CENTRAL GARAGE

THE QUESTION OF DEPRECIATION

YOU cannot afford to overlook the question of depreciation when buying a car, because the time will come when you will either sell the car you have bought or turn it on a new car. The loss you will have to take will depend on your choice now.

Ask the owner of any car purchased within the last 15 months, at a price varying from \$2,000 to \$4,000, what loss he would have to take on a resale. The amount will surprise you!

The more expensive the car the more the owner stands to lose. Excessive cost of upkeep kills the demand for a used car of this class.

Grand Trunk car ferries are being equipped as oil burners in an attempt to lessen the smoke nuisance on the water front at Windsor.

G. Dickson, Manager, Glencoe

"Use the Bell to Sell"

Have a Big Store in a Small Town

THERE are such stores, that hold the trade for miles around, some of them built up without largely increasing capital.

The merchant buys small standardized stocks of the very best sellers, the same styles that are being shown in the big cities. He is particular to get the styles that are advertised, that his customers will look for. If it is wearing apparel, he probably does not carry the very small or very large sizes, preferring those for which there will be most demand.

When well displayed, an advertisement in the local paper starts them selling. The merchant looks upon the manufacturer or jobber as his warehouse. Once a week, or oftener, he checks up what new stock or odd sizes he needs, and orders them by Long Distance.

Shipment is often made the same day by express, parcel post, or freight. Quick delivery becomes possible. Customers are enthusiastic to find they can buy what they want in their home town. Reputation grows rapidly, and the yearly turnover increases notably.

By designating an experienced employee to handle out-of-town messages, their customers' calls are made at the low Station-to-Station rates.

DISTRICT AND GENERAL

Geo. Woods of Florence has purchased the grocery business of Bruce Stratton in Dresden.

Canada's population is given at 8,769,489 by the 1921 census—an increase of 1,562,846 in ten years.

A New York man has been arrested on the charge of breaking into and robbing the same store 100 times.

Henry Smart of Norwich has purchased Mrs. Penfold's furniture and undertaking business in Oil Springs. The marriage of Miss Roxie Lethbridge to Fred Freele, both of Stratford, took place in London on Feb. 27.

The managers of the U. F. O. store in Forest have established a rest room in connection with their store.

Mrs. Gough, wife of Thos. Gough, Stratford, died last week at the residence of her daughter, Mrs. A. B. Barrett, St. Thomas.

Grand Trunk car ferries are being equipped as oil burners in an attempt to lessen the smoke nuisance on the water front at Windsor.

Nebraska Supreme Court upheld the conviction of a school teacher who was fined \$25 for teaching German in his school, contrary to state law.

A well-known and highly-esteemed resident of Dunwich passed away on Feb. 26th, in the person of Stephen Gilroy, who had reached the age of 78 years.

The marriage of Norman L. Haviland of West Lorne and Miss Sadie Avey of Rodney took place at the Church of Christ parsonage in St. Thomas on Feb. 23rd.

A. E. Baker of Ridgeway received a message the other day that his son, Morrison Baker of Los Angeles, had come in contact with a live wire and had been electrocuted.

While cutting wood with a circular saw at Campbellton, Arch McDonald of Dunwich had one of his fingers nearly severed when his hand came in contact with the saw.

The friends of Miss Sophia Gee gathered at her home in Euphemia prior to her marriage recently and showered her in a manner that showed the esteem in which she is held.

William Dundas, who resides near Thamesford, and whose barn was recently burned, was visited upon by his neighbors and presented with a purse of \$500 as an expression of sympathy.

The death occurred at Detroit of John Zoller, a former resident of West Lorne. Mrs. J. R. Skinner and Miss Mary Zoller of West Lorne are sisters and J. Zoller of Crinan is a brother.

The House of Commons following resolution will consist of 245 members, according to the census figures just published. This will be an increase of ten members over the present representation.

An outbreak of spinal meningitis in horses has been reported in some sections of North Dorchester township, in Middlesex. The disease is said to be due to ensilage which the farmers have been feeding.

Farmers in Sombra are having their cattle vaccinated against "black leg" which is very prevalent, one farmer losing three of his herd. It is said the disease is caused by a germ in the dried-up grass of the pasture fields.

The Bishop of Huron has appointed Rev. T. H. Innes of St. Thomas church, Dover township, as rector of St. Peter's church, Tyroneville, to succeed Rev. C. H. P. Owen, who goes to Trinity church, Brantford.

Retail clothes, gathered in Hamilton, unanimously decided that newspapers were the most effective mediums for advertising. Their opinion was based on the experience that the proof of the pudding is in the eating.

Miss N. Archer, principal of the continuation school, Tilbury, who was removed to her home in Newbury a week ago, following a fortnight's serious illness from pleurisy, has been advised by her medical adviser to take an indefinite vacation.

Mrs. Mary Pomeroy, widow of Rev. J. G. Pomeroy, died at her home in Toronto last week. She was 88 years of age. Her husband died about three years ago. Mr. and Mrs. Pomeroy will be remembered in many Western Ontario places, where the former had charge of Methodist circuits.

Thrown into a chair, bound to it, rendered unconscious by a blow of the fist on the side of the head, and threatened with a gun held in the hand of a masked bandit, was the experience that occurred to Mrs. Andrew Brown, 398 Adelaide street, London, about 4 o'clock Thursday afternoon, when her home was ransacked by a robber. He finally made off after securing \$15.

The report is again current that the Wabash Railway Company is contemplating the erection of locomotive repair shops at St. Thomas at a cost of approximately \$500,000, in order to take care of their greatly increased Canadian business and to provide for the further increase that is anticipated when the proposed international bridge is completed between Windsor and Detroit.

Criticism of the Drury Government by Hon. George S. Henry (Conservative, York East), particularly directed at the good roads policy, and a defense of the administration by J. G. Lethbridge (U. F. O., Middlesex West), who argued the appointment of a minister of power, featured the continuation of the debate on the reply to the speech from the throne in the Legislature Tuesday of last week.

FOUND DEAD IN AUTOMOBILE

Inquest Ordered at Glencoe in Death of London Man

Scarcely a day has passed since the death of a man in an automobile was reported at Glencoe on Tuesday morning when two men in an automobile drove up to the undertaking rooms of Gough & Son with the dead body of a third man in the back seat of the car.

The body was that of Charles Frederick Rolph, a London man, and when his death was caused by several drinks of cider, or which it was said he had partaken, or was due to other causes, is now being investigated by the authorities.

Rolph died while being driven to Bothwell in a companion's motor car early Tuesday morning, and in the informal investigation held by Dr. Woods of Mount Brydges it was learned that the dead man and his companion had been drinking cider in London shortly before they started on their drive.

The two men who were with Rolph were Frank Newn and Edward Maloney. It was said they had been drinking cider at the home of a man named Riley, on William street, London, and about 2 a. m. started for Bothwell in Wm. Atkinson's car. Rolph was apparently asleep in the rear seat of the car when he did not respond to their efforts to waken him they drove to Dr. Glenn of Wardsville, who after examination said Rolph had been dead for some time. The body is still at Gough's undertaking rooms at Glencoe. Dr. Woods empanelled a jury which viewed the remains. The inquest was then adjourned until Thursday afternoon at 2 o'clock, when it will be held in the town hall here. In the meantime Dr. Glenn of Wardsville and Dr. McIntyre of Glencoe will hold a post-mortem.

Dr. Woods interrogated Frank Newn and Edward Maloney, who were with the deceased. Newn, who said he was a tinsmith and 39 years of age, deposed that he first met Rolph at William Bell's hotel on King street, London. He also met Maloney there. Maloney drove them to the home of a man named Riley, on William street. Rolph was "pretty tight," Newn said. "It was hard cider we had, no whisky; the cider was served from a keg by their host, who took no money for it. It was the only one there. We left there about 2 o'clock and took Rolph away to prevent his being arrested. We drove about the city endeavoring to find Rolph's rooming house, and not being able to find it we drove out to the country, going as far as Bothwell. We took note of the deceased who was sitting in the back seat of the car. We thought he was sleeping, but he did not look natural. We then went to Dr. Glenn who pronounced him to be dead. This was at 6 a. m. Dr. Glenn called the crown attorney who advised us to take the body to Glencoe. I did not know Rolph other than as a man who had been selling small articles from house to house."

Edward Maloney of Brantford, 34 years of age, who had been selling bulbs and accessories for Ford cars, deposed as follows:

"I have been in London six weeks. Rolph had been working with me for a week. I met Rolph at Riley's and then went to supper. Rolph stayed there. Went back with Newn about 3 o'clock. William Atkinson, garage man, my boss had telephoned to bring the car and go for a ride. No body paid for the cider that I know of. We took Atkinson home and then came back for Rolph. From that point the witness' deposition was in corroboration of that of Newn as to Rolph's condition and the call upon Dr. Glenn who pronounced Rolph to be dead.

Charles Frederick Rolph, the deceased, was better known as "Happy." His home was in Woodstock where his parents still reside, and he was about 24 years of age. The deceased is survived by father, mother, brothers and sisters.

The jury comprises the following: A. B. McDonald (foreman), W. A. Hagerly, E. T. Huston, Gordon Dickson, R. M. McPherson, J. N. Currie, A. J. Wright, P. E. Lumley, I. D. Kerr and G. A. Parrott.

ST. JOHN'S CHURCH, GLENCOE

The Rev. D. N. Abbyhanker, Church Missionary Society, Bombay, India, preached morning and evening and delivered an address, exhibiting ideas, articles of dress, etc., at 3 p. m., in above church on Sunday. Large and appreciative congregations attended the afternoon and evening services. It is no exaggeration to say that Mr. Abbyhanker had the attention of everyone from commencement to finish. He is a convert from the highest order of heathendom demonstrated the duty of those who know the gospel to carry or send it to those who do not. The gospel is not for us only, but for "all the world," and the church which is not a missionary church is not worthy of being called a church. Our small patriotism often finds it hard to transcend parochial boundaries. We do not realize that God's love, like the sky, is over us all. This and much more Mr. Abbyhanker plainly and with spiritual eloquence placed before his hearers. His visit will not soon be forgotten.

On St. Patrick's night, the 17th of March, in the basement of the church, under the auspices of the A. Y. P. A. and the choir, a concert and social will be given. Good program. Reserve this date.

GLENCOE COUNCIL

The regular meeting of the Glencoe council was held in the council chamber on Monday, March 6, 1922. Members present: Reeve McPherson, Councillors Lumley, Parrott and McCracken. The minutes of the last meeting were read and adopted.

The auditors then submitted their report, and on motion of Messrs. Lumley and Parrott the report was accepted and the clerk was instructed to issue orders on the treasurer in payment, also to order the printing of 50 copies.

On motion of Messrs. Parrott and McCracken the council endorsed the resolution of the council of the town of Hespeler opposing the raising of the standard for matriculation examination.

On motion of Messrs. Lumley and McCracken the council accepted, subject to the by-law, the petition of Thos. Huggitt for sidewalk on north side of Orange street from O'Mara street to Main street.

On motion of Messrs. Parrott and McCracken the following accounts were ordered: J. A. McLachlan, lunch for prisoner, 25c; Nat. Cushman, hauling gravel, \$26.67; Russell Newport, hauling gravel and cleaning streets, \$66; A. E. Sutherland, printing, etc., \$82.50; Nathaniel Currie, use of the truck scraper, \$2; J. B. Henry, salary for February, \$100; express on couplings, fire hose, 75c; A. M. Graham, rent of stove, \$2.

Charles George, Clerk.

MOSA COUNCIL

A meeting of the Mosa council was held at Newbury on Feb. 18. Members all present. The minutes of the last meeting were read and approved.

Moved by E. Hurdle, seconded by D. A. Mitchell, that Archie Regis be paid \$6. Bruce Fletcher \$4, Arch. McCready \$4, for statute labor performed since the pathmasters returned their lists. Carried.

Moved by F. J. James, seconded by E. Hurdle, that J. H. Saylor be paid \$7.47, Isaac Saylor \$38.42, Wm. Saylor \$2.15, W. E. Tunks \$53.35, J. Brooks \$13.33 and Ish. Allan \$1.28, for rebate on the trucks drain, by-law No. 682. Carried.

Moved by J. A. Leitch, seconded by E. Hurdle, that M. Letherby be paid \$11, J. F. Sherwood \$2, Sarah Haggerty \$15, Don. Flett \$7, H. Good \$14, Bruce Fletcher \$5, M. Moore \$4, Jas. Brown \$4, Hugh Armstrong \$4, E. Armstrong \$3, L. Ross \$3, Dan King \$8, for damages to lands in by-law for the repair of the Roycraft Hurdle drain. Carried.

Moved by J. A. Leitch, seconded by E. Hurdle, that D. A. Mitchell be paid \$10 and Matthew Armstrong \$20, allowance for bridges in by-law No. 647 for the construction of the Kelly drain. Carried.

The auditors' report was received. Moved by E. Hurdle, seconded by F. J. James, that the auditors' report be adopted, and that D. W. Gillies be paid \$20 and Peter O'Malley \$20 for services as auditors. Carried.

Moved by D. A. Mitchell, seconded by J. A. Leitch, that L. Kelly be paid \$8, refund of statute labor; Ed. Hurdle, \$36, balance due from 1921 for services as councillor; Municipal World, \$17, for dog tags and blank forms. Carried.

Moved by E. F. Reyecraft, seconded by F. J. James, that by-law No. 696, to appoint pathmasters, fenceviewers, poundkeepers and shunt valuers, be passed as read a third time. Carried.

Moved by F. J. James, seconded by E. Hurdle, that the reeve and clerk be hereby authorized to sign and submit to the minister of public works and highways of the province of Ontario the petition of the corporation of the township of Mosa, showing that during the period Jan. 1st, 1921, to Dec. 31st, 1921, there has been expended upon the township roads the sum of \$12,481.77, and requesting the statutory grant of 20 per cent. on that amount as provided by the Ontario Highways Act and amendments thereto. Carried.

The council adjourned to meet at Glencoe on March 18th, 1922, at ten o'clock in the forenoon.
C. C. McNaughton, clerk.

AGENDA CLUB SOCIAL

Crinan, Feb. 24.—The box social put on in Crinan hall by the Agenda Club last evening was a decided success. In spite of the utmost efforts of snow, rain and wind to make a wreck of the evening, a crowd of more than fifty spent a very happy time. A splendid program occupied the first part of the evening. This was followed by the sale of the boxes which appeared in interesting and beautiful variety. These were auctioned by M. A. McAlpine, and owing to his efforts and to the attractiveness of his wares the enterprise was all that could be wished for financially as well as socially.

There is not a single portion of the body that is not benefited by the helpful action of Tanlac.—P. E. Lumley.

NOTICE.—All accounts owing the Fletcher Mfg. Co. not paid on or before the 1st day of April, 1922, will be placed in other hands for collection. The Fletcher Co. pay cash and demand cash, and in future all work must be settled for before leaving shop. We repair only as an accommodation, and must demand cash. Bring the money or stay away.—The Fletcher Mfg. Co.

PLAY GIVEN IN WARDSVILLE

Irish Drama, "The Colleen Bawn," Well Put On

Wardsville, March 4.—A rare treat was afforded the public in the Wardsville music hall when the old original dramatic company presented the famous Irish drama entitled "The Colleen Bawn." All members of the cast presented their parts in a manner seldom seen on the amateur stage and deserve a great deal of credit.

Miss Hilda Blott, taking the part of Eily O'Connor, the "Colleen Bawn," proved conclusively that she is an actress of no small merit. Miss Agnes O'Malley, taking the part of Anne Chute, the beautiful little Irish heiress, with her acting carried the audience by storm. Mrs. (Dr.) O. J. Glenn, taking the part of Mrs. Creagan, delighted the audience with her wonderful emotional acting. Mrs. J. F. Henderson, taking the part of Sheila Mann (the bonnet's mother), played a most difficult and sympathetic part. Wm. Mimma, in the role of Myles Na Copaleen, commanded rounds of applause. James McIntyre, as Hardress Creagan, displayed ability in the role of the Irish nobleman. Corrigan, the "villain," taken by Alex. McIntyre, demonstrated the avarice and craftiness of a scheming lawyer. Joe Kearns, as Danny Mann (the bold man), exhibited rare talent in his fidelity to his master. J. F. McGregor, as Father Tom, parish priest of Kenmore, played the role in realistic form. E. L. Purdy, as Kyrie Daly, Anne's lover, played the role without a fault. The bridesmaids, servants and soldiers made a fitting finale to the play, not forgetting beautiful scenery of the Emerald Isle. The orchestra, under direction of John Haggitt, rendered exceptionally appropriate music.

Owing to the number that could not gain admittance to the hall the company repeated the performance Friday evening, March 3, for the benefit of the soldiers' memorial fund.

G. H. S. NOTES

The Literary Society will hold their regular meeting on Friday afternoon of this week. The program is being prepared by the girls.

Reports from London Normal tell us that Dorothy Highwood a graduate of last year, is making a very creditable showing in her work there, having received special commendation recently.

In the not far distant future the Literary Society purpose holding an open meeting in the town hall, to which the public will be invited. H. F. Johnston has offered two medals—first prize gold and second prize silver—for an oratorical contest open to all pupils of the school. A marked interest is being shown by the pupils, some of whom have indicated their intention of entering the contest. The following is the list of subjects from which the contestants must make a choice of topic:

Our Flag.
Canada's Heating Problems.
Canada's Vacant Farms.
The Greatest Man in Canadian History.

An Ideal Town.
Modern Inventions.
Music in the Home.
A Country Boy's or Girl's Chance in Life.

Canada's Place in the World.
Changes Wrought by the Auto.
What the Printing Press Has Meant to Me.
Canadian Immigration.
Does Glencoe Need a Carnegie Library?

Effects of Town Improvement.
Which Has the Greatest Influence on the People of a Country—Pulpit, Press or the Public?

We hope to report from week to week the progress which is being made in preparation for the contest.

FREIGHT WRECK AT HYDE PARK

About seven o'clock on Friday evening eight freight cars, forming a part of an eastbound Grand Trunk train, were wrecked at Hyde Park Junction when a truck under one of the cars broke. The derailed cars struck and carried away a large portion of the overhead bridge on the Hyde Park road. Traffic on the railroad was delayed for several hours. Six cars of load were included in those that were wrecked. It took several days to clear up the wreck debris and the roadway bridge will practically have to be rebuilt.

MUNRO-GEE

A very interesting wedding took place at the manse, Glencoe, on Wednesday, when Rev. Mr. Paton united in holy wedlock Sophy, youngest daughter of Mr. and Mrs. Abraham Geo. of Euphemia, and Donald Munro, second youngest son of the late Mr. and Mrs. Donald Munro of Mosa. The bride was daintily gowned in pearl grey satin. The young couple were unattended. The witnesses were Miss Violet Plaine and Mr. McKellar. After the ceremony the wedding party motored back to the home of the bride, where all partook of a very dainty wedding dinner, after which all motored up to Mr. Munro's house and enjoyed themselves dancing until the "wee man" Gordon McLaughlin of Klamarin furnished the music.

On Thursday Mr. and Mrs. Munro left by M. C. R. from Alvinston to spend two weeks visiting friends in Peck, Brown City and Detroit, Mich. On their return they will reside on the groom's farm on the Brooke and Euphemia townships.

THE MYSTERY OF THE GREEN RAY

By William Le Queux

Synopsis of Preceding Chapters.

The outbreak of war sends Ronald Ewart, a young London barrister, to the Highlands to say good-bye to his fiancée, Myra McLeod. On the train he meets Hilderman, who calls himself an American and a stranger in those parts, but later Ewart finds that he has built a hut on a cliff above the falls opposite General McLeod's lodge. While fishing in the river Myra is suddenly blinded by a flash of green light. Gen. McLeod tells Ewart of a strange experience at the same place, known as Chemist's Rock. Hilderman is very curious as to the cause of Myra's blindness. The famous London oculist holds out no hope and Ewart, after taking Myra home, brings Dr. Garneek from Glasgow. In the meantime Sholto is also blinded, and Ewart ascertains his belief that Hilderman knew of Sholto's affliction. The next morning the two men find footprints and keel-marks on the beach, and Ewart telegraphs for his friend, Dennis Burnham. At Chemist's Rock, Garneek sees the green flash and Ewart is suffocated. While in the darkness where the two young men are developing snap-shots, Myra discovers that she can see the red light. Ewart explains the situation to Burnham at the station.

CHAPTER XII.—(Cont'd.)

"I'm very glad you had Mr. Garneek with you," said Dennis at last, with a glance of frank admiration at the young specialist.

"Not so glad as I am," I replied fervently. "What I should have done without him heaven only knows. I can't even guess."

"Oh, nonsense!" cried Garneek, in modest protest. "I haven't been able to do anything. Our one advance was a piece of pure luck—the discovery that Miss McLeod could see by the light of a red lamp. We have decided to keep that quite to ourselves, Mr. Burnham."

"Of course," agreed Dennis, so emphatically that I laughed.

"Why so decided, Dennis?" asked, for I felt that I should like to climb to the topmost pinnacle of the highest peak in all the world and shout the good news to the four corners of the earth.

"I'm not a scientist, Ron," Dennis replied. "That may account for the heresy of my profound disbelief in science. I wouldn't cross the road to see a miracle. The twentieth century is uncongenial to anything of that sort. Take it from me, old chum, there's a man at the back of this—there's a nice man, I admit, but an ordinary human being to all outward appearances—and when we catch a glimpse of his outward appearances we shall know what to do."

"Yes, when we do," I sighed.

"You mustn't let Ewart get depressed about things, Mr. Burnham. He very naturally looks at this business from a different standpoint. With him it is a tragic, mysterious horror, which threatens the well-being if not the existence of a life that is dearer to him than his own."

"I'll look after him," said Dennis, with a grim determination which made even Garneek laugh.

"When you two precious people have finished nursing me," I said, "I hope you'll allow me to point out that that very reason gives me a prior claim to take any risks or run into any dangers that may crop up from now on. If there is any trouble brewing, particularly dangerous trouble, then it is my place to tackle it. I am deeply grateful to you fellows for all you have done and are doing and intend to do, but the nursing comes from the other side. I can't let you run risks in a cause which is more mine in the nature of things than yours."

"I fancy," said Dennis, "that even your eloquent speeches will have very little effect when it comes to real trouble. If danger comes it'll come suddenly, and we shall be best helping our common cause by looking after ourselves."

"Hear, hear," said Garneek, and I could only mutter my thanks and my gratitude for the possession of two staunch friends.

"To get back to business," I said

CHAPTER XIII.

The Red-Haired Man.

"I'll send the glasses at once," said Garneek, as the train steamed out of the station. Dennis and I stood on the platform and watched him out of sight.

"He seems a good fellow," said Dennis.

"Splendid!" I agreed readily. "He's exceedingly clever and wide-awake and very charming. What we should have done without him heaven only knows. I fancy his visit saved the entire household from a nervous collapse."

"We've no time for collapses, nervous or otherwise," Dennis replied. "We shall want our wits about us, and we shall need all the vitality we can muster. But at the same time I don't think there is any cause for nerves. You're not the sort of man, Ron, to let your nerves get the better of you in an emergency, especially if we can prove that our enemy is a tangible quantity, and not a conglomeration of waves and vibrations."

"Hilderman and his friend appear to be waiting for us," I interrupted.

"You may as well introduce me," said Dennis. "I'd like to meet the man. Who is his friend, do you know?"

"Haven't the remotest idea," I replied. "I have seen him once before, but that is all. I don't know who he is."

"Is he staying with Hilderman, or does he live in the neighborhood?"

"That I couldn't tell you either," I said. "I'm sure he doesn't live anywhere near Invermullach."

"As we strolled out of the station Hilderman and his companion were standing chatting by the gate which leads on to the pier. As we approached, Hilderman turned to me with a smile.

"Ah, Mr. Ewart," he exclaimed, "your friend has left you, then. I hope you won't let his inability to help Miss McLeod depress you unduly. While there's life there's hope."

"I shall not give up hope yet awhile, anyway," I answered heartily.

"May I introduce my friend Mr. Fuller?" he asked presently, and I found myself shaking hands with the round-faced little man, who blinked at me pleasantly through his glasses. I returned the compliment by introducing Dennis.

"On holiday, Mr. Burnham?" asked the American. Dennis was so prompt with his reply that I was convinced he had been thinking it out in the meanwhile.

"Well, I hardly know that I should call it a holiday," he replied immediately. "I have just run up to say good-bye to Ewart before offering my services to my King and country. We had intended to join up together, but he has, as you know, been detained for the time being, so I am off by myself."

"We are very old friends," I explained, "and Burnham very decently decided to come here to see me as I was unable to go south to see him."

"Never mind, Mr. Ewart," said Hilderman. "I guess you'll be able to join him very soon. I wish you luck, Mr. Burnham. I suppose it won't be long before you leave."

"He's talking of returning to-morrow," I cut in. "I wish you'd tell him it's ridiculous, Mr. Hilderman. Fancy coming all this way for twenty-four hours. He must have a look round, to say nothing of his stingsiness in depriving me of his company so soon."

"Well, I can quite understand Mr.

Burnham's anxiety to join at the earliest possible moment," he answered. "But I've no doubt Lord Kitchener wouldn't miss him for a day. I think he might multiply his visit by two, and stop till Wednesday, at any rate. Ah, here's the Fiona!"

I looked out to the mouth of the harbor and saw the steam yacht, which was in the habit of calling at Glasnabinnie, gliding past the light-house rock. I was about to make some comment on the boat when Hilderman forestalled me.

"How are you going back?" he asked.

"In a motor-boat," I replied. "I am afraid Angus is getting weary of waiting already."

"I'm sure Mr. Fuller would be delighted to have you fellows on board. Why not let your man take Mr. Burnham's luggage to Invermullach, and come to Glasnabinnie on the Fiona? You can lunch with me, and when you tire of our company I will run you across in the Baltimore. Eh? What do you say?"

"I shall be delighted, of course," his companion broke in.

"I hesitated for a moment, and glanced at Dennis. His face obviously said, "Accept," so I accepted.

"Thank you," I said; "we shall be very pleased. It will be more jolly than going back by ourselves."

"Good!" cried Hilderman, "and I can show you the view from my smoking-room. I hope it will make you green with envy."

"So I gave Angus his instructions, and the four of us waited at the fish-table steps for the dinghy to come ashore from the yacht. She was not a particularly beautiful boat, but she looked comfortable and strong, and her clumsy appearance was accentuated by the fact that her funnel was a commodious deck dining-saloon, on the top of which was a small wheel-house. Myra had been right, as it turned out; she was a converted drift-er. The two men who came in to pick us up wore the usual blue guernsey, with S. Y. Fiona worked in an arc of red wool across the chest. They were obviously good servants and useful hands, but there was none of that ridiculous imitation of naval custom and etiquette which delights the heart of the Cotton Exchange yacht owner.

We boarded the Fiona with the feeling that we were going to have a pleasant and comfortable time, and not with the fear that our setting of a leather-cleat shoe upon the hallowed decks was in itself an act of sacrilege. We were no sooner aboard than Fuller set himself to play the host with a charm which was exceedingly attentive and neither fussy nor patronizing.

(To be continued.)

Dye Dress, Skirt or Faded Curtains In Diamond Dyes

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her worn, shabby dresses, skirts, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is as simple as Diamond Dyes are guaranteed not to spot, fade, streak, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.

Woman's Interests

You Can Have Flowers Too.

For the busy woman who cannot spend as much time with flowers as she would like, but who still wants to beautify her home with summer annuals, a border bed along a fence is the most practical. A width of three feet makes a bed that is convenient to work with, and it can be any length, the longer the better. One of the prettiest borders of this kind I have ever seen was over ninety feet long, and contained about every tint of the rainbow.

The taller plants, of course, belong next the fence, making a splendid background for the shorter ones. It is best to start the seed in flats, transplanting later, thus getting the largest and best plants in the most conspicuous places. Much time can be gained in this way by avoiding all danger of frost.

One year I used cosmos for my backing with blue larkspur in front of them, and bush nasturtiums at the edge. These nasturtiums were the large flowering Tom Thumb variety, and stood erect, each individual plant a compact bush in itself. They bloomed abundantly from late spring until frost, the different shades of yellow blending well with the blue of the larkspur. Along a back fence that same year I planted dwarf sunflowers, which furnished feed for the chickens in addition to furnishing entertainment for the entire family. We loved to watch them turn with the sun.

Another quick grower giving splendid results is the old-fashioned zinnia. Seed houses are advertising a conical zinnia which, as the name implies, is cone-shaped, and rather blunted at the top. It grows to be about three feet tall, and comes in all shades of red, yellow, lavender, orange, and pink. A pretty combination with this is white candytuft, a low-spreading plant which, when covered with bloom, resembles a snowdrift.

A taller bed may be had by planting ten-weeks stocks, a flower something on the order of the hollyhock, using the double marigold and the Chinese woodflower to fill in.

The summer koehia, sometimes called

Use Minard's Liniment for the Flu.

ed burning bush, makes a restful pale green border. During the summer months it forms a hedge, two feet high, of the faintest green imaginable, and does not develop any color until touched with frost, when it turns a lovely claret-red.

The portulaca goes well with this unusual green, furnishing plenty of color for the entire bed. This makes an "easy" a flower bed as the busiest woman could wish for, as the portulaca doesn't require the attention that most quick-blooming flowers do. They bloom and seed at the same time—quite different from the fragrant nasturtiums. To allow nasturtiums to seed is to shorten their life by about half.

At one time I found that I had cut out big contract for myself when I covered a 40-foot fence with the climbers. They were beautiful, a brilliant mass of clean yellow and red blooms, hiding the fence completely and lightening up an otherwise dreary view. Sometimes I got almost a peck basket full at one picking, and I went over them at least every other day.

Perhaps the most satisfactory border is the one containing a reckless profusion of a dozen or more varieties. This can include verbenas, the broad-flowering zinnias, selvia, both red and pink, California poppies, as well as

DEVELOPING NEW FINNY TRIBES

CROSS-BREEDING WITH FISHES.

Fish Culture is Possible and Profitable on Almost Any Ontario Farm.

Success obtained in crossing the rainbow trout with the salmon, in California, points to the possibility of creating by such means entirely new races of fishes.

Cross-breeding among fishes must necessarily be limited to those which are not too distantly related. Trout, for instance, belong to the tribe of the Salmonidae. To attempt to cross the striped bass with the shad would be an absurdity, inasmuch as they represent different finny orders.

In Lake Erie there is occasional scarcity of "ripe" male whitefish at the season when the females are ready to spawn. This has led now and then to the use of the milt of the lake herring (another genus of the whitefish tribe) for fertilizing whitefish eggs; and it is said that, as a result, half-breeds are becoming rather plentiful in those waters, distinguishable by the long lower jaw which they inherit from their daddies.

Laboratory Experiments.

It is suggested that the dog salmon (of minor importance commercially) might be crossed with the much-esteemed "sockeye" to combine the flavor of the latter with the greater size of the former. If such an attempt were made the eggs would be hatched artificially and the fry "tagged" after raising them to fingerling length, in order to identify them three or four years later, when they should return from the sea to the rivers, and so get an idea of the results.

Would it be practicable to cross-breed the black bass with the striped bass or with the crappie? Could the same thing be done with the cod and the haddock or with the hake and the pollock? Naturally, reply that such experiments might be successfully carried out in the laboratory, but that they would have to value beyond satisfying scientific curiosity. Furthermore, as an incidental point, fish hybrids sometimes (though not always) prove to be "mules" incapable of producing offspring.

Suggestion has been offered that the oyster might be crossed to advantage with the long clam or with the "quahaug," so as to produce a new kind of shellfish that might prove highly popular in restaurants and at clam-bakes. The notion is undeniably attractive, but here again the naturalists step in with a veto, declaring that the blunders concerned are "too far apart" in a zoological sense.

On the other hand, they say that a fish is a very "plastic" organism, easily modified by breeding, as illustrated in the case of the goldfish, which has been developed in forms beautiful and sometimes weird from a commonplace, dull-colored little member of the carp family. Similar "stunts" might be done with other finny species; and certainly it would be practicable to increase the size of some of them greatly.

Improving a Species.

Take the sunfish, for example. The blue sunfish attains a length of twelve inches. By breeding it might be made two or three feet long. Much might be done in the same way with the black bass. All the sunfishes are, like the black bass, nest-builders, and all of them are well adapted for pond culture. The yellow perch and white perch could probably be increased four to six times in weight by proper breeding.

There is hardly a farm anywhere that cannot have a fish pond. Damming a little stream will make it. If there is no stream, a fine pond for fish culture can be made by digging out a marsh to a depth of four or five feet, covering the bottom with gravel and sinking planks edgewise for banks. Experts say that a one-acre pond ought to yield 5,000 pounds of fish annually, if properly managed. At ten cents a pound that would mean \$500 a year.

Flame-Throwing Machine Melts Snow.

Very heavy drifts of snow, packed and hard to handle by any method of removal, are now being cleared away much more easily and rapidly by demolishing, instead of moving them. The snow is melted by a stream of flame thrown at it in much the same manner that fire is quenched by a stream of water from a nozzle. The flame thrower also has a nozzle, which is connected to a pair of pipes, one leading to a boiler with steam at 50 to 70-lb. pressure, and the other to a tank of crude oil, which is kept at a temperature of about 90 degrees F. by a coil of pipe connected to the boiler, the whole forming a unit mounted on a small motor truck. Behind the nozzle the steam pipe is spouted into the oil pipe, forcing the oil out in a manner similar to the action of the steam of the water of a boiler injector, thus forcing the oil out of the nozzle in a spray under high pressure. A kerosene torch, or other means, located beside the nozzle, ignites this oil spray, which consequently forms a stream of fire about nine feet long.

Women!

Look for this Trade Mark when You Buy Kitchen Utensils

Would you buy a can of salmon if it had no label? Or a bag of flour? No, certainly not! Then be just as careful when you are buying kitchen utensils. Purchase only those articles of Enamel Ware carrying the SMP trade-mark. It is your safeguard and your guarantee of quality. Ask for

HEATED DEBATE IN DAIL EIREANN OVER WOMAN SUFFRAGE

Other Matters Cause Stormy Scenes—Party Bickering and Minister Baiting—Question of Observance of March 17.

A despatch from Dublin says:—The issue of woman suffrage was injected into the Dail Eireann's debate on Thursday, when Mrs. O'Callaghan proposed that the Dail issue a decree extending the franchise to women between the ages of 21 and 30, instead of confining it to women of more than 30. This would make women voters on equal terms with men.

This raised a heated discussion. The Griffith and Collins forces charged that it was an attempt indirectly to postpone the election. This was heatedly denied. Griffith pointed out that the election would be fought on the present franchise, it being impossible to prepare new lists within the available time. The motion was defeated on a vote of 47 to 38.

Later in the day de Valera made another threat to withdraw from the Dail. Although the Dail ratified the truce agreement between the rival parties made at the Sinn Fein convention, the ratification process provided only an interval in party bickering and Minister baiting. The Griffith and Collins party was heckled by anti throughout the day. Another discussion arose on de Valera's proposal for a \$25,000 loan for the initial purposes

of the Irish race organization adopted at the Paris race convention. De Valera admitted that United States representation at Paris had been not what was expected, but angrily charged misrepresentations of his position.

This discussion took the form of allegations and explanations. Collins suggested that a committee of two from each side investigate the position and report. The suggestion was adopted.

Count Plunkett proposed that the Dail decree all business suspended and public houses closed on St. Patrick's Day, March 17. Griffith opposed this, saying that when he tried this some years ago there was a popular revolt; adding that the Gaelic League, which enforced it, became unpopular consequently. The assembly's feeling being against the proposal, a compromise was made on the undertaking by Griffith stating that they would consider the matter. Griffith declared himself opposed to penalizing the poor man for his poverty, because while the poor man was unable to get a drink on the National festival, the rich man could have all he required at home. On Griffith's motion the Dail adjourned to April 25.

PROTECTORATE OF EGYPT ABOLISHED

Land of the Nile is Now a Sovereign and Independent State.

A despatch from Paris says:—A Cairo despatch states that Field Marshal Allenby, British High Commissioner in Egypt, has issued a proclamation abolishing the British protectorate of Egypt and declaring her a sovereign and independent State, with a provisional status quo for the defence of Egypt, the security of the Empire's communications and the protection of foreigners and of the Sudan.

A despatch from London says:—Prime Minister Lloyd George announced in the House of Commons that the British protectorate over Egypt has been terminated, and that Egypt was free to work out such national institutions as might be suited to the aspirations of her people.

At the same time Mr. Lloyd George gave the terms upon which the British Government will give Egypt the opportunity of working out her own salvation.

He said a Government white paper would show the House what had taken place since the declaration of the policy of the British Government last December, after the failure of the Egyptian mission to London led by Adly Yeghen Pasha. The paper also would contain, he added, the declaration of policy on which the Government, in accordance with the principles laid down in December, now proposed to proceed.

Martial law will be abolished in Egypt as soon as an act of indemnity has been passed, the Prime Minister announced. He explained that martial law had been used, not to enforce the British policy upon Egypt, but as a main instrument of Government in the hands of the Egyptian Ministers for certain important measures arising out of war conditions. An act of indemnity, therefore, would be necessary before any Government could dispense with martial law.

Advance in Living Costs in Germany

A despatch from Berlin says:—The high cost of living is once more the sole topic of discussion throughout Germany. During the last few weeks most of the necessities have advanced nearly 100 per cent. Only a few weeks ago, Berlin street cars advanced the fare to two marks, without transfers. Now the management informs the public that a further advance to three marks will be necessary. This is a typical example of the ratio in the advance of many essentials of life. The new price wave is bound to react soon, and there is every reason to believe the stage is being set for a new crisis.

Francis Wellington Hay, M.P.P., North Perth, has been chosen Liberal Leader for Ontario.

Mr. Larkin is Now A Privy Councillor

A despatch from Ottawa says:—P. C. Larkin, who was recently appointed Canadian High Commissioner in London, will shortly be sworn in as a member of the Privy Council of Canada. His appointment to the Privy Council dates from March 1, when he assumed the duties of High Commissioner. Membership in the Privy Council carries with it the title of Honorable, so Mr. Larkin will be addressed in future as Hon. P. C. Larkin.

Adult Education. Mr. Albert W. Mansbridge, founder of the Workers' Educational Association in England, spoke on Friday, March 3rd at the University of Toronto on "An Adventure in Education for Grown Men and Women." Mr. Mansbridge is a trades unionist who gave the best part of his life and sacrificed his health in the interests of education for working men. For his excellent work in the organization of the Workers' Educational Association, the University of Oxford conferred on him the honorary degree of M.A. Mr. Mansbridge also organized the Workers' Educational Association in Australia and is now on a visit to Canada and in the United States. The first Workers' Educational Association in Canada was founded in co-operation with the University of Toronto in 1918, and there are now seven evening classes in Toronto receiving education of university grade. The provincial university has also established four Workers' Educational Association classes in Hamilton and three in Ottawa. The University of Alberta conducts two such organizations in Edmonton and Calgary. It is expected that Mr. Mansbridge's visit will furnish a very considerable impetus to this important type of work in America.

Films of Royal Marriage Are Crossing Atlantic

A despatch from London says:—On board the Olympic, which left Southampton for New York on Wednesday, is a small barrel, the contents of which is eagerly awaited on the other side of the Atlantic. Specially constructed to float, this cask is packed with films and photographs of the wedding of Princess Mary and Viscount Lascelles. Off Nantucket the barrel will be flung overboard and picked up by a United States destroyer, which will meet the Olympic there. The destroyer will then make for Boston, and from there the films and photographs will be distributed throughout America. By this scheme it is anticipated that the films and photos will be screened and published in America a day earlier than would be possible otherwise.

Vesuvius Again in State of Eruption

Naples, March 5.—Mount Vesuvius is again in eruption. The phenomenon began with two mild shocks of earthquake, which were followed by the collapse of the eruptive cone, 200 feet high, which stood inside the crater. The fall of the cone was accompanied by rumblings and explosions and the throwing out of ashes and incandescent stones. Liquid lava poured out from the crater in streams, and in the 24 hours since the disturbance began, it covers an area of 100,000 square feet.

Senator John Milne died at Hamilton on Saturday in his eighty-fifth year.

The Dominion House of Parliament, with the Governor-General and the Party Leaders inset.

BRITISH GARRISON PRESERVES PEACE BETWEEN WARRING IRISH FACTIONS

Dublin, March 5.—A revolution against the Provisional Government has broken out in Limerick city. During Saturday night detachments of the Irish Republican army loyal to de Valera, from the counties of Cork, Tipperary and Clare, entered Limerick city, occupying the three principal hotels and using them as billets. These Republican soldiers went to Limerick to uphold the recent proclamation, signed by the principal officers of the mid-Limerick Brigade of the Irish Republican army, calling the Provisional Government traitors and refusing to obey orders from Dublin.

The Provisional Government sent a company from the loyal Irish Republican army, numbering about 140 men, fully uniformed and equipped, to occupy the barracks at Limerick. Up to the present writing there has been no clash between these armed and opposing factions of the army. The British garrison is still in Limerick city, and throughout Sunday a British armored automobile patrolled the streets, probably preventing hostilities. It is learned to-night that this car will be withdrawn and the British policy there will be one of hands off, letting the Irish fight it out.

BITTER FACTIONAL FIGHTS IN FIUME

Italy is Urged to Assume Administration of Disorganized City.

Rome, March 5.—A proclamation urging Italy to assume administration of the city of Fiume, due to the serious fighting between the Italians and the Croats, was issued to-day by the Fiume Committee of National Defence. The Government palace at Fiume has been occupied by the Provisional Government. The Italian carabinieri and the Royal Guards have been commissioned to preserve order. Fiume has been in a state of uproar for weeks as a result of the bitter factional fights.

PEERESSES TO SIT IN HOUSE OF LORDS

Twenty-four Women of British Peers Secure Privilege Awarded.

A despatch from London says:—Viscountess Rhonda has established the claim of women, who are Peeresses in their own right, to take their seats in the House of Lords. There are 24 Peeresses in the United Kingdom who can take advantage of the decision—one Duchess, four Countesses, two Viscountesses and 17 Baronesses. Some having married Peers higher in rank than themselves, are known by their husbands' titles.

Arthur J. Balfour, M.P. For Wexford, Ont., has, it is officially announced, been appointed Deputy Speaker of the House of Commons.

Arthur J. Balfour Made Knight of the Garter

A despatch from London says:—King George has conferred the Order of the Garter upon Arthur J. Balfour in recognition of his services at the Washington Conference. This is the highest honor within the gift of the King. The order was conferred on Mr. Balfour by King George at Buckingham Palace on Friday.

BRITISH ARMY IN CONTROL IN INDIA

General Rawlinson Does Not Expect a Rebellion of the People.

A despatch from Delhi says:—The military men in India are keenly alive to the possibility of dangers from the present political situation. They are not given to exaggeration, nor do they minimize the grave potentialities of the issues which cloud peace in India and cause the great spirit of unrest throughout the country. "We do not believe there will be a wholesale rebellion or rising of the people," said Lord Rawlinson, during an interview. "But we are expecting that we must meet sporadic outbreaks in different parts of the country, which may or may not be more serious than the recent Moplah trouble."

"Have the reductions in the British Imperial forces in any way impaired the efficiency of the army in India?" he was asked. "In no way," he replied. "We have made reductions of about 25,000 men in the organizations here. Of these reductions, as compared with our strength in 1914, 6,000 were British. We have under arms in India about 60,000 British troops. The native army numbers about 140,000, of which not all are at present in India. These troops are approaching the efficiency of the large pre-war forces."

"With the practical defeat of Mahatma Gandhi at the recent meeting of the All-India Congress Committee, do you expect the movement to swing from the present stand of non-violence to one from which violence and riots may be expected?" he was asked. "That is not for soldiers to answer. I cannot judge this myself. All I can say is that we are prepared to deal with any disturbances."

"In such an eventuality, are conditions similar to those which existed in Ireland—guerrilla warfare—likely to spring up?" I asked. "Is there any comparison between Indians and Irishmen?" he countered. Indeed there is not. In India a force of 200 police is capable of controlling a mob of 10,000. This has been done.

Sir Donald MacMaster, Member of the British House of Commons, died in London, England, on March 3. He was born in Williamstown, Ontario.

Potatoes, per bag, car lots, 90c to \$1. Veal calves, best, \$11; med., \$10; inferior, \$7; hogs, selects, \$14.50 to \$14.75.

Canada From Coast to Coast.

Summerside, P.E.I.—With a population of about 90,000, Prince Edward Island has seventy women's institutes working for community betterment. Short courses are given annually with instruction in domestic science, fancy work, sewing, millinery and other subjects.

Halifax, N.S.—A healthy increase in Halifax industries is indicated in the Dominion Bureau of Statistics' report on Maritime industrial growth. The output of manufactures in the city in 1917 was \$15,247,469; in 1918, \$19,339,836; and in 1919, \$21,955,162.

Kentville, N.S.—Over 100,000 barrels of apples have been shipped to Halifax for export by the Dominion Atlantic Railway. There are still approximately 350,000 barrels left for export. From the beginning of the season 1,490 more cars of apples were moved than for the corresponding period last year.

Newcastle, N.B.—The smelt fishing for 1921-22 in the northern and eastern coastal counties of New Brunswick has been the most successful in the history of the industry and the volume of shipments has exceeded anything previously reached. The bulk has gone to the United States though there has been a satisfactory trade with Quebec and Ontario.

Quebec, Que.—Complete control of the tidal fisheries of the Province of Quebec has been secured from the Federal Government by the Provincial Government, according to the announcement of the Provincial Minister of Fisheries, on his return from Ottawa. The province hereafter is to have sole administration of its tidal waters except for the waters of the Magdalen Islands which lie in the Gulf of St. Lawrence and have been judged to be too far away for practical provincial administration.

Montreal, Que.—Several hundred thousand pelts, including those of the polar, grizzly and black bear, coyote, muskrat, silver, red and cross fox, buffalo, hoover, sable and mink were received by the Canadian Fur Auction Sales Co. for their winter sale, consignments coming from all parts of Canada, the United States, Russia, Siberia, Labrador and Patagonia. Prices realized were, on the whole, higher than those prevailing at the fall sale, and in all a revenue in excess of \$1,200,000 was secured from the four days' sale.

Toronto, Ont.—About 25,000 hunters' licenses were issued last year in the Province of Ontario, it was announced by the Department of Lanta, Game and Fisheries. This is a somewhat larger number than the year before.

London, Ont.—A party of 150 Scotsmen and families, mostly from Glen-garry, will shortly arrive here under the auspices of Rev. R. A. MacDonnell, to take up farms in Kent and Essex counties, where large numbers of their compatriots have already settled. Father MacDonnell has announced that this party will be the beginning of an important emigration of Highlanders to this part of Ontario.

Winnipeg, Man.—In order to further promote the agricultural interests of the province the Manitoba Government has decided to increase loans advanced under the Rural Credits scheme. The limit now placed by the Act, \$5,000,000 will probably be increased to \$5,000,000, Hon. Edward Brown has announced. The policy of encouraging farmers to engage more extensively in stock raising by supplying well-bred dairy cattle on credit, will also be enlarged.

Saskatoon, Sask.—One hundred and fifty thousand bushels of wheat grown in the Saskatoon district were shipped to Shanghai and Yokohama during the month of January direct from Saskatoon elevators. This is the first wheat consignment for Asiatic points shipped direct from here.

Calgary, Alta.—In the four days ending February 10 between 7,000 and 8,000 tons of prairie wheat was inspected at Calgary and shipped west to Vancouver for ocean shipment to various parts of the world. This is a comparatively new trade development which has sprung up in the last year through successful experiments in shipping grain via the Panama Canal. Vancouver, B.C.—Fifty-three deep-sea ships, not including the big vessels that ply between Vancouver and San Francisco, is the record of the port of Vancouver for the month of January. For the whole of 1921 the number of deep-sea ships arriving in Vancouver was 389, compared with 336 vessels in the preceding twelvemonth. Coastwise local and foreign, the arrivals in 1921 were 11,485.

Armstrong, B.C.—Preparations for a heavy crop of celery are being made here. Hot beds, in which the spring plants for the early harvest are to be grown, are under construction and the first seeding will be done within a short time. Shipments of the 1921 celery crop, which was the heaviest in six years, started on July fourth. The gross returns from this crop averaged about \$700 an acre.

Member of R. I. C. Shot in Dublin Street

A despatch from Dublin says:—Sergt. Cotter, of the Royal Irish Constabulary, was shot while walking in the streets here on Thursday evening and died later in the hospital. His three assailants, whose identity is not known, escaped.

The most common form of color blindness is an inability to distinguish red.

REGLAR FELLERS—By Gene Byrnes

The Vogue!

in either laced-back or front-laced corsets may be had in the very wide range of

that we are now showing. Only reliable materials are used in their making. In particular the steels won't break or break.

Proper corseting plays a large part in fashionable and comfortable dressing today. Our salesladies will see that you get the proper model for your figure, and you will get a genuine Cc à la Grâce make, prices \$1.25 to \$4.75, all at new lower spring prices.

Prepare for Easter now. New Shipments Every Day.

Improvement in "Quality" and "Lower Prices" makes it encouraging to buy now.

EXECUTORS' SALE OF REAL AND PERSONAL PROPERTY
 in the Village of Glencoe, in the County of Middlesex

The undersigned Executors under the Will of Duncan McLean, late of the Township of Ekfrid, in the County of Middlesex, farmer, deceased, will offer for sale by public auction on the undermentioned premises on Wednesday, the 15th day of March, A. D. 1922,

the following Real Estate:
 Parcel No. 1. The South Half of Lot Number Ten in the Second Range South of the Longwoods Road in the Township of Ekfrid, containing one hundred acres more or less.

Parcel No. 2. The North Half of Lot Number Ten in the Third Range South of the Longwoods Road in the said Township of Ekfrid, containing one hundred acres more or less.

Parcel No. 1 has on it two frame barns, about twelve acres of wood land and an orchard. The land is all under pasture and is first-class grazing land.

Parcel No. 2 has on it a good frame house and a farm barn, about forty acres of first-class timber, and balance in pasture. The soil is clay loam and excellent pasture land. This land is situated about two miles from Ekfrid Station.

Terms of Sale of Real Estate. One-fifth of the purchase price to be paid at time of sale and the balance within one month thereafter.

There will also be offered for sale at the same time and place the following personal property:—1 horse, 1 set bobbleighs, 1 cutter, 1 hay rake, 1 mower, 2 plows, 1 hay rack, 1 lumber wagon, 1 top buggy (nearly new), 1 fanning mill, 1 buggy, 1 set harrows, double and single harness, hay fork, slings and ropes, 2 stoves, 2 tables, writing desk, 4 chairs, 2 beds and bedding therefor, carpet, chest of tools, sap buckets, quantity of wood, quantity of walnut lumber.

Terms of Sale of Personal Property.—Cash.
 L. L. McTaggart, Auctioneer; Archibald McLean and Isaac McLean, Executors; ELLIOTT & MOSS, Solicitors.

NOTICE TO CREDITORS

In the Estate of Duncan McLean, Late of the Township of Ekfrid, in the County of Middlesex, Farmer, Deceased.

Notice is hereby given, pursuant to "The Revised Statutes of Ontario, 1914, Chapter 121, Section 56," that all creditors and others having claims against the estate of the said Duncan McLean, who died on or about the twelfth day of February, A. D. 1922, are required to send by post prepaid or to deliver to the undersigned, solicitors for Archibald McLean and Isaac McLean, executors of the last will and testament of the said Duncan McLean, deceased, their names and addresses and full particulars in writing of their claims and statements of their accounts and the nature of the securities, if any, held by them.

And take notice that after the fifteenth day of March, A. D. 1922, the said Archibald McLean and Isaac McLean will proceed to distribute the assets of the said deceased, among the persons entitled thereto, having regard only to the claims of which they shall then have had notice, and that the said Archibald McLean and Isaac McLean will not be liable for the said assets or any part thereof to any person of whose claim they shall not then have received notice.

ELLIOTT & Moss, Glencoe, Solicitors for the said Executors. Dated at Glencoe, Ont., this twentieth day of February, A. D. 1922.

What a Glorious Head of Hair!

7 Sutherland 7 Sisters' Hair Grower is the Secret

In the New Models Studebaker Again Establishes Its Right to Leadership!
 1921 is past. It was a Studebaker year. 1922 looms ahead—uncertain in most things, but as certain in one as tomorrow's sunrise. It will be a Studebaker year.
 For the new models continue the intrinsic values that made 1921 a Studebaker year, PLUS the refinements suggested by another year of fine motor car building.
 Beautiful new bodies have been designed and built complete by Studebaker.
 Refinements have been made in equipment features that add to the comfort and the convenience of driver and passenger.
 Refinements have been made in mechanical details that make driving easier and the shifting of gears an operation as silent as it is simple.
 We are certain that the new models will maintain Studebaker leadership. We KNOW that you will be interested in them. We urge you to see them at our salesrooms.
 Look for These Features in the New Special-Six
 30-H. P., 31x3-inch motor with detachable head
 Intermediate transmission
 110-inch wheelbase
 Improved clutch makes the shifting of gears unusually quiet and easy
 Five passenger capacity
 New body of unusual roominess, built complete by Studebaker; finished in a deep, rich blue with refinements which make it even more beautiful than last year's model
 Large levelled plate glass window in rear of finely tailored top
 Cool ventilator controlled from dash
 Genuine leather upholstery
 Instruments, including 8-day clock, attractively grouped on dash
 Built-in thief-proof Yale transmission lock, ignition lock and lock on tool compartment in left front door—operated with same key
 Parking lights in lower corners of one-piece rain-proof windshield
 Windshield wiper
 Convenient tonneau extension light
 22x-inch cored tires

J. M. Anderson GLENCOE

On the information of Reeve Holman of Newbury, Neil Kinsman of the township of Ekfrid appeared before Magistrate D.C. McKenzie a few days ago and was fined \$10 and costs for being in an intoxicated condition. The Misses MacTavish of Friends Hospital, Frankford, Pa., formerly of Moss, were guests at a military ball and reception given at Philadelphia on Washington's birthday in honor of Gen. Sir Arthur Currie and Gen. John J. Pershing.

Sap was running good on Saturday, Sunday and Monday. Tapping of the sugar maples will be general this week, it is expected. Other evidences of spring are to be seen in the daily arrival of the robins and other migratory birds.

The C. E. Nourse Company are buying the material and making other preparations for the building of a large elevator and warehouse on the premises of the old American hotel and stables. The old buildings are to be removed and new buildings erected as soon as spring opens.

Last Wednesday was curlers' day at the Carman Arena, when three rinks from St. Thomas engaged in friendly contest with a like number of Glencoe rinks. The ice was in grand shape and the sport was greatly enjoyed. Glencoe won out in the afternoon and St. Thomas won out in the evening. On the whole Glencoe was five shots up.

Glencoe Odd Fellows held their annual "at home" on Tuesday evening at their lodge room, when about 60 including their lady and gentleman friends, enjoyed a few pleasant hours in cards and dancing and a short musical program. A solo by Miss Kathleen Crawford of Lobo, a vocal duet by the Misses Grant and a piano solo by Miss Margaret Morrison were greatly appreciated. A tasty lunch prepared by the ladies was served by the Odd Fellows' entertainment committee.

An entire trainload of Studebaker automobiles passed through Saturday evening over the Grand Trunk Railroad on the way to Montreal. This is perhaps the largest single shipment of motor cars ever made in Canada. The train consisted of 28 automobile box cars containing a total of 50 automobiles, involving nearly \$140,000. Very active buying is reported by Studebaker, which would be evidenced by its record-breaking shipment to Montreal.

The most brilliant and interesting of this year's social affairs was a dance given in the town hall, Thursday evening, March 3rd, by the ladies of Glencoe. About 100 guests enjoyed the dance program, for which music was discoursed by the Loughton orchestra. The hall was tastefully decorated in colors of orange and white, the main entrance being exquisitely arranged as a reception room. Lunch, served at 11 o'clock, was in keeping with the good taste otherwise displayed by the ladies in their efforts to please. Much credit is due to those who assisted in the general arrangements.

The Presbyterians of this community are looking forward with interest to the church and community conference to be held in the church here this (Thursday) afternoon and evening. Rev. Dr. Colin Young, superintendent of the non-Anglo-Saxon races of the West, will be the chief speaker. He will be accompanied by a number of prominent clergymen and laymen. The object of the conference is to further the spiritual objectives of the Forward Movement, and to increase the efficiency of the churches. Delegates are expected from all the neighboring congregations. The ladies of the congregation will serve supper for the delegates.

PERSONAL AND SOCIAL

Mrs. Rose Stewart is visiting friends in Paris. Mrs. Lewis Suliter is visiting her daughter Ruby, in Toronto. Ross McAlpine spent the week-end with his brother Woodrow.

TOWN AND VICINITY

Ed. Hamilton has taken a position as miller at Mustard's mill in Wryouling. The Misses McLean have bought the residence of the late Mrs. Hacker on King street. The annual meeting of the Glencoe Board of Trade will be held tomorrow evening at the town hall.

Rev. D. Robertson of Kilmartin and Rev. D. G. Paton of Glencoe will exchange pulpits next Sunday. The official board of the Glencoe Methodist church have invited Rev. R. J. Garbutt to remain a fourth year. J. R. Balkwill and W. Valt, Glencoe old-timers, were among the St. Thomas curlers who played at Glencoe last week.

Hugh Walker, Moss, who underwent a critical operation a couple of weeks ago, is making satisfactory recovery. J. E. Guild and daughter Mary of Sovereign, Sask., were guests for a few days last week at Hugh McCutcheon's.

Ernest Hicks was taken to London on Sunday afternoon and had a surgical operation for appendicitis, which was quite successful. Mrs. (Dr.) Nelson George of London will assist the choir at the song service to be held in Glencoe Methodist church next Sunday evening.

At the regular weekly meeting of the Presbyterian Guild, Rev. D. G. Paton gave an interesting address on "The Catacombs of Rome." A piano solo was given by Margaret Dickson.

Bruce McAlpine has taken a position with the Ontario Creameries in connection with their Glencoe business which has been handled with success for the past five years by D. R. Hagerty.

London Alerts and Glencoe juniors put up a fast and strenuous exhibition game of hockey at the Carman Arena Friday night. The game ended in a tie, 7 to 7, and in the ten minutes overtime period the visitors secured another goal, making the score 8 to 7 in their favor.

For sale—1 mower, 1 disk, 1 harrow, 1 riding plow, 1 walking plow.—Mrs. T. C. Reycraft, Glencoe. D. Lamont.

All ready for the spring trade with a full stock of harness and harness parts, at the lowest possible prices.—D. Lamont.

For sale—second-hand drills, disk harrows, cultivators; all overhauled and in good shape. Terms to suit.—D. M. McKellar.

For sale—2 cows, due to freshen in about a month; also 2 yearling steers. All choice stock.—Crawford Allan, Route 3, Glencoe.

McPherson & Clarke have a carload of 4 and 5-inch tile on track. Parties wishing to secure same can draw them off car.

One nearly new buggy, at a good reduction in price; also a big shipment of new buggies, just arrived, at new prices.—Wm. McCallum.

The new styles and new qualities and the new low prices on clothing make quick sales and pleased customers, at J. N. Currie & Co's.

For sale—building, to be removed, 24 x 46. Would make a fine stable and drive barn. Also one 2,000-lb. scale.—George Highwood, Glencoe.

A concert will be held in S. S. No. 1, Moss, on St. Patrick's night, 17th of March. A good program is being prepared. Lunch will be served.

For sale—brick building, with apple evaporator machine, at Middlemiss. Will sell complete or separate.—Frank Copeland, Highwood, Glencoe.

To rent—a brick house on Main street, Glencoe, with 2 acres of land, and stable which may be used as garage. Apply to A. B. McDonald.

I have one 10-20 Titan tractor and three bottom Hamilton tractor plow, used only a short time, for quick sale at half price.—Wm. McCallum.

I have a quantity of American Banner oats, free from smut and foul seeds, for sale. Sample may be seen at Central Billiard Parlors.—Roy Siddall.

Don't fail to see "Evangeline" at the opera house, Saturday evening, under the auspices of the Ross Mission Band. Admission—adults 50c, children 25c.

A play will be presented under the auspices of the Literary Society of S. S. No. 5, Ekfrid, on Friday, March 10th. Ladies are requested to bring lunch for two. Full particulars next week.

I have several used gas engines, guaranteed in perfect running order, at right price. Did you say cars? I have anything you may want in either new or used cars.—Wm. McCallum.

Millinery and Ready-to-wear Parlors.—A new shipment of ladies', misses' and children's dresses; a beautiful assortment of new blouses; plaid and striped sport skirts.—Mrs. W. A. Currie.

I wish to announce that I am selling for cash only on and after March 1st. As I have to pay cash, in order to do so I must have the cash. I would also like all bills paid by the 14th of March, as I am closing up the books for the year.

The Moss & Ekfrid Co-operative are prepared to pay cash for eggs. Grain of all kinds, also seed grain, for sale, and all feeds produced on the farm, and will pay cash for cream. We keep a stock of shoes, rubbers, tobacco, sugar, and in fact everything required.

AUCTION SALES

On lot 22, fourth range south of Longwoods Road, Ekfrid, (half-mile west of Tait's Bridge), on Thursday, March 16, at one o'clock: 1 heavy gelding, 6 years; 1 heavy gelding, 8 years; 1 strong third horse, 11 years; 3 fat steers, choice; 3 fat heifers; 1 cow, 8 years old, due June 15; 1 cow, 9 years old, milking good; 1 cow, 6 years old, milking good; 1 cow 4 years old, due October; 1 cow 3 years old, calf by side; 2 steers, 1 year old; 3 heifers, 1 year old; 3 calves, 2 months old; 4 choice ewes; 19 shoats; 1 brood sow, due April 15; 1 brood sow, due May 20; 1 Massey-Harris binder, 7-ft.; 1 Massey-Harris wide disk; 1 Massey-Harris drill; 1 Massey-Harris corn cultivator; lance-tooth harrow; Oliver riding plow; 1 wagon; set sleighs; buggy; combination hay and stock rack; DeLaval cream separator, No. 12; 1 Ford touring car, 1911 model; 1 set double harness; 1 set single harness; 1 set Scotch collars; 2 open collars; 1 galvanized oil barrel, 40 gals.; 1 barrel vinegar; 15 tons alfalfa hay; stack of corn, unshucked; 2 bushels alfalfa seed; a few cords of stovewood; 50 rock hens; logging chains. Stanley Doble, proprietor; L. L. McTaggart, auctioneer.

KILMARTIN

Alex. McCallum of Sombra spent a few days, visiting friends here. The death occurred at her home near Shields on Wednesday, March 1st, of one of the oldest pioneers of this section, Mrs. Barbara McVicar, widow of the late Donald McVicar, in her 88th year. The funeral took place to Kilmartin cemetery on Saturday afternoon.

Mr. Wilcott of Detroit spent Sunday at Alex. Dewar's. Geo. M. Secord of Brandon is visiting friends in this vicinity. The solo rendered by Mrs. Thompson of Strathroy in Burns' church on Sunday morning was much appreciated.

Mrs. Pierson and baby daughter of Detroit are visiting her parents, Mr. and Mrs. Alex. Dewar.

Miss Elsie McKellar of Detroit is spending a week at her home here. Mr. and Mrs. Thompson, Dunald Walker and daughter Allegra of Strathroy were guests at D. D. McLaughlan's over Sunday.

Mrs. John McAlpine of Woodslee left for Glencoe on Friday, just for Saskatoon to be at the bedside of her sister, Mrs. McDonald, who is seriously ill.

At the Y. P. meeting in Burns' church, Sunday evening, Mac, Leitch and Dugald Walker gave a report of the convention held in St. Thomas recently which they attended as delegates. Miss Christena Little also read a paper.

Left for Glencoe on Friday, just for Saskatoon to be at the bedside of her sister, Mrs. McDonald, who is seriously ill. Mr. Robertson will exchange pulpits next Sunday.

"Adeline" a most fetching dress in very fine quality, good weight, Botany series, adorned strikingly with a new allover design of silk heading, narrow band giraffe of self material with strapless ends; new flare sleeves; dress done in black. \$14.50 splendidly tailored.

Wright's Hardware Store

ANNOUNCEMENT

Present trade conditions make it absolutely necessary to make some changes in existing methods of doing business. Manufacturers and wholesale dealers have realized this, and in consequence have so shortened credit terms that in order to purchase goods in the right markets and at right prices settlements must now be made on a cash basis.

Then, again, the higher prices of goods now prevailing means a much larger investment of capital, and in an effort to keep prices within bounds the percentage of profit now is materially reduced when compared with profits obtained under normal conditions before the war, and in face of this reduction in profits the overhead expenses of doing business have increased.

During the past five years I can honestly say that no excessive profits have been taken in my business, and I am firmly convinced that the same can be said of the other retail merchants in our town.

After a most careful study of the situation, and with a firm conviction that the necessity for credit no longer exists, I wish to announce that after April 1st my business will be conducted on a CASH basis. Monthly account terms will, as usual, be given to corporations, factories, contractors, schools, churches, drillers, and customers building or painting houses. Goods ordered by phone or letter will be due at end of the month in which ordered, settlement of monthly accounts to be made by 10th of the month following purchase.

I trust that my customers and the public in general will appreciate the fact that I am taking this step in an endeavor to give them better prices and better service than would be possible under other conditions, and would solicit a continuance of the splendid patronage accorded me in past years.

Fills Its Silos With Sunflowers.

Sunflowers are to-day one of the most important silage crops in Western Canada, and one in which Ontario farmers are rapidly becoming interested. The rise of this once despised weed to a position of recognized value in the economy of a nation has been one of the most interesting agricultural developments of recent years.

Only a little while ago, one perhaps might have seen in Western Canada a few tall sunflowers nodding their big blossoms in some neglected fence corner where they had escaped the reaper or mower. Now on hundreds of prairie farms every summer broad fields of sunflowers make the landscape gorgeous with their masses of yellow blooms.

Sunflowers have greatly increased the number of silos. Since they have become a cultivated crop, the prairies are becoming dotted with silos. Every prosperous farmer has a silo or is planning to build one.

Time was when Western Canada was divided between wheat and cattle. The cattle pastured on the open range, the wheat was almost an exclusive crop. These were the days of the cattle king and the wheat baron. They were bonanza days when big farmers scored a fortune or a failure in a year.

To-day is the day of the small farmer and diversified farming in Western Canada. The settlers are raising not only wheat but other field crops and all kinds of live stock. Their prosperity is based on a diversity of farm products.

This era of diversified farming has helped the sunflower to its new place in agriculture. Silage is necessary as a winter feed for live stock and sunflowers have solved the silage problem for many farmers. There is a race between corn fodder and sunflowers for supremacy as a silage crop and sunflowers are gradually gaining to the front.

A conclusive test as to the relative merits of sunflowers, corn, oats and clover silage was recently made on a Canadian government experiment farm," said DeWitt Foster, superintendent of the industrial and resources department of the Canadian National Railways. "A herd of Holsteins was fed on the three silages two weeks at a time, each cow being given thirty pounds daily. On sunflower silage, each cow produced 27.24 pounds of milk daily of 3.6 per cent. butter-fat content and gained two pounds in weight per day; on peas and corn, 25.88 pounds of milk of 3.5 per cent. butter-fat and gained one pound per day; on corn, 26.4 pounds of milk of 3.4 per cent. butter-fat and gained 1.85 per day."

Two great advantages sunflowers have over corn as a silage crop. They cost much less to grow and their yield is very much heavier. On good land thirty tons of sunflowers may be grown to the acre. Corn is a hardy crop but sunflowers are harder. They will thrive on dry land where corn would be a failure. They flourish under soil and climatic conditions that would kill other crops. Twenty tons to the acre on poor land is not unusual. As for the cost of turning sunflowers into silage, one farmer who has been feeding his cattle sunflower silage for several years estimates that it costs him \$1.50 a ton to pack the sunflowers into the silo. Last year he fed his cows thirty pounds of sunflower silage a day and they averaged from forty to fifty pounds of milk a day.

The palatability of sunflower silage was a question at first which led some farmers to doubt its value. This is no longer a problem. It is sometimes a matter of a little difficulty to wean cows from corn silage when they have grown used to it and accustom them to sunflower silage. Corn perhaps has a daintier flavor to the bovine palate

than sunflowers. But the question is solved quickly by feeding the cattle a mixture of corn and sunflower silage and gradually changing to an exclusive sunflower diet. When they have once acquired the taste for sunflower silage, it is said cattle seem to prefer it to corn silage. At least they eat it with equal appetite and with equal physical benefits.

By making silage cheap and abundant, sunflowers have aided the farmers of Western Canada in a very material way. Silos practically double the stock supporting capacity of land, and sunflower silage enables a farmer almost to double his dairy, or beef herd without adding to the acreage of his farm.

Kill Your Quack Grass in the Spring.

Some six year ago I noticed a few patches of quack grass had worked their way into one of my fields from the highway. If I had the same condition to contend with now I would dig them early in the spring when the ground is soft, and burn the roots. It would have taken less than a day, and would have saved me considerable bother and expense. A person can dig a lot of quack grass in a day if it is just in patches. I had had no previous experience, however, so I tried killing it with a hoe and then tried pulling it. Then I seeded the piece to clover and let it go.

My first success was three years ago, when I set a somewhat infected piece to raspberries, and raised a crop of cucumbers between the rows. The cultivation was very thorough and both the berry plants and cucumbers made a vigorous growth. I do not remember thinking about the quack grass at all as we cultivated (my man did part of the work), but along in the summer it occurred to me that I had not seen any in that piece for a long time, and I began to wonder just what I had done to destroy it. I do not know yet, but I had a theory that I felt sure of, so I plowed up my clover piece the next spring with a determination that in the fall there would not be a spear left.

I planted the field to silage corn, hilling it so I could cultivate it both ways and hand-hoe it. Our corn grew very high with lots of leaves for shade and we cultivated and hoed continually. But when the corn was in the silo and we could look over the field, I could not see that we had hurt the quack grass much. I sowed rye immediately to be plowed under in the spring for another crop of silage corn. My enthusiasm about getting rid of the pest was getting pretty well down, but I put in half a day digging out-lying patches, and made up my mind to do the best I could with the cultivator and the hoeing go.

We cultivated before the corn was up, and three times more as rapidly as seemed advisable, and then rose bugs, leaf hoppers, grape berry moth, etc., took up our time. But this year when the corn was in the silo I could not see very much quack grass in the field. What there is left I can dig up in a few hours in the spring with a potato fork.

I have noticed while digging quack grass at this time, that many of the root stalks were dead, leaving only tender sprouts that seemed easy to destroy. It has also surprised me that wherever I dug these patches in the spring, that they were entirely destroyed, though it did not seem possible that I had gotten every root. It seems, therefore, that this must be the plant's most vulnerable time. The vitality of the root-stalk is at its lowest, after going through the winter, and it then makes a rapid growth, storing up food and moisture against the farmer's cultivator and hoe and the summer drought until it is nearly invincible; and we must destroy the plant if at all, before this new growth takes place.

hard to clean. The board floor is the driest and warmest but should have a concrete foundation to keep out rats. In making a concrete floor it pays to build it up on coarse field stone or cinders to prevent dampness. Then place strips of roofing paper in the cement and it makes a moisture-proof floor. On the cement floor it is possible to do thorough cleaning.

The use of a straw loft in a poultry house helps to prevent damp conditions. Such houses are cooler in the summer and warmer in winter. Hollow tile is considered a better material for poultry house walls than cement, but not as dry as lumber.

A Dangerous Practice.

Please permit me to call the attention of your readers to the dangerous practice of throwing boards down with nails sticking from them, and leaving them lying around, a constant danger to anyone with worn, thin shoes, or barefoot children in summer. This is a very common habit and causes many deaths from tetanus or lockjaw unless attended to promptly and skillfully.—A. L. P.

Milk is baby's building material.

The springing season will soon be at hand. Have your equipment and material ready.

A Garden for Every Home.

There are two ways in which the residents of cities, towns, and villages can make the surroundings of their dwelling attractive and thus benefit not only themselves but also the entire community. The first is by cleanliness and tidiness in their surroundings, including the back yards, and the second is by paying some attention to the planting of shrubs and flowers. At the recent convention of the Experimental Union held at the Ontario Agricultural College, the president of the Union, Mr. J. B. Spencer, laid particular stress upon the part that horticulture could be made to play in the improvement of the farm and urban dwellings, and indeed in the beautification of the whole countryside. He said that not only were the Horticultural divisions of the Ontario Agricultural College, Guelph, and of the Macdonald College, Quebec, ready to render every assistance in pursuance of this object, but that the Department of Agriculture at Ottawa through the Dominion Horticulturist, Mr. W. T. Macoun, was prepared to give instruction and advice. The lessons acquired at the Experimental Farms during the past forty years were at the disposal of all enquirers by means of reports, circulars and bulletins, which could be had by application to the Publications Branch of the Department of Agriculture at Ottawa. In these were given much information as to the characteristics, planting and cultivation of both ornamental and useful plants. There was also a lantern slide lending service, with accompanying information for lectures, on the planting and care of farm home grounds, available to responsible people for use in addressing meetings. The speaker urged that no opportunity should be lost by horticultural societies in helping, aiding, and assisting the beautification of urban and rural points in this way. Communities in Ontario were advised to take advantage of the new Community Hall Act, an Ontario Act which made provision for encouragement to horticulture. Ottawa, St. Thomas and St. Catharines were typified as cities that had given special attention to beautification through the laying out of land with plants, shrubs and flowers.

Planning your work so that it can be done with the least possible effort is not laziness but good planning. Keep your tractor and keep it oiled. Clean off all dirt and grease from the outside of the machine. Wipe first with kerosene and then with gasoline.

Tractor Tips.

If you would be safe rather than sorry, don't overload. To run a straight furrow you must look a long way ahead. Read, study and commit to memory the book of instructions. Carelessness and abuse are at the bottom of most tractor troubles. Don't play with your tractor. Be serious. Make power farming a business.

Housing the Tractor.

The tractor represents an investment which should be carefully conserved. Protection from the elements is absolutely necessary if efficiency is to be maintained. Too many farmers leave their tractor exposed during the winter months. Proper protection will aid materially in prolonging the life and usefulness of the machine. Naturally the tractor will be used primarily for best work during the winter time, and if possible provision should be made for housing it in a dry and well lighted building adjoining the work shop or conveniently near it so that it may be readily accessible and in good condition whenever it is desired to use it. In laying out the tractor the following precautions will insure its being kept in good condition:

1. After running it into a well protected storage room and before stopping the motor, slowly pour about a pint of good clean oil into the bowl of the carburetor and continue running until the oil has all been sucked

When the Son Marries

BY HILDA RICHMOND.

Every real mother likes to send her daughter forth on her wedding day with as nice an outfit as the family purse will afford, but many good mothers are really ignorant of the fact that their sons should have certain articles, as well as should the prospective bride. Many families innocently suppose that if they give the young man a sum of money to help buy his farming equipment and furniture, nothing else is necessary. Indeed many of them, and well-to-do people at that, provide nothing for their sons to take to their new homes. This comes about through lack of knowledge rather than stinginess many times.

One bride was amazed when she looked over her young husband's clothes to find that he owned nothing but garments that were thriftily patched and repaired by his frugal mother. Of course, he had a new suit to be married in, with new overcoat and new things from the skin out, but his entire wardrobe, which was small, was in poor condition. Now that mother would have given up her life for that boy if it had been necessary, but she did not hesitate to humiliate him by sending him forth with such an outfit, when she could well afford to make or buy new for the young man who had faithfully worked on his father's farm since returning from high school.

The mother of the young man about to be married should see that he has enough undergarments, night shirts, socks, shirts and personal articles, such as handkerchiefs, ties and little things, to last several years. Young men starting in life find many places for their hard-earned dollars, and the boy who does not have to pay out money immediately for working clothes and underwear is very grateful to the mother who foresaw the difficulties and light places of the first years of married life.

Every young man should have his own bedroom outfit to take from his old home with him. Perhaps the bride

into the motor. Then shut down the motor. The object of this is to coat the friction surfaces with a film of oil to prevent rust.

2. Open all drain cocks on the cooling system. Do not forget to drain the water tank and water line in a kerosene-burning machine. Also drain the air washer.

3. Clean off all dirt and grease from the outside of the machine. Wipe first with kerosene and then with gasoline.

4. At your first opportunity go over the tractor carefully and put it in good shape for the spring work.

Parents as Educators

Developing Good Judgment in Children

BY EDITH LOCKRIDGE REID.

Much of the inefficiency throughout the business world to-day is directly due to the lack of proper early training in the home. No business system or course of salesmanship and technique can ever quite overcome the habits and mind development acquired while the individual was passing through childhood and the most impressionable years of his existence.

One Monday morning I discovered that I was out of laundry soap because Jennie, our laundress, had not reported the fact before she left the previous week. There was just time for Robert to go to the store before school. "Get five bars of M. B. Laundry Soap," I told him as he started off. Meanwhile Jennie got around waiting, all because she hadn't told me about the empty soap box the week before. However, while this fact is not exactly the point I am making in this article, yet nevertheless it proves that Jennie had not been taught to use her judgment when she was small.

But to go back to Robert. In the course of time he appeared in the kitchen with empty hands. I had told him to get M. B. Laundry Soap but the store had none, and although the grocer wanted him to bring the next best he decided not to spend his money for something I hadn't told him to get. Now Robert is nine years old, and he knows that the washing could not be done until we had the soap. But there was only twenty minutes between then and school time, so I dispatched Jennie herself for the soap and used ten minutes in trying to impress upon Robert when NOT to conform to implicit obedience. I showed him how to reason that the washing was soaking. And that there wasn't any soap in the house. Jennie was waiting. The clothes had to be washed. And to get them clean we must use soap.

Now it would have been much easier to have said, "Oh, Robert, run along to school; you do use such poor judgment." But some day Robert is going to work for an employer. And that employer will not always be on hand to tell him what to do when the right kind of material is not available. That employer will hire him for that very purpose, namely, to do his thinking for him and take some of the responsibility of his department. We can't always get the kind of soap we ask for in this world, and we must make quick decisions and "wise ones" in choosing the next best thing.

But I was rewarded the very next

THE CHILDREN'S HOUR

What Happened to the Birthday Cake.

"It will need four eggs and a cup of sugar and some milk and some flour," mother said as she went to the pantry to get the yellow mixing-bowl and the sifter to make Barbara's birthday cake.

"It needs sugar, too, for the frosting, and please make very thick frosting, mother dear," Barbara begged. She was standing beside the kitchen table, watching, for she was going to be six years old in just a few days. It was to be her birthday cake, rich and sweet, and shining on the supper table with six pink lighted candles.

"I am afraid that the cake and the frosting together will use up all our sugar," mother said, as she came back. "I wonder," she went on, with just a little bit of worry in her voice, "if we could manage with two eggs instead of four. Eggs cost so much now."

"Well, we have to make a birthday cake, don't we, mother, because I always cut it and share it?" Barbara said. Mother looked down in Barbara's kind little face and she thought a moment, too. That was the wondrous part about mother and Barbara, they so often thought the same things. Then they said something to each other, laughed, and hugged each other, and mother put away the big yellow mixing-bowl and flour sifter.

The next day was Barbara's birthday, and two people who didn't have birthdays had surprises.

Timothy, whose mother did the washing, had been very ill for a long time. He was getting better, and could sit in the big rocking chair, all wrapped up in a quilt, and try to smile out through the window when Barbara passed. Barbara stopped at Timothy's door on the morning of her birthday. She had a basket on her arm. She took from it a bottle of creamy milk and a bag that held four white eggs.

"Here is a part of my birthday cake for you, Timothy," Barbara said. "It will make you get well faster." Granny Blake was just putting her kettle on her stove when she heard a knock at the door of her little house. When she opened it she saw Barbara, who loved Granny Blake so much. No one could make such nice rag dolls as Granny, and she was always cheerful and smiling, even when she had hardly enough coals to make her kettle boil.

Barbara still carried her basket, and she took a package of sugar and a freshly baked loaf of wheat bread out of it.

"Here is a part of my birthday cake for you, dear granny," Barbara said. "This is sugar for your tea, and mother made the flour into a loaf of bread for you to eat with it."

Then Barbara went home almost as happy as if she had eaten a large piece of frosted birthday cake. But when the day was almost over and it grew dark, Barbara began to wish that that she could see the six pink candles shining for her birthday. She went slowly in to supper, thinking of them. And, oh, what a surprise she found there!

In a rosy circle in the middle of the table shone six pink lighted candles set in six pink rosette holders. In the centre of this birthday circle of lights was a bowl that held six beautiful pink roses from the garden, and beside Barbara's plate was a parcel wrapped in pink tissue paper. When Barbara blew out the candles and opened the parcel she found a pink hair ribbon for a birthday present.

"What a beautiful birthday this has been, mother," Barbara said, "without a birthday cake!"

Your Agricultural Attitude.

Trouble is the cheapest commodity on the market at the present time. Everybody has an over-supply of it. But money is scarcer than the proverbial hen's teeth.

However, two years ago money was easy getting and a fellow was lucky if he tried to borrow trouble. Such attitudes of mind are the result of mob psychology which, in other words, means, we do it because everybody else does it. Such thoughts often seem justified, but they are not.

The man who dares to look through the present and to think or do different than the crowd, is scoffed at at the time, but frequently becomes famous in the future because of the satisfactory outcome of his attitude.

Big business men have made fortunes by buying "when everybody is selling and selling when everybody is buying. So can we profit if we become optimistic when everybody else is pessimistic and pessimistic when others are all optimistic.

Your present agricultural attitude is of vast importance to you and others. If you sit and bemoan the state of affairs you certainly are not doing much to better conditions. Even though your potatoes failed, your fruit trees did not bear and your corn brings next to nothing, do not plant less, feed less or spray less. But, rather, plant as much, feed as much and spray as much as ever. Have faith that the near future promises improved conditions for the farmer.

We cannot urge you too strongly to farm as nearly normal as possible this year. It does not pay to lay down on the job.

Punjab comes from two Persian words meaning five rivers.

Poultry

Salt is not necessary in poultry feed but half a pound to 500 pounds of mash seems to improve the flavor. A little charcoal is good for the digestive tract as an absorbent. Oyster shells are necessary to make strong egg shells, and grit as a grinding material is very important.

In feeding scratch grain it is best to give about one-fourth in the morning and three-fourths at night. This keeps the birds hungry in the morning so they will eat more of the mash containing animal proteins. The results from dry mash seem as good as from wet mash. If wet mash is used it should be given at noon. Mr. Ferguson says that hens do not need water if they have plenty of milk.

A southern exposure is best for the hen house. It should not be in a low place where air drainage is lacking and fog will settle about the house, or on the highest hill where there is too much exposure to the wind.

A sandy loam is the best soil about a hen house. It should have a gravelly sub-soil that is easily drained. On a heavy soil there is greater danger of contamination. The poultry house floor is of great importance. The earth floor is cheapest but must be dry and it may become dusty or damp and is

Sheep Notes

When Ewes Refuse To Own Lambs.

A ewe frequently refuses to own her lamb. She should be confined to a small pen. If she shows a disposition to fight her lamb and refuses to allow it to suckle, a stanchion should be constructed in one corner and the ewe closely confined until she makes up her mind to mother her offspring.

This sometimes takes a week but invariably she will submit and give little further trouble. When a ewe drops

twin lambs and one weaker than the other, the shepherd should be on hand to assist the weaker one until able to care for itself. Sometimes a ewe dies in lambing and leaves a strong, healthy offspring. If there is another ewe in the flock that has lost her lamb she may be induced to act as a foster-mother. It is profitable to rear motherless lambs on cow's milk.

Better overhaul the incubator.

Says Sam: Tell me what your family does after supper and I'll tell you where your boys and girls are.

TRY THEM IN YOUR GARDEN

DE LUE'S GOLDEN GIANT SWEET CORN, one to two weeks earlier. Ear half as long again and 12 to 14 rowed when Golden Bantam is 8 rowed. Better quality, more productive. Pkt. 25c. 1/2 lb. 40c. 1/4 lb. 65c. 1 lb. \$1.00 postpaid.

NEW ALBINO TOMATO. Pure white in color, containing no acid. Pkt. 25c. postpaid.

New York Head Lettuce A leader as a summer head lettuce. Pkt. 10c. or 50c. 2 or 3 65c. postpaid.

JOHN A. BRUCE & CO.

HAMILTON, CANADA ESTABLISHED 1850

"SEEDS THAT GROW"

MANUFACTURE OF ASBESTOS PRODUCTS

HEAVY EXPORT OF THE RAW MATERIAL.

Monopoly of World's Supply Should Lead to Monopoly of Manufacture.

Canada offers advantageous industrial openings in many important lines of manufacturing, and probably none more so than in the manufacture of asbestos products. It has long been an anomaly that the Dominion, which ranks as the world's principal producer of asbestos, has largely behind in the matter of engaging upon the manufacture of asbestos products. Practically the entire demands in Canada for goods manufactured from asbestos have been satisfied from the United States manufacturing plants. Canada, with 88 per cent. of the world's possession of asbestos deposits, is exporting 99 per cent. of the raw material she mines to the United States and buying back her own product in a manufactured form.

Though the urgency of bettering this state of things has long been recognized, efforts to this end have never been aggressive or strong, largely because the necessity in establishing asbestos manufacturing industries on a sufficiently large scale lay in capital which was lacking. Nevertheless, a few manufacturers who have successfully entered upon the manufacture of asbestos goods, have been successful to an extent in increasing Canada's exports of manufactured asbestos. Even though little has been done in materially cutting down the volume of imports in these goods.

Canada's production of asbestos and asbestos in 1920 amounted to 197,321 tons, the deposit of crude and milled fibre being 157,994 tons. About seven per cent. of this was shipped direct to England and three per cent. went to Italy, Japan, France, and other countries. Only about one per cent. was retained in Canada for manufacture. The remainder, as has been noted, went in its raw state to the United States. It is significant that a proportion of the shipment to the United States went to the South American trade by which transaction Canada must obviously have been a direct loser. In 1914 the amount of manufactured asbestos products imported into Canada was valued at \$467,160, and this had, by 1920, increased to \$212,042. In the same period manufacture of asbestos goods, exported from Canada, rose from \$23,316 to \$232,316, which illustrates an expansion of some magnitude in the industry. The value of asbestos produced in 1920 was over \$14,000,000; it has been estimated that if this worth of raw materials had been fabricated in Canada, its value to the country would have approximated \$194,000,000.

In Canada there is an awakening to the fact that considerable revenue and industrial development and employment is being lost to the Dominion through the heavy export of raw asbestos. The failure to take advantage of manufacturing at home both for domestic consumption and the export trade; there has been, however, some endeavor to extend the Canadian industry of the manufacture of asbestos products.

Additional Manufacturing Plants. Previously there was only a single plant, at Lachine, Quebec, where asbestos slating, shingles, sheeting, mill board, paper corrugated asbestos sheets, and air-cell pipe coverings were made. The production of the plant was for both local and export trade, consisting in the main of asbestos boards. A new development, however, is the construction of a large manufacturing plant at Asbestos, Quebec, where for the first time in Canada asbestos products on a large scale will be produced. The products will include asbestos textiles, brake lining, asbestos shingles, paper, roofing, pipe coverings, etc. Another industry manufacturing asbestos products has been located at East Broughton. This, it is hoped, will mean the beginning on a larger scale to the industry of asbestos manufacturing in Canada. In 1920 Canada exported to the United Kingdom, United States, Australia, France, Italy, Japan, Spain and other countries, 152,740 tons of crude asbestos worth \$11,521,536.

In the Province of Quebec, where the principal asbestos deposits are located, excellent opportunities to build up a home industry in the manufacture of asbestos products exist. Not only asbestos but also the other important, refractory, non-conductive material, magnesite, is found in the same vicinity. These deposits lie in close proximity to each other and to the most densely populated areas of the province, from which abundant and cheap labor can be secured as well as an assurance of expanding home markets.

Until Canada can effect this and see her own plants rise to the exclusion of her present volume of imports, she will continue to lose a considerable revenue in two directions: whilst a continuation of the support of the industries of other countries means the stifled growth of her own. With a virtual world monopoly of the supply of asbestos she should, in all justice, have the same exclusive possession in manufacture from them, and this time and capital will bring about.

ROSY CHEEKED HEALTHY WOMEN

Know the Full Value of Rich, Red Blood.

Robust, healthy, red-cheeked women seldom worry. Their condition of mind and body is such that they can rise above the causes that bring melancholy and brooding. It is the woman with weak, watery blood who is thrown into nervous unrest by little annoyances that grow so great in the imagination that it seems as if she must scream to relieve her feelings.

A woman's health quickly falls her when her blood becomes thin and weak. The stomach is disordered and all appetite vanishes. The nerves lose their strength and so sleep is not regular and does not refresh the body. A state of weakness arises that increases gradually and gives further cause for worry. Good blood is necessary to every woman who has grown to the pale and weak, and in this condition Dr. Williams' Pink Pills will be found of great benefit, because they enrich and purify the blood. Women who are anemic, suffer from indigestion, palpitation, headaches and nervous attacks will find new strength through a fair use of these pills. Among the women who have proved the value of this medicine is Mrs. Enos Levy, Hackett's Cove, N.S., who says, "About two years ago I began to fall in health and was very weak. My constitution was all run down, and my blood was weak and watery, as was manifest every month. I had heard of Dr. Williams' Pink Pills and what they would do for the blood, and being in such a low condition I decided to try them. By the time I had finished the fourth box I found to my great delight that I was a great deal stronger, and my blood a deep red color. I have a lot of work to do besides taking care of my little one, and with my good health I enjoy it, and I can truthfully say I owe this condition to Dr. Williams' Pink Pills."

Dr. Williams' Pink Pills can be obtained through any medicine dealer, or may be had by mail, post paid, at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Avenging Kitchener.

The London Times tells in a recent issue how the British steamship, Palmbranch—laden most conspicuously for her name, with ammunitions, poison-gas, and high explosives—destroyed in the Arctic Ocean the submarine which sunk the cruiser bearing Lord Kitchener.

It was a quarter to four of a clear, sunny afternoon. Land had already been sighted about fifteen miles distant. Captain Malling, the master, had received no warning that submarines were about. But he was an alert officer who left nothing to chance, and had his ship and crew organized to a man-of-war's pitch. The gun's crew were standing by the gun, an American 13-pounder, with a cartridge inserted but the breech open, and they were ready for anything.

Suddenly one of the gun's crew saw a stationary periscope sixty yards distant on the port beam. At the same moment a white track of bubbles revealing a torpedo's course raced towards the ship. The track passed two or three feet from her stern; the torpedo had gone under the ship, running too deep to strike her. The men at the Palmbranch's gun slammed to the breech and laid their sights to zero. As they did so, the conning-tower of a submarine rose on the port quarter, barely forty yards away. Then the deck itself emerged from the water.

Naval gunners are rarely gifted with such a target, at point-blank range. They accepted it with due thanksgiving. A flash, a roar; the Palmbranch's first shell struck the U-boat at the base of the conning-tower. Just where it joined the deck, and tore great gaps and rents. Five seconds later a second shell burst against the waterline forward. Two rounds with a small gun. They sufficed. The submarine, which appeared to be stopped, rolled slightly. Then, taking a heavy list, and tilting on end with stern high out of the water, she sank vertically out of sight.

Point.
Teacher—"William, what is income tax?"
While—"It is when you sit on a tack."
Teacher—"No, I'm afraid you don't see the point."
While—"You don't sit, you feet it."

Surnames and Their Origin

MacCAUSLAND
Variations—MacCaoslan, Caslon, MacAslan, MacAnselan.
Racial Origin—Scottish.
Source—A given name.

You would not think, perhaps, that the family name of MacCaosland had anything to do with the given name of Anselm. But it has.
The forms MacCaosland and MacAslan appear to be the ones most frequently met with to-day, though you will often run across the others. These names are all derivatives of the Gaelic given name of "Anselan," which is equivalent to "Anselm." The latter being the Teutonic form, with "Anselmus" as the Latin rendition.

It is interesting to note in this connection that many of the names have been developed independently in the Gaelic and Teutonic tongues, but along virtually parallel lines, and when you trace back the connection you do not find it until you arrive at that prehistoric and misty speculative period before the Celts and the Teutons branched off from the parent Aryan stock and subsequently split again into many races and nations. For comparative analysis of Celtic and Teutonic tongues as well as the Latin and Greek shows that a large proportion of their fundamental vocabularies, stripped of their variations, inflections and changes, are from the same word roots. In other cases, however, given names have been imported from one language into another, and subsequently have developed into different forms.

The family name of MacCaosland or "MacAnselan," which is the Gaelic form, appears to have developed in the Clan Buchanan of the Scottish Highlands.

PRYOR
Racial Origin—English.
Source—A title, or a nickname.

Here is another of the type of family names which cause the evi-minded of limited knowledge concerning medieval social conditions to smile knowingly and refer to what is termed "the bar sinister," in short, to illegitimacy.

What the origin of a family name is in the specific, individual case, only a dependable genealogical tracing of it back to its source will establish.
About the family name of Pryor or Pryour, this much is certain: It was in most cases founded upon the word "prior," with its well-known meaning in religious life. The explanation that the name was first borne by actual children of priors assumed to have been bound by vows of celibacy, is plausible, but it doesn't bear deep analysis, any more than does the shallow theory that all kings are descended from kings, all earls from earls, or all Keyzers from Kaisers. There weren't enough kings, even if you counted in those of Ireland, to account for all the kings among English-speaking races to-day.

The human brain contains 300,000,000 nerve cells.
Cape Horn was so named by the Dutch navigator who discovered it in 1616, and called it Cape Horn after his birthplace.

sent from kings, all earls from earls, or all Keyzers from Kaisers. There weren't enough kings, even if you counted in those of Ireland, to account for all the kings among English-speaking races to-day.

The alternative, and undoubtedly the true explanation in the vast majority of cases, is that men were given such nicknames as "the prior," "the king," and so on, either from peculiarities of bearing or from taking part in the very popular "mystery plays" which in medieval times were held in every little village.

Ice Can Now Be Compressed.

Experiments recently made with enormously high pressures—up to 20,000 atmospheres, or the equivalent of 300,000 pounds per square inch—have developed results as remarkable as they were unexpected. Up to now 3,000 atmospheres was the maximum tried. Under a pressure of 6,000 atmospheres mercury passed through walls of massive steel.

Hitherto water has been supposed to be an incompressible substance, but under 12,000 atmospheres it was reduced 20 per cent. in volume. Nor was it previously known that liquids could be made to freeze by mere compression. Water, when the pressure is pushed high enough, turns to ice, no matter how high the temperature. Water at 180 degrees Fahrenheit will freeze under a pressure of 20,000 atmospheres. Ice, under a pressure of only 2,000 atmospheres, collapses 18 per cent. in volume, assuming a different appearance and new physical properties. A piece of it will sink in water. If more pressure be applied another kind of ice is produced. Phosphorus under 12,000 atmospheres turns black and assumes an appearance resembling graphite. Under the same pressure soft rubber becomes harder than mild steel.

Inasmuch as all materials far down toward the centre of the earth are subjected to tremendous pressures, the laboratory observations above quoted must be particularly interesting to geologists.

KEEP LITTLE ONES WELL IN WINTER

Winter is a dangerous season for the little ones. The days are so changeable—one day bright, the next cold and stormy, that the mother is afraid to take the children out for the fresh air and exercise they need so much. In consequence they are often cooped up in overheated, badly ventilated rooms and are soon seized with colds or gripe. What is needed to keep the little ones well is Baby's Own Tablets. They will regulate the stomach and bowels and drive out colds, and by their use the baby will be able to get over the winter season in perfect safety. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Payment Deferred.
Alice, the five-year-old, entered the general store of Mr. Smith, with whom she was a great favorite, and announced that, to make her dolly a dress, she needed "some red, blue and yellow."

When Mr. Smith had brought out the required amount of material she asked how much it was.
"That will cost you just one kiss," replied the storekeeper.
Whereupon Alice answered: "Mamma will come in and pay you to-morrow."

Green.
"Your grandfather lived to a green old age, didn't he?"
"I'd certainly call it that. Why, the old gentleman allowed himself to be outrageously swindled a dozen times after he was seventy."

MONEY ORDERS.
It is always safe to send a Dominion Express Money Order. Five dollars costs three cents.
The harp is believed to have originated from the hunting bow, the tightly stretched string of which will emit a musical note.

Minard's Liniment prevents Spanish Flu.
Here is a Useful Tree.
Probably no other tree in the world, unless it is the bamboo, is useful in so many different ways as the carnauba, a species of palm that grows in northern Brazil. Not only is the tree pretty, says Mr. Harry A. Franck, but it is useful from root to crown.

Fibres and wax from the leaves were used to make the first phonograph records and some of the first electric light filaments. The wax indeed is one of the important exports of Brazil. To get it the natives brush the leaves until the wax falls from them in the shape of a white powder. The powder is later worked up into many forms, from seals to shoe-polish. The fibres make their candles of it. The fibres of the leaves they weave into hats, mats and baskets. They also make brooms of them, and they use the leaves to roof their houses and to make palm-leaf fans. Useful fibres also come from the inside of the trunk, the iron-hard wood of which they use to make many things, from musical instruments to water pipes. From the roots they make a purgative and a kind of farina that is of inestimable value to them in times of famine.

The pulp of the fruit has an agreeable taste; and from the seed, which is of agreeable taste when roasted, comes a saccharine substance that can either be used as food or turned into wine or vinegar. Finally they use the seed as birros; that is, the knobs to which the lace makers tie the ends of their threads. The clickety-click of the birros can be heard all over northern Brazil.
No one is useless in the world who lightens the burden of it for anyone else.

BLUNDEN IS BACK ON JOB EVERY DAY

DARTMOUTH CITIZEN FEELS YOUNG AND ACTIVE AS A BOY.

Was Losing Much Time From Work Because of Stomach Trouble But Eats Anything on Table Now.

"Think of it, a short time ago I could hardly push a plane or use a hand saw and to-day I feel as young and active and vigorous as I ever did in my life," said Harry J. Blunden, well known carpenter of Hester St., Dartmouth, N.S.

"For three years before I started taking Tanlac I didn't know what it was to have a single day's good health, and for the last two years my stomach has been in such a disordered condition that I was just in misery all the time. Nothing in the world will pull a man down as quick as not-being able to digest what he eats, and I lost weight and strength all the time. "I am on the job now working every day and feeling fine all the time. I certainly enjoy making the shavings fly now. Tanlac has just made a brand new man out of me."

Tanlac is sold by all good druggists.—Advt.

Tone Producer for Violins and Similar Instruments.

It is said that a modern violin, of any ordinary make, can be converted into the equivalent of a Stradivarius, or other violin of Italy's golden days of string-instrument making, by the attachment to it of a newly invented tone producer. The device is applicable to any kind of string instrument, is made of specially prepared wood, and is so constructed that it conforms to the shape of the instrument to which it is attached.

Mother, Quick! Give California Fig Syrup For Child's Bowels

"Even a sick child loves the 'fruity' taste of 'California Fig Syrup.' If the little tongue is coated, or if your child is listless, cross, feverish, full of cold, or has colic, a teaspoonful will never fail to open the bowels. In a few hours you can see for yourself how thoroughly it works all the constipation, sour bile, and waste from the tender, little bowels and gives you a well, playful child again.

Millions of mothers keep 'California Fig Syrup' handy. They know a teaspoonful to-day saves a sick child to-morrow. Ask your druggist for genuine 'California Fig Syrup' which has directions for babies and children of all ages printed on bottle. Mother! You must say 'California' or you may get an imitation fig syrup.

The coast of Heligoland, which measured 120 miles in A.D. 1300, had been eroded to three miles in 1900 by coast erosion.

THIN, FLAT HAIR GROWS LONG, THICK AND ABUNDANT

"Lapocaine" is only 35 cents a bottle. One application ends all dandruff, stops itching and falling hair, and, in a few moments, you have doubled the beauty of your hair. It will appear a mass, so soft, lustrous, and easy to curl. But what will please you most will be after a few weeks use, when you see new hair—fine and downy at first—yes, but really new hair growing all over the scalp. "Danderine" is to the hair what fresh showers of rain and sunshine are to vegetation. It goes right to the roots, invigorates, and strengthens them. This delightful, stimulating tonic helps thin, lifeless, faded hair to grow long, thick, heavy and luxuriant.

SO WEAK COULD HARDLY DO ANYTHING

Now Looks After Home, Thanks to Lydia E. Pinkham's Vegetable Compound

Meaford, Ontario—"I was so weak I could hardly do anything and my back seemed the worst. I read so much about Lydia E. Pinkham's Vegetable Compound for women that I thought I would try it. I feel that it did help me for I am looking after my own home now and seem quite strong again. I have recommended your Vegetable Compound to quite a few friends and you can use my name if you wish to do so.—Mrs. H. PORTER, Box 440, Meaford, Ontario.

In your own neighborhood there are doubtless women who know of the great value of Lydia E. Pinkham's Vegetable Compound. Women everywhere, either by word of mouth or by letter, recommend this splendid medicine. Those who have suffered from female weakness, change of life, and similar troubles know of the wonderful relief brought to them by the Vegetable Compound.

CASCARETS 10¢

For Constipated Bowels—Bilious Liver

The nicest cathartic-laxative to physic your bowels when you have Headache Biliousness Colds Indigestion Dizziness Sour Stomach is candy-like Cascarets. One or two tonight will empty your bowels completely by morning and you will feel splendid. "They work: while you sleep." Cascarets never stir you up or gripes like salts, Pills, Calomel, or Oil, and they cost only ten cents a box. Children love Cascarets too.

ASPIRIN

WARNING! Say "Bayer" when you buy Aspirin. Unless you see the name "Bayer" on tablets, you are not getting Aspirin at all. Why take chances?

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

- Colds
- Headache
- Rheumatism
- Toothache
- Neuralgia
- Neuritis
- Earache
- Lumbago
- Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark registered in Canada of Bayer Manufacturing of Monach, a subsidiary of the Bayer Corporation. While it is well known that Aspirin means Bayer manufacturing, to meet the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

He beat the train to the crossing a good many times

"It's never touched me yet," he explained when they pointed out the risks.

That's the answer a good many people make when they hear that the drug element in tea and coffee often harms nerves and health. They say it's never touched them yet.

Sometimes they only think it hasn't.

Wakeful nights, drowsy days, headaches that keep coming more frequently—often are blamed on bad luck when the blame belongs on bad judgment in taking needless chances with harm.

Over on the safe side is Postum, a pure cereal beverage, delicious and satisfying—containing nothing that can harm nerves or digestion. Thousands who used to try their luck with tea or coffee are enthusiastic over having found safety and satisfaction in Postum.

It's worth your while to make the test with Postum for ten days. Postum is a delightful drink for any member of the family, at any meal.

Your grocer has both forms of Postum: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

Postum for Health

E. A. Mayhew & Co.

NEWBURY

Roy Barnes of Theford visited at Thos. Fletcher's last week. Albert Grant of Windsor spent the week-end at his home here. Oliver Prangley spent a few days in Windsor.

Tomorrow (Friday) is the evening of the play, "Don't Marry for Money." The play promises to be fine and a special program will be given between acts. The seats were nearly all gone Monday.

Miss Annie E. Connolly of Detroit spent the week-end at her home here. Mrs. Risk of Flint, Mich., spent last week with her brother, G. D. Dobbyn.

Jack Kain of the hydro department, who is at present working at Alvinston, spent the week-end with Adair Bayne.

Alvia Burr spent Wednesday last with his sister in London.

Rev. Mr. Paton of Glencoe preached in Knox church Sunday afternoon.

Our readers will remember the Newbury Methodist church sending by Wm. M. Leonard last summer the sum of \$60 to be used in Chengetu Hospital. We feel sure the following letter received by Mrs. A. Holman a few days ago, per Rev. R. J. Garbutt of Glencoe, will be read with pleasure and gratitude to feel that this balance is going to so noble and lasting a cause.

Chengetu, West China, Jan. 9, 1922. Rev. R. J. Garbutt, L.L.B., Glencoe, Canada.

Dear Mr. Garbutt—Mr. W. M. Leonard has forwarded the gift of sixty Canadian dollars from the Newbury Methodist church to our hospital in Chengetu. In our currency it has brought us \$92.30. The hospital committee greatly appreciate this gift, and through you wish to thank the church for the interest that prompted it, as well as for the gift itself. It is to be used to furnish a private ward, which we shall name the "Newbury Ward" in recognition of the gift. When the name-plate is mounted we will try to have a photograph of the ward taken and sent to you, so that you may see what your money has done.

During 1921 there were 1,129 patients treated in the hospital; 390 operations with general anaesthetic, 24 with local and 524 operations without anaesthetic. In the dispensary we treated 9,932 patients. These figures will give you some idea of our work. All patients in the hospital have an opportunity to hear the Gospel each morning. Also we give away many portions of Scripture. Again thanking you for the gift. Yours sincerely, (Dr.) C. B. Kelly, Sec. Hospital Committee.

Two good, reliable remedies which guarantee results are RAZ-MAH for Asthma and Bronchitis, and T.R.C.S. for Rheumatism, Lumbago, Neuritis, etc. Sold by H. I. Johnston.

WARDSVILLE

An old-time dance was given in the town hall Monday evening by some of the men of Wardsville and vicinity. A large number were present and spent a most pleasant evening. Lunch was served at twelve by the ladies and the dancing resumed.

Last Wednesday being Ash Wednesday, the first day of Lent, services were held in the Anglican church here.

Frank McGregor spent a few days in Toronto last week.

Mrs. McIntosh and son of Woodstock spent the week-end with her sister, Miss M. C. Farrington.

The U. F. O. gave a chicken supper in the hall Thursday evening. About 150 sat down to a bounteous supper. After the business meeting a short program was rendered—a duet by Misses Florence and Norma Willis, a short speech by Rev. Mr. Murphy, a duet by Harry Skit and Wm. Tomlin, an instrumental by Miss Mary Hatton, and the speech of the evening by Mrs. Tom Dykes.

A meeting of the literary society of Wardsville high school was held Friday afternoon. The president occupied the chair. After the routine

FOR PEOPLE WHO CARE

To keep up their appearance, SEVEN SUTHERLAND SISTERS' COLOGARON will transform their hair to any shade desired. A simple home treatment. Hairless, itchy, dandruff, Ask to see card showing eight different shades.

H. I. JOHNSTON DRUGGIST - GLENCOE Dora Sutherland, 193 Spadina Ave., Toronto

CASHMERE

Mr. and Mrs. Will Saylor spent a few days with the latter's parents, Mr. and Mrs. David Smith, Bothwell, recently.

We are sorry to note that Miss Donald Smith is on the sick-list. Henry Burile spent Sunday with Charles Fennell, Newbury.

A number from here attended the U. F. O. chicken supper at Wardsville on Thursday night.

Mr. and Mrs. Earle Tunks spent Wednesday with her parents, Mr. and Mrs. Allen Sifer, Bothwell.

Mr. and Mrs. Arthur Tunks and children spent Sunday at the home of Sam Laach, near Newbury.

Mr. and Mrs. Calvin Sifer and son Franklin were in Newbury on Sunday, visiting her grandmother, Mrs. W. H. Jeffery, who is ill.

We are sorry to hear that Basil Sifer was seriously hurt while working at Reid's sawmill. In some manner his foot got near the large saw and badly severed his toe, so that he will be laid up for a month or so.

Mr. and Mrs. J. A. Bobier, at Bothwell.

Muscular Rheumatism Subdued.—When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until case is secured. There is more virtue in a bottle of it than can be fully estimated.

MODEL CENTRE

Sap's running, say the ones who have tapped the sugar maples. Henry Stringer of St. Thomas is visiting at Will Old's.

Alf. Berdan moved from Dunwich to his new farm here last week.

Dan Campbell is rapidly improving after an operation for appendicitis.

Misses Cleo and Elva Sutton spent the week-end with friends in London and St. Thomas.

Mrs. Wm. Caruthers attended the funeral of her uncle, Mr. McKellar, in Caradoc last Friday.

Miss Eva Campbell of Sarnia has returned home, after spending a few weeks with her grandmother, Mrs. Peter Munroe.

If our local sugar beet growers were not descendants of a hardy race of pioneers, there would not be many of them left by the time grass grew again. Last fall they nearly lost all their faith in making money when their loads of beets would shiver from 20 to 65 per cent, by the time they got across the scales. But the growers rapidly recovered from the nervous strain of watching that continue till the beets were finally ready to receive another rude jolt, when they received their bonus cheque from the sugar company last month of \$120 per ton when they were expecting at least \$2 per ton or more. However, the majority of them were able to get around without the use of a cane till last week word was passed around that the contract was out for 1922, offering \$4.50 per ton, with a further bonus if the beets were nearly all sugar. This was the final straw, and each grower, so far as we have heard, has firmly resolved to store away his valuable beet machinery and go back to the good old grain growing and stock raising.

A Prime Dressing for Wounds.—In some factories and workshops carbolic acid is kept for use in cauterizing wounds and cuts sustained by the workmen. It is better to keep on hand a bottle of Dr. Thomas' Electric Oil. It is just as quick in action and does not scar the skin or burn the flesh.

CAIRO

Mr. and Mrs. J. E. Burgess of Chatham spent the week-end with their daughter, Mrs. H. A. Newkirk.

Mrs. Alex. Munro and Ila Burr were called to Windsor on Wednesday owing to the illness of their sister, Mrs. John Baird.

Miss Olive McTavish is visiting her aunt, Mrs. Fred Thompson.

Garnet Handies and Meryl McKeeven visited the former's uncle, Will Handies of Wardsville, during the week.

J. W. Switzer spent the week in Sarnia attending court as a jurymen.

CAMPBELLTON

Mrs. J. McEachren is spending a few days with her sister, Mrs. Stables, Melbourne.

Walter Minnie, who spent the past week at his home here, has returned to Glencoe.

A. A. Berdan is moving to the farm he recently purchased near Glencoe.

Dunwich council has had piles driven in the river at Tail's bridge.

An illustrated lecture on "Canada" will be given in the music hall here on Friday evening, March 17, by Rev. R. J. Bowen of the London University extension department, under the auspices of the Aldborough No. 11 and Wardsville Women's Institutes. It will commence at 8 o'clock and a silver collection will be taken up.

SHEILD SIDING

The next social evening of the Windydale Club, U. F. O., will be held on Friday evening, March 17th. A good program is being arranged.

NORTH EKFRID

Th. U. F. O. are holding a meeting in S. S. No. 4 on Thursday evening, March 9th.

Everybody knows that in Canada there are more

Templeton's Rheumatic Capsules

Sold than all other Rheumatic Remedies combined for Rheumatism, Neuritis, Neuralgia, Sciatica, Lumbago, etc.

Many doctors prescribe them, most druggists sell them. Write for free trial to Templeton, Toronto.

Sold by H. I. Johnston

APPIN

The close of the very successful short course which has been held here during the last four weeks was marked by the giving of a banquet by the girls and boys of the course to guests numbering about fifty.

The hall looked beautiful, a color scheme of blue and white being artistically carried out. The one long table which was down the centre made a very attractive appearance. The dinner was served promptly at 7.30, after which three toasts were proposed—

"To the King," by Orval Smith, and responded to by all singing the national anthem; "To the short course," by Diarmid McTaggart, and responded to by Stewart McDonald; "To the ladies," by Mr. Wadsworth, and responded to by Miss Gertrude Lotan.

A presentation was then made by Mr. Wadsworth, the instructor, to the two young men who came highest in general proficiency—the first to Diarmid McTaggart, a book on "Feeds and Feeding"; the second to Orval Smith, a book on "Poultry."

The Laughton-Walker orchestra furnished beautiful music during the whole evening, which brought to a very fitting close the splendid course in agriculture which has been a privilege for those who availed themselves of this rare opportunity. Much credit is due to the teachers who gave such splendid lectures in such an able manner that they will not easily be forgotten.

The Appin Community Players have postponed the presentation of their play, "Fanchon the Cricket," advertised to be given in the Appin town hall March 8th. Due notice will be given of the new date to be fixed.

Mr. and Mrs. Earl Blain, who spent the week-end with her parents at Appin.

Mrs. Fred Haggitt and Lorna have returned home after a pleasant visit with friends in London.

Mrs. Dan Patterson visited Monday afternoon with Mrs. Thos. Haggitt.

Mrs. C. Blain and Verne spent Sunday with her sister, Mrs. Fisher.

Ed. Haggitt is getting timbers and lumber in readiness to erect an addition to his barn this spring.

PARKDALE

Rosie Bell, daughter of Jason Bell, is quite ill with pneumonia.

Mr. and Mrs. Earl Blain, who spent the week-end with her parents at Appin.

Mrs. Fred Haggitt and Lorna have returned home after a pleasant visit with friends in London.

Mrs. Dan Patterson visited Monday afternoon with Mrs. Thos. Haggitt.

Mrs. C. Blain and Verne spent Sunday with her sister, Mrs. Fisher.

Ed. Haggitt is getting timbers and lumber in readiness to erect an addition to his barn this spring.

CAMERON

Owing to so many being ill on Sunday there was no service in Cameron church on Sunday.

An epidemic of flu has visited a number of homes. Mr. and Mrs. Ed. McAllister, Misses Violet and Jean Plaine, Howard and Lloyd Plaine, Miss Ida Evans and William Gage's family are all confined to bed with the epidemic.

Mr. and Mrs. Archie Campbell of Bad Axe, Mich., have returned home after attending the funeral of Mrs. Campbell's mother, the late Mrs. Donald McVicar, which was held on Saturday at Kilmartin cemetery.

Mr. Goldrick and Oscar are sick with the flu. A. D. and Irene McVicar are also confined to the house.

Miss Winnifred McVicar of Wheatley has returned to her school after being home to attend the funeral of her grandfather on Saturday.

SOUTH EKFRID

A meeting of the South Ekfrid literary society was held in Tail's Corners school house on Friday evening, March 3rd.

The program was given as follows:—Solos by Mac, McRae, Trissie Cooke and F. J. Cooke; readings by Miss Marie Brown and R. Lovell; mouthorgan selection by Donald McVicar.

A mock newspaper by Miss Clara Thomas was much enjoyed by all, also a debate: "Resolved that the city depends upon the country to a greater degree than the country depends upon the city."

The affirmative was taken by C. Allan and Mrs. James McRae, and the negative by R. W. McEachren and Will Coulthard. The judges decided in favor of the negative by one point. The next meeting will be on March 17th, when an entertainment will be given. Most of the program will be given by the Kilmartin dramatic club, who will put on their play, "A Puzzled Detective." Other numbers will also be given, including some addresses by popular speakers. Lunch will be served.

WOODGREEN

Miss E. Leitch, who has been visiting Mr. and Mrs. Robert Eddie, has returned to Ross, near Kilmartin.

A number from here attended the play, "The Colleen Bawn," at Wardsville on Friday evening.

The provincial road was scraped on Saturday and is much improved, a point where gravel is being laid in large quantities, to prevent it from being carried away during freshets.

It is expected that a hydro line will be built in the near future from Dutton along the Currie road by way of Wallacestown to a point near the lake.

MELBOURNE

Our village streets are being much improved by a heavy coating of cinders. The low places are being filled and the streets levelled.

The women's day for prayer was observed in the Presbyterian church on March 3rd and the services were well attended. Many from the visiting churches took part in the program.

A number of our citizens attended the play, "Uncle Tom's Cabin," which was given in the hall here recently.

Men are at work clearing away the broken brick and debris on the school grounds, preparing to begin work on the new school as soon as possible.

Dread of Asthma makes countless thousands miserable. Night after night the attacks return, and even when brief respite is given the mind is still in torment from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are ward off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.
