## Lament for Willie.

In vain, in vain this barning tear, It brings not back our Willie dear In vain we search the vacant chair, Our dearest Willie sits not there :

In vain we listen for his voice That made our very hearts rejoice In vain we wait his cheering smile.
That could our deepest grief beguile.

He died not in the summer time, When fields and flowers were in their prin But in November's sullen gloom, Our darling found an early tomb.

And we had hoped, in coming years, He would have soothed our grief and fea That he would cheer us at the last, When sinking 'neath death's chilling

But now our earthly hope is gone, And we through life must trudge alone Strangers alike to love and joy, While wanting thee, our dearest boy! The fairest flowers are first to fade, And moulder in death's silent shade ; And all too soon thy youthful form Has beut beneath the scowling storm.

Too good, too fair to tarry here, Thy soul has sought a higher sphere; And we will wait in faith the prayer, Until we meet thee, Willie, there

CARLETON PLACE. Wednesday, Jan. 27th, 1864.

There has been a dead calm in politics for several months past, with nothing at all stirring to excite a ruffle on the surface. --The election contest in South Leeds, however, has relieved the monotony of affairs, for the pecuniary benefit of the lucky editor and a more than usual amount of excite- who is to succeed us in supplying news to ment is felt as to the result. It is very the assembled wisdom of Brudenell, that all gravely stated by those who are in a position well informed persons, whether clerks of to know what is going on in that county Townships or not, when writing to editors that some of the opposition members of the either on their own business or that of the House have been very liberal in supplying corporation, make it an invariable rule to funds to carry on the contest and buy up pay the postage on their letters. any votes that may be for sale: and that narties are now in the county saying "Money" to the people. This fact, of itself should be enough to cause every honest man in the county to shun the ranks of the party who resort to such means to secure an election. We need never expect to have the government of the country honestly administered, so long as gentlemen secure seats in

There is another curious feature in this election. It is well known that South Leeds contains a large number of Orange men and Catholics, and this has suggested the idea of John A. Macdonald and D. Arcy McGee, going hand in hand through the county to try and make things pleasant to both parties; and are leaving no means un tried, fair and unfair, to secure the election

Parliament by money or other outside in

We trust the friends of hopest govern ment will show themselves worthy of the cause they have espoused and return Mr. Richards again with a handsome majority. The electors of South Leeds, must, surely, be better informed than to listen to th teachings of any member of the old coalition government whose extravagant and corrun policy in the management of public affairs had well nigh ruined the country. The polling will come off on Wednesday and Thursday, the 27th and 28th instant.

The Quebec Tribune furnishes the figures of the following instructive contrast. The Governor-General occupies two houses in St. Louis Street, and this was what they cost under the late Government :-

As the twilight shades of evening were closing in, I found myself in company with others making for the church. The evening was fine, mild, but not serenc; a few scat-tered flakes of snew spottfully playing in the breeze, one taking a zigzag course, then, as if chasing another would drop carelessly on the fair bosom of mother earth, causing the sleigh to glide more smoothly over its crested surface. On arriving at the Church it was brilliantly lit with petroleum, and every indication of life and activity. After paying the admittance fee to the keeper of the loor, a man of rather gentlemanly deportment, I was admitted to the interior of the building. ### Gold on the Bow River. The Nor'-Wester brings us a circumstan-

tial account of the discovery of gold in large quanties on this side of the Rocky Mounins, within British territory,
A party of American miners, it would

appear had crossed the mountains from British Columbia, and had discovered diggings on Bow River which paid \$25 per day to the hand. They then proceeded to Fort Benton, an American station on the Upper Missouri, and had fitted out an expedition to take possession of the new Ophir. They were on their return thither when they were met by a hunting party which brought the news to Red River.

Bow River is one of the upper tributaries of the South branch of the Saskatchewan. It is situated in the immediate neighborhood of what we believe to be one of the finest countries in America, well watered and wooded, and with a fertile soil a mild and healthy climate. This territory, situated not very far from the boundary line, will be a strong source of attraction for the Americans. It is much to be regretted that it should not first be occupied by British subjects and British law extend over it. There is no reason to hope that either one thing or the other will be done. By the supineness of the Imperial authorities, and the machinations of the Hudson's Bay Company seem to be even more philo-American than their prodecessors for they are aiding a Minnesota Company to build a railroad designed to give American access to the territory before Canada can get her route opened. Horrible Occurrence.

On Monday morning a lunatic abtually clove in the skull of a man about seventy years old, named McGrath, in the Belfast Police-office with a large iron instrument. About eleven o'clock on Sunday night, William McGarrigle, an emaciated young man, a laborer, aged about twenty years, was brought to the police-office, charged with having assaulted his brother, at their house, Ewart's row, Crumblin road, and with being a dangerous lunatic. The accused was handcuffed and put into a cell. About twelve o'clock he either took ill or feigned illness, and complained that he was dying was allowed to sit at the fire, which is only a foot or two from the wooden bed, and i guarded with iron grating. He was dosing about half-past one o'clock. War Against the Clouds The present season has witnessed the troduction of a novel and eccentric fashion among the ladies. In place of exposing their pretty features, as our Quebec girls may slways do without fear of disparangement, they have given way to the inexorable laws of fushion, hiding their faces with a 'nubia" or "cloud," while out in their shopoing tour. On Saturday afternoon half a ozen wags belonging to one of the regi ments stationed in this city made their ap earance in Fabrique and St. John streets n a sleigh drawn by four spanking bays. and driven by the "Dr.," who handled the ibbons with consummate skill. Each of he bucks were a "cloud" of varied colors and reclined in their seat with the most effeminate neglige. The suddeuness and novelty of the turn-out took the ladies by surprise. Some stood petrified with astonishment and indignation; some simpered and laughed; while others ran into the nearest store and quickly divested them-selves of their new-fangled ornament. The sterner sex enjoyed the joke richly, while those apparently indifferent to the cause of this little commotion among the fair ones were the parties who created it. The 'clouds' have broken and disar peared, and the sweet bright smiling faces of Quebec's

He was born on the 3rd of January, 1775, and tive Peer, and also a Baron of the United Kingdom; a Knight of St. Patrick, a member of the Privy Council of Irelrand, and Lord Lieutenant of the County of Tyrone. He is succeeded in his Irish honors by Col onel James Molyneux Caulfeild, Lieutenant and Custes Rotulorum of the County of Armagh, married in 1856 to Elizabeth, daughter of Sir William Somervile, Bart. (now Lord Athlumney) by Lady Maria Conyngham deceased in 1843. The Earl just deceased was the last of the original twenty-eight representative peers of Ireland selected at the time of the Union. He had also sat in the Irish House of Commons, of which, with Sir Thomas Staples, he was also the only surviving member. Ireland has lost in Lord Charlemont an excellent resident landlord, and a nobleman who constantly supported the best interests and was

The prisoner had been for some time paying his addresses to the girl, and at the time of her death she was between six and seven months advanced in pregnancy. On the morning of the 7th inst., she went to her room, taking with her a pint of highwines, which, it is said, had been furnished to her by Butler. The prisoner, it is further said, was sometime with her in the room. When the room was visited a few hours later, the door was found locked. Suspicion being excited that all was not right, the door was burst open, and the unfortunate girl was found a corpse on her bed, having evidently been dead for some time. The supposition is that she had drank the highwines at the instigation of the prisoner, and that they contained some poison. A Coroner's inquest was held on the body, and resulted in a verdies of "death from natural causes." The verdict not being satisfactory to the father of the result of the analysis is not yet known.

Chilian Account of the

Secrifice.
From El Mercurio, Valparaiso.
The 8th of December was a great trius for the clergy of the Church of the Jes in Santiago. An enthusiastic audience filled every nock. There were hardly any men there, 3,000 women, comprising the flower of the beauty and faction of the capital, were at the feet of the ecclesiastics, very many against the will of fathers and in a Hall of Fire. But the performance had not yet begun when the crescent of fire at the foot of the gigantic image of the Virgin over the high altar overflowed, and climbing up the mashin draperies and pasteboard devices to the wooden roof, rolled a torrent of flame. The suddenness of the fire was awful. The dense mass of women frightened out of their senses—numbers fainting, and all entangled by their long swelling dresses—rushed as those who knew death was at their heels, to the ene door, which soon became choked up. Fire was everywhere. Streaming along the wooden of the church was one of panic-stricken hore.

heroic acts of sublime daring have not been wanting. Endearing gratitude has been excited in every Chilian heart by Mr. Nelson, the Minister of the United States, his countryman, Mr. Meiggs, and several other foreigners. There were generous men who defied the fury of the flames to save who defined the fury of the flames to save lives, and some of these died martyrs to their noble hearts. An Englishman to rush through the flames, to seize in his powerful arms a lady, stride with her a little twash operful arms a lady, stride with her a lattice way, and then, his hair in a blaze and choked with smoke, fall back into the canon never to rise again. A young lady of the name of Solar, just before the smoke suffocated her, had the presence of mind to knot her handkerchief round her leg, so that her corps might be presence of mind to knot her handkerchief round her leg, so that her corps might be recognized.

Now fancy such a church, with such ta-

daughters, there dwells an idea of right—something from God, that priests have not something from God, that priests have not succeeded in poisoning, have been in earnest, and the Government has had to follow and yield to pressure. The decree has gone forth, and not one stone of that accursed thurch shall be left on another.

The contempt and horror of these priests increase with their insolence and inhumanity. They preach that the irreparable loss of so many of the fairest and most virtuous of Chill's virgins and matrons is a special of Chill's virgins and matrons is a special of the church, in which there can be no question they were outpably imprudent. Again, they are charged with acts and words of heartlessness that one would prefer not believe if the assertions were not so openly made by those who were confusion to get in. So the principal door was soon obstructed by a solid wall of human bdies unable to move or to extricate ing was increased by the freezy of those who, busy in getting out old mattings and leathern chairs, while two thousand souls were in the agony of death?

GAS IN RAILWAY CARRIAGES --- O Monday afternoon, the 4.10 train from Dundee to Perth was brilliantly lighted up with gas. There were a first, a second and two third class carriages, and in the first there were three jets—one in each compartment; in the second two; and two in each of the thirds. The apparatus used is Newall's patent—the carriages being fitted along the top with pipes, which are connected with each other by vulcanised India-rub ber tubes previous to the starting of the trains. The tubes atop of the carriages are fixtures, the jet pipes being let in to the position of the old lamps, and the glass globes enlarged, to obviate the effect of the extra heat. A CLEAR CASE.—Newspaper people are proverbially temperate as well as virtuous. We believe one of the eraft did get slightly tight a few days ago, and the following is a sample of his paper the next day:—"Yesterday morning, at four o'clock, p. m., a small man named Jones or Smith, with a heel in the hole of his trowsers, committed arsenie by swallowing a dose of suicide. The verdict of the inquest returned a jury that the deceased came to the fact in secondance with his death. He left a child and six small wives to lament the end of his six small wives to lament the end of his unfortunate loss. Is death we are in the Stands, &c.

held to be an austere convert to the cause.
On one of these visits John Matthew was thus complimented by his il ustrious brother: "My dear John, really I must complimented by his il ustrious brothers aw you looking better; your complexion is clear and healthy, and your color is so youthful. Why, John, I could not have a better proof than yourself of the virtues of temperance. You have got a new lease of life. It is well known by your appearance that you drink nothing but water." John made some modest remark about his brother's kindness, but did not seem inclined to prolong the conversation as to his own ther's kindness, but did not seem inclined to prolong the conversation as to his own merits as an abstainer, and turned as soon as he could to the weather and the state of the crops. "How good of John," Father Mathew thought, "to give up his little indulgence to please me." Amiable delusion!

May be did not seem inclined other by a key. Three or fo ir persons only, among whom was Shaw, were acquainted with this fact, but the key was never entrusted to any of them. On Tuesday the Duke of Brunswick, on leaving home for the afternoon, informed Shaw that he expected a jeweller to come the following morning to mount some of the diamonds in the dulgence to please me." Aniable delusion! Now, if there was a man in all Tipperary who h d a conscientious respect for whisky punch, "of course in reason," John Mathew was that man. The Steek consists to apply the clisic out. to the fiercest attack of the gout. Not finding it convenient to apply the elixir outwardly, he persistently applied it inwardly, but "in moderation." The priest invariably retired at an early hour, and silence soon after reigned in the house; and then John, the austere teetotaller, who had never taken the pledge, and who was determined never, "with the cleasing of the Lord," to do so if he could help it, quietly indemnified himself for his forced abstemiousness at and after dinner. The polished brass kettle was placed upon the table, with the decenter the glasses, he sugar, and the lemon; and that a robbery had been committed, the the glasses, he sugar, and the lemon; and ed that a robbery had been committed, the John mixed his tumbler, drank the priest's Duke descended to his bed-room on the first health, wished the whole world as happy as himself, and enjoyed his punch perhaps with all appeared but Shaw.
