## 2lorthly Reviem.

During the month of August dulness is usually expected in the real estate market, and these expectations have been realized, but there is a better tone to the market this year, and this is due to the general feeling that better times are surely coming, that business conditions of every kiud are inproving, and that renewed prosperity in business necessarily means more active dealing in real estate. An encouraging feature of the situation is seen in the small lot sales in the newer wards, and in the suburbs of the city. St. Denis Ward can take credit to itself this month of having the largest number, and the smallest amount of recorded trausfers.
There has been a fair demand for houses to rent-hoth furnished and unfurnished-since the middle of August, and as owners are dispose 1 to make concessions to meet the inws ui good retanus, nouses are being taken pretty freely, although in some cases at low rents for the winter only. What every body would like to see now is a better demand for store and business property, which is still moving very slowly.
There has been no change in the mortgage loan market. Money is still plentiful at low rates of interest, and as stocks are high, the holder of idle money will be very apt to turn his attention to real estate investment at the present prices as being the safest course in sight.
The city assessment roll is ready for inspection up to 16th September, and this practically means that property owners have just about time enough to find out what ther own properties are valued at for

taxation purposes. But the most important thing for the tax payer to know is, if the civic burden is eveuly distributed - whether properties are assessed high or assessed low, would make little or no difference if all were treated alike. The cheapest and quickest way to equalize assessments is to have the roll published, so that every tax payer interested can study it up quietly at home, with the view of finding out if he is paying a portion of some other tax payer's assessments. 'These valuation rolls are published in other cities, and there is no good reason why they should not be issued in book form here. A printed copy of the city of Ottawa assessment roll for 1898 can be seen at this office.
The sales recorded in August in Maisonneuve, deLorimier, Mile End, Montreal Annex, Outremont, Cote des Neiges, Notre Dame de Grace, St. Henry, St. Cunegonde and Montreal West, (Junction), amount to about $\$ 124,000$-of which St . Henry contributed about $\$ 50,000$, Mile End about $\$ 25,000$, and Montteal Annex $\$ 17,500$.
There were 107 real estate transfers in the City wards and Town of Westmount recorded at the registry offices during the month of August, the particulars of which are given in other columns, amounting to $\$ 501$ 886.31 .

## 2 Zotes.

The sale of the brick block on St. Catherine street, near Stanley street, announced in a recent issue, does not appear to have culminated for reasons best known to the culminators. We werefinformed positively by one of the principals best qualified to make the annourcement, which we considered a good basis for a "note." Perhaps it partook of the character of the big deals announced on Great St. James street not long ago, which also did not rulminate.

We understand that an effort on foot to push the widening of St. St. Lawrence street, above Sherbrooke street, Surely we have had enough of this at present. Give the poor city a rest and time to get its

VICTOIKLA STLKEENS - Stone front house, in good order and well built; will be sold at a low figure to close an estate.-(195-B.)

health again after the carnival of extravagance we have indulged in, and paid so dearly for. 'The men who are most anxious for this new work are men with hatchets to griud at the public grindstone; and they are not men who cannot tell a lie. Professing the good of the city, they know where they come in, und so unfortunately does the city. Let us give the city a chance now to grow in the good old fashioned way without the hotbeds and forcing houses of the expropropriation process.

The new St. Stephen's Church, of Westmount, has broken ground at the corner of Dorchester street and Atwater avenue. We understand they do not intend to complete the permanent building at present, but like all sound institutions, let it grow a natural life, open to expansion and improvement in the future. It is always wise to leave something for posterity to do.

Westmount is making a good move in encouraging the opening of a first-class bowling green. Such institutions become the pride and glory of a municipality. It will make a good mate for the fine tennis grounds of Kensington avenue.

Tucker's new school on Guy street above St. Catherine street is being pushed rapidly to completion. Everybody seems to want to get West as fast and as far as possible. This ought to be a good centre for such an enterprise, although we have no doubt the old building will not seek long for a new tenant.

The Stanley apartments are taking on a finished look. To many the building appears to be turned inside out, showing the seamy side to the public, and keeping the smooth buff-coss brick work ${ }^{\text {s }}$ the private view of the tenants, There

DORCHESTER STRELTT- A Llcck of modern stone front cottages on the upper part of the street, all well rented, would be sold separately or en bloc. Owners anxious to sell on account of ili health. (243-A)
DRUMMOND STREET -A good brick terrace house, near Osbo ne street, in good order, c entrally situated. Price ouly $\$ \mathbf{\$ 7}, 760$. ( 155 B .)

DUFFFRIN STREET-Three neat brick-encased cottages, within flity yards of Logan's Park, six rooms, bath and w. c., collar, etc. Price only $\$ 4,500$ for the three, or would be sold separately on easy terms. (128-B).

M.AYOR \& BERTHELET STREET.A fine block of property situated in this most central position consisting of two handsome stone houses on Berthelet streei, and some smaller buildings on Mayor street. The whole be gold on bloc to close an estate. Price and tarms easy. ( $845 \cdot 8$ )

MCGILL COLIEGE AVENDE-A substantially built house, 28 ft . Wide, in first-class order, heated hy steam, on the hest part of the street. Price only $\$ 7000$. (373-a).

McGILL COLLEGE AVE.-A stone Iront terrace house, in good order, very roomy, close to St. Catherine treet. Price only $\$ 7000$. ( $138-\mathrm{B}$ )
is much to he said for this system too, if such is the intention. On the other hand we are told by indisputable authorities, that we must admire the outer brick work for its own particular beauty. This, we are told, is the brick work of the future. Those mottled vitrified bricks are the Wagners of the architectural world-in fact these are the very stones which He of Aron wrote of each coutaining a sermon to the unenlightened. And we must confess that while the full effulgence of the new light has not yet reached us, we are at last getting a glimpse of its intended effects and hope in time to bebome fully reconciled.

Why cannot Montreal inaugurate a childrens brigade of volunteer street cleaners and guardiaus such as exists in New York with such good and growing results. This would seem to be an opportune season for such a beginning when we are possibly threateued by small-pox, which is essentially "a dirt disease." Apart from the accual benefit to be derived by the city, it is fine training for the young generation and will bear its fruit in cleaner cities in the next century if not in this. Let some of the leading daily papers take it up and give honorable mention and prizes to the yourg scaven-gers-or volunteer surveyors let us call them-"and see what will come."

It is hoped and believed that the rebuilding of the lower part of the St. James street property of Mr. Carsley may lead to extensive improvements of the upper part of the front which is no longer an ornament to the leading street in the city.

The new Fairman stores on St. Catherine street, are rapidly approaching completion. The Alex. anders expect to get into their new restaurant and store about the mid-
cairl Colilege avender-A large and convenfent resldence 27 feetfront in the portion of this street llkely to become business property at a very carly date. In the meantime the bullding is in geod order as a residence. Anxious to sell. (1093).

## OOR WATER GATE.

For the advancement of civic pride and confidence in the future of Montreal, our citizens should be compelled periodically, to enter the city by the water gate of Lachine rapids. We do not know of any more inspiring sight for the purpose. Time and place seem to conspire to make the scene imposing. The tourist hour is the early evening when the sunset makes a glorious back-ground for the city and its approaches. Then, added to the grandeur of the rapids, as nature's setting of the gun, we have two magnificent bridges to pass under, botb perfect specimens of their kind and wonderful in their proportions. A new and imposing feature of the approach is the Lachine hydraulic works projecting its massive struc. ture out into the rushing water to capture a fraction of the power so lavishly going to waste.

When this is passed, the city proper looms into sight, with its countless chimnies and its metropolitan eloud of smoke, It conveys the

PEEL STREET ABOVE SHER BROOKE.-A modern stone front house only a few years built-specially constructed for owuers occupation. This nite is one of the best on the street, jverlooking handsome grounds. The house is 28 feet wide and has the extra advantage of side lights. Price $\$ 18000$ (821-8)

ST. ANTOINE STMEET-. 1 well built stone fromt tenment, in good oriler, and rented for ミitio jur annum. A sool investment. jrice sgi7.. 5.41-3),
impression very strongly of a well founded city, busy, prosperous, secure : undisputed in its supremacy and beautiful for situation. The inlond character of the river is lost as we enter the harbor, and see. chiefly the iron mousters of the open sea. No longer the dapper white lofty upper works of the inland vessel, but the sombre massive hulls and smoke stacks made to grapple with Atlantic storms. The "coup d'oeil" as the traveller passes up the harbor to the canal should be sufficient to impress upon the observer the importance and wealth of the city. Civic pride is no longer the local petty thing it once was, for in this case we feel that our city is the spokesman for our whole Dominion and we are proud to feel that it speaks in such grand tones.

## A VOUNG MAN'S CHANCES OF SUC. CESS.

Business is no plaything. Business is earnest. Business is real. Business is exacting. IIc who would win in it must fight ; and fight a good warfare, too.

Competition was never as keen in the world's history as it is to-day. Under competition, illegitimate as well as legitimate, merchants are being forced out of business and clerks out of employment. And we sometimes wonder when the end will come.

Naturally much wailing and gnashing of tecth are beard over this condition of affairs. In moments of weakness, men, Elijah like flee into caves of inaction, and declare, by implica. tion if not in words, that they would rather die than continue to perserve. And if they do not persevere they do die.
Inaction is sure to induce dry tol ; and dry rot is sure to induce dissolution in business life as well as in animal or plant life. Proof of this is in evidence every day.

Manufactirers as well as merchants, employcreas well as employecs, are failing in their respective avocations for no other reason than that they are unequal to the task, through inability or inaction. of surmounting difficulties which arise in their pathway. Some of these diticulties are citraordinary; frequently they are only ordinary.
livery business man, every clerk, every young man whatocver, will find lions of more or less aggressive natures in his pathway, and unless he conquess them they will conquer him.

Getting around them will not sultice. That is only arother way of giving them the vietory. They must be grappled with until they aie prepailed against. And with viciory comes addad

8T. ANTOINE ST.-A substantial solld built house, near Guy Street, in good order. Leated by Daisy farnace, 16 rooms, moderate price $\$ 8,750 .-184-\mathrm{B})$

strength as well as a lessening of the forces of opposition.

The honey of satisfaction is to be found in the catcass of every obstacle lion that every man subjugates.

There is no uead lion for the man who has not the courage to fight ; but there is the live lion and the vinegar of non-success.

The pivotal point of success in life is the ability to rise equal to emergencies is attained oniy by the ability to gather reserve force.

In spite of the competition whose keenness we hear so much of to day, there is room and to spare on top. And no intelligent young man whatsoever need despair of reaching it.

Iet him begin right, keep right, and there need not be much question as to the outcome

The keener competition that obtains to day only means that the meshes of the sieve of selection are smaller, thus preventing less dross than formerly getting through.

There is no crowding out of the best. It is only the survival of the fittest for business, for the professions, for the workshops, for the pulpits.
It is barder than ever for the man whom Nature designed to walk behind the plough to walk behlnd the counter, and rice versa.

But $t \mathrm{l}$ is not jarder for the man to be that in life which Nature designed he should be.

Ships that are built for river service it would be folly to place upon the Atlantic. Equally so is it folly for young men to connect themselves with avocations for which they are entirely unsuited.

Adaptability for 2 certain avocation does not necessarily mean gerfus. But after all, what is genius but the ability to do. to work, to attain?

En, ersen says: "To believe your own thought, to believe that what is true for you in your private heart is true for all men-that is genius."

To believe that such and such is, that so, and so can be, and to ecquire what you believethat is genius.

The men who have engraved their names on the rocks of Tim, the men who have set the world on fire, are men who have set a gaol for their attainment and who have had the energy through rain and sunsinine, through food aud drought, through ill and good report, io run with patience the race that was set before them-
The son of the mest obscure of men need no despair of success.

It is not what a young mati is that determines what he shall be. It is what he wills to be. in other wurds, every sane young man is the architect of his own destiny, "Work out your own salvation with fear and trembling," says the Good l3ook. And it applies with equal fores to the material as well as to the spinitual life.

Young men must be serious. Life is a struggle, or it is not anjthing. Living isdoing, net lulling. And doing means struggling.

To struggle well man must think rell : Think for what he is best fitted ; think how he can qualify himself for that which Nature appears to lave Jesigned him.

ST. LUKI: ST.-Two stonefront apartment houses close to Guy Sireet, costing over $\$ 12,000$ rented (at low rentals) for \$900; will be sold for the moriguge and charges amourting to $\$ 9.500$. An opportunity for a small capital - only $\$ 3,000$ cash required.

If men do not think, they cannot be serious. Seriousnoss comes of thinking. Seriousnets $s$ thinking.
Half the inen who are to day in positions for which they are not suited, are where they are because they did not think at the proper time. They havn drifted, not stecred, to where they are now anchored. And because they are not successful, they are splenetic. And the splenctic man is shorn of hall his ability to do. Those things he ought to do he does not, and those things he should not do he does. And there is no health in him.
The young man who is inattentive as to preparation for the struggle of living, cannot expeet to have much strength when the struggle begins in carnest. Chesterfield has said that "there is no higher mark of a mind of menger intellect in the world than inattention." No truer words were ever spoken. Man must be attentive to win, and unless he thinks he cannot be attentive.

The highest office of our public schools, of our universities, is to teach people to think.
Idleness of mind as well as of muscle will prevent the success of any young man, no matter how richly he may be endowed with baaias. He who lacks industry lacks the one thing necdful, "Idieness," we are told," is only the refuge of weak minds and the holiday of fools." This is strong language. But most certainly the young man whospends his days in idleness is a fool of fools no matter how much brains Nature may have packed into his cranium.
Many a man with large brains has, like small potatoes, gradually been worked to the great mass of humanity ; because he would not toil, neither would he spin.
Have a gan! in life. Train for it. Keep your eye upon it, evenif now and then olistacles may cause yeu to swerve temporarily to the right or to the ieft. Keep running.
"Doing of one thing," wrote Lord Chesterfield to his son, "and thinking at the same time of another, or altempting to do two things at once, are the never failing signs of a little, frivo lous mind "

Cuntinuity and deliniteness of purpose are stepping stones which will carry to success any and every young man who will use them. And these qualities, valuable as they are, are not like precious stones, attainable by the rich oaly. They are within the reach of all. And the price is the energy and carnestaess spent in their cultivation.-The Hard:are and Mctal Merchanf.

## TUE PRINCIPLES OF BUSINESS.

No calling requires a greater use of brain power than business, and few require . higher erder of general ability. The great secret of success inbusiness-the secret, in fact of success on a largescale-is to conceive of it as a matter of principle, not merely as a series of transactions. There are great nerchants as there are breat statesmen, and there are small inerehants as there are small politicians, and the difference between the great and the small men is very much the same in both. The small politiciar

works by the day, and sees only one opportunity before him ; the small merchant does the same thing-he is looking for the next dollar. The statesman on the other hand, it master of the situation, because he understands the general principles which control events ; this knox. ledge enables him to deal with large questions and to shape the future. The great merchant does the same thing. His business is not a mere money. etting affair, not a mere matter of harter, but a science and an ant; he studies the general lawi of trade, watches the general condition of the country investigates present neeis foresees future wants and adapts his busincss to the broad conditions of his time and place. He puts as much brains into his work as does the statesman, and he ends by being not a money. getter, but a large minded and capable man. An eminent successful man of the statesmanlike quality said the other day that the more he understood life the more clearly he saw that it was all done on business principles, by which he meant, not only that the universe is governed by unvarying laws, but that promptnesy, exactness, thoroughness, and honesty are wrought in every fiber. On these business principles all life is conducted-if not by men, ai least by that Power which is behind man. It ought to the the ambition of every young man to treat his business from the point of view of the statesman. and not from the politician. - Excriange.

## ARTISTIC ELECTRIC LIGIITING.

In an editorial on the numerious instances of inconguous and inartistic electric fittings in the Elctriat Engincer, Junc 18, it is suggested that when electric lights are to be introduced into previously designed apartments, the designer of the decoration of such rooms bhould ise consulted, or at least a person equally competent to design the electric-light fittings in accordance witn the general design of the room itself. The point is illustrated by a reference to two notable instanses, one of inartistic electric-lighting work and one of the opposite type, the effect in the latter being singularly pleasant. Pictorial reproductions are given which show that, with proper care and attention, a much more har. monious and satisfactory result can be obtained than is usual. The first instance cited,-namely , that of inartistic work, -in a room in the west end of London, "was one in which the artist and designer spent a great deal of time and trouble to produce a perfect specimen of an Empire drawing-room a year or so later the supply mains came along, with the certain result that the electric light had to be installed. The work was intrusted to a firm of electrical enginecrs of very high standing in the profe:sion, but who doub:less, were more use to the foundry and crectug-shop than to the artistic adornment of a drawingroom. As a consequence their client was allowed to select what took his fancy, and the result was the spoiling of the room, from an artistic point of view, by the supplying of fiuings of the 'Bensons' style,fittings which in a modern 'Liberty' style of rooin would have looked perfectiy in keeping,

GOY STREET-Three good building lots, above Dorchester streot, cach 26 feet 3 Inches front; very few vacant lote left in thle secion. (207-A).
LE ROYER STHEETM-A very denidable bulluling lot tor warehoure, etc... 34 feot by 60 feet. No waste ground. ( $78-13$ ).

but which under the circumstances, were most inartistic." A worse effect results in cases where the fittings has got into the hands of the manufacturers of gas futings. "Their idea of electric fittugs is simply to turn ${ }^{\text {th }}$ their old patteins up. side down, overlooking the fact that with gasfittings there is not much scope for artistic treatment, whereas with electric light its chief beauty is the etsy manner in which it can be treated artisticaliy." It is conceded, however, that the artistically designed and exeeuted litings are much mere freçuent now than they were a few years ago. The designing of such fittings is now something done by the designers of the decorations of the roum, in cases where elaborat-ely-decorated rooms, in accordance with some special idea or scheme, are constructed. This method of the only one by which to avoid incongrulties such as are above set forth.

## A GLOOMS OUTLOOK.

The remarks of the ptesident of the Board of Assessors, as to the great depreciation in rentals attributed in part to the disgraceful condition of many of our streets, is, in as far as that explanation is correct, a sad and pointed commentary upon the general inefficiency of our civic administration. Kents on Notre Dame. street west, the assessors point out, have cspecially sufiered on account of the almost impassable condition in which it has been kept for years past. Had the city been t 30 poor to have voted money to put this street in proper repair some excuse might have been made for the backwardness of the alderman in giving it their attention; but such was not the case. Over two years ago money was voted to pave it, but by a clever juggling of finances on the part of certainaldermen the money was diverted and squandered upon other projects. Rentals un St. Antoine strect-all know the disgraceful state of its paving-are also shown to have deprecinted unduly. It may be said that St. Amoine street has not yet undergone its 'permanent improvement so much having been invished eliewhere that the means were not forthcoming for its promised widecing, and that Notre Dame street west is in this respect also in the future tense. The worst of it is, however, that where the money has heen spent and where the 'permanent' improvements have been made these are in a sad state of decay, witness the billowy condition of the ask halt on upper St. Denis strect, owing evidently to the imperlect laying of the st ucture bencath it ; witness also the rugged surface of Crang street. The loan that was raised for these improvements was permanent, and Montreal people will have to pay interest on it forever, but, as the 'Witness' strongly prutested at the time, there was no element of permanency about the inprovements thus sccured, which in any honest system of book keeping should be paid for out of revenue and not out of capital. Montreal is now payirg interest to the extest of a million dollars a year, largely for ephemeral improve. ments which are long dead and grne. If any

RICHELDEU S'IRELS-Thirty good bullding lots ranging from 20 feet to at feet front. Price 50 cents per foot. (611-3).

MCIMOND STREET, Corner of Basin strect-A large property with two street frontages and lanes on the other two sides containing an area of 14,000 feet, Including $a$ corner building suitalie for oflice, dwellins or tenements. say that we have no resources to meet such needs as these of strect repairs cut of of annual revenue, and that to make such a limita ion would be simply to forbid any sort of pavement we reply by pointing to well governed towns such as Glasgow. which, though it is developing at least as fast in proportion as Montreal, is able to keep everything in apple pie order without taxing the citizens at all, while we who are paying extreme exactions have to see our property deteriorating owing to chatic zonditions caused by misgovernment.

- Daily Witmiss.

## THE NEWEST IN WALL PAPER.

The latest development in wall paper slowis neither flower, nor figure nor stripe, $n$ rear It is simpl; on all over water, or muire ground, like a piece of silk or satin moire, and is brought out in all satisfactery tints and shades Panels of this moire paper used perpendiculariy on 2 calcimined wall surface, the pancls defined with a narrow gilt moulding, afford an effective treatment for a dirawing-room. A sample lately seen was in leaf green moire paper, put on in up and down panels three quartis of a yard wide on a wall surface tinted in a paler shade of green. The gilt moldings that edged the panels were chased and ornamented, and not even a close observer would have discovered that the moire was paper and not silk Other new papers show the delicate exactness and linely wrought tigures and flowers of the Louis XVI buches and draperies, but most of the largely set up papers have large, bold patterns, either in scrolls or conventionalized designs. A new treatment for these large flowered paper is to have a very deep dado and freize of narrow stripped paper of the two main colutus of the pattern. A room decorated in lavender paper, in which tleur de lis of an ivory ground formed the main coloring, had a very deep dado of lavender and cream-stziped paper, marked by a white moulding and a frieze of the same stripped lavender and white paper above. By using dados of either striped or plain colored cartridge paper the boldest potters in flowered or figured wall paper may be employed successfully without detracting from the size of the room.-Jurrsal of Comentrce.

## LIME MORTAR IN FREEZING WEATIIER.

There is a popular fallacy to which a great many masons adhere most tenaciously, that the addition of lime to cement mortar is desirable if the work is to be carried out in treezing weather. Upon what reasoning such a solntion is based it is impossible to determine, though there scems to be a vague feeling that because that lime in slacking becomes very hot, it therefore must impart a ccrtain portion of its heat to the moitar, and so :etard any effect of freezing weather. This is not only illogical, but $i t$ is net warrented by facts. Lime is slacked in cold water, it is then mixed with cold

DOROHESTER STREET-A handsome corner stone front fiouse, in first-class order, all conveniences, hot water furnace, a comfortable family house, vacant lot adjolning would be sold if desired. (61-B).

Price $\$ 11,000-149$.
sand and cold cement, and is on ordinary building operations carried a long distance through the cold atmosphere, so that by the time it is actually laid up with the cold bricks in the cold wall all heat virtue has departed and the lime is absolutely inert in caloric. So much for theory. To determine the practical effect, tests were made last winter during the course of the construction of one of our largest buildings. Upon the coldest day of the winter, when the thermometer registered below zero, two eight-inch square brick piers were constructed under as near as possible the exact conditions which would obtain in a wall. The piers wcre a little over one foot high. One was laid up with mortar composed of one part lime and two parts cement, and four parts sand. The mortar of the other was composed of two parts cement and four parts sand. The piers, were allowed to stand under cover which would protect them from beating storms, but they were exposed to alternate freezing and thawing effects of the temperature during a period of about three months. At the end of that time it was found that the mortar containing lime was considerably disintegrated. so that it could be crumbled easily betweed the fingers, while the cement mortar though some what injured by frost, was still reasonably firm and hard. The first pier was dropped to the floor through a distance of four or five teet, and was entirely destroyed, no bricks adhering to each other. Dropping the cement mortar pier through the same distance it broke in two pieces, and not until it had been violently dashed against the floor six times was it entirely destroyed. Even then some of the bricks broke before the mortar became dislodged.
The reason for this action of the two mortars is very apparent. The addition of lime to cement mortar tends to retard the setting. Consequently there would be a considerabe period during which the cold weather could act disastrously upon the mortar. Furthermore, lime mortar sets by absorbing carbonic acid from the air, a process which takes a great deal of time. Cement mortar, on the contrary, sets by crystalization, and a few moments after it is in place in the wall the outer surface has taken a sufficient set to serve as at least a slight protection against the sold, while long before the lime mortar mixture would be hard, the cement mortar would be so completely crystallized that the cold would have comparitively little effect upon it. Consequently, the addition of lime to to cement mortar is a positive detriment in every sense.-The Brickbuilder.

## MAKING FLOORS WARM.

In sections of the country where a low degree of temperature is the rule rather than the e ception during the winter months, warm rooms are very essential, and while the heating apparatus may be the prime factor to this end, a due regard to the construction of floors and walls will materially assist in accomplishing the object sought, and at the same time effect a sav

ST. CATHERINE STREET-A good building lot, 80 feet front on ${ }^{\circ}$ st. Catherine street, with a frontage of 160 feet on Metcalfe Avenue, a mplendid location for shops or residence. (93-B).
ST. CATHERINE STRRE T-A comfortable, well-built atone front cottage, with extension kitchen, Daisy furnace, and all improvements; five rooms on ground floor. Would exchange for a smaller house. Price only $\$ 8,000$. ( 883 3 .)
ST. CATHERINE STREET-A lot of land just west of Metcalfe Avenue, with a frontage of 88 feet 10 . inches first-class locallty for building. Price only 75 cents per foot. ( 85 r B )

ST. CATHERINE STREET-Seven building lots each 27 feet by 100 feet, one of them forming the corner of Belmont Arenue. ( $62-\mathrm{B}$ ).
. 1
ST. CATHERINE STRI ST-Two building lots, near Metcalle Avence, about 44 feet 5 inches front by a depth of 170 feet to 174 feet' each. (382 \& 386-2).

ST. CATHERINE STREETI.-A rough stone front double cottage, 84 feet front, contains ten rooms and cement cellar basement, heated by hot water furnace; all modern improvements; situated near Greene Avenue.

TWO DETACHED HOUSES IN THE best residence section of Westmount, both built for owners occupation. Each lot has a frontage of nearly one hundred feet, one commands a view from elevated land the other is surrounded by magnificant trees. Particulars and permits at the offce. Also a particularly handsome house 28 feet wide, beautifully furnislied in oak on the main fioor and containing special features throughont. Will be sold at a reasonable price.
OPPER LANSDOWNE AVENGE-We call special attention to the fine blocks of lots laid out on the St. Germain property. They are laid out in frontages of 50 feet with, a depth of 110 to 115 feet. The situation is the most accessible of. all the hilliside property and commands a magnificent view. Price from $12 \not 1 / 2$ cents upwards. (289-A).

VICTORIA AVENCE-A good lot- on the best part of the avenue, just above Sherbrooke street, facing Chesterfield avenuc. Owner having left the city, would sell at a low Bgure. (43-B).

WESTERN AVENOE-About 60:yards west of Metcalle avenue, a. very desirable piece of land 48 feet pront by 100 feet deep, to a 20 -foot lane in rear. (132-B).

WESTMOUNT PARK. - A hinndeome solid brick house, 13 rooms and' re fine cellar, Daisy furnace. Sanitary:ariangements perfect. Electric Light and gas in house, gas grate in parlor. Coprer lot with 100 feet frontage on the beautifal new Park. Size of lot $50 \times 100$. Price, $\$ 10,000$.

WESTERN AVENUE--Two tine building lots, corner of Elm Avenue, 27 ft. Front $x$ about 93 ft. deep, good lane in rear. These lots are exceptionally well stuated, good view of the mountain, adjacent houses are all handsome, well buill and occupied by owners. ( $176 \cdot \mathrm{~B}$ ).

WESTMOUNT-A magniacent corner property on the uplands, w!th grounds containing over 100,000 leet, with a substantial three-story solld brick house, heated throughout by hot water furnace, and contains seven bed-rooms, besides other ample accommodations. This is a good opportunity to combine the purchase of a home with a speculation, as the price is about the value of the land. Would be sold in lots if required.

WOOD AVENDE-A handsome new stone front house, conveniently laid out, in perfect order. All up-to-date improvements. Particulars at office (110-B).

## Suburban Properties

for sale by

A few pretty cottages, substantially bullt with stone foundations and extengion kitchent with cellar, for \$2,500 , including 7500 seet of land on the principal avenue. Terms easy. (84-B).
ing in the amount of the fuel bills, says the Industrial Wirld. One of the reasons why the Aloors of a frame dwelling are so trequently cold is due to the way in which the thoors are built. In some cases when the joists are placed in position the spaces between them at the walls are left in such a way that the cold from the outer skin of the wall can readily enter between the ceiling and the floors. How to remedy this is described by a writer in one of our exchange; who suggests that in all cases the spaces between the joists at the walls be lathed, and a strong coat of well-haired mortar applied before the ceilings are lathed. This precaution would make a house fifteen or twenty per cent. warmer than where it is neglected. In lower tioors this method of dealing with the spaces, or some similar one, should never be overlooked or cold feet will be the rule with those who are obliged to remain over them for any length of time in the winter. A good way to avoid cold in the lower floor if the joists rest on a stone foundation, is to "brick fill" between the joists and made level with the floors, makingthe brick "filling" not less than four inches thick. The bricks should be laid in good mortar, well "flushed" up to the joists and made level with the top of the timbers. In stone or brick buildings "b ick filling" is generally done on the lower floor, but often in the upper stories where the walls are left thinner hy the set backs the joists rest on the steps formed by the set hack in many cases nothing being done to the wall between the joists, while the celling and floors are finished with nothing to prevent the cold penetrating through the thin walls to the spaces between the lath and the floor. Sometimes a careful workman will see that the brick walls between the joists are recdered with a heavy coat of mortar, which is very good in its way, and would be better if the furring ran down to the edge er step and the space lathed and plastered; but this is perhaps objectionable beczuse of its forming places where mee or other vermin world find resting places. The better way is to brick fill, leaving a hollow space between the wall and the filling on the room side. If the projection of brick work receiving the joists is not more than four inches, the brick filling may overhang the walls and inch or so on the inside, so as to give a one-inch hollow space between the wall and the filling. As this prejection would be between the joists it would be hidden from sight.

Scientific American.

## SUNDAY BICYCLING.

"We are asked," says the N. W. Chiristian Advocat, (Meth.) of Chicago, "if bisycling does not increase Sabbath-breaking, and if the wheel does not, thereforc, deserve discouragement. There is no room for doubt that the wheel en. courages Sabbath-breaking-upon the wheel. Good roads also increase Sabbath-breaking. Horses in their day led to Sabbath-breaking. Good fishing does so. Yachting does so. The chief trouble, however, is in the man or woman who misuses the horse, the wheel, the yacht, the fishhook, or gund roads. One may as well

GEORGEVILLE, $P$. Q.-One of the finest farms in the townships, containing 387 acres, with a frontage of $1, y$ milis on Lake Memphremagog, and only a shont distance from the Owl's Head Hotel. First-class House and suutable out buildings. A charming situation for summer residenees. (206.C.)

LOWER LACHINE ROAD-A choice plece of suburban property adjoining that of the late Mr. Slppell; one of the most desirable frontages on the river. Fery easy terms. (110-2)

MONTREAL JUNCTION-18 cholie lots situated near the station, would be sold en bloc or separately. (183-8).

NORWOOD-A charming irame cottage, situated in one of the most commanding sites on the bank of the Beck River, convenient to both C.P.R. Station and clectric road. Cottage contains nine rooms and summer kitchen, good stable and coach house. Area of grounds about 60,000 feet. Photo and particulars at offlee. (428-a).

NOTRE DAME UE GRACE-A beautifully situated lot of land on Cote St. Antoine Road, 46 feet by 178 feet, running back to an avenue on which electric cars are now running. Commands a magnificent view.

OLD ORCHARD, ME. -1 charming seaside cottage, containing thirteen rooms, all well finished and nicely laid out, ample cupboards and closet accomodation. Piazza on three sides. Splendid view of beach and ocean. Photo and plans in office. Price only $\$ 5700$. ( $203 \cdot \mathrm{C}$ )

OTTERBURN FARM-Belonging to the Estate of the late Sir Joseph Hickson, contains about 2800 acres of which 225 acres are under cultivation. The property is situated on the river Madawaska about four miles south of lake Temiscouata, and is reached by the Temiscouata Railway which runs through the property at about half a mile from the house. The distance from Riviere du Loup on the St. Lawrence is 65 miles, and about 17 miles from Edmunston, St. Johns River, the junction of the Temiscouata and Canadian Pacific Railways. Cleared land produces large crops of hay, oats, peas, wheat and potatoes, well fenced, The uncleared land contains fine timber, principally cedar, pine, ash and tamarac which produces some revenue without depreciating the value of the property. Considerable stock has always been kept on the farm, and there are large barns, sheds and outhouses in first class condition. Good dwelling house and a farmers house, also boathouse, blacksmiths shop, carts and farm implements. There is good trout fishing throughout the whole of this district, the toulida being abundant in Lake Temiscouata. Partridge and bares are also plentiful. Other particulars at this office.
POINTE CLAIRE-A new frame house on avenue leading to lake on lot 100 \& eet by 165 feet. Price only $\$ 2500$. ( $97-\mathrm{B}$ ).
SHERBROOKE, P.Q.-Some choice factory sites with water power (about 600 horso power at present available) adjoining the Grand Trunk line. Call at omice for p'an and particulars. (288-A).

SAULT AU RECOLLET-BACK RIVER-A farm of about 150 arpents, with a fiontage of six arpents on the rivor, main road nlsu runs through farm; close to electric cars. Divided up into building lots. An opportunity to purchase a good lot at this charming suburb cheap. Good car service. Call at office to see plan and get particulars. (94-B)

STRATHMORE-Four handsome frame cottages at this popular summer resort, nicely laid out, large lot, and convenient to railway. Moderate price. (100-).

STE. ANNE DE BELLEVUE-A frame cot tage situate on Grand Trunk Ave., 8 rooms, lot 200 by t50. (174-B.)

ST. LAMBERT-A semi-detached brick encased cottage, extension summer kitchen, on stone foundation, containing elght rooms, water in house, three minutes' walk from station. (352-2.)

ST. LAMBERT,-A detached villa residence, built of brick and stuceo work, on stone foundation, 10 large rooms, bath room and closets, daisy furnace; large verandahs on ground flcor, balcony on first floor. Lot 90 ft . $\times 175 \mathrm{ft}$. lald out in lawn and planted with apple pear and plum trees, five minutes from station. (101-B)

ST. LAMBERT'g-A very haudsome brick and stucco detached house, on lot 50 feet by 200 feet, extension kitchen, heated by hot water furnace. Ground laid out with iruit trees, etc. (129-B).

ST. LAMBERT.-A very nice bric encased house on Victoria Ave., close to Station, heated by furnace, hot and cold water in house. Lot 90 by 174 feet. Moderate price. (157-B.)

3T. HILAIRE.-23 arpents of land, all in choice orchard and garden, with frame-house ; beautifully situated for summer residence. ( $159-\mathrm{B}$.)

St. JOHAS, QUE.-Three solid brick cottages with extensions, well situated on Cbamplain street, tacing Richelieu River ; nine rooms, bath and w. c. in each. Area of lot about 16700 feet. Price only $\$ 3000$. (205-C).

VAUDREUIL-Beautiful river point of Give arpents of level land, nicely wooded; deep water, convenient to both railways. Low price, (101-B). price, (154-9),
discourage a fist diet or the making of good country or city roads as to open a campaign against the special instruments that facilitate Sabbath-breaking. There is no more immoral steel or rubber about a bicycle in use on Sunday than on Monday. A war upon the wheel as a wheel is sure to expose the warrior to redicuie. Such a campaign is useless. The only route to reform is through the intelligence and conscience of riders. It is easy to see that some men on wheels on Sunday may be in a better state of mind or soul or morals than some others who go about on foot. The sole test is in the intent and spirit of the rider. Every person can judge for himself, but is not a final and authoritative tribunal for others Some people abstain from walking out on Sunday lest they should seem to identify themselves with others who 'do their own pleasure' on God's day. The Bible contains a prohibition for those who 'go with the multitude to do evil.' . If a Christian man has legitimate errand of mercy on Sunday he is as much entitled to ride on the wheel as he is to walk."

## SPECIAL.

Our bargain counter this month con tains two properties which call for special mention and should attract the attention of bargain hunters.

One is a stone front tenement property in the west end, only built a fow years and situated in good street, within a block of the cars, this property is forced to sale for benefit of the mortgagees will be sold $\$ 3000$ under cost. Terms easy.
The otber is a large and well built stone front house in the neighborhood of Dominion Square, with extra deep extention suitable for business or professional purposes or as a first class residence. We are prepared to convince the most skeptical that this a bargain.

## LAKE ST. LOUIS.

 . . Farm for Sale.With good lake frontage, situaled between Dobrial and Pointe Claire. Would sel a part of the river frent, which is one of the best point between Dorval and Zointe Claire. (32-B)

## IMPURE ICE.

Althongh unquestionably a step in the right direction, sanitarists were sceptical as to the adequacy of the bill presented last winter to the New York Legislature concerning the cutting of ice. The bill offered was to restrict such cutting within 1,000 feet of a sewer outlet, or within the limits of any city or town having more than 50,000 inhabitants. Scientists and experts unite in declaring that bacteria are not killed by freezing. The typhoid germ is particularly stubborn in this respect. It has been known to travel several miles underground along spring courses as well as overground without losing any of its power for evil. Such being the case, the distance prescribed by the bill, $\mathrm{r}, 000$ feet, seems too small a limit. It is almost absolutely certain, says a sanitary authority, that rivers, brooks, or small streams lying within a fairly thickly populated district are not fit either to cut ice from or to use for drinking purposes. Nothing short of boiling will secure immunity, if disease germs are present. With, however, this menacing state. ment comes an encouraging secondary one. Experiments, long continued and elaborate in Europe, and more recent and restricted in cur own country, bave demonstrated beyond a doubt that it is possible to pu:ify and keep pure any stream. Hamburg is the most often quoted illustration of this fact. Polluted water caused the frightful cholera visitation therea few years ago, and the same water purified stopped the epidemic, and it has continued to prevent its return and to raise very perceptibly the city's rank in the world's health-list. Only the lethargy of city fathers, says the authority above quoted, and indifference of the public at large are to blame for the constant defilement of beautiful streams and the shameful epidemics of typhoid and diphtheria which constantly play havoc in numberless families everywhere in the land.

## A SCHOOL OF CHARACTER.

" It is necessary, unless the public school is to fai desperately in its good purpose, that it should be a school of character," says the N.Y. Churchman (P.E.). "To a certain extent, it is that easily and inevitably. It teaches promptness and punctuality and neatness; it brings children under a wholesome and salutary discipline. But it must do more, if it is to fulfil the purpose for which the community sustains it. It must not only compel them to do rigat, leaving the policeman to continue the compulsion, but it must so train them that they will desire to do right. And by what means? There has been a long debate in this country concerning the reading of the Bible in the schools. There is at present arising a debate in England as to the compulsory recitation of the Apostics' Crecd in the schools. Neither will avail of itself. Character is formed neither by reading nor by recitation. Words will not make it. Character depends on character. It is com-
municated from one personality to another. It is formed in cbildren by the good examples of their elders and associates. The Bible and the creed, to be brought effectively into the school, must come breathing and alive in the person of the teacher. Thus, the achool waits upon the teacher. Anp the teaciner, the trainer of the new and better citizenship, who sholl shape the schoc: to the accomplishment of iis high purpose, waits upon the gracious personal influences of the Christian religion."

## ENDURANCE OF MODERN BUILDING

Sume architests are still afraid ol the Chicago method, as the steel cage construction is called, and lean heavily when they car: on their masonry, but for the losy towor on a small base the steel cage is inevitable. Mo one can tell how long it will stand the test of timo. There are 1,950 tons of steel in a building 370 leet high, which weighs in all 15,006 tons, and the metal will surely corode; but how long before its sustaining strength will be viliated to the danger point is a question that no one can answer empirically, and the present generation of builders is not likely to know how well or how badly it has builded.-J. Eincoln Steffens, in the July Seribner's.
