Forts, Settlements, and Factories, on the Coast of *Africa*, beginning at Cape *Blanco*, and extending from thence to the Cape of *Good-Hope*, inclusive, and all other the Regions, Ports, &c. comprehending within the said Limits, which are now claimed by, or in the Possession of, the *Royal African Company of England*, or which may hereafter be in the Possession of the Company hereby established, shall, from the passing of an Act for divesting the *African Company* of their Charter, Forts, and all other their Property on the Coast of *Africa*, their Goods and Merchandize only excepted, be absolutely vested in the new Company established by this Act, and their Successors, to the Intent that the said Forts, Settlements, and Premises, shall be employed only for the Protection, Encouragement, and Defence of the said Trade.

The Company established by this Act shall not trade to or from *Africa*, in their corporate or joint Capacity; nor shall they have any joint or transferable Stock; nor shall they borrow Money on their common Seal.

P. 549.

The Direction and Management of the Affairs of the new Company shall be by a Committee of nine Persons to be chosen annually; who are to meet as often as shall be necessary, at some Place in the City of *London*; and the said Committee, or any five of them, or the Majority of them assembled, shall, from and after the passing such Act for divesting the *African Company* of their Charter, &c. or before, so far as the *African Company* shall consent thereto, have full Power to make Orders for the governing and improving the Forts and Factories which are or shall be built within the Limits aforesaid, and to appoint Governors, Deputy-Governors, or any other Officers civil or military, and to remove or displace them when they shall see fit; and to make Orders and Regulations for the better Government of the said Officers and Servants abroad, and to take Security for their good Behaviour, and Obedience to the Regulations established by this Act, and to such as the Committee shall from Time to Time make; so as no Orders or Regulations made by the Committee shall lay any Restraint whatsoever on the Trade or Traders, contrary to the Intent of this Act.

P. 550.

The Traders, or Persons intending to trade, to or from *Africa*, who shall, on or before the 30th of *June* 1750, have paid into the Hands of the Chamberlain of the City of *London*, 40s. each for their Admittance into the Freedom of the said Company, are empowered to meet on the 30th of *July* 1750, in the *Guild-hall* of the said City, and choose three Persons: And such as shall, on or before the said 30th of *June* have paid into the Hands of the Clerk of the Merchants' Hall in the City of *Bristol*, the like Sum of 40s. are empowered to meet on the 10th of *July*, in some convenient Place in the City of *Bristol*, and choose three other Persons; and such as shall, on or before the said 30th of *June*, have paid into the Hands of the Town Clerk of *Liverpool*, the like Sum of 40s. are empowered to meet on the said 10th of *July*, in the Town-Hall of *Liverpool*, and choose three other Persons; and the nine Persons so chosen shall be the first annual Committee, and shall continue in their Office for one Year, and until others shall be chosen in their Room.

In all future Elections, the Committee shall be nominated on the 3d of *July* in every Year, in Manner following, *viz.* three shall be nominated by the Freemen of

the said Company admitted in *London*, who shall assemble for that Purpose at *London*; three by the Freemen admitted into the said Company at *Bristol*, who shall assemble for that Purpose at *Bristol*; and three by the Freemen of the said Company admitted in *Liverpool*, who shall assemble for that Purpose at *Liverpool*.

The Freemen of the said Company in any of the said Cities and Towns, respectively, may choose other Committee-men in the Place of those that shall happen to die, be removed, or refuse to act; and ten Days previous Notice shall be inserted in the *London Gazette* by the Committee, of the Time and Place where such Election is to be had.

If at the Time appointed for the Elections of Committee-men, the Freemen in any of the said Cities or Towns shall neglect to proceed to such Choice, such as shall be chosen in the other of the said Cities or Towns, though less in Number than nine, may act as the Committee until the next annual Election; and all Elections shall be determined by the Majority of the Votes present; and where the 3d of *July* shall fall on a *Sunday*, the annual Election of Committee-Men shall be on *Monday* the 4th of *July*.

In Case of an Equality of Votes at any Election, the Lord-Mayor of *London*, the Mayor of *Bristol*, and the Mayor of *Liverpool*, respectively, shall determine which of such Persons shall be the Committee-Man.

The Committee shall meet for the first Time on the first *Monday* in *August*, P. 552 1750, and shall then settle the Manner of their future Meetings, and of the Notices and Summonses to be sent for that Purpose to the Members of the Committee; and no Order or Resolution of the Committee, to which all the Members present at the making thereof shall not be consenting, shall be binding, unless confirmed at a subsequent Meeting, at which all the Members of the Committee shall be present, or of which the Absentees shall have had the usual Notice.

At every Meeting, when the Time prefixed for entering on Business is come, and so many as are necessary to make a Committee are present; before they enter upon Business, a Chairman shall be chosen by Lot, out of the Committee-Men then present who shall take the Chair for that Meeting; but he shall not vote that Day on any Question, unless the Votes are equal, in which Case he may vote; and every Committee-Man, who shall not be present at the Choice of the Chairman, shall not vote on any Question before the Committee that Day; but he may be present, and give his Opinion in all Matters as any other Committee-Man may do; and all Matters which shall be decided by a Plurality of the Votes of such of the Committee-Men as shall be entitled to vote, shall be deemed to be decided by a Majority of the Committee then present.

Such of his Majesty's Subjects as shall, on or before the 30th of *June* 1750, pay to the Chamberlain of *London*; the Clerk of the Merchants' Hall in *Bristol*, or the Town-Clerk of *Liverpool*, 40s each for their Freedom, shall be the first Members of the said new Company: And from and after the said 30th of *June*, any other of his Majesty's Subjects who shall trade to or from *Africa*, shall be admitted Freemen of the said Company at *London*, *Bristol*, or *Liverpool* upon Payment of 40s. each, to such Persons as the Committee shall appoint to receive the same.

No Persons admitted Freemen after the said 30th of *June*, shall vote at the Election of Committee-Men until one Year after their Admission. P. 553.

The Chamberlain of *London*, the Clerk of the Merchants' Hall in *Bristol*, the Town-Clerk of *Liverpool*, and such other Persons as the Committee shall appoint to receive the said Sums of 40s. for the Admission of Persons into the Freedom of the Company, shall sign and deliver to every such Person a Certificate of Payment thereof, for which they shall be paid 2s. 6d. as a Fee; and no more, and the Names and Places of Abode of every such Person shall be entered in a Book to be kept for that Purpose by the Receivers.

The Chamberlain of *London*, the Clerk of the Merchants' Hall at *Bristol*, and the Town Clerk of *Liverpool*, shall pay and deliver over the said several Sums of 40s. received by them, and the Books, in which the Names and Places of Abode of the Persons making Payment thereof are entered, to such Persons as the Committee shall appoint to receive the same.

The Persons who shall be appointed by the Committee at *London*, *Bristol*, and *Liverpool*, to receive the said Sums of 40s. shall annually, or oftener if required, pay

pay and deliver over the same, together with the Lists of the Names, and Places of Abode of the Persons from whom received, to the Committee, as they shall direct.

An exact List shall be kept at the Office of the Committee in *London*, of the Names and Places of Abode of all Persons admitted into the Freedom of the said Company, distinguishing where each Person was admitted; which List shall yearly, ten Days at least before the Annual Election, be printed and delivered gratis to the Members who shall desire the same.

No Person shall be capable of being chosen, or acting as a Committee-Man, above three Years successively; and two or more Persons, who shall be in Copartnership in Trade, shall not be chosen, during the same Time or Year: And none of the said nine Persons, during the Time they shall be of the Committee, shall directly or indirectly trade jointly or in Copartnership to *Africa*, or lade any Goods or Merchandizes on board the same Ship in which any one of the Committee shall, for that Voyage, have before laden Goods, to be carried to any Place in *Africa*.

23 Geo. II.  
P. 535.

The Committee may from Time to Time invest such Part of the said Money in their Hands, as they shall judge necessary, in the Purchase of Goods and Stores; which, after the same are insured, shall be exported to *Africa*, and there sold, and applied for the sole Use, Preservation, and Improvement of the Ports and Settlements, and for the Payment of the Wages and Salaries to the Officers and other Persons employed there; but the Committee shall not export from *Africa* any Negroes or other Goods in Return, or in any other Manner carry on a Trade to or from *Africa*. And an Account of the Committee's Receipts and Payments shall be kept in a Book which shall be open at their Office in *London*, to be perused gratis at all seasonable Times, by any Members of the Company.

The Commissioners for Trade and Plantations may remove any of the Committee-Men, or Officers, or Servants appointed by them, who shall be guilty of any Misbehaviour, contrary to this Act; giving Notice of such Removal, and specifying the Causes thereof to the Committee; and when a Committee-Man shall be so removed, the Committee shall give Notice forthwith to the Mayor of the City or Town by whom the said Person was chosen, to elect another in his Room; and if any Officer or Servant shall be removed, the Committee may appoint another in his Stead.

Whenever the Committee-Man shall be charged with Misbehaviour in his Employment, the Commissioners for Trade and Plantations shall summon him to appear before them; and upon his Attendance, or Default, examine into the Truth of the Charge, before they shall remove him from his Employment.

P. 536.

The Committee shall render an Account of all their Transactions once a Year to the Commissioners for Trade and Plantations, or oftener if required; in which shall be contained an Account of all the Monies received and disbursed by them, or by their Order; and also all the Orders and Instructions given, as well to their Officers and Servants in *Great-Britain*, as on the Coasts of *Africa*; and all their Answers thereto; and all other the Transactions of the Committee.

The Committee, out of the Monies they shall receive, may deduct annually a Sum not exceeding 800*l.* for defraying, in the first Place, the Salaries of their Clerks and Agents, at *London*, *Bristol*, and *Liverpool*; the House-Rent of their Office in *London*, and all other Charges of Management, Commission, or Agency, in *England*; and the Residue of the said Sum shall be divided amongst themselves, as they shall think proper, as a Compensation for their Trouble and Attendance; and the Rest of the Monies shall be applied wholly to the Maintenance and Improvement of the Ports and Settlements on the Coast of *Africa*, which shall be in the Possession of the said Company, and for providing Ammunition and Stores, and Officers and Soldiers to defend the same.

The Committee shall, within one Month after the Expiration of the Year for which they shall be chosen Committee-Men, lay before the Cursitor Baron of the *Exchequer*, an Account upon Oath of the Money received by them during the preceding Year, and of the Application thereof; and the Cursitor Baron, within one Month after, shall audit and pass the same; and he may examine any of the said

Committee, and such other Persons as he shall judge necessary upon Oath, touching any of the Articles or Particulars therein; and the Account so audited and passed shall be a full Discharge to the said Committee, without their being compelled to render any other; and the Committee shall lay before the Parliament every Session a Copy of the said annual Account, and of all the Orders and Regulations made by them in the preceding Year relating to the said Forts and Settlements, or the Government of their Officers or Servants employed therein; and Copies of the same shall be annually laid before a general Meeting of the Members of the said Company, to be held in *London, Bristol, and Liverpool*, of which fourteen Days Notice shall be previously given in the *London Gazette*.

23. Geo. 3.  
P. 557.

No Officer or other Person employed by the Committee at any of their Forts or Settlements, shall in any Manner, or on any Pretence, obstruct any of his Majesty's Subjects in Trading; and the Forts, Warehouses, and Buildings, which are or shall be erected by the said Company, shall at all Times be free and open to all his Majesty's Subjects, to be used as Warehouses for depositing Gunpowder, Gold, Elephants' Teeth, Wax, Gums, and Drugs, and no other Goods.

The said Forts, Warehouses, and Buildings, shall, in Case of Necessity or Danger, be free and open to all his Majesty's Subjects, for the Safety of their Persons, and Security of all their Effects.

Any of his Majesty's Subjects trading to *Africa*, for the Security of their Goods or Slaves, may erect Houses and Warehouses under the Protection of the said Forts, or elsewhere, in any other Part of *Africa* within the Limits aforesaid; and the same shall be their Property, and not be disposed of, or let, to any Foreigner whatsoever.

If the Commander or Master of any Vessel trading to *Africa*, shall, by any indirect Practice whatsoever, take on board or carry away from the Coast of *Africa* any Negro or Native of the Country, or shall commit, or suffer any Violence to be committed on the Natives, to the Prejudice of the said Trade, he shall forfeit 100*l.* one Moiety thereof to go to the Use of the Company towards maintaining the said Forts and Settlements, and the other to the Prosecutor.

P. 558.

The Lords of the Admiralty shall give Instructions to the Captains of such of his Majesty's Ships of War as shall be stationed, or ordered to cruize within the Limits aforesaid, from Time to Time to inspect and report to them the State and Condition of the said Forts and Settlements; and the Officers of such Forts are required to permit such Inspection; and Copies of all the said Reports shall be laid before the Parliament every Session.

Such Commission Officers of his Majesty's Navy as the Lords of the Admiralty shall appoint for that Purpose, shall inspect and examine the State and Condition of the Forts and Settlements on the Coast of *Africa* in the Possession of the Royal *African* Company, and of the Number of Soldiers therein; and also the State and Condition of the military Stores, Castles, Slaves, Canoes, and other Vessels and Things belonging to the said Company, and necessary for the Use and Defence of the said Forts and Settlements, and shall, with all possible Dispatch, report how they find the same to the Lords of the Admiralty; and the said Company, their Officers and Servants, are required to permit such Inspection and Examination, and to assist therein; and a Copy of the said Report shall be laid before Parliament at the Beginning of the next Session.

The Accountant-General of the Court of *Chancery*, and such two of the other Masters of the said Court as the Lord Chancellor, or Lord Keeper of the Great-*Seal*, shall nominate for that Purpose, shall be Commissioners for examining into the Claims of the Creditors of the Royal *African* Company; and the said Commissioners, or two of them, are empowered, according to their Discretion, by Examination of the Parties interested, or the Testimony of Witnesses upon Oath, or by the Inspection and Examination of the Books, Deeds, Writings, and Accounts of the said Company and their Creditors, to examine into the said Claims, and enquire and state when the same were respectively incurred, and for what Consideration they were originally contracted; and upon what Consideration the Claimants became intitled thereto, together with their Opinion of the Justice and Reasonableness of such Debts; and for that Purpose the Creditors are to deliver

unto such Officers and at such Place within the City of *London* as the said Commissioners, or two of them, shall appoint, of which Notice shall be given in the *London Gazette*, an Account of their respective Claims, with a Copy of their Securities for the same; and such of the said Creditors as reside in *Great-Britain* or *Ireland*, shall make their Claims on or before the 30th of *August* 1750, and such as are resident on the Coast of *Africa*, or elsewhere beyond the Seas, shall make their Claims on or before the 30th of *December* 1750, and the Directors and Officers of the said Company, and all other Persons whom the Commissioners shall think fit to examine touching the said Matters, are required to attend the Commissioners at the Times and Places they shall appoint, and to give the best Information they can touching the said Claims; and to produce all Books and Papers in their Custody or Power relating thereto; and the Commissioners, or two of them, are authorized to administer an Oath for the better Discovery of the Truth of the said Facts; and they are to close their Examinations of all the Claims that shall be made by such of the Creditors who reside in *Great-Britain*, or *Ireland*, on or before the 31st of *January*, 1750; and of such as reside in *Africa* or other Parts beyond the Seas, on or before the 28th of *February*, 1750; and are to lay the Accounts of their Proceedings before the Parliament with all convenient Speed. If any Person summoned shall neglect or refuse to appear and be examined touching the Matters and Things by this Act directed to be enquired into, or shall refuse to answer, or shall not fully answer to the Satisfaction of the Commissioners all Questions put to them, as well by Word of Mouth as by Interrogatories in Writing, or shall refuse or neglect to produce all Books of Accounts and Papers in their Custody or Power relating to the Premises, any two of the Commissioners may commit such Person to such Prison as they shall think fit, to remain there without Bail or Mainprize until he shall submit in all Things aforesaid; and the Commissioners, where any Person shall be committed for refusing to answer, or for not fully answering any such Question, shall specify the Question in their Warrant and Commitment.

23 Geo. II.  
P. 560.

P. 561.

The Royal *African* Company, &c. are restrained for one Year to be computed from the 17th of *March*, 1749, from assigning or disposing of any of their military Stores, Ammunition, Slaves, Canoes, Vessels, and Things necessary for the Use or Defence of their Forts and Settlements; and all Actions and Suits for Recovery of any Debt due by, or contracted on Behalf of, the said Company, shall be stayed for one Year, to be computed from the said 17th of *March*, 1749.

The Remainder of this Act is about Mr. *David Oribton* then in Custody, and the Charges of obtaining the Act, &c. And another was made in the succeeding Session viz. 24 Geo. II. for allowing further Time to the Commissioners appointed by and in Pursuance of the preceding Act, to enquire into the Claim of certain Creditors of the Royal *African* Company, &c. viz. till the 12th of *January*, 1752.

26 Geo. II.  
P. 773, 774.

P. 775.

This Act recites the two preceding ones, and in Pursuance of them, that a Survey had been taken of all the Forts and Castles of the Royal *African* Company on the Coast of *Africa*, by Captain *Thomas Pye*, Commander of his Majesty's Ship *Humber*, and of the Quantity, Number, and Quality of Cannon, and their military Stores, Canoe-Men, Castle Slaves, Canoes, and Vessels, then at each respective Fort belonging to the said Royal *African* Company. And whereas the said Company are willing to surrender all and singular their Lands, Forts, &c. and all their Estate, Property, Interests, and Effects whatsoever, for such Compensation and Satisfaction, and to be applied in such Manner as herein after is expressed and directed: Be it therefore enacted, that the Royal *African* Company of *England*, from and after the 10th Day of *April*, 1752, shall be, and they are hereby absolutely divested of, and from their said Charter, Lands, Forts, Castles, &c. and all other their Estate, Property, and Effects whatsoever; and that all and every the *British* Forts, Lands, Castles, Settlements, and Factories, on the Coast of *Africa*, beginning at *Port Sallee*, and extending to the Cape of *Good-Hope* inclusive, which were granted to the said Company by the said Charter, or which have been since erected or purchased by the said Company; and all other the Regions, Countries, &c. lying and being within the aforesaid Limits, and the Islands near adjoining to those Coasts, and comprehended within the Limits

described by the said Charter, and which now are, or at any Time heretofore have been in the Possession of, or claimed by the said Royal African Company of England, together with the Cannon, and other military Stores, Canoe-Men, &c. at and belonging to the said Forts, Castles, &c. such Stores as have been made Use of in the Service of the Forts, and such Canoe-Men and Slaves as may have died since the taking of the said Survey, only excepted, and also all Contracts and Agreements, made by, or for, or on the Behalf of the said Royal African Company, with any of the Kings, Princes, or Natives, &c. and all other the Property, Estate, and Effects whatsoever of the said Royal African Company, shall, from and after the said 10th of April, 1752, be vested in, and the same and every of them are, and is hereby fully and absolutely vested in the said Corporation, called and known by the Name of *The Company of Merchants trading to Africa*, and their Successors, freed and absolutely discharged of and from all Claims and Demands of the said Royal African Company and their Creditors.

Provided always, that the divesting the said Royal African Company of their Charter, and vesting the before-mentioned Premises in the said Company of Merchants trading to Africa, shall not extend to give the said Company, or their Committee, any other Rights, Privileges, or Powers, than such as are given to the said Company by the afore recited Act of 23 Geo. II.

And Bance Island, in the River *Sierra Leon*, with its Forts and Buildings, appearing to belong to *Alexander Grant*, *John Sargent*, and *Richard Oswald* of London, Merchants, they shall continue in the quiet Possession of it, and it shall be absolutely vested in them, their Heirs and Assigns; any Thing herein or in any former Acts to the contrary notwithstanding; though with the *Proviso*, that it shall never be lawful for them to alienate their Right and Interest therein to any foreign Person.

The new Company of Merchants may, with the Consent of the Commissioners for Trade and Plantations, raise and arm, train and muster, such military Forces as to them shall seem requisite and necessary, and subject them to martial Discipline, so as the Punishment does not extend to the Loss of Life or Limb.

They may also erect Courts of Judicature for hearing and determining all Causes on Account of maritime Bargains, &c. or concerning any Person residing within the Bounds and Limits aforesaid.

Provided nevertheless, that his Majesty, his Heirs and Successors, shall have full Power, at his or their Will and Pleasure, from Time to Time, by his or their Sign Manual, to revoke all such Powers which shall be given to any Persons for raising, arming, and training the military Forces, and all such Rules and Regulations as shall be given or established, and to grant all military Powers on the said African Coast, and establish such Rules and Regulations as he or they shall from Time to Time think fit; and also to revoke and repeal all such Courts of Justice as shall be erected; and to erect and establish such other Courts of Justice there, as he or they shall from Time to Time think fit.

And be it further enacted, that all Contracts and Agreements which have been made by the said Royal African Company with any of the Kings, &c. on the said Coasts, and all Deeds, &c. which did belong to the said Company, shall, on or before the said 10th Day of April, 1752, be delivered over to the said Company of Merchants trading to Africa, &c.

And for making a full Compensation and Satisfaction to the Royal African Company for their said Charter, Lands, Forts, Castles, &c. Be it enacted, that out of all or any the Aids or Supplies granted to his Majesty in this Session of Parliament, there may, and shall be applied and paid, the Sum of one hundred and twelve thousand one hundred and forty-two Pounds, three Shillings, and three Pence, without Account, to such Persons, and in such Proportion, and in such Manner as is herein after particularly directed and appointed.

That out of the same Sum of 112,142l. 3s. 3d. the Commissioners of his Majesty's Treasury, or any three of them for the Time being, do issue and pay the Sum of one thousand six hundred and ninety-five Pounds and three Shillings, to *Richard Edwards* and *Edmund Sawyer*, Esqrs. two of the Masters of the High Court of Chancery. and *John Waple*, Esq. one other of the Masters, and also

Accountant-

Accountant-General of the said Court; being the Commissioners appointed to examine and state the Claims of the Creditors of the said Royal African Company, by the 23d of his present Majesty, for their Trouble, and in Satisfaction of the Expences of executing the said Commission.

And it is further enacted, That out of the aforesaid Sum of 112,142*l.* 3*s.* 3*d.* the further Sum of eighty-four thousand six hundred and fifty-two Pounds, twelve Shillings, and seven Pence, be distributed and paid to the several Creditors mentioned and set forth in the second Schedule to this Act annexed, in the respective Sums and Proportions therein mentioned, in full Satisfaction of all and every their Demands.

25 Geo. II.  
P. 780.

That twenty-three thousand six hundred and eighty-eight Pounds, fifteen Shillings, and five Pence, be paid and divided to and amongst the Persons named in the third Schedule to this Act annexed, in the Sums and Proportions therein mentioned, being such of the Proprietors of African transferrable Stock as were possessed of the same on the 31st Day of December, in the Year of our Lord 1748, the same being computed to be at, and after the Rate of ten Pounds *per Centum* on the said Stock, so possessed by them at that Time, in full of all their Right and Title to the same, or any Part thereof.

That the Sum of two thousand one hundred and five Pounds, twelve Shillings, and three Pence, Residue of the said Sum of 112,142*l.* 3*s.* 3*d.* be paid and divided to and amongst the Persons named in the fourth Schedule to this Act annexed, the Sums and Proportion therein mentioned, being such of the Proprietors of African transferrable Stock as have become possessed of the same since the said 21st of December, 1748, being computed to be at and after the Rate of five Pounds *per Centum* on the Stock so possessed by them, in full of all their Right and Title to the same or any Part thereof.

And be it further enacted, That from and after the said 10th of April, 1752, the said Royal African Company shall cease to be a Corporation, and all Claims and Demands against it, &c. are hereby declared to be null and void, &c.

P. 781.

And that the said Richard Edwards, Edmund Sawyer, and John Waple. Esqrs. or such other of the Masters of the High Court of Chancery as may be hereafter appointed, shall be constituted and appointed Commissioners for the making out and delivering Certificates to all the Creditors of the said Royal African Company, and the Proprietors of their Stock in the said Schedules particularly mentioned, and for other the Purposes in this Act contained, for the Space of two Years, to be computed from the 1st of January, 1752. And the said Commissioners, or any two of them, are hereby impowered and required with all convenient Speed to make out, under their Hands, and to deliver all and every the Creditors of the said Company, and to the several Proprietors of African transferrable Stock, mentioned in the said several Schedules, Certificates of what is due, or allowed to them respectively as aforesaid, and to take proper Receipts for the same,

And in Case of any of the Creditors' or Proprietors' Death, or becoming Bankrupts, the Certificate shall be delivered to their respective Executors or Assignees.

P. 782.

And be it further enacted, That all the Creditors of the said Company, and Proprietors of their Stock, on Receipt of the Certificate herein before directed to be made out and delivered, shall, upon their respective corporal Oaths, which the said Commissioners are hereby authorized to administer, produce and deliver up to the said Commissioners, all and singular the Bonds, Bills, &c. relating to their respective Debts, which at the Time of the Examination of their Claims, or that of receiving the said Certificate, were, or shall be, in their Hands, which the said Commissioners are hereby impowered and required to cancel and destroy; and the Commissioners are hereby impowered to stop and retain the Certificates of such as shall not deliver up the Securities to their Satisfaction, or as they shall require.

And that the Creditors and Proprietors, or their Executors or Assignees, shall attend the said Commissioners, on such Days and Times, and at such Place,

That the Lord High Treasurer, or any three or more of the Commissioners, <sup>25 Geo. II. P. 783.</sup> are hereby authorized and impowered, on Tender to them of the Certificates, to issue and pay to the Persons named in them, the several Sums therein respectively contained.

That in Case of the Death of any of the Commissioners, others shall be appointed by the Lord High Chancellor; and the Commissioners are hereby required to lay Accounts of their Proceedings before the Parliament.

And it is further enacted, that the said Company of Merchants trading to *Africa*, and their Successors, are hereby required, with all convenient Speed, to sell and dispose of all the Goods, Wares, and Merchandize of the said Royal *African* Company, which shall come to the Hands of the said Company of Merchants or their Agents, the military Stores, Slaves, Canoes, and Vessels, in the first Schedule to this Act annexed, excepted, for the best Price that can be got for the same; and that the said Company of Merchants do every Session of Parliament, until the whole shall be disposed of, lay before both Houses of Parliament, an Account of the Disposition of the said Goods, &c.

And that the said Commissioners shall and may take for each Certificate from the Parties obtaining the same, a Sum not exceeding the Rate of two Pounds *per Cent.* upon the Money contained therein, where the Sum shall not be more than one hundred Pounds; and a Sum not exceeding one Pound *per Cent.* where the Money contained therein is above one hundred Pounds, and not exceeding one thousand Pounds; and a Sum not exceeding ten Shillings *per Cent.* where the Money contained therein does exceed one thousand Pounds; which respective Sums, and no more, the said Commissioners shall and may demand and take, in full Recompence for all Trouble and Expences which they or their Clerks, &c. shall be at, in the Execution of the Powers thereby given them.

And whereas, at a general Meeting of the Creditors of the said Royal *African* <sup>P. 784</sup> Company, on the 4th of *March* 1747, *Robert Myre* and *William Mills*, of *London*, Merchants, and *John Leapidge*, Stationer, with others, were chosen and appointed by the said Creditors, to solicit a Satisfaction for the just Debts due and owing to them; and as it is reasonable that all the said Creditors should contribute to the Charges of such Solicitation, and a proportionable Part of the Expences for obtaining this and the last Act; every Creditor of the said Company whose Name is expressed in the second Schedule, shall pay to the said *Robert Myre*, &c. or one of them, a Contribution, at, and after the Rate of two Pounds *per Cent.* upon the Sum in the said Schedule expressed, to be by them, the said *Robert Myre*, &c. applied in Payment of all such Charges and Expences as they have been or shall be at, &c. and no one of the said Creditors shall have a Certificate of, or for, his or her said Debt or Claim from the said Commissioners, until he, or she, shall produce to them a Note in Writing, under the Hands of the said *Robert Myre*, &c. or one of them, expressing the Receipt of the said Contribution. And the said *Robert Myre*, <sup>P. 785</sup> &c. shall, on or before the 10th of *May*, 1754, or within three Calendar Months next after all the Contributions aforesaid shall have been paid, if the same shall be sooner paid, lay and submit an Account thereof, and of their Payments and Disbursements, in Writing under their Hands before the said Commissioners for their Examination and Allowance; and shall dispose of the Balance then remaining in their Hands, if any, in such Manner as the said Creditors at a general Meeting to be summoned for that Purpose by Advertisement in the *London Gazette*, or the major Part in Value of the Creditors, at such Meeting, shall resolve, agree, or direct.

And whereas there is a considerable Sum of Money due to *William Newland*, the Solicitor to the Royal *African* Company, for his Fees, Labour, and Disbursements, in diverse Solicitations on their Account in their general Business since the 31st of *December* 1749; and it being just and reasonable that all the Proprietors of the transferrable Stock of the said Company should contribute to a proportionable Part of the Expences for obtaining the last and present Act, every Proprietor of the said Company, whose Names are expressed in the third and fourth Schedules to this

2 c. Geo. II.  
P. 726.

Act annexed, shall pay to *John Vaughan*, *Solomon Ashley*, and *Bitye Lake*, Esqrs, Captain *Thomas Collett*, and *Samuel Zell*, Gentleman, or one of them, a Contribution, at, and after the Rate of two Pounds *per Centum*, for and upon the respective Sums in the said respective Schedules expressed to be payable to the Persons therein mentioned, to be by them the said *John Vaughan*, Esq. &c. applied in Payment of such Sums as are now due to the said *William Newland*, on the Account before-mentioned; and a proportionable Part of the Charges for obtaining the said Acts, in such Manner as shall be adjudged and directed by the said Commissioners in Writing under their respective Hands; and no one of the said Proprietors shall have a Certificate for his or her said Share and Proportion from the said Commissioners, until he or she shall produce to them a Note in Writing, under the Hands of the said *John Vaughan*, Esq. &c. or one of them, expressing the Receipt of the said Contribution; and the said *John Vaughan*, Esq. &c. shall, on or before the 10th of *May*, 1754, or within three Calendar Months next after all the Contributions aforesaid shall have been paid, if the same shall be sooner paid, lay an Account thereof, and of their Payments and Disbursements, in Writing under their Hands, before the said Commissioners for their Examination and Allowance, and shall dispose of the Balance then remaining in their Hands, if any, in such Manner as the said Creditors at a general Meeting to be summoned for that Purpose, by an Advertisement in the *London Gazette*, or the major Part of them in Value, present at such Meeting, shall direct and appoint.

This Act shall be taken and deemed as a publick Act, &c.

The old Company being thus divested of their Charter, the Trade to *Africa* became free and open to all his Majesty's Subjects, but was and is still carried on under the Direction and subject to the By-Laws of a new Set of Merchants, stiled, *The Committee of the Company of Merchants trading to Africa*; and by an Act of Parliament passed in the Year 1765, all the British Forts and Settlements upon the Coast of *Africa*, lying between the Port of *Sallee* and *Cape Rouge*, together with all the Property, Estate, and Effects of the Company of Merchants trading to *Africa*, in or upon the said Forts, Settlements, and their Dependencies, are vested in his Majesty King *George III.* and other Regulations are made, for securing, extending, and improving the Trade to *Africa*, which has restored it to a flourishing State; and an annual Grant is made by Parliament of from 13,000*l.* to 15,000*l.* for repairing and maintaining the Forts.

Our Exports for this Trade are Cloths, and other Woollens, Mullins, and some other *India* Goods, Spices, Drugs, Tobacco, Sugar, dying Woods, Alum, Paper, Steel, Iron, Lead, Toys, Mercery and Hard Ware, Ivory and Box Combs, Glass Beads, &c.—And our Returns from thence are Slaves, Gum Senegal, Oilrich Feathers, Indigo, Gold Dust, Dates, *Damas* Raisins, Copper, Wax, Wool, Goat Skins, Coral, bitter Almonds, &c. In which Description I include the Particulars of that small Branch of Trade we carry on from hence with *Sallee*, *Tunis*, *Tripoli*, and *Algiers*.

I shall in the next Place give some Account of the Original of our Trade to *India*, and of the first Institution of a Company for carrying it on.

*Of the Trade between Great-Britain and Asia, more especially that carried on by our East-India Company.*

OUR Knowledge of the *East-Indies* was early, and is very reasonably supposed to be derived to us from the *Romans* during their Settlement among us; though it is not said that any Commerce was attempted with those Parts till the celebrated *Alfred*, who so gloriously filled the *British* Throne, sent, in 883, a favourite Ecclesiastick, one *Sigbelmus*, with Alms for the poor distressed Christians of *St. Thomas* and *St. Bartholomew* in the *Indies*; this we learn from the *Saxon* Annals, and though an extraordinary Event, they alone would put it past Doubt, had we not the Confirmation of it from *William* of *Malmsbury*, who writes, that the said *Sigbelmus* left in the Treasury of *Sherburn* Church in *Dorsetshire*, of which on his Return he was made Bishop, some Jewels and Spices that he had brought with him from *Asia*.

This

This Voyage before any Trade ed in this Work, Eyes of our Merchants produce; they had and after struggling have at last happily not ranked as a

It is said, that at *Seville* in *Spain* the *India* Trade from both Books and than sufficient, in but in that Day in such a bold Use of this judicious by the *Puillanin* Ships, and more and by their Access would be to their *Elizabeth's* Reign certain a Design of securely, they finally granted them thereby constituted *Company of the M* Seal, and to be made on the 1st of *July* privilege of making Years, with a Permission of foreign Coin, these Kingdoms

This Charter was during that Term Space this Charter it should upon two Experience should publick Benefit, and favourable Company and the

In Consequence Stock for promotion; in which seventy-two thousand terminated to considerable Ships for the Tons, was Admiral *Sufannab* and *Asic* of an hundred and four hundred and Pounds; and the depended in the *Pu*

They sailed from to *India*, without *Lancaster*, there *Moluccas*, and set here in Safety, a

The Death of to the Throne, i

This Voyage however was not soon repeated by any other, and it was still later before any Trade was settled from hence; the *Venetians*, as I have already mentioned in this Work, having supplied us always with the *Asiatick* Commodities, till the Eyes of our Merchants were opened to the Advantages which a direct Trade would produce; they solicited the Protection of the Throne to their infant Engagements, and after struggling with many Difficulties and Oppositions from jarring Interests, have at last happily brought the Company trading there, to be at least second, if not ranked as a first, amongst the most opulent Associations in the World.

It is said, that in the Year 1527, one Mr. *Robert Thorne* of London, then settled at *Seville* in Spain, was the first that ever recommended the establishing an *East-India* Trade from England, and added such strong Reasons to his Proposals, which both Books and Experience had furnished him with, as would have been more than sufficient, in this enlightened Age, to have rendered his Schemes successful; but in that Dawn of commercial Knowledge, People were timorous of engaging in such a bold Undertaking as this then appeared to be, and consequently the Aims of this judicious Gentleman, for his Country's Prosperity, were rendered abortive by the Puillanimity of those they were addressed to. And though many *English* Ships, and more *Englishmen*, in foreign Bottoms, were successively going there, and by their Accounts it made appear how easy an Establishment of Factories, &c. would be to their Countrymen in those Parts, nothing was done in it till Queen *Elizabeth's* Reign, when several great Men and eminent Merchants began to entertain a Design of establishing such a Commerce. And in order to do it the more securely, they solicited her Majesty for an exclusive Charter, which she accordingly granted them on the 31st of *December*, 1600, in the 43d Year of her Reign; thereby constituting them a Body Corporate, by the Stile of *The Governor and Company of the Merchants of London, trading to the East-Indies*, with a Common Seal, and to be managed by a Governor and twenty Directors, yearly to be chosen, on the 1st of *July*, or within six Days after. She likewise granted them the Privilege of making By-Laws, allowed them to export Goods Custom-free for four Years, with a Permission also to carry out thirty thousand Pounds, every Voyage, of foreign Coin, provided they brought an equal Sum of similar Specie into these Kingdoms by their Trade.

This Charter was for fifteen Years, and her Majesty engaged to grant no other during that Term; but this Cession was with the *Proviso*, that if within the said Space this Charter should appear to be in any Respect detrimental to the Publick, it should upon two Years' Warning, under the Privy-Seal, become void; but if Experience should evince the contrary, and this new Corporation appear to be a publick Benefit, then the promises to renew their Charter, with such additional and favourable Clauses, as shall be requisite to promote the Advantage of the Company and the Kingdom.

In Consequence of this Charter, the Company lost no Time in raising a joint Stock for promoting their Design of carrying their Project immediately into Execution; in which they were so successful, as soon to find themselves Masters of seventy-two thousand Pounds, no small Sum at that Time, with which they determined to commence their Trade, and gave Beginning to it by fitting out five able Ships for the first Voyage; of which Squadron the *Dragon*, of six hundred Tons, was Admiral, the *Hector*, of three hundred Tons, Vice Admiral, the *Suffanab* and *Ascension*, of two hundred Tons each, and the *Guest*, a Store Ship, of an hundred and thirty Tons Burthen; the whole Complement of Men was four hundred and twenty; the Expence of equipping them forty-five thousand Pounds; and the remaining twenty-seven thousand Pounds of their Cash was expended in the Purchase of their Cargoes.

They sailed from *Torbay* on the 2d of *May*, 1601, and continued their Voyage to *India*, without any remarkable Accident; and the Admiral, Captain *James Lancaster*, there made a Treaty with the King of *Acben*, sent a Pinnace to the *Moluccas*, and settled a Factory in the Island of *Java*; after which he returned here in Safety, and brought good Profit with him.

The Death of Queen *Elizabeth* soon after made Way for King *James's* Accession to the Throne, in whom this Company found a powerful Protector, not only by

his countenancing their Proceedings, but by affording them all the Assistance they could desire, which, together with the Advantages resulting from the first Voyage, animated them to fresh Engagements: and they fitted out a second Squadron of four Ships, under the Command of Sir *Henry Middleton*, which proceeded in 1604 for the *Moluccas* and *Java*, where they were well received by all the *Indian* Princes, though their Treatment from the *Dutch* was very indifferent, who, had they retained any Gratitude, it must have made them rather carefs than ill use their *quondam* Preservers; but, jealous of a Rival in this beneficial Trade, they lost all Remembrance of their Obligations, and opprobriously traduced the *English* to the Natives, by misrepresenting them as a cruel, unjust, and ambitious People, whose Intentions were not to trade fairly with them, but to seize their Country, and forcibly take from them what they liked; however, this insidious Behaviour had not all the Effect our *Batavian* Neighbours intended, as the King of *Ternate* expressed a Regard for our Countrymen in his Letter to King *James*, notwithstanding the *Dutch*, as he therein informs his *British* Majesty, had used their utmost Endeavours to alienate their Esteem, and destroy the good Opinion which both he and his Subjects had entertained of the *English*, ever since Sir *Francis Drake* had visited their Island.

In 1607 the Company undertook a third Voyage with three Ships only, which they successfully performed, especially in the *Moluccas*; and though the *Dutch* repeated their ill Usage, yet they could not hinder these Ships from procuring a valuable Cargo of Spice, which they brought safely to the *Downs*, *May*, 10, 1610, with this remarkable Instance of Providence, that in this whole Voyage, out and home, they had not lost a single Man. In this Squadron Captain *William Hawkins* embarked, to whom was given the Title of the King's Ambassador to the *Great-Mogul*, by whom he was very kindly received, and had the good Fortune, by his prudent Address and Management, to settle a friendly Correspondence between the two Courts.

His Majesty King *James*, in the Month of *May*, 1609, was pleased to enlarge the Company's Charter in the Manner they had requested; and not only so, but he made it perpetual, which gave them such fresh Spirits, that they built a Ship of one thousand two hundred Tons Burthen; which I mention, as this was the first Marine Construction of any large Dimensions in *England*; it having been customary till then, to build or purchase all great Ships from the *Hanse* Towns; and being so extraordinary a Thing, the King, the Prince of *Wales*, and most of the chief Nobility, went down to *Deptford*, to dine aboard her, and were served entirely upon China.

I might here enter into a Detail of the Company's Progression in their Trade, Settlements; and their Contests with the *Dutch* and *Portuguese*, till I brought my Reader to that unparralleled Scene of Barbarity perpetrated by the former at *Ambayna*; but the Troubles in *England*, during the Civil War affected the Commerce of *England*, so much that no material Improvements were made in it until the Restoration of King *Charles II.*

It was one of the earliest Acts of his Reign to revive and settle the Trade of the *East-India* Company, which he effected by granting them a new Charter, dated the 3d of *April*, 1661, confirming thereby not only their former Privileges, but making considerable Additions to them, he enlarged the Quantity of Bullion they before had Liberty to export each Voyage to 50,000*l.* though with the former *Proviso*, that their Trade should introduce an Equivalent, in that or foreign Specie; their exclusive Trade was confirmed, and he gave them a Power to license others to traffick in the *Indies*; but this Charter still retained the Condition of the first, that it should be vacated upon three Years' Notice, if it was found to be detrimental to the Nation.

His Majesty, in his Marriage Treaty with the Infanta of *Portugal*, had it stipulated, that the Island of *Bombay* should be ceded to him as a Part of her Portion, and after his having built a Fort there, he made it over to the Company in Fee-Tail, who have remained Masters of it ever since; besides which Favour, he granted them two new Charters in the 28th and 35th Years of his Reign. But they having been put to great Expences, by the Intrigues and Violence of the *Dutch* in

And this Occur

the latter Part of it, and this cunning People having found Means to soften that Prince's Resentments, the Company's Trade languished till King *James II.*'s Accession to the Throne, who proved a powerful Protector, and granted them greater Privileges than they knew how rightly or advantageously to use, otherwise they might have increased their Commerce, as they are now placed on so good a Footing both at home and abroad; but this prosperous Condition was reserved as a Reward for a more prudent Set of People afterwards.

King *William* and Queen *Mary* granted a new Charter to the Company, dated the 7th of *October*, 1693, wherein their former Charters were confirmed; and another of Regulations was granted by their Majesties on the 10th of *November* following; by which new Grants they were enabled to take in a fresh Subscription for seven hundred and forty-four thousand Pounds, and tied down to make public Sales by Inch of Candle; to export yearly of the Manufactures of this Kingdom, to the Value of one hundred thousand Pounds; and annually to furnish the Crown with five hundred Tons of the best Salt-Petre at the Rate of thirty-eight Pounds ten Shillings per Ton in Time of Peace, and at forty-five Pounds per Ton in Time of War: They were also directed to make no Dividend on their Stocks but in Money only. This Charter was to continue in Force for twenty-one Years, provided the Governor and Company complied exactly with the Rules therein prescribed, and likewise with such other Orders, Directions, Additions, Qualifications, and Restrictions, as their Majesties, by and with the Advice of their Privy-Council, shall think fit to appoint, on or before the 25th of *September*, 1694, otherwise all their Power and Privileges might be determined and taken away by Letters of Revocation.

And in Pursuance of this *Proviso*, another Charter of Regulations was granted to the said Company under the great Seal of *England*, on the 28th of *September*, 1694, in the sixth Year of their Majesties' Reign; prescribing, among other Things, that in the Month of *August*, yearly, the Governor and Company should present to the Privy-Council, a true Account, fairly written, under the Governor and Deputy-Governor's Hand, of the Nature, Quality, Value, and Prime-Cost of the Manufactures of this Company by them exported, and from what Place; and this upon the Oaths of the proper Officers and Servants of the Company. And it was further ordered, that none of these Goods should be again landed in *England*, or carried elsewhere, than within the Limits of the Company's Charter. It was likewise directed, that on the Application in Writing of any six or more of the Proprietors, possessing each one thousand Pounds Capital Stock, demanding a general Court of the said Company to be called, the Governor or Deputy-Governor should be obliged within eight Days to call such Court; and that it should not be adjourned, but by the Consent of the Majority of the Proprietors then assembled: And the Company were required to signify their Acceptance of, and Submission to, these and other Restrictions, under Penalty of its being dissolved.

But though these Charters and Regulations seemed fully to confirm, at the same Time that they enlarged the Company's Privilege and Power, yet they proved but a Prelude to the Dissolution of both; as their Rights were contested by a Set of Interlopers, under a Pretence that the Crown could not grant an exclusive Charter; and the Government's Wants inclining the Ministry to listen to the Offers of a Loan from other Hands, though on Terms they ought to have rejected, hastened the Destruction of an Association seemingly so firmly established, to the Ruin of many thousands, who had embarked in it, under the Sanction of the Crown: For 'tis new Set of People, who were willing to advance their Money, though intimidated from doing it without a better Surety than what had hitherto been esteemed, I mean the King's Prerogative, at last agreed with the Ministry to lend them two Millions under a parliamentary Security; at an Interest of 8 per Cent. and an Act to incorporate them, which passed in 1698; so that hereby two Companies trading to the *East-Indies* were established, and subsisted at the same Time.

This Act was not obtained, however, without a strong Opposition from the old Company, who followed the Bill into the House of Lords; but had the Mortification to see it pass, under the Supposition of its being for the Public's Advantage. And this Occurrence reduced them to the Necessity of endeavouring an Accom-

modation with their new Rival, which being for the common Benefit of both, was settled under several Articles; and amongst them, that a joint Trade should be, for seven Years, carried on, though with different Stocks and separate Servants, who sometimes acted jointly, and at others governed alternately, under the Direction of their own Masters. But this double-headed Government being found inconvenient, and the seven Years spun out, it was mutually agreed by the two Companies to form themselves into one, which they accordingly did in 1705, though they could not bring their Factors at all Places into the same Union till three or four Years after, nor carry on their Business with the Advantages they had Reason to hope, unassisted by the Ministry, whose Attention was now solely engrossed by the foreign Wars we were then engaged in, and the Company left to take Care of itself, by finding out some Means to obtain such favourable Regulations, as might effectually remedy the Inconveniences that had resulted from the uniting two Companies, before so differing in their Interests. And, in Order to obtain such a Law as was requisite for this Purpose, they tempted the Government by a tendered Loan of a Million and two hundred thousand Pounds, *extra* of what was before lent, to grant them such Parliamentary Assistance towards carrying on their Trade, as they required, and which incorporated them under the Title of *The united Company of Merchants of England, trading to the East-Indies*: It likewise enacted, that this Company shall pay into the *Exchequer* 1,200,000*l.*

6 Ann. Cap.  
17. S. 1.

- s. 2. That they may borrow by their common Seal on their united Stock, so as the principal Money owing do not exceed 1,500,000*l.* above what might lawfully have been borrowed before this Act.
- s. 3. In Case the general Court of the said *English* Company shall think fit, they may call in Monies from their Adventurers, towards raising the said 1,200,000*l.* or the repaying the Money borrowed to that Purpose; and in Case any Member shall neglect to pay his Share of the Monies called in, or which the said Companies, in Pursuance of 9 *W.* III. Cap. 44. or their Charters, shall call in for carrying on their Trade, by Notice fixed on the *Royal Exchange, London*, the Companies may stop the Dividends payable to such Member, and apply the same towards such Payment, and also stop the Transfers of the Shares of such Defaulter, and charge him with Interest at 6 *per Cent.* for the Monies neglected to be paid; and if the Principal and Interest be not paid in three Months, the Company may sell so much of the Stock of the Defaulter as will pay the same.
- s. 4. The said 1,200,000*l.* shall be deemed an Addition to the Stock of the *English* Company and be Tax free.
- s. 5. The united Stock of the said *English* Company shall be subject to the Debts contracted by the said Company.
- s. 6. The *Proviso* in 9 *W.* III. Cap. 44. and in the Charters of the said Company for: Reduction upon three Years' Notice, upon Repayment of the 2,000,000*l.* paid in, and the Arrears of the Payments at 8 *per Cent.* is repealed.
- s. 7. Persons intitled to 7200*l.* Part of the 2,000,000*l.* who have united their Stock to the Corporation's, and who carry on a Trade for their separate Use, may hold their Proportion of the Annuity, as if this Act had not been made. But the *English* Company may affix Notice on the *Royal Exchange*, of their Intention to repay 7200*l.* at the End of three Years; and in Case the Company pay the same, and the Annuities at 8 *per Cent.* for the same, then the said Stock of 7200*l.* and Trade, shall be vested in the Company.

Besides the above Particulars, many others were enacted, concerning their Stock and Payment of Customs, &c. by the Acts already mentioned, and several succeeding ones; and as it was found in the Beginning of King *George* the First's Reign, that several Attempts had been made to discover the Secrets of the Company's

It shall be lawful for the united Company of Merchants of England trading to the *East-Indies*, and their Successors, to arrest such Persons within the Limits <sup>9 Geo. I. C. 21. S. 2.</sup> aforesaid, and send them to England to answer for their said Offence.

Every Person who shall solicit for, obtain, or act under any Commission from any foreign State, to sail, or trade to the *East-Indies*, &c. shall forfeit 500*l.*

If any of his Majesty's Subjects shall repair or trade to the *East-Indies*, or Places <sup>9 Geo. I. C. 24. S. 1.</sup> beyond the Cape of *Good-Hope*, mentioned in former Acts, contrary to any Law in being, it shall be lawful for the Attorney General, or for the united Company trading to the *East-Indies*, within six Years, to file in any of the Courts at *Westminster*, Informations against such Offenders. And, if found guilty, the Court shall give Judgement against him, by Fine and Imprisonment, as it shall think fit, and award the Prosecutor Costs; but, if the Defendant is acquitted, the Company shall pay him Costs.

All Contracts made by any of his Majesty's Subjects, or in Trust for them, on s. 2. the Loan of Monies by Way of Bottomry, on any Ship in the Service of Foreigners, and bound to the *East-Indies*, &c. and all Contracts for supplying any such Ship with Goods or Provisions, and all Copartnerships relating to any such Voyage, and Agreements for the Wages of Persons serving on board any such Ships, shall be void.

Every Subject of his Majesty who shall go to the *East-Indies*, &c. contrary to the s. 3. Laws in being, shall be deemed to have traded there; and all the Goods there purchased by any such Offender, or found in his Custody, or in the Custody of any other in Trust for him by his Order, shall be forfeited, and double the Value.

All Goods shipped on board any Ship bound for the *East-Indies*, &c. except s. 4. Goods of the Company, or such as are licensed by them, and the Stores for such Ship, and all Goods taken out of such Ship on her Voyage homeward before her Arrival, shall be forfeited, and double the Value; and the Master, or other Officer, knowingly permitting such Goods to be shipped, or taken out of such Ship, shall forfeit for every Offence 1000*l.* and shall not be entitled to any Wages; nor shall the Company be obliged to pay any Wages to such Master, &c. but shall have an Allowance in Respect thereof, out of the Monies payable on Account of the Ship.

It shall be lawful for the Attorney General, at the Relation of the Company, or s. 5. by his own Authority, to exhibit Bills of Complaint in the *Exchequer* against any Persons trading to or from the *East-Indies*, &c. contrary to Law, for Discovery of such their Trading, &c. and for Recovery of the Duties and Damages herein mentioned, waving in such Bills all Penalties for the Matters in such Bill contained; and such Persons shall pay to his Majesty the Customs of the Goods arising by the said unlawful Trade, and shall answer to the Company 30*l.* per Cent. according to the Value thereof in England, and if such Offenders pay the Customs into his Majesty's *Exchequer*, and the Damages to the Company, they shall not be prosecuted on any other Law for the same Offence: And if such Bills, exhibited at the Relation of the Company, be dismissed, the Company shall pay full Costs; and if a Decree be obtained against the Defendants, they shall pay Costs to his Majesty and the Relator, &c.

If any Subject of his Majesty shall contribute to, or encourage the establishing <sup>9 Geo. I. C. 26. S. 1.</sup> or carrying on any foreign Company trading to the *East-Indies*, and other Places beyond the *Cape of Good Hope*, described in former Acts, or shall be interested in the Stock or Actions of such foreign Company, every Person so offending shall forfeit his Share in the Stock of any such Company, together with treble the Value thereof, &c.

If any Subject of his Majesty shall have accepted of any Trust, or shall know of s. 4. any Interest which any of his Majesty's Subjects shall have in any such foreign Company, and shall not within six Months discover the same in Writing to the united Company, or their Court of Directors, he shall forfeit treble the Value of the Interest, &c.

Every Person, who within the Time above limited shall voluntarily come to the s. 5. Court of Directors, and make a Discovery in Writing, of the Interest of any of his Majesty's Subjects in the Stock of such foreign Company, shall have one half of the

the clear Amount of the Forfeitures arising by this Act out of the Estate of the Persons so interested, &c.

9 Geo. I. C.  
26. 3.

If any of his Majesty's Subjects, other than such as are lawfully authorized, shall go to or be found in the *East-Indies*, the Persons so offending are declared to be guilty of a high Crime and Misdemeanour, and may be prosecuted in any Court of *Westminster*; and being convicted, shall be liable to such corporal Punishment, Imprisonment or Fine, as the Court shall think fit, &c.

- S. 7. Persons so offending may be seized and brought to *England*, and any Justice of Peace may commit them to the next County Gaol, till Security be given by natural-born Subjects, to appear in the Court, where such Prosecution shall be commenced, and not to depart out of Court, or out of the Kingdom, without Leave of the said Court.

The following Acts principally regard the Company's Stock, with which I shall finish the Subject of their Establishments and Polity, and then proceed to say something of their Trade.

3. Geo. II. C.  
14. 3. 4.

The Annuity of 160,000*l.* shall be reduced to 128,000*l.* in Respect of the Capital Stock of 3,200,000*l.* which reduced Annuity shall be charged on the same Revenues as their present Annuity, &c.

- S. 5. On one Year's Notice to be given by Parliament after the 25th of *March*, 1736, and on Repayment of the capital Stock of 3,200,000*l.* and of all Arrears of their reduced Annuity, their said Annuity shall cease.
- S. 6. Upon one Year's Notice, after the 25th of *March*, 1736, to be given by Parliament on Repayment to the Company of any Sum not less than 500,000*l.* in Part of the Capital Stock, and on Payment of all Arrears, due on their reduced Annuity; so much of the said Annuity, as shall bear Proportion to the Monies paid in Part, shall cease.
- S. 7. Notwithstanding such Redemption, the united Company shall continue a Body Corporate by the Name of *The united Company of Merchants of England trading to the East-Indies*, and enjoy all Privileges which by former Acts or Charters founded thereon, the Company might enjoy.
- S. 8. After Redemption of the said yearly Fund, or one Moiety thereof, the Company may, by By-Laws to be made in their general Courts, declare what Share in the remaining Stock, &c. shall qualify Members to be Directors, or to give Votes in any general Court.
- S. 9. Notwithstanding such Redemption, the Company shall, subject to the *Proviso* of Determination herein contained, enjoy the sole Trade to the *East-Indies*, and all Places between the Cape of *Good-Hope* and the Straits of *Magellan*; and if any Subjects, other than Factors, &c. of the Company, shall sail or adventure to the *East-Indies*, &c. every such Offender shall incur the Loss of all Ships employed in such Trade, &c. with the Guns, and Furniture, and the Goods laden thereon, and double the Value thereof, &c.
- S. 10. The said Company shall have Powers, by any Acts or Charters granted to the Company, not altered by this Act, discharged from all *Provisoes* of Redemption therein contained, for securing to them the sole Trade to the *East-Indies*, and for securing their Effects, and governing their Affairs.
- S. 11. Provided that upon three Years' Notice to be given by Parliament, after the 25th of *March*, 1766, and Repayment of the said Capital Stock of 3,200,000*l.* and all Arrears of Annuities payable in Respect thereof, the Right of the Company to the sole Trade to the *East-Indies*, &c. shall cease.
- S. 12. Nothing in the above *Proviso*, or in the Charter of the 5th of *Sept.* 10 *Will.* III. shall extend to determine the Corporation of the united Company, or to exclude them from carrying on a free Trade to the *East-Indies*, &c. with their Joint Stock, &c. in common with other Subjects of his Majesty.
- S. 13. Any Notice in Writing, signified by the Speaker of the House of Commons, shall be deemed proper Notice by Parliament to the Company.
- S. 14. The united Company are restrained from purchasing Hereditaments in *Great-Britain*, exceeding in the whole the yearly Value of 10,000*l.*
- S. 15. Nothing in this Act shall prejudice such Trade or Navigation within the said Limits, as the *South-Sea* Company are entitled to.

Nothing herein shall subject the Governor and Company of the Merchants of <sup>3 Geo. II. C.</sup> *England*, trading to the *Levant Seas*, to any Penalties in Respect of their trading <sup>14. 8. 16.</sup> into those Seas.

The reduced Annuity of 128,000*l.* shall be transferred from the Duties now <sup>3 Geo. II. C.</sup> charged, and be charged upon the *aggregate Fund*, to be paid to the united Com- <sup>20. 8. 22.</sup> pany, &c.

Whereas the said united Company of Merchants trading to the *East-Indies*, are <sup>17 Geo. II.</sup> willing to advance towards the Supply granted for the Service of the Year 1744, <sup>2 P. 363.</sup> a Million Sterling, for the Purchase of an Annuity of 30,000*l.* well secured to the said Company and repayable on the same Terms with the Company's present Capital, with an Addition of fourteen Years to their present Term, which will, with such Addition, extend to *Lady-Day*, 1760, besides the three Years allowed them after the Expiration of their present Term, for bringing home, and disposing of their Effects, and other Purposes, with Power to the Company to issue out Bonds from Time to Time, with any Part, or the whole Amount of the said Million Sterling, and on such other Conditions, &c. as are herein after made: *It is therefore enacted*, that the said united Company of Merchants of *England*, trading to the *East-Indies*, in Pursuance of their before recited Agreement, shall advance into the *Exchequer*, for his Majesty's Use, the full Sum of one Million, on or before the 29th of *September*, 1744, &c.

And to encourage the Company to advance the said Million, &c. it is hereby <sup>P. 365.</sup> enacted, that the Provisoes contained in the 3d of *Geo. II.* and all other Provisoes contained in any other Acts, for determining the Annuity of the Company, and their Right to the exclusive Trade to the *East-Indies*, and Parts aforesaid, upon the respective Notices and Payments in the same Acts mentioned, are hereby repealed and made void; and the said Company shall for ever enjoy, not only their present entire Annuity of 128,000*l.* out of the Revenue charged therewith, but also after the said 29th of *September*, 1744, they shall enjoy a further Annuity of 30,000*l.* computed after the Rate of 3 per Cent. per Ann. &c.

The *East-India* Company under their common Seal may borrow Money equi- <sup>P. 366, 367.</sup> valent to the Million raised for his Majesty's Use, over and above the Money which might lawfully be borrowed thereon before making of this Act.

At any Time on a Year's Notice to be given by Parliament, after the 25th of <sup>P. 368.</sup> *March*, 1745, on the Expiration of the said Year, and on Repayment of the 3,200,000*l.* formerly advanced, and of the 1,000,000*l.* now to be advanced, without any Deduction, and on the Payment of all Arrears of the said Annuities of 128,000*l.* and 30,000*l.* then the said Annuity shall cease.

On a Year's Notice at any Time after the said 25th of *March*, 1745, to be given <sup>P. 369.</sup> by Parliament on the Expiration of the said Year, and on Repayment of any Sum not less than 500,000*l.* in Part of the said Debt of 4,200,000*l.* and on Payment of all Arrears, &c. then so much of the said Annuities as shall bear Proportion to the several Sums paid in Part, shall, from Time to Time, as such Payments are made, sink and be abated, till their whole Annuities shall be entirely sunk and determined.

Notwithstanding such Redemption of the Annuities of 128,000*l.* and 30,000*l.* the said Company shall, subject to the Proviso of Determination, herein after contained, enjoy an exclusive Traffick to and from the *East-Indies*, and all Places between the Cape of *Good-Hope*, and Straits of *Magellan*, and Limits prescribed in the Act of *9 Will. III. &c.* in as ample a Manner as the said Company could thereby or otherwise lawfully trade thereto; And the said *East-Indies*, or Places within the Limits aforesaid, shall not be resorted to by any other Subjects, before the exclusive Trade of the *India* Company is determined: And if any other his Majesty's Subjects, shall presume to trade thither during the Continuance of <sup>P. 370.</sup> the exclusive Trade of the *India* Company, they shall forfeit their Ships, with their Guns and Furniture belonging, with all their Lading and double the Value, &c.

The said *India* Company shall hereafter for ever, subject as aforesaid, enjoy all <sup>P. 371.</sup> the Profits and Powers, as by any former Acts of Parliament or Charters founded thereon are enacted and established concerning them, under any particular Denomination, and not altered by this Act; and the same are hereby confirmed, and

shall continue to be enjoyed and practised by the said Company, for the better securing to them the sole and exclusive Trade to the *East-Indies*, &c. and for preventing all other his Majesty's Subjects trading thither, and for securing their Effects and governing their Affairs in all Respects, as effectually as if the same things were severally repeated in the Body of this Act; subject nevertheless to such Restrictions and Covenants as are contained in the said Acts and Letters Patent now in Force, and not hereby altered; and to the Proviso following, *viz.*

17 Geo. II.  
1732.

Provided that on three Years' Notice to be given by Parliament, after *March* 25, 1760, and Repayment of the Capital Stock of 4,200,000*l.* and all Arrears of Annuity in Respect thereof, the Company's Right to the sole and exclusive Trade to the *East-Indies* and Parts aforesaid, shall cease and determine, &c.

The Company's Settlements, and the Places they trade to in *Persia* and *India* are many, as *Gombroon*, where a Factory was established about the Year 1613, which continued to govern the whole Trade, in Respect of the Company, in *Persia*, till the Disorders in that Country obliged the *Factors* to decamp, to the no small Detriment of the Company's Trade, who carried on a very great one to this Port.

*Mocha*, situated at the Entrance of the *Red Sea*, is a Place where the *English* are well received, and carry on a very considerable Commerce in Coffee, &c. as they do in all the adjacent Parts of *Arabia*, though with the Risk of being sometimes oppressed by the unjust Proceedings of the reigning Princes, and exposed to the piratical Depredations of those Parts.

Our Factories, Ports, and Settlements, on the *Indian Coast*, are at *Barach*, *Sually*, *Surat*, *Bombay*, *Dabul*, *Carwar*, *Tellebery*, *Anjengo*; and *Conymer*, all along the *Coast of Malabar*; and turning up to those of *Coromandel*, we meet with *Port St. George*, the Principal of our *Indian Possessions*.

The *English* formerly had a Settlement at *Matchulipatam*, *Narsipore*, and several other Places to the *Northward* on this Coast, but were obliged to quit them by the Interruption they received to their Trade from the *Rajahs'* Impositions.—Round *Carrango Point*, in the Bay of that Name, lies *Angerang*, where some *English* from *Vizagapatam* settled in the Year 1708, but the Factory soon withdrew, and thereby defeated the projected Scheme of extending their Trade that Way; *Vizagapatam* however continues fortified, and the *English* their Residence there; these Places lie in the Kingdom of *Golconda*, and the next to it is that of *Orissa*, in which is the Town of *Balafore*, where the *English*, *French*, and *Dutch*, have their respective Factories, though of very small Importance; *Pipley*, about five Leagues from it, had once a Settlement, but was deserted for the more commodious Situation of *Hughly* and *Calcutta*; several Trading Towns are dispersed on this Coast, but the Company's chief Factory here is that at *Fort William*, a Fort belonging to *Calcutta*, situated on the River *Hughly*, the most westerly Branch of the *Ganges*. The Fort itself is said to be irregular, and untenable against disciplined Troops; but it contains commodious Houses for the Governor and other Officers or Servants of the *East-India Company*. As to the Town of *Calcutta*, it is, to all Intents and Purposes, an established Settlement, under an *English* civil Government, having a Mayor and Alderman, upon the Footing of our corporate Cities, and lately a supreme Court of Judicature has been introduced; and Judges nominated by the King, in Virtue of an Act of Parliament for the better Administration of Justice in the Company's Settlements in *India*, were sent out, but from the Complaints lately exhibited against their Proceedings, it should seem as if this new Regulation will not be permanent.

The next Place on the Continent *Southward* is *Merjee*, situated on the River *Tanacerin*, and subject to the King of *Siam*, where some *English* were formerly settled as private Merchants, for which Reason the Company insisting on their being turned away, and some Misunderstandings arising between their Messenger and the Natives on this Occasion, seventy-six of our Countrymen were massacred; though the Affairs of the Company having since their Union been more prudently managed, and all Things carried on with the greatest Regularity, a proper Provision is made for the Trade of the whole Gulf from the *Ganges'* Mouth to the

Extremity of the new Colonies.

Our Factories *Sillebar*, on the *I* pose we enjoy the elements on the C they have been more especially to

Extremity of the Peninsula of *Malacca*, without any extraordinary Expence of new Colonies.

Our Factories of *Mæbo*, *Bantol*, *Cattow*, *Bencoolen*, *Marlborough Fort*, and *Sillibar*, on the Island of *Sumatra*, are so well established as to afford Room to suppose we enjoy the best Share in the Traffick of it; and we had formerly some Settlements on the Coasts of *Cochin-China*, and in the Kingdom of *Tonquin*, though they have been since withdrawn; but an occasional Trade is still carried on there, more especially to the Kingdom last mentioned.

Our Trade to *China* was once principally carried on at *Amoy*, but for many Years past *Canton* has had the Preference, and seems to have determined the Gentlemen at *Madras* entirely in its Favour, as the Impositions of the *Nandareens* at the former became intolerable, and forced them to resolve on turning their Commerce into this different Channel.

The various Regulations made by the Legislature for settling the commercial Transactions of the Company, and the Administration of their civil and military Government in *India*, from the Year 1781, to the present Time, are of too extensive a Nature to be inserted at large in this Work; but the Substance of the whole may be reduced into a small Compass.

Under the subsisting Charter, the Commerce of the Company has increased beyond all former Example, and the Conduct of its political Concerns, subject to a Board of Control appointed by Government at home, promises greater Security and Permanency to the national Advantages derived from the exclusive Privileges granted to it. For the Number of Ships employed in this Trade has increased considerably of late Years; for Instance, in the Season of 1787, twenty-nine Ships were laden in *China* for *England*, of the Burthen of 700 Tons upon an Average; and the same Number has been since consigned to *India* from *London*; and nearly 19,000,000 *Pounds* of different Kinds of Teas, which constitute only one principal Article of their Commerce have been imported, instead of about 6,000,000, the usual Amount before the Duties were lowered by the Commutation Act. Finally, the List of Ships just published as engaged to be taken up, to be sent out for the Season of 1791 amounts to no less than *Thirty-four*; no greater Proof therefore, can be given of the prosperous and unrivalled Commerce of the *British East-India Company*.

The Company's Exports from hence are chiefly Bullion, of which the Proportion with the other Particulars of an outward-bound Cargo, I believe, is commonly from  $\frac{1}{2}$  to  $\frac{2}{3}$  Parts; the others consisting of Lead, Iron, Guns, Powder, Match, Cloths of various Colours, Serges, and other Stuffs, Cochineal, Quicksilver, Vermillion, rough Coral, Amber, &c.

And the Returns are, Pepper, Coffee, Tea, Incense, Salpêtre, Terra Japonica, three Sorts of Lack, Indigo, Myrrh, Bezoa, Opoponax, Vitriol, Camphire, China Root, Sal Ammoniac, divers Gums, and Aloes, Galbanum, Galangals, Sagapenum, Rhubarb, Senna, Mirabolans, *Indian Leaf*, and many other Sorts of Drugs, Cowries, Red-Wood, Sandal, Cane, Tutenack, raw and wrought Silk, Callicoes, white and painted, Mullins, Cotton Wool, and manufactured into a great Variety of Things for Wear, China, Japanned Cabinets, &c. Arrack, Diamonds, Pearls, and many Curiosities, unnecessary to be enumerated here; I shall therefore close this Discourse on our *Indian Trade*, with my sincerest Wishes for its constant Prosperity, as notwithstanding the many specious Arguments that have been used to the contrary, I must consider it a general Benefit to the Nation.

And, in Pursuance of my Plan, I now proceed to treat of our *American Trade*, in which that granted to, and carried on by the *South Sea Company*, is first to be considered; I shall therefore mention the Occasion of its original and show the Uses they have from Time to Time made of their Charter.

## Of the SOUTH SEA Company.

**T**HIS Company, established at the latter End of the seventeenth Century, was seemingly more with a political View of raising Money for the Government's Service than in Expectation of its carrying on any great Trade; as they had neglected every favourable Opportunity for attempting the Conquest of some Place in the Southern Parts of *America*, which might have secured the Means of extending a Commerce in which every Prospect of Advantage must necessarily centre; but this Omission, and its Consequences, had rendered the Company's Stock so low in the Public's Esteem, that it was at near 40 *per Cent.* Discount, when an unexpected Accident raised it to such an imaginary Value as seemed the Effect of an Infatuation, only to be paralleled by the *Mississippi* Scheme that preceded it.

The *French Guinea* Company had contracted with *Philip V.* King of *Spain*, on his Mounting the Throne of that Monarchy, for the Introduction of Slaves into his *American* Dominions, and on this Agreement changed its former Name to that of the *Assiento* Company; and being supposed a very beneficial Contract, it was an Article of the Treaty of Peace at *Utrecht*. that this Contract should be translated to the *English*, and was accordingly signed at the Court of *Spain*, in *March* 1713, to continue thirty Years, under various Articles, which I excuse giving, as they are now annulled, and in all Probability will never be renewed. It was in consequence of this Contract that the Company established Factories at *Porto Bello*, *Panama*, *Carthagena*, *Vera Cruz*, *Buenos Ayres*, &c. which continued till the late War dislodged the Factors, and destroyed their Settlements.

The Company was obliged to furnish the *Spanish* Colonies with four thousand eight hundred Negroes yearly, though they might introduce more if they thought proper; and had Liberty to send an annual Ship of five hundred Tons, with Goods to be disposed of there; in which, as well as in the Negro Contract, his Catholick Majesty was a fourth Part concerned; but this Agreement found many Obstacles to its Performance, and occasioned divers Representations to the Court of *Spain* before it could be carried into Execution; in Consequence of which, several Articles were altered, and new ones added, previous to the performing any Part of it; and indeed during the Time it continued, Misunderstandings and Disputes were continually arising, either about the Number of Negroes or Tonnage of the Ship; and when the late Rupture happened, it found many Particulars unsettled, and large Sums due from the Crown of *Spain* to the Company, which on the Return of Peace were lumped at 100,000*l.*

Much more might, and indeed should, have been said about this Association; but as their Trade is terminated, it would be superfluous to enlarge concerning it in such a Work as this: I therefore proceed, to give some Account

## Of the HUDSON'S BAY Company.

**T**HAT Part of the World, which gave Birth to this Company, owes its Discovery, as the *English* suppose, to the Diligence of that able Mariner, whose Name it bears, and who reaped no other Fruit of his Labours to discover a North West Passage, than thus conveying to Posterity a Record of his Capacity and Diligence, in which at last he perished. The *Danes* insist on their prior Knowledge of this Part of *America*. But not to enter into a Detail of the Dispute, nor enlarge on the historical Accounts of it, I shall content myself with informing my Reader, that though the Expectations of an advantageous Trade might reasonably have encouraged its being sooner engaged in, yet it was the Year 1681 before any tolerable Progress was made in it; and on the 2d of *May* an exclusive Charter was granted by King *Charles II.* in the 32d Year of his Reign, to Prince *Rupert* and his Associates, which established this Branch of Trade on the solid Footing it has continued ever since; though not without various Interruptions by the *French*, who, jealous of such Neighbours to their *Canada* Settlements, have frequently driven the *English* from their's; and this Contest, which continued several Years, made them alternately Masters of the Bay, till it was finally determined by the Treaty of *Utrecht* in our Countrymen's Favour, who have now several Forts and Factors settled there, notwithstanding the extreme Cold, which is so intense as to confine them

them for several good Provisions, Reverfion, to contribute in than that of Country furn and Iunglafs Fifhes; but Value of this

them for seven or eight Months in the Year to their Houfes; though they have good Provisions in this reclude Life, with the Pleasures of Hunting and Fishing in Reverſion, to which in Summer-Time the Elements of Earth, Air, and Water, contribute in ſuch Plenty as would be hardly credited under a leſs Authority than that of many Eye-Witneſſes, who have aſſured us of it; though this Country furniſhes nothing for the Support of Trade but Furs of various Sorts, and Iſinglaſs, the latter made here by the Company's Servants from the Skins of Fiſhes; but the former are ſo rich, and both ſo plenty, as to have raiſed the Value of this Company's Funds above thoſe of any other.

The Commodities they truck with the *Indians* for their Furs, are Arms, Powder, Balls, Kettles, Hatchets, Knives, Sword-Blades, Awls, Fiſh-Hooks, Steels, and Flints, blue Serge Cloaks, Shirts, Stockings, Tobacco, coarſe Thread for Nets, and ditto of divers Colours for Sewing, Glaſs Beads, Pins, Needles, &c. which as I before obſerved, procure ſuch Returns as have greatly enriched the Proprietors of them.

And having mentioned the Settlements of our trading Companies, I ſhall in the next Place treat of our *American Colonies*, of which we have the moſt extenſive and flouriſhing of any Potentate, the *Spaniards* only excepted; as, beſides our Iſles, we poſſeſs an uninterrupted Line of Sea Coaſt from the Gulf of *Mexico*, Northward up to *Hudſon's Bay*.

*Of the General Commerce of AMERICA, with GREAT-BRITAIN and other NATIONS.*

**T**HE total Alienation of the Thirteen Provinces of *North America* from the *Britiſh Empire*, by a formal Renunciation of all Claim of Dominion over and Property in them; by an Act of Parliament paſſed in the Spring of the Year 1783; and the final Ratification of the Independence of thoſe Provinces, by the following Treaty, produced the greateſt Revolution in Commerce, which had been experienced by *Great-Britain*, from the era of her original great commercial Eſtabliſhments on the Continent of *North America* in the Reigns of Queen *Elizabeth*, and King *James I.* to the preſent Time. For which Reaſon, we not only inſert in this Place, an exact Copy of the ſaid Treaty, but annex to it, a concise Account of the Changes, and Conſequences reſulting from it.

*The Definitive Treaty of Peace and Friendſhip between his Britannic Majeſty, and the United States of America.*

ART. I. His Britannic Majeſty acknowledg<sup>s</sup> the ſaid *United States*, viz. *New Hampſhire, Maſſachuſet's-Bay, Rhode Iſland and Providence Plantations, Connecticut, New York, New Jerſey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina, and Georgia*, to be free ſovereign and independent States; that he treats with them as ſuch; and for himſelf, his Heirs and Succeſſors, relinquishes all Claims to the Government, Propriety, and territorial Rights of the ſame.

ART. II. And that all Diſputes which might ariſe in future, on the Subject of the Boundaries of the ſaid *United States* may be prevented, it is hereby agreed and declared, that the following are and ſhall be their Boundaries, viz. from the north-weſt Angle of *Nova Scotia*, to that Angle which is formed by a Line drawn due North, from the Source of *St. Croix* River to the Highlands, along the ſaid Highlands, which divide thoſe Rivers that empty themſelves into the River *St. Lawrence*, from thoſe which fall into the *Atlantic Ocean*, to the north-weſternmoſt Head of *Connecticut* River; thence down along the Middle of that River, to the 45th Degree of north Latitude; from thence by a Line due Weſt on that Latitude, until it ſtrikes the River *Iroquois* or *Cateraguy*; thence along the Middle of the ſaid River into the *Lake Ontario*, through the Middle of that Lake, until it ſtrikes the Communication between the ſaid Lake and the *Lake Erie*: Thence along the Middle of that Communication into *Lake Erie*, through

the Middle of the said Lake, until it arrives at the Water-Communication between that Lake and Lake *Huron*: Thence along the Middle of the said Water-Communication: Thence through the Middle of the said Lake to the Water-Communication between that Lake and Lake *Superior*: Thence through Lake *Superior*, Northward of the Isles *Royale* and *Phillipeaux*, to the *Long Lake*: Thence through the Middle of the said *Long Lake*, and the Water-Communication between it and the *Lake of the Woods*, to the said *Lake of the Woods*: Thence through the said Lake to the most north-western Point of it; and from thence in a due west Course to the River *Mississippi*: Thence by a Line to be drawn along the Middle of the said River *Mississippi*, until it shall intersect the northernmost Part of the 31st Degree of north Latitude.

South, by a Line to be drawn due East, from the Termination of the Line last mentioned, in the Latitude of 31 Degrees North of the Equator, to the Middle of the River *Apalachicola*, or *Catabouche*. Thence along the Middle thereof, to its Junction with the River *Flint*: Thence Strait to the Head of *St. Mary's River*; and thence down along the Middle of *St. Mary's River* to the *Atlantic Ocean*.

East, by a Line to be drawn along the Middle of the River *St. Croix*, from its Mouth in the Bay of *Fundy*, to its Source; and from its Source, directly North to the said Highlands, which divide the Rivers that fall into the *Atlantic Ocean*, from those which fall into the River *St. Lawrence*; comprehending all Islands within twenty Leagues of any Part of the Shore of the *United States*, and lying between the Lines to be drawn due East from the Points where the said Boundaries between *Nova Scotia* on the one Part, and *East Florida* on the other, shall respectively touch the Bay of *Fundy*, and the *Atlantic Ocean*; excepting such Islands as now are, or heretofore have been, within the Limits of the said Province of *Nova Scotia*.

ART. III. It is agreed, that the People of the *United States* shall continue to enjoy, unmolested, the Right to take Fish of every Kind on the grand Bank, and on all the other Banks of *Newfoundland*: Also in the Gulph of *St. Lawrence*, and at all other Places in the Sea, where the Inhabitants of both Countries used at any Time heretofore to Fish. And also, that the Inhabitants of the *United States* shall have Liberty to take Fish of every Kind on such Part of the Coast of *Newfoundland* as *British* Fishermen shall use, but not to dry or cure the same on that Island; and also on the Coasts, Bays and Creeks, of all other of his Britannic Majesty's Dominions in *America*; and that the *American* Fishermen shall have Liberty to dry and cure Fish in any of the unfettled Bays, Harbours and Creeks of *Nova Scotia*, *Magdalen Islands*, and *Labrador*, so long as the same shall remain unfettled; but so soon as the same, or either of them, shall be fettled, it shall not be lawful for the said Fishermen to dry or cure Fish at such Settlement, without a previous Agreement for that Purpose with the Inhabitants, Proprietors, or Possessors of the Ground.

ART. IV. It is agreed, that Creditors on either Side shall meet with no lawful Impediment to the Recovery of the full Value, in Sterling Money, of all *bona Fide* Debts heretofore contracted.

ART. V. It is agreed, that the Congress shall earnestly recommend to the Legislatures of the respective *States*, to provide for the Restitution of all Estates, Rights, and Properties, which have been confiscated, belonging to real *British* Subjects; and also of the Estates, Rights, and Properties, of Persons resident in Districts in the Possession of his Majesty's Arms, and who have not borne Arms against the said *United States*; and that Persons of any other Description shall have free Liberty to go to any Part or Parts of any of the *Thirteen United States*, and therein to remain twelve Months, unmolested in their Endeavours to obtain the Restitution of such of their Estate, Rights, and Properties, as may have been confiscated; and that Congress shall also earnestly recommend to the several *States*, a Reconsideration and Revision of all Acts or Laws regarding the Premises, so as to render the said Laws perfectly consistent not only with Justice and Equity, but with that Spirit of Conciliation which, on the Return of the Blessings of Peace, should universally prevail. And that Congress shall also earnestly recommend to the several *States*, that the Estates, Rights and Properties, of such last-

last-mentioned Persons shall be restored to them, they refunding to any Persons who may now be in Possession of them, the *bona Fide* Price, where any has been given which such Persons may have paid on purchasing any of the said Lands, Rights, or Properties, since the Confiscation.

And it is agreed, that all Persons who have any Interest in confiscated Lands, either by Debts, Marriage Settlements, or otherwise, shall meet with no lawful Impediment in the Prosecution of their just Rights.

ART. VI. There shall be no future Confiscations made, nor any Prosecution commenced against any Person or Persons, for or by Reason of the Part which he or they may have taken in the present War; and that no Person shall, on that Account, suffer any further Loss or Damage, either in his Person, Liberty, or Property; and that those who may be in Confinement on such Charges at the Time of the Ratification of this Treaty in *America*, shall be immediately set at Liberty, and the Prosecution so commenced be discontinued.

ART. VII. There shall be a firm and perpetual Peace between his *Britannic* Majesty and the said *States*, and between the Subjects of the one, and the Citizens of the other, therefore, all Hostilities, both by Sea and Land, shall from henceforth cease: All Prisoners on both Sides shall be set at Liberty, and his *Britannic* Majesty shall, with all convenient Speed, and without causing any Destruction, or carrying away any Negroes, or other Property of the *American* Inhabitants, withdraw all his Armies, Garrisons, and Fleets, from the said *United States*, and from every Port, Place, and Harbour within the same; leaving in all Fortifications, the *American* Artillery that may be therein: And shall also order and cause all Archives, Records, Deeds, and Papers, belonging to any of the said *States*, or their Citizens, which in the Course of the War, may have fallen into the Hands of his Officers, to be forthwith restored and delivered to the proper *States* and Persons to whom they belong.

ART. VIII. The Navigation of the River *Mississippi*, from its Source to the Ocean, shall for ever remain free and open to the Subjects of *Great-Britain*, and to the Citizens of the *United States*.

ART. IX. In Case it should so happen, that any Place or Territory belonging to *Great-Britain*, or to the *United States*, should have been conquered by the Arms of either from the other, before the Arrival of the said provisional Articles in *America*, it is agreed, that the same shall be restored without Difficulty, and without requiring any Compensation.

ART. X. The solemn Ratifications of the present Treaty, expedited in good and due Form, shall be exchanged between the contracting Parties in the Space of six Months, or sooner if possible, to be computed from the Day of the Signature of the present Treaty.

In Witness whereof, we, the under-signed Ministers Plenipotentiary, have, in their Names, and in Virtue of our full Powers, signed with our Hands the present Definitive Treaty, and caused the Seals of our Arms to be affixed thereto.

Done at *Paris*, this 3d Day of *September*, 1783.

(L. S.)	D. HARTLEY,
(L. S.)	JOHN ADAMS,
(L. S.)	B. FRANKLIN,
(L. S.)	JOHN JAY.

The grand commercial Alteration produced by this Treaty was the throwing open the foreign Trade of the *Thirteen Provinces*, which had been before confined solely to *Great-Britain*, to all the other Nations of the known World; and the Consequence that immediately ensued was, separate Treaties of Commerce between the said *United States*, and some of the most considerable maritime and commercial Powers of Europe. *France* had set the Example, prior to the Peace, *Spain* had followed; and afterwards *Holland*, *Sweden*, *Prussia*, *Denmark*, and *Russia*; our famous navigation Act, in the elegant Language of *Edmund Burke*, was thereby almost frittered away; and the only Remedy left, was to rely on the Wisdom of Parliament, in framing such commercial Laws and Regulations for renewing the Intercourse

Intercourse with the aforesaid *dismembered* Colonies, as should be best calculated to throw as much of the Trade of the *United States*, as possible, into the old Channel; and this was accordingly done without Loss of Time, and what is more remarkable still, without any formal Treaty of Commerce between the two Parties; for at the Date of Writing this Article for the Press, no such Treaty subsists, though repeated Efforts have been made to accomplish it.

23 Geo. III.  
C. 39.

Two short Bills were passed, one to repeal all the prohibitory Acts, which had totally put a Stop to any Intercourse between the two Countries; the other to prevent the Custom-Houses of *Great-Britain* requiring *American* Vessels to produce certain Instruments, as Manifestoes and other particular Papers, on their Arrival from any of the Ports of the now *United States*, at any Port of *Great-Britain*; and to vest in the King and Council, for a limited Time, full Powers to make such other Regulations as should be judged expedient.

By the second Act, likewise, the Ships of the Citizens of the *United State*, with the Merchandizes and Goods on board the same, are to be admitted into all the Ports of *Great-Britain*, in the same Manner as the Ships and Vessels of the Subjects of other independent sovereign States; and the Merchandizes and Goods on board such Ships or Vessels of the Subjects or Citizens of the said *United States*, being of the Growth, Produce or Manufacture, of the said *United States*, shall be liable to the same Duties and Charges only, as the same Merchandizes and Goods would be subject to, if they were the Property of *British* Subjects, and imported in *British*-built Ships or Vessels, navigated by *British* natural-born Subjects.

This Privilege by another Clause is extended to the *British* Colonies in *America*, thereby establishing a free commercial Intercourse between the Subjects of *Great-Britain* in those Colonies, and the Subjects and Citizens of the *United States*.

The same Drawbacks, Exemptions and Bounties on the Exportation of Merchandizes and Goods from *Great-Britain*, to the Territories of the *United States*, are granted to them; as are allowed on Exportation of the same Articles to the Islands, Plantations or Colonies, now remaining or belonging to the Crown of *Great-Britain* in *America*.

These Acts were followed by an Order of Council dated at the Court of St. James's the 26th December, 1783; by which unmanufactured Goods or Merchandizes of the Growth or Production of any of the *United States* of *America*, the Importation of which is not prohibited by Law, may be imported directly from thence into *Great-Britain*, either in *British* or *American* Ships, by the Subjects, or Inhabitants of either Country, on the Payment of the same Duties, as they are liable to, if imported by *British* Subjects, in *British* Ships only, and from the Colonies and Plantations in *America* belonging to the King of *Great-Britain*.

By the same Order of Council, Tobacco is allowed to be imported in Ships belonging to the said *United States*, and a Payment of the Duties to be lodged in the King's Warehouses in the Ports of *London*, *Bristol*, *Liverpool*, *Cowes*, *Whitehaven*, *Greenock*, and Port *Glasgow*, in Order to be taken from thence, subject to the Regulations of the Acts of Parliament in Force, respect the warehousing of Tobacco, to be exported to other Countries.

And in Order to facilitate the carrying on Trade and Commerce between the People and Territories belonging to the Crown of *Great-Britain* in the *West-Indies*, including in that Description the *Babama Islands*, and the *Bermuda* or *Somers Islands*; and the People and Territories belonging to the said *United States* of *America*; his Majesty is hereby farther pleased to order, that Pitch, Tar, Turpentine, Hemp, Flax, Masts, Yards and Bowsprits, Staves, Heading-Boards, Timber, Shingles, and all other Species of Lumber: Horses, Neat-Cattle, Sheep, Hogs, Poultry, and all other Species of live Stock and live Provisions: Peas, Beans, Potatoes, Wheat, Flour, Bread, Biscuit, Rice, Oats, Barley, and all other Species of Grain, being the Growth or Production of any of the said *United States* of *America*, may, until farther Order, be Imported by *British* Subjects, in *British*-built Ships, owned by his Majesty's Subjects, and navigated according to Law, from any Port of the said *United States* in *America*, to any of his Majesty's *West-India Islands*, the *Babama Islands*, and the *Bermuda* or *Somers Islands*; and that Rum, Sugar, Melasses,

Tables of the Imp  
Edition, London

Melasses, Coffee, Cocoa-Nuts, Ginger, and Pimento may, until such Order, be Exported by *British* Subjects, in *British-built* Ships, owned by his Majesty's Subjects, and navigated according to Law, from any of the said Islands, to any Port or Place within the said United States, upon Payment of the same Duties on Exportation, and subject to the like Rules, Regulations and Securities, as the same Articles by Law, are or may be subject and liable to, if exported to any *British* Colony or Plantation in *America*; and the Bonds and Securities heretofore required to be taken for such Ships carrying such Goods, shall and may be cancelled and discharged, upon the like Certificates as are required by the above recited Act to discharge any Bond given in *Great-Britain* for the due landing any other Goods in the said United States of *America*.

In the Session of Parliament of 1784, the Act before recited was continued, and has been renewed in the same Manner annually, to the present Year 1791.

Another Act passed to confine for a limited Time, the Trade between the <sup>25</sup> *Geo. III.* Ports of the United States of *America*, and his Majesty's Subjects in the Island of <sup>C. 5. 1785.</sup> *Newfoundland*, to Bread, Flour, and live Stock, to be Imported in none but *British-built* Ships, owned by *British* Subjects and navigated according to Law; clearing out from the Ports of his Majesty's *European* Dominions, and furnished with a Licence according to a Form thereunto annexed; and already given in a former Part of this Work.

Continues the Act above recited with these Additions: Goods imported into <sup>26</sup> *Geo. III.* *Newfoundland* contrary to this Act shall be forfeited; and no Licence shall be <sup>C. 1. S. 5.</sup> granted to any Ship to carry on the said Trade after the 30th of June, 1787.

The preceding Acts being continued to April 5th 1789; it is further enacted: <sup>28</sup> *Geo. III.* that Iron, Hemp, Sail-Cloth, or other Articles, the Produce of any Place bor- <sup>C. 5. S. 2.</sup> dering on the *Baltic* Sea, which may be exported from *Great-Britain*, if exported contrary to Law; or Goods Imported from the Territories of the United States of *America*, into *Great-Britain*, not being such as are permitted by Law to be Imported, shall be forfeited.

These are the present subsisting Laws respecting our Commerce with the new States of *America*; and they have been found sufficient to promote a beneficial, increasing Return of Trade in Favour of *Great-Britain*, without any Commercial Treaty; and against the Expediency of making such a Treaty, that excellent and correct Writer and Calculator on the commercial Affairs of *Great-Britain* and *Ireland*, and of their Trade with the *American* States, *John Lord Sheffield*, one of the Representatives in the present Parliament for *Bristol*, to whom the Editor acknowledges himself greatly indebted for much valuable Information, and some authentic Materials for the Improvement of this Work, offers the following weighty Objections.

"It is plainly impossible to make a Commercial Treaty with the *American States*, without giving them some valuable Privilege, for which they have precluded themselves from making an adequate Return. The Treaty of Peace, and subsequent Acts, opened the Ports of *Great-Britain* and *Ireland* to them, in the same Manner as their Ports were opened to us, when they repealed their restraining Laws. A brisk Trade has already begun, and it is unnecessary to prove on which Side the Advantage is, between the Traders who ask for Credit, or the Traders who give it.

"If the *American States* had any Thing to grant by any Kind of Commercial Treaty, it may be well doubted, whether they would keep it farther than suited their Convenience. Besides; what was foretold in the first Edition of this Work \*, has now actually happened. Every Account from *America* says, that *British* Manufactures are selling at a considerable Profit, while other *European* Goods cannot obtain the first Cost. Every Day's Experience shews that this Country, from the Nature and Quality of its Manufactures, and from the Ascendancy it has acquired in Commerce, will command at least three Fourths of the *American* Trade. The *American* Merchants solicit a Correspondence, and beg

\* Observations on the Commerce of the *American States*, By *John Lord Sheffield*, with an Appendix containing Tables of the Imports and Exports of *Great-Britain* to and from all Parts from 1700, to 1783 &c. The Sixth Edition, London 1784.

for Credit, because, while they feel their own Want of Capital, they know that our Traders are more liberal, and our Goods cheaper and better than any other in Europe. And the only Danger is, not that the American Merchants will ask for too few Manufactures, but that they will obtain too many".

Our noble Author, then states the Risk of giving an extensive Credit to the People of the United States, who being impoverished by an expensive War, which has bequeathed them many Taxes to pay, will not be punctual in their Remittances at a Time, when they are associating against the Payment of old Debts. But this well-grounded Objection in 1784, when his Work was published, has been since happily removed, by an equitable Change in the Conduct of the United States, for having rescinded their former Resolutions, they have lately made large Remittances on Account of old Debts; and have restored several confiscated Estates to Loyalists, the original Owners, upon their refunding the inconsiderable Sums paid for them by the new Purchasers. Upon the whole therefore, it appears evident, that in the present State of our Commerce with the said United States, we derive more real Profit from them, than while they were subject to the Crown of Great-Britain. And Lord Sheffield supports this Opinion, by the most convincing Arguments and Facts, which we take the Liberty to insert in this Place, because they may serve as a Guide to mercantile Legislation, with Respect to similar Cases, that may arise if Difficulties and Disagreements should hereafter occur concerning other Foreign Settlements and Plantations belonging to the British Empire.

" Let Considerations of Advantage and Protection hereafter go Hand together. In most Cases, the Expence of Protection and civil Government is much greater than the Prevention of Competition is worth. The superior State of British Manufactures in general, does not require other Means of Monopoly than what their Superiority and Cheapness will give. If we have not purchased our Experience sufficiently dear, let us derive a Lesson of Wisdom from the Misfortunes of other Nations, who like us, pursued the Phantom of Foreign Conquest and distant Colonization, and who, in the End, found themselves less populous, opulent, and powerful.

" By the War of 1739, which may be truly called an American Contest, we incurred a Debt of upwards of - - - - - £. 31,000,000  
 " By the War of 1755, a further Debt of - - - - - 71,500,000  
 " And by the War of the Revolt, nearly - - - - - 100,000,000

Total £. 202,500,000

"And thus have we expended a larger Sum in defending and retaining our Colonies, than the Value of all the Merchandise which we have ever sent them: we have in a great Measure, disbursed this enormous Sum, to secure the Possession of a Country which yielded us no Revenue, and whose Commerce called for but 1,655,902*l.* of the Manufactures of Britain, taking the Average of four Years, from 1767, to 1770; so egregious has our Impolicy been in rearing Colonies for the Sake of their Custom."

Finally, for the Satisfaction of British Merchants, and of all Persons interested in, or wishing well to the Trade and Navigation of Great-Britain, we add, from a comparative View of authentic Records, that at the Commencement of the Year 1788, Our general Imports and Exports from and to all Ports of the World, exceeded by some Millions, the Amount of any preceding Year, during the present Century.

The Imports for the Year 1787, amounting, by the declared Value at the Custom-House to - - - - - £. 17,804,024 : 16 : 1

The Exports for the same Year to - - - - - 18,296,166 : 12 : 11

After this ample Statement of the Consequences of the *American* Revolution, we proceed, according to the original Plan of our Author *Wyndham Beawer*, with the civil and commercial History of the several Provinces of *America*; their Growth and Product, &c. beginning with the Southernmost.

## O f G E O R G I A .

**T**HIS Settlement lies in the Bounds of *Carolina*, as described in their Charter; but having long remained unfettled, the worthy Projectors of the *Georgia* Establishment fixt on this Spot as a proper one for their benevolent Intentions of relieving the Distresses of their fellow Creatures, and at the same Time to make their Relief turn to a publick Advantage. It was with these generous Views, that a Set of Gentlemen solicited his late Majesty King *George II.* for a grant of the uncultivated Lands afore-mentioned, with a free Consent of the *Carolinians*, to whom this Tract was rather a Burthen than a Benefit, and from whose Settlement they expected to reap both Security and Advantage. His Majesty, always ready to promote the Good of his Subjects, was graciously pleased to condescend to their Request, and by his Letters Patent, bearing Date the 9th of *June*, 1732, did constitute the Petitioners a Corporation, by the Name of *The Trustees for establishing the Colony of Georgia in America*; with Capacity to purchase and take Lands, to sue and be sued, &c. with the restraining Clauses, that no Member of the said Corporation should have any Salary, Fee, Perquisite, Benefit, or Profit whatsoever, for acting therein, or should have any Office, Place, or Employment of Profit whatsoever under the said Corporation, &c. They had likewise a Power to make By-Laws, &c. And, amongst other Things, there was granted to the said Corporation and their Successors, under the Reservations therein mentioned, seven undivided Parts, the whole to be divided into eight equal Parts, of all those Lands, Countries, Territories, situate, lying, and being, in that Part of *South Carolina*, in *America*, which lies from the northernmost Stream of a River there, called the *Savannah*, along the Sea Coast to the Southward, unto the most Southern Stream of a certain great other Water or River, called the *Alatamabab*; and Westward from the Head of the said Rivers, respectively in direct Lines to the *South Seas*: To have and to hold the same to them, &c. for ever, for the better Support of the said Colony, under the yearly Rent of four Shillings Proclamation-Money of *South Carolina*, for every hundred Acres of the said Lands, for every of which the said Corporation shall grant, demise, plant, or settle; but not to commence until ten Years after such Grant, Demise, Planting, or Settling; and erected and created the said Lands, Countries, and Territories, into one independent and separate Province, by the Name of *Georgia*; and made the Inhabitants who shall reside therein, free, and not subject to any of the Laws, Orders, Statutes, or Constitutions of *South Carolina*, except the Commander in Chief of the *Militia*; and authorized the said Corporation, for the Term of twenty-five Years from the Date of the said Letters Patent, to form and prepare Laws, Statutes, or Ordinances, for the Government of the said Colony not repugnant to the Laws and Statutes of *England*; to be presented under their common Seal to his Majesty in Council, for his Approbation or Disallowance; and that the said Laws so approved of, should be in full Force and Virtue within the said Province. The Council for the Time being of the said Corporation were likewise impowered to apply their Money, make Contracts, &c. to appoint Officers and Servants, removable at Pleasure; that they might transport and convey into the said Province such of his Majesty's Subjects and Foreigners, as are willing to go and inhabit there; and declared all Persons born within the said Province, and their Posterity, to be free Denizens as if they had been born in any of his Majesty's Dominions. The said Corporation had likewise Power to assign, transfer, and set over, such particular Portions of the said Lands, Tenements, and Hereditaments, unto such of his Majesty's Subjects and others, willing to live in the said Colony, upon such Terms, and for such Estates, and upon such Rents, Reservations, and Conditions, as the same might lawfully be granted, and as to the said Common Council should seem fit and proper; provided no Grant should be made of any Part of the said Lands, unto, or in Trust for, or for the

Benefit of, any Member of the said Corporation; and that no greater Quantity of the said Lands be granted, either entirely or in Parcels, to, or to the Use of, or in Trust for, any one Person, than five hundred Acres; and declared, that all Grants made contrary to the true Intent and Meaning thereof, should be absolutely null and void. And granted, that the said Corporation, for the Term of twenty-one Years from the Date of the said Letters Patent, should have Power to erect and constitute Judicatures and Courts of Record, or other Courts, to be held in his Majesty's Name, for the Hearing and Determining all Manner of Crimes, Offences, Pleas, &c. And it is directed, that all Rents, Issues, or Profits, which should come to the said Corporation, issuing or arising out of or from the said Province, should be laid out and applied in such Manner as would most improve and enlarge the said Colony, &c. And directed, that the said Common Council should from Time to Time, for the said Term of twenty-one Years, have Power to appoint all such Governors, Judges, Magistrates, Ministers, and Officers, civil and military, both by Sea and Land, within the said District, as they should think fit and needful for the Government of the said Colony; except such Officers as should be appointed for managing, collecting, and receiving such of his Majesty's Revenues as should arise within the said Province; with a Proviso, that every Governor so appointed, should be approved of by his Majesty, and qualify himself as other Governors in *America* are by Law required to do, &c. And they have Power to train the Militia, erect Forts, &c. And that they shall have Power to import or export their Goods at or from any Ports that should be appointed by his Majesty, within the said Province, without being obliged to touch at any other Port in *South Carolina*; and declared, that after the End of the said twenty-one Years, such Form of Government, and making of Laws and Statutes, and Ordinances for the Government of the said Province and its Inhabitants, should be established and observed within the same, as his Majesty, his Heirs, and Successors should ordain and appoint, agreeable to Law; and that after the End of the said twenty-one Years, the Governor, and all Officers civil and military within the said Province, should be appointed by his Majesty, his Heirs, and Successors.

In Consequence of this extensive Charter, many Nobles and Men of Fortune undertook, in Quality of Trustees, to carry the Design into Execution, and had, as the Object of their first Care, the obtaining a sufficient Fund for enabling them to send over a considerable Body of People, and to provide them with all Kinds of Necessaries; to which they liberally subscribed themselves, obtained considerable Sums by Collection from Persons who were charitably disposed, to forward the Settlement, and, besides, procured a Donation from Parliament of 10,000*l*.

The properest Method was also studied in making this Settlement, that it might both answer the intended Ends of their being sent thither, and also contribute as much to the publick Utility as possible; in Order whereto, every Individual was regarded as a Planter and Soldier, and accordingly furnished with Arms for Defence, and Tools for his Husbandry, whose Use and Exercise was also taught him: It was also resolved, that Towns should be planned, and Lands appointed for the Subsistence and Conveniency of the Settler, and these be held in Tail-Male, as the properest Tenure in this infant Colony. The Introduction of Negroes was also prohibited for many Reasons. And after these Dispositions were made, and the Trustees enabled by publick and private Benefactions, one hundred and fourteen Souls, Men, Women, and Children, embarked with *James Oglethorpe*, Esq. one of the Trustees, in *November*, 1732, and sailed for *Carolina*, where they arrived on the 25th of *January* following; and being assisted by the Governor of *Charles-Town*, and other kind Gentlemen, a Town was marked out, and the first House begun, ten Miles up the River *Savannah*, on the 9th of *February*; after which *Mr. Oglethorpe* procured all the Assistance and Necessaries he could for his young Colony, sowed and planted a Quantity of Corn, Herbage, and Fruit, made a Treaty with the *Indians*, and then returned *England*, in Order to continue his good Offices by procuring the necessary Supplies to be sent to this Object of his Care; and arrived in Safety, in *June*, 1734, accompanied by several of the *Indian* Kings and Chiefs, who were endeared to our Countrymen by the kind Usage shewn them here.

Mr. *Oglethorpe* again embarked, and on the 6th of *February*, 1733, arrived with four hundred and seventy Persons, who were settled on the Island of *Sr. Simon*, and in the preceding Month a Parcel of *Scotch* Highlanders were got there, and established up the River *Alatamaha*, about sixteen Miles distant from the aforesaid Isle; they both built Towns, the *English* calling their's *Frederica*, and the *Scots*, *New Inverness*: Roads of Communication were made between the Towns of the *British* Adventurers and the *Indians*, and both the North and South Frontiers were not only secured by Fortifications, but also by an amicable Treaty, concluded with the *Spaniards* of *St. Augustine*, which, however, was disapproved of by their Court; and the Governors of *Cuba* and *Spanish Florida* had Directions to prepare such a Force as they imagined would be sufficient to destroy our Settlements, as well as in *Carolina* as *Georgia*; to prevent which, his Majesty was graciously pleased to order a Regiment of six hundred effective Men to be sent to *Georgia* for its Defence and Protection, and the Trustees allotted each one of them a Parcel of Land to encourage their good Behaviour.

The Parliament also now granted them 20,000*l.* and 26,000*l.* at sundry Times afterwards, for their further Assistance, which enabled the Trustees to make another Embarkation, and with these repeated Augmentations of People, the Town laid out in this new Colony began to flourish. Mr. *Oglethorpe* was appointed Colonel of the aforesaid Regiment; and no one could have been more proper for the Command than he, who only used his Authority and Care, to protect that Settlement, which with so much Fatigue and Assiduity he had planted; but this Reinforcement did not induce him to abate any Thing of that Discipline he had always observed, but he continued to train his Militia, with the same Exercise and Regularity he had before used them to, and, disregarding the Dangers he run, and the Inconveniences he suffered by travelling in an almost unknown, uninhabited, and consequently an uncultivated Country, he undertook a Journey of five hundred Miles from *Frederica*, purely to increase the Services he had already rendered the Colonies of *Carolina* and *Georgia*, by concluding a new Treaty with the *Indians*, and thereby confirming them in the *English* Interest, at a Time when the *French* were using their utmost Efforts to draw them off from it; thus, to advance and secure the Happiness of others, did this worthy Man, with unwearied Diligence, expose himself to Hazards and Toils, that would have proved unsurmountable to one of a less enterprising Genius and steady Resolution; but these enabled him to go through even such a comfortless and tiresome Expedition, as this now mentioned.

The Number of People settled in *Georgia* in the first eight Years was upwards of two thousand, which under Mr. *Oglethorpe's* prudent Conduct, in Obedience to the wise Regulations and Dispositions of the Trustees, had now acquired Strength sufficient to defend themselves, as they were soon obliged to prove; for the War, kindled here with the *Spaniards*, in 1739, soon blazed out in *America*, where General *Oglethorpe*, having with all the other Governors in that Country received his Majesty's Orders to annoy the *Spaniards* as much as they could, agreed on an Expedition against them at *St. Augustine*, in Conjunction with the Forces of *Carolina*; and though the Plan of their Operations seemed to be well concerted, it unfortunately miscarried with the Loss of many Men and much Money. The *Spaniards* in Return paid them a Visit in the Beginning of *June*, 1742, but met a signal Repulse from the *English*; for though their Force consisted of fifty-six Sail, with between seven and eight thousand Men, they were defeated by the Handful General *Oglethorpe* had with him, to the immortal Honour both of the Soldiers and their Commander, who obliged the Enemy to so precipitate a Flight, as to leave Part of their Baggage, &c. behind them. The General received all the Congratulations and Acknowledgements, so justly due to his Bravery, from all our *American* Governors, and ought to have the same Incense paid him by every Well-Wisher to the Colonies, or indeed *Great-Britain* itself.

This Province is said to be capable of producing all that *Carolina* does, though the Trustees, from an Observation that most of the *American* Settlements run into a Cultivation of the same Commodities, recommended a different Practice here, and ordered a large Plantation of *Mulberry-Trees* to be made, invited thereto by

the Propriety of the Soil, and Agreeableness of the Climate for raising Silk, of which a Parcel was brought from thence in 1739, and deemed by competent Judges to be very good; though what more it may have produced since, I must confess myself ignorant, or indeed, of what other Returns it has made to the People's Expectations, from the large Sums expended on it; though, should it fall short in the Fertility it has been praised for, and remit but little in Exchange for its Manufactures it takes from hence, the Establishment ought to be supported as an important Frontier, whose Consequence has been demonstrated, in the Stand it made against the above-mentioned powerful Attack, which might otherwise have proved of fatal Consequence to several of our Colonies. The Exports are calculated at about 74,000*l.* and the Imports at 49,000*l.*

#### Of CAROLINA.

**T**HIS Part of the Globe has been possessed alternately by *Spaniards* and *French* and though one of the finest Spots in the World, had by both been deserted for near a hundred Years, when his Majesty King *Charles II.* granted it the 24th of *March*, 1663, to *Edward* Earl of *Clarendon*, then Lord High Chancellor, *George* Duke of *Albemarle*, *William* Lord *Craven*, *John* Lord *Berkley*, *Anthony* Lord *Ashley*, *Sir George* *Carteret*, *Sir William* *Berkley*, and *Sir John* *Collinton*, with all Royal Fisheries, Mines, Power of Life and Limb, and every thing necessary to an absolute Propriety, within the Limits of the Patent, and with the Acknowledgement of twenty Marks yearly; and this Grant was seconded by another about two Years after, that made some Alteration in the Boundaries, and included both the *Carolinas* and the new Province of *Georgia*. But this Establishment not meeting with a Success answerable to the Proprietor's Expectations, they after struggling with many Difficulties for the Space of near sixty Years, resigned  $\frac{1}{4}$  of their Grant to the Crown, in Consideration of 17,500*l.* paid them for it, and the Surrender was confirmed by Act of Parliament in 1728; the other  $\frac{3}{4}$  being therein reserved to the Right Hon. *John* Lord *Carteret*, late Earl of *Granville*.

This Country, as afore-mentioned, is very pleasant and fertile, as the Riches acquired by the Inhabitants in a few Years plainly prove; and the Trade of it was once so considerable, that from *March* 1730, to the same Time 1731, there sailed from *Charles Town*, mostly for *England*, 207 Ships, with 41,957 Barrels of Rice, about 500*lb.* wt. each; 10,700 Barrels of Pitch; 2063 of Tar; and 759 of Turpentine; of Deer Skins 300 Casks, containing 8 or 900 each; besides a vast Quantity of *Indian* Corn, Peas, Beans, &c. Beef, Pork, and other salted Fleth; Beams, Plank, and other Timber for Building, most Part of Cedar, Cypress, Sassafras, Oak, Walnut, and Pine.—Since writing the above, the *Carolina* Trade is greatly increased by the Produce of *Indigo* in that Colony.

Before the late War in *America*, the Commerce of *South Carolina* alone employed 140 Ships. Its Exports to *Great-Britain* of native Commodities, on an average of three Years, amounted to upwards of 395,000*l.* annually, and its Imports to 365,000*l.* The Exports of *North Carolina* were computed at 68,000*l.* and its Imports at about 68,000*l.*

Their Trade with the *Indians* is very considerable, by which they procure the Skins above-mentioned; and in Exchange for them give Lead, Powder, coarse Cloth, Vermillion, Iron, strong Waters, and some other Goods, reaping from this Traffick a very great Profit. Of Negroes it is supposed there are near 50,000 in the Province; though Artificers are very scarce, and their Demands for Labour very extravagant; which I believe principally proceed from the Misrepresentations of the Country at home; otherwise it is to be imagined, a fine Climate and great Wages would be sufficient Inducements to attract a sufficient Number of Mechanics to supply every Want there could possibly be of them.

## Of VIRGINIA.

THIS Country was at first divided into North and South *Virginia*, and was accordingly granted by King *James I.* in 1606, to two distinct Sets of Men, the one to possess all the Lands, &c. between 34 and 41 Degrees of Latitude, to be called the first Colony, and the others to have all those lying between 38 and 45 Degrees of Latitude, with the Denomination of the second Colony; and they immediately fitted out Ships and sent many People there in the same Year; and though their Establishments were rendered as easy to them as the Nature of the Thing would possibly admit, and their advantageous Situation was very apparent, yet they could not submit to the few Labours and Difficulties attending their first settling, though with the Prospect of soon obtaining from them a comfortable and easy Abode, capable of daily Improvements by an honest Industry, but were continually breaking out into Contentions and Disturbances, which proved ruinous to the Colony, and their own Destruction; and they were so contumacious as to fly in the Face of Justice; so that few of their Governors could support their Authority, or bring them into any settled Order or Discipline; which was a good Deal owing to the Nature of the Grants made in *England* by the Patentees, and no small Share of it charged on the Company's Mal-Administration; in so much, that on King *Charles I.* ascending the Throne, he dissolved the Company in 1626, reducing the Country and Government under his own immediate Direction, and granting Patents to particular Adventurers, with the Reserve of a Quit-Rent of two Shillings for every hundred Acres.

This Resolution of his Majesty's at first seemed very agreeable to those already settled, and animated many daily to increase their Number; but old Discontents reviving, and the People proving restless under their Governor's Oppressions, gave an Instance of their Resentment, by sending the first his Majesty had set over them Prisoner to *England*, for his Disagreement with his Council, and Violences on the Inhabitants. And the subsequent Troubles of King *Charles's* Reign, and *Cromwell's* Administration, hindered the good Dispositions from proving effectual that had before been taken for the Colony's Prosperity by their worthy Chief, Sir *William Berkeley*. However, many continued Solicitors for Patents of large Tracts, which has indeed proved very prejudicial to the Country, as it is by this Means that very few Towns are to this Day built in it, and those few so small as hardly to be worth naming.

It lies from 36° to 39° of North Latitude, and between 74° and 80° of Western Longitude, being about two hundred and forty Miles in Length, and near one hundred and twenty in Breadth; divided into twenty-five, some say twenty-nine, Counties; of these, the first is *James County*, which contains five Parishes, and the only two Towns in the Province; and these, as I said before, so small, that the principal called *James Town*, does not contain above eighty Houses; and *Williamsburg*, though the Seat of Justice, not above half that Number: The People, if we reckon Men, Women, and Children, and join to these the Negroes, may amount to about five hundred thousand, which may reasonably be supposed to bring no small Advantage to their Mother Country; as from hence they are all supplied with most of the Necessaries of Life; such as Linen, Silks, *India* Goods, Wine, and other foreign Manufactures; and of our home ones, Cloths, Serges, Stuffs, Bays, Hats, and all Sorts of Haberdashery Ware; Hoes, Bills, Axes, Nails, Adzes, and other Iron Tools; Cloths ready made, Knives, Biscuit, Flour, Stockings, Shoes, Caps for Servants, and indeed almost every Thing that is made in *England*, to the Amount of near 1,000,000*l.* Sterling which is repaid mostly in Tobacco, of which it is supposed, by the nicest Calculators, that near one hundred thousand Hogheads are, in Times of Peace, imported here yearly, employing between three and four hundred Ships, navigated by upwards of four thousand Sailors; and of these, about 60,000 Hogheads are re-exported for foreign Parts, which, if computed only at 5*l.* per Hoghead, makes 300,000*l.* besides the Duties not drawn back, and the new Freight it occasions.

This

This Settlement, it is to be observed, is only that Part of the original Grant, called the first or *London* Colony; the other, termed the second or *Plymouth* Colony, shall be spoke of when I come to treat of *New-England*, of which they were the original Planters; in the mean Time I proceed, as it comes next in Course, to speak

#### Of MARYLAND.

THIS Colony remained a Part of *Virginia*, as several others did till they were dismembered, which shall be noted in their proper Places, till 1632, when King *Charles I.* in the eighth Year of his Reign, granted all the Country to the North of *Potowmack* River, not then planted, to *Cecilius Calvert* Lord *Baltimore*, and his Heirs; which Tract was thenceforth called *Maryland*, in Honour of the then Queen *Confort*; and in Consequence of this Grant, the Proprietor sent over his Brother, with about two hundred Adventurers, to take Possession of their Limits, and to make a Settlement; which they first did in an *Indian* Town, called afterwards *St. Mary's*, on the River *Potowmack*, and near the Mouth of that they christened *St. George's*.

This soon became a flourishing Colony, though the *Baltimore* Family was deprived of its Government during the Civil Wars; but King *Charles II.*'s Restoration proved that of the Proprietor's; as his Majesty, on coming to the Throne, reinstated him in all his Privileges.

The Province is situated between 38° and 40° of Northern Latitude, and between 75° and 80° of Western Longitude; abounding, as *Virginia* does, in fine Springs and Rivers; so that, like the *Virginians*, they can bring the Ships up to their very Doors: It is divided into ten Counties, though it has very fine Towns, the same Humour of living on their own Plantations prevailing among the Gentry here, as was before observed to reign among their above-mentioned Neighbours.

The Soil and Products of this Country are similar to those of *Virginia*, and the Natives here imitate the others' Management, in confining their Husbandry to the Cultivation of Tobacco only, of which it is supposed they now produce as much as *Virginia* does, though the Quality to the *English* Taste is inferior to the other, it being stronger than the sweet-scented Leaf gathered on the Borders of *Jams* and *York* Rivers; however, this Circumstance gives it a Preference every where in the North, to which Part of the World we generally send it: The Inhabitants may be about 30,000, who are supplied with Necessaries from hence in the same Manner *Virginia* is, so that a Catalogue of them need not be repeated here.

#### Of NEW-YORK.

THIS, like the last-mentioned Province, was a Part of *Virginia*, and became our's under the double Right of Discovery and Conquest; the first by *Cabot*, and the latter from the *Dutch*, who had settled here, and held it by an illegal Title, and therefore the *English* have retained it ever since its Recovery at the Beginning of the *Dutch* War. It is about two hundred Miles in Length, though generally very narrow, well replenished with Provisions and Farms, which occasions it having few large Towns; the Capital *New-York* City, however, is very considerable for this Part of the World, as it contains upwards of a thousand well-built Houses of Stone and Brick, besides commodious Quays and Warehouses on its excellent Harbour, where some hundreds of Ships and Vessels are employed in the foreign Trade and Fisheries from hence carried on to *Madeira* and the *Azores*, where they send Pipe-Staves and Fish, returning with Wine and Brandy, to their very great Advantage; and to all our Sugar Islands, more especially *Barbadoes*, they send Corn, Flour, Bread, Beef, pickled and smoaked Pork, Peas, Bacon, Apples, Onions, Board, and Pipe-Staves; for which they bring back Sugar, Mellasses, Rum, Ginger, &c. And the Agents for this Province, in their Contest with the Sugar Plantations, affirmed, that their Winters being severe, obliged them to take off more of the Woolen Manufactures of this Kingdom, for which they remitted Gold and Silver, than all the Islands, *Jamaica* excepted, put together, and which I believe has remained uncontradicted.

At our becoming Masters of this Country, it was found to be very thinly peopled; but the Climate and Soil have proved such powerful Inducements to Adventurers, that their Number is supposed now to be swelled to 90,000.

Before the *American War*, the Exports from this Province, upon an Average of three Years, amounted annually to 526,000*l.* and their Imports from *Great-Britain* to 531,000*l.*

#### Of PENNSYLVANIA.

**ADMIRAL Penn**, afterwards Sir *William*, rendered himself famous by the Conquest, with Col. *Venables*, of *Jamaica*; and endeared himself to every one serving under him, by his unaffected Modesty, and other engaging Qualifications and Virtues; these, and his great Abilities in maritime Affairs likewise, placed him in a very high Degree of Esteem and Credit both with King *Charles II.* and his Royal Brother, which drew from the former a promised Grant of this *American Territory*, in Reward of his past Service to the Crown; but he dying before its Confirmation, and his Son not applying for it till some Years after, the Patent bears Date only from the 4th of *March*, 1680, containing all that Tract of Land in *America*, with all the Islands belonging to it, from the Beginning of the 40th Degree of North Latitude to the 43d Degree, &c. This was the Limitation of the first Grant; but Mr. *Penn* having afterwards obtained an Addition from *New-York*, the whole Territory of *Pennsylvania* now runs three hundred and thirty Miles in Length, and about two hundred in Breadth, being distinguished by this Denomination in both the Patents.

There were but few *English* when Mr. *Penn* sent over the first Adventurers, who had accompanying them a Governor of his appointing, to whom the *Suedes* and *Dutch* that remained very readily submitted; but he afterwards went in Person to settle the Constitution he had procured to be drawn up by that great Lawyer, Sir *William Jones*, and to make Agreements with the *Indian Princes*. The Air is serene and pleasant, the Soil generally fertile, and every Thing growing here in great Abundance and Plenty. The Towns are large and numerous, well situated for Trade, and populous; insomuch that the Capital, *Philadelphia*, is now supposed to contain fifteen thousand Inhabitants, by which the Number of People in this flourishing Colony may be guessed at, though it would be difficult to ascertain them.

The Merchandize which *Pennsylvania* furnishes for its Commerce with *Europe* and *America*, consists in Horses, Pipe-Staves, Pork, Beef, and Fish salted and barrelled up, Skins and Furs; all Sorts of Grain, *viz.* Wheat, Rye, Peas, Oats, Barley, Buck-Wheat, *Indian Corn*, *Indian Peas* and Beans, Pot Athes, Wax, &c. And in Return for these they import from the *Caribbee Islands*, &c. Rum, Sugar, Melasses, Silver, Negroes, Salt, and Wine; and from *Great-Britain*, Household Goods, Clothing of all Sorts, Hardware, Tools, and Toys. They also grow some Rice, and a little Tobacco of the worst Sort; and their Trade with the *Indians* is confined to a few Articles; they receiving from them only Furs and Skins, and giving them in Return, some Clothing, Arms, Ammunition, Rum, and other Spirits.

The Amount of the Commodities exported from *Great-Britain*, before the War, was upon an Average of three Years, valued at 611,000*l.* and those exported to *Great-Britain*, including Ships built there for Sale in *England*, are estimated at 705,500*l.*

#### Of the JERSEYS.

**THESE** fell under the Dominion of the Crown at the same Time that *New-York* did, and with that composed the Province of *Nova Belgia*, taken from the *Dutch*, as before-mentioned, and all were included in the Grant made by King *Charles II.* to his Brother the Duke of *York*; who invested this Part of it by the Name of *Nova Caneria*, in *John Lord Berkley*, and Sir *George Carteret*, and they or their Assigns agreed to divide it, with the Denomination of *East* and *West New Jerseys*; the first falling to the Share of Sir *George*, as the latter did to his Lordship;

ship; and both being parcelled out into different Proprietaries, were unanimously resigned up to her Majesty Queen Anne, on the 22d of April, 1702, and have been ever since governed by Royal Authority: They have several well-built Towns in them, commodiously situated for Trade, as Ships of two or three hundred Tons may come up to the Merchants' Houses in divers of them. The Country yields Plenty of all Sorts of Grain, with which they supply the Sugar Islands, and besides this drives some Trade in Furs, Skins, and a little Tobacco; they likewise ship some Train Oil, Fish, Corn, &c. for Portugal, Spain, and the Canaries, though New-York is their principal Market, either for supplying themselves with, or disposing of their Commodities.

The Inhabitants are computed to be about 100,000, but they carry on little or no foreign Trade, owing to the vicinity of the Jerseys to the great commercial Cities of Philadelphia and New-York, by which they were supplied with Merchandize from Britain, and make Returns in Wheat, Lumber, and other native Products.

#### Of NEW-ENGLAND.

**I**N my Description of Virginia, I gave an Account only of the first or London Company, referring my Readers for the Success of the second or Plymouth Company's Expedition, to this Place, which I shall now give.

These Adventurers contented themselves for some Years, with the Trade of Furs with the Natives of North Virginia, and fishing on that Coast, in which two Ships were employed so early as the Year 1614, commanded by the famous Capt. John Smith, and Capt. Thomas Hunt, the former of which landed, and took a particular View of the Country of the Massachusetts, by which he was drawn into several Skirmishes with the Natives; and afterwards returning to England, he left Orders with Hunt to proceed in his Ship, with the Fish taken, to Spain; but this ungenerous Man, not content with his finny Treasure, and stimulated by an avaricious desire of Gain, took such iniquitous Steps to procure it, as proved of fatal Consequence to the infant Colony; for as soon as Capt. Smith was departed, he enticed twenty-seven of the innocent Indians aboard, and carried them with his Cargo to Malaga, where he sold them at 20l. a Head. This Outrage was resented by the Indians in such a Manner as might justly be expected; they broke off all Communication with the Colony, so that an entire Stop was put to the little they before carried on, and their Endeavours for Revenge were exerted on several future Occasions. And repeated Disappointments occurring by these Disagreements, the Patentees were discouraged from prosecuting their intended Settlements, and gave up all Thoughts of making them. However, other Adventurers carried on a Trade to New-England; and a Congregation of Independents who had fled from thence to Holland on Account of their Religion, under Mr. John Robinson their Minister, now meditated another Remove, and determined on changing their Climate once more, from an European to an American; flattered with the Hopes of finding an Asylum in the latter, which was denied them in the former. And they accordingly procured a Grant for their Settlement on Hudson's River, where, however, they never arrived; but either Chance, or Treachery, as some suppose, having driven them to New-England, in the Latitude of 42° North, they there landed, and built themselves a Town, which they called New Plymouth, being about a hundred Souls in all, Men, Women, and Children, of which a great Part died the first Winter. However, new Recruits continually succeeding, they began to grow powerful, and became a flourishing Colony; and this led them to reflect seriously on the Nature of their present Settlement, which they knew to be precarious, as they were not only without a Patent or Grant to secure them in the Possessions they now enjoyed, but held them contrary to the Rights of the North Virginia, or New-England Company. In Order, therefore, to establish themselves on a better footing, they commissioned one of their Number, in the Year 1624, to solicit a Charter for them, which he successfully performed, and obtained one more favourable than their most sanguine Expectations could make them hope for; they being thereby enabled to elect a Governor, Council, and Magistrates, and to make Laws, provided they were no Ways

opposite to our's, or in any Respect encroached on the Crown's Prerogative: Thus the first Settlement in this large and fertile Country was confirmed; and this animated others to take the same Steps; of which I shall give some Account in as brief a Manner as possible.

In 1625, Mr. *White* of *Dorchester*, another Minister of the same Persuasion with the before-mentioned, being animated by his Success, determined to follow his Steps, in Hopes of the same good Fortune; and accordingly procured a Grant from the *North-Virginia* Company, to divers therein mentioned, of all that Part of *New-England*, which lies between the great River *Merimack* and *Charles* River, &c. and obtained a Patent from King *Charles* I. to hold the same; which was enlarged by a new one, 1628, with still greater Privileges than in those ceded to the *New Plymouth* Colony, and by whom *Charles Town*, *Dorchester*, and *Boston*, the Capital, were successively built; and from these a Colony was detached, to settle on *Connecticut* River; which afterwards obtained a Grant for themselves, with Privileges similar to those already spoken of. After these, *New-Haven* was built, and the Country settled; and whilst this was transacting in the *South-West* Parts of *New-England*, those in the *North-East* were not neglected; for these Coasts having for some Time been frequented, for the Advantages of Fish and the Fur Trade, encouraged those concerned therein to attempt an Establishment; which they succeeded in so much to their Satisfaction, as in a few Years to settle the two Counties of *New-Hampshire* and *Main*, for which they obtained a Charter; but as Feuds and Divisions prevailed among them, they again resigned it, in 1684, to the Crown, where the Property has ever since remained.

And if any one reflects on the swift Progress made in the Settlements, that in about twenty Years they had built twice as many Towns, cultivated a large Tract of Land, and settled a tolerable good Trade, he must allow them to have been uncommonly industrious, more especially, if he considers the many Difficulties they had all along to struggle with.

*New-England* at present comprehends four very considerable Governments, viz. *Massachusetts*, which with *New-Plymouth* and the *Main*, are now included in one Charter; *New-Hampshire* still remaining separate; *Connecticut*, comprehending also *New-Haven*; and *Rhode-Island*, with *Providence* Plantation. The whole Country extending from 41 to 45 Degrees of North Latitude, and from 67 to 73 Degrees of Western Longitude, abounding with Plenty of Fish, Fowl, Fruit, Grain, and Herbage; it is likewise replete with many fine Rivers, and its Inhabitants are very numerous.

Its Commerce is very considerable, being spread all over *America*, and to several Parts in *Europe*: Our Sugar Colonies are from hence supplied with Fish, Cattle, Corn, Apples, Butter, Cheese, Oil, Tallow, Boards, Hoops, Pipe-Staves, Skins, Bark, Turpentine, &c. and these in such vast Abundance, that the Island of *Barbadoes* only is computed to take off the Value of two hundred thousand Pounds yearly: They also deal with the other Sugar Colonies; sometimes with the *French*, more with the *Spaniards*; and their Exportation of Fish for *Portugal*, *Spain*, and *Italy*, is greater than from any Part except *Newfoundland*—From hence they take all Kinds of Mercery Goods, Linens, Stockings, Shoes, Sail Cloth, Cordage, Haberdashery Ware, and a vast many other Things: In Return, they build for us a prodigious Number of Ships, and supply us with Pig and Bar Iron, Pitch, Tar, Turpentine, Skins, Furs, Oil, Whale Fins, Logwood, and other Commodities, besides a great Quantity of Masts, Yards, and Plank, for the Royal Navy; and as I cannot pretend to make a Calculation myself of the Advantages accruing to us from this Trade, I shall adopt Sir *Josiah Child's* Words on this Subject, to convey to my Reader an Idea of the Greatness of them. "To do Right," says he, to that industrious *English* Colony, speaking of *New-England*, I must confess, that though we lose by their unlimited Trade with other foreign Plantations, yet we are very great Gainers by their direct Trade to and from *Old England*. Our yearly Exportations of *English* Manufactures, Malt, and other Goods from hence thither, amounting, in my Opinion, to ten Times the Value of what is imported from thence; which Calculation I do not make at Random, but upon mature Consideration; and peradventure upon as much Experience of this very Trade, as any other Person will pretend to do, &c."

It

It was computed, before the unfortunate Revolt of the Thirteen Provinces from the Mother-Country, that the Amount of the *English* Manufactures and of *India* Goods sent into this Colony from *Great-Britain*, was not less, upon an Average of three Years, than 395,000*l.* Our Imports in Value, &c. Commodities for home Consumption, and for Exportation to the *European* Markets, were calculated at 370,500*l.*

#### Of NOVA-SCOTIA.

**N**O Part of our *American* Settlements has occasioned more Contests than this, or has so often changed Masters; having been several Times alternately possessed by *French* and *English*, though our Title to it is founded on *Cabot's* Discoveries, and was therefore originally regarded as a Part of *North-Virginia*, and as such, within the Charter of the *Western* Company, who gave strict Orders to those in their Service, by all Means to prevent foreign Nations from settling in their Limits.

Sir *Samuel Argal*, then Governor of *Virginia*, made a cruising Voyage in 1618, round the Coast northwards, as far as *Cape Cod* in *New-England*, about five or six Years before the *English* Adventurers arrived in that Country; and being informed by the *Indians*, that some white Men had settled farther North, he went, and found a Fort built, with a *French* Ship riding at Anchor before it, both which he took; and the *French* afterwards cancelled their Patent from the King; and acquainted him of another Settlement made by their Countrymen at a Place they had named *Port-Royal*, in the Bay on the South-west of *Acadia*, which he also went to, and reduced it.

When Sir *Ferdinand Gorges* was President of the *New-England* Company, he proposed to Sir *William Alexander* to procure a particular Grant for the Land to the Northward of their Patent, who accordingly applied for and obtained it of King *James I.* in 1621; and the next Year sent a Ship with Passengers, to plant and settle there; but it being late in the Season, they were forced to winter in *Newfoundland*, and to wait the Spring's Return before they could get away, which they effected as soon as the Weather would permit it, and proceeded on their Voyage till they happily concluded it, and landed in what they afterwards called *Luke's-Bay*; and Sir *William Alexander* having published a Book, with the Description of the Country, placed it in so tempting a Light, that his Sovereign created a new Order, called the Knights of *Nova-Scotia*, purely to facilitate its Plantation.

This projected Settlement, however, proved abortive; and there was afterwards another Grant made of the Northern Part of this Country, to Sir *David Kirk*, from whom the *French* King bought it, or at least contracted to give him 5000*l.* for it; and Sir *William Alexander*, some Years after, sold his Property to *Claude de la Tour*, a *French* Nobleman; which plainly proves that the Rights and Titles by which they held them were acknowledged by that Nation.

*Oliver Cromwell*, in 1654, sent Major *Sedgwick* to dislodge the *French* from *Port-Royal*, which he effected, and took Possession of the said Tract of Land; on which *Charles de St. Estienne*, I believe it should be *Estienne*, Son and Heir to *Claude de la Tour*, came to *England*, and on making out his Claim under Sir *William Alexander*, then Earl of *Sterling*, *Cromwell* allowed it.

On the 20th of *Sept.* 1656, the said *Charles de St. Estienne* sold and conveyed his Property in the said Country to Sir *Thomas Temple* and *William Brown*, who divided the said Land by Deed of Partition.

Sir *Thomas* afterwards, *viz.* in the Year 1662, made out his Right, and obtained a Patent from the Crown, not only for the Territory mentioned therein, but for the Government thereof during his natural Life, and the sole Monopoly of the Fishery and Trade with the *Indians*.

By the Treaty of *Breda*, in 1667, this Land was again ceded to the *French*; and in 1670, the Possession was delivered to them by Sir *Thomas*, in Virtue of the said Treaty, and in Obedience to express Orders from the Earl of *Arlington*, then Secretary of State, though he never conveyed his Right to the Lands, nor ever received a single Farthing of 16,200*l.* Sterling then stipulated to be paid to him

in Recompence of his Disbursements for building Forts, maintaining Garrisons, and the Debts due to him from the Natives, though much sollicitated for, both at the Courts of *England* and *France*.

In 1690, on the 28th of *April*, Sir *William Phipps* having, by Order of the *Massachusetts*'s Government, set forward on an Expedition for the Reduction of this Country, succeeded therein; and having dispossessed the *French* thereof, and appointed a Governor, he returned to *New-England* on the 30th of *May* following, and the *English* remained Masters of it till 1697, when by the Treaty of *Riswick*, it was once more restored to the *French*.

In 1710, it was again reconquered by the Forces of *Queen Anne*, sent from hence and *New-England*, under the Command of General *Nicholson*; and by the Treaty of *Utrecht*, in 1712, was yielded up to *Great-Britain*, and has ever since continued in the Possession of this Crown, having been constantly garrisoned by a Regiment of Soldiers, till its late Settlement augmented the Number of these, as well as of its Inhabitants.

Sir *Thomas Temple* died on or about the 27th of *March*, 1674, at *Brentford* in *Middlesex*, leaving his Nephew, *John Nelson*, Esq. of *Boston* in *New-England*, his Heir and sole acting Executor to his Will; who by Deed, bearing Date the 15th of *April*, 1731, sold and conveyed all his Right, Title, Claim, &c. in and to the said Lands, Debts, Rent, &c. to *Samuel Waldo*, Esq. of *Boston* aforesaid; of which the said *Samuel Waldo* afterwards sold and conveyed an undivided Moiety to me. And as we were conscious of what Importance the Settlement of this Province would be to the Northern Colonies, we secured a considerable Number of *Swiss* Protestants to begin it, not imagining, after so clear a Deduction of our Title, we should have any Impediment to so necessary a Work, pregnant with innumerable Advantages to the Nation. However, lest our Right should be in future contested, on Account of the aforesaid several Treaties and Changes of Possession, we humbly intreated his Majesty, about thirteen years ago, to confirm our Grant, or to give us a new one; which Petition he was graciously pleased to refer to a Committee of Council, and the Committee referred it to the Consideration of the Attorney and Solicitor General; which being just before the breaking out of the War of 1755, this Occurrence made us desist from pressing the Affair: But all Pretensions to this Colony having been formally renounced on the Part of *France*, by the IVth Article of the Peace of *Verfailles*, in 1763, our Title to *Nova-Scotia* is now confirmed beyond Dispute.

This Country lies in a good and healthy Climate, being in the same Latitude with *Old France*; enriched with a fertile Soil, abounding in fine navigable Rivers, which, like its Coasts are full of various Kinds of Fish; more especially Salmon, Sturgeon, Herrings, Cod, and Whales; and besides these, the Province is capable of producing Hemp, Flax, Masts, Iron, and all the naval Stores, *extra* of Furs, Oil, Whalebone, and Poor-jack; it can also as conveniently as any other supply the Sugar Colonies with Provisions, Boards, Staves, &c. and consequently, under proper Encouragement, soon become capable of taking off large Quantities of *British* Manufactures, and in Time prove a valuable Establishment to its Mother Country.

In the Year 1749, a Town was built in this Colony, and called *Hallifax*, in Honour of the Earl of *Hallifax*, the noble Patron of the Undertaking, who then presided at the Board of Trade. By the Goodness of its Harbour, and its convenient Situation for *British* Men of War to winter in, together with the Protection it affords to the Cod Fishery, this bids fair to be one of the most considerable Towns in *North-America*, notwithstanding its Northern Climate; being free from Ice the whole Winter.

The Number of Inhabitants is computed at 16,000, who carry on a considerable Trade in Furs and naval Stores, which, with their Fishery, and the internal Circulation by the Residence of a Governor and a Garrison, consisting of three Regiments of regular Forces, renders it a very flourishing Place. *Annapolis*, a Town of less Note, is famous for its fine Bay in which a thousand Sail of Ships may ride at Anchor in Safety.

## GENERAL COMMERCE OF THE WORLD.

The Exports from *Great-Britain* to this Country, consist chiefly in Woolen and Linen Cloth, and other Articles of Clothing; Fishing-Tackle, and Rigging for Ships. The Imports, consisting of Timber, Furs, and Fish.

*Of the Islands of Cape Breton and St. John.*

**T**HESE two Islands belonged to the *French*, but were taken from them in the Year 1758, by the *English* Fleet and Army commanded by Admiral *Boscawen* and General *Amberst*; and ceded to us by the following Treaty of 1763. The principal Advantage of these Islands is their Situation for the Cod Fishery, which throws the whole of that invaluable Trade into the Hands of the *English*, calculated by some at so large a Sum as eight hundred thousand Pounds *per Annum* Profit, employing at least 1500 Ships, exclusive of large Boats.

At the same Time these Islands were taken, the *French* Neutralis, as they were called, came from *Nova-Scotia* to our more Southern Settlements, by which that lately settled Colony is secured from Inroads both from them and the *Indians*.

## OF CANADA.

**I**N the Year 1759, General *Wolfe* and Admiral *Saunders* being sent with an Army and Fleet from *Great-Britain* to attack this very considerable Settlement of the *French*, their Arms were blessed with such Success that they made themselves Masters of the City of *Quebeck*, the Capital of that Country, situated on the River *St. Lawrence*. At the same Time General *Amberst*, the Conqueror of *Louisburgh* the Year before, with Sir *William Johnson*, and a large Army of Regulars from *England*, Provincials, and *Indians*, marched against the *French* Settlements at *Crown Point*, *Ticonderoga*, and *Niagara*; the two first of which were abandoned on the Approach of General *Amberst*; but Winter coming on, prevented his proceeding to *Montreal*, and thereby making a Junction with General *Wolfe*. While this was doing, Sir *William Johnson* besieged *Niagara*; and an Army of *French* and *Indians* coming to raise the Siege, he entirely defeated them, on which the Place surrendered.—General *Forbes* marched with another Army to attack Fort *Duquesne* on the *Ohio*, which the *French* set on Fire and abandoned on his Approach. This finished the Operations in this Country for the Year 1759.

In the beginning of the following Year 1760, the *French* from *Montreal* attacked the new Conquest of *Quebeck*; but raised the Siege on the Arrival of the *English* Fleet, abandoning their Tents, Baggage, Artillery, &c. On the Approach of Summer, General *Amberst* proceeded with his Plan for the entire Conquest of this Country; and notwithstanding the Difficulty of bringing up Artillery and supplying an Army with Provisions at so considerable a Distance from the back Settlements of our Colonies, he arrived at *Montreal* in the Beginning of *September*, where he was joined by General *Murray* from *Quebeck*. The Day General *Murray* arrived, Articles of Capitulation were agreed on between General *Amberst* and the Marquis *Vaudreuil*, Commander in Chief of the *French* Troops in that Country, and Governor General of the Colony, for the Surrender not only of *Montreal*, but of all *Canada*; of which Country, with all its Dependencies, the IVth Article of the Treaty of Peace following, gave us the entire Property, and thereby secured our other Colonies from the continued Dread of the Inroads made by such troublesome Neighbours behind them.

This Country is of a prodigious Extent, and by its large Lakes and Rivers, formed for the greatest inland Navigation in the World. The *French* Inhabitants, who remain in the Country and enjoy their Estates, amount to near 100,000.

Since *Great-Britain* became possessed of *Canada*, her Commerce with that Country employs 34 Ships, and 400 Seamen. Their Exports, upon an Average of three Years, in Skins, Furs, Ginseng, Snake-Root, Capillaire, and Wheat, amount to 150,500*l*. Their Imports from *Great-Britain*, in a Variety of Articles, are computed at nearly the same. The Importance and Value of this improveable Trade is self-evident; for *Canada* supplies us with unmanufactured Materials, indispensably necessary in many Articles of our Commerce, and takes

in Exchange the Manufactures of our own Country, or the Produce of our other Settlements in the *East* and *West-Indies*.

I have now done with our Settlements on the Continent, and shall next speak of our *American* Islands, equally beneficial to this Kingdom with the Establishments whose Trade I have just now described; and shall begin with those called the *Caribbee* or *Antilles*; and of these the principal is

## B A R B A D O E S,

WHICH was primarily granted by King *Charles I.* on his coming to the Crown, to *James* Earl of *Carlisle*, who having sold some Parcels to several Adventurers, they transported themselves thither; and the first Improvement they attempted was planting Tobacco; but this not succeeding according to Expectation, they proceeded to try Cotton and Indigo, which afforded them much better Returns. But I find they made little or no Sugar till 1647, when the Colonels *Mordiford*, *Drax*, and *Walrond*, and several other Cavaliers, were induced, by their uneasy Situation in *England* under the Usurper, to convert their Estates into Money, and seek a quiet Recess in this fertile Isle, carrying with them such Implements and Machines as were proper for Sugar-Works, which they intended to propagate, as seemingly the Commodity best adapted to the Soil, and in which Experience has proved they were not deceived; for it is said, that Colonel *Drax* in a few Years acquired an Estate of 7 or 8000*l.* per Annum, and married the then Proprietor's, the Earl of *Carlisle's*, Daughter.

The Increase of its Riches and Inhabitants was a Consequence of the Soil's Fertility, and a Reward of the Planters' Industry, and I believe is unparalleled by any Settlement, of any Nation whatsoever; as, in 1626, this Country was so far from being settled, that it was quite uninhabited, affording nothing for the Support of Life, and overgrown with Shrubs and Bushes, enough to discourage the Attempts of the first Planters to clear it; yet, in the Space of fifty Years, this Incumbrance was quite destroyed, and by an exact Calculation there were in the Island at this Period fifty thousand white People, of whom twenty thousand were able to bear Arms, and eighty thousand Negroes; a surprizing Populoufness on so small a Spot, and in so short a Time! though it is probable the Inhabitants would still have increased, had not an epidemical Distemper among the Whites, begun in 1691, swept off such Numbers of them, that the Calamity has not been repaired to this Day; and it is supposed, that at present there are not above thirty thousand white People on the Island, and of *Negroes*, *Mulattoes*, and *Mestizo* Slaves, about an hundred thousand.

In 1661, this Island was purchased by King *Charles II.* of the Lord *Kinnoul*, Heir to the Earl of *Carlisle*, since which Time it has continued unalienated by the Crown: It lies in 13 Degrees of North Latitude, and 59 of Western Longitude, being about twenty-five Miles in Length, and fifteen in Breadth, very little bigger than the *Isle of Wight*, and supposed to contain, according to a round Computation, an hundred thousand Acres. The whole is so entirely planted with Canes, that even the common Necessaries are not cultivated or raised here; so that Corn, Flesh, and Fish, is for the most Part brought from the Northern Colonies, besides Fuel, and all Sorts of Staves and Boards.

*Bridge-Town*, or *St. Michael's*, is the only one of any Consequence in the Island, being situate in *Carlisle* Bay, and contains between ten and twelve hundred Houses, tolerably well built with Brick or Stone, defended by three Castles, and accommodated with good Wharfs and Keys, for landing and loading of Goods.

The Product of the Isle, as has already been remarked, is principally Sugar; though besides this, great Quantities of Rum are distilled from the Melasses, and it affords some Cotton, Indigo, Ginger, and Pimento; all which it returns us in Lieu of the Manufactures and Commodities it is so largely supplied with from hence, besides the Advantage arising from an Employ of Shipping, necessary to furnish them with the *Madeira* Wine they want; this being the principal Beverage of the Rich and Opulent in the *West-Indies*.

## Of St. Christopher's, Nevis, or Mevis, and the other Caribbee Islands.

THE first of these stands next in Regard to *Barbadoes*, being about seventy-five Miles in Circumference, and lies in the Latitude of  $17^{\circ} 25'$  on this Side the Line. The *English* and *French* both took Possession of it on the same Day, and in *May, 1627*, divided it between them, continuing in perfect Amity till the breaking out of the War, which destroyed the Harmony; and our Countymen being more powerful than their Neighbours, drove them off the Premises, which by the Treaty of *Utrecht* were confirmed to the Crown of *Great-Britain*.

Their chief Product is Sugar, of which in a common Year they make about 10,000 Hogheads, but like the last mentioned Island, this also yields some Ginger, Indigo, and Cotton.

*Nevis*, or *Mevis*, was also settled by the same Persons, and within a Year of the same Time as *St. Kitt's*, was and is commonly the Residence of the Governor of these *Leeward* Islands; it is not above twenty Miles in Circuit, yet has maintained between 30 and 40,000 Whites and Blacks, and produces about 6000 Hogheads of Sugar.

*Montserrat* was begun planting with *Nevis*, and seems to be near a Circle of about three Leagues Diameter, more mountainous than any other of the *Antilles*, and yet so fruitful in the Vallies and Plains as to produce from 2500 to 3000 Hogheads of Sugar, besides some other of the Commodities before mentioned, natural to these Isles, and to support about 5000 white, and 12 or 14,000 black People\*.

*Barbuda* was as early settled as either of the two last-mentioned Isles, but being different in its Products, and having met with greater Interruptions in their Settlements, by frequent Incurfions from the *Caribbeans*, there are not to this Day 2000 People at most in the Island, though these are all white, as their sole Employ is Husbandry, for carrying on which themselves are sufficient without Slaves; they raise Corn and feed Cattle, with which they supply their Neighbours.

*Anguilla*, as it is falsely wrote, or *Snake Island*, as it is more falsely translated, is about ten Leagues long, and three broad, something Eel like, or Serpentine in its Shape, and also so level, that there is not a Mountain in it. The first Adventurers settled here in 1650, and finding this, like *Barbuda*, fitter for raising Corn and breeding Cattle, than other Productions, they brought their Stock with them, and might, undoubtedly, like the Inhabitants of that Island, have made a better Improvement in their Farming Business than they have done, had not Idleness lulled them into a slothful Neglect of the Means Providence had put into their Hands, of procuring a comfortable Subsistence; but they content themselves with a bare Sufficiency for Nature's Support, though not through the Instigation of any philosophic Principles, but as the Result of a confirmed Sloth or Laziness, which is as great as can be, and seems the Influence of the Air they breathe, as many from *Barbadoes*, and every other of the *Caribbee* Islands have been infected with it on their Arrival here; and it is carried to so high a Pitch, that they live in a more lawless Manner than even their Predecessors, the *Indians*, ever did, having neither Minister nor Magistrate among them; so little Sense or Notion have they of Government or Religion.

They hardly amount to a thousand People, and they have very little Sugar, and I believe no Cotton, Indigo, or Ginger among them.

*Antego*, or *Antigua*, is about sixty Miles in Circumference, and was granted by King *Charles* in 1663, to *Francis* Lord *Willoughby*, Governor of *Barbadoes*, on which he settled a Colony in about three Years Time; it however afterwards by some Means reverted to the Crown. Its principal Town is *St. John's*, the Residence of the Governor, and, of late Years, a Royal Dock-yard, and a considerable naval Establishment has been made there, which has greatly increased the Trade and Population of the Town and of the whole Island, which is supposed to contain 7000 Whites, and 30,000 Negroes, Slaves to the former. The Products of the Island for Exportation are Sugar, Ginger, Indigo, and Tobacco: The Soil in most Places is but indifferent, the Heats are greater than in *Barbadoes*, &c. and the Hurricanes more frequent and destructive.

\* St. Christopher's Nevis, and Montserrat, by the Fortune of War, have fallen into the Hands of the French and remained in their Possession in 1782.

*Grenada* is 25 Leagues in Circumference, and has several good Bays and Harbours, some of which are fortified. It is situated in 11° 15', North Latitude, about 30 Leagues South West of *Barbadoes*. There are several small Islands that lie to the Northward of *Grenada*, called the *Grenadillas*, which, after being reduced, were all ceded to us by the late Peace of 1763; and with the three heretofore neutral Islands, *Dominic*, *St. Vincent*, and *Tobago*, constitute one of the four Governments of *British America*, to which *Grenada* gives Name.

*Dominica* has a central Situation between *Guadaloupe* and *Martinique*; it is about twenty-eight Miles in Length, and thirteen in Breadth. It was conquered from the French in the last War, and ceded to *Great-Britain* by the Treaty of Peace in 1763; but being so situated as to intercept the Communication with *Guadaloupe* and *Martinico* in Time of War, the French, early in the late War, before we were prepared for the Blow, recaptured it, but it was restored by the Treaty of Peace, in 1783.

*St. Vincent* and *Tobago*, Islands of inferior Consequence, the former about twenty-four Miles in Length, and eighteen in Breadth; and the latter, thirty-two in Length, and nine in Breadth, belonging to the *French*, being retaken from *Britain* in the late War, after the *British* Planters and Merchants had been at a considerable Expence in cultivating it; and not restored. Indigo, Coffee, Sugar, and Rum are the chief Products of all these Islands.

### Of JAMAICA.

THIS Island, one of the largest in *America*, is of an oval Form, near a hundred and forty Miles in Length, and about sixty in Breadth; it is situated in the *Atlantic* Ocean, between seventeen and eighteen Degrees of North Latitude, and from seventy-six to seventy-nine of Western Longitude, about twenty Leagues East of *Hispaniola*, and as many South from Cuba. Its Length is *English* Miles is 140, and its greatest Breadth 60. It is very fertile, and produces several Commodities more than any other of our Plantations do, as Cocoa, Pepper, and wild Cinnamon; of the first, however, there is a much less Quantity growing, than there was when the *Spaniards* were Masters of this Isle, proceeding from the Ignorance of the *English* in its Cultivation, it being of a very delicate Nature, and requiring great Care to shade and nurse it, otherwise it continues barren, pines, and dies; and notwithstanding every Precaution is practised, that has come to the Knowledge of our Countrymen, they cannot bring it to fructify as it formerly did; of Pimento there are great Quantities, which from its Form, and the Place of its Growth, is called *Jamaica* Pepper, and commonly here in *England* All-Spice; being of a fine high Flavour, and deservedly reckoned the best, and most temperate of the many aromattick Drugs brought to us, principally from the *East-Indies*. The Bark of the wild Cinnamon is commonly, though falsely, called *Cortex Winteranus*, and is sold here as such; but this latter is a Native of the Straits of *Magellan*, from whence it was first brought by Captain *Winter*, who accompanied Sir *Francis Drake* in his Voyage round the World. Besides these Commodities, there are several other Productions natural to *Jamaica*, as Cotton, which grows here in great Plenty, and finer than that of the *Caribbee* Islands; Tobacco, though cultivated in small Quantities, Abundance of Fustick, Redwood, Logwood, and others, for Dying; besides several Sorts of Wood that are sweet scented. The Island also abounds in Medicinal Herbs and Drugs; as Guaiacum, China, Sarsaparilla, Cassia, Tamarind, Vanillaes, Variety of Mistletoe, and several salutary Gums and Roots. — Copper Mines have been discovered here, of which Metal I have seen a Sample from thence very fine and good; but all these Products must give Place to the Sugar Cane, which has brought such immense Riches to the Inhabitants; and the Quantity is not only very great, but the Quality superiour even to that of *St. Christopher's* which is accounted the best in the *Leeward* Islands. It is difficult to ascertain the Number of the Inhabitants; but Computations lately made demonstrate that *Jamaica* is not so populous as it was at the Beginning of the present Century. We now reckon only about 25,000 Whites, and 90,000 Negroes; whereas

whereas at the former Period it was supposed to contain 70,000 Whites, and 120,000 Negroes. The Inhabitants are all supplied with Clothes, Furniture, &c. from *Great-Britain*.

The Exports of the Island consist of three principal Articles of native Growth: *Sugars* of which they export, after good Seasons, about 20,500 Hogheads annually; estimated in *England* at near 425,000*l*. Most of this goes to *London*, *Bristol*, and *Glasgow*; and from the two former to *Ireland*, before the Restrictions on the Commerce of that Kingdom were removed: Some Part is likewise sent to *North-America*, and bartered for Staves, Planks, Pitch, Tar, and Provisions. *Rum*, of which they export about 4000 Puncheons. *Melasses*, with which they trade principally to *New-England*. *Cotton*, of which they export about 2000 Bags.

I cannot quit the Subject without mentioning another beneficial Commerce chiefly carried on from this Island, *viz.* that of cutting Logwood in the Bay of *Campeachy*, to which we have an undoubted Right; and this has been so clearly proved by many Authors, as to put the Matter beyond Dispute, notwithstanding the continued Depredations of the *Spaniards* on this Account, to the no small Detriment of those who are concerned in this Branch of Business, and consequently to this Nation in general, as no less than 14,935 Tons, 3*q.* 4*lb.* were imported in the Years 1713, 1714, 1715, and 1716; and were the Cutters properly protected, a Sufficiency might now be brought in for our own Use, and that of our Neighbours, without any Expence to the Government; and as this is not only clear Gain, but occasions the additional Benefit of employing a considerable Number of Ships, I think it challenges a suitable Regard, as from what I have here mentioned, it may reasonably be concluded, that the Profit accruing thereby, cannot be put at less than 100,000*l.* a Year.

#### *Of the Lucayos, or Bahama Islands.*

THESE lie in the *Atlantic Ocean*, between 21°, and 27° of Northern Latitude, and from 73° to 81° of Western Longitude, taking their Names from one of them called *Babama*, which is situate in the Latitude of 26°. 30'. at the Distance of between twenty and thirty Leagues, say some, and 50 Leagues as others assert, from the Continent of *Florida*; but *Providence*, lying in the midst of them, has been pitched on as the Seat of Government, when any has been settled here.

These Islands were granted by King *Charles II.* to *George Duke of Albemarle*, and several other Noblemen, who ineffectually endeavoured to people them; for as soon as some Adventurers were got there, they were driven off by the *French* or *Spaniards*; and when this was not the Case, they contumaciously rose against his Governors, whom they either destroyed, or sent them away Prisoners, to the Dissolution of all Polity and their own Destruction; so that after several Settlements made, and successively destroyed, either by the Enemy or themselves, these Islands became a Refuge for Pirates, till 1718, when King *George I.* appointed a Governor, who once more established a Colony here, where there may now be between fifteen hundred and two thousand People; though the having a Force in these Parts, seems more the Motive to their Settling, than what is expected from their Products, for as yet these have been but trifling, consisting in a little Tobacco, Sugar, &c.

#### *Of the Bermudas, or Summer Islands.*

THESE received their primitive Denomination from one *Bermudas a Spaniard*, their first Discoverer; and were afterwards called *Summer Islands*, from Sir *George Summers*, who was shipwrecked, and in another Voyage there reigned his Breath. They lie within the Limits of the Grant that was made to the *Virginia Company*, who sold them to an hundred and twenty Persons of their own Society, and these afterwards obtained a Charter from King *James*, which confirmed their Property. This new Company soon endeavoured to render their Land profitable, by the establishment of a Colony, and accordingly sent a Ship there with the first

Adventurers in 1610, under the Direction of Mr. *Richard Moore*, who made them an excellent Governor, and soon put them in a Capacity to defend themselves, by building a handsome Town and strong Forts, and by his prudent Management he disappointed the *Spaniards'* Attempts to land on, and conquer these Islands, in 1614. His first Settlement was upon a Plain in *St. George's* Island, where, from a Habitation of Palm-tree Leaves, sprang up *St. George's* Town, one of the strongest and best built in our *American* Colonies.

This worthy Man was succeeded by Capt. *Daniel Tucker*, who being a Person of a superior Education to his Predecessor, and having seen more of the World, exerted his Talents in Favour of the Colony now put under his Care, and established a regular Form of Government, traced out Plantations, and obliged every one to build uniformly in the Town, and to plant regularly in the Country, so that a beautiful Symmetry was seen through the whole of their Improvements, and Pleasure was thus blended with Profit.

In 1619, this vigilant Governor quitted to another, who then arrived from *England* with four Ships and five hundred Planters, which were equalled in Number by those already settled there, so that the Colony began now to make a Figure; for as Laws were settled, the Government directed to be, by Governor, Council, and Assembly, as in our other *American* Plantations, and Capt. *Tucker*, having before established a Militia, they were secured against the Attacks of any Enemy.

The Number of these Islands are uncertain, as by some they are reckoned to be three hundred, whilst others make them above five hundred. They lie in the Latitude of  $32^{\circ} 30'$  North, and in  $35^{\circ}$  of Western Longitude, a great Distance from the Continent, as the nearest Land, which is *Carolina*, lies at least two hundred and fifty leagues, as Mr. *Harris*, or four hundred and eighty Miles, as Mr. *Echard* says, to the West of them.

The Air is deemed extremely wholesome, and the Country vastly pleasant; the Soil is rich and fertile, insomuch that *Indian* Corn, their chief support, is reaped twice here, between the Months of *March* and *December*, and all the Plants, Flowers, and Trees peculiar to the *West-Indies* grow here in great Perfection, as those transplanted from *Europe* do; and besides, among the Fruits, the Oranges here in every Respect exceed those either of the *East* or *West-Indies*, as among the Forest Trees the Cedar does for any Use or Purpose whatsoever, more particularly in Ships, so that the *Bermudas* Sloops are become famous, both for Service and Sailing.

*St. George's* Town, the Capital, has no less than seven Forts to defend it, though indeed the whole Coast, and the unknown Rocks, are natural Bulwarks to this Country, so that the Inhabitants live free from the Apprehensions of an Enemy, and as happy as a mild Government, and a delightful Country, can make them. It is true, that the pleasing Prospect of Riches has been the principal Attraction to the peopling of most of our other Colonies, though the settling these Isles was apparently from different Motives, as their Trade is very limited, and consequently the Opportunities of making a Fortune very rare; so that the greatest Inducement the State had to settle them, was to keep them from being possessed by any other Nation; but that arising to the Adventurers, was to secure to themselves a safe and quiet Retreat from the Cares and Tumults that the other Parts of the World laboured under, of which they had none here to ruffle and disturb them; so that many with this philosophick Disposition, and that could content themselves with the Pleasures and Plenty of the Country, retired here with their Fortunes, as others did to procure or preserve Health, and some few on Account of Religion.

Their Trade chiefly consists in Timber and Provisions, which they send to the other Parts of *America*, a small Quantity of Tobacco, and the building of Sloops, as before-mentioned; so that though it has for some Time been a very flourishing Colony, it is very little beneficial to the Mother Country, otherwise than by the Clothing and other Necessaries it takes from us, which cannot be inconsiderable, when the smallest Computation makes the Inhabitants to be in Number at least nine thousand.

Of

## OF NEWFOUNDLAND.

OUR Right to this Island has already been incontestibly proved by several good Authors, so that any Advances towards it would be superfluous here. It lies between 47 and 50°. Northern Latitude, and is so far from being that cold and inhospitable Country that many have represented it, that St. John's and some other Places have been constantly inhabited for many Years past: It is very warm in the Summer, and though the Snows lie long in the Winter, most Sorts of European Fruits grow wild here; however, were there fewer in Number, and the Soil much worse than it is, the Advantages of our possessing it would still subsist, as these do not result from what grows here, but from the Fishery upon its Coasts and Banks, and the natural Consequences of it.

Mr. Parkhurst has given us an Account of its State in 1678, when he says; there were about fifty Sail of English, one hundred Sail of Spanish, besides twenty or thirty Sail of Biscayners, fifty of Portuguese, and a hundred and fifty French Ships, employed upon that Coast, so that the Fishery must have begun long before, to be at such a Height so early, and the Importance of it was quickly discovered by Queen Elizabeth's wife Ministry, and by them so encouraged, that towards the Close of her Reign, upwards of two hundred Sail of fishing Vessels were employed, and these navigated with more than eight thousand Seamen.

The Fishery has greatly increased since the sole Possession of it was confirmed to the Crown of Great-Britain; and we can have no better Proof of the astonishing Improvements, and of the national Benefits of this valuable Branch of our Commerce, than a comparative View of the different Statements of it given in at the Bar of the House of Commons in the Years 1775, and 1787. At the first Period, it appeared that four hundred Ships, whole burthen was not less than 36,000 Tons, 2,000 Shallops, burthen 20,000 Tons, and 20,000 Seamen, were employed in this Fishery; that 600,000 Quintals of Fish were annually taken, which, upon an Average of seven Years, were worth 14s. per Quintal, and together with the Value of other Articles, independent of Cod Fish, as Salmon, Cod Oil, Seal, and Furs, amounted annually to more than half a Million Sterling.

In 1787; the Report made to Parliament was, that since the Encouragement given to the Newfoundland Fishery, by the several Acts of Parliament already noticed, under the Head of Shipping, the French Fishery had considerably diminished; while the British had increased to such a Degree, that 722,000 Quintals of Fish had been taken by our People that Year; and that this Nursery for Seamen was annually increasing; as well as the Demand for the Articles from home, necessary for carrying it on, and for Consumption on the Spot, viz. Biscuit, Beef, Pork, Butter, Cheese, Linen and Woolen Cloths, Nets, Hooks, Lines, &c. These Considerations therefore determined the Legislature to continue all the Acts made of late Years for the Encouragement of this Fishery; particularly, that which authorises the Trade between the Ports of the United States of America, and the British Settlements at Newfoundland.

I now return to Europe, where I have only our Trade to the Baltick, and with the northern Countries to treat of; and as Russia stands foremost in Dignity, I shall give it the same Preference here, and begin with it.

*An Account of the Trade between GREAT-BRITAIN and RUSSIA, carried on by the RUSSIA Company.*

OUR Trade with the Russians is very considerable, and was always greatly encouraged by the British Government; but the flourishing State of our American Colonies would have reduced our Imports of Naval Stores from Russia, if the unhappy Revolt of the North-American Colonies had not taken place, which has again increased the Balance of Trade, which was always against us, with this Empire. The strong political Alliance which has taken Place between Great-Britain, and the Empress of Russia, CATHARINE II. likewise greatly contributed to advance her commercial Connections with us; but still the Improvements made

made in the little, of late Russia, partic Towels, tabl

Wherea beneficial whereby g Growth of

made in the Linen Manufactures of *Ireland* and *Scotland* have contributed not a little, of late Years, to diminish our Demands for similar Manufactures from *Russia*, particularly in the Articles of Sail-Cloth; Sheetting, coarse Linen for Towels, table Linen, &c.

But the Treaty of Commerce with this Country, entered into for *twenty Years*, expired in 1786; and a Reluctance to renew it on the Part of the Emperour, combined with some Difficulties in the Arrangement of it; and a political Coolness between the two Courts, has hitherto prevented any new Treaty, and not a little embarrassed the Merchants of both Countries.

This Commerce is carried on by a Company, projected in the Reign of *Edward VI.* though not established by Patent, till the 6th of *February*, in the 1, and 2, of *Philip* and *Mary*, whereby was incorporated, *The Merchants Adventurers for the Discovery of Lands unknown, and not before frequented*, with Power that the said Fellowship should have the sole Trade to all the Main Lands; Isles, &c. of the Emperor of *Russia*; which Letters Patent were, by an Act of Parliament 8 *Eliz.* not printed, confirmed to the said Company, by the Name of *The Fellowship of English Merchants for Discovery of new Trades*, with an Exclusion of all other Subjects from this Trade, without the Consent of the Governor, Consuls, and Assistants; though by 10 and 11 *Will. III.* Cap. 6. Sect. 1. it is enacted, that every Subject of this Realm, desiring Admission into the said Fellowship, called the *Russia* Company, on Request to be made to the Governor, Consuls, and Assistants, or any three of them, shall be admitted into the said Fellowship, paying for such Admission 5*l.*

Any Person residing in any Out-Port, or other Place within this Realm, shall be admitted on the same Terms.

And it was since enacted, That from and after the 24th of *June*, 1741, any Persons free of the said Fellowship of *English* Merchants for Discovery of new Trades, commonly called the *Russia* Company, exclusive of all others, may import into this Kingdom, in *British*-built Shipping, navigated according to Law, from any Place belonging to *Russia*, raw Silk, or any other Commodities, of the Growth or Manufacture of *Persia*, provided such Manufacture be made of the Produce of *Persia*; being purchased by Barter, with Woollen or other Manufactures, exported from *Great-Britain* to *Russia*, and from thence carried into *Persia*, Gold and Silver in Coin or Bullion excepted, or with the Produce arising from the Sales of such Manufactures, so exported to *Russia*, and carried into *Persia*, upon paying or securing the Customs and other Duties now payable, by any Law now in Force, according to such Rules, and with such Drawback, and under such Penalties, as are by Law prescribed, on the Importation of the like Goods of the Growth, Produce, or Manufacture of *Persia*, imported into this Kingdom from any Place in the *Levant* Seas, by any Persons free of the *Levant* or *Turkey* Company; any Thing in the Act of 12 *Car. II.* to the contrary notwithstanding.

No Silk, or other Manufactures of *Persia*, shall be imported into *Great-Britain* P. 678. through *Russia*, by Virtue of this Act, unless the Importers take an Oath, or Affirmation, before the Collector, Customer, or Comptroller of his Majesty's Customs, at the Place of Importation; that, to the best of their Knowledge, the Silk; and other Manufactures of *Persia*, contained in their Entries, were truly purchased by Barter with Woollen, or other Manufactures, exported from *Great-Britain* to *Russia*, and from thence carried into *Persia*, not being Gold or Silver in Coin or Bullion, or with the Produce arising from the Sales of such Woollen, or other Manufactures exported as aforesaid: And in Default of taking such Oath or Affirmation, all the Manufactures of *Persia*, so imported from *Russia*, shall be liable to be forfeited, as if the same had been imported, contrary to the said Act of 12 *Car. II.*

This Act does not extend to the permitting the using or wearing in this Kingdom any wrought Silks, or other Commodities of the Manufacture of *Persia*, mentioned in the Act of 11 *Will. III.* which Act is hereby confirmed, &c.

Whereas soon after the Commencement of the aforesaid Act of 14 *Geo. II.* a very 25 *Geo. II.* beneficial Trade between *Great-Britain* and *Persia* through *Russia* was opened, P. 584. whereby great Quantities of raw Silk, and other Goods and Commodities of the Growth or Manufacture of *Persia*, were imported in Return for the Woollen and other

23 *Gen.*  
P. 585.

other Manufactures and Goods of *Great-Britain*, upon much easier and more advantageous Terms, than the same could have been otherwise procured; but the said Trade having been for some Time past interrupted, the Subjects of *Great-Britain* not having been of late permitted, to transport *British* Manufactures and Commodities into *Persia* through *Russia*, in Consequence whereof, the Importation of raw Silk, and other Commodities of *Persia* from *Russia*, hath been discontinued: And as it would be of great Advantage to the Trade of this Kingdom in general, as well as contribute to the Increase and Improvement of the Silk Manufactures in particular, if raw Silk of the Growth or Produce of *Persia*, purchased in *Russia*, were permitted to be imported from *Russia* in Return for Woollen and other Manufactures exported from *Great-Britain* to *Russia* although the same be not carried from thence into *Persia*, it is enacted, That from and after the 25th of *December*, 1750, all Persons free of the *Russia* Company, exclusive of all others, may import into this Kingdom from *Russia*, in *British* built Shipping, navigated according to Law, raw Silk of the Growth or Produce of *Persia*, which shall be purchased by Barter, with Woollen, or other Manufactures or Commodities exported from *Great-Britain* to *Russia*, although the same be not carried from thence into *Persia*, Gold and Silver in Coin or Bullion excepted, or with the Produce arising from the Sale of such Commodities, and not otherwise, upon paying the Customs and other Duties, &c.

No Silk of the Growth or Produce of *Persia* shall be imported from *Russia*, by Virtue of this Act, unless the Importer make Oath before the Collection &c. that it was purchased by Barter, &c.

This Act shall not deprive the *East-India* Company of any of the Powers and Privileges, &c. which belong to them, or which they might have enjoyed if this Act had not been made.

In Consequence of these Acts, the Company have something increased their Trade, and would undoubtedly have enlarged it more, had not the Troubles in *Persia* put a Stop to their Designs.

In Return, we import from thence, *extra* of the *Persian* Commodities, Pitch, Tar, Bees-Wax, *Russia* Leather, Skins, Furs, Pot Ashes, Iron, Copper, Hemp, Flax, Linens, and Linen Yarn, Linseed, Cavear, Sail-Cloth, &c.

And our Exports are, Woollens of various Sorts, Silks, Paper, Mercury, and Hard-wares, Arms, Powder, Brimstone, Lead, Tin, Pewter, Herrings, Incense, Copperas, White Lead, Dying Woods, Gold and Silver Thread, Lace, Sugar, Pepper, Tobacco, &c.

#### *Of the Trade between Great-Britain, Denmark, and Norway.*

**T**HOUGH the *Danes* are Masters of one of the safest and finest Ports in *Europe*, I mean *Copenhagen*, yet their Trade has always been inconsiderable, comparatively with that of other Powers, as their Country affords but little towards carrying it on; however of this I shall have Occasion to speak when I come to treat of those Kingdoms; Our Exports there are but trifling, being reduced to a few Woollens, Paper, Drugs, Pepper, Tin, Herrings, &c. and as our Imports greatly exceed our Exports in Value, this must consequentially be a very losing Trade to us, and as such should have been dropped long ago; more especially as every Commodity we receive from thence, might be better furnished from our own Plantations, they consisting principally of Pitch, Tar, Fir, Timber, Deals, Masts, Yards, Spars, Baulks, some few Furs, Skins, &c.

#### *Of Great-Britain's Trade with Sweden.*

**T**HIS is a more considerable, though not a more beneficial Commerce than the last mentioned, as the Balance is greatly against us, and might easily be remedied by the frequently proposed Means, of encouraging a Supply from our own *American* Settlements, as the Imports from thence are pretty near of the same Sort with those from *Denmark*, viz. Pitch, Tar, Hemp, Flax, Furs, Copper, and Iron; and they in Return take from us, Broad Cloth, fine Stuffs, and some other Woollens, wrought Iron, and Brass, Horological Works, Paper, Pepper, Tin, Herrings, Drugs, &c.

The *Irish* Fuller's Earth of their Livin Respect of th their Exports

*Of the Commerce between Great-Britain, Poland, and Prussia.*

THIS Trade is of no great Importance, nor varies much from the two last mentioned, though it is not so small as to be left out in a Work of this Nature, as it takes off pretty large Quantities of our Manufactures, though principally through the Medium of the *Dutch*: *Poland* has no other Ports than *Dantzick* and *Elbing*, from whence we import Naval Stores, as from *Denmark* and *Sweden*; with some Iron, Steel, Pot Ashes, Sturgeon, Linen, and Sail Cloth; and, in Return, send them several Sorts of Woollens, Herrings, Mercery, and Drapery; some Tobacco, Sugar, Rice, &c. as we do the *Stetiners* in *Prussia*, though from thence we receive but very little in Return. *Dantzick* also furnishes us with Spruce Beer, and Bees' Wax, as both this and *Stetin* do with East Country Plank.

*Of the Trade which Great-Britain carries on with the Austrian Netherlands.*

THIS is a very extensive and beneficial Commerce, as it takes off great Quantities of our Products and Manufactures.

We supply them with a vast Variety of Articles, the chief of which are *Yorkshire* Woollen Cloths, particularly White plains for Clothing their Military; *Norwich* Stuffs, *Manchester* Cottons, fine Worstead Stockings, Hard-ware of all Sorts, Paper-hangings, Crockery, Rock-Salt, Slates, Alum, Tin, Lead, and since the Port of *Ostend* has been made free, Household Furniture, Sadlery, Horses, &c. In fine, for the Extent of it, *Great-Britain* does not enjoy a more beneficial Branch of Commerce; the Returns being principally made in Specie.

Our Imports consist of Thread-Lace, a small Quantity of Damask Table Linen, Lawns, and other fine Linen, Rags for our Paper Mills, Apples, Potatoes, old Iron, and other trifling Articles.

This finishes my Account of the Trade of *Great-Britain*, which I have endeavoured to render as plain to my Readers as I possibly could in so limited a Space: And I proceed to give an Abstract of that carried on in *Ireland*, which I shall do in the same Manner as I have hitherto observed. Having displayed the Greatness of its Products and Manufactures; in a former Chapter, I have now to add an Account how they are disposed of.

## O F I R E L A N D.

THE Products of *Ireland*, as has been already shewn, are similar to those of *Great-Britain*; and it was always the Opinion of the best commercial Writers, that if the Restraints laid upon her Commerce by *British* Acts of Parliament should ever be taken off, their Manufactures would be equal in Quantity and Quality, if they did not rise to a Degree of Superiority from the Cheapness of Labour in *Ireland*. We have now seen these Restraints removed, and a new commercial System established, founded upon this Maxim, that the commercial Improvement of *Ireland* must, in the End, prove advantageous to *Great-Britain*.

At the Time of publishing the last Edition of our Work, the beneficial Effects of this striking Revolution in Commerce were but beginning to operate; and the Editor only foretold what has actually happened: Happily the constant Demand for this Book; by the Gentlemen of the Long Robe, and the Merchants and Traders of *Great-Britain*, *Ireland*, and *America*, has produced the present Edition, in which he is enabled from authentic Documents to state the prodigious Increase of the Commerce of *Ireland*, and the reciprocal Benefit that both Kingdoms have derived from those liberal Regulations made in Favour of *Ireland* by the *British* Legislature. And that the Contrast between former Times and the present may be more evident, he has judged it necessary to retain some of the old Estimates and Calculations.

The *Irish* possess the Principles of the Woollen Manufacture, *viz.* Wool, Fuller's Earth, &c. in as great a Degree of Perfection as we, and the Cheapness of their Living gives them vastly the Advantage in working them up, both in Respect of the Value of the Materials, and the Price of Labour; so that were not their Exports thus prohibited, their Commerce would greatly clash with our's, and

GENERAL COMMERCE OF THE WORLD.

this Interference prove prejudicial to both; therefore to alleviate this seeming Hardship as far as a prudential Care of our own Trade will suffer, the *Iriſh* are permitted, not only to introduce their Wool here, but to import their Yarn alſo, which they annually do to the Amount of forty thouſand Packs; and though this Reftriction undoubtedly contracts their Trade, and reduces it into a much narrower Compaſs than would otherwiſe bound it, yet this being the only one they are burthened with of ſuch a Nature, their foreign Trade is very conſiderable, notwithstanding it is confined to the mere Produce of their Land, and Linen-Looms; the firſt of theſe conſiſt chiefly in Beef, Pork, Butter, Leather, Tallow, and Corn; and for the Diſpatch of what is ſuperfluous, and unconſumed at Home, they have different Channels; viz. to *Iſlanders* they ſend Tallow and Leather, in great Quantities; and Butter to *Holland*; *France* and the *Britiſh Colonies* take off large Parcels of their barrelled Beef, as theſe latter do now of their Linens, which are alſo permitted to be imported here Duty free, ſo that many Millions are annually brought in; they likewiſe ſend yearly good Store of Pilchards and Herrings to *Spain* and *Portugal*; ſo that their Exports are very great. However, to give the Reader a better Idea of them; we preſerve ſome Extracts of the Imports and Exports from Mr. *Dobbi's* curious Calculations.\*

The following is an Abſtract of the General Imports and Exports from 1710 to 1726, ending at *Lady-Day*:

Years.	Exports.			Imports.			Balance:			Contra Balance.		
	l.	s.	d.	l.	s.	d.	l.	s.	d.	l.	s.	d.

	Medium of Cattle and Sheep				623,777	3	9

We have no such Tables at present; and the Exportation of Sheep being long since prohibited, it will be to the full as satisfactory to state the general Increase of the Produce of live, and slaughtered Cattle: The three Species of which exported from *Ireland* are *Bullocks*, *Cows*, and *Hogs*; and to these we must add other Articles, as *Tallow*, *Hides*, *Butter*, *Cheese*, &c. comprehended under the Produce from Cattle.

The average Amount for five Years ending the 25th of *March*, 1782, was 1,293,858*l.* yearly; which is about one-third of the Value of eight Years, in the preceding table. And one Article alone will suffice to shew the prodigious Increase of the Trade of *Ireland* to *England* alone, since Provisions from that Kingdom were permitted by the *British* Legislature.

The Quantity of *Pork* imported into *England* alone for the Year ending 5th *January*, 1783, was 45,995 *Barrels*, which exceeds, according to *Lord Sheffield's* Calculations, the whole Export of *Pork* to all Parts of the World, from *Ireland*, twenty Years ago. The Article of *Butter* has increased nearly in the same Proportion.

The Produce of the Exports of Grain and Fish.

Years.	Grain.			Years.	Fish.

For the Year 1783, the Exports of Grain to *England* alone amounted to 38,146*l.* With respect to the Fisheries, they have never been pursued with that

## GENERAL COMMERCE OF THE WORLD.

that Activity and Assiduity which might have been expected from the Situation of the Coasts. The Herring Fishery is the principal Branch; and it may suffice to mention, that *Ireland* exported for the *West-India* Trade alone in 1783, no less than 35,960 Barrels, the Value of which by far exceeds the Value of the Exports of all Kinds of Fish from *Ireland*, in Mr. *Dobbs's* Table for 1726.

The Produce of the *English* Linen.

Years.	Linen.		
	<i>l.</i>	<i>s.</i>	<i>d.</i>

1726	342,295	0	9
Total	—	2,277,770	6 7
Med.	—	284,721	5 9½

The Exports in Linen Cloth to *England* alone, for 1783, amounted to 948,180*l.* 9*s.* 2*d.* being nearly three Times the Value of the Exports to all Nations for the Year 1726.

The Imports into *Ireland* from all Nations, at a Medium of seven Years, ending at *Lady-Day* 1727, amounted to 843,392*l.* And the Imports from *Great-Britain* alone, of the Growth and Manufacture of *Great-Britain*, on an Average of three Years, ending *March* 25th, 1783, amounted to 1,432,417*l.*

The Value of the Goods and Merchandize being the Growth, Product, or Manufacture of *Asia*, imported into *Great-Britain* by the *East-India* Company, and from thence imported into *Ireland*; for three Years, from 25th *March*, 1780, inclusive, to 25th *March*, 1783, inclusive, was, 1,056,050*l.* 2*s.* 0*d.* and consisting of the following Articles, Drugs, Spices of different Kinds, Rice, India Silks, Callicoes, Muslins, Salt-Petre, China, Raw Silks, Teas.

Thus stands the Trade between *England* and *Ireland*. I shall next consider the Commerce of *Ireland* with *Scotland* and the *Isle of Man*, annexing an Abstract of the *Irish* Exports and Imports, for the Term of eight Years, as follows:

Years.	Exports.			Imports.		
	<i>l.</i>	<i>s.</i>	<i>d.</i>	<i>l.</i>	<i>s.</i>	<i>d.</i>
1719	13,690	19	0	37,868	19	3½
1720	10,352	4	4	27,706	18	4½
1721	11,256	15	2½	29,151	10	11½
1722	14,398	2	9½	27,468	14	10½
1723	23,578	5	8	33,497	2	4½
1724	21,250	0	3	31,003	0	1½
1725	10,023	12	4	38,938	0	3½
1726	9,384	2	0½	29,762	12	2½
Total	113,934	1	7½	255,396	19	6

The Exports to *Scotland* for the Year ending 25th *March*, 1783, amounted to 123,897*l.* So that the Exports for that Year, exceeded the Value of the Imports to 171,670*l.* of the Total of eight Years, in the preceding Table.

The Exports to *Scotland* and the *Isle of Man* consist of Oatmeal and other Grain, Beef and Kine, Horses, Hides, Butter, Cheefe, Soap, Linen, and Mutton, with some other Articles, and Wine and Brandy.

The Imports from thence consist of Coals, Tobacco, Bark, Brandy, Barley, and

and Malt, G  
Herrings.

and Malt, Groceries, Linen, and Kenting, Wine, Timber, Linen Yarn, and Herrings.

The following is an Abstract of the Exports to *America* for the same Number of Years, *viz.*

	<i>l.</i>	<i>s.</i>	<i>d.</i>
1719	77,190	8	8½
1720	88,980	18	9
1721	68,404	3	2½
1722	74,344	9	6½
1723	82,806	6	9½
1724	96,825	8	10
1725	103,998	2	4½
1726	110,313	19	7½
<b>Total</b>	<b>702,863</b>	<b>17</b>	<b>9½</b>

The Exports to the Colonies remaining subject to *Great-Britain*, for the Year ending 25th *March*, 1783, amounted to 381,617*l.* 1*s.* 7*d.* which exceeds the Value of any three Years to all *America*, in the foregoing Table. The Calculations respecting the Trade of *Ireland* with the *United States of America* cannot be made out exact, on Account of the very considerable Imports in Tobacco and other Articles, since the Commerce of *Ireland* was liberated from the former Restrictions of not trading directly to the *American Colonies*; but receiving all Goods and Manufactures of the Growth and Product of those Colonies by Re-exportation from *Great-Britain*, in *British*-built Ships. But the prodigious Increase of this Branch of the Commerce of *Ireland*, may be readily conceived by the Amount of the preceding Article.

The next particular Trade to be considered is the *Eastland*, which comprehends all the Countries northward of *Holland*, upon the Continent, from *Emden* to *Archangel*, the *Sound* and *Baltick* consequently included.

The Exports consist of Beef, Biscuit, Butter, Beer, Cheese, Grain, raw and tanned Hides, Oat-meal, Linen, Calves' Skins, Tallow, Malt, Salt, Pork, Soap, Gun Powder, and the Remainder is made up of several small Articles, not material in Trade. The Imports to *Ireland* consist of Bark, Copper Plates, Flax, and Seed, Sugar, Hemp, Iron, Lamp Black, Herrings, Train Oil, Tin Plates, Tar, and Wood, the Remainder being made up of Linen Yarn, Pot-Ash, Lattin Wire, and other small Things.

The next Trade to be examined in a Southward Progress, is that with *Holland* and *Flanders*.

The Exports thither chiefly consist of Beef, Biscuit, Butter, Candles, Feathers, Salmon, raw Hides, Pork, Rape Seed, Hogs' Lard, and Tallow, with several other Particulars not material; and the Imports from thence are Bark, Wheat, Battery, Brafs Shruff, Books unbound, Drugs, Madder, and other Dying Stuffs, Earthen Ware, Flax, Groceries, Geneva, Gunpowder, Inkles, Thread, Hemp, Iron, Bone-Lace, Cambricks, Hollands, Flax Seed, Linseed Oil, Paper, Pot-Ash, Starch, Garden Seeds, Silk Manufacture, Steel, Whalebone, *Rbenish* Wine, Wooden Ware, Iron, Lattin and Steel Wire.

The next particular Trade that falls regularly in our Way to be observed, is that of *France*.

The Exports consist of Beef in Barrels, Pork, Biscuit, Butter, Candles, raw Hides, and Tallow; the other Articles of small Value in Trade are not worth inserting. The Imports from thence are Wine, Brandy, Capers, Playing Cards, Cork, Flints, Gloves, Prunes, Succus Liqueur, Sugar, Iron and Iron Ware, Cambricks, Lawns, Train Oil, Olives, Copper-plate Printing Paper, Rezin, Salt, Silk Manufacture, Toys and Trinkets, Vinegar, Groceries, Wooden Ware.

Though the Exports for *France* cannot be ascertained to any Nicety from the Custom-house Books, as Merchants are not restrained in their Entries, for reporting their Goods for one Country when they are designed for another, as is frequently the Case in this Trade; for the Entries are made for that Kingdom,

when

when the Merchandize is intended for *Hamburgh, Bremen, or Holland*, and this with the View of evading Payment to the several *British* Light-houses in their Way to the said Places, towards whose Support all Ships pay in the first Port they put in at, and are charged with so many as they are benefited by in their Voyage; now if it appear, by their Cocket, that they are bound for these Ports, they pay towards the Maintenance of them all; but if for *France*, and they are supposed to be blown there out of their Way, they are charged for no more than they are presumed to receive Benefit from, and hereby elude the several Charges they must otherwise pay.

Mr. *Dobbs* makes several Allowances for an illicit Trade, &c. too long to be inserted here, and then concludes from the Premises, that *Ireland* loses by her Trade with *France*.

The last in Order, though the greatest Branch of the *Irish* Trade with Foreigners, is with *Spain, Portugal, and the Straits*, as these take off the major Part of any manufactured Commodities they export, except *Linen*.

The Exports to the afore-mentioned Countries are, Beef, Candles, Cheese, Barley, Wheat, Hake, Herrings, Salmon, Hair, raw Hides, Tanned ditto, Linen, Pork, Calf Skins, Starch, Tallow.

The Imports from them are Capers, Cork, Dying Stuffs, Sugar and Fruit, Oranges and Lemons, Iron, Oil, Salt, Silk Manufactures, Raw Silk, Thrown Silk undyed, Succus Liguor, Walnuts, Port Wine, Spanish Wine, Hoops, Cane, Reeds, and Plank, Wool.

The blameable Inaccuracy in the Custom-House Accounts in *Ireland*, the great Fluctuations in the Commerce of that Country, with the principal Kingdoms and States of *Europe*, and other Circumstances, render all Tables of the Amount of any particular Trade incorrect, especially as such Amount must be calculated by the Value in sterling Money, at which they are rated by the Piece, the Yard, the Pound, or the hundred Weight; for which Reason, we have followed our best modern Guide, *Lord Sheffield*, and from him give the following short Statement of the Amount of the general Trade of *Ireland*, with all the foreign Countries of *Europe*.

	£.	s.	d.
Total <i>Irish</i> Produce Exported to foreign Countries, on an Average of nine Years, ending <i>March</i> 25th, 1782,	345,118	10	9
Ditto, exported to ditto, in the Year ending <i>March</i> 25th, 1783,	384,222	19	3
Total Imports from foreign Countries on an Average of nine Years, ending <i>March</i> 25th, 1782,	605,117	4	0
Ditto from ditto, in the Year ending <i>March</i> 25th, 1783,	679,289	8	7

By the Imports so far exceeding the Exports, false Conclusions may be drawn, as they have been by Mr. *Dobbs*, and we are sorry to add, by our more intelligent commercial Writer, *Lord Sheffield*. Whenever the Imports from any Country exceed the Exports, they state the Balance of Trade to be against the Importer. No reasoning can be more fallacious, if the Article imported, as in the Case of *Ireland*, and forming such a Balance, consist of the first Materials for its principal Manufactures, to be wrought up to the highest State of Perfection, and to be so exported, with the Addition of the Labour of the Inhabitants, to other Countries, with a considerable Profit. For Instance, 6207 *cwt.* of Flax, and 11,415 *cwt.* of Hemp were imported into *Ireland* from the East Country in one Year, and contributed to raise the Value of the Imports above the Exports; and a Balance must have been paid to the East Country in Specie, or Bills of Exchange: This has been usually called a *Loss*; but the Sum so paid produces a Profit, beyond any derived from Barter, and is received back again, with Interest, in the Payments for the Linens manufactured by the *Irish* and exported to *Britain* alone. Without a large Quantity of Flax and Hemp in Store, this valuable Manufacture, the chief dependance of *Ireland* might stagnate; besides, a bad Season, or a prohibitory Law passed in the Country from whence you import your first Materials, may put a stop to it for a Time; therefore, in every

We conclude this general Account of the Trade of *Ireland* with observing that the Shipping of *Ireland* bears no Proportion to its increasing Commerce. The *English*, *Scotch*, *Danish*, *Dutch*, *French*, *Spanish*, and *Portuguese*, all have a considerable Share in the carrying Trade of *Ireland*.

### Of the Products, Manufactures, and Trade of FRANCE.

THE COMMERCE of this Kingdom bears a Proportion to the Number of its Inhabitants, and the Extensiveness of its Dominions; of which some Idea may be formed from the Calculations made of its annual Revenue, which is estimated at 25,000,000*l.* and the Number of its Inhabitants, by the latest Computations, appear to be about 25,000,000.

In treating of the Commerce of this Country, I shall observe the same Method that I have followed in my Description of *Great-Britain's*, that is, by acquainting my Reader with the Products and Manufactures of each Province, and then shew him how they are disposed of.

#### 1. The Isle of France.

THE Capital of which is *Paris*, where many Manufactures are carried on, and afterwards brought into Trade, of which some are exempt from the Jurisdiction of the public Companies of the City, and established by Royal Authority; such as the *Gobelins*, where as beautiful Tapestries are made as any in *Europe*; the *Savonnerie*, appropriated to the making of Carpets with a Mixture of Silk and Worstead, in Imitation of those brought from *Persia*, the Beauty of whose Colours they come up to, and greatly exceed them in the Figure. The Manufactures of Glasses, Cloths, Hangings, &c. besides which the Artificers here carry on all Manner of Trades that are practised in our Metropolis; though it is with Pleasure I can assert, not many of them with equal Perfection. Here, however, are made all Sorts of rich Silks, Brocades, &c. Stockings, Hats, and every other Requisite for Home Consumption and Trade; and almost all the small Towns, Villages, and Districts in the Neighbourhood of *Paris*, have some Fabrick particular to them; as *Madrid*, a Castle built by *Francis I.* in *Boulogn* Wood, famous for Stockings; *St. Cloud*, for Porcelaine, Earthen Ware, Glass, and Tanneries; *Gentilly*, *Garges*, and *Antony*, are noted for Whitsterns; at *Ferté Gaucher* is a Manufactory of Serges; *Compeigne* affords Stockings, Socks, and Caps; as *Margny* does Cloths, Camlets, and Shags; at *Houdon* are made a considerable Quantity of Worstead Stockings; at *Dreux* is a Fabrick of coarse Cloth, and at *Châtres*, *Linas*, *Meulan*, *Sejanne*, *Poissy*, *Claye*, *Lusarcbe*, *Moret*, and *Dourdon*, large Parcels of Leather are tanned, and this last is famous for knit Stockings, and making Buff.

#### 2. The Province of Picardy.

THE natural Products which this Province furnishes to Trade are Corn, Hemp, and Wool; and its Manufactures, Woollens, Linens, Caps, Tapestry, and Soap. In Respect to the first, here is worked up five or six hundred thousand Pounds of Wool of the Country's Produce, and near as much more from *Germany*, *Holland*, *England*, *Spain*, and some other Parts of *France*, so that in the City of *Amiens* only are made about 120,800 Pieces of Stuffs, and 50,000 Pieces in the Neighbourhood, which are called foreign Stuffs, as they are made out of the City; and of the aforesaid Wool, the Camlet-makers alone take off 80,000*lb.*

The Cities of the greatest Trade in *Picardy*, next to *Amiens*, are *Beauvais* and *Abbeville*; besides which there are many Villages and Towns, as *Tilloy*, *Fienwill*, *Najars*, *Bauckemps*, *Gravilliers*, *Feuguieres*, *Amale*, *Anvoille*, *Glatigny*, and *Seuls*; in all which Places are only made Serges of many Sorts and Qualities, and what in *French* is called *Tiretaines*, which I take here to be meant a Linsey Woolsey; *Mouy* and *Crevecaur* give a Name to some of the former made there, as *Tricot* and eleven Villages of its Jurisdiction does to other Kinds of Serges of their Fabrication.

The finest Woollen Thread spun in *Picardy* is that of *Amiens*, where the Spinning employs a great Number of Hands, and consumes a large Quantity of Wool both of the Country's Growth and *Spanish*, which is used for making of Caps and Cloths here, and in the Woollen Manufactures of *Paris*, *Elbeuf*, and *Rouen*. The Quantity of Hemp and Flax gathered in this Province is likewise very great, so that the Linen Trade here equals that of the Woollen; and *St. Quintin* is where the greatest Sales are transacted, which may amount to 40,000 Pieces in a common Year; after *St. Quintin* is *Peronne*, and then *Nesle*; the different Species made in these three Places being several Sorts of Cambricks, from ten to a hundred Livres a Piece, Lawns, Gauzes, Hollands, printed Calicoes, &c.

The Fabrick of soft Soap at *Amiens* is so considerable as to produce yearly ten thousand Quintals, and at *Beauvais* Tapestry is made, and in its Neighbourhood is carried on a large Bufinets in Caps, Thread, and black Silk, Lace, Gimps, &c.

In *Amiens* are at least two thousand Looms constantly employed, and in its Neighbourhood eleven fulling Mills, turned by Water, whose Quality is not less excellent for Dying than it is for cleaning the Woollens, which of this Place alone sell for upwards of 1,600,000 Livres.—The Linens of *Pignigny*, *Oresmaux*, and *Flixcourt*, are better than those of *Amiens*, of which about two hundred Pieces are made and sold weekly.

Mr. *Savary* says, that the Cloths of *Abbeville* are so like to those of *England* and *Holland*, as to render a decision in Favour of either very difficult; but either their Fabricks are grown worse since his Time, the contrary of which I am very well assured of, or else he is guilty of a noted Partiality to his Countrymen; for though I will allow the Cloth that is made there to be good, yet the Yarn is neither so fine spun, nor so well and closely wove as here in *England*, neither will it wear so long, and much sooner grows bare and shabby; this Experience has taught me, as I have for many Years seen the Wear of them, and more than once examined many of the finest Pieces on the Spot: It is said here are about an hundred Looms, that employ upwards of fifteen hundred Spinners, besides as great a Number of Weavers, Cloth-Workers, Fullers, Dyers, and such like Artists, necessary to the perfecting the Cloths; and the Produce of them is computed to be at least five hundred thousand Livres yearly. Besides Cloth there is made at *Abbeville*, *Barragon* Serges, Druggets, &c. to the Amount of about an hundred thousand Livres, and of Stuffs made out of the City, though in its Neighbourhood, two hundred thousand Livres; and extra of these Commodities, many others are the Products of *Abbeville*, as Pluth, Caffoy, Ticking, coarse Linen for Package, &c. to the Value of about 150,000 Livres.

*St. Quintin* has no Woollen Manufacture, though near 100,000lb. of Wool is collected in its District; it however has a large Fabrick of Linens, insomuch, that forty thousand Pieces are made or sold here yearly, to the Value of 2,000,000 Livres; being Cambricks, Lawns, Hollands, and several other Sorts of Linens, which are likewise made in great Abundance in many Parts of this Province, whose Inhabitants are almost totally employed in the Linen and Woollen Way, as they have a large Share of the Materials in their own Territories, which produces them 524,000lb. of Wool, and Plenty of Flax of a very rich Quality.

THE Proximate Products of the Soil, both of the cially Wheat and a most excellent are made various Lacc. The Pastport they give tween three and Cattle; whose I their Rivers and Copper, and m

The Fabrick fction, of wh most considerat

*Of the Products of Champagne and Soissons.*

THE Proximity of these two Provinces, and the great Resemblance of their Products and Manufactures, have induced me to treat jointly of them. The Soil, both of the one and the other, is very fertile in all Sorts of Grain, more especially Wheat and Oats, and their Hills are covered with Vineyards that produce a most excellent Wine. Hemp and Flax are cultivated here in Plenty, of which are made various Sorts of Linen, and Threads employed in the Manufacturing of Lace. The Pastures are admirable for Grazing, as may be judged from the Support they give to sixteen or seventeen hundred thousand Sheep, which yield between three and four Million Pounds of Wool, besides a great Parcel of black Cattle; whose Hides afford a sufficient Employ to several Tanneries; and, in fine, their Rivers and Brooks set to Work many Forges for working Iron, hammering Copper, and milling Paper.

The Territories of *Rehbel* or *Mazarin* are in many Parts unfit for Corn, and this Sterility has put the Inhabitants on a Method of gaining a Livelihood, which I could not omit mentioning for the Uncommonness of it, and that is the fattening Oxen with Loaves, composed with Rape Oil, which Seed they gather here in plenty; but the principal Product of these Provinces is the Wine, for which they are justly so famous, and of which the best is found at *Rheims*, *Sillery*, *Hautvilliers*, corruptly called *Ovill*, in the Valley of *Pierry*, and the District of *Ay*, though there are many good ones of a second Quality at *Oxmery*, *Cbatillon*, and *Vertus-Dormans* in *Champagne*, and *Guichy*, *Pargnant*, and *Caucy* in the *Soissonois*. The Number of the Woollen Manufactories established in these Provinces is almost incredible; at *Rheims* they make Cloths like those of *Berry*, and various Sorts of Stuffs, both here and at *Rhetel*, *Chateau*, *Portion*, *Mazieres*, *Donchery*, *Mouzon*, *Fismes*, *St. Menebould*, *Sommepy*, *Ville-en-Tartenois* *Soissons*; *Chateau-Thierry*, *Charly*, *Obaye*, *St. Martin-Dabois*, *Bar-sur-Aube*, *Ferre-en-Tartenois*, *Neully*; and *St. Fond-Sedan* is noted for making and Dying the finest black Cloths, as also large Parcels of Cloth and other Serges: At *Bouts*, *Pertes*, and *Joinville*, only white Estaminas are made; at *Montcoruet* are made Sattins, Cloth, Serges, &c. as they are at *Vervins*, *Fontaine*, and *Ploumure*, with some ordinary Cloths: At *Montineral*, *Langres*, *St. Just*, *Anglure*, *Sezanne*, *la Ferte Gaucher*, and *la Ferte Sous-Jouars*, the Fabricks are of Cloths, made all of Spanish Wool; in fine, *Brienne*, *Chalons*, *Vitry*, *Chaumont*, and *Dienville*, make several Sorts of Stuffs and Serges, besides some Cloths.

Linens, whether Flaxen or Hempen, are no inconsiderable Products of these Parts, as the Manufactories of them are dispersed through both Provinces, though the principal one is at *Guise*; however, between this Place, *Vervins*, and *Noyon*, there are thirty-four Villages, where no other Linens are made than those of the finest Flax, called *Bateyles*, or Cambricks. At *Rheims*, and almost all the above-mentioned Places for Woollen Fabricks, there are also established some for Linen, which with those of Hats, Caps, Lace, &c. are very considerable, and furnish a great Value to the general Commerce of *France*.

4. *Of the Lyonnois Forest, and Beaujolois.*

VERY little Silk is gathered in the first of these Districts, and yet *Lyon* is one of the Cities, where the greatest Commerce in this rich Merchandize is carried on. All the Silks brought in from the *Levant*, *Persia*, *Messina*, *Italy*, *Spain*, &c. for the Use of *France*, ought to be carried to *Lyon*, as to a Staple, and from thence sent to *Paris*, *Tours*, and the other Silk Manufactories of the Kingdom.

The Products of these three Provinces for Trade, are 1. Hemp. 2. Wine. 3. Vitriol, Saffron, and Copperas. 4. Coals, which are consumed in the manufacturing Arms, and other Works of Iron.

The Fabricks are principally of Silk, and of the Materials necessary to its Perfection, of which that carried on at *Lyon* has for many Years past been the most considerable not only in *France*, but in any other Part of *Europe*. Mr. Sa-

vary says, that there is yearly employed of Silk, Gold, and Silver in this Manufacture, to the Amount of eleven Millions of Livres; that the Preparation of these Materials to fit them for Use, and their Working up, arifes to better than three Millions; the Sales made of them, to above three Millions more; and that of the seventeen Millions, which these three Sums amount to, Foreigners pay near One-third, in Time of Peace, when Trade flourishes.

This might be very true when Mr. Savary wrote, but the Weaving and Dying Arts are since brought to so great a Perfection in many Parts, more especially among us, that large Deductions must be made from the preceding Calculations, and the Balances considerably altered from what they were then, to what they are now.

The *Lyonnois* Manufacture is not confined to any two or three different Sorts of Silks, but is general, producing Gold and Silver Brocades, and rich ones without either of these Metals, Damasks, Sattins, Velvets, Mohairs, Taffeties, and almost every other Species made elsewhere. The fine-drawing, and making the Gold and Silver Thread, our Author says, employs a thousand Marks of Gold, and five Million Livres of Silver yearly; and here are also made some Fustians, Dimities, and a considerable Trade carried on in the Bookselling Way. Other Parts of these Provinces are noted for their different Products, as *St. Etienne* and *St. Chaumont*, for Hardware and Ribbons, *Roche* for Cheese, *Beaujolais* for Lincens, and various Sorts of Paper, made in many Parts of them, which altogether render these Parts very considerable in the commercial Way.

#### 5. Of MONTAUBAN.

IN this Province are collected from twelve to fifteen hundred Quintals of different Sorts of Wool, which, jointly with large Parcels from abroad, are worked up by the Inhabitants into various Sorts of Stuffs and Cloths, making in all about sixty thousand Pieces. At *Montauban* and *Cabors* are made several Sorts of Serges and corded Stuffs. At *Gourdon*, *Leffoure*, *Realville*, *Vicqfensac*, *Auche*, *Mauvezin*, *Mur-de-Barras*, *Espalion*, *Foix*, *Pamiers*, *Milland*, *St. Giron*, *Tarascou*, *Carlat*, *St. Gaudans*, *Apeñ*, *Gimn*, *Montrejan*, *Montpezat*, and *la Caussade*, are made Druggets, Serges, Crapes, and coarse Cloths, as they are at *Beaumont de Lernaige*, *St. Clair de Lomagne*, *Villefranche*, *Cramares*, *St. Aularis*, and many other Places; and also at some few of them are made Barragons and fine Stuffs. At *Montauban*, *Gourdon*, and *Jouillat*, there are Manufactories of Hats; and, at this latter, several Tanners. Stockings and Caps are made at *St. Clar de Lomagne*, *Pamiers*, *St. Giron*, *Montrejan* and *Mirande*. Hempen Linen at *Gourdon*, *Villefranche*, *St. Clar de Lomagne*, and *St. Antonin*; Paper at this last and *St. Giroul*, and Tickings at *St. Clar de Lomagne*. The greatest Number of Forges are on the Side of *Tarascou*, which are twenty-seven in Number. At *St. Giroul* there are four, and some Hammers for beating Copper. At *Foix* there are three Hammers, and in the Neighbourhood of *Villefranche* are several Hammers and Forges, all which, joined to the Fabricks before-mentioned, employ a great Number of Hands, and occasion a Currency of large Sums of Money.

#### 6. Of GUIENNE.

THIS rich Province furnishes Trade with large Quantities of Wine and Brandy, Vinegar, Prunes, Resin, Chestnuts, Oil, Iron, and Copper, wrought and unwrought, a great deal of Paper, and a middling Quantity of Hemp; there are in the Neighbourhood of *Perigeux*, thirty-nine Forges for Cannons, and other large Works of Iron; there are also many others near *Dax*, and several Hammers for Copper at *Bergerac*, *Orteix*, and *Nerac*. On the Side of *Oleron* are four Paper Mills, and in the Neighbourhood of *Bergerac* and *Castel Jaboux* seven others. A large Quantity of Hemp is cultivated at the two *Tonneins*, and in some other Places along the *Garonne* and the *Lot*; but all the Fabricks are but trifling, when compared with the Crops of Wine and Brandy, the staple Commodities of these Parts; insomuch, that in all this Province not above seventy-five thousand Pounds of Wool are shorn, and it is with these, and

a few from *Poitou*, *Bazas*, *Mont-de-Marsan*, *at Ponts*, some from *Marmande*, Hats at *Reolle*, Thread

THESE two are very different, the first yields a sufficient quantity whilst the *Limois* is those bad, hardly for Bread to nourish. Both the one and the other Fabrick is in great request. The Manufacture of ever, there are *Angoumois*, *Angouleme*, *St. Leonard*, *Bordeaux*. The Saffron of Trade; for, although it is sold at *Bordeaux* chiefly at the *Fair*

GRAIN, Wine, and their Manufactures; the Inhabitants to the Horfes and Mules, best Stud of *Holland* of which there are *At Partinay*, *Chamois* is preferred at *Cbatelle* of 25,000lb. of from *Spain* about annually made;

THE Produce are Salt, Vinegar, and their Manufactures of Sugar are refined of *Rbe*; 18,000 famous for the reigners. *Oleron* *lonne* yield near Brandy distilled in the *stricks*. *Angoumois* and Iron, this *Chapple*, *Bourdeaux*, *Feuillede*.

a few from *Poitou*, that all their Woolen Goods are made, *viz.* at *Bordeaux*, *Bazas*, *Mont-de-Marsan*, and *Nay*, thick Blankets; at *Joussac*, coarse Cloths; at *Pons*, some Estaminas; at *Baniers*, the Stuffs called Cardillats; at *Pau* and *Marmande*, Hats; at *Cadillac*, *Nerac*, and *Villeneuve d' Agenois*, Stockings; and at *Rolle*, Thread, Fringe, and Ticks.

#### 7. Of Limosin and L'Angoumois.

THESE two Provinces, though under one Direction or Receipt of Custom, are very different in the Nature of their Soil and Products; the *Angoumois* yields a sufficient Quantity of Wheat, Wine, and all Sorts of excellent Fruits; whilst the *Limosin* on the contrary is cold and sterile, has but few Wines and those bad, hardly any Wheat, so that Rye, Barley, and Chestnuts commonly serve for Bread to nourish the Inhabitants.

Both the one and the other Province have a great Number of Paper Mills, whose Fabrick is in great Repute for the Press, though very little for Writing.

The Manufactures for Woolen Stuffs are very trifling in this Province; however, there are a few Stuffs, Serges, Estaminas, coarse Cloths, &c. made at *Limoges*, *Angouleme*, *St. John d' Angely*, *Nerac*, *Rocheaucalt*, *Sentereune*, *Cognac*, *St. Leonard*, *Brievés*, and at *Tulle*.

The Saffron cultivated in the *Angoumois*, is no small Object of the Country's Trade; for, although it is not so good as that of the *Gastinois*, a great Quantity of it is sold at *Bordeaux* to Foreigners; and the bringing up of Horses for Sale, chiefly at the Fair of *Chassus*, closes the Commerce of these Provinces.

#### 8. Of POITOU.

GRAIN, Wine, Chestnuts, Hemp, and Wool, are the Products of this Province; the Meadows, whose Herbage is an excellent Pasture, enable the Inhabitants to raise and feed a great Number of large and small Cattle, of Horses and Mules, with which they carry on a very considerable Trade. The best Studs of Horses are in the twelve Parishes called the Wood of *Estos*, in four of which there are Salt Marthes.

At *Partinay*, *Niort*, *Fontenoy*, *Thouars*, and many other Places of their Districts, are made Cloths, Druggets, Serges, and Linsey Woolseys; at *Niort* also Chamois is prepared; Woolen Stockings and Caps at *St. Maixant*, and Hardware at *Chatellerault*.

25,000lb. of Wool is gathered in this Province, besides which there is brought from *Spain* about 600,000lb. of which, from 20 to 30,000 Pieces of Stuffs are annually made; and here are only three Forges of Iron, and two Paper Mills.

#### 9. Of Rochelle, Aunis, Saintonge, &c.

THE Products of the Provinces and Country that compose this Receivership, are Salt, Wine, Brandy, and Hemp, besides a Number of excellent Horses; and their Manufactures are of Linen, principally at *Barbezieux*. Great Quantities of Sugar are refined at *Rochelle*, and about 34,000 Muids of Salt gathered in the Isle of *Ré*; 18,000 Ton of Wine, and 10,000 Barrels of Brandy. This Island is also famous for the Anniseed Water made here, not only among the *French*, but Foreigners. *Olleron* produces about 4,000 Barrels of Brandy, and the Sands of *Olonne* yield near 20,000 Muids of Salt: Vast Quantities of Wine are gathered, and Brandy distilled, at *Rochfort*, *Charente*, *Aigre*, *Xaintes*, *Cognac*, and their Districts. *Angouleme* affords four Sorts of Merchandize, *viz.* Brandy, Pepper, Saffron, and Iron, this last having Forges for it at *Perigord*, *Aubarocbe*, *Rudeau*, the *Chapple*, *Bourequouit*, *New Forge*, *Jomeliers*, the *Angoumois*, *Planchemenier*, and *Feuillade*.

## 10. Of ORLEANS.

THE Wines that are made in very great Quantities in this Province, amounting to 100,000 Tons, are the principal Part of its Products, and it is said, that *Blois* and *Beaugency* do not furnish less: It is likewise very fertile in Corn, and not entirely barren in Manufactures, as at *Orleans*, *Dourdan*, *Gien*, *Blois*, *Chartres*, and some other Places, subject to this Generality, are made all Sorts of Woolen Stockings, both wove and knit, and at *Dourdan* many are made of Silk; at *Orleans* also are wove Caps, as Cloths are at *St. Geroux*, *Clamecy*, *Chatillon-sur-Loing*, and *Montargis*; various Sorts of Stuffs, different Species of *Serges*, *Crapes*, *Capuchin Cloths*, *Bays*, *Linsley Woolsey*, *Estaminas*, &c. are made at *Beaugency*, *Blois*, *Vendome*, *Pierre-Fitte*, *Montoir*, *Salbry*, *Souffme*, *Nouan-le-Fuzelier*, *Vouzon*, *Jergeau*, *Chartres*, *St. Fargeau*, *Brou*, *St. Agnan*, *Cbateau-Neuf*, *Brincent*, *Sully*, *La Charité*, *Petiviers*, *Pongoin*, *Cbaudun*, *Bazoches*, *Illiers*, and *Antben*. This Province has several Fabricks of Hats, though the principal ones are at *Orleans*, *Vendome*, *La Charité*, and *Blois*; at all which Places there are likewise considerable Tanneries; and in the Neighbourhood of *La Charité*, are twelve Forges, and three Furnaces for Iron. The *Beauße* and *Vendomois*, produce a great Quantity of Wheat and other Grain, as most other Districts of this Receivership do: In this Province, upwards of 200,000*lb.* of Wool are manufactured into about 25,000 Pieces of Cloth and other Stuffs, most of it the Growth of the Country.

## 11. Of Touraine, Anjou, Maine, and Perche.

THE principal Manufactures established in this fruitful and pleasant Part of *France*, are comprised in the silken, woolen, and tanning Commodities. The first has its establishment in *Tours*, the Capital of the Province of *Touraine*, where are made all Sorts of fine Silks, as Velvets, Mohair, *Serges*, Brocades, Sattins, Tafeties, &c. in which formerly were worked up 2,400 Bales of Silk, though at present three or four is more than sufficient; and the same Decadence that has happened in this Manufacture, has occurred in the Woolen, as this hardly employs fifteen or twenty Looms now, that occupied two hundred and fifty before; in those that still subsist, are *Amboise*, *Cbinon*, *Richlieu Loudun*, *Loche*, *Beauvieu*, *St. Chrijslopple*, *St. Pater*, *Laval*, *Beaumont*, *la Roue*, *Roziers*, *Montrefor*, *Villehin*, *Orbigny*, *Reugnay*, *Cbateau-Renault*, *Newville*, *Pontpierre*, *Maray*, *Neufay*, *Lojant*, and *Montricard*, are made much the same Sorts of Stuffs and Cloths, as in the last mentioned Province. Few Hides are now tanned here, in Comparison with the great Quantity that used to be formerly. The natural Products of these Parts, consist in Wines, Brandies, Saltpetre, and such Abundance of Fruit raised, and afterwards preserved by the Natives, as has drawn on this Province the Appellation of the Garden of *France*. In the Parishes of *Parcenay*, *Abillon*, *St. Mars*, and *Mettray*, are Quarries of Millstones; and near the Abbey of *Noyers*, a Copper Mine was discovered in the latter End of the last Century. About 7000 Pieces of Cloths, *Serges*, *Druggets*, *Linsley Woolseys*, and other Stuffs, are made in this District of *Touraine*, besides some Caps, Hats, and Stockings; in that of *Anjou* are gathered Wines, Flax, and Hemp, of which large Quantities of Thread and Linen are made; the Quarries of Slate, Iron, and Coal Mines, the Whitstries for Linen and Wax, the Refineries of Saltpetre and Sugar, the Forges and Glashouses, with the Manufacture of *Estaminas* and *Druggets* of various Sorts, make up the Commerce of this Province; of these latter about 4000 Pieces are made yearly at *Angers*, *Cbateau-Gontiers*, *la Fleche*, *Beauge*, *Saumur*, *le Ludi*, *Dove*, *Montreuil*, *Bellay*, *Beaufort*, and *Durtal*, besides some Hats, Caps, &c. In the Territory of *Maine*, about 5,300 Pieces of the aforesaid Woolens are made, though the principal Manufacture of this Province is Linen, for which it produces the Materials in vast Plenty, and there has been seen 20,000 People employed at once in the several Branches of it: Here are also some Glashouses, Iron Mines, &c. and large Quarries of a middling Sort of Marble. The Manufactures of the small Province of *Perche*, are Linen Stuffs and Paper, of which the first is the most considerable; they have also here some Forges of Iron, and carry on some Trade in the Grazing Way.

## 12. Of BERRY.

THE Sheep and Wool of this Province are the principal Materials it furnishes for Trade; its Corn, Iron, Hemp, Nut Oil, Wines and Wood, would also occasion a tolerable good Traffick, had they navigable Rivers to carry them off. The finest Wool is sold for *Rouen*, and only the inferior Sorts worked up here, of which are made the coarse Cloths, called *Drab de Berry*, and some ordinary Serges, Druggets, Linsey Woolsey, &c. at *Bourges*, *Iffoudun*, *Chateauroux*, *Vierzon*, *Selles*, *Aubigny*, *St. Amant*, *la Chastres*, *Castillon*, *Mebum*, *Aubigni*, *Dun-le-Roi*, *St. Benoist-du-Salt*, *Buzancois*, *Leueroix*, *St. Savin*, *Sancerre*, *Linieres*, *Leret*, *La Chappelle-danguillon*, *Aisne-le-Chateau*, *St. Guatier*, *Fovy-le-Pre*, *Argenton*, *Neury-St.-Sepulchre*, *Argent*, *Valençay*, *Cinconet*, *Baugy*, *Sancergues*, *Les Aix*, *Blancafort*, and *Enrichement*, in all from 47 to 48,000 Pieces.

## 13. Of MOULINS.

THE Manufactures and Fabricks of this Province, which contains the *Bourbonnois*, *Nivernois*, and the upper Part of *Auvergne*, are the Forges and Founderies, where Cannon, Anchors, and such large Works of Iron are made; the Manufactures of Tin, Earthen Ware, and Glafs; the Smalt Works, those of Cutlery and other Hardware, the Fabrick of Tapestry and Cloth; and the natural Products consist in Wine, Hemp, Iron, and Steel Mines, Coal, Cattle, Fish, Chestnuts, and Cheese. The whole Province feeds such a Quantity of Cattle, as exceeds Imagination; and it is surprizing to see how many Beeves and Sheep are every Year extracted from it for all Parts (even in Time of War) for *Flanders*, *Germany*, and *Italy*: Here are also, in an Acorn Season, large Herds of Swine fattened; and in Return of Manufactures, the Iron, Steel, Iron Plates, and Tin, are melted, run, and formed into several different Works, almost in all the Forges, built on the little River of *Nievre*, which falls into the *Loire*, under the Bridges of *Nevers*, and which before joining it, gives Movement to the Bellows, Hammers, and other Machines of above fifty Forges.

The Cutlery, and other Hardware, is made at *Bourbon* and *Nevers*, and in this last is also made some Earthen Ware, and some Works of Enamel. At *Aubusson*, and *Feuilletin*, there are Manufactures of an ordinary Tapestry; and at *Moulins*, *St. Pourçain*, *Montluçon*, *Aerisson*, *Decize*, *Cercy-la-Tour*, *Moulins-Engilbert*, and *Nevers*, are made some coarse Cloths and Woolens, though by far the fewest in this Province of any in *France*: This Receivership produces in Wood, from the *Nivernois*, *Bourbonnois*, and more especially from *Morvant*, about the Value of 400,000 Livres yearly; Coal from the Vicinage of *Decize*, to the Import of 120,000 Livres; Fish 300,000 Livres; Hogs, in an Acorn Year, 300,000 Livres; Corn, Hemp, Wine, and Cattle, 500,000 Livres; Iron 300,000 Livres; Tin 50,000 Livres; Earthen Ware and Glafs 200,000 Livres; Cutlery and other Hardware, with some Enamel, 150,000 Livres; and Tapestry, Nut Oil, &c. to at least 150,000 Livres. The Products of Wool, and the Manufactures of Linen, I pass unnoticed, as these are all consumed on the Spot, as indeed most of the Cloths and Stuffs are.

## 14. Of AUVERGNE.

THIS Province is commonly divided into High and Low, and the Products of each are as different as their Situation; the first is mountainous, as the Distinction seems to speak it, and productive of nothing but Food for Cattle, of which here is bred a surprizing Quantity; and the Low Lands abound in Corn, Wine, Hemp, and Walnuts; their Meadows are delightful, and so fertile, that those in the Neighbourhood of *Riom* and *Clermont*, are mowed three Times a Year, and the Lands in general never lie idle, or at most are not fallowed above one Year in twenty.

There

There are several Sorts of Manufactures in the *Auvergnois*, and almost all the different Species fabricated are of a very good Quality, but more especially the Paper, which is excellent, made chiefly at *Ambret*, and about *Tbiers* and *Clermont*. The Manufactures of Estaminas, Woollen Camlets, and other Stuffs, are at *Ambret*, *Culmbac*, *Oliergue*, *Sanxillanges*, and *St. Flour*, making in all about 10,000 Pieces. Laces are made at *Aurillac*, to the annual Value of 200,000 Livres, though formerly they produced near 800,000, and there are some made at *Muret*, *la Chafé-Dieu*, *Alarce*, and *Vincroles*. The Hardware of *Tbiers* and its Neighbourhood, affords Subsistence to above 5,000 Families, and Cards for Play are made here and at *Ambret*. The Tanneries of *Clermont*, *Riom*, *St. Flour*, *Maringuet*, *Anjoy*, *Cbaudes-Aigues*, &c. are very considerable, as the Dairies near *Aurillac*, *Moriac*, *Volers*, *Beze*, *la Tours*, and *Ardes*, are in Cheese: Many fine Mules and good Horses are bred in the Studs of this Province, which, besides the foregoing Particulars, produces Masts for Ships, and Wood for Carpentry, Coals, Fruit, Wax, Glue, Tallow, Butter, Linen, Hemp, and Nut Oil.

### 15. Of NORMANDY.

TO treat of this large and rich Province with due Regularity, I shall do it according to its customary Division, into the three Districts of *Rouen*, *Alençon*, and *Caën*.

The former produces Corn, Cider, Cattle, Hemp, and Flax, and besides has some Fisheries at *Dieppe*, *Honfleur*, *Havre*, &c. Its Manufactures consist of Woollens, Linens, Leather, Hats, Combs, Paper, and playing Cards; at *Rouen*, *Elbeuf*, *Darnetal*, *St. Aubin*, *Aumale*, *Bolbec*, *Louviers*, *La Bouille*, *Gournay*, &c. are made all Sorts of Cloth, Serges, Druggets, Ratines, Blankets, and divers Species of Stuffs and Hangings, in which are employed about 1,100 Looms, and from 8 to 9,000 Bales of Wool, besides other Materials, of which 5,000 are Spanish, and the Rest of the finest Staples of *France*. Linens of many Proportions, and different Fineness, are made at *Ponteau-de-Mer*, *Lizieux*, *Bernay*, *Rouen*, *Caudec*, *Arques*, and *Montoilliers*. The most considerable Tanneries are at *Rouen*, and its Neighbourhood; and Hats are made in several of these Parts, though the Quantity is vastly short of what they have been formerly.

The District of *Caën* has not less extensive or important Trade than this last treated of, but it seems as if each Part of this Receivership had appropriated a different Species of Business to itself.

Here are gathered a large Parcel of Drugs for Dying, such as Woad, Argol, Sumac, &c. The Butter of *Issigny*, the white Salt made in several Ponds, the Linens fabricated at *Bayeux*, and in its circumjacent Parts, are the only Manufactures of it; the Wool, Hemp, and Flax in this Neighbourhood, are sold unmanufactured: In the District of *Vire* are three great Forges of Brasery, viz. at *Envou*, *Abuze*, and *Cberbourg*; and here are made some Woollens and Linens; at *St. Lo*, *Vire*, *Valogne*, *Cberbourg*, *Countances*, *Fresne*, *St. Pierre-de-Antremet*, *Atbis*, *Flers*, and *Halouze*, to the Amount of 28,500 Pieces of Cloth, Serges, and Stuffs, besides Linens, Hats, Stockings, Leather, &c. and the Territory of *Alençon* is nothing inferior to the other preceding two, either in the Diversity of its Commodities, or Importance of its Trade. Large Parcels of various Sorts of Linens are made at *Donsfront*, *Vimoutiers*, and thereabouts. The Manufacture of Vellum Lace, was maintained through the long War at *Alençon*; the Magnificence, or rather Extravagance of *France*, sufficing for its Support, even in those distressful Times; of Cloths and Stuffs, from 50 to 52,000 Pieces, are made in this Division in a common Year. The Pins made at *Laigle* and at *Conches*, the Hardware and Brasery of this last, the Tanneries at *Argentan*, *Vimoutiers*, *Conches*, and *Verneuil*; the Fabrick of wooden Shoes, the forming of Joists, Beams, and other Timber for building; the fattening of Poultry for *Paris*, and the Butter and Eggs sent there; the Saltpetre, in the District of *Argentan*, are no small Addition to the Commerce of *Alençon*; but the Glafs-houles at *Nonant*, in the Forest of *Exme*, at *Fortiffambert* in the Forest of *Montpinson*, and the two established in the *Tbimarais*, with the Forges for Iron at *Cbancegray*, *Varennes*, *Carvages*, *Rannet*, *Conches*, and *la Bonneville*, are the Fabricks which mostly enrich their Neighbour-

16. Of B R E T A G N E.

THE Products and Manufactures of this Province, are, 1st, Salt, of which is annually made in the Parish of *Bourneuf*, from 16 to 17,000 Muids, and in that of *Guerrande*, or *Crohic*, from 20 to 30,000. 2dly, Butter, in the Bishoprick of *Nantes*. 3dly, Wines, more especially those on the River of *Nantes*, and these mostly distilled into Brandies, to the Amount of about 7000 Pipes *per Annum*. 4thly, Corn, particularly from the Bishoprick of *Vannes*, of which in a good Year, after a sufficient Provision made for the Province, 6000 Tons of Wheat, and 9000 of Rye, may be exported for *Spain*. 5thly, Hemp and Flax, principally cultivated in the Bishoprick of *Rennes*, *Treguier*, *Leon*, and *Dol*, and sold in Threads, Stockings, Stocks, Gloves, and Cloths, to a very considerable Value. 6thly, Iron, for which here are several Forges in different Parts, Lead, Coal, and Paper. 7thly, Pilchards and Mackarel, whose Fishery is carried on from *Pert Louis*, *Belleisle*, *Concornau*, *Audierne*, and sometimes from *Breyl*. 8thly, Woollens, such as Estamins, Druggets, Serges, Flannels, Crapes, and some ordinary small Cloths, made at *Nantes*, *Rennes*, *Bourg*, *Dinan*, *St. Brieux*, *Lamballe*, *Cbateaubriant*, *Nazay*, *Redon*, *Josselin*, *le Gu. de Plelant*, *St. Croix*, *Aucray*, *Vannes*, *Melchroit*, *Rochefort*, *Chteau-neuf*, *Lengonna*, and *Herwilliac*, to the Value of about Livres 40,000

And I shall here re-capitulate the afore-mentioned Commodities, and set down what those carried out of the Province may yearly amount to

Linens of all Sorts, to the Value of	12,000,000
Threads, crude, whitened, and coloured, to the Value of	1,000,000

17. Of the Duchy of Burgundy.

THE Wines of *Dijon*, *Nuis*, *Beaune*, *Ponarre*, *Chassagne*, *Macon*, *Tonnerre*, *Auxerre*, &c. are the principal Products of this rich Province, and are justly termed the Mother of Wine, not so much for the Quantity, as the Excellency of its Quality: Here are however other Commodities, as Corn, Iron, Cattle, Wool, Hemp, &c. of which the following Manufactures are made, viz. from 12 to 13,000 Pieces of Cloths, Serges, and other Stuffs; the Crop of Wool amounts to 3 or 400,000*lb.* Weight; the Hides and Hats suffice for the Use of the Inhabitants; here are thirty-two Forges for Iron, and eight Paper Mills: Several Ingredients for Dying grow here, and Wood in particular flourishes to a Miracle; Li-

nens are made at *Vitaux*, *Saulieu*, and *Autun*, though coarse, and no large Quantity; and a few Stockings, with some Lace, finish the Catalogue of this Province's Productions.

## 18. Of FRANCHE-COMTE.

THE Products of this Province consist of Corn, Hay, Iron, Saltpetre, Salt, Cattle, Butter, Cheese, and Horses. The Rivers *Saone*, *Doux*, *Laignon*, *Loure*, and some Brooks, work upwards of thirty Forges and Furnaces, where a large Quantity of Bombs, Bullets, and many other Iron Commodities are made; Masts and other Wood for Marine Constructions grow here in Plenty; and the Saltpetre made in a common Year, is about 1,200,000*lb.* with Room for a considerable Augmentation at a small Expence, upon a due Application. The Salt is from the Pits of *Montagne d'orle*, so named from the rich Treasure it encloses, which however only consists of two Drains of Water never dry, and which produced an extraordinary Quantity of this Commodity. The Studs of this District are very considerable, having always about 80 Stallions, 9000 breeding Mares, and from these about 5000 Colts yearly; here is no Manufacture of Drapery, nor any other Product meriting Regard.

## 19. Of DAUPHINE.

THIS Province being divided into Mountains and Plains, the Productions correspond to this Diversity of Soil and Situation. The Mountains produce Firs, and other Trees proper for Marine Uses, and cover several Sorts of Mineral and Metals; and the Rivers that arise and flow from them, turn many Mills of Forges and Foundries, for carrying on divers Works of Iron, Steel, Copper, and Lead, according to the different Species of Metals cast and wrought here. The principal Iron Mine is in the Mountain of *Allevard*, six Leagues from *Grenoble*, being of an excellent Quality, soft, easy to forge and file, without Flaw. The Copper Mines are in the Mountain of *Cloche*, and those of Lead in the *Gapençois*, near the Cave of the *Arnauds*, and at the Village of *Argentieres*, four Leagues from *Briançon*. In the Territory of *Bessies*, there are Slates; in that of *Larnage* a Mine of Vitriol and Coppers, and another of Tobacco-pipe Clay, worked up at *Tain*; *Cezanne* and *Cestiers*, in the *Briançonnois*, produce Chalk, and several Parts in the Upper and Lower *Dauphiny*, Coal and Saltpetre. The Manufactures, which these different Metals and Minerals occasion and maintain, are spread thro' the whole Province. Steel is made at *Rives-Moirans*, *Voiron*, *Beaumont-Furent*, *Tulins*, *Beaucroissant*, *Chabons*, and *Vienna*. The Iron is forged at *St. Hugon*, *Hurtiers*, *Thois*, *Allevard*, *Laval*, *Concelin*, *la Combe*, *Vriage*, *Revel*, *des Portes*, *St. Gervais*, and *Royans*; and Scythes and Sickles are made at *Voiron* and *Viziles*: Sword Blades at *Rives*, *Beaucroissant*, *Tulins*, *Viaron*, *Beaumont-Furent*, but above all at *Vienna*; Cannons are cast at *St. George*, and Anchors forged at *Vienna*: In fine, there are Copper Forges at this last-mentioned Place, *Turins*, *Noiron*, and *Beaucroissant*; and the Vitriol and the other Minerals are prepared in the Fabricks and Laboratories of *Allevard*, *Laval*, *la Cloche*, *Laugentieres*, *Lesbet*, *Bearrierie*, and *Larnage*. These are the Products of the hilly Parts, and we will now descend to the Plains, where we may find growing in their proper Seasons, Hemp, Corn, and Mulberry-Trees, for the Nourishment of Silk-Worms. The Linen Manufactures of the former are at *St. John-Cremiere*, *la Tour-du-Pin*, *Bourgoin*, *Vienna*, *Jallies*, *Ruy*, *Lisle Dabo*, *Artas*, *St. George*, *Voiron*, and at *la Buissle*. It is almost in the same Places that Thread is spun, for Sewing and for the different Sorts of Cap-making: Silk is made through the whole Province, excepting in the Mountains, and some Parts too cold for the Worms; and besides these, here are many Paper Mills at *St. Donat*, *Chateau-Double*, *Perus*, *Dijonnet*, *Chabucil*, *St. Viller*, *Cress*, *Vienna*, *Rives*, *Pariot*, and *Vizille*. The Fabricks of Hats are established at *Grenoble*, *Fontenil*, *Saffenage*, *Voreppe*, *Moirans*, *Cress*, and *Pont-en-Royans*. Large Hides are dressed on the Side of *St. Andre*, *St. Jean-de-Bourgnay*, *Vienna*, *Serre*,

*Serre, Grenoble, Lunbin, Croes, and Goncelin*; the Skins and small Hides are tanned at *Grenoble, Voiron, Romans, Valence, Loriol, Livron, Moutellimast, Dieu-le-fit, Vienne, and St. Antoine de Viennois*. The Cheefe of *Saffenage* or other Parts, sold under that Name; Gloves of *Grenoble* so light and fine: The Pine-Nuts, Resin, Turpentine, &c. gathered in these Parts, make a considerable Addition to the Trade of them; but I have yet to treat of a principal Branch, viz. that of the Woollen Manufactory carried on at *Grenoble, Voiron, Tulin, St. Marcollin, Roybon, Serre, Beaurepaire, St. Jean-en-Royans, Romans, Pont-en-Royans, Crest, Montelmar, Tollinain, Dieu-le-fit, Buis, Valence, and Vienne*, in all which Places are annually made from 38 to 40,000 Pieces of Cloths and Stuffs.

## 20. Of PROVENCE.

THIS Province is very fertile in Wine, Olives, Saffron, Oranges, Lemons, Prunes, Almonds, Nuts, Pomegranates, and all Sorts of excellent Fruit; and here is also gathered a very great Quantity of Silk and Wool: Of the Olives is made large Quantities of the sweetest Oil, besides those pickled, for which the *Provincials* have the best Method yet known. Their Muscated Wines of *St. Laurent* and *Ciutat* exceed any Thing of that Nature, and add to the Delights of the best Tables: The Raisins, wherewith these Wines are made, and particularly those gathered about *Roquevaire* and *Auriol*, are excellent in their Kind, as the Figs are dried here of two Sorts, and no Part of the World comfit their Fruits in that Perfection as here. The great Number of the Mulberry-Trees with which this Province abounds enables the Natives to breed vast Quantities of Silk-Worms, and thereby procure large Crops of their precious Webs. The Soap, particularly that of *Marseilles* and *Toulon*, is in very good Repute, though generally allowed to be inferior to that shipped at *Alicant* in *Spain*. There are in *Provence* sixty Paper Mills, where many Sorts of this Commodity are made; and the Tanneries are many and very considerable. The Country Wools are employed in divers Manufactures of Stuffs, and many Fabrieks of Hats; the latter at *Aix, Marseilles, Toulon*, and in the Principality of *Orange*; and the former at *Toulon, la Roque, Mewve, Solieres Cuers, Pequanto, Camzules, Luc, Draguignan*, and at *Lorgues*, though a great Part of these are made of Spanish Wool, pure and unmix'd: At *Gordes, Apt, Ayquieres, Auriol, Signe, Celmars, and Digne*, are likewise made some corded and other Stuffs, as there are at *Arles* and *Grignan*, of other Species: In this Province also are made many Hammers for Copper Work, which are all the Commodities it furnishes to Trade.

## 21. Of LANGUEDOC.

ALTHOUGH this and the last-mentioned Province are joined together, enjoy the same Aspect, and are exposed to the same Winds, they are, however, very differently divided, in Regard of the necessary Advantages for Trade, more especially in their Ports, with which the other abounds; and to this Nature has given one, so that the few it enjoys, are the Effects of Art, made with a great deal of Trouble and Expence: However, as in these Sections I propose to confine my Discourses only to the Products and Manufactures of the Countries treated of, I shall omit enlarging on their Situation, at least at present, and prosecute in this, the Method I have observed in my Account of all the preceding Provinces.

*Languedoc* is esteemed as one of the best cultivated Provinces of the Kingdom of *France*, and justly merits this Encomium; its Inhabitants are numerous, diligent, skilful, and industrious; it enjoys the Advantage of having a greater Diversity in its Products, than any other Province; yet this Country, so well cultivated, and so well peopled, might raise a much greater Revenue, support a much greater Number of Inhabitants, and furnish the State with much larger Succours, if it understood to attract by a suitable Culture all those Advantages which

which it is capable of procuring; it has plenty of Corn and Wool, but it might largely augment its Crops of Wine and Oil, and expect a surer, more beneficial, and immediate Sale to these Commodities, than they ever find, or can hope for from the others; the Growth of Silk might also be greatly increased, and Cotton might be planted to Advantage, and this further improved by establishing Manufactures of it; much more Salt might be made, more Mines wrought, and a great Number of Things might be added to the natural Products of the Country, for which the Soil and Situation is adapted; however, I shall not enlarge on what this Part of *France* might be made to produce, but now acquaint my Readers with what its Products and Manufactures actually are.

This fruitful Province, one of the largest, richest, and most agreeable of that Kingdom, has two great Salt Marshes, the one at *Mordirac*, the other at *Sigan*, both yielding vast Quantities of that useful Commodity. At *Rieux*, *la Grang-des-pres*, *Lodève*, *Carcaffonne*, *Limoux*, *Castres*, *Alby*, *Alet*, *St. Colombe*, *Lauclanet*, *Lafit*, *la Grace*, *les Septes*, *Calabre*, *Maxanet*, *Terrières*, *la Caume*, *Bedarrioux*, *St. Sreian*, *Quissac*, *St. Hypolite*, *Bauzely*, *Vigan*, *Ganges*, *Saunennes*, *Anduze*, *Alais*, *St. Gervais*, *Sommieres*, *Gardonnenque*, *la Salle*, *Bezidère*, *Aniane*, and *Beaucaire*, are many Woollen Manufactures of Cloths, Serges, Ratines, Baize, Crapes, Druggets, Linscy Woolsey, and several other Sorts of Stuffs: Of the silken Fabricks, the principal are at *Touloufi*, *Montpelier*, *Nismes*, *Alais*, and in some other Towns and Villages along the *Rbone*, where are made Taffeties, Tabbies, Crapes, Tarandines, Brocades, Damasks, and some Goods with a Mixture of Silk and Wool, in which all the Silk gathered in these Parts is employed, being from 12 to 1500 Quintals in a common Year. The Verdeggris made at *Montpelier* and its Neighbourhood, and the Crystal of Tartar prepared at *Aniane*, are in great Esteem among Strangers. The Diocese of *Mirepoix* has also Mines of Iron, Coals, and Jett; the Iron is found and wrought at *Coursbuls*, *St. Colombe*, *Qyillau*, and at *Belguat*; the Coal at *Triment*, and at *St. Benzij*; and the Jett at *Lovan*, and *Ranalet*. Of Hats the Fabrick is very considerable in these Parts; they are made at *Montpelier*, *Quissac*, *Sauve*, *St. Hypolite*, *Saunennes*, *Anduz*, *Alais*, *Uzes*, *St. Geniez*, *la Salle*, *Nismes*, *Clermont*, *Beaucaire*, *Valborgne*, *Mairvirin*, and *Valarangué*: Chefnuts and Hemp are plenty in the *Vivares*; and in the Diocese of *Carcaffonne*, all the Inhabitants of the six Boroughs, composing the little Territory of *Graiffac*, are Nail-Makers. The Fabrick of Lace employs a good Part of the Workmen in *Velay*, and besides the Manufactures before-mentioned at *Montpelier*, there are made Blankets, Wax is whitened, and those Drams called *Raf-folis*, composed in greater Quantities than can be consistent with their Drinkers' Health: But to abbreviate the Detail of this Province's Products, I shall excuse giving a more particular Account of them than the preceding; though in the following general one, I shall set down the Value of the total Produce and Manufactures, and add what Share of it is superfluous to the Province's Consumption, and therefore sent into others, and abroad.

22. Of

22. *Of the Lower Navarre and Bearn.*

**I**F *Bearn* cannot be called fruitful, the *Lower Navarre* is much less so, being a mountainous barren Country, whose Soil will not produce any Thing but thro' Force of Application and Care; and it is owing to the Labour, Assiduity, and Industry of the Inhabitants, that it yields the little it does. The Vallies of *Baretons*, *Alpe*, and *Offane*, in the Precinét, or *Seneschauß*, of *Olron* in *Bearn*, produces Pines to make Masts for the Royal Navy; they likewise enclose some Mines of Lead, Copper, and Iron, which employ a Quantity of Forges, Founderies, and Hammers; some Salt is also made in different Parts of *Bearn*, though very little more than serves for the Natives' Consumption. The Productions of this Country for Trade are Wine, Wheat, Millet, Oats, Apples, Flax, and Hemp, with which latter they make some Linen, as they do Cider with their Apples, selling their Wine, of which that of the *Seneschalry of Morlac* is esteemed excellent. These two Provinces, more especially the Mountains of *Navarre*, have most admirable Pasturage, which enables the Inhabitants to breed and raise a great Number of Horses, black Cattle, and Sheep, of which latter the Wool is so fine as to pass for that of *Spain*; though here are no Woollen Manufactures, except a trifling one for coarse Cloths for the poor Natives' Use.

23. *Of French-Flanders.*

**O**F which *Lille* is the Capital and Centre of its Trade; its Manufactures, and the Undertaking of its Merchants, employ and maintain about 100,000 Workmen, either in the City, Suburbs, plain Country, or the neighbouring Villages: The Commodities which this Part of *Flanders* produces are Grains of all Sorts, for the Food both of Men and Beasts; Hay, Wood, Fruit, Wool, Horses, Flax, Cattle, Butter, and prodigious Quantities of Rape Oil.

The Manufactures consist in Cloths, Serges, Ratines, and divers other Sorts of Stuffs, made with Wool alone, or mixed with Silk or Thread; and others, where several Sorts of Linens are made, both figured and plain; Hides differently tanned; Tickings, Camlets, Damasks, Velvets, Laces white and black, either of Thread or Silk, Tapestry, gilt Leather, Pipes, Match, Pasteboard, Stockings, Breeches, Caps, or other such knit or wove Work; fine Ozier Baskets, Hats, Barragons, Crapes, Blankets, and several other Species of Stuffs: All these Manufactures are established in the City of *Lille*, and the Commerce they occasion can hardly be imagined. At *Orchie*s are made Trippes; at *Douay*, the same Things in Proportion as at *Lille*; at *Armeniers* Estaminas, some Cloths, and a very few light Stuffs; it is in this City also that the Linens made in the adjacent Parts are all sold; at *Lanoy* and its Jurisdiction some light Stuffs also are made. At *Gorgehe* is a Fabrick of plain and figured Linens, whitened in the Whitsteries of this Place, which are excellent for the Purpose. There are several Looms of Woollen Stuffs, or those mixed with Silk, at *Roubais* and *Turcoing*; at *Menin* is a Fabrick of Linen, and another of Hats; and in fine, at *Tournay* are made worsted Stockings, mock Plush, and Earthen-Ware.

24. *Of Lorraine and Bar.*

**T**HERE are but few Woollen Manufactures in either of these Duchies, and none of Silk; what little is carried on of the former is at *St. Nicholas*, *St. Marie-au-Mines*, but the Cloths are very coarse and in little esteem. At *Nancy* is a Fabrick of ordinary Hangings, though so trifling, that I should not have mentioned it, but to avoid leaving out any Manufacture in a Country where there are so few, That of Thread Laces is not only more considerable, but is almost the only one that merits any Regard; *Mericourt*, *Vezelise*, *Neufchateau*, and some Villages in their Jurisdiction, are the Places where most are made, and employ five or six hundred Women or Girls; it is true they are far from being fine, but of a Quality very fit for the *Spanish* Markets, where several thousand Pieces are annually sent. and Paper, are also Manufactures of these Provinces, but all consumed at Home; and what they afford for Trade is Salt, Iron, Alum, Saltpetre, Wood, Cattle, Wool, Rape Oil, Honey, Wax, Wine, Brandy, Skins, and Glass. Places proper for making Salt are found in many Parts of *Lorraine*, so that at least a Dozen might be appropriated to this Purpose, which would furnish a large Quantity of an excellent Sort; though only three are now wrought, *viz.* at *Kozieres*, *Cbateau-Salins*, and *Dieuse*.

The Iron Mines are chiefly in the Mountains of *Vosge*, though there are some in the plain Country; they afford Plenty of Metal, and employ a great Number of Forges. The Allium Mines are only found in the *Voyvre* near *Longevi*, and are of little Advantage to the *Lorrainers*, as they neither know how to extract or prepare it. Of Saltpetre they have no Mine, but collect it, as elsewhere, on the Walls of old Houses, and other antique Buildings. Timber and Masts are felled in the Mountains of *Vosge*, both for Ship and Land Use; and the Glass-houses are established in the Woods of the Provosty of *Arnay*, in those of *St. Michael*, and at the Village of *Tavey*, three Leagues from *Nancy*. Brandies are distilled at *Pont-a-Mousson*, though not from Wine as in other Parts of *France*, but from the Pressings of the Grapes, which are every where else regarded as useless, or at most serve only for feeding Pigeons, or to dry and burn. The Skins particularly those of Bears, which are taken in large Quantities in the Mountains, and the Forests of *Vosge*, are sold at *Strasbourg*, &c. Wheat grows here in Plenty; and the *Lorrainers* are esteemed the best Founders in *Europe*; especially for Cannon, Mortars, and Bells; the Inhabitants of *Levescour*, *Outremicour*, and *Breraine*, are the most reputed for these Fabricks, and this Art may be regarded as a Sort of Trade in *Lorraine*.

#### 25. Of the three Bishopricks.

UNDER this Title are comprehended *Metz*, *Toul*, and *Verdun*, three imperial and episcopal Cities in *Lorraine*, now subject to *France*. The Products of this Country are Wine, Wood, Grain, Salt, Hides, Fruit, Confectionary, Brandy, Linen, and wrought Wood of *St. Lucia*, a sweet-scented Wood; besides which here are several Woolley Manufactures, and Fabricks of Caps; the best of which are established at *Metz*, and its Neighbourhood, which consist of all Sorts of *Ratines*, divers Species of thin *Serges* for the Women's Wear, coarse Cloth, with some *Druggets*, and *Estaminas*. *Toul* and *Verdun* have also some of these Manufactures, but very inconsiderable, both in Quantity and Quality. Worsted Stockings are made in all the three Cities, and these Parts abound so in Tanneries, that there are above forty at *Metz*, more at *Verdun*, and several at *Toul*. A Sufficiency of Salt is extracted from the Works of *Moyenvic*, as these produce about 9000 Muids *per Annum*. Oil is made here from the *Lorain* Rape-Seed, both for their Woollen Manufactures and Lamps. The Mountains of *Vosge* furnish the three Bishopricks with Cattle, Butter, Cheese, Skins, especially those of Bears, and Wood for all Uses; besides which they make Brandy in the Manner that is expressed under the preceding Section of *Lorraine*.

#### 26. Of ALSACE.

THE Trade carried on in this Province, bears no just Proportion to its Fertility, and the Number of its Products; however, *Strasbourg*, the Capital of the Lower *Alsace*, furnishes Trade with Tobacco, Brandy, Hemp, Madder, Alkermes, Saffron, Hides, Tallow, Wood, and large Cabbages, of which last Commodity, though seemingly trifling, there is yearly sold at *Mayence* and in *Holland*, to the Amount of 30,000 Crowns: The Manufactures of this City consist of Hangings, ordinary Cloths, Blankets, *Serges*, and some Linens, made both of Hemp and Flax; at *Giromani*, *St. Marie-au-Daines*, *Astembare*, and *Munster*, are Mines of Silver, Copper, and Lead, all in the Upper *Alsace*; and to melt and prepare the Iron of these Mines of *Befort*, there are many Furnaces and Forges in the neighbouring Forest, and for those of Copper, a Number of Hammers and Foundries.

#### 27. Of

## 27. OF ROUSSILLON.

**T**HE Wool, Iron, and Olive Oil of this Country are the principal of its Products for Trade: The first of these are so fine and good, that they almost equal the Spanish in Quality; the Extract of Oil in a common Year, is to the Worth of 2 to 300,000 Livres; but of the Wine, though good, only a middling Quantity is sold; the Rest of their Trade consists in Wheat, Millet, large Cattle, and Sheep. *Roussillon* has no one considerable Manufacture; here are however some Blankets, ordinary Linens, and coarse Cloths, made for the Peasants' Clothing and Use.

I HAVE now finished my Detail of what each Country of *France* produces, and shall next inform my Readers how these Products are disposed of, in the general Traffick of that Kingdom, excusing to mention any Thing of the Trade carried on with *Great-Britain*, as this has been spoken of already.

The Commerce of *France* is extended almost to every Part of the known World, where any is carried on, and it is this only I shall speak of, without regarding their Home Trade, and shall begin first with that they maintain with *Holland*, as the most considerable of any other they are engaged in; and the principal Cities concerned in it, are *Paris, Rouen, Orleans, Dieppe, Dunkirk, St. Valery, Caen, Nantes, St. Malo, la Rochelle, L'Isle de Rbe, L'Isle d'Oleron, Bourdeaux, Bergerac, Montauban, Bayonne, Lyons, and Marseilles*, whose Trade with the *Dutch* I shall describe in Order. Of the Manufactures of *Paris*, are sent to *Holland* all Sorts of rick Silks, as Gold and Silver Brocades, and those without either of these Metals; Gros de Tours, Damask, flowered and plain Sattins, Tarandines, Thread Laces, Ribbons and Girdles, Aprons, Head Dresses, Gloves, Fans, Jewels, Books, &c. From *Rouen* they extract Linens, *Caudebec* Hats, Laces of Silk, and of Gold and Silver, true and false, Silk and Worsted Stockings, divers Sorts of Mercury and Hardwares, Greening Weed for Dyers, Thistles for Clothiers, Saff Glafs, Bon Chrétien Pears, Rennet Apples, Cider, and Sweetmeats. From *Orleans*, they have only *Gatinois* Saffron, *Orleans* Wine, and some from the *Loire*, and Brandies: *Dieppe* furnishes them with Saff Glafs, Laces, Mercury, and Hardwares, and a large Quantity of Combs, and Horn Tobacco-Boxes. The Trade of *Dunkirk* with *Holland* is now reduced to the Importation only of the Returns the former gets by its *American* Commerce, and which are principally sent to *Rotterdam*. *St. Valery* has hardly any Trade with the *Dutch*, nor does *Caen* remit them any Thing but Paper, which is sent both to *Amsterdam* and *Rotterdam*. *St. Malo* supplies the former with Paper, Honey, Grain, Calf-Skins, Grindstones, *India* Goods, coarse Sugars, and several *Spanish* Commodities.

*Nantes* sends them *Bretagne* Linen, Butter, when scarce in *Holland*, Corn, such as Wheat, Rye, and Malin, Honey, *Gatinois* Saffron, *Loire* Wine and Brandy, Paper, Prunes of *St. Catharine*, Sugar, Indigo, Cocoa, Rocou for Dying, and Cotton Wool: *Rochelle* furnishes *Amsterdam* with Wine and Brandy, Salt, Paper, brown Sugar, Syrup, Indigo, *Martinico* Cocoa, Walnut-Tree Boards, &c. The Isles of *Rbe, Oleron*, and Town of *Cognac*, supply it plentifully with small Wines, particularly that from *St. Martin*, Brandy and Salt. *Bourdeaux* sends there Brandy, Vinegar, *Perigord* Chestnuts, Prunes of *St. Antonin*, Walnuts, and Walnut-Tree Planks, Honey, *Montauban* Saffron, Linseed for Oil, Paper, Turpentine Resin, and Pitch, coarse Sugars, Indigo, and Rocou, Syrups, and several other Commodities. *Bergerac* only affords for this Trade, Wine and Chestnuts, with which at least a hundred and fifty Ships go yearly laden from hence and *Li-bourne* to *Amsterdam*. From *Bayonne* are carried there the several Wines of *Journanfen, Bearn, Cbalosse*, and *Cape Breton*; Brandies, Chestnuts, Prunes, Hams, Liquorice, Turpentine, Resin, and Pitch; a large Parcel of *Spanish* Wool, Honey, Bed Feathers, and Linseed. *Lyons* only deals with *Amsterdam* in Silks and Exchanges, though *Marseilles* sends there Olive Oil, Soap white and marbled, Brandy, *St. Laurence* Wine, Olives, Capers, Anchovies, Honey, Almonds, Figs, Raisins, Currants, Tunny Fish, Dates, *Verdegris*, Perfumes, Woad of *Languedoc*, *Marseilles* Quilting, Silk Stockings of *Nijmes*, all Sorts of *Arabian* and *Levant*

The  
*Italy*, the  
has with

Drugs, Coffee, Silk, Cotton Wool and Thread; *Angora* Goats Hair, Camels Hair, and several other Sorts of Merchandize:

And what *Holland* sends to *France* in Return, are Cloths; Cambricks, Hollands, Cotton Wool and Thread, Chints and Muffins, but these by Stealth, as they are contraband, Sugar-Candy, Pepper, Cinnamon, Cloves, Mace, Nutmegs, writing Quills, fine Wool, Horse Hair, Ox Horns, Drugs for Dying, Diamonds, Pearls, and Seed Pearls, Madder, Galls, Gums, Allum, Copperas, Vitriol, Pewter, Lead, Copper, Tin, Steel, Iron, Iron Plates, Pots and several other Works of this Metal; Limbecks for Distilleries, and Kettles for boiling Sugar; Bras and Iron Wire, Quicksilver, refined Brimstone, all Sorts of tanned Hides, *Russia* Leather, all Sorts of Skins, Flax, Hemp, Cables and Cordage for Ships, Sail-Cloth, Mafts, Yards, and Plank for all Marine Uses; Timber for House-building, Refin, Pitch, Tar, Cheese, Tallow, Candles, Butter, Salmon pickled and smoaked, Herrings, Whalebone, Train, Linfeed, and Rape Oils, Linfeed for sowing, Musk, Civet, and Ambergris, Coral, and yellow Amber, Staves, Casks, Ashes for the Soap Works and Whittlers, white and yellow Wax, Wax Candles and Flambeaus, Starch; all Sorts of Thread for Sewing or Weaving, as also for making Cables and Sails, China-Ware, Tea and Chocolate, Couries, and all Sorts of Copper Basons and Merceries for the *Guinea* Trade; Tapestries of different Species, Cannon, and all Sorts of Fire-Arms, Powder, Bullets, and Bombs.

By which may be in Part seen how considerable a Trade is carried on between *France* and *Holland*; and if we may believe the Author of the *Memoirs on the Commerce of the Dutch*, *Monf. Boreel*, who was their Ambassador to his most Christian Majesty, had declared and proved to the *French* Court, that in the Year 1658, Goods had been entered in the several Custom-houses of the seven United Provinces to above three Million and a half of Guilders in Value, in the following different Sorts of Commodities, *viz*:

	Guilders.
Of Velvets, Satins, Gold, Silver, and other Brocades, Taffeties, &c. made at <i>Lyon</i> , <i>Tours</i> , and <i>Paris</i> , to the Value of	6,000,000
Of Silk Ribbons, Thread, and Gold and Silver Laces, Buttons, Stay-Laces, &c.	2,000,000
Of Castor, Nicuna, and <i>Caudebec</i> Hats, made at <i>Paris</i> , &c.	1,500,000
Of Feathers, Belts, Fans, Head-Dresses, Looking-Glasses, Watches, Clocks, and other Merchandize of this Sort	2,000,000
Of Gloves made at <i>Paris</i> , <i>Rouen</i> , and <i>Vendome</i>	1,500,000
Of Wools spun in <i>Picardy</i>	1,500,000
Of the different Sorts of Paper made in <i>Auvergne</i> , <i>Limosin</i> , <i>Poitou</i> , <i>Champagne</i> , and <i>Normandy</i>	2,000,000
Of Pins and Needles, Box, Ebony, and Ivory Combs	500,000
Of Hardware from <i>Auvergne</i>	500,000
Of the different Sorts of Linens from <i>Bretagne</i> and <i>Normandy</i>	5,000,000
Of Furniture, Beds, Quilts, Blankets, Curtains, and Fringes	5,000,000
Of <i>Bordeaux</i> , <i>Gascogne</i> , <i>Saintonge</i> , <i>Orleans</i> , <i>Anjou</i> , and <i>Nantes</i> Wine	5,000,000
Of Brandy and Vinegar	1,500,000
Of Saffron, Soap, Honey, Almonds, Olives, Prunes, &c.	2,000,000

Which Imports together make thirty-six Millions of Guilders 36,000,000

*Monf. Boreel* represents, that besides all this, *Holland* annually extracted from *Rochelle*, *Marans*, *Brouage*, and the Islands of *Rbe* and *Oleron*, above five or six hundred Ship-loads of Salt, without including Hemp, Wheat, and other Grain that they take from *France* in a plentiful Year, which sometimes amount to more than six Millions; and though their Trade must have suffered some Alteration in near a Century that has elapsed since the above Calculation was made, yet it still continues very great, and most of the same Commodities exchanged as were by the preceding Account.

The *French* likewise carry on a very important Trade with *Portugal*, *Spain*, and *Italy*, though nothing nigh so much as they formerly did, as *Spain* in particular has within a few Years past set up several Manufactures of Silk, more especially at *Valencia*,

*Valencia*, which now rival the *Lyonnois* Fabricks in Pattern, Goodness, and Dye; they however still supply *Portugal* with this Commodity, and both Kingdoms with some Woollens for their *American* Trade; on the contrary, raw Silk is carried from *Italy* to *France* as well by Sea as Land, and all the *Italian* States in Return take off some Part of their fleecy Treasure wrought into *Serges*, *Cloths*, *Druggets*, &c. Of Hats, some are yet exported to all these Countries, though in nothing near the Quantities as was usual when those of *Caudebec* were the celebrated ones of *Europe*; their Linens and Lace also continue to find a Sale as well in most Parts of *Italy* as the *Spanish* and *Portuguese* Dominions, both in this Part of the Globe and *America*; and these States furnish the Wants of the *French* with large Parcels of Hides from *Buenos Ayres* and *Newva Colonia*, as they do with Snuff and Roll Tobacco; of the former it is said, about two thousand Ton from *Spain*, and as much of the latter from *Portugal*; they also take from *Spain* large Quantities of Soap ready made, with Oil and Soda or Barrilla, to manufacture more at Home; and with this latter they likewise supply themselves for their Plate Glass Fabricks. With their Wine, Brandies, and Salt, they carry on a prodigious Trade to all the *North*, for though many of those Parts are supplied with these Commodities at Second-hand by the *Dutch*, yet none totally; for *Sweden*, *Denmark*, *Russia*, and the *Dantzickers* relieve a great Part of their Wants with their own Shipping, which they load with Iron, Steel, Copper, Tin, Lead, Powder, Stock-Fish, Salt-Fish, Tallow, Wools, Boards, Masts, Hemp, Cordage, Tar, and other naval Stores for the *French* Markets; though indeed, in Regard of the *French* Interest, it signifies very little what Nations are the Exporters of their Commodities, provided they be taken off. They carry on an immense Trade to the *Levant*, and on the Coasts of *Barbary*, principally with their own Products and Manufactures, and supply all their *West-India* Settlements with them; they share all the *European* and *American* *East-Indies*, and if they do not do as much as the *English* and *Dutch* do in them, they do more I believe than all the other Nations put together. Their Commerce with *Germany* is also considerable, and a great Part of this is carried on by Land, as the two Empires in many Places join, so that Silks, Salt, Woollens, &c. they may get to Market without the Intervention of any Sea Carriage, and bring back an Assortment of those fine Threads and Laces for which many of those Parts are so famous. The *Flemings* come empty, and load back with Wine, Brandy, Syrup, and Sail Cloth. The *Hamburgers* bring Lead, Copper, Starch, Staves, Steel, Iron; and in Return take Salt, Wines, Brandy, Indigo, Ginger, and Paper. For carrying on their *West-India* Trade, the *French* have a Company with an exclusive Charter, which was at first formed in 1628, to support the Colonies they had at that Time established in *Canada*, and to settle others in that vast Tract of Land then most Part unknown; this Company immediately began to flourish, and the large Settlements since made there are properly owing to its Activity and good Management, though it subsisted no longer than till 1649, when it began to sell Part of its Grant, and finished the Whole by 1651. This occasioned a Succession of Companies under different Denominations, and frequently split into several Societies, too prolix to be inserted here, till they were reunited again in one, in 1664, under the Title of *The Royal West-India Company*, but this only lasted for about nine Years, when the King annulled the Patent, and annexed all the *American* Settlements to this Crown, at which Time there was also established a more considerable Association, I mean that of the *East-India Company*, which still subsists; and there are now very large Colonies and Settlements in both the different Districts, though the Support of the one and the other has cost that Monarch several Millions. Here is likewise the Company *du Bastion de France*, settled in the Kingdom of *Algiers*; and that of *Senegal*, after some Years' Traffick, was in 1718 swallowed up by their grand Company of the *Indies*; though out of this sprung their *Guinea* Company, which changed its Name for that of the *Asiento*, and then for the *South Sea* Company, and in its Turn lost both the one and the other, in its Abolition, the King laying the Trade of their District open to all its Subjects in 1716. They have also had their *Hudson's-Bay*, *Mississipi*, *Western*, and *Canada* Companies; the Company of *Acadie*, Company of the *North*, *Levant* Company, and *St. Domingo* Company, all which have been so altered and jumbled together, that it would take up too much Time, and be little to the Pur-

pose, to give a distinct History of them: I shall therefore conclude my Dissertation on the Trade of France, with this additional Remark, that, notwithstanding its Sufferings by the late War, it seems a very growing one, and must be regarded with a jealous Eye by every Well-wisher to that of Great-Britain.

Of the Trade of SPAIN.

THE principal, and most beneficial Branches of this Commerce, have been treated of already in that carried on with us, as the Trade with the French can never be accounted so, the Balance being greatly in their Favour, even in that, less than middling, Traffick yet subsisting between the two Crowns. The chief Places of Trade in Spain, are Madrid, St. Sebastian, Bilbao, Seville, Cadiz, and in its Bay, St. Maria, Port Real, St. Lucar, and Rota, Malaga, Cartbagena, Alicant, Valencia, and Barcelona, in all which the Dutch have some Commerce, and, next to that with the English, the most advantageous one to the Spaniards. Madrid, the Capital of Spain, is situated almost in the Middle of it, and consequently lies very distant from the Sea, which however does not hinder its carrying on a considerable Trade, by Means of the Correspondence it has settled with the several Sea Ports of the Kingdom, and elsewhere, more especially at Cadiz and Cartbagena, as these are the usual Places where Goods are landed for the Metropolis; and it is here that all foreign Commodities are entered for the Court, on Account of the Difference in the Customs, which greatly vary between the several Ports of this Kingdom. At St. Sebastian's great Quantities of Wool are shipped for England, France, and Holland, as also Chestnuts and small Nuts for the latter, both from hence and Gigon, which is but a little distant. From Bilbao, the Dutch carry Wool, Iron, Saffron, Chestnuts, Oranges, and Lemons: From Seville they take Olives, Oil, Wool, Oranges, Lemons, Morocco Hides, and Wine: From Cadiz, they have Indigo, Cochineal, Tobacco de Verines, Jesuits Bark, Sarsaparilla, Venelloes, and other American Drugs and Hides, Salt, Wine, Oil, Figs, Raisins, Wool, &c. At Malaga and Cartbagena, they supply themselves with Wool, Oil, Olives, Raisins, Figs, and Wine, and from this latter with some Sofa or Barilla. Alicant affords them still greater Supplies, as from hence they have a better Sort of the last-mentioned Commodity; Red Wine, accounted by the Dutch a good Remedy for the Dysentery, Castile Soap, Anniseeds, Cummin-Seeds, Almonds, Raisins, Saffron, Oil, and Salt. Valencia, though the Capital of the Kingdom of that Name, and a most delightful fertile Country, produces nothing for the Dutch, nor indeed any other Nation, but raw or wrought Silks, of which the first is however generally all shipped at Alicant, when the Extraction is permitted, which has for some Years been denied, and Valencia grows no Almonds or Wines, as most Authors have erroneously asserted. Barcelona is the Capital of Catalonia, where some few Woollens are made, though the only Extracts from these Parts for Holland are Brandies and Nuts, chiefly shipped at Saloe. The Merchandizes which the Dutch carry to Spain are Holland, Silesia, and Osnabruck Linens, printed Cottons and Chints, Mullins, Cambricks, Brabant and Flanders Lace, Gold and Silver ditto, English and Dutch Cloth though I believe these are now prohibited, Gold, Silver, and Silken Stuffs, Gauzes, Ribbons, Fans, Wigs, Velvets plain and flowered, Caffoys, Silk and Worsted Stockings, Merceries, and Hard-ware of all Sorts, Pepper, Cloves, Mace, and Nutmegs, Wheat and other Grain, when wanted, Wood for the Building of Ships, Canvas, Cords, and Twine, Ships built on Purpose for Sale, Anascotes, Lamparillas of Bruges, and Picottes of Lijk, Tapes white and coloured, Butter, Cheese, sewing Thread, Paper, Cards, Table Linen, Russia, and other Hides, &c. The Commerce between Italy and Spain consists in several Sorts of wrought Silks from Naples, Florence, Milan, Genoa, Messina, and Legborn, Hoops, Pipe-Staves, Paper, Lincens, and Corn, on Failure of the Spanish Harvest. The Swede, and Danes bring only Iron, Copper, Pitch, Tar, and Lumber: and re-load with Wine, Brandy, Salt, &c. The Hamburgers likewise take off these Commodities, and besides, they yearly freight two or three Ships, to load almost solely with Saffron and Almonds. The Island of Majorca is very fruitful in Oil, of which great Quantities are yearly shipped for all Parts of the North, and that of Ivica is greatly frequented for its Salt,

Salt, of which one Sort is different in Colour and Grain from that made at *Almai*. The greatest and most important Part of the *Spanish* Trade is carried on at *Cadiz*, and this on Account of the Galleons and Flotas being dispatched from, and returning there. And as it is a Commerce in which the principal Nations of *Europe* are concerned, I shall give my Reader some Idea of the Method of its Transaction, and acquaint him with the Assortments of Goods proper for an Interest therein. The Galleons was a Name formerly given to large Men of War of three or four Decks; and though it has been for a long Time disused with this Significancy, it is however still retained by the *Spaniards*, and used indifferently for all the Ships which yearly sail from *Cadiz*, for *Cartagena* and *Porto-Bello*; of these, there are eight for the King's Account, which are Men of War, and from twelve to sixteen belonging to Merchants, who obtain, or rather purchase, the Permission to undertake this *American* Voyage. The Ships are all fitted out at *Cadiz*, from whence they may sail at any Time, though they commonly depart some Months before the Flota, which leave this Place always in *August*, and are about two Years before they return. The Flota consists of three Men of War for the King's Account, and an equal Number with the Galleons for the Merchants, from four hundred to a thousand Ton, which sails, as before observed, about *August*, for *la Vera Cruz*, and is generally nineteen or twenty Months in its Voyage. Besides these Distinctions in the *West-India* Convoys, there is yet another, under the Denomination of the Flotilla, or little Flota, which the *Spaniards* give to some Ships, sent before the Flota on its Return from *la Vera Cruz*, with an Account of the Time of its Departure, and what its loading consists of. When these Fleets set out together, they separate in the Latitude of the *Antilles*, and rejoin on their coming back at the *Havanna*, in the Isle of *Cuba*; the Galleons are always the richest, though the Assortments of Goods proper for the different Markets, much the same; the following therefore will indifferently serve for both.

## From ENGLAND.

Cloths in twenty Pieces, nineteen Brown and one Black.  
Sempeternas, in forty Pieces, the following Colours, *viz.*  
Fifteen Pieces of Parrot Green, fifteen Pieces of Sky Blue, five Pieces of Musk, five Pieces of Black.  
Serges, all Brown, or sorted like the Sempeternas.  
Estaminas, wide and well calendered, Brown and Green.  
Serges, fine, of a scarlet Colour.  
Says, White and Black, well calendered.  
Bombazeen, double, Brown and Greenish.  
Serges of *Hoogwet*, half White and half Black, very fine and well calendered.  
Bays of *Colchester*, the hundred Pieces assorted as follows, *viz.*  
Twenty Pieces Black, fifteen Pieces Parrot Green, fifteen Pieces Sky Blue, twelve Pieces of the best Yellow, ten Pieces Scarlet, ten Pieces Red, eight Pieces Violet, five Pieces very White, five Pieces Carachuca, a Colour which I am quite ignorant of.  
Stockings, Worsted, of the first and second Sort.  
Ditto, Silk, ordinary knit, in Packets of ten Pair, *viz.*  
Three Pair Sky Blue, two Pair Dove Colour, three Pair Parrot Green, two Pair light Yellow.

Three Pieces Flesh Colour, three Pieces Sky Blue, three Pieces Parrot Green,  
three Pieces Caracucha.

Thread Stockings.

Laces, Gold and Silver, from one to eight Fingers wide, one Third of each Sort.  
Cuts of black Laces, a Foot, or half a Yard wide.

From *Holland* and *Flanders*.

Cloth, fine, of two Aunes wide, twelve Pieces, assorted as follows, *viz.*

Two Pieces Black, two Pieces Scarlet, two Pieces of a light Nut Brown, two  
Pieces Olive, two Pieces of deep Cinnamon, and two Pieces of Musk.

Cotton printed Cloths, called Guineas, which are denominated Hollandillas in  
*Spain*; twenty-five Aunes long, and the Assortment of a hundred Pieces to be  
as follows, &c.

Thirty Pieces deep Blue, twenty Pieces pale Blue, fifteen Pieces Parrot Green,  
fifteen Pieces Orange, ten Pieces Musk, five Pieces Yellow, and five  
Pieces Flesh Colour.

Or as the subsequent;

Fifty Pieces of Blue, deep and pale, ten Pieces of a pale Flesh Colour, ten  
Pieces of Parrot Green, ten Pieces of Orange, ten Pieces of Musk, ten  
Pieces Yellow.

Some Pieces of Goods made of Goats Hair, wide and narrow very fine, of Musk  
and black Colours.

Nanpareils, Palmitres, Serges of *Leige* of a deep Scarlet; ditto, corded, of *Holland*  
of lively Colours; Dimities, Browns and Greens.

Says, fine, half Black and half of a very good White.

Tapes, White, made of *Erverwelt* Thread, of twenty-eight Threads, the two  
Thirds.

Ditto, Flesh Colour, of eighteen Threads, the other one Third.

Castor Hats, fine, two Thirds White and one Third Black.

Pepper and Cinnamon, when they are cheap; as the Charges run high on them.

Cloves and Mace, in a small Quantity, as the Consumption is not great.

*Russia* Hides; Musk in the Cods and out of them.

Wax, White, in Cakes of five Roves: Knives, with Ivory Handles.

Stuffs of *Leyden*, of a fine Black, two and three threaded Velvets.

Plush Velvet.

Silk Brocades of plain Colours, among which must be neither Red nor Flesh  
Colour.

Barragons of *Lisle*, and double ones of *Valenciennes*.

Picote Woollen, of modest Colours and Browns.

Ditto, Silk, Lamparilles and Anafotes.

Serges, fine, of *Germany*, all of brown Colours.

Cambricks, of the finest and clearest Sorts.

Hollands, very fine; and Laces of all Sorts, especially fine.

Lace, called *Cortes*, of the Price of eight or sixteen Rials of Plate the Yard; the  
Assortments of the *Cortes* of *Anvers* are made for a hundred, as follows, *viz.*

Twenty Sorts of Tranfillas, in two Assortments, *viz.*

Ten of the same Pattern, from two to four Inches wide.

Forty Aluxeriados, with small Holes in;  
twenty-five from two to four Inches Width,  
fifteen from two to five Inches Width,

Twenty Puntas de Mosquito, the half from three to eight or ten Inches  
wide, and the other Half from four to eight or ten Inches wide, but each  
Sort to be of the same Pattern.

Ten Licenciados, very fine, of one or two Inches wide, and some from three  
to four Inches wide, for Women's Head Dresses.

Tranfillas and Aluxeriados, of the finest, from one to two Inches wide.

Damask Napkins and Table-Cloths

Some Plaitilles, Estopilles, and Bocadilles.

## From ITALY.

Lames of Silk of *Naples*, the ten Pieces assorted as follows, *viz.*

Two Pieces Flesh Colour, three Pieces Parrot Green, two Pieces Sky Blue, and two Pieces Dove Colour.

Silk Stockings of *Milan* with long Clocks, each Dozen separate, with the following Colours.

Three Pair Dove Colour, three Pair Parrot Green, three Pair Sky Blue, three Pair light Yellow.

Ditto, for Women, of the same Colours.

Ditto, of *Messina* and *Genoa*, about half the Quantity as from *Milan*.

Ditto, for Children, of the same Colours.

Guirvions, or Corcondilles of *Naples*, *Messina*, and *Genoa*, of Brown Colours.

Silk Estaminas and Gorgeranes, of the same Colours.

Plain Silks of *Florence* of a low Price, the ten Pieces assorted thus ;

Three Pieces Parrot Green, three Pieces Dove Colour, one Piece Sky blue, one Piece light Yellow, one Piece of a fine white, one Piece of an Amber Colour.

Flowered Silks of a middling Price, with lively Colours, and some Brown.

Gold and Silver Silks, from twenty to twenty-four Rials of Plate the Yard.

Lamas, of lively Colours, all with Silver, and none with Gold.

*Calabria* Silk, a hundred Skeins, sorted as follows ;

Fifty Skeins Brown ; ten Black, Pearl and White ; ten Parrot Green ; ten Dove Colour ; ten deep and Sky blue ; five deep Green ; five deep Yellow.

Since the above Calculation was made, the *Spaniards* have improved greatly in their Manufactures; and now, at least in a great Part, supply several of the preceding Commodities from their own Looms; of which Don *Geronimo de Uztariz* says, in his Theory and Practice of Commerce, there were formerly no less than sixteen Thousand in *Seville*, though they now are reduced to about three hundred; which Decrease, though a seeming Contradiction to what I have asserted of the *Spanish* Improvements, is, however, not so in fact; as the Decay of Trade in one Place has been more than equivalently augmented in another; thus the City of *Valencia*, *Alicant*, *Alecy*, &c. have gone on for some Years past increasing both in their Silk and Woollen Manufactures, insomuch, that it is now computed there are in this kingdom only two thousand Looms; in *Catalonia* above five hundred; and in the Kingdom of *Granada* a thousand: And as there are also several of both Sorts in other Provinces, we may reasonably conclude, there are not at present so few as ten thousand in all *Spain*, which one would imagine should be sufficient to clothe both Rich and Poor, as the Inhabitants of *Spain* are not supposed to exceed seven Millions and a half; however we find the contrary, and though the Imports to that Kingdom are greatly diminished within a few years past, yet they still continue very considerable, more especially to furnish out the Assortments proper for the *American* Settlements: Wool and Silk are the natural Products of this Country, so that the Natives have a constant Supply of Materials for their Manufactures within themselves, and the Crown has prudently prohibited the Extraction of the latter, in order to encourage them, as I doubt not it would the former, did not the Sheep produce more than sufficient for the Subjects' Use. A Patent for the making of Crystal Glass was granted on the 30th of *January*, 1720, to Don *John Goyeneche*, which still continues; and the same Gentleman undertook the cutting down, and conveying from the *Pyrenees*, Mafts, and Timber for Shipping, which he still performs, by having established three Works, in the highest and most craggy Parts of those Mountains; one of them in the Kingdom of *Aragon*, upon the Mountains of *Espuna*; another in the same Kingdom, in the Valley of *Hecho*, and upon the Mountains of *Oza*; and the third in the Kingdom of *Navarre*, in the Vale of *Roncal*, and upon the Mountains of *Maze*, *Zurizabitti*, and *Yzeizpeta*, all being brought by Land and Water Carriage into the River *Elbro*, for his Catholic Majesty's Navy. It is also owing to the Industry of this great and useful Man, that many Fabricks of Pitch and Tar are established in many Parts of the Kingdom of *Aragon* and *Catalonia*, more especially in the Mountains of *Tortosa*, where the great Plenty of Pines affords

affords sufficient Matter for a very large Increase of these necessary Commodities ; and indeed most of the Mountains in *Spain* are covered with these Trees, and the Extraction of these Resins so easy, that it is a Matter of Surprise any Importation of it is permitted from other Parts ; yet I believe much more is brought in than made here, notwithstanding what Don *Geronimo de Uztariz*, before quoted, asserts, that the Manufacture of all Kinds of Rigging in *Port-Royal* is with Hemp and Tar of the *Spanish Growth*. At *Sada* in the Kingdom of *Gallicia*, Cables, Cordage, and Sail Cloth are made, as this latter was, some Years ago, by that good Subject and consummate Statesman the Prince of *Campo Florido*, then Viceroy of *Valencia*. The aforesaid Don *John de Goyeneche* established with his Glas Fabrick twenty-six Looms for Cloths, which manufactured fifty thousand Yards yearly for clothing the Troops ; besides others for Soldiers' Hats, Buff, and Shamois Leather, Looms for weaving Silk Handkerchiefs, Ribbons, and Girdles ; a Distillery for Brandy and *Hungary Water*. In *Madrid* has been set up a Manufacture of Tissues, Lust-rings, and other Silks, in Imitation of those made at *Lyons* in *France*, and from whence most of the Artificers have been drawn ; without the Gates of that Metropolis has likewise been raised a Fabrick of fine Tapestry, similar to those of *Flanders*, under the Direction of Masters and Workmen from that Country. The Fabricks of fine Cloths at *Guadalaxara*, *Valdemero*, *Alcoy*, &c. are very considerable, and are undoubtedly greatly improved both in Quantity and Quality within a few Years past ; yet our above-mentioned Author must excuse my dissenting from his Determination in Favour of the latter, when he asserts they are as fine as the *English* ; for I cannot allow them to be equal to the *French*, much less to what is undoubtedly their Superiors ; and I speak this with due Deference to Don *Geronimo's* Judgment, which I revere in other Particulars, though in this it seems something biassed and prejudiced in Favour of his Country.

The *Spaniards* are well known to have excellent Iron, and may whenever they please cast very good Cannon, Ball, &c. at their Founderies of *Lierganes* and *Covada*, which are but at a small Distance from the Dock Yards of *Guarnito* and *Santona*. From the Fabricks of *Eugui*, *Azura*, and *Iturbieta*, a Supply of Bombs, Grenadoes, Ball, and Grape Shot, may be drawn, and Gunpowder is made, all glazed, in several Parts of the Kingdom. In the Forges of *Placentia* in *Guipuscoa*, only three Leagues distant from the Sea, is manufactured a considerable Number of good Fire-Arms, so that they may easily be conveyed by Water to any of the Yards, as Nails, Anchors, and other Iron Works, proper for Marine Uses, may be, their Forges enjoying the same advantageous Situation ; Hemp grows plentifully in several Parts of *Spain*, and might easily be increased, if the Natives set about its Cultivation, particularly in the Plains of *Granada*, *Murcia*, and *Valencia*, where I have seen five Crops of it, and its Price so reasonable, that my above-mentioned Author says, a Proposal was made to furnish the King with 25,000 Quintals, at four Dollars per Quintal, clear of all Charges.

I shall now say something concerning the Companies established in *Spain*, and with this close up my Account of the Trade of that Kingdom.

#### *The Royal Company of the Philippines.*

THE first Association in this Country was that now mentioned, whose Charter was dated at *Seville* the 29th of *March*, 1733, with the following Articles.

This Company was established to carry on a Trade directly to the *Philippines*, and had a Privilege, Art. I. To sail to the said Isles, and to trade there, and in the *East-Indies*, and on the Coasts of *Africa*, both on this, and on the other Side of the *Cape of Good-Hope*, and in all the Ports where other Nations have a free Trade. Art. II. and III. This Privilege is exclusive, and all former Permissions given are hereby revoked. Art. IV. This Company may hoist the King's Arms in all their Colours, have a Seal, bearing the Arms of *Cadix*, to use in all their Affairs. Art. V. The Ships of this Company shall pay no Duties, being considered on the Footing of the Royal Navy ; and the Charity for the Seminary of *St. Elme*, and the Admission of Youth for the Study of Navigation, shall be at the Choice of the Directors.

Art.

Art. VI. As also the Nomination of the Masters, Carpenters, and Caulkers; on Condition, however, that they be with the King's Approbation. Art. VII. If the King sells or freights any Ships to the Company, they shall be such as it requires; and the Price of the Sale or Hire shall be agreed between the Intendant and Comptroller of the Marine at *Cadix* on the one Part, and the Directors of the Company on the other. Art. VIII. IX. X. XI. and XII. They may build Ships in any Part of the King's Dominions, or out of them; and if they buy them abroad, they may bring them to *Cadix*, without paying Duties, except on those they re-sell; and all the Cordage, Sails, &c. shall enjoy the same Exemption, as those used immediately for the King's Service; and in Case they want any Thing from the Royal Arsenals, it shall be delivered them for its just Value. The Company may settle Magazines wherever they please, which shall enjoy the same Privileges as the King's, and be visited in like Manner with these, on Suspicion of any Fraud. The Directors may nominate their Officers from among any Foreigners, provided that the Captain and half the Crew are *Spaniards*. Art. XIII. XIV. XV. and XVI. And the Company may also name Strangers, for their Factors, who, as well as the Officers, shall be subject to Punishment if they do not actually follow the Directors' Orders. The King will grant the Company some Troops, if necessary; and if the Ships of the said Company, which are prohibited going to *America*, are forced on that Coast, they shall be regarded as Men of War, and provided, at a reasonable Price, with all they want; and in Case they have not sufficient Cash to discharge the Expence, they shall be supplied with it from the Royal Coffers, and the Company shall reimburse the King at *Cadix*. Art. XVII. XVIII. XIX. and XX. The Company may freely embark any Merchandize and Products, either of *Spain* or other Countries, to sell or truck; and they may also load 500,000 Dollars, more or less, on each Ship, to employ in the Purchase of Goods; and in Case any Silver remains, they may truck it for Gold, and on the Extraction of the said Silver they shall pay no Custom, &c. The remaining Articles, to the Number of fifty-two, are concerning their Cargoes, Customs, &c.

*Concerning the Guipuscoa Company.*

**T**HE Province of *Guipuscoa*, seeing their Countrymen despoiled of the *Caracca* Trade by Foreigners, offered his Catholick Majesty, to equip for his and the Nation's Service, some Men of War, and to send them to the *Caraccas*, to facilitate the Means of preventing the said Detriment, and secure the future Advantages of that Trade to themselves; his Majesty admitted the Offers, and granted the said Province an exclusive Charter for that Trade, on the following Conditions.

1. That the Province should erect a Company, and send yearly to the *Caraccas* two Ships of forty or fifty Guns, laden with the Products of *Spain*, which shall proceed to the Port of *Guayca*, and being unladed, shall go out and cruize on the Coast, and take all Ships and Vessels they shall find carrying on an illicit Commerce, and may extend their Cruize from the River *Oronoko* to the River *de la Hacha*, for which Purpose they shall be furnished with a Commission from his Majesty.

2. That the two Ships shall be loaded at *St. Sebastian*, or at *Passage*, and instead of the Royal Duties which they should pay at *Cadix*, they shall render to his Majesty an equivalent Service, and sail directly from *Guipuscoa* for the *Caraccas*.

3. That on returning with their Cargo of Cocoa, Silver, Gold, Tobacco, Sarsaparilla, Hides, and other Products of those Parts, they shall proceed to *Cadix*; and after having been visited, and the Royal Duties paid, they may transport to *Cantabria* such Part of their Lading as they shall think proper, without suffering the considerable Expence of delivering and re-shipping their Goods.

4. That the Prizes which they shall make in *America*, shall be divided one-third to the Crew, and two-thirds to the Company.

5. That the Merchandize taken may be sold at the *Caraccas*, on paying the King's Customs. The Ships taken, with their Ladings of Cocoa, and other Goods,

6. That the Company's Factors, having any Quantity of Cocoa remaining, may send it to *La Vera Cruz*, in the Barks appointed for the Trade permitted to the Inhabitants of the *Caraccas*.

7. That the Factors shall be obliged to supply with Goods, besides the Province of *Venezuela*, those of *Cumana*, *Margarita*, and *la Trinidad*.

8. That the Governor of the *Caraccas* shall be nominated Judge Conservador of the Company and their Dependencies, with a Prohibition to all Tribunals and Ministers to intermeddle, with a Right of Appeal to the Council of the *Indies*.

9. That the said Ships shall be exempt from paying Strangers' Duties, &c.

10. That his Majesty will maintain the said Company under his Royal Protection, and make those concerned in it to enjoy all the Rights and Honours that appertain to those of his Royal Navy; and the Share which any one shall take in this Commerce shall not prejudice his Honour, Estate, or Reputation, neither directly or indirectly; but on the contrary, this shall be a new Lustre added to his Gentility, his Services, his Character, &c.

The said Company formed Bye-Laws, for their better Government, to the Number of twenty-four, which I excuse adding as superfluous here; and for the same Reason shall omit mentioning the Steps taken by the *Dutch*, by their Ministers at *Madrid* and *Paris*, to obtain a Revocation from his Catholic Majesty of the said Company's Patent.

#### Commerce of PORTUGAL.

THERE is hardly a State in *Europe*, with the Title of a Kingdom, and whose King has no additional Territories, that is of less Extent than that of *Portugal*; and yet no one has pushed Trade farther, or has maintained it with a superior Reputation. Its great Conquests in both *Indies*, its Establishments in many places on the Coast of *Africa*, and the Possession of the *Azores*, *Madeira*, and *Cape de Verd* Islands, for a long Time supported the said Commerce, which it might probably have yet preserved, had the Union between this Kingdom and *Spain* never happened.

This Union so fatal to the *Portuguese* Trade, was agreed on in 1580, after the Death of Cardinal *Henry*, Successor to the unfortunate *Sebastian*, who was killed at the Battle of *Alcacer* in *Barbary*, the 4th of *August*, 1578; and thereby becoming Subject to the *Spanish* Monarchy, it found a very formidable Enemy in the *Dutch*, who were combating for Liberty, almost at the same Time that the others began to suffer the Yoke which they were shaking off.

*Brazil* was soon lost, and their new Enemies became Masters of a Part in their *East-India* Conquests; and being likewise bereaved of a Share of their Colonies on the *Guinea* Coast, they had barely Power left to support the remaining Part of their *African* Trade, which had formerly being equally glorious and profitable to them. It is true that after a constrained Union, or rather Servitude of sixty Years, *Portugal* recovered its primitive Power or Liberty, and all the States, which it had remaining in the other three Parts of the Globe, were unanimous with it, in electing *John Duke of Braganza* for their King, who was accordingly proclaimed on the 1st of *December*, 1640.

But the fatal Blow to the *Portuguese* Commerce was struck; for although they afterwards re-possessed *Brazil*, and their Forts and Establishments on the *African* Coast were restored to them, those of the *East-Indies* were never again settled; inasmuch, that the Trade since carried on at *Lisbon*, is nothing in Comparison with what it formerly drove, when the Riches of *Persia*, *Arabia*, the States of the *Mogul*, the Coasts of *India*, *China*, *Japan*, and all the Isles of that vast Part of the Ocean beyond the Line, came to be united at *Goa*, the Capital of their *East-India* Conquests, and were by numerous Fleets brought to *Lisbon*, for their Distribution to all the Nations of *Europe*, by the Hands only of these their sole Importers.

The present Trade of *Portugal* is principally carried on by Foreigners; and the chief Places for it are *Lisbon*, *Porto Porti*, *Ulla de Conda*, *St. Ubes*, and *Faro* in *Europe*; though in the Commerce of their *American* and other Settlements, none but the Subjects can openly be concerned. Of that with the *English* I have already spoke, and shall now mention what Branch the other Nations are engaged in. The *Dutch* send to *Lisbon*, all Sorts of Linen, Woollen, and Silk Manufactures; such as printed Cottons, and Chints, Muslins, and Cambricks, *Holland*, *Osnabruck*, and *Silesia* Linens, Black Silk and others, *Delft* Serges, Men and Women's Clothes ready made, Wigs, Hats, and Gloves, Silk and Worsted Stockings, *Russia* Hides, Copper Pans and Kettles, Steel, Mercery, and Hardwares, Powder, Cannon Balls, Hemp, and Flax, Corn, Paper, and Cards, besides which, most of the Merchandizes sent from *Holland* to *Cadiz* are proper for *Lisbon* or the *Brazils*.

And in Return they take from the *Portuguese*, *Brazil* Sugar, Tobacco, and Snuffs; *Fernambuc*, *Campeche*, and *Brazil* Wood, Hides, Cotton, Ginger, divers Drugs, Sweetmeats, Indigo, Cochineal, Sumack, Anniseeds, Wool, Oil, and Olives, Figs, Raisins and Almonds, Oranges and Lemons, Pearls, Diamonds, and other precious Stones, Gold and Silver Ingots and Coin.

The *French* Trade with *Portugal* is but small, as his most Christian Majesty brought it to this low Ebb, by prohibiting the Importation to his Dominions of *Portuguese* Sugars and Tobacco; there is, however, a Sale of some of the *French* Brocades, Perukes, &c. though to no great Value.

The Commerce with *Italy* furnishes them with Paper, and some Linens from *Genoa*; Glass Works from *Venice*; and Silk from these and most other Parts of this Country; who carry back with them Sugar, Hides, Tobacco, &c.

From the northern Powers are brought here Hemp, Flax, Tar, Pitch, Iron, and all other naval Stores for the King's Yards and otherwise; besides Copper, some Linen, &c. and the Ships bringing these Commodities, of which the *Svedes* are always most, relade with Wine, Brandy, Oil, Salt, Oranges, Lemons, Cork, Sumack, and some few other Commodities.

The *American* Trade employs a great Number of Ships; as there sail annually from *Lisbon* and *Oporto* twenty to twenty-two Merchant-Vessels for *Rio Janeiro*; thirty for the *Bay of All Saints*; as many for *Pernambuc*, and seven or eight for *Paraiba*; those for the two first Places, of five hundred Tons Burthen; but for the latter, not above half as big.

All the Ships destined for the same Part sail together, and observe the same Method in their Return; those of *Oporto* joining those of *Lisbon*. The *Paraiba* and *Pernambuc* Fleets depart all in Company, and come back in like Manner: And the King grants five Men of War yearly to convoy these Fleets, viz. two for *Rio Janeiro*, two for *All Saints Bay*, and one for *Pernambuc*; sending some Vessels to meet them on their Return in the Latitude of the *Azores*. The Departure of all these Ships for *Brazil* is commonly in *March*, and their Return in *September* or *October*; and formerly it was permitted to carry Silver with them for Trade; but now this is prohibited, and their Cargoes restrained to be Goods, of which the following ones are the Chief, viz. Flour, Wine, Brandy, Oil, ordinary Worsted Stuffs, Linen and Thread of the Country; Silk Stockings, Hats, Baife, Serges, and other Woolens from *England* and *Holland*; whitened Linen called *Panicos*, and raw ditto named *Aniages* and *Groga*; Copper Plates, and other Requisites for the Sugar Engines and Mills from *Hamburg*; some Linens from *Bretagne*; a few Druggets, Serges, and clouded Brocades of all Sorts of Colours from *France*; and Tabbies, Taffeties, sewing Silk, Paper, &c. from *Italy*. The *English* Goods, however, make up the best Half, and generally find the best Dispatch. From the *Bay of All Saints* the Ships come laden with Tobacco, Sugar, Sugar-Candy, Indigo, Whale Oil and Fins, which come ashore here in great Quantities from *June* to *September*, Cotton, Oil, and Balsam of *Capaiva*, *Ipecacuanha*, *Pareira*, *Brava*, or the wild Vine, affirmed by Mr. *Savary* in his Dictionary, to come from hence, though denied by Dr. *James*, in his Dispensary, to be a Native of this Country, as he says that it is of the *East-India* Growth; both allow it to be a good Diuretic; and the former reports that the *Portuguese* regard it as a Specific for the stone and Gravel, which induced me to mention it here, some Cinnamon, long Pepper, Ginger, Elephants' Teeth, from the Coast of *Africk*, Copper from *Angola*, Hides, Silk, dyeing and

sweet scented Woods, Saffron, Rocou, Laque, Rock Crystal, Cocoa, Ambergris, that the Sea sometimes throws ashore, Amethists, of which here is a Mine, Gold, found in the Gravel of a River near a Place called *St. Paul*, of which the King's Fifth may nearly amount to eight or nine hundred Marks, and all Sorts of Sweetmeats wet and dry.

The Ships that touch here from *Goa*, in their Way to *Europe*, furnish the Inhabitants of *Brazil* with Spice, Drugs, and other *Eastern* Merchandize; and by those from *Angola* and *Congo* they receive their Negroes, at least fifteen thousand yearly, Ivory, Wax, Honey, Civet, Gold, and all other Commodities that those Parts produce; but these Goods, the Slaves excepted, are mostly sent to *Portugal* in the *Lisbon* Fleet.

*Pernambuc* produces only Sugar, and *Brazil* or *Fernambuc* Wood, being steril in the Necessaries of Life; and the Inhabitants, who are more numerous than in any other part of the *Brazils*, would hardly be able to subsist without the foreign Supplies the Ships bring them; on the contrary, *Rio Janeiro* is extremely fertile in sugar, Indigo, and Cotton, as it would be in Tobacco, was the Growth of more than what suffices for the Inhabitants' Use not prohibited; it likewise brings Wheat to Perfection, and has *Brazil* Wood, Hides, and Fish Oil in Plenty.

It is particularly with the *Portuguese* of this Part that the *Spaniards* of *Buenos Ayres* carry on their Trade; these furnishing them with Flour, Biscuit, Salt, or dried Meat: and the *Portuguese* giving in Exchange Sugar, Tobacco, Indigo, Wine, Brandy, Rum, and several other Merchandizes that they receive from *Europe*.

The principal Company which the *Portuguese* have is that Trading to the Coast of *Africa*, of which I shall give some Account, and with it conclude my Treatise on this Nation.

#### *The Portuguese African Company.*

THE true Object of this Company's Trade is the furnishing *Brazil* with Negroes; and their Patent bears Date from the Beginning of the Year 1724, under the following Articles:

1. The new Company engages to build a Fortrefs at their own Expence at the Mouth of the River *Angre*, over-against the Isle of *Corisco*, which belongs to the King of *Benin*, near the Coast of *Gabon*, otherwise called *Pongo*, in 1°. 30'. South Latitude.

2. That they shall furnish as many Negroes as the *Portuguese* Plantations in *America* shall have Occasion for.

3. That it shall not be permitted either to *Portuguese* or foreign Ships to traffick on the said Coast, on Penalty of forfeiting Ship and Cargo.

4. Nevertheless if any Ships are forced thither, either by Storm or some other Necessity, the Company's Factors may permit them to water, and likewise sell them the Provisions they may stand in Need of, without permitting them, however to transact any Business.

5. That this Concession shall last for fifteen Years, after which it shall be lawful for his *Portuguese* Majesty to prolong the Term, or to re-enter into Possession of the Country granted.

6. In this last Case, his Majesty may take Possession of the Forts, Artillery, Ships, and other Effects of the Company, on paying ready Money for them, according to the Valuation.

Some Time after this Grant was made publick, the new Company fixed up at *Lisbon* Billets, declaring the Conditions under which an Interest might be had therein, the Funds it would consist of, and the Price of the Actions. These Conditions were couched in twelve Articles, of which the principal ones are.

That the Fund shall only be one Million of *Crufades*.

That the Actions should be worth a thousand *Crufades* each, of which the Proprietors shall pay three hundred *Crufades* at subscribing, the same Sum in the Month of *December*, 1724; and the remaining four hundred *Crufades* whenever the Company thinks proper, after six Months' Notice.

That those Proprietors, who shall not comply with the Payments at the Time prescribed, shall forfeit what they have already advanced.

That

That the Company shall pay the Proprietors, a Year after the first Undertaking, a Dividend of five *per Cent.* on the Capital Sum they shall have paid in, and this taken from the Profits which the Company shall make by their Trade.

In fine, that the Chief or general Commander, who has undertaken to form this Company, shall have fourteen *per Cent.* upon the Profits that it shall make, on which he undertakes to pay the Factors, and other Persons, that he shall deem necessary to be employed, on the Coasts of *Africk*, at *Lisbon*, *Brazil*, or elsewhere.

*Portugal* has lately erected two Companies to manage the *Brazil* Trade, namely those of *Grand Para*, and *Pernambuc*; which Measure has subjected our *Portuguese* Trade to many Restraints, and been the Subject of several Memorials from our Consul and Merchants at *Lisbon*, to the *British* Minister at that Court, on the Foundation of the Treaties subsisting between us; but hitherto, as far as appears, without Effect.

#### OF THE TRADE OF ITALY.

*And first of that of Venice.*

THE Commerce of this Republick is hardly to be imagined, though there is no Comparison between the present and former State of it, when it was from hence that all the other *European* Countries were furnished with the Products of all the *East*; however, it is yet so considerable, as to stand the first, and I think by far, among the trading States of that Part of the Globe.

The Quantities of Gold and Silver Tissues, and other Silks made here, are prodigious, and are sold in all Parts of *Europe*, where these Sorts of Commodities find a Dispatch; but the Consumption is more particularly great in all the *Levant*, where it spreads daily more and more; and it is asserted for a Truth, that the *Turks* take off larger Quantities than all *Europe* put together; besides which, the State produces Rice, Currants, Looking-Glasses and other Crystal Works, Beads, Laces, Gloves, Snuff-Boxes, Silk, Coral, Tartar, and Cream of Tartar, Oil, Olives, Drugs, fine Lacque, Orpiment, Annis and Coriander Seeds, Brimstone, fine Steel, Turpentine, and Soap: They likewise make some Cloth here, which was formerly greatly valued for its Beauty, though its Quality is not a little inferior to the *English*, *French*, and *Dutch*. The *Armenians* established at *Venice*, and those who annually arrive there, contribute greatly to the Support of its Trade, in which the *English* and *Dutch* Ships also find a Convenience, as these are generally the Carriers of the said Merchants' Goods from the *Levant*. I have already briefly mentioned the Particulars of its Trade with us, in which thirty or thirty-five Ships are annually employed in carrying there Lead, Tin, Pepper, Sugar, Ginger, Dying Woods, Hides, Woollen Goods, Herring, Salmon, Pilchards, Stock-Fish, &c. which Ships return laden with Currants, Hemp, Brimstone, Beads, Drugs, Oil, sometimes Rice, &c.

From *Hamburgh*, *Holland*, *Norway*, and the *Baltick*, ten or fifteen Ships arrive yearly with Dying Woods, Pepper, Cinnamon, Cloves, Mace, *Russia* Hides, Brass, Iron, Pitch, Tar, Stock-Fish, &c. And these Ships reload with the same Goods as is before-mentioned for *England*, with the Difference that to these Places are carried more Silks.

Formerly there came annually from *Lisbon* to *Venice* near three thousand Chests of Sugar, in Return for the Cargoes of Corn sent there from *Ancona*, *Sicily*, and the *Levant*; as also Rice, *Turkey* Wheat, Steel, Looking, Drinking, Window Glass, &c. But, as for some Years past, the same Quantity of Sugars has been introduced from *France*, the Trade from *Portugal* has in Proportion gone on decreasing, as this has augmented.

From *Cadix* and other Ports of *Spain*, *Venice* gets Indigo, Cochineal, Wool, Barilla, &c. for the Produce of the same Effects as were sent to *Lisbon*.

To *Genoa* and *Leghorn* are sent many Cargoes of Corn, which the *Venetian* Vessels, commonly load in the *Archipelago*, and some Window Glass, &c. sometimes repaid in Goods, but oftener by Remittances.

There are sent to the Kingdoms of *Naples* and *Sicily*, large Parcels of ordinary Cloth, Steel, Iron, Writing Paper, Looking, Drinking, Window Glass, &c. and received from thence, Oil of Almonds, Sofa, Pistachoes, Silk, Pitch, Lemons, and Lemon Juice.

But however t  
current will be re

In fine, the Trade which *Venice* carries on with the *Morea* in the Gulfs of *Le-panto* and *Athens* ought not to be forgotten; as it is from these Places, that a great deal of Wool, Silk, Wax, Galls, Valonea, Oil, Cotton, Grain, Honey, Tar, &c. are extracted, besides a prodigious Quantity of Cheese; for which the *Venetians* generally pay in Money, except some Loadings of Fir and Larch Planks, with a few Nails and old Iron, which, however, employ several Ships continually.

This is the principal Commerce that *Venice* carries on by Sea; that which she transacts on *Terra-firma* is also very considerable; for, besides what it has with a great part of *Germany*, it furnishes all the Wants, either from the East or West, of the States of *Parma*, and *Placentia*, *Modena*, *Bologna*, *Ferrara*, *Mantua*, *Milan*, and all *Lombardy*; and even of *Piedmont*, by Means of the Rivers, which facilitate its providing all these Places on easier Terms than by *Genoa*, *Leghorn*, or *Ancona*; besides this, it also sends all Sorts of Goods into its own and the *Ecclesiastical State*; more particularly a great Quantity of Wax, which is wrought, and finely blanched at *Venice*; here are likewise Sugar Refineries, with which is carried on a good Trade, as there is with Soap, Glass, &c. And the sole Privilege to sell Tobacco, imported from *Salonica* and *Albania*, in the *Venetian Territories*, actually produced in the Year 1741, the Sum of 736,000 effective Ducats, which make 950,000 Current, for the Term of five Years.

And to preserve the considerable Trade carried on with *Germany* and *Turkey*, which in Value surpasses all others, the Republick has granted large Privileges to the Merchants of both Nations, established in this Capital, and has assigned vast Edifices to the one and the other, as well for their Habitation, as a Deposit for their Merchandize; that of the *Turks*, called the *Palace of Turkey*, and that of the *Germans*, *Il Fondaco de Tedeschi*.

If any Dispute happens between the *Turks* and the Republick's Subjects, in which the former think themselves offended, they demand Satisfaction in so haughty a Manner, and receive it so promptly, that it seems as if there was a Fear to Refuse it them.

In Regard of the Traffick with the *Germans* in *Stiria*, it is partly by Sea and partly by Land in Waggon; and with this I conclude the Trade of *Venice*; though before I close the Section, I shall add the following Method of calculating the *Venetian Money*, as I was not so explicit about it when I treated of its Bank.

*Concerning the Agios at Venice, and the Difference between Bank and current Money.*

**T**H E R E are two Agios, the one constant and fixed of 20 per Cent. called the Bank Agio; the other fluctuating like that of *Amsterdam*, and is from 120 to 128, which is called the *Sopragio*, because it is calculated on the Bank Money, after the first Agio is added.

*As for Example,*

Ducats 2000 Banco at the Sopragio of 128  
 $\frac{1}{4}$  400 Bank Agio of 20 per Cent.

2400	}	Sopragio of 128.
20 480		
4 96		
4 96		

Ducats 3072 Current.

128 100 3072 to 2400, from which deducting  $\frac{1}{4}$  for the Bank Agio of 120  
 $\frac{1}{4}$  400

Ducats 2000 Banco.

But however the Sopragio vary, be it 128 more or less, such Sum of Ducats current will be reduced to Ducats 83 $\frac{1}{4}$  Banco.

9 E

From

From hence it appears that by making  $82\frac{1}{2}$ , the middle Term, or by multiplying the Current Ducats by  $83\frac{1}{2}$ , and dividing by the Sopragio, the Amount in Bank will be given.

128	$83\frac{1}{2}$	3072	Ducats 2000 Banco.

The Bank of *Venice* is shut on all Holidays, and every *Friday* of the Week in which there is no Holiday; besides which there are four Times of the Year in which it is shut, for several Days together, agreeable to the Order of the Senate 29 Feb. 1737, and not as I by Mistake mentioned in treating of the said Bank, viz.

The first shutting of the Bank to begin the *Saturday* before *Palm-Sunday*, and open the first *Monday* after *Easter Week*.

The second—on the 23d *June*, and open the second *Monday* of *July*.

The third—on the 23d *Sept.* and open the second *Monday* of *October*.

The fourth—on the 23d *Dec.* and open the second *Monday* of *January*,

#### Of the Trade of Genoa.

**T**HIS Republick for a long Time disputed with that of *Venice* the Empire of the *Mediterranean Sea*, and the Trade to the *Levant*; but after the celebrated Victory of *Chiozza*, as mentioned in the Historical Introduction, they ceased to rival the *Venetians*, after they had done so for near three hundred Years; it is, however, certain, that they now only yield the Superiority in the *Levant Trade* to their ancient Competitors, as their's is supposed to be considerably greater to the Rest of *Europe*, and more especially to *Spain*; and it is besides by *Genoa*, that Foreigners carry on all their Trade with *Lombardy*.

Raw Silks, and in Skains, which the *Genoese* get from *Messina*, and other Ports of *Sicily*, and the fine rich Silk they make in their Capital, occasion a considerable Trade, and they see an annual arrival, however, of Ships, hardly credible, all of which take some of their Manufactures: It is true, that for some Time past, the Business of their City has not been so brisk as usual; but as it is to be hoped they will find some Means to re-establish it, I shall describe it as it has been, with my best Wishes that, *Phoenix* like, it may rise out of its own Ashes.

The Fabricks here are plain and flowered Velvets, and some with Gold and Silver Grounds; Damasks, Sattins, Tabbies, Gold and Silver Tissues, and many other Sorts of Silks, both plain and flowered; here are likewise Oil, Olives, dry Sweet-meats, Silk Stockings, Gloves, Breeches, and Waistcoats, Ribbons, Gallons, Paper, Soap, Rice, Oil, Olives, Figs, Almonds, Anchovies, Marble, Lemons, scented Oil, and Perfumes, Tartar, *Parmesan Cheese*, red Coral, Coffee, Cotton, and all Dying and Medicinal Drugs, that come from the *Levant*.

At present the *Genoese Trade* to *Smyrna* is but trifling; however they always keep a Consul there.

In the flourishing *Æra* of this Republick, it was Mistress of several Isles in the *Archipelago* and possessed many Cities and Towns on the Coast of *Greece*; and the *Black Sea*; *Pera*, one of the Suburbs of *Constantinople*, was once under their Dominion, which facilitated the carrying on a great Trade in the *Levant*.

The Decline of their Power, and the Loss of so many States, occasioned the Ruin of their Commerce in the Dominions of the *Grand Signor*, where their Merchant Ships are now rarely seen.

When foreign Ships arrive at *Genoa*, which is one of the finest Ports in *Italy*, they deposit their Goods in a great Warehouse called *Porto Franco*, because the Merchandizes brought in to be sold, as well as that to be exported, pay no Duties at coming in, or going out; the Merchants only paying at the Custom-House in Proportion to the Sales they make, and it is permitted them to re embark whatever remains unfold, without any Imposition.

In 1741 an Insurance Company was formed at *Genoa*, which has contributed to the Revival of the Commerce of the Republic; the Plan of this Company was inserted in the former Editions of our Work, but upon a careful Review of the Articles, and comparing them with the Systems of other Companies of a similar Nature in *England*, *France*, and *Holland*, it was found that they contained no Information whatever that could possibly be of service to the Merchant, or the Statesman of the present Times, for which Reason they are omitted.

The *Genoese* have a *Levant* Company still subsisting, which was established in 1645, though it has for some Years past done so little Business, that it is hardly remembered to be an Association, its Transactions are so trifling in a corporate Capacity. They likewise had a Company established formerly under the Title of *The Company of the Grills*, which supplied the Spaniards in *America* for a long Time with Negroes, but on their agreeing with the *Assiento* Company, this of the *Genoese* was overlet.

I must here introduce some Account of the Island of *Corfica*, as Part of the *Genoese* Dominions, and I am the more tempted to do it, as the Natives have rendered themselves so famous in their Struggles for Liberty, and done so much towards making themselves a free People. All their noble Efforts for Independence have been however rendered abortive; for *Genoa*, unable to subdue the resolute Inhabitants of this small Island herself, concluded a Treaty at *Verfailles*, in 1768, whereby that Republic formally ceded *Corfica* to the *French* King, for an indeterminate Time. In Consequence of this Measure, a considerable Body of *French* Forces being sent to take Possession of it, their Numbers soon effected this glorious Conquest over a handful of brave unhappy Men, and in 1769 their General *Pajcal Paoli* left the Island.

It might have been apprehended that this Procedure would be considered as an Infraction of the Treaty of *Aix la Chapelle*, by which it had been provided that no Change should be made in the State of *Italy*: But however this may be, the Rest of *Europe*, even *England* itself, contented themselves with being mere Spectators of this Event; and though they professed to pity the Fate of *Corfica*, afforded no Assistance to check the Hand of Oppression, and succour expiring Liberty in a poor little Nation whose Number does not Amount to 200,000 Souls!

The *Mercure Historique* furnishes us with a short, though curious Account of them and their King *Theodore*, which I have translated, in Hopes it may be agreeable to my Readers.

“ THE War which has subsisted for some Years between the *Genoese* and the *Corficans* leaves Room to doubt, whether they will remain with the Possession of that Isle, or whether it shall pass under some other Power, or whether the Inhabitants will obtain their Liberty. In the Interim, for the unravelling of the mysterious Intrigue, which King *Theodore* has played, who was elected in 1735, I shall here observe, that on his Return to that Isle towards the End of 1737, he convoked the States of the Kingdom, to give them an Account of his Proceedings during his Absence; he afterwards made them a Representation, consisting of several Points, which they agreed to, without the least Difficulty; they were, above all, extremely well satisfied with the Dispositions taken to extend their Trade, and they established a Council of Commerce, composed of four *Corficans*, and the same Number of foreign Commissaries, conversant in Trade, from which they flattered themselves with great Success; and it is a Matter of Surprise, that a Nation till then hardly known, should find themselves in a Condition so suddenly to make themselves talked of. They attended to the Manufactures of divers Species of Goods; and the Crops were

so abundant this Year, 1737, that the Corn, Wine, Oil, and other Fruits, were at a very low Price, which must naturally put the Chamber of Commerce in a Condition to procure great Advantages from Foreigners; but, as Money is very scarce in *Corsica*, they permitted the Inhabitants of the Low Country, to pay their Taxes and Capitations in Fruits, &c."

The principal Articles of King *Theodore's* Propositions were,

I. That they ought as soon as possible to set about making some Salt-Ponds, as the Nature and Situation of the Country promised so great a Quantity of that Commodity, as may load an Hundred Ships yearly; so that the Crown and Subjects might draw Advantages from this Branch of Commerce.

II. That they ought to encourage the Working of the Iron, Copper, and Lead Mines which are discovered, to extract not only Iron for common Uses, but for Cannon, Bullets, and other Things necessary to put an End to this tedious troublesome War, and thereby save the gross Sums sent out of the Isle to purchase them.

III. And as here is a great Abundance of Brimstone and Saltpetre, they ought to build a Mill on the most commodious River, to make what Gunpowder they shall need in the Kingdom, and repair the Want under which they have hitherto laboured in this Particular, without mentioning the vast Sums it has cost.

IV. They ought to encourage Agriculture, the Majority of the best Lands being uncultivated; and to this End, they ought to establish in each *Pieve* some Commissaries, intelligent in this Art, who shall be particularly charged to take Care, that the Peasants till each a certain Spot in their several Districts for their own Advantage; and in Parts improper for the Plow, each Peasant shall be obliged to plant at least four thousand Vines, or a thousand Olive Trees, and all Sorts of Exemptions shall be granted during ten Years for those Grounds so newly cultivated.

V. By an Ordinance published throughout the Kingdom, one constant and uniform Measure shall be established for all the Fruits growing here, such as Oil, Wine, Honey, Pitch, Tar, and other Commodities put up in Casks; and at the same Time, one Ell, one Weight, and one Bushel, similar and conformable to the Standards of other Trading Nations.

VI. Whereas a Quantity of Silk may be shipped for abroad, they should above all encourage this Branch of Commerce.

VII. And as nothing can contribute more to the Advantage of this Nation than a regular foreign Trade, and as our Kingdom is better situated than any other for it, with so great a Number of good Ports and Bays, we would have our good Citizens accustom themselves to it, by making them sensible of the Advantages arising from such an Application. To which Purpose we have thought proper to establish a College of Commerce for Account, and at the Expence of the Crown. The Commissioners of which College shall be obliged to purchase of our Subjects all their Fruits and Products of the Country, fit to be sent abroad, at a Market Price, paying them in Manufactures, or other Silver Coin; But, if the Peasant will not give his Products at such a price, he shall bring them into the Crown Magazines, where a Receipt shall be given him. The Commissioners shall send these Products with others, and their respective Invoices, to the Consuls and Correspondents of the Crown in foreign Parts, with an Order to draw out the particular Accounts of the Produce of these Effects, in Order that there be given to every one what belongs to him. The Proprietors shall receive at the College of Commerce the Returns, or Imports of their Accounts, on paying, besides the Carriage, five *per Cent* on the Capital, to defray the Charges; and if the Peasant be necessitous, and cannot wait for the Returns unassisted, he may receive from the College, the half, or two thirds of the Value of what he delivers, for which he shall pay on balancing Accounts half *per Cent*. for six Months, besides the five *per Cent*. aforementioned. And to give a greater Credit to the said College, we engage our Self and Crown for it. And we order our Consuls, Residents, or Correspondents, to contract and negotiate only with the said College, and they shall send us whatever we cannot pass without in our Isle. No Vessel shall

VIII. And forasmuch as that our Kingdom abounds in Wood, Pitch, Tar, Hemp, and every Thing necessary for the Construction of Ships; this Article should be taken very seriously into Consideration, as also what concerns the Fishery, &c.

This little History is not intended solely to amuse, but will likewise serve to shew what that Island contributes to Trade, as the Commodities therein mentioned are the Total of its Products:

*Of the Trade of Naples.*

**T**HIS Capital of the Kingdom of the same Name is a Place of great Trade, and the Goodness of its Port attracts vast Numbers of foreign Vessels to it; but in order still to increase its Commerce, and raise it to the highest Pitch possible, Don Carlos, the late King, invited the *Jews* to settle there, by granting them several very great and singular Privileges, as will appear by the following Edict published on the 3d of *February*, 1740, by Order of his *Sicilian Majesty*, *viz.*

I. It is granted to all Merchants or others of the *Hebrew Nation*, a full and absolute Safe-guard, Faculty, and Permission, to come, remain, traffick, pass on, or stay, with or without their Families, in our Kingdoms and States, as also to depart, and return, without any Obstacle, both in Regard of their Effects and Persons; and this for the Term of fifty Years next following, to commence the first Day of this; declaring, that the fiftieth Year being expired, there shall yet be granted five others, during which, if it be the good Pleasure of his Majesty, or his Successors, to abrogate the present Licence at the End of the fifth Year, they may freely, and without Hindrance, regulate all their Affairs, &c. we willing, that no extraordinary Duty be exacted from them on the Departure of their Ships, Vessels, Horses, Carriages, &c.

II. If any *Hebrews* coming from other Kingdoms or Countries to ours, shall be accused in those States from whence they came, of having committed some enormous Action or Crime there, for which they have been prosecuted, as also in Case that they were disguised as Christians, and had feigned to be of this Religion, we annul and make void the Causes of such Accusation, and will not permit that they be called to Account for it in our Dominions, on any Pretext whatsoever; in fine, we grant to the said *Hebrews*, the free Exercise of their Ceremonies, Solemnities, Use, and Customs, according to the *Jewish Laws*, prohibiting their wearing publickly Cloaks, or other distinguishing Drefs, under any Denomination whatsoever.

III. That the *Hebrews* shall not be subject to any Registry or consular Jurisdiction, nor to any Company of Tradefinen; but, if any Difference arises between a Christian and a *Jew*, on some Affair concerning Arts and Trades, the Judge Delegate, who shall be named for this Purpose, shall be deemed a competent one, and decide it.

IV. We grant to the *Hebrews* and their Families, who shall establish their Residence in our States, to enjoy, in Respect of their Commerce, either at home or abroad, the same Privileges, Franchises, and Immunities, which the other Citizens, or Inhabitants of the said Cities or Places, do, or may enjoy.

V. That all their Moveables or Ornaments making a Part of their Apparel, acquired either within or without our Dominions, shall be exempt from paying any Customs, or Duty of Passage, at their Importation or Exportation.

VI. There shall be a Judge Delegate at *Naples*, *Palermo*, and *Messina*, and a Magistrate appointed at *Messina*, as at *Naples*, who shall judge of the Differences that shall arise between a *Christian* and a *Jew*, or between two *Jews*, in Case that the Crimes merit a severer Chastisement than confining or banishing; and in other Cases, that may be carried exclusively before their People of the Law, and

if they are wronged or aggrieved, they may recur to the Royal Protection of his Majesty.

VII. This Article regards the Punishment to be inflicted on the *Jews*, who shall frequent or keep Company with either Christians, *Turk*, or *Moor*.

VIII. This is to prevent the false Accusations, which may be intended against the *Jews*.

IX. If there happens any disastrous Accident to a *Hebrew*, that should oblige him to fail, and that he falls into Penury, so as to disable him from paying his Debts; in this Case the Merchandize, Bills of Exchange, and other Effects, or Money appertaining to any Correspondent, shall not be stopped to satisfy his said Debts.

X. Is relative to the Dowry of Married Women.

XI. On the Subject of Sequestrations obtained against the *Jews*.

XII. Concerning the Validity of the Securities which the *Jews* shall give, when they shall be obliged to leave the Kingdom.

XIII. Permits the *Hebrews* to have all Sorts of Books, after being, however, inspected by their Delegate.

XIV. and XV. Favour the *Jewish* Physicians.

XVI. Grants them a publick Synagogue.

XVII. Leaves them at Liberty in Regard of their Wills.

XVIII. In Regard to Contracts of Purchase and Sale, or in Trade, in Relation to the *Jews* in our Dominions, the Sales shall not be held as perfected, till after a Writing has passed between the Buyer and Seller, under their Hands, and confirmed by a Notary, or two Witnesses; provided that if between Merchants in the retail Way, at Fairs, Markets, &c. they be made without these Formalities, they shall have all Force, according to the usual Custom and Law, in Regard to the other Inhabitants.

XXV. We grant to the *Jews* all the Favours, Privileges, and Faculties, enjoyed by the other Merchants of this Kingdom; they may exercise all Sorts of Trades and Traffick; but it shall not be permitted them, after the Manner of our Subjects, to cry about the Streets old Clothes to sell: Though the *Jews* have Leave to sell and buy every one in particular, in his own House or Shop, none of them or their Family shall be obliged to wear any Mark that they may be known by.

XXXI. The Merchandize of the *Jews*, and of their Correspondents, and their Persons, coming to any Place whatsoever in our Ports, shall be free, as well in their Merchandizes and Persons as the Ship which brings them, on Payment of the ordinary Customs, Gabelles, and Taxes, even when they have no Passport; provided that it appears by the Vessels' Documents, that it was destined with its Goods for one of our Ports, and no Magistrate or Officer shall molest either the Ships or any of the Effects; but, on the contrary, shall observe our present Privilege, and in Case of Disobedience shall be punished, and all the Merchandizes restored to the *Jews*, with Charges and Expences, without any Hinderance real or personal.

XXXV. We grant to the *Jews* six Warehouses for their Use in the Custom-Houses of *Naples* Rent free, since we consider them as our own Subjects; they may have also the like, in the other Custom-Houses of our Kingdoms for their Conveniency, equally with the other Burgesses and Inhabitants, in Proportion to their Number and Trade, according to the Informations that their Declaration shall give in; and in Case that the Magazines of the Custom-House are not sufficiently large to contain their Goods, it shall be permitted the *Jews* to hire others to their Liking, under the Guard and Inspection of the Custom-House Officers, enjoying the Privilege of *Portos Francos*, as if their Effects were enclosed in the Offices of the Custom-House.

The King of the *Two Sicilies* likewise made a Treaty of Peace, Trade, and Navigation with the *Ottoman* Court, which was concluded at *Constantinople* the 7th of *April*, 1740, whereby his Subjects are put on the same Footing with those of all others trading to the Dominions of the *Grand Signor*:

*Naples* furnishes Trade with raw and wrought Silks, silk Waistcoats and Stockings knit, Oil of Laurel, crude Brimstone, *Calabrian* Manna, Rosemary Blossoms, Anis and Coriander Seeds; Raisins, Currants, Cream of Tartar, Figs and Olives, Soap, dried Orange and Lemon Peel, Silk Stockings and Waistcoats, Essences, Quintessences, and Perfumes.

*Palermo*, the Capital of *Sicily*, produces also raw and wrought Silks, Brimstone, Cream of Tartar, fine Sponges, and Plenty of the finest Wheat, except *Spanish*, I ever saw.

*Reggio* yields Raw Silk, Manna, Oil, and dried Fruits.

*Messina* affords also large Quantities of Silk, and other Commodities, similar to those of *Palermo*.

With those Products and Manufactures his *Sicilian* Majesty's Subjects carry on a great Trade to *England*, *Holland*, *Lisbon*, *Turkey*, and some to *France*, more especially in Corn, when this Kingdom is in Want; and the Merchandizes they take in Return will be noticed in a Catalogue of those fit for *Italy*, in which these Places will be included.

*Of the Trade of Rome, and the other Territories of the Pope.*

THIS City is more celebrated and known for Antiquity, History, Magnificence, and Grandeur, than by its Commerce, as it draws almost all from Abroad; by its Port of *Civita Vecchia*, at the Mouth of the celebrated River *Tyber*, whose Stream must be gone up to reach *Rome*: these Parts afford nothing more to the Increase of Trade than Allum; made in great Abundance about six Miles from *Civita Vecchia*; but what is wanting here, *Bologna* and *Ancona* in the *Ecclesiastical* State abundantly supply, I mean to Commerce, the Fertility of the Country about the first being beyond all Imagination; and this improved by the Industry of its Inhabitants, has rendered the City rich and flourishing; there are Mills for Paper, and others for sawing the Wood found in the *Apennines*; to move Hammers for forging Iron, for polishing Gun Barrels, to bruise the Barks; and *Valonea* for tanning of Hides, for making of Oil, for Flax and Hemp, for grinding all Sorts of Grain, for winding, twisting, and making Silk into Skains, and for an Infinitude of other Works.

The Manufactures of this City are Cloths and Silks, particularly Sattin, Damasks, and Velvets, flowered and plain; silk Stockings, Linens and Crapes. There are raised in the Neighbourhood a great Quantity of Silk Worms, which furnishes the *Bolognois* with the richest Part of their Trade for raw Silk; and besides the Silk in Skains, they here make Organcens, which are very much esteemed.

The other Merchandize brought from *Bologna*, consists in their celebrated Sauces, of which Foreigners take off yearly a surprising Quantity, packed up with Cotton in little deal Boxes, and ornamented with painting and Gilding; here is likewise a considerable Trade in Quince Marmalade, prepared by the religious Recluses of the Place.

*Ancona* has likewise its Silk Fabricks, and Tanneries for Hides, of which its Exports chiefly consist, except in some Years when large Quantities of Corn are shipped from hence; it was made a free Port by *Clement XII.* in a Decree of the 16th of *February*, 1732, very much to the Dislike of the *Venetians*, as it attracts a large Share of that Trade carried on before at *Venice*, both from the North and the *Levant*.

*Of Florence and Leghorn, with their Trade.*

THE Commerce of *Florence* is carried on by Way of *Leghorn*, and consists in a large Quantity of rich Silks, manufactured in this Capital of the grand Duke of *Tuscany*; the principal of which are Tissues and Brocades of Gold, Silver, and Silk, Sattins of all Colours, but more especially the White, which are greatly esteemed, Armoifins and Taffeties; here are also made some light Woollen Stuffs; and the other Merchandize that this Place affords, are raw and spun Silks, Wool washed and unwashed, Wine, and Gold Wire.

*Leghorn*, or *Livorno*, is one of the most important, and the best Ports of the Grand Duke's Estates, and hardly yields in Point of Trade either to *Venice* or *Genoa*; the great Liberty which all Nations enjoy, let their Religion be what it will, induces some of almost all Nations to assemble here; and the moderate Customs paid on Importation, for all Exportations are free, attracts also a Concurrence, not only of *French*, *English*, *Dutch*, &c. but also of *Jews*, *Turks*, and *Armenians*; the *Turks* however trading only *de passò*.

The *English* and *Dutch*, more especially the former, carry on the greatest Trade; this Place being properly the Staple or Magazine for the major Part of the Goods which they receive from the *West*, and send to the *Levant*, as it is for those they get from hence in Return, and forward to their *Western* Markets.

The *Jews* and *Armenians* transact most of the Business, by intervening as Brokers, for which they are paid, according to Custom, for the different Branches of Trade they transact, whether Purchases or Sales, Exchanges or Insurances.

Besides the rich Fabricks of Silk, Gold and Silver, at *Florence*, *Pisa*, *Lucca*, and the other Towns of *Tuscany* and its Neighbourhood, here are found raw Silk of all Sorts, as well *Italian* as *Levant*, and even *Spanish* Olives and Oils, not only of the Growth of the Country, but from different Parts, as *Gallipoli*, *la Ponille*, the *Levant*, *Barbary*, &c.

But that which is not the least important Part of this Commerce, are the Merchandises from the *Levant*, with which, as has been said, the *English* and *Dutch* have always their Warehouses well furnished, as they have with those Goods they receive from the *West*, which consist of the same Commodities, as will hereafter be mentioned as proper for *Italy*; what is shipped from *Leghorn*, besides the Goods afore-mentioned, are Cotton in Wool and spun, Coffee, brought there by Way of *Alexandria*, Allum, of *Civita Vecchia*, and the *Archipelago*, Anniseeds, from *Rome* and *Malta*, fine Laque, from *Venice*, Marble of curious Colours, from *Carrara*, Red Coral, from *Sardinia*, Soap, Sumack, Argol, Brimstone, Wine, &c.

#### Of the Trade of Milan, Modena, Lucca, Parma, and Verona.

**MILAN**, the Capital of *Lombardy*, is very considerable for its Commerce, which it furnishes with Gold Thread, flowered Velvets, with Gold, Silver, and Silk Grounds, many fine wrought Silks, and large Quantities of unwrought, exported for *France*, &c.

*Modena* has its Products and Manufactures so like those of *Bologna*, as a Description of them here would be a Tautology.

*Lucca* is a small Republick in *Italy*, upon the River *Serchio*, five Leagues from *Pisa*; it is celebrated for its fine Silk-Manufactories, particularly those of Velvets, Damasks, Sattins, and Taffeties; here is likewise sold a large Quantity of raw Silks, and in Skains, as also of Oils and Olives, which latter are esteemed the best in *Italy*, but double priced from all others.

*Parma* transacts all its Business by Way of *Venice*, which principally consists in raw Silk, and Cheese made at *Lodi*.

I shall lastly mention, as a very considerable Branch of the *Italian* Trade, that carried on in the Territories of his *Sardinian* Majesty; of which *Turin* is the Capital, and has an advantageous Situation, for extending it on every Side, as almost all that comes from the other Parts of *Italy*, and that which enters it by the Way of *Lyons* and *Geneva*, pass by this City; the *Po*, which runs near it, also facilitates a Communication with *Lombardy* and the *Venetian* States; and although it is necessary to traverse the *Alps* to get there, nothing is easier than the Journey by Mules, which are made Use of for the Transportation of the Goods, and of Men, who give all desirable Assistance for the Passage of Mount *Cenis*.

*Piedmont* produces the best Silk in *Europe*, on Account of its Lightness and Fineness, and the Organcens made of it, are most esteemed, in *England*, *France*, *Holland*, and *Germany*, of any. It is reckoned that, in a common Year, are made in the King of *Sardinia's* Territories, viz. in *Piedmont*, *Montferrat*, *Alexandria*, *Lomeline* and *Novaras*, about 560,000 Pounds, of twelve Ounces, of raw Silk,

which are all reduced into Organcens or Frames; only these of *Navarais* being permitted Extraction unthrown.

The Fabricks of all Sorts of Silk Stuffs, long since established in *Turin*, consume about 130,000 Pounds of thrown Silk yearly; though it is to be observed that the Fabricators of these Silks, import from their Neighbours, the greatest Part of the Frames they use, of raw Silk to make them.

There are besides in *Turin*, about six hundred or seven hundred Looms for Silk Stockings; for whose Employ a great Quantity of Silk is required; however, it is computed, that besides the Silk used in all these Manufactures, there is yearly sent to *Lyons*, about two thousand small Bales, of an hundred and thirty-six Pounds each, laden at *Genou* and *Legborn*; extra of what is sent to *Holland* and *Germany*, by Way of *Savoy* and *Geneva*.

This Prince's Dominions have likewise several Fabricks of Drapery, particularly of Scarlet, Blue, and Black Cloth; besides divers Sorts of light Stuffs; they also make Ratines, and coarse Cloth for the Soldiers' Clothing.

*Piedmont* is very fertile in Corn, with which it supplies its Neighbours, particularly with Rice; of which large Quantities are sent to *France* and *Genoa*, as also to *Venice*, by the River *Po*.

Hemp likewise grows here in Plenty, which is almost all sent through *Nice* to *Marseilles* and *Toulon*, except a small Share to the *Genoese*.

A great Number of Cattle are fatted in *Piedmont*, and Abundance of Wine made, both which find a ready Sale among the *Genoese* and *Milanese*, and a large Share of this latter is distilled into Brandy, to make the Composition of *Rosifolis* at *Turin*, which has greatly the Preference of others.

Some few Years ago, a Manufacture of Earthen Ware was established at *Turin*, and a little while since, another of Porcelains, which is brought to great Perfection; several Quarries of excellent Marble are found dispersed about the Country, which serves to ornament both their Churches and Palaces.

The Countries of *Nice*, *Oneille*, and other Places on the Sea Coast, subject also to his *Sardinian* Majesty, produce most excellent Olive Oil, and in such Plenty, that besides a Sufficiency for all his Dominions, large Quantities are sold to the *French* and *Genoese*. And the Island of *Sardinia*, producing many of the Commodities above-mentioned, and similar to those of *Sicily*, I shall not enlarge on its Description, to avoid Repetitions, but now give a Detail of the Commodities proper for *Italy*.

*Merchandize proper for Italy.*

**S**PICE in general, which, except Pepper, the *Dutch* supply.

Cocoa, Ginger, Tea, Porcelaine, and other *Indian* Curiosities.

All Sorts of *French* Merceries, Laces, and Guimps, of Silk and Silver.

Silk Stuffs, with Gold and Silver, from *Lyons* and *Tours*, and Ribbons, particularly from *Paris*.

Wigs, Hair, Worsted Stockings, Hats, &c.

*Of the Levant Trade, on the Coast of Barbary.*

I shall include, under this Title, all the Commerce carried on with the *English*, *French*, *Dutch*, and *Italians*, at *Smyrna*, *Alexandretta*, *Aleppo*, *Seyda*, *Cyprus*, *Constantinople*, *Alexandria*, *Rofetta*, and even *Grand Cairo*, *Angora*, and *Beidazar*, upon the Coasts of *Barbary*.

The great Quantities of *European Ships* that trade to *Smyrna*, and the numerous Caravans which arrive there from *Persia*, have always made, and still make this to be a Place of the greatest Commerce in all the *Levant*, for which it is happily situated in the Gulf of the *Archipelago*, in that Part of the *Lesser Asia* that the *Greeks* called *Ionia*, and at present named *Natolia*.

The Port of this City, so famous for its Commerce, is capable of containing many Fleets, and here are generally seen several hundred Merchant Vessels of divers Nations.

The greatest Part of the principal foreign Merchants have fine commodious Houses of their own; and hardly any Thing can be seen more superb and magnificent than the Habitations of the Consuls, who are almost all lodged near the Sea; but Persons whose Stay here is but short, or who would be saving in their Expences, may have the Convenience of being accommodated in a *Kan*, which is a Sort of an Inn, where a thousand People may lodge, on paying a Dollar per Month for each Chamber.

At *Smyrna* are two Custom-houses; the biggest called the Custom-house of Commerce, where the Duties are paid on Silk, and other Goods that the *Armenians* import from *Persia*, and those which the Christian Nations unlade there, and embark for their Returns: The other named the Custom-house of *Stamboul*, or *Constantinople*, only takes Notice of the Trade of this Capital of the *Ottoman* Empire from *Salonica*, and other Parts of *Turkey*.

The Caravans have their Times and Seasons fixed for their Arrival and Departure, on which the *European* Nations regulate the Remits of their Ships, to the End that the *Asiaticks* may carry with them the Western Merchandizes, and the *Europeans* relade with those of *Asia*.

Of the *Asiatick* Nations, the *Armenians* are those that carry on the greatest Trade with *Smyrna*; the Caravans from *Persia* being almost all composed of them, and in this City are established above twelve thousand.

In respect to the Natives of *Europe*, the *English* are best regarded, and most favourably treated, and they likewise send the greatest Number of Ships here; next to them the *Dutch*; and lastly, the *French*, but they are too numerous here, and thereby hurt one another.

The Merchants from *Leghorn* carry on a great Trade here: those of *Venice* still more; and the *Gencese*, notwithstanding the Expence the Liberty to trade under their own Colours has cost them, hardly any.

The *French* Trade is carried on from *Marsilles* in ten Sail of Ships, and three or four Barks yearly; whose Ladings consist of Dollars, Cloths of *Dauphine*, *Carcassone*, and *Sapte*; in Perpetuans, or Imperial Serges; in Caps, Paper, *Cochinai*, *Tartar*, *Verdegris*, *Indigo*, from *St. Domingo*, and *Guatemala*, *Pewter*, *Dying Woods*, *Spice*, and *Sugar*. The Returns being almost the same for all the Nations of *Europe* who trade there, I shall here mention them once for all, *viz.* *Angora* Goats, and Camels Hair, *Rhubarb*, *Scammony*, *Opium*, *Senna*, *Gun*, *Adragant* and *Arabick*, *Coffee*, *yellow Wax*, *Allum*, *Cotton* in Wool and spun, *Currants*, *fine Camlets*, *fine Wools* from *Metalin* and *Caracuzia*, *Skins* like *Moroccoes*, *Buffaloes Hides*, *Shagreen*, *Sponges*, *Mastick*, *Saffron*, *Galbanum*, *Galls*, *Ashes*, *Box*, *Anniseds*, *Fustians*, *Buckram*, *Carpets*, *Silks* called *Cerbassi*, *Legis*, *Ardasse*, and *Ardassetes*, *Cotton Stockings*, *Turkey Handkerchiefs*, *Valonea*, *Xantoline*, *Apoanax*, *Agaric*, *Tutti*, *Amber*, *Musk*, the *Ultramarine Stone*, *Storax*, *Soap*, *Pearls*, *Diamonds*, *Rubies*, and other precious Stones; but these Jewels are sold privately by the *Armenians*, who bring them with their Caravans, and who frequently come themselves to *Christendom* to dispose of them.

The *Dutch* send yearly about fourteen Ships, with *Leyden* fine Cloths, Cloves, Mace, Cinnamon, Nutmegs, Ginger, Cochineal, Indigo, Copperas, Quicksilver, Brass and Iron Wire, *Dantzick* Steel, *English* Pewter, rough yellow Amber, Tartar, Sea-Horse Teeth, Lapis Lazuli, Loaf and Powder Sugar, Cinabar, red Oaker, Dying Woods, Tin, *Russia* Hides, &c. and re-lade with the greatest Part of the Goods just mentioned.

The *Venicians* generally send fourteen or sixteen large Ships annually, under Convoy of two Men of War, besides others at different Times without Convoy; and the *Livernois* also send Vessels as they find Occasion.

*Angouri*, or *Angora*, and *Beibazar*, Capital of *Galatia*, has always preserved its Reputation for the Beauty and Fineness of its Goats Hair, and the Fabrick of Stuffs made there at present called Camlets; and it is from this Place, and *Beibazar*, that *Smyrna* is supplied with these Commodities, the Quantity of the former being almost incredible, of which it is said the *English* transport about five hundred Bales, the *French* as many, and the *Dutch* more than double that Number, and the Consumption of it is full as great there, as what is shipped by these Nations: The *English* and *Dutch* have Factors settled here to purchase this Commodity at first Hand, by which Means they have it much cheaper than when brought to *Smyrna*.

*Aleppo* and *Alexandretta*; these two Cities of *Syria* have a great Similitude in their Trade, or rather it is the same that they both carry on, *Alexandretta* being properly only the Port to *Aleppo* which is twenty-two, or as some say twenty-five, Leagues within Land.

*Aleppo* is one of the principal Cities in the *Turkish* Empire, and yields only to *Constantinople* and *Cairo* in Grandeur, and to *Smyrna* in Point of Trade.

Two Things, among others, are very remarkable in Regard of Trade. The one is the Custom of making Pigeons serve for Messengers, to give Advice of Ships' Arrival, and other pressing Affairs, which is done by taking them from their young ones at *Aleppo*, and sending them to *Alexandretta* a little before it is supposed they may be wanted, which being let fly at this Place, with a Billet about their Neck, return in three Hours' Time. The other is, the Prohibition to go from *Alexandretta* to *Aleppo*, any other Way than on Horseback; and the Reason of it was, to prevent Sailors running afoot to *Aleppo*, and there spoiling the Price of Goods by their Over-urgency in laying out their little Stock, which without this Ordinance would be greatly diminished.

There is hardly any Place in the three ancient Parts of the World, from whence some Merchants are not seen at *Aleppo*: Besides the *English*, *French*, *Dutch*, and *Italians* which reside there, the Caravanseras are always full of *Armenians*, *Turks*, *Arabians*, *Perfians*, and *Indians*, which come in such Numbers by the Caravans, that although there are about forty of those publick Buildings, they hardly suffice to contain those, who only appear to transact some transient Business, and who after selling their Goods, return by the Way they came, with their new Purchases.

The Merchandize proper for this Place, are the same as those for *Smyrna*; and those which the Ships relate are Silks of the Country, and *Persia* Cotton Cloths of various Sorts, and among others blue Amans, Auquilles, Lizardes, those from *Boby*, others called Linen Antiquies, Ajamis, and Abundance of Chints; different Cottons, and Cotton Threads, Galls, Cardovans, Soap; many Species of Silk Stuffs, and those admirable Camlets before-mentioned.

*Seyde* is the ancient *Sidon* of *Phoenicia*, so renowned formerly for its great Traffick, very little inferior to that of *Tyre* itself, whose Reputation for Commerce has been equally published, both by sacred and profane Authors. The modern *Sidonians* retain nothing of the ancient but their Inclination for Trade, every Thing else is altered; their Power by Sea no longer subsists: The vast Extent of their City is reduced to less than one Quarter of what it was formerly; and the great Number of its Inhabitants to less than six Thousand, of which the Foreigners make near half.

But few Western Commodities find a Sale at *Seyde*, though with the Products of the Country a pretty good Trade is supported; those few are some Cloths of lively Colours, Sattins and Damasks of *Lucea* and *Genoa*, with some Paper, a few Chefts

Chests of Indigo and Cochineal, Spice, Sugar, and *Brazil* Wood, all in small Quantities. The Goods laden here are principally Silks and Cottons, with some Athes, Galls, Oil, Soap, and Birdlime; and as the Occidental Sales do not balance their Purchases, a considerable Sum of Money is yearly obliged to do it.

The *French* Trade to this Place, *Acre*, and *Rama*, which are in its District, imports about 350,000 Dollars yearly, and there are no Merchants but of this Nation settled in these Places.

*Cbio* is now subject to the *Turks*, and better peopled than any Isle in the *Egean* Sea; its Commerce is very considerable, though much less than the Number of its Inhabitants, and the various Sorts of Merchandize that grow and are made here, seem to promise: The Wine, Silk, Cotton, and Turpentine, and Mastick, are the principal Products that draw the *Europeans* hither, more especially the *English* and *French*, who have their Consuls here.

It is supposed that above 100,000 *French* Crowns' worth of thrown Silk is annually exported from hence, besides a large Quantity of Silk Stuffs made in the Isle, such as Damasks, Sattins, and Taffeties, which are transported to *Cairo*, and to all Places on the Coasts of *Barbary* and *Natolia*, particularly to *Constantinople*.

The Cottons are in Wool, or spun, and a great deal of them employed in Fustians and Dimities, which are as much esteemed, and disposed of in the same Way, as the Silks.

Mastick, the chief Article of their Trade, is hardly found any where else but here, and the best, and indeed almost the whole is for the *Grand Signor*; who has from all the Villages in the Island where it is gathered, two hundred and eighty-six Chests, weighing 100,025 *Oques*, and some few others are taken by the Custom-house Officers, &c. Of Turpentine the Isle produces about three hundred *Oques*, of 3½ Pound one Ounce. Of Oil about two hundred Hogheads, each Hoghead weighing 400 *Oques*, and the *Oque* about 3lb. 2oz. Of Silk 6,000 Masses, or 30,000lb. almost all which is wrought up by the Islanders in the Manufactures before-mentioned. Here is also some very good Wine, known to the Ancients under the Distinction of *Nectar*; and it affords fine Honey and Wax in tolerable Quantities.

*Cyprus* maintains hardly any Trade with the *Europeans*, except with the Products and Manufactures of the Isle. Its Extent, and the Fertility of its Soil, enables it to furnish Commerce largely; particularly with Cottons, and Silk, which are cultivated almost every where. The Cottons in Wool or Thread are esteemed the best and finest in all the *Levant*; the Country between *Nicosia* and *Famagoula*, and about *Papbos*, and *Limisso*, are the Parts in the Island that produce most.

The Silks are also gathered, and the Silk Worms bred in some Villages, subject to the Magistracy of the two last mentioned Cities; but the best and greatest Quantity is made in the Village *Cyteree*, though none are held in an equal Degree of Goodness with the Cottons.

The Wools, Wine, Galls, some Medicinal Drugs; red, yellow, green, and greyish Earths or Boles; Stuffs and Dimities are the other Merchandizes of the Isle, to which I think I ought to add as one, the *Ortolans*, which come here in such Abundance, that the Natives pickle them; and, besides what they consume on the Island, the *Venetians* export upwards of a thousand Barrels annually.

Some few Bales of Cloth, Paper, Caps, and some Verdigris, are the only Goods imported there, which occasion the major Part of the Returns to be paid for in Money, and the most advantageous Specie for this Purpose are the *Mexican* and *Seville* Dollars.

*Constantinople*. This City, formerly the second *Rome*, or rather the true Capital of the *Roman* Empire, when *Constantine* the Great had chosen it for his Residence; after having been for a long Time the Seat of the *Greek* Emperors, and a little more than half an Age that of the *Latins*, became at last the Metropolis of the *Turkish*.

The happy Situation of this great City, joined to the Beauty and Security of its Port, might render it a Place of the greatest Trade in the World, if the Inhabitants, who are subject to a Servitude that almost deprives them of the Property of their Effects, dared to think of enriching themselves by Commerce; or, if the

Foreigners that Trade draws here, and who are treated with less Haughtiness and Severity, were not exposed to so great and frequent Insults and Impositions.

Notwithstanding these Reasons, so naturally tending to raise a Dislike in the Christian Nations to a Commerce with *Constantinople*, there is however a great Number of their Ships seen to arrive here; and there is hardly one of these Nations who have not a Minister settled here, more to protect their Merchants than for any political Interest; the *Emperor* and the *Venetians* being those only who can have any Contest with the *Port*, by Reason of the Proximity of their Territories.

Of the *Europeans*, the *English*, *French*, and *Dutch*, are those who carry on the greatest Trade here, more particularly with their Cloths, sent here directly, or brought from their Warehouses at *Smyrna*, which are always well filled. The Cloths from *Venice* have for a long Time had the Preference in this City, though every where else in the *Levant*, they are the least esteemed.

Those destined for *Constantinople* should be thin and fine, well milled, close shorn, without any Nap; above all they must be of the best Dye, and have their just Lengths and Breadths.

The properest Colours for *Constantinople* are Violet, Purples, Green, Red, Crimson, Scarlet, Sky-blue, Flesh and Cinnamon Colours; no Black, except of the greatest Beauty, and then only one Piece in forty or fifty. About eight or nine thousand Pieces are sold here yearly, one fourth *Dutch*, little more than one third *English*, and the Rest *French* and *Venetian*; a few Perpetuanas, and some other Woollens are sold here, but of Silks, great Quantities from *France* and *Italy*, and a small Matter from *England* and *Holland*; the chief are the Sattins from *Florence*, Tabbies, Damasks with and without golden Flowers, flowered Brocades, with gold and silver Grounds from *Venice*; and flowered Velvets from *Genoa*; but although these Stuffs preserve the Name of their original Fabricks, some of them are now made at *London* and *Amsterdam*, and many of them at *Lyons* and *Tours*, which are however sold to the *Turkish* Tailors, and *Armenian* Merchants, for true *Venetian* and *Genoese* Goods.

The Sale of Sattins amounts yearly to between five and six hundred Pieces; of Tabbies to three or four hundred; of Damasks without Gold, only sixty Pieces, and with, an hundred Pieces, and hardly more Velvets; but Brocades with gold and silver Flowers find the greatest Vent, though these must be made on Purpose, with Patterns proper for the Place; for it is not the Richness of the Stuff that pleases the *Turks*, but chiefly the Gaiety, and above all the Cheapness.

Paper is one of the best Commodities carried to *Constantinople*, and what frequently produces the most Profit; it goes there from *France* and *Venice*; and *Genoa*, though principally from the first, in all about thirty thousand Reams; the other Merchandizes are, Hard-ware, Tin, Brass, and Iron Wire, which the *English* and *Dutch* carry from *Hamburg*, and the *Baltick*; gold Thread, and ditto Gold and Silver false, from *Poland*, carried by the *Venetians*, *Marseilles* and *Tuniseen* Caps; Verdigris from *Montpelier*, Oil of Spike from *Marseilles*; Tattar, Sugars supplied by the *English* and *Dutch* when the Crop has failed in *Egypt*, which commonly furnishes *Constantinople*, by the Way of *Alexandria*; and in fine, Spices, Camphire, Quicksilver, Lead, Cochineal, *Brazil* Wood, White-Lead, &c. in which these two Nations are almost solely concerned.

The Exports from *Constantinople* are very few in Comparison with the Imports; therefore, to balance Accounts, the *European* Merchants direct their Correspondents at *Smyrna* or *Aleppo*, to draw it on the Capital, or other Remittances to be made therein in Specie from the said Metropolis, to purchase what they commission to be bought for their Ships relating at either or both of the said Places.

The few Merchandizes mentioned to be exported from *Constantinople* consist in Wools, called Pelades, and Tresquilles, of which the Extract in a common Year is two thousand Bales of the former, and three thousand of the latter. Of Buffaloes' Hides, about ten thousand carried to *France* and *Italy*; of Ox and Cow Skins, of the different Sorts and Qualities, fifty thousand, of which the Consumption is for *Italy*; of Pot-Ashes, from the Black Sea, which the *English* and *Dutch* buy to scour their Cloths; yellow Wax, some Goat's Hair Thread, a Quantity

of Caviar, or salted Sturgeons' Roes, commonly bought up by the *Venetians* and *Lechorners*.

The Fur Trade from *Muscovy*, *Natolia*, the *Black Sea*, *Crim*, and other Places of *Tartary*, is very considerable, though in this the *European* Merchants have no Share, being entirely transacted by the *Greeks*; of these Skins about two hundred Chests, with two hundred pair in each, of Sables are yearly sold, from fifteen hundred to twenty-five hundred Dollars *per* Chest; Ermines, only esteemed when extremely white, fell from ten to eleven Dollars, for forty Skins and *Mincvers* at seventy Dollars *per* Thousand; Martins, Polecats, Lynxes, and Fox Skins are brought here from *Natolia*, and annually sell for the Value of about sixty thousand Dollars; the black Fox Skins brought from *Cassa* and *Tartary* are in very great Esteem, and their Sales may yearly import an hundred thousand Dollars.

Of *Cassa*, or *Capba*, and the *Black Sea*: The *Venetians* have often endeavoured to commence a Trade to this last, more especially to *Cassa*, and in 1672 obtained Leave, by the lively Representations, and the more persuasive Arguments of large Presents, which their Bailly the Chevalier *Qyirini* made, but upon the Remonstrances of the Superintendent of the Custom-house at *Constantinople*, who suffered in his Interest by this Concession, and also under the political Apprehension, that the *European* Christians would, by this Means, more easily have a Correspondence with those of their Religion settled on that Coast, the Privilege was revoked, and no *European* Nation has been able to obtain one since.

*Cassa* has an excellent Road, and its Port is where the greatest Business is carried on in all the *Black Sea*, it being common to see arrive, or sail, four or five hundred Vessels together. Here is a great Trade carried on in Corn, Salt, Furs, and Butter, this last being esteemed the best in all *Turkey*; but that which attracts the greatest Number of Shipping, and what induced the *Venetian* Ambassador to purchase the afore-mentioned Liberty at so great a Price, is the large Quantity of Sturgeons taken in the *Palus Maeotis*, of which salt Roes the *Italians* are so fond, and not only they; but several other Nations of *Europe* and *Asia*. Some Accounts say, that many of these Fish here weigh eight or nine hundred Pounds, and their Roes three or four Quintals; and though these Relations may be something exaggerated, it is certain that there are none elsewhere, either so large, or abundant; but as the Trade of this Part is in general so very great, I shall give my Readers an Abstract of a very curious Memoir drawn up by a Person well acquainted with it.

The Commerce, says he, of the *Black Sea* is so considerable by the Advantages it affords, and the great Quantity of Goods it takes off, that the yearly Import of them is supposed to be more than three Millions of Dollars; *Cassa* is one of the principal Ports in it, distant about seven hundred Miles from *Constantinople*; the *Turks*, *Greeks*, *Persians*, and *Muscovites*, are the People who support this Trade, and vast Quantities of Merchandizes sell here, both for the Consumption of the Place, and that with many others with which it maintains a Correspondence. Here are annually sold to the Value of twelve or fifteen thousand Dollars in *Venetian* Brocades; here is likewise sold another Sort in which the Gold and Silver is false, and the Flowers like those of *Damask*, to the Amount of seven or eight thousand Dollars. Ten or twelve Bales of Cloth are also annually disposed of; about twenty thousand Dollars worth of *Scio* *Damask*; and to the Amount of an hundred and fifty thousand Dollars in *Taffeties*, striped and plain; here is likewise brought from *Scio*, fifteen thousand Dollars' worth of *Fustians*, and some of these from *Constantinople*. Of Coffee here is sold yearly from fifteen to twenty thousand Dollars; and five to six thousand Dollars in Flax from *Cairo*. Of all these Merchandizes a great Part is consumed in the *Crim*, distant about an hundred and fifty Miles from *Cassa*, another Part is sent to the Ports situated near the *Palus Maeotis*, as at *Gustere*, *Bolovelava*, *Kireri*, and some other dependent on *Cassa*, which serves them for an Almagazen.

The Proceeds of all these Goods are commonly employed in Hides, Wax, Wheat, Barley, Butter, Honey, and Caviar, which are the chief Products of the Place. Of the Hides here are two Sorts, the best made at *Cassa* being from about thirty-five to forty thousand yearly; these are carried to *Smyna* by the Way of *Natolia*, and

and cost about a Dollar each; the second Sort are of an inferior Quality, tanned in the Neighbourhood of that City, whose Value is three-fourths of a Dollar each, and their Number about an hundred Thousand, which are sent to *Constantinople*.

There is annually collected at *Cassa* near thirty thousand Ocques of Wax, of which Part goes to *Smyrna*, and the Rest to *Constantinople*; there are also sent yearly to the latter, fifty or sixty Saicks, or, Saïques, with Wheat, and from fifteen to twenty with Barley, of *Butter Cassa* remits to this Capital between fifty and sixty thousand Ocques; and the Profit it makes by its Honey is not less than that which the Wax and Butter leaves. In fine, this Place affords some Silk, though the Quantity is not large, nor its Quality good.

*Azeck* or *Ajoph* is situated on the *Don* or *Tanais*, not far from the Place where this great River falls into the *Palus Maotis*. This Part of *Asia* was hardly known in *Europe*, only to the Geographers, before the Year 1695, when the famous *Czar Peter Alexowitz* took this Fortress from the *Turks* to whom it belonged, with the Design to establish a Fleet there, not only to attract the Trade of the *Black Sea*, but also capable to make the Grand Signor tremble, even in the Capital of his Empire; *Ajoph* soon attracted the Attention of all Nations, and it cost more than one Siege and a bloody Battle, in which the *Czar* with his whole Army had like to have perished, to restore this Place to its first Master, who having experienced the Importance of it, augmented its Fortifications, and guarded it with an extreme great Jealousy; but it is known that in the War of 1739 this City became again an Apple of Discord, and that the *Czarina* remained in Possession of it, though I believe without reaping those great Advantages that the *Czar* had at first expected from its Conquest.

It is from *Ajoph* that a Part of the Caviar sold at *Constantinople* comes, where in a common Year are imported at least ten thousand Barrels with 7½ Quintals each; though all the Caviar is not made of *Sturgeons'* Roes, but some of those of other large Fishes.

*Kily*, or *Kilia*, is situated on the South Side of the *Danube*, about seven or eight Leagues from the Mouth that discharges into the *Baltick Sea*. Four or five thousand Pieces of Fustian from *Scio* are brought here yearly, and Damasks from thence also to the Value of about six thousand Dollars; Buckrams for more than thirty thousand; besides two thousand Pieces of Fustian made and sold in the Place; Coffee also sold here for fourteen or fifteen thousand Dollars; Flax for three or four thousand; striped Taffeties, called Santals, for above sixty thousand; other Sorts of Taffeties for seventy thousand; of Cloths, fifty or sixty Pieces are annually imported, though of all these Merchandizes few are consumed at *Kily*, as this is the only Staple, or Storehouse, from whence they are sent to divers Ports on the *Danube*, or within Land, as *Ismael*, *Memeswaer*, *Hias*, *Galas*, and several other less considerable; all which Places contribute something to Trade, viz.

*Hias*, about fifty thousand Ocques of Wax, of which a Part is sent to *Smyrna* by *Natolia*, and the Rest to *Constantinople*; the Butter comes from other Ports, where in a common Year may be collected above an hundred thousand Ocques.

At the Mouth of the *Danube*, and before *Kily*, is a very large Fishery, of the *Mouronne*, though what this Fish is, I confess my Ignorance, which produces above sixty thousand Dollars yearly; each Fish weighs about a Quintal and a Half, one with another, after the Roes are taken out, to make Caviar, though this Commodity made here is not good, as the curing it well would render it too costly to get any Thing by it. From the Ports along the *Danube* are expedited more than six hundred Saicks yearly with Wheat and Barley, which commonly yield the great Profit of 15 to 30 per Cent. to the Concerned.

*Prevat* takes off no *European* Goods, so that all the Commerce is carried on in *Dutch* Dollars, the *Polish* Abra, the *Izelotes* of the Empire, *Venetian* Sequins, *Hongres* of *Hungary*, the *Egyptian* Cherif, *Alpers*, and *Parats*, all which Species are commonly taken here at 15 or 20 per Cent. higher than in *Constantinople*. Here is made in a common year from twenty to twenty-five thousand Buff-Skins, and some Wax is also shipped off.

*Kirmant*, like the last-mentioned Place, takes off nothing from *Europe*, and only furnishes Trade with about twenty-five or thirty thousand Hides yearly, and some Butter.

*Sinope* is a Port situated on the *Euxine* Sea, on the *Natolian* Side; some Goods are here imported, but the greatest Part of the Trade is carried on in the different Coins afore-mentioned. The *Persians*, however, drive a very considerable one here in Silk Stuffs, Cambresines, Indianas, Carpets, Lizats, &c. of which the greatest Part goes to *Constantinople*, and the Rest to *Cassa*, and it is the *Tartars*, *Greeks*, and *Turks*, who purchase the greatest Part of these Merchandizes; a few Linens are brought from *Trebisonde*, but of so little Import as not to merit any Regard.

*Nicopolis* is a Sea Port, with very little or no Trade: Though

*Castamboli*, which is two Days Journey from it, makes coarse Buckrams of all Colours to above eighty thousand Dollars Value yearly; of which a Part goes to *Constantinople*, and the other to *Cassa* and *Kily*; here is also gathered a considerable Quantity of Wax sent to *Smyrna*; and the *Persians* carry on a great Trade here, as they do at *Reb*. *Jay's* Journey from *Synope*.

*La Mastre* is a Port on the *Black Sea*, tolerably secure, and where a pretty good Commerce is carried on, consisting chiefly of Packthread and spun Yarn for Cordage and Cables, of which there are annually laden for *Constantinople* at least eight Saicks; there also goes from hence, and several other neighbouring Ports, a large Quantity of Wood, the greatest Part for *Constantinople*, where it is employed in the *Grand Signor's* Yards for building the Men of War and Gallies; the Masts in particular are very good, and so long, that they have served for sixty and seventy Gun Ships, all of a Piece.

There are exported from several Parts of the *Black Sea*, Salt Beef and Pot-ashes, the last for *Constantinople* and *Smyrna*, which the *English* and *Dutch* purchase to scour their Cloths, and make Soap; the Furs also that come from *Muscovy* are transported to *Constantinople* by the *Black Sea*.

#### Of the Trade of Cairo, Alexandria, and Rosetta in Egypt.

THE interior Commerce of *Egypt* was once very considerable; of which its continual Fairs, that during the whole Year were often held several at a Time in the different Provinces of the Kingdom, will give the highest Idea. There all the People of the Country flocked together, to furnish themselves with the Goods and Merchandizes that they wanted, or to dispose of those which a Superfluity rendered useless. There each particular District, bringing into Trade the Merchandize which either Art or Nature had rendered peculiar to them, contributed on its Part, to this reciprocal Communication, and to the general Circulation, which was incessantly made, in the whole Body of the State. *Egypt* was so fertile, and had so well perfected the Arts and Sciences, that there was a prodigious Concourse from all Parts to these so frequent Assemblies, which were productive of immense Riches to all the Country.

In Regard to the exterior Commerce of the Kingdom, it did not become flourishing all at once; and as it owed its Birth to the Wants of Strangers, rather than to those of the *Egyptians* themselves, it was only by Degrees that it went on improving, and in the End became so extremely great. *Egypt* was for a long Time shut up in itself, and so separated from all other Nations, that Nature itself seemed to have concurred in keeping it hid from the Rest of the Earth, as at first it had no Communication with any of the other People of the World. Long and toilsome Deserts encompass it on the *East* and *West*, where its greatest Extent is; dreadful and unpassable Mountains bound it on the *South*, and shut up its Passages to *Nubia*; In fine, the *Mediterranean* Sea on the *North*, seemed to deny it any Commerce on that Side, whilst Navigation was so little known, that it was for a long Time in those Ages retarded. *Egypt*, contented with its own Products, was then both unknown, and unprofitable to the Rest of the Universe; from which it drew no Advantage, until the *Greeks*, by risking the crossing to *Africk*, discovered in that Country, so long unknown, a Nation already polished and a Friend to Trade, that in Time engaged deeply in it, and became famous for its Knowledge both in this, and other liberal Arts and Sciences; which the Magnificence and bon Gout of their Kings, went on perfecting by inspiring an Emulation in their Subjects to improve in all by the Application of a suitable Reward,

as an Encouragement to those who exceeded in any of them; and it may be justly asserted, that they were there supported a much longer Time, than among all the other Nations of the Earth: But after *Egypt* fell under the Dominion of the *Mabometans*, all went to Decay; the Fertility of this charming Country diminished, as the Number of Inhabitants did, and these People were soon reduced to an extreme Misery under their pitiless Masters, and from a Nation once so industrious, are now become the most unpolished, since the Arts and Sciences were banished.

The making of Fire-Arms is of all Arts the best maintained in *Egypt*; and notwithstanding all others, and the Sciences are so fallen here, that it is hardly possible to discover any Traces of them, yet it always carries on a very considerable Trade with *Africk*, *Asia*, and even to *India* and *Europe*, and it must be allowed, that no Situation was ever more favourable for Trade, than that of this delightful Country.

*Cairo*, the Capital of *Egypt*, is seated on the *Nile*, above the seven Mouths, by which this River discharges itself into the *Mediterranean*; *Alexandria*, and *Rosetta*, distant from one another ten or twelve Leagues, and which are at two of the *Nile's* Mouths, serve as Ports to this famous City, about ninety Leagues distant: and it is before the one or the other, that the *European* Ships anchor to discharge their Goods, of which the greatest Part is designed for *Cairo*, and where they attend to take in their Reladings.

If all that has been said of the vast Extent of *Cairo*, to make it deserve the Name of *Grand*, beyond all other Cities, is not an Effect of Exaggeration in the *Arabian* Historians, or of that of the greatest Part of the *European* Travellers, who are equally suspected, certainly there is not a City in the World, that ever had or has, a better Title to it; but, not to enter into this Historical Discussion, there is no Room to doubt, that it has been, and still is, a Place of great Trade, though *Montieur Maillet*, *Sicard*, and other *French* Writers, will not allow it to be near so big, nor so populous as *Paris*.

The famous City of *Alexandria* is now reduced to three or four thousand Refugees, from the different Provinces of *Turkey*; *Rosetta* is all new built, of which the Foundation was not laid much above a hundred Years ago; and as the Canal, which goes from the *Nile* to *Alexandria*, only now serves to carry the Water from that River to this City, and the Lake *Marcotis*, the Necessity of housing the Goods sent from *Cairo* to *Alexandria*, and those which go from thence to *Cairo*, has probably not a little contributed to the Aggrandisement, or even to the Construction of *Rosetta*. And it frequently happening that the Goods, which were without the Bar, waited an Opportunity to get over it to *Alexandria* for Months together; and on the other Side, as those that came from this City, after having surmounted the Difficulties of the said Passage, could not be transported to *Cairo* in the same Vessels, it became absolutely necessary to build in this Part proper Places to put them under Cover, and to have Correspondents and Factors settled there. The Trade here is so much augmented, more especially since the Beginning of this Century, that this City is now one of the most powerful in *Egypt*, and carries on a considerable Trade in the Commodities that its Neighbourhood produces, with those brought in from *Cairo*, and those imported by the *Greeks* in their Saicks from the *Archipelago*.

The Merchandizes carried to, and exported from these Ports, being with a trifling Difference the same for *Cairo*, as for the two Cities that serve for its Storehouses, I shall not treat of them separately; but only remark, that the greatest Traffick, either in Purchases or Sales, is transacted at *Cairo*, with which the Business of *Rosetta* and *Alexandria* is nothing in Comparison.

The Goods exported from *Egypt* are, Benzoin, Bdellium, Gum-Arabick, Gum-Adraganth, Turbith, Myrrha, Abissinica, Incense in Tears, Storax, Aloes Succotrina, and Hepatica, Sugar in Powder and Loaves, and Sugar Candy, Sherbet in Casks, different Sorts of Cinnamons from *Ceylon*, *Malabar*, &c. Cassia, Cocoa, Coriander, Coffee, Myrabolans, Chebula, Bellerica, and Citrina, Nutmegs, Nux Vomica, Cardamoms, Ben, Tamarinds, Coloquintida, Pepper, Mace, Flax of all Sorts, Senna, Spikenard, Bastard Saffron, Cotton in Wool and Thread, Her-

modaclyls, yellow Wax, Ginger, Rhubarb, Elephants' Teeth, Wool washed, and unwashed, Ostrich and Herons' Feathers of different Sorts, Mummy, Sal-Ammoniac, Nitre, Roche Allum, Sea Lizards, Botargue, Mother of Pearl, blue Linens of several Species from several Places, painted Linens, Mogrebines, Mullins, and Cambresines; *Egypt* also produces some Stuffs, and other Commodities of various Materials, as of Wool alone, Wool and Silk mixed, &c. Ribbons, Handkerchiefs, Carpets, and Musk; there are likewise exported from *Cairo* and *Alexandria*, a Quantity of Buffaloes, Ox, and Cow Hides in the Hair, red and yellow Cordouans, Shagreen Skins, &c.

*Egypt* does not want the necessary Materials for making good Glass, but she sends them to *Venice*, from whence they return manufactured, though in small Parcels, as the *Turks* never drink out of Vessels of this Commodity. There are still made in *Egypt* a large Quantity of Linens differing in Quality, and Stuffs with Silk and Cotton, Silk and Gold, and even Velvets, though but very few of them are perfectly good.

The Merchandize which *Europe* sends to *Egypt* are, Agarick, white and yellow Arsenick, black Lead, Orpiment, Antimony, Sublimate, Quicksilver, Vitriol, Vermilion, Cinnabar, Lattin and Brass Wire, Tin, *Venetian* Steel, Lead, Paper, Sattins, from *Florence*; Cloths of all Sorts, Caps, Cochineal, Coral from *Messina* wrought and unwrought, red Tartar, Roche Allum, Dying Woods, and Hardware; besides which a vast Quantity of Glass Beads from *Venice* of all Colours, are sold at *Cairo*, and afterwards transported to *India* and all *Africa*, where the Women deck themselves with these Toys, as the *European* Ladies do with Diamonds and Pearls. There is also carried on at *Rosetta*, a very considerable Trade from *Constantinople* and *Satalia*, in white Slaves, brought from those two Cities, and in black ones, remitted there in Return from *Egypt*: All the Eunuchs in the *Grand Signor's* Seraglio, and in private ones, as well as almost all the other Negroes, that are in *Turkey*, both Men and Women, come from *Egypt*, where an Infinity of white young Persons of both Sexes are brought in Exchange for them; the white Slaves are very dear, when they are well made, being worth at least from 40 to 45*l.* Sterling, and some Girls have been sold for more than ten Times as much. The greatest Part of the Trade at *Cairo* is transacted by the *Jews* and *Arabians*, who are here in great Numbers, and who, with some *Turk* Merchants, carry on that of the *Red Sea*, from whence they draw the Majority of the afore-mentioned Merchandizes; and it is also the *Arabian* Brokers who interfere in almost all the Negotiations here.

This Commerce is carried on by *Suez*, a Town situated at the Bottom of the *Red Sea* on the *Egyptian* Coast, about forty-five Leagues from *Cairo*, and separated by a Plain of firm Sand, very commodious for Carriages. It is from this small Town, whose Port nevertheless is far from a good one, that the *European* Goods, carried there by Caravans, are at first transported to *Gedda*, a League Distance from *Mecca*, and afterwards to *Mocha*, a City in *Arabia*, at the Entrance of the Straits of *Babel-Mandel*, where the *Red Sea* communicates with the *Indian* Ocean; and it is also at *Suez* that all their Merchandize arrives, which the *Turk* Merchants of *Cairo* import from the *East-Indies*, and of which the general Staple for *Egypt* is at *Mocha*, where these Merchants have their Factors.

The Commerce of the *Red Sea* is carried on by Means of the *Grand Signor's* Ships, and of some particular Princes, which Ships are without Decks, or Artillery, so that nothing would be more easy than their Capture; a Bark, furnished with only four Guns, might make an immense Booty in this Sea. When they are hindered by contrary Winds from arriving at *Suez*, they traverse the *Red Sea*, and go to winter at *Coffei*, a small Place, and not much frequented, five Days' Journey distant from *Coptain*, a City in the *Tbebaida*; whilst these Vessels are at an Anchor, they send from the *Upper Egypt* to take their Lading, and carry them Provisions and Goods. The Road from *Coffei* to the *Nile* is two Days' Journey farther than that from *Suez* to *Cairo*; nevertheless the Expence is not much more, because the Camels' Hire costs less in the *Upper* than in the *Lower Egypt*, and the remaining Carriage being by Water is performed for very little.

Besides what *Eastern* Merchandize the *Europeans* export from *Cairo* and *Alexandria*, the *Turkish* Merchants also transport a very great Quantity to *Constantinople*,

*tinople*, and to other Cities of the *Grand Signor's* Territories, on their Saicks, and in which they also lade Rice, Flax, Sugar, and other Commodities of the *Egyptian* Growth; and the Total of this Commerce does not import less than between 7 and 800,000*l.* Sterling *per Annum*, and employs about an hundred, or an hundred and twenty Saicks in it.

The Trade of *Egypt* is also very great on the Part of *Asia*, from whence Caravans laden with Riches are continually arriving at *Cairo*, and which are conveyed by that Branch of the *Nile*, which falls into the *Mediterranean* near *Damietta*. it is from *Arabia* and the Neighbourhood of *Mecca*, that the white Balm comes to *Cairo*, so much valued by the *Eastern* Ladies, for preserving their Complexions, though there is but a very little of it unadulterated. Almost all the Soap that is used in *Egypt* comes from *Palyline*, where it is made of a very good Quality, though that of *France* is better; the Consumption of this Commodity is very great, because the washing with Lyes is not practised here.

The different Countries of *Africa* do not contribute less than the Rest of the World to enrich the Trade of *Egypt*; there is no Year passes in which some Caravans do not arrive from *Tunis*, *Algiers*, *Tripoli*, and even the remotest Provinces of that Part of the Earth; so that there is seen a continual coming in of Merchandize from all the Universe. Among these foreign Merchants who rendezvous at *Cairo* from all the inhabited Places of *Africa*, there is above all two Sorts, who ought not to be forgotten; of which the first was called *Croys*, living near the Isle of *Pheasants* on the Ocean, who come to *Fez* and *Morocco*, and from thence to *Cairo*, traversing the immense Deserts that lie in their Way. This Caravan, which is seven or eight Months on its Journey, touches also at *Tripoli* in *Barbary*, and brings Gold-Dust to *Cairo*; though they take Care not to sell it as such, for in so doing they imagine they commit a Sin, and therefore sell it for Silver, with which they buy Copper and Cutlery Ware, which they carry back with a certain Species of Shells, current in their Country for Money.

The second Sort of Merchants I just now mentioned are black like the first, and are full as singular; they have a Method of carrying on Commerce so particular that it is probable they are the only People in the World that practise it: In vain may any one offer them double the Value of their Goods, if he does not join the Elephant's Pizzle with it; that is to say, nothing but a good Drubbing will induce them to drive a Bargain, and therefore the Brokers of the Country, accustomed to the Manner and Expectations of this Gentry, do not fail to serve them according to their own Fashion, and always begin liberally to dispense their Blows, that they may terminate the Difference the sooner; after which Preliminary, these Negroes are the most contented People in the World, and there is nothing that may not be expected from their Good-Humour.

In fine, the *Nile* conveys to *Egypt* all that *Ethiopia* encloses most serviceable and precious; though it is not the *Ethiopians* themselves who carry on this Commerce, as these People very seldom trade any Distance from their own Country; but they sell their Merchandize to the Natives of *Nubia*, called *Barbarians*, who traversing the frightful Mountains which separate them from *Egypt*, bring those precious Effects there. Every Year a Caravan sets out from *Sannar* for this Journey; and though it is only composed of Merchants ragged and almost naked, who frequently want all Sorts of Conveniences in the toilsome dangerous Roads they have to go; it is impossible to conceive what Riches they are Bearers of. From several Parts of *Africa* there is brought to *Egypt* Gold-Dust, Elephants' Teeth, Ebony, Musk, Civet, Ambergris, Ostrich Feathers, divers Gums, and an Infinitude of other Merchandize, though this Traffick is not a little increased by the Remises of two or three thousand Blacks sent here to be sold, from all which it is easy to conceive what prodigious Sums these Caravans must return with, either in Specie or Goods.

It must naturally be concluded, that a Commerce so considerable cannot but bring immense Sums with it, and make *Egypt* one of the richest Parts in the World. It is true, this Country produces neither Gold, Silver, nor precious Stones; yet it is probable, that there is not a Spot upon Earth where these Productions of Nature are less rare, or more common. The Flax, of which a prodigious Quantity

tity of Linens are made, and from thence spread into all Parts of the World; the Cotton gathered in Abundance, and a great share of it worked up; the Wheat, Rice, Pulse, Sugar, Coffee, Sherbet, Hides, Morocco Leather, all Sorts of Drugs and Spices; that Sort of Earth called *Hanna*, so much esteemed, and of which there is so great a Demand in all the *Levant*, where it serves both Men and Women to paint their feet and Hands; all these draw immense Sums from *Europe*, *Asia*, and *Africa*; there is not a Year that 4 or 500,000 Dollars are not carried there from *France* and *Italy* only. From *Africa* there is annually imported from 1000 to 1200 Quintals of Gold Dust; and from *Constantinople* and *Asia* there comes more than a Million of Dollars, for the Purchase of Rice, Coffee, Linens, &c. It is true, that what the *Bashaw* pays yearly to the *Grand Signor*; what he sends to the Ministers of the Port to obtain a Continuance in his Post; what he and his Dependents carry off on his quitting the Government; that which the *Agas* levy, whom the *Sultans* send from Time to Time into this Country; what goes to *Damascus*, and all that which passes to *Mecca*, may amount to many Millions: However, it is certain that there remains near as much; and if the Natives, or even the *Turks*, who are under continual Apprehensions of being stripped, had not the Madness to bury their Money, by which Means it not only becomes useless to Trade, but is often absolutely lost, it is certain that few Kingdoms in the World would be richer than *Egypt*.

*Of the Commerce of the Archipelago.*

**BY** the Word *Archipelago* is to be understood a Cluster of small Islands, of which there are many in different Seas; but that I am now going to treat of is most necessary for the *European* Merchants to know, being as it were at their Doors.

This *Archipelago*, being the only one I believe that was known to the Ancients, lies in the *Egean* Sea; and the principal Islands are, *Argentiere*, *Milo*, *Siphanto*, *Serpho*, *Antiparos*, *Paros*, *Naxia*, *Stenja*, *Nicuria*, *Amorgos*, *Calcyra*, *Cbeiro*, *Skinofa*, *Raelia*, *Nio*, *Sikino*, *Folicandro*, *Santorin*, *Nausio*, *Mycone*, *Delos*, *Syria*, *Ibernia*, *Zia*, *Macronisi*, *Joura*, *Andros*, *Iinos*, *Scio*, *Metelen*, *Tenedos*, *Nicaria*, *Samos*, *Patmos*, *Fourni*, and *Skyros*, which produces Oil and Olives, Wine, Corn, a Sort of Lichen for dying Red, some ordinary; and some good Silk, Cotton, Figs, Mafts and Planks, Salt, at *Milo*, in vast Plenty and very cheap, Brimstone, great Quantities of Mill-Stones, at *Milo*, Flax, Cheese, Oxen, Sheep, Mules, Emery, Laudanum, Wool, Goat's Hair, Marble, Cotton, Cloth, a small Quantity of Pitch, Vallonea, Honey, Wax, Scammony, several Sorts of Earth, Capers, &c. which the Natives sell to the several *Europeans*, who go here to purchase them.

*Candia* is a large Island, situated at the Entrance of the afore-mentioned *Archipelago*, formerly known under the Name of *Crete*; it carries on a considerable Trade, and all the Christian Nations, who traffick to the *Levant*, have Consuls settled here. The chief Towns of the Isle are, *Canea*, *Retimo*, *Candia*, and *Girapetra*; the Neighbourhood of the principal Place, as well indeed as all the Rest of the Island, are covered with almost an infinite Number of Olive Trees, yielding very good Oil, which is the principal Product of it, and in such Quantities, that in a common Year are gathered at least three hundred thousand Measures, of eight *Ocques* and a Half, and the *Ocques* of three Pounds two Ounces; here are likewise purchased, Wine, Gum Adraganth, Laudanum, Wool, Silk, Honey, Wax, Cheese, Cotton, and Wheat.

*Salonica*, the ancient *Thessalonica*, is a Sea Port seated at the Bottom of the Gulf, bearing the same Name, in the *Archipelago*. All the *European* Nations Trade here, but the greatest Commerce is from *Italy*. This Place is very fertile in Corn, and I have seen some very good Wheat from hence, though not quite so clean as it should be. The other Merchandizes of *Salonica* are, Tobacco, of which whole Ship Loads are exported at a Time, Hides, Cotton in Wool, better than that of *Smyrna*, yellow Wax, brought here in large Quantities from *Turkish Valachia*, unwashed Wool, and some coarse Woollen Stuffs, for the clothing of the Poor People and Soldiers.

*Of the Commerce with the Coast of Barbary.*

WHAT is called *Barbary*, is that vast Maritime Part of *Africa*, which extends for more than six hundred Leagues from *Egypt* to the Straits of *Gibraltar*, and a little beyond them into the *Atlantick* Ocean. The principal Kingdoms, or Republicks, which divide the Coast of *Barbary*, are *Tripoly, Tunis, Algiers, Morocco*, and *Fez*; the Government of these two last is entirely monarchical, and subject to the same Prince; that of *Tripoly* is Republican, and those of *Tunis* and *Algiers*, a Mixture of both. All these States have a Number of Ports in the *Mediterranean*; and the Kingdoms of *Morocco* and *Fez* have also some on the Ocean, which are equally serviceable for the Christians' Trade, and for a Retreat to their own Cruizers.

The most considerable of these Ports, and where the greatest Trade is transacted, and Consuls of different Nations reside, are *Tripoly* and *Gouletta*, which is that to *Tunis, Algiers* and *Sallee*, in which last the chiefest Trade of *Fez* and *Morocco* is carried on, although a good deal is done at *Tetuan*, and some at *Arzilla, Alcazar, Axanor, Saphia*, and *Santa Cruz*. The Kingdom of *Algiers* has, besides its Capital, *Tremecen, Constantine, Boua, Bugia, Giger, La Calla, Cape Rosa, Collo*, and that called the *Bastion of France*, near the Gulf of *Storacourouri*.

And besides the *Gouletta, Tunis* has *Bizerta* and *Port Farina*, though the *Tripolines* have only the Port of their City, with some few Places on the Coast, where none, or hardly any Trade is carried on.

The *European* Merchants have Warehouses only in the principal Cities, and rarely land in any others, on Account of the Impositions commonly practised there; trading among these People, as the Saying is, Pike in Hand, being always on their Guard, or otherwise they are surely abused or cheated.

I have already mentioned, in a former part of this Work, the Exports from *Barbary*, as well as the Goods they take off, and have little to add thereto, except something concerning the Trade of *Morocco*, which differs in several Respects from the others.

*Sallee*, as above observed, is the Port in the Kingdoms of *Fez* and *Morocco*, of the greatest Commerce; the Entrance of the River *Guerou*, on which it is built, has a Bar of Sand that changes according to the Winds that blow, which is of a vast Inconvenience to the trading Vessels, though it serves as a Resource to the *Salletines* when pursued by the *Maltese*, or other Christians, who are more in Safety here than in any other Port of *Barbary*.

The *European* Merchandizes are unladen immediately on their Arrival, into the Christian Merchants' Warehouses there, and afterwards sold Wholesale to the *Moors* or *Jews*, who send them to their Correspondents at *Morocco, Fez, Mequinez, Tarudant* and *Illoe*. The greatest Part of the Merchandize imported is consumed in these five Cities, particularly at *Mequinez*, twelve Leagues from *Fez*, and has the largest Magazines of Corn, Hides, and Wax, which are the chief Commodities of the Growth of *Morocco*, and the States dependent on it. And what Goods remain undisposed of in the said five Places are sent to the Provinces of *Sara, Dras*, and *Tonet*, in the Kingdom of *Taflet*, where the *Arabians* take them in Truck for Gold Dust, Indigo, Ostridge Feathers, Dates, and sometimes a few Elephants' Teeth; of which last, Gold, or the Feathers, none are produced in the Territories subject to the King of *Morocco*, although the Christians yearly extract from them a great Quantity of that rich Dust and Plumes. The Gold and Ivory is brought by the *Arabian* Troops, who go to procure them, as far as the Kingdoms of *Sedan* and *Gago*, which are Part of *Guinea*, and are above four hundred Leagues from *Morocco*. The Ostridge Feathers come from *Sara*, or *Dara*, a Country to the South of *Morocco*, towards the Sea of *Sand*, where the *Moors* and *Arabians* kill them in great Numbers, and sometimes take them alive,

and bring them to *Morocco*, which has led many Authors and Geographers into the Error of supposing them Natives of this Empire.

The *Benizequers*, a People of *Africa* in the Province of *Habat* in the Kingdom of *Fex*, have among them a Number of Weavers and Curriers, who carry on a great Trade in Linen and Hides; and the other Commodities in which they deal are, Honey, Wax, and Cattle.

*Santa Cruz*, in the Kingdom of *Morocco*, on the Confines of that of *Sus*, near to Mount *Atlas*, is a small Town, though it at present carries on a pretty good Trade, more especially to *Marseilles*, where Imports and Exports are such as are before mentioned.

*Algiers*, Mr. *Savary* says, contains above three thousand foreign Families which Trade had drawn there, though he supposes it principally arises from the Sale of the Prize Goods, continually bringing in by their Privateers. The Country produces plenty of Corn, besides the other Commodities peculiar to *Barbary*, and their Imports consist of Gold and Silver Stuffs, Damasks, Draperies, Spices, Pewter, Iron, hammered Copper, Lead, Quicksilver, small Cordage, Bullets, Linens, Sail-Cloth, Cochineal, Tartar, Allum, Rice, Sugar, Soap, Galls from *Aleppo* to *Smyrna*, Cotton in Wool, and Thread, Copperas, Aloes, Woods for Dying, Cinnamon, Vermilion, Arsenic, Gum Lack, Aniseeds from *Malta*, Brimstone, Opium, Mastick, Sarsaparilla, Incense, Spike, Honey, Wool, Paper, Glass, Beads assorted, &c. a small Quantity of these Merchandizes, however, sell here, although the Natives are always wanting them, as Duties must be satisfied, Recoveries difficult, a Retreat of the Property uncertain, and Imposition very frequent. Those, therefore, who need any of these Goods wait till the last Extremity, in Hopes of some Prize being brought in.

*Couca* is a small Kingdom, subject to that of *Algiers*; its principal Trade consists in Corn, Olives, Oil, Figs, Raisins, Honey, and Wax; here are also some Iron, Allum, Sheep, and Goats for Exportation.

The *Bastion of France* is a small Fortification built at the Extremity of the Kingdom of *Algiers*, on the Side where its Frontiers join with those of *Tunis*. The *French*, to whom it belongs, and from whom it received its Name, have been in Possession of it ever since 1561, when *Soliman II.* made them the Concession, after a previous Agreement with the Divan of *Algiers*, and the petty Princes of the Country, for which they pay 39,500 *French Livres* yearly.

*La Cassa* is the true Port to the *Bastion*; and besides these, the *French* have *Cape Rosa*, *Bonna*, and *Collo* in their Grant, from all which Places, they annually Export about fifty thousand Measures of Wheat, eleven or twelve thousand of Barley, five or six thousand of Beans, and some other Pulse, above eighty thousand Skins, a little Suet, above five hundred Quintals of Wax, and much the same Quantity of Wool. It is likewise here that the *French* have their Coral Fishery, of which they take from five to six hundred Quintals yearly; and all these Commodities are sent to *Marseilles*, except the Pulse or Grain, which the *Italian* Markets take off, and more especially *Genoa*.

The *Bastion* has been for some Years past united to the *French African* Company, or the *Cape Negro* Company, whose Exports from the Place of their Denomination, are like those from the *Bastion*, viz. Corn, Hides, Wool, and Wax, of which in a good Year their Extracts are considerable.

Between these two Places of the *Bastion* and *Cape Negro*, subject to *Tunis*, is the Isle of *Tabarque*, dependent on *Sardinia*, but has for a long Time appertained to Messrs. *Lomellini* of *Genoa*, in Property, who pay a Sort of Tribute to *Algiers* and *Tunis*, to preserve the Inhabitants in the free Enjoyment of the Coral Fishery, and do the same to the King of *Sardinia*, though their Island is well fortified, and free from Insults. It likewise carries on a tolerable good Trade on its Coast in Corn, Hides, and Wax.

#### Of the Commerce of AFRICA.

THIS is one of the four Parts of the World, bounded by the Ocean, the *Mediterranean*, and the *Red Sea*, which make a Peninsula of it; and a great Isthmus, between *Suez*, at the Extremity of the *Red Sea*, and *Damietta*, on the *Mediterranean*, joins it to *Asia*. This situation gives it a vast Extent of Coast, on which

which only very little Heats that which the

which only the *Europeans* have any Traffick; the Inland of their Continent being very little known, either from the Nature of the Country, the insupportable Heats that generally reign here, or on Account of the Inhabitants' Ferocity, of which the major Part are Savages.

And as a Connexion of Matters, which could not conveniently be separated in treating of the *Mediterranean Trade*, led me to describe that of *Cairo*, *Alexandria*, *Rosetta*, and all the Coast of *Barbary*, that make a considerable Part of *Africa*, I shall have no Occasion to repeat any Thing concerning them here; but under this new Title proceed to give a general Idea of all the Places, where any Commerce is transacted on the other Coast of *Africa*, and of the Establishment that the different Nations of *Europe* have there.

In regard to the Trade of the *Red Sea*, as it in some Sort appertains more to *Asia* than *Africa*, I shall omit speaking of it till I come to treat of the *Asiatic Commerce*, and at present confine myself to the *African* only.

Very little or no Trade has been carried on, nor any of the *Europeans* had any Settlement on the said Coast, from the Kingdoms of *Morocco* and *Sus* to the Neighbourhood of *Cape Verd*; near which Cape, and in the Space between the River of *Senegal*, which is one of the Branches of the *Niger*, and that of *Sierra Leona*, the *French* and *Portuguese* have some Factories; as the *English* and *Dutch* formerly had, but the one abandoned them, and the others yielded them to *France*.—Since writing the above, the *English* have driven the *French* from all their Settlements on the Coast of *Africa*.

The Coast of *Sierra Leona* is visited by Ships of all the four Nations, though solely the *English* and *Portuguese* have any Establishment here; and it is the first only who reside near *Cape Misirado* between the Coasts of *Sierra Leona*, and those of *Malagueta*, where they have about ten or twelve Houses in all.

The *French* carry on some Trade on the Coast of *Malagueta*, otherwise named *Greves*, though without any Residence, and on the *Ivory Coast*, which joins to this last-mentioned, all the Nations of *Europe*, that are engaged in the *African Trade*, transact a great Deal here in Elephants' Teeth; though some of them, having no Settlements, are obliged to negotiate with the greatest Caution, very rarely putting Foot ashore for fear of the Natives, who are Cannibals, fierce, and untameable.

The *Gold Coast*, which is the next, is the most frequented of any in *Africa* by the *Europeans*; and to preserve the Trade of the rich Metal, from which it is denominated, there is hardly any of them who have not Habitations here, and some of them possess even Towns and considerable Fortifications.

*Ardres* is a small maritime Kingdom joining to the *Gold Coast*, though it affords very little for Trade but Slaves: And *Benin* follows, making a Part of the Coast of the Gulf of *St. Thomas*. The Isle of the same Name under the Line has belonged to the *Portuguese* ever since they drove the *Dutch* out, who had before taken it from them, whilst united with the Crown of *Spain*. The former also have some Settlements at several Places in the Gulf, and particularly at those which are in the Neighbourhood of the Kingdom of *Congo*.

It is from this Kingdom, and that of *Angola*, that the best Part of the Negroes transported to *America* are extracted, and where each Nation goes to seek the Number they want. The *Portuguese* are in a Manner Masters of these two Kingdoms, where they are both feared and loved by the Natives; however, their Authority does not extend to hinder the *English*, *French*, *Dutch*, &c. from carrying on the Slave Trade with Ease and Advantage.

The *Casraria*, or Country of the *Cafres*, begins almost where the Coast of *Angola* ends, and continues to the *Rio de Spirito Santo*, where that of *Sofula* commences. The *Europeans* have no Traffick in all this vast Extent of Coast, though it is the most celebrated of all the *African* coasts, on Account of the Cape of *Good Hope*, which is situated about the Middle of it.

The *Dutch* have a Settlement at the Cape, though not so considerable for any great Advantage arising to them from their Trade with the Natives, as from its serving for a Rendezvous and Place of Refreshment to their *Indian* Fleets both going and coming.

After

After the *Cafrean Coast*, comes that, as I observed before, of *Sofala*, where none but the *Portuguese* are settled, as they also are at *Mozambique*, which joins next, and which has before it the great Isle of *Madagascar*.

In fine, it is also the *Portuguese* alone who carry on the whole Trade of *Melinda*, though it is the last Place they engross to Cape *Guaydajur*, which being doubled gives an Entrance into the *Red Sea*. The Coast of *Ajan*, or Desert Coast, which extends from the Kingdom of *Melinda* to the said Cape, produces nothing fit for Trade, having besides hardly any Inhabitants to carry it on.

I have not mentioned any of the Isles of the *African Coasts*, except those of *St. Thomas* and *Madagascar*; but in the subsequent Part of the Work, none shall be neglected that contributes any Thing to Trade; and at present I shall enter into a Detail of that wherein the *Europeans* are concerned on all the said Coasts, beginning it at Cape *Verd*.

*Of the Trade of the African Coast from Cape Verd to Sierra Leona.*

**C**APE *Verd*, so named from the Ever-green Trees that cover it, is situated between the Rivers of *Senegal* and *Gambia*, which are two of the chief Mouths of the *Niger*, a River similar to the *Nile*, with which, as one may say, it divides all *Africa*; this traversing the one Half, before it falls into the *Ocean*, as the *Nile* does the other Half in its Progress to the *Mediterranean*.

The Trade practised in going up these two Rivers, either on the Coasts of *Senegal*, or on those which extend from *Gambia* to the Cape of *Sierra Leona*, consists in Gold Dust, Ivory, Wax, Hides, Gums, Ostridge and Heron's Feathers, Musk, Rice, Millet, Indigo, Cotton Coverings for Negroes, and these Slaves themselves.

The *Portuguese* have had great Settlements on all these Coasts, but at present their Habitations are something more inland, especially going up the River of *St. Domingo*, which is about thirty Leagues from that of *Gambia*, where their Residence is at *Cachoe*, the Place where the *African Company* of *Lisbon* have their Magazines, for depositing the *European* Merchandizes, and those they collect of the Country's Produce, brought down the said River, which is navigable for above two hundred Leagues, being annually above 100,000lb. of Wax, 50,000 of Ivory, and from 800 to 1000 *Negroes*, which they send to the Islands of *St. James* and the *Brazils*, besides those they send to the *English* and *Dutch*, who come here yearly to seek them.

The *Portuguese* here carry on their Commerce in Barks of about forty Tons Burthen, with which they trade up the Rivers *Cazuma*, *Pongues*, *Nonnes*, and even to that of *Sierra Leona*; the first furnishing them with their greatest Quantity of Wax; *Pongues* and *Nonnes* with Indigo; and *Sierra Leona* with Fruit, which they call *Coffe*, with which they drive a great Trade; and from all these Places they also get a Quantity of Ivory and Slaves, which they truck against the afore-mentioned *Negroes*, Clothing, Brandy, Iron, Pewter, &c.

The *English* had formerly many Habitations, and some Forts on the River *Gambia*: That called *St. James*, belonging to the *South-Sea Company*, situated a little higher than its Mouth, was taken and destroyed by the *French* in 1695.

The River *Gambia* has two Openings, the one to the North and the other to the South; in which latter, being most used, Ships of three or four hundred Tons may enter, but cannot go up it above six or seven Leagues; though Vessels of a hundred and fifty Tons may go up as many Leagues to *Majugard*; and the *English*, with lighter Barks, have often proceeded yet a hundred and fifty Leagues higher, from whence they have brought back a Quantity of Slaves, Gold, and Ivory, in Time of Peace, to *Majugard*, where they had a Magazine, and their Fort with their principal Habitation was in an Isle of the River about seven Leagues from its Mouth.

*Cantory* is a Kingdom of *Africa*, in *Negro Land*, on whose Coasts the *French* have a tolerable good Trade, and a Fort for its Security and Protection. The principal Traffick is in Skins and Hides, for which Duties are paid at *Beybouta*.

*Calbaria*, a Province in *Africa*, where the *Dutch* have a considerable Trade, chiefly carried on at the Town of that Name, their Fort being there, and their

Traffick in Slaves a good one, though the greatest Part of the Natives on this Coast are Man-Eaters. The Exchange for Slaves is unpolished Copper, or small Bars of hammered Brass, each weighing a Pound and a Quarter, and about two Feet and a half long, of which fourteen or fifteen are commonly given for Slaves of both Sexes, and different Ages, one with another; of these the Natives make a Sort of Lattin Wire, which they employ in Collars and Bracelets to adorn themselves; and in Case any of these latter are carried ready made from *Europe*, they use them there as Money.

## S E N E G A L.

**T**HE *French* Company of *Senegal*, united to that of the West in 1718, and after the Year 1719 swallowed up in the great *India* one, have two principal Establishments on this Coast; the one at the Isle of *Goree*, and the other in the Isle of *St. Lewis*, at the Mouth of *Senegal* River. The *Dutch* were the first who occupied the Island of *Goree*, and built there the Forts of *St. Francis* and *St. Michael*, though under their first Masters they had other Names. The *French* seized it in 1678; in 1692 the *English* took it from these last, who the succeeding Year again repossessed it; and the *Senegal* Company have occupied it ever since, and from hence carried on a Part of their Trade, of which, however, the greatest Share always continues to be transacted on the Coast of *St. Lewis* Isle, and that of the River *Senegal*. These Places were taken by the *English* in 1758; and by the Xth Article of the Peace of *Verfailles* in 1763, the Island of *Goree* was restored to *France*, the Trade of the River *Senegal*, with the Forts and Factories of *St. Lewis*, *Podar*, *Galam*, were ceded to the King of *Great-Britain*: And by 4 *Geo.* III. C. 20. the Fort of *Senegal* and its Dependencies were vested in the *African* Company.

All that the *French* Company negotiated, in the whole of these Settlements, *Senegal* included, might amount in a common Year to six thousand Bull and Ox Hides, forty or fifty Quintals of yellow Wax, seven or eight thousand Pounds of Elephants' Teeth, two thousand Cotton *Negro* Vestments, twenty-five or thirty Marcs of Gold, and fifty thousand Slaves. It also obtained some Ostrich and Herons' Feathers, Ambergris, Civet, a Quantity of coarse Cotton Cloth, blue and white striped; which were resold on the Gold Coast. The chief Traffick of Gum is with the *Moors*, who bring it on Horses to a Place called *Terrier Rouge*, at fifty Leagues from the Coast, going by the River of *Senegal*; of which the Sales begin in the Month of *April*, and last about six Weeks.

Higher up on the Coast is found the Kingdom of the *Jalofes*, and that of the *Ceratique*; and it is to this last that the Customs are paid for the Liberty to navigate and trade in the River of *Senegal*.

The *English* and *Dutch* have very considerable Dealings with these *Jalofes*, and the Places of their principal Transactions are *Camino*, *Jamefil*, and *Geroepe*. The Months of *March* and *April*, with those of *November* and *December*, are the most convenient ones for this Commerce.

The Merchandizes proper for *Senegal* and *Gambia* are in Part the same, and Part different. Those for the River of *Gambia*, particularly for the *Jalofes*, with which the *Dutch* commonly lade their Vessels for this Traffick, are Bars of Iron, twenty-eight or thirty to weigh about ten Quintals, Brandy, Beer, Copper Basons of different Weight, Copper Plates of about a Pound, Yarn, coarse narrow blue Serges, four threaded Cloths, red, yellow and blue Ratines, red, yellow and white combed Wool, white, blue, red, and yellow, Glass Beads of various Sorts, rough Coral, Sabres, Copper Trumpets, red Caps, round Padlocks, Rock Crystal, Sailors Knives, coarse Shirts, and fine ones with Lace at the Bosoms and Wrists, Suits of Cloths from *Harlem*, *Silesia* Linens, and others both of Hemp and Flax, fine Cotton Linen, fine and common Paper, Earthen Pots white and blue, Blankets of *Leyden*, *Irish* Mantles, *Morocco* Leather Shoes, Hats, brown Fustians, coarse white Thread, Glass Bottles with Pewter Stoppers, and all Sorts of Needles.

The Ladings of the *French* Ships for *Senegal* were in Part composed of the aforesaid Goods; and besides them of black Cotton Linens, calendered Linens of

*Rouen*, Kettles from four to ten Pounds' Weight; some few Trinkets of Silver, yellow Amber, Pewter, little Looking-Glasses with painted Frames, some Coin, large red Coral, Taffeties, Crimson, cherry Colour, yellow, and blue, though but few of them, a few Cloves, Sambouc Wood, and the Iris of *Florence*, for Presents to the *Negro* Kings, as also a few Ells of Scarlet Cloth for the same Purpose.

Arms, such as Musquets, Musquetoons, Fowling Pieces, Pistols, double-barrelled Guns, Gunpowder, leaden Balls, Shot, and Flints, are equally proper for *Gambia* and *Senegal*; but one of the best Merchandizes, and of which the Sales are the most considerable, are the *Mahlivean* Shells, called *Cauris* in *India*, and *Bouges* on the Coast of *Africa*.

All these Merchandizes, and some others which will be hereafter mentioned, are equally proper for the Trade of all the other *African* Coasts, excepting the above-mentioned Shells, which are only current from *Cape Blanco*, to and including *Juda*, or *Xavis*, on this Side the River *Ardes*. But *Angola*, where the greatest Purchase of *Negroes* for *America* is made, does not admit these Shells in Trade. It is true, that the Inhabitants of *Congo*, do also make Use of Shells, by them called *Zimbi*, or *Zimbi*; but these are carried them only by the *Portuguese*, who are in a manner Masters of all this great Kingdom.

*The Commerce of the African Coasts, from the Cape of Sierra Leona, to the River of Ardes.*

IT is from the River of *Sierra Leona*, that the Coasts of *Malaguete*, or *Malaguette*, begins, so called from a Sort of Pepper, that makes the principal Trade of the *Blacks* of this Part of *Africa*; the *English* and *Portuguese* share this Traffick; the first having a Factory conveniently established in one of the Islands, and the other within Land.

The Merchandize this Country affords them, are Rice, Elephants' Teeth, the best on all the Coasts, Civet, and a little Ambergris. The Capes of *Monte*, and *Miserado*, would likewise be good Places for the Ivory Trade, could the Inhabitants be made tractable, as the River *Jonco*, or *del Punto*, would, did not the Sea break in such a Manner, as to render anchoring there very dangerous.

The *Ivory Coast* joins to the preceding, and produces only those Teeth and a little Gold for Trade. Iron Rings and small Bells are what most pleases these Barbarians from *Europe*; and the Places of the greatest Trade on this Coast, are the *Grand Drouin*, situated in an Isle formed by a small River; *Groma*, *Tabou*, *Little Tabou*, *Tao*, *Rio Fresco*, *St. Andrew*, *Giron*, *Little Drouin*, *Bortrou*, *Cape la Hou*, *James la Hou*, *Wallockè*, and *Gammo*.

The *Gold Coast* begins at the River *Sueiro da Castos*, and is about a hundred and thirty Leagues long East and West. This Coast is above all others of *Africa* the most frequented by the *Europeans*, and where the *English*, *Dutch*, and *Danes* have very considerable Settlements: The great Quantities of Gold found, and sold on this Coast, have given it its Name, and its chief Market Places are, *Acbim* or *Asime*, *Acera*, called also *Tafon*, *Acanni*, *Acheroa*, and *Fetu*. That of *Asime* is the best, and of the Standard of twenty-two or twenty-three Carats.

*Abusson* is the first Kingdom on this Coast westward, which extends only about six or seven Leagues along Shore, though its Bigness within Land is unknown. On sailing Eastward, the Villages and little States of *Albiani* and *Tabo* are met with; the first six Leagues from *Iffini*, and the other ten. The Ships that trade along the Coast come to an Anchor before these Villages, and hoist their Colours, on which the *Negroes* immediately come off, and on finding them Friends, go aboard, where they are commonly regaled with a Glass or two of Brandy, and an Enquiry is made from them, whether any Ships have been lately on the Coast, and what Goods they have got to dispose of.

The Kingdom of *Guamere* is the nearest to *Cape Apollonia*, and though its Sea Coast be very contracted, it is pretty considerable within Land, and drives a great Trade, either from Gold Mines it has itself, or with what it collects by its Commerce, with those that possess them, as this Metal is very common here; and the Traffick in Ivory and Slaves is not a little. At eight Leagues to the East of *Cape St. Appellina*, is the Village which the *Negroes* call *Asem*, the *French* *Asime*,

*Asime*, and the Years Matter.

After *Asime* compose it. a Fort, which Master of the coming to set improve the and is one of the Landing and well cult a great deal c trou, about t to the East of

Althoug Rest of the and the Na

The Vil have a For

The Kin Village is a Fort herc

*Axime*, and the *Dutch Atebin*, of which these last have been for above a hundred Years Masters.

After *Axime*, is *Cape des Trois Pointes*, called so from three Mountains which compose it. The Subjects of the King of *Prussia* were settled here, and had a Fort, which they had obtained in 1720, and delivered up to the *Negro* King, Master of the Country, who acquainted the *French* therewith, and solicited their coming to settle there, with Offers of an exclusive Trade; but they neglecting to improve the Opportunity, the *Dutch* took it in 1725, and continue to enjoy it, and is one of the most considerable Places on the Coast; the Anchorage is good, the Landing easy, without any Bar; the Country is healthy, abundant, fertile, and well cultivated. Besides the Gold Trade, which is very considerable, here is a great deal of Ivory, and many Slaves. The *Dutch* have another Fort called *Botrou*, about two Leagues to the Eastward of the Cape; and another at six Leagues to the East of *Botrou*, named *Witsen*, pretty near to *Tacoravi*.

*Sama* or *Chama*, is one of the chiefest Places on the Gold Coast, being near four Leagues East of *Tacoravi*; it contains about two hundred Houses, and the *Portuguese* had here formerly a Factory, and a Redoubt; but the *Dutch* seized both the one and the other, and carry on a considerable Trade here, it being the Rendezvous of all the neighbouring Negroes.

The Kingdom of *Gnaffo*, or *Commendo*, being four Leagues to the East of *Sama*, this with *Fesfu*, or *Fetu*, and *Sabou*, made formerly but one Kingdom, and was then powerful and rich, but, since its Division, is greatly diminished. The *Negroes* call it *Commenda Ajata*, and the *Portuguese*, *Aldea de Torres*, though it is yet known under the Name of *Little Commendo*, to distinguish it from *Gnaffo*, which is further in Land, and denominated *Great Commendo*. All this Country is extremely fertile, and abounding in every Thing necessary for Life. At *Little Commendo*, is a celebrated Market kept daily, the best furnished of any one in *Guinea*, and it may be in all *Africk*.

Although the Gold Trade is not so considerable here, as at the Places before-mentioned, and at the Mine, &c. which I shall hereafter speak of; yet the *French* have notwithstanding made a Settlement that is of infinite Service to them, for furnishing their Ships with Refreshments in their Voyages to the East; and in their Return to *France*.

The Castle of the Mine, known by the Name of *St. George de la Mina*, is the principal Factory, and the best Fortrefs which the *Dutch* have on the Gold Coast, being the Residence of their Director, and general Commandant, and the Centre of their Commerce, on which all their other Settlements depend. The Soil is infertile, and therefore the Miners are obliged to the *Blacks* of *Commendo*, *Fetu*, and *Cape Corfe*, for their Provisions; which last Place lies about three or four Leagues from the Mine, and has for some Years past been the chief Settlement of the *English* in these Parts; it is the Residence of the Director General of the *London* Company, who has the Authority over all the Settlements which this Nation has in *Guinea*; and the Fortifications are here so strong, as to have resisted the *Dutch* Fleet, under the Command of Admiral *Ruyter*. The Village occupied by the *Negroes* is the most considerable of the Kingdom of *Fetu*; it is composed of more than two hundred Houses, and has a diurnal Market, where every Thing may be had for Money that a Person can wish for.

By the Agreement which the *English* and *Danes* made on their joint Capture of this Place from the *Dutch*, it was stipulated that the *Danes* should have a fortified Settlement here, called by them *Fridericbourg*, which is to the North-East of the Village, and is commanded by the principal Commissary of the *Danish* Company, which carries on a considerable Trade here.

Although the Fort and Village of *Cape Corfe* are in part dry and arid, the Rest of the Kingdom is very fertile and abundant, the Lands are well-cultivated, and the Natives, who are numerous, are very laborious.

The Village of *Moure* is a little League from *Fridericbourg*, where the *Dutch* have a Fort with the Name of *Nassau*.

The Kingdom of *Fantin* is extremely rich, populous, and potent; the greatest Village is *Cormantin*, about three Leagues from *Moure*; the *English* had formerly a Fort here taken and retaken by the *Dutch*, with whom at last it remained, and they

they have here a good Trade, as they have at *Adia* and *Jamohia*, which they have fortified. The Country is rich in Gold; the Inhabitants laborious, Lovers of Trade, of which they have learned the Secret: and Oeconomy from the *Dutch*.

*Ackram* or *Acron*, a Town in *Africk* on the *Guinea* Coast, is not far from *Bregu*, or *Berku*, and whose principal Traffick consists in Gold Dust, which the Inhabitants give in Exchange for red Cloth, Pots, Kettles, Basons, and other Copper Kitchen Utensils.

*Aguvanna*, another *African* Kingdom on the Gold Coast, carries on much the same Traffick as the Preceding, with the Addition of some few Slaves.

Of *Acara*, *Lampi*, *Juda*, and *Ardres* or *Ardra*.

**A***CARA* is a large Kingdom, seated at the Extremity of the Gold Coast, where the *English*, *Dutch*, and *Danes*, have each a considerable Fort, which render them Masters both of the Gold and Negro Trade, and therefore obliges the *French* to deal with *Lampi*, *Juda*, and *Ardres*, even when at War with these Nations; the latter of which borders on the Kingdom of *Boneri*. Before that *Moure* and *Cormanteri* had attracted the greatest Part of the Business transacted on the Gold Coast, the Village of little *Acara*, situated at the End of it, was the Place where most of the *European* Merchandizes found Dispatch; this Village only furnished a third of all the Gold that the *Europeans* traded for on this Coast, and the Negro Trade is still pretty good here, as between three and four hundred may annually be purchased on reasonable Terms.

The Commerce of *Lampi* and *Juda*, a small Kingdom between *Acara* and *Ardra*, is not inconsiderable, especially for the Purchase of Negroes. In the Years 1706 and 1707, the *French* Assiento Company bought here two hundred and fifty each Voyage, in Truck for *European* Goods from forty-five to fifty *French* Livres per Head, though in the Kingdom of *Ardres*, from whence near three thousand Slaves may be annually extracted, they cost about eighty ditto; and these with Provisions, are the only Articles of Commerce in this Kingdom for Exports; the Goods esteemed most here for Truck, are the biggest Glass Beads; large Crystal Pendants; large gilt Cutlasses; coloured Taffeties; silk Stuffs striped and spotted; fine Linen; Laces; fine Handkerchiefs; with Buttons; Iron Bars; a fine thin woollen Stuff called Bouge; Copper, cylindrical, and pyramidical Bells; long Coral; Copper Basons of various Sizes; Muskets; Brandy; large Umbrellas; gilt Looking-Glasses; *China* Taffeties, and other Silks from that Part; Gold and Silver Dust; *English* and *Dutch* Crowns.

Of the Trade on the Coast of the Kingdom of *Benin*.

**T**HE *Europeans* trade but little in this Kingdom, although it has two hundred and fifty Leagues of Coast, and the Inhabitants are less savage than the Negroes of *Guinea* and other Parts of *Africa*. The Merchandize found here are Cotton Habits striped according to their Fashion, afterwards sold on the Gold Coast, and others blue, proper for the Trade of the River *Gabou*, and on that of *Argola*; Jasper Stones; female Slaves, for they will sell no Men; Leopard Skins; Pepper and Acori, which is a Species of blue Coral that grows under Water, in the Form and Manner that other Corals do. In Exchange of these Commodities are given Gold and Silver Stuffs; Red and Scarlet Cloths; Red Velvets; Violet coloured Ferrets; *Harleim* flowered Stuffs, well coloured; Red Glass Ear-Rings; Looking Glasses with gilt Frames; Glass Beads; Bouges; fine Coral; Earthen Drinking-Pots striped with Red; all Sorts of Cotton Thread, and Linen; Oranges; Lemons, and other green Fruits candied; Brads Bracelets weighing five Ounces and an Half; Lavender; and Iron Bars.

The *Dutch* are almost the only Traders with these People, as it is they alone among all the *Europeans* who have a Warehouse here, which by the King's Permission is established at *Golou*, a large Village on the River of *Benin*; and this Commerce they enjoy so uninterruptedly, as the Country produces neither Gold, Ivory, Aides, Gum, Wax, nor Slaves, as above-mentioned, though the Natives are much

current an

much more civilised, honest, and if the Expression may be allowed, polite than any of their Neighbours.

Captain *Snelgrave*, in his Treatise of *Guinea*, published in 1734, says, that the River *Congo*, in the sixth Degree of southern Latitude, is the most distant Part that the *English* trade to, whose Commerce here is so greatly augmented since the Peace of *Utrecht*, that instead of thirty-three Ships under those Colours that in 1712 were on the coast of *Guinea*, it was demonstrated to the Commissioners of Trade, that in 1725 there were above two hundred Sail, to the great Advantage of Navigation and our *American* Colonies.

Our Author recounts the Ruin of the Kingdom of *Whidaw*, *Fida*, or *Juda*, of which *Sabee* is the Capital, situated about seven Miles from the Sea; and here the King had granted to the *Europeans* commodious Houses for their Factories, protecting both their Goods and Persons. The Port was open and free to all *European* Nations, who came here to purchase Slaves; and this Trade was so considerable, that the *English*, *French*, *Dutch*, and *Portuguese*, exported above twenty thousand yearly from this Kingdom and its Neighbourhood; but the Liberties which the Natives enjoyed of having many Women, and their abandoning themselves to Luxury and Pleasure, so effeminated them, that although they could bring above an hundred thousand Men into the Field, their Cowardice was so great, as to suffer two hundred Enemies to drive them from their Capital, and to see uninterruptedly their whole Country destroyed by a Nation, which they had formerly despised.

## O F C O N G O .

**T**HE *Portuguese*, who discovered this Kingdom in 1484, and settled here in 1491, are the only *Europeans* that trade here; all other Nations only stopping for Refreshments, which they purchase of the Blacks, in Exchange for small Looking-Glasses, Beads, &c. The principal Settlement of the *Portuguese* is at *Loanda*, the Residence of the Vice-Roy, and, as may be said, the Capital of what the Whites possess in this Kingdom; the Port is very large, and the Anchorage secure, and this is the Place where all the Ships arrive and sail from, either for *Europe* or the *Brazils*.

The Slave Trade is the most important one that the *Portuguese* have at *Congo*, and the Number which they send yearly to the Support of their *American* Colonies is surprizingly great; but what renders this Business still more advantageous and considerable, is the short Cut from hence to the *Brazils*, compared with what all other Nations have to run, when carrying these unhappy Wretches to their Plantations; as the *Portuguese* seldom exceed a Month or five Weeks in their Passage, and consequently in this short Time are not exposed to such a Loss by Mortality among their Slaves, as others are, who have a much longer Voyage to make, which frequently occasions Distempers that sometimes carry off the greatest Part of them.

It is difficult to ascertain the Number of Slaves, which the *Portuguese* residing at *Loanda*, *Colombo*, *St. Salvador*, and all other Places in this Part of *Africk*, have in Property. Those who are least rich, having fifty, an hundred, or two hundred belonging to them, and many of the most considerable possess at least three thousand; a religious Society at *Loanda*, having of their own twelve thousand of all Nations, which being Blacksmiths, Joiners, Turners, Stone-Cutters, &c. do almost all bring their Masters in from four to five hundred *Reis per Day*, Gain, which they procure by working for the Publick.

Besides Negroes, *Congo* produces Ivory, Wax, Honey, and Civet, and has in it some Mines of Iron and Copper, though of these no great Quantity is extracted. *St. Salvador* is properly the Rendezvous of all the *Portuguese* Merchants; where they bring Gold and Silver Stuffs, Velvets, *English* Cloth, Gold Lace, black Rattine, small *English* Carpets, Copper Basons, blue Earthen Pitchers, Hats, Rings, Coral, Fire-Arms, and Shells called here *Zimbi*, or *Zinibis*, as before observed, which serve for a small Money; besides all which, Brandy and Wine find here a current and good Dispatch.

## Of ANGOLA.

**ANGOLA** is of all the *African* Coasts that which furnishes the *Europeans* with the best Negroes, and commonly in the greatest Quantities, although it scarcely extends twenty-five to thirty Leagues along the Sea-Shore; it is true, this Kingdom widens considerably within Land, being at least an hundred and fifty Leagues in Length, and as much in Breadth, whose Capital is *Loanda St. Paola*.

Although the *Portuguese* are extremely powerful in the interior Part of the Kingdom; and that the Majority of the Negroes in the Provinces they have subdued, may properly be termed the Vassals of his most faithful Majesty, to whom they yearly pay a Tribute of Slaves, yet the Negro Trade, which is transacted on the Coast, has always remained free to the other Nations of *Europe*; and the *English*, *French*, and *Dutch* send yearly a great Number of Vessels, who carry off many thousands of these poor unhappy Creatures, for the Supply of their *American* Settlements, or for Sale in those of the *Spaniards*.

The *Portuguese* are, however, those which deal the most here; and it is astonishing that they have not before now depopulated the Country, there being hardly any Year, that they do not ship off fifteen thousand for *Brazil*. The Villages of *Cambambe*, *Embaco*, and *Massingomo*, are those which furnish most Slaves to the *Portuguese* Merchants concerned in this Traffick.

And the Merchandize with which they pay for them, are Cloth with great Lists; Crimson Silk Stuffs; Linens; Velvets; Gold and Silver Lace; back Serges; *Turkey* Carpets; white and coloured Thread; sewing Silk; *Canary* Wine; Brandy; Olive Oil; Sailors' Knives; Spices; refined Sugar; great Hooks; Pins three Inches long, and others of various Sizes; Needles, &c.

The *Portuguese* have also a Settlement at *Binguela*, a small Kingdom dependent on that of *Angola*, where they carry on some Trade; but this Place is unwholesome, and fitter for the Abode of Criminals banished by the Tribunal at *Lisbon*, than for the Residence of Persons exercising Trade.

## Of Loango, Malimbo, and Cabindo.

**THE** Negro Trade that is carried on in these three Places of the *Angolian* Coast, is not one of the least considerable, that the *English* and *Dutch* are concerned in, on the Shores of this Part of *Africa*, whether for the Number, Goodness, or Strength of the Slaves, for which the *Europeans* prefer them to all others; and the Inhabitants of the *American* Colonies always give for them a higher Price, as more able to sustain the Labour and Fatigues of the Culture and Manufacturing Sugar, Tobacco, Indigo, and other painful Works, in which it is customary to employ these miserable Persons.

The Merchandize proper for these Parts is the same as has been already mentioned, so I shall only add a Remark made by the Judicious in this Commerce; that as soon as the Business is concluded, and the Slaves aboard, not a Moment should be lost in getting to Sea, for fear that the unhappy Captives should grieve at the Sight of their Country, from which they are to be for ever banished.

## Of the Trade of the African Coasts from the Cape of Good Hope, to the Entrance of the Red Sea.

**THE** *Portuguese* discovered the Cape of Good Hope in 1493, but they remained undetermined to settle here, either through a Want of Courage or Defect of Prudence, or by a Reflexion on the Cruelty with which they treated the poor *Hottentots*, in Revenge of their being at first not well received by them. It does not appear that from that time the *Europeans* made any Descent there till 1600, when the Ships of the *Dutch East-India Company* began to touch here, though they did not at first comprehend all the Advantage they might draw from an Establishment in this Country, and therefore contented themselves for some Years to anchor here, going and coming, only to buy fresh Provisions; and in order to secure these from any Influx till re-embarking, they built a small Fort upon the Harbour

whose Ruins were discernible not long ago. But on the Company's Ships stopping here as usual, in 1650, one Mr. *Van Reibeck*, then a Surgeon, soon perceived, by the Situation and Goodness of the Country, of what Advantage the Establishment of a Factory here would be to the Company's Trade, and on his Return to *Holland*, he communicated his Thoughts to the Directors, who so far approved of them, as to resolve on attempting the Thing without Loss of Time, and accordingly they charged him with the Care of the Expedition, and gave him four large Ships, with all Materials, Instruments, Workmen, &c. necessary for the Undertaking: They made him Admiral of this little Fleet, and Governor of the Cape, with full Power on his Arrival to treat with the Natives, and to regulate every Thing that he should judge would be conducive to the Establishment of the intended Colony, on a secure and lasting Foundation. *Van Reibeck* had all the Success that he could possibly desire in this Enterprize; as he knew well how to ingratiate himself with the *Hottentots*, by the Presents he made them of some Hardware, he presently concluded a Treaty with them, by which they granted the *Dutch* full Liberty to settle in their Country, and to trade with them as they should think proper, on Payment of fifty Guilders, in the same Sort of Merchandize as their Presents were. This Treaty was immediately executed with Punctuality by both Parties, and from that Time the *Dutch India* Company have enjoyed an uninterrupted Settlement, and nothing is neglected to render it as beneficial as possible.

When I say their Establishment has been without Interruption, I mean from the contracting Parties; for as soon as the *Dutch* began to cultivate their new purchased Lands, and to build Houses and Forts, the *Gunjermans*, which are a Nation at the Cape nearest the Sea, opposed themselves to this Establishment, and called in all the neighbouring Nations to their Assistance: but the *Dutch* defended themselves so well, that their Enemies were obliged to demand Peace, which was granted them on the following Conditions, *viz.* The first Agreement was not only confirmed, but it was further stipulated, that all the Lands which the Natives did not then actually occupy, shall thence-forward belong to the *Hollanders*, with this Clause only, that the Natives might settle wherever they pleased, provided it was in Places that the *Dutch* left uncultivated. An Alliance offensive and defensive was at the same Time concluded, which though not set down in writing, the *Hottentots* not understanding the Use of Letters, has been hitherto religiously observed. By this Treaty the *Dutch* are in a Manner become the Masters of all this Country; and the Chiefs of the Nations frequently come to renew the Alliance with the Governor, and to bring him Presents of Cattle, when they are always well received, and their Gifts returned in Tobacco, Brandy, Coral, and other Things they are known to be fond of.

It has cost the Company immense Sums to put this Establishment on the Footing it at present is; Mr. *Kolben* computes the Expence of the first twenty Years to have been at least a Million of Guilders *per Annum*, and that during the Time he was there, it was difficult to raise enough to defray Charges. The Revenues consist in the Tithes of all the Lands which the *Europeans* possess at the *Cape*, Ground Rents, Customs on all foreign Wines, and those of their own Growth, on Tobacco, Beer, Brandy, and other distilled Liquors, as well as on the Profits made by Trade, which the aforesaid Mr. *Kolben* reckons annually amounts to 225,000 Guilders. But as the Colony has always gone on increasing, and fresh Lands continually been grubbing up, this Establishment must become very beneficial in Time.

The Territories which the *Dutch* possess are divided into four Districts or Colonies, of which the first is called the *Cape*, because it is the nearest to the Sea, and the City and Fort of *Good Hope*, are built there.

The second Colony is that of *Stellenbosch*, so called from *Steel*, the Name of a Governor, *Simon Vander Steel*, under whom this Establishment was made, and *Bosch*, which in *Dutch* signifies Wood, because the Country was entirely covered with it, or over-run with Weeds, when the *Dutch* took Possession; this Colony is separated from the first by Sands of a great Extent, and divided into four Parts, of which the two principal ones are, that which still retains the Name of *Stellenbosch*, and that called *Hottentot Holland*, not because it resembles the Province

Province of *Holland*, which is much less, and very differently situated, but because it appeared to the first Settlers, to be the fittest for Cattle appertaining to the *India Company*.

*Drakenstein* is the Name of the third Colony, which begun by settling in 1675; a great Number of *French* Protestants having a little before fled for Refuge to *Holland*, the *Company*, by Recommendation of the States General, sent many with their Families to this Country, with Orders to the Governor to give them Lands, and all Necessaries for their Culture; it is these or their Descendants, who at this Time compose the greatest Part of the Inhabitants of *Drakenstein*; and although they have omitted nothing that might render this Settlement flourishing, and herein have been assisted by the Soil, which in general is very good, yet few have obtained a Sufficiency to make themselves easy, but generally speaking are poor, living from Hand to Mouth, and in Huts like the *Hottentots*. This seems surprising, but our Author attributes it to the little Support afforded them, as there was Room to have expected more.

The Country is mountainous and stony, yet nevertheless very fertile, producing almost every Thing growing in the other Colonies; the Honey Mountains are here among others, so called from the great Quantity of that sweet Liquid, which a Meridian Sun forces in drops from the Cliffs of the Rocks, and which the *Hottentots* acquire at the Peril of their Lives. The Governor *Vander Stel* gave this Colony the Name it bears, in Honour to Monsieur Baron *Van Rbeede*, Lord of *Drakenstein* in *Guilderland*, who in 1685 was sent by the *India Company*, in Quality of Commissary General, to examine the State of all their Factories and Plantations, and to redress as he should think proper the Abuses crept in there.

The last and youngest Colony of the Cape is that of *Waveren*, which received this Name from *William Vander Stel*, in Honour of the Family of *Van Waveren* of *Amsterdam*, to which he was allied. It was before called the *Red Sand*, on Account of a Mountain which separates it from the Colony of *Drakenstein*, on the Top of which, and about it, is found a great Quantity of this red Sand. The Country is naturally very fertile, but little cultivated, as the Inhabitants possess nothing here in Property, but are obliged to renew their Leases every six Months with the Governor.

There is not a Country in the World, according to Mr *Kolben*, that feeds so great a Quantity of large and small Cattle, as the Cape of *Good Hope*, where they are cheaper, and their Flesh better; an Ox commonly weighs here between five and six hundred Pounds, which is given for a Pound of Tobacco; and a Sheep's Tail weighs from fifteen to twenty, and sometimes thirty Pounds.

As lazy as the *Hottentots* naturally are, they do not however neglect an Application to the Mechanick Arts, and they are even so expert, that it is inconceivable how they should be accused of being a People the most ignorant and stupid in the World: They have Furriers and Tanners by Profession among them, who understand repairing the Skins with which they cover themselves, and the Hides that they employ in divers Uses, almost as well as the *Europeans*; Artificers in Ivory, who without any other Instrument than a Knife, work in it with as much Propriety and Delicacy as the best Turners; Matt-Makers, Rope-makers, who have the Art to make Cords with small Rushes, that are as strong and durable as Hempen Ones; and the Blacksmiths, who very well understand to cast Iron, and give it all Sorts of Forms, only with Flints, although they hardly ever make any other Use of it, than to arm their Sticks, Arrows, Javelins, and other similar Instruments. These Blacksmiths work also in Copper, though but a little; for all their Performances herein are reduced to some Toys, with which the Men and Women adorn themselves; and they are all in general Potters, every Family making their own Vessels, for which they use the Earth of an Ant Hill, which they carefully cleanse, and afterwards knead with Ant Eggs, which make an admirable Cement, and gives to the Matter a jet Black, that it never loses. It is hereby seen, that they neither want Invention or Dexterity, and that if they were less slothful, they would, in the Mechanick Arts, soon equal all the other *Africans*.\*

## Of SOFALA and MONOMOTAPA.

**T**HE Kingdom of *Sofala* is rich in Gold Mines and Ivory, and these two precious Commodities attract Foreigners, and maintain Commerce. The *Arabians* are supposed by some, and the Fleets of *Solomon* and *Hiram* King of *Tyre* by others, to have been the first Traders to these Parts; but as I have treated largely of this Contest in my Historical Introduction, I beg Leave to refer my Reader thereto, for any further Information.

The *Portuguese* settled here towards the End of the fifteenth Century, and in 1500 even obtained Permission to build a Fort pretty near the Capital, for the Habitation of their Factors, carrying on their chief Trade herein, for which it was commodiously situated on the *Quama's* Shore, where they had their Warehouse for *European* Merchandize sent them from *Mofambique*.

The richest Mines of the Kingdom are those of *Sofala*, from which there is yearly extracted, if the *Negroes* may be credited, more than two Millions of *Mergals*, which at fourteen Livres Tournois, as Mr. *Savary* computes them, make twenty-eight Millions of Livres: These Riches are divided between the *Portuguese*, who are the only *Europeans* that trade to this Kingdom, the *Arabians*, more especially those of *Ziaen* and *Mecca*, and the *Mabometans* of *Quilloa*, *Monbasse*, and *Melinda*. These latter come in small Barks, which they call *Zambucks*, and bring blue and white Cottons, Silk, Ambergris, and Succinum, or yellow and red Amber variously carved.

The Commerce of the *Arabians* may import above 140,000*l.* Sterling per Annum, in the exchanging divers Sorts of Goods that they bring from the *East-Indies* and the *Red Sea*, against Gold and Ivory.

In Regard to the *Portuguese* Trade, it is carried on by those of this Nation settled at *Mofambique*, who send here the Products of *Europe*, proper for this Market, on which they make so vast a Profit, that only the Governor's Rights amount nearly to between 60 and 70,000*l.* Sterling, extra of the *Portuguese* Troops Pay, which comes out of this Trade, and besides the Tribute that is annually sent to the King of *Portugal*, which is very considerable.

The smallest Share of these Merchandizes are, however, consumed in this Kingdom, the Rest passes to *Monomotapa*, where the *Sofalois* truck them against Gold, which is given them unweighed, these People never using Scales, and making, as one may say, an arbitrary Traffick, dependent on the Caprice of the Buyer and Seller.

The Kingdom of *Monomotapa* being within Land, and none of its Provinces near the Sea, Strangers, and more especially the *Europeans*, carry on no direct Trade with it; it is true, the *Portuguese* have some Settlements here, but Religion has been a greater Motive to their Origin than Trade; so that all the Gold, Ivory, and Ostrich Feathers, which are the principal Commodities that this vast Tract of *Africk* furnishes to Commerce, pass, as before observed, through the Hands of the *Sofalois*. The Gold of *Monomotapa* is of two Sorts, the one from the Mines, and the other found in the Gravel of the Rivers; and from both the Quantity collected annually is so great, and the Merchants of *Sofala* have so rich a Business here in Truck for *Asian* and *European* Goods, which come from the *Arabians* and *Portuguese*. that these latter commonly call the Prince to whom *Monomotapa* is subject, the Golden Emperor.

## Of MOSAMBIQUE.

**T**HE *Portuguese* are the only *Europeans* who have any Establishments, or carry on any Trade in the Kingdom of *Mofambique*; the *Arabians*, however, share with them, although the former use all possible Means to hinder their Progress, and secure it entirely to themselves. The *Portuguese* Habitations along the Coast are considerable, and all defended by good Fortifications, or at least by strong Houses, which serve for Magazines and a Security against the Natives, who are equally perfidious and lazy; but the Centre of their Commerce in these Parts is the Isle of *Mofambique*, about two Miles from the Continent,

in which they have a commodious Town, well fortified, which is the common Residence of the Governor-General, and of the richest Merchants.

This Isle and its Port are to the *Portuguese* India Shipping what *Madagascar* was formerly to the *French*, and what *St. Helena* and the Cape of *Good Hope* are at present to the *English* and *Dutch*, viz. a Place for depositing Goods, and affording Refreshments.

The *Dutch* twice attempted to make themselves Masters of the Commerce of *Mofambique*, in the Beginning of the seventeenth Century; the first in 1604, and the second in 1607; but the *Portuguese*, then united with the *Spaniards*, made so brave a Defence, that the *Dutch* Fleets were obliged to retire half ruined, though with a rich Booty that they found in several *Portuguese* Caracks which they took.

The Trade carried on here consists in Gold and Silver, Ebony, of which their Forests are full, Ivory, found here in greater Abundance than in any Part of *Africk*, in Slaves taken in War, Matts, and all Sorts of Refreshments; and the Merchandize given in Exchange are Wine, Oil, Silk, Woollen and Cotton Stuffs, Coral, wrought and unwrought.

When the *European* Goods arrive at *Mofambique*, in the *Portuguese* Ships, they are taxed at a certain Price by the King's Factor, who afterwards sends them to *Chilimani*, at the Mouth of the *Senna*, from whence they go up the River in small Barks, to a little *Portuguese* Town seated at the Height of the *Senna*, where the *Caffres* and *Blacks* come from the Inland Kingdoms and Provinces of *Africk*, sometimes at three or four Months' Travel Distance, to buy or take on Credit the *Portuguese* Goods, for a Quantity of Gold agreed on, and which they never fail to bring faithfully.

This Traffick generally yields *Cent. per Cent.* and is properly the *Chilli* and *Peru* of the *Portuguese*; Gold being so common here, at a Month's Journey from the Coast, that the Utensils of the House and Kitchen are usually made of it.

#### Of MELINDA.

THE Commerce of this Coast, which is the last Kingdom from the Cape of *Good Hope* to the Entrance of the *Red Sea*, where the *European* Ships anchor to trade, is almost entirely in the Hands of the *Portuguese*, who have a great Settlement in the Capital, and have even had the Credit of building seventeen Churches here, although the King is a *Mahometan*. The Natives, however, carry on some Trade with their own Vessels, in the *Red Sea*, and with them frequent the best Ports in *Arabia*.

They are also sometimes seen in the *Indian Sea*, particularly at *Cambaya*, a maritime Town in the Territories of the *Great Mogul*; but with all this, and though the *Indians* and *Arabians* sometimes bring their Goods to *Melinda*, it is properly by the Hands of the *Portuguese* that all this Trade is transacted, which is but little less considerable than that of *Mofambique*.

The Gold brought from *Sofala*, the Ivory, Copper, Quicksilver, all Sorts of Silks and Cotton of *Europe* and the *Indies*, various painted Linens, especially *Cambayan* Handkerchiefs, Spicery, Rice, and other Legumens and Fruits, are the principal Commodities brought to *Melinda*.

#### Of ABYSSINIA.

ABYSSINIA, better known to the ancient Geographers under the Name of the *Upper Ethiopia*, produces all Sorts of Commodities proper for the Support of a considerable Trade, either at Home or Abroad, if the natural Sloth of its Inhabitants did not hinder their benefiting themselves by these Advantages.

Many Authors who have endeavoured to discover and fix the Situation of this famous Empire; though I think Dr. *Garcin* has justly placed it elsewhere, as may be seen in the historical Introduction; however, it is certain, that *Ethiopia* is of a very great Extent, and would be one of the wealthiest Empires in the World,

if the People knew how to profit themselves by the Treasures that are hid in the Bowels of the Earth.

The Empire is composed of many Kingdoms, as that of *Tigre*, divided into twenty-four Provinces, *Abyssinia*, and *Ajan* dependent on it. The *Portuguese*, after they had taken the Island and City of *Ormuz* in the *Persian Gulf*, *Muscate* on the Coast of *Arabia Felix*, and the Isle of *Zocotora*, at the Entrance of the *Arabian Gulf*, soon opened a Passage to *Ethiopia*, and established a considerable Commerce there, and where they afterwards transported many Families of their Countrymen to form there a Sort of Colony: The new Guests, becoming suspected by the *Abyssines*, were driven out, and all Trade forbidden with them. After this Expulsion, the Emperors of *Ethiopia* would not suffer their Subjects to have too strict a Correspondence with the *European Nations*, much less to permit any of these Nations to settle in the Country, under the Pretence of trading.

Gold, Silver, Copper, and Iron, are the Metals this vast Region of *Africa* produces; and other Commodities, are Cardamoms, Ginger, Aloes, Myrrh, Cassia, Civet, Ebony, Ivory, Wax, Honey, Cotton, and Linens made of it of various Colours; and I might add, Sugar, Hemp, Flax, and excellent Wine, if these People, Demi-Barbarians, had the Art to prepare and boil the Cane's Juice, to cultivate the Vines, and press the Grapes, and to spin and weave their Hemp and Flax, as all these Things grow with them in Abundance, and of as good Qualities as in any other Part of the World.

#### *Of the Trade of the African Islands.*

THE principal Islands which Geographers attribute to *Africk* are *Madagascar*, the *Terceras* or *Azores*, *Madeira*, the *Canaries*, *Cape de Verd* Isles, *St. Thomas*, *St. Helena*, *Zocotora*, and *Malta*; this last is in the *Mediterranean*, and the Rest in the *Ocean*.

All these Islands are either possessed or frequented by the *Europeans*, who carry on a considerable Trade with them; that of *Madagascar* might be, as well for the Abundance of its rich Produce, as for its happy Situation in the Route to *India*, one of the most famous Isles for Trade in the Universe, if the Ferocity of its Inhabitants, and the Intemperance of the Air and Sun, in the Places where the *Europeans* were at first settled, had not discouraged their Continuance. It is situated over-against and along that Part of the Continent of *Africk*, which the Kingdoms of *Sofala*, *Mosambique*, and *Melinda* compose, from whence it is distant in some Places a hundred, and in others but seventy or fewer Leagues.

The *European* Commodities fit for the Trade of this Isle, are painted Linens, Silver, Copper, and Pewter, Rings and Bracelets, a Quantity of small Mercery and Hardware, several Sorts of Glass Beads, particularly blue, red, white, green, yellow and Orange Colour, Brandy, *Spanish* and *French* Wine, Cornelians long and Olive shaped, red and white, large Brass Wire, and small Chains of ditto, Nails of all Sizes, and divers Tools, both for the Smith and Joiner, as well as Locks, Hinges, &c.

The Goods to be had there in Exchange consist of several Sorts of Gum, such as *Gutti Tacamahaca*, various Species of *Dragon's Blood*, &c. different Woods, Wax, raw Hides, Sugar, Tobacco, Pepper, Cotton, Indigo, *Ambergris*, *Incense*, *Benzoin*, *Palma Christi* Oil, green Balm for Wounds, *Saltpetre*, *Brimstone*, white Cinnamon, Civet, Rock Crystal, Blood Stone, Touch-Stone, *Terra Sigillata*, several Boles, Mats of Rushes, and Flax; and even of Silk; but the Culture or Search after these Things being neglected by the Natives, and the *Europeans* who are established among them not having been more industrious, they have not been benefited by these Riches, which some Pains and a little Time would easily have secured to them.

Some also count Gold, Silver, and precious Stones among the natural Products of this Isle; but that any of these Metals are found here is very uncertain, and all the precious Stones are very imperfect.

*Of the Azores, Madeira, Cape de Verd Isles and St. Thomas.*

AS all these Isles appertain to the Crown of *Portugal*, I have judged it best not to separate them in relating the Trade carried on to them.

The *Azores*, called also the *Terceras*, from the principal of them, are nine in Number, *viz.* *Flores, Cuervo, Fayal, Pico, St. George, Gratiofa, St. Mary's, St. Michael, and Tercera*. These Isles lying between the two Continents of *Europe* and *Africa*, opposite to the Coasts of *Portugal*, were discovered in 1439, or 1449, by the *Portuguese*, uninhabited; who deeming them fit for Culture, they immediately settled Colonies on them, and their commodious Situation in the Way to the *Indies* and *Brazil* did not a little contribute to the speedy peopling them, and establishing a considerable Commerce, especially at *Tercera*, which is the Governor's Residence, and a Bishoprick.

The City of *Acra* is the sole Port in this Isle, inaccessible in all other Parts, where all the *European* Ships anchor, and where the Products not only of this, but of all the other Islands are brought, though, however, the Ships often touch at the other Isles, to purchase Coods at first Hand, or to take Refreshments. Wheat, Wine, Wood, Potatoes, and Hides, are the principal Commodities they afford; but it is on the Wood that the Inhabitants of *Tercera* found their chief Business; there is notwithstanding a large Quantity of fresh Oranges and Lemons exported from these Isles, and a still greater preserved, with several other Species of Sweet-meats, of which those at *Fayal* are esteemed the best, and the *Dutch* yearly load several Ships with these Commodities.

The Imports there from *Portugal* are all Sorts of Mercery, Linens, Stuffs, Fustians, Silk Stockings, Rice, and Paper, with some Oil and Salt; and the Inhabitants likewise purchase considerable Parcels of *Canary* and *Madeira* Wine, their own being weak and insufficient for their Consumption; the Woollens used formerly to be carried all from *Europe*, but within these fifty Years there are several Fabricks set up in the Isle of *St. Michael* for Cloths, Druggets, Camlets, Serges, and Hats, besides some Silk Stuffs, in Imitation of those made at *Lyons* and *Tours*, which has sometimes nearly sufficed for the Island's Supply; and the flourishing Condition they were in, in 1717, induced some People to think, that this Colony, contrary to what has been experienced in all others, would soon supply its Mother-Country with the Commodities this had till then received from it. But as the Fabricators were frequently in Want of Wool and Silk to keep their Looms going, it must certainly be a Damp to them, and gave the *French* Hopes of retrieving a Trade they formerly carried on by the Way of *Lisbon*, to their no small Advantage.

The Returns made to *Lisbon*, besides those of these Islands' Growth, are Gold Coin from *Brazil*, and the other Products of that Part of *America*, such as white and Muscovado Sugars, Jacaranda, and other Woods, Cacao, &c.

The *English* now carry on the greatest Trade to the Island of *Tercera* of any Nation, where they lade the afore-mentioned Goods, in Return for Woollens, Iron, Herrings, Pilchards, Butter, Cheese, and Salt Meat.

*Madeira*, situated on the Coast of *Africa*, to the Southward of the *Canaries*, among the Number of which the Pilots generally place it, and from which it is only distant about sixty Leagues, was discovered by the *Portuguese*, in 1410, or 1420, to be an impenetrable Forest; so that before they could settle here, and cultivate it, they were obliged to set Fire to it, though this Expedient had like to have cost those who composed this Infant Colony their Lives, by the excessive Heat in their Barks where they retired, and continued whilst the Wood was burning; but having afterwards effected their Settlement, the Island is become one of the most fertile and populous of any in the Ocean; and produces Plenty of Corn, Wine, Sugar, Guns, Honey, Wax, Hides, all Sorts of Fruits, fresh, dry, and candied, especially Citrons, Lemons, and Pomegranates, Yew and Cedar Plank, &c. and its Imports are such of the *European* Goods as have been before-mentioned for the other Islands.

The *Cape de Verd* Isles, discovered by the *Portuguese* in 1472, some say in 1572, are to the Number of ten, *St. Jago, St. Antonia, St. Lucia, St. Vincent, St. Nicolau,* the *White Isle,* the *Isle of Salt, Mayo, Fuego,* and *Buena Vista.* They are often called the *Green Islands,* from the continual Verdure that covers them, and sometimes the *Salt Islands,* on account of the Quantity made of this Commodity, not only on the *Isle* bearing that Name, but on some of the others; *St. Jago* is the Capital, and Residence of the Governor, who is a Sort of Vice-Roy, and commands all that the King of *Portugal* possesses in *Africa,* from *Cape Verd* to the *Cape of Good Hope.*

The *European Nations,* which trade to the *East-Indies* and *Africa,* commonly touch at these *Islands* for Refreshments, calling at *St. Jago* in Time of Peace, and contenting themselves to water, &c. at *Mayo, St. Antonia, St. Vincent,* or the *Isle of Salt,* when a War; the few *Portuguese* settled in these latter receiving and dealing with them, at all Times willingly, though indeed they are in no Condition to oppose their Descent, if their Inclinations led them to it. These *Islands* were mere Deserts when the *Portuguese* first began their Settlements, though they now produce in Abundance many Commodities fit to support a considerable Trade, but more especially raw Hides of Kids, Goats, wild Cows, &c. Cattle are so plenty, that several Ships are employed in carrying them to *Brazil;* and the annual salting of Fish caught near *Cape Verd,* keeps many Sailors at Work, as it does also Vessels afterwards, for its Transportation to the Bay of *All Saints,* or *Fernambouc.* The *Isles of St. Vincent* and *St. Antonia,* in particular, carry on a very lucrative Trade in the Oil they extract from Tortoises that come ashore in certain Times of the Year, as well as in Ox Hides, which they dress in the same Manner with them in *Spain* and *Portugal.*

In fine, the Rice, Honey, *Turkey* Wheat, Oranges, Lemons, Pine-Apples, and several other delicious Fruits, as also the great Quantities of tame and wild Fowl, found here, not only serve for the Food and Regales of the Inhabitants of these *Isles,* but also for the Traffick which they have with Strangers, who come here to water, or to trade.

The *Isle of St. Thomas,* which the Negroes of the Coast call the *Isle of Poncas,* took its new Name from being discovered on that Saint's Day, the 21st of *December,* 1465, in seeking to discover a Way to the *East-Indies;* and the King of *Portugal* sent People there in 1467.

Its Capital is called *St. Thomas;* and although it is situated under the Line, and that the Heats are excessive, the *Portuguese* have raised here one of the most flourishing Colonies they have in *Africa;* and its Situation appeared so commodious to the *Dutch,* for the Trade of *Angola,* and its neighbouring Coasts, that they took it twice, viz. in 1610 and 1641, though they could not keep it; and the *Portuguese* in a short Time repaired the almost inestimable Damage which their Enemies did there on abandoning it. The *Portuguese* were the first who inhabited and cultivated it, though at present the Negroes are by far the greatest Number, and it is supposed might easily seize it, if their natural Sloth and Cowardice, joined to their Aptitude for Slavery, did not render them incapable of such an Enterprize.

Sugar Canes and Ginger grow here, as well as at any Place in the World, and make the principal inland Trade of the *Isle;* the *Portuguese* cultivate them with extreme great Care, and notwithstanding the excessive Heats of Sky and Sun, they are seldom deceived in their Expectations, as the Crop both of the one and the other is getting in every Month of the Year. Of brown Sugar here is commonly made from six to seven hundred Charges, of which there is yearly carried out of the *Isle* near a hundred thousand Roves, of thirty-two Pounds *Portuguese* each, which is sent to *Portugal,* wrapped up in its Leaves.

The other Products and Manufactures of the *Isle* are divers Cotton Stuffs, proper for the Negro Trade on the Coast, Fruits, and particularly that called *Cola,* which is a Nut, in Taste like a Chestnut, and which is trucked with great Advantage at *Loanda, St. Paola,* and other Places in the Kingdom of *Angola* and *Congo,* from whence they are transported to a much greater Distance. The

Legumes of all Sorts arrive here to great Perfection: *Indian* Wheat, Millet, Manioc, of whose Roots the Cassave is made, Melons, Potatoes, Figs, Bananas, Dates, Cacaos, Oranges and Lemons grow here in Abundance; the Sheep and Kids are excellent, but the Beef is smaller, and not near so fat as in *Europe*.

The *European* Commodities, which the *Portuguese* carry to *St. Thomas*, are Linens from *Holland* and *Rouen*, or other similar in Quality, Thread of all Colours, thin Serges, Silk Stockings, *Leyden* Camlets, *Nijnes* Serges, Hatches, Bills, Salt, Olive Oil, Copper Plates and Kettles, Pitch and Tar, Cordage, Sugar Moulds, Brandy, and all Sorts of distilled Liquors, *Canary* Wine, Olives, Capers, fine Flour, Butter, and Cheese.

Besides the great Isle I have now spoke of, some Pilots give the Name of *St. Thomas* in general to small Islands, near, and even to some very distant: Of these the chief is *Prince's* Isle, discovered in 1471; that of *Fernando Pao Pao*, or *Port*, that of the *Ascension*, and that of *Annabon*, or *Bon Anno*; it having been discovered on New-Year's Day, even that of *St. Helena*, although at a great Distance from that of *St. Thomas*, of which I shall treat in its Place; and in Respect of the other four, no Commerce is carried on with them, as the Ships bound to the *East-Indies*, only touch here for Wood and Water, or to catch Tortoises, when in Want of fresh Provisions, and have many Sailors sick; except *Annabon*, where the *Portuguese* that are settled carry on a Trade in Cotton, which they gather in great Abundance here, as also Hogs, Goats, Poultry, Variety of delicious Fruits, Palm Trees, Tamarinds, Woods, &c.

#### Of the Canary Islands.

THESE are the same the ancients knew under the Name of the *Fortunate* Islands; whose Discovery nevertheless is reckoned only from the Year 1348 or at the utmost a Century before; they were in a Manner forgotten for several Ages, and as it were, lost all that Time to the Nations of *Europe*, who had no Knowledge of them. The *Spaniards* are at present the Proprietors and have possessed them ever since 1522, when they were given up to them by the Successors of their first Conquerors. They are situated to the West of *Africa*, over-against the Kingdom of *Morocco*, being eighty Leagues distant from that Coast, and till lately were counted only seven in Number, of which the principal is called the *Grand Canary*; the other six are *Palma*, *Fer-o*, *Gomera*, *Teneriffe* so famous for its Peak, or Mountain, supposed to be the highest in the World, *Fuente*, *Fortaventura*, and *Lancerotte*; but for some Years past *Clara*, *Lobos*, *Graciosa*, *Raca*, *Alegranza*, and *Inferno*, have been discovered and added. The Soil of these Isles is extremely fertile in all Sorts of Grain, Fruits, and Legumes; particularly in those excellent Wines, so much esteemed over all *Europe*, where so large a Quantity is yearly transported: Mr. *Savary* says, that between us and the *Dutch*, an annual Export is made from thence of above thirty thousand Tons of this pleasant Cordial; and though I am convinced that the Quantity is very large, yet I cannot think it amounts to so much: Sugar is also cultivated here in Abundance, and in the *Grand Canary* only, twelve Mills are employed in grinding the Canes: and in Proportion on the other Isles, so that here may be as much, or near as much made, as there is at *St. Thomas's*; the other Goods extracted from these Isles are Honey, Wax, Goats Skins, Pitch, or black Gum, divers Sorts of Fruits, Sweetmeats, Poultry, great and small Cattle, with a large Quantity of *Canary* Birds, which, though seemingly a trifling Article, yet swells the Amount of their Trade very considerably.

The *English*, who trade more here than all other Nations put together, in a Manner supply these Islands with all the *European* Goods they want, which consist in Cloths, ordinary Camlets, Baize, mostly Blacks and Emerald Greens, Anaf-cotes, black and white, Sempiternas, most blues, Lamparilla of all Colours, worsted Stockings, wove and knit, Hats, Gogonelles, Linen from *Holland* and *Hamburg* of two or three Sorts, other fine and coarse Linen, all Numbers of Thread, Household Furniture, such as *Escrutoires*, Chests of Drawers, Chairs, &c. ness, Pewter, Mercery, and Hardwares; *Irish* Hides, all Sorts of Silks, though most of these are now supplied from *Spain*, Men and Women's Silk Stockings, Ribbons, Wheat, Barley, Flour, and all Sorts of Pulse, Herrings, Pilchards, Beef, Pork, Butter, Cheese, and Candles; with all which the other Isles are supplied from *Teneriffe*.

And the *English* take in Return the *Malvoise* and dry Wines made here, of which in a good Year *Teneriffe* only produces above thirty thousand Pipes, one-third *Malvoise*; and *Palma* and *Ferro*, fifteen or sixteen thousand Pipes each.

I have already mentioned, under the Trade of *Spain*, the Nature of the Gallions and Flota; and to this I shall now add, that besides those, several Ships are permitted annually to sail from these Islands for the *Spanish America*, under the Limitations of carrying their Products with them, or returning with no other Commodities than those of the Growth of that Country, and out of these Silver and Cochineal are excepted; however, they find Means to evade these Restrictions both going and coming, and the *English* have always Warehouses of Goods here to supply the Demands made on such Occasions; these Ships have a Right to proceed to all the *Spanish* Ports in that Part of the World, except *Vera Cruz*, *Cartagena*, and *Porto Bello*.

#### Of ST. HELENA.

**T**HIS Island is situated in the Western Part of the *E. biopian* Sea, in sixteen Degrees, twelve Minutes, South Latitude, almost four hundred Leagues from the Coasts of *Angola*, and those of *Brazil*, though something nearer *Africk* than *America*, and therefore Geographers have placed it to the former.

The *Portuguese* discovered it in 1508, and left it for a Place of Shelter and Resort, common to all Nations, who should trade to *India*; after which the *Dutch* settled and then abandoned it for the more commodious Situation of the Cape of *Good Hope*, and the *English* have possessed it ever since; but as it affords nothing for Trade, more than the Refreshments for the Ships that call there, I shall not add any Thing to what I have now said about it.

#### Of Socatara or Zocotara.

**S**EATED at the Mouth of the *Red Sea*, commonly called the Straits of *Babel-Mandel*, is the last of the *African* Isles towards the East, and nearest to the Continent of *Asia*. This Situation placing it almost equidistant from these two Parts of the World, renders it very convenient for Ships that come from *India*, *Madagascar*, *Mosambique*, or *Melinda*, to trade with *Arabia-Felix*, or with *Aden*, *Mocha*, *Mecca*, and other Cities of the *Red Sea*. It produces, besides, good Refreshment of all Sorts, Aloes, the best in the World, Ambergris, Indigo, Civet, Incense, Dragon's Blood, and other Medicinal Gums, Rice, Tobacco, and Dates, of which latter they have such Quantities as to serve them instead of Bread. All these Commodities the Natives either sell to Foreigners, who touch there, or truck them against other Products of *Europe* or *India*.

#### Of MALTA.

**T**HIS Island, situated in the *Mediterranean* Sea, between *Tripoly*, of *Lisbary*, and *Sicily*, is less known for its Trade, than for being the Habitation of the Military Order of *St. John of Jerusalem*, who have possessed it ever since 1530; the Commerce of it is, however, pretty considerable; not by what it produces, as it is hardly better than a Rock, and consequently cannot furnish the Inhabitants with the Necessaries of Life, much less for the Support of a Traffick with Foreigners, by Way of Barter or Exchange; but this is done by the Importation of many *English*, *Dutch*, and *Italian* Ships, who carry here all Sorts of Goods for the *Maltese* Use, or are freighted by their Merchants to load Corn, &c. in

*Italy.* The Island, however, produces Cotton in Plenty, of which the Natives make the finest Stockings and Women's Gloves I ever saw, Wax, and Honey, the last being of a superior Quality to what comes from the other Parts, is greatly esteemed, and was the Motive for giving the Island its Latin Name of *Melita*.

Of the COMMERCE of ASIA.

**T**HIS is one of the largest and richest Parts of the World, whose Northern Boundary is the *Scythian* Ocean, or the Sea of *Tartary*, its Eastern the *Oriental* Ocean, the *Indian* Sea to the South, and to the Westward, the *Red* Sea, the *Isthmus of Suez*, the *Mediterranean*, the Canal of the *Black* Sea, the *Pont-Euxin*, the Sea of *Zabache*, the *Don*, and the *Oby*; being from East to West about seventeen hundred and fifty Leagues, and from North to South near fifteen hundred and fifty.

Many Nations of this vast Continent, especially those who live in the Middle of it, and those of the *Northern* Ocean, are very little known to us, and if we except the *Russians*, who possess a Portion, and whose Caravans, since the Reign of the Czar *Peter Alexowitz*, have regularly departed every Year from *Petersburgh* to *China*, and traverse some Part of it, it may be said, that the *Europeans* have no Trade there, and have only uncertain and fabulous Accounts of these Countries.

Though it is not so with Respect to the Southern and Eastern Coasts of *Asia*, of which I shall now briefly speak, as they follow, from *Mocha*, the richest and most trading City of *Arabia-Felix*, to *China*, where the *Europeans* generally terminate their Voyages and commercial Enterprizes; reserving nevertheless, the Liberty to make some Excursions within Land, particularly for what regards the Trade of *Perfia*, the Empire of the *Grand Mogul*, that of *China*, the Kingdom of *Siam*, and some others; which, however, I shall touch on with the utmost Brevity. Afterwards I shall run over that great Number of Isles lying in the East, whose Commerce in Spice, and other precious Commodities, is rendered so famous, and annually attracts so great a Number of Ships, as well from all the *European* as *Indian* Nations.

With Respect to the Eastern Coasts of *Asia*, which are washed by the *Mediterranean*, *Black* Sea, and the *Archipelago*, I shall excuse saying any Thing more about them here, having before joined this Commerce to that of *Europe*, to which my Reader may have Recourse, particularly where the Trade of *Constantinople*, *Cassa*, *Alppi*, &c. is treated of.

I shall, therefore, begin this Traffick of *Asia* with the Cities of *Arabia-Felix*, seated on the *Red* Sea, or in the *Ocean*, near its Mouth; as *Mecca*, *Mocha*, *Aden*, and some others; and afterwards enter the Gulfs of *Ormus* and *Bassora*; where we find *Bassora*, *Ormus*, *Gameron*, or *Bender-Abassi*, dependent on the Empire of *Perfia*, which we shall visit even to its Capital.

The Coasts of *India*, both on this and the other Side of the *Ganges*, will afterwards follow, and then survey those of the *Grand Mogul*, especially in the Kingdom of *Guzurate*, where are seated *Amedabaib*, *Cambaye*, *Surat*, *Daman*, &c. After them *Bengal*, *Decan*, of which *Goa* is the Capital, *Malabar*, of which the chief Cities for Trade are *Calicut*, *Cranganor*, and *Cocbin*, the Coast of *Coromandel*, which has *Narsinga* and *St. Thomas*, the Kingdom of *Golconda*, those of *Pegu*, *Siam*, and *Tanasserim*.

In Fine, *Malacca*, *Cochinchina*, *Tonquin*, and *China*, with which I shall finish the Trade of this vast Continent.

The *Asiatick* Isles, whose Trade I here propose to treat of, are the *Maldives*, which first present themselves in the direct Route from *Europe* to the famous Cape *Comorin*; those of *Celen* and *Maynar*, which almost touch the Cape. The three Isles of the *Sund*, viz. *Sumatra*, in which is the Kingdom of *Achen*, and several others, *Java*, so celebrated for that of *Bantam*, and yet more for the famous City of *Batavia*, and the Isle of *Borneo*. The *Philippines*, called the *Manilles*. The *Moluccas*, so fruitful in Spice. The *Ladrones*, which are in the Track from *America* to *India* by the *South Seas*, and the Isles of *Japan*, or

*Japan*, from as I have a shall avoid cerning it a Word Trade.

*Japan*, from whence all *European* Nations are excluded except the *Dutch*. And as I have already occasionally mentioned something of the *East-India* Trade, I shall avoid repeating it here, but only now add, what I before omitted concerning it. And previous to my Entrance on this proposed Detail, I shall speak a Word concerning *Bursa*, which was omitted in the Article of the *Levant* Trade.

*Bursa*, which is the Capital of the ancient *Bizbynia*, is still one of the finest and largest Cities in the *Grand Signor's* Dominions, seated on the Sea of *Marmora* in *Natolia*.

Its Caravanferas, or Inns, are vast and commodious, and its *Bezeftan*, with its rich Shops, resembles the Saloons of a Palace, by the Quantity of Merchants, and Goods exhibited to view there. The most able Workmen of all *Turkey* are at *Bursa*; its Manufactures of Silk Stuffs are admirable; but its Carpets and Tapestry, worked on Designs sent from *France* and *Italy*, are above all esteemed. Silk is gathered here in Abundance, and of the best Quality that the Estates of the *Grand Signor* produce; here is also some Gum Adragant, which is collected at *Carajifai*, or *Chateau Noir*, about four Days' Journey from this City.

#### The Trade of ARABIA.

THIS Part of *Asia* has at least thirteen thousand Leagues of Circuit, and is divided into *Arabia Deserta*, *Arabia Petraea*, and *Arabia Felix*; this last which is almost as big as the other two, and which it also surpasses in Riches and Number of Inhabitants, is besides distinguished for its Commerce, which is one of the most considerable in all the East.

Its chief Cities, and those most noted for Trade are *Mocha*, *Hidedan*, *Chibchiri*, *Zibet*, and *Ziden* on the *Red Sea*; *Aden*, *Fartack*, and *Mascate*, on the *Ocean*, or *Arabian Sea*; *Babr*, *Barhem*, and *El-Catif*, in the Gulf of *Bassora*; in *Fine*, *Bassora* at the Bottom of this Gulf; but as this last is in *Arabia Deserta*, I shall describe it when I come to treat of that Province.

I might here add *Mecca* and *Medina*, Places which the *Mabometan* Zeal has separated as holy, and which are also rendered famous for the immense Riches annually brought here by five Caravans, partly through the Devotion of Pilgrims, and partly by the Merchants for Trade; but the Entrance into these two Cities being prohibited on Pain of Death to any Christian, and the *Europeans* consequently having no Commerce here, I shall content myself with informing my Reader, that the Business which the *Musulmen* Nations of *India* and *Africk* carry on here is by *Ziden*; this being properly the Port of *Mecca*, although it is at least twenty-five Leagues distant; and by *Mocha*, which serves as its Storehouse, or Staple.

*Mocha*, situated at the Entrance of the *Red Sea*, in thirteen Degrees eighteen Minutes of North Latitude, is at present a City of the greatest Commerce in all *Arabia-Felix*, where it was transferred to from *Aden*, about the Middle of the 16th Century. There are hardly any maritime Nations, either of *Europe*, *Asia*, or *Africa*, who do not send Ships to *Mocha*; the *English* and *Dutch* generally send their's here, from the Places in *India* where they are settled, as the *French* did when their Commerce was most flourishing, but they now go there directly. The other Vessels brought here by every Monsoon, which are often fifty or more in Number, commonly come from *Goa*, *Diu*, *Tourel*, *Dabul*, *Goga*, *Calicut*, *Achen*, *Majulpatam*, *Nevega*, *Promiens*, *Cadts*, *Mojambique*, *Melinda*, and *Ethiopia*, all laden with the richest Products of the Places from whence they sail, or that their Freighters have collected from the most remote Parts of the East, as from *Cbina* and *Japan*; besides which Maritime Trade, a very great and rich one is carried on by Land, by Means of the Caravans from *Aleppo* and *Suez*; that arrive in the Month of *March*. They are commonly two Months on their Journey, and generally join on entering *Arabia*, making Part of those that conduct the Pilgrims to *Mecca* and *Medina*, but which, till then, are only composed of Merchants and Goods.

About a thousand Camels serve to transport these Merchandize, Eatables, and other Necessaries for the Merchants, and the Troops, which go as an Escorte to

defend them against the *Arabs*; and these Caravans are esteemed but indifferently rich, if they carry less in ready Money than two hundred thousand Dollars, and a hundred thousand Ducats of Gold, either *Hungarian*; *Venetian*, or *Moorish*; and this is only to be understood of what is entered at the Custom-house, there being always near as much more unregistered, and carried by Stealth, to save the Duties, which are very considerable. The Goods which these Caravans convey are Velvet, Satins, Armoins, Gold, *Levant* Stuffs, Camlets, Cloths, Saffron, Quicksilver, Vermillion, and Merceries, from *Nuremberg*. The Royal Ship, laden yearly for the *Grand Signor's* Account, from *Swes*, brings also the same Commodities as the Caravans, with the Addition of some *Muscovy* Hides, Pewter, Fonwa, a Drug to dye Scarlet, and about four hundred thousand Dollars, though but fifty thousand Ducats.

The Goods which the Caravans, Royal Ship, and other foreign Vessels lade at *Mocha*, in Return for those brought here, are partly the Products and Manufactures of *Arabia*, and partly what have been introduced by Ships from *India*, *Africa*, and *Europe*. The *Arabians* furnish but little towards this Commerce of their own Manufactures, as they have only some Cotton Cloth, and this but coarse; though, in Recompence of the said Defect, their Growths supply many valuable Commodities, as Incense, Myrrh, and Ambergris, Aloes, Balin, Cassia, Dragon's Blood, Gum Arabick, Coral, and a Quantity of Plants, both medicinal and odoriferous, precious Stones, especially *Babarem* Pearls, but above all, Coffee, which, besides being of the best Quality, is so plenty as to lade many Ships with it yearly, of which this Port is generally full from all Parts, and under all Colours, as from *Surat*, *Cambaye*, *Diu*, *Malabar*, and all Places in *India*; here are also Vessels of *Cassien*, *Socotra*, *Mascate*, and all the Gulf of *Persia*; and of the *Europeans*, *English*, *French*, *Dutch*, *Danes*, and *Portuguese*; and besides the Merchants of the above-mentioned Nations, this is the Rendezvous of many from *Barbary*, *Egypt*, *Turkey*, and all *Arabia*, and may properly be termed a general Magazine, where the Merchandizes of an universal Trade are deposited.

*Aden* formerly enjoyed all the Advantages in Trade that *Mocha* now does, by a Transfer from the other; and is the only Port that the *Grand Signor* has upon the Ocean; its Situation near the Mouth of the *Red Sea* renders it a Harbour common to both, which still attracts a considerable Trade from the *Arabians*, *Persians*, and *Indians*, as it some Time ago did from the *Dutch*, till their own Plantations of Coffee proved almost sufficient to supply their Demands, and consequently slackened their Intercourse with other Nations for it.

*Chicbiri*, or *Chiriri*, is seated higher than *Aden* in the *Persian* Gulf, and is the first City in *Arabia Felix*, where the *Dutch* used to Trade before their corresponding with *Aden*.

This City has an *Emir*, or *Arabian* Sultan for its Sovereign, although tributary to the *Turks*, to whom he pays annually four thousand Dollars, and twenty Pounds of Ambergris. The Vessels from *India*, *Persia*, *Ethiopia*, and the Islands of *Comorre*, *Madagascar*, and *Melinda*, are those that mostly frequent this Place, whose Imports and Exports being similar to those of *Aden*, a Repetition of them here is superfluous.

*Mascate* is a City in *Arabia Felix*, situated to the Westward of *Mogol* in the Gulf of *Persia*, in the Latitude of twenty-three Degrees thirty Minutes North, directly under the Tropick of *Cancer*, and is a Place of greater Trade than any other near the Gulf of *Ormus*. The Pearl Fishery hard by the Isle of *Babaram*, in the Months of *June*, *July*, and *August*, is alone capable of enriching the City greatly; but besides this, it has the Advantage of being a Depository of all the Drugs, and Merchandize of *Arabia*, transported from hence to *Persia*, *Egypt*, *Syria*, the *Indies*, and even to *Europe*.

*Cassien* has its Ports open and exposed to an East Wind, though sheltered from the West; its Trade is but inconsiderable, and this under the King's immediate Direction; some Vessels come here with Rice, Dates, and a Sort of Clothing made of Hair in *Persia*, which Goods are exchanged for Oliban, Aloes, and Butter; and the properest Time for this Commerce is in the Months of *May*, *June*, and *July*.

*Ser*; the Trade of this City, not far from the last mentioned, is very considerable; its Inhabitants are friendly to Strangers, and its Port being a very good one, attracts the Ships from several Parts, especially from *Mafate*, *Cameron*, *Surat*, *Galla*, and other Places on the Coast of *Ethiopia*; the Merchandizes exported from hence are Butter, Myrrh, Slaves, Oliban, Aloes, and other Drugs that *Arabia* produces.

*Mofeck*, distant from *Mocha* about ten Leagues, has lost its Trade by the Proximity, and now hardly deals in any Thing but Salt.

*Hodeeda*, is an Isle in the Latitude of fourteen Degrees fifty Minutes, that has a Creek proper for the Construction of Ships, and a secure Port; these Advantages draw a tolerable good Trade here, particularly in Coffee, brought from *Zidda*, *Mocha*, and other Parts.

*Gezeon*; the Pearl Fishery renders this Place famous, and its Trade flourishing, of which the *Banians* have the Direction, with very considerable Profits.

*Ferfoam* is an Island about three Leagues distant from *Gezeon*, which, besides the Pearl Fishery, has a great Trade in Wheat, with which it supplies all Parts of *Arabia*.

*Judda*, or *Zidden*; this is properly, as has been before observed, the Port to *Mecca*; its Trade consists chiefly in Coffee brought here by the *Arabians*, and bought by the *Turks*, who take it off, almost all; though here are also Merchants of *Mogul*, *Persia*, and several Places on the Coasts of *Ethiopia*.

#### Of the Trade of the Gulf of PERSIA.

THIS Gulf, called also the Gulf of *Ormus*, from the Isle of *Ormus*, a very little Distance from its Entrance, Gulf of *Bassora*, from a City of this Name in *Arabia Deserta*, at its other Extremity, and the Gulf of *El-Catif*, from a Kingdom in *Arabia Felix*, extending along the Coast, opposite to that of *Persia*, is equally celebrated for its Pearl Fishery, near the Isle of *Babarem*, as for its great Commerce with all the *Oriental* and *European* Nations, who send their Ships either to *Bender-Abassi*, or *Bassora*.

The City and Isle of *Ormus*, although quite fallen from its former Lustre, and entirely destroyed by Order of *Cha-Abas*, after his retaking them from the *Portuguese*, merit however to be mentioned, as due to the Memory of what they once were, and the Rank they for a long Time maintained among the most trading Isles and Cities of *Asia*.

This Isle, seated in the *Persian* Gulf, pretty near its Mouth, and two Leagues from the Coast of *Persia*, has little more than twenty Leagues Extent; yet it bore for a considerable Time the Title of a Kingdom, with its own Monarchs, Tributaries however to the King of *Persia*.

The *Portuguese*, who judged this Port necessary to their infant Commerce in the *Indies*, took it in 1507, and hereby shut up the Entrance to *Persia* against all other Nations, as no Person was henceforward permitted to traffick there without their Passport, or under their Colours; and whilst they, of all the *Europeans*, remained Masters of the *Indian* Trade and Navigation, the *Persians* did not find themselves in a Condition to shake off this Yoke, which these new Comers had put on one of the most famous Empires of *Asia*. But the *Dutch*, having followed the *Portuguese* to *India* in the latter End of the sixteenth Century, and the *English* at the Beginning of the seventeenth, the Emperor *Cha-Abas* availed himself of the Assistance of these latter, to drive the Enemies from their Isle, which they were obliged to surrender in 1622, having lost, as they pretend, at its Taking, more than six or seven Millions in Merchandize, and other Effects.

*Cameron*, *Gamron*, or *Gambrown*, the Port of all *Persia*, and perhaps of all *Asia*, where the greatest Trade is transacted, was quite disregarded, till the *Portuguese* were driven out of *Ormus*; as before that Occurrence, this was only a small Village with about fifty miserable Huts, where the *Portuguese*, however, kept twenty-five or thirty armed Barks, on Account of the Goodness of its Port, and to maintain their own Commerce, and hinder that of others.

*Abas* fortified the Port, and began to build the City, and by Privileges and Immunities drew Trade here, changing its Name, and calling it after his own. This Port is open to all Nations, except the *Spaniards*, and *Portuguese*; and here are seen, *Perfians*, *Arabians*, *Indians*, *Banians*, *Armenians*, *Turks*, *Jews*, *Tartars*, *Moors*, *English*, *French*, and *Dutch*.

The trading Time is from the Month of *October* when the great Heats are over, to the Month of *May* when they recommence, and at this Season the Ships of all the *Europeans* established in *India* arrive, and many others appertaining to *Indians* and *Moors*; and by Land at a fixed Day, are seen coming here, divers Caravans of Merchants, from *Ispahan*, *Schiras*, *Laon*, *Aleppo*, *Bagdat*, *Herat*, *Bassora*, &c.

The *English* began their Trade to *Persia* in 1613, and were so much the better received, as the *Grand Abas* then formed the Design of engaging their Assistance to dislodge the *Portuguese* from *Ormuz* and other Parts, and for that Purpose entered into a Treaty with our Countrymen, that entitled them to many Privileges, which have however been very ill observed; for as soon as the *Persian* Monarch had his Turn served, he forgot, or rather slighted his Engagements; and though he still continued to prefer the *English*, it was not in the Manner, and to the Degree, as was promised, or their Service deserved.

They now carry to *Persia* Silver, a large Quantity of Cloth, Pewter, Steel, Indigo, Silk Stuffs, and the finest and most beautiful *Indian* Cottons.

The *Dutch* Cargoes consist of *Spanish* Dollars, and Rixdollars, Goods that they receive from *Europe*, and what they collect from their different Settlements in *India*, but above all, Spices, with which they supply all *Persia*; *Siampan*, *Anis*, and *Santal Woods*, *Ginger*, *Indigo*, *Vermillion*, *Incense*, *Benzoin*, *Quicksilver*, *Lead*, *Pewter*, *Copper*, coloured Cloths and Linens.

The *Indian*, *Arabian*, and *Moorish* Vessels are laden with the Products and Manufactures of their Countries, and the Goods that come by the Caravans, consist of various Gold and Silver Stuffs, Velvets, Taffeties, Porcelaine, Feathers, *Morocco* Leather, Wool, Brocades, Carpets, *Turkey* Camlets, and other slighter ones from *Arabia*, Medicinal Drugs, *Dragon's Blood*, *Manna*, *Myrrh*, *Incense*, *Raisins*, *Dates*, *Barcum* Horses, but particularly raw Silk, which is the greatest Article in the *Persian* Trade; here are also found *Turquoises*, and *Pearls*, of which latter I shall have Occasion to speak more hereafter.

All Nations trading to *Gamron*, have their Houses and Magazines here; those of the *English*, *French*, and *Dutch*, having more the Air of Palaces than Merchants' Offices and Habitations, and are seated along the Sea Side, which is very convenient for the lading and delivering their Ships, as they arrive.

*Persia* has still some other Ports in its Gulf, but much less considerable than *Bender-Abassi*, which has attracted almost all the Commerce of these Parts.

*Congre*, or as some call it *Bender-Congo*, or *Bender-Erric*, is also in some Reputation, and Strangers send their ships, or conduct their Caravans here; the chief Trade is however in *Pearls*, and *Boles* for dying and painting *Green* and *Red*, which are gathered from little Hills of these Colours, in a Mountain a few Leagues from the City, called by the Natives *Cbiampa*.

*Babarem*, is an Island in the *Persian* Gulf, seated over against the Coast of *Arabia* from which it is but a little distant, belonging to the King of *Persia*.

The Soil is fertile, and produces plenty of Fruit, particularly *Dates*, though the Water has so bad a Taste that Strangers cannot use it, and the Divers who frequent this Place are obliged to seek it elsewhere. It is not the Fertility of the Isle, nor the Trade carried on here, that render it so famous in all the East, and oblige the *Perfians* to have a Citadel, and to keep a Garrison of three hundred Men here; but the *Pearl* Fishery, which is near it, produces at least a Million yearly.

This Fishery begins with *June*, and ends with *September*, in which *Pearls* of a large Size are sometimes taken, even to the Weight of fifty Grains, though in common from ten to twelve; and those that exceed this, ought to be separated for the King, though herein he has not always Justice done him.

*Bassora*, or *Bassora*, is situated on a River named by the *Arabians* *Schat-el-Arab*, which is formed by the Union of the *Euphrates* and *Tigris*, that join a

good Day's Journey above this City, and so united empty themselves into the Persian Gulf, Twelve Leagues below it. This place is rich, and of greater Trade than any one in Arabia Deserta, and its Possession having been for a long Time disputed by the Arabians, Persians, and Turks, these latter remained Masters of it.

Bassora, like Bender-Abassi, gained considerably by the Destruction of Ormus, and here are now seen Ships from all Parts of Asia, and Europe, and especially among these last, the English and Dutch make a considerable Figure, they having their Factories here, to transact their Business, and Dispatch their Letters by Land, which is done by the Way of Damas and Aleppo. The Portuguese also have a Settlement here, though to very little Purpose.

Almost all the Trade passes through the Hands of Indians, Persians, and Armenians. The Caravan of Bassora is one of those that carries to Bender-Abassi a Part of those rich Goods, with which that Trade is supported: And the same Caravan brings back, on its Return, the Products of India, China, Japan, and Europe, of which Bender is, as has been before observed, a Depository, Staple, or Storehouse for Persia, and the three Arabias.

Besides this Commerce with Bender-Abassi, and that which Bassora maintains on the Sea Coast with the Indians, Moors, and Europeans, whose Ships arrive here every Mousson, this City has also a very considerable one with Bagdat, which is not at a great Distance, and is commodiously seated for a Transportation of its Commodities by the Tigris; and the same with Aleppo, and the Rest of the Ottoman Empire in Asia, from whence Caravans set out, and a Part of them always destined for Bassora.

We might also place in the Number of those Things that render this Trade flourishing, the passing here of the Persians, in their Pilgrimage to Mecca, who commonly take this Route, and not only pay large Duties to the Turkish Bashaw, but also exchange or sell a Quantity of Goods here, which they bring in their little Caravans going and coming.

*Of the inland Commerce of PERSIA, and the States dependent on it.*

COMMERCE is regarded as an honourable Profession in Persia, where the Name of a Merchant is esteemed a Sort of Title of Distinction, and something respectable; the Noblemen, and even the sovereign himself, do not disdain to exercise the Function, and to have Warehouses, &c. for carrying it on.

The Empire of Persia is of so great an Extent, and its Provinces are generally so rich and abundant, that the Assertion of its Trade being one of the most considerable in Asia has nothing surprising or incredible in it.

Ispahan is as the Centre of this Commerce; it is from thence that the Caravans set out for carrying the Goods to Bender-Abassi, which the Factors of foreign Nations residing here have purchased for shipping. And it is here, where many yearly arrive, both from within and without the Kingdom, as from Scbiras, Laor, Aleppo, Bagdat, Herat, Bassora, and all those from the Levant; and there are few Cities, where Trade attracts so large a Number of Strangers as this; of which the most considerable are the Armenians of Zulfa, a Colony which Abas le Grand established in one of the Suburbs; and the Indians, of which here are more than a thousand, who have their Shops in the Meidan or market, next the Persians.

Here are also settled though less numerous, English, French, Dutch, Italians, Spaniards, Tartars, Arabians, Turks, Georgians, Persians from all the Provinces of the Empire, and Jews.

There are no Sorts of Goods, which may not be found in Ispahan; but the greatest Trade it drives is in Silk, of which an almost incredible Quantity is annually gathered in Persia. The Provinces which produce most, are Guilan; Mesanderan, Media, Bactria, Caramania, and Georgia, which all together may produce about twenty-two thousand Bales of two hundred and seventy-six Pounds each, with an appearance of its yearly increasing.

This Silk is distinguished into four Sorts, viz. Chirvan so called from Chirvan in Media, near the Caspian Sea; and in Europe Ardasse, Karvary, or Legis gathered

thered at *Legiam*, a small Town of *Guilan*, *Ked-Coda-Pensud*, or *Bourgenif* and *Churbasse*, or *Brocard*. Of all which Silks, it is said not above a thousand Bales are used in the *Perſian* Manufactories, and the Rest fold for Transportation to *Turkey*, *India*, and all Parts of *Europe* and *Asia*.

The Manufactures of Stuffs in *Perſia* are on a Footing with thoſe in *Europe*, excepting Cloths, of which there is no Fabrick eſtabliſhed, and the *Perſian* Manufacturers make of Felt, which they underſtand the working up, as well as any People, ſome Cloaks and common Carpets to cover the fine ones, for which they are juſtly ſo famous.

A very great Trade is carried on in *Perſia* with Cloths from *Europe*, brought by the *Engliſh* and *Dutch* to *Gamron*, among which are likewiſe ſome *French*, more eſpecially thoſe of *Berry* and *Uſſeau*.

The Stuffs the *Perſians* moſt commonly make in their Manufactories, are of Wool, Cotton, Goats' and Camels' Hair, and above all, Silk, with which they very often mix the three laſt Materials. The ſpinning, winding, and milling, are ſimilar to what is practiſed in *France* at *Lions* and *Tours*, and the *Perſians* are intelligent in the Uſe of the Diſtaff, Spindle, Reel, and Mills, which ſerve in the ſaid two Cities, for the Silk's Preparation.

The Stuffs they make of pure Silk, are Taffeties, Tabbies, Sattins, Gros de Tours, Turbans, Ribbons, and Handkerchiefs. They make alſo Brocades, Gold Tiſſues, and Gold Velvets, of which laſt Sort ſome coſt fifty *Tomans* the *Gueſe* or *Perſian Aun*, which comes to about five Pounds Sterling per *Engliſh* Yard, and is certainly the deareſt in the World. The fineſt *Perſian* Carpets are made in the Province of *Kirman*, eſpecially at *Sijlan*; and among the Stuffs made of Silk only, there are many painted with various Deſigns, and ſome heightened with Gold and Silver, applied with Moulds and Gum Water, which they underſtand ſo well performing, as to make them almoſt appear true Brocades.

The Woollen Manufactures, or thoſe of Camels' Hair, are for the moſt Part eſtabliſhed at *Yeſde*, *Kirman*, and *Mongnay*; the Wools of *Kirman* being the fineſt in the World. The Goats' Hair Stuffs are made in *Hircania*, and reſemble Baragons, the fineſt coming from *Dourak* in the *Perſian* Gulf.

The other Goods which the *Perſians* ſend abroad beſides their Silks and Stuffs, are Porcelaina, Feathers, *Morocco* Leather, Cotton Wool, or Thread, Chagrin of all Colours, Tobacco, Galls, Mats, Baskets, Things wrought in Box, Iron and Steel of *Cafſhin*, and *Koraſan*; Furs, Lapis Lazuli which comes from the *Ulbocks*, but of which *Perſia* is the Storehouſe, Perfumes, eſpecially Ambergris and Muſk both Productions Strangers to *Perſia*, but found here in great Abundance, the one brought from *India* and the *Red Sea*, and the other from *Tibet*. Pearls from the *Perſian* Gulf, Turquoifes, all Sorts of Spices brought by the *Dutch* to *Bender-Abaffi*, Saffron the beſt in the World, particularly that from the Coaſts of the *Cafſian* Sea, and *Amadan*, Allum, Brimſtone, diſtilled Water of Orange Flowers, Roles, &c. Glaſs, Cryſtal, divers Animals' Skins prepared at *Sebiras*, Coffee brought there from *Arabia*. In fine, Variety of Medicinal Drugs and Gums, which either grow or are brought here; and among the products of *Perſia*, and as Part of her Merchandize, the excellent Wines of *Sebiras* and *Yeſde* ſhould not be forgotten, as the *Perſians* do not conſume the whole themſelves though the great Men here are very much given to Inebriety, notwithstanding the *Alcoran's* Prohibition; but they are transported annually to a very conſiderable Value all over *Indoſtan*, and even to *China*. Piſtaches and Almonds grow plentifully in *Yeſde*, *Cafſhin*, and *Sultania*; and of Camels, Horſes, Mules, and Lambs, large Quantities are yearly ſent into the Dominions of the *Grand Signor*, to *Indoſtan*, and to other Parts of *Asia*. All that has been here ſaid of the Trade of *Perſia*, muſt be regarded as a Deſcription of it before the Revolution in 1721; and as the Troubles in that Kingdom ſtill continue, the Commerce there is not only interrupted, but in a manner loſt, eſpecially to the *Europeans*, and muſt remain ſo, till Peace the Parent of it reſtores Tranquillity, and places Trade on the footing it formerly was.

## Of GEORGIA and MINGRELIA:

THERE is hardly any Country in all *Asia*, more abundant in Cattle, wild and tame Fowl, Fruits, Wines, and indeed all the Necessaries of Life, nor where they are in greater Perfection, than in *Georgia*. Its Wines, particularly those of *Teflis* its Capital, are transported to *Armenia*, *Media*, and even to *Ispahan*, where a Quantity of it is always reserved for the King's Table: Silk is gathered here in Plenty, but the *Georgians* not understanding its Preparation, nor having hardly any Artificers among them to manufacture it, they carry it among their Neighbours, and drive a great Trade with it at *Arzerum* in *Turkey* and thereabouts.

The Lords in *Georgia* being Masters of the Lives and Liberties of their Vassals, as the Fathers are of their Children, made a bad Use of their Power, by selling many thousands of both Sexes yearly for Slaves, more especially of the Females, who being all very beautiful, were purchased by the *Turks* and *Persians* for their Seraglios; and this iniquitous Commerce was principally carried on by the *Armenians*. The *Turks* likewise sent out large Parties of *Janissaries* to seize and carry off the Boys and Girls early; but since the Conquest of this Country by the valour of Prince *Heraclius*, who has made it independent, the female *Georgians* have been protected from this Violence, and preserve their Liberty and their Chastity.

*Mingrelia* does not traffick less in Slaves than its Neighbour Territory, as above twelve thousand of these unhappy Wretches are yearly disposed of in this Manner, of which above three thousand are purchased for *Constantinople*. The other Merchandizes that this Country produces, are Silk, Flax, in Linen and Thread, Linseed, Hides, Martens' Skins, Castor, Box, Wax and Honey of two Sorts, the one white and the other red, though both excellent; it is the *Turks* of *Constantinople*, and the Merchants of *Cassa*, *Gonia*, *Irisfa*, and *Trebisonde*; who carry on this Trade; and it is common to see twelve Sail yearly from *Constantinople*, and more than sixty Feluccas from other Parts, which bring here sundry Goods and Provision, to truck against those of the Country, as very little or no Money intervenes in these Negotiations, or any that are transacted by the *Mingrelians*.

The Goods proper for this Exchange, are Bracelets, Rings, Glafs, or small Necklaces, small Knives, Pins, Needles, and other minute Mercery.

Brimstone and Nitre are found near *Teflis*, as a fossile Salt is, in some Mines in the Road to *Erivan*. Olive Oil is very dear, so that the Natives both eat and burn that of Linseed; which is all the Use the *Georgians* make of this Plant, as they throw it away when the Seed is gathered, though they might have excellent Flax from it, did they not prefer the Cotton Cloth to Linens.

*Avogasia*, Part of *Mingrelia*, is abundant in Flax, Hemp, Pitch, Wax, and Honey, though this last is commonly better, by Reason of the Bees gathering it from the Box and Yews that grow here in Plenty. Vermilion is found in an almost inaccessible Rock; and it is in several Parts of this Province, that the true Rhapontick is met with, which many take for Rhubarb, and what dishonest Druggists sell for it.

## Of ARMENIA.

THIS Kingdom, after many Revolutions, was at last subjected by the *Turk* and *Persian*; and as I have already treated of that Part belonging to the *Schah*, I shall now speak of the other under the Dominion of the *Grand Signor*, or at least of the two principal Cities, which seem to have divided the Trade of all the Rest of the Kingdom between them.

*Erzerum*, or *Erzeron*, Capital of the Part of *Turkish Armenia*, is a City of very considerable Trade, consisting chiefly of Copper Plates, Dishes, &c. Furs, Galls, Caviar, and Madder. The *English* drive a great Trade here, and have a Consul, who lives in a very handsome Manner.

*Tocat* is the second City in *Turkish Armenia* for Trade, and is regarded as the Centre of it for *Asia Minor*, where Caravans are incessantly arriving or departing;

ing; those of *Diarbequis* are eighteen Days coming here, and those from *Erzerum* but fifteen. Those from hence to *Sinope* are but six Days going, and those from *Bursa* twenty. The Caravans that go directly to *Smyrna*, without passing by *Angora*, or *Bursa*, are twenty-seven Days on the Road if with Mules, but forty if Camels are the Bearers; in fine, here are Caravans that go only to *Angora*.

The great Trade of this City consists in Utensils of Copper, as Kettles, Cups, Candlesticks, and Lanterns, which the Artisans here work very neatly, and these Commodities are sent to *Constantinople* and *Egypt*; the Copper they make Use of comes from the Mines of *Gumficana*, three Days' Journey from *Trebisonde*, and from that at *Castamboul*, ten Days' Travel from *Tocat* towards *Angora*.

Here is prepared a Quantity of yellow *Morocco* Leather, which is carried to *Samfon* on the *Black Sea*, and from thence to *Calas*, a Port of *Valachia*, where are also sent some red ones; but these the Merchants of *Tocat* procure from *Diarbeck* and *Caramania*. Painted Linens are also a great Object of Trade here; and although they are not so handsome as those of *Persia*, yet the *Muscovites* and *Crim Tartars*, for whom they are designed, are contented with them; and the Commerce of Silk is not inconsiderable here, though that of the Growth of the Place is all worked up here in slight Silk Stuffs, sewing Silk and Buttons.

#### Of the Commerce of Great TARTARY.

THE *Tartars* are at present Masters of a third Part of *Asia*, and their Country, commonly, called *Great Tartary*, to distinguish it from the *Lesser*, which is in *Europe*, is situated between seventy-five and an hundred and fifty Degrees of Longitude, and from thirty-eight to fifty two Degrees of North Latitude; these People now possess all the North of *Asia*, and are at present divided into three different Nations, viz. the *Tartars*, properly so called, the *Calmoucks*, and the *Moungales*; for though all these *Pagans* that are dispersed about *Siberia*, are without Doubt descended from the *Tartars*, yet they are not now considered as a Part of them, but regarded as a savage People. The *Tartars*, particularly so named, inhabit the Western Parts towards the *Caspian Sea*, and are all *Mahometans*: The *Calmoucks* are in the Middle of *Great Tartary*; and the *Moungales* near the *Oriental Sea*, but both are Idolaters. The first are subdivided into many Branches; and the *Moungales* into Tribes, or Branches of Tribes: And *Great Tartary* does not belong to one Sovereign only, as many have believed, but is possessed by the Czar of *Muscovy*, the Emperor of *China*, and by many petty Chans or Princes, who reign over large Provinces.

This vast Country is under the finest Climate in the Universe, and of an extraordinary Goodness and Fertility; but, as it is one of the highest Tracts of inhabited Land, it wants Water in many Parts, though washed by nine principal Rivers, viz. the *Anur*, *Scbingol*, *Selinga*, *Jenisca*, *Amu*, *Khefell*, *Jaicks*, *Irtis*, and the *Oby*, and therefore is only cultivated on their Borders, and this but just where Necessity drives the Inhabitants; for the *Calmoucks* and *Moungales* never use any Agriculture, and only live on what their Cattle produces them; and their vagabond Life is owing to this Want of Farming, which constrains them to change their Habitations in Conformity to the Seasons, occupying the Northern Country in the Summer, and the Southern in the Winter.

*Great Tartary* has this Peculiarity, that it produces no Trees of any Height, except towards the Frontiers, and there only in some few Places; for all that are found in the Heart of the Country are only Shrubs, not exceeding a Man's Height; but in Recompence hereof the Mountains furnish the Natives with a large Quantity of wild Goats, white Bears, black Foxes, Ermines, Sables, and Gluttons, a flesh-eating Animal a little smaller than a Wolf, whose Furs, with Rhubarb, Ginseng Roots, Silk, Wool, and Musk, constitute the Trade of the Northern, Eastern, and Southern Part of the Country; but the *Tartars*, who inhabit the West, on the Borders of the *Caspian Sea*, regard all Trade as a Matter beneath them, and glory in robbing the Merchants who pass through their Territories, or at least exact so on them, as to make them lose all Desire of returning among them; and indeed, all these *Mahometan Tartars* live on the

goes fo  
Slaves, th

Rapine and Spoil, which they pillage from their Neighbours, whether in Peace or War; in which they are very different from the *Calmoucks* and *Moungales*, who, although they are *Pagans*, live quietly on the Products of their Flocks, and offend no one, unless they are first molested: Of these some have fixed Habitations, though others have neither Towns nor Villages, but live in Tents, and wander from one Place to another, according as the Conveniency of Pasturage invites; and they all support themselves by equine Food, as we do by that of Oxen and Cows, of which latter they rarely eat, but live chiefly on Horse Flesh, and make use of Mare's Milk, as the *Europeans* do of that of their Kine. The *Tartars* have so strong a Passion for the Colour red, that not only their Princes and Ladies, but even the common People, through all the North of *Asia*, would do more for a Piece of Stuff with this Dye, than for four times the Value in Gold and Silver.

The chief City of the Eastern, or *Nieuchou-Moungales*, is *Naun*; that of the Western, or *Calcha-Moungales*, *Argunfsky*. The Kingdom of *Tangut*, or *Bagbar-gar*, is divided into two Parts, of which the Southern is properly called *Tibet*; this Kingdom is now in the Hands of the *Calmoucks*, and is the peculiar Patri-mony of *Dala-Lama*, the Sovereign Pontiff of all the *Pagan Tartars*, who by some has been confounded with *Prester-John*, before spoken of. The Capital of this Kingdom is *Barantola*, in whose Neighbourhood is gathered a Quantity of Rhubarb, &c. and at *Tarzinda* is a Mine of Gold extremely rich, at the Foot of the Mountains which separate the Lands of *Contaisch* from those of *China*, to the East of the Deserts of *Goby*, of which the *Chinefe* have taken Possession, and have established here some Colonies of the *Moungalians*.

The Kingdom of *Casibgar*, or the *Little Boucharie*, is a fertile Country, and tolerably populous; it is rich in Gold and Silver Mines; but the *Calmoucks*, who are at present its Masters, receive but little Benefit from them, as they live quietly on the Products of their Cattle, and never mind Gold nor Silver, that is to cost them Trouble in its Acquisition; however the *Bouchares*, who inhabit the Towns, collect a good deal of Gold Dust in the Spring, in the Gutters, which the Torrents occasioned by the melting Snows make on every Side of the Mountains. and carry it to *India*, *China*, and even as far as *Tobolsky* in *Siberia*. There are also found large Quantities of Musk in the *Casibgar*, and many Sorts of precious Stones, among which are Diamonds; but the Inhabitants have not the Art to cut or polish them, and therefore are obliged to sell them rough.

The City of *Casibgar*, which gives its Name to the Country, was once the Capital of the Kingdom, but since the *Tartars* have been in Possession of it, it is greatly fallen from its pristine Grandeur; however, it still carries on some Trade with the neighbouring Countries, though little in Comparison of what it did formerly.

*Jerkeen* is at present the Metropolis of the *Little Boucharie*, and is pretty large. It is the Staple of the *Indian* Trade with the North of *Asia*, of *Tangut* with *Siberia*, and of the *Grand Boucharie* with *China*, which renders it both rich and populous. If *Peter* the Great had lived a few Years longer, he would have endeavoured to establish a Trade between this Place and his Territories, by Means of the *Irtis*, which would have been very advantageous to *Russia*.

*Chateen*, or *Cbotan*, is to the East of *Jerkeen*, and is at present in a flourishing Condition, by Reason of the great Trade carried on here between the *Bouchares*, *Calmoucks*, *Indians*, and the *Tangutois*, and the extreme Fertility of the Soil.

The *Great Boucharie*, of which *Bouchara* is the Capital, comprehends the *Sogdian*, the *Eactriana* of the Ancients, with their Dependencies, and is at present the best cultivated, and most populous of any Province in the *Grand Tartary*.

With the *Makometan Tartars* the Slaves are a considerable Object of Trade, for whose Capture they often make War with their Neighbours, keeping some for their own Service, and selling the Rest where they can; and this Commerce goes so far with some of them, that in Default of an Opportunity to make Slaves, they do not scruple to steal and sell the Children of one another, or to

sell their own, if they cannot do better; if they are tired of their Wives, they sell them without any Ceremony, as they do their Daughters, especially if they are handsome.

The Horses of these *Tartars* have but a bad Appearance, being very lean, notwithstanding which they are indefatigable, and may justly be termed the best Horses in the World.

It must be acknowledged that Nature has with-held nothing from this fine Country, that could render an Abode here agreeable; the Mountains abounding in the richest Mines, and the Vallies in an admirable Fertility of all Sorts of Fruits and Pulse. The Meadows are covered with Grass Man-high; their Rivers full of excellent Fish; and Wood, so scarce in all the Rest of *Great Tartary*, grows abundantly in many Places of this Province; but all this is of very little Use to the *Tartar* Inhabitants, who are naturally so slothful, that they rather chuse to piller and steal, than to apply themselves to cultivate what Nature has offered them so liberally.

*Carfebi*, or *Karfebi*, is at present one of the best Cities in the *Great Boucharie*; it is large, well-built, and better peopled than any other in the Country; the adjacent Parts are extremely fertile, and its Inhabitants carry on a very good Trade to the North of *India*.

*Jalugafan*, which stands almost in Front, is one of the chief Passages by which People enter from the States of *Contafch* into the *Great Boucharie*.

*Badagfchan* is a very ancient, and extremely strong City; it is not large, but well enough built, and populous; its Inhabitants are rich by the Gold, Silver, and Ruby Mines in its neighbouring Mountains; although there is no one who regularly works these Mines, those who live at the Foot of the Mountains do not benefit themselves a little by the Grains of Gold and Silver which they collect in the Spring, after the melting Snows have washed them from their Beds, by their Torrents.

*Anderab* is the most Southern City of all the *Great Boucharie*, separating the Territories of the *Great Mogul* and *Persia* from *Grand Tartary*; it is by this Place, that whatsoever is brought in, or carried out of their Country, to or from the States of the former, must necessarily pass. And there is in the Neighbourhood of *Anderab* rich Lapis Lazuli, with which the *Bouchares* carry on a considerable Trade, with the Merchants of *India* and *Persia*.

Although *Cabul*, or *Caboul*, depends on the *Great Mogul*, and not on the *Chan* of *Balck*, it will be à propos to say something here concerning the flourishing Trade maintained between the Subjects of these two Princes. *Cabul*, situated at the Foot of the Southern Mountains which separate the Estates of the *Great Mogul* from the *Grand Boucharie*, is one of the finest Cities to the North of *India*; it is large, rich, populous, and because it is considered as the Key of the *Grand Mogul* Territories towards *Persia*, and the *Great Boucharie*, is always carefully kept in a good State of Defence. This City is the Staple of all the Merchandize that passes to the *Indies*, *Persia*, and the *Grand Boucharie*. The Subjects of the *Chan* of *Balck* come here in Throngs with Slaves of both Sexes, and above all, with *Tartarian* Horses, of which so great a Trade is driven in this City, that it is pretended here come yearly more than sixty thousand. The Neighbourhood of *Cabul* is very fertile, and all that is necessary for Lite grows here in Abundance, and is very cheap.

The City of *Bouchara* or *Buchara* is upon a River, whose Waters are very unwholesome, and which discharges itself into the *Amu*, about forty Leagues from the *Caspian* Sea; it is large, fortified, and well seated for Trade with *Tartary*, *Persia*, and *India*; though with all these Advantages it carries on but little, being hindered by the extraordinary Impositions on Foreigners in the Article of Customs.

*Samarkant*, Capital of the Province of *Maurener*, is about seven Days' Journey to the North of *Bouchara*, and was formerly much more brilliant than now; however, it is large and populous enough; it is said that the best Silk Paper is made here of any in the World, and therefore is much sought after by the *Oriental* Nations. Here is the most famous *Mabometan* Academy of Sciences; and its adjacent Grounds produce Apples, Pears, Grapes, Melons of an exquisite Taste, and

in such Quantities, that the Empire of the *Great Mogul*, and Part of *Perſia*, are ſupplied from hence with them: And indeed this City wants nothing to render it conſiderable in Trade, but other Maſters and Neighbours than the *Mahometan Tartars*.

*Wardanſi*, ſeated to the Weſtward of *Bauchara*, towards the Frontiers of *Charaſſin*, is a tolerable large City, inhabited by the *Boucharies*, who in peaceable Times trade to *Perſia*, and in the Country of *Charaſſin*.

*Balck* is the Capital of the ſmalleſt, and moſt Southern Part of the *Grand Boucharie*, but extremely well cultivated, and fertile; here is gathered a great deal of Silk, which the Inhabitants work up into Stuff: The *Uſbecks* here are the moſt civilized of all the *Mahometan Tartars* of the *Grand Boucharie*; to which the great Commerce they drive with the *Perſians* and the Subjects of the *Great Mogul* does not a little contribute.

*Talckan*, ſeated below *Balck*, on the River that runs by it, is a ſmall City, well built, pretty populous, and with a tolerable Trade.

*Cachemire* is a ſmall Kingdom, that is hardly thirty Leagues long, by twenty broad, ſo ſhut in by high Mountains, which ſeparate *India* from the *Grand Tartary*, that there is no Entrance to it on any Side, without paſſing Rocks of a prodigious Height; it is almoſt one continued Valley, whoſe Fertility and Beauty makes up for the Smallneſs of its Extent, as all Sorts of Fruit and Pulſe that we have in *Europe* grow here abundantly, without the Trouble of Cultivation.

The *Cachemirians* are very induſtrious, and poſſeſs the Secret of making the laquered Wares, and light Woollen Stuffs with Borders, ſo much eſteemed in *India*. The River *Amu*, or *Abiunu*, which has its Source to the North-North-Eaſt of this Kingdom, and runs by it, is full of all Sorts of Fiſh, and its Borders quite charming, on which grow thoſe excellent Melons, and all thoſe other delicious Fruits, which are ſo ſought after in *Perſia* and *India*, and which are tranſported even to *Ruſſia*.

*Charaſſin* is a Country extremely fertile in all thoſe Parts that are fit for Culture, and its Inhabitants are reckoned the richeſt Herdſmen of all the *Ottoman Empire*; they are ſupported entirely by their Cattle, which conſiſt in Camels, Sheep, and Goats; and lodge in Tents, which they tranſport from one Place to another, according as the Sealon and Conveniency of Paſture ſuits: In Winter they encamp along the *Euphrates*, on the Side of *Meſopotamia* and *Natolia*; and the Summer Heats invite them to the reſreſhing Vallies encloded by the *Armenian Mountains* towards the Riſe of the *Euphrates* and *Tigris*.

The ſecond Body of *Turkmen*s, called *Eastern Turkmen*s, alſo ſubſiſt by their Cattle or Agriculture, according to the different Diſtricts they are found in; the Winter Sealon they paſs in the Towns and Villages in the Neighbourhood of the *Amu*, and the *Caspian Sea*; and in Summer they encamp whereſoever they meet with good Paſtorage and Water.

There are twenty Provinces in this Country of *Charaſſin*. That of *Burma* is to the Eaſt of the City of *Uſſir*, towards the Frontiers of the *Grand Boucharie*. This Province is very fertile, populous, and produces the moſt delicious Melons of all the *Charaſſin*. That of *Gordijeb* is between the *Piſchga* and the *Kumkant*; and as this Province is watered by the River *Amu*, it is one of the moſt fruitful and beſt cultivated Parts of the *Charaſſin*.

The *Choraſan* is beyond Contradiction the fineſt, richeſt, and moſt fruitful Province of all *Perſia*; but having mentioned it already, I ſhall only add here, that as the Climate of this Country is excellent, and the moſt temperate of any in this Empire, nothing in theſe Parts can equal the Fertility of its Soil; all ſorts of exquisite Fruits, Cattle, Corn, Wine, and Silk thrive here to a Miracle: Mines of Gold, Silver, and precious Stones are not wanting; and, in fine, all that can render a Place rich and agreeable this Province abundantly poſſeſſes.

The City of *Meſched*, or *Meſchet*, ſituated on a little River which falls into the *Kurgan*, was once in a very flouriſhing Condition, by the many conſiderable Manufactures of Gold and Silver Brocades, with other Stuffs, ſettled here. The Earthen Ware of this Place was alſo very much eſteemed, beſides which a great Trade was carried on here in thoſe beautiful ſilver-grey Lamb-skins with curled Wool, finer than

than Silk itself: And it was in every Respect a very rich, stately, and populous City, till the *Usbeck Tartars* plundered and left it in a miserable forlorn Condition; its adjacent Parts are, however, the most charming of any in the World, and produce in Abundance all Sorts of exquisite Fruits and Greens, as its neighbouring Mountains do *Turquoises*, and even *Rubies*.

*Herat* is at present the finest and largest City of all this Province, since the Ruin of the last-mentioned, which was the Capital; it is rich, fair, and populous, and produces the handsomest Carpets of all *Persia*; here are also made several Sorts of valuable Stuffs and Brocades; and in a Word, this is the Staple of almost all the Commerce carried on between *Persia* and *India*, as it lies in the Route from *Isphahan* to *Candahar*.

*Atrabath* is situated on a Gulf of the *Caspian* Sea, being the Capital of the Province of that Name, and passes for one of the finest Cities in *Persia*, as it is large, well-built, rich, and very populous. Here are many fine Fabricks of Silk and Woollen Stuffs, more particularly of a Sort of Camlet that is vastly esteemed. The circumjacent Lands are equally agreeable and fertile in every Necessary of Life, and the neighbouring Mountains are all covered with Forests of Fruit-Trees. The Gulf of *Atrabath* is about fifteen Leagues from East to West, and four or five from North to South, but is only navigable for small Vessels, because here is not more than ten or twelve Feet Water at its Entrance to the *Caspian* Sea, but it is of great Convenience to this City, by Means of the Communication it has with all the *Persian* Cities seated on that Sea.

*Mankislak* is a small Town in the Country of *Charassim* on the Borders of the *Caspian* Sea, to the Northward of the Mouth of the Southern Arm of the *Amu*, and in itself is but trifling, as it does not contain at utmost above seven hundred miserable Cots; but its Port is excellent, and the only one in this Sea; it is spacious, secure, deep, and if it was in other Hands, would make Trade soon flourish.

*Urgens*, the Capital of *Charassim*, is situated in a large Plain, to the North of the River *Amu*, about twenty-five *German* Leagues from the Eastern Border of the *Caspian* Sea. This City was once very considerable, but since it became subject to the *Tartars*, and the *Amu*, that run at the Foot of its Walls, has taken another Course, it is fallen greatly to Decay.

*Turkestan* is about seventy Leagues long, and as many broad, having several good Districts of Land on the Side of the River *Jemba*, and towards the Mountains which divide this Province from those of the *Calnoucks*; but the Inhabitants make no Advantage of it, as Rapine is their only Occupation, and few among them have any fixed Habitation, but live in Tents, towards the Frontiers of the *Calnoucks*, and the aforesaid River, that they may be within Reach of benefiting themselves by any Occasions that shall offer for Pillage or Plunder; and they go to sell the Slaves they make in these Excursions either to the *Charassim* or *Grand Boucharic*, where they always find *Persian* or *Armenian*, and sometimes *Indian* Purchasers.

#### Of the Caspian Sea.

IT is but a little while since we have had any true Knowledge of the *Manderan* or *Caspian* Sea, which the *Persians* call *Kussim*. It is beyond Dispute the greatest Lake in the Universe, being situated between the thirty-seventh and forty-seventh Degrees of Latitude, and the seventy-seventh and eighty-third Degrees of Longitude; its Waters are extremely salt, except towards its Shores, where they are freshened by the Rivers running in, and it abounds with Sturgeons, Salmon, Salmon Trout, &c. all which Fish come in the Spring to seek the Mouths of the fresh Water Rivers; and it is incredible what a Quantity are yearly taken at this Season; here are also Carp and Bream, which is something particular in a Sea, whose Water is naturally salt; and here is also the White Fish, called by the *Russians* *Bielluga*, which is peculiar to this and the *Black* Sea; and for this Reason some pretend that these two Seas have a subterraneous Communication. All these Sorts of Fish are much larger and fatter than elsewhere, especially the White Fish, which have been taken twenty Feet long; they have some Resemblance to a Pike, with the Taste of a Sturgeon.

The *Caspian* has neither Flux nor Reflux; and the only Port is *Baku*, in the Province of *Schivan*, on all its Western Coast, and this solely for small Vessels; though there is a good Road at *Terki*, where the Vessels ride in Safety, between the Isle of *Zeken* and the Land. On the Eastern Coast is the Port of *Mankijeblak* in the *Cborassan*, which is excellent, and the only one found in this Sea; but being unhappily in the Hands of the *Tartars*, with all this Eastern Coast, it is of very little Use.

*Of the COSACKS, or COSAQUES.*

THE *Cosacks* are now divided into three Branches, and the *Russians*, on whom they depend, call their Country the *Ukraine*, which is in that Language, *situated on the Frontiers*, because it effectually makes a Frontier between *Russia*, *Poland*, *Little Tartary*, and *Turkey*, being to the Westward of the *Borjibenes*. As this Country is an entire Plain interspersed with fine Rivers, and agreeable Forests, it must be supposed to be extremely fruitful; as it is in Effect, and produces all Sorts of Grain and Pulse, Tobacco, Wax, and Honey in such Abundance, that it supplies a great Part of *Russia* with it. The Pasturage here is so excellent, that the Cattle surpass all others of *Europe* in Size; the *Muscovite* Beef that I have seen, has always been very small, though I think fatter, and superior in Quality to any other. The Rivers are stocked with excellent Fish, and Game is found here in such Quantities, that this Country only wants a Communication with the Sea, to be one of the richest States in that Part of the Globe.

The *Don Cosacks*, who occupy, on the Banks of the River with this *Russian* Name, a Number of Towns and Villages, do not extend themselves far within Land, as there is a Want of good Water in many Parts, and no Wood; they live on their Cattle's Produce and Agriculture, without forgetting however to live at the Expence of others, whenever Occasions present.

The *Cosacks* of the River *Jajcks* took Possession of its Southern Border, when the *Tartarian* Power began to decline there; and when the *Russians* seized the Kingdom of *Astracan*, the *Cosacks* voluntarily submitted to their Dominion. These People live by Agriculture, Fishing, and the Produce of their Cattle, with what Booty they can make. This River at present separates *Russia* from the Estates of *Contajsch*, and its Banks are so fruitful, that however little the Earth be cultivated, it abundantly produces every Necessary of Life. It is also extremely full of Fish; and it is asserted, that in the Spring, so great a Quantity come here from the *Caspian* Sea, to seek fresh Water, as almost to stop its Course, and may be taken with the bare Hand, with the Roes of which prodigious Shoals, caught in this River and Neighbourhood, so much Caviar is made and exported to all *Europe*.

The *Tartars* of *Nagai* subsist by their Hunting, Fishing, and Cattle, being subject to the *Russians* ever since their taking the Kingdom of *Astracan*, which the others possessed before; the Capital of the same Name is seated on the Frontiers of *Asia* and *Europe*, and by this convenient Situation invites a large Number of *Armenians*, *Indians*, *Persians*, *Mahometans*, *Tartars*, *Calmoucks*, *Georgians*, and *Muscovites*, to form a considerable Trade here.

The *Volga* is one of the largest Rivers in the World, and traverses almost all *Russia*; it abounds with all Sorts of Fish, and its Borders spontaneously produce most Species of Pulse and Herbs without any Labour or Cultivation.

The *Calmoucks* are Part of the *Pagan Tartars*, descended from the *Mogoules*, and desirous of being still called so; they inhabit the finest and most considerable Part of *Tartary*. The best Iron of all *Russia*, and it is probable of the whole World, known in that Country by the Name of *Siberian* Iron, comes from the Mountains of *Aigles*, that separate *Russia* from *Siberia*; which Metal is melted and wrought with the same Ease as Copper, and there are Cannons made of it, nothing inferior to those of Brass, either in Beauty or Goodness. These People carry on no Trade, except by Way of Barter for Cattle, and are harmless and inoffensive, if not molested, as has been before observed. The *Oby* and *Orn*,

large Rivers in this Country, are full of Fish, and most of their Borders very fertile in every desirable Product.

*Of the general Commerce of the EAST-INDIES.*

**T**HE *East-Indies* commence where the Kingdom of *Persia* ends, being separated from it by a long Chain of Mountains, and the River *Indus*, whose Name they have taken, and which on issuing from Mount *Taurus*, where it rises, takes its Course towards the Northern Parts of *India*, as the *Ganges*, which flows from the same Mountain, does towards the South, both falling at last into the *Indian Ocean*; the first into the Gulf bearing its Name, and the other into that called *Bengal*. This vast Region of *Asia* is called the *East-Indies*, from its advanced Situation towards that Part of the Heavens, more than any other Country yet known; as *America* is in the same Manner distinguished by the Denomination of the *West-Indies*, on Account of its lying more West than any other District of the habitable Globe.

*East-India* is commonly divided into that on this Side of, and that beyond, the *Ganges*; the first Part comprehends the Empire of the *Great Mogul*, the Kingdoms of *Decan*, *Narjinga*, *Canara*, the *Pesiberie*, or Fishing Coast, that of *Coromandel*, *Rejnagar*, and *Orixa*. The other includes the Kingdoms of *Bengal*, *Ara-can*, *Pegu*, *Siam*, *Malacca*, *Camboya*, *Ciampa*, *Cocbinchina*, *Brama*, *Jangomea*, *China*, and others less considerable.

Both these Parts have their Isles, though those appertaining to that beyond the *Ganges*, are larger and much more considerable for their Trade than the other, as will be explained hereafter, when their Description falls in Course; and I shall now begin with that of the *Great Mogul's* Dominions, being the first that present themselves on quitting the *Persian Sea*, to enter the *Indian Ocean*.

*Of INDOSTAN, or the Empire of the Great Mogul.*

**T**HE Empire of this Prince comprehends a vast Extent of Coasts in the *Indian Sea*, and stretches very far within Land, so that he possesses the greatest Part of the *Indian Terra Firma*.

The Kingdom of *Bengal* once belonged to him by Conquest, and of which he still retains a Share, though the *Moorish Rajas*, or Governors, to whose Custody he trusted it, have revolted, divided the other Part among themselves, and thereby deprived the Emperor of one of his richest Provinces, and the most convenient for Trade; for which he is however in some Sort indemnified by the Sovereignty, which he has always preserved, and by the Acquisition of the Kingdoms of *Decan*, *Cacbemir*, *Breampour*, and *Maliquo*, which he has added to his Dominions.

*Indostan* is in general so fertile in all that can contribute to the Conveniency of Life, that it might very commodiously pass without any foreign Trade, and not only comfortably, but very deliciously subsist on its own Abundance; yet the greatest Part of the Inhabitants, particularly those called *Bantians*, are so addicted to Commerce, and understand it so well, that it is nothing surprizing, to see them maintain so considerable a one on all the Coasts of this Empire, and even to *Agra* its Capital.

The *European* Traffick with the *Mogul's* Dominions consists principally in Gold and Silver Coin, Leather, Spice, Elephants, &c. brought here from *Japan*, *China*, *Moluccas*, and *Ceylon*; Pewter, Cloths, &c. imported from *Europe*, and Horses from the *Ussacks* and *Persia*.

*Of GUSURATE.*

**O**F all the Kingdoms which compose *Indostan*, there are none that have more considerable Ports, or where greater Trade is carried on, than this of *Gusurate*, called also by some the Kingdom of *Cambaye*, from one of its most important Cities, distinguished by the Appellation of the *Indian Cairo*. itory is almost totally maritime, forming a Peninsula, that stretches out between the Gulfs of *India* and *Cambaye*, containing more than an hundred and twenty Leagues of Coast.

It is in this Extent that *Cambaye* and *Surat* are situated; the two Cities, especially the last, the most celebrated in *India*, for the Trade which the *Europeans* carry on there, or that the native Merchants maintain from *Java*, *Sumatra*, to the *Levant*, *Aden*, *Mocha*, and *Mecca*, on the *Red Sea*, and to *Bender-Abassi*, in the *Perfian Gulf*, in Cotton Cloth, Counterpanes, Carpets, embroidered Hangings, Rock Crystal, Granates, Hyacinths, Amethists, Turquoises, choice Drugs, Medicinal Herbs, Dying Woods, Perfumes, excellent Indigo, cultivated and made at *Amadabat*, the Capital of the Kingdom, and at *Sircbes*, Camphire, Tobacco, Brimstone, Turbith, Galanga, Nard, Lapis Lazuli, *Assa foetida*, Borax, Scamony, Benzoin, Pepper, Cummin, Ginger, Mirabolans, Silks of their manufacturing, Corn, Salt, Oil, and Butter.

Their Returns from *Aden*, are Gold and Silver Coin, Coral, Ambergris, Misseit, a Drug for dying and colouring, and the best Opium of all the East. From *Perfia* they extract Brocades, and other Silk Stuffs, Velvets, Camlets, Pearls, Almonds, Raisins, Nuts, Dates, and particularly Rose-Water, of which they are very fond, and which they transport to many Parts of *India*.

The *Europeans*, and other Nations, furnish this and the other Territories of the *Great Mogul* with Pewter, Vermillion, all Sorts of Cloth, Ivory, Sandal Wood; and there are seen in their Ports and principal Cities, not only *English*, *French*, *Dutch*, and *Portuguese*, but also *Jews*, *Turks*, *Perfians*, *Arabians*, and Merchants of all the Cities in *India*, except *Chinese* and *Japanese*. I shall treat of the Trade of all the Cities at large, after I have said something of that of *Amadabat*, Capital of the Kingdom, and some others within Land.

*Amadabat*, one of the largest Cities in the *Mogul Empire*, is seated within eighteen Leagues of *Cambaye*, and forty-five of *Surat*, on a little River which falls into the *Indus*. Its Commerce is equally flourishing both at home and abroad, sending yearly large Caravans to *Agra*, and transporting to *Surat*, *Cambaye*, and *Brochia*, its manufactured Stuffs, and other Merchandizes: The Products of the Country are brought there in Return of their Caravans.

It is reckoned there are twenty-five great Towns, and above three thousand small ones in the Jurisdiction of this City, whose Inhabitants are almost employed in working for the Fabricks; of which the principal ones are of Silk or Cotton, pure or mixed with one another, being a Species of Goods peculiar to the Country, such as *Tulbandes*, *Alligias*, *Attelases*, *Baffetas*, and *Chites*; here are also made *Brocades*, Gold and Silver Stuffs, *Damasks*, *Sattins*, *Taffeties*, and *Velvets* of all Colours, *Alcaiffs* or *Carpets*, with Gold, Silver, Silk, or Stuff Grounds; in Fine, all Sorts of Cotton Cloth, white or painted, which in Fineness, Beauty of Designs, and Vivacity of Colours, do not yield to any in the *Indies*.

The greatest, or at least the best and most beautiful Part of these Manufactures are destined for *Surat*; the *Banians*, who transact almost all the Business of this last Place, and are here as Brokers to the *European* Merchants, having their Factors on the Spot, who buy up the Goods as soon as made, or being the Undertakers themselves, have Artificers to work for them. The Products of the Country are Indigo, which is cultivated and prepared abundantly in the Territory of this Capital, particularly at *Sircbes*, which, though but a small Town, has acquired great Reputation by their perfect ordering of this Drug, Sugar Candy, and Sugars, all Sorts of Sweetmeats, Cummin, Honey, Lack, Opium, Borax, Ginger dry and candied, Mirabolans, Saltpetre, Sal Ammoniac, Ambergris, Mulk, and Diamonds; but these three last Commodities are brought from abroad, and resold to foreign Merchants. It is here that the *English* and *Dutch* have their Linens stained, and their Saltpetre refined; and it is from this City that all the blue Cloths come, which are sent to *Perfia*, *Arabia*, to the Kingdom of the *Abyssines*, the *Red Sea*, the Coast of *Melinda*, *Mojambique*, *Madagascar*, *Java*, *Sumatra*, *Macassar*, and the *Molucca* Islands.

*Brochia*, a large City in the Kingdom of *Gufurate*, seated twelve Leagues to the North of *Surat*, on a River which at eight Leagues Distance discharges itself

self into the Sea at two Openings, is reckoned both among the maritime and inland Cities. Here, and in eighty Villages under its Jurisdiction, are made Cotton Cloths, that are always placed among the Number of the finest and most beautiful of all *India*. The Factories which the *English* and *Dutch* have here are very ancient, and some of the first that these two Nations established on this Coast.

*Bijantagar* is almost in the Middle of the Kingdom, where a great deal of Cloth and Thread are made for Transportation. And

*Pettan* is celebrated for its Manufactures, which consist in Silk Stuffs, Cotton Cloths, Tulbandes, Allegais, and in some other such like Fabricks, that are also made at *Amadabatb*, *Brodera*, *Goga*, *Cbist*, *Pour*, *Nariaatb*, *Vasset*, and some other Places; and it is from them that the *Banians* extract Abundance of those Commodities, which the *Europeans* make a Part of their Ships' Cargoes.

#### Of CAMBAYE.

THE Trade of this City is very considerable, and only yields to *Surat*, which it formerly surpassed, till the latter had reaped the Advantage of the Decay of that of *Goa*, and of the Ruin of the *Portuguese* Trade there.

It is seated at the Mouth of the River *Carari*, at the Bottom of the Gulf, to which it gives Name, sixteen Leagues from *Brachai*, and thirty from *Surat*; the *English* and *Dutch* have Lodges here, on Account of its Proximity to the last, where their principal Trade of the *Grand Mogul's* Dominions is transacted, and where they have their Factories settled, which may be almost regarded as the second in Point of Importance, among those they have in *India*.

The Natives of the Place, more especially the *Banians*, addict themselves to Trade, and carry on one commonly to *Diu*, *Goa*, *Cochin*, *Achem*, *Batavia*, *Bantam*, the Coast of *Coromandel*, that of *Bengal*, *Persia*, and the *Red Sea*, where they send their Ships, but generally with *Dutch* Pilots, hired with a considerable Salary of the Company; and though the Remis of these Goods to all the aforesaid Places, is a considerable Object of their Commerce, yet it is nothing in Comparison with that which they transact with Strangers, who yearly arrive at *Cambaye*; there being hardly any Nation of *India*, from whence both Merchants and Ships are not seen here; as also from *Mosambique*, *Melina*, *Arabia*, and the *Persian* Gulf. The *Europeans* besides send here every Monsoon a good many Vessels, whose Ladings consist more in Reals, Rixdollars, Ducats, and Sequins, than Merchandize; Gold and Silver being the best Cargo that a Ship can bring to this Coast, except Spice, which the Inhabitants here and at *Gufurate* cannot be without.

The principal Goods exported from *Cambaye* are very fine Cotton Cloths, in as good Esteem as those from *Bengal* and *Coromandel*, Canvas, many Sorts of Silk Stuffs, Tulbandes, Sashes, Carpets, Cloth of Gold, Counterpanes of Silk and Cotton, stitched or embroidered, Quilts, Bed Furniture, &c. Elbow Chairs, Tables, and other Household Stuffs, Indigo, Saltpetre, Borax, Opium, Cummin, Ginger, Rhubarb, Mirabolans, many other excellent Drugs, Sugar, Oil, and Butter, without reckoning several Sorts of precious Stones, found at *Gufurate*, or that are brought here from elsewhere. A great many excellent Works in Agate are also performed here, which do not in any Manner yield to those of *Europe*, either in Beauty or Perfection.

The major Part of the Merchandizes, of which the *Europeans* make the greatest Purchases, are not those of which their homeward-bound Cargoes are composed, but they serve for Traffick to other Parts of *India*, to exchange against various Commodities that may suit their Owners; and the same may be said of Grain, Fruit, Pulse, as Wheat, Rice, Peas, Beans, Kifery, a Sort of a Pea, Millet, Barley, Oranges, Lemons, Citrons, Mangas, and Cacaos, of which the *English* and *Dutch* carry a large Quantity yearly to Places where these are wanting, and dispose of them there to great Advantage; and this Remark may serve for all that shall be said henceforward concerning the Trade of the *Europeans* in the *East-Indies*.

## O f S U R A T.

THERE is no Place in the *Mogul's* Dominions, and it may be added in all the *Indies*, more celebrated for Trade than this is. It is seated on the River *Tapi*, or *Taptia*, to which *Souali*, lying six Leagues from its Mouth, is properly the Port, the River being unnavigable for large Vessels up to the City, which obliges the Merchants to unlade their Goods here, and to send up those designed for *Surat* by Barks or Waggon. This City was taken by the Troops of the *English East-India Company*, in the Year 1759, and still continues subject to that Company.

Those intended for other Parts remain at *Souali*, in Warehouses built with Boards, which each Nation has here, till Opportunities offer for sending them to their destined Ports. *Souali* is a Sort of Encampment upon a Point of Land, or Peninsula, formed by the Sea and the River's Mouth, which is very commodious for a Market to furnish the Sailors with Refreshment on their Arrival; this Camp consists only of small Huts, made with Reeds, Bamboes, &c. ranged in Form of Streets, during the fine Monsoon, where the Natives plant their little Shops, filled with Fruits, &c. to the great Convenience of the new Comers, and to the no small Profit of the Inhabitants, no Village being near, and the *European Companies' Magazines* being a League to the North of this Bamboe Town.

The Houses of the *Europeans* here are spacious and magnificent, of which the *English* are those who make the best Figure; and the Goods brought here for *Europe* are Cotton Thread, Wool, and Cloth; and of these latter are shipped both white and stained; many Sorts of Silk Stuffs, plain, striped, &c. with and without Silver and Gold, painted and printed Linens, raw Silks, Indigo of three Sorts, Carpets of Silk and Wool, others all Silk, with Silver and Gold, Alcs, Sapan Wood, Coffee, Maldivian Cauries, so necessary for the *Guinea Trade*, Incense, Saltpetre, Borax, Gum Lack, Myrrh, Terra-Merita, Red Bole, Musk, Benzoe, and sometimes Ambergris, Pearls, Diamonds, and other less precious Stones.

The Commodities of this Place fit for the Trade to *Mocha*, the Coast of the *Red Sea*, and the *Arabia Felix*, are coarse Linen, white, blue, and black. Those for *Bender-Abassi*, and *Bassora* in the *Persian Gulf*, white Linens, coarse and fine, with a few blue and black. Those for *Sumatra*, and all the Kingdom of *Achem*, *Java*, and *Maccassare*, Linens blue and black, of which many more fine than coarse. For the *Philippines*, all Sorts of Linen, coarse and fine, white and stained, Carpets, and Silk Stuffs. In Fine, Opium, for the Coasts of *Malabar*, and the other Places in *India*, from whence the Pepper comes, as there is nothing better to truck against that Spice.

As the greatest Part of the Merchants, Brokers, and *Indian Manufacturers*, are naturally given to cheating in several Ways, the *Europeans* who deal with them should always be on their Guard, and carefully examine the Quality, Weight, Measure, &c. of every Thing they buy.

Two Ships sail yearly from *Surat* for the Conveniency of the *Mabometans*, who go on Pilgrimage to *Mecca*, but they are commonly as much laden with Goods for the *Mogul's* Account, as the Pilgrims; and their Returns are so rich as to make Part of the Trade of the *Europeans*, for the Commodities of *Arabia Felix*.

The *Turks* of *Aden* and *Mocha* also send an annual Ship to *Surat*, whose Cargo is for Account of the *Grand Signor*. And it is at this Place that the *English* and *Dutch* commonly make their Ladings for *Persia*, the *Red Sea*, and *Arabia Felix*; and here also the *Persian* Merchants embark with their Goods for the same Places, on which they make great Profits.

Very considerable Negotiations are made from hence and some other Parts of *India*, by Way of Exchange, and I shall therefore mention the Premiums they are commonly agreed at with this Remark, that they are not so fixed, but that they occasionally rise and fall, as in *Europe*.

The Exchange from *Labor* to *Surat* is generally from 7 to 7½ per Cent.

From *Janabat* and *Agra* 4 to 5.  
 From *Amadabath* 1 to 1½.  
 From *Bengal*, *Patna*, *Casimbazar*, and *Ougli*, 8 to 9.  
 From *Golconda*, and the neighbouring Parts, 5 to 6.  
 And for *Goa*, 4 per Cent.

## Of A G R A.

**B**EFORE I quit the *Mogul's* Empire, it is proper I should take Notice of this City, which is its Capital, and the Centre of its Trade. It is situated in 28°, on this Side of the Line, on the River *Gemini*, or *Gomma*, which falls into the *Ganges*.

The Number of its Meidans, where the publick Markets are kept for all Sorts of Provisions; of its covered Bazards, where each Merchant and Artificer have their Shops and Quarters, of which some are half a Quarter of a League long; and that of its Caravaneras, above eighty in Number, suffices to demonstrate both the Greatness of its Extent, and the Importance of the Commerce carried on here by Foreigners and its Inhabitants; which is maintained by several Caravans from *Amadabath*, *Surat*, and other Places, commonly composed of four or five hundred Camels, and by which Conveyance the *English*, *French*, *Dutch*, *Moors*, *Turks*, *Arabians*, *Persians*, and other Nations send their Merchandizes to, and receive others from, this Capital, as may suit their Business.

Besides the Indigo of this City, which is the best in the World, a large Quantity of Silk Stuffs and Linens are exported; these latter principally to the West and North; and it is here that all the Merchandizes of *Boutan* and *Tartary* are brought, and where the Merchants of the interior Parts of *Indostan* also come.

*Daman*, *Bacaim*, *Diu*, and *Chaul*, are four maritime Places in the Kingdom of *Gujurate*; but all four appertaining to the *Portuguese*; they also were Masters of *Bombay*, between *Daman* and *Chaul*, but yielded it up to the *English* in the Year 1662, in Favour of the Marriage between King *Charles II.* and *Catherine*, Infanta of *Portugal*. It is a very good Port, and as secure a one as any on the Coast.

*Daman* is seated on the Peninsula, on this Side the *Ganges*, and on the Gulf of *Cambaye*, between *Surat* and *Bacaim*, from which it is equally distant; its Situation, and the Goodness of its Fortrefs, as also the Importance of the Trade carried on here, makes the *Portuguese* regard it better than any other Place they have remaining in *India*, although the Business of *Bacaim* hardly yields to this; yet that of both the one and the other, as well as of *Diu*, is considerably decayed, since the *English*, *Dutch*, and other Nations of *Europe*, have brought *Surat* into such Reputation; and the *Portuguese* lost, as one may say, the Empire of *India*, of which they had Possession for an Age.

*Diu*, which has the Reputation of being impregnable, has always been, and still is, the strongest Place the *Portuguese* have in these Parts; it was here that they formerly kept their Fleets; and it was also here that the *Moorish* Vessels were vilited, and took their Passports to secure their Commerce; so that there was no Place from whence the King of *Portugal* drew a greater Revenue, either by the Custom-house Duties, or the Produce of the Visits and Passports.

## Of the Trade of LASSA, or BOUTAN, and CHAUL.

**B**OUTAN, an *Indian* Kingdom, bordering on the States of the *Grand Mogul*, is a Country very little known; though there is a Caravan of Merchants, who yearly set out from *Patna*, the greatest City of *Bengal*, at the End of *December*. The Caravan arrives in eight Days at *Gorrocbeppour*, the last City of the *Mogul*, where the Merchants take Provisions for the remaining Part of their Journey; from thence to the Foot of the *Nangrocel* Mountains, is eight or nine Days' painful Travel, which Mountains are eight or ten Days getting over; and as they are very rugged, the Inhabitants, who retire here, and are half Savages, come to offer themselves to Passengers, for the Carriage of them and their Merchandize to the Foot of the Descent. The Provisions and Goods are laden on

 Linens, l

on Oxen, which carry about an hundred and fifty Pounds Weight; and the Men pass, seated on a Sort of Cushion, which these poor People fix on their Backs, and three Women commonly relieve one another in carrying a Man this little Journey; on leaving the Mountains there are Oxen, Camels, Horses, and even Palanquins, for those who choose them, which Travellers do not quit till their Arrival at *Boutan*.

A very great Trade in Musk, is carried on in all the Country of *Boutan*; and it is here also, where the finest Rhubarb is found; here likewise grows the *Semen contra Vermis*, or Wormseed, and the Country abounds greatly in Martens, so that very fine Furs are to be procured here, but little Gold is to be met with in the whole Kingdom; and that which is here is brought from abroad by the Merchants who come to trade. In Regard to Silver, it is believed here are some Mines, and that it is from the Products of the Country, that the King of *Boutan* stamps his Coin, which is of the same Weight and Value as the *Roupies*, of an octagon Shape, with Characters that are neither *Indian* nor *Chinese*.

Their sole Manufactures are coarse Hempen or Cotton Linens, with which they clothe themselves in Summer, and ill made Cloth, hardly better than Felt, serves for their Winter Clothing.

*Chaul*, or *Chaul*, is a City, as I just now mentioned, belonging to the *Portuguese*, which on their Arrival, and *Indian* Conquest, they took from the King of *Deccan*; its Trade is very considerable, but much less than it has been formerly; it is, above all, famous for its Silks and Silken Manufactures, with which it almost entirely furnishes *Goa*, as well as a great Part of *India*.

A great many *China* Ships come here, with the Products of that Country, and take Spices, which turn to a good Account. The other Fabrieks carried on here, are all Sorts of Varnish after the *Chinese* Manner, and divers Works of Lack of all Colours, which nearly approach in Goodness to those of *China*. Here are also Plenty of Oxen and Cows; all Sorts of Fruit, and the other Products of the Earth, except Grapes, Walnuts, and Chestnuts.

#### Of the Commerce of the Coasts of INDIA and MALABAR.

THAT Extent of Coast, which runs from the Frontiers of *Gujurate* to Cape *Comorin*, are called the *Indian* Coasts, in which are found the Kingdoms of *Deccan*, *Cuncan*, *Canara*, *Malabar*, which alone contains at least eight or ten, and among them *Cananor*, *Calicut*, *Cranganor*, *Cochin*, *Porca* or *Porcati*, *Calicoulang* and *Coulan*. Of all which Coasts the *Portuguese* were for a long Time Masters, it being from hence that they began their Discoveries and Conquests in the *East-Indies*; as *Calicut* was the first City where they landed, and *Cananor* the Place where they built their first Fortification, which was followed by others almost in every maritime City of those little States; but when their Affairs began to fall into Decay in the East, they abandoned and razed that Part of them which they deemed indefensible against the *Dutch*, who drove them out of the best, and among them *Cochin* and *Cranganor*, which these latter took in 1661, the *Portuguese* having only been able to save *Goa*, and a few other obscure Places.

*Deccan* is the first Kingdom on this Coast after that of *Gujurate*, which for a long Time was a Province of the *Mogul* Empire, as well as the other, though at present it is only tributary. Its Sea-Ports, where some Trade is transacted, are *Geytapour*, *Rajapour*, *Carapatar*, *Dabul*, and *Sifardan*, which consists in Silk Stuffs, and Cotton Cloths sent by Sea to *Surat*, or what the Inhabitants of *Deccan* transport by Land into the Territories of the *Mogul*, those of *Golconda*, and as far as *Coromandel*; and in this Kingdom it is, where Pepper is first met with.

*Rajapour* is a City built in the Lands of *Sevagy*, that famous Rebel, who for a long Time busied all the Forces of the *Great Mogul*, and the King of *Vijapour* his Master. It is about twenty Leagues from *Goa*, and produces Saltpetre, Linens, but above all Pepper, which is gathered here in Abundance.

*Balagate*

*Balagate*, a Kingdom of *Asia*, on the *Indian* Peninsula on this Side the *Ganges*, makes a Part of that of *Decan*, and produces a Quantity of Silk and Cotton; here also is found excellent Lack, as good as that of *Pegu*, *Arcque*, Rice, Betel, in which the *Europeans* drive a considerable Trade. The Diamonds extracted from that which the *Portuguese* call the old Mine are very much esteemed, especially those to which they have given the Name of *Nayffex*, or dwarf Points, because they are naturally brilliant: Here are also Amethysts, Chrysolites, and those Stones which the Lapidaries call Hematites.

*Cuncan*, which some make a Kingdom of itself, and others place among the Provinces of *Decan*, is noted for the City of *Goa* seated in it, besides which it has also four others, viz. *Vijapour*, *Sahapour*, *Paranda*, and *Wingurla*, where some Traffick is established, in all Things similar to that of *Decan*.

*Goa* is the Capital of what the *Portuguese* possess in *India*, taken from the King of *Decan* in 1520, by *Alphonso Albuquerque*, and continued ever since in their Possession, as they have always successfully defended it against the most formidable Powers of this Part of *India*, and still guard it with an extreme great Jealousy against the Enterprizes of the *Dutch*, who having taken from them almost all their other Places, found this at least as convenient for the Trade of *Surat*, as all those they possess on the Coasts of *India* and *Malabar*. This famous City is seated in fifteen Degrees six Minutes Latitude, in an Isle which the Rivers *Mandoua* and *Guani* form at their Entrance, and is the Residence of a Viceroy, who had formerly five large Governments under his Jurisdiction, viz. those of *Mojambique*, *Moscate*, *Ormus*, *Ceylon*, and *Malacca*; at present his Authority hardly extends beyond *Goa*, and the Commerce which the *Portuguese* carry on to *India*, is nearly reduced to that of this City; and even this is so trifling, that one Merchant tolerable rich, and in Credit, might with one Ship only maintain it to *Lisbon* and *India*.

So that *Goa* no longer supports its ancient Reputation, the *Banians*, who formerly carried on all the Trade, being moved to *Surat*, and by their Retreat having complicated the Ruin of that little Commerce which had escaped the Enterprizes of the *Dutch*, the Cruizes of the *Malabar* Pirates, and, if one may be permitted to say so, the Slothfulness and Indolence of the *Portuguese* themselves; among whom, for a long Time past, have not been found such valiant Men, as, under the *Gamas* and *Albuquerque*, had made all *Asia* to tremble; nor those able and enterprising Merchants, who had carried their Commerce as far as the Arctic Circle.

Those Traders who still remain at *Goa*, continue to lade some Cargoes for *Perfia*, *Pegu*, *Manillas*, and *Macao*; but besides that the Ships' Ladings commonly belong entirely to the *Indian* Merchants, there is hardly a *Portuguese* rich enough to purchase a Cargo of two thousand Pounds' Value, insomuch that in all *India* they scarce trade for fifteen thousand Pounds.

Their best Returns are those from *Mojambique*, although very much diminished, either by the Loss of *Mombaze* and *Pate*, on the Coast of *Melinda* to the *Arabians*, or because the Negroes do not bring Gold or Ambergris here in such Quantities as formerly, through Fear of the said *Arabians*, who ravage all the neighbouring Country.

The little Gold which the *Portuguese* draw from *Mojambique*, is disposed of at *Diu* and *Goa*, from whence it seldom goes out again, being here converted into a Coin nominated after *St. Thomas*, and worth about 5s. 6d. Sterling.

It is commonly believed that what has completed the Ruin of the *Portuguese* Trade in *India*, which, with the Places they still possess there, might yet revive, is each Governor's interesting himself a Share in the Commerce of the Place he commands at; and that Merchants, no longer enjoying the Liberty they once did, dare not undertake any thing considerable in it.

There is, however, a Tribunal established at *Goa*, to judge and determine the Affairs of a Company, which for a large Sum obtained some Years ago an exclusive Grant of the Trade from *Mojambique*, *Mombaz*, *Macao*, and other Places in *India*, appertaining to the Crown of *Portugal*, though I am ignorant how it prospers, and it is to be doubted whether the said Association has not done more Harm than Good to this Capital of the *Portuguese* in the *Indies*; it is, however, from hence only that this Nation are permitted to lade for *Bengal* and *Cbina*.

*Baticala*, the Metropolis of a little *Asian* Kingdom in the Peninsula on this Side the *Ganges*, to which it has given its Name, carries on a very considerable Trade, almost all transacted by *Jews*; it consists principally in Rice, which produces here two Crops yearly, distinguished by no less than four different Sorts, of which the first and best is called *Gracateli*; the second *Jambucal*; the third *Canacar*; and the fourth *Pacharel*; each of a different Value, according to its Quality. The other Commodities of this Place are, Powdered Sugar, Mirabolans, and Sweetmeats of all Sorts. The Rice and Sugar are exported by the Ships from *Ormuz*; and the Mirabolans are sent to *Persia* and *Arabia*: A large Quantity of Copper also finds Vent here for the making Money, and Kitchen Furniture.

## O f M A L A B A R.

I Have before observed that all this Part of *India*, which from a common Name is called *Malabar*, is divided into several small States, with the Title of Kingdoms, which they almost all bear, though they have particular Names to distinguish them; of which I shall give some Account, or at least of their chief trading Cities, where the *Europeans* have Settlements from *Goa* to *Cape Comorin*.

The Air is good on all the Coast of *Malabar*, and there is hardly a Country in *Asia* more fertile; the black and white Rice, which makes a Part of its Trade and probably the most considerable one, is gathered here, as above mentioned, twice a Year; and, besides a Quantity of excellent Fruits, which serve for the Shipping's Refreshment, here may be laden a Quantity of Cardamoms, Cinnamon, Betel, white Arque, and red for Dying; but above all Pepper, of which vast Parcels are annually exported.

There are several other Parts in *India* where this last Commodity is produced, but it no where grows in greater Abundance, or of a better Quality than on this Coast, from *Vijapour* to *Cape Comorin*; the largest Berry comes from *Vijapour* and *Canara*; all other Places producing the Grain of a lesser Size, though these are most esteemed by the *Indians*, who come here to supply themselves with it.

The Cardamoms are gathered in the Kingdom of *Cananor*, on a Mountain six or seven Leagues from the Sea, which it is believed is the only Spot in the World where they are found; a few of them are transported to *Europe* for medicinal Uses, and the Rest to *India*, *Persia*, and *Arabia*; where the Rice is never thought good, till seasoned with this agreeable Spice.

The Cinnamon is not near so good as that of *Ceylon*, and but little of it left, since the *Dutch* rooted up what grew at *Cochin*; and the Betel is only proper for the East.

*Mirzeou*, is the first Place of the Kingdom of *Canara*, near the Frontiers of that of *Vijapour*, about eighteen Leagues to the South of *Goa*; the *Portuguese* had here one of their most ancient Fortifications, but the *Canarins* took it from them in 1662, after a Defence which neither did Honour to the Besiegers or Besieged.

*Mangalor*, which is eighteen Leagues from *Bilipatan*, and *Bacanor* nine Leagues from hence, are the two principal Places of *Canara*, as well for Trade as the Goodness of their Ports. Pepper, and black and white Rice, are the chief Merchandizes exported from these two Cities, the Trade of this Commodity being so great at *Mangalor*, as to lade fifty or sixty Vessels with it yearly.

*Onor* is a small Kingdom of *Bijnagar*, where the *Portuguese* have a Factory, and purchase almost all the Pepper gathered here, which has the Reputation of producing the best and heaviest in all *India*. Here may be shipped off about eight thousand Quintals yearly, bought of the King of *Baticala*, who is also Sovereign here, and must be paid for six Months before the Crop, otherwise the Factors will return without it. A Quantity of Rice is also extracted from hence for several Parts of *India*.

*Cananor* is one of the largest Kingdoms of *Malabar*, and though it yields to *Calicut* in Extent, it generally exceeds it in Trade and Number of Inhabitants. Its principal maritime Places are *Balipatan*, *Tramapatan*, and *Cananor* the Capital, to which it has given Name. The *Portuguese* for a long Time preserved here

the first Fort they built in *India*, but lost it with *Cochin* in 1662; from which Time the *Dutch* who took it, remained in a manner Masters of the Trade of this Part of *Malabar*, which has not less than twenty-five Leagues of Coast.

The Goods extracted from hence are, Sugar, Pepper, Ginger, Cardamoms, Areque, Elephants' Teeth, Cassia, Honey, and Ambergris, found at Cape *Comarin*. Here is some Trade carried on in Jewels, as Granite, Sapphires, Hyacinths, Rubies, Topasses, and particularly a Stone nominated among the *Europeans* from the Place of its Produce, Cananor Stone, of some Use in Medicine with the *French*. It is asserted, that upwards of two hundred Vessels come here yearly; and though a considerable Trade is carried on in the above-mentioned Commodities, it is certain that Rice, in which this Kingdom so much abounds, is the chief Lading of them.

*Cacla* is a Village one League to the Southward of *Cananor*, where very fine Linens are made; but a little farther *Tramapatan*, renowned also for its Bazar, Merchants, and Linen.

*Bilapatan* is a City of *Cananor*, where the greatest Pepper Trade is carried on; it is large, and inhabited by rich *Mabometan* Merchants, being seated on a small River, three Miles from the Sea. The *English* have a Settlement here, and lade a chief Part of the Pepper they send to *Europe*.

*Tilichery*, called by the *French* *Tilceri*, is four Leagues from the last-mentioned Place, three from *Cananor*, though Mr. *Eachard* puts it down thirty Miles, and only one from *Tramapatan*. The *English* have a Fort here, and Prince *Onitri* gave the *French* Permission in 1670 to translate their Factory from *Bilapatan* here. Its Trade is the same as that of the above-mentioned neighbouring Places, with the Addition, that here is found some Sanders, and from this Kingdom is shipped a great deal of Pepper for *Persia*, *Bassora*, *Mocha*, and *Mascati*, at which Places the smallest Grain is in the greatest Esteem.

*Calicut*, called formerly the Empire of *Samorin*, is the largest of all the Kingdoms on this Coast, and the Title of Emperor, which all other Princes give to its Sovereign, seems to acknowledge a Superiority; yet, in Reality, all the petty Kings of this Part of *India*, are wholly independent one of another.

This Kingdom extends from *Pudepattan* River to that of *Cranganor*, being about thirty Leagues of Coast, and was once a Place of the greatest Trade in *India*, as well on Account of the Resort here of foreign Merchants, as for the Commerce and Navigation that its Ships maintained with the most celebrated Cities of *Asia*: But first *Goa*, and afterwards *Surat* carried away the Business from it; besides, the Coast being bad, and Inundations very frequent, have not a little contributed to drive its *quondam* great Trade from hence, though here still remains a tolerable one.

The *English*, *French*, and *Dutch* have Settlements here, and though it be the Capital of the *Samorin* Empire, yet the Court removed farther within Land, and thereby occasioned a considerable Diminution to the before decayed Trade of this Place; its Bazar is nevertheless one of the handfomest of *Malabar*, it containing four or five Streets always full of rich Goods, of which the chief are Pepper; fine Linens; natural Saltpetre, that wants but little Purification, and which is found in Plenty all over the Kingdom, particularly on the Side of *Sirinapatan*; Sanders; excellent Rice, which here, as well as on all the Rest of this Coast, is not one of the least Objects of Trade.

The Sand of the Sea Shore on the Coast of *Calicut*, especially at the River's-Mouth, is found mixed with Grains of pure Gold, by which many poor People find a comfortable Subsistence, though the Grains are commonly very small.

*Tanor* is the chief trading Place of a very little Kingdom, from which it is denominated, and whose King, though his Dominions are hardly ten Leagues square, is as much a Sovereign as the Emperour of *Samorin* himself.

This City, if it may be called so, is five Leagues to the Southward of *Calicut*; it has only an open Road without any River, and the Inhabitants of its Bazar are rich *Mabometans*; this Nation is at Enmity with the *Dutch*, but strongly allied to the *Portuguese*, and the *French* were well received by them in 1672.

*Cranganor*, between *Tanor* and *Cochin*, is but a very small Kingdom, where nevertheless the *Portuguese* had a considerable Fort, which was called *Cranganor*

of the Portuguese, to distinguish it from the Cranganor of the Malabars: The Dutch took it in 1662.

Cochin, another Kingdom which commences where the last-mentioned ends, had two Capitals distinguished like those of Cranganor, and Cochin of the Portuguese, and was also taken by the Dutch in January 1667.

Porco, Percatti, or Percats, come next; and afterwards Caleculang, and Coulang, which are the last Kingdoms of Malabar. The English and Dutch have their Factories in the chief and best Places of these petty Kingdoms; and the latter have Forts at Coulang and Cochin, to secure the Pepper Trade which is very considerable here, and which their Vessels yearly lade in passing, continuing their Route to Surat, Persia, and the Red Sea, where they dispose of the major Part, in Exchange for many rich Merchandizes, that all these Places produce, and which they bring afterwards to Batavia.

The Traffick of these six small Kingdoms is but little different from that of the Rest of Malabar, though there are notwithstanding some natural Productions, that are peculiar to each of them, and not to be found in the others; which in some Measure varies the Trade. In general the Exports from hence are Pepper, Cardamoms, Laque, Ginger, Tamarinds, Opium, Ambergris, Rice black and white, Kisseri, and Cayang, a Species of Pease, Sanders, Saltpetre, and Linens of divers Sorts, though neither so fine or well painted as those about Surat, of which I have already spoke; nor those of Coromandel or Bengal, of which I shall treat hereafter.

Coulang is a Kingdom in the Peninsula of India, on the Coast of Malabar, whose principal Trade consists, like those before described, in Pepper, which the European Ships and Indian Junks come here to lade; and there is on the Coast a Fishery for Pearls, pretty considerable, which belongs to the King.

#### Of the Coast of The PESCHERIE.

**T**HIS Coast, properly that of Madura, called also the Pearl Coast, extends from Cape Camori, or Camorin, to Negapatan, or Nagapatnam, being the first Part of Coromandel. It has before it the Isles of Manar and Ceylon, and it is in the Straits, which separate them from the Continent, that the Pearl Fishery is carried on.

The inland Parts of this Country are arid and almost barren, where none of those Vegetables or admirable Fruits are gathered that render Life so commodious in all India; except a little Rice, hardly sufficient for the Inhabitants; so that it is only the Pearl Fishery that keeps the Natives here.

Tutucorin is deemed the Capital of this Coast, though less for its Grandeur and Beauty, than for the Fishery of Pearls carried on here, and because its Inhabitants are the most expert in it; those also of Calipatuam are in Esteem, and these two Towns furnish the greatest Number of Boats. The Portuguese settled here on their first Arrival in India, and the Dutch took it from them in 1658, and have kept it ever since, sharing this marine Treasure with the Sovereign of the Country; all the Oysters taken being publickly sold as soon as the Fishery is over.

#### Of the Coast of COROMANDEL.

**T**HIS Coast begins at the Point of Negapatan, where that of the Pescherie ends, and reaches to the River Nagund, and the City of Masulipatam; though some give it a greater Extent, and continue it to Bengal.

The Trade carried on by the Europeans here, is very considerable, where they have all great Settlements, Forts, and Factories; having been invited thereto by the Goodness of this Port and Roads on this Coast, which are the best in India, and are a great Refuge to their Ships, when during the bad Mousson, they are obliged to quit the Coast of Gufurate and Malabar, as they cannot remain there in Safety.

The

The chief Establishments which the *Europeans* have on this Coast, are *Madras* or *Madrassapatnam*, *Pettapeller*, *Comimoor*, *Metchlepatam*, *Vijigapatam*, and *Maddapollam*. *N. B.* *Patnam* means a City in all the Peninsula on this Side the Ganges, belonging to the *English*; *Pondicherry*, appertaining to the *French*; *Negapatnam*, *Nipatan*, otherwise *Portapouli*, *Tegapatnam*, *Sadrassapatnam*, *Majulipatnam*, *Duikeron*, *Bimlipatnam*, *Naguerantze*, *Conjemere*, and *Pahacue*, possessed by the *Dutch*, and *Tranquebar* by the *Danes*. I might here introduce *St. Thomas*, as a *Portuguese* Factory on this Coast, being the Place where they transact their Trade from *Coremandel*, but this Nation has no Fortification here, as others have at the Places afore-mentioned.

*Madras* is seated in the Latitude of thirteen Degrees, ten Minutes, Mr. *Charles Lockyer* says thirty Degrees North, and an hundred and two Degrees thirty Minutes of East Longitude, and after the *Dutch* had shut the *English* out from *Bantam*, became the Residence of one of the Company's two Presidents in these Parts, and is now regarded as the Centre of its Trade, either with *Europe* or *India*.

From four to six Ships is the common Number that arrive here yearly, directly from *Europe*, and much the same in Return, laden with the Goods of the Country, and those collected from their other Factories on this Coast, or what their Trade in *India* has brought here, which are Silk Stuffs, Silk and Cotton Handkerchiefs, Cotton in Thread and Wool, Indigo; all Sorts of Mullins and Calicoes; *Majulipatnam* Chints, reckoned the most beautiful made in the *Indies*, and the most esteemed in *Europe*; Diamonds and other precious Stones from the Mines of *Golconda*, &c.

A Trade is carried on from hence by the Factory, to all Parts eastward of the Cape of *Good Hope*, as to *China*, *Manilla*, *Batavia*, the Coast of *Java*, *Jabore*, *Molucca*, *Syeda*, *Pegu*, *Arracan*, *Bengal*, *Siam*, and all the *Coremandel* Coast, with *Achen*, *Priaman*, *Indrapore*, *Bencoolen*, *Bengal*, &c. though the *China* Voyage is the most desirable one, on Account of the Returns in Gold and fine Goods; but the Company having for some Years past sent Ships directly from *England* there, the Advantages of a Trade between that Country and *Madras* are greatly diminished; and that to the *Manillas* is of two Sorts, the one carried on by the *English* Merchants settled on the *Coremandel* Coast, and the others by the Traders of the same Nation from *Europe*, but both must go under foreign Colours, those from hence under *Irisb*, and those from thence under some *Pagan*, the *Spaniards* admitting all Nations whether from *Europe* or *India*, at the *Manillas*, in their own Ships, and under their own Colours, except the *English* and *Dutch*, who are denied this Privilege; the latter for their Attempts to take them, more particularly for their Enterprize against them 1649; though the Prohibition to the *English* is unmerited, at least for any thing I ever heard.

Few or none of our Nation value themselves on the *Irisb* Ensign to go there directly, this Trade being regarded as illegal here, though permitted there, so that they are generally supplied with our Goods, by the other Method open to them; the Goods sent from *Madras* there, are long Cloths, or white Cotton Cloths, of seventy-two Cobdes in Length, and two and a Quarter broad; others of the same Length and Breadth much finer; the same Species, common Blues; white common Salempoures; and the same blue; various Sorts of Percales, white and blue; common Cambayes of *Madras*, and *Bengal*; Mongonpous, *Bengal* Taffeties, of red and mixed Colours, doufies, common and fine Belelaes, *Melchapatan* Sattins, Lampassies, and Chites, or painted Linens; Guerassies, and raw Silk of *Bengal*. Besides which *Indian* Commodities, the *English* send a great many of the *European* ones; such as Camlets, Cloths, Serges, Hats, worsted Stockings, Crystals, *Flanders* Lace, *Perpetuanas*, &c. and when a Cargo is intended for the *Manillas* from *Europe*, some good *Graves* Claret, and *Nantes* Brandy in Bottles should be added, as this finds an advantageous Dispatch among our Countrymen at *Madras*, or if carried on, among the *Spaniards* at the *Phillipines*. The Commodities brought back to our said Settlements on Return of the Voyages, are Dollars, Brimstone, Leaf Tobacco, &c. and sometimes they touch at *China* in their Way Home, and there truck the Merchandize they got from the *Spaniards* against Gold, as this leaves a great Profit.

But lately the Gentlemen at *Madras* have sent their largest Ships to *Mocha*, *Persia*, and *Surat*, with *Bengal* and *China* Goods, calling at several Ports on the *Malabar* Coast in their Way, especially at *Calicut* for Pepper, Cocoa Nuts, Coyr, Cardamoms, Nux Vomica, Turmeric, Coccus Indi, &c. and Rice is often a profitable Commodity in *Mocha* and *Persia*, as I have before mentioned.

A Man with a fair Character may easily find Money here on his own personal Security at *Bottomree*, or *Respondentia*, to what Port soever he be bound, at the following Rates, viz.

To *China*, 20 or 25 per Cent. *China* and *Persia* 40 to 45. *Bengal* 16 to 18. *Acben* 16 to 18. *Batavia* 20. *Pegu* 20 to 25. *Batavia* and *Surat* 35 to 40. *Manilla* 30 to 35. *Surat* 25 to 35. *Surat* and *Persia* 35 to 40. And *Mocha* 30 per Cent.

*Pondicherry* is seated in the Territories of the Prince of *Gingy*, at twelve Degrees of Latitude, and an hundred and fourteen Longitude, where the *French* have a very strong Fortification, and well garrisoned, as we lately experienced to our Cost; their Warehouses here are large, and the Goods with which they are commonly filled, destined either for *Europe*, or the Commerce of *India*, *Persia*, and the *Red* Sea, are collected less from *Coromandel* than from *Bengal*, *Surat*, and the Coast of *Malabar*, where the *French* Company's Ships go to lade them; there is notwithstanding a Quantity of Cotton Cloth made here, and in its Neighbourhood, both white and stained, with Mullins, Silk, &c. all which Commodities they lade for *Europe*, and make their Cargoes to consist of the same Goods as the *English*.

The *Coromandel* Trade is one of the most important to the *Dutch*, of any they carry on in *India*, as may be judged from the great Number of Settlements which they have on this Coast, and even in the Capital of *Golconda*, of which I have above mentioned the Chief; although a few Years preceding the End of the seventeenth Century it was become a Sort of an Expence instead of Benefit to them, by the great and continual Impositions of the *Moorish* Rajas, which seemed not to be disapproved of by the King. This bad Usage obliged them to arm for obtaining the Satisfaction which they thought due: They took *Majulipatnam*, and by that obliged the King of *Golconda* not only to confirm their ancient Agreements, but to add those that were more advantageous; and also to ascertain in a better Manner the Customs on Imports and Exports, which the Rajas, who formed them of their own Government, only levied according to their Pleasure, or exacted in Presents, near as much as the Company could benefit themselves, on the Goods they shipped or delivered there.

Three of the most advantageous Prerogatives that the *Dutch* now enjoy in the States of the King of *Golconda* are, first, that no Merchant with whom the Chief of the Factory is in Treaty about Business, shall be molested either in Person or Effects, even for the King's Affairs, till previously the Company be satisfied in all their Pretensions on the said Merchant. Secondly, that the Weavers, Painters, and other Workmen employed by the Company, shall not be interrupted in their Labours, although for the King's Service, till they have complied with their Contracts; and thirdly, that they shall have Liberty to employ what Brokers they please, without being obliged to take those belonging to the King or Rajahs.

And they have likewise another Privilege which they enjoy in common with the other *Europeans*, and that is not to pay the Duty of *Chappadellallah*, that is making the Linens, which to the Natives amount to twelve per Cent.

The Goods which the *Dutch* carry to *Coromandel*, are principally Spices, Silver, and *Japan* Copper, Mine Gold, *Malacca* Pewter, Quicksilver, Lead, Vermillion, Camphire, Elephants' Teeth, Sanders, Siampan, *European* Cloths and Stuffs; for which they barter Linens, and all the other Commodities before spoken of.

*Golconda*, which I have so often mentioned in speaking of the Trade transacted on this Coast, is the most considerable of all the Kingdoms in this Part of *India*, either for Extent, or the Business that Strangers negotiate here, or that its Merchants carry into all Parts of *Asia*.

Besides the ancient Domains of the *Golcondan* Kings, it is increased by a Part of *Bijnagar*, and *Orisa*, this confining on *Bengal*, and the other Neighbour to the *Mogul*, separated by Mountains from *Malabar*.

This Kingdom is principally celebrated for two Things, *viz.* the Port of *Masulipatnam*, and the Diamond Mines, which have been discovered for above two hundred Years, and produce great Quantities of those precious Stones. The major Part of the Country of *Golconda* is so fertile, that it commonly produces two, and sometimes three Crops of Rice in a Year, so that this Commodity makes one of the principal Articles of its Trade. The Cotton Cloths, and among others, the painted ones of *Masulipatnam*; the Salempouris, Percalles, and the Bettiles of *Golconda* and *Ragamandraca*; the Dongris of *Tatepaque*, called Dongrais of *Peta*, and the fine Bettiles of *Nasapori*, and of *Condepouli*, are not the smallest Objects of Trade; and it is an inconceivable Quantity that is yearly transported to all *Asia*, and of which too many are brought to *Europe*. The Commerce of these Linens passes entirely through the Hands of Pagans, Natives of the Country; though confined only to those among them called the *Banians*, who compose the third Class or Tribe of those Idolaters, and who are all Merchants, Brokers, Factors, or Exchangers. The Indigo of *Golconda* hardly yields in Quality to that of *Labor*, though it is not so good as that of *Agra*; it is chiefly cultivated at *Condepouli*, *Masulipatnam*, *Sadrapatnam*, *Gelapoudi*, and *Escoines*, from whence the *Dutch* usually fetch it to sell at *Chaul* and *Dabul* to the North.

Crystal, Granates, Topasses, Agates, Amethysts, Bezoar, Betel, Rice, Steel, Iron, and a Plenty of Refreshment for Ships coming there to trade, do also constitute a Part of their Commerce, which is so advantageous here, and at the other Ports dependent on it, to the *Dutch*, as to induce them many Years to employ upward of three hundred thousand Pounds in Goods, of which they send a Part to *Europe*, and distribute the Rest in *India*.

*Masulipatnam* is the principal Port of the Kingdom of *Golconda*, on the Coast of *Coromandel*, and called so from *Masuli*, a Fish, and *Patnam*, a City, being a Name suited by the Natives to its Situation, which is upon a River greatly abounding in this agreeable Food, as its Road also does, being besides the safest in all *India*. These Advantages draw here the Merchants of all Nations, and is equally commodious to them, and those of the Country, for sending their Ships into almost all Parts of *Asia*; the greatest Number of those bound for *Pegu*, *Siam*, *Aracan*, *Bengal*, *Cochinchina*, the *Red Sea*, *Madagascar*, and the *Manillas*, sailing from thence; and though the Exports here are the same as those from the Rest of this Kingdom, it is principally for the Beauty of its painted Linens, that it is so well known in *Europe*, of which here are two Sorts, as at *Surat* and other Places in *India*, *viz.* the one painted with Pencils, and the other only stamped; and notwithstanding the same Colours are used in both Species, those painted greatly excel in Beauty: These Colours, especially the red, are fixed in with a Plant called Chay, only found in the Kingdom of *Golconda* along the *Coromandel* Coast; and the Advantage which it gives to the Linens wherein it is used, is, that they become more beautiful with washing; the Vivacity of the Colours augmenting by the Water, and lasting, as one may say, longer than the Stuff itself. At *Masulipatnam* are also found, Salt, Serges, some other light Stuffs, and Rice in greater Abundance than in any other Place on the Coast.

#### Of the Kingdom of BENGAL.

THOSE who terminate the Coast of *Coromandel* at *Masulipatnam*, call that the Coast of *Orisa* which continues to *Bengal*, and even some comprehend in this the City of *Pipeli*, though it really is in the Kingdom of *Bengal*.

Although the Kingdom of *Orisa*, which gives Name to this Coast, has many Ports, they are all so bad, that the *Europeans* carry on little or no Trade at them, so I shall pass on to that of *Bengal*, one of the richest in the *Indies*.

*Bengal* is a Kingdom situated to the East of *Indostan*, towards the Sea; some formerly believed, and among them *Moreri*, that there had been a City called *Bengal*, which had given its Name to the Kingdom, of which it was the Capital. It is certain

certain that there neither is, nor ever was, a City so called in these Parts; and what is more, there is no City at all, seated at either of the *Ganges'* Mouths, as the said Author has asserted. If there is a Metropolis, it must be that where the Viceroy resides, which was formerly at *Dacca* or *Decca*, but for a long Time past the Court has been kept at *Casembazar*; the first of these two Cities is large, and situated on the *Oriental* Branch of the *Ganges*, near sixty Leagues from its Mouth, and the other is upon the western Arm of the same River, at sixty Leagues above *Ougli*.

All the Maps of this Country are faulty, as well in the Form as Latitude of this Kingdom's Coast, they making the *Ganges'* Discharge into the Gulf of *Bengal*, to be at twenty-three Degrees of Latitude, when it is really at twenty-one Degrees fifteen Minutes; and are also very defective in the Situation of Places, which I thought proper to mention as not foreign to my Subject.

The Commerce carried on here, as well by Strangers as the Inhabitants, is very considerable; and in which here are concerned *Persians*, *Abyssinians*, *Arabians*, *Guzuratinis*, *Malabars*, *Turks*, *Moors*, *Jews*, *Georgians*, *Armenians*, and in fine, Merchants from all Parts of *Asia*. All the Christian Nations established in *India* send their Ships here, as it is the Merchandize of *Bengal* that makes a considerable Part of their Reladings for *Europ*; besides those they extract for their *Indian* Trade.

The most trading Cities, and where the *English*, *French*, and *Dutch*, have their most flourishing Settlements, are *Casembazar*, *Ougli* *Ougeli* or *Hugueli*, *Pipeli*, and *Bellezoor*; to which may be added *Patna*; for although some place it without the Jurisdiction of *Bengal*, by making it the Capital of a petty Kingdom subject to the *Mogul*, yet as its Trade is all carried on through *Ougli*, I shall not separate it from the afore-mentioned Cities.

The *English* have their Establishments at *Ougli*, *Pipeli*, and *Bellezoor*, the *French* at the two first, and the *Dutch* in all the said five Places.

*Ougli* is the City where all the Nations concur, who carry on the *Bengal* Trade, and where the richest Merchants of the Country reside, whether *Moors* or *Pagans*. Its Warehouses and Shops are always full of rich *Indian* Goods, but each Sect of the Natives have their particular Quarters in the Bezars, without ever mixing, as much for the greater Freedom in Trade, as out of a Principle of Religion, which hinders these superstitious People from having a too great Familiarity together.

The Lodge which the *Dutch* occupy at this Place, is very large and magnificent, having at once the Air of a Fortification and Palace. The Director lives here like a Prince; and next to *Batavia*, this is the Place where the Power and Splendor of the Company appears in their greatest Lustre.

*Casembazar* is the Part of *Asia*, from whence the *Dutch* draw the greatest Quantity of Silks, which they bring down the *Ganges* to *Ougli*, and from thence send Part to *Japan*, and Part to *Europe*; it is for this Business that they maintain a considerable Factory here, though they besides are furnished by it also with a Quantity of Taffeties plain and striped, and the finest Linens that *Bengal* produces.

The Crop of Silks at *Casembazar* may amount in a common Year to twenty-two thousand Bales of a hundred Pounds each, of which the *Dutch* Company have Leave to buy only six or seven thousand, the Rest are divided between the *Tartars* and the *Mogul's* Subjects, or remain in the Country for the Manufacturers.

At *Chiopera*, in the District of *Patna*, are the best Refiners of Saltpetre, and it is there that the greatest Purchases of this Commodity are made; and from whence the largest Quantity of it comes that is exported from *Bengal*; and it is for this Trade only that the *Dutch* have a Factory here.

It must be observed, that in Regard to the Merchandizes that are extracted from *Patna* and *Casembazar*, they must be ready to be carried down to *Ougli* at the End of the rainy Season, as the Canals by which they are conducted grow dry in two Months, after the fair weather Monsoon commences, and then the Land Carriage greatly augments the Expence.

The Merchandize proper for *Bengal*, are *Japan* Silver, Copper, *Malacca* Pepper, Vermillion, Alkermes, Quicksilver, Lead, Tables, Cabinets, and other Moveables

ables jappanned, Porcelain of *China* or *Japan*, Looking Glasses, Cloths, and all Sorts of *European* Merchandize, Pepper, Spice, Areque, Elephants of *Ceylon*, and their Teeth, Birds of Paradise, and *Ternate* Parroquets. The Goods of this Country's Growth, or that are brought there from the neighbouring Kingdoms, with which the *Europeans* usually lade their Ships from the homeward bound Voyage, consist of raw Silks, called *Tany* and *Mouta*, Cotton Wool and Thread, red Wood, various Boles, Coffee, Cowries, or Cauris, which serve for small Money here; white and yellow Wax, Canes and Rattans, Gutta Gamba, *Bengal*, *Labor*, *Coramandel*, and *Arga* Indigo, three Sorts of Lacque, Myrrh, various Perfumes, Salt, Rice, Saltpetre refined and unrefined, Terra Merita, Sugar, and Sugar Candy.

With these two last the *Dutch* lade several Ships entirely every Year; Part for their own Accounts, and Part on Freight for the *Moorish* Merchants, destined principally for *Persia*.

There is likewise exported from *Bengal*, Borax, Opium, Grain, Gums, and Medicinal Roots, embroidered Counterpanes, Carpets, and Stuffs, sent to *China*, *Japan*, *Cambaya*, *Tonquin*, and several other Parts of *India*, and of which large Parcels come to *Europe*, Fruits, Butter, packed in Copper Pots, or Sacks made of Buffalo Skins, Honey, various Sorts of Sweetmeats, Diamonds, of which here is an ancient Mine in the Kingdom, and many other Species of precious Stones, Slaves, either of the Country, where the poor People sell their Children to subsist, or those of *Aracan*, a neighbouring Kingdom, whose Inhabitants exercise Piracy more than Trade, and whose principal Merchandize consists in their unhappy Neighbours of both Sexes, reduced by them to Slavery.

Although all these Commodities make a rich Object of Trade to the Nations concerned therein, it must notwithstanding be allowed that the Dimities, Tickings, Linens, and other Cotton Goods made here, are Commodities that the *European* Companies' Ships bring back in the greatest Quantities, and with which the *Indian* Merchants also make a great Part of their Vessels' Ladings. It is in this Kingdom only that the Herb grows of which many Sorts of Goods are made; and the Natives of the Country who carry on the inland Trade, and through whose Hands almost all the *European* Affairs pass, are the *Banians*, who are all either Merchants, Brokers, Bankers, or Book-keepers, and among them many are concerned in the Marine Trade, either in their own Ships, or by those they freight.

#### Of the Trade of ASEM, or AZEM.

THIS Kingdom, in the *Great Indies*, is one of the best Countries in *Asia*, rich in the Mines of almost all Sorts of Metals, such as Gold, Silver, Steel, Lead, Iron, &c. It also produces a large Quantity of coarse Silk, and the best Lacque in all the World. All the Mines belong to the King, and the Gold is prohibited Exportation, though the Silver Coin makes an Article in Trade, and may be carried off by Strangers. Another Branch of Commerce, and that no small one, consists in Bracelets and Collars, for the Arms and Legs, of which they use great Quantities themselves, and send as many to the Kingdom of *Boutan*.

#### Of the Trade of BENARES, or BANAROUS.

THIS is one of the greatest Cities in the *East-Indies*, and seated to the Northward of the *Ganges* which washes its Walls; its Trade is very considerable, particularly in Silk Stuffs and Cotton Linen, both white and painted. The Caravanseras here are many, and very commodious, in the principal of which are sold the most valuable Goods, under two vast Galleries raised in the Middle of the Court; and as it is commonly the Artificers themselves who come here to sell their Goods, Strangers may have them at first Hand, and consequently cheaper than in most of the other Cities of *India*, where the *Banians*, *Jews*, or *Armenians*, buy them to resell.

Capture, or

## Of ARACAN and PEGU.

THESE two Kingdoms, which follow that of *Bengal*, and whereof the latter's Coast joins those of *Malacca*, are better known in *India* by the piratical Courses of the one, and the lasting Wars of the other with the King of *Siam*, for the famous white Elephant, than for the Largeness of their Commerce with the *Europeans*; the *English* and *Dutch* however preserve some Correspondence with *Aracan*, on Account of the Refreshments which their Ships are sometimes obliged to take there, yet without having any Settlements, although the King has often invited those two Nations to an Establishment in his Country.

In Respect to the Kingdom of *Pegu*, the *Dutch* send some Ships here yearly from their Settlements on the Coasts of *Coromandel* and *Bengal*, laden with Linens of this Kingdom, from *Majulipatnam* and *Meliapour*, better known under the Name of *St. Thomas*. The proper Linens for this Commerce are *Lagias*, or *Alegias*, *Topitics*, and *Corpi Pintadi*; the *Peguans* preferring the Linens of *Meliapour* to all others, and it is with these that they clothe themselves, without the Tailor's Assistance, each Piece making a complete Habit, in turning it many Times, and in many Manners about their Body; the Women cut them in four, and cover themselves to their Knees. There is also brought them *Opium*, *Pepper*, *Cinnamon*, *Nutmegs*, *Sanders*, and *Wood of Paradise*.

The Exports from hence are *Ginger*, *Gold*, *Silver*, precious Stones, and *Pearls*, which two last are contraband, and here must be a Permission from the King, for either buying or selling. This Kingdom also produces a Quantity of *Rice*, and it is from hence that the *Dutch* carry it to *Malacca*, besides which the Exports are *Elephants' Teeth*, *Pewter*, *Honey*, *Wax*, *Cardamom*, *Long Pepper*, *Cachou*, &c.

## Of MALACCA.

THIS City is seated at two Degrees and a half Latitude on this Side the Line in the Straits, to which it gives Name, and separates the *Terra-Firma* from the Isle of *Sumatra*. *Alphonso Albuquerque* took it from the King of *Ibor*, or rather *Gobor*, in 1511, and it was unsuccessfully attacked an hundred Years after by the *Dutch* though they were more fortunate in 1641, when they drove the *Portuguese* out, after a Siege of six Months, and have remained Masters of it ever since. Its Port is one of the best and safest in *India*, and may be entered at all Times of the Year, which is an Advantage that neither that of *Surat* or *Goa* enjoys, nor any others of *Guzurate* or *Malabar*, which are all subject to the Monsoons. Whilst it remained in the Hands of the *Portuguese*, it was one of the Staples for the *Indian Trade*, and as a Storehouse to all the East, where the *India Nations*, accustomed to the marine Traffick, used to assemble.

It still supports its Reputation, and its Commerce is yet very considerable, particularly in Linens from *Surat*, *Coromandel*, and *Bengal*, which find Vent here, at *Andra*, *Giery*, and in the Rivers of *Siaca* and *Piera*, and here are also found other Goods, of which a Part go by Land to *Siam* and *Pegu*.

The major Part of the Payments for these Linens, and other Commodities brought here by the *Dutch*, are in *Gold* and *Pewter*, on which large Profits are made in the other Parts of *India* they are sent to. The chief Officer in Trade that the *Dutch* Company maintains here is called *Chabander*, an *Indian Name*, which signifies Super-Intendant, who is independent of the Governor, and has the sole Direction of the Trade and the Customs.

The *Dutch* are here about two or three hundred Families; the other Merchants are *Malayans*, *Moors*, or *Chinese*; these last only concerning themselves in the Retail of *Tea*, *Sugar Candy*, *Sweetmeats*, &c. but the others have their Shops ever full of all Sorts of Goods, that the *Dutch* Ships bring here.

The Trade carried on at *Malacca* was the least Motive to the *Dutch* for its Capture, or that now induces them to maintain and guard it with so much Care; but

but its admirable Situation for that of *China* and *Japan*, besides its commanding all the Straits in which it is seated, so that no Nation can pass to the Eastward without their Permission.

*Ligor* and *Tenasserin* are two petty Kingdoms in the Peninsula of *Malacca*, dependent on the King of *Siam*; the *Dutch* have Settlements here, and carry on a good Trade in Pepper and Pewter, of which I shall speak in the following Section where I am to treat

*Of the Trade of SIAM.*

**T**HIS Kingdom, ever since the Separation of *Tonquin* and *Cochinchina*, is one of the most powerful in *India*: Its present Bounds are *Cambaye* to the East, *Labur* to the North, *Ava* and *Pegu* to the West, and the Sea of the Gulf of *Siam*, to which it gives Name, to the South. Its Capital is *Sci-Jutbaia*, of which the *Europeans* have made *Judia*, *Judia*, *Judea*, and *Odia*, and the *Portuguese* call it *Siam*.

This City is seated on the *Menam*, a great River that falls into the Gulf of *Siam* four Days' Journey from it; and which, like the *Nik*, regularly overflowing and drowning the whole Country at periodical Seasons, renders it very fertile in all Necessaries of Life, particularly in Rice, of which Foreigners yearly export several Ships' Lading; though large Ships cannot get up the River, but are obliged to attend and take in their Cargoes below, whilst small ones may get up to *Bancock*, five or six Leagues above its Mouth, but only Barks and Junks can reach the Capital.

There is no Part of *Asia* from whence Merchants are not seen at *Jutbaia*, as they come here from *Japan*, *China*, the *Philippines*, *Tonquin*, *Cochinchina*, *Ciampoa*, *Camboya*, the Isles of *Sunda*, *Bengal*, the Coast of *Coromandel*, *Surat*, *Persia*, and *Arabia*; and the *European* Nations that have Settlements here are the *English*, *Dutch*, and *Portuguese*; the *French*, who had one also in 1686, were driven out from *Bancock* in 1688, and though they afterwards settled in another Part of the Kingdom, their Trade was so inconsiderable, that it may be justly said they have ever since sent more Missionaries than Merchants there.

It is only the *Europeans*, *Chinese*, and *Moors*, that is, all the *Makometans*, who are privileged to have Houses in this City; the *Indian* Nations having them without, though their Quarters are all separate, where they carry on their Trade, and exercise their Religion.

The *Dutch* carry on the greatest Trade here, and the House they built in 1634, is one of the handsomest they have in all the *East*; yet this Settlement is only reckoned the twentieth in the thirty-two principal ones they have in all, under the general Government of *Batavia*.

Trade is one of the chief Professions of the *Siamois*, and it may be truly said, that their King is the principal Merchant among them, whether for the Traffick at home or abroad.

His foreign Commerce is mostly to *China*, where he annually sends five or six large Vessels; to *Japan*, where there go two or three; to *Camboya*, *Tonquin*, and *Cochinchina*, the Destination is as many; and in Fine, to all the Coasts of *India*, especially *Surat*, and even to *Persia*, where there are always some of his Ships, commanded commonly by Christians, as his own Subjects are no great Sailors.

The inland Trade of the Kingdom, carried on by his Factors, does not only consist in the valuable Commodities imported by his Shipping, of which his Warehouses are always full, and sold at the Prices he thinks proper; but also in the different Productions of his Dominions, whether they be the Tribute of his Subjects or what he cultivates in the Lands particularly belonging to him: So that only in *Betel* and *Areque*, green and dry, the King's Agents get upwards of six or seven hundred thousand *French Livres*: and it is reported, that the Customs of *Bancock*, and the farming the circumjacent Gardens, produce him more than four Millions yearly. This Kingdom is rich in Mines of *Pewter*, *Lead*, *Silver*, and even *Gold*, though these last produce but little, and that of a very base Alloy;

Alloy; the Pewter Mines of *Lagor* being the most considerable, whose Metal makes one of the best Branches of Trade that the *Dutch* carry on here; the Company having a Treaty with the King, which interdicts the Purchase of this Commodity by any others than themselves.

It is with this Pewter that the *Dutch* ballast their Ships in returning for *Europe*, preserving however enough of it for their *Indian* Trade, where in many Parts they truck it against other Commodities to a very great Advantage.

The other Merchandizes which *Siam* produces are Wood for building Ships of which the *Dutch* lade great Quantities for *Batavia*, Stags' Beeves' Buffaloes' and Tigers' Skins, of which latter, a striped Sort esteemed very valuable, more especially for *Japan*, Gum Lacque, Lead, Sapan Wood, Calembeck, or *Alis* Wood, Honey, Wax, Sugar, Betel, Areque, Pepper, Rice, Salt, Varnish, various odoriferous Woods, Tea, that comes from *China* and *Japan*, Calin, supported by some a Metal between Pewter and Lead, though by others only a Mixture of them, Ambergris, Linens of the Country, Elephants' Teeth, Saltpetre, Gum Gutta, Canes and Rattans, Cotton, Ivory, Asphaltus Woods, Musks, Benzoin and Silk; but these three last are brought here from *Labor*, when that Kingdom is not at War with this of *Siam*.

The Goods proper for this Trade, and which are principally in Demand at *Siam*, are Silk Stuffs, Spices, all Sorts of *Chinese* and *Japan* Commodities, such as flowered Velvets, japanned Works, Porcelaine, Goldsmiths' Wares, divers *European* Commodities, Gold and Silver Bars; but the Goods that find the readiest and surest Dispatch are the Linens from *Surat*, *Coromandel*, and *Bengal*; here are besides imported red Coral, yellow Amber, Quicksilver, Sanders, and Cloths; Pepper also was once a good Commodity, but since its Prohibition here the Natives have enought, and to spare for Exportation.

#### Of CAMBOYA.

**T**HIS Kingdom, called also *Cambodia*, was formerly a Province of *Siam*, but at present only makes it the Acknowledgement of an annual Tribute, viz. of a Nolegay of golden Flowers. The Capital of this Kingdom, which the *Europeans* call by the same Name, and the Inhabitants *Rauveka*, is situated at sixty Leagues from the Mouth of the River which falls into the Sea, to the East of the Gulf of *Siam*, and which, like the *Nile* and the *Menan*, overflows the Country regularly every Year. The *Portuguese* had for a long Time this Trade to themselves but it is now open to all those who will engage in it; and here are *English*, *Dutch*, *Portuguese*, *Chinese*, *Japanese*, *Siamois*, *Cochinchinese*, *Malayans*, &c. of which some come with the South, and return with the North Monsoon, and others quite the reverse. The *Dutch* send Linens here from *Malacca*, of which the properest for this Market are *Bengal* Callics, white and red Bettiles, Assortments of Serasses, and some Cotton Thread.

The Goods this Place produces for Exportation are Benzoin, Gum Lacque, Wax, Copper Basons, Iron *Chinese* Pans, Rice laden for *Quinam*, and a Quantity of Stags' Beeves' Buffaloes' and other Savage Animals' Skins, which here, as well as at *Siam*, are one of the best Articles in this Trade, and the easiest sold, by Means of the *Chinese* and *Dutch* Traffick to *Japan*, the former being the most considerable Traders here of all the Eastern People.

#### Of COCHIN-CHINA.

**T**HIS Kingdom is seated between those of *Camboya* and *Tonquin*, on a Gulf bearing its Name; its Length is about an hundred and ten Leagues, and its Breadth in some Places, only ten, twenty, or twenty-five at most; and, notwithstanding its small Extent, it has the Kingdoms of *Chiampa* and *Thien* for Tributaries, where it carries on a very great Commerce.

Its chief foreign Trade is that of *China* and *Japan*, carried on by the *Chinese* settled here, or those of *Canton*. The *Europeans*, especially the *Dutch*, lade many Merchandizes here; the *French*, as has been said of *Siam*, have hardly any of their

their Nation here but Missionaries. The Commodities extracted of the Growth of the Place are Gold, which comes from the Mines, or Dust collected in the Gravel from some Rivers, of Calembac Wood, which grows in the Kingdom of *Champoa*, from whence they can only bring it to *Cochin-china*, and which sells for its Weight in Gold, even on the Spot; Pepper is also extracted from hence, and sent to *China*; Silks gathered in such Quantities, that even the Cordage of their Gallies and Fishermen's Nets are made of it: Taffeties, which are the only Stuffs made here; Sugar, shipped commonly for *Japan*; Wax, Areque, and Betel, Rice, with which many Ships are annually laden; in Fine, those Birds' Nests so much esteemed by all the *Indians*, as a salutary Food, which serve them at once both for Aliment and Regale.

#### Of TONQUIN.

**T**ONQUIN was for a long Time a Province of *China*, when *Cochinchina* and *Chiampa* were a Part of it; at present these two Kingdoms are separated, and *Tonquin*, more compact than before, is bounded on two Sides by three Provinces of *China*, which are *Canton* to the East, and *Jean* and *Quansi* to the North; to the West it touches on the Kingdom of *Brama*, and to the South on *Cochinchina*, and the Gulf to which this last has given its Name.

The *Tonquinois* did not till pretty lately renounce the Politics they had learned from the *Chinese*, not to trade with any foreign Nation; but at last they are become more tractable, having at first permitted Strangers to come and trade with them, and were afterwards emboldened to go and traffick with others, as they now do at *Siam*, *Batavia*, and many other Places of *India*, they send Ships to.

The best Merchandize that the *Europeans* can carry to *Tonquin* are Gold and Silver, especially Dollars, although they are not without them; as here comes a great deal of Gold from *China*, and a Quantity of Silver from *Japan*; besides, some pretend that this Kingdom has Mines of both these Metals, though Mr. *Tavernier* denies it, and with a reasonable Probability. Other Commodities brought here are Spice, Pepper, Quicksilver, Vermilion, Cloths, and yellow Amber. These People are open and faithful in their Dealings, in which they are very different from their quondam Masters the *Chinese*, who pride themselves in cheating Foreigners, and use a thousand Chicaneuries in their Purchases and Sales.

Silks are in such Plenty at *Tonquin*, that both rich and poor equally clothe themselves with several light Stuffs made of them in the Country; and the major Part of those Things, which in other Places are made of Flax or Hemp, are composed here of this Material. The *Dutch* export great Quantities of these Silks for *Japan*, being more commodious than to fetch those of *Persia* and *Bengal*, as they did before their Trade was established at *Tonquin*.

Here is also to be purchased Musk, Tortoise-Shell, Aloes Wood, of which here is some worth near an hundred and thirty Pounds Sterling per Pound, Sugar in Pound and half Pound Leaves, proper for *Japan*; Porcelaines, brought from abroad, Lacque, Rice, and those Birds' Nests mentioned in the Section on *Cochinchina*, which are found in five small Islands of the Gulf, where both the *Tonquinois* and *Chinese* go to seek them. It is also in five other neighbouring Isles that they go to catch Turtles, or Tortoises, which come ashore there in such Quantities at certain Seasons, as to render the Sale of their Shells and salted Flesh one of the best Branches of Trade in this Kingdom. They have Oranges and Lemons here, as in all other Parts of *India*; but these latter are so sour, as to become thereby useless for Refreshments to the Ships, and are therefore only consumed here instead of *Aqua Fortis*, to cleanse Copper, Brass, or Iron for Gilding, in the Dying of their Silks, and in the Lyes for their Linens, which makes them of a dazzling Whiteness.

## Of the Commerce of CHINA.

THIS vast Part of the Globe, and the Easternmost of *Asia*, is equally famous for its Fertility, which furnishes an Abundance wherewith to maintain an extensive Commerce, and for the Genius of its Inhabitants, who, more than any other People of the World, understanding to employ in all Sorts of Manufactures and Works the many rich Products that grow, and are found in the fifteen Provinces of this great Empire; which is rendered more adapted to Trade than any other eastern Country, by the many Rivers and Canals that traverse all its Divisions, and thereby facilitate the Transport of its Merchandize; and for Exportation by the good Ports that six of its Provinces have, which are washed by the oriental Ocean.

The *Chinese* Politics making them fear that a Communication with Strangers might corrupt their Laws, never gave these latter any Opportunity to attack their Liberty under a Pretence of Trade; but, for several thousand Years, shut the Entrance to their Kingdom against all Nations whatsoever, and were content with the interior Trade carried on among themselves; but at last the Emperor, having opened his Ports to all the World in 1685, the *Indians* and *Europeans* were equally forward to improve the Liberty of this new Trade, which they have carried on ever since.

The *Portuguese* till then had been the only Nation of *Europe* who had carried on any Sort of Traffick directly to *China*, by Means of their Situation at *Macao*, of which I shall treat by and by, and the *Dutch*, desirous of imitating them, when established in the Isle of *Formosa*, having been chased from that Post in 1661, had renounced this Commerce, or at least, like the *English*, only maintained it in the half deserted Isles, where the *Chinese* Junks brought their Merchandize, and returned with what they got there from Foreigners.

It is true, that many *Indian* Nations; and the *Dutch* themselves, were never without the Products of *China*, but it was what the *Chinese* brought, who were permitted to go to other Parts, at the same Time that all others were strictly forbidden coming among them; and the Places which the *Chinese* Junks frequented most, and to which they still continue the Trade, are *Japan*, the *Manilla*, *Cochinchina*, *Achin*, *Malacca*, *Cambaya*, *Siam*, *Tonquin*, *Patana*, *Jambi*, *Andragiri*, in the Isle of *Sumatra*, *Batavia*, and some others.

The Trade with Strangers in *China* was not only open by Sea, but the Caravans were also admitted here, as well from the eastern *Tartars*, who now govern this Empire, as the *Muscovites*, who send yearly to *Pekin* a very numerous one from *Petersburgh*.

*China* is separated from the States of the *Grand Mogul*, by sandy Deserts absolutely impassable, and other Provinces of *India*, by Mountains very difficult to get over, which hinders almost all Trade between these different Kingdoms, except a very small one on the Frontiers, though it is very difficult to know in what even that consists, as not one in a thousand at the Capital knows any Thing of what passes without the City. It is true, the *Chinese* have sometimes gone to *Bengal*, the *Philippines*, *Batavia*, and even to *Goa*; but this by Stealth, and with the Connivance of the Mandarines, Governors of the Sea Ports, for a good Sum of Money, which the Court were Strangers to, notwithstanding it is absolutely forbidden to every Subject of the Empire, to go to any Foreign Part, on any Pretext whatsoever, without a Licence, or express Order of the Government.

The greatest Part of the *Chinese*, spread in *India* to trade, are of the Posterity of those who escaped from *China*, when the *Mongolean Tartars* became Masters of it; and they have only a clandestine Communication with the other *Chinese* their Countrymen.

There is no Nation fitter for Trade, and that understand it better, than the *Chinese*, so that it lets no Profit slip, which Commerce offers; trading in, and benefiting by all, with an admirable Dexterity and Skill, though not with that Fidelity, as is elsewhere regarded as the Soul of Trade; in one Word, the *Chinese* are spread in *Asia*, wherever there is any Thing to be got, with the Characteristick of Cheats, Uturers, faithless, full of Complaisance and Subtlety to manage a good Opportunity,

portunity, and all this under the Appearance of plain Dealing and Honesty, capable of deceiving the most attentive and suspicious; and they commonly say proverbially, that all other Nations are blind in Respect of Trade, but themselves and the *Dutch*, which latter have one Eye, but they two. As it has always been a Maxim in the *Chinese* Government, to encourage a great Currency of Trade in all the Kingdom, it may be said that all the People concern themselves in it; here being hardly any of the Natives, even the Mandarins, who are not engaged in it, at least in Partnership with the Merchants, to whom they advance their Money, that it may increase, and not lie idle.

One of the principal Branches of Commerce in *China*, as well at home as abroad, consists in Silk and Silk Stuffs, either plain or mixed with Gold and Silver, of which here is so great a Plenty that most of the People, and even Servants, commonly go clad in Sattin or Damask. Silkworms are bred in almost all the Provinces of the Kingdom; but *Nanquin* and *Chekiang*, especially the latter, are those where most is gathered, and where most Silk is manufactured, there not being one Year in which they do not send to *Pekin* near four hundred Barks laden with Cloth of Gold, or Tissues, Damasks, Sattins, and Velvets, besides those made by the Emperor's Orders for Presents to his Ladies, Princes, and all his Court; all the other Provinces also pay a Part of their Tributes in Silk and Silk Stuffs, which are generally refold for the Emperor's Account, but when altogether are not near the half of what *Chekiang* furnishes alone. It is in the Province of *Nanquin*, that the most beautiful Skins are made, and where most of the best Artificers come to establish their Fabrick, though Foreigners hardly carry away any of these; but almost all the Skins that the Europeans buy, as well wrought as raw, are manufactured at *Canton*, or in the Province of which that City is the Capital, and gives its Name.

There is made in *China* all Sorts of Silk Stuffs, either net or mixed with Gold and Silver, as there is in *Europe*, and many other peculiar to themselves; and they have Wools in many Provinces, of which they make some Serges, as they are ignorant in the Manufacture of Cloth, though they have these brought here, and very much esteem them, more especially those from *England*, yet they buy but little, as the Cloths cost vastly more than the very finest Silks that can be made here.

The *Chinese* have also various Furs, even of the very finest, such as Minivers, Ermines, and Martens, but they are all consumed in the Country, in Linings for Men and Women's Clothes, of which one only often costs above 25*ol.* Caps, Saddles, and other Moveables.

The other Merchandize exported from *China*, besides wrought and raw Silks are Cottons in Wool, Thread, and Linens made of them, Brats in Plates, and Salmons, Toutenaque, Tea, Camphire, Musk, Flax, Sugar, Salt, Ginger, Sweetmeats, Quicksilver, Vermilion, Lapis Lazuli, Vitriol, Ambergris, Rhubarb, Galangal, China, Mirabolans, China Ink, Horles, Porcelaine, japanned Works, Potter's Works, proper for *India*; Camlets, Hemp, and Hempen Linens, fine Gold, Pewter, Iron, Steel, and many Instruments made of these Metals richly wrought; in fine, precious Stones, Pearls, beautiful Marble, Aloes, Rose, Brazil, and Ebony Wood, Jesuits Bark brought from the *Manillas*; yellow and reddish Amber. After the lacquered Works of *Japan*, those of *Foiken* pass for the best, and though there are good Artists in this Manufacture at *Pekin*, yet they fall short of that Beauty and Perfection so conspicuous in the Fabricks of *Japan* and *Foiken*, as much as they exceed any Thing of that Nature attempted in *Europe*.

In Regard to the Merchandize proper for the Trade of *China*, Plate is the Basis, whether in Dollars, as they come from the *Manillas*, or in Bars, as the *Dutch* bring them from *Japan*; the *Chinese*, who have none, esteeming it greatly, and willingly truck their Gold and best Commodities against it. And whilst I am on this Subject, it will be not improper to remark, or unprofitable to my Reader, that in this Traffick, the Difference between Gold and Silver is computed as one to ten, whereas the Difference in *Europe* is as one to fifteen, so that great Advantages are made by carrying the latter thither. Spice and Pepper also find a good Sale here, particularly this last, wherefore the *Dutch* always make it a Part of their Ladings; there are also brought here Linens of various

Sorts, Cloth  
red, white,  
and red Cor

Sorts, Cloths, Serges, Estaminas, of divers Species of Colours, of which the red, white, and black are most in Esteem, Sanders, Elephants' Teeth, Amber, and red Coral, though pale.

What has been hitherto said of the *Chinese* Trade has been but little more than the Transactions of the inland Part of this vast Empire, by the Inhabitants of the different Provinces that compose it, and with taking some Notice of that Trade which Foreigners, especially the *Europeans*, carry on here, since the Emperor opened his Ports to them; I shall now therefore enter into a Detail of the Commerce that the *Chinese* carry on in their own Ships in all Parts of the East.

*Of the exterior Trade of CHINA.*

**C**ANTON is the Port where all the *Chinese* Junks are laden for Abroad, and where they come to bring their Returns; the Places for which they commonly lade are, as has been already observed, the Isle of *Hainam*, *Cochinchina*, *Camboya*, *Tonquin*, *Siam*, *Batavia*, *Japan*, *Manilla*, *Surat*, *Maldives*, and *Achen*, of whose Trade I shall speak in Order.

*Of the Commerce of CANTON to the Island of HAINAM.*

**T**HIS Island, situated nineteen Leagues to the South-West of the River *Canton*, is Part of the Empero. of *China's* Dominions, so that seemingly it should not be comprized in what I have to say of the exterior Trade of *China*; but as they themselves count it among the Places of their foreign Traffick I shall therefore begin with it, as I proposed.

Vessels may go and come from *Canton* to the Isle of *Hainam* all the Year, but the best Season for leaving *Canton* is the End of *November*, and that of returning from *Hainam* the Month of *June*; those who depart in the good Monsoon may make their Passage in less than eight Days, but those who sail against the Monsoon, commonly employ a Month, and sometimes six Weeks in the Voyage. The Goods they carry with them to *Hainam* are wrought or unwrought Iron, Iron Chablron, Cotton, Cotton Linens, called Canques of *Foiken*, ditto of *Nunquin*, common Straw Matts, and Garlick. The Commodities in Return for *Canton* are various Sorts of Rattans, yellow Wax, Galangals, Venifon salted and dried, Areque, Cocoa Nuts, Stags Skins, and Nerves, and Aloes Wood, of which it is said there is thirteen Sorts.

*Commerce from CANTON to COCHINCHINA.*

**T**HE King of *Cochinchina* is the only Merchant that may publickly be dealt with, yet sometimes he permits Particulars to buy and sell; and though the Licence for so doing costs dear, it is notwithstanding always very advantageous, and every Ship on Arrival makes to him, or his Officers, a Present to the Value of about four hundred Taels.

The *Chinese* Vessels leave *Canton* the Beginning of *March*, and commonly arrive at *Cochinchina* about the 15th, though sometimes the Weather detains them till the 25th; and to return from hence they must set out the Beginning of *July*, having generally the same Passage coming as going.

The Goods proper for *Cochinchina* are the Caches, a Copper Money, of *Hainam* and *Canton*, Brimstone, Saltpetre, though it must be observed that both these last Commodities are not permitted to be laden at one Time, in the same Ship, nor either of them separately, without a particular Licence, which always costs dear, as these are prohibited Exportation from *China*, Gold Stuffs, fine white, and red Crapes, Ginseng, thin Crimson Sattins of *Canton*, coarse Porcelaine for common Use, all Sorts of Medicinal Drugs, thick Paper for burning before their Pagods, Glass Bracelets, ordinary and fine, Iron Kettles, and Leaf-Gold. The Returns from thence are in Gold Ingots, *Agacaramba* Wood, Darts, Areque, the best in *India*, black Wood, Rhinoceros' Horns, of three Sorts, Buffaloes' and Cows' Horns, Pepper, Fish, called *Bitchemarec*, Sea-Dogs Skins, strong coarse Silk

Silk Stuffs, Birds' Nests, white Sugar, and Sugar Candy, and *Japan* Wood for staining yellow.

*Trade of CANTON with CAMBOYA.*

**T**HE *Chinese* Vessels, which carry on this Trade, sail from *Canton* the Beginning of *January*, and spend in their Passage from fifteen to thirty Days, according as the Weather favours; their Return is commenced at the End of *June*, that they may arrive in *China* by the succeeding Month. The whole Commerce is contracted in the southernmost Part of *Camboya*, near three hundred and fifty Leagues from the River of *Canton*. Every Ship, on Arrival, makes a Present to the King, and his four principal Officers, of three or four hundred Taels, and then have Liberty to trade with whom they please.

The Commodities commonly sent here are only five, *viz.* Iron Anchor Flukes, Umbrellas, Rattan Mats, all Sorts of Fruit, and Porcelain. The Returns are Sapan, or Brazil Wood, Elephants' Teeth, Lacque, Lounge for painting yellow, Birds, Buffaloes, Chameaux', Cows' and Stags' Skins, Buffalo and Cows' Horns, Peacock Feathers, and Taffousia, a medicinal Drug.

*Trade of CANTON with TONQUIN.*

**T**ONQUIN is two hundred and twenty-five Leagues from the River of *Canton*, which is commonly sailed in ten or twenty Days, and the Return much the same; the Seasons for departing and coming back, are the Beginning of *January* and *July*. The Presents which these People make the King and seven of his Officers hardly amount to three hundred Taels, though all other Nations pay a great deal more: The Merchandizes carried thither, are *Canton* Cafches, Iron Kettles, small Bras Cannon, Pewter in Gilt Leaves; all Sorts of Drugs, at least an hundred Species, ordinary Porcelain, Cloves, Pouchoe, a Drug serviceable in Medicine, and for dying yellow Silk, or thin Taffeties, red Crape of *Canton*, Gauze of the third Sort, Glass Necklaces, Vermilion, Alum, Rupiediy, a Drug for dying Black, and all Sorts of *Chinese* Fruit. The Goods laden in Return are, yellow raw Silk, Mudis, or Stuffs made of a Tree's Bark, several Sorts of Taffeties, coarse and fine Canques, or Cotton Linen, Brazil Wood, Cinnamon, not extraordinary good, Lacque, Aniseeds, and Caramangee, a medicinal Drug.

*Commerce of CANTON and SIAM.*

**T**HE Ships sail from *Canton* to *Siam* about the 20th of *November*, and are thirty or forty Days in their Passage, and their Return is begun in *June*, that they may all arrive in the Month following; and the King here, as in *Cochinchina*, is the only one to trade with.

The *Chinese* carry a large Quantity of all Sorts of Goods here, and bring no fewer back; the outward-bound Cargoes consisting of wrought and unwrought Iron, Toutenaque, Allum, white Sugar, wrought Copper, Latten and Iron Wire, Copper Basons of different Sizes, cast Copper Cisterns, Iron Kettles, five within one another, all which Commodities serve as Ballast, Damasks and Satins of all Colours, striped and common Taffeties, Gauzes, sewing Silk, Marelle, a red Nanguin Paint, Chuangon, a Medicinal Drug, Figie-caque, a *Chinese* Fruit, Sugar Candy, Raisins, Prunes, dried Chestnuts, Water Melon Seeds, Copper Drums, called Gans, Quicksilver, and three Sorts of Gold Wire. The Goods that compose their Cargoes in Return, are Elephants' Teeth, Lead, Pewter, Areque, Brazil Taffousie, or Wood, Taffousia, a Medicinal Drug, all which serve for Lattage, Lacque, Horse, Cow, Buffalo, and Stag Skins, Buffalo and Rhinoceros Horns, Myrrh, Loung, Birds' Nests of three Sorts, Pouchoe, Incense, Bird Skins with their Feathers, Peacocks' Tails, two Sorts of Stags' Nerves, and Caye-lac, an odorous Wood for burning in their Pagods.

*Of the Trade between CANTON and BATAVIA.*

**BATAVIA** is seven hundred Leagues from *Canton*, and Ships which go from the former to the latter sail the Beginning of *December*, in Order to arrive in the following Month; and when they return set out on the second or fourth of *June*, and get home in *July*. The Goods the *Chinese* carry with them are, *Toutenaque*, Gold, fine and ordinary *Porcelaines*, several Sorts of Tea, Copper Basons, Gold Wire of *Canton* and *Nanquin*, Sattins and Damasks, the greatest Part black, Taffeties, three Sorts of sewing Silk, Aniseeds, Quicksilver, Vermilion, Musk, Borax, Iron Kettles, five or seven in one another, Rhubarb, Arcaffoul, a Medicinal Drug, Copper like the *Japan*, very thin *Canton* Taffeties, of all Colours, *Canton* Glafs, and *China* Root. The homeward bound Cargoes consist of Lead, Pewter, Pepper, Incense, Puchoc, Caremangee, Camphire, Coral, Rattin and other Mats, Rattins, Nutmegs, Cloves, yellow Amber, Myrrh, *Assa-fetida*, *Azeboucq*, a Medicinal Drug, *Guinea* Pepper, Birds' Nests of two Sorts, and Sugar Candy.

*Commerce from CANTON to JAPAN or JAPON.*

**AS** I shall have Occasion to treat amply of this Island, in the Chapter that will be dedicated to it, there will be no Room to enlarge on it here; so I shall only confine myself to that carried on by the *Chinese*, in a large Number of Junks that they yearly send to this Place from *Canton*; that the Port of *Japan*, which their Buiness leads them to, is called *Lang-Ajakie*, situated in thirty-six Degrees six Minutes of North Latitude, and in an hundred and fifty-one of East Longitude.

In order to secure a successful Passage, the Vessels should leave *Canton* the Beginning of *May*, that they may get to their intended Harbour in about twenty-five Days, as a timely Arrival is of the utmost Importance to the Sales of their Goods, a Preference being always given to the first Comers, when the Merchants or Captains demand it; and this Claim should never be neglected, as the *Chinese* send so many Junks in some Years, that several, which arrive last, are obliged to carry all, or at least a Part of their Cargo back again.

On approaching the Harbour, the Vessel must anchor at three Leagues' Distance, to give the Custom-house Officers Time to visit her, and take the Captain's Declaration, which must be in Writing, and contain his Name, that of the Junk, the Place he came from, and those he touched at, the Number of his Crew, when he sailed, the Condition of his Goods, the Size of his Vessel, the Number of his Guns and small Arms.

As soon as the Visit is over, the *Japanese* Pilots and Sailors come aboard, and carry the Vessel into Port, where, when anchored, the Lading is delivered into the Warehouses, which the Director-General of Trade furnishes, where the Sales are made on the Day, and at the Hour, appointed by him.

The Goods proper for this Voyage are, Coral in Grains, *Agracaramba*, an odoriferous Wood, *Ultramarine*, none but the King of *Japan* can buy these Commodities, Enamel of five different Colours, Alum, Iron, *Toutenaque*, white and brown Sugar, which five Articles serve for Ballast, Sattins, of which more than two Thirds are black, white Taffeties, of *Canton* and *Nanquin*, white and red Crape of *Nanquin*, *Canton* fishing Linens, Vermilion, raw Silk of *Nanquin*, *Galanga*, Legumen, yellow Lacque, as it distils from the Tree, *Areque* Bark, *Yehitsee*, a medicinal Drug, *Caramangee* from *China*, *Folio Chiroze*, a medicinal Drug, yellow Wax, *Chinese* white Linen of several Sorts, green Alum, Honey, *Chientou*, a medicinal Drug, Sugar Candy, Benzoin, Aloes Wood of three Sorts, Gum Sandrac, Tortoise-shell, Camphire of three Sorts, Puchoc, Incense, Myrrh, Lounge, Musk, Rhubarb, Cinnamon, *Chuangon*, a medicinal Drug, and a very bad Saffron. In Return the *Chinese* take Lacque or Varnish, *Porcelaines*, fine Pearls, Steel, wrought Copper, and a Sort of Camphire proper for *China*.

*Trade from CANTON to the MANILLAS.*

THESE Isles are two hundred Leagues from the River of *Canton*, where the *Chinese* Ships sail for in the Month of *March* at latest, and depart from thence in *July*. All the Junks that go this Voyage make the Governor and Superintendent of the Customs at the *Manillas*, a Present on their Arrival, which at first was only voluntary, but the Continuance has made it become a Right.

This Trade was formerly very advantageous, but it is greatly decayed; in 1700 the Goods from *Canton* lost 30 per Cent. at the *Manillas*, and though afterwards they grew something better, yet nothing in Comparison to the Value they once bore there. When the *Spaniards* go from their Islands to *Canton*, they carry a Parcel of Embroideries, and a little Musk with them; and what a *Chinese* Cargo for the contrary Voyage consists of, is *Toutenaque*, Iron, Porcelaines of all Sorts, Canques of *Canton*, and others of *Nanquin*, very ordinary Sailcloth, several Sorts of Cloths called *Nunna*, flowered *Damaiks*, plain *Sattins*, various Species of *Taffeties* from *Canton* and *Nanquin*, white and red *Crapes*, plain and flowered *Moeres*, with raw and sewing *Silks*. In Return, they bring *Brazil* Wood, *Stags' Flesh*, salted or dried, *Stags' Nerves*, and *Pearls*.

*Of the Trade from CANTON to the MALDIVES, touching at ACHEM.*

FOR this Voyage a Ship of a hundred and fifty to two hundred Tons Burthen is the properest, navigated with five or six *Europeans* at most, and the Rest of her Crew *Lafqueres* or *Lascars*. The Season for sailing is the End of *October*, to arrive at *Achem* between the first and tenth of *December* at latest, that they may depart for the *Maldives* in Time. The Lading of this Vessel should be composed first, with Merchandize proper for the *Moors* of *Achem*, who trade for *Surat*. Secondly, with those convenient for the Natives there. And thirdly, with such as may suit the *Maldivcean* Market. The Goods for *Surat* are, fifty Ton of white Sugar, an hundred Pieces of *Japan* Copper, twenty to fifty Pieces of Sugar-Candy, two hundred Pieces of *Toutenaque*, twenty to forty Pieces of *Quicksilver*. The Goods for the Natives of *Achem* are, coarse *Porcelaine* about five hundred *Taels*, *Copper Basons* of different Sizes, twenty Pieces of *Chinese* Tobacco in Pound and half Pound Papers, fifty Pieces of Gold *Canton* Thread of the third Sort, twenty *Catis*, the Ends must be of *Silk*, three or four *Braces* of fine *Coffee*, and *Tea-Cups* and *Saucers*, fifty Pieces of *Taffeties* squared, such as are sent to *Siam* for *Womens' Petticoats*, fifty Pieces of five threaded *Damaiks*, with red, blue, and yellow Flowers. The Returns make from hence are in Shells called *Cauris*, or *Cowries*, which serve as Money in many Parts of the *East-Indies*, as they do on the Coasts of *Africa*, where the *Europeans* carry them, dried *Fish*, and the Bark of the *Cacao Trees*, prepared for Spinning to make *Cables* with. There may likewise enter into the *Canton* Cargo for *Achem*, several Species of *European* Goods, such as all Sorts of *Nails*, *Iron Anchors* from three to fourteen *Quintals* Weight, *Iron Guns* from two or five *Quintals*, *Wine* and *Brandy* in Bottles, some *Chiffels*, *Spectacles*, twenty *Barrels* of *Pitch*, *Paper*, *Iron* in flat broad *Bars*, *Cordage* from one to five Inches thick, *Padlocks*, and also some blue *Linen* for *Womens' Petticoats*.

*Of the English Trade from MADRAS to CANTON.*

THE Ships sail on their Voyage in the Month of *July*, and arrive there in *August* or *September*; sometimes they lose their Passage, in waiting too long for those from *Europe*, to get *Dollars*, as without these they can do nothing in Trade to *China*. They sail on their Return from *Canton* in *January* or *February*, and their Voyage either going or coming, is from forty-five to sixty Days.

The Goods carried from *Madrass*, are *English* Lead, Lead and Pewter from *Pegu*, *Malaccan* liquid *Storax*, *Rattans* from the same Place, *Incenſe*, *Aſſa-tiſſida*,

*Madras* red Wood, Myrrh, Puchoc, and fine Pearls of all Sorts. The Goods in Return are Gold, Copper from *Japan*, and ditto from *Canton* like the other, Toutenaque, Allum, Quicksilver, Vermillion, ordinary Porcelaines for the *Moors'* Use, white Sugar, and Sugar-Candy from *China*.

*Of the Trade from SURAT to CANTON.*

THEY carry from *Surat* to *Canton* the same Goods as from *Madras*, besides a Quantity of Cotton; and those brought back from *Canton* are also the same, except the Gold. They sail from *Surat* in the Month of *May* or *June*, in Order to arrive at *Canton* in *August*, and come from thence about the 15th of *December*, to finish their Voyage in *March*.

*The Europeans Commerce with CANTON.*

THE Ships which annually arrive here from *England*, *France*, *Portugal*, and *Holland*, commonly bring the following Goods, *viz.* Silver, in various Coins, all Sorts of fine Cloths, Camlets, Serges, and other Woollen Stuffs, fine Linens from *Holland*; Clocks and Watches, Looking-Glasses of all Sizes, Mathematical Instruments, *English* Etwees, Pencils, Paper of all Sorts, various Ornaments for both Sexes, some *European* Liquors, and especially Wine; of all which Commodities a good Part is distributed in Presents to the Mandarines in the Government of this Place, and the Merchants generally make a considerable Advantage of the Rest. They employ the Silver they carry in the Purchase of divers Sorts of Goods, in Virtue of certain Agreements made before-hand, which are raw Silk, Damasks wrought according to Patterns given; plain Silk, lacquered Wares, Green and Bohea Tea, Badianes, a Seed from the Anis Tree growing in *China*, so called from the smell which its Wood has, like that Aromatick in *Europe*, Canes and Porcelaine after the Models and Paintings directed. They also sometimes buy Gold here, though but seldom, as they have it much cheaper in *India*. At *Canton*, some precious Stones, excepting Diamonds, are likewise to be met with, though never in any great Quantity.

It is at *Quantung* and *Poiken*, that the best *Chinese* Brocade Silks are made, and of which a large Quantity are brought to *Europe*, all which Commodities are purchased with ready Money; and the Sales of *European* Goods are on the same Terms, as Strangers find a considerable Difference in their Disfavour by Barter, and therefore maintain the Method of buying and selling for ready Money only.

In 1720, a Commissary from the *Mississippi* Company arrived at *Canton*, and obtained Liberty from the Court to reside there; but on his proposing to lade a Ship, he found so many insurmountable Difficulties lying in his Way, that he thought best to decamp, and quit his uneasy Residence; in the same Year also a Ship arrived under the Emperor's Colours at *Ossend*; the Fate of which Company being so well known, I have no Need to enlarge about it.

Besides what is before-mentioned, there are transported from *Europe* and *China*, and from *China* to *Europe*, a thousand Trifles, which make a considerable Gain, though they are too numerous to be particularized; I shall therefore omit attempting it, and proceed to give some Account of the Trade carried on between the two Empires of *Russia* and *China*, as it properly comes in here, and for which Mr. *Lange* has furnished me with Materials in his Journal, &c.

*A State of the Trade between RUSSIA and CHINA.*

OUR Commerce with *China*, says the above-mentioned Author, is at present in a pitiful Condition, and nothing in the World could have prejudiced our Caravans so much as the Commerce maintained at *Urga*, the Chan of the Western *Mongales* Camp, tributary to *China*, for from thence arrive at *Pekin* Monthly, nay Weekly, not only the same Goods as our Caravans convey there, but of a better Quality, and carried in such Quantities by the *Chinese* Merchants, who are continually coming and going between *Pekin* and *Urga*, and those which the *Lamas* or

or *Moungalean* Priests furnish on their Part, that makes the Value amount to four or five Times as much as a Caravan going under her *Czarish* Majesty's Name; besides, Particulars are able to bring their Commodities so much cheaper to Market, than the necessary Expences of a Caravan will permit the Commissary of it to do; and having not only the Advantage of travelling cheaper, but also quicker, they have an Opportunity to forestall the Market, and sell their Goods before the Caravan can arrive; it is, therefore our Author's Opinion, that except the Trade between *Russia* and *Urga* be prohibited, only with the Allowance of carrying their Cloths and *Russia* Hides, the Ruin of the Caravans is certain and near, and which may in the End draw on that of all the *Muscovite* Trade in those Parts. The Goods commonly brought from *China* to *Russia* are, small string Pearls, fine Gold, various Sorts of raw Silks, Damasks of different Goodness, plain and flowered Sattins, several Species of Silk Shagreen, spun Silk, Cotton Cloth, all Sorts of Green and Bohea Tea, which they might have in greater Perfection in *Russia*, than in any other Part of *Europe*, as the Northern Provinces of *China* produce by far the best, and the *Muscovites* have this by the Way of *Siberia*; so that, would they be careful in its Package, it would naturally retain a higher Flavour than that which comes by Sea from *Canton*; but their Indolence leading them to a Neglect of this Precaution, their Teas are generally tainted, and contract an ill Taste, of which their Delicacy renders them greatly susceptible, Badianes, before described, Porcelaines, Carpets, Silk Flowers stuck on Paper, and some Tobacco. The Commodities sent from *Petersburgh* to *China*, are Jewels of several Sorts, Sables, white and common Fox, Lynx, Beaver, Ermine, Minever, Badger, and Seal Skins, with some Teeth of this last Animal.

I might here add something of the *French* Traffick to *China*, as I said but little about it, in treating of that Nation's general Commerce; but I omit it now for the same Reasons I did then, *viz.* because both their outward and homeward-bound Cargoes, are in all Things so like those I have mentioned in the *English* Trade, that a Repetition would be superfluous.

#### Of M A C A O.

**A**LTHOUGH the City of *Macao* is not to be reckoned amongst the most considerable ones of *China*, either for Grandeur or Number of Inhabitants, yet it merits a particular Regard, on Account of the Reputation that it has always held among those where the *Portuguese* have been established in the East, and still possess there; as also because it is the first where the *Europeans* opened the Trade of this great Empire, and which it enjoyed alone near two Ages, that they were permitted to come and trade in it.

The said City is situated in a Peninsula of the *Oriental* Ocean, on the Coast of the Province of *Canton*, to which it is joined by a Slip of Land, at forty Leagues by Sea distant from its Capital, where the *Portuguese* settled, the Beginning of the sixteenth Century.

Before the *Chinese* were familiarized with these new Comers, who, under Pre- tence of trading, were already possessed of the strongest Cities of *India*, and their Fleets Masters of the Eastern Seas, it was only permitted the *Portuguese* to come annually with their Goods to the desert Isle of *Sanchan*, and there to open Shop in Huts, made in Haste of the Boughs of Trees and Turfs, without being licensed to build any Houses. Their Credit increasing, they advanced to *Macao*, ten Leagues from *Sanchan*, where they afterwards improved what Opportunities offered, to ingratiate themselves, and obtained Permission to build Houses and Magazines, and to encompass their new Town with a single Wall.

The *Dutch*, jealous of the *China* Trade, where they could not be received, attempted to drive these *Portuguese* out a hundred Years after their Establishment; but, having missed their Aim, their Enterprize only served the better to secure their Enemy's Settlement, as the *Portuguese* laid hold of this Occasion to obtain the Liberty of fortifying their Habitation, which was granted, as they were better liked for Neighbours than the *Dutch*.

The Fortifications of this Place are fine and regular, and the *Portuguese* have now built three Forts, on as many Eminences, or little Mountains, always guarded by a strong Garrison, and defended, as is said, by two hundred Pieces of Cannon.

The Isthmus, which joins the Peninsula of *Macao* to the Continent, is shut out by a strong Wall, built across it, that has a Gate in the Middle, by which all the *Chinese* may come in, and go out, but no *Portuguese* may pass it, on Pain of Death; it is at this Gate, where the Emperor of *China's* Officers are paid the Customs of Importation and Exportation, on all the Goods, Provisions, and Fruits, which are brought to or carried out of *Macao* by Land. All the *Portuguese* Trade was at first shut up within the Circuit of the City, where they received their Merchandize, and where the Junks from *Canton*, and the other Maritime Provinces of *China*, came to take them in Exchange for their Silks, Stuffs, and other *Chinese* Manufactures and Products.

Afterwards, some Merchants of *Macao* had Permission, for it was not indifferently granted to all, to go twice a Year to the Fairs at *Canton*, and purchase what they thought proper, who generally left Orders for such Goods as they should want next Voyage, that they might be making during the Time between the two Fairs, which if they spent there, it was always on board their Ships, as well for their own Safety, as to avoid the extreme Mistrust and Infidelity of the *Chinese*, and they were obliged to pay large Sums to the Viceroy for Leave to trade.

It was with these Goods they carried from *Canton*, and those that the *Chinese* Junks brought to *Macao*, or what came in by Land, that the *Portuguese* formerly composed all those rich Cargoes that they yearly sent to *Japan*, *Manillas*, and all the Parts of *India* from *Goa* to *China*, where they carried their Trade to, before the *Dutch* came to interrupt them.

At present this Trade is almost reduced to nothing, and they enjoyed but few Advantages from the Treaty they made in 1680 with the Court of *Pekin*, by which it was agreed that they only should transact the whole Commerce of *China*, exclusive of all other Nations; this Privilege having lasted not quite five Years, as the Ports of this vast Empire were opened, as before mentioned, in 1685, to all those who would come to trade there.

#### Commerce of the Kingdom and Peninsula of COREA.

THE Kingdom of *Corea*, called also *Caoli*, and *Tiscenceuk*, extends from the thirty-fourth to the forty-fourth Degree of Latitude. On the South it is very near to *Japan*; and on the North it joins to *China* by a high Mountain, which keeps it from being an Island. The Country is not equally fertile, as the Northern Coast produces hardly sufficient to support its Inhabitants, who only subsist on bad Barley, and are clothed with Animals' Skins; whilst on the contrary, the Rest of the Kingdom produces in Abundance all Necessaries of Life, besides Cotton, Hemp, and even Silk, though they are ignorant how to fit it for Use; here is also found Silver, Lead, Tiger Skins, Nili or Ginseng Root, so much esteemed by the *Tartars* and *Chinese*, a Quantity of large and small Cattle, more especially Horses, Cows, and Hogs. The *Coreans* hardly trade with any others than the *Japanese*, and the Inhabitants of the Isle of *Suisima*, seated between *Japan* and *Corea*, who have a Magazine or Deposit for their Merchandize, to the South-East, and in the City of *Ponchant*.

The Goods brought to *Corea*, are Pepper, Brazil Wood, Allum, Buffaloes' Horns, Stag and Buck Skins, and other Commodities; even some from *Europe*, which the *Dutch* and *Chinese* sell to the *Japanese*. All these Goods are exchanged and trucked against the Manufactures and Products of the Country; and the *Coreans* have also some Trade directly to *Pekin*, and the Northern Provinces of *China*; but this Business is of so great Expence, as it must be carried on all by Land, and on Horsecback, that only the most considerable Merchants are capable of undertaking it; it is those of *Sior* who go thus to *China*, and are not less than three Month in their Journey, the whole Commerce consisting in Linens.

This Kingdom has from Time immemorial been tributary to the *Chinese*, who treat it very severely, not permitting it to have any Trade with Strangers, though the Inhabitants go clandestinely with their Goods by the Sea of *Japan*, in to the River *Amur*, and from thence by the *Najunda*, to the City of *Near*, to trade there with the *Moungales*, and indirectly with the *Russians*. They go twice a Year to *Pekin*, viz. in the Months of *March* and *August*, to the Number of forty or fifty Persons, as well to pay the Emperor his Tribute, as to carry on their Trade, which principally consists of the following Particulars:

A Sort of thick large Paper made of raw Silk, which serves in *China* for Window Sashes, instead of Glass; Gold and Silver figured Paper; all Sorts of large Fans, variously fashioned; very fine Mats, which serve in Summer instead of Mat-trasses; smoking Tobacco cut very small, of which vast Quantities are consumed in *China*, where it is better esteemed by the Natives than their own; a striped Cotton Cloth; a Sort of Skins which the *Russians* call Chorky, which are found in great Abundance here, and for which there is a large Demand at *Pekin*; a dried Fish taken from some large Shells caught in the Sea of *Japan*; besides which they carry there large Sums in Silver, and with them purchase the finest raw Silk and Cotton, Damasks, a Sort of Stuff mixed with Silk for Linings, Tea, Porcelain, all Sorts of Kitchen Furniture in white Copper, and Sables' Tails.

#### Trade of the Islands in Asia.

THE trading Isles of which I intend to treat, are the *Maldives*, *Ceylan*, the three Islands of *Soud*, viz. *Sumatra*, *Java*, and *Borneo*, the *Moluccas*, the *Philippines*, the *Ladrones*, and the most famous of all, the Isles of *Japan*.

I might here also take Notice of the Isle of *Amian* on the Coast of *China*, and that of *Fomoso*, where the *Dutch* built the Fort of *Zeland*; but this having returned in 1661 under the Dominion of *China*, and the *Europeans* carrying on no Trade to either, I shall content myself with having only mentioned them; and follow the same Method in treating of those above mentioned, as I observed with the *Asiatick* Continent, that is, to speak of them as they lie in our Way, on advancing into the Oriental Sea, and so to run them over from the *Maldives*, which first present themselves, to the Isles of *Japan*, beyond which the *Europeans* carry on no Trade.

#### Of THE MALDIVES.

THESE Isles, more famous for their Number than Grandeur, lie in the *Indian* Sea, at sixty Leagues from Cape *Comarin*, extending from eight Degrees North to four Degrees South Latitude. Their Number is uncertain, and it daily decreaseth, though they are computed to be at least twelve thousand, Part inhabited, and Part desert, which are divided into thirteen Attolons, that is, thirteen great Parts, by pretty large Channels that separate them, the Islands of each Attolon being so near to one another, that at Low-Water the Communication may be made on Foot, without being wet higher than the Knees. The greatest Trade of these Isles consists in those small white Shells called Cowries, so often mentioned in this Work, and the *Dutch* are the People particularly concerned in it, whether to *India*, where they distribute a Share, or in *Europe*, where they sell them to most other Nations, who trade to *Guinea*, *Juda*, and on the other Coasts between Cape *Verde*, and that of *Good Hope*; besides which the Islanders carry a large Quantity themselves to *Ceylan*, and some other Places on the *Malabar* Coast, from whence a great many are sent to *Surat*, and into the Dominions of the *Grand Mogul*.

The Goods given them in Exchange for their Shells, are coarse Cotton Cloths, Rice, and some other Provisions, that do not grow in their Isles. The Cocoa Tree also furnishes them with some Merchandize that they sell to Strangers; though Dr. *Garcin* has exploded a vulgar Error, hitherto propagated by most Authors, who have described those Trees as Natives of those Isles, accounting them the best of any in *India*, which I thought would not be unacceptable to my Reader, if I give it a Place here; the Doctor acknowledges, that here are Plenty of the com-

mon Sort of Cochoas, though in nothing different from those growing in the neighbouring Countries; but that Species to which the Preference is to be given, and whose Product these Isles are so celebrated for, does not yield the edible Nut, but one only useful in Medicine, being esteemed by the *Indians* very good against Poisons, Cholicks, Fevers, and Affections of the Nerves, for which they come to seek, and purchase it at a very considerable Price.

## O f C E Y L A N.

**T**HIS Island, called also by some *Ceylon*, is seated in the *Indian* Sea, at forty-five Leagues East from Cape *Comorin*. Its Length is about eighty Leagues, being between the sixth and eleventh Degree of Latitude, its Circumference more than two hundred, and it is supposed to be the *Trapobana* of the Ancients.

The *Portuguese* discovered it in 1506 or 1509, but they could only settle on the Coasts, without having ever been able to penetrate into the Country; they enjoyed their Conquest, and the Cinnamon Trade, for more than a Century, when the *Dutch* having begun to make themselves known in these Parts in 1602, soon after seized on *Gale Point*, and successively made themselves Masters of all the other Forts, till they had chased the *Portuguese* entirely from the Isle in 1657, by the Capture of *Colombo*, the finest and strongest of all their Cities, not only in *Ceylan*, but in all *India*. This Conquest was made with the Assistance of the King of *Candi*; and one Clause in the Treaty was, that this Place should be put into his Hands; but the *Dutch* having thought it more for their Interest to keep it themselves, were soon embroiled with their new Ally, and from that Time to this the Concord is nothing better between them, than it was before between the *Cingales*, or *Cingalais*, and the *Portuguese*, the former being prohibited on pain of Death to have any Commerce with the *Dutch*, though this must be understood of the mountain *Cingales*, who belong to the King of *Candi*, and not the maritime Ones, and these are the *Hollanders'* Subjects.

The *French* in 1672 attempted an Establishment in this Island, and the King of *Candi*, who would have been pleased to oppose them to the *Dutch*, as he had before done these against the *Portuguese*, granted them by Treaty the Port of *Cottiar*, seated on the Bottom of *Trinquemale* Bay, in the eastern Part of the Isle; but the Enterprize of *St. Thomas*, in which Admiral *Debayes* lightly engaged the *French* Squadron then under his Command, hindered his supporting this Settlement that he had begun, and the War which was then declared between *France* and the *States General*, having afforded Opportunity and Time to the *Dutch* for displacing the *French*, they remained in their first Possession, that is, sole Masters of the Coasts and Cinnamon Trade, but always ill with the mountain *Cingales*, who continually reproach them with their Infidelity.

The principal Places that the *Dutch* have on this Island's Coast, which they entirely possess, except some to the Westward, are *Colombo*, the Capital of them, and the Governor's Residence, *Negombo*, *Matura*, *Gale*, *Calature*, *Batecab*, and *Trinquemale*, two Ports to the East, besides several Habitations.

They have also the Isle of *Manan*, and the Kingdom, or large Peninsula, of *Jassanapatnam*, both to the North. The Commodities commonly found in *Ceylan*, and which are collected with very little Trouble, are long Pepper, Cotton, Ivory, many medicinal and dying Roots and Drugs, Cardamoms, Silk, Tobacco, Ebony, excellent Wood for building, Lead, Betel, Areque, the best in *India*, Wild Honey, Musk, Wax, Crystal, Saltpetre, Brimstone, Sugar, Curcuma, a Root for Medicine and Dying, Rice, of which the *Dutch* carry large Parcels to the Coast of *Coremandel*, Iron, Steel, Copper, Gold, Silver, and all Sorts of precious Stones, except the Diamond, Cinnamon, and Elephants.

Though all these Commodities abound in the Uplands, subject to the King of *Candi*, the *Dutch* have them not in such Plenty, and but few of them, except the Cinnamon, when the *Cingalais* do not dare to venture on a Breach of the Prohibition for their trading with the *Hollanders*; it is therefore principally with this Aromatick that the *Dutch* support their Traffick here, and it is not the whole Isle that produces it equally, here being many Places where but little grows, and more

where

where there is none at all. That called the Cinnamon Field or Ground, and which belongs entirely to the *Dutch*, is from *Negambo* to *Gallettis*, a Village three Leagues to the East of *Fort Mature*, which comprehends a Part of the Western and Southern Coasts of the Isle. The best Cinnamon is that in the Neighbourhood of *Columbo* and *Negambo*; that of *Gale Point* is also very good, and the Rest but middling; it is distinguished into three Sorts, *viz.* the fine, middling, and coarse, of which the young Trees produce the fine, and of a worse Quality in Proportion to their Age, though the Bark must at least be two or three Years old. This Tree multiplies greatly, and almost without Culture, but the *Dutch* hinder their Increase, to make this precious Bark more scarce and valuable.

The Cinnamon Tree comes very near in Characters to the Laurel, that is, in Flower and Fruit, and the Natives suppose there to be nine different Sorts; some distinguished by their Smell and Taste, and others by their component Parts, among which is one that smells strong of Camphire, and another with a thorny Trunk and Branches. The Season for harking and getting in the Crop, is *June*, *July*, and *August*, and it lasts three Weeks or a Month, according to the Quality, gathered; between three or four thousand People are employed in it, all of them enrolled, and disciplined with as much Exactness as regular Troops, that they may perform their different Functions unconfused.

Next to the Advantage arising from this Commodity, the *Dutch* reap the greatest from *Areque* and *Elephants*, which the Natives cultivate and hunt for them, by transporting them to several Parts of *India*, where the first sell in Preference to any other, and the latter will fetch from fifty to eighty Pounds Sterling each.

#### Of SUNDA or SONDE Islands.

THESE are a great Body of Isles, lying in the *Indian Sea*, to the Westward of the *Molucques*, from the eighth Degree of North to the same of South Latitude, and between the hundred and thirty-eighth and hundred and fifty-eighth Degree of Longitude, of which the three principal ones are, *Java*, *Sumatra*, and *Borneo*, as well for their Extent as Commerce, of which I shall treat in the Order I have here placed them.

#### Of JAVA.

JAVA, seated to the South of *Sumatra*, reaches from the Straits of *Sunda* to those of *Baleboang*, which is about two hundred and twenty four Leagues; and its Breadth being unequal, the Circuit may be near four hundred and eighty. The *Dutch* are at present the only *Europeans* established on it; having first iniquitously possessed themselves of the *English* Settlements at *Jacatra*, and afterwards that of *Bantam*, they have since hindered any others from coming here.

The *Javans*, jealous of their Liberty and Trade, did for a long Time refuse all *Europeans* Leave to settle in their Country, till the *English* towards the End of the sixteenth Century, landed, and were, by the Emperor of *Java*, permitted to build a small Fort at *Jacatra*, with Warehouses, and a Lodge for their Factors and Goods; and the King of *Bantam* also gave them Leave to establish a Factory in his Capital, in Order to share a foreign Trade with his Neighbours.

It was in 1617 that the *Dutch*, who till then had not had any fixed Trade at *Java*, came to establish there, but, according to their Practice in the *Indies*, at the Expence of others, having, in Sermon Time, surprized the *English* Fort at *Jacatra*, and plundered their Lodge and Goods, they afterwards built there the City of *Batavia*.

The *English*, well settled as they thought at *Bantam*, which was the Residence of the second President of their Company, continued to carry on as considerable a Trade as the *Dutch*; but were dispossessed of this Place also by their envious Neighbours, under a false Pretext and feigned Authority of the King, a Detail of which is too long to be inserted here.

*Bantam*  
It is bu  
the fam  
1617,

Before the *Hollanders* became Masters of *Bantam*, the *Javans*, who were naturally born for Trade, carried on a very considerable one themselves, not only in several Ports of their Islands, but to the most remote Places of *India*; and though this Business is greatly diminished, through the successful Endeavours of the *Dutch* entirely to destroy it, yet a Part of it still subsists, by Means of the many Havens and Ports in the Isle, where the Company have no Establishments.

The Places of their chief Trade, besides that of the Ports in the great and little *Java*, are *Sumatra*, *Siam*, *Malacca*, *Borneo*, *Celebes*, *Bouton*, the *Moluccas*, *Banda*, *Solor*, and *Timor*; though in Regard of the *Moluccas*, and the other Isles dependent on them, they must have Leave and take Passports for going there from the *Dutch*, who are absolute Masters of them, and which are always difficultly obtained, and at a considerable Expence; they also trade by Sea to *Batavia*, and it is here they direct their principal Traffick to, as it is the Resort of many Nations from all Parts of *Asia*.

What they deal most in is Rice, which they go to purchase, and then transport it elsewhere; they however engage in the Disposal of all Commodities growing on their Isle, such as Pepper, Cocoa Nuts, Oil, Sugar, Cardamoms, Opium, Indigo, Birds' Nests, Horfes, Arcque, many medicinal Drugs, Benzoin, from *Borneo*, Ginger, Copper, Gold, &c. in Exchange of which they bring back several Sorts of rich Silk Stuffs from *Coromandel*, *Bengal*, and more especially the Patoles of *Sarat*, Cotton Cloth, Counterpanes, Matts, Fotas, a Sort of Women's Dress, Lacque, transparent Resin, Tortoiseshell, Pewter, Lead, Porcelaines, Tea, Sandal-Wood, Ivory, *European* Cloves, Cinnamon, Nutmegs, and Cloves, which Spice they are obliged to buy of the *Dutch*, except they can clandestinely procure some of the two last Sorts from the *Moluccas* and *Banda*, to which they are very near Neighbours.

The principal trading Cities of the Isle are *Balampoang*, *Panarocoon*, *Jourton*, and *Cidaion*, of which the *Dutch* have almost ruined the Trade, to draw it to *Japara*, where they are Masters, which lies ninety-four Leagues from *Bantam*, from whence they get the greatest Part of their carpentry Wood, Cattle, Rice, and Fruit, to supply the Inhabitants of *Batavia*, *Ambaina*, *Ternate*, and *Banda*, and to whose Port the *Javans*, *Macassarais*, and several other Nations, even from the most remote Parts of *Asia*, send their Ships; *Cberidon* on the same Coast, is sixty-seven Leagues from *Bantam*, where the Company have a Fort, as well as at *Japara*. There is yet, on the Coast of this great Isle, *Togal*, *Samwang*, *Ranbam*, where the Company build their Sloops, and other Vessels, and *Sourabaya*, to all which the *Dutch* have Fort, in Fine, *Bantam* and *Batavia*, which are the only two of whose Trade I shall speak, as the *Dutch* have in a Manner here united that of the whole Isle.

*Bantam* is the Capital of one of the two Kingdoms, whose Kings divide the Empire of the Isle of *Java*; he of *Bantam* extends his Dominions even into the Isle of *Sumatra*, on the other Side of the Straits, where he possesses *Sillebar*, *Dampin*, and *Lampon*. *Bantam* was, before the *Europeans* had penetrated into the East, one of the most trading Cities of *India*; the *Arabians*, *Turks*, *Moors*, *Chinese*, and almost all the Nations of *India* sending their Ships here.

I have already said, that the *English* were the first *Europeans* who here obtained a Settlement, where their Commerce flourished for a long Time; and I could greatly enlarge, and give a black Detail of their Dilligence, but I dare not trespass so much on my Reader's Patience; let it therefore suffice to repeat, that the *Dutch* have remained Masters here ever since they unjustly deprived our Countrymen of it.

There is no Place in the Isle of *Java* where Refreshments cost less than here; the Natives, who, on the Ships' Arrival bring them in Plenty, are contented with Pins, Needles, small Knives, &c. in Payment.

*Batavia* is seated also in the Isle of *Java*, to the Eastward of the Kingdom of *Bantam*, and twenty Leagues from the City of that Name, which is the Capital: It is built on the River *Jacutra*, and nearly on the Ruins of the ancient Town of the same Denomination, that the *Dutch* took from the *English* by Surprise in 1617, as before-mentioned, and which they had often defended against all the

Forces of the Emperor of *Maratan*, the most powerful Monarch of the Isle. In 1619 it took the Name of *Batavia*, though it was not finished and put in its present Condition till 1660.

This new City, which yields in nothing to the finest in *Holland*, either for the Length of its Streets, Magnificence of its Buildings, Convenience of its Canals, and Beauty of the ever-green Trees planted on each Side, is defended by a Citadel with four Bastions, founded on Piles, in which the Company always maintain a Garrison of a thousand regular Troops; besides which Fortification there are divers advanced Posts within Land, sustained by Redoubts, or small Forts, to cover the Soldiers from the Excursions and Surprizes of the *Javans*.

The City is peopled with divers Nations, of which the *Dutch* make near half, and among them are some *Portuguese*, though almost all of them Protestants, who have two Churches here, where the Ministers officiate in their own Language; the *Malayans* have also one, and the other Inhabitants are permitted the free Exercise of their Religion: The Suburbs reach near half a League into the Country, and form a larger Town than *Batavia* itself, peopled with *Chinese*, *Moors*, *Javans*, and *Malayans*, and also many *Dutch* Artisans; the first are the principal Husbandmen, who sow Rice in the Grounds they cultivate round the City, and have brought it to such Perfection as not to need any foreign Supplies: Sugar is also gathered here in Plenty, and there are many Mills on the River *Jacatra*, for bruising the Canes, and several others for making Paper, Gunpowder, and grinding Corn; but all these Advantages, though capable of making any City flourish, are nothing in Comparison with those that the Company's immense Trade brings here, where all Sorts of *European* and *Asian* Commodities are amassed, and their Warehouses well filled, either for lading their Ships bound Home, or those destined for the Trade of *China*, *Japan*, all *India*, *Perja*, *Arabia*, and the *Red Sea*; *Batavia* being the Centre where all the Company's Effects enter and go out, by a perpetual Circulation, and always with an inconceivable Advantage, though considerably diminished by the indirect Gains of so many principal Directors, and their Subalterns, through whose Hands all the Affairs pass, and who, in Places so distant, are apt to forget their Conditions, and think themselves Masters of those Effects, of which they are only Depositories.

The Council of *Batavia* has eight Governments subject to it, viz. that of *Ceylan* and *Coromandel*, in the occidental Peninsula of the *Ganges*; that of *Malacca*, at the Extremity of the oriental Peninsula; four on the *Molucca* Isles, which are *Macassar*, *Ambona*, *Ternate*, and *Banda*; the eighth is that of the Cape of *Good-Hope*. After these Governments there are three Directions, each filled by a Chief with the Title of Director, the one in *Perja*, the other at *Surat*, and the last at *Bengal*; the Director of the first resides at *Gammeron*, and has the Lodges at *Isjoban* and *Kerman* in his Dependance; that of *Surat*, where the Director resides, has under it the Lodges of *Amadabat*, *Farocbia*, or *Brockia*; and that of *Bengal*, which is very extensive, has its principal Settlement at *Ougli*, where the Director resides, and has under his Direction that of *Cazembazar*, *Bellajor*, *Decca*, *Paina*, and *Chispera*; *Pepeli* belonged to it formerly, but the Company have abandoned it for a long Time. Four well fortified Places serve to guard the Country, where are many Establishments, the chief of which bear the Title of Commanderies; of these there are two in *Ceylan*, viz. *Point Gale*, and *Jassanapatnam*; the other two are *Cackin* on the *Maabar* Coast, and *Samarang* on the Coast of *Java*.

The other Factories or Lodges are those on the Coast of *Coromandel*, under the Governor of *Nagapatnam*; those of *Java* specified in this Section, under the Commander of *Samarang*; those of *Sumatra*, which are *Palimbang*, *Jumbi*, and *Padang*, are independent of all others but the Government of *Batavia*; in *Siam*, those of *Siam* and *Japan*, which are *Judia* and *Ligor* for the first, and *Mungejaky* for the second; and three Lodges subject solely to the upper Regency, although their Chiefs have only the Rank of Merchant. They had formerly a Settlement at *Torquin*, but they abandoned it in 1700; so that from the preceding Account may be gathered, that of Factories subject to Governors, Directors, and Commanders, which are the most considerable ones, there are fifteen, and of the other Subaltern Settlements, small and great, from fifty-three to fifty-five.

This Island is the most fertile and populous of any in the World; here grow an inexpressible Quantity of Rice, and Cocoa Nut Trees, which are the principal Food of the Natives. All Sorts of *Indian* Fruits are found here in Plenty; the Fountains and Rivers are numerous, and so equally and commodiously distributed, that nothing better or more convenient could possibly be desired, which so fertilize the Lands, as to procure Abundance, and this the congregating of such a Number of Inhabitants, who are naturally addicted to Trade, which the many navigable Rivers here greatly contribute to their carrying on. Wild and tame Fowl abound in an extraordinary Manner, a Hen being worth no more than a Penny Sterling. Here are Stags and wild Boars in Plenty, Rhinoceros and Tigers are frequent in the Woods, which are very thick on the Mountains that garnish the Island, and these both small and great are generally cultivated. The innermost northern Coast is the best, and the most populous, on Account of its great Fertility, being also rendered the most frequented by its convenient Situation for Trade and Navigation, which is very different from the southern Coast that is the exterior Part, in Respect of the Isles of *Sunda*, and the great Sea; the Shores of this Coast are steep, full of Shoals, and Rocks, which render them difficult of Access, and but thinly inhabited. The principal trading Places along the other Coast are first,

*Bantam*, already described, after passing the Straits of *Sunda*, which are twenty-eight Leagues long, and from them to *Bantam* are five Leagues more.

*Batavia*, likewise treated of, is twenty Leagues to the Eastward of *Bantam*: And

*Ceribon*, where the *Dutch* have a well fortified Factory, is a City distant from *Batavia* forty-eight Leagues by Sea, and composed of near eight thousand Families, in as many Houses, some of Stone, others of Wood, but the greatest Part of Bamboes. This Place produces a good deal of Rice, Timber, Indigo, edible Bird's Nests, &c.

*Tagal* is another City where the Company have a Fort and Lodge, twelve Leagues to the East of the last mentioned, than which it is a little bigger, and its Buildings much the same.

*Samarang*, twenty-two Leagues from *Tagal*, and about sixty-eight from *Batavia*, is a City surrounded by a Plain, and crossed by a River that receives Barks and small Vessels between its Mouth and the City; it is the biggest on the Coast after *Bantam*, and supposed to contain more than twenty thousand Houses; the Company have a Factory and Fort here, which commands all the others that are on the Coast, the Chief bearing the Title of Commander, and is the fourth that it has in *India*. The *Chingse*, who have spread themselves on all this Coast, as well as in the other Isles, are very numerous in this Place, by whose Means the Company corresponds with the *Javan* Court kept at *Cartasura*, a good Way within Land, as the Emperor has for many Years quitted *Mataram* where he formerly resided; it is reckoned four Days' Journey from *Samarang* to *Cartasura*, and *Mataram* is another Day's Travel farther to the South.

*Torrahaya* is a City on the River, a good League's Distance from the last treated of, with near six thousand Houses or Families; and at nine Leagues farther on the Coast is,

*Jopara*, a large City washed by the Sea, that may contain about ten thousand Families, where the *Dutch* have a Fort built on a River: And twelve Leagues from hence stands the City of

*Javana*, situated near the Sea, being full of People and Trade, with near ten thousand Houses.

*Rambang*, or *Ramban*, is four Leagues to the East, and may contain about six thousand Houses; I have before mentioned that the Company have a Yard here for building Shallops and other small Vessels; and here is a great Trade carried on in Rice, &c.

*Touban*, lies thirteen Leagues farther, and is a City with about five thousand Families, who also furnish Trade with Plenty of Rice, and Ship Timber.

*Chaiou*, three Leagues from *Touban*, is a fine old City, with above six thousand Houses, having formerly had a King of its own, and trades greatly in Rice, which grows here in Abundance.

*Sourabaya*

*Sourabaya* is a large City twenty Leagues from *Cadainou*, seated in the Straits of *Madura*, and upon a River, a large League from the Sea. It has more than ten thousand Houses, of which a great Part are built with Stone, as the *Chinese*, who are very numerous here, always build with this Material. Its Commerce in Rice is very great, so that it can supply Trade with between two and three thousand Tons, and some Years double that Quantity; the *Dutch* have a fine Port here with a Captain's Command.

*Passaroacan* is a City fortified by the *Javanese*, with above ten thousand Houses. It is thirteen Leagues from the last mentioned Place, near a River, one League from the Sea, the *Dutch* having a small Fort, at some Distance from it. The Trade in Commodities of the Country's Growth consists in Carthame, or Bastard Saffron, Cattle, Fowls, Rice, and Birds' Nests, all in Abundance.

*Panaroucan* was once the Capital of a small Kingdom, and is seated on a fine River, containing about five thousand Families, with the same Trade as the two preceding.

*Balamboang*, is the last City situated at the Easternmost Part of *Java*, on a Strait formed by the Isle of *Bali*, having about ten thousand Houses built almost all with Bambo, and abounds with Rice like the other Cities.

The Fertility of this Island is inconceivably great, not having its Equal in the World; all Things are brought to Perfection here with Ease, and but little Trouble; the Days and Nights are always equal, and the Heat, which is temperate, remains continually the same, so that *Fahrenheit's* Thermometer never varies above four or five Degrees; the Earth is better, not so marshy, and less mountainous, than in its neighbouring Islands; so that the *Chinese* are very fond of settling here, and some come for this Purpose almost every Year; they likewise render it more valuable by their Husbandry and Trade, which the *Javanese* neglect, as they are more propense to Deceit and Cozenage than Labour. This Richness of Soil makes it so populous, that one may see the Roads swarm with People in a surprizing Manner; the Rivers also, which are numerous, have their Borders thick set with Villages; and besides the Cities now described along the Shore, there are many within Land full as large and populous. It is reckoned that *Cartajoura*, where the Emperor's Court is, has upwards of thirty thousand Houses, and that *Mataram*, which is the largest City of the Isle, has sixty thousand at least; in Fine, according to what the *Dutch*, who inhabit the principal Places on the Coast, have been able to discover, there are in this Isle forty large Cities and forty-five hundred known Villages, besides others yet undiscovered by them; and by certain Memoirs it has been found, that these same Places some Years ago contained no less a Number of Inhabitants than near thirty-two Millions, including all Ages and Sexes; by which Calculation it may be seen, that this Island is three Times more populous than *France*, if the Difference of Territories be considered; as the Isle of *Java* is not altogether equal in Bigness to the Moiety of that Kingdom, which yet does not contain above twenty Millions of Souls\*.

#### Of SUMATRA.

THIS Island is about one hundred and ninety Leagues long, by sixty broad, and situated in six Degrees of Southern Latitude, ten Leagues from the Peninsula of *Malacca*, and four or five from *Java*, the Separation between the two Islands being made by the Straits of *Sunda*.

Its principal Commerce consists of Gold, Silver, Pewter, Copper, Iron, Diamonds and other precious Stones, Pepper, Wax, Honey, Camphire, Cassia, Sanders, Tortoise-shell, Brimstone, Rice, Sugar, Ginger, Benzoin, Ambergris, Jet, Dragon's Blood, and Rattans.

The Gold is found all over the Isle, but more especially between *Tiou* and *Maningcabo*, where the Inhabitants gather it in Lumps at the Foot of the Mountains after great Rains, or in the River Sands, where they get the greatest Quantity, which the Collectors, who are Demi-Savages, give in Exchange for di-

vers Commodities with their Neighbours, as they have no Trade with Strangers; those of *Maningabo* give in Truck Arms, Iron Tools, and Cotton Cloth; and those of *Priawan*, Pepper, Steel, Salt, *Surat* Coverlids, &c.

Almost all the Island, except the middle Part, produces Pepper, but the Places where most is gathered are *Andaogert*, *Jambi*, *Palimbang*, and above all, *Indra-Poura*; though *Ticou*, *Sillebar*, *Maningabo*, and *Barros* yield some, but of an inferior Quality; yet a large Quantity of both Sorts are annually shipped, as well for *Europe* as *India*. The Brimstone is found at *Pedir*, where there is a Mountain of it; and near to this City it is that Resin, called *Sumatra Balm*, is collected. The Diamonds and precious Stones come from abroad, particularly from *Borneo*. The other Drugs and Commodities grow and are cultivated in the Isle, especially in the inland Parts, Benzoin being the Product of *Barros*.

Besides these Places before-mentioned, some Trade is carried on at *Achem*, *Pacem*, *Delit*, *Arou*, and *Campara*.

*Achem*, situated in the Northernmost Part of *Sumatra*, is the Capital of a large Kingdom, and almost of all the Isle; being the most healthful Place, as the others have generally a bad Air, from the Waters and Lowness of the Lands; it is here that Foreigners transact the greatest Business, and the Road is seldom without some *English*, *Dutch*, *Portuguese*, *Danish*, *Chinese*, *Guzarates*, *Arabian*, *Persian*, *Abyssin*, and other Ships, from many Places of *India* and *China*.

The Goods they bring here are Gold and Silken Stuffs, Muslins, Painted Linens, Cotton, unspun Silk, Fish, Butter, Oil, Arms, and Warlike Stores, Silver, and more especially Rice, which the *English*, *Dutch*, *Danes*, and *Chinese* bring in large Quantities, as this Part of the Isle is entirely destitute of it, white, red, and blue Salampours, Percasies, Spices, and Opium, brought from *Bengal*.

The *Dutch* have four or five Forts and Factories in the Dominions of the King of *Achem*, and those of some other petty Princes; among which are *Padang* on the Western Coast; and *Palimbang* and *Jambi*, on the Eastern, a little within Land, which in a Manner renders them Masters of the Pepper and Gold Trade.

*Jambi*, which is one of the best *Dutch* Settlements, is upon a River of the same Name, twenty-five Leagues from the Sea, from whence may be extracted above two thousand Tons of Pepper yearly, that comes from the Mountains; Cotton Cloths and Handkerchiefs are proper for this Trade, as are also Dollars, &c.

*Sillabar*, a City on the West Coast, about thirty Leagues from the Straits, belongs, as before observed, to the King of *Bantam*, and is famous for its Manufacture of *Cris*, or Poniards worn by the *Javans* and the major Part of the *Indians*, being in great Esteem, and a large Trade carried on in them.

## O f B O R N E O.

THIS Island being nearly Circular, and near two hundred Leagues Diameter, it must consequently have a Circumference of about six hundred. It has the Isle of *Celebes* to the East, *Java* to the South, *Sumatra* to the West, and the *Philippines* to the North. Only a Part of the Coasts, especially those of the Kingdom of *Borneo*, are known, the Barbarity and Infidelity of the Islanders having disgusted the *Europeans* so as to hinder their establishing among them, or indeed to continue their Trade.

The *Dutch* first arrived there in 1609, and settled some Factories at *Borneo*, *Sambas*, and *Succadana*; but besides their not being able to obtain an Exclusion of all other Nations from trading here, as they for a long Time solicited, they so often proved the Ferocity of these Savages, who daily sought fresh Pretexes to plunder their Warehouses, and kill their Factors, that they at last forced them to abandon the Isle, and leave its Merchants to bring their Goods to *Batavia*, if they had a mind to maintain their Commerce; which principally consists of Diamonds, Gold, Pearls, Bezoar, Aloes, Wood of different Sorts, Wax, Pepper, Camphire, Benzoin, Dragon's Blood, and Rattans. The Gold is found at *Pebang*, *Sey*, *Calantan*, *Scribas*, *Catra*, and *Melanougua*, and is more abundant than is commonly imagined; but the Sloth and Knavery of the Inhabitants make them live

in extreme Poverty, amidst immense Riches, which their valuable Mines, and fertile Soil, would abundantly produce them, at the Expence of very little Labour; as their Lands would yield any of the *Indian* Fruits, and Spice in particular would flourish here to a Miracle, as Experience demonstrates in its present Growth of Clove and Nutmeg Trees, found here with every requisite Quality.

*Sambas* and *Succadana* are the Places for the Purchase of Diamonds, of which the Mine is farther within Land, and may produce about six hundred Carats yearly; here is also some of Iron, Copper, and Pewter, and whatever else *Sumatra* yields may be found here; whose Imports also are similar to those of that Island.

#### CRIMATI, or CRIMATIA

**I**S a small Island in the *Indian* Sea, about four or five Leagues distant from *Borneo*, where is a Diamond Mine, and some Pearls are found on its Coasts, both which Commodities the Inhabitants carry to sell at *Malacca*; and they are so jealous of these Jewels, as to deny any Foreigner Admittance among them.

#### Of the MOLUCCA, or MOLUCQUE ISLANDS.

**T**HESE Isles are Part of the *Oriental Archipelago*, and indeed compose a particular one themselves of more than an hundred and thirty Islands. They are divided into the great and small *Moluccas*, and these last again parted into those properly so called, and them of *Banda*. Some Authors placing also the Isle of *Ambonya* among them.

All these Islands, of which I shall speak according to this Division, were discovered by the *Portuguese* in 1511, and their Possession for some Time disputed by the *Spaniards*, in Virtue of the famous Division made by the Court of *Rome*, then the acknowledged Arbitrator in the Partition of the *East and West Indies*; however, by the Treaty of 1420 between those two Nations, the *Moluccas* were ceded to the former, who occupied them till 1601, when the *Dutch* newly arrived in *India* began to molest them in their Possession, and finally chased them out of all these Islands, commonly called the Spice Islands, on Account of the Growth of Nutmegs, Mace, and Cloves in many of them, and as Mr. *Savary* says, not in any other Part of the World, though Dr. Green informs us of their being produced in *Borneo*, as just now mentioned.

#### Of the Great MOLUCCA ISLES.

**T**HESE are among others *Celebes*, *Gilolo*, *Ceram*, and *Bouton*, to which *Timor* and *Arou* ought to be added. The first is the most considerable of all, being two hundred Leagues long, by an hundred broad, which must be understood, not of one sole Isle, but of a Cluster so near to one another, that they seem to compose but one only. It encloses many Kingdoms, of which that of *Macassar* occupies the greatest Part of the Southern Coast, &c. This Kingdom is also the most fertile of any, and almost the only one where the *Europeans* have any Trade.

The Capital, celebrated for its Grandeur, Number of Inhabitants, and the Beauty of its Buildings in the *European* Taste, is situated in the Southern Part of the Isle, at five Degrees six Minutes from the Line, where the *Portuguese* formerly carried on, almost alone, one of the greatest Trades in *India*. The *Dutch* succeeded them, and by Consent of the *Macassar* King, who seemed tired of the Servitude in which the former held him, built here *Panakoke* and *Samboupo* Forts to secure their Trade, and, as they would make the *Macassars* believe, the Liberty of their Country. But these new Guests not being more tractable in Point of commercial Concerns than their Predecessors, but endeavouring to become Masters of *Macassar*, to the Exclusion of all other Nations, the *Portuguese* regained their Credit, and the *Dutch*, being near driven out, prevented the Designs of their Enemies, which they had foreseen, by appearing before *Macassar* in 1660, with a Fleet of thirty-three Sail, and after having been equally victorious at Sea, where they took, burnt, or sunk six large *Portuguese* Ships, richly laden, and on Shore, where in

a Descent they forced Sword in Hand two Forts within Gunshot of the City, they so intimidated the King and his People, altho' the bravest in *India*, that they obliged him by a Treaty concluded at *Batavia* the same Year, never to admit the *Portuguese* again into any Part of the Kingdom, and to leave the *Hollenders* in Possession of their Forts and Trade: It was not, however, till 1669, that they could entirely subdue their restless and savage Nation, who, notwithstanding the Treaty in 1660, and another in 1667, continually interrupted their Spice Trade, by sending small Vessels to traffick with the Inhabitants of *Banda* and the *Moluccas*, in Cloves and Nutmegs, which they afterwards sold to the *Englische*, and maintained as the *Dutch* gave out, a Correspondence with their Enemies, to take from them *Ambayna*, one of their eight great Governments in *India*. And notwithstanding so considerable an Expence was made, and so much Blood spilt, they have not been able to establish an exclusive Trade at *Macassar*, the Port and City having remained open to all the Nations of *India* and *Europe*, excepting the *Portuguese*, who notwithstanding may now come and Trade like the others, since their Imbecility in the *Indies* no longer affords the *Dutch* any Jealousy.

The principal Commodities exported from hence are Rice in a vast Quantity, and the best in *India*; Gold, Ivory, a great deal of Brazil Wood, and some Sanders, Cotton, Camphire, various Sorts of Hard-Ware, Arms proper for the *Indies*, Ginger, long Pepper, and Pearls fished here. The Imports consist of Scarlet Cloth, Gold and Silver Stuffs, *Cambaye* Cloth, Pewter, Copper, Iron, Soap, and *Affa-fetida*, which two last come from *Surat*.

*Gilolo* has the second Rank among the great Isles of the *Moluccan Archipelago*. Some make it two hundred Leagues, and others but an hundred and fifty Leagues in Circuit. The best Merchandize extracted from hence is Sagou, or Sago, for making Bread, without which the Inhabitants of the *Lesser Moluccas* and *Randa*, could not subsist in the Want of Rice, with which they can only be supplied from *Macassar*, &c. It is made of the Pith of a Tree like a Cocoa-Tree, and is now in great Esteem in *Europe*, as a flourishing Food for weak and valetudinarian Constitutions.

*Ceram* is not less than *Gilolo*, a Part of whose Coast has for a long Time appertained to the King of *Ternate*, and was the Occasion of a tedious War between him and the *Dutch*, on Account of the Cloves cultivated here; since the Peace made between them in 1638, this Place has shared the Fate of *Ternate* and the other Isles belonging to it. The Clove Trees have been rooted up, and the *Dutch* have built Redoubts and Forts in many Places, to impede all foreign Trade where they now have made themselves Masters. Of which more hereafter, in treating of *Ternate*.

*Bouton* is the last of the four *Great Molucca* Isles, and may have about eighty Leagues Circumference. This produces no Rice, but carries on a great Trade in Slaves, and has a small Quantity of Ambergris of a middling Quality. Its best Business is that of Tamettes, a Sort of Linen made here, proper for the *Moluccas*, where the *Dutch* carry a large Quantity yearly.

#### Of the Little MOLUCCA ISLES.

THE Islands properly called the *Moluccas* are only five, viz. *Ternate*, *Tidor*, *Machian*, or *Makiam*, *Moter*, and *Bachian*, which compose one of the seven great *Dutch* Governments in *Asia*. The Land of these Isles lies very high, each being an entire Mountain, which begins from the Coasts, and have their Summits run to a great Elevation. They are all very small; *Ternate*, which is the Principal, not having above seven Leagues, *Machian* near six, *Moter* only four, and *Bachian* twenty in Circuit; but this last is half Desert, and very full of Sago Trees. All these Isles are near the Line, *Machian* is directly under it, and *Moter* more to the North. The King of *Ternate* reigned formerly, not only over these five Isles, but over the greatest Part of the *Moluccan Archipelago*, and his subjects were then obliged to bring their Spice to his Capital; and it was there that the foreign Merchants, whether *Javans*, *Malayans*, *Chinese*, and the *Portuguese*, at first, came to buy it; but a little after these latter were arrived

in

in *India*, this great Power of the *Ternatois* began to shake, and the Inhabitants of *Macassar*, *Tidor*, and many other Isles having revolted and confederated, went to attack their King.

The *Portuguese*, always attentive to what might enlarge their Empire, and extend their Conquests in the *Indies*, soon mixed in the Quarrel, and improved so favourable a Conjunction to their own Advantage, obtaining thereby an Establishment in *Te. vate*, even with the King's Consent; and afterwards by Right of Conquest in *Tidor*, *Machian*, *Ambayna*, *Banda*, *Timor*, and *Solor*; where they built Forts, which made them Masters of the Spiceries. In 1605, the *Dutch* appeared at *Ternate*, and the *Portuguese Ternatois* received them, and permitted their Building the Fort of *Tolucco*, one of the first they had in *India*.

This Change of Masters having in nothing sweetened the *Ternatois'* Servitude, who to the *Portuguese* Yoke had now added that of the *Dutch*, they endeavoured several Times to shake off this last, but always unsuccessfully; and were obliged to make various Treaties in 1609, 1612, and 1613, which finished the Loss of the little Liberty they had remaining, and entirely excluded all Foreigners from the *Moluccas*, securing to the *Dutch* only all the Trade of the Cloves, which grew in those Isles. This Treaty, which confirmed all preceding ones and restored to the King of *Ternate* all the Places that the *Dutch* had seized in the last War of 1638, agreed, that all the King's Subjects should quit *Ambayna*; and that this Prince should for ever renounce his Right to that Isle in Favour of the *Dutch*, with many other Articles to rivet their Slavery, and exclude all Strangers. It ought, however, to be remarked here, that this Peace was in some Sort bought by the *Dutch*, for although victorious, and Masters of one Part of the King's Territories, who, with his Grandees, and brave Troops, had retired into inaccessible Places, they chose rather to submit paying them a Kind of an annual Tribute, than to risk the Clove Trade, of which they were, and are yet so jealous; as they also did in Favour of the *Onimas* and *Oroucais*, to whom they likewise yearly pay a Sort of Pension to recompence their rooting up all the Clove Trees in their Lands, and not to permit their Vassals planting any for the future; and, since the Treaty of 1638, the *Dutch* have absolutely remained in Possession of the five small *Molucca* Isles, but by various Disputes which have happened since, the Company has been obliged several Times to augment the different Pensions they paid, for the Destruction of the Clove Trees in all the Isles, as they found they had sufficient in those which grew in *Ambayna*. These Augmentations were made in 1652, 1682, and lastly in 1713, when it was finally agreed that they should pay, yearly,

To the King of <i>Ternate</i>	6600 Rix-Dollars.
To the King of <i>Tidor</i>	2400
To the King of <i>Bachian</i>	700
To the King of <i>Moter</i>	150
To the King of <i>Machian</i>	2000
To the Grandees of <i>Ternate</i>	600

In all 12450 Rix-Dollars.

None of these Isles are fruitful except in Cloves, and consequently furnish nothing else to Trade: That of *Ternate* yielded formerly in a common Year between four and five hundred Bahares, of five hundred and fifty *Dutch* Pounds each, of Cloves, and near one thousand in the grand Crop, which happened every seven, or, as others say, every four Years; *Tidor* three hundred Bahares, and twelve to thirteen hundred in the good Season; *Moter* only an hundred; *Machian* three hundred; *Bachian* little more than *Moter*; but these three augmented proportionably in the good Year; *Moter* and *Bachian* yielding near four hundred, and *Machian* fifteen or sixteen hundred; but no Cloves grow there since the aforesaid Treaties. From *Ternate* a small Quantity of Tortoiseshell is exported, and a large Trade carried on there of coarse Linen, and some others with Handkerchiefs, called

Of the ISLES of BANDA.

THESE Islands, the only Places in the World where the Nutmegs and Mace grow, according to Mr. *Savary*, though denied by Dr. *Garcin*, as hinted at in the Introduction to the *Moluccas*, make a Part of the so often mentioned *Archipelago*, and are in the Number of those called the *Little Moluccas*. They are six, every one with its own Name under the general one of *Banda*, viz. *Lontbor*, *Neira*, *Gounong-Api*, *Poulo-Ay*, *Poulo-Rbon*, and *Roufinguein*, as Dr. *Garcin* writes them; though Mr. *Echard*, in his *Gazetteer*, calls them *Lanton*, *Nera*, *Genapi*, *Pulloyay*, *Palerni*, and *Bassingen*.

*Lontbor* is the largest, highest, and fullest of Nutmeg Trees; it was once called *Bandan*, by the Natives of the Country, and it is from thence that these Isles are denominated *Banda*. But after that the *Dutch* had a Factory here called *Lontbor*, which was that of a City destroyed in the ancient Wars, this Isle was called so likewise.

*Neira* is two-thirds less, and is where the Governor of the Islands resides; it is furnished with two Forts, the one called *Nassau*, and the other *Belgick*. This on a little Mountain towards the Middle of the Island, the other on the Straits, a Musket-Shot in Length, and over against the Isle of *Lontbor*.

*Gounong-Api* is about the Size of the preceding one, and not above a Stone's throw distant from it to the West; it has a large Mountain in the Middle, which occupies almost the whole Isle, and is a Volcano that burns continually ever since the End of the sixteenth Century, and gives Name to the Island, as *Gounong* in *Malayan* signifies Mountain, and *Api*, Fire.

*Poulo-Ay*, is a small Isle to the West of the three preceding ones, of which the Land is pretty plain, and very good. The Company have a Fort here called *Ravenche*, and this is as fertile in Nutmegs as *Lontbor*, if not more.

*Poulo-Rbon* and *Roufinguein*, the other two Isles, are the smallest of all, very barren, and but thinly inhabited, each having a little Redoubt guarded by some inferior Officers.

*Banda*, which is the sixth of the eight great Governments that the *Hollanders* have in *India*, lies in four Degrees and a half of South Latitude, four hundred and fifty Leagues from *Batavia*. This was one of their first Establishments in *India*, and Fort *Nassau* in the Isle of *Neira*, before mentioned, was the first they built.

Among the six Isles of *Banda*, there are but three where the Nutmegs are cultivated, viz. *Lontbor*, *Neira*, and *Poulo-Ay*, the others being too mountainous and barren; the first is the largest, and furnishes the greatest Quantity of Fruits, it having twenty-five Nutmeg Orchards, which in the best Year produce all together about 570,000 Pounds of Nutmegs, and 140,000 Pounds of Mace, growing on a Superficies of 140,000 Yards of Land. The Isle of *Neira* yields in a good Year 8000 Pounds of Nutmegs, and 2000 Pounds of Mace, from a Spot of 10,800 Yards: The Isle of *Poulo-Ay*, although very small, is in Proportion the most fertile of all, having six Orchards containing a Surface of 28,760 Yards, which produce in a favourable Season 120,000 Pounds of Nutmegs, and 30,000 Pounds of Mace. The Proprietors of these Orchards in the three Isles want the Assistance commonly of twenty-six thousand Slaves for their Cultivation and getting in the Fruit.

Of AMBOYNA.

THE Isle of *Amboyna* is situated in four Degrees twenty Minutes from the Equinoctial Line, at forty Leagues' Distance from the Isle of *Banda*, or thirty-four from *Poulo-Rbon*, the Westernmost of this Cluster, and consequently the nearest. Some Authors place it among the Number of the *Great Moluccas*, although it has not above twenty-four Leagues Circumference. It is divided in two, so that the Isthmus, which separates the two Parts, being very narrow, it

seems to form two Isles. The largest of these two Parts is called *Hitou*; and the other not above half as big, on the Southern Side, *Leytimor*: The first is twelve Leagues long, and two and a half broad; and the other five Leagues in Length, and one and a half in its greatest Breadth. The two small Peninsulas of this Island, form a narrow Gulf between them, of a Parallel Length with *Leytimor*, and something better than a League wide, both at its Entrance and in the Middle. Besides this great Isle of *Amboyna*, there are ten small ones very near, viz. *Ceram*, *Ceram-Laout*, *Bouro*, *Amblau*, *Manipa*, *Kelang*, *Banza*, *Orna*, *Heni-moa*, and *Noussa-Laout*; these last three bearing the Name of *Uliassers*, which, with *Amboyna*, are the only four Isles where Cloves are cultivated, the Trees in all the others, being grubbed up, as these produce sufficient to serve the whole Globe. The Company have Redoubts and Settlements in all the Islands, as well to restrain the Inhabitants from planting, as to hinder any contraband Trade from being carried on. At *Amboyna* the *Dutch* have several Forts, in one of which the Governor resides, this being the fifth of the Company's great Governments in *India*.

When the *Dutch* first became Masters of this Isle, there were very few Clove Trees in it, but they have since made such Plantations, that it now produces more than all the *Moluccas* put together. The greatest Crops are gathered at *Hitou*, *Loubou*, *Campbell's*, *Leffide*, *Nau*, *Caytol*, *Cabaau*, *Larike*, *Vaccajibou*, *Ourien*, and *Affaloulo*, Part in the small, and Part in the great Isles. All the Isle is divided into several Villages, and each Village into many Orchards equally cultivated by the *Dutch* and Natives, who are each obliged to plant ten Clove Trees yearly, which has been the Occasion of so great a Multiplication, as not to leave Room for the Culture of other Fruits, Pulse, and Greens for common Use, but they are brought from abroad, especially *Batavia*. The Clove Trees of *Amboyna* and its Neighbourhood have, from one Year to another, a good and a bad Crop, which is different from the other *Moluccas*, where the other good Crop only comes every fourth Year, and sometimes every seventh. They have tried to plant Nutmeg Trees in the Isle, and have some few growing in Gardens, though they thrive very poorly. At *Victoria* there are Magazines always full of Stuffs, ready made Cloths, Cotton Cloths, and other Merchandize of *India* and *Europe*, where the Inhabitants go to furnish themselves with what they want, on which the Company make large Gains. The Provisions, Stores, and Commodities from *Batavia* are brought here yearly by two of the Company's Vessels, who on their Return laden entirely with Cloves, which some Years are produced in such Quantities, that they are obliged to burn, or throw Part of them into the Sea, proceeding from the Obligation the *Dutch* have laid themselves under to take all that the Season yields, at a Price agreed on with the Owners.

It is supposed that there are more than sixty thousand Inhabitants, of which the least Part are *Dutch*, so that these are forced to maintain large Garrisons to awe the Natives, in Case they should be dissatisfied at the Reception of their Cloves. And it may be seen at what an Expence both of Blood and Money the Company have secured to themselves this Branch of Business; and yet after all their Care and Precaution, it never has, nor ever will be, in their Power to hinder the Extraction of the Spices entirely, and in the Manner they endeavour to guard against, with so much Jealousy: I mean by partly falling into the Hands of Foreigners, through the Connivance of their own Officers and Servants. The total Number of the Clove Trees growing in all the Places before-mentioned are supposed to be about two hundred and fifty thousand, extra of the young Plants rearing, to supply the old ones' Decay; and as their Fecundity is uncertain, and greatly varying according to the different Seasons, I here add the Products of seven successive Years, that my Reader may thereby calculate the Average, viz. in 1705, two thousand and six Bahares, of five hundred and fifty Pounds, as before-mentioned; Anno 1706, twenty-six hundred and sixty-one Bahares; Anno 1707, seventeen hundred and ninety-eight Bahares; Anno 1708, six hundred and two and a half Bahares; Anno 1709, twenty-nine hundred and fifty-nine Bahares; Anno 1710, nine hundred and thirty six Bahares; and Anno 1711, thirteen hundred Bahares.

*Timor* and *Solor* are also two Isles of the Eastern *Archipelago*, between the Cape of the Isle of *Celebes*, and the Isle of *Flores*, where the *Dutch* have some Trade and Forts. At *Timor* a Commerce is maintained in Slaves, Wax, and Sanders, of which latter here may be collected yearly near two thousand Bahares, of five hundred and sixty Pounds, and *Solor* produces the same Commodities, though in much less Quantities.

Of THE PHILIPPINES, or MANILLAS.

THESE Isles were discovered by the famous *Magellan* in 1520, though not settled till 1564, under the Reign of the *Spanish* Monarch *Philip II.* from whom they received their new Name. They lie in the *Indian* Sea, between *China* and the *Moluccas*, at about an hundred Leagues distance from the Coasts of *Cambaya* and *Champaa*, and two hundred from the *Mariannes* Islands; they composing one of the five *Archipelagos* in the *Oriental* Ocean, and by some are numbered in eleven hundred, though others count them as many thousands, which is undoubtedly an Exaggeration, greatly exceeding the Truth.

The Island *Manilla*, so called from its Capital, is the most considerable of all those possessed by the *Spaniards*, and the Centre of their Trade, which they extend on one Side as far as *China*, and on the other to the *American* Coasts, or the *South* Sea. This Isle, though seated under the torrid Zone, as well as the Rest of the *Philippines*, enjoys a healthful temperate Air, notwithstanding its first bad Reputation. It is the Northernmost of all these Isles, and is not less than four hundred Leagues in Circumference.

*Mindanao*, which on the contrary is the Southernmost Isle, hardly yields in Grandeur to the foregoing, but the Inhabitants in some Sort carry on a distinct Commerce, either with the *Spaniards*, when not at War with them, to *China*, *Borneo*, or the other Isles of *Sonda*, where they carry several of their Products, and return with the Commodities they want. They had also a settled Trade with the *Moluccas*, before the *Portuguese* and *Dutch* became Masters of them. The Merchandize which these People carry to all the said Places, are Gold, which they gather in their Mountains and Rivers, particularly in that of *Batuam*, Wax, Rice, Sago, Stuffs, made of a Tree's Bark, Cocoa Nuts, Sesame Oil, Iron, Steel, and bastard Saffron. The *Spaniards* also extract from hence Timber for building their Galleons, which are larger than those of the *European* Construction; and this Isle also affords many thousand Skins, especially of Stags and Buffaloes, which are proper for the *Japan* Trade; and we might reckon among the Commodities of its Growth, Nutmegs, Cloves, Betal, Cacao, and Pepper; but the Natives omit the Cultivation of more than they want of the two first, for Fear that if they increase their Plantations, it might invite the *Dutch* among them, and put them on endeavouring to become Masters of that Business here, as they had done at the *Moluccas* and *Banda*.

Almost all the Trade the *Spaniards* transact, is managed, as before observed, in the City of *Manilla*: This Capital, the Residence of the Archbishop and the Viceroy, is situated in fourteen Degrees fifteen Minutes of Latitude, in the most Southern Part of the Isle; its Harbour is very good, spacious, and secure; and it is here where the two Galleons that lade at *Acapulco* in *New Spain* yearly arrive, and from whence they return with the succeeding Monsoon to the said Place of their Departure. It is also here that the *Chinese* and *Japanese* Vessels are continually arriving, with a great Part of the immense Riches those two Empires are possessed of, to truck them against those of the new World, of which this City is a Sort of Depository for the East. The Time of these People's Negotiations is commonly from *December* to *April*, during which Term, thirty or forty of their largest Vessels are always seen in the Road, and in the remaining Part of the Year, four or five hundred of all Sizes, which belong to the *Spaniards* and the *Chinese* settled in the Isles, with others trading to this *Archipelago*. The *Portuguese* also carry on a good Trade here, and it is in this only that they make any considerable Gains, since they lost that of *Japan*; though of all the Nations who traffick here, the *Chinese* are those who carry on the greatest

greatest Commerce, and the Number of them residing here may amount to at least two thousand. The Goods which they, and other Strangers, bring here, are Silk and Cotton Stuffs of all Colours, raw and spun Silk, Cotton Wool and Thread, Gunpowder, Brimstone, Iron, Steel, Quicksilver, Copper, Wheat Flour, Walnuts, Chestnuts, Biscuit, Dates, Porcelaine, Cabinet, Eterutoires, lacquered Trunks, Rice, all Sorts of Drugs, Saltpetre, Cotton Cloth, white and coloured, Ribbon Head-dresses for the Women's Veils after their Fashion, Pewter and other Household Furniture made of it, Silk Fringes, and Thread ones of various Sorts; in fine, divers Merceries and Hardware, of *China* and *Europe*, and several Sorts of Glass Beads, which are proper for the Isle of *Mindanao*.

The Exports from the *Philippines* consist of the Products of the Country, and those brought there from *America*; the first are Gold from *Mindanao*, Wax, Honey, Tobacco, and Sugar, transplanted from the *Wyl-Indies*, and which flourish here perfectly well, Stags', and other Animals' Skins, both wild and tame, Timber, as well for Houses as Ship Building, Plantain Cloth and Thread, several Oils, Civet, and the Animals that produce it, Palm-Wine, Baitard Saffron, Cocoa Nuts, and all the Commodities which that wonderful Tree produces; and in fine, Sago, which serves the Natives in the same Manner that it does the *Moluccans*. The Merchandizes from *America*, are the Products and Manufactures of *Peru* and *Chili*, and of all the *Spanish* Coasts in the *South Sea*, brought to *Manilla* by the Annual Galleon from *Acapulco*, but principally in Gold and Silver, which the Mines of *Potosi* and *Chili* furnish the East with in Abundance, notwithstanding the vast Quantity that the Flota and Galleons yearly transport to the West.

#### Of the LADRONES, or ISLES of THIEVES.

MR. Savary says these Islands were discovered in 1520, and Mr. Echard in 1552, by Magellan, after passing from the North to the South Sea by the celebrated Straits bearing his Name; he called them the Islands of *Thieves*, in *Spanish*, *Isas de Ladrones*, on Account of the petty Larceny the Natives were guilty of, in stealing a few Nails and Bits of old Iron from him, and the *Islands of Sails*, from the vast Quantity of Canoes that at once surrounded his Ship on his Arrival; they were afterwards named *Mariannas*, from *Mary Anne of Austria*, Queen of *Spain*, who sent Missionaries there in 1665, after their being taken Possession of for that Nation. They are at the Extremity of the East, or upon the utmost East bound of our Hemisphere, in that vast Expanse of Waters, that lie between *Japan*, the *Philippines*, and *Mexico*, or in other Words, between the *Oriental* and *Pacifick* Ocean; there are only fourteen, or as some say, fifteen of them known, although they are much more numerous: *Gnabans* and *Saypan* are the most considerable and populous, having, as Mr. Savary says, more than thirty thousand Inhabitants each, although the largest of them is not forty Leagues in Circumference, which must be a Mistake in the said Gentleman, either in the Number of the Inhabitants, or Extent of the Isles. Some have believed that they had always a Commerce with the *Tartars*; but it is certain that, before *Magellan's* Arrival, they thought themselves the only Inhabitants of the Earth, ignorant even of the Use of Fire, which they took at first for a devouring Animal, to whom an Approach was dangerous. Since the *Spaniards* have been established here, those of the *Philippines*, distant only two hundred Leagues, maintained some Trade here, and the annual *Acapulco* Ship always touches for Refreshments, which they truck against Linens, Iron, Merceries, and Hard-Ware; but this Trade is so inconsiderable, as would have induced me to pass it without Notice, had it not been to avoid neglecting the Memento of these Isles, which, by their Situation between *Asia* and *America*, may very much favour those, who carry on a Marine Traffick from the South to the East.

## Of the Isles of JAPAN, or JAPON.

THESE Isles lie in the Sea of *China*, between thirty-one and forty Degrees of Latitude, about two hundred and eighty Leagues distant from the Continent in some Places; though in others not above sixty. The three principal ones are *Nippon*, in which is seated *Meuco*, the most important City of the Isles for Trade, *Ximus*, or *Ximo*, and *Xicocon*, or *Xicoco*. A great Number of small circumjacent Isles surround them, though but little known to the Europeans, except those of *Firando*, where the *Dutch* had at first some Settlements, and that of *Bongo*, called *Cikoko*, where *Nangasaki* is built, the Seat at present of the *Dutch* Trade, and which was formerly that of the *Portuguese*, before their Expulsion from *Japan*.

It has been for a long Time controverted, whether *Nippon*, the largest of these Isles, and some others to the North of this vast Empire, do not join with *Great Tartary* or to *Jesso*, that Land newly discovered, and as yet but little known; some modern Relations however separate it by the Straits of *Sangaar* from any Continent, and more especially the Observations of that fine Chart, which the deceased Czar, *Peter the Great*, had made, to inform the Publick of this Truth, and to delineate the Lands subject to his Dominion, show that northward they are very near to *Japan*, or at a Distance which places the one or the other, by a Strait, within Sight. That Land which lies to the North of *Japan*, is called *Jesso* by the *Japanese*, which they take to be an Island, though it is asserted by *Dr. Garcin*, to be a Peninsula joined by its northernmost Part to *Great Tartary*.

One Emperor is the sole Monarch of this vast Empire, and notwithstanding it has many Kings, these are more Titles of Honour than Ensigns of Sovereignty; those bearing them having no more Authority than Governors of Provinces, or Viceroyes. This Country has always carried on a very considerable Trade, either by Strangers coming here with their Goods, or that the *Japanese* have gone to fetch them, and carried those of their own Growth for Barter.

The Commerce of the *Chinese* with *Japan* is almost as ancient as the two Empires, and the *Siamese* and *Cambojans* did not carry on an inconsiderable one, till the *Dutch* became Masters of it, to the Downfall of that of the other three. The *Japanese* trade to *Cochinchina*, *Siam*, *Camboja*, and the *Manillas*, their principal Returns being in Silk.

The *Portuguese* were the first Europeans who had any Knowledge of these Isles, either, as some say, by Relation from the *Chinese*, or *Siamese*; or, as others report, that they were driven on them by a Storm in 1534, or 1543, going to *China*. The first Place they settled at was on the Coasts of *Sarunga*, pretty near the City that gives Name to the Isle; but the Shores not being good and holding, they four or five Years after, passed to the Isle of *Quijua*, near *Nangasaki*, a Post that the *Dutch* now enjoy, and carried on a yearly Trade to the Value of two hundred and forty thousand Pounds Sterling.

A Jealousy in Trade, rather than a true Interest of State, drove the *Portuguese* out of this Empire in 1636; and with them all other Christians, who were reckoned to be four hundred thousand in 1620, and the Christian Religion, which *St. Francis Xavier* had begun to preach there in 1549.

Before the Edict, which bars the Entrance to *Japan* against the Christians, the *English* were well received here, and had many Privileges granted them; but the *Dutch* found Means, by Misrepresentations, to get them among all other Christians excluded, and to continue in Possession of the Trade themselves, for which indeed they are the fittest, as most of the Products of *Japan* are sold in their other Settlements, and the Products of them brought here; though the *Dutch* were included in the general Expulsion, but had taken such Measures as to procure a Re-establishment in about three Years, when they returned, though not to *Firando* their former Settlement, but to *Nangasaki*, or rather *Dijima*, where the same Habitation was given them as had formerly belonged to the *Portuguese*, and where the Company's President has resided ever since 1641.

*Nangasaki*, Capital of the Isle of *Bongo*, or *Cikoko*, is situated in the thirty-third Degree of northern Latitude, before which lies a small Isle, separated by an Arm

of the Sea, only forty Feet wide; and for a Communication between it and the City, there is a Bridge an hundred and fifty Paces long, by fifty wide; at one End of it there is a Draw-bridge, in the Hands of the *Japanese*, which the *Dutch* are prohibited to pass, without leave from the Governor of the City, on Pain of Death; neither are any of the *Japanese* permitted to enter, except the Interpreters and Factors, with whom the Officers and Commissioners of the Lodge may only have Communication.

The whole Island is pallisadoed round, for the Security of the Company's Ware-houses; four long Streets divide it, which are cross cut by some public Places; on each Side are a Number of Magazines, though the principal one is at the Gate of the Bridge, where the Goods are sold. There is another Port to the Sea Side, which is where they lade and unlade their Vessels.

The Impositions on them are very extraordinary, and what no Nation could submit to, less wedded to their Interest than the *Dutch*; but these patiently bear every Innovation and Insult, for the enchanting Premium of an hundred and fifty per Cent. that they are supposed to make by this lucrative Commerce, and which it is reckoned leaves the Company an annual clear Profit of five Millions. The two Ships that the *Hollanders* send to *Japan*, carry their Returns to *Batavia*, where the Repartition of the Goods brought there is made, according to their Propriety, for the different Markets in *India*, *Asia*, and *Europe*, that the Company trade to.

The Merchandizes of *Europe*, *India*, and *China*, fit for the Trade of *Japan*, are Scarlet and other lively coloured Cloths; Camlets of various Sorts; red Serges, Burats, a coarse woollen Stuff, Gold and Silk Brocades; Damasks; black and coloured Armoifins; Gauzes, and other Silk Stuffs; whitened and raw Silks; Cotton Thread and Wool; Embroideries; Carpets, Linens; Silk Night-Gowns ready made; *Flanders* Pack Cloth; Glass and Earthen Bottles; Lead, Pewter, Steel; different Sorts of Alocs and Brazil Wood; white and *Muscovado* Sugar; *Cambodian* Nuts, the Skins of a Fish like a Thornback; Allum; red Leather; Capoc, a Sort of very fine Cotton, Wax; a mixed Metal called Calin; Sublimate, Cassia, Verdigris; Tea; Colours for Porcelaine; Camphire, Musk, Paper, Pepper, Spices, Elephants' Teeth, Hemp, red Wool, medicinal Drugs, Borax, Quicksilver, *China* Porcelaines; and Merceries of all Sorts from thence and *Nuremberg*; red Coral, and Stags' Skins, with those of other Animals; of which Green Hides the *Dutch* carry yearly to *Japan* two hundred thousand of Stags, and an hundred thousand of Beeves, mostly procured from *Siam*; and of which the Island of *Formosa* furnished them a Quantity whilst they remained Masters of it.

Almost all the Goods are paid for in ready Money, and a large Profit is to be made by carrying them to *China* and *Bengal*.

From *Japan* the Exports are, all Sorts of Household Furniture of painted lacquered Wood, Fans, Porcelaine, Medicinal and Dying Drugs of the Country's Growth; Copper, some Minerals, Goats' Skins, Silk and Flos; of which the *Japanese* often sell a Part, and get foreign Silks for their own Use, especially those of *China*, instead of them.

#### Of the Trade of JESSO.

THE Country of *Jesso*, *Yedso*, *Yeco*, *Jedia*, or *Eso*, makes only one Continent with some of the *Japan* Isles, although there have been both Navigators and Geographers, who have thought it separated by an Arm of the Sea, which the *Japanese* also affirm. Its Inhabitants and Trade were for a long Time unknown to the *Europeans* frequenting the *Asian* Seas, and it is only since 1643, that there has been any Advices about it; gained by the Return of a *Dutch* Ship called the *Castricum*, that discovered it. The Natives of the Country, which is very mountainous, are mostly Savages, both in Form and Manners, being entirely without Religion, and almost covered with long Hairs like Bears, especially the Mountaineers, though the Inhabitants of Towns are a little more polished, and all equally under the Dominion of one Prince or Governor, who acknowledges the King of *Japan* for his Sovereign, and pays him yearly a Sort of Tribute, which he personally presents, and it consists commonly of Silver and Ostrich Feathers.

The Trade which they carry on with the *Japanese* is not inconsiderable, and these were the only People they knew till the *Dutch* appeared among them. The Commodities which they truck with the *Japanese*, are Whales' Fat, and their Tongues smoked and dried, Furs, several Sorts of Feathers, and other Products of their Lands and Game, besides some Hemp which they spin, by holding it between their Teeth, and twisting it with the Palms of their Hands. The *Japanese* Merchants visit them once a Year, and carry them Rice, Sugar, Silk Clothes, and others of a blue Stuff called *Kangan*; Copper, Tobacco Pipes, and Boxes, Cups, varnished Pots, and other small Kitchen Utensils, Silver Pendants, and Copper Ear-rings, Hatchets, Knives; and in fine, all that they have comes from *Japan*. These People, notwithstanding their natural Savageness and Barbarity, are however very subtle and intelligent in their Trade, wherein they are truly just and faithful, without any Inclination to Theft; in general they mostly esteem Iron, and more especially those under the forty-sixth Degree prefer it in their Traffick with Strangers, to all other Commodities whatsoever.

This finishes my Account of the *Asiatick* Commerce, in which I have been as concise as the Nature of the Subject would permit; conscious of having already exceeded my proposed Limits, though I hope neither unnecessarily, nor unprofitably to my Reader, whose Information I have ever strictly consulted, rather than any Ease or Advantage to myself.

Of the Commerce of AMERICA.

**A**MERICA was discovered in 1492, by *Christopher Columbus*, a *Genoese*, though *Americus Vespucio*, a *Florentine* Merchant, who went there in 1497 and 1499, had the Honour to give it its Name: It is divided into two great Parts, that form a Peninsula each, and are joined by an Isthmus, hardly seventeen Leagues wide. Both are denominated from their Situation; that to the North being called *North-ern America*, and that to the South *Southern*. This last is also named *Peruvian*, and the other *Mexican*, from *Peru* and *Mexico*, the two greatest Empires that the *Spaniards* conquered in this new World; whose Discovery having been made at the Expence of *Ferdinand* and *Isabella*, King and Queen of *Castile* and *Aragon*, the *Spaniards* have always pretended, that these new found Lands ought to belong to them only; but other Nations not attending the Discussion of this unjustifiable Claim, have each taken Possession of what suited their Conveniency in the one and the other Part; so that the *Portuguese* at present share the Empire of *Peru* with its pretended Owners; and the *English*, *French*, *Dutch*, and *Danes*, are Masters of the greatest Parts of *Mexico*, and the Northern Isles.

*America* is almost environed by the Sea, and is denominated either *North*, or *South*, *America*, according as the Coasts it washes are situated towards either of those two Points of the Heavens; the South, being also called the *Pacifick* Sea. In the one and the other Sea, joined by the Straits of *Magellan*, *Maire*, and *Brower*, are several Isles, though many more in the North than in the South, this having none that are considerable; whilst the North has the *Bermudas*, *Lucayes*, *Antilles*, and the large Isles of *Cuba*, *St. Domingo*, or *Hispaniola*, *Jamaica*, *St. John de Porto Rico*, *Terra Nueva*, *Cape Breton*, or *Louisbourg*, and some others of less Importance, and uninhabited.

The Division of this new discovered Quarter of the Globe is as follows, *viz.*

The *Spaniards*, who were its first Conquerors, and who are also the best settled here, possess on the Continent all Southern *America*, except *Brazil*, belonging to the *Portuguese*, and some Places in *Chili*, *Magellan*, and the Isthmus of *Darien*, where they never have been able to subdue the *Indians*, who are therefore called *Indios bravos*, brave *Indians*.

*Spain* also occupies the best and richest Part of the Northern District to *Mississipi*, *New Albion*; and the Isles belonging to them are, *Hispaniola*, otherwise called *St. Domingo*, which the *French* share with them, *Cuba*, *Porto Rico*, *Margarita*, *Lucayes*, and some others of less Note, that the *Spaniards* only sometimes visit, without having any Colonies on them.

Next to the *Spaniards* the *English* have the most flourishing Settlements in *America*, as well for the Number of Inhabitants, and the Quantity of Ships sent there yearly, as for the valuable rich Commodities they produce.

The *French* have in *Terra Firma*, *Mississippi*, *Cayenne*, and something towards the River *Surinam*. Their Isles are, *Martinico*, *Guadaloupe*, and *Santa Croix*, among the *Antilles*. They have besides the Southern Part of *St. Domingo*, and the little Isle of *Tortuga* near to it.

The *Portuguese* only possess in *America*, the Coasts of *Brazil*, extending from the River of the *Amazons*, to that of *St. Gabriel*, near the River of *Plate*; this Coast is divided into fourteen Commanderies, of which the best known in *Europe* are *Fernambouc*, the *Bay of all Saints*, and *Rio Janeiro*.

The *Dutch*, so well situated in the *East-Indies*, are bad enough off in the West, where all their Colonies are reduced to those of *Saba*, *St. Eustatia*, and *Walckeren*, all the smallest Isles of the *Carribbees*; but to make them some Amends, they possess those of *Bonaire*, *Aruba*, and *Curacao*, which lying pretty near to *Curtogena*, and *Porto Bello*, furnish them with frequent Occasions of carrying on a very beneficial contraband Trade, against which the *Spanish* Governors usually shut their Eyes.

*Surinam*, at the Mouth of the River with the same Name, on the Coast of *Guaiana*, belongs also to the *Dutch*, as does *Bamrom*, *Apruwace*, and *Berbice*, all these in *Terra Firma*, and are, as one may say, separated by *Cayenne*, appertaining to the *French*.

In fine, the *Danes* are settled in the little Isle of *St. Thomas*, where the *Hamburgers* have also a Factory. This Island is not very distant from *Porto Rico*, and they have another small one among those called the *Virgins*.

These are the only Nations settled in *America*, and having spoke of their Possessions, I shall now proceed to treat of their Trade, beginning first with that of the *Spaniards*, as Masters of a larger Share of those Parts than all the Rest put together.

The Isle of *Cuba* is the largest of the *American* North Sea, after *St. Domingo*, which however it greatly surpasses in its Riches and Commerce. It lies East and West from twenty to twenty-three Degrees of North Latitude; it is about four hundred Leagues in Circumference, and is almost cut in two by a Chain of Mountains, from whence issue several Brooks and Rivers, whose Gravel contains some fine Gold, a plain Indication of the neighbouring Mines being impregnated with that Metal, though hitherto they have remained unwrought, as well as those of Copper and Silver, supposed to be within three Miles of *St. Jago*, the Capital of the Isle; but its chief Riches are the vast Number of Hides cured here, taken from the Infinity of both its tame and wild Cattle; besides which it produces, Sugar, Tobacco, Tallow, dry Sweetmeats, Ginger, Cassia, Mastic, Aloes, Sarsaparilla, and a great Quantity of Tortoise-shell.

*Hispaniola*, more commonly called *St. Domingo*, from the Name of its Capital, is seated between the eighteenth and twentieth Degree of North Latitude, near the Middle of *Cuba*, *Jamaica*, and *Porto Rico*; from which latter it is only separated by a very narrow Strait. The principal Commodities that the *Spaniards* trade in from their Part, are Hides, Tallow, Sugar, Ginger, Cocoa, Wax, Honey, some Ambergris, *Brazil* and *Guayac* Woods, which grow here, and that of *Campêche* brought from Abroad; in fine, Lemons, Oranges, and many other Fruits, sold fresh, and of which most excellent Sweetmeats are made, both wet and dry: Here are also some Gold Mines, but since the entire Destruction of the Natives, they remain unknown, and the present Possessors have no more of this Metal, than what is found among the Gravel of the Rivers.

The City of *St. Domingo*, seated in the Southern Part of the Isle, at the Mouth of the River *Ojano*, is the Capital of the *Spaniards*' Share in *Hispaniola*, and the Staple of their Goods, either Native or Foreign; the Inhabitants of the other Towns coming here to furnish themselves with these from *Europe*, and the Continent of *America*, brought here in the Ships of that Nation, at the same Time leaving their's for Embarkation. The Salt-ponds of the Isle are almost equally divided between the *Spaniards* and the *French*, there being many in the Northern

Part, where the latter inhabit, and not fewer in the Southern, where the former have their chief Establishments: The most abundant, and from whence the best Salt is extracted, are those of the Bay of *Ocoa* and *Corodou* to the South; and them of *Caracol*, *Limonade*, and *Monte-Christo*, to the North-East. Here are also found some Mountains of Sal Gemme, but they are neglected, as well as some other Minerals, which might become, with a proper Care and Application, a considerable Object of Trade.

*Porto Rico* is situated fifteen Leagues to the Westward of *Hispaniola*, being from thirty to thirty-five Leagues long, by twenty broad, and was named, either from the Port of its Capital, which is one of the most spacious, commodious, and securest in *America*, or from the Quantity of Gold, at that Time extracted from the Mines of this Isle.

There is now but little of this precious Ore appears in the Commercial Transactions of the Isle, the Mines having been either exhausted, or neglected for Want of Workmen; here is, however, always some little collected in the River-Sand, and particularly in the Torrents that fall from the Mountains, and most abundantly in those of *Mantanabow* and *Cecubo*.

The chief Trade carried on here, consists of Sugar, Ginger, Hides, Cotton, Wool, and Thread; Cassia, Mastick, Guayac, Mays, Salt, of which here are excellent Ponds, Oranges, and Lemons, fresh or preserved, and all Sorts of Cattle. Its principal Cities are, *Porto Rico*, the Capital, *St. Germain*, *Arevalo*, and *Guddiamila*, though the first is where all the Business of the Isle is carried on.

*Margarita*, or *Pearl Island*; on the Coast of *South America*, at eleven Degrees of North Latitude, was for a long Time famous for the Fishery of Pearls, but has been deserted ever since the Middle of the seventeenth Century, and this Business transferred to *La Rancharia*, in the River of *La Hacha*, where the *Spaniards* sent ten or twelve Barks yearly from *Cartagena*, convoyed by a Man of War of twenty-four Guns, with proper Divers for the Oysters.

*Of the Trade on the Coast of SPANISH AMERICA in the NORTH SEA.*

IT would undoubtedly be too long, and an unprofitable Attempt, to enter into an exact Detail of all the Maritime Towns, where any Trade is carried on, in this Part of the *Spanish* Dominions; I shall therefore describe those Places which serve as Staples, or publick Storehouses, and where the Flota, Galleons, and Register Ships, come to deliver their *European* Goods, and relade those of *America*.

The Chief of these Cities in the *North Sea*, are *Porto Bello*, for *Peru* and *Castile d'Or*, or *New Castile*; *Cartagena*, for *New Grenada*, and Part of *Guatemala*; *Vera Cruz*, for all *Mexico*; *Porto Cavallo*, for the *Honduras*, and the other Part of *Guatemala*; *Maracaibo* for *Venezuela*, and the neighbouring Provinces; *Buenos Ayres*, for *Paraguay* and *Chili*; and some others of less Consequence.

*Porto Bello* is no ancient City, having been built in 1584, to serve as a Retreat for the Galleons, instead of *Nombre de Dios*, seated less advantageously, and where bad Air exposed both the *Europeans* and the *American* Merchants to many Disorders, when their Traffick obliged them to meet at this unhealthy Place; though the former is but small, and almost as unwholesome as the other.

It is here that the Fair is held, for a Month or six Weeks, while the Galleons stay, when the principal Dealers return to *Panama*, where they reside all the Rest of the Year. The Concourse is so great at *Porto Bello*, during the Fair, that the smallest Shop often lets for a thousand, and a middling Chamber for an hundred and twenty Dollars, only for the short Time it lasts; Provisions also augment proportionably, and commonly two thousand Mules are employed in bringing the Goods from *Panama*, and returning with those from *Europe*, the Distance between the two Places being about eighteen or twenty Leagues; the chief of what they bring from *Panama* on the said two thousand Mules, is Gold and Silver,

ver, which is delivered at the Place of the Fair, and after being there weighed, and marked by the proper Officers, is thrown by with as much Neglect, till embarked, in the Corner of some Warehouses, as Pigs of Lead are in the Countries where they abound.

I have already mentioned, under the Article of the *Spanish* Trade, what Commodities were proper for the *West-Indies*, and shall now add, that the Returns from *Porto Bello* are in the aforesaid precious Metals, Indigo, Cochineal, Cacao, now brought only by the *Caraccas*, or *Guipuscoa* Company, Sugar, Tobacco, Hides, &c. The King's Revenues, being one-fifth of all Gold and Silver, are generally sent home by the Galleons, as well as what appertains to Particulars, and which is delivered these latter at *Cadix*, after Payment of such Duties as the King thinks proper to impose.

*Cartagena* is one of the four Provinces of *New Castile*, whose Capital, with the same Name, is seated on the *North Sea*, though very distant from *Porto Bello*, to which it is hardly inferior for its Trade, and greatly exceeds it in Grandeur, Populousness, and Riches. It is one of the best Ports in the World, and therefore made Use of by the Galleons for Wintering, when they are obliged to pass that Season in these Parts, and where they often call on these Occasions; besides which, this Place maintains a great Trade with almost all the Provinces of *Mexico* and *Peru*, and no small contraband one with *Jamaica* and *Curaçoa*. It is here also, that the Revenue of his Catholic Majesty, and the Effects of Particulars, are brought from *New Castile*, and the other three Provinces of that Kingdom, to be sent Home by the Galleons; these Commodities are Gold, Silver, Drugs, Medicinal Plants, Spices, and all others mentioned to be shipped from *Porto Bello*, besides some Emeralds from the Mines, near the City of *St. Fé de Bogatto*.

*Vera Cruz*, called also *St. John de Ulhua*, from the Name of its Port, is situated at the Bottom of the Gulf of *Mexico*, in the Nook formed by the *Yucatan*; and is in some Manner a City of the greatest Trade in all the *Spanish America*, either on the one, or the other Sea; its Merchants sending their Ships in all the Northern Ocean, and to the Isles of *Cuba* and *St. Domingo*, to *Jucatan*, *Porto Bello*, *Cartagena*, and all other *Spanish* Places where any Trade is carried on: And though so extensive a Traffick might suffice to enrich a much larger City than this, it is however the least Object of its Inhabitants' Commerce, as it is here, if I may be allowed the Expression, that all the Riches of the Old and New World unite; those of the first brought annually in from the *Manillas*, and *East-Indies*, by the Way of *Acapulco*; and from *Europe*, by the Flota; and the Products of the latter, collected here from all Parts of *Mexico*, to be forwarded to *Old Spain*. The Number of Inhabitants is not very considerable, as they hardly exceed three thousand; but these are all Merchants, or Factors to those of *Mexico*, among which are many who have three or four hundred thousand Dollars to employ.

The Fair begins on the Flota's Arrival, and lasts as long as it stays here, when the Concourse is very great; and in Case its Detention is all the Winter, which sometimes happens, this is the Place it remains at; though it generally lades in *April*, and departs in *May*, if the Weather permits; if not, continues here till *August*, according as Winds and other Circumstances are favourable, or otherwise.

*Porto Cavallo* is the Place where all the Trade carried on between *Spain* and the *North Sea* with *Guatemala*, a large Province of *Mexico* in the *South Sea*, is transacted. Its Inhabitants are almost all Factors to the Merchants of *Guatemala*, and their Houses Magazines for the Reception of their Goods, being a Port of greater Commerce than any in the Gulf of *Honduras*, at whose Bottom it is seated pretty near to *Rio Dulce*, called also the River of *Guatemala*. The *Spanish* Ship that brings the *European* Merchandize here, is one of the Registers, commonly of seven or eight hundred Tons' Burthen, laden, as I have formerly mentioned, with Iron, Steel, Paper, for writing and print, Linens, fine Cloths, Silks, Saffron, Oil, Serges, Ribbons, Thread, and some small Hard-Wares, Merceries, and Glass Beads for the *Indians*.

The Goods which come from *Guatemala*, are Gold, Silver, Cochineal, Indigo, Hides, Sarsaparilla, Jalap, Mechoacam, Cotton, Balm, a Specie of Petrole Oil, &c.

• *Maracaibo* is the Name of a great Lake, at the Extremity of the Bay of *Venezuela*, as also of the principal Town that the *Spaniards* have on it; which, though but small, is well built in the modern Taste: It has a most excellent Harbour, and its Merchants are so rich, as to build, fit out, and lade their own Vessels for all Parts of *America*, and send them even to *Spain*. This City has the Privilege of a yearly Register-Ship to lade the Products of the Country, and bring those from *Europe* fit for this Market. It is also the Depository for the Goods from *Merida*, and of some other Places on the Frontiers of *New Granada*, and *Venezuela*, eighteen, or as others will have it, forty Leagues from *Gibraltar*, a large Town on the Lake, where the chief Merchants of *Maracaibo* have their Estates. It is from *Merida* that all the Gold, Silver, and precious Stones, are brought to *Maracaibo*, and from *Gibraltar*, the best Tobacco, and the most excellent Cacao, that all the Continent of *America* produces.

The Commodities proper for the Bay of *Venezuela*, and the Lake of *Maracaibo*, are Lincens, Silks, Wines, Tools for Agriculture, some Hard Ware, and small Mercery, and many other of those I have formerly mentioned.

*Buenos Ayres*, situated in the thirty-fifth Degree of South Latitude, is built on the Southern Bank of the great River of *Plate*, on the Declivity of a little Hill, at the Mouth of a small River, falling into the great one. It contains near four thousand Houses, all Earth, except fifty Bricks; its Inhabitants are rich, and owe their Riches to the great Trade they drive, both at Home and Abroad.

Its inland Trade is with *Paraguay*, *Chili*, and *Peru*; and the foreign one, first, with *Brazil*, where the Merchants send their Ships, although they will admit no *Portuguese* into their Ports. Secondly, with the *Spaniards* of *Europe*, who lade several Register Ships, to bring here all such Goods as I have mentioned to be fit for *Porto Bello*. Thirdly, with the *English* when the *Affiento* Trade subsisted; and fourthly, here come many Vessels from several Parts of *Spanish America*.

The chief Commodities exported from *Buenos Ayres*, are Hides, of which vast Quantities are shipped here, Cochineal in small Cakes, and *Vigrean* Wool, both from *Peru*, *Coquimbo* Copper, *Paraguay* Herb Tobacco, Loaf and Muscovado Sugar, Cotton Thread, yellow Wax, and what else the Cities of *Paraguay* and *las Corrientes* produce; in Truck of which the Inhabitants of those two Places take Knives, Scissars, Ribbons, Taffeties, Linens of *Bretagne*, flowered ditto of *Rowen*, Silk Stockings, *English* coloured Flannels, grey Castor Hats, Silk Stuffs, Cloth, and *Peru* or *Quito* Flannels, as no Cash ever comes from or goes to either of the said Cities.

The Bay of *Campeche*, and the Coast of *Caracas*, ought also to have a Place among the trading one of *Spanish America* in the North Sea, as the first abounds with Logwood, the Dying Wood, so much esteemed in *Europe* for Blacks, and Violets. The City of *Campeche*, which is the Capital of the Country, is seated in twenty-nine Degrees of Latitude, and the only one that there is, from Cape *Catoche* to *Vera Cruz*. The Goods extracted from hence, besides the aforesaid Woods, are Timber for Building, Wax, Sugar, Cassia, Sarsaparilla, and Hides.

The *Caracca* Coast is fruitful in that Sort of Nut, wherewith Chocolate is made, and though it seems a long Chain of Mountains, yet it has many Vallies, where the Inhabitants of *Caracca*, Capital of the Country, maintain their Slaves to cultivate the said Nut Trees which produce the Cacao less in Size than what is gathered in other Parts, yet this is esteemed the best in Quality of all that *America* yields.

This Coast affords little Trade besides this Fruit, though here are some Hides and Silver, but these are contraband Commodities; and the Goods most vendible here, are several Sorts of Linens from *Europe*, and Calicoes from *India*, Brandy, Earthen Ware, and several other Manufactures of *England*, *France*, and *Holland*.

*Of the Commerce of the SPANISH AMERICAN Coasts in the SOUTH SEA.*

THAT Part of the Ocean, entered from the North Sea, by the Straits of *Magellan, Maire, and Bowers*, and which washes the Meridional Coasts of *America*, from the said Straits to the Isle of *California*, is called the *South Sea*; it is also called the *Red Sea*, the *Pacifick Sea*, the *Sea of California*, and the *Sea of Jesse*; but this is only when a Part is to be specified, the Name of the *South Sea* comprehending the whole, when speaking in general.

The principal Cities which the *Spaniards* possess on these Coasts, and where they carry on the greatest Trade, going up them from *Chili* to *New Spain*, are *Baldivia*, the *Conception*, *Valparaiso*, *Arica*, *Lima*, and *Callao* its Port, *Panama*, *Acapulco*, and *La Navidad*; besides which principal Places, here are a Multiplicity of small Ports between them, that either serve for lading Places to some inland Cities, or for carrying on a coasting Trade, with the Products of each particular District; the chief of which are *Auroca*, *Lavelia*, *Guarme*, *Paita*, *Rio-Tomba*, *Selaques*, the *Trinity*, *St. Michael*, *Tomaco*, *Sansonnat*, *Sagno*, *Nasca*, *Pisca*, *Pachacama*, *Barbacoa*, *Tecoantepeque*, *Nicoya*, *Chiricito*, and some others.

*Baldivia*, *La Conceptione*, and *Valparaiso*, are situated on the Coast of *Chili*, and it is in their Ports that all the Trade of this Kingdom with that of *Peru* is transacted, as the Way by Land, although shorter, is both more difficult and dangerous, on Account of the Mountains to be crossed, which are almost all desert, and so difficult of Access, by the extreme Cold always reigning here, that there are but few Merchants who care to run the Hazards of them; and the other Road by the Desert of *Datacoma*, notwithstanding it is the shortest, is not less difficult through the Want of fresh Water.

*Baldivia* is the first City found on the Coast, after passing the Straits of *Magellan*, and is seated two Leagues from the Sea, in the fortieth Degree of Latitude, between the Branches of two Rivers, which at their Mouth form one of the finest and securest Ports on all this Coast. The Gold Mines, which are not very distant, and more abundant and rich than any other of *Chili*, rendered it formerly very famous, but the Revolt of the *Arauco Indians*, who invaded and took it in 1599, and whom the *Spaniards* have not been able to subdue since, has greatly diminished its Reputation and Trade, although these latter are re-established here, and maintain a Garrison of two hundred Men. Its principal Trade by Sea is to *Lima* the Capital of *Peru*, where they yearly send eight or ten Vessels of four or five hundred Tons, laden with all the Products of the Country, among which are Beef and Goats' Skins, Tallow, Salt Meat and Wheat. And the Returns made by these Ships are in Wines, Sugar, Cacao, Spiceries, and all Sorts of *European* Merchandize, that arrive from *Porto Bello* to *Lima*, by Way of *Panama*. Its Inland Commerce is to *St. Jago*, Capital of *Chili*, through which it receives from *Buenos Ayres* the various Commodities mentioned in treating of the Trade of that famous City.

*La Conceptione*, reckoned the second City of *Chili*, counting *Baldivia* for the third, and *St. Jago* for the first, is seventy Leagues from this last, and sixty from the other. Its Port, in Form of a Horse-shoe, and from thence called by the *Spaniards* *Herradura*, is five Leagues from the City, to which light Vessels go up by the River *Andalien* which crosses it. The Mines of *Quilacoya*, and *Quilacura*, are only four Leagues distant, and the principal washing Places of the Kingdom much about the same; it is here that on separating the Earth from the Metal by this Lotion, that those Lumps of Gold are discovered, which are of the greatest Purity, and so much enrich the fortunate Finders: And which, as well as all that is extracted from the Mines, is carried to the Mint at *St. Jago*, to pay the King's one fifth, which is sent with the Rest of the Royal Revenue to *Lima*. The Natives breed a great Quantity of large Cattle and Goats, the Skins of which list they make into *Cordovans*, and send these with the other Hides to *Lima*, from whence, by *Panama* and the River *Chagre*, they are transported to the North Sea. The other Commodities in which they trade being much the same as those of *Baldivia*, with the Exception of Wool and Cloth, and other

Stuffs made in the Country, and the Ships which the Inhabitants send Yearly to *Peru*, being ten or twelve, bring with little Difference the same Returns as those of the other aforesaid City do.

*Valparaiso* is seated in a Bay of the same Name, at the Mouth of the River *Topocalma*, and serves as the Port to *St. Jago*, the Capital of *Chili*, built on the same River, fifteen Leagues from the Sea. This Port is one of the safest and most commodious of those on the South Coast, and is where all the King's Revenue of *Chili* is embarked for *Peru*, as also the Effects of Particulars destined for the North Sea, consisting especially of Gold, drawn from the Mines near *Baldivia* and the *Conception*, or those of *Tijil*, which are between *Valparaiso* and *St. Jago*. There are also carried to *Lima* Turquoises, which are found in an excellent Rock, opened in the Valley of *Copiapo*, in the Northern Part of *Chili*.

*Quintero* and *Coquimbo* are also two maritime Cities of *Chili*, where some Business is transacted, especially at this last, in whose Neighbourhood is a Copper Mine, producing Metal with which all the Artillery of *Peru* and *Chili* is cast.

*Arica*, although it is the least considerable City in *Peru*, for the Number of its Inhabitants, and Beauty of its Buildings, there is scarcely any Place which, in so small a Time, transacts so rich a Commerce, its Warehouses being, for fifteen Days, the Depositories of all the Treasures from *Potosi*; and the Silver Fleet, which yearly sails with the King's Revenue, and the Mines' Produce for *Lima*, to be afterwards forwarded by the Way of *Panama* to *Porto-Bello*, in the North Sea, for the Galleons. This Treasure is brought from *Potosi* to *Arica* in March; and in June the *Lima* Ships come to lade it. The City is situated in eighteen Degrees forty Minutes of Latitude, seventy Leagues from the City of *Potosi*, to which it however serves for a lading Place, as before-mentioned.

The Merchandizes which are brought from *Lima*, and other Ports of *Peru*, to *Arica* for *Potosi*, are *European* Cloths and Serges, with others from *Quito*, where the best Woollen Manufactures are of all *Peru*. Gold, Silver, Silk, and Cotton Stuffs; these made in the Country, and the others coming from *Spain* by the Galleons, Flour, Wheat, Maiz, or *Indian* Wheat, *Acicoca*, an Herb serving instead of *Paraguay*, *Ariquipa* Wines, the best of *Peru*, where the King of *Spain* permits the planting Vineyards, Oil, Olives, Butter, Cheese, Sugar, Salt, Quicksilver, Sweetmeats, Syrups, and all Sorts of Hard-Ware, and Iron Utensils for the Service of the House and Mines; all which are paid for in the latter's Argentine Produce; as the City of *Potosi*, called also an imperial City, being seated in a Country so barren and unfruitful, would furnish nothing to Trade, if its Mountains did not cover those inexhaustible Silver Mines they do.

It is also owing to the Richness of its Mines that this City is the finest, most populous, and abundant in all Things, of any one in *Peru*; its Inhabitants amounting to more than sixty thousand, among which are at least ten thousand *Spaniards*. And its Markets, Warehouses, and Shops, are ever full of all Sorts of Fruits, Sweetmeats, Wines, Stuffs, Jewels, *European* and *Indian* Curioisities, with an Infinitude of other Merchandizes and Wares, to gratify both the Taste and Sight, subserving as well to Pleasure and Use as Ornament; although, as has been said, none of these Things grow; or are the natural Products of the Country.

*Lima*, called also by the *Spaniards* *Ciudad de los Reyes*, is the Capital of *Peru*, and seated two Leagues from the South Sea, being a Place of the greatest Trade in all this Part of *America*. The Riches of *Peru* and *Chili* are brought here from the Ports of *La Conception* and *Arica*, where they are collected; and the greatest Part of the Goods that arrive from *Europe* at *Porto-Bello*, and *La Vera Cruz*, are also brought here from the one by the Ships of *Panama*, and from the other by those of *Acapulco*. The Inland Commerce of this City is not less than its foreign one; and if it maintains this latter with all the Places on the South Sea Coasts, from *Chili* to *New Spain*, its home Traffick is equally extensive, as it does not only spread to all the Provinces that compose the Empire of *Peru*, but to all the other Kingdoms of Southern *America*, even to *Buenos Ayres* and *Carthagena* on the North Sea.

The Trade of *Lima* is carried on, partly by *Spaniards*, and partly by *Indians*, these latter having more Liberty here than in any other Place of the King of *Spain's*

*Spain's* Dominions, on Payment only of a small Tribute twice a Year. It is these that do all the servile Work, and are the sole Mechanicks and Husbandmen, the *Spaniards* thinking it beneath them to stoop to such Offices, and only engaging in the more valuable Branches of Trade, such as Gold and Silver, Silks, *European* Cloth, &c. with which, and indeed with every other Conveniency of Life, this City is so well supplied, as would induce a Belief, that this Plenty could only be the Product of the Country. The Gold comes here from *Cbili*, *New Castile*, *Cusco*, and some other Provinces of *Peru*; the Silver from the Mines of *Potosi*, and those of *Oruco*, *Tarapaca*, and *Cbocolcora*; and the Quicksilver from *Europe* and *Juancabeluca*, forty Leagues from *Lima*. They get the Country Stuffs from *Quito*, and from the Mountain Towns, which are in the Neighbourhood of their Capital. The Wines are brought them from *Arequipa*, *Yca*, *Cisca*, and *Najca*; as the Cattle are from *Xaxra*, *Cusco*, *Caneto*, and *Guemangua*. The Sugars, Sweetmeats, Syrups, and Preserves, are made at *Jamanga*, and *Gnara*. The Wheat, Flour, and Maize, come from this same Place, *Vancas*, and the Villages near to *Lima*; Dry Fish from *Pieta*; Carpenter's Wood from *Guyaquil*, though cut on the Side of *Gallo*, near to it; and Salt from the Ponds of *Gnara*, &c. Oil and Olives from almost all the Ports of the Coasts between *Arica* and *Lima*.

Pearls are brought from the Pearl Islands in the South Sea, and Part from *Panama*, of the Fishery of *Rancherie*, also formerly of *Margarita*, in the North Sea; and precious Stones are found in many Rocks, Mines, and Rivers of *Peru*.

All the Gold and Silver Mines are so rich and abundant, that, as it is asserted, the King of *Spain* has in less than fifty Years received for his one-fifth, of only those of *Potosi*, one hundred and eleven Millions of Dollars.

*Calao*, as before-mentioned, the Port to *Lima*, is two Leagues from the City, spacious and very secure, without Rocks or Shallows. It has two Channels, the one for large Ships, on doubling the Isle of *Lobos* that covers it; and the other for Barks, or small Vessels, by a Strait between the Continent and the Island. The City lies along the Bank, and all its Inhabitants, above two thousand, are either *Lima* Factors, Carriers, Sailors, or Inn-keepers, as its Buildings are Warehouses for the Reception and Deposit of the Goods that arrive from *Acapulco*, *Panama*, *Arica*, and the *Conceptione*, or Inns to accommodate the Merchants who arrive from all Parts, when the Fleets come here to lade or discharge. Two Fleets, both called the same, Plate Fleets, are annually fitted out in this Port, the one for *Arica*, and the other afterwards for *Panama*. The first sails towards the End of *February*, and after having laden the Silver of the *Potosian* Mines, returns to *Lima* in about a Month, or by the Beginning of *April*, near the same Time that the Vessels from *Valparaiso* bring here the Revenues of *Cbili*. As soon as this Fleet is returned, and the *Cbili* Vessels are arrived, they unlade the Goods, to wait a proper Season for the Voyage to *Panama*; the least valuable are put in Warehouses, and the Gold and Silver, with what else is precious, sent to *Lima* in Carts, or on Beasts of Burthen, with which the Road from *Calao* to that City, is nearly full during the whole Year, more especially in the three or four Months of the Fleet's Arrival and Departure. Also in the Months of *March* and *April* there arrive at *Lima* by Land, Gold, Silver, and the Merchandize of all the Provinces of *Peru*, that are destined for *Porto Bello*, and which must be ready for the Sailing of the *Panama* Fleet.

The Departure of this second Fleet is always at the Beginning of *May*; and it is commonly two-thirds bigger or stronger, both in Merchant Ships and Men of War, than the other; because, besides the Riches of *Potosi*, which the Fleet of *Arica* only brought, that for *Panama* carries also all the Revenues of the King and Particulars' Effects from *Cbili*, *Peru*, and a great many of the other Kingdoms of *South America*. And it is by Return of this Fleet, that all the Goods destined for *Peru* and *Cbili* are brought; and from thence sent either by Sea or Land to the Places they are consigned to.

Besides the Fleets before-mentioned, there is yearly equipped at *Calao* a Twenty-Gun Ship for *Acapulco*, a famous Port in *New Spain*, by which the *Spaniards* of *Mexico* maintain a great Trade with the *Philippines*, and receive a large Quantit

of Goods from *India* and *China*. This Vessel arrives at *Acapulco* a little before *Christmas*, and carries there Cacao, Dollars, and Quicksilver; in Return of which she brings back Spice, Silks, Chints, Calicoes, and a few other *Indian* Commodities; though this Trade is prohibited to all others but to those concerned in the said Ship; the Court of *Spain* having interdicted it to all the Rest of *Peru*, under very severe Penalties, for Fear of hurting that which *South America* carries on with *Spain* by Way of *Panama* and *Porto-Bello*.

This was the Situation of *Calao* before the Earthquake, which with an Inundation of the Sea, that happened at the same Time, destroyed every Person in the Town, except one Man, who crept up the Flag-Staff, and dropped from thence into a Canoe, which floated under it. As this happened before the Peace of *Aix-la-Chapelle*, it is not doubted but the Damage is repaired in some Measure, but it is so difficult to get Accounts from that Country, that nothing can be said with Certainty.

The chief Places with which the *Spaniards* maintain a regular Commerce on this vast Extent of Coast, are *Leon*, *Guayaquil*, *Truxillo*, *Lejparso*, *Lavilla*, *Nicoya*, *Chiriquita*, *Paita*, *Sagna*, *Najca*, *Pijca*, and *Pachacama*, of which the first produces Sugar, Cattle, Hides, Pitch, Resin, and excellent Cordage, besides Plenty of Timber for Ships, whereof more are built here than at any Place in the South Seas, except that I am just going to mention.

*Guayaquil*, in the Province of *Quito*, whose Products are Gold, precious Stones, Cacao, Green Hides, Tallow, Sarsaparilla, Woollen Stuffs of the Country Make, Saltpetre, Brimstone, and Wood, worked up in the Ship-Yards of this Place; it also produces Cacao in such Plenty, that there is hardly a Year in which thirty thousand Bales, of eighty-one Pounds each, are not shipped off, and sometimes the Quantity is doubled. The Goods imported here from *Lima* are Wine, Oil, Spice, and other *European* Commodities.

*Truxillo* is six Leagues from the South Sea, having a Port called *Guanabaco*, the most difficult to enter, and the most unsafe of any on the Coast. Its chief Trade consists in Wheat, Flour, Wine, Sugar, Sweetmeats, especially Quince Marmalade in Casks, Cattle, Horses, Mules, &c.

*Lejparso* is situated in the Bay of *Caldaria*, two Leagues from the Sea; it is the Port to *Carthage*, a City of *South America*, in the Province of *Quimbia*, twenty-four Leagues distant from it, and formerly had a good Trade, but it is now reduced to some Sugar, Hides, and Provisions, for *Lima*.

*Panama*; of all the Cities I have hitherto treated that trade with *Lima*, none have supplied it with other Commodities than those of their own Growth and Manufactures except *Acapulco*; but a quite different Commerce is transacted from *Panama*. Before the City was taken, pillaged, and burnt, in 1673, by Sir *Henry Morgan*, it was seated on the Shore of the South Sea, at nine Degrees of North Latitude; but the new one is built at four Leagues distance from the Ruins; more magnificent, better fortified, and with a greater Number of Inhabitants. It gives Name to a large Bay in which it is built, and to the Isthmus, that, separating the two Seas, joins the Meridional to the Septentrional *America*, and is equally famous for its Land Trade with *Porto-Bello*, on the North Sea, and its maritime Negotiations with *Lima* on the South Sea, collecting in its Warehouses all the Goods that the Galleons bring from *Europe*, as well as all the Riches of *Cbili* and *Peru*, which come by the Plate Fleet; and although it at all Times carries on a very considerable Commerce, and has its Road always filled with a great Number of Vessels; it is, nevertheless, on the Plate Fleet's Arrival, and with the Goods by the Gallions, that the greatest Concourse of Merchants meet here, and the Trade is most flourishing, being then that the Fair is held, which attracts both the Nobility and Commonalty of the Neighbourhood to assemble and increase the Throng.

As soon as the Galleons touch at *Carthagena*, where they remain some Time before they proceed to *Porto-Bello*, a Courier is dispatched to *Lima*; and on the Receipt of this Advice, the Viceroy orders the Plate-Fleet afore-mentioned to be laden and dispatched, under Convoy of four or five Men of War; whilst the President of *Panama*, on his Part, directs the providing Mules for the Carriage of a Part

a Part of the Treasure by Land, and Barks for the Conveyance of the Remainder by the River *Chagre* to *Porto-Bello*, that no Time may be lost, as the Galleons only remain there about a Month, during which Time every Negotiation must be transacted. It is computed that the King's Effects laden on the Galleons, commonly amount to three Millions of Pieces of Eight in a common Year; and that the Merchants' registered Effects are three or four Times as much, *extra* of what is shipped clandestinely. All the Galleons must be ready to sail the thirtieth Day after Arrival, otherwise they run a Risk of being left behind; however, the Admiral commonly grants an Addition of eight Days, which is of great Relief to the Merchants, and nothing disadvantageous to himself, as this Benefit is always procured by the Intervention of a considerable Present. The Goods proper for this Voyage have been already described in the Article of the *Spanish* Trade, so I shall only add here, that all Iron Instruments, such as Hoes, Axes, Hatchets, Anvils, &c. Spice, Wine, Oil, Laces, and Gold and Silver Stuffs, are likewise proper Objects of this Trade.

The maritime Towns, where, next to *Lima*, the Merchants of *Panama* carry on their Trade, are *Lavillia*, which furnishes it with Hogs, Poultry, salt Beef, and Strops; *Paita*, or rather *Piura*, to which the other is the Port, whence are exported Wine, Oil, Flour, Sugar, Soap, and Goat Skins, made into Cordoans; *Realgio*, yielding Brandy, Sugar, Oil, Flour, and Wine; *Galio*, *Tomago*, and *Chiloe*, three Islands producing yearly a large Quantity of Timber and Boards; *Pijca*, fruitful in excellent Vineyards; *Truxillo*, abundant in Wheat, Flour, and Sugar; *Oicoya*, where are Plenty of Shipwrights and Yards, as also a Quantity of Cattle, Hides, Wheat, and Red Wood, or Nicaragua. There are also some *Panama* Barks, which go yearly to fish for Pearls at the Isle of *Gorgona*; this being the only Place where they are found in the South Sea; those called the Pearl Islands, within twelve Leagues of *Panama*, now producing none.

*Tecoantepeque*, *La Trinidad*, *Vatulco*, and *Realjo*; are Places also on this Coast between *Panama* and *Acapulco*, which serve for Ports, where all the Traffick of *Guatemala*, *Leon*, *Quaxaca*, *Nicarague*, and some other Provinces of *New Spain* is transacted, which consists in Cacao, Vanillas, Achiot or Rocou a Dying Herb, Indigo, Cochineal, Hides, Wheat, Maiz, Wool, Sugar, Cotton, Salt, Honey, Cassia, Wax, and in some other of the Products of *Mexico*.

*Acapulco* is next to the Port of *Tecoantepeque*, and seated seventeen Degrees North of the Line. It is the Western Port to the City of *Mexico*, as *Vera Cruz* is the Northern; and the principal Places of its Trade are *Peru*, the *Philippines*, and the Coasts nearest to *Mexico*; the Commerce of which latter is entirely negotiated through the last four mentioned Places, and some other small Harbours, where the Merchants of *Acapulco* send their Goods on light Vessels, to extract Provisions and Refreshments, although they receive large Parcels by Land on Mules, particularly Flour, Chocolate, small Cheese, Salt Meat, and all Sorts of such Provisions, for which they have daily a Market; and the Cattle they want comes the same Way. I have also treated of the Trade between *Acapulco* and *Peru*; and though that between the Northern and Southern *America* is open and free, yet the Inhabitants of this City make but little Use of it, their Commerce being only extended to the Places on the Coast, so that what is transacted between this and the *Manillas*, is what gives it Reputation, and which is carried on, in only two Ships of eight hundred or a thousand Ton each; whereof one is always in lading at the *Philippines*, and sails on its Return, as soon as its Twin Vessel arrives, a Convoy being assigned them, of a twenty-eight Gun Ship, and they mounting forty each. Their Cargo from *Acapulco* consists partly of *European* Merchandize, brought to *Mexico* from *La Vera Cruz*, and partly of the Products of *New Spain*, both sent to the South Sea on Mules. The Relading back is composed of whatsoever *Asia* produces, that is either rich or valuable, even Pearls, precious Stones, and Gold Dust, with which these Ships are so fully stowed, as to render their between deck Guns unserviceable in Case of an Attack.

## Of the Trade of FRENCH AMERICA.

I SHALL begin with the Isles which the French possess in this Part of the World; and first with the *Antilles* or *Carribee* Islands, of which this Nation are Masters of seven out of the twenty-eight; shared that of *St. Christopher's* with the *English*, till the Treaty of *Utrecht*, in 1713 gave it wholly to the latter; but during the present War they have recovered it.

*Martinico* is the chief of them, the others are *Grenada*, *Dominica*, *Tobago*, *St. Vincent's*, *Guadalupe*, and *St. Croix*. Above two hundred Ships are employed in the Trade of these Islands, and it is not uncommon to see eighty Merchantmen lading at *Martinico* together. Tobacco was formerly the Staple Commodity here, but the Cultivation of that Plant has been long neglected for Sugar, more especially at *Martinico*, which alone is supposed now to yield in a common Year, between five and six Millions of Pounds Weight; *Grenada* and *St. Croix*, four or five hundred thousand between both: *St. Lucia*, taken by the *English* in the present War, grows only Tobacco, with some Pulse and Greens: Though, besides these Commodities, the Islands produce among them Indigo, Cocoa, Rocou, Cotton, Ginger, Cassia, Guinea Pepper, some Medicinal Gums, Hides, Tortoise-shell, Dying Woods, &c. The Commodities sent there from *France*, are very Necessary for Provisions and Clothing, Household Furniture, and Tools for various Uses, especially for Agriculture.

*St. Domingo*, divided as I formerly mentioned between the *Spaniards* and *French*, carries on a very considerable Trade, of which the chief Places assigned the latter are *La Grande Ance*, *Leogane*, *La Grande Terra*, *Port de Paz*, *Port Margot*, *Lanon Louisa*, *Trou Charles Morin*, *Lemodada*, *Cape François*, and the *Little Goave*. Besides this Distribution of *St. Domingo*, the *French* possess the smallest Isle of *Tortuga*, about three-fourths of a League from the other, and the Products of both are Tobacco, Sugar, Indigo, Ginger, Rocou, Cotton, Cocoa, Hides, Braziletto, yellow Sanders, Fustick, Cedar, Genadillo, and some other Woods for the Dyers' or Cabinet Makers' Use. The Ships' Cargoes proper for these Isles are much the same as those for the *Antilles*, excepting the Salt Meat, which is not here wanted, *St. Domingo* having it in so great Plenty, as even to supply the other Isles with large Quantities: Here are about four thousand Families established in the whole Settlement, which more than double those of the *Spaniards*, though these latter are near a Century more ancient here than the others.

On the Continent of *North America* the *French* possessed *Louisiana*, called also *Mississippi*; and in the Southern *America*, *Cayenne*, and some other Habitations on the River *Surinam*. They have been sometimes also Masters of *Nova Scotia*, as formerly hinted, and they were once so of *Newfoundland*; but these having been ceded to the *English* by Treaties, I shall only remark here, that with Respect to the latter, the *French* are, in Consequence of the thirteenth Article of that of *Utrecht* in 1713, permitted during the Fishing Season to build themselves Stages and Huts, and whatever else is necessary for Curing and Drying their Fish, though this Privilege only to extend from *Cape Bona Vista* to the Northern Extremity of the Isle, and from thence Westerly to *Cape Ricbe*; but they are to build no Houses, much less Fortifications, nay, are not so much as to anchor here, only in the aforesaid Season.

*Louisiana*, or *Mississippi*, is a vast Extent of Country of more than one hundred and eighty Leagues, lying in *North America*, between *Canada*, *Carolina*, *Mexico*, and the Ocean. It is in these newly discovered Lands that the famous Colony is established, which after the Year 1717 engrossed the Attention of all *Europe*, and set the major Part of it a madding after their Example, to the Ruin of many thousand Families; however, I shall here consider it in its present Situation, and give an Account of the real Trade that is here subsisting; regardless of the chimerical and ideal Advantages some of its most sanguine Adventurers at first proposed from it. The chief Settlement of this Colony, or more properly speaking the Capital of all the Country, and Centre of its Commerce, is the City to which the Name *New Orleans* was given, to preserve the Memorial of the Re-

gency of that Prince, under whose Protection and Auspices it was founded. Its Situation is on the Side of a River, near enough the Sea to have the Conveniency and Facility of lading and unlading the Ships that import, and at a sufficient Distance to avoid its bad Air and Neighbourhood, when irritated. The Trade carried on here is much the same as at *Canada*; and some *Indians* have assured the *French*, that high up in the Country are found Mines of Gold, Silver, Copper, Iron, and Steel. These Mines are, however, undiscovered, but the true Riches of the Country consist in that great Quantity of Cattle with which the Plains and Forests of *Louisiana* are filled, viz. Horses, Asses, Bulls, Cows, Sheep, Goats, and Hogs, of which the *Indians* make a great Slaughter in their Excursions, and bring both Flesh and Skins to the Colony, and there Exchange them for Trifles. The Supplies from *France*, proper for this Colony, are the same as has been directed for the Islands; with the Exception, that to what the Country produces towards the Support of its Inhabitants, must be added, *fe* Corn, Rice, Pulse, and all that can contribute to sustain so numerous a Colony; and the Merchandizes fit for the Trade with the *Indians*, are coarse Woollen Blankets, serving for Clothes, *Limbourg* Cloths, white and red, and Cloaks ready made of them; ordinary Hats, Knives, Hatchets, and Pick-Axes, small Mirrors, Glass Beads, and Vermillion.

The Ports, Posts, and Establishments, which the *French* at present occupy are sixteen, viz. the Isle *Aux Vaisseaux*, *Biloxi*, or *Fort Louis*, *New Orleans*, *Manbac*, *Matches*, *Natchitoches*, *Yafous*, *Illinois*, *Oubache*, *Isle Dauphine*, *Fort de Conde*, *Alibamons*, the Bay of *St. Bernard*, the River *Aux Cannes*, *Padoucas*, and *Missoures*. This Country produces Rice, Indigo, Cotton, Tar, Pitch, but mostly Tobacco.

By the Vllth Article of the Treaty of Peace 1763, all that Part of *Louisiana* lying on the East Side of the River *Mississippi*, with the free Navigation of that River, was resigned to the *British* Crown. And, in 1769, the *French* ceded *Louisiana* to the Crown of *Spain*.

*Cayenne* is the only Settlement the *French* have in *South America*, except some Habitations that they possess on the Coast of *Surinam*, and the River of *Amazons*, which form a Sort of Government of more than a hundred Leagues.

The Isle of *Cayenne* that gives Name to this Government, and takes it from a River whose two Branches separate it from *Terra Firma*, lies in the Latitude of four Deg. forty Min. a hundred Leagues from the great River of the *Amazones*; It is seventeen Leagues in Circuit, of which five are bathed by the Sea, and the Rest by the two Branches of the River aforesaid: And has been successively possessed by the *English*, *French*, and *Dutch*, though the *French* have finally remained Masters of it ever since 1677. Its chief Products are Sugar, Rocou, Indigo, Cotton, and Vannillas; and the Commodities sent here from *France*, are principally Flour, Wine, Brandy, Linens, Stuffs, Quicksilver, Hard-Ware, and above all Salt Meat; the Inhabitants, exclusive of the Soldiers and Slaves, are about twelve or fifteen hundred Men, spread in the different Habitations above-mentioned, of which the Chief, composing a small Town of two hundred Houses, with three hundred and fifty Whites, is below *Fort Louis*, where the Warehouses are kept.

#### Commerce of the PORTUGUESE in AMERICA.

THIS Nation's Possessions in *America* have been many Years since reduced to the *Brazils* only, though this is a Part of the New World so vastly extensive, fertile, and rich, that they have no Room to complain of their present Share. This Country reaches from the *Amazon* River to that of *Plate*, and has its Coasts curved into a Semi-Circle of about twelve hundred Leagues Extent, though the *Portuguese* do not occupy the Whole, having no Habitations beyond *Rio Janeiro*, which is two hundred Leagues from the River of *Plate*, its Southern Boundary. The inland Country is yet unknown, as the *Portuguese* have never penetrated it above eighty Leagues, by Reason those vast Regions which separate it from *Peru* are inhabited by innumerable Nations of *Indians*, who, loving Liberty, dispute the Acquisition of their Lands, Inch by Inch, as they regard foreign Settlements only as Usurpations. The *Portuguese* have divided their Establishments into fourteen Captainships, or Commanderies, viz. *Tamaraca*, *Babia de todos los Santos*, *Pernambuco*, *Paras*, *Maragban*, *Ciara*, *Rio Grande*, *Paraiba*, *Ceregippe*, *Los Isleos*, *Porto*

*Porto Segure, Spirito Santo, Rio Janeiro, and St. Vincent;* of whose Commerce I should now treat; but having already done it in the Section on the Trade of *Portugal*, any further mention here would be superfluous.

I might here also very properly add, an Account of the Trade which some other Northern Powers carry on in *America*; but having as yet given no Description of their *European* Commerce, I shall join them both together, by reciting the general Traffick of each particular Potentate, and begin first with the *Dutch*.

*Of the Trade of HOLLAND.*

**N**OTHING gives a greater or more magnificent idea of this Commerce, than the flourishing Condition it has always supported the States in, notwithstanding the many long and expensive Wars it has for a Century past been so frequently engaged in. Three Things more especially support this immense Traffick; the one is the great Credit of the Bank of *Amsterdam*, whose Treasure is supposed by some to be three thousand Tons of Gold, of an hundred thousand Guilders each; the second Thing so advantageous to the Trade of *Holland*, is the incredible Number of Ships, continually going out and coming in; and the third, is the Safety with which its Trade is carried on, by the Government's Protection in Time of War, or when any Cruizers or Pirates make it necessary. And though this Commerce is so extensive, it is kept up by a People, whose Country contributes hardly any Products towards it; as the *Dutch* have nothing more of their own than some Butter, Cheese, Earthen-Ware, and some few other Trifles that they can spare; very little Wheat growing in *Holland*, and no Wine at all; the few Sheep here, have a Wool coarse and harsh; the Land produces very little Flax or Hemp; one of its best Qualities being its Propriety, in several Parts, for Fuel, so that the Inhabitants, for Want of other, are reduced to the Necessity of burning the Earth that bears them; but its fat Pastures nourish great Herds of Cattle, producing the prodigious Quantity of Milk, that suffices for the daily Want of a People peculiarly fond of a lacteal Diet, and for making Abundance of Butter and Cheese, of which they eat more than any Nation in the World. Their Manufactures are many, and very considerable, though almost all the Materials for them are brought from other Countries. I have already mentioned the Particulars of their Trade with us, with *France, Spain, Portugal, and Italy*, and blended it with that of the other *Europeans* on the Coast of *Barbary, Africk, and Asia*: I shall therefore only add here, the State of it with their Septentrional Neighbours. The Trade carried on nearest Home, and the most convenient for the Safety of the concerned, is that which they maintain with a Part of *Germany*, by Means of the Rivers running through the Country, or on the Borders of it; such as the *Rhine* and *Muse*, which bathe their States; the *Weiser, Ems, and Elbe*, not very distant from the *German* Ocean. The Traffick of the *Rhine*, and with it that of the *Moselle* and *Maine*, is very considerable. *Cologne* is properly the Centre of the Commerce carried on here, where the Merchandize of *Lorraine*, and the Archbishopsrick of *Treves* are collected; such as Wood, Iron Bars, Cannons, and Bullets of the same Metal. It is likewise by the *Rhine* that the Products of *Mentz* and *Franconia*, washed by the River *Maine*, are conveyed to, and sold in the celebrated Fairs held twice a Year at *Francfort* or *Nuremberg*: The *Rhine* also serves the *Dutch* in bringing them the Flax, Threads, and Linens from the Duchies of *Juliers* and *Berges*.

The *Muse* facilitates the Trade of *Holland* with *Leige* on that River, as it does that of *Aix-la-Chapelle*, not very distant; and of which almost all the Trade is transacted in the first of these two Cities. The Extracts from *Leige* are Serges, Slates, Coal, Lead, Iron, Bullets, and Braziers made at *Aix-la-Chapelle*, &c. The *Weiser*, which has its Source in the Mountains of *Turing*, waters one Part of the *Lower Germany*, and after having passed through the Country of *Hesse* and *Brunswick*, falls into the *Germanick* Ocean. *Bremen*, seated fifteen Leagues from its Mouth in the Peninsula that it forms with the *Ems*, is the Deposit of all the Merchandize of those Parts; and it is in this City that the *Dutch* buy up the Carpentry Wood, Cheese, Wools, several Metals, and Beer, that are brought here

from *Lower Saxony, Hesse, Brunsvick, &c. Emden*, Capital of *East Friesland*, at the Mouth of the *Ems*, is the Staple of all the Commerce of that Part of *Germany* which traverses this River. The City is governed by its Magistrates, and the *Dutch* their Allies, or one may say their Masters, by the great Credit they have there, draw hence all the Merchandise of *Westphalia*, and especially of the Bishopsricks of *Paderborn* and *Munster*, which consists principally in Timber, Cloths; Wools, and Linens; it is also from thence that those Hams come, so generally esteemed in *Europe*; *East Friesland* also furnishes *Holland* with Cattle and Horns. In fine, the Trade of the *Elbe* is one of the most considerable that the *Dutch* transact in the *Germanick* Sea. This famous River has its Source in *Bohemia*, towards the Frontiers of *Silesia*; from thence traversing many rich Provinces, and amongst them the States of *Saxe, Brandenburg, and Brunsvick*, passes to *Hamburg*, the City which for its Trade has merited the Appellation of the *Amsterdam* of the North, from whence in about twenty Leagues it falls into the Sea, swelled by all the Rivers of *Bohemia, Saxe, &c.* that it has received during so long a Course.

The *Dutch* commonly transact their Business of *Lower Germany* at *Hamburg*, though they often go up to *Harburg* and *Magdeburg* for Wine and Wood, buying in those Parts even entire Forests which they sell, and fill large Magazines with this Commodity, to be in Readiness when they want, or think proper to vend or utter it. The Goods that the *Dutch* carry to *Germany* by the five Rivers aforesaid, are Silk and Woollen Manufactures, Mercery, Spice, Drugs, Dying-Woods, Sugar, Cheese, Herrings, Copper, and Ribbons.

*Ancvers, Brussels, and Malines*, furnish the *Dutch* with Thread and those Laces, bearing this latter's Name; *Ghent* and *Bruges* with Linen, Hemp, and Basons; *Brussels* and *Ouderode* with Tapestry; and *Lisle*, Capital of *French Flanders*, with Cambricks, Laces, and Baracans; the Returns are made in Woollen and Silk Stuffs, Drugs, Spices, &c.

The Traffick of the *North* and *Baltick* is one of the most important that the *Dutch* carry on; in other Branches of Trade, it seems as if they only worked for the other Parts of *Europe*; but in this almost all regards themselves; and it is from thence that they fetch the Grain which supports them, and the Things necessary to their Navigation; without which neither the State, nor Particulars, could subsist.

Although *Sweden, Denmark*, and some other States, seated on the *Baltick* Sea, are comprehended under the general Word *North*, yet *Norway, Archangel*, and some of the most Septentrional Provinces of *Russia* and *Denmark*, merit more particularly this Title; and it is with these that I shall commence the general Northern Trade.

Before the Year 1553, the Trade of *Muscovy* was carried on by the Way of *Narva* and *Revel*, Cities of *Livonia*, at the Bottom of the *Baltick* Sea; but the Port of *Archangel* having been discovered by the *English*, all the Trade of this vast Empire was transferred thither, being much more convenient than any of the others, especially on Account of the Passage of the *Sound*, which took away, or at least restrained, the Freedom of the Trade of those two Places; and there now sail annually from the Ports of *Holland*, particularly from *Amsterdam*, near forty Ships for *Archangel*, from two to four hundred Tons, always divided in two Squadrons; the one only of five or six Sail, which departs in *June*, and returns in *September*; and the others of thirty or thirty-two Ships, whose sailing is fixed in *July*, and its coming back in the End of *October*. These two Squadrons have always a Convoy, even in the midst of the profoundest Peace; and carry with them Silk and Woollen Stuffs, Linens, Castors, from *Canada*, Paper, Mercery, Hard Ware; Cannons, and other Arms, Powder, Brimstone, Copper, Lead, Pewter, Brandy, Wine, Oil, Vinegar, Sweetmeats, dried Fruit, Saffron, Sugar, Spice, Pepper, Herrings, Incense, Copperas, White Lead, Indigo; Woods for dyeing the *Russia* Hides; Laces, Gold, and Silver Wire, and of this latter Metal in Specie.

The Trade to *Norway* employs yearly upwards of three hundred *Dutch* Vessels from four to five hundred Tons, the greatest Part from the Villages of *Frisje*, or those in the Neighbourhood of *Amsterdam, Bergen*, the most considerable Port in

in the Kingdom of *Norway*, is where the *Dutch* drive their principal Trade, though they carry on some with *Dreutheim*, *Copperwick*, and a few other Places, in Spice, Salt, *Spanish* Wine, Vinegar, Brandy, Cheese, rolled Tobacco, and some Clothes. And as Timber for Ship-building is what the *Flemings* mostly bring back, they have made several Treaties from Time to Time with the King of *Denmark* concerning Wood, &c.

The Commodities which the *Dutch* lade in the *Baltick* being bulky, oblige them to employ a large Number of Ships, a thousand to twelve hundred, yearly, in this Trade, which they send less than half laden, though they always return with an entire Cargo; and as the Balance of Trade is in their Disfavour, by the Produce of their Goods sent being insufficient to pay for the Reladings, they are always obliged to accompany these Voyages with a Parcel of Rixdollars, to make the Deficiency good. The Commodities proper for *Sweden* and *Denmark*, are Spice, Drugs, *Portugal* and *Spanish* Salt, those from *France* not being in so much Esteem here, Sugar, Wine, Brandy, Linen, with Silk and Woollen Stuffs. For *Pomerania*, Cloth, Wine, Cheese, Salt, Tobacco, Spice, Iron, Lead, Pewter, and old Rixdollars. For *Dantzick*, a Quantity of Silks of all Sorts and Fashions; a great many Clothes; Dying Woods, seraped or ground; Madder, large Parcels of Spice, Drugs; *Italian* Cremor Tartari, Sugar, Oil, Paper; divers Sorts of Wine, Brandy, and *French* Salt, fit only for *Prussia*. In fine, they send to *Riga*, *Revel*, *Narva*, and *Pernau*, Cities of *Livonia*, Salt, Spice, Sugar, Tobacco, *French* Glafs, and above all, a Quantity of old Rixdollars, with which they pay for Goods not only of this Province belonging to *Sweden*, but also those that are transported here, from *Muscovy*, *Poland*, and *Lithuania*.

Their Whale Fishery, is very advantageous, occasioning a yearly Employ of near two hundred and fifty Ships, with between four and five thousand Men, but that of the Herrings so infinitely exceeds it, as almost to surpass the Degree of Comparison; above twenty thousand Men, and three thousand Busses, find an annual Occupation in it; and it is asserted, that they take and sell more than 300,000 Tons, one Year with another, which at two hundred Guilders per Ton, as a *Dutch* Author computes them, amount to sixty Millions, from which must be deducted near twenty-three Millions, for the Charges of Outfit, &c. and there remains nett Profit 370,000,000 of Guilders, or about 340,000l. Sterling.

Although the *Dutch* have no great Settlements in the *West-Indies*, since they were obliged to quit the Conquests they had made on the *Portuguese*, they notwithstanding carry on a very considerable Trade here; which is not a little augmented by the contraband Commerce for which their Colony at *Curaçoa* administers them frequent Opportunities. *Surinam*, *Aprovaeg*, *Berbice*, and *Boron*, seated in *South America*; *Bonnaire*, *Aruba*, and *Curaçoa*, among the *Soto-vento*, or *Leeward Islands*, and *Saba* and *St. Eustatia*, two of the smallest *Antilles*, are the only Colonies the *Dutch* possess at present in the *West-Indies*.

The four Colonies of *Terra Firma* take their Name from four Rivers of the Province of *Guiana*, along which they are established. Sugar, which grows here in Abundance, is the principal Object of their Trade, though they also cultivate Indigo, Tobacco, Ginger, and Cotton. The Merchants of *Amsterdam* carry on the greatest Part of this Trade, and have their Warehouses here always well filled with all Sorts of Goods that the *Europeans* usually send to *America*.

Of the *Antilles*, where the *Dutch* are established, neither of them is very considerable; *St. Eustatia* is the biggest, and *Saba* the smallest; these two are little better than Rocks, though the few Inhabitants residing here have found sufficient Earth distributed to raise a Support, and some Tobacco for Exportation; this is a Commodity common to them all.

The *Dutch* have several trading Companies established in *Holland*, such as the *East* and *West-Indian*, that of *Surinam*, the *North*, the *Lewant*, the *Baltick*, and the *Nova Zembla* and *Greenland* fishing Companies, all of considerable Advantage both to the State and Particulars.

Though however rich the Trade of these are, or whatever else is transacted by private Merchants with the other three Parts of the World, it is certain, that that which their *East-India* Company has carried on in all the Kingdoms of *Asia*, for little more than a Century past, is of a much greater Consequence, and infi-

nately surpasses it, both in Profit and Reputation. But as I have already given an Account of it, in my Description of *Afia*, I shall here close my Narrative of this Nation's commercial Transactions.

*Concerning the Trade of the NORTH, and the BALTICK SEA.*

**T**HERE is comprehended under this Name, not only what is enclosed within the Compass of this Sea, but also some Cities seated on the Rivers which fall into the *Germanick* Ocean that are near: And all that are more Northwardly, as *Norway*, *Danish*, *Swedish*, or *Muscovitch Lapland*, *Archangel*, *Boronday*, *Siberia*, *Greenland*, and *Nova-Zembla*.

*Hamburg*, an Imperial and Hanseatick City, is the most considerable of all of them situated on the *German* Ocean. Here is carried on, not only the whole Trade of the *Elbe*; but it is also by Means of its Merchants, that the greatest Parts of the *Remisses* are made, and Bills negotiated, with all the Cities of the North; an Advantage that it only shares with *Amsterdam*.

This famous Hanseatick City is more than twenty Leagues from the *Elbe's* Mouth; though Ships go up this River within two or three Leagues of it, and are there obliged to lighten, being barred a nearer Approach by a Bank of Sand, with whole Cargo. The Goods proper for this Place, are some *French* Salt, White Wine, to the Amount of six or seven thousand Barrels yearly, and of Brandy about four thousand, a little Vinegar, Cloths, wrought Silks, Spice, Drugs, Mercury, Prunes, and other dry Fruits, with a large Quantity of Paper. And the Goods exported from thence are, Grain, Wood for Ship-building, Pipe Staves, Lattin, and white Iron Wire made in *Saxony*, and all Sorts of Copper Pots and Kettles. Here are also found the many various Species of Goods that the *North* and *Baltick* produce, though not so cheap, being at second Hand. It carries on a great Trade with *France* and *Spain* in its own Shipping, though much more in foreign Bottoms, and its Engagements with *Holland*, &c. are already spoken to. I have also described its Bank, and should now say something about its Coin, that has occasioned such Embroils between this State and the Crown of *Denmark*; but a nice Deduction of the Motives to, and Particulars of these Disputes, would be too prolix for the Space I have left, and a curtailed Account must be unatisfactory; I shall therefore excuse adding any Thing on this Subject.

*Bremen* on the *Weser* is in good Repute for its Trade, though much inferior to *Hamburg*. Large laden Vessels can only go within four Leagues of the City, and smaller ones to the Distance of a League and a half. The Imports are much the same here as the last mentioned Place, except *French* Salt, of which none is consumed. The Wood extracted from hence is the best in the *North*, but it is likewise the dearest; and here is also exported Wheat, Wool, some Metals, and *Brunswick* Mum, of which that of *Bremen* is nothing inferior.

*Denmark*, *Sweden*, *Muscovy*, *Poland*, *Courland*, and some Provinces of *Lower Germany*, environ on all Sides this Part of the Ocean that forms a Sort of great Gulf, named the *Baltick* Sea, which can only be entered by two Passages, the one called the *Belt*, difficult and dangerous, and the other the *Sound*, of which the King of *Denmark* is Master, by possessing the Fortres of *Kronemburgh*, near *Elfsinur*.

This Sea has a large Number of excellent Ports or Cities at but a little Distance, where a great Commerce is carried on; the principal of which are *Lubeck*, *Copenhagen*, *Elfsinur*, *Stockholm*, *Rostock*, *Stralsund*, *Stetin*, *Colberg*, *Dantzick*, *Elbing*, *Konigsberg*, *Riga*, *Revel*, *Pernau*, *Narva*, and *Vijbourg*, from which Places and Sea more Goods are in general exported and imported, excepting at *Dantzick*, where the Consumption is very great; this famous City being as a Magazine of all Necessaries to *Poland*.

*Lubeck*, an imperial City, and at the Head of the *Hans* Towns, seated in *Lower Saxony*, on the River *Traves*, which at ten Leagues from thence falls into the *Baltick* Sea, has a better Trade than *Bremen*, but a great deal worse than *Hamburg*. Here may sell yearly two thousand Lasts of *French* Salt, which the Natives refine, four thousand Barrels, or a thousand Ton of Wine, as many hundred Barrels of Brandy, and one hundred and fifty of Vinegar; Paper also finds a good Sale here;

and the *French* besides Sugar, Mercery, and some Silks, the *English* and *Dutch*, bring their Cloths, dying Drugs, and Pepper, to which these latter add Nutmegs, Mace, and Cinnamon. The Goods exported are Hemp, Flax, *Russia* Hides, from *Muscovy*, Iron wrought and unwrought, particularly Ships' Anchors, Wood, Grain, and Wools. Laden Merchant-Ships can only go to *Travemunde*, a small Village, three Leagues distant from the City, where they are obliged to lighten to the Draft of eight Feet Water, in which Condition they may swim up quite to *Lubeck*.

## Of the Trade of DENMARK.

THE Port of *Copenhagen*, Capital of the Kingdom, is not only the finest in the *Baltick*, but one of the most convenient and safe in all *Europe*; it is also here that the chief Trade of *Denmark* is transacted, though some Business is likewise done at *Elfsinur*; but neither at the one nor the other any thing in Comparison with the Negotiations of the Rest of this Sea. The Goods that sell best in *Denmark*, are *Spanish* and *Portugal* Salt, except their Consumption has been affected by the Mine discovered at *Oldesboe* in 1730, *French* Wines and Brandies, Paper, Gold and Silver Stuffs, *English* and *Dutch* Woollens, Spice, Medicinal Drugs, and Pepper, Tallow, Hemp, Cod, Stockfish, Wheat, from the little Isle of *Zealand*, and Rye from *Zealand*, are almost all the Merchandizes shipped from hence, the Extraction of Carpenters' Wood being excepted. The *Dutch* also transport from the Country of *Jutland*, a Quantity of lean horned Cattle yearly, which they fatten in their Pastures, and reap therefrom a considerable Advantage.

After *Copenhagen*, the most trading Cities of *Denmark* are, *Usted*, *Chriistianstadt*, *Carlsroon*, *Salzbourg*, *Carelsbaven*, and particularly *Elfsinore*, or *Elfsinur*, from which the Extracts are, some small Mafts, Deal Boards, Tar, Tallow, Beeves' and Goat-Skins. The major Part of which Trade, and indeed that transacted with all the Places in this Kingdom, except the Capital, is by Way of Barter, or the Intervention of Rix-dollars, brought here by the Dealers for that Purpose.

The other Isles next to *Zealand*, or *Sjeland*, in which *Copenhagen* stands, are *Fubnan*, *Laland*, *Langeland*, *Falster*, *Mune*, *Samsoe*, *Arroe*, *Bornholm*, and *Amack*; of which the first is nothing inferior to the principal Island, either in Extent or Goodness: It abounds in Wheat, Hogs, Lakes, and Wood; though it produces nothing for Exportation but Horses, the Fruits being all consumed at Home.

*Laland* yields Abundance of all Sorts of Corn, especially Wheat, from whence the Metropolis and other Parts of the Kingdom are supplied, besides which the *Dutch* export a good deal yearly.

*Falster*, *Langeland*, and *Mune*, are numbered among the fertile Islands, and the two first yield some Grain, for annual Transportation. *Arroe* and *Alsen* abound in Aniseeds, which the Natives ordinarily use to season their Victuals, and even mix it with their Bread. *Bornholm*, *Samsoe*, and the other Isles, breed Cattle, and produce a Sufficiency of Corn for the Inhabitants, but that of *Amack* deserves to be examined apart. This little Island is very near to *Copenhagen*, from whence it is separated only by a small Arm of the Sea, which is passed by a Drawbridge, and this Spot is the most fruitful of any other Territory in *Denmark*: It was many Years ago given to some *Hollanders*, transported here to manage the Dairy, in making Butter and Cheese for the Court; they had great Privileges granted them, of which they enjoy some to this Day, but others have been curtailed, and it is to be feared, that by little and little they will come to be placed on the Footing of other Subjects; the Industry and Diligence of the Inhabitants of this Isle have made it, as one may say, the Kitchen Garden of *Copenhagen*, and nothing in the whole Kingdom is to be found of the Sort that exceeds what this produces, and has growing here.

*Jutland* makes the greatest Part of *Denmark*; it is a fertile Country, abounding more especially in Cattle, but defective in good Ports on the Side of the Ocean; nevertheless this does not hinder the *Dutch* from making an annual Extraction of a large Quantity of meagre Cattle, as has been before mentioned. The Horses and Hogs are excellent, and very numerous, and the Corn sufficient for the Inhabitants. The Land is most fruitful near the Sea Coasts; and in a Word, is the best that the King of *Denmark* has.

The Duchy of *Sleswick*, or South *Jutland*, is in general a very good Country; the Conveniency of its Situation between two Seas, the Ocean and the *Baltick*, gives it great Advantages for Trade, although the Conveniences for Transportation are not many. It furnishes its Neighbours with Wheat, Cattle, Horses, and Fuel Wood, besides what it retains for the Natives' Use.

*Holslein* is very abundant and very agreeable; it is perfectly well seated for Trade, like the preceding, between two Seas, and has besides the Advantage to be near the *Elbe* and *Hamburg*, which being a free City, and consequently rich, is of no small Advantage to the Territories which the King and Duke of *Holslein* have in its Neighbourhood.

*Stormar* and *Dithmar*, or *Ditmarsh*, are two Districts nearest the *Elbe*; this Country is for the most Part low and rich, of a fat Soil like many Places in *Holland*, and similar to those also in its Fertility and Embellishments; these Countries likewise are benefited by the Neighbourhood of *Hamburg*, and the River they lie near.

The Country of *Oldenburg* abounds in Cattle, and raises a great Number of Coach Horses, very much sought after for their Colour, which is yellowish, though otherwise their Qualities are not extraordinary.

In general, though *Denmark* be of great Extent, it notwithstanding yields but in small Quantities the Necessaries of Life, few Products for the Merchants, and till lately no Manufactures at all; but, to remedy this long continued Neglect, and stir up the People to an Imitation of their industrious Neighbours, by an Ordinance of the King's, of the 28th *November*, 1727, all Merchants were prohibited to send to *Iceland* any other Cloths than those made at *Copenhagen*. There are also established some Fabricks of Linens at *Zwelck*, *Blank*, and *Lübich*, which are sufficient to supply all the Provinces of the Kingdom, inasmuch that the Chamber of Finances and Trade forbid, by the King's Order in *September* 1728, the Entrance of foreign Linens. In a Council held *February* 1725, it was resolved to raise a Tax or Impost on all the Cities, both of *Denmark* and *Norway*, and to employ the Produce in establishing a Fishery in *Greenland*.

The thirteenth of *January* 1727, his Majesty interdicted the Entry of any foreign Goods into the Kingdom by the Way of *Bremen* and *Lubeck*; and, for a still greater Encouragement to Trade, the King, in *February* 1730, published an Ordinance to lower the Duties on the Entry of Goods, that the Merchants his Subjects should introduce directly from foreign Countries, which however should not take Place on those brought into the Kingdom by Strangers.

In *August* the same Year, an Edict was proclaimed, by which that Monarch enjoined all his trading Subjects, not to send any Ships to *Portugal* or *Spain*, with a less Force than eighteen Guns, and a proportionable Crew, to defend themselves against the *Barbary* Corsairs, in Case of Need. And, in *January* 1631, *Christian VI.* suppressed the Farm on the Customs on Wine, Brandy, Salt, and Tobacco, permitting both the *Danes* and *Norwegians* to trade in them.

#### Concerning THE SOUND.

THE Passage, or Straits called the *Sundt*, or *Sound*, so famous in all the Northern Countries, is between the Isle of *Sialand*, and the *Terra Firma* of *Scania*. On the *Swede's* Side is the City of *Helsingburgh*, with a ruined Castle, between which and *Elfsinore* all the Ships which trade to the *Baltick* pass and re-pass, so that it may justly be said, that, after the Straits of *Gibraltar*, this is the most important and frequented one in *Europe*. The Loss of the Province of *Schonen*, which, with the three adjoining, were given to the *Swedes* by Treaty in 1658, was very considerable to the *Danes*, in Regard to this celebrated Passage, as they were Masters of the one, whilst they continued Possessors of the other; it is true, that by Treaties, the Right they had is expressly reserved to them, and, in Virtue thereof, they make all Ships pay the Impost at passing, excepting the *Swedes*, who were excused till 1720, when the Treaty of *Stockholm*, signed the 14th of *July*, between the Kings of *Denmark* and *Sweden*, re-united and confirmed the Sovereignty of the Toll to the first of these Crowns for ever; to which the *Swede* Ships have always since submitted like those of other Nations,

yet they cannot judge their Right to be as firm and secure, as if they were Masters of both Coasts, as formerly; for they may have the Title as formerly, but not the Power to support their Claim, in Case of any Disagreement with the *Swede*, which, whilst they possessed the other Shore, was uncontrollable. The Customs have been various, according as Times, and the Interests of Princes, have suited, and the levying them has given Birth to many Disputes, too long to be recited here; however, I shall just mention the supposed Origin of this Toll, which, it is asserted, took Rise from a general Consent of Merchants trading to the *Baltick*, readily to contribute a small Sum for the Raising and Support of some Lights on the Coast, to serve, in dark and tempestuous Nights, as Guides to the disconsolate Sailors: By this Means the Passage of the *Sound* soon became frequented, to the entire Neglect and Disuse of the *Great Belt*. But as many disputed the Payment of the aforesaid trifling Contribution, and nothing had been regulated to decide the Difference that ought to be made in the various Sizes and Burthens of the Ships subject to its Payments, the *Danes* began in Succession of Time to constitute themselves Masters of the Affair, and to exact more or less, according to the Force or Weakness of those with whom they had to deal, or proportionably to their Situation with the Princes or States to which the Ships belonged; which induced the Emperor *Charles V.* to fix the Toll for his Subjects of the seventeen Provinces, by a Treaty concluded with the King of *Denmark*, and signed at *Spire* on the *Rhine*, at two Nobles, a Gold Coin valued at six Shillings and eight Pence *English*, for each Ship of two hundred Tons, or under, on entering or coming out of the *Sound*, and for all Ships above two hundred Tons, three. This Treaty remained in Force, till the *Dutch* shook off the *Spanish* Yoke; but as their Contentions with that Crown exposed them to the Impositions of the *Danes*, these last taking Advantage of the Conjunction, raised this Tax to an excessive Height, which Abuse the *Dutch* had not Leisure to think of redressing, at a Juncture when their Wars and Troubles engaged their whole Attention; however, in the Year 1600, they combined with the *Lubeckers*, jointly to oppose so exorbitant a Duty, as was equally laid on the Subjects; from which Time the *Dutch* paid more or less, according to their good or bad Fortune; but in general they paid but little. *Denmark* and the *United Provinces*, as Sovereigns, made the first Treaty about this Toll, as Mr. *Savary* says, in 1647, by which they submitted to pay a certain Sum for each Vessel passing the *Sound*; and as this Treaty was only for forty Years, it consequently expired in 1687, when a provisional one was concluded, according to the said Author, for four Years longer; in the Expectation of adjusting at Leisure, a more durable and solemn Agreement of the many Disputes subsisting between the contracting Powers about this and several other Affairs. Mr. *Jean Pierre Ricard*, in his Book intitled, *Le Negoce d'Amsterdam*, printed in 1772, says p. 435. that the above-mentioned first Treaty was concluded on the thirteenth of *August* 1645, and renewed for twenty Years, the fifteenth of *June* 1701, with a Regulation what Ships and Sorts of Goods belonging to that Nation, are to pay *Sound* Duty. *La Martiniere* is also agreed in the Year, and adds, that it was likewise adjusted by this Treaty, that the Subjects of the *United Provinces* should pay Toll at the Rate of Four per Cent. on all Merchandizes, which with the Complaisance of our King *James I.* in Favour of the *Danes*, to the Produce of his own Subjects, out of Regard to the Princess of *Denmark*, whom he had married, confirmed that King's usurped Title, to what was otherwise precarious; and as Time and Treaties have now rendered it a Sort of Due, I shall consider it in this Light, and give an Account of it on the Footing it is at present.

The *English* Treaties with the Crown of *Denmark* are founded on those the *Dutch* have made with it, the first in 1667, but this speaks nothing of the *Sound*, so the subsequent one in 1670, is that wherein the Concession of the Passage Duty is made; it contains forty-two Articles, expressing, that a perfect Peace and Friendship shall commence and be established between the two Crowns; of which neither shall consent to any Thing prejudicial to the other. That they shall not assist each other's Enemies, if Aggressors, but *England* to assist *Denmark* if invaded. Each Party to be comprehended in any Treaty made with others, and a Freedom of Trade to be carried on between the two Kingdoms; *English* not to

come to prohibited Ports without Licence, or Strife of Weather, nor the *Danes* to any of the *British* Colonies. *Danes* may import all Things of their own Growth or Manufacture, and such as come from any Part of the River *Elbe*, into *England*, *Scotland*, and *Ireland*; and the *English* have the same Liberty for introducing all the Products of his *Britannick* Majesty's Dominions into any Part of *Denmark* or *Norway*, except Ports prohibited; though in Case any Strangers have hereafter Liberty to bring all Sorts of Goods into prohibited Ports, both Parties respectively shall have the same Privilege. Neither to pay any greater Duties than other Strangers, excepting the *Suedes* in *Denmark*. Both Nations have Leave to bring all Goods into any Port, where he is not bound, nor, being forced in, obliged to unload or sell any Part of his Goods. Though prohibited Timber be laden on an *English* Ship, she shall not be searched after it is aboard, nor shall the Ship, or any *British* Subject, be arrested or molested for it, &c. *English* Ships passing the *Sound*, to have the Benefit of deferring Payment of the Custom till their Return, on bringing with them Certificates under the Seal of their proper Officers, testifying that the Ships belong to *British* Subjects, and likewise that before their Passage they give Security to pay it at their Return, and if they shall not return, in three Months at farthest. Goods landed at *Elsinore*, with an Intention to transport them elsewhere, shall pay no Duties but what the *Dutch*, or any other Strangers, pay. *British* Ships and Subjects to be dispatched immediately on their Arrival at *Elsinore*, without a Preference to any other Nation, except the Inhabitants of certain Places, who have anciently held a Privilege to that Purpose, and still do. The Subject of either Prince dying in the other's Dominions, shall have his Estate preferred for the Use of the right Heir, &c. The Subjects of either of the Confederates may trade with Enemies of the other, unless in besieged Places, or with contraband Goods. A Merchant may freely reside where he trades, and Duties only to be paid according to printed Tariffes. *English* Ships trading to *Norway* shall be re-measured, that thus Commerce may be better regulated than hitherto. That the Freedom of Navigation during the War, which either Party may have with any other, may be observed, Passports and Certificates shall be given to the Allies' Ships, and the Ship bearing such Certificate shall not be searched, on producing it. *English* Ships passing by *Gluckstadt*, and other Places subject to the King of *Denmark* on the *Elbe*, shall be free from all Customs and Search. Any Injury done to either Party's Subjects in the other's Territories, shall be punished according to the Laws of the Country. No Ships, or Goods laden on Ships, belonging to either Party, shall be adjudged Prize, but by due Form of Law. Justice to be administered according to the Laws of each Country respectively. In Case of Shipwreck, the Goods, &c. shall be preserved for the Owners of Ships. Commanders of Ships, Goods, &c. not to be arrested or seized, but for the Defence of the Kingdom, and in Cases of Debt. Merchants, Mariners, &c. to have the Liberty of wearing, or carrying Arms. Ships steering the same Course, shall have the Benefit of each other's Convoys. Pirates shall not be protected by either Party. The Subjects of either Party shall have free Access at all Times to each other's Ports; but Men of War not to exceed Six in Number, except forced in, and then to give Notice to the Magistrate. Neither Subjects shall take Letters of Mart from any Prince or State in War with the other. Ships taken in Port by a third Party shall be restored, and Seamen taken on board any Prize, that are the Subjects of either Crown, shall be set free. If a Ship laden with prohibited Goods is taken, no Bulk shall be broken till an Inventory be made in the Admiralty. No Men of War to injure the Subjects of the other Prince; and in Case they do, they shall be liable to make Satisfaction, as it shall be adjudged on Trial in the Courts of Admiralty, or by Commissioners appointed by the contracting Kings respectively. Sentence concerning Prizes shall be given according to Justice, and upon Complaint of any Sentence, the Cause shall be reheard. No Goods shall be sold before Sentence but by mutual Consent, and to prevent perishing. Consuls to be appointed. No private Injury to break this Treaty, nor Reprisals to be granted, but upon Denial or Delay of Justice. The *English* to enjoy all Privileges enjoyed by any Strangers in *Denmark*, the *Suedes* only excepted. Former Treaties, not contrary to this, confirmed, and the Ratifications to be exchanged within three Months.

The afore-mentioned Treaty, made between the *Danes* and the *Dutch*, under the 15th of *June*, 1701, for twenty Years, and another between *Denmark* and *France*, dated at *Copenhagen* the 23 of *August*, 1742, for fifteen Years, being much the same in Substance as the preceding with us, I omit giving the Particulars of them, for Fear of incurring the Censure of Prolixity; but shall proceed to communicate the Rules for striking to the Castle at *Cronenburg*, near *Elfinore*:

## I.

Ships from the North, as soon as they get the highest Church Spire, (*N. B.* It is blown down, and the Steeple covered with Boards) and the northernmost Steeple in *Cronenburg* to bear in one S. W. and by W. must lower their Top-Gallant or Top-sails, and continue so until they are past the Castle, and have the two northernmost Steeples of *Cronenburg* to bear in one W. and by N. and then may again hoist them.

## II.

Ships from the South must have lowered before they get the two North Steeples of *Cronenburg* W. and by N. and continue so until the Church Spire and North Steeple of the Castle bear in one S. W. and by W. They who neglect in these two Articles, may be fired at from the Castle.

## III.

Such Ships as carry standing and flying Top-Gallant Sails shall lower them down to the Cap, and if they have but one Top-Gallant Sail, must at the same Time lower their Fore-Top Sail half Mast down; if no Top-Gallant Sails, then both Top-sails half Mast down. All Vessels who have no Caps, must lower their Top-sails entirely down. Ships who have only low Sails are exempted from lowering.

## IV.

Ships turning to Windward, with a scant or little Wind, and the Current so strong against them that it would force them astern in Case they lower, then it is not required, but on a Flag being hoisted from the Castle, are excused, and may do their best.

## V.

In Case a Ship is fired at from the Castle, and the Master and People will make Oath that he lowered, as in the first and second Article, or could not do it to prevent driving astern by Wind or Current, he is free from paying the Shot; but if his People refuse to take such Oath, he must pay. If the Master fails without paying the Person who clears him at the Custom-House, he must pay the Money, when it is proved who the Master was: Charge one Guinea; to the Boat one Shilling.

The 9th of *April*, 1687, the King issued a Placard, ordering the following Fees to be paid at the *Sound*.

	Rix-dollars.
To the Director of the Customs	$\frac{1}{2}$
To the four Chamberlains	1
To the Seal Presser, for stamped Paper, and his Trouble	$\frac{1}{2}$
To the Toll Inspector, for himself and three Boatmen	1

By another Placard of *June* 15, 1701.

	Rix-dollars.
To the Director of the Customs	$\frac{1}{2}$
To the four Chamberlains	1
To the Seal Presser, for stamped Paper, and his Trouble	$\frac{1}{2}$
The Translator extorts eight Stivers for each Cocket.	

## GENERAL COMMERCE OF THE WORLD.

Such of the above Fees as are now taken, some of the Commissioners charge in Crown Money, which is apprehended to be an Abuse, as they ought only to be charged in current Money.

The following are the *Sound Duties* on such Goods as are commonly carried from, or brought to, *England*, which I thought would be sufficiently satisfactory to my Reader, without swelling the Account, by an Amplification of what all other Nations pay on the Commodities that compose their Trade.

	Rix.	Sti.

Yarn, Tow, the 4 Schipponts	Rix. Sti.
Sail, 1 Schipp.	o 36
All Sorts of Woollen, the 50lb.	o 36

I should here have added to the preceding an Account of the Customs on Goods in *Denmark*, but I omit inserting them as I have those payable in all other Kingdoms, to avoid swelling the Work to too great a Bulk; however, I shall give my Reader a List of the Commodities prohibited by his *Danish* Majesty, and note some other Particulars, necessary to the Information of such Persons as are concerned in that Trade.

Brimstone is forbid Importation by a Placart of 29 *December*, 1727; and Buckram to be brought into *Copenhagen* and the Island of *Sieland*, by Order from the Chamber of Finances, dated 10 *Sept.* 1728. Cloth, Corn, and Earthen Ware of all Sorts, are prohibited by a Placart of 25 *Feb.* 1717; dried Fish, or salt Cod, from foreign Parts, prohibited by a Placart of 23 *March* 1729; Flannel, and Iron in Bars, prohibited by a Placart of 8 *Sept.* 1730, but allowed on Oplag, which is a Privilege granted to *Copenhagen* and *Elsinore*, where all foreign Goods may be landed and exported Duty free within a Year, for Exportation; Kerfies forbid to be imported; Oil of Linfeed, Hemp, and Rape Seed, prohibited by a Placart of 22 *Nov.* 1704; Mohair twisted, forbid by a Placart of 18 *July* 1708; Woollen Stuffs of all Kinds, and Stockings, prohibited; Brandy, Salt, Tobacco, and Wine, may not be brought into any Port in *Denmark* but *Copenhagen*: Wool Cards, not importable into *Sieland* by a Placart of 15 *Sept.* 1727, but admitted any where else.

To the Port Charges before-mentioned, payable in the *Sound*, should be added :

	Laden	in Bal.
Light Money for Ship and Cargo, in Crowns	Rixd. 5 3	2 25
Pass, Seal, Writing Money, and Fees	2 12	2 12
Guard Ship both Ways, 4 Sti. each Time		
British Poor upwards of 24 Sti.		
Commission	o 24	o 24

Add 3 Sti. on each Rixd. Crowns, to make it current Money, and observe that in this and all the preceding Duties, 48 Stivers make the Rix-dollar.

*N. B.* All Matters are allowed 4 *per Cent.* out of the Duties paid on their Cargoes both upwards and downwards.

At *Copenhagen* a Bank was established a few Years ago, whose Notes are current through all *Denmark*; and the King's Orders, the 21st of *March*, 1705, concerning stranded Ships and Goods, are very excellent, though they have not been so well observed lately as they should be in *Jutland*, where  $\frac{1}{2}$  Salvage has been recovered, in Direct Contradiction to the aforesaid Ordinance; but in *Norway* a better Regard is paid to it.

Besides the *Sound*, the *Baltick* has an Entrance by the great and small *Belt*; the former being a safe Passage, when well known, for large Ships, which pay the Duties thereof at *Nybourg* in the Isle of *Fubnen*, where the *Danes* have a fortification, opposite to *Korsjer* the Ferry Place in *Sieland*, and where all Passengers for *Jutland*, *Holstein*, &c. from *Copenhagen* land.

The *Little Belt* is at *Frederica* in *Jutland*, where small Ships can only pass, and must pay *Sound* Duties, and *Sophia Odde* in *Fubnen*, both Places being fortified. And as *Norway* is subject to his *Danish* Majesty, I shall now treat of it, though it makes a Break in my proposed Method of describing the Trade of the Nations bordering on the *Baltick* all together.

#### Of the Trade of NORWAY.

THIS Kingdom is ancient, and was governed by its own Princes till 1397, when it became a Province of *Denmark*. Its Northern Borders at *Wardhus*, lie in the Lat. of 70 Deg. 50 Min. and its South-East at *Frederichsbald* in 59 Deg. 20 Min.

Min. its South-West Limits being the *Naze*, in 57 Deg. 50 Min. and the inland Frontiers are in many Places separated from *Sweden* by a Range of Mountains, which continue to the North Sea. The Country is very barren, not producing a Sufficiency either of Corn or Cattle for the Inhabitants' Support, although it is in general very thinly peopled, proportionate to its vast Extent, containing only two hundred ninety-one Parishes, with nine hundred thirty-nine Churches and Chapels of Ease; it differs from all other of his *Danish* Majesty's Dominions, in producing many more Commodities for Exportation than they all put together; its Natives being active, laborious, industrious, and honest.

Copper is one of its principal Products, and of this the chief Works are at *Raaras*, *Silboe*, *Zyckne*, *Meldabl*, or *Lyckens*, *Faadabl*, and *Aardabl*. The first of these Mines yields about three hundred and fifty Tons yearly, on which the King hath two Rix-dollars per Ton Excise, a Tenth in Kind, and a Duty on Exportation of 8l. 15s. per Ton, which brings near one-fifth of its Value into the Revenue.

It is mostly shipped for *Holland*, and the Proprietors of this Mine have it divided into one hundred and seventy-two Shares, each worth about 500l. Sterling, as in a Medium of twenty Years past, it hath yielded twenty per Cent. annually, after having been worked about one hundred and ten Years. It lies about one hundred and eight *English* Miles E. S. E. from *Drontheim*.

*Zyckne* Mine is more ancient than this now mentioned, lying three hundred and sixty Miles to the S. W. of it, and produces about fifty Tons yearly.

*Meldabl* is the third, and has been wrought with various Success, having sometimes rendered the Proprietor fifty per Cent. and at others nothing: The Medium Quantity is computed to be near fifty Tons yearly.

*Silboe* had been given over for fifty Years, but wrought again for fifteen past by the Boors; is two hundred and forty Miles from *Drontheim*.

*Faadabl* hath been wrought about three Years, though it had been given over for several before; it now affords great Hopes of being the second Mine in *Norway*, and is about six hundred Miles W. from *Drontheim*.

*Aardabl*, eighty Miles S. S. E. from *Bergens* was rented by the *English* Charitable Corporation about the Year 1731; but whether through the Stubbornness of the Ore, Ignorance of the People sent over, some Iniquity of the Managers, or all together, several thousand Pounds were sunk, and after one or two Cargoes had been shipped for *Newcastle*, the Company stopped Payment, and the working the Mine has been ever since discontinued. About three Millions *Winchester* Bushels of Charcoal, and many thousand fathoms of Billet Wood, are yearly consumed at the several different Melting-Houses, which latter beginning to grow scarce, makes it probable that the Drain of a few Years more, will oblige the Artificers to have Recourse to *Britain* for a Supply of her Mineral Coal.

The five last Mines are exempted from any Payment to the Revenue on Account of their Property; and in that of *Zyckne* is a Well, whose Water turns Iron into Copper in three Years soaking. At *Konigsburgh*, four Miles above *Stronsfoe*, are also Mines of Silver, which, in *May* 1731, were let to farm, after a Prohibition to all Strangers had been issued in the preceding *February*, not to take any Interest therein. And at *Drontheim* is a Pearl Fishery, whose Revenue the King granted to the Queen in the said Year. Its other Products are Iron, Pitch, Tar, Fish, Skins, Tallow, Butter, Ashes, and above all Masts, Boards, and Timber.

About the Year 1738, an Allum Work was erected near *Cbristiana*, where is an inexhaustible Rock of Slate, which is burnt into Ashes, and these being steeped in Water, and afterwards boiled, produce Allum, though my Author is uncertain whether any Urine or Kelp is used in the Operation. Carraways also grow very plentifully in this Country, and large Parcels of them are annually exported. Of Crystal a good deal may be got a few Miles above *Cbristiana*, but a Sample of it having been sent here to *London*, its Quality was disesteemed. In *Iceland* is the famous Volcano *Hecla*, from whose Mountain great Quantities of Brimstone are procured, which occasions this Commodity to be prohibited Importation here, and the Wool of this Island is very fine and long; it was peopled from *Norway* in about 950, is governed by a grand Bailiff, hath two Bishops, and thirty-seven Parishes.

The Imports are Spice, Wine, Brandy, Vinegar, Cheese, Tobacco, Woollens of all Sorts, Salt, Beer, Bottles, salt Beef, black Lead, Bras, Buckrams, Butter, Calicoes,

licoes white and painted, Candles, Caps, Silk, and Worsted, Canvas, Coals, Cop-  
peras, Cork, Coriander Seed, Cotton, Coverlets, Currants, Cyder, Dimity, dry  
Fish, Corn, and Flour, Glass, Glue, Gunpowder, Hats, Herrings, Indigo, Lead,  
Leather, Linen, Mead, Mustard Seed, Mercery, Nuts, Pewter, Quicksilver, Rai-  
sins, Rice, Saffron, Salmon, Steel, Stockings, Sugar, Sweetmeats, Tea, Tin, Silks,  
Verdigris, Vitriol, Wax, Wire, and many other small Commodities too numerous  
to be inserted.

About twelve Years ago, *Joachim Frederic Baron Beurt*, a *Bohemian*, erected as  
Director General, at the King's Expence, a Salt Work at *Aresfund*, near the *Færder*  
Island, with a great Pile of Buildings; and the Water there being much fresher  
than in the North Sea, is pumped up to the Top of the Grader House, from whence  
it is conveyed by a great Number of Spouts, and falls upon many Hurdles, with  
the Bark taken off, in Order to dissipate the fresh Particles of the Water, and pre-  
pare the Remainder for the Pan, to which the House being left open on all Sides,  
that the Air may have a free Passage, is intended to contribute, and by this Me-  
thod they endeavour to imitate the Salt of *France* and *Portugal*, though the Qua-  
lity is much inferior, and will not keep in damp Places.

This Kingdom has many good Ports, but the following ones only are appointed  
for the landing or lading Merchandize, from or to foreign Parts, or those of the  
King's other Dominions, whose Trade I shall briefly particularize, having already  
spoke of it in general.

*Abrendal*. The usual Exports of this Place are short Timber, and a few coarse  
sawn Deals.

*Bergen* was once a first Rate Hans-Town, and the Seat of a Bishop and Grand  
Baily, though its Trade has for some Time gone very much to Decay; at present its  
principal Exports are Tar, ordinary nine or ten Feet Deals, salt Cod, Stockfish,  
Herrings, and Salmon; here all Sorts of Corn may be imported, on paying a  
Custom of twelve Sti. Specie per Barrel.

*Christiana* is a City about a hundred and thirty-seven Years old, the Residence  
of a Viceroy, Bishop, Grand Bailiff, and is the High Court of *Norway*; from  
hence are shipped the greatest Quantity of the best Deals in this Country; and  
besides it has an Allum, and a Stuff Manufacture.

*Christiansund*, built about an hundred and twenty Years ago, is the Seat of a  
Bishop, and Grand Bailiff; its chief Exportation Timber, and a few Deals mostly  
ill sawn.

*Christiansund* was called *Faarfund* until 1732, when the late King gave it its  
present Name; its yearly Exports are about two thousand Barrels of Tar, some bad  
Pitch, of which they have little in *Norway*, Stockfish, 10,000 Barrels of Cod and  
Ling, 48,000 Barrels of Herrings, some few Deals, Train Oil, and Salmon.

*Drammen* is a general Name for *Bragnes*, *Copperwyk*, and *Stromsøe*; it exports  
great Quantities of Deals and Timber. It lies about four Miles distant from  
*Konigsberg*, where the Silver Mines are, and by a Placart, dated *May* the 4th,  
1706, all Ships going to *Drammen* in Ballast, are directed to cast it out near the  
Custom-house, for Preservation of the Ground whereon it is built.

*Drontheim*, called also *Trundheim*, is an ancient City, and was formerly the seat  
of the *Norway* Kings; though now become the Residence of a Grand Bailiff, and  
Bishop, whose Cathedral is the most magnificent of any in the Country, being built  
with a coarse black Marble, which a neighbouring Quarry produces. Its Exports  
are fourteen Feet three Inch Fir Deals; great Quantities of nine to ten Feet one  
and half Inch ditto; red and white Deals, in all ten to eleven hundred thousand;  
Tar, and near five hundred Tons of Iron, mostly for *Amsterdam*.

*Molla*, a small Port, which only affords some Tar and Fish.

In 1748 the above three Ports were farmed by several of the Inhabitants for ten  
Years, at the annual Rent of 32,000 Rix-dollars, which has produced them very  
great Profits by the yearly Income of 40,000 Rix-dollars from *Drontheim* 20,000  
from *Christiansund*, and 6000 from *Molla*.

*Flekkefjara*, whose chief Exports are Salt Fish, Herrings, and Stockfish.

*Frederichsbald* is the easternmost Town in *Norway*, and was built about a hun-  
dred and twenty-eight Years ago; it is separated from *Sweden* by a Ford two *English*  
Miles broad; and its Exports are confined principally to Deals, with a few Balks

and Spars: Its Oplag occasions the Importation of all Goods in their own Ships, besides Iron from *Sweden*, under any Colours.

*Friderichstad* rose on the Decline of *Sarpsburg*; lying a Mile and a Quarter up the River *Glommen*, about a hundred and seventy Years ago; from hence many Mafts, Load Balks, Deals, Spars, small Balks, &c. are annually exported: It is the best fortified Town in *Norway*; but as several of the Fortifications are built on a Clay Ground, with a Boggy Bottom, the Foundations frequently give Way and sink.

*Holmstrand*, a small Town, that exports a few Deals, Balks, and Sparwood. It lies in the Earldom of *Färslburg*; and on the Island called *Long Oe*, near to it is a very great Quarry of grey Marble.

*Krageroe* is another small Town, yielding some Deals, Balks, Spears, and Spars; and some Years ago it produced the best fourteen Feet Deals in *Norway*.

*Langesund*, a small Place; subject to the Custom-house of *Porfgrund*, affords some small Balks; but mostly Sparwood.

*Laurvi*, a small Town in the Earldom of the same Name, within *Stavern*, where the Earl has a fine Iron Work, produceth chiefly that Sort of Deals called *Schirven*, which are commonly esteemed the best.

*Mandball*, a little Place lying two Miles on the East Side of the *Naze*, yields some short Timber, and a few low priced Deals.

*Mof*, a small ancient Town, whose chief Exports are Sparwood, and a few Deals; though it has a fine Iron Work, and several Saw Mills.

*Porfgrund* has the Custom-house for itself, *Brevig*, *Lofsfund*, and *Sebeen*; the two first exporting very good large Timber, especially the Sort called *Bratsburgh* Spears, Sparwood, and some Deals; at the last Place are sawn the Cloister Deals from twelve to eighteen Feet long; the best in those Parts.

*Romsdalbal*, a small Town, whose Exports usually are some Fish, and a little Tar. *Rus-oe*, commonly called *East-Ries*, produceth chiefly short Balks, Spars, and some few coarse ill-sawn Deals.

*Sand* lies on the West of *Christiana* River, though the Ships chiefly lade on the East Side, at *Drobark* and *Wenbeck*; its Exports are great Quantities of white Wood Balks, and Spars, principally for the *Hollanders*.

*Stavanger*, a very poor Place, mostly inhabited by Shipmasters, who are chiefly employed in carrying Fish from *Bergen*, and the adjacent Ports, coastwise, and some small Matter to the *Belt*.

*Sandefjord*, a small Place between *Laurvig* and *Tonsberg*, whose chief Produce is Spars for *Denmark*, as there are few Instances of Foreigners lading here.

*Sundbard*, a small Town N. W. of the *Naze*, ships a little Fish and some Tar.

*Tonsberg* is deemed the oldest trading Town in *Norway*, and has the Ruins of an ancient Stone Building, supposed to be the Relicts of a Palace, where one of their Kings resided; it is now a poor Place, and the Exports reduced to a few white Deals, Balks, and Sparwood.

Two or three Ships are sent yearly from *Copenhagen* to *Finmark*, which lade with Fish and Oil, mostly for *Holland*; and one or two likewise go from the same Place, chiefly with Provisions for the Garrison at *Greenland*, and to carry Missionaries, as the Inhabitants want but few Necessaries, or seem to have no Care for more than the present.

*Wardbuus*, or *Wardbuys*, is the northernmost Fort in *Norway*, where the King of *Denmark* keeps a small Garrison: It lies in 70 Deg. 45 Min. Latitude, and its Longitude from the Meridian of *London* is 27 Deg. 50 Min. Near it the River *Tanne* takes its Rise, and runs through *Lapland*; from the different Ports of which, and *Finland*, ten or twelve Ships, of about two hundred Ton, lade yearly with Fish for *Copenhagen*, and from the latter many to *Bergen* and *Drontheim*.

The Havens of this Country are very numerous, and most of them very safe, but many of them abound with the Worm so prejudicial to Ships' Bottoms; no one is permitted to go into or out of them without a Pilot, as per Placart *March* 5, 1725; where the

1st Article is, That all Ships going into Harbour, either to lade there, or destined to other Countries, shall pay Pilotage conformable to this Regulation, and not be allowed, whilst a Pilot is to be got, by themselves, People, or any five sworn

Pilots, to carry their Ship in or out of Harbour, or to follow other Ships, for if they do, they are liable to pay Pilotage at the Custom-house.

2dly, One Tenth is to be deducted out of the Pilotage for the Captain, who is Chief over all the Pilots, and the remaining nine Tenth to the Pilot.

3dly, The Summer Pilotage, viz. from the 16th of *March* to the 16th of *October*, from Sea, is to be for a Ship drawing 4, 5, and 6 Feet Water

Winter Hire,  $\frac{1}{2}$  Part more to be paid from the 16th of *October* to the 16th of *March*, and when the outer Rocks do not exceed one Mile from the Port, only single Pilotage is due. For every Foot above 18, 1 Rixdollar per Foot more than the 5 Rixdollars, the Feet to be reckoned as are marked, and the Pilotage to Sea to be  $\frac{1}{2}$  less than this bringing in, and nothing reckoned for  $\frac{1}{4}$ ,  $\frac{1}{2}$ , or  $\frac{3}{4}$  Feet.

Flat built Ships pay  $\frac{1}{2}$  more; above this Depth 1 Rixdollar more for each Mile; if the Pilot carry a Ship above four Miles, he is to receive  $\frac{1}{2}$  Part less, but if nine or twelve Miles inclusive,  $\frac{1}{2}$  less for each Mile. Winter here to receive  $\frac{1}{2}$  Part more also, for Pilotage in and out.

Whilst the Pilot is aboard, the Ship Master must provide him free Meat and Drink, but if obliged by contrary Winds to keep the Sea, one, two, or more Days, the Master, exclusive of the Pilotage, must pay the Pilot two Rixcoorts daily.

N. B. Nothing to be paid the Pilot for Attendance whilst the Ship is in Harbour, nor can he demand Provisions.

4. The Pilots must not, on Forfeiture of their Place, take more Pilotage than what this Placart allows, except in stormy Weather, where Hazards are run, or more Persons employed for the saving People, Ship, and Cargo, or when the hath lost Masts, Sails, or Rudder; the Pilot may in such Case agree above the common

Rate. If the Master refuse to agree, the Pilot notwithstanding must do his Duty, and the Pay be settled by the *Oldermans* and two disinterested Persons; but if either Party be dissatisfied, the Magistrates may attempt it; if their Determination be also disliked, it may be appealed to the Court of Admiralty in *Copenhagen*.

5. As soon as the Pilot sees a Ship in the Offing, with her Colours out as a Waft, he shall go with his Boat without the outer Rock, and continue on board her until safely moored. If in clear Weather a Ship put out a Show for a Pilot, being in some Danger, and no Pilot appears, they ought to attend in that Neighbourhood; and having no reasonable Excuse, shall forfeit two Rixdollars each to the Poor. And the *Oldermans*, for not keeping better Order among the Pilots, shall forfeit four Rixdollars for the first Neglect, five for the second, and lose his Office for the third.

6. A Ship having brought to for a Pilot with his Colours out, and none near at hand, the Fishermen who have been used to officiate as Pilots, may then take Charge of the Ship and carry her in, recovering full Pilotage for their Trouble, without any Deduction, though none but Pilots may carry a Ship to Sea, except Fishermen appointed by the *Oldermans*.

7. That the Pilot-Boats may be known, they shall carry a red Cloth in the Middle of their Main-Sail, but when they cannot use it, shall shew a white Cloth at the End of their Sprit; and on Neglect to shew these Marks, they shall each Time forfeit two Rixdollars to the *Oldermans*, and two ditto to the Poor. Fishermen using such Signs shall forfeit four Rixdollars each Time.

8. When a Master hath got a Pilot on board, he shall not be obliged to take another on his coming into another Pilot's District, if the Pilot he has is acquainted and willing to proceed farther; though if the *Oldermans* order another Pilot, the former must quit, to prevent the Harbour's being left destitute; but if the Pilot engages to go farther than he is acquainted, and a Damage happens, he shall pay it, as the Law directs. Code IV. B. I. Cap. v. A.

9. When a Master has any reasonable Cause to complain that his Pilot has not done proper Duty, and the Weather permitting, Colours were put on to shew the Want of a Pilot, the Master shall in this Case take the Pilot and *Oldermans*, and in Presence of two Sea-faring Shipmasters, whom the Magistracy shall appoint, make an Attestation thereof, and the Master shall have Credit for Law Charges until a Decision, each Party obliging themselves to be satisfied therewith; and a Pilot, having Reason of Complaint, is entitled to the same Liberty.

10. The Pilots are to have Blanks in the Master's Language, for him to sign, notifying what he has paid him, as shall the Pilot for what he has received.

11. Wind and Weather permitting a Pilot to conduct a Ship into a convenient Harbour, he must not on any Account carry her into one where the anchoring Ground is too deep, especially late in the Year, or in Winter, except in Cases of Necessity; and then the Pilot shall before-hand acquaint the Master with the Circumstances, and must however anchor in the most convenient Place, on Penalty of four Rixdollars; and the same Sum on neglecting to take an Attestation that it was not his Neglect. A Pilot conducting a Ship through dangerous Places, or altering the Land Marks, shall be imprisoned for Life in *Bremerholm*, or suffer Death if he deserves it.

12. As the Captain is allowed one Tenth of the Pilotage, the *Oldermans* of the Pilots shall have three Stivers on each Rixdollar, both of them to be deducted out of the stipulated Rates; and if Pilots carry in and out of Harbour, which do not lade or deliver in that Country, the Captain's Salary shall be only one twentieth Part.

13. Forfeitures to be distributed among poor Sailors.

14. The Collectors of the Customs are to assist the Pilots in getting their Pilotage, and not clear the Ships until they are satisfied, or have the *Oldermans*'s Attest what Draught of Water she drew in and out, but must deduct the Salaries, if the Master has paid them to the *Oldermans*.

15. A Master sailing before he hath paid his Pilot, shall, when met with in *Norway*, pay the Debt, and the like Sum to the Poor, besides the Law Charges: And a Master using a Pilot ill shall forfeit as the Law directs.

16. As Pilots are always obliged to keep a Look out, they shall have Rewards of others.

17. If the Magistrates' or Admiralty's Decisions in Law Suits between Masters and Pilots are disliked, either Party may appeal to the King.

18. Ships bound to any Port within the *Fæder*, and stop, with a fair Wind; in any out Harbour to smuggle, the Pilot shall immediately inform the nearest Officer of Justice; and the Master, on due Proof made against him, must pay the two hundred Rixdollars, as directed in the Book of Rates; the same to be also observed North of the *Naze*: And a Pilot neglecting to give such Information shall lose his Place.

19. The King commands all his Military Officers to be assisting herein, and to keep these Orders as a Law.

Masters of Ships must make a true Report at the Custom-House, within twenty-four Hours after their Arrival; and, if required by the Collector, must produce authentick Bills of Lading. The not reporting within this Time limited, incurs a Penalty of twenty Rixdollars daily; if they neglect to report all their Cargoes, they must pay twenty *per Cent.* on the Value of that Part omitted, except he will make an Oath it was an Error, without any sinister Intent to smuggle them. If they belong to Master or Mate, they are confiscable and liable to double Duty.

Masters must be careful not to sail without their *Told-Zedel*, which is a Passport given them from the Custom-house, containing a List of the Cargo, and that the Lading, Teinde, or tenths, a Custom, and Lights are paid; otherwise being found without it, and the Cargo is discovered not to be duly entered, treble Duty must be paid, and the Master condemned to Chains for Life in *Bremerholm*; if the Ship be only in Ballast, the Punishment is to pay ten Rixdollars, and the producing false Passports, with an Intent to defraud the Revenue, incurs a Forfeiture both of Ship and Goods.

The Lights in this Province are the *Fæder*, built on a high Rock at the Entrance of *Christiana* Fiord, and two on the *Naze* Point; in *Denmark*, they have the *Schaw*, and *Anbalt* in the *Cattogat*; that on the Sand Bank called *Scagen*, at the Point of *Jutland*, was some Time ago washed away, and I believe not yet restored.

The Sea Marks here, are the Cow and Calf near *Mandahl*. Off *Merdoe* Island, the *Trom* Hills, and *Trom* Church, with a new built whitened Steeple, and the above-mentioned Light-houses.

The *Danish* trading Companies, are that of the *North*, the *Iceland* Company, and the *East-India* Company. The first was established at *Copenhagen*, in 1647, by *Frederick* III. which has not only very considerable Settlements in *Norway*, but they send their Ships also to the Port of *Varanger*, at the Bottom of the Gulf of the same Name; from whence their Commissaries penetrate by Land, both into the *Danish* and *Muscovite* *Lapland*, on Sledges drawn by Rein-deer.

They also extend their Trade to *Barandia* and *Siberia*, where their Factors advance even to *Panigorod*, the Capital of this Part of the Czar's Dominions; and the Goods they carry are Rixdollars, Tobacco, Brandy, and Linen, which they truck against a Variety of Furs, the only Products of these Parts.

The *Iceland* Company also owe their Charter to the said Monarch *Frederick* III. who granted them his Letters patent in the same Year the Northern Association obtained their's. It is the Ships of this Company only that are permitted to trade with this Island, which lies in sixty-five Degrees forty-four Minutes of Latitude and thirteen Degrees and thirty Minutes of Longitude. The Inhabitants, although at present Christians, are notwithstanding almost as much Barbarians, as before this Religion was professed among them. They neither buy, nor sell, or know the Use of Money; so that all their Trade consists in Barter, either with Strangers, or between one another; this Isle became subject to *Denmark* at the same Time with *Norway*; and their chief Traffick consists in Beeves, Sheep, and Horses, and the Skins of these Animals, dry or salted, dry Fish, Butter, Tallow, Blinstone, and the Furs of Foxes, Bears, Wolves, &c. Among the Sheep they have a very extraordinary Sort, being large, with eight Horns, which the Natives are obliged to saw off, for fear of their wounding the other Cattle, as they are

difficult to tame; their Wool is thick and fine, which recommends it to a good Sale.

The *Danes* carry to these Islanders, in Exchange for Commodities, Tobacco, Linens, Flour, Beer, Wines, Brandy, Iron, Cloth, some Hard-Ware, &c. all conveyed to *Kirkebar*, a large Town, or small City in the Island, where the Merchants and Factors reside; and though the Trade to *Groenland* has nothing to do with the Company's Charter, yet as it still lies farther North than *Iceland*, I shall speak of it here, as in its proper Place.

This Country, in a Manner unknown, and its Limits yet undiscovered, has hitherto hindered the Learned from determining whether it is a Continent joining to that of *America*, or *Tartary*, or whether it is separated from both, and is an Island. The Smallness of its Products are suited to the Paucity of its Inhabitants, as it affords nothing but Whale-Fat and Oil, Seal Skins, and the Teeth of a Fish called *Towak*, more valuable than Ivory for its Whiteness; which they truck with the Whale-Fishers, who land here to boil their Blubber, against Knives, Scissars, Needles, Looking-Glasses, &c. And as I have no where taken Notice of the Value and Importance of this Fishery, which now begins to be regarded here, as it is encouraged by the Government, and the Success of our late Attempts in it; I presume it may not be disagreeable to my Readers, to be advised of what may annually be taken in that Sea. I shall therefore give a List of the Ships which fished there in the Year 1737, with the Fortune they each had in their Enterprize.

The *Dutch* then sent into the *Greenland* Sea an hundred and six Ships, which caught three hundred and fifty-five Whales. The *Hamburgers* seventeen Ships, that took thirteen Whales and a half. *Altena* sent five Ships, and got seven Whales; and *Bremen's* ten Ships caught eleven Whales; these were all *extra* of the Adventurers to *Davis's* Straits, whose Engagements were yet more considerable.

The *Danes* began late to engage in long Voyages, at least to the *East-Indies*, and it was not before the Middle of the seventeenth Century, that their Colours were seen in the Gulf of *Bengal*, and on the Coast of *Pegu*. At present they carry on a pretty good Trade to those Parts, by a Company established in 1612, and whose Privileges were enlarged, and its Commerce extended by a Grant from his *Danish* Majesty in *January* 1728, which made them in a Manner a new Association; and for a Fund they opened Books to take in Subscriptions, at *Altena*; but this new Company being strongly opposed by the Maritime Powers, which undoubtedly had an Influence on the intended Subscribers, the Thing dropped, and the Company remained on its primitive Footing; but the late King, in Order to assist and encourage their Undertakings, advanced them a hundred thousand Crowns in 1740, that they might push their Trade with more Vigour.

The Isle of *St. Thomas*, seated in the North Sea, at fifteen Leagues Distance from *Porto-Rico*, is the only Colony that the *Danes* have in the *West-Indies*. The *Hamburgers* have also a Factory here, from whence they carry on some Trade with the *Antilles*.

The Products of this Isle are but little, for though some Sugar and Indigo are gathered here, they would not be capable alone to support the Inhabitants, if they found not in their Situation, a Resource elsewhere, from whence to procure, not only a Support, but to set forward an advantageous Commerce, consisting principally in the Negro and contraband Trade carried on with the *Spaniards*: their having made their Isle a free Port likewise greatly contributes to their Benefit, as it attracts the Business of all the illicit Traders in those Parts. But now to return to the *Baltick*.

#### Of the Trade of COURLAND, PRUSSIA, and POMERANIA.

THE small State of *Courland* has properly but one Port in the *Baltick* Sea, which is *Libaw*. *Memel*, at the Entrance of the Gulf of *Courland*, although it belongs to Ducal *Prussia*, I insert it here, as it is between these two Cities that all the Trade of this Country is transacted, of which Wood and Grain make the most considerable Part. most esteemed of any in the North, whereof large Parcels are used in *Holland* for extracting its Oil, and in *France* and *Flanders* for fowing; and this Trade is sufficient to employ twenty-five Ships yearly in it from *Holland* only.

*Konigsberg* is the Capital of Ducal *Prussia*, seated on the *Pregel*, that falls into the *Trijuaf*, called by some the *Hac*, a Sort of Lake that communicates with the Sea; but it is at *Pilau*, a considerable Fortrefs at the Entrance of this Lake, that the Vessels at first arrive in their Way to *Konigsberg*, which is more than eight Leagues distant, and cannot be gone up by Ships drawing more than ten Feet Water. This Inconveniency, which occasions great Expences, is followed by two others, *viz.* Strangers may not house their Goods in Order to wait a favourable Opportunity for their Sales; neither is the dispersing them within Land by the Canal permitted, nor their Sales suffered to be made to any other than the Inhabitants of the City.

Besides the Products of the Province, the *Pregel*, which has its Rise in *Lithuania*, serves for Transportation to *Konigsberg* of that Country's and *Poland's* Products, such as Pipe-staves, Deal Boards, Wheat, Rice, Barley, Millet, Hides, Furs, Hemp, inferior to what is got from other Parts of the North, Flax, Wax, Honey, Tallow, Pot-Ash and Wood Ash; the Imports there are Woollens, Salt, mostly from *France*, of which near eight thousand Lafts are sold here annually for the Consumption of *Prussia* and *Lithuania*. The other Goods proper for this Commerce are Iron, Lead, Pewter, about one hundred Barrels of Wine, one hundred ditto of Brandy, and the same Quantity of Vinegar; Butter, Cheese, Sugar, Tobacco, chiefly *Clراع* and *Martinico*; of which a hundred thousand Pounds may be used here yearly, Spice, and, as in all the Rest of the *Baltick*, Rix-dollars.

*Dantzick* is, of all the Cities seated on the *Baltick* Sea, that where the greatest Business is transacted. The *Vistula*, on whose Borders it is built, near a League from its Mouth, conveys to it all the Merchandizes of *Poland*, whose richest Palatinates this River washes for more than one hundred Leagues in its Course, and serves to transport in Return those foreign ones with which its Warehouses are always well stocked. Ships drawing more than eight Feet Water cannot get up to the Canal, running from the *Vistula* to the City, so that if they draw more, they must be lightened in the Road, which is an excellent one, and carry the Part of the Cargo so taken out in Boats.

The Magazines for Grain established at *Dantzick* in an Island, partly formed by the *Vistula's* Channell, are very famous in all *Europe*, and they certainly deserve it, if there is no Exaggeration in the asserting, that they annually supply Foreigners with eight hundred thousand Ton of Wheat. It is a Privilege of the Burghers, that they only are permitted to purchase the *Polanders'* Wheat, when once brought into their City; but on the other Hand they are obliged to take all that comes in, at a Price fixed by the Magistrates. Strangers here are subject to the Inconvenience, as at *Konigsberg*, of being debarred the Liberty to send their Goods within Land, or selling them to any others than the Citizens; but the Hardship is something alleviated here, by the Permission to house them till a favourable Opportunity offers for their Disposal.

The Ladings of the *English*, *French*, and *Dutch* Ships for this City consist of a Quantity of Cloths and Silks, Spice, Dying Woods, Drugs for that Use, and Medicines, *Italian* Cremor Tartari, Sugar, Oil, Paper, all Sorts of Hides, Salt, Wine, and *French* Brandy.

Wheat and other Grain, I have already observed, are the principal Exports from *Dantzick*; here are however many other Goods, that this Place furnishes Trade with, of which the most considerable are Ships' Masts, Oak and Deal for Carpentry, Flax, Pot-ashes, Weed-ashes, Honey, Wax, Tallow, Steel, Iron, Copper, Lead, Saltpetre, Pitch, yellow Amber, Beeves Hides, Skins, Wool, and *Poland* Salt, when the *English* and *Dutch* cannot have this Commodity from *France*.

*Stettin*, which is the Capital of Lower *Germany*, has the greatest Share of the Trade of it, altho' it has other Ports, as *Stralsund*, *Wolgaß*, and *Colberg*, this last in the Territories of his *Prussian* Majesty, where some is transacted, yet but little in Comparison with that of the first mentioned City; which is seated in the four Branches of the River *Oder* that preserve its Name, and which falls into the *Baltick* about eight or ten Miles from it. Ships cannot go up to the City, but

are generally unladen at *Stenwert* or *Wolgast*, from whence the Goods are carried in Boats.

At *Stettin* are to be met with, not only the Products of *Pomerania*, but also those of *Silesia*, and the Marquisate of *Braudenburgh*, brought there by the *Oder*, which partly crosses them, and consists chiefly in Grain, Ships' Masts, Woods, Hides, coarse Wool, Honey, Flax, and *Silesia* Linens: Their Imports are Spice, Silks, Woollens, a large Quantity of Sugar, many Herrings, twelve to fifteen hundred Lafts of *French* Salt, a few Wines, leis Brandies, and elsewhere, a good Fund of Rix-dollars:

*Of the Trade of LIVONIA, and its principal Cities.*

THE Possession of this vast Province was a long Time disputed between the *Muscovites*, *Polanders*, and *Swedes*; but by the Treaty of *Oliva*, in 1660, it was divided between the two last Powers, to which a third may be added, *viz.* the Dukes of *Courland*, who enjoyed a Share of it, under the Protection of *Poland*. But the last War in the North, begun in 1699, dispoiled the *Swedes* of it; after divers Events equally glorious to *Charles XII.* King of *Sweden*, and to *Peter I.* commonly called *Peter the Great*, Emperor of *Russia*; though more fortunate in the End to this last, who remained in the Possession of all *Swedish Livonia*, and it is now Part of the *Russian* Dominions.

The Peace concluded after the Death of *Charles XII.* killed at the Siege of *Christianstadt*, having adjudged *Livonia* to the Emperor, thereby in a Manner rendered him Master of the Trade of the *Baltick*, in opening to him the Ports of *Riga*, *Revel*, *Narva*, and *Pernaw*, whose Commerce is of so much the more Importance, as not only the Goods of the Country, but a large Quantity besides, are brought here from *Russia* and *Poland* in the Summer, by the Rivers on which three of these Cities stand; and in the Winter by Sledges.

*Riga*, Capital of the Province, is built on the *Dwina*, which, after traversing a Part of *Lithuania* and *Livonia*, falls into the *Baltick* Sea, two Leagues below the City, where their Ships may get up to, if their Draught of Water does not exceed twelve Feet, otherwise they must be disburthened.

The fittest Time for this Trade is that of the two Fairs, held yearly in *May* and *September*, where most Purchases are made in Rix-dollars, though some in Exchange for Goods brought there; but this Business is something troublesome to Strangers, as they are not suffered to unlade their Ships, till after having sold their Cargoes to the Burghers; and would be much more so, where it not that this Law is often evaded by the Goods being cloaked under borrowed Names, lent, for the Lucre of a Commission.

The few Goods laded for *Riga* consist of *Rhenish* and *French* Wines, hardly four hundred Barrels of the latter, Spice, Salt, of which from five to six thousand Lafts sell here yearly, Sugar, Tobacco, Vinegar, Paper, some Fruit, and Mercery Ware, though all these in small Quantities. The Returns which the *English*, *French*, and *Dutch* get from hence are very considerable, the principal being Furs, of which there is annually brought down the *Dwina* more than a thousand Boat loads, besides what comes in the Winter on Sledges.

The Masts from *Livonia*, which are very valuable, also Oak Plank for Shipping, Ton and Pipe Staves, in great Abundance, Deal Boards, Wheat, Hemp, Flax, and their Seeds, especially the last for sowing, and Oil, Pitch, Tar, Wax, Tallow, and excellent Ashes for Glafs or Soap.

*Revel* is almost equidistant from *Riga* and *Narva*: It was for some Time among the Number of the *Hanseatick* Towns, but renounced their Alliance in 1550. Its Trade is always very great, but not like what it was before the *English* had discovered the Port of *Archangel* in the *White* Sea, and when it was the Magazine of the greatest Part of the *Russian* Products. Its present Exports and Imports are near the same with those of *Riga*; to which I beg my Reader will be referred.

*Narva*, upon a River of the same Name, not less than the *Elbe*, has enjoyed for a long Time the Privilege of the *Hanseatick* Cities; having been almost

ruined, and its Trade ceased for near a Century, it did not begin to recover its Credit till after the Middle of the seventeenth. *Olearius* remarks, that in 1654, they imported here at least sixty *Dutch* Vessels, which laded more than the Value of five hundred thousand Crowns in Goods; since which Time it has contested a Superiority in Trade with *Riga* itself, and carried it against *Revel*.

The Neighbourhood of *Novogorod* and *Pleskou*, trading Cities of *Russia*, from which last *Narva* is hardly forty Leagues distant, makes that of all this vast Empire easy to it; and it is the Passage by which almost all the Merchandizes which go even to *Moscow* are transported.

The Commodities proper for *Narva*, or those in which Foreigners invest their Returns, are the same as at *Riga* and *Revel*, and therefore need no Repetitions.

*Pernau*, a small City on a River of the same Name, was formerly occupied in no other Commerce than that of Wheat, which drew here some foreign Vessels to lade it; but since the Means have been found of bringing down the River a Quantity of Masts, not less valuable than those of *Norway*, and a good deal of other Wood, its Trade is greatly increased; and since 1680, the *Dutch* have annually sent here more than sixty Ships instead of five or six, that they consigned here before. Few Goods are wanted here, and almost all the Trade is carried on by the Intervention of old Rix-dollars.

*Of the Commerce carried on at ARCHANGEL and other Parts of RUSSIA.*

THE Trade of *Archangel* also comprehends that which may be transacted as far as *Moscow*, by Means of the *Dwina* on which this City is built, of other Rivers with which this vast Empire abounds. Besides the *English* and *Dutch*, who alone carry on more Trade here than all other Nations put together, the *French*, *Swedes*, *Danes*, *Hamburgers*, and those of *Bremen*, have their Magazines and Correspondents at *Archangel*. The Commodities fit for this Place may be seen in the Description of the Trade of *Holland*, to which may be added *Bordeaux* and *Anjou* Wines, three Quarters Red, and one Quarter White, Syrops, whitened Linen, Fustians, coarse Cloth, and other light Woollen Stuffs, Ribbons, Hats, Jewels, Household Stuff, and Artificers' Tools.

But of all the Merchandize there is none whose Sale is so sure, or that turns to better Account than the Castor from *Canada*, which often sells for ready Money, though this is seldom the Case with any others.

Furs are, as one may say, the Foundation of the Trade carried on with *Russia*, and the Chief of its Exports; and although they do not differ in Quality from those of *Lapland*, *Borandai*, and *Siberia*, of which I have already treated, yet they are to be found here in greater Quantities, on better Terms, and with less Risk. The *Russia* Leather, dry or salted Hides, Goat, Bear, or Wolf Skins; Hemp, Flax, Hogs' Bristles, Fish Oil, Caviar, Tallow, Tar, Wax, salted Salmon, &c. are Commodities that *Muscovy* yields, and of which the general Staple is established at *Archangel*, which, since its being frequented by the *English*, and afterwards by other Nations, has carried away a great Part of this Trade from the *Baltick*, and particularly from *Revel*.

Of all these Products and Goods, the most esteemed are the Hides of *Jeroslaw*, the Honey and Wax of *Pleskou*, the Tallow of *Fologda*, the Oil in the Neighbourhood of *Volga*, the Flax and Hemp of the great *Novogorod*, the Pitch of *Dwina*, and the Sables and other Fur of *Siberia*.

*Astracan*, a City under the Dominion of the *Russian* Emperor, is seated at the Mouth of the *Volga* in the *Caspian* Sea; the principal Merchants trading here are *Muscovites*, *Tartarians*, *Armenians*, and *Indians*. All Sorts of Merchandizes may be sold in the Morning at the Bazar or Market of the *Tartars*, where other Nations have the Liberty of carrying their's. After Noon the *Russian* Bazar is held where the *Armenians* are equally admitted, and the *Indians* transact all their Business in their own Caravanera.

*Bratoffena* is a Village near to *Moscow*, on the Side nearest to *Archangel*, where Commissioners are established to examine all Goods destined for *Moscow*, which after

after being searched, and the Lead here put on them, are no more distributed till their Arrival at that City.

*Burates*, a Nation of *Muscovite Tartary*, which inhabit along the River *Angara*, and the Lake of *Bekal*. They are rich in Cattle, particularly in Beeves and Camels, with which the *Muscovite* Caravans that go to and from *China* are commonly provided here, paying their Hire in Goods, and not in Money, of which these People make no Account.

The Merchandize proper for this Place are black Sables, Pewter, or Copper Basons; *Hamburgers*' red Cloths, Otter Skins, *Persian* Silks of all Sorts of Colours, and Gold and Silver Ingots. The largest Ox hardly comes to four or five Roubles, and the strongest Camel to ten or twelve, the Rouble on the Footing of five Guilders as in *Russia*.

*Jeroslaw*, a *Muscovite* City on the River *Volgda*, where one of the greatest Trades of all *Russia* is negociated, principally consisting in Hides, Tallow, Lincens, and Erufhes.

*Mokaira*, a great Monastery, with a Village of the same Name, seated on the *Kerfime* that falls into the *Volga*, a great River of *Muscovy*.

This Place is famous for its annual Fair held here in the Month of *July*, and which lasts for fifteen Days. The Majority of the *Russian* Merchants usually attend it either to buy or sell; and, for the Conveniency of Trade, here is a wooden Caravanfera built, where they lodge and retire their Goods.

*Solowitzjada* is a *Muscovite* City, celebrated for its Trade, where are many good substantial Merchants, and excellent Artificers, particularly in Works of Silver, Copper, and Ivory: It has also in its Neighbourhood many Salt Ponds, producing a great deal of that Commodity for Transportation to *Vologda*, and several other Places, even as far as *Archangel*.

*Tomskoi*, subject to the *Czar's* Dominion, is a City seated on the River *Tom*, in *Muscovite Tartary*; a great Trade is carried on from hence to *China*, by the *Cham* of *Busuchtu*, and the *Buchares*, among which some *Russian* Merchants mix. This Journey is made in three Months, and the same Time expended in their Return, but with an inexpressible Trouble, as every Thing must be transported on Camels, even Wood and Water in some Places; and it would be impossible for the *Russians*, or any other foreign Nations, to perform this Peregrination alone, the Country being full of Robbers, who pillage all Passengers, except they are well accompanied or guarded.

I shall say nothing here of the Trade which the *Russians* do, or might carry on by the *Volga* and *Caspian* Sea to *Persia*; by *Tartary* to *China*; and by the *Black* Sea to the Dominions of the *Grand Signor*, as the other Nations of *Europe* are but little concerned therein, except to account for the Rise of *Petersburgh*, a modern, and now very flourishing City.

*Peter the Great*, having formed an Idea of the vast Advantage his Empire might reap from securing to it the Silk Trade of *Persia*, in the Year 1722 appeared more confirmed than ever in his determined Endeavours to make himself Master of this Branch of Commerce, and in Order thereto, he took Possession, as one may say, of the *Caspian* Sea, and ordered a nice Chart to be made of it, where the Ports and Roads were very regularly described, particularly the Coasts of those Countries where Silk grew in the greatest Plenty, such as *Quilan*, *Schirwan*, and the Neighbourhood of *Schamachi*: In Effect, he accompanied an Expedition on that Sea, seized the City of *Andreef*, in the Province of *Dagbestan*, and laid the Foundation of another large Harbour near *Derbent*, at the Bottom of the *Baltick*, in the Gulf of *Finland*, to which he gave the Name of *Peter's-Haven*, better known by that of *Petersburgh*, reducing the Inhabitants of *Derbent*, to have Recourse to him for Protection, and submit to his Laws; and though his Project has partly failed, yet this Settlement, having been frequently benefited by the Court's Preference and Encouragement, is in a few Years grown to be a considerable City, though not corresponding to the apparent Exaggeration of an anonymous Author, who said, some Years ago, that it was likely to become as magnificent as *Verfailles*, as strong as *Dunkirk*, and more flourishing in its Trade than *Amsterdam*.

However, through the great Encouragement given by the reigning Empress Catharine II. to Arts, Manufactures, and Commerce, the Splendour, Popularity, and Affluence of this City is daily increasing; and, by her Attention to maritime Affairs, all Parts of her Dominions are in a State of Improvement, that must render the *Russians* a formidable and flourishing People.

Shipmasters, on their Arrival at *Cronshadt*, have a printed Book of Directions given them, for their Regulation; and they are allowed the Duty of ten Rix-dollars, or what they will amount to, under that Sum, on such Goods as are their own Property.

The Ton here in Freight, is 46 Poods on Leather, and on other Goods 36 Poods, 120 Pieces of Drillings, 60 Pieces of Sail or Raven Duck, Linens, 6, 8, to 10,000 Archins, *pe.* Ton, as in Fineness.

*Of the Commerce of SWEDEN.*

**A**LTHOUGH this Kingdom has always furnished *Europe* with its superfluous Products, it was nevertheless regardless of its Trade, till Queen *Christina* both protected and encouraged it, by the Advantages she granted to, and procured for, this Nation; which till her Reign, seemed entirely to neglect Commerce, either by having its Attention drawn off, through its natural Propensity to War, or the Effects of Sloth and Ignorance, which it would not be at the Pains of removing; but the Cruelty of the Duke of *Alva* made many to escape from the *Low Countries*, and take Sanctuary here, to which Fugitives *Sweden* owes the major Part of the Knowledge it has acquired in Trade; and their Establishment was so successful, as to encourage a great Number of *Walloon*s to transport themselves here, whose Language and Religion still subsists in those Places where they first settled.

They erected Forges and other Conveniences for casting of Cannon, as also for the manufacturing of Iron Wire, and other Works of this Metal, Copper and Brass, which their Descendants continue to this Day; but, notwithstanding all this, the Navigation of the *Swedes* was but trifling, till their aforesaid Princess, on concluding a Peace with *Denmark* in 1644, obtained from that Crown a Concession, that all the Ships, and other Effects of her Subjects, shall pay nothing on passing the *Sound*; since which the *Swedes* have greatly increased in Shipping, and in the late War were the principal Carriers of *Europe*. The chief Articles of *Sweden's* Exports consist of Copper, Iron, Pitch, Resin, Masts, Boards, &c. In Exchange of which, it takes from foreign Parts, Salt, Wine, Brandy, Draperies and other Stuffs; Tobacco, Sugars, Spice, Paper of which they hardly consume yearly two thousand Reams in all the Country, Linen, Vinegar, Fruits from *Provence*, some Mercury, and divers other Commodities.

The Trade, which the *Swedes* have with *Portugal*, is that which they can least be without, as the Kingdom chiefly supplies them with the great Quantities of Salt they use; though their Commerce with *England* yields them much more Profit in taking off near half their Products, and bringing them almost two-thirds more of their Value, in Silver than in Goods. The least is that transacted with *France*, as this rather serves to feed their Vanity, than supply their Needs, and consumes but very little of the Country's Manufactures or Growth.

It is at *Stockholm*, that almost all the Traffick of *Sweden* is negociated; Foreigners not having the Liberty to trade in the *Botnic* Bay, nor the Subjects of his *Swedish* Majesty, to bring their Goods only to this the Capital, whose Port is deep and secure, though the coming in, and going out, long and dangerous.

The *Swedes* themselves transport the best Part of their Commodities, in their own Ships, to *Holland*, *Spain*, and *Portugal*, and some few proceed to *France*, to lade Wine, Brandy, and Salt. But the *English* and *Dutch* are the People who carry on the greatest Trade with this Country; the first by their Woollens, and the latter with their Spices: though that of the *Dutch* is however the most considerable, especially since they have in some Measure rendered themselves Masters of the Copper Mines, and of the Pitch and Tar made there, by the great Loans they advance to the Farmers of the former, and to the Merchants of the other

Materials so necessary to Navigation, inasmuch that these Commodities are to be met with almost as cheap at *Amsterdam* as *Stockholm*.

Strangers are permitted to deliver their Goods at *Stockholm* without paying any Customs but in Proportion as they go selling, and may, if they find no Vent here, relate them for another Market, on the Payment only of Half *per Cent.* Duty. I have already mentioned, in the Section of this Country's Trade with us, the Merchandize we import from thence, and shall only add a Remark here concerning Copper, whose Purchase is always made with ready Money; that it is better effected in Winter than Summer, as in this last Season it is only to be had at second Hand, so that consequently in the former it may be procured best and cheapest.

The cultivated Lands of this Kingdom are fertile enough, though the major Part have but little Depth; barren Soils manured with the burnt Ashes of the Trees that grow here often produce a very abundant Crop, without any other Tilling or Improvement than the bare covering of the Seed. If the Inhabitants were industrious beyond what mere Necessity forces them to, it would not be difficult for them to raise a Sufficiency of Grain, at least to supply their Wants; but by their Mismanagement they cannot subsist without Supplies from *Livonia*, and other Parts of *Germany* bordering on the *Baltick*, which however are of no Service to the poor People, who live distant from these commercial Reliefs, and are obliged, in a Dearth, to grind the Grain of Beech Trees Bark, and make it into Bread.

The Wool which their Sheep produce is extremely coarse, and can only serve to make Clothing for the Peasants; their Horses are small, especially in the Duchy of *Finland*, but they are hardy, strong, and vigorous; here are a Quantity of savage Animals, of which the Natives hunt and eat the Bears, Elks, Deer, &c. and take the Wolves, Foxes, wild Cats, and some others, for their Furs.

The principal Lakes of *Sweden*, are the *Weter*, *Wener*, and the *Meler*, which, with many others, are not ill provided with Fish, such as Salmon, Pikes, Perch, Tench, Trout, Eels, and several other Sorts unknown elsewhere; here is, above all, an infinitude of *Streamlings*, a Fish smaller than a Herring, which are salted in Barrels, and distributed all over the Country: And besides these the *North-Bottom*, or the Bay that separates *Sweden* from the Duchy of *Finland*, is so abundant in Seals, that a large Quantity of Oil is extracted from them, and transported to divers Places. In the Lakes of *Finland*, vast Numbers of Jack are taken, of which, some are salted, and others dried, and afterwards sold to very good Advantage.

Among the Mines of this Kingdom there is one of Silver, which is about one hundred and forty-five Braces deep, and yields, after great Labour and Trouble, near the Value of twenty thousand Crowns of fine Silver yearly; though this is not above Four *per Cent.* Profit. The Profundity of the Copper Mine does not exceed eighteen Braces; it is of a very great Extent, but subject to Damage from Time to Time, by the falling in of the Vault, which however is not all Loss, as the Mineral procured from this Rubbish makes some Amends, though the Detriment of this Occurrence is always considerable. The Copper that is annually extracted from this Mine produces about two hundred thousand *French Livres*, of which the King has one fourth Part, besides twenty-five *per Cent.* on all the Ore carried away uncleaned; and he has the Preference of all the Silver to take it at one-fourth Part less than its Worth.

The Mines and Forges of Iron are here also very numerous, especially in the mountainous Parts, where there are commodious Water-falls to turn the Mills, so that, besides the Iron used in the Country, there is yearly exported for near the Value of three hundred thousand *Livres*. At *Stockholm*, and the Castle of *Jenscopingh*, near the Frontiers of *Denmark*, are large Magazines filled with this Metal, brought from *Oerbro* in *Nerwa*, as Opportunities offer, and of which they are continually making all Sorts of Fire-Arms. For what regards these Mines, there is besides the Inferior-Courts, and Officers established in many Places, a general one, called the *College of the Mines*, which has its Sessions, or Assemblies, at *Stockholm*, of which the President of the Treasury is generally the Chief, as-

sisted by a Vice-President, and other Assessors; the Laws are in this more exact and circumstantial, than those for any other Affairs, and Justice is commonly administered here with a great deal of Care.

This Nation has no Settlements in *America*, though the Great *Gustavus Adolphus* had projected a Company for the other *Indies*; and his Letters Patent given on this Occasion, the 14th of *June*, 1626, are yet extant, by which he invited his Subjects to an Engagement in it; but the Wars which rendered him so famous, and wherein he sacrificed his Life in the Arms of Victory, hindered the Execution of his Scheme, which died with him, as it is not known that any of his Successors followed it; at least it was never till lately put into Execution; it is true, that in the Reign of *Christina* his Daughter, so known and celebrated for her Love of the *Belles Lettres* and her Abdication of the *Swedish* Crown, her Subjects attempted some Settlements in the *West-Indies*, where they sent a Colony, and called their Establishment *New Sweden*, and the City they built there *Christina*; but this lasted not long, as they were driven out by the *Dutch*; and no other Establishments have been made, or Charters granted, either in *Asia* or *America*, till the 4th of *June*, 1731, when his *Swedish* Majesty founded a Company, by Letters Patent in Favour of *Henry Koning*, and his Associates, whose chief End was to commence and regulate a Navigation and Trade to certain Parts and Places in the *East-Indies*, where the other Powers of *Europe* had not acquired any Jurisdiction or particular Right of Trade. This Patent gives the said Company a Liberty to sail to, and trade in all Places beyond the Cape of *Good-Hope*, where other Nations have a free Commerce, for the Space of fifteen Years, but they are not to extend their Trade to any Port belonging to other *European* Princes or States without their Leave. The Ships employed in this Trade shall always sail from *Gottenburgh*, and return there to unlade; and the Company shall pay the King and Crown, during the said fifteen Years, a hundred *Dalers Silbermunt per Last*, for every Vessel they employ and lade for the said Traffick, according to their Size; for which Purpose they shall be measured before their Departure from *Gottenburgh*, and this Impost to be laid in *Carolins* in Specie, six Months after their Return; and the Company shall also pay for the Goods they shall bring from the *East-Indies*, two *Dalers Silbermunt per Last*, in Lieu of the City Duties. The Company may fit out what Number of Ships they think proper, on Condition that they be bought or built in *Sweden*, and furnished there with all the necessary Materials, provided such Ships and Materials are to be had there; but, if not, the Company has Liberty to procure them where most convenient; only to regard benefiting the Fabricks, Products, and Manufactures of *Sweden* all possible. The said Ships shall carry the *Swedish* Merchant Colours, and be provided with Commissions signed by his Majesty, and Passports from *Algiers*. The Company may employ in their Trade what Funds they judge convenient, and raise them either by Subscription, or otherwise, as they think proper; they may also put aboard their Vessels what Guns and Ammunition they shall want; all Sorts of Merchandize, and Products, Silver coined, or otherwise, excepting the Specie of the Country, bearing the Arms of his Majesty of *Sweden*; and in like Manner may bring back, unlade, and sell, whatever Goods they will. The Ships not to be stopped from sailing, or hindered coming into Port on their Return on any Pretext whatsoever. The Wood and Materials which the said Company shall transport from one Part of *Sweden* to another, or from any foreign Place, for the Construction or Refitting of their Ships, shall be exempt from all Duties, as their necessary Provisions and Stores shall be, provided that after their Declaration at the Custom-house, and put under Lock and Key at the Company's Warehouses, till the Time of their embarking, they pay the Custom-house one-eighth *per Cent.* Recognition. But for the Products and Fruits of *Sweden*, where-with the Ships may be laden from *India*, they shall pay the customary Duties, according to the Tariff, as also those of the City. The stopping of the Goods brought home, on carrying from the Ships to the Magazines, or from one City to another, is prohibited after Payment of those before stipulated to the King. The Captains shall, for the Discipline of the Sailors and Soldiers, have the same Authority as Commanders of the King's Ships, though they shall conform to the  
Company's

Company's Instructions in every Particular relative to their Navigation and Trade, provided they are in nothing contradictory to this present Grant. None of the Equipage of the said Ship shall be forced into the King's Service, nor that of any other whatsoever: But it is not permitted to employ other Soldiers or Sailors who have deserted his Majesty's Service. They have a Faculty to arrest, by the Magistracy of the Place, all Soldiers or Sailors who shall have run away, before the Time elapsed that they had engaged for. The Ships having delivered and sold their homeward-bound Cargoes, the Purchasers shall pay no Exports, or any other Duties, whether they send the Goods to some other Port in *Sweden*, or directly to a foreign one, except one-eighteenth *per Cent.* called Recognition. The Direction of the Company shall always consist of at least three Persons of Experience and Probity, who are to be either born or naturalized in *Sweden*, and Residents there; and the said Company may make such Regulations as they shall judge convenient, provided they are not contradictory to the Articles of this present Privilege. The Company may appoint what number of Supercargoes, Officers, Sailors, Soldiers, &c. they shall deem necessary, whether Natives or Foreigners, which latter shall enjoy the same Privileges as *Swedish* Subjects. To the Stock of Strangers, or others interested and engaged in the said Company, shall not be arrested on any Pretence whatsoever; and his Majesty will naturalize all such as shall apply for it, according to their Quality and Condition. If it happens that the Company, or those employed by them, be molested, ill used, or hindered in their Trade by any one, or in any Part of the World whatsoever, his Majesty grants them full Power to obtain Satisfaction, and do themselves Justice by every convenient Means, and to repulse all Violence; regarding those as Pirates and publick Enemies who offer it, his Majesty willing that the said Power be expressly inserted in all the Commissions he shall sign; and if, contrary to all expectation, the said Ships should be attacked or taken, his Majesty, after having examined the Injury done them, and found that they had in nothing acted contrary to the first Article of this Charter, will grant them his Protection, and sufficient Power to obtain Justice, and an entire Indemnity, either by Way of Reprisals, or in the speediest Manner possible. All other Subjects are prohibited, during the said Term, to carry on any Trade to the *East-Indies*, on Penalty of his Majesty's Displeasure, and Confiscation of their Ships, Effects, &c. His Majesty promises to change or augment the Privileges contained in the present, if it shall be found necessary, for the Promotion of the said Commerce. Given at *Stockholm* at the Senate, &c.

*Of the Commerce of SWITZERLAND and GENEVA.*

THE *Swiss*, so famous for their Candour, Fidelity, and Bravery, are also equally celebrated for the Trade which the principal Cities of their Cantons transact with Strangers. The Situation of their Country between *France*, *Germany*, and *Italy*, joined to the profound Peace they have always enjoyed, and to the Facility of Transportation, by Means of the Rivers *Rhine* and *Rhône* that flow from their Territories, occasions their Traffick with those States, and the *Low Countries*, to be very considerable, especially in Time of War, between the Powers who possess them. By the *Rhine*, *Switzerland* has a Communication with the Ocean; by the *Rhône* with the *Mediterranean*; and it may be said, that it even makes the Communication of the two Seas; since that of the *Rhine* may be gone up as far as *Seyffel*, seven Leagues from *Geneva*, where the Goods embarked for *Morges* are transported to *Yverdun*, and from thence go by Water even to *Holland*; there being a Canal of Communication between *Morges* and *Yverdun* begun, and which may be finished at a small Expence.

Within Land, the Transportation of Goods from one Place to another is easily performed by Means of the Rivers with which it abounds, notwithstanding the Mountains cross the Country in many Places.

*Switzerland* is in no Lack of any Commodity necessary to the Support of Life; Wood, Corn, Wine, Cattle, Sheep, whose Wool may be employed in making

Clothing, and Flax, are here in great Abundance; so that Salt in Part is their only Want; but the *Tirol*, *Franche-Compté*, and *Bavaria*, are forward to furnish it, so that this Article is not an Object of Commerce, being one of the Revenues of the State, who alone manage this Business, and sell this Commodity at a very moderate Price: Some Time since a Mine of Rock Salt was discovered near *Aigle*, in the Canton of *Berne*, on the Frontiers of *Valay*; but this, at most, can only furnish one-third of what is necessary for the Country of *Vaud*.

*France* furnishes towards the general Imports of this Country, Salt from *Franche-Compté*; Wine from *Burgundy*; Gold, Silk, and Silk Manufactures from *Lyon*; and many light Woollen Stuffs, made in the Provinces bordering on the Cantons.

It has from *Germany* all Sorts of Mercery, and particularly from *Nuremberg*, a great Quantity of Hard-ware; and Hides from *Frankfort*.

*Italy*, especially *Piedmont*, sends it ordinary Silks, Organzines, and Fleurets, spun, unspun, or raw. And *Holland* supplies it with Cloth, Serges, Flannels, Calimancoes, painted Linens, Mullins, Cambricks, Cotton, Ivory, Dying and Medicinal Drugs, Spice, Tea, Chocolate, Whalebone, *Russia* Hides, and *India* Silks.

If we examine what *Switzerland* imports from foreign Parts, especially from *France*, it will be found that it is Luxury more than Necessity obliges it to have Recourse there; so that some Cantons, convinced of this Truth, and persuaded that good Magistrates ought to endeavour as much as is dependent on them to eradicate this Vice, have enacted sumptuary Laws, prohibiting Jewels, and the Use of all Gold and silver in their Furniture, or in their Clothes; Silks of an excessive Price, and even the Entry of foreign Wine, is very severely forbidden in the Canton of *Berne*, which Laws are regarded as a Means to hinder the Coin from going out of the Country.

The Commodities which either the Growth or Manufactures of *Switzerland* produce, are various, according to the different Genius of the Natives in their respective Situations, which I shall describe, and begin first with *Zurick*, Capital of the chief Canton, which is seated on a fine Lake very abundant in Fish, from whence the *Limmat* flows, that divides the City into two Parts, whose Communication is by two fine Wooden Bridges. Although *Zurick* has but few Baillages, it is one of the richest Cantons, by the Trade and Fabricks which its Inhabitants have attracted and set up among them, and which have flourished beyond their most sanguine Expectation. It is certain, that the *Zurickers* have a Genius that qualifies them for Imitation, and the Peasants a Patience and Attachment to Labour, which assists them marvellously in it; and as they work cheap, it is a considerable Advantage to them, and recommends their Goods to a ready Sale: Thus, though the Merchant and Artificer gain but little, *Zurick* possesses great Riches, a plain Indication of the good Effects that Manufactures, and Diligence in them, produce.

Commerce is, properly speaking, the Business of *Zurick*, the particular Object of its Industry, and the determined ruling Taste; the most considerable Men of the City do not disdain to interest themselves in Trade, but apply to it with the same Diligence as the inferior Citizens; and their great Riches never render their Assiduity, Patience, and necessary Labour, to augment their Manufactures, and perfect their Works, irksome; this is what makes their Republick flourish, and that has raised it to the Degree of Power it at present possesses.

The Silks and Organzines which the *Zurickers* buy yearly in the *Trentin*, *Italy*, and *Piedmont*, to twist or throw, employ a great many People, and the Sale which they afterwards have for them in *England*, *France*, *Holland*, and elsewhere, is very considerable; they also employ great Quantities of Silk in their own Manufactures, wrought separately in several Stuffs, Handkerchiefs, Crapes, &c. mixed with Worsted, Cotton, Thread, or Ferret; large Parcels of Cotton are also spun here; for the aforesaid Fabricks; Cotton Linen is made for Printing, as are Stockings and Handkerchiefs of the same Material, the finest being wrought into Mullins; and towards the End of the last Century, the Art of drawing Gold and Silver Wire was introduced here.

*Wintertbour* is a privileged City of the aforesaid Canton, whose various Manufactures have brought it into great Reputation and Trade; here are made Mullins, Cravats, Handkerchiefs, Cotton, Cloth, Woollen Crapes, Callimancoes, Sattins, Damasks, and Camlets, in imitation of the *English*. The Cotton is spun here, where they also dye well.

*Zurzach* is rendered noted for its two Fairs held here at *Pentecost* and *St. Verena*, at the End of *August*, which attract a great Number of Merchants from divers Countries: And

*Schaffhouse* is the twelfth Canton, and the Staple for Steel, Copper, Lattin Wire in Rolls and Bands, which the *Swiss* get from *Stiria*, *Salzbourg*, *Hungary*, &c. many Things are cast here, and a Variety of Works established, of Buttons, Trimmings for Bridles, Coach Harnesses, and Cottons printed; though its Trade is very different from that of *Zurich*, except in the aforesaid Articles, as it furnishes but little to the other Cantons. It is not large, but the Soil very good and fertile in Wheat and Fruits, abundant in Pasturage, and produces excellent Wines.

*Berne*; for to give some Idea of the Trade of this City and Canton, which is the biggest of all, it will not be improper to represent to my Reader its Fertility in Grain Wine, Pasturage, Rock Salt, and Iron Mines.

The Commerce of Horses and other Cattle, brings in here large Sums of Money: That of Grain is a principal Article: The White Wines of the Coast and the *Vaud* are very much esteemed; of which the Cantons of *Fribourg*, and *Soleure*, consume a great deal. Its Manufactures consist in the spinning of Silk Ferret, which employs more than four thousand Persons; in Linens and Hempen Cloths of all Sorts, Dimities, Cotton Cloth for printing, Silk Stuffs, and others with Silk and Cotton, Flannels, Cotton and Wool, Cotton and Thread, Silk, Worsted, Cotton, and Thread Stockings, Ferrets, Tapes, and fine Paper. The greatest Part of these Manufactures owe their Establishment to the *French*, who in the Capital found an Asylum from their Perfection, and Succours beyond their Hopes. The Ferret and Thread find a Vent in *France*, *Germany*, and other Parts of *Switzerland*; the Linens and Table-cloths, of which here is made a prodigious Quantity, sell in *England*, *France*, *Spain*, and *America*; these being the finest and best of any wrought in all the Cantons. The Dimities are very like those of *Holland* and *Flanders*; many of the Cotton Cloths are printed in several Fabricks, as well in the City, as other Places of the Canton, and the Rest are sold for the same Use to *Geneva*, *Neuchatel*, *Morat*, and *Bale*.

The Stocking Weavers get their Wools from *Leipzig*, which they have spun in the Manner as to make Stockings of two, three, and four Threads, sold chiefly in *Italy*, where their Beauty and Goodness has brought this Fabrick into great Esteem. The Silks manufactured here serve principally for the Consumption of the Cantons, among whom it stands the second in Rank, though in Bigness it is one-third of the whole. It has many considerable Towns and Places subject to it, where divers Manufactures are established, or some Trade carried on; the Chief of which I shall just mention.

*Bourgdorf* is a Town engaged in a pretty considerable Traffick with Linen, Thread, and Hemp. Its Markets are frequent, and it abounds in Whistlers, having besides several good Fabricks of Cutlery Ware.

*Langtall*, is a large Village, famous for its Sales of Linens, Thread, Hemp, and Flax. The *Swiss* Merchants make very considerable Purchases here of Linen, as they come out of the Looms, Tape and Laces.

*Araci*, a fine Town seated on the *Aar*, has some Manufactures of Worsted Sattins, and Camlets, knit Stockings, Cotton Handkerchiefs, Cutlery Ware, and Horn Combs. Hides and Skins are also prepared here for various Uses; and its Neighbourhood furnishes a Quantity of Hempen and Cotton Cloth.

*Lintzbourg*, a Town in the Neighbourhood of *Arau*, is situated on a little River, and has a Manufactory for printing Linens; Cotton is spun here, and a large Quantity of Cloth made of that Commodity in this Bailiwick, which is one of the richest, and the most considerable in the Canton; where is also a Fabrick of Hats, and Woollen knit Stockings.

*Zoffingue* is a tolerable large Town, with many Privileges, and furnishes Trade with several Articles from its Fabricks, such as Flannels, Silk Ribbons, and Ferrets, various Sorts of Cloth made with Cotton and Wool, separate and mixed; Cutlery Ware; and here are also very good Linen Printers and Dyers.

*Bruck*, a Town on the *Aur*, is one of the great Passes for Goods both by Land and Water; the River here is very deep, and shut in above the Town among Rocks, that render its Course extremely rapid, forming an Elbow called the *Fall of Bruck*, which was formerly esteemed very dangerous, but now the Boatmen do not regard it as such: In the Town and Neighbourhood some Woollen Stockings are knit, and here are also several Looms for weaving them.

Besides the Towns dependent on *Bern* afore-mentioned, seated in the Country of *Allemand*, there are others in the Country of *Vaud*; the most noted of which I shall now add.

*Lausanne*, the capital Place of the *Vaudois*, near the Lake *Leman*, is more celebrated for the Nobility who reside here, and for the Learned, who have adorned and still adorn its Academy, than for the Extent of its Trade. There are but few Parts, that in equal Limits enclose so much Gentry: And Commerce would flourish here, as it is one of the finest and most fertile Countries in *Europe*, if the Nobility had not imbibed the false Notion, of its being derogatory to their Honour.

At this Place, however, are made some Ratines, wove Stockings, fine Earthen and Delft Ware; but above all the Bookseller's Trade, and Printer's Art, flourishes here in a great Degree, and is daily improved.

*Ouchy*, on the Borders of the Lake, half a League from *Lausanne*, and which serves for its Port, is the Landing Place for Goods coming from *Milan* and *Valais*, by *Vevay*. Here are Halls built purely for the Reception of Merchandize, which may also be brought here from *Geneva*, if destined for *Switzerland*.

*Vevay*, a pleasant Town, seated on the Lake *Leman*, half a League from the *Alps*, maintains an extensive Commerce with *Valois*, *Savoy*, *Piedmont*, and the *Milanese*, from whence it gets a good deal of Rice. This is the Staple of the Merchandizes that come from those Countries, or that *Switzerland* sends thither; here is a Fabrick of Hats, Woollen Stockings, and some Works of Horology. Its Fairs are very frequent by the Resort of *Savoyers*, *Valaisians*, and *Montagnards*, and are above all considerable for the Sale of Cheese, from whence *Geneva* and *Lyons* are partly supplied. *Vevay* is at present rich and populous, and its Inhabitants enjoy the Franchise in *France* granted to the *Swiss* Nation: In its Neighbourhood are Quarries of fine Marble, and they have established there Water Saws, which greatly facilitate the Works, so that six may operate at the same Time on one Block, which has put the Undertakers in a Condition to furnish very cheap Marble, for inlaying Porticoes and Halls, according to the modern Taste, and also to compose Chimney Pieces, &c. which they do in a very great Manner.

*Morges*, a Town also situated on the Borders of the said Lake, two Leagues from *Lausanne*, is well built, and has a good inclosed Port. This is the Reception of Goods from divers Countries, that arrive here by Water and Land; the *Genevan* Barks transport here weekly the Merchandize that the *Swiss* get from *Italy*, *Piedmont*, *Savoy*, *Dauphiny*, *Lyons*, *Languedoc*, *Provence*, and *Bordeaux* by the Capital of *Languedoc*, and relate those which are arrived from *England*, *Holland*, the *North*, *Germany*, and *Switzerland*, destined for *Geneva*, *Piedmont*, *Italy*, *Spain*, and the Southern Provinces of *France*.

*Nyon*, built in the same Manner as the two preceding Places on the Banks of the Lake *Leman*, is a great Pass for Goods that this Town, *Valais*, and the *Milanese*, export from several Provinces of *France*. Its Soil is as proper for Vines, as that Part of the Country of *Vaud*, bordering on the said Lake, which produces those good Wines on the Coast and *Vaud*, that are so much esteemed; of which the Trade of these latter in *Switzerland*, and those of the Coast in foreign Countries is very considerable.

*Cepet*, a small Town two Leagues from *Geneva*, is noted for Clockwork, and its large Fishery.

*Yverdon*, a very agreeable Town, on the Western Extremity of the Lake of *Neuchâtel*, is a considerable Staple, or Deposit for Wine, Salt from *Roche* and *Savoy*, and other Merchandize, for whose Reception here are large Halls built, which serve for no other Purpose. Its chief Trade however is that of Wine, and Delft Ware made here.

*Avenches*, on a Hill near the Lake *Morat*, was the Capital of the Country of the *Helveticans*; it has a most delightful Situation, and here are found some good Remains of Antiquity. It is a great Pass, and some Years since, the Natives have made some Plantations of Tobacco, which, with those of *Payerne*, and its Neighbourhood, very nearly furnish a Sufficiency for the Canton's Consumption, and produce a considerable Revenue to the Inhabitants, whose Soil being very fertile, is likewise abundant in Grain and Fruits.

*Payerne*, a Town of the Country of *Vaud*, seated on the *Broie*, between *Avenches* and *Moudon*, is a very large Pass. Its Territory is very fertile in Grain and Fruits, and here are fine Plantations of Tobacco, out of which the Inhabitants prepare the Rappee, after the Secret of *Clerac*, which is in Esteem both at Home and Abroad.

*Moudon* is an ancient Town built on the aforesaid River *Broie*, fruitful in Corn, and a very considerable Pass for Merchandize by Land.

*Morat*, situated on the Lake of the same Name, is the Staple for all the Wine of the Country of *Vaud*, sent to *Berne*, and a great Pass for Goods, both by Land and Water. Lincens are printed here, and the Town is dependent on *Berne* and *Fribourg*.

*Granson*, seated on the Borders of the Lake of *Neuchâtel*, at a League from *Yverdon*, is also under the Dominion of *Berne* and *Fribourg*, and is the Staple of Salt from *Franché-Comté* for *Switzerland*, in whose Neighbourhood is a good Paper Fabrick at a Place called *La Motte*.

*Lucerne* is a Town built to the North of the Lake, at the Port where the *Russ* issues, which enters the *Aar*, below *Bruck* in its Way to the *Rhine*; here are divers Manufactories of Hempen, Flaxen, and Cotton Cloths, Fustians, Cotelines, Woollen knit Stockings, and spinning of Cotton throughout all the Canton, which abounds in Grain and Pasturage. It also breeds large Herds of Cattle, with which the Natives drive a great Trade, as they do in Cheese for the *Milanese*, from whence the *Swiss* receive in Return large Parcels of Rice.

This Town has an advantageous and convenient Situation, as being on the grand Route to *Italy*, by Way of *Monte St. Godard*. And the Goods which have crossed the *Alps* are transported from hence, by the Lake and River *Russ*, to the *Rhine*, which conveys them to the Ocean. The small Cantons that want Corn, provide themselves here with great Facility, the Lake washing those of *Uri*, *Schwitz*, and *Unterwald*.

*Uri* is a Canton in the Vallies of the high *Alps*, and abounds in excellent Pastures; its principal Revenue consists in Cattle, and its Cheese finds a ready Sale in *Lombardy*. At *Altorf*, a chief Borough of the Canton, is established a Fabrick for cutting and polishing Crystal, of which here are very fine Mines, and the Canton produces several Sorts of Linen for various Uses.

*Schwitz*; in this Canton are made Linens of Hemp and Flax, but Cattle and Cheese are the two great Branches of their Trade.

*Unterwald* has a Revenue and Trade similar to the last-mentioned, with the Addition, that here the Natives spin the Thread they use in manufacturing their Linen.

*Zug* is one of the most agreeable of the small Cantons, and its principal City with the same Name is well built, standing on the Lake called also *Zug*. The Country produces Corn, Wine, a great many Chestnuts, and has excellent Pastures; besides which here are Manufactures of Linen and Woollen Stuffs.

*Glaris*, the capital Town of the Canton, furnishes green Cheeses, renowned for their Goodness and medicinal Virtues given them by a certain inserted Herb, which also produces their Colour, and they are called by the Inhabitants *Schabzi-guer*. Its Slate Quarries are reputed the finest in *Europe*, and furnish the Tops of Tables of a surprising Bigness. This Canton is rich in Cattle, and the Inhabitants very laborious; here is a great deal of Cotton spun; Part sold, and the Remainder employed

employed in the Manufactures of *Switzerland*; and some Linens and Stuffs are made here according to the Custom of the Country.

*Basil* is a City built on the *Rhine*, which divides it into two unequal Parts; it is one of the most considerable of *Switzerland*, although properly out of it, and drives a Trade unequalled by any in that Country. Its Situation procures it the Passage of the Goods that come from *England*, *Holland*, the *North*, and *Germany* for the Cantons and *Geneva*, and for those which the *Swiss* and *Genevans* send to those Countries; the Trade of the Wools of *Germany* and *Poland*; that of Cloth and other Stuffs, Drugs and Spiceries, Metals and Furs, is very considerable here, as are the Engagements in Exchanges: The Activity and Penetration of its Inhabitants have long since rendered it noted for Trade, particularly for Linens, whose Fabricks are in a flourishing Condition. It has also several Manufactures of flowered Ribbons, which employ a great Number of Workmen, and are spread through *Germany*, *Silesia*, *Hungary*, and *Bohemia*. The Fabricks of wove Stockings, Silk ditto, and worsted, set a great Number of Looms to Work, whose Products are sent very distant to be disposed of. The Manufacture in Imitation of Chintz is brought to great Perfection, and does not only supply the neighbouring Merchants, but many others much farther off. The Paper of this City has been long noted for its Goodness; and here are Letter-Founders, not only of the Characters of the living Languages, but also of *Greek* and the *Oriental* Tongues, which are used all over *Switzerland*, in *France*, *Germany*, and elsewhere; Printing is likewise a considerable Part of the Business of the Inhabitants, among whom are also found Gold-Beaters, very expert in their Art, Fabricators of Tobacco, excellent Dyers, both of Silk and Wool, Whitsters, &c.

*St. Gall* is a fine large City seated two Leagues from the Lake *Constance*, in a narrow barren Valley, whose Soil produces nothing but Grass, notwithstanding which, most of the Inhabitants are rich, at least very few of them straitened in their Circumstances; their Wealth flowing in with their great Trade, which chiefly consists in Linen, whose Consumption is very extraordinary all over *Switzerland*, and abroad. This Business is so considerable as to place the Weavers in some Respects on a Level with the Nobility; as they with the Gentry make the first of the twelve Tribes, of which this City is composed. The Manufactures of Woollen Stuffs are here also in a flourishing Condition; besides which, this City being so near the afore-mentioned Lake, and on the Road from *Germany* to *Italy*, it serves as a Channel of Communication between them; and its Halls are the Warehouses for Goods that go and come.

*Fribourg* is a pretty large City, and Capital of the Canton bearing the same Name, seated on the River *Sane*. Its Factories are extensive, and the Country very fine, being, next to *Lucerne*, the most powerful of the Roman-Catholic Cantons; the Goodness of its Pastures, and the Fertility of its Soil, yield a very considerable Income to the Inhabitants, whereby they are placed at Ease, and are not so laborious as their Neighbours; so that, with the Exception of the Cheese Trade, they bring little to it, besides a few Hempen Linens, and some Hats made here. There is a Fabrick of Paper in the Neighbourhood, and a Printing-Office in the City.

*Gruiere*, is a small Town in the Canton of *Fribourg*, noted for its excellent Cheeses in all *Europe*; and of which the Trade is so very considerable, as to induce several Merchants of this Canton to settle Houses at *Lions*, for negotiating their Sales.

*Soleurre*, the capital City of the Canton with the same Name, has very fine Fortifications, and is seated in a Country extremely pleasant; the *Aar* dividing the City into two unequal Parts. It serves as a Deposit for the Goods imported to *Switzerland*, by Way of *Schaffhouse* and *Basil*; and which are laden for *Verdon* by the Lake of *Bienne*. At *Olten*, a small Town on the *Aar*, and dependent on *Soleurre*, besides other Parts of the Canton, are made a Quantity of Woollen knit Stockings, and some Hats, and Cutlery Ware.

*Apenzel* is the principal Town of the Canton named therefrom, which is very rich in Meadows and Pasturage, fitly adapted to the Breeding of many Cattle, in which this Territory abounds: they also grow here a great Deal of Hemp and

Flax, which serves the Inhabitants for a Winter's Employ in making Linens, fold afterwards at *St. Gall*, but little distant therefrom.

*Bienne*, a Town situated at some Distance above the Lake of this Name, between *Soleure* and *Neufchatel*, dependent on the Bishop of *Basil*, carries on a great Trade in Deal Boards, commonly twenty-two or twenty-four Feet long, as also in other Wood for Building; here are also made Variety of Ribbons and Ferrets, and it has good Tanneries, and a fine Earth for Delft Ware.

*Poretrees*, a City and Castle serving for the Residence of the Bishop of *Basil*, where is made fine Earthen Ware, Gloves, and Woollen Stockings knit and milled.

*Mulbaufin* is built on the River *Ill*, five Leagues from *Basil*, and allied with the *Swiss*. It is seated in a very fertile Plain; abundant in Grain and Wine, having more than sixty Manufactures of Cloth and Druggets; here is also made a Quantity of Woollen knit and coarse Silk wove Stockings, and Blankets; besides which, the Place affords very good Dyers and Tanners, who have sufficient Occupation in their different Employes.

*Neufchatel*, is a *Swiss* City, Capital of the Principality of this Name; it is seated on the Borders of a Lake, which communicates with those of *Morat* and *Bienne*, and discharges itself that Way into the *Aar* and the *Rhine*; which extremely facilitates its Trade, not only with the Rest of *Switzerland*, but also with *Germany* and *Holland*, for which Places Vessels depart twice a Year with Goods and Passengers; it is a very pleasant Voyage, and is generally performed in fifteen Days. All the Subjects of this Sovereignty are exempt from Tolls, Imposts, and other Duties, as well for the Goods they bring in, as those they export on their own Accounts; neither are they obliged to declare the Contents of their Bales, or Cases, at entering or going out when the Merchandize belongs to them. Here are three Fairs in the Year, at which the Merchants pay no Customs on Imports and but a Trifle on Extracts. Their Trade is pretty extensive, and here are Magazines, where Traders of the neighbouring Places may purchase the various Commodities from *India*, *England*, *Holland*, *France*, and *Germany*, at reasonable Prices.

The chief Fabricks of the Country are printed Cotton, in Imitation of *Clintz*, pushed to a great Degree of Perfection, the Beauty and Vivacity of the Colours, equalling those of the best *Ahatick* Performances; here are also manufactured Thread and Cotton Stockings, of which a great Consumption is made in *Italy*, *France*, *Spain*, *Portugal*, the *American* Isles, and even in *Holland*, notwithstanding the fine Fabricks of *Harlem*; the *Dutch* Merchants having distinguished the Goodness of the Thread and Work, besides a considerable Difference in Price. The Glovers' Trade has been long in Repute, and the Thread is spun finer here than in *Holland*, to above the Value of forty-five Shillings Sterling per Pound Difference. The Manufacture of Lace is spread through the whole Canton; the common Sort are wrought in great Quantities in the Mountains, and a prodigious Sale is made of them abroad; in the City, the Perfection of this Commodity is pushed to a Degree of Equality with those of *Flanders* for Beauty, and to surpass them a great deal in Quality; here are also made Linens and Tapes, and the *Chamois* of *Neufchatel* is in great Esteem, it being sent to *Italy*, *France*, and *Germany*.

The Village of *Serrieres*, dependent on this City, and which on Account of its Proximity might be regarded as one of its Suburbs, is considerable for the many Wheels which the little River bearing its Name turns, without ever having the least Interruption from the roughest Winters or driest Summers; among which are grinding Mills, Saws, Polishers, Forges, Founderies, and Battery Works, for Copper, Iron, and Paper; here are also made Variety of Hard-ware, but the Iron Wire and Cards of this Place are, above all, in great Esteem.

The Medicinal and Vulnerary Herbs found here in great Abundance, its vast Herds of Cattle and Plenty of Corn and Wine, with every other Necessary of Life, proclaim the Fertility of the Country; in which a Residence is rendered still more agreeable by the Wholesomeness of the Laws, which secures the Property and Liberty of the Subject.

## Of GENEVA.

**T**HIS City is celebrated for its Antiquity, for its advantageous Situation, for the Number of its Inhabitants, and particularly for its great Trade, which however was yet much more considerable before the Removal of its Fairs to *Lyon*. It is seated in one of the most delightful Countries of *Europe*, at the Extremity of the Lake bearing its Name; and which facilitates a Commerce, that the Industry of its Inhabitants has rendered very extensive. In Respect to whose interior Part, this City may, with proper Limitations, be regarded as one of the Storehouses of *France*, a Part of *Germany*, *Switzerland*, *Piedmont*, and *Italy*, which Countries it supplies with all Sorts of Linens, Mullins, Chintz, Drugs, Spice, *English*, *French*, and *Dutch* Cloths, Porcelaines, Tea, Hard-Ware from *Germany* and *Forest*, Scythes, Sickles, Iron and Latin Wire, Gold and Silver Galloons and Laces, Stockings, Hats, Jewels true and false, all Sorts of Clockwork, Variety of Files, Steel of its own Growth and from *Germany*, Tin, wrought Copper, and Books on all Subjects.

Independent of which Traffick, the diligent Inhabitants have carried it to the most remote Countries, by interesting themselves in Voyages to *America*, and the *Isles*; but I shall add a short Detail of what I have said above of their Products and Manufactures, as due to a City numbered among the most celebrated ones of *Europe*.

Its Territories, though they are not the most fertile, do nevertheless yield excellent Corn, and Wine both white and red of good Quality; it has also Pastures sufficient for the breeding and Support of its Cattle; and the *Rhofne* furnishes it with Trout, of which some of above thirty Pounds Weight are exported, and carried even as far as *Paris*.

Horology is however the most considerable Manufacture, which alone easily subsists near a quarter Part of the Men, Women, and Children dwelling here, who are all profitably employed in the different Branches of this Art, and have brought it such Perfection, as to yield, I believe, only to *England* in it.

Gilding is also in a flourishing Condition here, where Silver Wire is drawn Gilt, as also with the deceitful Appearance of its being so made only by smooking; Gold and Silver Galloons, and Laces, are made of all Sorts and Qualities, Embroideries of Silk in Variety of Shades and Colours, all of which are sent into *Germany*, *Italy*, *Portugal*, *Spain*, and from thence to the *Indies*.

Another very considerable Fabrick is that of painted Linens, in Imitation of those performed by the *English* and *Dutch*; which for Beauty of Design, and Vivacity of Colours, are only inferior to those of the said two Nations.

The Bibliothecal and Printing Business is also very great here, and a material Object of Trade, as the Liberty of the Press extends to all Sorts of Works, provided they contain nothing against Religion in general, Princes, and good Morals; so that no Objection is made against Printing the Writings of the *Romanists* against *Protestantism*, but it is performed with the greatest Exactness and Fidelity; and besides the Books printed here, the Libraries are assorted with all those that daily appear in *France*, *Italy*, *Holland*, and *Germany*.

There is no Place of its Size, where more Jewels are composed, both true and false, than here; and in general there reigns in this Sort of Work so good a Taste, that Trade, which it attracts, cannot but engage the ingenious Artists, to maintain the Reputation he has already acquired.

The Fabrick of Silk Stockings goes on improving, and is got into some Reputation, as is that of Velvets; and I should do Injustice to the Arts, and those who exercise them, should I pass them over in Silence, as here are Machinists, Engravers, Designers, and Mathematical Instrument Makers, who practise all these Employments with Success and Credit; not forgetting those celebrated Medalists, Messrs. *Dassier*, who will transmit to latest Posterity the Delicacy and Grandeur of their excellent *Burin*.

I shall finish this Article with the Description of two Manufactures lately established in the Country of *Dardagny*, dependent on the Sovereignty of *Geneva*. Of which the first is a Fabrick of Steel in Bars of any Size, that equals in Quality

lity most others made elsewhere, and which has for Offspring a Manufacture of Files and Rasps of all Sorts and Sizes.

The other is a Fabrick of Copper, producing all Assortments that can be desired in this Commodity, such as Bands, Cups of all Sizes, Plates, Chaldrons, and an Alloy of Metals for all Uses, and this on cheaper Terms than elsewhere.

The Correspondence between the Merchants of this City and those of *Marseilles* and *Amsterdam*, and the little Way there is by Land, for the Transportation of their Goods to the *Rhine* and *Rhofne*, facilitates that of the two Seas, so that there is hardly a Place, howsoever distant, where the other Nations of *Europe* send their Ships, that some of the *Genevans* are not seen as Partners, or Principals in the Voyage.

While the Independency of this Republick was maintained, its Trade continued in a flourishing Condition, but since its Connection with the Court of *Versailles*, the *French*, under the Title of Guardians of the Peace of the Republick, interfere in their Civil Government, and occasion Parties in it, which threaten Dissolution. In the Moment of writing this Article, considerable Emigrations of their most skilful Artists are taking Place, and *Ireland* is the Kingdom likely to be benefited by this Revolution.

### *An Account of the WEIGHTS, MEASURES, and COINS, in all Parts of EUROPE.*

**T**HE Weights in common Use throughout *Great-Britain*, are Troy and Avoirdupois; the former consisting of Grains, Pennyweights, Ounces, and Pounds, whereof 24 Grains make a Pennyweight, 20 Pennyweights, an Ounce, and 12 Ounces a Pound, by which Bread, in Corporation Towns only, Gold, Silver, and Apothecaries' Medicines are weighed; and to this Weight Corn Measures are reducible, as 8lb. Troy makes a Gallon, 16lb. a Peck, and consequently 64lb. a Bushel; Liquid Measures are also dependent on it, as their Capacities correspond in their different Sizes thereto, from a Pint consisting of 12 Ounces, or a Pound, up to a Ton, containing 252 Gallons, and weighed 2016lb. or 1890lb. Avoirdupois; 2 Pints make a Quart, 4 Quarts a Gallon, containing 231 Cubical Inches, 63 Gallons a Hoghead, 42 a Tierce, 126 a Pipe, and 252 a Ton of Brandy, Cider, Wine, &c.

Refiners and Jewellers also make Use of this Weight in Part; the former calling their smallest Fractions Blanks, of which 24 make a Perit, 20 Perits a Droite, 20 Droites a Mite, 20 Mites a Grain, and then as above. The Jewellers divide the Ounce into 152 Parts or Carats, and these into Grains, whereof four make a Carat.

By Avoirdupois Weight, all Gross Goods and Base Metal are weighed, such as Grocery, Resin, Pitch, Tallow, Soap, Butter, Cheese, Iron, Lead, Copper, Alum, &c. its component Parts are Drams, Ounces, &c. of which 16 Drams make an Ounce, 16 Ounces a Pound, 28 Pounds a Quarter of a hundred Weight, or 112 Pound, and 20 hundred Weight or 2240 Pound a Ton; but besides this hundred Weight there is another called the Stannary Hundred by which Tin, &c. is weighed to the King. The Avoirdupois Ounce is lighter than the Troy Ounce, by near a twelfth Part, 51 Ounces Troy being equally to 56 Avoirdupois; but the Avoirdupois Pound is heavier than the Troy, 17 Pounds of this latter being equal to 14 Pounds of the other.

Wool is generally sold by the Tod, or Clove, allowing 7 pounds to the Clove, 14 Pounds to the Stone, 28 Pounds to the Tod, 128 Pounds to the Wey, 364 Pounds to the Sack, and 4368 Pounds to the Last.

Lead is bought by the Fodder, which at *London*, *Newcastle*, &c. weighs 19½ Hundred Weight of 112 Pounds; but at *Hull* 19½ Stannary Hundred of 120 Pounds; and at *Chester*, &c. it is still different.

In *Effex*, Butter and Cheese are weighed by the Clove, or half Stone, being 8 Pounds, of which 32, or 256 Pounds is a Wey; but in *Suffolk* 42 Cloves or 336 Pounds are allowed to the Wey. Of Butter a Firkin must weigh 56 Pounds, and that of Soap 60 Pounds, and 4 Firkins of either make a Barrel.

A Stone of Beef at *London* is 8 Pounds, but in the Country it is commonly 14 Pounds; Horse-Racers also reckon 14 Pounds to the Stone; and it is the same with Iron, Shot, or Wool, double the Quantity of Iron and Shot being called a Quarter, though a Stone of Sugar, Cinnamon, Nutmegs, Pepper or Allum, is but 13½ Pounds.

A Faggot of Steel is 120 Pounds, and a Burden of Gad Steel 180 Pounds.

A Barrel of Gunpowder is 100 Pounds, and 24 Barrels make a Last.

A Seam of Glass is 24 Stone, of 5 Pounds each, or 120 Pounds.

A Truss of Hay 56 Pounds, and a Load or Ton of it 36 Trusses.

Raw Silk is sold here by the Pound of 24 Ounces, or more properly one Pound and a half Avoirdupois; but Orgazines, Trames, &c. by the common Pound of 16 Ounces.

In *France*, *Holland*, and most other Places in *Europe*, the Pound is termed Mark Weight, by reason that 2 Marks of 8 Ounces compose it, so that in all Places where this Pound is used, it consists of 16 Ounces, as with us; and as most Authors who have calculated the Correspondency of these different Weights have taken those of *Paris* for a Standard, I shall follow their Example, as it is easy to reduce any not mentioned in the following Table by the Rule of Three, and I shall only take Notice of such as are not inserted therein; or that make Use of more Weights than one.

*Coningsberg* reckon their Weights by Schippounds, consisting of 400lb. divided into 10 Steens of 40lb. each, 100lb of *Paris* makes 125lb. of *Coningsberg*, and 100lb. of *Coningsberg* makes 80lb of *Paris*, so that the *French* Hundred of Salt yields near 10 Lasts, which is little more than 40,000lb. at this Place.

*Dantzick's* Schippound consists of 320lb. containing 20 Liespond of 16lb. each, of which 100lb. makes 88½lb. at *Paris*; and on the contrary, 100lb. of this last City makes 112lb. at *Dantzick*. The Hundred of *French* Salt produces 11½ to 12 *Dantzick's* Lasts, the Last of that Salt being 18 Ton, though the Last of this Commodity from *Lunenburg* and *Haran* is only 12 Tons.

*Elbing's* Weights are the same with those of *Dantzick*.

*Stetin's* Schippound contains 180, and its Pierre 21lb. the 110lb. making 100lb. of *Paris*. The Hundred of Salt from *France* yields here 10 Lasts.

*Lubeck*, the Schippound here is 300lb. divided into 20 Liesponds of 15lb. each; and 100lb. of this Place makes 95½lb. of *Paris*, and 100lb. of *Paris* 105lb. of *Lubeck*.

*Breslaw*, 100lb. of this Place makes 50lb. at *Paris*, and 100lb. *Parisian* makes 125lb. here.

*Bremen's* 100lb. is reckoned equal to 97lb. of *Paris*, and 100lb. of *Paris* is esteemed 103lb. of *Bremen*.

*Naumbourg* make Use of the same Weights as *Leipsick*, calculated in the Table.

*Erfirt* computes 100lb. to equal 92lb. of *Paris*, and that 100lb. of *Paris* makes 108lb. here.

*Bergne*, the 100lb. here is computed to make 90lb. of *Paris*, and the 100lb. of *Paris* to make 111lb. of these.

*Cologne's* 100lb. makes 96lb. at *Paris*, and 100lb. of *Paris* is equal to 104lb. here.

*Ghent*,  
*Brussels*,  
*Malines*,  
*Bruges*, } correspond exactly in Weights with *Antwerp*.

*Lisse*, 100lb. of this Place makes 88½lb. of *Paris*, and 100lb. of *Paris* makes 114lb. here.

*St. Malo* is commonly supposed to have its Weights equal with those of *Paris*, though by some reckoned to be 2 per Cent. less.

## GENERAL COMMERCE OF THE WORLD.

*Bayonne* had its Weights equal to those of *Paris*; and at *Lyon* two Sorts of Weights are in Use; those of the City, by which all Species of Gross Goods are sold, and whose Pound, consisting of 16 Ounces, only makes 14 Ounces Mark Weight; the other for Silk only, containing 15 Ounces the Mark, so that 100lb. of Silk makes 108lb. City Weight.

*Genoa*; this City has five Sorts of Weights, the first called the *Great Weight*, used in the Custom-house; the second *Cash Weights*, for Plate and Coin; the third *Cantaro*, or the common Quintal, by which are weighed Gross Goods that are sold; the fourth called the *Great Balance*, by which Raw Silks are weighed; and the fifth is called the *Small Balance*, that serves for weighing fine Goods.

90 $\frac{1}{2}$ Rotoli or Pounds,	<i>Great Weight</i>	} make 100lb. of <i>Paris</i> .
100 Rotoli	<i>Cash Weight</i>	
100 Rotoli	<i>Common Weight</i>	
145 lb.	<i>Great Balance</i>	
153 lb.	<i>Small Balance</i>	

*Rome*, 100lb of this City, makes within a Trifle 71 $\frac{1}{2}$ lb. at *Paris*, and 100lb. of *Paris* make 140lb. of *Rome*.

At *Leghorn*, they make Use of two Sorts of Weights, viz. great and small.

93lb. great Weight	} of <i>Leghorn</i> , makes 100lb. of <i>Paris</i> .
140lb. small Weight	

The Quintal is reckoned variously, according to the Species of Goods sold here by it, viz. the Quintal of *Roman Allum*, or Poorjack, dried or Pickled Heartings, and Salted Salmon, is sold here by that of 150lb. The Quintal for Sugar 151lb. and for Wool and Fish 160lb.

*Florence* has the same Weight as at *Leghorn*.

*Lucca* has likewise two Sorts of Weights, viz.

Great Weight, of which 94 $\frac{1}{2}$ Rotoli, or Pounds	} make 100lb. of <i>Paris</i> .
Small Weight, of which 14 $\frac{1}{2}$ Rotoli, or Pounds	

<i>Palermo</i> in <i>Sicily</i> two Sorts of Weights, of which,	} make a Trifle less than	} of <i>Paris</i> .
100 Rotoli, Great Weight		
100lb. Small Weight		6 $\frac{1}{2}$ lb.

At *Venice* the Weights are likewise different, the Pound of the small Weight consisting only of 12 Ounces, and the Pound of the great Weight 18 $\frac{1}{2}$  of the same Ounces; or it is otherwise reckoned that

100lb. great Weight makes	158 lb. small Weight, and	
100lb. small Weight	63 $\frac{1}{2}$ lb. great Weight;	
100lb. great Weight	} making	} of <i>Paris</i> .
100lb. small Weight		
		90 lb.

And 100lb. of <i>Paris</i> makes at <i>Venice</i>	} 104 lb. great Weight,

*Bologne*, 100lb. of this Place makes 66lb. at *Paris*, and 100lb. of *Paris* makes 151 $\frac{1}{2}$ lb. of *Bologne*.

*Bergame*, like *Venice* has two Sorts of Weights, viz. great and Small; this latter has only 12 Ounces to the Pound, and the great has 30 Ounces or 2 $\frac{1}{2}$  small Pounds. The small serves for weighing Silk, Cochineal, Indigo, Wax and other Drugs; and the great for Wool and other Gross Goods.

100lb. small Weight	} of <i>Bergame</i> , makes	} of <i>Paris</i> , and
100lb. great Weight		
		147 $\frac{1}{2}$ lb.
100lb. of <i>Paris</i> , makes	} 169lb. small Weight	} of <i>Bergame</i> .

The Weights of *Naples* are the same with those of *Bergame*.

*Smyrna* uses the *Canta*, or Quintal, with its Fractions, for the Weight of Goods.

The Quintal weighs 45 Oques, or Okkes, or 100 Routels,

The Batmen makes 6 Oques.

The Sechie 2 Ditto

The Routel makes 180 Dragmes

The Oque 400 Ditto.

The Quintal of 100 Routels or 45 Oques as above, is equal to 114lb. of *Paris*; on which Footing 100lb. of *Paris* makes about 87 $\frac{1}{2}$  Routels of *Smyrna*.

Subject.

It is reckoned that the Oque weighs a Trifle more than 2 $\frac{1}{2}$ lb. of *Paris*, but this is according to the Goods weighed by it.

*Constantinople* has the heaviest Weights in all the *Levant*, though they are distinguished as at *Smyrna*. The Quintal consists of 45 Oques, and the Oque of 400 Dragmes, corresponding to 2 $\frac{1}{2}$ lb. of *Paris*.

It is reckoned that the Quintal of *Constantinople* weighs  $\left\{ \begin{array}{l} 112\frac{1}{2} \text{ lb. of } \textit{Paris}, \\ 181 \text{ lb. of } \textit{Venice}, \\ 160 \text{ lb. of } \textit{Leghorn}, \end{array} \right.$

Being divided into Rottels, Oques, Batmens, &c. as at *Smyrna*.

At *Aleppo* they make Use of divers Sorts of Weights, viz.

The Quintal, or Cantar, of 100 Rottels, each consisting of 720 Dragmes.

The Surlo, which is 27 $\frac{1}{2}$  Rottels.

The Rottel with which most Goods are weighed containing, as above, 720 Dragmes, which make 4 $\frac{1}{7}$ lb. of *Paris*.

The Rottel for weighing the Silks growing in the Neighbourhood, is of 700 Dragmes, and weighs 4 $\frac{1}{2}$ lb. of *Paris*.

The Rottel for weighing *Persian* Silks, Legi de Burma, Ardasse, and Ardassete, contains 680 Dragmes, and weighs 4 $\frac{1}{4}$ lb. of *Paris*.

The Damassin Rottel, with which, Brass, Luttin Wire, Amber, Camphire, Benzoin, Spikenard, Balm of *Micca*, and Aloes Wood are weighed, contains 600 Dragmes, and makes 3 $\frac{1}{2}$ lb. of *Paris*.

The Ok, or Oque, weighs 400 Dragmes.

The Metical, with which Pearls and Ambergris are weighed, is 1 $\frac{1}{2}$  Dragme.

1lb. of *Paris*.

1lb. small Weight of *Venice* } make at *Aleppo*  $\left\{ \begin{array}{l} 156 \\ 98 \end{array} \right.$  Dragmes.

1lb. great Weight of D $^{\circ}$  }  $\left\{ \begin{array}{l} 98 \\ 112 \end{array} \right.$

The Quintal of *Tripoli* makes 1 $\frac{1}{2}$  Quintal of *Aleppo* of 720 Dragmes.

At *Seyda*, the ancient *Sidon*, two Sorts of Weights are in Use, viz.

The Rottel Damassin, or Damasquin, by which all Sorts of Silks and Cotton Thread are sold; it is reckoned 600 Dragmes, which make 3 $\frac{1}{2}$ lb. of *Paris*.

And the Acre by which most of the Gross Goods are sold, equal to 4 $\frac{1}{2}$ lb. of *Paris*.

*Alexandria* makes Use of a Cantar or Quintal for the weighing of Goods, which varies according to the different Species weighed by it, as for some it consists only of 100 Rottels, and for other, 105, 110, 112 $\frac{1}{2}$ , 115, 120, 125, 130, and 133.

The Rottel *Parfarin* is 144 Dragmes, 100 of which Rottels are reckoned equal to 125lb. of *Leghorn*.

The Rottel *Gerouin* is 312 Dragmes.

The Okke, or Oque is 400 Dragmes.

The Cantal, or Quintal of 100 Rottels, is supposed equal to 120lb. of *Paris*.

*Rosett* has its Weights the same as those last mentioned of *Alexandria*.

*Grand Cairo* makes Use of the Quintal, or Cantar of 100 Rottels, for the weighing most of its Goods, reckoned equal to 88lb. of *Paris*; though a Quintal of Coffee yields 95lb. at *Amsterdam*, which is, as has been observed, the same with those of *Paris*.

These are all, or at least the principal Places of Trade, whose Weights are not mentioned in the subsequent Table; so that I have nothing more to add on this Subject.

GENERAL COMMERCE OF THE WORLD.

A TABLE of the AGREEMENT which the WEIGHTS of the PRINCIPAL PLACES in EUROPE have with each other.

*N. B.* At the Weights of Amsterdam, Paris, Hamburg, Strasbourg, Bremen, and several other Places have but the intended Difference, they are all compared under that of Amsterdam, as those of Amsterdam are under Frankfurt, and others in the same Manner.

OF WEIGHTS, &c.

Mr. *John Peter Ricard*, having furnished us in his Book entitled *Le Negoce d'Amsterdam*, and several other Authors in their different Works, with a Calculation of the Agreement, which the several Corn Measures of *Europe* have, with those of that City, I herewith dedicate it to my Readers' Service, in Hopes it may be useful to many of them in their feminal Negotiations; but, previous thereto, I shall give some Account of the Fractions of the different Measures mentioned therein, and of those that are not there inserted.

The dry Measures at *Amsterdam* for Corn are,

The Last containing 27 Muddes, or 36 Sacks.

The Mudde, containing 4 Schepels.

The Sack, containing 3 Schepels; and Retailers still divide

The Schepel into 4 Vierdevat, and

The Vierdevat into 8 Kopp.

The Last { of Wheat commonly weighs from 4600 to 4800lb. }  
 { of Rye - - - - - 4000 to 4200lb. } Mark Weight.  
 { of Barley - - - - - 3200 to 3400lb. }

The Last of *Monnikendam*, *Edam*, and *Purmerent*, is equal to that of *Amsterdam*.

The Last { of *Hoorne*  
 { of *Enkbuysen*  
 { of *Muiden*  
 { of *Naarden*  
 { of *Wesep* } is of 22 Muddes, or 44 Sacks, and the Sack of 2 Schepels.

The Last of *Haarlem* is of 38 Sacks, and the Sack of 3 Schepels; 4 Schepels making 1 Hoed of *Rotterdam*, and 14 Sacks, 1 Hoed of *Delft*.

The Last of *Alkmaar* is of 36 Sacks; the Hoed 4 Schepels; but the Hoed is 5-8ths bigger than that of *Rotterdam*.

The Last of *Leyden*, is of 44 Sacks, and the Sack of 8 Schepels.

The Last of *Rotterdam*, *Delft*, and *Schiedam* is composed of 29 Sacks, and the Sack of 3 Schepels, of which 10 2-3ds make an Hoed; the Last of these Places being 2 per Cent. bigger than that of *Amsterdam*, and this Last for Hemp-Seed is also of 29 Sacks, and for Linseed 24 Tons or Barils.

The Last of *Dort* or *Dordrecht* is of 24 Sacks, the Sack of 8 Schedels, and 8 Sacks make 1 Hoed. All Grains are bought and sold here by the Hoed, which make 8 Barils or 32 Schepels, counting 4 Schepels to the Baril; and 3 Hoeds make 1 Last of *Amsterdam*.

The Last of *Gouda*, or *Tergouw*, is of 28 Sacks, and the Sack of 3 Schepels; 32 Schepels making 1 Hoed.

Four Hoed of *Oudewater*, *Heusden*, *Gornichem*, and *Leerdam*, make 5 Hoed of *Amsterdam*: 2 Hoed of *Gornichem* make 5 Achtendeelen, or Huitiemes, and 1 Last, and 4 Hoed, make 5 Hoed of *Delft*.

Twenty-eight Achtendeelen or Huitiemes, of *Asperen*, make 32 Huitiemes of *Rotterdam*: 26 Huitiemes of *Worcum*, also make 32 Huitiemes of *Rotterdam*.

The Last of *Breda*, for hard Grain, such as Wheat, Rye, Barley, and the like, is of 32 1-half Veertels, or Quartiers: and the Last of Oats is of 29 Veertels; 13 Veertels of hard Grain making 1 Chapeau of *Delft*, and 14 Veertels of *Antwerp*.

Corn Measures of the Provincce of *Utrecht*:

The Last of *Utrecht* consists of 25 Muddes or Sacks; 6 Muddes making 5 Mouviers, and 10 1-half Muddes or Sacks, 1 Hoed of *Rotterdam*.

The Last of *Ammerfort*, is of 16 Muddes, or of 64 Schepels; 6 Muddes making 1 Sack, or 1 Hoed of *Rotterdam*.

The Last of *Montfort* is of 21 Muddes, the Mudde making 2 Sacks, and the Hoed containing 4½ Huitiemes more than that of *Rotterdam*.

The Last of *Ylssleyn* contains 20 Muddes, each Mudde 2 Sacks, and the Hoed 3 Huitiemes more than that of *Rotterdam*.

The Last of *Vianen* is also of 22 Muddes, the Mudde of 2 Sacks, and the Hoed contains 2 Huitiemes more than that of *Rotterdam*.

## GENERAL COMMERCE OF THE WORLD.

Corn Measures in the Province of *Frijs*:

The Laft { of *Leeuwarden* } is of 33 Muddes, of 18 Tons or 36 Loopers, which  
 { of *Haarlingen* } make 3 Hoed of *Rotterdam*.  
 { of *Groninguen* }

Corn Measures of the Province of *Gueldre*:

The Laft of *Nimeguen* is of 21 $\frac{1}{2}$  Mouwers, and that of *Arnhem* and *Doebourg* of 22 Mouwers; the Mouwer is 4 Schepels, and 8 Mouwers make 1 Hoed of *Rotterdam*.

The Laft of *Tbiel* confifts of 21 Muddes; the Hoed of *Rotterdam* being an Achteling or Huitieme bigger.

The Laft of *Roermonde* is of 68 Schepels, or Achtelings; 100 Veertel, or Quartieres, making 1 Hoed of *Rotterdam*.

The Laft of *Bommel* is of 6 Achtendeels, or 18 Muddes greater than that of *Rotterdam*.

At *Harderwyk* it is reckoned that 11 Muddes make 10 of *Amsterdam*.

Corn Measures of the Province of *Over-Yffel*:

The Laft of *Compen* contains 24 $\frac{1}{2}$  Muddes for Wheat, of which 9 make 1 Hoed of *Rotterdam*.

The Laft of *Zwoll* is of 26 Sacks, or 9 Muddes, which make 1 Hoed of *Rotterdam*.

The Laft of *Deventer* is of 36 Muddes, counting 4 Schepels to the Muddes.

Corn Measures of the Province of *Zeeland*.

The Laft of *Middelbourg* is reckoned 41 Sacks and 1 Achtendeel; reckoning 2 Achtendeels to the Sack.

The Laft of *Vliffingen* or *Fleffingue*, and that of *Veer* or *Terveer* is of thirty Sacks.

The Laft of *Zirickzee*, *Ter-Goes*, *Bommene*, *Tertolen*, *Stavenes*, and *Duyvelant* is of 37 $\frac{1}{2}$  Sacks.

The Laft of *Sommelfdyk*, *Dirkflaud*, *Middlebarnes*, *Oeltieflaat*, *Pays de l'Uticien*, and *La Brille*, is of 38 $\frac{1}{2}$  Sacks; but all thefe aforefaid Measures are reducible, and near equal to the Laft of *Middlebourg*, becaufe 2 $\frac{1}{2}$  Achtendeels make the *Zeeland* Sack, or the *Middlebourg* Sack of 2 Achtendeels, as above-mentioned.

Corn Measures for the Province of *Brabant*:

The Laft of *Antwerp* for Wheat is of 37 $\frac{1}{2}$  Verteels or Quartieres, and that for Oats of 37. The Verteel being divided into four Mukens, and 14 Verteels making the Hoed of *Rotterdam*.

At *Bruffels* 25 Sacks are reckoned for an *Amsterdam* Laft of Wheat.

The Laft at *Malines* is of 34 $\frac{1}{2}$  Verteels; the 100 Verteels making 108 of *Antwerp*, and 12 Verteels making 29 Achtendeels of *Delft*.

The Laft of *Louvain* is of 27 Muddes, and the Muddes of 8 Halfters.

The Laft of *Breda* for Wheat is of 33 $\frac{1}{2}$  Verteels, and of 29 for Oats; the 13 Verteels making 18 Sacks, or 1 Hoed of *Rotterdam*.

The Laft of *Stenbergen* is of 35 Verteels.

The Laft of *Bergen-op-zoom* is of 36 Sifters for Wheat, and 28 $\frac{1}{2}$  for Oats.

The Laft of *Bojleduc* is of 21 $\frac{1}{2}$  Mouwers, of which 8 make 1 Hoed of *Rotterdam*.

Corn Measures of *Flanders*:

The Laft of *Ghent* contains 56 Halfters for Wheat, and 38 for Oats; 12 Halfters making 1 Muddes, or 6 Sacks, fo that each Sack is 2 Halfters, and Corn is bought and fold here by Muddes or Halfters.

The Laft of *Bruges* is of 17 $\frac{1}{2}$  Hoed for Wheat, and 14 $\frac{1}{2}$  for Oats, which makes one Laft of *Amsterdam*, and one Hoed of this Place yields 4 $\frac{1}{2}$  Achtendeels of *Delft*.

The Laft of *St. Omer* is of 22 $\frac{1}{2}$  Raziers.

The Laft of *Dixmude* for Wheat is reckoned to be 30 $\frac{1}{2}$  Raziers, and 24 Raziers for Oats; the Razier making 2 Schepels of *Rotterdam*.

The Laft of *Lille* confifts of 38 Raziers for Wheat, and 30 Raziers for Oats, the Razier making 2 Schepels of *Rotterdam*.

Eighteen Sakers of *Dunkirk* make 1 Hoed of *Rotterdam*; Sea Measure is 9 Raziers, which weigh 280 to 290lb. Mark Weight each, but the Land Razier only weighs 245lb. of the faid Weight.

At *Gravelines* 22 *Raziers* is reckoned to the Last of Wheat; and 18½ for Oats.

Corn Measure of the Country of *Leige*:

The Last of *Leige* is 96 *Setiers*, and the *Setier* consists of 8 *Muddes*.

The Last of *Tongres* for Wheat is 15 *Muddes*, and for Oats 14.

Corn Measures of *Great-Britain* and *Ireland*:

The Last of these Islands contains 10½ *Quarters*; the *Quarter* is 8 *Bushels* and each *Bushel* 8 *Gallons*, or 4 *Pecks*; the Last being equal to that of *Amsterdam*.

Corn Measures of several Places in the *North*:

The Last of *Dantzick* is equal to that of *Amsterdam*, it being reckoned commonly to weigh 16 *Schipponds* of 340lb. each, making 5440lb. per Last, *Dantzick* Weight, for Wheat; though the Last for Rye is only counted 15 *Schipponds*, or 5100lb.

The Last of *Coningberg* is equal to that of *Amsterdam*, and Corn is brought and sold here by the *Guilders* and *Gr.* of *Peland*.

The Last of *Riga* contains 46 *Loopens*, which make a Last of *Amsterdam*; Corn sells here for *Rix-dollars* of 3 *Guilders*, or 90 *Gros*.

The Last of *Copenhagen* is of 42 *Tons*, or 80 *Schepels*, though it varies according to the different Sorts of Grain, even as far as to 96 *Schepels*.

In *Sweden*, the Last is reckoned 23 *Tons*.

The Last of *Hamburgb* contains 90 *Schepels*, 12 of which Lasts make 13 of *Amsterdam*.

The Last of *Lubeck* is 85 *Schepels*, of which 95 make a Last of *Amsterdam*.

The Last of *Emden* consists of 15½ *Tons*. And

24 Lasts of *Bremen* make 23 of *Amsterdam*.

Corn Measures in several Parts of *France*:

The chief Measure for Grain is called at *Paris*, and in many other Cities of that Kingdom, a *Muide*, which is divided into 12 *Setiers*, and the *Setier* into 12 *Boisseaux*, or *Bushels*; the *Setier* for Wheat is again divided into 2 *Mines*, the *Mine* into 2 *Minots*, and the *Minot* into 3 *Boisseaux*. The *Setier* of good Wheat ought to weigh from 244 to 248lb. *Mark*.

The *Setier* of Oats is divided into 24 *Boisseaux*, the *Boisseaux* into 4 *Picotins*, the *Picotin* into 8 *Demi-quarts*, and the *Demi-quart* into 2 *Litrons*.

The *Muid*, or 12 *Setiers* of *Paris*, makes 17 *Muddes* of *Amsterdam*, and 10 *Setiers* the *Amsterdam* Last.

The *Muid* of *Rouen* contains 12 *Setiers*, making 40 *Setiers* of *Paris*, which *Muid* ought to weigh 3360lb. *Mark* Weight of Wheat, as the *Setier* weighs about 280lb. which is divided into 2 *Mines*, and the *Mine* into 4 *Boisseaux*; 4 *Muids* are equal to 3 Lasts of *Amsterdam*, 6 *Setiers* making 10 *Muddes*, or 1½ *Muid* an *Amsterdam* Last.

The *Muid* of *Orleans* ought to weigh 600lb. it is divided into 12 *Mines*, and makes 2½ *Setiers* of *Paris*, 5 *Boisseaux* of *Bourdeaux*, or 3½ *Muddes* of *Amsterdam*.

The Measure for Corn used at *Lyons* is called an *Ainée*, which is divided into 6 *Bichets*, or *Boisseaux*, and makes near 1½ *Setier* of *Paris*, or 3½ *Boisseaux* of *Bourdeaux*; so that 4 *Ainées* make 7 *Muddes* of *Amsterdam*.

8 *Boisseaux* of *Roan* make one *Setier* of *Paris*, or 1½ *Muide* of *Amsterdam*.

3 *Ainées* of *Macon* make 7 *Muddes* of *Amsterdam*.

5 *Boisseaux* of *Avignon* make 4½ *Muddes* of *Amsterdam*.

The *Setier* of *Montpelier* is of 2 *Emines*, and the *Emine* of 2 *Quarts*; the *Setier* weighs from 90 to 95lb. *Montpelier* Weight, and 3 *Setiers* make 1½ *Muddes* of *Amsterdam*.

The *Setier* of *Castres* in *Languedoc* consists of 2 *Emines*, the *Emine* of 4 *Megeres*, and the *Megere* of 4 *Boisseaux*; the *Setier* weighs near 200lb. of this Place, which make 170lb. *Mark*, so that 100 *Setiers* make 4 Last of *Amsterdam*.

38 *Boisseaux* of *Bourdeaux* make 1 Last of *Amsterdam*, or 12 *Setiers*, of *Paris*: the said *Boisseaux* ought to weigh from 122 to 124lb. *Mark*, when the Wheat is good.

4½ *Setiers* of *Amiens* make 1½ *Muide* of *Amsterdam*; the *Setier* is here divided into four *Piquets*, and ought to weigh 50 or 52lb.

## GENERAL COMMERCE OF THE WORLD.

8 Setiers of *Bologne*, in *Picardy*, make 13 Muddes of *Amsterdam*, and ought to weigh 270lb. small Weight.

12 Setiers of *Calais*, make 18½ Muddes of *Amsterdam*: the Setier weighs about 260lb. 12 whereof making thirteen at *Paris*.

19 Setiers of *St. Valery*, make 1 Last  
 18 Mines of *Dieppe*, make 17 Muddes  
 5½ Boisseaux of *Havre de Grace*, make 1½ Mudde  
 14 Boisseaux of *Amboise*, make 1½ Mudde  
 19 Setiers, of *Saumur*, make 1 Last  
 14 Boisseaux of *Tours*, make 1½ Mudde  
 20 Boisseaux of *Blais*, make 1½ Mudde

} of *Amsterdam*.

5 Boisseaux of  $\left\{ \begin{array}{l} \text{Aubeterre} \\ \text{Barbeſieux} \\ \text{Perigueux} \end{array} \right\}$  make 1½ Mudde

49 Setiers of *Arles*, make a Last of *Amsterdam*, each Setier weighing 93lb. Mark, and the Charge is reckoned 300lb. of that Place.

48 Setiers of *Baucaire*, make a Last of *Amsterdam*, and the Charge here is 2 per Cent. bigger than that of *Arles*.

The Charge of *Marſailles*, is of 4 Emines, the Emine of 8 Sevadiers; and the Charge is also computed at 300lb. *Marſailles* Weight, which makes it equal to 1½ Mudde of *Amsterdam*.

Forty-eight Charges of *St. Gilles*, make a Last of *Amsterdam*; the Charge here is also of 300lb. but heavier by 18 to 20 per Cent. than that of *Arles*.

Fifty-one Charges of *Taraſcon* make a Last of *Amsterdam*; the Charge here is likewise of 300lb. 2 per Cent. heavier than that of *Arles*.

Three Emines of *Toulon*, make 2 Muddes of *Amsterdam*; the Charge is here reckoned to consist of three Setiers, and the Setier containing 1½ Emine, 3 of which make 2 Setiers of *Paris*.

Four Boisseaux of *Auray*, make 1½ Mudde

The Ton of *Audierne*  
 The Ton of *Brest*  
 The Ton of *Morlaix* } make 13½ Muddes } of *Amsterdam*.

83½ Boisseaux of the said *Morlaix* have yielded at *Rotterdam* a Last, and 15 Sacks of 29 to the Last; on which Footing the 83½ Boisseaux make very near 1½ *Amsterdam* Lasts.

The Ton of *Hannebon* and *Port Louis* makes 17½ Muddes of *Amsterdam*.

The Ton of *Quimpercorantin*, makes 13 Muddes of *Amsterdam*.

The Ton of *Nantz*, makes 13½ Muddes of *Amsterdam*; it is composed of 16 Setiers, and the Setier of 16 Boisseaux: The Ton ought to weigh from 2200 to 2250lb. heaped Measure, which is 18 or 20 per Cent. more than striken Measure.

The Ton of *Rennes* and *St. Maloes* makes 14 Muddes of *Amsterdam*, and ought to weigh about 2400lb.

The Ton of *St. Brieux* makes 15½ Muddes of *Amsterdam*, and ought to weigh about 2600lb.

The Ton of *Rochelle* and *Marans* contains 42 Boisseaux, which makes 13 Muddes of *Amsterdam*.

Corn Measures of *Spain*.

At *Cadix*, &c. Corn is sold by Fanegas, or Hanegas, of which 5 make an *English* Quarter, or 52 to the Last of *Amsterdam*.

In the Kingdom of *Valencia*, the Corn Measure is a Cahiz, consisting of 12 Barchillas, and three hundred Cahizes make 25 Lasts of *Amsterdam*.

Corn Measures of *Portugal*.

216 Alquieres, or 4 Muids of *Lisbon*, make a Last of *Amsterdam*, the Muid being 54 Alquieres; though the Muid is divided into 15 Fanegos, and the Fanego into 4 Alquieres.

The Alquieres of *Oporto* have always been reckoned 20 per Cent. bigger than those of *Lisbon*, at which Computation 180 make an *Amsterdam* Last; but I find that an *English* Quarter commonly yields there 16 Alquieres, at which Rate only 164 go to the Last of *Amsterdam*.

At the *Azores* Islands, belonging to the King of *Portugal*, and in that of *St. Michael*, 60 *Alquieres* is reckoned to the *Muid*, and 240 make an *Amsterdam* Last, though Corn transported from *St. Michael* to the Island of *Madeira*, yields 4 *Alquieres* Benefit on the 60; that is the 60 of *St. Michael* produce 64 at *Madeira*; being 6 $\frac{2}{3}$  per Cent.

*Italian* Corn Measures.

Corn is sold at *Genoa* by the *Mine*, with an Exemption from Duties to the Seller, and 25 *Mines* are reckoned a Last of *Amsterdam*.

At *Leghorn*, 40 Sacks make a Last of *Amsterdam*, and 2 Sacks of Wheat make the *Marseilles* Charge of 300lb. less 4 per Cent.

Wheat is sold at *Venice* by the *Staro*, or *Setier*, 2 *Staro* making one *Marseilles* Charge, or 1 $\frac{1}{2}$  *Mudde* of *Amsterdam*.

This may suffice to show the chief Corn Measures of the principal Parts in *Europe*, to which my Reader may have Recourse, for a more ample Explication of their different Divisions, than could conveniently be inserted in the following Table; though this contains a greater Number of Places, and shews at one Glance, the Agreement between the Measures of every City, with those of *Amsterdam*, *Paris*, and *Bordeaux*; the Name of the Place being sought in the first Column, whose Measure is wanted, they being all ranged for this Purpose in an Alphabetical Order, and all trifling Fractions left out as their Insertion would have interrupted the Regularity of the Table, without adding any Thing to the Instruction of my Reader.

A TABLE of the Agreement of divers MEASURES with those of AMSTERDAM, PARIS, and BORDEAUX.

Next to the Dry, I proceed to the Long or Applicative Measures, of which our's in *Great-Britain*, are the Yard and Ell, the former for measuring all Silks, Woollens, &c. the latter used only for Linens. The Yard consists of three Feet, and the Foot of twelve Inches; the Ell being a Yard and a Quarter. I may also here add, that the Geometrical Pace is reckoned five Feet; a Fathom, or Fathom, six; a Rod, Pole, or Rod, sixteen and a half; and of these forty make a Furlong, and eight Furlongs make an *English* Mile, which by a Statute of *Henry VIII.* ought to be 1760 Yards, or 5280 Feet, that is, 280 Feet more than the *Italian* Mile.

The Measures in other Parts of *Europe* are very different both in Name and Extent, tho' most of them founded on the Geometrical Foot, which, varying in Length, has occasioned the fixt Measures of Places to vary also from one another; and before I say any Thing of this Difference, I shall in Part shew it to my Reader by a Print of some Fractions of Aunes, &c. of several of the chief Trading Cities, which will confirm the Calculations I shall afterwards give in a general Table.

The Length of a Quarter of the *Brabant*, or *Antwerp* Aun or Ell, having 6 *French* Inches and 4  $\frac{1}{2}$  Lines.

The Length of a Quarter of the *Amsterdam* or *Dutch* Ell, containing 6 *French* Inches and 3  $\frac{1}{2}$  Lines.

The Length of a Quarter of a *Brasse* at *Venice*, for measuring Woollens, &c.

The Geometrical half *French* Foot of 12 *French* Inches.

The Length of  $\frac{1}{5}$  and  $\frac{1}{10}$  of the *Paris* Ell or Aun, containing 5 Inches 5  $\frac{1}{2}$  Lines, or 65  $\frac{1}{2}$  Lines.

The Length of the half Foot of *Amsterdam*, the whole being 11 *French* Inches.

lens, viz  
For Woo

An Aun of *Denmark* or *Copenhagen* is reckoned one-third less than the *English* Yard, but with more Exactness, it is  $24\frac{1}{2}$  Inches *English*.

The Aun of *Meinden* contains  $15\frac{1}{2}$  French Inches, and two Lines, so that 100 Aunes of *Amsterdam* make a Trifle less than 166 Aunes of *Meinden*, and 200 Aunes of *Meinden* make 60 Aunes of *Amsterdam*.

At *Genoa*, four Sorts of long Measures are used, viz.

The Cane of 9 Palmes for Woollens,

The Cane of 10 Palmes for Linens,

The Brass of near  $2\frac{1}{2}$  Palmes,

The Palme for Silks and Velvets.

The Palme is a common Span, making 8 Inches, and is a Measure used in most Parts of *Italy*.

The modern Palme of *Genoa* is 9 Inches 2 Lines, of which 4 Palmes is a Trifle less than the *Lyons* Ell.

Eight *Genoa* Canes make 15 Aunes of *Lyons*, and  $3\frac{1}{2}$  Palmes of 9 to the Cane, make an *English* Yard.

100 Aunes of *Amsterdam* make a small Matter more than 30 Canes at *Naples*; and

100 Canes of *Naples* make a Trifle more than  $333\frac{1}{3}$  Aunes of *Amsterdam*.

17 Canes of *Naples* are counted equal to 32 Aunes of *Lyons*.

The Cane of *Sicily* makes  $8\frac{1}{2}$  Palmes, *Marseilles* Measure, on which Footing any larger Quantity may be regulated. The *Neapolitan* Palme is 8 Inches and 7 Lines.

100 Canes of *Barcelona* make  $239\frac{1}{2}$  Aunes of *Amsterdam*, with a Trifle over; and

100 Aunes of *Amsterdam* make  $41\frac{1}{2}$  Canes of *Barcelona*.

108 Varas of *Cadix* are equal to 100 *English* Yards.

At *Peterburgh* 8 Verschocks, are 1 Arschin, or 28 *English* Inches, and 1 Saffchine makes  $7\frac{1}{2}$  *English* Feet, so that 100 Saffchines make  $241\frac{1}{2}$  *English* Yards, and

100 *English* Yards make  $41\frac{1}{2}$  Saffchines, a Trifle less.

100 Aunes of *Riga* make very near 130 Aunes of *Amsterdam*; and

100 Aunes of *Amsterdam* make 77 Aunes of *Riga*.

100 Aunes of *Revel* make  $128\frac{1}{2}$  Aunes of *Amsterdam*; and on the contrary,

100 Aunes of *Amsterdam* make 78 Aunes of *Revel*.

The Aune of *Coningberg* is near  $\frac{1}{4}$  Part shorter than that of *Amsterdam*, so that 100 Aunes of this last, make about 120 of *Coningberg*; and 100 Aunes of *Coningberg*, about 80 of *Amsterdam*.

*Elbing* has the same Measure with *Dantzick*, which may be seen in the Table.

The Foot of *Stetin* is equal to that of *Amsterdam*.

100 Aunes of *Lubeck* make  $83\frac{1}{2}$  Aunes of *Amsterdam*, and

100 Aunes of *Amsterdam* make 120 Aunes of *Lubeck*.

100 Aunes of *Bremen* are reckoned equal to  $83\frac{1}{2}$  Aunes of *Amsterdam* and

100 Aunes of *Amsterdam* to make 120 Aunes of *Bremen*.

100 Aunes of *Erfort* make 61 of *Amsterdam*, and 100 of *Amsterdam*, make

164 of *Erfort*.

6 Aunes of *Langensaltz* make 5 of *Amsterdam*, so that 100 Aunes of *Langensaltz* make  $83\frac{1}{2}$  of *Amsterdam*; and 100 of *Amsterdam* make 120 of *Langensaltz*.

100 Aunes of *Leige* are reckoned 80 of *Amsterdam*; and

100 Aunes of *Amsterdam* make 125 Aunes of *Leige*.

The Aunes of *Malines*, *Ghent*, and *Bruger*, are equal to those of *Antwerp*.

100 Aunes of *Lijle* make  $103\frac{1}{2}$  Aunes of *Amsterdam*; and

100 Aunes of *Amsterdam* make  $96\frac{1}{2}$  Aunes of *Lijle*.

100 Aunes of *Dieppe* make 171 of *Amsterdam*; and 100 Aunes of *Amsterdam*

make  $58\frac{1}{2}$  Aunes of *Dieppe*.

33 Canes for Linens

100 Canes for Woollens

374 $\frac{1}{2}$  Palmes

107 Brasses of  $3\frac{1}{2}$  Palmes

} of *Rome*, make 100 Aunes of *Amsterdam*.

At *Florence* and *Legborn*, the following Measures are used for Silks and Wool-

lens, viz.

For Woollens { Palmes of which  $349\frac{1}{2}$   
 Brasses of 2 Palmes, whereof  $116\frac{1}{2}$   
 Canes of 8 Palmes, whereof  $29\frac{1}{2}$  } make 100 Aunes of *Amsterdam*.

## GENERAL COMMERCE OF THE WORLD.

For Silks { Palmes, of which 238 $\frac{1}{2}$   
 Braffes, of 2 Palmes, of which 119 $\frac{1}{2}$   
 Canes, of 8 Palmes, whereof 29 $\frac{1}{2}$  } make 100 Aunes of *Amsterdam*.

At *Lucca*, two Sorts of Braffes are in Use,

Of which { 114 $\frac{1}{2}$  for Woollens } make 100 Aunes of *Amsterdam*.  
 { 119 $\frac{1}{2}$  for Silks }

800 Palmes, or 100 Canes of *Naples*, make a Trifle less than 310 Aunes of *Amsterdam*.

100 Aunes of *Amsterdam* make 258 $\frac{1}{2}$  Palmes, or 30 $\frac{1}{2}$  Canes of 8 Palmes, which Palme exactly agrees with  $\frac{1}{3}$  of an Aune, and 4 Lines of a *French Foot* at *Amsterdam*; and the Cane yields there  $\frac{3}{4}$  Aunes less 6 Lines of the said Foot.

At *Palermo*, 100 Canes of Palmes make a Trifle more than 287 $\frac{1}{2}$  Aunes of *Amsterdam*; and

100 Aunes of *Amsterdam* make 33 $\frac{2}{3}$  Canes of *Palermo*.

At *Venice*, two Sorts of Braffes are used, the one to measure Woollens, and the other for Linens, and Gold or Silver Stuffs; and that for the Woollens consists of 2 Feet 8 Lines, or 296 Lines of the *French Feet*, and is longer by 6 $\frac{1}{2}$  per Cent. than the Braffe for the Gold and Silver Stuffs; so that

100 Braffes for Woollens make 106 $\frac{1}{2}$  for Gold and Silver Stuffs, &c. and

100 Braffes for Gold and Silver Stuffs, make 94 $\frac{2}{7}$  Braffes for Woollens.

100 Braffes for Woollens

100 Braffes for Gold and Silver Stuffs { of *Venice*, } 98 { Aunes of *Amsterdam*.  
 make 92 $\frac{2}{7}$  }

100 Aunes of *Amsterdam* { 102 Braffes for Woollens }  
 { 109 $\frac{1}{2}$  Braffes for Gold, &c. Stuffs } of *Venice*.

100 Pies of *Smyrna* and *Seyde*, are computed to be 97 Aunes of *Amsterdam*.

100 Aunes of *Amsterdam*, make 103 Pies of *Smyrna*, &c.

100 Pies of *Constantinople*, make 97 $\frac{1}{2}$  Aunes of *Amsterdam*.

100 Aunes of *Amsterdam*, make 102 $\frac{1}{2}$  Pies of *Constantinople*.

100 Pies of *Aleppo*, are reckoned to make 98 Aunes of *Amsterdam*.

100 Aunes of *Amsterdam*, make 102 Pies of *Aleppo*.

100 Pies of *Alexandria* and *Rofette*, make 97 Aunes of *Amsterdam*.

100 Aunes of *Amsterdam*, make 103 Pies of *Alexandria*, &c. and the Correspondency of all the other Measures in *Europe* are to be found in the following Table.

By means of the ...  
*France*. And the same in Respect of the Agreement of all other Measures ancient and modern, ...  
 the Lines, to the Column of the Measure sought: For Example; if it is wanted to be known how many Canes of *Maryskales* or *Wolens-*  
*her*, make 100 Aunes of *France*, look for this latter in the left Hand Column, and from thence trace the Line to the Column which  
 has at the Head, *Canes of Maryskales and Wolensher*, and it will be found, that 59 $\frac{1}{2}$  Canes make the 100 Aunes, and so for the Rest.

OF MEASURES, &c.

100 Braffes of Bergamo, Bologna, Modena, Mantua	100	174 $\frac{1}{2}$	182 $\frac{1}{2}$	100	200	209	167 $\frac{1}{2}$	83 $\frac{1}{2}$	194 $\frac{1}{2}$	143 $\frac{1}{2}$	126 $\frac{1}{2}$	58 $\frac{1}{2}$	50 $\frac{1}{2}$	50 $\frac{1}{2}$	53 $\frac{1}{2}$	53 $\frac{1}{2}$	133 $\frac{1}{2}$	101 $\frac{1}{2}$	166 $\frac{1}{2}$	170 $\frac{1}{2}$	174 $\frac{1}{2}$	194 $\frac{1}{2}$	214 $\frac{1}{2}$	
100 Braffes of Florence and Leghorn	100	174 $\frac{1}{2}$	182 $\frac{1}{2}$	100	200	209	167 $\frac{1}{2}$	83 $\frac{1}{2}$	194 $\frac{1}{2}$	143 $\frac{1}{2}$	126 $\frac{1}{2}$	58 $\frac{1}{2}$	50 $\frac{1}{2}$	50 $\frac{1}{2}$	53 $\frac{1}{2}$	53 $\frac{1}{2}$	133 $\frac{1}{2}$	101 $\frac{1}{2}$	166 $\frac{1}{2}$	170 $\frac{1}{2}$	174 $\frac{1}{2}$	194 $\frac{1}{2}$	214 $\frac{1}{2}$	
100 Braffes of Milan	100	174 $\frac{1}{2}$	182 $\frac{1}{2}$	100	200	209	167 $\frac{1}{2}$	83 $\frac{1}{2}$	194 $\frac{1}{2}$	143 $\frac{1}{2}$	126 $\frac{1}{2}$	58 $\frac{1}{2}$	50 $\frac{1}{2}$	50 $\frac{1}{2}$	53 $\frac{1}{2}$	53 $\frac{1}{2}$	133 $\frac{1}{2}$	101 $\frac{1}{2}$	166 $\frac{1}{2}$	170 $\frac{1}{2}$	174 $\frac{1}{2}$	194 $\frac{1}{2}$	214 $\frac{1}{2}$	

The Aunes, or Ells of Amsterdam, London, Lyons, the Rhine, Rotterdam, and other Cities of Holland; as also that of Normandy, being all equal, are comprehended under that of Amsterdam. A Table of Ouzing is under that of France; and those of Rome and Segis are equal to those of Milan, Frankfurt, and Leipzig.

By Means of the above TABLE may be seen, viz. that 100 Aunes of Holland make 98 $\frac{1}{2}$  of Brabant or Arvers, and 8 $\frac{1}{2}$  Aunes of France. And the same in Respect of the Agreement of all other Measures therein mentioned, which may be easily found, by going along the Lines, to the Column of the Measure sought: For Example, If it is wanted to be known how many Canes of Marfilla or Montpellier, make 100 Aunes of France, look for this latter in the left Hand Column, and from thence trace the Line to the Column which has at the Head, *Canes of Marfilla and Montpellier*, and it will be found, that 99 $\frac{1}{2}$  Canes make the 100 Aunes, and so for the Rest.

GENERAL COMMERCE OF THE WORLD.

The following are the Measures of France and other Countries reduced into Feet, Inches, and Lines, of which 12 Lines make an Inch, and 12 Inches a Foot, which may in some Measure illustrate the preceding Table.

	Feet.	In.	Lines.	
The Aune of Paris contains	3	7	8	little more
The Cane of Provence, Avignon, and Montpellier	6	0	9	
The Cane of Toulouſe, and the Varra of Arragon	5	5	6	
The Yard of England	2	9	11	
The Aune of Holland, Antwerp, and Tournoy	2	0	11	little more
The Aune of Flanders, Brabant, and Germany	2	1	5	
The Varra of Caſtillè	2	7	2	little more
The Varra of Valencia in Spain	2	9	7	
The Ras of Piedmont, and the Baſſe of Lucca	1	9	10	
The Baſſe of Venice, Bologna, Modena, and Mantua	1	11	3	
The Palm of Genoa	0	9	1	
The Braſſe of Bergame	2	0	3	
The Braſſe of Florence	1	9	4	
The Yard of Seville	2	6	11	
The Cane of Naples	6	10	2	
The Aune of Troyes, and Arc in the Duchy of Bar	2	5	1	little more
The Aune of Liſle and Arras	2	2	2	ditto
The Braſſe of Milan for Silk	1	7	5	
The Ditto for Woollens	2	0	11	little more

To the above Contents of various Measures, I herewith add a Correspondency of the Length of a Foot in divers Places into Parts,

	Parts.
The Foot in England, divided into	1000
The Royal Foot of Paris	1068
The Foot of Leyden	1033
The Foot of Amſterdam	942
The Foot of Antwerp	946
The Foot of Lowvain	958
The Foot of Malines	919
The Foot of Middlebourg	991
The Foot of Dort	1184
The Foot of the Brille	1103
The Foot Rbindlandick, and that of Berlin	1033
The Foot of Vienna	1053
The Foot of Frankfort on the Maine	948
The Foot of Cologn	954
The Foot of Straſbourg	920
The Foot of Bavaria	954
The Roman Foot	907
The Foot of Venice	1153
The Foot of Mantua	1569
The Foot of Turin	1062
The Foot of Caſtile	1001
The Foot of Toledo	899
The Foot of Liſbon	917
The Foot of Copenbagen	965
The Foot of Dantzick	944
The Foot of Riga	1831

The same Salt, Lime, first is now to the Gallon counted a Ture this Co lowed to the of Europe, S other, is bo its Dispatch the Cent. of Laſts or 14 14 Tons m tho' some of ſterdam and the North, Oleron; M Aunis; fro of Bretagna Spain.

In the C varies, acc this Measu divided into

The C 28 stricken or 23 Tons the Ponds, are deemed of theſe w 46,000ib.

In Den ing recko Coning ſber At Rige Laſts of K The ſal which La At Stea Measure a In Por the Cent. At Al English, King's A Of Li with its Pottles n of Beer; half a H The l portion Wine M one Oun let of W Hogſhea lons, or Forei accordi

The same receptive dry Measure as is used for Corn serves also in *England* for Salt, Lime, Coals, &c. they being all meted by the *Winchester* Measure, tho' the first is now generally sold from the Pits by Weight, reckoning 7lb. Avoirdupois to the Gallon, or 56lb. to the Bushel; in Freight-Computation 42 Bushels is accounted a Ton, 5 Bushels is a Sack, and 4 Cwt. a Quarter. When sold by Measure this Commodity and Coals must be heaped, or else five stricken Pecks are allowed to the Bushel, and of the latter 36 Bushels make a Chaldron. In other Parts of *Europe*, Salt, which is a more staple and current Merchandize than almost any other, is bought and sold by different Measures, according to the several Places of its Dispatch. For at *Amsterdam*, where vast Quantities are imported, it is sold by the *Cent.* of 404 Measures, or Scheppels, which *Cent.* is reckoned to be seven Lasts or 14 Tons, and the Last to weigh 400 lb. so that the said seven Lasts or 14 Tons make 28000lb. called the *Cent.* of Salt, which also contains 208 Sacks, tho' some of this Commodity is much heavier than others. Salt is carried to *Amsterdam* and all the Cities of *Holland*, *Flanders*, *Brabant*, *Zealand*, other Places of the *North*, and up the *Baltick*, from *Marans*, *Brouage*, *Sude*, the Isles of *Ré* and *Oleron*; *Meche*, *Rochele*, and other Places of *Saintonge*, and the Country of *Annis*; from *Poliguen*, *Croisil*, *Guerand*, the Bay of *Bouaneuf*, and other Parts of *Bretagne*; from *St. Ubs* in *Portugal*, and from *Cadiz*, *Almat*, and *Ivica* in *Spain*.

In the Cities and other Parts of *France*, Salt is sold by the Muid, whose Size varies, according to the different Places of its Manufacture and Dispatch: At *Paris* this Measure is reckoned to contain 12 Setiers, or 48 Minots, which Minot is also divided into less Fractions.

The *Cent.* of Salt, from *Marans*, *Brouage*, *Sude*, the Isles of *Ré*, &c. contains 28 stricken Muids, and each 24 Boisseaux, which yields at *Amsterdam* 11½ Lasts or 23 Tons, a little more or less, according to the good or bad Metage made at the Ponds, or its Waste in the Voyage. The Salts of the Isle of *Ré* and *Brouage* are deemed heavier than those from *Okron*, *Marans*, *Mornac*, &c. And the *Cent.* of these weighty Salts yields at *Hamburg* 11½ to 11¾ Lasts, which are 45 to 46,000lb.

In *Denmark*, or *Copenbagen*, the said *Cent.* only renders 9½ Lasts, the Last being reckoned here equal to 18 Tons, and the 50 Lasts to correspond with 52 of *Coningberg*; at which Place the *Cent.* produces about 10 Lasts, or 40,000lb.

At *Riga* the said *Cent.* yields the same Measure as at *Coningberg*, and about 6½ Lasts of *Riga* make the great *Cent.* of *Amsterdam*.

The said French *Cent.* produces at *Dantzick* 11½ to 12 Lasts that Measure, of which Lasts 7½ to 7¾ make likewise the great *Cent.* of *Amsterdam*.

At *Stetin* in *Pomerania*, the French *Cent.* yields 10 Lasts, making 40,000lb. Measure and Weight of the said Place.

In *Portugal*, Salt is bought by the Muid, of which four make a Last, and seven the *Cent.* of *Amsterdam*, containing, as above, 404 Scheppels.

At *Almat* and *Ivica* it is sold by the Modin, which weighs from 27½ to 28 Cwt. *English*, and at both Places the Quantities made are prodigious, being all for the King's Account.

Of Liquid Measures in *Great-Britain*, the ordinary smallest one is called a Pint, with its Fractions, of which two make a Quart, two Quarts make a Pottle, two Pottles make a Gallon; eight Gallons make a Firkin of Ale, and nine a Firkin of Beer; two Firkins a Kilderkin, and two Kilderkins a Barrel; one Barrel and half a Hoghead, two Hogheads a Pipe or Butt, and two Pipes a Ton.

The *English* Wine Measures are smaller than those of Ale and Beer, and are proportioned as 4 to 5; so that four Gallons Beer Measure are almost five Gallons of Wine Measure; of which latter a Gallon is 231 Cubical Inches, and eight Pounds one Ounce, and 11 Drams Avoirdupois of Rain Water. Of these Gallons a Rundlet of Wine holds eighteen, half a Hoghead 31½ Gallons, a Tierce 43 Gallons, a Hoghead 63 Gallons, a Putcheon 84 Gallons, a Pipe or Butt 126, and a Ton 252 Gallons, or 2016 Pints; by which Measure is sold Wine, Brandy, Vinegar, Cyder, &c.

Foreign Vessels for containing Wine, Vinegar, &c. have various Denominations, according to their different Sizes, and Places of their Fabrication.

The Wooders of *Germany*, for holding *Rhenish* and *Moselle* Wines, are different in their Gauges; some containing 14 Aumes *Amsterdam* Measure, and others more, or less.

The Aume is reckoned at *Amsterdam* for eight Steckans, or 20 Verges or Veertels; or for  $\frac{1}{4}$  of a Ton of two Pipes; or four Barrels of *France* or *Bordeaux*, which  $\frac{1}{4}$  is called at this latter Tierçon, because three of them make a Pipe, or two Barrels, and fix the said Ton.

The Steckan is 16 Mingles, or 32 Pints; and the Verge or Veertel is in respect of said *Rhenish* and *Moselle*, and some other Sorts of Wine, of six Mingles; but in measuring Brandy, it consists of six  $\frac{1}{2}$  Mingles. The Aume is divided into four Anckers, and the Ancker into two Steckans or 32 Mingles.

The Ancker is taken sometimes for  $\frac{1}{4}$  of a Ton, of four Barrels; on which Footing the *Bordeaux* Barrel ought to contain at *Amsterdam*, when the Cask is made according to the just Gauge, 12  $\frac{1}{2}$  Steckans, or 200 Mingles; Wine and Lees; or 12 Steckans or 192 Mingles racked Wine; so that the *Bordeaux* Ton of Wine contains 50 Steckans or 800 Mingles, Wine and Lees; and 48 Steckans, or 768 Mingles, of pure Wine.

The Barrels or Poinçons of *Nantes*, and other Places on the River *Loire*, contain only 12 Steckans *Amsterdam* Measure. The Wine Ton of *Roebelle*, *Cognac*, *Charente*, and the Isle of *Rhe*, differs very little from the Ton of *Bordeaux*, and consequently from the Barrels and Pipes.

A Ton of Wine of *Chalosse*, *Bayonne*, and the neighbouring Places, is reckoned 60 Steckans, and the Barrel 15, *Amsterdam* Measure.

The Muid of *Paris* contains 150 Quarts, or 300 Pints, Wine and Lee, or 280 Pints clear Wine; of which Muids three make a Ton, and the Francions are,

The Muid	}	containing	{	36 Setiers
The Setier				4 Quarts
The Quart				2 Pints
The Pint				2 Chopins
The Chopin				2 Demi-Setiers
The Demi-Setier				2 Poissons

The Muid is also composed of Pipes, Poinçons, Quartaux, Queues, and Demi-Queues. These Poinçons of *Paris* and *Orleans* contain about 15 Steckans, *Amsterdam* Measure, and ought to weigh with the Casks, 666lb. a little more or less.

In *Provence* they reckon by Milleroles. The Millerole of *Toulon* weighs about 130lb. Mark, and ought to contain 66 *Paris* Pints, which is nearly equal to 100 Pints of *Amsterdam*.

In Lower *Languedoc*, as at *Montpelier*, &c. the Muid contains 18 Setiers, and the Setier 32 Pots or Peekez, so that the Muid makes 576 Pots, and yields at *Amsterdam* 35 Steckans, or 560 Mingles; so that the Pot or Peeche of *Montpelier* is less than the Mingle: But the Casks of *Montpelier* are never of an equal Gauge, some Muids containing more than others.

The Butts or Pipes from *Cadix*, *Malaga*, *Alicant*, *Benicarlo*, *Saboc*, and *Mataro*, in *Spain*, and from the *Canaries* subject to that Crown, from *Lisbon*, *Oporto*, and *Fayal* in *Portugal*, are very different in their Gauges, though in Affreightments are all reckoned two to the Ton.

Vinegar is measured as the Wine; but as the Measures for Brandies are different, I shall now give an Account of them.

These Spirits from *France*, *Spain*, *Portugal*, &c. are generally shipped in large Casks, called Pipes, Butts, and Pieces, according to the Places from whence they are exported, and differing in their Contents, not only from one another, but even among those embarked at the same Place.

In *France* Brandy is shipped in Casks, called Pieces at *Bordeaux*, and Pipes at *Roebelle*, *Cognac*, the Isle of *Rhe*, *Nantes*, and other neighbouring Places; which contain, as before observed, some more and some less, even from 60 to 90 *Amsterdam* Verges, or Veertels, according to the Capacity of the Vessels, and the Places they come from, which being reduced into Barrels, will stand as follows,

At <i>Emden</i>	27 Verges

In *Provence* and *Languedoc* Brandy is sold by the *Quintal*; the *Casks* included, and at *Bruges* in *Flanders* the *Verges* are called *Sesters*, of 16 *Stops* each, and the *Spirits* sold at so much *per Stop*.

The *Mingle* of Brandy at *Amsterdam* weighs 2lb. 4 oz. *Mark Weight*, and the *Verge* or *Verteel* 14lb. a little more or less; at which *Rate* the 30 *Verges* must weigh 420lb.

The *Pieces* of Brandy sold at *Bordeaux* commonly contain from 50 to 80 *Verges*, and 32 *Verges* is reckoned, as has been mentioned, to a *Barrel*; the *Verge* contains 3½ *Pots*, or a little less, and the *Barril* near 110 *Pots*, *Bordeaux Measure*.

*Olive Oil* is also shipped in *Casks* of various *Sizes*, according to the *Custom* of the *Places* where it is embarked, and for the *Convenience* of *Stowage*. *Gallipoly*, *Leghorn*, *France*, *Majorca*, and several other Parts of *Spain*, *Portugal*, &c. supply the northern Parts of *Europe* with this *Commodity*, as well for *Eating*, as *cleaning* of *Woolens*, and *making* of *Soap*. In *England* it is sold by the *Ton* of 236 *Gallons*, and at *Amsterdam* by the *Ton* of 717 *Mingles*, or 1434 *Pints*; the *Casks* it is imported in contain from 20 to 70 *Steekans*, at 6 *Mingles per Steekan*, the *Mingle* weighing 2lb. and 2, 3, or 4 *Ounces*, according to the *Place* of the *Oil's* *Growth*.

It is reckoned that the *Barrel* of *Oil* at *Genoa* weighs near 187½lb. *Nett Weight*, which is equal to 125lb. at *Amsterdam*, and 14 of these *Barrels* or thereabouts make the said 717 *Mingles*, which ought to weigh 1750lb. at the last mentioned *Place*.

At *Leghorn* the *Barrel* of *Oil* weighs 85lb. which a little exceeds 59lb. at *Amsterdam*, and is more frequently shipped in *Jars* and *Flasks* than *Casks*.

In *Provence* it is sold by *Millerols* of 66 *Paris Pints*, which make about 100 *Pints* of *Amsterdam*.

From *Spain* and *Portugal* it is brought in *Pipes* or *Butts* of different *Gauges*; at the first it is sold by *Roves*, of which about 40 go to the *Butt*, and at the latter by *Almoudas*, whereof 26 make a *Pipe*; the *Almouda* contains 12 *Canadors*, and the *Canador* makes near a *Mingle* at *Amsterdam*.

*Train Oil* is sold in *England* by the *Ton*; and at *Amsterdam* by the *Barrel* of 12 *Steekans*.

*Honey* is sold with us by the *Pound*, though in *Amsterdam*, where great *Quantities* are imported from *Bordeaux*, *Bayonne*, *Bretagne*, *Provence*, *Hamburg*, *Bremen*, and several other *Places*, it is sold by the *Ton*, or *Barrel*.

*Beer* at *Amsterdam* is commonly put in *Tons* or *Barrels*, half, quarter, and half-quarter of *Barrel*; and sometimes in *Pipes*, *Butts*, and other such large *Casks* for their *East* and *West India* *Provisions*. The *Ton* or *Barrel* ought to contain 1 Aume, or 3 *Steekans*, making 128 *Mingles*, and the other *Vessels* in *Proportion*.

## OF COINS, both real and imaginary.

In *England*, the *Copper* ones are a *Farthing* and *Half-penny*, the latter being two of the former.

In fine *Silver* of the *Standard* of 11 oz. 2dwt. called *Sterling*, the smallest *Piece* is one *Penny*, others of two *Pence*, three *Pence*, four *Pence* called also a *Groat*, and six *Pence*, a *Shilling*, or 12 *Pence*, a *Half-Crown*, or two *Shillings* and six *Pence*, and a *Crown*, or five *Shillings*.

In fine *Gold* of 22 *Carats*, called also *Sterling*, a *Guinea*, now worth 21 *Shillings*, half a *Guinea*, some few two and five *Guinea Pieces*, and fewer ½ ones.

*Accounts* are kept in *Pounds*, *Shillings*, and *Pence*, the first and last *imaginary*, and *Exchanges* are calculated in one of these two.

In *France*, the *Gold Species* are *Louis*, with its *Diminutions* of ½ and ¼, and its *Augmentations* of double and quadruple.

Of

Of Silver the Crown or Ecu, with its Fractions, which at present passes for 3 Livres, though it has been up to more than 7 Livres.

Of Silver and Brads mixed, the Sol. And

Of Copper the Liard, which is  $\frac{1}{3}$  of a Sol, or 3 Deniers. A Double 2 Deniers. And a Denier or  $\frac{1}{12}$  of a Sol.

Accounts are kept throughout the Kingdom in Livres, Sols, and Deniers, of which 12 Deniers make a Sol, and 20 Sols a Livre; their Exchange is by the Crown of 3 Livres or 60 Sols.

In *Holland*, the Gold Coins are

Ducaton	} worth	{	15	Guilders, and 15 Stivers
Ducats			5	5
Souverains			15	
Rose-Nobles			11	

though of these very few are seen.

Silver Coins.

Ducaton	} worth	{	3	Guilders and 3 Stivers
Drie-Guilders			3	
Rixdollar or Patacon			2	10
Croons			2	Of this Coin very few to be met with
Dollars			1	10
Goud Guilders, or Golden Guilders			1	8

Here are also  $\frac{1}{4}$  and  $\frac{1}{8}$  Rixdollars; Schellings, of which some are worth 6, and others only 5 Stivers; here are also Stivers, of which 20 make a Guilder, divided into 2 Deniers de gros, or 8 Duytes, or 16 Pennins, though these two last Denominations are imaginary.

Here are besides several other Coins, particularly some small ones, of 2, 3, 4, 8, and 12 Stivers.

Accounts are kept at *Amsterdam* and *Rotterdam*, the two chief trading Places, in Guilders, Stivers, and Pennins; so that although Goods are sold for other Species, such as Livres de gros, &c. yet all are reduced to the above Denominations for the Entries into their Books. The Exchanges are made with us in so many Schellings to a Pound Sterling, though to most other Places in Deniers de gros.

Foreign Coins are very many, both of Gold and Silver, but are not current here at any fixed Price, but, as other Commodities, rise and fall according to their Plenty or Scarceness.

In *Russia*, 3 Coppecks is an Altin, 10 Coppecks 1 Grievé, 25 Coppecks is a Polpoltin, 50 Coppecks is a Poltin, 64 Coppecks is a Dollar, and 100 Coppecks or 10 Grievés is a Rouble; an *English* Crown passes there by Weight, for 120 to 130 Coppecks.

Accounts are kept in the trading Places of this Empire, in Roubles, Grievés, and Moscoviques, 2 of which make a Coppeck; or in Roubles and Coppecks. Their Exchange is only on *Holland*, and negotiated in either Roubles or Coppecks.

In *Norway*, a Rixdollar is six *Danish* Marks, a Mark sixteen Shillings, and at *Copparwyk*, *Laarwyk*, *Mardou*, *Vlekeren*, *Jedder*, *Stafanger*, *Romsdal*, and *Drontheim*, the Rixdollar is worth 4 Oorts, an the Oort 24 *Danish* Schellings.

In *Denmark*, the Rixdollar is worth 4 Oorts, or six *Danish* Marks, the Oort 24 Schellings, or 1 $\frac{1}{2}$  Mark, the Mark 16 Schellings, and the Schelling three Pennins; 2 *Danish* Marks make 1 Mark Lubs, and at *Bergen*, Accounts are kept in *Danish* Rixdollars, Marks, and Schellings. But little is done in Exchanges from this Kingdom, and the few that are transacted from *Copenhagen*, are in *Danish* Rixdollars of six Marks for current Rixdollars of *Amsterdam*.

In *Stockholm* and the Rest of *Sweden*, the Dollar is worth 4 Marks, and the Mark 8 Oorts, or Runticks, which is an imaginary Specie; 2 Marks make a Mark Lubs, and here are Copper Rixdollars of 6 Dollars or 24 Marks; here is also Silver Money called Silvergelt, or Silvermunt, and one Mark Silver Money is reckoned worth 2 $\frac{1}{2}$  Copper. The Silver Dollar is divided into 3 Marks, and the Mark into 3 Oorts; though they have no such Coin as a Runtick, or Rontstucken, yet they reckon two of their Copper Farthings to a Runtick, 3 Runticks to a Witton, 10 $\frac{1}{2}$  Wittons to a Copper Dollar.

Accounts are kept in this Kingdom in Dollars, Marks, and Oorts, and the Exchange is made between a Copper Rixdollar of 24 Marks of *Stockholm*, and a current Rixdollar of 50 Stivers of *Amsterdam*.

At *Cracow* in *Poland*, their common Coins are, Gros, of which 18 make 1 Oort, and 30, one Guilder; a Specie Dollar is 40 Gros, and worth about two Shillings Sterling. A Rixdollar is 5 Oorts, or 90 Gros; a Gold Ducat is 6 Guilders. A Crofs, and a Specie Dollar, pass at uncertain Value from 3 to 4 Guilders, as there is a Premium upon them that sometimes amounts to 10 and 15 per Cent. Accounts are kept here in Guilders, Gros, and Deniers, of which latter 18 make a Gros, and 30 Gros a Guilder, or in Rixdollars and Gros, reckoning 90 of the latter to the former.

At *Riga* the Rixdollar is 90 Gros, and divided also in 15 *Riga* Marks, and into 3 *Polish* Guilders; the *Polish* Guilder must therefore consequently make 5 *Riga* Marks, and is also divided into 30 *Polish* Gros; a Gros is 3 Whittens, or 6 black Ditto. A Voirding is 1½ Gros, or 4½ Whittens, or 9 black Ditto.

Accounts are here kept in Rixdollars and Gros, and it is in the former of these Species that Exchanges are made with Rixdollars current of *Amsterdam*.

At *Revel* and *Nerwa*, the Rixdollars consist of 64 Whittens or 90 Gros: Accounts are kept in these two Places in Rixdollars and Whittens, where they have likewise Copper Plate Dollars, which they use in Exchange.

At *Coiningsberg*, *Elbing*, and *Dantzick*, the Rixdollar is divided into 90 *Polish* Gros, or into 3 *Polish* Guilders, and the Gros into 18 Penins or Deniers.

At these Places Accounts are kept in Rixdollars and Gros, or in *Polish* Guilders, called also Timpfhen, Gros and Deniers or Penins. They exchange on *Amsterdam* in *Polish* Gros, for a Livre de Gros of 6 Guilders current Money of *Amsterdam*, and on *Hamburg* for the Rixdollar.

At *Stetin*, 36 Stivers, or Schellings Lubs, make a Rixdollar, and Accounts are kept here in those Species, and Remittes made in them.

At *Lubeck*, the Rixdollar is worth 3 Mark Lubs, or 48 Schelling Lubs; the Mark being divided into 16 Schellings, and the Schelling into 12 Penins or Deniers. Accounts are kept here in Marks, Schellings and Deniers or Penins Lubs, in which their Exchanges are made.

At *Breslaw* the Rixdollar is worth 30 Silver Gros, and the Gros 12 Fenins. It is also divided into 90 Creutzers, and the Creutzer into 4 Fenins, and the said Rixdollars are called imperial Mony, augmented by 17 Creutzers.

Accounts are kept at this Place in Rixdollars, and Silver Gros and Penins, in the first of which Species Exchanges are made on *Amsterdam* for a certain Number of Stivers, Bank Money, and on *Hamburg* for Rixdollars of *Breslaw*, against Rixdollars of *Hamburg* Bank.

At *Hamburg*, the Mark, or Mark Lubs, is divided into 16 Stivers Lubs, and the Setiers into 12 Deniers Lubs. The Rixdollar is 48 Stivers Lubs, or 3 Mark Lubs, besides which many foreign Species are current at this Place, superfluous to be mentioned here, as they will be taken Notice of where they are coined.

Here Accounts are kept in Marks, Schellings, and Deniers Lubs Bank Money by those who have Cash in the Bank; but by those who have not, their Books are generally kept in Rixdollars, Schellings, and Deniers current Money. This is a great Place of Exchanges, in which it negotiates with most Parts of *Europe*. It shall therefore be a little particular in their Currency.

*Hamburg* gives to

*London*, from 32 to 38 Schellings Flemish per Pound Sterling.

*Holland*, Sutch Dollar for 30 to 35 Stivers, and often Rixdollars for Rixdollars with a Premium.

*Berlin*, Rixdollars for Rixdollars, with a Benefit of so much per Cent.

*Leipsick* and *Dantzick*, ditto.

*Flanders*, Mark Lubs, for *Flanders* Stivers.

*Sweden*, the Rixdollar, for Copper Marks, and sometimes at a Premium of so much per Cent.

*Muscovy*, the Rixdollar for an uncertain Number of Coppecks.

*Frankfort*, the Sutch Dollar, against some Creutzers of Exchange, or Rixdollar for Rixdollar at so much per Cent.

*Nuremberg*, the Merchant's Dollar, for current Creutzers, and Rixdollar for Rixdollar, with a Premium.

*France*, a Number of Schellings Lubs, for the *French Crown* of three Livres. *Spain*, Ditto, for the Ducat of 375 Maravedies.

*Portugal*, a Number of Deniers, for the Crusade of 400 Reas.

*Geneva*, the same as with *Paris* and *Lyons*; and it is a Custom to draw Bills upon *Lubeck* payable in *Hamburg*; the Term Lubs being derived from the former of these Places, once the Capital of the *Hanse Towns*, as it is here that the Schellings Lubs are coined.

*Venice*, a Number of Groots, for a Ducat of 24 Soldi Banco.

At *Bremen*, the current Coins are a Rixdollar, divided into 1½ Double, or 3 single *Bremen Marks*, or 24 double Schellings, or 6 Head Pieces, or 72 Gros, or 360 Swaar. A double Mark is 48 Gros, 4 Head Pieces or 240 Swaar. A double Schelling is 3 Gros or 15 Swaar. A Gros is 5 Swaar, and a Swaar is a Penin.

At this Place Accounts are kept in Rixdollars and Gros, and it exchanges on *Amsterdam* Rixdollars of 72 Gros, for Rixdollars of 50 Stivers Banco.

At *Lepfiek*, and *Naumbourg*, a Rixdollar is 24 Gros, and the Gros 12 Penins. Said Dollar is likewise 1½ Rix Gould or Rix Guilder, and this Piece is worth 16 Gros. A Ducat is 4 Guilders, or 2½ Rixdollars; besides which they have 8, 4, 2, 1, and ½ Gros Pieces, and some still smaller, of 9, 8, 6, 4, and 3 Penings.

These two Places keep their Accounts in Rixdollars, and Crowns, Gros, and Penings, and their Exchange Money is worth 10 to 20 *per Cent.* more than the current. If Bills are made payable here in current Money, they are discharged ¼ of their Amounts in Pieces of 4 Gros, and the other ¾ in Gros Pieces; but if they are drawn to be paid in Exchange Money they must be satisfied in Rixdollars, often termed Crowns in Exchange.

At *Brunswick* and *Ofnaburg* the Rixdollar is divided into 36 Mariengros, and the Mariengros into 8 Penins, in which Specie their Exchanges are also negotiated.

At *Berlin*, the Rixdollar is worth 3 Guilders or 90 Gros, about 4*s.* 6*d.* Sterling, a Guilder 20 Brummers, or 30 Gros, 18 Gros an Oort, and 5 Oorts the Rixdollar. A Brummer or Abrafis is 1½ Gros, 1 Gros is two Polchen or 18 Penins, and 1 Schelling is 6 Penins or Deniers.

In this City and the Kingdom Accounts are kept in Guilders, Gros, and Penins, and the Exchanges made in Rixdollars, for *Amsterdam*, *Hamburg*, *Anglburgh*, *Nuremberg*, *Breslaw*, *Switzerland*, and *London*, when any Thing is done direct here, though this is very seldom, as Transactions of this Nature commonly pass through *Amsterdam* and *Hamburg*.

At *Zurich*, the Rixdollar or Ducat is worth 28 Batz and 2 Schellings of this Money, which are worth more than the *Switz* Batz, and less than those called good Batz; the Guilder of *Zurich* called the good Guilder, is 16 Batz, or 40 Schellings of this Place. The Batz is worth 2½ *Zurich* Schellings; the Schelling 6 Anstlers, or 1½ Creutzer, of which latter 4 make the Batz.

At this Place Accounts are kept in Rixdollars, Creutzers, and Hellers; their Exchange is commonly made in *Zurich* Money; reckoning their Rixdollars, worth about 4*s.* 6*d.* Sterling, at 108 of their Creutzers.

At *Zurzach*, most of the *Switz* Coins are current; and

At *Schafhouse*, the Rixdollar is worth 27 good Batz, the Guilder of *Zurich* is worth here 15 ditto. The good Batz makes 10 Baps, or 4 Creutzers.

At *Berne*, the Rixdollar is worth 30 common *Switz* Batz. The good Guilder of *Zurich* is worth 16 Batz, and 2 Schellings *Switz*; and the Batz is worth 4 Creutzers, or 2½ Schellings.

At *St. Gal*, the Rixdollar is worth 25½ Batz, or 102 Creutzers. The Guilder is 15 Batz, or 60 Creutzers. The Schelling is 6 Creutzers or 1½ Batz. The good Batz is 5 Creutzers. The common Batz 4 Creutzers. The Creutzer 4 Hellers or Penins.

In this Canton, Accounts are kept in Guilders, Creutzers, and Penins, *St. Gal* Money, or under the same Denominations, in the Coins of the Empire. It gives in Exchange to *Vienna*, *Nuremberg*, *Auglburgh*, and *Belfano*, a Number of its Guilders

*Guilders*, for others of said Places; the same to *Venice* for Ducats Banco; ditto to *Genova* for Crowns of that Place; and the like to *Lyons* for the *French Crown*.

At *Basil*, the Rixdollar consists of 27 good Batz, the good Guilder 15 good Batz, or 60 Creutzers. The good Batz is 10 Raps, or 4 Creutzers. The Guilder of the Empire is here worth 25 Schellings or Plapperts, or 20 Gros; the Gros 7½ Raps; and the Plappert 6 Raps.

Accounts are variously kept in this Canton, some in Rixdollars, Schellings and Deniers, some in Livres, Schellings and Deniers, some in Rixdollars, Creutzers, and Penins, and some in Guilders, Creutzers, and Penins; they exchange as *Zurich* does, and their Rixdollar is worth about 4s. 6d. Sterling.

At *Straßburgh*, the Rixdollar is valued at 1½ Guilders, or 15 Schellings, 90 Creutzers, 3 Livres or 60 Sols. A Guilder is 10 Schellings, or 60 Creutzers, or 2 Livres, or 4 Sols. A Livre is 20 Sols, 5 Schellings, or 30 Creutzers. A Schelling is 6 Creutzers, or 4 Sols. Exchange from hence is transacted with most Places in the Silver of *Alsace*, which is the same with the Silver of *France*: the Rixdollar being here reckoned at 3 Livres *Tournois*, the Agio being commonly from 1 to 2 per Cent.

At *Genova* the Gold Coins are Pistoles, worth 40 Florins 3 Sols, or 11 Livres 10 Sols *Tournois*. Ducats worth 22 Florins, or 6 Livres, 6 Sols, or something better, though few of these Coins are now met with. The Silver Monies are Crowns, worth 10 Florins 6 Sols, or 3 Livres. Pieces worth 1 Florin 9 or 10 Sols *Tournois*. Pieces of 10 Sols 6 Deniers, or 5 Sols *Tournois*. The Copper are, Pieces of 6 Sols, 3 Sols, 1 Sol, and 6 Deniers, 9 Deniers, and 6 Deniers of *Genova*; besides which there are Silver Pieces of 2 Florins, and 1 Florin, though of these there remain but few. The *Genova* Florin is worth 5 per Cent. less than 6 Sols *Tournois*. The Exchanges are in Crowns of 3 Livres *Tournois*, called also by some Rixdollars, and almost all the foreign Coins of *Europe* are current there.

At *Cologn* the Rixdollar, computed at 4s. 6d. Sterling, is divided into 78 Albusse; the Albus into 12 Deniers, or 2 Creutzers, and the Creutzers into 4 Hellers. The Dollar is worth here 52 Albusse. The Guilder 24 Albusse. The Blasfart 4 Albusse; and Accounts are kept in Rixdollars, Albusse, and Penins, and their Exchanges with *Amsterdam* are Rixdollars of 78 Albusse, for Rixdollars current Money there at a fluctuating Premium.

At *Frankfort für Maine and Hanaw*, the Rixdollar is 90 Creutzers, and the Creutzer 4 Heller; but as the current and exchange Money is so very different, and not readily to be calculated, I herewith add a Computation made by Monsieur *John Peter Ricarl*, in Hopes it may, at least to some, be both agreeable and useful.

- 100 Guilders of 65 Creutzers exchange Money, make  
 108 Guilders, 20 Creutzers of 60 Creutzers exchange Money.  
 87 Rixdollars, 62 Creutzers, of 74 Creutzers ditto.  
 81 Rixdollars, 6 Creutzers, 3¼d. of 90 Creutzers current Money.  
 132 Guilders, 6 Creutzers, or 3¼d. of 60 Creutzers current Money.  
 100 Guilders of 60 Creutzers exchange Money, make  
 92 Guilders, 20 Creutzers of 65 Creutzers exchange Money.

*N. B.* 1 Guilder of 60 Creutzers is reckoned worth about 3s. Sterling.

At this Place Accounts are kept in Rixdollars and Creutzers, and the Difference of the Exchange Money from the current, is shewn in the preceding Calculation.

At *Vienna* many foreign Coins have a Currency, but their own is the Imperial Ducat of 4 Guilders, the Rixdollar in Specie of 2 Guilders. The imaginary Rixdollar of 1½ Guilder, or 90 Creutzers, the imaginary Guilder of 60 Creutzers. The Schelling of 7 Creutzers and 2 Deniers. A Gros is 3 Creutzers, 2 Deniers. A Patre, is 4 Creutzers. A Penin and Denier is the same; and 3 Deniers are a Dreyer. Accounts are kept here in Guilders, Creutzers, and Penins, reckoning 8 Penins to a Creutzer. This Place exchanges with *London* a Rixdollar for an uncertain Number of Pence, commonly between 4 and 5 Shillings. With *Holland* the same for an uncertain Number of Stivers. With *Nuremberg* and *Augsberg*, Rixdollars for Rixdollars with an uncertain Premium. With *Venice* an uncertain Number of Rixdollars for 100 Ducats Banco. And with *St. Gal* 100 Guilders of 60 Creutzers, for an uncertain Number of those Guilders.

At *Embsen*, the Money most in Use are Rixdollars, valued at 2 Guilders, 14 Stivers; and their Exchange is almost confined to *Amsterdam*, between Rixdollars and Rixdollars, and sometimes Guilders against Guilders, both with a Premium of 10 much *per Cent*.

*Bolzano* is a Place considerable in Exchanges with several Parts of *France*, *Italy*, *Switzerland*, and *Germany*. The Species most current here, are the *German* Rixdollars and Dollars, the former worth 90 and 93 Creutzers; the Guilder of 60 Creutzers is likewise in Use here. It exchanges with *Lyons* an uncertain Number of Creutzers for a *French* Crown. With *Rome* the same for a Crown. With *Florence* Ditto for that Crown of 7½ Livres. With *Bergam* the Rixdollar of 93 Creutzers for an uncertain Number of *Soldi*. With *Venice* the same, for a Number of *Soldi* Banco. With *Ancona*, the Guilder of 60 Creutzers for an uncertain Number of Bajoches. With *Bologne* ditto, for a Number of *Soldi*. With *St. Gal* 100 Guilders for an uncertain Number of Ditto that Money. With *Frankfort* an uncertain Number of Rixdollars of 90 Creutzers, for 100 Rixdollars of that Place; and with *Augsberg* and *Nuremberg* the same.

At *Nuremberg* and *Augsberg*, the Guilder is 15 Batz, 20 Imperial Gros, or 60 Creutzers; the Creutzers four Hellers, and the Rixdollar is 1½ Guilder, or 90 Creutzers; near 4s. 6d. Sterling, 22½ Batz, or 30 Imperial Gros; a thick Dollar is 1½ Guilders, or 25 Batz, or 100 Creutzers; a Gros is 3 Creutzers or 12 Deniers, and a Batz is 4 Creutzers, or 16 Deniers.

Accounts are kept here in Guilders, Creutzers, and Hellers, and the Exchanges on *Amsterdam* and *Leipsick* are in Rixdollars for Rixdollars, with a Premium. On *Venice* in Guilders for Ducats de Banco; and on *Vienna*, *Prague*, and *Breslau*, in their Guilders, for other Imperial Money.

At *Leige*, a Livre is 20 Schellings, and the Schelling 16 Fenins. The Crown or Rixdollar of this Place, is worth 4 Livres, which are reckoned on a Par with the Rixdollars of 50 Stivers current Money of *Amsterdam*.

Here Accounts are kept in Livres, Sols, and Deniers; and Exchanges made in Livres for Guilders of current Money in *Amsterdam*.

At *Antwerp*, *Brussels*, *Malines*, *Ghent*, and *Bruges*, the Livre de Gros is 20 Schellings de Gros, and the Schelling 12 Deniers de Gros; called here, at *Amsterdam*, and in all *Erabant* and *Flanders*, Pounds, Schellings, and Groots *Flemish*; and at *Antwerp*, as well as in *Brabant* and *Flanders*, are two Sorts of Money, or rather one Sort with two different Values, for the same Species are variously reckoned in their Currency, or by Exchange. For Exchange, the Patagon or Rixdollar is here reckoned for 8 Schellings, or 48 Stivers in Exchange-Money, though for 56 Stivers current Money; and the Schelling de Gros, which is 6 Stivers in

Exchange, passes for 7 Stivers in the Currency; so that there go 119 $\frac{1}{2}$  Guilders or Livres de Gros Currency to 100 Ditto Exchange; 100 Livres de Gros, Bank Money at *Amsterdam*, is commonly worth 2 to 4 *per Cent.* more than 100 Livres de Gros Exchange Money at *Antwerp*.

In *Spain*, the Gold Coins are the same all over the Kingdom, *viz.* the four, two, and single Pistole Pieces, as also the  $\frac{1}{2}$  Pistole. The silver Coins are the *West-India* Dollars, with its Fractions of  $\frac{1}{2}$ ,  $\frac{1}{4}$ , or two Rials, one Rial, and  $\frac{1}{2}$  Rial of Plate, now worth 10 $\frac{1}{2}$  Rials of Plate, whereas some years ago, its Value was no more than 8 of the said Rials; and the Pistole then worth but 32 Rials that is now current at 40 Rials; these Dollars all come milled from *Mexico*; but from *Peru* they still come unmilled as formerly, being the same in Value as the others, with this only Difference, that of these no less than Dollars and half-Dollars are current, the lesser Fractions having been cried down above 20 Years ago. When the late Emperor was in Possession of *Spain*, he coined a pretty large Quantity of Pestarens, or  $\frac{1}{2}$  Dollars, which being of a base Alloy, King *Phillip V.* lowered their Value 20 *per Cent.* on his coming to the Crown, so that instead of four, five of them went to the Dollar, and the said King coined many Dollars with their Fractions during his Reign. The Copper Money is very various, and almost Provincial; that at *Caliz* and in *Castile*, are double and single Quartos and Ochavos, of which two Ochavos make a Quarto, and two single Quartos make a double one: 17 Quartos make 2 Rials Vellon, which is now an imaginary Coin, though formerly it was the principal one of the Kingdom. A Maravedie is also another imaginary Specie, of which 17 are reckoned to a Rial Vellon. The Ducat is also a fictitious Coin of 11 Rials of Plate in Purchases, Sales, and all other mercantile Transactions, except in Exchanges, when it is valued at 11 Rials of Plate and 1 Maravedie, or 375 Maravedies. In the Kingdom of *Valencia*, the Copper Coin is peculiar to it, being called Dineros, of which 30 make a Rial of Plate, and 24 a Rial current, being an imaginary Coin, of which 10 were reckoned of equal Value with 8 Rials of Plate, and 2 to be the same as 3 Rials of Vellon; here are also some few Pieces of 3 and 6 Dineros, much about the Size of our Half-pence and Farthing; and as the Currency of this Coin is very considerable, though confined to the Kingdom of *Valencia* only, they are made up into Papers of 2 and 3 Dollars each, and so received and paid unopened, very often to the Value of several thousand Dollars; but in Case of any Suspicion they are weighed. At *Barcelona*, their Copper Money is again different, and 14 Rials Ardites are there reckoned to the Dollar; so that I cannot help taking Notice of the Errors all Authors that I have seen run into, by making the Coins and the Entries in Accounts the same all over *Spain*; and where any one has varied under a pretended Correction of his Predecessors, he has done it, in so erroneous a Manner, as to leave the Account worse than he found it. At *Caliz*, Accounts are kept in Rials of Plate, and its Fractions; in *Castile* in Maravedies, in *Valencia* in Livres or Dollars, Sueldos or Dineros, of which latter 12 make a Sueldo, an imaginary Specie, and 20 Sueldos, a Livre or Dollar. In *Catalonia* in the Species above-mentioned of Ardites; and so in several other Parts of the Kingdom, which I thought proper to mention, as necessary to rectify the Mistakes made in this Matter.

This Kingdom exchanges with *London*, a Dollar or Piece of Eight for an uncertain Number of Pence. With *Brabant, Flanders, Holland, Zealand, and Hamburg*; its Ducat of 357 Maravedies, for a Number of Groots; with *France* for so many Maravedies against the *French* Crown, or the Pistole for so many Livres, &c; with *Portugal*, the Ducats for Crusades, or a Pistole for the Number of Reas; with *Novi*, an uncertain Number of Maravedies for the Crown Mark; with *Venice* the same, for a Ducat Banco; with *Florence* Ditto for the Ducat of 7 $\frac{1}{2}$  Livres; with *Leghorn* the same for the Dollar; with *Milan* the same for the Ducat of 115 Soldi; with *Naples* the same for the Ducat of 10 Carlins; and Ditto with *Palermo* and *Messina* for the Florin of 6 Tarins.

In *Portugal*, the current Coins are many, *viz.*

Besides which, there are some few Copper Coins of less Value, current in that Kingdom.

Accounts are kept there in Reas, making a Separation at every hundred Thousand, &c. and it exchanges with *London* 1000 Reas, or a Mil Rea, for an uncertain Number of Pence; with *Hamburg*, *Holland*, and all the *United Provinces*, a Crusado for some Pence *Flemish*; with *Spain* an uncertain Number of Reas for the Ducat or Dollar; with *France* the same for a *French* Crown; with *Florence* Ditto for that Crown of 7½ Livres; with *Genoa*, the same for a Scudi; with *Leghorn*, the same for a Dollar of 6 Livres.

At *Genoa* and *Novi*, many Species of foreign Coins are current, but their own are the Dollar, of 5 Livres, the common Dollar or Ducat of 4 Livres; 12 Denaris make 1 Soldi; 4 Soldis a Chavelet; and 5 Chavelets, or 20 Soldi, a Livre.

Accounts are kept in these Cities in Livres, Soldi, and Denari, or in Dollars of 100 Soldis exchanging on *London* the Dollar of 5 Livres for a certain Number of Pence; on *Amsterdam*, and *Antwerp*, ditto for a Number of Groots; on *Spain* the same for so many Maravedies; on *Portugal* the same for Reas; on *Geneva* the same for a Crown with a *Premium*; on *Venice* the imaginary Crown of 90 Soldi, for an uncertain Number of *Venetian* Soldi; on *Milan* ditto for a Number of Sols of the Empire; on *Rome* an uncertain Number of Soldi for that Crown; on *Paris* the Dollar for an uncertain Number of Sols; on *Leghorn* an uncertain Number of Soldi, for the Dollar of six Livres; on *Naples* the same for the Dollar of nine Carlins.

At *Milan*, many Sorts of money are current as at *Genoa*, but their own Species are Livres, Soldis, and Denari, to be counted like Pounds, Shillings, and Pence, viz. 12 Denaris make a Soldi, &c. and Accounts are kept here in those Species. This is a considerable Place of Exchange; and gives to *London* a Ducat for an uncertain Number of Pence; to *Spain* Ditto for a Number of Maravedies; to *Venice* the same, for a Number of Soldi; to *France*, an uncertain Number of Soldi for a Crown *Tournois*; to *Florence* ditto, for that Crown of 7½ Livres; to *Genoa* the same, for the Dollar of five Livres; to *Novi*, the same for a Crown Mark; to *Rome* 100 Crowns for an uncertain Number of stamped Crowns. Besides which it exchanges with many other Places.

At *Rome*, the Crown is worth 10 Julios, and the Julio 10 Bajoches. The Crown is also divided into 20 Soldi d'Or, and the Soldi d'Or into 12 Denari.

Accounts are kept here in Crowns, Julios, and Bajoches, or Grains and Quartrins; and it exchanges with *London*, a stamped Crown for an uncertain Number of Pence; with *Genoa*, the same for some Soldi; with *Bergam* and *Bologne*, Ditto for Ditto; with *Ancona* 100 Ditto, for a Number of their Crowns; with *Spain* one Ditto, for an uncertain Number of Maravedies; with *Blozans* the same for some Creutzers; with *France* an uncertain Number for 100 *French* Crowns; with *Venice*, the same for 100 Ducats Banco; with *Leghorn*, the same for 100 Dollars; with

with *Novi* ditto for 100 Crowns: with *Lucca* 100 ditto for an uncertain Number of those Crowns of seven Livres.

At *Legborn* the Dollar is worth six Livres, or 20 Soldi, and the Soldi 12 Denari, and the Ducat is worth 7 Livres.

At this Place Accounts are kept generally in Dollars, Soldi, and Denari; and the Exchanges are made on *London* by giving a Dollar of 6 Livres for an uncertain Number of Pence; on *Holland* the same for a Number of Groot; on *France* the same for a Number of Sols; on *Portugal* the like, for a Number of Reas; on *Florence* the same for some Soldi; on *Genoa*, ditto for ditto; on *Venice*, an uncertain Number of Dollars, for 100 Ducats Banco; on *Naples*, 100 Dollars for a Number of Ducats of 5 Tarins; on *Novi* ditto, for the like Number of Crowns, with a Premium; on *Rome* ditto, for an uncertain Number of Crowns; on *Geneva* ditto for ditto; and besides, it exchanges with many other Places, in the same Manner as its Capital *Florence* does.

At *Florence*, 5 Quartrins make a Craca or Grain, 8 Grains a Julio or Paulo, 12 Grains a Livre, and 7½ Livres, or 150 Soldi, a Crown.

They here keep their Books and Accounts in Crowns, Soldi, and Denari; Picoli, or Current; and exchange the Crown of 7½ Livres with *London*, for an uncertain Number of Pence; with *Spain* the same for Maravedies; with *Portugal* ditto for Reas; with *Milan* ditto for Soldi; with *France* an uncertain Number of ditto for 100 Crowns *Tournois*; with *Novi* ditto for 100 Crowns of that Place; with *Venice* ditto for 100 Ducats Banco; with *Naples* 100 ditto for an uncertain Number of Ducats; with *Legborn* an uncertain Number of Soldis, for the Dollar of 6 Livres; with *Lucca* 100 Crowns for an uncertain Number of Crowns of 7½ Livres; with *Rome* ditto for an uncertain Number of Roman Crowns; with *Amsterdam*, *Antwerp*, and *Genoa*, the same as from *Legborn* to those Places.

At *Lucca* the Crown is worth 7 Livres 10 Soldi, the Livre 20 Soldi, and the Soldi 12 Denari, all d'Or, and they keep their Accounts therein.

At *Naples*, several Coins are current, but their own is the Ducat, which makes 10 Carlins; a Tarin 2 Carlins; a Carlin 10 Grains; a Grain 3 Quartrini: a Carlin is worth about 5d. Sterling.

Accounts are kept here in Ducats, Tarins, and Grains; and Exchanges made with *Spain*, by giving a Ducat of 10 Carlins for an uncertain Number of Maravedies; with *Genoa* the Dollar of 9 Carlins for some Soldi; with *Palermo* the Ducat of 10 Carlins for a Number of Ponti; with *Legborn*, *Florence*, *Venice*, *Rome*, and *France*, for 100 Dollars, Crowns, Ducats, stamped Crowns, and Crowns *Tournois*, 100 *Neapolitan* Ducats with a Premium.

In *Sicily*, the Coins are like the preceding; 8 Pichili make a Ponti, 6 Pichili a Grain, 10 Grains a Carlin; a Tarin is 2 Carlins, 12 Carlins is a Florin, 13 Tarins a Ducat, and 12 Tarins a Current Crown, which is about 5s. Sterling.

Accounts are kept in this Island as at *Naples*; and it exchanges with *Spain* the Florin for an uncertain Number of Maravedies; with *Florence* an uncertain Number of Carlins for the Crown of 7½ Livres; with *Novi* the same for the Crown; and with *Naples* an uncertain Number of Ponti, for the Ducat of 5 Tarins.

At *Venice* both the current and Bank Ducat make 24 Soldi, or six Livres and 4 Soldi. The *Venetian* Pistole 29 Livres; the Chequin 17 Livres; the Testoon two Livres 14 Soldi; † Ditto or a Julio, 18 Soldi; a Soldi 12 Denari; a Livre Picoli is 20 Soldi, and about 9d. Sterling. Accounts are kept here in Livres, Soldi and Denari, Picoli or current; but the Bank Entries are in Livres, Soldi, and Grossies. It deals very considerably in Exchanges, and gives to *London* a Ducat of 24 Grains Banco, for an uncertain Number of Pence Sterling; to *France* an uncertain Number of Ducats, for 100 Crowns *Tournois*; to *Spain*, one Ducat for a Number of Maravedies; to *Holland*, *Brabant*, and *Hamburg*, a Ducat for a Number of Groot; to *Novi*, an uncertain Number of Ducats for 100 current Crowns; to *Naples*, 100 Ditto for an uncertain Number of Ducats, of 10 Carlins; to *Legborn*, 100 Ditto for a Number of Dollars of 6 Livres; to *Lucca* 100 Ditto for an uncertain Number of Crowns of 7½ Livres; to *Rome* the same, for an uncertain Number of Crowns; to *Genoa*, an uncertain Number of Soldi Banco for the Crown of four Livres; to *Milan* the same, for a Crown of five Livres 15 Soldi;

to *Frankfort*, *Nuremburg*, and *St. Gal*, 100 Ducats, for an uncertain Number of Guilders of 60 Creutzers.

At *Bologna* Accounts are kept in Livres, Soldi, and Denari, the Livre being 20 Soldi, and the Soldi 12 Denari. The Money is a Crown worth four Livres five Soldi, or 85 Boulonins. Here is likewise a Testoon valued at one Livre 10 Soldi; a Jules at 20 Quartrins, and the Soldi Bayock, or Boulonin, at six Quartrins. Many Coins of the Empire, *France*, and *Spain*, pass current here, and it exchanges with *France* an uncertain Number of Soldi for one Crown *Tournois*; with *Naples* the same, for the Ducat of 10 Carlins; with *Venice*, the Crown or Dollar of 85 Soldi, for an uncertain Number of Soldi; with *Rome* an uncertain Number of Soldi, for the Crown of 10 Julios; with *Lucca* the same for the Crown of 7½ Livres; with *Florence* ditto for the Ducat of seven Livres.

At *Bergam* many foreign Coins are current, and their Accounts are kept in Livres, Soldi, and Denari, of which 20 Soldi make a Livre, and 12 Denari one Soldi. The Ducat or Crown of Exchange is reckoned at 7 Livres, and of these it gives to *Novi* an uncertain Number for 100 Crowns of that Money; to *Milan* the same for the Ducat of 5 Livres and 15 Soldi; to *Lyon* ditto for a Crown *Tournois*; to *Rome* ditto for a stamped Crown; and to *Venice* a Crown for an uncertain Number of Soldi.

At *Parma* Accounts are kept in Crowns of 20 Soldi, and one Soldi is 20 Denari. The Merchants' Crown is reckoned 4 Livres, with an unsettled Premium.

At *Modena* Accounts are kept in Lires, Soldi, and Denari; they have also a Ducat of 5 Livres, with many other foreign Coins current here.

*Mantua* has the same Species and the same Way of Reckoning as the last mentioned Place.

And at *Ferrara* and *Ancona* Accounts are kept, and the Species the same as at *Rome*.

In the Island of *Sardinia*, Accounts are kept, as in most Parts of *Italy*, in Livres, Soldi, and Denari; the Dollar or Piece is worth 9½ Rials, and the Rial 15 Soldi, *Sardinian* Money, and the Livre 20 Soldi; so that the Dollar is valued at 6 Livres, 18 Soldi, or 138 Soldi, that Island's Currency.

At *Placentia* Accounts are kept in Crowns, Soldi, and Denari of *Maak*, of which 12 Denari make a Soldi, and 20 Soldi the Crown. This Place always gives in Exchange an entire Sum, viz. a whole Crown, or 100 Crowns, &c.

In the Island of *Malta* Accounts are kept, and Money is the same with that of *Sicily*, being Silver, Copper, or Brass, of which the latter are the current Species; and in Negotiations of Purchases, or Sales, it is always stipulated whether Payment shall be made in Silver or Brass Money, the former being esteemed 50 per Cent. better than the other. Six Pichili make a Grain, 10 Grains a Carlin, two Carlins a Tarin, and the Deci Tarini 10 Tarins, besides which many foreign Coins are current on the Island.

In *Savoy* and *Piedmont*, the Species are Madonines or Pistoles of *Savoy*, worth 13 Livres; Ducatoons worth 7 Florins, or 84 Soldi; the *Savoy* Crown, worth 3 Livres, 12 Soldi; the Livre worth 20 Soldi; and the Soldi worth 4 Quartrins or Liards. Accounts are kept here in Livres or Lires, Soldi, and Quartrins; their Exchanges are in Ducatoons.

In the Island of *Candia*, the same Coins are in Use, and the same Method of Accounts practised as at *Venice*. In their Measuring two Picos are used, the one for Silk, and the other for Woollens; 100 of the former making about 61½ Yards *English*, and 100 of the others four Yards more. The Weights of this Isle are also two; the Suttle and great Weight; 100lb. of which latter very nearly correspond with 118lb. Avoirdupois; and the 100 Suttle make about 76lb. Ditto.

In the *Morea*, Accounts are kept as in *Venice*, or *Turkey*, according to which of these Powers the Place is subject, though they generally reckon in their Dealings by the Dollar of 80 Aspers. In computing their Weights, they reckon 11½ Drains to an Ounce, 12 Ounces to the Pound, 3lb. to the Oque, 132lb. to a Quintal, of about 117½lb. *English*, though in weighing Raw Silk, they count 15 Ounces to the Pound. Oil is sold here by a Measure called the Lever, weighing about 7½lb. of which to make near 15 *English* Gallons, or 112½lb.

Corn

Corn is sold here, and the Weight which Weigh per Place.

At *Constantinople* The Piece is the same as the Aspers pass here, for a portion for the Aspers, the Aspers, 116 Aspers; kins, &c.

and Aspers At *S...* Roofpi the O...

Corn is sold here by the Bochel, of which 9 $\frac{1}{2}$  make 8 Bushels *Winchester* Measure, and their Wine is sold by the Loder, containing about 8 Gallons *English*; which Weights and Measures I mention here, as they were omitted in their proper Place.

At *Constantinople*, the current Coins are golden Sequins, worth 243 Aspers. The Piece reckoned at 120 Aspers. The Paras or Medins worth 3 Aspers, and the Asper worth a Trifle more than a Farthing Sterling. Many foreign Coins pass here, such as *Spanish* Dollars, if weighty, at 108 to 110 Aspers, and in Portion for what they are light; Caragroufchs, Money of the Empire, for 120 Aspers, the Asselanis, Abouquels, and Lion Dollars of *Innsbruck* and *Holland* worth 116 Aspers; the *Polish* Abras, the Turks, Izelotes, *Venetian* and *Hungarian* Zekins, &c.

At *Smyrna* they use for current Money the Asselanis, and Abouquels, worth 80 Aspers, the Scherifs of this Place being Pieces of Gold worth 2 $\frac{1}{2}$  Dollars.

At *Alexandretta*, or *Scanderoon*, as well as at *Aleppo* and *Seyda* the current Coins are the Dollar worth 80 Aspers, and under these Denominations all Accounts are kept in these Parts.

At *Alexandria*, *Rosetta*, and *Grand Cairo*, the current Dollar is worth 33 Medini, and the Abouquel, or Lion Dollar, 30 Ditto; the Asselani worth 32 Medini, and the *Spanish* Dollar about 70. The Gold Coins are the Sultani, Xeriff, and Cheekens, being each worth about 9s. 4d. 5d. or 6d. Sterling.

The Places mentioned in the three last Articles should not have been inserted here had their Connexion being less with *Constantinople* than it is, as their Situation is not in *Europe*, to which Part of the World I proposed to confine the present Section of Measures, Weights, and Coins, which I have now finished with all the Accuracy I have been able; and though the greatest Part of the preceding Tables and Computations are collected from several Authors, and their Errors, which were many, corrected, wherever I perceived them: yet I have not stopped here, but also very considerably enlarged them, by the Addition of many principal trading Places, that had been omitted by the Composers of the aforesaid Calculations, who have generally copied from one another, and thereby propagated the Mistakes and Oversight of the first Inventors, which are here, at least in some Measure, rectified and improved.

I shall next endeavour to give the best Account I can of the Weights, Measures, and Coins of the other trading Parts of the World, with which I shall conclude the Work.

At *Cassia* in the Black Sea, many foreign Coins are current, but those in most Esteem are the weighty *Mexican* and *Sevilan* Dollars, which are always worth here 10 per Cent. more than the Asselani, being continually bought up by the *Armenians*, and sent to *Persia*. The Asselani passes from 90 to 100 Aspers; the *Venetian* Zekin for 2 $\frac{1}{2}$  Asselanis, as at *Constantinople*; the Abras passes for  $\frac{1}{2}$  of an Asselani; the Izelot for  $\frac{1}{3}$  of Ditto, and the Turk for  $\frac{1}{4}$ . The Ocque or Ok of *Cassia* is the same with that at *Constantinople*: And they have two Sorts of Long Measures, the one for Woollens and Silks, and the other for Lincens, Cottons, &c. both are called Pic, but the first for Distinction Pic-arsen; the Linen Pic is 30 per Cent. bigger than that of *Constantinople*.

At *Killy*, or *Killia*, the Money consists in Asselanis, worth sometimes 115 or 116 Aspers, as at *Constantinople*, their Price being generally governed by that of the last City: The Izelot is received here for  $\frac{1}{3}$  of the Dollar. The *Sevilan* and the Caragroufch have here the same Currency as at *Constantinople*, and other Species at a proportionable Value.

At *Prevat*, all Trade is carried on in Asselanis, Abras, Turks, Izelotes, *Venetian* and *Hungarin* Zekins, Cheritts, Aspers and Paras; these Species being commonly 15 per Cent. higher than at *Constantinople*, as they are at *Synope*, *Nicopolis*, and *Cassamboli*.

At *La Mastre* the current Coins are only the Asselanis, Quarts, Turks, Izelotes, and Aspers, the *Sevilan* and Caragroufch Dollars not being so much as known here.

At *Satonica*, in the *Archipelago*, the *Sevilan* is worth 212 Aspers, and the Sequin Roufpi 412. The Measure called the Guilot makes near half a *Legborn* Sack, as the Ocque does 3 $\frac{1}{2}$  lb. of that City, and the Pic is near a *Dutch* Ell.

In *Barbary* the greatest Part of the Money used is foreign: Here are, however, some Coins struck by the Kings or Deys in their different Territories; though the general Currency in these Parts are, *Spanish* Dollars, *French* Crowns, *Hungarian* Ducats, and the *Turkish* Golden Sultanins.

The *Metecals* are a Sort of Gold Ducats made at *Morocco* by the Jews at their Pleasure, so that their Standard is very uncertain; the *Blanquilles* are small Silver Pieces worth 2½ *French* Sols, and the *Felours* are Copper, of which 8 go to a *Blanquille*. Dollars, Halves, and Quarters are almost the only foreign Coin current in *Morocco*, where the *English*, *French*, and *Dutch* Gold and Silver, or the *Spanish* Pistoles are not received.

There is also coined at *Tunis* some Species of Gold and Silver. The Sultanins are of the former Metal, but heavier by ¼ than those of *Europe*. The Navaro are of Silver; cut nicely square; the *Doublas* and *Burb* as coined here are the same in Value with those of *Algier*.

The long Measure of *Mequinez* is the Palm, which is 8 *French* Inches, or ¾ of the *Paris* Foot. And the long Measure of *Santa Cruz* in the Kingdom of *Morocco*, is called a *Coude*, of which 100 *Paris* Ells make 225; the 100 *Aunes* of *Holland* 133; 100 *English* Yards about 175; and a *Cane* of *Provence* 3¼ *Coudes*. The real Coins are the *Flux*, *Blanquille*, and golden *Ducat*; the *Flux* is of Copper, and 16 go to the *Blanquille*, of which 4 make an Ounce, and 10 Ounces, or 40 *Blanquilles* make a Silver *Ducat*; the Golden one has no fixed Courie, but the Price of it varies according to its Scarceness or Plenty, from 12½ to 15 Ounces. A weighty *Dollar* yields a Trifle more than 7½ Ounces, given into the Mint for making *Blanquilles*; their Weights are 5 per Cent. heavier than the *Mark* Weights, and it has been found by Experience, that 100 *Marfeilles* Pounds, produce at *Santa Cruz* 97lb. and 100 of *Santa Cruz* yield 125 or 126 at *Marfeilles*.

At *Algier* the current Money made there, is golden *Sultanins* and *Aspers*; *Burbas*, of which 6 go to an *Asper*. The *Doubla* is Silver, and worth a Trifle more than the *French* Crown; the *Rubick*, *Median*, and *Zian*, are all Gold Coins; the first worth 35, and the last 100 *Aspers*; but these three Species are particularly struck at *Tremecen*. The foreign Coin that pass here, are the *Sultanins* of *Morocco*, the *Portugal* Golden Pieces, the *Venetian* Sequins, the *Spanish* Pistoles and Dollars of all Weights. The Value of these Species is not here fixed, but varies, though not much, according as it suits the Government; not but the *Patique Chique*, small *Dollar*, or the *Asper* *Dollar*, which is an imaginary Coin, is fixed and always worth 232 *Aspers*; the ¼ of a current *Dollar*, commonly called the great *Patique*, which ordinarily weighs 2½ Pistoles, but is sometimes altered by the *Dey*. In 1725, the *Sultanin* of *Algier* and that of *Morocco*, were worth 2 current Dollars and 4 Rials; the *Venetian* Sequin, 2 Dollars 6 Rials; the *Crusade* of *Portugal* 7 Dollars; the *Spanish* Pistole four Dollars and 4 Rials; the *Sevil* and *Mexican* weighty Dollars 20 to the Pound, 3 small *Patiques* and 7 *Temins*; the weighty *Legborn* *Dollar*, 3 current Dollars, and 6 Rials; ditto of *Tunis* 3 Dollars, and 4 Rials; the great *Pataque* or current *Dollar* of *Algier*, 3 small *Pataques*, or 696 *Aspers*; the *Temin* is a small *Rial*, or ¼ Part of the little *Pataque*, that is 29 *Aspers*; the *Caroube* is half a *Temin* or 14½ *Aspers*.

The common *Algier* *Quintal* is 133lb. of *Marfeilles*, or 106lb. de *Marc*; the *Pound* is generally composed of 16 Ounces, except in weighing *Chocolate*, *Tea*, and similar Commodities, when it is only 14 Ounces; the *Pound* of *Dates*, *Raisins*, &c. is 27 Ounces.

The Measure for *Woollens* and *Linens* is the *Turkey* *Pic*, of which 2 make 1 *Aune* and 2 Inches *Paris* Measure; but *Gold* and *Silver* *Stuffs* and *Silks* are sold by the *Moresco* *Pic*, three of which only make 2½ of that of *Turkey*.

Though a considerable Trade is carried on to the prodigious extensive Coasts of *Africk*, and though these are peopled by numerous different Nations, yet Coins are unknown among them, and all their commercial Transactions are carried on by Way of *Barter*, they having no other Money in Use, than some Shells for the Purchase of small Matters, in most Places; and in *Abyssinia*, or the Empire of *Prester John*, some Bits of *Rock Salt* only; so that this great Part of the World affords

affords me nothing to remark on the Subject I am at present engag'd in, till we come to the Isle of *Madagascar*; where, though Money is useless, yet they have some Weights, though only for Gold and Silver, and the biggest of these not exceeding a *Dragme*, or the *Gros*, they have no Notion of Ounces or Pounds, nor Terms in which to express them. The *Gros* is here called *Sompi*; the *Demi-gros*, *Vari*; the *Scruple* or *Pennyweight* *Sacare*; the *Demi Scruple* or *Obuley Nanqui*, the six Grains *Nanque*; the Grain unnamed among them. And all other Merchandize are exchanged according to their Value, and not Weight. They have likewise here long Measures, and those of Continnence, the latter like Bushels are called *Troubabouache*, or *Moncha*, that hold six Pounds of husked Rice. The *Foule*, not containing above half a Pound, and the *Zatou*, with which unhusked Rice is measured, and contains 100 Voules, being near 25 Pounds; they have but one long Measure called *Refe*, which is very near an *European* Braffe, and they are not unacquainted with the Span, but open their Hand to describe it.

I should here have proceeded to describe the Weights, Measures, and Coins of *Asia*, &c. as they are in Use at every Place, but as this would occasion Repetitions, I shall give them alphabetically to avoid swelling this Article unnecessarily.

*Abagi* or *Abassia* is a *Persian* Silver Coin, worth 2 *Mamoudis* or 4 *Chayes*; the *Chaye* reckoned to be equal in Value to a Trifle more than 4 *Sols*, 6 *Deniers* of *France*, so that the *Abagi* is 18 *Sols*. This Specie is current through all *Persia*; and at *Teflis* and in all *Georgia*, it is worth 22 *Sols Tournois*; 4 *Chaouris*, or *Sains*, make here an *Abagi*; 1 *Ufaltou*, a half *Abagi* or 2 *Chaouris*; 40 *Afers* or *Carbequis* make also an *Abagi*, and the *Venetian* *Sequin* is worth six *Abagis* and three *Chaouris*.

*Abas*, a *Persian* Weight for Pearls, being  $\frac{1}{2}$  lighter than the *European* *Carat*.

*Abucco*, *Abocco*, or *Acochi*, a Weight used in the Kingdom of *Pegu*, consisting of 12  $\frac{1}{2}$  *Teccalis*; 2 *Abuccos* make the *Agito* or *Gizo*; 2 *Gizos* make 1 *Demi-Biza*, and the *Biza* weighs 100 *Teccalis*, about 2lb. 5 Ounces of the heavy, and 3lb. 9 Ounces of the light Weight of *Venice*.

*Acre*, or *Lacre*, an *India* Money.

*Almene* an *Indian* Weight of about 2lb. serving to weigh *Saffron* in many Parts on that Coast.

*Arab*, an imaginary Money in the States of the *Grand Mogul*, particularly at *Amadabath*, of which 4 make 1 *Crou*; a *Crou* worth 100 *Lacks* or *Laques*; and the *Lac* 100,000 *Roupies*, or *Rupees*.

*Raat*, in *Siamese*, and *Tical* in *Chinese*, is both a Weight and Coin current in the two Empires; the Weight is 4 *Mayons*, in *Siamese* *Seling*, the *Mayon* 2 *Fouangs*, the *Fouang* 4 *Payes*, and the *Paye* 2 *Clams*; here are also *Sompayes*, in Value  $\frac{1}{2}$  of a *Fouang*. All these Weights are also Coins, or at least Bits of Silver that pass in Lieu of them, as well in *China* as *Siam*. The *Tical* weighs 3 *Gros* and 23 Grains, which, reckoning the Ounce of Silver at 3  $\frac{1}{2}$  *Livres Tournois*, is 32 *Sols* and 4 *Deniers* that Money, as it weighs near  $\frac{1}{4}$  an Ounce.

*Babar*, *Bubaire*, or *Barre*, is a Weight used at *Ternate*, *Malacca*, *Achem*, and several other Places in the *East-Indies*. There are two sorts of them, the one called the great *Babar*, and the other the little one. By the first *Pepper* and all other Spice is weighed; it is composed of 200 *Catis*; the *Catis* of 26 *Taels*, or 38  $\frac{1}{2}$  Ounces *Portuguese*, each *Tael* being reckoned 1  $\frac{1}{2}$  Ounce that Weight; so that the *Babar* is 55lb. of *Portugal*, or 48lb. 4 Ounces of *Paris*, *Strafbourg*, *Amsterdam*, &c. The small *Babar*, by which is weighed *Quicksilver*, *Vermillion*, *Silk*, &c. also consists of 200 *Catis*, but each *Catis* is only 22 *Taels*, or 32  $\frac{1}{2}$  Ounces *Portuguese*; so that this *Babar* only makes 45lb. 13 Ounces of *Portugal*, and these near 40lb. 7 Ounces of *Paris*.

The *Bahir* of *China* is 300 *Catis*, but these only make 200 of *Malacca*, each *Chinese* *Catis* containing no more than 16 *Taels*, one of which weighs 1  $\frac{1}{2}$  Pieces  $\frac{1}{2}$  and consists of 10 *Malmace* or *Mases*, and each *Mas* 10 *Condorins*. The *Bahir* of *Mocha* in *Arabia*, weighs 420lb. containing 15 *Traffels*, the *Traffel* 10 *Mauns*, the *Maun* 40 *Tuckea*, and the *Tuckea* 10 *Coffila*.

*Baruth*

*Baruth*, an *Indian* Measure containing 17 Gantans, that is 50 to 56lb. of Pepper, *Paris* Weight, of 16 Ounces to the Pound, so that the Gantan ought to hold near 3lb.

*Bafaruco*, a small *Indian* Coin of two Sorts, the one termed good and the other bad, which latter are  $\frac{1}{2}$  less than the other; 3 good *Bafarucos* make two *Portuguese* Reas, 15 a *Vintain*, and 375 a *Pardao-xerafin*.

*Batman*, a *Persian* Weight, of which there are two Sorts, the one called *Batman de Cahi*, being the King's Weight, and the other the *Batman de Tauris*, from the Name of a principal City in *Persia*; that of *Cahi* serves to weigh as well the Necessaries of Life, as the Loads of the Beasts of Burden. It weights 12 $\frac{1}{2}$ lb. of *Paris*, of 16 Ounces. That of *Tauris* only used in Affairs of Trade weighs 6 $\frac{1}{2}$ lb. or half of the other, though by some it is supposed only to weigh 5lb. and 14. Ounces, at which Computation it consists of 6 Rattles, each a Trifle less than a *Parisian* Pound; the *Derhem* or *Dragma*, which is the fifth Part of a Pound; the *Mescal*  $\frac{1}{4}$  of a *Derhem*; the *Dung* of the 6th Part of a *Mescal*, and is equal to 6 Grains, *Carat* Weight; and the *Barley* Corn, which is  $\frac{1}{4}$  of the *Dung*; besides which Divisions the *Persians* have that of the *Vakic*, about a *French* Ounce, and the *Sahcheray*, consisting of 1170 *Derhem*.

*Befarcb*, a current Coin of *Ormus*, very rare in Value with the *Liards* of *France*, 10 of them make 1 *Pais*; 4 *Pais* 1 *Soudis*; 10 *Pais* 1 *Chay*, with four *Dutch* *Stivers*; 20 *Pais* 1 *Mamoudi*; 2 *Mamoudis* 1 *Abbaffi*; 25 *Pays* 1 *Larin*; 5 *Larins* the *Real* or *Rixdollar*; and 100 *Mamoudis* 1 *Toman*. They reckon in *Ormus* by *Tomans*, the same as in *Holland* by *Livres* de *Gros*.

*Bisti*, both a Weight and Measure used on the Coast of *Coromandel* in the *East-Indies*. It is the  $\frac{1}{4}$  of the *Maun* containing 5 *Cecrs*, and 1 *Ceer*, 24 *Tol*. See *Maun*.

*Biza*, *Biza*, or *Bize*, is a Money of *Pegu*, with the same Currency as a half *Ducat*. *Biza* or *Piza* is also a Weight in the same Kingdom for weighing of Merchandize; it is about 2lb. 5 oz. heavy weight of *Venice*, or 3lb. 9 oz. the futtle or light Weight of that City; it likewise weighs 100 *Tecalis*; besides this the smallest Weights are the *Abucco*, weighing 12  $\frac{1}{2}$  *Tecalis*; the *Agito*, weighing 2 *Abocchis*, and 2 *Agiti* the *Demi-Biza*, that is 50 *Tecalis*.

*Bifti*, a small *Persian* Money, which some good Authors place among the current *Silver* Coins of *Persia*, and make it worth 1 *Sol*, 4 or 6 *Deniers* *Tournois*; but others probably more credible, and among them *Sir John Chardin*, only reckon the *Bifti* as an imaginary Coin; it is true, they call it *Dinar-Bifti*, which they make to be worth 10 single *Dinars*; so that on this Footing, of 10,000 single *Dinars* that go to a *Toman*, another imaginary Specie, there must be only 1000 of those called *Bifti*.

*Cabeer*, a Money used for Accounts at *Mocha*, of which 80 are reckoned to a *French* Crown.

*Canan*, a liquid Measure of the Kingdom of *Siam*, which the *Portuguese* call *Choup*; it contains near a *Pot*, or near 2 *Pints* of *Paris*  $\frac{1}{2}$  of the *Canan* is called *Leing*, the same as the *French* *Chopine*.

*Candul*, or *Bandile*, a Measure of Continnence used in *India*, at *Cumbaya* and *Bengal*, for Rice and other Grain; it contains 14 *Boisseaux*, and weighs near 500lb. and the Gauge of Ships is reckoned here by the *Candul*, as it is by the *Ton* in *Europe*; so that when it is said, a *Vessel* is 400 *Canduls* Burden, it is to be understood she can carry 200,000lb. or 100 *Tons*.

It is also a Weight used in *China* and at *Galangis*, of which there are 2 Sorts; the smallest being 16 *Mauns*; the other, which is the heaviest, consists of 20 *Mauns*; the first makes 3 *Chintals* good Weight, and the last 3 *Chintals* and 3 *Rubis*; the *Rubis* making 32 *Rotolis*.

*Cando*, *Candi*, or *Condi*, a long Measure used in several Parts of *India*, and particularly at *Goa*, where it corresponds with 17 *Dutch* *Aunes*,  $\frac{1}{4}$  per *Cent*. bigger than the *Aunes* of *Babel* and *Bassora*; and 6 $\frac{1}{2}$  more than the *Varre*, or *Aune* of *Ormus*; Silks and Woollens are measured by the *Varre*, but Linens by the *Cando*; which Measure in the Kingdom of *Pegu* is equal to the *Aune* of *Venice*.

*Cas, Caxa, Cayas, Cache, Casse, and Casfe*, is a small Money of Lead, and the Séum of Copper mixed; its principal Currency is at *Bantam*, and the Rest of the Isle of *Java*, and in some neighbouring Islands; this Money made at *Chincheu*, a City in *China*, is a little thinner than a Double of *France*, and has a Hole bored in the Middle, by which many of them are strung together; this String, called a *Santa*, has 200 *Caxas*, which are worth 9 *Deniers*; 5 *Santas* tied in a Bundle, make 1000 *Caxas*, called a *Sapacou*, which make 3 *Dutch Stivers* and 9 *Deniers*. There is nothing more brittle than this Money, so that if it falls it certainly breaks in many Pieces; and if it lies but one Night in Salt Water, they stick so close together, that more than half is broke in their Separation; the *Malayans* call them *Cas*; but in the Language of *Java*, they are named *Pitis*. There are two Sorts of them, great and small; the latter are those I have been speaking of, whose Value is so small, that 300,000 of them are only worth about 56 *Guilders*, and 5 *Stivers of Holland*; the biggest are the old ones, of which 6000 are worth a Piece of Eight, and are very little different from the *Cashes of China*, and the *Cassies of Japan*.

*Casava, Gasava, or Gazana*, is an *East-Indian Silver Coin*, and one of the *Roupies* current in the Dominions of the *Grand Mogul*, especially at *Amdabath*.

*Casbeque, Kabesque, or Cabesque*, is a small Copper Coin, only made, and current in *Persia*; it is worth about 6 *Deniers Tournois*, and the *Demi-Casbeque* one half. *Pul*, is the common Name of all Copper Money in *Persia*.

*Cati, Catti, or Katti*, is a *Chinese Weight*, particularly in Use on the Side of *Canton*. It is divided into 16 *Taels*, each *Tael* making 1 *Ounce*, 2 *Gros of France*; so that the *Cati* is 1lb. 4oz. Mark; 100 *Catis* make a *Pic*, which is a large *Chinese Weight*, like the 120lb. of *Paris, Amsterdam, Strasburgh, &c.* The *Cati* is also the only Weight at *Japan*; it is likewise used at *Batavia*, and other Parts of *India*, where it is lighter or heavier, according to the Number of *Taels* it consists of; for Example, at *Java* it is worth only 20 *Taels*, and at *Cambaya* 27.

*Cati* is also a small Weight which the Eastern Lapidaries use, for weighing *Emeralds*, being only 3 *Grains*. It is likewise an Account Money used in *Java*, and other neighbouring Islands, being near in Value to 19 *Dutch Guilders*, and 100,000 *Caxes of Java* go to the *Cati*.

*Cavan*, used in some of the *Philippine Islands*, and especially at *Manilla*, for measuring *Rice*, and other *Corn* and *Pulse*, containing 50 *Spanish Pounds* of the first.

*Chaye, Shair, or Chay*, is the smallest *Silver Coin* that is made or current in *Persia*; some pretend that this is the *Bisti*, which according to their reckoning makes 1 *Sol* and 6 *Deniers Tournois*, although it seems certain, that the *L'ti* is not a real, but imaginary Specie. The *Chaye* is worth just 4 *Sols*, 7 *Deniers*, and 1 *Maille of France*.

*Cheda*; a *Pewter Coin*, made and current in the Kingdom of that Name, lying in the *East-Indies*, and in the Neighbourhood of the *Great Mogul's* Dominions. There are two Sorts of this Money; the one of an *Octagon*, and the other a round Figure; the first weighing 1½ *Ounce*, and passes in the Country for the Value of two *Sols Tournois*, although, on the Footing of 14 *Sols per Pound of Pewter*, it ought not to be worth more than 1 *Sol* and 3 *Deniers*.

The round *Cheda* worth 4 *Deniers*, has 80 *Cawries*, or *Maldivian Shells* given for it; both are received in the Kingdom of *Pera*, of which the King of *Cheda* is also Master.

*Cherafis, or Tela*, are *Golden Medals* stamped in *Persia*, erroneously supposed by some to be a current Coin, but the *Persians* make none of *Gold*; so that all the Money passing in that Empire of this Metal is foreign, and not coined there.

*Cheray, or Chaby*, a *Persian Weight* used in Trade; that is what is otherwise called the civil or common Weight, and is double that named the legal Weight.

*Cherif*, a small *Gold Coin* made current in *Egypt*, worth about 4s. *Sterling*.

*Clam*, a small Weight, and imaginary Coin of *Siam*.

*Cobile, Cobil, or Coude*, a long Measure used in several Parts of *India*, being unequal and varying as the Aune does in *Europe*. At *Surat*, *Monf. Tavernier* makes it 2 Feet and 16 Lines, King's Measure, and it is divided into 24 *Tafots*, each *Tafot* a Trifle more than an Inch.

*Cokein*, an imaginary Specie, used in *Japan*, in Accounts, like the Pistole in many Parts of *Europe*, being in Value about 10 *Livres Carolus* of the Low Countries.

*Coffla*, a Weight of *Mocha*.

*Cobi*, a large dry Measure used in the Kingdom of *Siam*, for Corn, &c. It contains 40 *Sestes*, and the *Seste* 40 *Sats*; so that reckoning the *Sat* at a Trifle more than 3lb. *Marc*, and the *Seste* 100 *Catis*, or 125lb. that Weight, the *Cobi* must weigh exactly 5000lb.

*Coiang* both a Weight and Measure of *Cambaye* in the *East-Indies*, of which 5 make a *Last*.

*Commassé*, or *Connuassé*, a small Money current at *Mocha*, and the only one made there; it has no fixed Value, but is dependent on the Governor's Caprice for it; 60 *Commassés* and 80 *Caveers*, or *Cabeers*, in which Accounts are kept, make a *French Crown*.

*Compan*, a Silver Money current in several Parts of *India*, particularly at *Patane*: It is worth about 9 *Sols*, *French Money*, though it rises and falls; and is near the same in Value and Alloy with the *Mainoudi* of *Cambaye*.

*Condorin*, a Sort of small Weight, which the *Chinese*, especially those of *Canton*, use for weighing the Silver received and paid in Trade; it is worth about 3 *Farthings Sterling*, 10 of them make 1 *Mace*, and 10 *Mace* 1 *Talc*, or *Tael*.

*Conduri* in *Malayan*, or *Laga* in the *Japan* Language, is a scarlet Bean with a black Spot on its side, which those two People use for weighing Gold and Silver.

*Conadis*, a small Coin used at *Gaa*, and in all the Kingdom of *Cochin*.

*Cotta*, a Sort of a Measure used in the *Maldives*, for measuring of *Cauris*, or *Cowries*, a small Shell that serves as Money in some Parts of *Asia*, and the greatest Part of the Coast of *Africk*; it contains 12000 of those Shells.

*Coutit*, called also *Guz*, a Sort of Aune used at *Mocha*, for measuring Linens and Silks, of about 24 Inches long.

*Coupant*, an oval Piece of Silver or Gold of *Japan* of various Sizes. The Biggest of the Gold ones weigh 1½ Ounce, which at 63 *Shillings Sterling per Ounce* come to 5*l.* 10*s.* 3*d.* others about ¾ as big both in Size and Weight, are worth 1*l.* 16*s.* 9*d.* The Silver weigh about 7½ *Penny-weights*, and all these Pieces are not properly Coin, but are taken by Weight as such.

*Coupon* is also a small Weight used in the Isle of *Borneo*, for weighing Diamonds, 10 of them making between 30 and 40 *Carats*.

*Couron*, more properly a Sum, than any particular Species of Money, being used at the Court of the *Grand Mogul* to express the great Sums in the Finances of that Sovereign, near the same as in *France*, and other *European* Courts, where these are reckoned by Millions. It has been falsely called by *Monf. Savari*, *Couroure*, *Courou*, and *Crou*, for its proper Expression is *Couron*, being in Accounts 10 Millions of *Rupees*, or 100 *Lakes*, or *Lacks*, the Lack making 100,000 *Rupees*; 100 *Courons* make one *Padan*, and 100 *Padans* one *Nil*, though these two last run up so high as to be almost out of Use.

There was never an Occasion to have the Value of *Courons* so well known or considered either in *Europe* or *Asia*, like the Occurrence at the Beginning of 1739, by the rapid and unheard-of Expedition of the famous *Thomas Koulikan*, *Schach-Nadir* of *Perfia*, against the City of *Debly*, Capital of the Great *Mogul's* Dominions, of which an exact Relation arrived to us in 1740, by Way of *Constantinople*, and made the Booty taken there amount to 111 *Courons*, which, valuing the *Rupce* at 3 *French Livres*, or 30 *Dutch Stivers*, makes 3330 Millions of *Livres Tournois*, or 1665 Millions of *Guilders*; a Sum and Capture so immense, as to stand unexampled in History; and what makes it the more surprizing is, that almost all these Riches were taken in the City of *Debly* only. And the last would seem incredible, if it was not known, that the Silks, Cottons, and other Goods, the Manufactures and Growth of this vast Empire, attract and bring in here Plate from most Parts, both of *Asia* and *Europe*, by the many Ships that come yearly to purchase their Ladings with this Metal, *Indo-*

*dofan* being an Abyss for it, where all that which *America* yields is sooner or later swallowed up by falling into the Hands either of the Prince or his *Rajas*, who never let the Value of a Shilling return. *Thomas Kouli-Kan* having restored the Empire he had conquered to the Mogul, imposed on him, by the Treaty, an annual Tribute of 3 Courons, or 30,000,000 of Rupees; which I suppose he has been able to shake off since the Troubles in *Perfia*. I hope this little History will not be disagreeable to my Reader, to whom I have been tempted to offer it, by the extraordinary and uncommon Circumstances of the Affair, and under the Supposition that so punctual a Detail of it may not have fallen into every one's Hand.

*Daeczajie*, a Silver Coin, current in *Perfia*, being worth 5 Maimoudis; and 2 of them make the *Hafar* Denarie.

*Dank* or *Danek*, a small Silver Coin current in *Perfia*, and some Places of *Arabia*; it weights  $\frac{1}{4}$  of a Dragine, and has its correspondent Value. *Dank* is also a small Weight used by the *Arabians*, for precious Stones, and Drugs employed in medicinal Compositions; it is  $\frac{1}{8}$  Part of the *Arabian* Dragme, or 8 *French* Grains.

*Derbem*, a small *Perfian* Weight  $\frac{1}{4}$  of a Pound.

*Dinar*, a *Perfian* Word, signifying sometimes all Sorts of Gold Coins, and at other Times a small imaginary Specie, worth 1 *Denier*.

*Dinar Cheray*, a *Perfian* Weight of the Value of a Dollar, or Golden Ducat.

*Ding*, a general Name for all Weights at *Siam*, in particular; they have scarcely any others separate from their Coins, though this is only to be understood of the Silver ones, Gold having no Currency here as Money, but is bought and sold as a Merchandize, and is worth twelve times as much as Silver.

The Weights of *Siam*, that have the same Name with their Money, are the *Cali* or *Schang*, the *Mayon* or *Seling*, the *Pouan*, *Sompaye*, *Paye*, and the *Clam*.

*Doudou* is a Copper Money, current in some Parts of the East, particularly at *Suratte* and *Ponticberry*; it is worth a Trifle less than 2 *French* Liards, so that there go 14 to the Gold Fanon of those Places, or about 6 *Sols Tournois*; and 1 *Doudou* is worth 2 *Caches*.

*Dung*, a small *Perfian* Weight,  $\frac{1}{8}$  of a *Meskal*, and of which about 3600 go to the small *Batman* of *Perfia*, called the *Batman* of *Tauris*, and near 7200 to the great, or King's *Batman*. Besides the *Dung*, here is the Grain of Barley, reckoned  $\frac{1}{4}$  of it, so that the *Batman* of *Tauris* consists of near 14,400 Grains of that Corn, and the King's *Batman* as many again. *Dung* is also a Silver Coin, made and current in *Perfia*, weighing 12 Grains.

*Fano*, a small Weight used at *Goa*, and some other Places in the *East-Indies*, for weighing Rubies, being 2 *Venetian* Carats.

*Fanon*, or *Fanos*, a Coin current on the Coast of *Malabar*, *Coromandel*, in the Isle of *Ceylon*, and several other Parts of *India*; there are of them both Gold and Silver; the former not the same in all Places, either in Goodness or Weight, which makes a great Difference in their Value: The heaviest are not worth above 5*d.* to 5 $\frac{1}{2}$ *d.* Sterling, and the lightest little more than 5 Farthings; they weigh seven Grains, but the Gold is of so base an Alloy, that 22 of them hardly make half a Crown; these are made at *Asem*; and those of *Pegu* are of the same Weight, but being of a better Standard, 15 are equal in Value to the aforesaid 22. There are likewise Golden Fanons at *Ponticberry*, worth about 3 $\frac{1}{2}$ *d.* They are made like the half of a Pea, and nothing bigger; 12 *Doudous* are given for this Fanon, and 2 *Caches* for the *Doudou*.

The Silver Fanons are not worth at most above 2*d.* Sterling, 20 of them going to the *Pardo*, a *Portuguese* Money made at *Goa*.

*Faratelle*, a Weight made Use of in some Parts of *India*, equal to 2lb. of *Ljbon*, of 14 oz. *Marc*, or 1 $\frac{1}{2}$  of *Paris*.

*Fayallé*, an imaginary Coin, valued by some as the *Pistole* of *France*, viz. 10 *Livres*, and by others 12 $\frac{1}{2}$  *Livres*; which Difference apparently proceeds from the first Valuation being made on the *French* *Livre* of 20 *Sous*, and the other on the *Livre* or *Guilder* of *Holland*, worth 25 *Sous*.

*Forle*, or *Fulle*, a Copper Coin, made and current in *Egypt*, it is also called *Bulbe* or *Bulba*, this Specie is about the Size of a *French* *Double*, though a little

thicker, and is worth a Liard, or 3 Deniers that Money: Eight Forles make a Meidin, and there are half Forles; the *Turks* call it Mangour.

*Fouang*, or *Foang*. Vide *Baat*.

*Fun*, called a Money by *Gemelli*, an *Italian*, the only one that speaks of it, though he leaves its Value and Metal unexplained. The Journal of the *Sieur Lange* to the Court of *China* in 1721, says, the *Chinese* Weights are divided into *Laen*, *Tzin*, and *Fun*, of which 10 *Tzins* make a *Laen*, and 10 *Funs* a *Tzin*. A *Laen* of *China* has something more in Silver than the *Russian* Rouble. 16 *Laens* make 1 *Gin*, which a little exceeds the *Dutch* Pound of 16 Ounces. 4 *Funs* make near 30 *Zschoffes*, or *Tiziens*, a small *Brass* Coin. One *Laen* of the finest Silver is, according to its just Value, worth 1000 *Zschoffes*. The Price of this Money is commonly so subject to vary, that it regularly rises and falls weekly; and from what is said above, we may reasonably conclude that the *Laen* is the same as is called by some the *Laem*, explained to be a Piece of Silver passing by Weight, and called by the *Portuguese* *Tael*.

*Galls*, a Silver Money of the Kingdom of *Camboya*, in the *East-Indies*, weighing 1 *Mace*, 5 *Condorins* *Chinese*. Its Standard was once 80 *Tocques*, but in the Year 1718 it fell to 60.

*Gantan*, a Weight used at *Bantam* in the Isle of *Java*, and some other Parts of the *East-Indies*, weighing near 3 *Dutch* Pounds.

*Gantan* is also a Measure for Pepper, containing exactly 3lb. Vide *Baruth*. *Nic. de Graaf* says, that the Inhabitants of *Batavia* call the Measures they use for Rice, *Gunting*, containing near 15lb. Weight, and though the Names of *Gantan* and *Gunting* are very much alike, their Contents greatly differ.

*Ganzas*, or *Gauzas*, a Money made of Copper and Pewter by Particulars in the Kingdom of *Pegu*, and not in the Royal Mints. The Value of these are not fixed, but rise and fall according to the Times of Payment, for the Goods of the Country, though they are commonly worth between 2 and 3 *French* Sous.

*Gari*, a Sort of an imaginary Specie, or rather the Denomination of a Sum, used in many Parts of the *East-Indies*, and particularly in the Dominions of the Great *Mogul*; 1 *Gari* of *Roupees* is worth near 4000 *Roupees*.

*Gazana*, or *Gajava*, is a Silver Coin, and one of the *Roupees* current in the Great *Mogul's* Territories, particularly at *Amadabath*, worth 1½ *Livre* *T.*

*Gaze*, a small Copper Money made and passing in *Persia*, worth near 2 Liards; some confound this with the *Kabeiqui*, and others esteem it the *Kabeiqui*, or *Persian* Liard.

*Ge*, or *Ja*, a long Measure in the Empire of the Great *Mogul*, though it is not real but imaginary, and comes to about 34½ *Dutch* Aunes.

*Geden*, a Measure of Contineuce, that the *Indians* use for their Grain, and contains near 4lb. of 16 oz. Weight of Pepper.

*Goltsebut*, a Sort of Money, or rather a small Ingot of Gold that comes from *China*, and is regarded there rather as a Commodity than a current Specie; the *Dutch* gave it this Name, signifying in their Language a golden Boat, because it is in this Shape, though other Nations call them gold Cakes.

As neither in all *China* or *Tonquin*, any Gold or Silver Money is struck, the Natives cut those two Metals into Bits of diverse Weights, calling the Silver ones *Taels*, and the Gold ones *Goltsebutts*, of which I am speaking; these serve in large Payments, when the *Taels* and Copper Money are insufficient. Here are of two Sorts, the one of 32½ *Ounces*, and the other but half as much. When the *Chinese* transport their *Goltsebutts* into different Parts of *India*, where they trade, the Merchants they deal with commonly cut them in Halves, as the *Chinese* are so dishonest, as often to line these Gold Cakes with either Copper or Silver to ½ of their supposed Value.

The *Japanese* have also their *Goltsebutts*, though only of Silver; which, being of various Weights, are consequently of different Values.

*Grimelin*, a small Silver Coin, made and current at *Tripoli* in *Barbary*, in Value a little more than four *Sols* *Tournois*.

*Guelle*, a long Measure used in some Parts of the *Mogul's* Dominions, being about 1½ *Dutch* Aune.

*Gueze*, ditto of *Perfia*, for measuring Stuffs, Linens, &c. Of this Measure there are two Sorts in that Kingdom, *via.* the Royal *Gueze*, called also *Gueze Moncklets*; and the *Gueze Racourcie*, called simply *Gueze*; this last being only  $\frac{7}{8}$  of the other. The *Gueze Moncklet* contains 2 Feet 10 Inches, and 11 Lines of *Paris*, or  $\frac{4}{5}$  of that *Aune*, so that 5 *Gueze* make 4 *Aunes*.

In *India* is also used a long Measure called *Gueze*, which is near 6 Lines shorter than that of *Perfia*, or about  $\frac{1}{7}$  of an *Aune* less, though as the Difference is so small it is seldom regarded.

*Guppas*, Weights used in some Towns in the Straits of *Malucca*, particularly at *Queda*. 4 *Guppas* make the *Guantas*; 16 *Guantas*, 1 *Hali*, or *Nali*; and 15 *Halis* the *Bahar* of 450lb. *Marc*.

*Hajser Menarie*, a Silver Coin current in *Perfia*, worth 10 *Mamoudis*.

*Jerun Chrochen*, a Money coined in the Dominions of the *Grand Signor*, current for half a *Ducat*.

*Keer*, or *Ceer*, Weights used in some Cities of the *Great Mogul*, particularly at *Agabar* and *Ziamger*, in the first of which Places it weighs 36 small Weights of 1 $\frac{1}{2}$ lb. *Marc*, and in the other 36 of 1 $\frac{1}{2}$ lb.

*Ken*, a Sort of an *Aune* used at *Siam* not quite 3 Feet, 2 *Kens* making 1 *Voua*, which is a *French Toise* less 1 Inch; the *Ken* likewise makes 2 *Socks*, the *Sock* 2 *Keubs*, the *Keub* 12 *Nious*, and there go 8 Grains of unhusked *Rice* to a *Niou*, which makes 9 *French Lines*.

*Kepath*, a small Weight used by the *Arabians*; it is  $\frac{1}{2}$  a *Danck*, or *Dank*, that is the *Grain*; 12 *Kepaths* make the *Dirhem* or *Dragme* of *Arabia*, and some have thought that the Word *Karat* comes from this of *Kepath*.

*Khatovat*, a long Measure used in *Arabia*, and is the Geometrical Pace of the *Europeans*, it contains three *Akdams* or Feet, and 12000 *Khatovats* make the *Parafange*.

*Kijle*, a liquid Measure also of *Arabia*, though Authors differ about its Contents, some making it equal to a *Septier*, others to a *Pint* or *Bottle*, and some only to a *Poisson*, or  $\frac{1}{2}$  of a *Septier* of *France*.

*Lack*, or *Lake*, 100 of which make a *Couron* of *Roupees*, and this *Roupee* reckoned worth a *French Crown* of 3 *Livres*, 1 $\frac{1}{2}$  *Dutch Guilders*, or 2s. 6d. *Sterling*. *Vide Couron*.

*Larres*, a Money used in the *Maldives*, of which 5 make a *Dollar*.

*Mamoudi*, a Silver Coin current in *Perfia*, and many Parts of the *East-Indies*; the *Perfian Mamoudi* is in Size and Shape like the *French 5 Sol Piece*, and is worth 2 *Chayes* or *Schaes*; 2 *Mamoudis* make an *Abassi*, and 100 a *Toman*, which is the largest Account Money in *Perfia*. The *Indian Mamoudis*, called also *Mamedis*, have no certain Value. In the Province or Kingdom of *Guzurate* the *Mamoudi* is worth 12 *French Sols*, so that five of them make a *Crown Tournois*, and the small *Mamoudis* bear a proportionable Value, that is 6 *Sols* at *Guzurate*, and more or less at *Bengal* and other Places, according to their Rise and Fall.

*Man*, *Maun*, *Maud*, *Mem*, *Mao*, or *Mein*, Weights used in the *East-Indies*, especially in the Dominions of the *Grand Mogul*, and its several Names undoubtedly proceed from the different Pronunciation of the many various Nations that Trade draws here, both *Afaticks* and *Europeans*: There are two Sorts of *Mauns*, the one called the *King's Maun* or *Weight*, and the other only a *Maun*. The *King's Maun* serves for weighing *Necessaries*, and Things for *Carriage*, and is composed of 40 *Serres*, and each *Serre* exactly a *Paris Pound*; so that 40 *Parisian Pounds* are equal to one *King's Maun*. Though the *Sieur Tavernier*, in his Observations on the *East-India Trade*, seems to dissent from this Calculation, and says that the *Maun of Suratte* comes out to only about 34lb. of *Paris*, being composed of 40, and sometimes 41 *Serres*, but that the *Serre* is near  $\frac{1}{7}$  lighter than the aforesaid *Pound*. He likewise speaks of a *Maun* used at *Agra*, the *Great Mogul's Capital*, which is half as heavy again as that of *Suratte*, and which on the Footing of 60 *Serres* whereof it is composed, makes 51 to 52 *Paris Pounds*. The 2d Sort of *Maun* is that used in Trade composed also of 40 *Serres*, but each of these *Serres* is reckoned only 12 *Ounces* or  $\frac{1}{2}$  of a *Paris Pound*. In the *East-Indies* there is yet

a third Distinction of the Maun, in common Use at *Goa*, consisting here of 24 Rotolis, each 1 lb, *Venetian*; or 13 Ounces 1 Gros of *Paris*, the *Venetian* Pound being only 8 1/2 Ounces 6 Gros of *Paris*; so that the *Goa* Maun weighs 36 lb. of *Rome*, and 19 lb. 11 Ounces of *Paris*. In fine, the Maun is a Weight that alters according to the Places and Sorts of Goods it is used in. At *Suratte*, another Author says, it makes 42 Ceirs, or *Serrés*, but is either greater or less, according to the Commodities weighed with it. It is of 34 lb. in the Sales of Cotton, Gum-Lacque, Benzoin, Vermillion, Quicksilver, Copper, Pewter, Sandal Wood, Arêque, Ivory, or Elephants Teeth, *Spanish Wax*, &c. which is also agreeable to what Mr. Tavernier says. It is 35 1/2 lb. for weighing Indigo at *Suratte*, and but 24 1/2 lb. at *Amadabat*. It is 36 1/2 lb. on the Sales of Camphire, Spice, Tea, dry Pulse, or Wheat, Siampan Wood, &c. but at *Amadabat* the Maun in Regard of these Goods, is 38 1/2 lb. It is 38 lb. for *Cachou*, and 40 lb. for *Asa-Fetida*. At *Bengal* the Maun is 40 Ceirs, and weighs 64 lb. for Spice, and 68 lb. for Pewter, Copper, Quicksilver, Lead, and most Sorts of Drugs; and 64 1/2 lb. for Silk. On the Coast of *Coremandel* the Maun is 68 lb. as at *Bengal* on most Goods; it likewise weighs 40 Ceirs, and the Ceir 1 7/8 lb. Maun, or more commonly *Batman* is a *Perjian* Weight. *Vide* *Batman*.

Maun is yet a Weight of *Bandaar-Gamron*, in the *Persian* Gulf, of 6 lb. the other Weights are the Maun-cha weighing 12 lb. and the Maun Surats weighing 20 lb. The Maun at *Moeba* weighs a little less than 3 lb. and 10 of them make 1 *Trafel*, 15 *Trafels* 1 *Bahart*, and the *Bahart* is 42 lb.

*Mangalis*, a small *East-India* Weight, of near 5 Grains, only serving to weigh Diamonds, Emeralds and other precious Stones being weighed by Cats of three Grains each.

*Mangelin* is also a small Diamond Weight at the Mines of *Rascond* and *Pani* otherwise *Coulers*. The *Mangelin* of these two Mines weighs 1 1/2 Carats, that is 7 Grains; there are also in the Kingdoms of *Gelonda* and *Vissapour*, *Mangelines* that weigh 1 1/2 Carat. The *Mangelines* of *Goa*, in use among the *Portuguese*, only weigh 5 Grains; and though they are commonly called *Mangalis*, these two are different Weights, as this Account of them plainly demonstrates.

*Mangours*, a small Coin current in *Egypt*, whose true Name is *Ferle*, which see.

*Manfia*, Weights used in some Places of *Persia*, particularly in the *Sibircau* and in the Neighbourhood of *Tauris*: It weighs 12 lb. or a little less.

*Maun-Surats*, this Word construed is, *Suratte* Weights, of forty Ceirs. *Vide* *Maun*.

*Marco*, a Weight used at *Goa*, of 8 Ounces *Portuguese*, that is a Demi Rotoli. *Mas*, or *Mace*, a Sort of small Weight used in *Côma*, especially on the Side of *Canton*, for weighing Silver. *Vide* *Condorin*.

*Maures*, a Gold Coin current at *Suratte*, and in some other Parts of the *Mogul's* Dominions.

*Memeeda*, a Liquid Measure used at *Moeba* in *Arabia*, it contains 3 *Chopines* of *France*, and 40 *Memeedas* make 1 *Teman*.

*Merigal*, a Species of Gold Coin current at *Sofalt*, and in the Kingdom of *Monopotam*; it weighs a little more than a *Spanish* Pistole.

*Mesal*, a small *Perjian* Weight, making near the hundredth Part of a *French* Pound of 16 Ounces; this is the Demi-Derhem, or Demi-Dragmae of *Persia*. 300 *Derhems*, or 60 *Mesals* make the *Batman* of *Tauris*, which weighs 5 lb. 14 Ounces *French*. *Vide* *Batman*.

*Metecal*, a Sort of Gold Ducat, struck at *Morocco*, and in some other Cities of that Kingdom and *Fex*. This *Metecal* is different from the *Metecal* of *Fex*, only worth 20 *Dutch* Stivers; the old *Metecals* excel the new ones both in Weight and Fineness; these are of different Goodness, and consequently of various Values, which occasions no small Difficulty in Trade.

*Metkal*, or *Mitkal*, a small *Arabian* Weight, of which 12 make an Ounce.

*Metricol*, or *Mitricol*, a small Weight 1/4 Part of an Ounce, which the *Portuguese* Apothecaries and Druggists use in the *East-Indies*; besides which they have the *Metricoli*, which only weighs 1/8 of an Ounce.

*Minaltoun*, an imaginary Specie made Use of in some Parts of *Persia*, making 10 *Yonfaltoun*, 2 *Yonfaltouns* make 1 *Abassi*; and 5 *Abassis* the *Minaltoun*. The *Yonfaltoun* is also called *Mamoudi-Lacze*.

*Monbu*, or *Monka*, a Sort of Boisseau or Corn Measure used by the Inhabitants of *Madagascar*, for measuring hulked Rice. *Vide Troubahouache*.

*Morcedje*, a Silver Money current in *Persia*, particularly at *Spaban*, of which 7 make a *Dutch Crown*.

*Murais*, or *Morais*, a Measure for Rice and other dry Pulse used by the *Portuguese* at *Goa*, and in their other Colonies, containing 25 *Paras*, and the *Para* weighing 22 *Spanish Pounds*.

*Nali*, an *East-Indian Weight*. *Vide Hali* and *Guppas*.

*Nanque*, is the smallest Weight of the five, used among the Inhabitants of *Madagascar*, for weighing Gold and Silver; it is equal to 6 Grains, and besides this, here are the *Sompi*, *Vari*, *Sacare*, and the *Nanqui*. *Vide Sompi*.

*Nafara*, a Silver Money cut square, struck at *Tunis*.

*Nevel*, a small Coin of a base Alloy, current on the Coast of *Coromandel*, 8 or 9 of which make a *Fanon*, and 15 *Fanons* a *Pagode*; the *Nevel* is worth from 3 to 6 *Cassies*.

*Oubang*, is a Gold Money of the largest Sort at *Japan*; its Figure is oval, nearly resembling in Form and Size the Sole of a Shoe, and its Value is 10 *Couppans*, or *Couppans*, which are Pieces of Gold of the same Figure, but ten times less in their Weight, or less in their Surface; the *Oubang* is worth 100 *Rixdollars* in *India*, and the *Couppang* ten.

*Paczfajie*, Silver Money current in *Persia*, worth 2½ *Mamoudis*; 2 *Paczfajies* make 1 *Daczajie*, and 2 *Daczajies* the *Hazaar Denarie*.

*Pagoda*, is a Gold Coin common on all the Coasts of *Coromandel*, and almost the only one in Use in the Trade carried on there; large Payments being always made in these gold ones. The *English* make of them at *Fort St. George*, of the same Standard and Weight with those of the Country, and which pass for the same Value. The *Dutch* also stamp some at *Palaiacata*, says my Author, though I believe he mistakes it for *Negapatnam*, of the same Weight with the *English*, though 2 to 3 per Cent. better in Fineness, and consequently are more sought after.

At *Narsingua*, *Bijnagar*, and the neighbouring Parts, they make Silver Pagodes of divers Standards and consequently of various Values; the smallest are worth 8 *Tangis*, reckoning the *Tanga* at 90, or 100 *Indian Bararucos*. *Vide Bararuco*.

*Para*, a Measure that the *Portuguese* use in *India* for Pulse, weighing 22lb. *Spanish*, and is ¼ of the *Mourais*.

*Pardao*, or *Pardo Kerajin*, a Silver Money of a base Alloy, which the *Portuguese* stamp in *India*, current at *Goa*, and on the Coast of *Malabar*; they are worth near 300 *Reas*, or 20 *Fanons*; there are also 1 and ½ *Pardaos*, and some say there are likewise double ones. And as no Money is more easily counterfeited than this, the *Indians* make many false ones up in the Country, and bring them down to pass in Trade, which they would easily do, were it not for some of the *Christian Natives*, who are employed to examine them, and are so expert in their Office, that they will readily and certainly detect the Falsity only by feeling.

*Pardaos de Reales*, is a Name given to the *Spanish Dollars*, the only Specie of that Nation current in *India*, which have a certain Value fixed on them, from which they never lower, but often rise as they are wanted.

*Pardor*, a Piece of Silver Money current at *Mosambique*, and along the Coast of *Africk*, worth 200 *Reas*.

*Pau*, a long Measure used at *Loango de Boaire*, and in some other Places on the Coast of *Angola* in *Africk*. There are three Sorts of *Paus* at *Loango*. That of the King and his favorite prime Minister; that of his Princes and Captains; and that of Particulars. The King's *Pau*, is 28 Inches long, that of the great Men 24 Inches, and that of Particulars only 16½.

*Peebu*, or as it is wrote by some, *Pessi*, and by others *Peyses*, is a small Copper Money current in many Places of *India*, especially in the maritime Provinces of the Great *Mogul*, and more particularly in the Kingdom of *Guzarat*; 26 make 1 *Manoudi*, and 1000 make 1 *Manoudi*.

Mamoudi, and 54 a Rupee; so that the Pecha is worth near 8 Deniers. In those Parts of *India*, where the Cowrie Shells are current, 50 or 60 of them are given for the Pecha, and where the *Caramania* Almonds pass for small Money, 40 or 44 of them.

*Pic, Pick, or Picol, the Chinese Quintal of 100 lb. their Weight, or 125 lb. Marc.*

This Weight is also in Use at *Siam, Malacca*, and in the Isles of *Sonde*, though at the first of these it consists of double the Number of *Siamese* Catis, to what it does of the *Chinese*, as the former Cati is only half of the latter.

*Picol*, is also another Weight used in *Cbina* for Silk, containing only 66½ Catis; so that three of these Picols make as much as the Bahar of *Malacca*, that is 200 *Indian* Isles, weighing near 20 *Dutch* Pounds.

*Pole*, a Copper Money struck at *Bogbar*, an ancient Province of *Persia*, at present govern'd by its own Prince, 120 of which go to the Silver Coin of the Country, worth about 12 Sols *Tournois*, though this Value is not always certain, as it rises or falls as the Prince pleases.

*Pont, or Punt*, a long Measure used in *China*; of which ten go to 1 *Cobre*, and the *Cobre* is about 13½ *French* Inches.

*Ratis*, a Weight used for Diamonds, at the Mines of *Soumelpour* in the Kingdom of *Bengal*; and in all the *Great Mogul's* Empire for Diamonds and Pearls it is ⅔ of a Carat of 3½ Grains.

*Refse*, a long Measure used at *Madagascar*, near what is called the *Brasse* in *Europe*. They also use the *Demi-Refse*, or *Span*.

*Rize*, the Name given to a Sack with 15000 Ducats, in the Territories of the *Grand Signor*, so that it may pass as a Sort of a reckoning Money, like a Ton of Gold in *Holland*, or a Million in *France*.

*Roe-neug*; this is the largest Measure for Lengths and Distances used in the Kingdom of *Siam*, being the *Siamese* League, of near 2000 *French* Toises. There go to it 20 Jods, 4 Sens to the Jod, 20 Voua to the Sen, and 2 Ken to the Voua; the Ken is the *Siam* Aune.

*Rotolo, or Rotoli*, a Weight used in *Sicily*, several Parts of *Italy, Portugal, Cairo*, and other Places in the *Levant* and *Egypt, Goa, &c.* is very different in most of these Parts mentioned, as has been already shewn; therefore as a Weight I have nothing to add about it; and shall only say it is also a liquid Measure in some Cities and States of the *Barbary* Coasts, 32 of them at *Tripoli* making a *Matuli*. another Weight also used in this City of 32 *Rotolis*, and 42 of these *Rotolis* make a *Mataro* or *Matara* of *Tunis*.

*Roup*, besides being a Coin of *Poland*, is also one made and current in some Provinces of the *Turkish* Empire, particularly at *Erzerum* in *Armenia*, being worth ⅔ of a *Spanish* Dollar.

*Rupee*, a current Coin in the Empire of the *Great Mogul*, and in many other Places and Kingdoms in the *East-Indies*. There are both Gold and Silver of this Denomination, though those of the first Metal are scarce and in little Use, weighing 2½ Drachmes and 11 Grains; there are also it's Fractions of Halves and Quarters. The Silver Rupee is of so unequal a Value, as to be with Difficulty fixed on any certain Footing, its Worth varying according to its Quality and the Place of its Fabrication; there are 5 Sorts of them, viz. the Rupee *Siccas*, worth at *Bengal*, 39 Sols *Tournois*, those of *Suratte* 34, and those of *Madras* 33, all of the new ones, those called *Arcates*, and the last *Petch*. The new ones are round, and many of the old ones square, though they are both of the same Weight; and besides these Distinctions of new and old, the Indians make the other five abovementioned; and it may in general be remarked, that all these Sorts are in higher Value at the Places of their Make than elsewhere; and that the new are always worth more than the old; the Reason of which Difference proceeds from the Love the Natives have of Silver, which induces them for its Preservation to hide it carefully in the Earth, as soon as they get a few Rupees together. To prevent which Disorder, that drains the Countries where it is practis'd of their current Species, the governing Prince and *Rajas* stamp new ones annually, with an Augmentation in Value, without any Increase of Weight, and these consequently grow diminishing in Worth as they

grow old. The Silver Rupee is the most current Money in Trade, both at *Suratte* and *Bengal*; but on the Coast of *Coromandel*, the Gold Pagodes, worth 2 Rixdollars or 3 $\frac{1}{2}$  Rupees, are the most in Use.

It is from the *Madras* Rupee that the Value of all others is proportioned, and that varies according as certain Circumstances occur; and these different Sorts of Rupees have not an equal Currency in every Place, as may be seen by the above Valuation of them. The Rupee used in Accounts is only an imaginary Specie, as well at *Suratte* as *Bengal*, to which the Value of the old Rupee is often reduced, and is worth  $\frac{1}{7}$  less than that of *Madras*. All Sorts of Rupees are divided into a smaller Money, called *Ana*, of which 16 go to the Rupee; but it must be observed that the *Ana* is worth more or less in Proportion to the Value of that Kind of Rupee of which it is a Part. Some *Anas* are made at *Madras*, but so few that they are rarely seen to pass, so that this Specie is rather a reckoning Money than a current one. The smallest Coin, and that in greatest Use, among the common People, and in the Markets, are the *Cowries*, 80 of which are counted a *Pouni*, according to the Custom of *Bengal*; so that a Rupee is divided into *Anas*, *Pounis*, and *Cowries*, according to which the following is the Value of all Rupees as they passed at *Bengal* in 1726.

The Rupee of <i>Madras</i> was worth	38	Pounis, or 3040	Cowries.
The <i>Sike</i> , or <i>Sicca</i> Rupee	39 $\frac{1}{2}$		3160
The Rupee, <i>Arcate</i>	37		2960
The Rupee, <i>Petch</i>	36 $\frac{1}{2}$		2920
The Current, or Old Rupee	34		2720

Besides which there are yet two other Species of Money in Accounts, called the *Heys* and *Gandan*, the first worth 95 *Cowries*, and the other 4. The current Rupee is that used in the Revenues of the *Great Mogul*, and was in 1726 and 1727, worth 1 $\frac{1}{2}$  *Dutch* Guilders, or, which was the same Thing, a *French* Crown in 1741.

*Rubi*, a Gold Coin, current in all the Kingdom of *Algiers*, and in those of *Congo* and *Labex*, worth 35 *Aspers*; it is especially struck at *Tremecen*, which has the Privilege of making these, as well as the *Medians* and *Zians*.

*Savare*, a final Weight used in *Madagascar*, for Gold and Silver, being equal to an *European* Scruple.

*Sat*, a Measure at *Siam* for Corn, Seeds, Pulse, and some dry Fruits; it is a Sort of a *Buthel* made of *Bambou*, and 40 of them make a *Seste*, and 40 *Sestes* the *Cochi*; it is difficult to reduce with any Certainty these Measures to those of *Europe*, as some reckon the *Seste* 100 *Catis*, and the *Cati*, as has been already observed, not being of the same Weight in all Parts of *India*, the *Seste* or *Sat* cannot be ascertained; but if 100 *Catis* be esteemed 125lb. *Marc*, the *Sat* will be near 3lb. and the *Cochi* 5000lb.

*Seban*, or *Schbang*, in *Chinese* *Cati*, is a Weight used in the Kingdom of *Siam*; the *Chinese* *Cati* is worth 2 *Siamese* *Scans*; so that the *Chinese* being 16 *Taels*, the *Siamese* must be only 8, though some reckon that of *China* at 20 *Taels*, and the other half. The *Tael* weighs 4 *Baats* or *Ticals*, each of near half an Ounce; the *Baat* 4 *Selings*, or *Mayons*; the *Mayon* 2 *Fouangs*; the *Fouang* 4 *Payes*, the *Paye* 2 *Clams*; the *Clam* weighs 12 Grains of Rice, so that the *Tical* or *Baat* weighs 768 of those Grains.

It is to be observed, that the greatest Part of these Weights pass also for Money, either real or in reckoning, as Silver is a Merchandize, and sold by Weight.

*Scharafi* a golden Coin, that was formerly made in *Egypt*, worth the same as a *Sultanin*, that is, near a golden Crown of *France*; the *Arabians* call it *Dinar*, or *Methcal*-aldhegal, the *Scharafi* at present scarce, and some believe them to be the same Specie as what the *Greeks* name *Golden Bezans*.

*Scherefi*, a Gold Coin current in *Persia*, worth 8 *Larins*, at the Rate of 2 *Spanish* Dollars per *Larin*; the *Europeans* call them *Golden Seraphin*.

*Scherif*, otherwise called *Sultanin*, and very commonly *Sequin*; it is a Gold Coin current in all the *Grand Signor's* Dominions, though it is hardly ever made at any Place but *Cairo*, and is the only Gold Specie struck in *Turkey*.

*Schuite d' Argent*, a Sort of Account Money at *Japan*, on which Payments in Trade are estimated, being worth  $12\frac{1}{2}$  *Dutch* Guilders, that is 5 Rixdollars, or Crowns of the United Provinces; and otherwise it is reckoned equal to 4 Taëls, 6 Mace, and 5 Condorins; the Value of them varying a little according to the Year.

*Sompaye*, is the smallest Silver Coin current at *Siam*; it was worth 2 Sols and Demi-pite *French* Money, when the Ounce of Silver was only valued at 3 Livres. It is the half of a Fouang, and 12 to 13 Siamese Catches are given for 1 Sompaye, or 400 Cowries. The Sompaye is divided into 2 Payes, the Paye into 2 Clams; but these two Sorts of Money are only imaginary, and not current Specie; the Sompaye and its Diminutions serve also for Weights; the Clam weighing 12 Grains of Rice, and the other rising in Proportion.

*Sompi*, a small Weight, which the Inhabitants of *Madagascar* use for Gold and Silver; it weighs but 1 *Paris* Dragma, and yet it is the heaviest Weight these Islanders have; they not knowing what the Ounce or Pound is, nor have any thing answering to them; the Diminutions of the Sompi, are the Vari, or Demi-gros, the Sacare or Scruple, the Nanqui or Demi-scruple, and the Nanque, equal to 6 Grains.

*Sordis*, a small Money current at *Ormuz* in the *Persian* Gulf, being worth 4 Payes, and the Paye 10 Besorchs. *Vide* Besorch.

*Tael*, called by the *Chinese*, Leam, is a small Weight of *China*, equal to 1 Ounce and 2 Dragmes. *Vide* Cati, Mace, and Condorin.

*Tamling*, a *Siamese* Name to this Specie of Money and Weight, which the *Chinese* call Tael; the Tael of *Siam* is more than half lighter than than of *China*. *Vide* Cati, Baat, &c.

*Tanga*, an Account Money used in some Parts of the *East-Indies*, particularly at *Goa*, and on the Coast of *Malabar*; there are two Sorts of this Coin, the one called the good, and the other the bad Alloy; it being very common in *India* to reckon by Money of good and bad Alloy on Account of the vast Quantity of different Specie current there that are either false or altered. The Tanga of good Alloy is  $\frac{1}{2}$  heavier than that of a bad Alloy, so that if 5 of the former Tangas are given for 1 *Pardo-Xerafin*, there must be 5 of the others. 4 Vintins of a good Alloy make 1 Tanga of the same Standard; and 15 good Barucos go to the Vintin; the good Baruco, on the Footing of the *Portuguese* Reas; but when the Barucos are of a base Alloy, three of them only make 2 Reas.

*Tare*, or *Tarre*, Money of the *Malabar* Coast, is a Silver Coin worth 6 Deniers *Tournois*; 16 of them make 1 Fanan, which is a small Piece of Gold worth 8 *French* Sols.

*Tela*, a Sort of Money, or rather a Gold Medal struck by every King of *Persia* at his coming to the Crown, which are distributed among the People; they are in Weight like the *German* Gold Ducat, but have no Currency in Trade, nor among the Merchants.

*Teman*, a liquid Measure used at *Mocha* in *Arabia Felix*, containing 10 Memcedas.

*Tibofé*, an *East-Indian* Coin, being one of the Rupees current in the States of the *Grand Mogul*, and worth double the *Gafana* Rupee.

*Tol*, this is the smallest Weight and Measure used on the Coast of *Coromandel*, of which 24 make a Ceer; 5 Ceer the Bûs; 8 Bûs the Maun; and 3 Mauns the Mandi, which is the heaviest Weight in this Part of *India*.

*Toman*, by some called Tumein, is an Account Money used by the *Persians* in keeping their Books, and to facilitate the Reduction of large Sums in Payments. It is composed of 50 Abassis, or 100 Mamoudis, or 200 Chayes, or 10,000 Dinars, being near 43, or 46 *French* Livres, valuing the Abassi at 18 Sols and 6 Deniers; the Mamoudi for 5 Sols, 3 Deniers; the Chaye 4 Sols, 6 Deniers, and 1 Maille; and the Dinar for the Denier *Tournois*. The Toman is also a Weight used in *Persia* for weighing Money, which in large Payments is always received in this Manner and never counted; the Toman weighs 50 Abassi.

*Toque*, a Sort of reckoning Money used at *Jeds*, and some other Parts of the *African* Coast, where the Bouges or Cowries are current; one Toque of Bouges is composed of 40 of those Shells; and 5 Bouges make 1 Galline.

*Troubahouache*, called also *Moncha*, or *Monka*, a Measure used by the Inhabitants of *Madagascar*, for their husked Rice, containing near 6lb. of that Grain; but for their unhusked Rice they have another Measure named *Zatou*.

*Val*, a small Weight used in *India* for Dollars or Pieces of Eight, each of which ought to weigh 73 *Vals*. It also serves for weighing Gold Ducats, which must weigh 9 *Vals* and  $\frac{1}{4}$  of an *Indian* Carat, and whatever is wanting of these Weights in either, the Vender is obliged to make good.

*Vari*, a small Weight in Use among the ancient Inhabitants of *Madagascar*, weighing near half a *Dragme Marc*; here is likewise the *Sompi*, *Saccare*, *Nanqui*, and *Nanque*; none of which are used, only for weighing Gold and Silver.

*Voule*, a small Measure used by the Natives of *Madagascar*, in retaling their husked Rice; it contains near half a Pound of Rice, and 12 of them make the *Troubahouache* or *Monka*, and 100 the *Zatou*.

*Zacues*, a small Silver Money current in *Persia*, being a half *Mamoudi*. *Vide* *Mamoudi*.

*Ziangi*, a Silver Money at *Amadabath*, that is likewise current in other Places of the *Mogul's* Territories; it is among the Number of the *Rupees*, and worth 20 *per Cent.* more than those called *Gafana*, and is about 36 *French Sols*, the Value of which last Coin is to be understood through this whole Calculation, except where it is expressed otherwise, to be as it was current at the Time of making it, *viz.* 13 *Livres*, 6 *Sols*, and 8 *Deniers* for a Pound Sterling.

*Of the CUSTOMS; of their Administration, and of Custom-House Officers.*

**CUSTOMS** are properly the Tribute or Toll paid by Merchants to the King, for carrying Merchandize out, or bringing it in; or in other Words *Duties*, payable to the Crown, for Goods exported and imported; and these are due to every Prince or State, both of common Right, and by the Law of Nations; as a Matter inherent to their Prerogatives; they being Guardians and absolute Commanders of their Harbours and Ports, where Commodities are landed and laden: Though in *England*, the Prince's Power is more restrained than in arbitrary and despotic Governments, as he can lay no Imposition on any Sort of Merchandize, though never so superfluous or unnecessary, whether native or foreign, or upon Merchants, Strangers, or Denizens, by his absolute Power; without Assent of Parliament, either in Time of War, or under the greatest Necessity or Prefures that may be.

*Customs* are satisfied in different Manners, according to the various Usages of the several Countries where they are levied: In some, they are paid in Money, and in others, in Kind; which Merchants should endeavour to be acquainted with, and govern themselves according to the Laws, Constitutions, and Proceedings used in all Kingdoms respectively, whereby they are secured and defended in their Traffick and Commerce; for by Non-observance thereof they expose themselves to the Risque of Mulcts, Fines, Loss, and Forfeiture of their Goods and Ships.

The Word *Customs* comprehends *Magna & Antiqua Custuma*, payable out of *Dyr* 165. our own native Commodities; as for Wool, Woolfells, and Leather; and *Parva Custuma*, which are Customs payable by Merchants, both Strangers and Denizens, which began in the Reign of *Edw. I.* when the Parliament granted him three Pence in the Pound, on all Merchandizes exported and imported.

But that which is granted by Parliament, is properly called a Subsidy; and is sometimes granted to the King for Life, of which there are several Sorts; as *Tonnage*, a Duty granted out of every Ton of Wine imported, which was first granted by Parliament to *Edw. III.* and *Poundage*, a Subsidy granted for all Goods exported and imported, except Wines, &c. and is usually the twentieth Part of the Value of the Goods, or twelve Pence in the Pound; and this was first given to *Hen. VI.* for Life.

In the Reign of *Edw. III.* the greater Charter for free Traffick was confirmed; <sup>2 Inf. 66.</sup> and *Anno 6 Edw. III.* it was enacted, that no new *Customs* could be levied, nor ancient increased, but by Authority of Parliament.

In the subsequent Reigns, several other Duties were laid on foreign Goods and Merchandize, and the abovementioned of *Tonnage* and *Poundage*, granted by *12 Car. II.* for Life to that Prince, have been continued in the same Manner to his royal Successors, down to his present Majesty King *Geo. III.*

As these Duties increased under every Reign, more particularly; from the Commencement of the present Century, owing to the Necessity of increasing this Branch of the Public Revenue, to provide for the Interest, or Annuities, annually to be issued and paid to the public Creditors, on Account of an increasing National Debt, which in the present Day, we have seen augmented to an almost incredible Sum; and also to defray other Expences of Government, such as the civil List, &c. the Mode of collecting the Customs, from the Number, and Variety of Denominations of the Duties imposed by the Legislature at sundry Times, and appropriated to particular Purposes, became so intricate and perplexed that the oldest Merchant in *London* was unable to calculate the Sums he had to pay on the Goods and Merchandizes he either Imported or Exported. Such Alterations likewise, were liable to take Place every Session of Parliament, that no Book of Rates,

OF THE CUSTOMS

though many were published, could serve as a certain or permanent Guide. Neither could the Merchant go to the Custom-House and enter his Goods immediately, by paying down the Sum specifically stated; but was under the Necessity to submit to injurious Delays, until all the usual Computations on the old Subsidy, the new Subsidy, the one third Subsidy, the *Five per Cent*, additional *Five per Cent*, &c. &c. &c. were exactly and separately calculated. So that, besides great Anxiety of Mind, the Merchant was obliged to sacrifice a great Deal of his own Time, or of that of his Clerks, and was put to much Trouble and Expence. This public Grievance called aloud for Redress: our best commercial Writers, and all sensible Foreigners repeatedly complained of the mal-Administration of the *British* Customs; but in vain, no Minister listened to their friendly Admonitions; though a considerable Increase of Revenue was pointed out as the certain national Advantage to be derived from a Reform. At Length, a great Commercial Revolution, a Treaty of Commerce with FRANCE, forced upon the *British* Ministry, a Measure which had been unaccountably delayed; though it had been partly arranged, and was intended to be brought forward, towards the Close of Lord *North's* Administration. Under the former Mode of regulating the Customs it was totally impossible for the Original Author of *LEX MERCATORIA* or the Editor of the last Edition, to insert any Table of Duties, composed with such Accuracy that Merchants might rely upon the Calculations in their respective Commercial Concerns: at present, that Difficulty being removed by the Consolidating Act of 1787, great Pains have been taken to examine and compare the Books of Rates, since published; and after expunging a great Number of useless Repetitions, to exhibit as concise a View as the Nature of the Subject would admit, of the Duties on *Importation* and *Exportation*; of the *Drawbacks*, Bounties and other Allowances, as they are established by the said Act; and which cannot well undergo any considerable Alterations during the existing Treaty with *France*, the Term of which will not expire until the Year 1798.

The Merchant, by referring to any one or more Articles in the following correct Tables, will know for a Certainty what Sums of Money are required for clearing them at the Custom-House; and will be enabled to provide accordingly. This must be acknowledged on the Face of it, to be no small Advantage, and in Addition to this, they will give him a more general Knowledge of the Commerce of *Great-Britain*.

See 9 <i>Geo.</i> III. cap. 38.		15	0 0
Tobacco, damaged, for every pound weight cut off			
See 9 <i>Geo.</i> I. cap. 21.		0	0 0
Wines, damaged or corrupt, or unmerchantable, if the Importer shall refuse to pay the duties thereon, the Commissioners of the customs may cause such wines to be received into the custody of the proper officers, and to be publickly sold, in order to be distilled into Brandy, or made into Vinegar ; the produce of such sale to be paid to the importer, but not to exceed the following Allowances :			
Of the Growth of <i>Germany</i> , or which pay duty as such, the ton		4	0 0
— of <i>France</i>		4	0 0
— of <i>Spain, Portugal</i> , or elsewhere		8	0 0
But no Allowances to be made for any Wines, unless imported in casks on board a merchant's Ship, directly from the place of the Growth, or the usual place of shipping, except as to ships stranded.			

**T**HE Merchant being thus enabled to ascertain and prepare the Sum requisite for the Acquittal of the Duties, his next Care must be to appoint a proper Person to report the Ship's Arrival, and to make the Entries in the Long Room up-stairs at the Custom-house; and the Manner of transacting this Business follows here in order.

Form of ENTRIES inwards.

WHEN a Ship arrives, on which a Merchant has any Goods, it is usual for him to apply to some Clerk in the Long Room at the Custom-house to make the Entry, who computes the Duties, and directs him where to pay them in, for which his Charge is very small; however, if one has a Mind to avoid it, he must draw out a *Bill of Entry* in the following Manner, *viz.*

*London, October the 25th, 1791.*

In the Union, *Thomas Richardson a Alicant.*

*S. T.*

*S. T. No. 1 & 10, Ten Bales of Almonds, containing 60 Cwt. 27. 34 4 4-20 per Cwt. £ 103 : 1*

of which the Merchant must make seven, the one written in Words at length which is to pass, and called a Warrant; and in the others, the Contents may be expressed in Figures, which are all delivered to the proper Clerks in the Long Room, who attend for that Purpose, from Ten in the Morning till two in the Afternoon; and having paid the Customs into the Treasury, a Receipt is given for them, and Officers appointed so soon as others concerned in the Cargo have taken the same Steps.

But previous to this Entry, the Ship must be reported, the Method of performing which I shall add for the Sake of those who may be as well Owners as Merchants.

On the Ship's Arrival in the River, the general Practice is to nominate a Person to act as a Ship's Husband, except an Owner has a Mind to perform this Part himself, who must take an exact Account of her Lading from the Captain's Manifest, and report the same at the Custom-house; which he does by making two Copies, the one on a blank Sheet of Paper, and the other on a Paper with the Oath to be taken by the Master of the Ship, printed on it, given by the Usher of the Custom-house, who generally attends at the upper End of the Long Room, to administer Oaths, &c. And the Report is to be made in the subsequent Form, *viz.*

*To report a Ship.*

After exactly copying the Manifest on the two Sheets of Paper, as before-mentioned, you must go to the Comptroller, or to the Deputy Comptroller, in the Long Room of the Custom-house, accompanied by the Master, and read the two Manifests over with him, of which he retains that written on the plain Sheet; and the other with the printed Oath, you must return to the Usher from whom you received it, who, after examining the Master concerning the Ship, and this latter has sworn to the Manifest, the Usher directs you how, and to whom you must pay for entering the Ship, and your next Business is to see, whether those principally concerned in her Cargo have made their Entries, that if they have not, you may apply for their doing it, in Order to set the Ship to work, and begin her Discharge

*Omissions in a Report.*

When upon the Delivery of any Ship, it appears that any Part of the Cargo has been omitted in the Master's Report, and he applies to the Collector to amend the same; though the Officers have not any Reason to believe, but that such Omission was through Inadvertency, and without any Design of Fraud, yet the same shall not be permitted as the Law stands; but the Honourable the Commis-

sioners

tioners are to be acquainted with a true State of the Case, and if they are satisfied, and are pleased to give Leave, then the Goods so omitted, may be added to the Report, after the following Manner:

Third Day of *March*, 1791.—Added by the Commissioner's Leave of the 8th ultimo.

*D. S.*—4—1 Case—Linen—*David Smith*.

*A. B. Master*.

And then the Report is sworn to *de novo*, inserting the particular Days underneath that, when sworn to before.

*Directions how to proceed after the Report is made.*

The Person directed by the Owners to take an Account of every Merchant's Goods as they are delivered, called the Ship's Husband, having got the Land-waiter's Name, who is appointed for the Ship, he applies to him for Information of what Merchants have made their Entries, and for a Copy of his Warrant, which he signs, and sends aboard the Ship to the Officers there, that they may commence their Work, which they soon after do, and send a Hoy or Lighter to the Quays.

And against the Lighter's Arrival, the Ship's Husband has prepared a Book, ruled in the same Manner as the Waiter's; on one Side of which he places the Number or Quantity of Goods he judges the Lighter may contain, as in the

1	A B No.	4	Margin, and opposite thereto, he sets down the Marks and
2	C D	8	Numbers of each Parcel as they are landed; and as soon as
3	E F	5	the Lighter is delivered, he takes a View, or gets the Surveyor
4	G H	9	to give him an Account of the Damage, if any, upon the Goods.

When the Goods are weighed or measured, and the Merchant has got an Account thereof, and finds his Entry already made too small, he must make a Post-Entry for the Surplusage in the same Manner as the first was done.

And as a Merchant is always in Time to make his Post, he should take Care not to over-enter, to avoid as well the Advance as the Trouble in getting the Over-plus back; however, if this is the Case, and an Over-Entry has been made, and more paid or bonded for Customs than the Goods really landed amount to, the Land-waiter and Surveyor must signify the same, upon Oath made, and subscribed by the Person so over-entered, that he, or any other Person to his Knowledge, had not any of the said Goods over-entered on board the said Ship, or any where landed the same without Payment of Custom; which Oath must be attested by the Collector and Comptroller, or their Deputies, who then compute the Duties, and set down on the Back of the Certificate, first in Words at Length, and then in Figures, the Sums to be paid; which Certificate and Endorsement are as follows:

*The CERTIFICATE.*

These are to certify, that *J. F.* did pay his Majesty's Duties inward in the *Dolphin*, *Thomas Wheeler*, Master, from the *Sound*, the 9th Day of *May*, 1791, for 124 Ton of Iron, 35 hundred and a half of Copper in Plates, and 800 hundred Clap-Boards; and we the Officers underwritten did examine the same at the Delivery thereof out of the said Ship, and found no more than 118 Tons of Iron; 33 hundred Weight of Copper, and 763 hundred Clap-Boards: And for further Manifestation of the Truth hereof he made Oath, that neither he, nor any other Person, to his Use or Knowledge, had any of those Goods over-entered on board the said Ship, or in any Place landed them without paying Customs. Dated at the *Custom-house*, *London*, the 14th Day of *May*, 1791.

*W. B.* Surveyor.

*H. S.* Landwaiter.

*Jurat.* *J. F.* that the Contents of the above-mentioned Certificate are true.

As the Difference is very great between the Duties paid by British Subjects, and those paid by Aliens, it is necessary in this place to observe, with Respect to the making and subscribing of Merchants' Entries at the *Custom-house*, that any British Man may custom, in his own Name, the Goods of another British Man; so may one Merchant Stragner enter the Goods of another Merchant Stranger: but he that so enters the Goods of another Person, whereby the King loses his Duty, forfeits the Goods to the King, &c. and likewise all his own Goods and Chattels for ever. 1 *Eliz.* Cap. 11. S. 6.

*Bills of Sight.*

When Goods come consigned to any Merchant, and he has not received any Invoice, Bill of Lading, or other Advice, from his Correspondent, or happens by any other Cause to be ignorant of the real Quantities and Qualities of the said Goods, so that he is not capable of making a perfect Entry of the same, he must acquaint the Collector and Comptroller thereof, and desire a Bill of Sight, or View, in Order to have them brought on Shore and examined; who, upon the Merchant's making Oath to the Truth of his Allegiations, and depositing such a Sum of Money in the Collector's Hands, as may be conjectured to be sufficient to answer the Duties, will grant such Bill. The Form thereof, and the whole Method of Execution must be as follows:

In the Britain of London, Jonathan Dacl Master, from Ostend. *Edward Hague.*  
*January 23, 1791.*

Sight { 2 Cases }  
*A. F.* { 1 Bale } of Merchandise, Quantity and Quality unknown.  
 N<sup>o</sup>. 1 to 5. { 2 Packets }

*Andrew Fountain* maketh Oath, that neither he, nor any other Person for his Use, has received any Invoice, Bill of Lading, or other Advice, or doth know the Contents of any of the Goods above mentioned; so as to be capable of making a true and perfect Entry thereof, without having them first examined by the Officers of the Customs.

*Jurat. 23 die Januarii, 1791.* Signed *Edward Hague.*  
*Coram me A. B. Collector.*

Sufficient Money being deposited to secure the Duties, you may permit the Goods above mentioned to be landed under your Care, and to be brought to his Majesty's Warehouse, to be there viewed, examined, &c. by the Surveyor and the Land-Waiters, who are to endorse the particular Quantities and Qualities on the Back hereof, and return the same to us immediately, that a perfect Entry may be made: but the Goods are not to be delivered till such perfect Entry be made, and his Majesty's full Duties be paid.

Deposited one hundred Pounds.  
*R. M. Collector, T. W. Customer, I. L. Comptroller.*

To { *E. B. Surveyor.*  
*W. A. Tide-Surveyor.*  
*C. R.* } Land-Waiters.  
*M. P.* }

*Time allowed to export by Certificate.*

The Merchants are allowed, for their shipping off Tobacco, Sugar, Ginger, Pepper, Bugles *alias* Beads, Cast and Bar Iron, dying Wood, all dying Wares and Drugs, eighteen Months to *British*, and fifteen Months to *Aliens*, to have their Drawback; and all other Goods, twelve Months to *British*, and nine Months to *Aliens*.

Amber Beads, rough Amber, Coral Beads, and polished Coral, and all Cowries, may draw the Inpost 169<sup>2</sup> exported in three Years.

*2, 3 and 4 <sup>l</sup>un.*

*4 and 5 <sup>l</sup>l.*  
*and <sup>l</sup>M.*

No Duties or Customs are to be taken for Prize Goods, consisting of any Military or Ship Stores.

Wines which, at the Time of landing, shall be damaged, corrupt, or unmerchantable, and which shall be given up to the Officers of the Customs, to be publickly sold, in Order to be distilled into Brandy, or to be made into Vinegar, in Manner directed by the Act of 12 Geo. I. for the Improvement of his Majesty's Revenues of Customs, Excise, and Inland Duties, are not chargeable with the Duty of 3*l.* per Ton.

Almost all Goods and Merchandize imported, pay Duties, and are to be delivered either by *Tale*, *Weight*, *Measure*, or *Gauge*.

Those which pay Duty by *Tale*, are, at the Delivery, to be tallied at one, ten, twenty, &c. according to the Nature of them; and as the Merchant cannot, generally, have any Pretence for a short Entry in Goods by *Tale*, therefore it is supposed that, in Strictness, no Post-Entry should be admitted of.

Goods paying Duties by *Weight*, are to be brought to the King's Beam, and weighed, in Order to adjust the true Quantity for which his Majesty's Duties ought to be paid; for, in Consideration of the different Proportion which foreign Weights bear to the *British*, the Waste, &c. which may happen during the Voyage, and the Draughts and Tares to be allowed on the Landing, it cannot be expected that a perfect Entry can be made at first; but to enable the Merchant to make the nearest Estimate of the true nett Weight to be entered, he will be furnished in the Progress of this Work with a Table of the Proportion which all foreign Weights bear with our's, and also with the particular Draughts, Tares, &c. on all Goods imported; abstracted from Mr. *Crouch's* Account of them.

At landing the Goods, the Weigher is to call out the full and true gross Weights in the Scale, which, the Landwaiters, and Ship's Husband, are to enter in their Books, and should check with one another every Day, and from the Total of the said Gross Weight is to be deducted an Allowance in Consideration of

DRAUGHT, according to the following respective Weights, *viz.*

On all Goods imported, weighing under 1 Cwt.	1 lb. Dra.
From 1 to 2	2
2 to 3	3
3 to 10	4
10 to 18	7
18 to 30 or upwards	9

9 Geo. I. C.  
21. S. 15.

Except Tobacco of the *British* Plantations, which is to be allowed eight Pounds Draught only, for every Hoghead of 350*lb.* or upwards.

These Allowances for *Draughts*, the Landwaiters may, when they are very different, insert in their Books, opposite to each respective Draught, or, when they are not very different, compute the same, by counting the Number of the Draughts at each separate Allowance.

The Allowance for Draught being deducted, there is, in most Cases, a farther Allowance to be made out of the remaining Weight, called

TARE, being a Consideration for the outside Package that contains such Goods which cannot be unpacked without Detriment: or for the Papers, Threads, Bands, &c. that inclose or bind any Goods which are imported loose; or, though imported in Casks, Chests, &c. yet can be unpacked and weighed nett.

Several Sorts of Goods have their *Tares* ascertained, and these *Tares* are not to be altered or deviated from, in any Case within the Port of *London*, unless the Merchant, or the Officers of the Crown, thinking themselves prejudiced by such *Tares*, shall desire that the Goods may be unpacked, and the nett Weight taken; which may be done either by weighing the Goods in each respective Cask, &c. nett, or, as is practised in the *East-India* Goods particularly by picking out several Casks, &c. of each Size, and making an Average, and so computing

computing the rest accordingly. But this must not be done without the Consent of two Land-Surveyors, attested by their Hands in the Landwaiter's Books; and in the Out-Ports, not without the Consent of the Collector and Surveyor: And as to those Goods which have not their *Tares* ascertained, two Land-Surveyors in *London*, and the Collector and Surveyor in the Out-Ports, are to adjust and allow the same in the like Manner.

Sometimes the Casks, &c. are weighed beyond Sea before the Goods are put in, and the Weight of each respective Cask, &c. marked thereon, as is usual for most Goods imported from the *British* Plantations, or else inserted in the Merchant's Invoice; in which Case, if the real Invoice be produced, and the Officers have satisfied themselves, by unpacking and weighing some of them, that those Weights are just and true, they do then, after having reduced them to *British* Weight, if not so before, esteem them to be the real *Tares*, and pass them accordingly; though sometimes the *Tares* on the Cask, &c. are wholly disregarded, and the real *Tares* taken.

But the unpacking Goods, and taking the nett Weight, being supposed the justest Method, both for the Crown and Merchant, it is usually practised in the Port of *London*, in all Cases where it can be done with Conveniency, and without Detriment to the Goods.

Goods, delivered by *Measure*, are under three different Regulations:

1. Such as Linens particularly; which are measured by running Measure, being no more than taking the Length of the Piece from one End to the other.

And as in the *Holland*, *Flanders*, and some Sorts of *German* Linens, the Contents in *British* Ells are often annexed to, or marked on each Piece, and likewise inserted in the Merchant's Invoice; therefore there will not be any Difficulty in making a perfect Entry: So that no Post-Entry will be admitted in this Case.

And for such Linens as are contented in foreign Measures, the Table, which will hereafter be inserted, proportioning them to the *English*, will enable the Merchant readily to find their Contents in *British* Yards or Ells, according as the Nature of the Entry shall require.

But those *German*, or East-Country Linens, which are not contented, by reason the several Pieces of each respective Sort are generally about the same certain Lengths, may be entered, by computing the whole Quantity at such usual Lengths, and delivered by the Officers, by measuring some of the Pieces, and computing the rest accordingly.

2. Such as Pictures, Grave and Paving Stones, and Marble Tables particularly, which are measured by Square and superficial Feet.

Such as Marble Blocks, and Timber particularly, which are measured by solid or cubical Measure.

Goods delivered by *Gauge*, are Wines, &c. and all exciseable Liquors, whose Quantity to be entered may be pretty nearly determined by considering the Size of the Casks, and what accidental Leakage, or other Diminution, may have happened during the Voyage.

Before any Goods are delivered by Virtue of any Warrant, the same must be copied into the Landwaiter's Books, as a Foundation for the Delivery, distinguishing the Date and Number of the Entry, the Merchant's Name, the total Duties paid, the particular Packages, with the Marks, Numbers and Quantities of the Goods, for which the Duties have been paid.

And at the Delivery of the Goods, underneath the said Copy of the Warrant, must be inserted the particular Manner of the Delivery, as the Tale, Weight, Measure or Gauge, with the respective Allowances, for Draught and Tare, where the same are to be allowed, from the Total; wherefrom the Quantity first entered being deducted, the Remainder is the Quantity, for which a Post or additional Entry is to be made; and when the same is made, the Date and Number of such Entry must be inserted, opposite to the said short Entry, as will be illustrated by three or four Examples annexed.

In

OF THE CUSTOMS

In making Entries it is usual for Merchants to include all the Goods they have on board the same Ship in one, though sometimes they may happen to be of twenty several Denominations, or more; and as it is enacted by 12 Car. II. Cap. 4. Sect. 4. to which subsequent Acts have had Reference, That if any Goods, or Merchandize, be brought from Parts beyond the Seas into this Realm, by way of Merchandize, and unshipped to be laid on Land, Customs, and other Duties thereof, not paid, or tendered to the Collector, &c. nor agreed with for the same in the Customhouse, then the said Goods and Merchandizes shall be forfeited; therefore there was some Years ago a Resolution of the Court of Exchequer, that, to admit of Post or additional Entries, where Goods are short entered, the Goods so short entered being laid on Land before Payment of Duty, is a Matter of Favour and Indulgence, to prevent such Goods from Forfeiture; and though, in Goods delivered by Weight and Gauge, it is almost impossible to make a perfect Entry before Landing, yet in Goods delivered by Tale and Measure there cannot be any Excuse or Pretence for a short Entry, and therefore, as has been before remarked, it ought not to be allowed,

Examples of the Examination and Delivery of Foreign Goods imported.

*Of Landing and Lading.*

The Merchants of *London* are allowed to unlade their Goods at any of the lawful Keys and Places for landing Goods, between the *Tower of London* and *London-Bridge*, between the Sun-rising and Sun-setting, from the 10th of *September* to the 10th of *March*, and between the Hours of six of the Clock in the Morning and six in the Evening, from the 10th of *March* to the 10th of *September*, giving Notice to the proper Officers appointed to attend the lading and unlading Goods; and such Officers as shall refuse, upon due Calling, to be present, shall forfeit for every Default 5*l*.

It may be lawful for any Person to ship or lade into any Ship or Vessel, on the River of *Thames*, bound over Seas, Horses, Coals, Beer, ordinary Stones for building, Fish taken by any of his Majesty's Subjects, Corn, or Grain, the Duties being paid, and Cockets, and other lawful Warrants, duly passed for the same.

So likewise Deal Boards, Balks, and all Sorts of Mafts, and great Timber, may be unshipped, and laid on Land, at any Place between *Limehouse* and *Westminster*, the Owners first paying or compounding for the Customs, and declaring at what Place they will land them before they unship them; and upon Licence had, and in the Presence of an Officer, they may unlade them; otherwife they incur a Forfeiture.

*Form of Sufferances for landing Goods at an unlawful Key.*

Though foreign Goods and Merchandizes have been entered, and his Majesty's Duties duly paid, and a Warrant be thereupon granted for the Delivery thereof; yet, if the Merchant, for his Conveniency, is desirous to land them

at any other Place than the lawful Keys appointed by his Majesty's Commission out of the Court of Exchequer, a special Sufferance must be granted for that Purpose, after the following Manner:

*In the Alidolphus of Stockholm, Hans Carvel, from Sweden.*

*Edmund Boehm.*

Three thousand five hundred Bars, containing sixty Tons of Swedish Iron, two hundred and fifty Barrels, containing twenty Lafts of Tar. A Warrant having been past by us for Delivery of the above mentioned Goods, and the Importer having signified to us, the Inconveniency that would attend the bringing the same to the lawful Key, we have granted this special Sufferance for landing the same at—

You are therefore to permit the same to be unladen into Lighters, and afterwards landed at the said Place, in like Manner, and with like Care, Examination, and Inspection, as is usual at the lawful Key: For which this shall be your Voucher.

Dated at the Custom-house, *London*,  
the 20th of *May*, 1791.

*A. B. Collector, B. C. Customer, C. D. Comptroller.*

To { *D. E. Surveyor,*  
*E. F.* } Landwaiters.  
*F. G.*

Every Merchant making an Entry of Goods, either inwards or outwards, shall be dispatched in such Order as he cometh; and if any Officer or his Clerk shall, either for Favour or Reward, put any Merchant or his Clerk, duly attending and making his Entries as aforesaid, by his Turn, to draw any other Reward or Gratuity from him than is limited in the Act of *Tonnage* and *Poundage*, and the general Books of Value, if the Master Officer be found faulty herein, he shall, upon Complaint to the chief Officers of the Custom-house, be strictly admonished of his Duty; but if the Clerk be found faulty therein, he shall, upon Complaint to the said chief Officers, be presently discharged from his Service, and not permitted to sit any more in the Custom-house.

Every Merchant shall have Liberty to break Bulk in any Port, and to pay Custom for no more than he shall enter and land, provided that the Master of such Ship, make Declaration upon Oath, before two principal Officers of the Port, of the Content of his Lading; and shall declare upon Oath, before the Customer, Collector, Comptroller, or Surveyor, or two of them, at the next Port where his Ship shall arrive, the Quantity and Quality of the Goods landed at the other Port, and to whom they did belong.

The Officers who sit above in the Custom-house of *London*, shall attend their several Places from nine to twelve in the Forenoon, and one Officer or Clerk shall attend with the Book in the Afternoon, during such Time as the Officers are appointed to wait at the Water-side: All other the Officers of the Out-Ports shall attend every Day in the Custom-house between the Hours of nine and twelve in the Morning, and two and four in the Afternoon.

The Officers of *Gravesend*, having Power to visit any Ship outward bound, shall not without just Cause detain her, under Colour of searching, above three Tides, under Pain of Loss of their Office, and rendering Damage to the Merchant and Owner of the Ship. And the Officer in any of the Out-Ports shall not without just Cause detain any such Ship above one Tide, after the Ship is fully laden and ready to sail, under Pain of Loss of Office, and rendering Damage.

#### *Of Entries Outwards.*

When the Goods you intend to export are made up in the Packages you think proper, whether in Bales, Bags, Boxes, Cases, or in any other Manner, you must carry the true Contents to the Custom-house, by a Bill of Entry like the following one, *viz.*

*In the Mary, Joseph Thomas, for Lisbon.*

T. S.

T. S. Two Cases of Hats, viz.  
 N<sup>o</sup>. 1 qt. 90 Dozen.  
 2 — 18

Cases 2 — 108 Dozen.

T. S. Two Trunks of Stockings.  
 N<sup>o</sup>. 1 qt. 82 Dozen.  
 2 — 32

Trunks 2 — 114 Dozen.

Of these Bills you must write seven, and act with them as directed for the Bills inwards; and on having satisfied the Customs, you will have a small Piece of Parchment called a Cocket, which testifies your Payment thereof and all Duties for such Goods; and having marked and numbered your Goods, you endorse the same on the back of the Cocket, and of your shipping Bill, mentioning the true Contents of each Bale, &c. This Cocket and shipping Bill you must give to the Searcher with his Fee; and after paying the Wharfage and Portage of your Goods, you may ship them off; and take Care that you remind the Person who carries them on board, to bring you the Mate's Receipt for them, which you deliver to the Captain when he signs your Bills of Lading.

*The Form of a COCKET.*

**K**NOW ye, that T. S. Ind. for 108 Dozen of Hats, and 114 Dozen of Ind. or Inds. Stockings, in the *Mary, Joseph Thomas* Master, for *Lisbon*, paid all Duties. graves, significa natural-born.  
 Dated *August 30, 1791.*

On the Back of the Cocket write the Marks, Numbers, and also the Quantity of the Goods contained in the Cocket: Thus,

N <sup>o</sup> .	1	1	Case qt. 90 Dozen of Hats.
	2	1	Case qt. 18 Dozen of Hats.
T. S.	1	1	Trunk qt. 82 Dozen of Hose.
	2	1	Trunk qt. 32 Dozen of Hose.

If several Sorts of Goods are exported at once, of which some are free, and others pay Customs, the Exporter must have two Cockets, and therefore must make two Entries, one for the Goods that pay, and the other for those that do not pay Custom.

But to export Goods by Certificate, which must be foreign Goods formerly imported, and on which a Part of the Customs paid on Importation is drawn back, provided they are exported in the Time limited by Act of Parliament, it is not sufficient only to mention the Marks, Numbers, and Contents, as commonly practised in the Entries outwards, but also the Name of the Ship in which the Goods were imported, the Importer's Name, and Time of Entry inwards; and make Oath, that the Entries for those Goods were paid, or secured to be paid, as the Law directs. After you have made an Entry in this Manner, you are to carry it to the Collector and Comptroller, or their Deputies, who, after examining their Books, will grant a Warrant, a Specimen of which is here annexed, which must be given to the Surveyor, Searcher, and Landwaiter, for them to certify the Quantity of Goods; after which the Certificate must be brought back to the Collector and Comptroller, or their Deputies, and Oath made, that the said Goods are really shipped, and not landed again in any Part of *Great-Britain.*

*Britain.* This done, they set down, in Words at length, on the Back of the De-  
benture, and then in Figures on the same Side, the Sum of the Duties, and  
subscribe jointly to the Whole. By Virtue of this Dehentute, the Exporter may,  
in one Month after the Ship's Departure from *Great-Britain*, demand his Draw-  
back; and if the Collector has not Money in his Hands to pay the Dehenture,  
he is to certify the same on the Back of the Dehenture, that the Exporter may  
have Recourse to the Commissioners, who are then to pay him. Suppose that  
*H. V.* Merchant of *London*, exports 23 Dozen of Napkins, Holland's making,  
and 232 Ells of Holland, which he imported before from *Amsterdam*; he makes  
his Entry in the following Manner, *viz.*

*London, May 7, 1791.*

In the Goodfellow, Samuel Johnson, for Barbadoes.

*H. V.*

*H. V.* One Box, containing twenty-three Dozen of Napkins, Holland's mak-  
ing, and one Bundle, containing two hundred thirty-two Ells of Holland, im-  
ported the 20th of *April* last, in the *Dragon*, of *London*, Samuel King, Master,  
from *Amsterdam*; the Customs Inward being paid by the said *H. V.* the 20th  
of *April* last.

*H. V.*

The Collector and Comptroller, or their Deputies, give a Warrant of the  
same Tenor, signed by them, and directed to the Surveyor and Landwaiter;  
after which you have a Cocket in the following Manner:

*London,*

**K**NOW ye, that *H. V. Merchant*, for twenty-three Dozen Napkins, Hol-  
land's making, and two hundred thirty-two Ells of Holland, paid all the Du-  
ties inwards the 20th of *April* last, out of the *Dragon* of *London*, Samuel King  
Master, from *Amsterdam*, late unladen, and now in the Goodfellow, of *London*,  
Samuel Johnson Master, for Barbadoes. Dated the 7th of *May*, 1791.

*A. R.* Collector.

*C. D.* Comptroller.

And on the Back of the Cocket is endorsed as follows; The Contents of the  
Goods shipped, two-hundred thirty-two Ells of *Holland*, twenty-three Dozen  
Napkins, *Holland's* making.

*E. V.* Surveyor.

*A. L.* Searcher.

The DEBENTURE runs in the subsequent Form.

**H. V.** Ind. did enter with us, the 20th of *April* last, in the *Dragon*, of  
*London*, Samuel King Master, from *Amsterdam*, twenty-three Dozen  
Napkins, *Holland's* making, and two hundred thirty-two Ells of *Holland*; the  
Customs being paid inwards, by *H. V. Merchant*, the 20th of *April*, 1791,  
as doth appear by the Certificate of the Collector inwards; and for further Mani-  
festation of his just Dealing herein, he hath also taken Oath before us for the  
same. *Custom-house, London*, the Day and Year above written.

*A. R.* Collector.

*C. D.* Comptroller.

*Jurat.* *H. V.* that the two hundred thirty-two Ells, and twenty three Dozen  
Napkins above mentioned in this Certificate, were really shipped, and have not  
been since landed, nor are intended to be relanded, in any Port, or Creek in  
*Great-Britain*. The 7th of *May*, 1791.

*A. R.* Collector.

*C. D.* Comptroller.

*H. V.*

The twenty three Dozen Napkins, and two hundred thirty-two Ells of  
*Holland*, were shipped off at *Dice-Key*, *May* 7th, 1791.

*E. V.* Surveyor.

*A. L.* Searcher.

*I. K.* Landwaiter.

When the money is received on this Debenture, a Receipt may be given in the following Form, *viz.*

**RECEIVED**, June the 12th, 1791, of the Honourable Commissioners of his Majesty's Customs, by the Hands of A. R. Collector, the Sum of eleven Pounds, and three Pence, for the above Debenture. Per H. V.

*Of Goods, re-imported or returned.*

FOREIGN.

**W**HEN foreign Goods, which have been regularly imported, have been afterwards exported, and are, for Want of Sale, or the great Scarcity of such Goods, &c. desired to be returned, or to be again imported into any Port of Great-Britain, notwithstanding there is not any Law for such Re-importation, yet, upon Payment of the like Duties that were due upon the first Importation though perhaps the Goods were exported out of Time, and consequently were not intitled to any Drawback, it is the Practice to indulge the Merchant in such Re-importation, although such Goods may be prohibited to be originally imported from the Place from which the Ship now returns, upon Performance of the following Requisites; The first whereof is, to signify to the Searcher, &c. the Time when, and the Ship in which they were exported; who thereupon will have Recourse to their Books, and in Case they find that such Entry outwards was duly made, will grant a Certificate, or Duplicate thereof, as follows:

In the *James* of *Liverpool*, *John Williams*, for *Petersburgh*,

*Edward Ellis.*

One thousand Pounds of *Virginia* Tobacco, the Duties inwards whereof were paid, and the other Duties secured by *George Jones*, the tenth Day of *August*, 1790. Dated the fourth of *April*, 1791.

The Goods above mentioned were regularly shipped off, but five hundred Pounds of the said Tobacco\*, for which a Debenture hath passed, being Part of the above Entry, are now returned in the † *Sea-Horse*, *Jacob Peters* Master, from *Petersburgh*, as the Merchant is ready to make Oath. Dated at the Custom-house, *London*, the 20th of *August*, 1791.

*R. W.* Searcher.

*L. M.* Landwaiter.

If the Goods were entered outwards at any other Port, this Certificate must be granted by the Officers of that Port; But if the Cocket whereby they were shipped be produced, I apprehend that will fully serve the same Purpose. And on the Back of the aforesaid Certificate, Proof must be made, by the Oath of the Merchant, that the Goods then returned are the same therein mentioned. The Form of which Proof must be as follows:

20th of *August*, 1791. No. 4.

In the *Sea-Horse*, *Jacob Peters* Master, from *Petersburgh*.

Returned

*L. M.* } Fifty Boxes, containing five hundred Pounds Weight of *Virginia* Tobacco.  
No. 1 a 50 }

*Edward Ellis* maketh Oath, that the Tobacco above-mentioned is now returned as Part of the Entry outwards within mentioned, which was formerly exported from hence, and not sold, nor the Property changed beyond Sea; but he verily believes it to be the same Tobacco which was exported as aforesaid, and no other.

(Signed)

*Edward Ellis.*

*Jurat 20 Die Augustus, 1791,*

*Coram me R. B. Collector.*

\* To be omitted, if exported out of Time.

† Or the same Ship and Master.

Thereupon an Entry must be made, as for other Goods imported, and the Duties paid, or secured, being inserted underneath the Merchant's Oath; the Collector, Customer, and Comptroller, are to subscribe their Names thereto, and direct it to the Surveyor and proper Landwaiter, as a warrant for their Delivery of the Goods.

BRITISH GOODS RETURNED.

When Goods of the Product or Manufacture of *Great Britain*, which have been exported to foreign Parts, are, for Want of Sale, or any other Occasion, desired to be returned into any Port of *Great-Britain*, a Bill of Store may be granted for the landing and delivering the same: As a Foundation for which, the Searcher, &c. must be applied to, for a Certificate, or Duplicate of the Entry outwards, in like manner as before directed for foreign Goods.

Whereupon an Entry must be made in the Book inwards, as for foreign Goods imported; and the Collector, Customer, and Comptroller, having subscribed their Names underneath the Merchant's Oath, the same is to be directed to the Surveyor and proper Landwaiter, as a Warrant for their Delivery of the Goods. But as it may sometimes so happen, that the Entry outwards cannot be fixed upon, by Reason of the Distance of Time, the Loss of Papers or Accounts, or several other Accidents: Therefore, in that Case, as there cannot be any Proof, the Oath of the Merchant only must be deemed sufficient, and may be taken as follows:

In the *Good-Luck* of *Bristol*, *John Darby* Master.

*Richard White.*

T. L. } Bales  
No. 1, 2, 3, } Containing fifty Pieces of Woollen Cloths of *British* Manufacture.

*Richard White* maketh Oath, that the Cloths above-mentioned are sent to him, this Deponent, as Part of a large Quantity formerly exported from hence,  
I. G.  
and that, according to the best of his Knowledge and Belief, they are all of the Manufacture of *Great-Britain*.

(Signed)

*Richard White.*

*Jurat: 25<sup>o</sup> Die Martii, 1701,*  
*Coram me C. L. Collector.*

An Entry must be made in the Books inward, and this Oath must be subscribed and directed as a Warrant for the Delivery of Goods, in like Manner as when the particular Entry is proved.

Form of a SUFFERANCE, for Exporting Corn.

In the *Race-Horse*, of *Harwich*, *William Tims*, for *Dublin*.

I. G.

Two hundred fifteen Quarters of Wheat, to be shipped, but not exported till further Orders.

Two hundred fifteen Quarters of Wheat, *Winchester Measure.*  
*To the Surveyor and Searcher.*

*The DEBENTURE.*

*London.*

**T**HESE are to certify, I. G. Merchant, Ind. did on the 19th Day of June, 1791, enter, and have shipped for Dublin, in the Sea-Horse, whereof William Tims, Master, and two-thirds of the Mariners, are his Majesty's Subjects, two hundred fifteen Quarters Wheat, *Winchester Measure*; and that the Price of the Wheat of the Measure aforesaid, in the Port of London, last Market-Day, did not exceed forty-four Shillings per Quarter. Witness my Hand this 19th Day of June, 1791.

I. G.

*Jurat. I. G. That the Contents of the aforesaid Certificate are true.*

*Concerning Sufferances of Baggage.*

Passengers' Baggage, containing their Wearing-Apparel, &c. are permitted to be landed by a particular Sufferance directed to the Surveyors and Landwaiters appointed to the Ship, who, after Examination, are, on the Back thereof, to return a particular Account of each Passenger's Baggage to the Commissioners in the Port of London, and to the Collector in an Out-Port; who will order such Part as appears to be worn, to be delivered without Entry, provided they are not made of Goods prohibited to be worn in this Kingdom; but such Clothes, or small Parcels, &c. as have not been worn, and are customable, will be ordered to be entered, and those that are prohibited, to be prosecuted.

*Suppose a Sufferance for*

<p>3 Trunks,                  1 Box,                  2 Portmanteaus,</p>	}	<p>containing Wearing-Apparel, Linen, and Woollen.</p>
---	---	--

*The*

The Examination to be endorsed on the Back of the Sufferance, thus:

27 June, 1791.

Examined, 3 Trunks, 1 Box, 2 Portmanteaus, containing 4 Suits of old Wearing-Apparel, 16 Shirts much worn, Papers and Books of Accounts, 20 pounds of printed Dutch bound Books, 1 India Damask Nightgown, 2 Pounds of Tea, 3 Pounds of Chocolate, 2 Remnants, containing 20 Ells plain Holland's Linen, under 1 1/4 Ell wide.

A. B. Surveyor.

C. D. } Landwaiters.  
D. E. }

The Bound Books and Linen to be entered; the Nightgown, Tea, and Chocolate to be prosecuted, and the rest delivered.

F. G. } Commissioners.  
G. H. }  
H. I. }  
I. K. }

The whole Proceedings to be entered in the Landwaiter's Books, with the Date of the Order for Delivery, &c

And to finish this Subject, when the Landwaiters to each Ship have made true Entries of the Delivery of all Goods in their Books, and perfectly adjusted them, they are, before they deliver them to the Jerquer, or Surveyor in those Parts where there is no Jerquer, to certify the same under their Hands, after the Entry of the last Article, thus:

This Ship is regularly discharged, and all Post-Entries duly made.

A. B. Landwaiter.

The FEES, and ALLOWANCES that are due and payable to the Officers of his Majesty's Customs in the Port of London, &c. are as follow.

## No. I.

**T**O Laws and Regulations respecting the *Corn Trade*, See Page 41.

Since this important Article was printed off, upon the Representation of the Lords of the Committee of Council, appointed for the Consideration of all Matters relating to Trade and Foreign Plantations, a new Bill was framed for regulating the *Exportation* and *Importation* of Corn. It passed into a Law, 31 Geo. III. Cap. 30; and took place from the 15th of *November*, 1791.

By this Act, all the preceding Acts, commencing with 1 Jac. II, c. 30, are either repealed in Part, or altered and amended so as comprize what it has been thought proper to retain, in one Act of Parliament. It is has therefore been the Business of the Editor carefully to compare the old Regulations, with the new contained in the present Act; and the Reader is requested to refer from Page 41 to 44, for each separate Regulation altered and amended by the following Clauses in the new Act.

A Bounty of 1s. 3d. *per* Hundred Weight is granted on the *Exportation* of Wheat-meal; and of 1s. 6d. *per* Hundred Weight on Wheat-flower and Biscuit made of Wheat; subject to the old Regulation of the Bounty-Price of Wheat.

A Bounty of 10d. *per* Hundred Weight is granted on Barley-meal, and Beer- meal, and Big-meal, subject to the old Regulation of the Price of Barley. The Bounty on Oatmeal is altered to 12d. *per* Hundred Weight.

Oath to be made that Biscuit for *Exportation* is made of *British* Wheat; and no Bounty to be allowed for a less Quantity than upwards of one Hundred Weight for every Mariner or Passenger on board any Ship, nor for less than two Tons Weight in each Ship; over and above the Ship's Stores, or Allowance for each Mariner or Passenger for her Voyage.

Bond shall be given by the Exporters, and the Masters of Ships, for the due *Exportation*.

*Exportation prohibited*, when Wheat is at or above 46s. the Quarter, not only of Wheat, but likewise of Meal, Flour, Malt, Bread, or Biscuit, made of Wheat.

Of Rye, Pease, or Beans, when the Price is at or above 30s. *per* Quarter; and of Meal, Flour, Bread, or Biscuit, made thereof.

Of Barley, Beer, and Bigg, when the Price is at or above 23s. *per* Quarter; and of Meal, Flour, Bread, or Biscuit, made thereof.

Of Oats, when the Price is at or above 15s. *per* Quarter; and of Meal, Flour, Malt, Bread, or Biscuit, made of Oats.

Corn, exported contrary to this Act, to be forfeited, together with the Ship, Vessel, or Boat, wherein the same is laden, with all their Furniture, Apparel, Tackle, &c. and the Exporter subjected to a Penalty of 20s. for every Bushel of Grain, Meal, &c. so exported.

The Vessel not to be forfeited if satisfactory Proof be made from the Smallness of the Quantity, that any such Corn, &c. was on Board without the Privy of the Owner or Master.

Corn, &c. begun to be shipped outwards, or such Part thereof as shall be shipped within twenty Days from the Entry, may be exported, though the Prices should, in the mean Time, rise to the Rates at which *Exportation* is prohibited.

This Act not to extend to Corn, &c. for the Sustainance of the Crews of Ships; nor to the Victualling of his Majesty's Navy; nor to Beans exported to the *British* Forts and Settlements in *Africa*; nor to Corn carried Coastwise upon Sufferance; nor to the following Quantities allowed to be exported annually, *viz.*

To Gibraltar from the Port of London of all Kinds of Corn, Flour, &c. not above	-	-	2,500 Quarters.
To Guernsey, Jersey, and Alderney, from Southampton,	-	-	9,500 Quarters.
To the Isle of Man from	{ Whitehaven, } { Liverpool, } { Kircudbright, }	-	1,000 Quarters.
		-	1,000 Quarters.
		-	500 Quarters.
To St. Helena, Bencoolen, and the Company's Settlements in the East-Indies	from Great-Britain by the East-India Company.	-	1,500 Quarters.
To the British Forts, Castles, or Factories, in Africa	By the Committee of the African Company.	Wheat-Flour	33 Tons.
		Biscuit	15 Tons.

The Quantities allowed to be sent to sundry other Places, are enumerated in Tables too long to be inserted here; and being likewise subject to the provisional Orders of the Lords of his Majesty's Privy Council, appointed for the Consideration of all Matters relating to Trade and Foreign Plantations, the Merchants and others concerned in the Exportation to the West-India Islands, &c. must be governed by Circumstances; the said Lords of the Privy Council being directed by this Act, to regulate the Proportions to be exported from different Ports to each Island respectively, every three Months; on this Account therefore, they cannot absolutely rely on the Quantities allowed to each Island as inserted in the present Tables.

Sec. 12. The Inhabitants of Guernsey, Jersey and Alderney, may transport directly from thence to Newfoundland; the Wheat, or other Grain allowed to be imported into those Islands by 9 Geo. III. C. 28.

Sec. 13. Corn, &c. may be exported to Ireland, during an Embargo on the Exportation thereof from that Kingdom.

Sec. 14. In Times of War, his Majesty in Council, when the Parliament is not sitting, may allow greater Quantities of Corn, &c. than those specified in the Tables to be exported; but the additional Quantity is not to exceed 5000 Quarters of each Kind of Grain; and 2000 Tons of the several Sorts of Ground-Corn, and Biscuit in any one Year.

Sec. 15. After November 15, 1791, the Duties on the Importation of Foreign Wheat, &c. to be regulated according to the Prices specified in the following Table, marked D.

WHEAT when the Price is under 50s. per Quarter	High Duty	24	3
— if at, or above 50s. but under 54s.	First Low Duty	2	6
— if at or above 54s.	Second Low Duty	0	6
Importation of Wheat-meal and Flour to be governed by the Price of			
Wheat as follows	High Duty per Cwt.	6	6
	First Low Duty	1	6
	Second Low Duty	1	0

N. B. Malt of all Kinds of Grain prohibited.

BARLEY, Beer or Bigg when the Price is under 25s. per Quarter	High Duty	ditto	22	0
— at or above 25s. but under 27s.	First Low Duty	ditto	1	3
— if above 27s.	Second Low Duty	ditto	0	3
Importation of Indian Corn or Maize to be governed by the Price of Barley as follows,	High Duty per Quarter	ditto	22	0
	First Low Duty	ditto	1	3
	Second Low Duty	ditto	0	3

RYE, Pease, Beans, when the Price is under 34s. per Quarter	High Duty	ditto	22	0
— if at, or above 34s. but under 37s.	First Low Duty	ditto	1	6
— at, or above 37s.	Second Low Duty	ditto	0	3
OATS, when the Price is under 17s. per Quarter	High Duty	ditto	6	7
— if at, or above 17s. but under 18s.	First Low Duty	ditto	1	0
— at, or above 18s.	Second Low Duty	ditto	0	2

A separate

A separate Table marked E. regulates the Importation from *Ireland*, provisionally, *sec.* 16. when an Act of the Parliament of that Kingdom shall permit the Importation from *Great-Britain*, under the Regulations mentioned in the said Table. It extends the Conditions of this Table likewise to Importations from *Quebeck*, or other *British* Colonies or Plantations in *North America*.

On Importation of Corn as the Growth of *Ireland*, *Quebeck*, &c. the Master of *sec.* 17. the Ship is to bring a Certificate thereof, from the Officers of the Port where it was shipped, expressing likewise the Quantity.

No Corn, &c. to be carried Coast-wise, from any Port, where the Exportation *sec.* 21. is not allowed at the Time of shipping; but may be landed or unshipped at any other Port of *Great-Britain*, from whence the same, according to the Regulations of this Act, may then be exported.

Vessels with Foreign Corn, &c. arriving at Ports of *Great-Britain*, where *sec.* 25. the high Duties are payable, or where Importation is prohibited, may depart to Ports where the same may be imported on the low Duties.

Foreign Corn may be brought directly to *Grangemouth*, in the County of *sec.* 26. 27. *Stirling*, or to *Greenock*, in the river *Clyde*, in order to be conveyed from thence respectively, by or through the Canal called the *Forth* and *Clyde* Canal Navigation, in Lighters; to any Port or Creek at which Foreign Corn, &c. may then be imported. And from *Greenock* to the East Coast of *Scotland*; as well as from *Grangemouth* to the West Coast; Corn, &c. may be transported in manner above mentioned to any Port or Creek, where the same may be then landed upon Payment of the low Duties, subject to the Regulations of this Act. The Certificates, Bonds, and Securities, required must be given within three Days after unloading the said Foreign Corn, &c. otherwise both the Corn, and the Ship, or Lighter, shall be forfeited.

The maritime Counties of *England* shall be divided into twelve Districts, See *sec.* 31. 44; and *Scotland* into four. The Exportation to be regulated in the first District, by the Prices at the Corn-Exchange at *London*. See p. 44. And the several Proprietors of the said Corn-Exchange, or the major Part of them are authorized to appoint an Inspector of the Corn returns, who is to deliver his Commission within one Week after his Appointment into the Hands of the Lord Mayor, and enter into a Bond to the Corporation of *London* with two sufficient Sureties, to be approved by the Lord Mayor, for the faithful Execution of his Office, and shall also take the Oath prescribed by this Act. An Office shall be appointed for him in some convenient Place within the Corn Exchange.

In Case the Proprietors of the Corn Exchange, upon the Death or Removal *sec.* 35. 36. of any Inspector of Corn Returns, shall neglect to appoint another within a Week; the Lord Mayor and Court of Aldermen are authorized to appoint a fit and proper Person to the said Office. And no Inspector shall be removable, but by the Lord Mayor and Court of Aldermen. In case of Sickness a Deputy Inspector may be appointed.

The Oath required to be taken by Corn Factors, See p. 43, is by this Act, *sec.* 38. changed to a simple Declaration.

The weekly Returns made by the Factors and other Dealers in Corn, &c. *sec.* 39. shall be entered by the Inspector in a Book kept for that Purpose, but they shall not be shewn to any Person whatever, without an Order in writing under the Hand and Seal of the Lord Mayor, or any two of the Aldermen; under a Penalty of Ten Pounds.

The Inspector to make up weekly Accounts of the Average Quantity and Price *sec.* 41. 42. of each Sort of *British* Corn, &c. sold in *London*, and to transmit the Average Prices every *Friday* to the Receiver of the Corn Returns appointed by this Act, who is to transmit a Certificate thereof to the Collectors of the Customs at *London*, and the Ports in *Essex*, *Kent* and *Suffex*, as the Guide for *Exportation*. And the said Inspector shall make up, and transmit the like Accounts of the Average Prices to the Receiver of the Corn Returns, who is to transmit a Certificate thereof, to the Collectors of the Customs at *London*, &c. as the Rule for *Importation*.

Inspector to deliver a Copy of the Average Prices without Delay, to the Lord *sec.* 43. 44. Mayor and Aldermen, at their next Sessions of the Peace; to be published by them

them in the *London Gazette*, once in each of the four Weeks immediately succeeding such Session. Factors to pay to the Inspector for *British Corn* brought into the *Thames* *Eastward of London Bridge*, and sold, *rd. per Lash*, and for *Foreign Corn* *zd.* and to deliver to him an Account of the Quantity, &c.

The Appointment of Inspectors, and other Regulations respecting the Weekly Returns, &c. for the other *Eleven Districts of England*, are only Repetitions of the Rules to be observed in the first District, which includes the Ports of *London, Essex, Kent and Middlesex*; it is therefore needless to insert them as they can be of no Use to the Merchants, or other Persons concerned in the Corn-Trade in general, whose Transactions will be conformable to the Regulations of the first District already given.

The Regulations for the Importation and Exportation of Corn in *Scotland*, differ not materially from those of *England*, except in the Appointment and Denominations of the Officers. The Sheriff, or Steward-depute, or Substitute, is to transmit the weekly Account of Prices, which are to be fixed by the Measures and Weights used in each County, to the Receiver of Corn Returns at *London*. Sheriffs, &c. not causing the Prices to be fixed and determined as the Act directs, shall forfeit twenty Pounds.

sect. 70, 71. When the Parliament is not sitting, if the Average Price of any Sort of Corn, &c. should be higher than that at which the same Sort of Foreign Corn may be imported at the low Duties; the King in Council may prohibit Exportation. But the Prohibition not to extend to Foreign Corn already imported and warehoused.

sect. 82. All Corn shall be measured and computed by the *Winchester Bushel*; and a *Quarter* shall be deemed to consist of *Eight* of such Bushels. The Mayor or chief Officer of every City or Town in each District from which Corn Returns are directed to be made by this Act, and the Sheriffs in the respective Districts of *Scotland*, shall cause a Standard *Winchester Bushel* to be provided and kept in each City and Town, and the Measures commonly used in any City or Town, and differing in Quantity from it, shall be compared and computed by the Standard *Winchester Bushel*, the only Measure to be deemed legal.

When Corn is sold by Weight, *Fifty-seven Pounds Averdupoise of Wheat* shall be deemed equal to a *Winchester Bushel*, and all Computations by Measure for the Purposes of this Act, are to be made by the *stricken* and not by the *heaped* Bushel. *Fifty-five Pounds Avoirdupoise of Rye* shall be deemed equal to every such Bushel of Rye. *Forty-nine Pounds of Barley*, and *Forty-two Pounds of Beer or Bigg*, shall be deemed equal to every such Bushel of Barley, Beer or Bigg. *Thirty-eight Pounds of Oats* shall be deemed equal to every such Bushel of Oats. *Fifty-six Pounds Averdupoise of Wheat-meal*, and *Forty-five Pounds of Wheat Flour*, shall be deemed equal to every *Winchester Bushel* of unground Wheat. *Fifty-three Pounds of Rye-meal* shall be deemed equal to every such Bushel of unground Rye. *Forty-eight Pounds of Barley-meal* shall be deemed equal to every such Bushel of unground Barley. *Forty-one Pounds of Beer or Bigg-meal* shall be deemed equal to every such Bushel of unground Beer or Bigg. *Twenty-two Pounds of Oat-meal* shall be deemed equal to every such Bushel of unground Oats. The Quantity of ground Corn in Sacks to be determined by weighing two Sacks out of Twenty.

The other Regulations of this Act regard the Collecting of the Duties, Payment of Bounties, passing Accounts between the Custom-houses and the Treasury, &c. &c. none of which convey mercantile Information. We shall therefore close this important Article with an Observation which may afford great Comfort to the numerous Inhabitants of the very populous and daily increasing City of *London*. It appears to the Editor, that the wise Measures taken by the Legislature in this Act, are admirably calculated to prevent any great Advance in the Price of that necessary Part of our Food *Bread*; unless a real Dearth, which God in his Mercy forbid! should at any future Time, afflict not only this, but most of the Corn Countries of *Europe*, at one, and the same Period.

## TO BILLS OF EXCHANGE.

This great Cause; the final Decision of which was most anxiously waited for by all Persons concerned in the Negotiation of Bills of Exchange, is stated at large from Page 466 to 470, where it is noticed as being referred on certain Points of Law to the twelve Judges. They accordingly delivered their Opinions in the House of Lords on Friday Feb. 11th, 1791, after which their Lordships were pleased to affirm, the Law Term, for confirming the Judgement given by the Court of King's-Bench.

A Reference to the seven special Counts stated in the Declaration on the Bill, See p. 466, and to the Points proposed to the Judges for their Opinion, p. 470, renders any Repetition in this Place, totally unnecessary. But a very concise Statement of the Case, as it affected *Gibson* and *Jobnson*, is requisite, to render the final Decision, and its Consequences to the mercantile World still more explicit.

*Livezey* and *Hargrave*, Copartners, living at *Manchester*, drew a Bill of Exchange upon *Gibson* and *Jobnson* of *London*, payable to *John White* or order, when in Fact the Drawers knew no such Person; and this fictitious Name they indorsed on the Bill, to make it negociable, their own Credit being on the Decline; in this State it came into the Hands of *Minet* and *Fector*, and was sent to *Gibson* and *Jobnson* in the usual Manner for Acceptance: they did accept it, but when it became due refused Payment. *Minet* and *Fector* then brought an Action against them, which was tried, and the Jury found a general Verdict for the Plaintiffs upon the Ground of the fifth Count, which considered it as a Bill payable to Bearer. Against this Decision the Plaintiffs in Error, appealed to the House of Lords.

The Judges were unanimously of Opinion, that there was no Ground to charge the Drawers, who were likewise the Indorsers of the fictitious Name *John White*, with Forgery, or even intentional Fraud; a Point which had been strongly insisted upon, in Order to annul the Bill, and thereby set aside the Verdict. On the second Article, whether the Court had a Right to consider the Bill as payable to Bearer, a great Difference of Opinion took Place; and six of the Judges delivered their Sentiments that the Bill might be deemed in Law, a Bill payable to Bearer: viz. The Lords *Kenyon* and *Loughborough*, Justice *Gould*, and the Barons *Hotbam*, *Thompson* and *Perryn*. The Lord Chancellor, The Chief Baron *Eyre*, and Mr. Justice *Heath*, were of Opinion that the Judgement of the Court of King's-Bench could not be supported on any of the Counts; and the Chief Baron very forcibly inveighed against the Consequences of converting Bills payable to Order into Bills payable to Bearer; for he justly observed, that the Practice of supporting Credit by the Kind of Bill in Question was of so alarming a Nature as to require an immediate Interference; and he expressed his Apprehension that affirming the Decision of the Court of King's-Bench would increase the Evil, instead of checking it, and deeply injure the Interests of Commerce, which depended on the Support of fair, and the Discouragement of false Credit.

The Lord Chancellor could not divest his Mind of the Idea of Fraud in the Transaction. The Reason for making the Bill payable to the Order of *John White*, was to give it a greater Degree of Credit, and a more extensive Circulation. It was to give Countenance to a Thing that was unreal, which in his Opinion must be deemed a Fraud.

His Lordship forewarned the Judges in the Court of King's-Bench, that the very next Case which came before them would oblige them to decide, whether the putting the Name of *John White*, or any other fictitious Name, on a Bill of Exchange, was not a Forgery within the Statute. He wished it had been stated, and he thought the Judges who were of Opinion that there was neither Forgery nor Fraud in the Transaction, had confined themselves too closely to the special Verdict. It must be decided said his Lordship, whether those who call themselves Merchants shall be permitted to put fictitious Names, or the Names of any other Persons, not their own, on Bills, and write those Names themselves. It is a Question, My Lords, which demands a Solution—how far such an Instru-

Feb. 1791.

ment as this, is or is not to be considered as having been made for the Purpose of obtaining Money under false Pretences.

His Lordship pathetically lamented the Hardships of the Case with Respect to the Holders of the Bill, *who had paid a valuable Consideration for it, having dis-counted it*; but he thought the Criminality of the Act ought to have prevented Holders of it from maintaining an Action upon it.

With Respect to the Question, whether this was a Bill payable *to Bearer*; his Lordship differed totally from those learned Judges who said it ought to be so considered; and he very properly asked, at what Period of Time it became a Bill payable to Bearer, since it was originally drawn payable to Order, and the Holders had taken it as such—did the Change take Place before or after it was accepted; this ought to be determined—for as a Measure of general Policy, it was of extreme Importance, that Transactions of this Kind should be stopped. Fictions on Bills would be the constant Course, if their Lordships made such Bills payable to Bearer.

The Custom of Merchants was pleaded in vain, by Lord *Loughborough*; for it by no Means applies to the present Case, and the Lord Chief Baron was perfectly right in saying that no such Regulation was to be found in any of our Books: As to the Custom of Brokers who are Agents for foreign Merchants residing at a vast Distance from this Country, to prevent sending back a *foreign Bill of Exchange*, which might be highly prejudicial to the Merchant here, it is a Case widely different; here is no Intention to raise Money by a fictitious Credit, and if such a foreign Bill were found by a Stranger without any Indorsement, it would be no better to him than waste Paper.

But the Editor, with great Deference to the Opinion of the learned Judge, is extremely apprehensive that the final Decision, which in his humble Opinion seems to have followed the general Rule of Parliament, in adhering to the Opinion of the Majority—he means, *the Majority of the Judges*, has established a Precedent, which will facilitate the raising of artificial Capitals for opening new Country Banks, in almost every Market Town in *Great-Britain*; and will increase the Fabrication of Accommodation-Bills, for the Purpose of supporting rotten Credit, to the great Injury of fair commercial Credit, which ought to be protected and secured by the Laws of the Land, against all Attempts to undermine it by the Circulation of fraudulent Paper.

*Miles and  
others v. Miles  
or K. B. Term  
1791.*

In this Case, an Alteration of the Date of a Bill had been made after Acceptance; and it was decided, that any Alteration of the Date of a Bill of Exchange after Acceptance, whereby the Payment would be accelerated, avoids the Instrument, and no Action can be afterwards brought upon it, even by an innocent Holder for a valuable Consideration given by him for it. On this Occasion Lord *Kennyon* and Judge *Buller* in their Arguments, quoted *Beaves' Lex Mercatoria* as an unquestionable Authority. See p. 429.

#### TO BANKRUPTCY.

*Special Cases of Debts that cannot be proved under the Commission. See page 566.*

*Ex parte SMITH, in the Matter of LEWIS and POTTER.*

*In Chancery  
Sitt. before  
Mab. Term  
1789.*

This Petition prayed that a Debt proved by Sir *James Esdaile* and Co. under the Commission against *Lewis* and *Potter*, on certain Notes and Bills, which had been indorsed by the Bankrupts, might be expunged, on Account of the Holders' having, since the Proof of the Debt, discharged the Acceptors of the Bill, and Drawers of the Notes, without Notice to the Indorsers, or their Assignees. The first Note which was included in the Prayer of this Petition, was a Promissory Note made by *Barber* to *Powell*, and indorsed by *Powell* to *Lewis* and *Potter*, who, having Occasion to discount it, indorsed it to *Esdaile* and Co. *Lewis* and *Potter* became Bankrupts before the Note became due. The Note not being honoured when it fell due, Sir *James Esdaile* and Co. proved the Amount in *June* 1788, under

the Commission against *Lewis and Potter*, after which they proceeded at Law against *Barber and Pessell*, to Judgement, and then, there having been a Proposition on the Part of *Barber* to pay 15s. in the Pound, to all his Creditors, in full Discharge of their Debts, *Ejlsale and Co.* accepted the same, and gave a full Discharge to *Barber* for the Amount of this Note, without the Consent and Priority of the Assignees of *Lewis and Potter*.

Against the Petition, it was argued, that the Rule, which prevailed where the Drawer or Indorser were Solvent, could not prevail where the Indorser was a Bankrupt; the Meaning of that Rule, which requires immediate Notice to be given to the Drawer, was, that the Drawer, upon taking up the Bill, might recover from the Acceptor, the Amount of those Effects, supposed to be in his Hands, in Respect to which the Bill was drawn; and so, in the Case of a Promissory Note, where the Drawer did not pay at the Time, Notice was required to be given to the Indorser, in Order that he may take it up, and recover over against the Drawer; and the Consequence is, that if the Holder of the Note or Bill, instead of giving Notice to the Drawer or Indorser, will compound with the Acceptor of the Bill, or the Drawer of the Note, and discharge him in Respect thereof, he precludes the Drawer or Indorser from this Advantage; and therefore shall not afterwards call upon them for Payment. But where the Indorser is a Bankrupt, as in the present Case, such Notice cannot be necessary, nor can it be necessary to have the Consent of the Assignees to accept a Composition, when it appears to be a *bonâ fide* Transaction; for the Indorser being a Bankrupt, it is impossible he should take up the Note himself, which is the only Reason of the Notice being necessary. It would be a very unreasonable Rule, which required the Holder of a Bill or Note to accept, at his Peril, a fair Composition from the Acceptor, which was the best that his Circumstances would allow, and which was made upon a full Investigation of his Affairs—that if any Fraud appeared in the particular Transaction, and that, in Fact, the Composition taken, was not the best Bargain that the Holder could make, this would be an Answer in the Particular Case; but that the general Rule, as between Solvent Persons, ought not to apply generally, where the Party to whom Notice was expected to be given was a Bankrupt.

LORD CHANCELLOR THURLOW, I have before decided that the Doctrine of Notice, which holds amongst Solvent Persons, does not apply as between Bankrupt Estates; but, here, the Indorser only was Bankrupt, the Maker and the Payer of the Note were not. The Debt proved by Sir *James Esdaile* was undoubtedly well proved at the Time, and the Question is, whether the subsequent Conduct of the Creditor has destroyed that Interest which he acquired by such Proof. By the Composition he has made with the Drawer of the Note, which goes to the Length of discharging of the Drawer, he, certainly, has prevented the Assignees of the Indorser from coming on the Drawer of the Note for Payment of what his Estates shall pay in Consequence of the Proof; and yet, on the other Hand, it does seem a strong Thing to say that, where there are many Names on a Bill, one of whom is Insolvent, though not Bankrupt, and the other Bankrupt, and the Holder proves under all the Commissions, and then makes a Composition *bonâ fide* with the Insolvent Person, and obtains from him all that he possibly can; that he shall thereby be deprived of the Benefit of all the Provision made by him under the Commissions against the other Parties who stood on the Bill posterior to the Party compounded with. And I am well satisfied, in this Case, Sir *James Esdaile* did, in Fact, make the best Terms he could with the Drawer of the Note, by taking 15s. in the Pound of him in full. And whatever Difficulty I may find in making a Precedent which allowed of such a Composition, without giving Notice to the Assignees of the Indorser, I am convinced that the Justice of this Case, if it stood alone, would not require me to expunge this Debt. The Case made, does not impute any Fraud to the Transaction of this Composition; but, on the contrary, the Holders used all their Diligence at Law against the Drawer of the Note and the Payer, and then made the best Terms they could with the Drawer; though at the same Time, they have gone to the Extent of acquitting him altogether in Respect of the Note. However, whatever may be the Circumstances of the present Case, I think, in Point of Precedent, it may be dangerous to say,  
that

that, after such an Acquittal, the Holder may resort to the Indorser's Estate. It is certainly open to this Sort of Fraud, that when the Holder sees that in one Way or the other, he is sure of his 20s. in the Pound, he may favour an Acceptor, at the Expence of the Indorser; by compounding with the Acceptor for just so much as he conceives will be the Deficiency under the Indorser's Commission. In this View, it may be a dangerous Precedent; and I cure this Danger, by saying generally, that the Holder of the Paper shall not compound with the prior Names on the Bill, but with the Consent of the Assignees of the posterior Party. And it is not an Answer to say, that if any Fraud is practised in the Composition, that shall take it out of the general Rule. It is much better, and more convenient in Practice, to have a precise Rule to go by; and Justice will, in general, be better done to all Parties. It is not that Notice is strictly necessary, but I go upon this; the Debt is well proved against the Indorser's Estate; this gives his Assignees a Right of Action against the Acceptor or Drawer, for the Amount paid out of the Indorser's Estate; but this Right is cut away by the Composition and Discharge given to the Acceptor by the Holder. Therefore, it is better to say, let the Assignees either take the whole, or permit the Holder to make the most of it he can against the Acceptor. I think therefore, the Debt must be expunged.

A few Days afterwards, this Cause was mentioned again; when his Lordship said, he had considered it a good Deal, and had conversed on the Subject with some of the Judges; and he was satisfied that the Holders must get the Consent of the Assignees of the Indorser, before they can discharge the Acceptor without discharging the Indorser's Estate at the same Time. *Reports of Cases argued and determined in the Court of Chancery.* By William Brown, Esq; of the Temple. Vol. II. 1789.

*Ex parte* HARRISON, in the Matter of LEWES and POTTER.

This Case arose on an Engagement, by *Lewis* and *Potter* to warrant the Payment of the Bill of Exchange in Question in like Manner as if they had indorsed it. This Engagement was in writing, but the Bill did not become due till after the Bankruptcy of *Lewis* and *Potter*.

*Lord Chancellor* said, certainly, a Party may warrant the Payment of a Bill of Exchange, by other Means than by endorsing it; but in Order to enable the Holder to prove his Debt under the Statute of *Rebate 7 Geo. 1.* he must make himself a Creditor by Endorsement: There is no Debt proveable under the Provision of that Statute, but what arises upon the Face of the Instrument.

Therefore refused to order proof of the Debt.

*Ibid.* Vol. II.

This Cause came to a hearing on the Prayer of the Petition to the Lord Chancellor, that the Right of the Petitioners to the Ship therein mentioned, and the Money arising therefrom, might be declared and established to them.

The Case was briefly this—A Mortgage of the Ship *Nautilus* was made when she was in the Port of *Dublin*, and a Delivery of the Munitions: The Mortgagee insured her there, and made a second Mortgage; the second Mortgagee took Possession, as soon as he was informed she was in an *English* Port: This is a sufficient Possession to take it out of the Statute of 21 Jac. C. 19. See *Bankruptcy*, Page 536.

*Goob* and *Cotton*, original Owners of the said Ship, being indebted in the Course of Trade to *Lindegreen* and Co. in certain Sums of Money, mortgaged, or assigned her over, by Deed, dated *August 20th, 1783*; and by another Deed or Indenture of Lease and Release, bearing Date 17th and 18th of *September, 1783*, a second Mortgage or Assignment for the same Cause was made by *Lindegreen* and Co. to the Petitioners. The Ship remained at *Dublin* until the 14th of *September*, when she sailed for *Cadiz*. In the following Month, both the first and second Mortgagees became Bankrupts: The simple Questions therefore were; whether the Assignees of *Lindegreen* and Co. had a Right to the said Ship, her Munitions, &c. not having taken Possession of her in the Port of *Dublin*, though she remained there a sufficient Time for that Purpose; and whether the Possession taken by the Petitioners, of the said Ship as soon as she arrived in a Port of *Great-Britain* from her Voyage, was not such a Possession as deprived the Assignees of *Lindegreen* and Co. of all Right whatever to the said Ship, or to the Recovery of the Money arising therefrom.

The Arguments of Mr. *Mansfield* and Mr. *Cooke*, on the Part of the Petitioners; and of the Solicitor General and Mr. *Campbell* on the Part of the Assignees, are given at large in *Brown's Reports*, Vol. III.

The former contended that the Possession taken by the Petitioners, on the Return of the Ship to *Great-Britain*, was such a Possession as took it out of the before-cited Statute.

The latter, that Possession should have been taken before the Ship left *Dublin*; and in Default thereof, they insisted that the Property remained vested in the Assignees of *Lindgreen* and Co.

THE LORD CHANCELLOR said; if the Ship had been chartered from *Dublin* to *Cadix*, with Liberty to touch at a Port in *England*, has it ever been held that the Mortgagee was obliged to give Notice. If there had been a new Voyage commenced under the Authority of *Goob* and *Cotton*, that would have made the Case different; but here the Insurance was for a Voyage beginning from *Dublin*, where the Ship was chartered, and the Voyage begun, it would be difficult to take Possession. A Notice to the Captain would be to stop the Voyage.

His Lordship, therefore, granted the Prayer of the Petition.

*Brown's Rep.* Vol. III.
