# DR. T. A. SLOCUM'S

OXYGENIZED EMULSION OF

# Cod Liver Oil

Since the small (35 Cent) size was put on the market, the demand has been wonderful.

Every bottle of the small size sold, will sell several of the large.

It is the best Emulsion of Cod Liver Oil made, a fact that is abundantly testified to by leading Physicians and Pharmacists.

When you sell an Emulsion of Cod Liver Oil you should sell the best.

#### SEVEN REASONS WHY

#### SLOCUM'S OXYGENIZED EMULSION

Meets all the Requirements of a perfect Emulsion:

1st. Because of the absolute purity of the ingredients used.

and. Because it is carefully and accurately prepared.

3rd. Because it is perfectly free from disagreeable taste and odour.

4th. Because of its fitness for immediate absorption.

5th. Because it retains permanently all its qualities.

6th. Because it contains no Hypophosphites of Lime and Soda.

7th. Because the price is as low as is consistent with merit.

#### IT IS THE ONLY ABSOLUTELY PURE EMULSION MANUFACTURED.

For sale by all the leading Wholesale Houses in Canada, or DIRECT. We pay charges on all Cash Orders.

# T. A. SLOCUM & CO.,

186 Adelaide St. West,

TORONTO, ONT.

ADVERTISING MATTER ON APPLICATION.

#### ORIGINATED BY AN OLD FAMILY PHYSICIAN.

#### GENERATION AFTER GENERATION HAVE USED AND BLESSED IT.

Every Mother Should bave Johnson's Anodyne Liniment in the house for Croup, Colds, Sore Throat, Tonsilitis, Colic, Cuts, Bruises, Cramps and Pains, liable to occur in any family without notice. Delays may cost a life.

Every Mechanic, or person exposed to accidents or injury, Base-Ball players, etc., should keep it near at hand; for it acts promptly, is Soothing, Healing and Penetrating. When once used always used.

Every Traveller Should have a bottle in their satchel. It can be used Internally or Externally in more cases than any other medicine. Cures head-aches if inhaled.

Every Sufferer From Rheumatism, Sciatica, Neuralgia, Nervous Headache, Diphtheria, Coughs, Catarrh, Bronchitis, Asthma, Cholera-Morbus, Diarrhoza, Lameness or Soreness in Body or Limbs, Stiff Joints or Strains will find in this old Anodyne relief and speedy cure.

THE REASON WHY—Generation after Generation have Used and Blessed Johnson's Anodyne Liniment, is because it cures when all other remedies fail. It was devised and used for years in the private practice of old Dr. Johnson, to treat inflammation liable to afflict any person on earth; and which cause the danger in all the above troubles. The medical advice around each bottle is worth ten times the price.

How to Use Economically. Advice sent free. All who buy direct from us, and request it, shall receive a certificate that the money will be refunded if not abundantly satisfied. Price, 35 cts. by mail; 6 bottles, \$2.00. Express prepaid to any part of the United States or Canada. Duty also paid. I. S. JOHNSON & CO., Boston, Mass.

F. 1. BENEDICT, Secretary.

In our last number we placed before our readers a few remarks in regard to "Substitution," and closed them by suggesting a motto to the profession, i. o., "No Substitution." What we have had to say upon this subject has been well received by the majority and applauded by those whose opinion is valuable and whose experience and prin. ciples aid to give weight to their judgment in a matter of this sort. We have received adverse criticism, but no consecutive, good argument, to permit of or maintain the idea that it is right to deceive those who enter a drug store to buy something they want, and who have the cash in their hands to pay for it together with the conviction that the druggist they patronize is dependable and worthy of confidence.

We give another instance, and one which may serve to guide our readers' ideas towards the conclusion that a very little step one way or the other may take one from truth to untruth—from honest, upright business methods to the reverse. How near the line are we treading?

Customer—"I want a bottle of Hood's Sarsaparilla."

Druggist—"Let me see; I don't believe I have it. But I have something much better. This sarsaparilla contains more real medicinal property than Hood's, and the price is the same. Won't you try it?"

Customer—" No. I want Hood's. I have taken one bottle and it did me good, and I am going to continue."

Druggist—"Well, I don't think you will get it in town, and I can assure you this is as good and better. I know what it contains, and will guarantee it will do more good than the other, &c., &c., &c.,

Customer—" Oh! I can get it up the street. I saw several bottles in the window of the other drug store, and will just drop in there as I go home and buy one."

Druggist (who has two or three dozen in his back store : Il the while) calls out to his clerk—"Charlie, take a good look and see if there is not a bottle of Hood's Sarsaparilla left that we can let this lady have."

Charlie reappears with a bottle and the customer gets what is wanted.

"Make the best profit you can, but when salesmanship and good address will not secure it, take a lesser margin by all means rather than resort to falsehood for a few cents additional."

This sentence is the verdict of a man who occupies a noted position and who for years has been in the drug business.

In Montreal there is comparatively little substitution going on; yet it is more than likely that the entire retail trade of the Dominion will have meted out to them by the leading patent medicine manufacturers a severe punishment because a number have taken up substitution as a first principle. It is now on the tapis to charge \$1.00 preparations at \$10.00 per dozen and other prices, 50c and 25c articles proportionately. The various proprietors feel that they have nothing to thank the druggists for, and the feeling is growing upon them that what is sold is supplied in response to an absolute determined demand created by and maintained by their enormous advertising. They estimate that at least

one-third of the "calls" are lost through the action of druggists in substituting imitations or similar articles and upon which the retailer scores a greater profit. If substitution is not going on to the extent believed, and if the trade realize the blow this contemplated action will be to them in general, let some stand be taken in the matter to avert the prospective loss.

These columns are open to all, and we shall be pleased to have an expression of opinion on the matter.

It must not be forgotten that there is a great distinction between legitimately selling anything one may keep in stock and upon which the profit is an inducement to push, and the resort to untruth, misrepresentation and unbusiness-like methods Every retailer is wise indeed to prepare, and to have prepared for himself, nice specialties -- cough medicines, pills, sarsaparilla, &c., &c. But sell what you have for sale--uprightly and honestly upon their merits-upon their appearance and "get up." When you have three dozen of Hood's Sarsaparilla in your store—when you are definitely asked for it and your advice is not sought, don't say "I have none to-day; will you not take mine, as I cannot supply the other?" This constitutes earning money by falsehood, and a degredation to pharmacists, when it is possible for the patent medicine people to say that it is done generally or to any extent. Do business honestly and truthfully and you have the respect of the community.

The writer came across an instance worthy of mention in connection with the idea that it "pays" to respond fairly to the consumer:

Lady-"I want a bottle of Covernton's tooth wash. Have you got it, or shall I have to go to Mr. Covernton's store for it?"

Druggist-"I think we have it. (Produces it from the shelves.) We always keep what is asked for. The price is 25c."

Lady-"Don't you make one of your own?" Druggist-" Ves." (Produces it)

Lady-"Which is the best? Which would you advise me to take?"

Druggist-" If you have been accustomed to Covernton's you will perhaps be better suited with the same. I think mine is a good article, but I want my customers to be suited in every case and think you had better continue what you are in the habit of using and what you like."

the manly, business like, agreeable and satisfactory manner in which she was treated and returned a few days afterwards, purchased a bottle of the other wash, and finally became a customer for all her wants of the man who was ready to treat any one who entered his store upon a basis that completely obliterated from an ordinary vision the view of, an umpleasant effort, to gain a few cents additional pro-A perfect "hurdle race" for cents, and a really practical oversight of the bright, shining dollars passed by at each jump.

This man was "brought up" in the business by a prominent Woodstock druggist, who was radically opposed to anything with an irregular appearance. He would discharge a clerk who interfered with the expressed wish of any one who patronized his store and, as a matter of fact, some of the best men in the business to-day hail from Woodstock, and the early inculcation of good principles at the hands of their first master has assisted in no small degree to their success in life.

The absolute dishonest feature in the practice of substitution is in the compounding of prescriptions and when one ingredient is substituted for another. This is worse than dishonest. It is criminal to trifle with life and hamper the wonderful possibiliities secured through medical research. To deprive a human being of a chance of life or to deprive one, of relief from hours or days or weeks of suffering and anguish, and for the sake of a small additional profit, is to do what cannot be too Happily there is little of this harshly condemned. known to be practiced. Yet let us ask how many seriously think how wrong they are doing in selling or dispensing weak or cheap tinctures? Unwittingly, wrong is done by many in not being more particular in following strictly the Pharmaconceia in the matter of tinctures as well as with other ar-The druggist has a place—by right—in the world of business. He is a requirement all over the civilized globe. He cannot be "done without." but, entitled as he may be, to fair and just recompense for his time and material and in addition reasonable consideration for his professional or educational attainments, (which, applied in the daily avocation of his legitimate mission, are indeed valuable,) he must inot abuse his position, and, as we view it, must follow at all times a course that will maintain for pharmacy the high standard attained by our predecessors for all. The medical The lady took Covernton's, but was struck with I man who becomes known for his unprofessional practices and conduct has difficulty in making a living, and is despised by the community and his confreres as well. And the pharmacist—the physician's near ally—must enjoy the confidence and good opinion of those who are his natural clients, or else his business suffers, and suspicion will travel and burt those engaged in the business to a much greater extent than in the direction of the doctors of medicine, who have, perhaps, a greater claim to individuality in their profession than can be claimed for the druggists and who are held as responsible, more as a class.

THE following appeared recently in the Canadian Druggist:

Quite a breeze has been raised amongst the country druggists, and for that matter, amongst the city men also, owing to a large wholesale drug house sending circulars to country ductors offering to supply them on lowest terms. The retail men hold that such petty competition is unworthy of a large wholesale house, particularly as this house sends round travellers to solicit business from the very men it is trying to undersell.

The man who wrote this no doubt tried to be truthful, and we may credit him with believing that he could cause a "breeze" that would ruffle the drug world. Upon enquiry we find the case really a most amusing one. To be brief, the facts are as follows:

1st. No such circular has been issued by any of the Montreal houses.

2nd. A circular was issued to druggists and general stores in the Province of Quebec advising the approaching visit of an additional traveller.

3rd. One (only) of these trade circulars, through a blunder, found its way to an M.D. (and who was never called upon or sold by the house referred to.)

4th. A country druggist complained to the house and intimated he would remove his account.

5th. The explanation given was deemed satisfactory by the only druggist interested and the account continued as before.

6th. The druggist in question wrote to friends at the moment of his believed trouble and suggested some action be taken, but when he became satisfied, omitted to state in same quarter that no ground existed for endeavoring to attack or punish the house in question.

7th. Third parties full of wrath and condemnation, brought the matter up for action before the Council of the Quebec Association, who wisely decided it was not a matter for them to waste their time with; a boycott was suggested, but in any case it was resolved to "mind their own business and not to interfere with the affairs of individuals."

8th. Then some two or three, who enjoy un enviable feelings towards the house named, decided to have a meeting of the Montreal retail druggists to condemn—to boycott—to do injury, if possible

The meeting has not taken place and the basis does not exist for the attack, the originator or practically the "complainant" in the case, having found that there was no cause for the complaint. The house in question sells to doctors, surgical instruments and appliances in competition with the instrument dealers in Canada and U.S., but no doctor where there is a druggist, or in the environs of the location of a druggist, can obtain supplies of drugs, etc., from them. If they wished to trade with doctors they could have a thousand on their books in a very brief space of time. They refuse to sell them every day, but this does not hinder at all the ambitious efforts of two or three "busybodies" to discover a case--a single case where they have sold a doctor. If this business was being done with doctors it would be patent to all, and would not require a detective, nor yet, a Christopher Columbus, to make any one particular discovery, but a man's enemies will sometimes go such lengths in their endeavor to do him harm that they will lose the hold they might ordinarily be supposed to have, upon common sense and jump into a ridiculous position in their blind haste. This is an amusing case, and it will be interesting to follow the "breeze." When the dawn breaks and a regiment of soldiers find they have been firing all night at an imaginary enemy, they feel "cheap." Will any one attend better to their own business when it is shown that the house in question is not an enemy-has not been oneand that the supposed injured party is still in the supposed enemy's camp-smoking the pipe of peace?

WE refer you to the advertisement of Messrs. Porter, Taskey & Co, Druggists can get their supplies through Lyman Sons & Co. if desired. Send for particulars or prices, and don't let the fishing season pass without availing yourselves of a little of this outdoor pastime, and look up your friends as well.

#### B. P. Tinctures.

In view of the action of the Inland Revenue De partment in regard to the sale of Tinctures, the tincture tables given below will be of more than usual interest. The law is clear enough upon the subject, and those who have not been doing right for the sake of a little additional gain will have reason, doubtless, to remember the indiscretion.

The medical fraternity have complained—and most justly—that it was a common practice to fill their prescriptions with tinctures of a strength and quality other than the standard—the British Pharmacopæia.

The Department have had samples taken in various places, and there is little doubt but that any druggist who has been making—buying or using special formula tinctures—dispensing or selling

them, labelled simply, "Tincture" or "B. P. Tincture" will have to answer to a serious charge for contravention of the law. The milkman who uses water to dilute his milk, or the paint manufacturer who labels "white lead" that which contains a percentage of barytte or other substance have been punished, and it is not likely that the Government will be more lenient with those who dispense tinctures and have in their hands-life or death-suffering or relief. The man who always supplies B. P. standards is wise to-day, and it should not require the intervention of the Government officers to secure integrity in any direction in the profession. We trust the impression, that the trouble is general, is unfounded, and that very few can be brought to the front as degrading pharmacy without conscience and for paltry sordid reasons.

Specific Gravities.—It must be understood that in every instance these correspond to a temperature of 15.5 ° C. Column I. of each table indicates the sp. gr. of the spirit used in making the tincture. Column II. of each table represents the sp. gr. of the finished tincture. Too much importance must not be attached to slight deviations in the latter. The percentage of moisture and of soluble matter in the vegetable substances used in tincture-making are always liable to variation, and as such differences would principally affect the sp. gr. of the tincture, to draw a hard-and-fast line would be unreasonable. As a matter of practice, it will probably be found that an allowance of '005 will be more than sufficient to cover any natural discrepancy.

Table II. comprehends those tinctures in which the alcohol cannot be correctly determined by simple distillation, and includes all tinetures prepared with rectified spirit, as well as those containing appreciable quantities of volatile substances which would affect the alcohol value of the distillate as deduced from its specific gravity.

First, as to rectified spirit tinctures free from volatile oil, &c. These are dealt with as follows:—

Method A.—(See Table II. Column IV.) Fifty cubic centimetres of the tincture are accurately measured at a temperature of 15.5°C. About 45 c. c. distilled water are then added, and when the mixture has cooled to 15.5°C. it is further diluted to exactly 100 c. c. and distilled as already described. The percentage by volume of proof spirit indicated by the sp. gr. of the distillate at 15.5°C., multiplied by 2, will be the percentage by volume of proof spirit contained in the original tincture. On no account should rectified-spirit tinctures be distilled without dilution, as, unless the apparatus is of the most perfect construction, serious loss of alcohol will certainly occur. Tinctures which contain a volatile acid, such as tinct. benzoin co. and tinct. tolutana, or a volatile alkali, such as tinct. valerianæ ammoniata, must, after dilution, be carefully neutralized, as otherwise volatile matter will pass over with the spirit and interfere with the result.

Method B.—Tinctures containing an appreciable amount of volatile oil, etc., are best treated in the manner recommended by Allen. Fifty c. c. of the sample are diluted with distilled water to about 200 c. c. This causes a separation of essential oil, resi. as matter, camphor, etc.; a few c.c. of a saturated solution of calcium chloride are then added, the mixture well shaken, and then 4 or 5 c. c. of saturated sodium phosphate solution are introduced. The precipitated calcium phosphate carries down with it the oily matter, etc., hitherto held in suspension, and the mixture will filter bright. The precipitate left on the filter is washed with a small quantity of distilled water, and the filtrate and washings made up to 250 c. c. One hundred cubic centimetres of this are then distilled, and the distillate made up to 100 c. c. The percentage by volume of proof spirit therein, as indicated by the sp. gr. multiplied by 5. will be the percentage by volume of proof spirit centained. of proof spirit therein, as indicated by the sp. gr. multiplied by 5, will be the percentage by volume of proof spirit contained in the tincture under examination.

Solid Residue.—Column V. in the Tables represents the total amount of solid ingredients prescribed for each tineture, calculated into percentages. Columns VI. and VII. indicate the corresponding amount of solid residue obtained by evaporating 10 c. c. of tineture, and dried respectively at 45°-50° C. and at 120° C.

Test what you buy. Test what you make; and form of a B. P. label. always insist on your wholesalers' guarantee in the

#### The Royal Victoria Hospital, Montreal.

This grand institution will shortly be opened for the reception of suffering humanity. There will be no great flourish of trumpets, as such is contrary to the wishes of the public benefactors who have established and endowed this monument of their large-hearted generosity. The work of organization is going forward rapidly, and some appointments of importance have been made to the staff.

Doctors Roddick, Stewart and Adami are noted men in their profession, and while the severance of the two former from the Montreal General Hospital to go to the other will be felt, it is necessary that the Royal Victoria should have at least some of the best men procurable. It is sincerely to be hoped that the governors will not restrict (medically) the new hospital to McGill men. It will be a grave mistake to do so from some points of view, and will tend to lessen the general aspect and ef-· fect of the benefaction itself. Good men are wanted, and good men can be had amongst Mc Gill's graduates; but to permit the entrance of no other school would appear somewhat in the same light as if its benefits were made eligible to one denomination of Christians only. There are some very eminent French-Canadian medical men, and from amongst them some of the medical board of directors should be named. Dr. A. Brodeur, for instance, has a wide reputation, and is undeniably a man that would professionally add lustre to the hospital as well as carry to the French-Canadian element of our population the strongest possible evidence that the Royal Victoria Hospital was not solely for one college or for one denomination.

Sir Donald Smith's connection with McGill has, we imagine, carried a misapprehension to many who openly say it is McGill and will be McGill.

Bishop's College have, we believe, made representations to the governors on this subject.

The druggists and instrument men are somewhat "moved" over the subject of the extensive supplies at present about to be ordered. The institution is in a position to obtain what is required and will likely avail itself of every opportunity to avoid anything that is unnecessary in the purchase of requirements. The General Hospital can be copied to advantage in their method of obtaining current wants in the drug line

#### Malt Stout.

Prominent medical men have good words for the Malt Stout recently placed upon the market. It

sells at about the same price as the "Dublin Stout," contains less spirit, and has a more desirable medicinal effect. Messrs. Lyman Sons & Co. are interesting themselves in the sale.

The following is one of numerous letters re-

DEAR SIRS .- I have much pleasure in stating that I have tried your Malt Stout on a patient who was suffering from very difficult digestion, especially of starchy food. Although this patient was rapidly losing weight at the time of commencing with the Malt Stout, this emaciation soon stopped, and on the contrary she soon began to increase steadily in weight, and her appetite, which had become almost nil, is now very fair. In common with many other physicians, I have long been looking for a commercial extract of malt which would be sold at a reasonable price, and which we might prescribe both as a food and as an aid to digestion. As your stout is sold for even less than the best qualities of porter, I will have no hesitation in ordering it for patients who are losing weight owing to their inability to convert starchy food into sugar. Yours truly,

A. LAPTHORN SMITH,

Professor of Equecology in Bishop's College, Montreal.

#### TRADE NOTES.

H. H Warner, of "Safe Cure" fame, has made an assignment for the benefit of his creditors.

T. H. Rudderham, who has for some time managed the drug business of Copeland & Co., North Sydney, Cape Breton, has purchased the drug business of Dr. Atkinson at Parrsboro, N.S.

Edward Evans, of Evans, Lescher & Evans, of Liverpool, England, and also a director of the firm of Evans & Sons (Ltd), of Montreal, has arrived in Montreal, where he will make a short stay before proceeding to the Pacific Coast, accompanied by his brother, Alf. B. Evans, of Montreal. They intend returning by way of San Francisco and Chicago.

W. D. Bradford, general store, Granby, Que, formerly of Bradford & Roberts, was burned out about the middle of last month, just after getting in a new stock, worth some \$23,000. He was insured for \$14,000 and was obliged to seek the indulgence of his creditors. Liabilities nearly \$17,000, settled at 72½ c on the dollar, cash.

Upon the item to meet the expense under the Adulteration of Food Act, Sir Richard Cartwright suggested that, in view of a possible invasion of cholera, skilled officers should be instructed to inspect samples of water throughout the country. The Comptroller of Inland Revenue said he would be glad to act upon Sir Richard's suggestions.

At the annual meeting of the stockholders of the Antikamnia Chemical Company, of St. Louis, Mo., held April 17th, 1893, the entire interests of the company were secured by Messrs. Cox & Ruf, so

that the company is now a very close corporation. The officers are Frank A. Ruf, St. Louis, president and treasurer; John W. Cox, Boston, secretary. Mr. Ruf remains, as heretofore, manager of the en-

tire business of the company.

With greatly increased facilities and quadrupled capacity, the O. & W. Thum Co. have again effected a reduction in the cost of manufacturing Tanglefoot, and as usual they make a corresponding reduction in the price—25c per case. Besides reducing the price, they are packing two holders in each box. Each holder is made up into a package with five double sheets; these packages will prove a convenience to the dealer and will also encourage the purchase of larger parcels by his customers, who will appreciate the greater economy and the free holder. Their new machinery turns out even a more perfectly finished article than heretofore; the new holder is a model of neatness and simplicity, and in connection with the reduction in the price ought to make a year of unprecedented success for Tanglefoot.

#### Notes and Queries.

INCOMPATIBLE PRESCRIPTION — PERCENTAGE SOLUTIONS—J. D. W.—A prescription calling for Potas. Bromid. and Calomel in powders, was handed in at a counter in the West End, a few days ago. The dispenser suspecting incompatibility, consulted us. Potas. Bromid., whether of alkaline reaction or neutral, or made acid by acetic acid, determines with calomel, when moistened, the appearance of mercury in a fine state of division. The mixture should therefore not be dispensed. The reaction is probably as follows:

<sup>2</sup> K Br. + <sup>2</sup> Hg. Cl. = Hg. Br., + <sup>2</sup> K Cl. + Hg. This decomposition was pointed out by Kuhn, 1876, but has apparently escaped the notice of Squire, the National Dispensatory, Martindale, and the "Art of Dispensing."

Cocaine and Pilocarpine salts, produce the

same reduction of calomel.

G—Some discussion having arisen since the last Examinations, about the meaning of 1, 2, 3 etc., per cent. solutions, we have no hesitation saying that the only correct rule is: Grains in hu. dred grains, ounces in hundred ounces, etc., therefore 4 ozs. of a 5% aqueous solution, would be made by taking 87½ grains of the solid, and making up the quantity of finished product to 4 ozs. by weight. Physicians frequently desire a certain number of grains with 100 minims—this, however, does not in any way affect the above calculation, which is a matter of arithmetic The Pharmacopæial 1% liquids are not made 4.8 grains to the ounce. The word ounce, without qualification, means in the British Empire, ounce avoirdupois, which is the same in the case of water, as the fluid ounce.

This matter of percentages is discussed in the Proceedings American Pharmac. Assocn., 1892, ol 460.

T. D. R.

#### PHARMACY.

PALATABLE CASTOR OIL.—N. J. Pritzker recommends the following formula as being far superior to any yet proposed for disguising the taste of castor oil, while the dose is not increased, as the emulsion can be made to contain 85%, of oil, and in this form it seems to act more powerfully than the pure oil:

Castor oil	žiij
Yolk of egg	3iv
Oil bitter almonds	gtt ii
Milk to make	živ

The oil is added slowly to the yolk of egg, triturating thoroughly, then add the other ingredients. The emulsion is given in the same dose as castor oil and may be diluted with milk, wine or water.

DE CANDOLLE, the famous botanist, who died a few weeks ago at Geneva, was born at Paris in 1806, and succeeded his father, Augustin Pyramus de Condolle, as director of the botanical gardens at Geneva. He was a lecturer in the Academy of Geneva, and was a member of many of the learned societies of Europe.

SYRUP OF IODIDE OF IRON, according to J. Martenson, if made with rock candy does not turn red, as it always does if made from ordinary sugar. He explains the action of sugar on the iodide as being due to the ultramarine used to whiten the commercial granulated sugar.

GLYCERIN SUPPOSITORIES with aloin, colocynthin and citrullin have been tried by Dr. Kohlstock with considerable success in constipation, where the ordinary glycerin suppositories were without action. Each suppository contains either 0.5 grm. aloin, 0.03 coloynthin or 0 02 citrullin.

BISMUTH AND BORIC ACID OINTMENT FOR BURNS.—Dr. Wertheimer gives the following for the treatment of burns in children:

Bismuth subnib	9	gms	
Boric acid	4.50	"	
Lanolin	70	**	
Olive oil	20	"	m

The parts should be washed with boric acid solution, and the ointment spread on gauze, then applied.

#### Answers to Correspondents.

"A Young Lady."—Section 4024, clause 1 of the "Quebec Pharmacy Act" says: "To be admitted as a certified apprentice, the candidate must produce satisfactory evidence of a good, moral character, pass an examination in the English, French and Latin languages, in arithmetic, geography and history, and pay the fee prescribed by article 4029 of this Act; any medical student inscribed as such is considered a certified apprentice. We have not a copy of the Ontario law, but the requirements for the matriculation examination are very much similar to those of the Quebec examinations.

#### Correspondence.

To the Editor of the Montreal Pharmaceutical Journal.

DRAR SIR,—I was delighted with your article on "Substitution," i. e., the introducing and pushing of another article in place of the one asked for. It is a practice which is not good business policy and lays the pharmacist open to suspicion.

If a customer calls for a specialty, my clerks are instructed to give it, and not to introduce anything else. Simply wrap up the article called for, take the money and, with a pleasant remark, let the customer go. In nine cases out of ten a person thus

treated will come again.

People get a desire to try a certain article, because they have seen it advertised, and if they are talked into buying anything else they are annoyed when they leave the store, and naturally conclude that the pharmacist's advice was not disinterested from a commercial point of view.

The using of another drug, other than the one called for in a prescription, is so palpably dishonest that I have not considered it necessary to allude to that kind of "substitution" in this letter.

Truly yours, "AB ANTRO."

#### SUBSTITUTING.

Last month I read with pleasure, zest,
Vour words on "Substitution";
I think you tried to do your best,
Without much elocution,

You certainly exposed a fraud—
A knavish combination—
A scheme that some men love to laud,
And hold to admiration.

With trenchant pen and lots of vim, And robust constitution, You brought to light a custom dim, The work of "Substitution."

I must confess I'm in the trade— One of the institution; But as a druggist, can't degrade My work by "Substitution."

The custom is unmanly, mean,
Unworthy and degrading;
And public eyes both sharp and keen,
Will watch us when they're trading.

Oh! druggists greedy and unwise, There must come retribution! Remember people will despise This work of "Substitution!"

In future, when a man doth ssk
For Burdock, Paine's or Ayer's,
Attempt not the dishonest task
Of substituting Sayer's.

MONTREAL DRUGGIST.

Percolate the drugs with the alcohol and 1/2 gail. water to make one gallon, then add oils dissolved in 1 oz. alcohol, followed by the sugar coloring, set aside two days and filter.

#### Books Received.

"A Monograph on Cascara Sagrada," published by Fred. Stearns & Ce., Detroit, contains a digest of recent literature on the subject of Cascara. It is just the thing for the busy practitioner, as he has in a reliable and condensed form a complete history of the drug from the botanical, pharmaceutical and therapeutical standpoints. It is well written, and will well repay perusal. Messrs. F. Stearns & Co., Detroit, will be happy to send a copy to any physician interested in the study of this drug.

Proceedings of the Missouri Pharmaceutical Association, at the annual convention, Excelsior Springs, for which we are indebted to Dr. H. M. Whelpley, the secretary, contains several very interesting papers, especially those on Nitrometric Methods by Prof. Curtman, and one by G. H. Chas. Klie, on Sensitive Iodine Preparations.

# THE INTERNATIONAL PHARMACEUTICAL CONGRESS.

#### Preliminary Announcement.

ITS OBJECTS, ORGANIZATION, AND PROGRAMME.

1. The International Pharmaceutical Congress called to convene in Chicago, August 21, 1893, during the progress of the World's Columbian Exposition, will be the seventh in the series of International Pharmaceutical Congresses, and the first held in America.

In addition to the invitation extended by the American Pharmaceutical Association to the International Pharmaceutical Congress to hold its next meeting in 1893 in Chicago, a proposal was also made by the World's Congress Auxiliary of the World's Columbian Exhibition to the pharmacists of the world, inviting them to participate in the Columbian commemoration by a convention similar in scope to the other world's congresses to be held at the same time and place, the proceedings of which will, in part, be devoted to addresses and papers of a general and popular character, including brief reviews of the progress made since the days of Columbus. It was, however, deemed desirable that there shall be but one pharmaceutical congress held this year, and that the scope and objects of the proposed World's Congress of Pharmacists and those of the Seventh International Pharmaceutical Congress be merged, and to attain this end the World's Congress Auxiliary accordingly proposed that the programme of the International Pharmaceutical Congress at Chicago include addresses and papers of a historical nature, and afford opportunity for the presentation of such other topics of a general interest as may, in the judgment of the committee of arrangements, be appropriate to the occasion. This proposal having been agreed to, the International Pharmaceutical Congress will be the only world's congress of pharmacists held in Chicago during the exposition season.

The general scope and objects of the International Pharmaceutical Congress will be to stimulate pharmaceutical progress, to discuss the status of pharmacists and promote an intelligent appreciation of the work they do, and to consider matters and measures affecting the further advancement of pharmacy and a nearer approach to international agreement in education and practice.

2. A committee on the International Pharmaceutical Congress has been appointed by the American Pharmaceutical Association to arrange the preliminaries. This committee on arrangements consists of Oscar Oldberg, Chicago, chairman; N. Gray Bartlett, Chicago; C. Lewis Diehl, Louisville Ky.; D. R. Dyche, Chicago; Albert E. Ebert, Chicago; C. T. P. Fennel, Cincinnati, Ohio; J. M. Good, St. Louis, Mo.; C. S. N. Hallberg, Chicago; L. C. Hogan, Chicago; J. N. Hurty, Indianapolis, Ind.; J. Kochan, Denver, Col.; E. Kremers, Madison, Wis,; A. L. Metz,

New Orleans, La.; Charles Mohr, Mobile, Ala.; E. L. Patch, Boston, Mass.; A. B. Prescott, Ann Arbor, Mich.: Charles Rice, New York, N.Y.; E. H. Sargent, Chicago; William Saunders, Ottawa, Can.; L. E. Sayre, Lawrence, Kan.; William M. Scarby, San Francisco, Cal; William Simon, Baltimore, Md.; William Simpson, Raleigh, N. C; William S. Thompson, Washington, D. C.; together with Joseph P. Remington, Philadelphia, Pa, President of the American Pharmaceutical Association, and John M. Maisch, Philadelphia, Pa., Permanent Secretary of the American Pharmaceutical Association.

All who intend to participate in the Congress or to be represented or present in its meetings, and all invited guests, are requested to communicate in advance, and, if possible before July 1, their names and addresses to Oscar Oldberg, chairman of the committee, 2421 Dearborn street, Chicago.

All papers, reports, and communications to be read at the Congress will, as far as possible, be printed in advance, in order that copies may be distributed at the meeting. For this purpose, such papers, reports, and communications must be placed in the hands of the Permanent Secretary of the American Pharmaceutical Association, John M. Maisch, 145 N. 10th street, Philadelphia, before July 20. If received later, the printing in advance of the meeting cannot be promised.

3. The Congress will be constituted of delegates accredited for that purpose by the governments of the different countries, the pharmaceutical societies and examining boards, the colleges and schools of pharmacy, the pharmaceutical departments of universities, and the national pharmacopæial committees or commissions, respectively, each of which bodies will be entitled to be represented by three delegates.

4. Special invitations are extended to pharmaceutical teachers authors, leaders in the pharmaceutical profession, and pharmacists generally, to seats in the Congress.

5. When a vote shall be taken upon any question upon which the yeas and nays shall be called, only duly accredited delegates shall be entitled to vote.

6 The officers of the Congress shall consist of a president, vice-presidents, a secretary, and three vice-secretaries. The committee on arrangements shall act as a nominating committee, and shall nominate the officers by ballot. The number of vice-presidents to be nominated shall be determined by the nominating committee.

7. The first session of the Congress will be opened at 9 o'clock a.m., on Monday, the 21st'day of August, 1893, in the Memorial Art Palace, Chicago, in which commodious halls and accommodations have been placed at the disposal of the Congress through the courtesy of the World's Auxiliary of the World's Columbian Exposition.

The Congress will be opened with appropriate ceremonies, official addresses of welcome, and a

report of the committee of arrangements. A temporary organization will then be effected and a

committee on credentials appointed.

Following this will come the adoption of regulations for the government of the Congress and its proceedings, and the reception of official communications and invitations.

The nominating committee will then report the nominations for officers, after which the election of officers will follow.

8. The proceedings of the Congress will be conducted in the English language; but when participants in discussions speak in German, French, Spanish, or Swedish, interpreters will translate these languages into English. Addresses, papers, or communications printed or published by the Congress will be published in English, German, French, and Spanish.

The publication of the proceedings will be intrusted to a special committee, to be appointed by

the President of the Congress.

To defray the expenses attendant upon such publication, each member from the United States or member of the American Pharmaceutical Association who may take part in the Congress will be required to pay the sum of five dollars; no assessment to be made upon other members or visitors.

9. To facilitate the conduct of the proceedings of the Congress, the committee on arrangements will classify the business according to the subjects, and the Congress will for that purpose be arranged into four sections, as follows:

Section 1. Historical and Ethical Pharmacy. Section 2. Pharmaceutical Education and Legislation.

Section 3. Pharmacoposial Matters.

Section 4. General section, embracing pharmaceutical questions and subjects not assignable to any of the three preceding sections.

The order of business after the election of officers will be in conformity with this classification.

Subjects Proposed for Papers, Reports, and Discussion.

#### SECTION I .- HISTORICAL AND ETHICAL PHARMACY.

- 1. The condition of pharmacy four centuries ago as compared with its present status.
- 2. The history of pharmacy and pharmaceutical institutions in the United States.
- 3. The ethics of the practice of pharmacy, and the mutual relations between physician and pharmacist and between pharmacists and the public.
- 4. The influence exerted upon the practice of pharmacy by the introduction of chemicals and other medicinal substances controlled or limited by patents, copyrights, trade-marks. or other legal restrictions, but which are commonly ordered by physicians in their prescriptions.

Should such limitations as foster monopoly in the manufacture and sale of such products be removed in the interest of the public good? 5. The relations of pharmacists to public sanitation.

6. Statistics of the present number of pharma cies in proportion to population in various countries, and of imports and exports of crude drugs, medicinal chemicals, and pharmaceutical preparations during the last half century.

## SECTION 11.—PHARMACEUTICAL EDUCATION AND LEGISLATION.

- 1. Statistics giving the number of schools or colleges of pharmacy in each country, and the total number of students pursuing pharmaceutical courses.
- 2. How do the education and the professional and social position of pharmacists compare with those of other professions?.

3. What legislation, if any, is at present most needed for the advancement of the best interests of pearmacy?

4. To what extent is official supervision of drug stores necessary or beneficial?

SECTION III.-PHARMACOPCEIAL QUESTIONS.

1. The proper scope of a national pharmacopoeia.

2. What improvements, if any, are desirable and practicable in pharmacopæial nomenclature? Is a nearer approach to international uniformity possible?

3. What would be an ideal pharmacopæia?

4. What progress has been made towards the preparation of an international pharmacopæia for potent remedies.

What action, if any, should be taken in reference to this subject?

5. Have the influence and co-operation of pharmacists increased in the work of pharmacopæial revision in the various countries? What proportion of the membership of the pharmacopæial revision committee or commission of your country consists of pharmacists,?

6. Should any substance, the manufacture or sale of which is restricted by any patent, copyright, or trade-mark, be admitted into any national pharmacopoia? If so, under what conditions?

7. What consideration should determine the introduction into the pharmacopæia of a new remedy, or the retention or rejection of one already in it?

#### SECTION IV .- GENERAL SECTION.

- 1. Upon what general plan can a systematic pharmaceutical nomenclature of the complex organic chemicals recently being introduced into the Materia Medica (such as ansipyrine, etc.) be constructed?
- 2. In what directions may the pharmacist profitably extend his technical and professional work to render him less dependent upon the purely mercantile part of his business?

Papers upon these and other subjects which may be presented and accepted will be referred to their appropriate sections.

# Standard \* Pharmaceutical \* Products

have pleasure in announcing that our Laboratory at Walkerville is so far completed that we are prepared to supply our Fluid Extracts, Pills, Tablet Triturates, Capsules, Elixirs, Wines, Syrups, etc., in Assortment, Variety and Quantity, suited to the demand.

### OUR FLUID EXTRACTS

have established themselves firmly in the confidence and appreciation of the profession of the United States on their inherent merit.

Substantial merit is incontestably the secret of their present general employment. Our facilities for the procurement of

### CRUDE DRUGS

are unsurpassed. Every parcel of drugs delivered at our Laboratory, before being placed in stock for use, is identified by our Botanist and submitted to the rigorous examination of our Analytical Department. No Fluid Extract is permitted to leave our Laboratory until assayed and approved as of Standard Quality,

The Preparations of

#### TINCTURES, SYRUPS, WINES, ETC.

are greatly simplified by the use of our Fluid Extracts and miscellaneous pharmaceuticals with those of other manufacture, and shall be pleased to furnish samples to any who desire to make such.

Complete Descriptive List of our products and any information concerning them will be gladly and promptly furnished on request.

#### ADULTERATED CASTOR AND OLIVE OILS.

BY R. J. PARRY, B SC., AND P. A. ESTCOURT, Adic.

During the last six months we have had a large number of samples of castor oil and olive oil sent to us for analysis, and have been surprised to find what a small proportion of them were genuine. Out of fourteen samples of castor oil six were genulne and eight adulterated, and from fourteen sam ples of olive oil three were pure and eleven adultz rated. Any sample of castor oil whose specific gravity does not fall within the limits of '956 and 1966 should be viewed with grave suspicion, and if it be below '950 or above '969 is almost certainly adulterated. The saponification equivalent of pure castor oil - that is the number of grammes saponified by a litre of normal alkalisshould fall between 310 and 320, and the iodine absorption, according to Hubl, falls between 84 and and 84.7; our own experiments give 85. As will be seen from Table 1, none of the figures obtained agreed with these With regard to the rise in temperature when mixed with an equal weight of sulphuric acid—that is, 2 volumes of oil to a of sulphuric acid (97 per cent.) our figures do not agree with those recorded

our figures do not agree with those recorded by other observers. Allen gives 65" C., Archbutt gives 46" C., and we have repeatedly found 72" to 74" for castor oil of undoubted purity.

TABLE L

	Specific Gravity	Saponificat'u Equivalent	Iodine Ab- sorption.	Temperature Rise.
		-		
1 2 3 4 5 6 7 8	'9735 '9721 '9723 '9740 '9766 '9752 '9739	400 420 400 445 428 403 440	67 65 64	60 ° C. 62 ° C. 63 ° C. 60 ° C. 03 ° C. 01 ° C. 60 ° C.

The usual adulterants of castor oil are poppyseed, cocoanut, lard, and blown oils. The figures above quoted practically exclude all but rosin and blown oils. Moreover, in every case the samples were freely soluble in glacial acetic acid, which is a further indication of the absence of other oils. Since the gravity of blown oil seldom rises above '870, and its saponification equivalent seldom exceeds 284, we were confident that rosin oil was the adulterant used. The high gravity and saponification equivalent were confirmatory of this, as was the low iodine absorption. And if our observations on pure castor oil were correct, as we certainly believe them to be, in the case of the rise in temperature, the observed rise in the case of the impure samples pointed to the presence of hydrocar-To absolutely confirm our suspicions we used three further tests of extreme simplicity, but of great utility. A drop of the oil was placed on the back of the tongue, and in a minute nothing

but the disagreeable taste of rosin oil could be de tected. The samples did not appear fluorescent in bulk, but when mixed with an equal volume of ether and examined in tubes they were distinctly fluorescent. This is the usual method of observing the fluorescence of oils, but in the case of viscous oils, like castor, we have found the fluorescence much more intense when the sample without admixture with ether is allowed to run down the side of a thin glass tube and the thin layer adhering to the side is examined. Under these conditions the samples were extremely fluorescent. Finally, a few drops of each sample were dissolved in carbon bisulphide and treated with stannous bromide, with slight excess of bromine. In every case a fine coloration, from deep red to rich purple, was obtained, pure castor oil yielding little or no color. Thus every single sample was clearly proved to be adulterated with rosin oil. By adding absolute alcohol in the proportion of 2 parts to 1 of oil a large portion of rosin oil separated out, and by treatment with slaked lime most of the rosin oil combined loosely with the alkali, and the castor oil when filtered off from the lime compound had a specific gravity of 9665. By separating the rosin oil out by the addition of alcohol its specific gravity can be taken, and the percentage of rosin oil approximately calculated. However, we found that saponification of the oil with alcoholic potash, evaporating, to drive off the alcohol, and extracting the unsaponifiable matter with ether, was the most direct method of ascertaining the proportion of rosin oil, which we found to range from 35 to 40 per cent.

Before passing on to the samples of impure olive oil, it will be as well to review the results which are

obtained from the genuine oil.

The specific gravity is one of the most important features in enabling one to judge of the quality of the oil to be examined. Of many genuine samples examined by us the specific gravity at 15.5° C. (60° F.) compared with water at the same temperature never exceeded 917. In fact, we have never found so high a gravity. Low densitics have been observed, but 914 is the lowest we have come across, and the sample having this density contained a considerable amount of free acid. The general adulterants of olive oil are cotton-seed. poppy-seed, arachis, sesame, rape, and hydrocarbon The addition of any of these oils except rape oils. and the lighter hydrocarbons would tend to increase the density. The saponification equivalent is not of much value in assisting us to detect the adulteration in the oils, the saponification numbers of the oils generally used for sophisticating olive oil being nearly the same as those of the pure oil. If the adulterant were a hydrocarbon oil, or one from a cruciferous plant, the test would be of great value, as in these cases the saponification equivalent would be sensibly higher than those found for pure olive oil.

The observation of the rise of temperature with

sulphuric acid is a most important factor, and may be considesed to be, if not the most important, one of the most valuable tests of those used to ascertain the genuineness or otherwise of the olive oil submitted for analysis. Pure olive oil, according to many observers, gives 39° to 44°; our own experiments with the pure oil gave 40° to 43°. The usual adulterants of olive oil give much higher figures than these. We found the elaidin test of little value, except, of course, in indicating that the samples were sophisticated; for identification of the adulterant our results were not such as would allow us to pass an opinion as to the oil used for mixing with the olive oil.

The behaviour of the samples of oil with glacial acetic acid (E. Valenta, Dingl. polyt. J., cclii. 296; Jour. Chem Soc., xlvi, 1078) was observed Equal parts of the oil and glacial acetic acid were mixed and gently heated, with shaking, until the oil dissolved in the acetic acid. Our observations gave for the pure samples we examined 95° C., whilst our figures for the oils suspected of not being genuine were very much lower in every case. The importance of this test can only be appreciated after long and careful trial.

We also used Hübl's iodine-absorption method. For pure olive oil Hübl gives 81.6 to 84. Our own experiments gave 81.6 to 84.5 for the pure oil. The figures obtained from the oils commonly used as adulterants are much higher than this, as were the figures we obtained from our samples.

We applied still another valuable test—that of the melting-point of the fatty acids, obtained after saponifying a quantity of the oil with alcoholic potash, breaking up the soap with sulphuric acid, and washing free from the latter with distilled water. The fatty acids of pure olive oil obtained in this manner we found almost liquid at 23° C., whilst many of the oils before mentioned melted at as high as 35° C.

Our melting-point figures for the oils submitted for analysis were very much higher than those of pure olive oil, whilst they were slightly lower than those of cotton-seed oil. Our general figures are embodied in Table 2.

TACLE II.

·						
	Specific toraxits	Rice of Tem- perature	ledine Ale espiren	Saji-mfication E jaivalent	Valenta	
1 2 3 4 5 6 7 8 9 10 11 1 Parte (h)	9199 9186 9186 9194 9187 9187 9188 9187 9188 9187	640 C.	100'0 97'5 93'0 98'5 99'0 96'0 97'0 96'0 97'5 96'5 97'5 81-84 5	288 288 286 297 297 288 288 290 290 288 259 289	00000000000000000000000000000000000000	

On examining these figures, we found that the specific gravity, combined with the saponification equivalent, showed the absence of a hydrocarbon The difficulty was now to identify, if possible, the foreign vegetable or fat oil present. Except the saponification figures, no others agreed with those found by us of oils of known purity. Arachis oil of the poorer quality could have been used, the specific gravity of the poorer class being '920; but we examined for this oil by Renard's test, and were able to say that it was not present. In the same manner sesame oil, on account of its gravity and other general figures, might have been the adulterant, but, carefully using the colour-tests, we were able to dismiss it from our minds. We next turned our attention to cotton-seed oil, this oil being one used very largely for the purpose of adulterating olive oil, on account of its pleasant taste and general adaptability for eating and culinary purposes. We found that the high melting-points of the fatty acids of the samples submitted to us agreed well with that of cotton-seed oil, whilst the general colour-tests and elaidin tests also confirmed our suspicions.

To further strengthen our opinion that cottonseed was the adulterant, we carefully prepared the fatty acids of the suspected oils and dissolved them in alcohol, and then, after the addition of nitrate of silver, heated some to the temperature of boiling water. After some little time the silver was much reduced, and much blackening was observed. It may also be remarked that, on heating the fatty acid obtained after saponification for some time at the temperature of boiling water, the characteristic odour of cotton-seed oil was noticed, so that, by a review of these results, we were enabled to return every one of these samples as adulterated with cotton-seed oil.

#### J. E. D'AVIGNON.

The druggist at 55 Sandwich street west, opposite the Merchant's Bank, came to the town from Montreal (where he had been employed in the Medical Hall, the largest dispensing establishment in Canada) in 1879.

He is a Licentiate in Pharmacy of the Lower Canada College of Physicians and Surgeons in 1866; Licentiate of the Quebec College Pharmacy, 1870; Licentiate of the Ontario College of Pharmacy, 1880, and has for a number of years been a member of the Council of the latter named body.

His long experience dating from 1862, as a pharmacist and close attention to business have been the means of securing to him the largest prescription business in the city.

He has also a good trade in Perfumes and Toilet Articles, of which he keeps a very large and varied stock. A competent assistant is in attendance, Sundays and at night as well as in the day time to dispense medicines.

A special feature of the business however is the

manufacture of a number of popular and reliable remedies, among which may be mentioned D'Avignon's Cherry Balsam which is valuable for incipient consumption, and all throat and lung diseases. D'Avignon's Worm Lozenges are especially adapted for children and are certain destruction to worms. In these remedies as well as in baking powder he has a large family and local trade.

His baking powder has been well recommended wherever it has been used, and is put up fresh every day and sold at 25 cents per pound. With the baking powder a valuable receipt book is given

to any lady applying for the same.

Among other goods manufactured, may be meationed D'Avignon's Cream of Witch-Hazel, a valuable toilet preparation which is sold all over Canada, and is especially adapted for chapped hands, roughness of the skin, eruptions, redness, irritation, &c., and gives freshness to the skin and complexion. It is sold at the low price of 25 cents per bottle, and can be obtained of all druggists and dealers.

Mr D'Avignon's stock of these and other popular remedies is at all times complete, and he enjoys a reputation and trade unsurpassed by other drug Telephora connection with houses in the city. Detroit, Sandwich and Walkerville.— Windsor Review, Feb. 3rd, 1893.

#### Regulations Concerning Patent Medicines on the Continent.

According to an American Consular report, which is referred to by a pharmaceutical contemporary, the regulations of several European countries concerning patent medicines are a good deal more stringent than those of Great Britain. In Austria-Hungary prepared medicines, whether patented or not, unless imported for druggists, require a special permit from the Customs authorities. medicines and medical compounds are excluded from protection by the Austrian Patent Law, and the sale of such is permitted only to, and in drug In Belgium patent medicines can only be stores. sold by apothecaries or other authorised persons, and must bear the seal of the seller, who assumes the responsibility of the product. In Denmark the sale is confined to apothecaries. France entirely prohibits the sale of secret medicines, unless they are approved by authority and the formula is inserted in the official formulary. In Germany all proprietary medicines must be retailed by a regular sworn and licensed apothecary, who is responsible for their effect on the patient; but the most serious restriction is the prohibition of advertisements of patent medicines in public journals when such medicines are made by a secret formula or process. Thislaw is rigorously enforced in Badenand Prussia but less stringently so in Wurtemberg, Bavaria, and some parts of Northern Germany, while in Saxony the authorities exercise the right of prohibiting the sale altogether. In Italy the composition of a mixture will assume at once a beautiful blue color.

patent medicine must be approved by the Board of Health. No patent medicine is allowed entry into Russia unless special permission is on each occasion obtained from the Medical Department of the Minister of the Interior. If, after careful examination it is proved that the production of such medicines requires elaborate work and expensive apparatus, it is allowed entry subject to a duty of about 15 8d per pound avoirdupois provided such medicines are regarded as beneficial and are compositions durably preserved. In Sweden, Switzerland, and Turkey there are but few restrictions.

#### Rules For Drug Clerks.

It you see a customer enter, turn your back around and look at some bottles on the shelf. It has an air of sociability.

Always have the floor of your store mopped up in the busy time of the day. It impresses the customer with the idea that you value cleanliness. The same general rule would also apply to your windows.

If a lady asks for a postage stamp exclaim, "Don't you see that I am busy," or if the Directory is wanted, "Couldn't you see it when you came in?" Perhaps she doesn't feel mean enough already at asking the favor of you, and these little pleasantries will put her in the proper mood.

Always wear an angry expression when you have to go over to the soda fountain. It is not suitable work for a man of your ability and you are not paid to conceal your feelings.

Distribute two or three cats over the store. makes fun when a customer brings in a dog.

If a lady asks about perfumes, take an atomizer and spray some in her eyes. When she sees how lavish you are with it, she will appreciate its value.

Never put up a prescription in less than a half an hour after you receive it. You are the best judge of its urgency.

Never change the contents of your show-case. Customers who have been coming in for several years might miss sight of "old friends."

If you are selling tooth brushes always rub them across your hand or sleeve to show how pliable the bristles are. It enhance the value to the buyer.

Carry out these rules consistently for six months and then apply for an increase of salary.

#### New Color Reactions of Mixtures of Phenacetin, Methacetin and Hydracetin with Salts of Quinine.

Saturated, aqueous solutions of phenacetin or of methacetin assume, when diluted with an equal volume of chlorine-water and treated with ammonia, a reddish to brown color which appears slowly with the former, and more quickly and strongly with the By treating, in the same manner, the aqueous solutions of phenacetin or methacetin with a relatively small quantity of a quinine salt, the

According to F. A. Fluckiger (Pharm. Post.), the reaction is best seen when I part of the phenacetin mixture contains 1-10-1-20 part of basic sulphate of quinine (C, H, N,O<sub>2</sub>), H,SO<sub>4</sub>,—o. 1 gramme (1.1/2) min) of the mixture is shaken, in a test-tube, with 5 c.c. (So min.) of water; 8-10 drops of strong chlorine-water are then added together with 2-3 drops of ammonia. Or, the mixture of the two substances is heated in water to the boiling-point, before adding the above-named reagents, in order to dissolve the phenacetin; filter, after cooling, and proceed as indicated above. Hydracetin solution produces with chlorine-water a yellow color (intensified by ammonia) which, on mixing the solution with a small quantity of basic sulphate of quinine, turns into a beautiful red. Acetanilide and exalgin, when treated in the same way, produce no coloration, whatever; but, when treated with basic sulphate of quinine, they yield the green color characteristic of quinine. Morphine, as is well known, produces a yellow reaction when treated with chlorine-water alone, or with chlorine-water and ammonia. When mixed with quinine-salts it yields only the green color (thalei-ochin reaction).

#### Chemistry as she is Understood in India.

The following answers were collected from a written examination in chemistry held in connection with a well-known Indian university:

Sulphur is a smellful gas.

Nitrogen is a remarkable lazy gas, and is good for nothing.

Carbon always exists in a dark room.

There is no living being in the whole world that does not contain carbon.

Gas is made by filling a poker with coal and heating it.

Alumina is used in medicine to open the bowels. Chlorine gives botheration to the throat.

Hydrogen is a colourless, invincible gas, and

burns itself without anybody's help.

Nitric acid is used in the preparation of currant electricity. It is very bad for teachers to pour it

on our hands.

Soda is formed by heating castor oil and potash.

Caustic soda is used in the manufacture of soda water, and this is used in medicine for purgative

purposes.

Caustic soda is used as a summer drink.

Quicklime is made by pouring water on slaked lime.

Quicklime is made from smooth pebbles, and is good for worms.

We can eat this substance (CaO); it has the power of digesting food.

Lime destroys the excess of vegetable matter, and nothing in the whole world is an exception to the above fact.

Lime is used as a kind of gum for builders to stick bricks together.

There are two kinds of phosphorus—red and blue.

Preparation of phosphorus—The powder, which is got from the roots of plants, is mixed with H<sub>2</sub>S O<sub>4</sub> and water, and it is then filtered through paper filter. The refuge that is thus got is heated, when dense red fumes of phosphorus come, which may be collected by downward displacement, and may be rolled into sticks of phosphorus.

#### Opium-Growing in British India.

According to official reports, the cultivation of opium in Bengal is becoming unpopular with the farmers, because it is found that other crops which are less delicate are more remunerative in an average year than poppy. Exact data are not forthcoming, but it is known generally that while the area under poppy has been steadily decreasing, that under other crops has increased largely. The Benares opium agent reports that some European firms have organized a regular system of advances to stimulate the cultivation of cereals. Poppy, it is added, is no longer cultivated on the best soil everywhere, but has to take its chance with other crops. The effect of this competition is so keenly felt by officials that already there is a talk of holding out increased inducement to the ryot to take up the cultivation of the poppy, in the shape of more liberal loans for irrigation and a rise of 8a. per seer in price; and the Government is advised to make an attempt to increase the outturn of the poppy crop by exercising greater supervision over the cultivators. From the prospect of a yearly increasing area under cereals, the Opium Department turns with a sense of relief to the fact that six European planters in Tirhoot, who formerly cultivated indigo, are now putting their fields under poppy.

A somewhat suspicious looking parcel of jalap was exposed for sale in London recently. comprised both Tampico and Vera Cruz tuber, partly whole, partly sliced, some light and porous, aod some good heavy root. Much of the jalap was of small size. Such parcels are by no means rare, and it is probable that the decided fall in the resin value of jalap which has been noticed of recent years, may simply be due to too early harvesting. Some have the suspicion, not unreasonable in the circumstances, that the tubers which are sliced have been treated with spirit for the partial extraction of resin. A Vera Cruz tuber, weighing about 11/2 oz. was slized at the sides, and felt rather light. It yielded 8.5 per cent. of resin, that is 1.5 per cent. below the standard, but still not the lowest percentage which has been noted in genuine jalap. A second fair average sample of the Tampico sort yielded 10.5 per cent. of resin.

#### THEY PASSED THE EXAMS.

#### List of Successful Students at the Recent Pharmaceutical Examinations.

The annual meeting of the Pharmaceutical Association of Manitoba was held recently. Among those present were Messrs, J. F. Howard, president; J. C. Gordon, treasurer; B. M. Canniff, G. W. McLaren, P. H. Rosser, C. Flexon, E. Casselman, Dr. W. A. B. Hutton, A. A. Campbell (Montreal), Wilson (Hamilton), and J. K. Strachan, registrar.

The following reports were read and adopted:

To the Pharmaceutical Association of the Province
of Manitoba:

Your council beg to report

1. That at their first meeting they elected Mr. J. F. Howard as president; Mr. A. Moncton, vice-president; Mr. J. C. Gordon, treasurer; Mr. G. W McLaren, Mr. B. M. Canniff, Mr. H. E. Neeland and Dr. W. A. B. Hutton were appointed examiners, and Dr. E. A. Blakely, special examiner.

2. Mr. Moncton, since his election, having permanently removed from the city, Mr. C. Flexon was elected a member of the council to supply the

vacancy.

- 3. Your council, after careful consideration of the matter, and having received a legal opinion of Messrs. Hough & Campbell as to the powers of the council to refuse to recognize other pharmaceutical organizations or colleges of pharmacy, passed a resolution having the effect of in future giving no one the right to register as a druggist in this province on a diploma granted by any other association. This resolution does not interfere with the right of the examiners to dispense with examinations and accept authenticated certificates in lieuthereof, as provided by section nine of the Association's act.
- 4 Your council regret that since the last meeting the association has lost three of its members through death, viz.: Mr. Jos. Parkinson, and Mr. H. E. Neelands, both of Winnipeg, and Mr J. Stork, of Portage la Prairie The death of Mr. Neelands is a great loss to the association, he having rendered valuable service both as examiner and lecturer.
- 5. For causes beyond the control of your council they have found it impracticable to make any progress towards affiliation with the Manitoba Medical College.
- Your council have again pleasure in reporting a satisfactory financial position of the association.

J. F. HOWARD, President.

REGISTRAR'S REPORT.

To the Pharmaceutical Association of the Province of Manitoha:

GENTLEMEN,—I have to report that since the last annual meeting there have been added to the register the following:

Pharmaceutical chemists—Dr. W. A. B. Hutton, Dr. J. H. O. Lambert, T. G. Poyntz, G. A. Sherrin, G. W. Berry, Alexander Campbell, W. Campbell, W. L. Gemniel, H. P. Eakin, E. D. Martin, P. H. Rosser, J. Bray, R. J. Haworth and S. S. Smith.

Certified clerks—Austin Francis, F. A McDonald, Max Benjamin, A. D. Ferguson, Cochenor, R.

Wesley McClung.

Certified apprentices—W. Brooking, W. H. Kennon, H. H. Casselman, J. A. Gordon, H. E. Rogers, Annie Simpson, A. B. Huckell, G. Deyell, Ernest Bishop, Arthur Burriage, A. C. McDonald, Geo. H. Carman, J. P. Leveque, Wilkie Collins, F. G. Russell, R. Grimmett, R. E. Beattie.

There has been one prosecution, two informations having been laid, one for illegally compounding a prescription, and the other for the illegal sale of poison, the defendant being fined \$20 and costs

for each offence.

The following members have been removed from the register in consequence of removal from the province, non-payment of fees, or other causes, viz.: Dr. Lamont, A. Monckton, H. A. Neelands, J. Parkinson, J. Stock, E. R. Flach, J. K. Hollingshead, C. H. Gunn and R. J. Campbell.

J. K. STRACHAN, Registrar.

The treasurer's annual statement showed a balance on hand of \$1,833.21.

A discussion took place on the illegal sale of drugs and poisons, which was reported as going on in several parts of the province, and it was referred to the council to consider what should be done to prevent a continuance of the law's being disobeyed

EXAMINERS' REPORT.

At a meeting of the council the examiners' report was presented as follows:

GENTLEMEN,—Your board of examiners beg leave to report that they have duly conducted the regular semi-annual examinations on the 4th, 5th, and 6th inst. as advertised.

Five candidates presented themselves for major examinations and five for minor. Of these we recommend the names of B Storey, E. T. Howard, A. T. Andrews, F. A. McDonald and W. M. Harrison be added to the roll of licentiated chemists, they having obtained the requisite number of marks to entitle them thereto. Also that the names of A. E. Kelly, G. H. Cameron, T. W. Lines and Chas. McDonald be added to the roll of certified clerks, they having obtained the necessary marks to entitle them thereto.

We also recommend that Mr. Leithhead's name be added to the roll of licensed chemists on payment of the usual fees, he being, in our opinion, entitled to registration. We further recommend that all candidates for examination be required to make at least 50 per cent. on each paper as well as 66% per cent. total, and that failing to take 50 per cent. on each separate paper, although they may have taken a total of over 66% per cent., they be

required to come up for examination on such subjects as they have failed to obtain 50 per cent on, and that such subsequent examination must be taken not later than the second examination after such failure, and that half the regular fees be paid therefor, and that failing to pass such examination he shall lose all rights to count as passed on any subject and must come up for full examination thereafter; and also that Mr. W. W. McKeague, having produced satisfactory proof of qualification, be added to the register of licentiate chemists on payment of the usual fees.

(Signed)

G. W. McLaren, B. M. Canniff, W. A. B. Hutton.

The report was adopted, with the amendment that a candidate failing in the first examination must come up at the one immediately following.

Mr. W. W. McKeague and Mr. L. W. Leithhead attended before examiners, and producing certificates of qualification were admitted as chemists and druggists.

Following is the standing of the candidates who have passed:

MAIOR.

•	
A. T. Andrews	
JUNIOR.	
T. W. Lines	Possible 500

#### College of Pharmacy.

The annual meeting of the Montreal College of Pharmacy was held in the College building, 595 Lagauchetiere street, on Thursday, May 4th, at 8 p. m, a goodly number of members being present, David Watson, Esq., president, occupying the The minutes of the last meeting and also the annual report and financial statement were read by the secretary, Mr. Muir, all of which were approved and adopted. The report and financial statement were considered very satisfactory and shows the College to be in a prosperous condition, the balance cash on hand to the credit of the general fund being \$296.23 and of the building fund \$233.60, after having paid the Sun Life Insurance the sum of \$174 for interest and \$350 in reduction of the mortgage debt, leaving that liability now standing at \$2,500. The president in his address referred to the fact that this was the fifth time he had been unanimously chosen as their president, stating that he accepted the position this year with the distinct understanding that the vicepresident should succeed him next year. Mr. S. Lachance and Mr. T. D. McLeish were nominated scrutineers, who, after counting the ballots, de-

clared the following gentlemen to be elected to the Executive Board, namely: Jos. Contant, A. D. Mann, J. E Tremble, W. H. Chapman, W. S. Kerry, Ed. Giroux, jr., C E. Scarff, A. J. Laurence, and Jos. E. Morrison; these, with the following officers, namely, David Watson, president, C. I. Covernton, vice-president, and Alex. Manson, treasurer, will compose the board for the current year. The president now presented the gold medal to Mr. Herbert C. Harvey and a copy of Remington's Pharmacy to Wilfred L. Taylor, rewards of merit as licentiate of pharmacy and certified clerk respectively. Votes of thanks were passed to the president for his able supervision of the College affairs, also to the retiring board and to Mr. Muit for his efficient services as secretary. Upon the invitation of the president the members adjourned to another lecture-room for refreshments which had been generously provided by that gentleman.

#### A Suggestion for the Summer.

In their trade bulletin for April 1, Talcott, Frisbie & Co., of this city, mention that they have ordered a carload of Tanglefoot fly paper for arrival May 1, and they proceed to figure up what that means. There are 50 sheets in a box, 10 boxes in a case, and 700 cases in a car. That means 350,-000 sheets. Each sheet is capable of catching 1,000 flies. If every one does its full duty, 350,-000,000 flies will be caught. Arranged in line these flies would make a procession 2,071 miles long. Carefully piled they would make a cube 90 feet on each side. The circular does not say whether this enterprising firm intends to exhibit in the cube or procession form at the end of the season. The people would vote for the procession with the nearest fly at the city limits and the line running thence 2,071 miles in any one direction. -Hartford, Conn., Courant.

#### A Case of Suppressed Menstruation.

BY ARTHUR ROSITER CORB, M.D.

R. I., a. 18 years, came to my office with following history, viz.:

Although of apparently good physical development, menstruation had never been normal, but, for past three years had occurred at regular periods of from three to six weeks, flow scanty, and accompanied by intense abdominal pain in the region of the ovaries and tubes; the pain was so severe as to cause, at intervals, for several days, marked attacks of syncope, followed by headache.

The case appeared to be one of acute amenorrhoa, and Apioline was exhibited, in usual doses, for three weeks, when menstruation occurred. To her surprise and gratification, the discharge was profuse, accompanied with but slight pain, no syncope or subsequent headache.

The last two periods have been normal.

I am pleased to report the beneficial action of Apioline in this obstinate case.

# PHARMACEUTICAL ASSOCIATION OF THE PROVINCE OF QUEBEC.

The semi-annual examinations of the Pharmacentical Association of the Province of Quebec were held in the Montreal College of Pharmacy, 595 Lagauchetieere street, commencing on Tuesday and closing on Thursday of this week. Nine candidates for the major and twenty-six for the minor examinations entered their names. Of these the following, named in order of merit, passed successfully, and are entitled to be registered as "Licentiates of Pharmacy" and "Certified Clerks" respectively, namely: As "Licentiates of Pharmacy" -Herbert C. Harvey (gold medalist), T. Emile Barbeau, J. A. René de Cotret, Thomas J. Quirk, A. F. Foss and Kenneth C. Campbell. As "Certified Clerks."—James Douglass Webb, W. L. Taylor, P. J. McCloskey, Geo. F. Morrison, J. E. Dubé, J. E. A. Gauvin, H. W. Reynolds, John J. Power, J. J. O. Vaillancourt, Alphonse Martineau, Wm. Lyman, H. J. Pilon, R. A. Taschereau, J. A. F. Bertrand, with W. J. Furse and E. H. Lawson (equal.) The examinations were written and oral, and the subjects examined upon were; Chemistry, Pharmacy, Materia Medica, Toxicology, Practical Dispensing, Botany, Reading of Prescriptions and Weights and Measures.

The examiners were Messrs. S. Lachance, John T. Lyons and W. H. Chapman, Montreal; A. S. DuBerger, Waterloo, and R. W. Williams, Three

Rivers.

#### Pharmaceutical Association of the Province of Quebec.

WRITTEN MAJOR EXAMINATION.

Montreal, April 18th, 1803.

N.B.—You are requested to

1. Write on one side of the paper only.

2. Number and letter your answers so as to cor-

respond with the printed questions.

3. Number the sheets of paper in their proper order and attach them together; then fold them up and place your number on the outside.

#### MATERIA MEDICA AND TOXICOLOGY.

- 1. Wild Cherry.—(a) What is the technical name? (b) What is its origin? (c) What is its habitat? (d) Give the general description. (c) When should it be gathered and from what part of the tree?
- 2. Give the botanical name, habitat and natural order of each of the following: (a) Calumba, (b) Gentian, (c) Ipecacuanha, (d) Senega, (e) Cascara Sagrada, (f) Rhatany.
- 3. What order of plants furnish respectively: (a) Tolu, (b) Colocynth, (c) Chrysarobin, (d) Cubebs, (e) Jalap, (f) Senna, (g) Ammoniacum, (h) Elaterium.
  - 4. What would you give in a case of poisoning !

by Paris green, iodine, carbolic acid and concentrated lye?

#### BOTANY.

r. What are roots and how do they grow? Describe the different kinds of roots giving one example of each. How would you distinguish a piece of root from that of a stem?

2. What are stomates? Give a description of them and state what purposes they serve; also specify the exact parts on which they are found in

maple trees, onion plants and water lilies.

3. Give the differences between a parasite and an epyphite, describing the means by which both derive their nourishment and live, and if they contain any chlorophyle.

4. What is bark? State the different layers that compose ordinary bark, naming the kind of cellular

tissue contained in each layer.

#### CHEMISTRY.

- r. How may commercial cyanide of potassium, also pure cyanide of potassium be made? (b) Show by equation that one grain of cyanide of potassium pure is stronger cyanide dose than twenty minims of hydrocyanic acid dil.
- 2. Describe glucosides. Name six and state whence they come, (one at least out of the six must be official in the B. P.) State which of those you name is official and describe their physical characters.
- 3. A body composed of (). H. N. gives the following percentage:

Ο.	 76.19
Ν	 22.22

100.00

- (a) Show its formula by equation. (b) Name the compound. (c) Give specific gravity and strength of official solutions and characteristic tests.
- 4. Give a diagram of the official process for the preparation of ferrous sulphate. (b) In what respects do the official sulphate of iron, granulated sulphate of iron and dried sulphate of iron differ?

#### PHARMACY.

- 1. Give the B. P. process for the manufacture of salicylic and oleic acids. Give the formula and characters of one B. P. compound of each, with dose, if for internal use.
- 2. State official specific gravities and strength of liq. ferri perchlor, liq. potassæ, acid sulph. arom., liq.-plumbi subacet.
- 3. State the solubility of the following in water and alcohol, temperature being  $60^{\circ}$  F.: (a) Boracic acid, (b) acetanilid, (c) gallic acid, (d) phosphate of sodium, (e) corrosive sublimate, (f) oxide of zinc, (g) chlorate of potassium and (h) acetate of potassium.
- 4. Describe the method of preparing pepsin and pancreatin. What is the B. P. test for pepsin and its dose? What is peptone?

#### Pharmaceutical Association of the Province of Quebec.

WRITTEN MINOR EXAMINATION,

Montreal, April 18th, 1803.

N.B.—You are requested to

Write on one side of the paper only.

2. Number and letter your answers so as to correspond with the printed questions.

3. Number the sheets of paper in their proper order and attach them together; then fold them up and place your number on the outside.

#### MATERIA MEDICA.

1. Define materia medica and how it differs from pharmacy. What are the regulations for the sale of the poisons enumerated in schedule A in the Pharmacy Act?

2. Give the dose and properties of (a) arsenious acid, (b) aloin, (c) apiol, (d) lactucarium, (e) elate-

rium, (f) resorcin.

Give the strength of (a) liq. morph. hydrochl.,
 (b) liq. hydrarg. perchlor, (c) liq. atrop. sulph, (d)

liq. strych. hydrochl. Give their doses.

4. Give the properties and doses of (a) citrate of iron and quinine, (b) citrate of iron and strychnine. What percentage of quinine should a B. P. sample of the first contain, and what percentage of strychnine is usually contained in the second?

#### CHEMISTRY.

1. Give the technical name and chemical formula of each of the following with its molecular weight: (a) Salts of tartar, (b) Rochelle salts, (c) sal prunelle, (d) glauber salts, (e) lunar caustic.

2. Define analysis, synthesis, decomposition and

chemical combination.

3. What is the difference between sulphides, sulphites, sulphates and hyposulphites? Describe the method of preparing sulphuretted hydrogen gas.

4. (a) Name the sources of potassium, (b) give the source, formula and characters of carbonate of potassium, (3) state the chemical formula of caustic

potash.

#### PHARMACY.

1. Give six official liquid preparations containing drugs of animal origin, their composition, strengths and doses, if for internal use.

2. How much atropine is required to make four

ounces of a 5 % solution.

3 How many grains of hydrate of chloral is required to make one ounce of syrup of chloral, and how many grains of iodide of iron are there in each drachm of the official syrup? Give the dose of each syrup.

4 Criticise the following prescription and trans-

late the direction into French:

Hydrargyri Perchloridi... 3ss Potassii Iodidi...... 3i Syrupi Sarsae ...... 3vi

Misce fiat mistura.

Sig.—Capiat unum cochleare amplum, ter in die, ex cyatho aqua frijida, statim post cibum.

#### Another Customs Case.

Mother Seigel is in trouble with Her Majesty the Queen. The famous purveyor of syrup and pills also sends to the Canadian public an article known as "soothing plasters," which are sold to the trade at \$21.60 per gross, retailing at 25 cents, and are of course guaranteed to cure all mundane ills. These plasters are imported from the United States, where they are made by manufacturing chemists, who sell them generally at \$4 per gross. Mother Seigel, or rather her agents, the firm of A. J. White & Co., print her name on the plasters imported, and then put them on the market here. The Customs duty has hitherto been paid on \$4 per gross, but Mr J. D. L. Ambrose, the Customs appraiser, has demanded an amended entry, contending that the plasters should be entered at \$21.60 less the value of the printing done here. The importers, who are represented by Mr. R. D. McGibbon, Q.C., allege that no Mother Seigel plasters are sold in the United States and that \$4 is the proper value for duty. They have forwarded a large number of affidavits to the Hon. N. Clarke Wallace, Comptroller of Customs. The law on which Mr. Ambrose founds his ruling was recently passed and no similar case has yet arisen.

# Announcement From Department of Physiological Remedies of Parke, Davis & Co.

We learn with much interest that Messrs. Parke, Davis & Co., of Detroit, Mich., have undertaken the manufacture of some of the newer physiological remedies. They are now prepared to supply desicated thyroids and cerebrin, and expect to extend this list materially. The following announcement

is made by this enterprising firm:

As a result of the well known investigations of Dr. Brown-Sequard and other eminent therapeutists, the materia medica has recently been largely extended by resorting to the use of products representative of certain glands or tissues of the animal economy. As we have always made the manufacture of digestive ferments a specialty, and enjoy every facility for the preparation of products of this character, we are undertaking to supply some of these newest remedies, of which we now have ready Desiccated Thyroids and Cerebrin.

Desiccated thyroids are in the form of impalpable powder representing in permanent form the thyroid glands of sheep. This product is of such strength that 15 grains represent one gland of the average size. Desiccated thyroids are highly recommended in the treatment of myxœdema.

Cerebrin is prepared after the formula of Dr. William A. Hammond, and is put up in glass-stoppered ounce vials. While Dr. Hammond has re-

commended maceration of the brains for six months, we have modified his method in such manner that we are enabled to thoroughly extract the crude material in as many days.

One serious drawback to the use of these products has been the difficulty in getting the necessary crude material, and the disagreeable character of the work involved in their preparation.

Again, it is only by the most scrupulous attention to the minutest details that asepsis in the finished article can be secured and assured.

The well known reputation of our house is a guarantee of our ability and intention to fulfil every requisite. We do not doubt that many interesting results will follow the treatment of myxcedema by desiccated thyroids.

It is our purpose to extend this list from time to time. Descriptive literature of those announced will be supplied on application.

#### Davis, Staples & Co.

ALONZO STAPLES GOES OUT, MR. MACK, OF ST. JOHN, GOES IN.

Another drug store has been added to the already overburdened list of that class of shops in Alonzo Staples, who has for years been the visible head of the firm of Davis, Staples & Co., has gone out of the concern, and will open up a drug store in the building recently occupied by G. I. Gunter as an express office. It is apparent that Mr. Staples was that part of the company which made the business successful, and that he will carry with him all his old friends. The firm will now be known as Davis, Mack & Co. Mr. Mack is a stranger to the townsmen, as also to the farmers of the vicinity, and other things being equal, will not and cannot expect to carry the trade which Mr. Staples has done. His brother druggists will not oppose him, but of course it is natural that they should be anxious to help along one of themselves. Mr. Staples leaves the firm with a great deal more knowledge of human nature than when he entered that firm, and if he has not advanced in pocket it is certain he has learned where to look for friends In opening up he will have the best wishes of all his old patrons and a host of new ones.

The Davis part of the old concern is pretty generally believed to be George F Gregory, although he has not been considered a practical chemist, whatever his other abilities may be. It is presumed that Mr. Mack will be a wiser man in respect to the drug business in this city within a year from this than he is at present; and will likely also gain other experience that will perhaps prove beneficial to him after he leaves the city.

#### NOTES ON ESSENTIAL OILS.

CAMPHOR OIL.—Since the examination of this oil by Messrs. Schimmel, and the publication of their suggestions as to the practical application of

its constituents, in 1885, considerable attention has been directed to it, but the importation from Japan has fallen off. As a material for artists the more volatile portion has been found very useful, as its capacity for dissolving resins is greater than that of turpentine or any other essential oil.

CASSIA OIL.—The previous reports have furnished ample information as to the source and preparation of this oil, but there is still some uncertainty as to the conditions influencing its quality. Oil containing only from 45 to 55 per cent. of cinnamic aldehyde has again come into the Chinese market, and it is stated to be absolutely pure. This deficiency is accounted for by the statement that young and imperfectly ripened material always yields such oil. On examination Messrs. Schimmel found that the oil was not to be distinguished by its external appearance and characters from oils of the best quality. It did not contain rosin, fat, oil, petroleum, or any of the coarser adulterants. This oil has been rejected by the Hong Kong merchants, but some of it has found its way to India and places where low price is the chief attraction, and there is but little appreciation of quality. The explanation given by the Chinese of its inferior character cannot be summarily rejected, since it is possible that young leaves may contain a considerable proportion of the acetic ester of cinnamyl (C. H.OAc), and that cinnamic aldehyde may be formed from that by oxidation during the growth of the plant. But it is more probable that this inferior oil is derived from other parts of the plant, or from another species of the genus of Cinnamomum. Messrs. Schimmel remark that the previous history of this subject furnishes no inducement to believe the statements made by the Chinese, and they reserve their opinion until they shall have examined the raw material from which the inferior oil is obtained. Meanwhile they recommend that the determination of cinnamic aldehyde should be made the test of quality in purchasing the oil, and they state that the oil imported since last October has been found to contain at least 85 per cent. and sometimes as much as 94 per cent. of cinnamic aldehyde.

BERGAMOT OIL -For many years the examination of this oil has been limited to the determination of its physical characters, and it is only within the past year that the acetic ester of linalool has been recognized as its most important constituent. This fact pointed to a means of determining the quality of the oil, as the ester is the odorous con-By a saponification method described under the head of "Lavender Oil," the normal amount of ester has been found to be about 40 per cent., and the test may be relied upon for ascertaining the quality of bergamot oil. The chief adulterants are turpentine, orange, and lemon oils. All three reduce the solubility of bergamot oil in dilute alcohol, as well as the specific gravity and, of course, the amount of ester. The presence of orange oil is also indicated by its high optical rotation. In the examination of bergamot oil it is necessary in the first place to determine the specific gravity and the rotatory power. The alcohol test requires to be made more stringent—the oil should dissolve at 20° C., in from 1-5 to 2 volumes of 80 per cent. alcohol. Slight turbidity, increasing on addition of more alcohol is due to separation of bergaptene; but no drops of oil should remain undissolved. Distillation of the oil under normal atmospheric conditions causes considerable decomposition, and this treatment is quite useless for the purpose of valuation. The results of a long series of experiments have proved that oil containing a high amount of ester is distinguishable from those kinds containing smaller amounts by the higher specific gravity and greater solubility in alcohol of 80 per cent. Oil of undoubted purity pressed by Messrs. Schimmel was found to contain more ester than any other kind, and it is probable that a perfectly pure oil is not to be met with in commerce. Experiments with mixtures of bergamot oil and turpentine, orange or lemon oils, have shown that the ester determination may be fully relied upon, and as a minimum amount there should 38 per The specific gravity should not be under o.881 at 15° C., and the optical rotation not more than 20° with a column of 100 mm. Practical experience has long proved that distillation of the oil is injurious, and that the much less convenient process of pressing must be preferred on that ac-Experiments have shown that distilled oil contains much linalool, as a consequence of the decomposition of the ester, and by acetylating a distilled oil containing only 12 per cent of ester the amount of ester was increased to 61.5 per cent. Even pressed bergamot oil contains some linalool, and a sample containing 37 per cent. ester was found after acetylation to contain 47 per cent. It may probably be assumed that the oil obtained by distilling the residue of the pressing operation is used for adulterating the pressed oil, and that would account for the frequently small amount of ester, as well as the low specific gravity of the commercial oil as compared with absolutely pure pressed oil.

LEMON OIL —As the general result of further investigation, it has been found desirable to apply tests of increased stringency in judging of the purity of this oil. The determinations of optical rotation and specific gravity are of special importance, since the admixture of turpentine oil-almost the only adulterant—has the effect of reducing the rotatory power and increasing the specific gravity. By comparison of a number of samples with oil of known purity, expressed by Messrs. Schimmel, it appears that pure lemon oil of good quality should have a specific gravity of 0.858 to o.859 at 15° C., and an optical rotation of not less than + 60°, with a column of 100 mm. But these data are by no means sufficient indications of quality, which can only be determined satisfactorily by ascertaining the amount of citral present. It has I

not yet been possible to do that; but Messrs. Schimmel are endeavoring to devise a method suitable for that purpose, and they have reason to believe that they will succeed. In reference to the recently established production of a concentrated lemon oil—wholly or partially deprived of terpene, a question is raised as to what may be expected to become of the by-products of that operation, consisting of a mixture of pinene and limonene, possessing some lemon odour, but almost destitute of citral.

SWEET ORANGE OIL.—Similar observations of the characters of this oil have been instituted, and the conclusion arrived at is that it should have a specific gravity of '850 at 15° C., and a rotation of at least 95°. Addition of turpentine to the oil reduces the rotation and increases the specific gravity.

#### Boracic Acid as an Insect Destroyer.

Half pound boracic acid to one gallon cold water. When cold mix a little lime with it and then apply with a brush; the lime is used to show where the dressing has been applied.

The grapevine-growers of France are using this very largely now, and as above.

Fruit-growers are also using it,

The weight of a molecule of hydrogen, as given by an eminent authority, is approximately 0.000,000,000,000,000,000,000,004 of a gramme; by multiplying this inconceivably small number by 55, the atomic weight of iron, we ascertain the weight of a molecule of iron—0.000,000,000,000,000,000,000,2 gramme. In the sulphocyanide test we are able to detect the presence of 33 ten-millonths gramme of iron; dividing this number by the weight of one molecule of iron, we find that this apparently delicate test is unable to indicate to our senses a less number of molecules than 1,500,000,000,000,000,000,000,000.

#### free Want Department.

Druggists in need of apprentices and help generally, are invited to make free use of this department, and all persons seeking situations in the drug trade are cordially invited to do likewise. Advertisements of business for sale will also be inserted free of charge.

Wanted.—A certified clerk for one of the leading drug stores of Hull. Apply P. O. Box 1144, Montreal.

WANTED.—A manager for a drug store in Cape Breton. A good situation for the right man. Apply with references to P. O. Box 1144, Montreal.

CHEMISTS' ASSISTANT.—Englishman, desires situation in Canada; age, 26; experience in London, Eng., and the provinces. For particulars apply to W. T. Courtenay, Chemist, Water street, St. John's, Nfld.

(Vosges)

### CH. MARCHAND'S

### PEROXIDE OF HYDROGEN.

(MEDICINAL) H2O2 (ABSOLUTELY HARMLESS.)

MOST POWERFUL BACTERICIDE AND PUS DESTROYOR. ENDORSED BY THE MEDICAL PROFESSION. UNIFORM IN STRENGTH, PURITY AND STABILITY. RETAINS GERMICIDAL FOWER ANY LENGTH OF TIME. USED BY THE HOSPITALS OF THE U.S. ARMY.

Send for free book of 80 pages, giving articles by the following contributors:

DR. P. GIBIER, DR. S. POTTS EAGLETON, DR. C. P. NOBLE, DR. C. A. PHILLIPS, DR. J. H. DeWOLF, DR. J. V. SHOEMAKER, DR. W. S. MULLINS, DR. C. W. AITKIN, DR. H. F. BROWNLEE, DR. J. LEWIS SMITH, DR. J. MOUNT BLEYER, DR. W. B. DEWEES, and many others.

NOTE.—Avoid substitutes—in shape of the commercial article bottled—unfit, unsafe and worthless to use as a medicine.

Ch. Marchand's Peroxide of Hydrogen (Medicinal) is sold only in 4-oz., 8-oz., and 16-oz. bottles, bearing a blue label, white letters, red and gold border, with his signature. Never sold in bulk.

PHYSICIANS WILLING TO PAY EXPRESS CHARGES WILL RECEIVE FREE SAMPLES ON APPLICATION. PREPARED ONLY BY

# SYRUP OF FIGS · ·

The above is the trade name of the liquid laxative remedy manufactured by the CALIFORNIA FIG SYRUP COMPANY, of San Francisco, Cal., Louisville, Ky, New York, N.Y., U.S. A., and has been registered in the Canadian Patent Office.

SYRUP OF FIGS sells well and gives general satisfaction. It will be extensively advertised in Canada during the coming Winter and Spring.

We offer it to the trade at \$6.00 per dozen, and it retails at 75 cents per bottle.

The remedy is a combination of the medicinal principles of plants known to be most beneficial for the purposes intended, and it is very pleasant to the taste, and gentle, yet effective in cleansing the system, dispelling colds, headaches and fevers, and permanently curing habitual constipation.

Your orders respectfully solicited.

Yours truly,

## California Fig Syrup Co.,

San Francisco, Cal.

Louisville, Ky.

#### DRUGGISTS' ATTENTION !

At this time of the year you cannot afford to be without "ANTI-MOTH" PAPER. A ready seller.

#### CHAPMAN'S IMPROVED

The value of "ANTI-MOTH" PAPER as a protector of Woolen Goods, Furs, etc., from moths, has been fully proved by the increasing demand and sales each year.

Its success has of course brought many imitations into existence.

The Genuine Anti-Moth Paper is clean and will not soil the hands or the most delicate white Woollens and Furs.

It is pleasant in odor, and has the hygienic and medicinal properties of the Pine Tree.

It is better and cheaper than Camphor or any of its worthless imitations.

## Williams' Celebrated Eye Water

No Humbug

This proparation was used successfully by the manufacturer 25 years ago, when he was almost blind, and medical men pronounced him beyond their skill to cure, and with the proparation was restored to sight in one month. After many years Mr. Williams succeeded in obtaining this valuable receipt and proparation, and during the past ten years has sold this Eye Water to a great number of people, with successful results.

As there are several ingredients in the preparation for different diseases of the eye, they all work together for good without the least injury to the weakest eyes, and it cannot be excelled in strongthening weak eyes or restoring the sight.

\*\*It is a CEO.\*\* WILLIAMS.\* - 112 Papiesan Ro21, MONTERAL.

TO THE-

# ruggists of Canada

THE following preparations are now on the Canadian market, and extensively advertised in the Dominion:

#### Peach Bloom Skin Food

Dr. Clark's Pile Ointment

Dr. Clark's Catarrh Cure

Dr. Clark's Regulative Pills

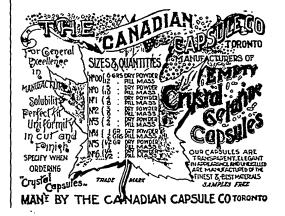

Dr. Clark's Lightning Liniment Dr. Jones' Horehound Expectorant

Write for Price List, and order from your nearest Wholesale House

## Weston Chemical Co.,

186 Adelaide Street West,

TORONTO.

Capsules Oleum Santal (Midy) always gives satisfaction in Gonorrhoa

and Cystitis. The oil is distilled by Midy's process, from the best freshly-cut Mysore Sandal Wood, and is vastly superior to commercial sandal oil, copaib, cubebs, etc. Original bottles contain 40 capsules of 5 minims each—they are value for money and pay to

GRIMAULT & CO., Paris,
LYMAN. SONS & CO.,
MONTREAL.

In Amenorrhœa of anæmic

or chlorotic patients, one capsule 2 or 3 times a day, given a week preceding menstruation, rarely fails to induce a normal flow.

### APIOLINE

(CHAPOTEAUT.)

The true active principle of Parsley, differing from the so-called Apiol.

Dispensed in spherical capsules of 20 centigrammes.

Original bottles contain 24 capsules.

In Dysmenorrhæa, (conges-

tive and spasmodic) amenable to internal remedies, the suppressed, irregular or painful menstruation is promptly relieved.

#### Wolfe's Schiedam Atomatic

## - Schnapps -

IS THE BEST STIMULANT, IN THE PREPARATION OF BEVERAGE AND BY ITSELF.

As a general beverage and necessary corrective of water rendered impure by vegetable decomposition, or other causes, as limestone, sulphate of copper, etc., the Aromatic Schnapps is superior to every other alcoholic preparation. A public trial of over thirty years duration, in every section of our country, of Udolpho Wolfe's Schnapps, its unsolicited endorsement by the medical faculty, and a sale unequalled by any other alcoholic distillation, have insured for it the reputation for salubrity claimed.

For sale by all Drugglsts and Grocers.

\$9,00 per case; 5 cases at \$8.50

LYMAN, SONS & CO., Sole Agents for the Dominion of Canada.

# In 1 to 5 Days. GUARANTEED Not to cauzo strictum. Uso two or three times a day with a 2-4 oz. cone point Syringe. Inject slowly and as far into the urethra as it will go.

#### ANATOMY OF THE

## CENTURY · AOTMIZER

No. 15.

For Spraying either Oil or Water.

ALDELIS.9.

For in, T pered Throst Tube, serews on bottle G at C.
B—Tongue Depressor, slips on tube at H. F.
I—Slip Nasal Cone, fits on tube at H. F.
D Improved Valve Chamber, cont ining Aluminum Valves,
L—Washer, fits on bottle at M.
K—Sift Rubber Feed Tube,
H Tip for Spraying Oils.

Aluminum Valves. All Hard Rubber and Glass. Sprays either Oil or Water. 5-inch Curved Throat Tube. Screwe Firmly on Bottle.

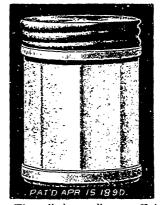

For Sale by

LYMAN, SONS & CO.

LYMAN, KNOX & CO.

KERRY, WATSON & CO.

For Ointments, Pomades, Glycerine Jelly, Etc.

#### 525252525252 Per Gros ¼ ounce . \$5 ∞ 1/2 6 00 7 50 9 50 3 11 00 . 13 00 5252525252

OPAL GLASS

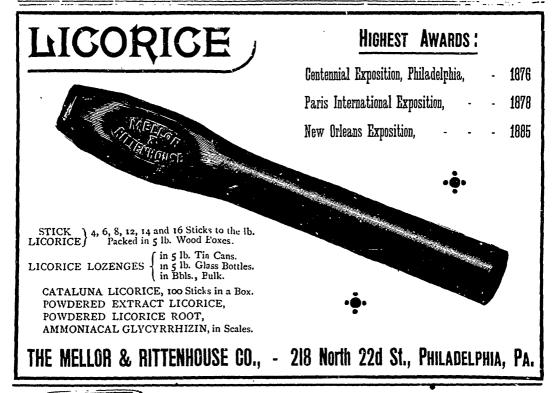

SCREW CAP.

The tall shape allows sufficient room for a label on the side of the Jar, which is of special importance.

Include a dozen of each with your next order.

The Handsomest and most Practical Jar in the Market.

Meinecke & Co. NEW YORK.

# Prescription Ware -

THE SALTSBURG BOTTLE WARE CO., Limited, offer to the trade their <u>NEW AND ELEGANT</u> designs in FLINT BOTTLES, Viz: EXCELSIOR OVAL, MONOGRAM SQUARE and SALTSBURG ROUND. ## ANTI-DANDRUFF.

The object in view when Anti-Dandruff was first produced was to offer the public a preparation for the hair that would in the first place remove Dandruff effectually and also act as a perfect hair-dressing without containing any ingredient injurious to hair, head or scalp. Anti-Dandruff has in a short time proved itself a perfect specific for the hair, and now stands in the estimation of its patrons as being head and shoulders above any similar preparation.

Why? It removes Dandruff with 3 applications.

"It makes the hair soft and pliable.

"It is not of a greasy or oily nature.

- " It stops falling of the hair—Is not a dye.

  It is of a nature peculiar to itself.
- " It is pleasant to use—Clear as crystal.
  - It possesses a most agreeable and delicate odor.
    - Men, women and children endorse it.

Price for Anti-Dandruff, 750 per bottle. \$6 per doz. We trust there will be no cutting.

{ CRYSTAL PEPSIN, Scales or Powder, - CRYSTAL PEPSIN TABLETS, 50 cent. size, - - - - per oz. Bottle, \$ 1.25 PRICE LIST: - - - per gross, 45.00

Jensen's Pepsin (both Crystal and Tablet form) is widely known, largely advertised and ready selling. It has leng been the standard, because giving the best practical satisfaction, owing to intrinsic value and uniform quality. So far as the digestive power of Jensen's Pepsin is concerned, the many tests of it made by the highest authorities, and published extensively, prove its high power.

The ready solubility of Jensen's Crystal Pepsin perfectly adapts it for all liquid forms.

To each druggist carrying Jensen's Tablets in stock, we will mail, postpaid, upon request, one of our elegant advertising banners, representing a Swedish peasant girl.

#### DR. S. A. RICHMOND'S TRADE-MARKS.

Are numbered 1, 2, 3, 4, 5 and 6, (including number 7 which is a part of number 2) represents my trade marks, which are printed on the Caddy or Cartoon that surrounds every bottle of Samaritan NERVINE manufactured by me. No. 1 represents my picture printed on the front side of the cartoon. No. 2 represents and contains my picture surrounded by four globes printed on the back side of the cartoon. Nos. 3 and 4 represent the sides of the cartoon, and contain the pictures of two men devoid of skin, showing the nervous system and blood vessels. No. 5 is printed on the top of the cartoon, and represents a man falling in a fit. No. 6 is printed on the bottom of the cartoon, and represents a temperance fountain. No. 7 is a part of No. 2 and represents a pictorial illustration of the Good Samaritan of bible history, and is printed below my picture which is surrounded by four globes owner and proprietor of said trademarks and any one who attempts to use the same, other than myself are imitators and frauds. The penalty for counterfeiting or imitating or offering for sale is a penitentiary offense or a fine of \$1,000.00 or imprisonment. The law does not screen the druggist who offers to sell goods of a fradulent character, but binds him equally with the manufacturer of said bogus goods. I warn the trade and the public in general, that they are forbidden the use of any said trade-marks.

#### DR. S. A. RICHMOND,

The People's Medical Servant,

Formerly located at St. Joseph, Mo.

TUSCOLA, ILLINOIS.

#### HOUSEHOLD STANDARD REMEDIES.

#### DR. S. A. RICHMOND'S Family Medicines

Are prepared with great care expressly for family use, under the immediate supervision of Dr. S. A. Richmond himself, who is thoroughly acquainted with each drug and its effects upon the human system.

#### Richmond's Samaritan Nervine

Is the only known infallible specific remedy for epileptic fits, spasms, convulsions, St. Vitus dance, alcoholism, opium eating and all nervous diseases. Price, \$1.50

#### Richmond's Rheumatic Lightning,

A balm for every ill that effects man or beast, requiring an external application. There is no pain it will not relieve; no wreline it will not subdue, and no lamoness which it will not curve. Forey application contains relief, and every bottle a curve. Rhemmatics throw away your crutches and rejoloc. Price, 50 contend \$1.00. cents and \$1.0).

Richmond's Radical Regenerator,
For spormatorrhox, seminal weakness, impotency, sexual debility and barronness in both soxes. Price, \$1 50.

#### Richmond's Sexual Pills

For lost manhood, womanhood, sexual decline, and weakness in both sexes. As a sexual tonic there is no known remedy in the whole history of the pharmacopia that will compare with them. They are an absolute specific Price \$1.50.

Cologne o/Rhine

Patented Purveyer to H. R. H. the Prince of Wales, and to several other Imperial and Royal Courts.

This EAU DE COLOGNE was distinguished with prize-medals and diplomas at the Exhibitions of all nations in London 1851, New York 1853, London 1862, Oporto 1865, Cordova 1871, Vienna 1873, Santiago (Chili) 1875, Philadelphia 1876, Cape Town 1877, Sydney 1879, Melbourne 1880, Boston 1883, Calcutta 1884, Adelaide 1887, Melbourne 1888 - \$9, and at Kingeton (Jamaica) 1891.

I beg all consumers wishing to obtain the *genuine* Eau de Cologne, distilled strictly according to the original recipe of the inventor, my ancestor, to pay special attention to my firm:

# RED MESSINA ORANGE, CHERRY RIPE, AND KASHU, SODA-WATER FLAVORS FOR 1893.

Orange. We are responsible for it. Better have the genuine.

CHERRY RIPE is a modified cherry, of course. We expect a run on it, New. KASHU is new. It has a peculiar spicy richness, heavy, full and strong.

KASHU is new. It has a peculiar spicy richness, heavy, full and strong. CHOCOLATE—new to nine-tenths of the fountains but not to those that serve the finest chocolate.

These four flavors will lead the trade this year unless we mistake the signs. We are going to advertise them. Better be ready.

There are a great many ways to get people into a drugstore; there are ways to keep 'em out, too. And people go in or keep out according to how the stores are managed. Don't be surprised if a book of less than a hundred pages don't tell all the ways to get people in and to keep 'em out. We don't know everything too; do you? We are sure of what we put into that book though.

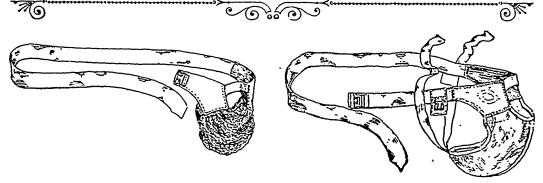

Order fruit juices, direct or through your jobber; let's be acquainted.

WRITE FOR PRICE LIST.

Our Goods are carried in stock by LYMAN, SONS & Co.

Prescribed by more than 25,000 physicians during the present year.

It will sustain and nourish babies, children, invalids and aged people when all else fails.

creates new and vitalized blood faster than any other food preparation in the world. For overworked and insufficiently nourished people; over-taxed professional and

Builds up the system after severe illness when recovery is slow and the appetite poor. Nursing mothers, teething infants and puny children thrive surprisingly by its

use, a change for the better being perceptible often within 24 hours.

It is the only thing that will permanently cure nervous prostration, dyspepsia, cholera infantum and excessive irritability of the stomach from any cause.

Read the remarkable testimonial from Col. Fred. Grant, regarding the prolongation of his father's life by the use of Bovinine:

"During the last four months of his sickness, the principal food of my father, Gen. Grant, was Bovinine and milk it was the use of this incomparable food alone that enabled him to finish the second volume of his personal memoirs. October 1st, 1885. FRED. D. GRANT.'

Send for pamphlet containing testimonials from a large number of the leading physicians of the country. Put up in 6 and 12 oz. size, at 60 cts. and \$1.00 per bottle. 12 ozs. contains the strength of 10 pounds of beel.

The Bovinine ( CHICAGO.

SONS & CO., Sole Agents for Canada, MONTREA

BOSTON.

HOUSANDS of Druggists in the United States have found that it is the quickest seller of its kind ever introduced because it is the best CORN Salve in the market.

EVERY dozen is mounted upon our handsomely Lithographed Counter Stand which attracts immediate attention and thus helps to advertise the goods.

We are advertising in a number of Canada papers, and in response to our offer are sending out many trial size boxes to individuals. This method will at once create a demand for the "A-CORN" in Canada. To meet this first demand you should have the goods in stock. Send to your jobber for a single dozen. We know you will soon order in gross lots.

We give a few extracts from letters we have already received from Canada from those who have sold it, and from some who have used it :

GIANT CHEMICAL CO., Phila., Pa.

Gentlemen:—I can recommend A-Corn Salve ahead of all other corn cures. I cannot sell any other corn medi-

cine since I introduced A-Corn Salve, and once used by anyone suffering they send others far and near to buy it, and in no us it failed to cure. Yours, &c.,
"I find it a ready seller and a good article."—R. GORHAM, Hamilton, Bermuda. case has it failed to cure. (Signed),

"The A-CORN beats all other kinds of Corn Salves. It has taken out two large corns for mother."
—WM. McGirr, Medina, Ont. "It is an excellent remedy."—A. ATKINSON, Cascades, Quebec.

EMEMBER this is not a new article you are asked to buy as an experiment which may possibly prove worthless, but a well tried remedy in the United States and an established success, and we desire to make it the same thing in Canada.

A trial order for I dox, from your Jobber will verify all we have said.

Price in Canada \$1.00 per doz.

Sold by LYMAN, SONS & CO., Montreal, Canada.
