The Flight Of Emperor

Prince Su Tells of the Journey of the Court from Pekin.

Soldiers, Who Were Beyond Control, Pillaged and Murdered Along the Route.

(Associated Press.) London, Oct. 30.-The correspondent of the Daily Express says the Chinese plenipotentiaries have opened negotiations by proposing that China should pay an indemnity of £40,000,000 sterling der foreign control until the obligation should be discharged. They also agree foreign trade. China undertakes to abstain from purchasing war material she proposes to double the import duties. Lord George Hamilton, secretary of state for India, has received the following dispatch, dated October 22nd, Pao

Ting, from Alfred Gaselee: "I have appointed an international commission to inquire into the murder of the missionaries and railway officials, with a view of fixing the responsibility." In a dispatch dated Pao Ting Fu, October 22nd, Gen. Gaselee says that in pursuance of instructions from Field Marshal Count von Waldersee, the British troops will return to Pekin and Tien Tsin, reaching their destination about

Persons Were Killed and Injured. Caraccas, Venezuela, Oct. 31.-Further details received regarding the earthquake of Monday show that San Casimiro, Cua and Charallano were entirely destroyed. An islet situated at the mouth of the Nemeri river has disappeared. At Tacarigua, Brochico and Curiene, the damage done was considerable. There are many dead and injured.

SKELETON IN A CELLAR.

(Associated Press.) New York, Nov. 1.-While workmen were clearing up a cellar formerly occupied by the late Dr. Thomas S. Holmes, who had a drug store in Brooklyn, they groups. came across a box secretly fastened, which was found to contain the petrified head and trunk of a girl about 12 years old. The police made an investigation and became satisfied that the skeleton was the property of Dr. Holmes who, it is said, experimented with an embalming process which he had used during the civil war, and the secret of which he died without revealing. It was Dr. Holmes's boast that he had discovered a process of embalming that would ossify bodies. He was at work on it when he died.

It is Expected That Mr. Robinson's Opponent in Northumberland Will Retire.

Bright Prospects of the Government Being Sustained by Increased Majority.

(Special to the Times.)

Ottawa, Nov. 1.-Looking over the result of the nominations yesterday the utlook for the Government being sus tained by a large majority is exceedingly bright.

The Conservatives have one election by acclamation, Mr. Seagram, the distiller, of Waterloo, This was done in return for allowing the local member of the same constituency being elected to the Toronto house, and had nothing to do with the Dominion contest.

On the other hand Sir Wilfrid Laurier gets two supporters by acclamation. L. Lavergne, of Athabaska, and John Costigan. It is also expected that the opponent to James Robinson, Northumberland, N. B., a strong supporter of Mr. Blair, has retired, which would give Sir Wilfrid three to one.

There are a large number of men put p by Conservatives for mere factious opposition. In some cases they will ose their deposits, and in others will be in a hopeless minority.

Dominion, and Sir Charles Tupper and his followers will be routed.

Mr. Costigan Returned. Ottawa, Nov. 1 .- A private dispatch received here to-day says that John Costigan has been elected by acclamation for Victoria, N. B. Mr. Costigan was endorsed by the Liberals.

New Directions for Sailing Among South Sea Islands to Be Issued.

(Associated Press.) San Francisco, Nov. 1.-Discoveries of great value are reported by the United States fish commissioner ship Albatross, which has returned from a fourteen

months' cruise in the South Seas and in Japanese and Alaskan waters. The officers of the vessel state that nearly all of the South Sea Islands are mischarted anywhere from two to a dozen miles, making steering by chart extremely dangerous. The exceptions are the Fiji spector Graham, of the building departgroup, owned by Great Britain, and the

curate sailing directions for use among the islands have been prepared. A world's record for deep sea net dragging was made about 50 miles east of the Tonga group of Islands, in lat. 20 deg. South. Specimens of marine life were brought up from a depth of 4,200 fathoms, or nearly five miles.

Motherhood ought always to bring happiness. But it is often the beginning of life-long unhappiness. As a preparation for motherhood, and as a preventive of the ills so often following maternity Dr. Pierce's Favorite Pre scription has been hailed as a "God-send to women." It heals diseases peculiar to women, tones up the system, makes motherhood practically painless, and establishes the sound health which insures healthy children.

Ladies From States Sell Tickets for Concert.

City Merchants Decide They Have Been Victimized and Threaten Proceedings.

During the past few days the circumspect observer on the street corner may have noticed a quartette of stylishly dressed strange young ladies travelling to and fro in the business portion of the Mr. McInnes created a sensation by decity, with that expeditious style of locomotion that has become the undisputed possession of the ubiquitous book agent. If any curiosity was aroused, it might be gratified by the knowledge that the energetic fair strangers were not book agents but ticket sellers, and irresistible ones at

Although wholly unknown to merchants here, they succeeded in collecting a substantial amount, alleged to be in aid of the Protestant Orphanage, from the various merchants to whom they incidentally sold tickets for a concert, announced by them to be given for this meritorious object, in the A. O. U. W. hall on Saturday evening next. No one has presumed to say that this concert will not be given, but it might be pointed out that the management of the Orphan's Home have auth- or not, I do not know, but, sir, one thing orized no one to collect subscriptions, and is certain, that this government is comthey were somewhat surprised to learn posed of the ablest and purest and most that this has been done.

It is, perhaps, not too much to say that nothing did more than the British preference to waken all over the British Kingdoms that Imperial sentiment which sent the troops of the colonies to the aid of the empire in South Africa. But the British policy of the Laurier government has not only a sentimental value. It has an enormous value in dollars and cents. Aside from the great increase of trade with the Old Country since the Liberal government came into office, the waroffice authorities are showing a preference for Canada which means a very great deal to the producers and manufacturers of this country. TUPPER'S TEXT.

When Sir Charles Tupper told the people of Quebec that Laurier was too British for him he gave the Conservatives of that province the keynote for their campaign. They did not lose any time in taking advantage of the hint. The French edition of the Montreal Star has revived the school question and is striving to prove the British proclivities of the Premier by the effect of the settlement of that dangerous misunderstanding. It was not intended that pamphlet No. 6 should be seen outside of the Eastern province, but it found its way to all parts of the Dominion and per opened the eyes of the electors as to the tations. WILL SWEEP THE COUNTRY.

Dominion Presbyterian: "Sir Wilfrid Laurier enjoys a unique popularity not only in Canada, but in the Motherland. It looks as if the Liberals, under his leadership, will again sweep the country; and, indeed, to the non-partisan onlooker there seems to be no good reason for a change. The country is prosperous, the manufacturing interests were never more so; and it is not claimed that a change of government just now would result in a better or more economical administration of public affairs."

The Colonist has unearthed two men who are opposed to the preferential tariff. Mr. Pendray is reported to have misgivings as to the effect on his business of the policy of the Liberal party. He should not forget that he still has a very reasonable measure of protection against the competition of British chean labor. The duty on ordinary laundry soap is one cent a pound; under the preference extended to Great Britain the honor and all sense of self-interest as duty will be two-thirds of a cent a pound. Other varieties of soap are taxed 35 per cent., and under the Liberal scheme 11 2-3 cents would have to be deducted from that. Add the cost of carriage and you have a very fair amount of protection. The government is bound to look at this matter from the point of view of the consumer as well as from the standpoint of the manufacturer. Sir Charles Tupper says he will get a preference for Canadian goods in the British market. ed to nothing. The chairman scored the Conservatives for their attempt to monopolize the flag by imputing disloyalty to the Liberals. Yet these very men if they were returned to power would strike the Mother Country in the short ribs by robbing her of a tariff preference. He warmly repudiated the suggestion that Liberals were not as loyal as their op

ponents. In introducing Mr. Drury, the chairman said he was a gentleman who had worked most zealously for the Liberal cause ever since he came to the city, and when it was not so popular to be a Liberal as it was to-day.

In his opening remarks the candidate aid he had endeavored to the best of his ability to prove that the consumer was being benefited by the preferential tariff. He was indebted, however, to the Colonist for a proof of his contention, editorial reference having been made to the hardship being worked on local manufacturers who were brought into competition with cheap British manufactures. If this were true of the soap and pickle factories, what must be said of hose lines which were not manufactured here at all. He ridiculed the speech f Colonel Prior, who claimed that the Liberals had adopted the Conservative policy of protection, although the Colonist had editorally said that the adoption of the preferential tariff was the

The speaker then alluded to the reciprocal benefits which had been received by Canada as a return from giving that preference as exemplified in the denunciation of the German and Belgian treaties, in the large war orders of the Imperial government here, in the better financial standing of Canada and in the concession made in agreeing to the establishment of a branch of the Royal Mint in Canada.

In regard to the mint, the course pursued by the ministry was the only feasible one, as owing to the limited currency circulation in Canada, a strictly Canadian mint could not be operated excepting at a loss.

Mr. Price had made a most inconsistent statement regarding the tariff. Af- advanced by Colonel Prior in the last ter stating that he had been shipping to session. Even the Colonist, rfter lamenting the injury done the manufacturers, had given the statement that the Conservatives, if returned to power, would repeal it, a distinct denial.

Turning to the matter of railways, he warmly commended Mr. Blair's policy in regard to the Intercolonial railway. He quoted the statement of a local Conservative who had formerly lived in Nova Scotia, who said Mr. Blair was the only railway minister who ever had the courage to make the Intercolonial railway anything but a subsidiary line to the C. P. R. The only chance Mr. Foster had to win in St. John against Mr. Blair was because the latter gentle man had stated that he would not knuckle to the C. P. R., and, of course, St. John was being threatened with the

He recalled the speech of Mr. Blair before the Victoria Board of Trade, in which he said that he was satisfied huge monopoly existed in the Crow's Nest Pass, and he had determined upon his return to Ottawa to break up that monopoly. He had done so, securing a reversal of 50,000 acres and in lowering the freight rates.

Contrasting the government's railway policy with that of its predecessors, he alluded to the government aid to the Canadian Northern, which paralleled the C. P. R., whereby the road received not an aere of rich fertile prairie land, and in return for the subsidy the government had 3 per cent, of the profits.

No government was perfect, and the present one was no exception to that rule, vet it had filled the measure of his ideal better than any other government. What man had not high ideals but how many measured up to it?

In regard to the post office department, not only had Mr. Mulock inaugurated penny post, but he had brought expenditure and revenue nearer an equilibrium. At the same time local post office employees were receiving more than they ever had. There were still government officials who were underpaid, and on this point he wished to say that it was hard to convince Eastern people that employees on the Coast re quired a higher salary, and until this was done the government could not advance wages. Being an Ontario man, he thought he was in a better position to discuss that matter from an Eastern man's standpoint than his opponents. affected it had been under the French

Although it had been charged that expenditure had increased, yet commerce had necessitated it. For the fiscal year ending 30th of June last, there was sufficient to pay out of the ordinary revenue all current expenses, with a balance of \$75,000.

The establishment of a labor bureau and its great benefits were also touched upon, the speaker instancing cases where contractors had been compelled to advance wages 50 cents a day, and the sweating system had been done away with. Where under the previous governments had the interests of the laboring men been so safeguarded?

The Liberal party had been true to its pledges on the franchise matter and regard to the Manitoba school question, while they had accomplished other reforms to which they were not pledged at all. He concluded with a stirring ap-

peal for support. T. W. Paterson, who was greeted with out he helieved the city would double its matters which every elector had to consider. He had to consider how the gov-ernment's policy had affected the coun-try generally and how it had affected it. locally. He had to consider also the personnel of the respective leaders and

> the respective candidates. Some apprehension had been felt even in the ranks of Liberals on the occasion of their return to power in 1896 re garding their ability to fill the portfolios with capable men. All doubt on that point had been set at rest. Sir Wilfrid Laurier had surrounded himself with men who had great administrative experience, and the history of every de-partment had shown the benefit of the change. It was simply amazing to consider that the revenue during four years of Liberal rule had leaped from \$239,000,-000 to \$380,000,000. He doubted if any country in the world could show an equally good showing. It was perhaps hardly fair to ascribe all the prosperity to the government, but it at least demonstrated that the ministers were cap-

able of administering their departments. He alluded to the enormous development of trade in the East, the records in Toronto showing not only a marked increase in the number of industries, but many of them working over time. Such had not been the case under a high pro-

tectivo tariff. It was difficult to find anything in the perform their duty on a number of occaions, notably in regard to the Yukon railway. To-day, notwithstanding the fact that the bulk of the trade to Skagway was for Canadian territory, the Canadian coast cities had only a fraction of the carrying trade. The vote of per. When the bill came up in the Senate, a Victoria Senator had moved the six months' hoist. Colonel Prior, as an excabinet minister, surely could have exerted sufficient influence with his leader to have that opposition withdrawn. When the Crow's Nest Bill came up these same members had voted for it. If they had been alive to their interests, they would have opposed its construction, unless it was agreed at the same time a road was built from the Coast to Kootenay. It was known that one of the members was interested in these coal lands, and he perhaps was too busy with his own interests to look after those of his constituents.

As the campaign progresses prospects to the interest of Victoria to s grow more favorable for the election of mint, and for that reason it the Liberal candidates in this city by a big majority. The meeting held in Johns Brothers' hall on Douglas street, last tended to the head of the Island evening, was one of the most enthusiastic miners could reach the city so held since the campaign opened. There were over 200 voters in the hall, and the speakers were applauded most heartily. Mr. Drury made a most convincing speech, and Mr. Riley a short, though exceedingly witty, one. The other speakers were Richard Hall, M.P.P., Dr. Lewis Hall and T. W. Paterson, and all were well received. Captain William Cox acted as chairman of the meeting.

Mr. Hamersley, appearing for the city, opposed the adjourn already Mr. Lambert had been fined under the by-law, and that the present was a fourth offence in that regard. If the defendant had intended to appeal, he should have done so before, and his proper course would have been to conform to the bylaw until the result of the appeal was known. Mr. Cane's argument against the by-law was practically a repetition of that already published Briefly it was that the enactment providing for the closing of barber shops had not been passed as such, as it should have been, but was introduced as an amendment to a different by-law altogether, namely, one to prevent the sale of goods on the Sabbath day. It is also indirectly responsible for an additional advance on fresh eggs, which, notwithstanding the many who have gone into the poultry business during the past year, are very scarce. The eggs are bringing 60 cents a dozen, the highest figure they have brought in Victoria in many years. On the other hand, game is more plentiful. Potatoes have gone up a point, but staples otherwise are unchanged. The current quotations are as

Gentlemen, the very best evidence we can have that the bottom is gone out of the cause of Mr. Sloan is Mr. McInnes's speech at the meeting at Extension, held on Thursday night. And that those gentlemen know is plain to everybody from the tactics which they are adopting. They well know that they are now fighting for a lost cause, that they have no chance of winning. In fact these men are getting desperate and they are failure, of paralysis and of body weak- of \$74.50 against the city for funeral adopting desperate tactics. from the notes). 'You asked for the Conservative nomination, and sent two telegrams.' A very serious charge that. Well, now, we'll have the telegrams Col. Prior says were sent. Where are they? Sir, (turning to Col. Prior, amid uproarious applause and shouts of: "That's it, Ralph, make 'em cough up the wires.') I ask you to produce those telegrams you say you sent, and which you told the audience here to-night were sent. Where are they? Col. Prior said he had not got them. (Renewed uproar and encouraging cries to Mr. Smith from the audience.) Well, then, if you cannot produce them I shall tell the audience all about them. I did send two telegrams. One to Mr. Burns, a Conservative, and the to Mr. Munro, also a Con- that they have a good thing. The Monservative, to the effect that as there was arch claims adjoin the Lorne to be a Conservative convention held in which was recently bonded for \$100,000 Nanaimo, I wanted these gentlemen, for and a cash deposit of \$7,500 has already the sake of the cause and for the sake been put up as a first payment. The of the country, to take the same wise course the Liberals already had taken to use their influence to get the convention to endorse me. But I never asked any Conservative convention to nominate me. (Cheers.) To be nominated by a Conservative convention would bind me to allegiance to the Conservatives, and that is altogether another matter. hotel. What attitude did the Liberals take in this matter? They said, the labor interests of this country have a right to direct representation in that house, the right to claim recognition, and they manfully surrendered their right to nominate a straight Liberal candidate in this constituency, in favor of organized labor of this country, and declared themselves perfectly willing to endorse the action you have taken, and to prevent a straight Liberal from running in this constituency against the labor candidate. I wanted the Conservatives to be as reasonable as that. Had they done so their interests would have been much better conserved. Now they are fighting the direct interests of labor in this country. The organized labor classes of this country wanted to bring out a man, and they endorsed my nomination. The men who are using their influence against me are fighting industrial interests of this country, Col. Prior recognizes the difference between the two points. Mr. Wolley says my connection with Mr. Robins, as a capitalist, has spoiled

opportunity for serving labor. My connection with Mr. Robins is exactly the same as that of any other candidate who has run in Nanaimo. Mr. Robins used his influence to promote the interests of Mr. Keith in 1894, and in 1896 he used his influence to help Mr. Haslam. And if he did it with them, why not with me. I never asked Mr. Robins for his support, never in my life. Mr. Robins voluntarily handed over his endorsation of me just as he had done of every other man he approved of, I respect Mr. Robins most highly; more highly than I do any other man in this country. He has always shown himself willing to support any man who has been generally acceptable to the workmen of this city. I want to know if it is possible to find another man in any other country who is prepared to take similar action. (Applause.) When the business of the workmen has been put into my hands to be discussed with Mr. Robins, he does that business just as straight and faith. fully as any occasion calls for. > road. Referred to the city engineer for report. E. A. Rennie, of Hamilton, wrote as ollows:

I notice in the reports of 1898 that the condition of the lepers was very bad, with a worse outlook for the future unless care could be taken of them. How many lepers are there now, and in what condition are they; and is there any nurse or proper person on the island to look after and care for them? Please give me as much and as full information as you can. I have been to Ottawa once in regard to the lepers in the West, and I have created interest in Ontario and in the far East in regard to them. The Synod of Nova Scotla passed a resolution and sent it to Ottawa. The answer of the Minister of Agriculture to that resolution does not properly answer the matter. He excuses his department from taking care of the care of the sick in each province is a matter that belongs to the care of the individual province. He says that the care of lepers in the East is an altogether different matter, that they are cared for because of a clause in the Confederation Act of the province of New Brunswick.

Now in the history of the lazaretto at Tragadie, N. B., it is stated that the lazaretto was not taken over at the time of Confederation, as a hospital of marine was, but that the care of the lepers was taken over some years later (about ten). Now, for my own information, I got a lawyer to look up the matter and I was told that there is no such condition in the Confederation Act. It would be well for the people in the West to have the matter looked up.

It is my personal opinion that the lepers can never be properly cared for so far away from supplies, at least that is the experience of the institution at Tracadle. As long as they had the lepers out on the island, they were not properly cared for, but when they were brought on the mainland they could be visited and they were tren near to supplies.

There is no reason why the lepers could not be put in isolation hospital somewhere near Victoria. The lazaretto is right in the village of Tracadie, with about four or

five acres of land about the building. Ald, Williams moved that the com-

munication be received and the information asked for granted, and that copies. of the resolutions formerly dealt with by the council on the subject be forwarded to Mr. Rennie.

Ald. Brydon could not see that the writer would be benefited by copies of these resolutions, and Ald. Yates was of the opinion that it would be quite To Report Upon the Best Way of sufficient to give the gentleman the in-

Ald, Kinsman concurred with Ald. Williams, who ultimately withdrew the second part of his resolution. The other portion carried.

E. C. Hart, coroner, communicated the rider submitted by the jury at the inquest in connection with the death of the late R. S. Gray, in which the attention of the council was directed to the dangerous state of the various cliffs along Dallas road. Referred to the city engineer for report.

F. J. Deane, secretary of the royal ommission on Chinese and Japanese immigration, asked for information on the (1) number of Chinese and Japanese now residing within the city limits; (2) increase, if any, within the past twelve month of this class of residents: (3) revenue obtained by the city from Chinese and Japanese; sources of the revenue and the amount thereof up to September 30th ult.; (4) occupations of Chinese and Japanese residence within this city limits; (5) such reports from the city medical health officer and sanitary inspector regarding conditions of Chi-(6) such other information as in the opinion of the city council may be of service to the royal commission.

Ald. Williams wanted this communication referred to the finance committee. and Ald. Stewart seconded, as he believed in giving these gentlemen as much work as possible. Ald. Cameron, of this committee, however, demurred, but pointed out that some information could e furnished by the corporation officials. Finally, on the suggestion of Ald. Beckwith, the communication was received and filed, and Mr. Deane will be informed that he can obtain the information on application to the various city officials. The city engineer reported regarding the complaint of the condition of San Juan avenue. This was reported on last November. It would cost \$45 to grade the road. The grading of Garbally road was also reported upon on the same date. It would cost \$285 to grade and surface this street with gravel. Regarding the petition of W. J. Bowden and others for a sidewalk on Esquimalt street, the city carpenter recommended construction of a walk on the north side of the street 600 feet long, at a cost of \$91. A sidewalk 450 long at a cost of \$50 was also recommended to be laid on the east side of Market street. The report was referred to the street

J. L. Raymur, the water commissioner, vanted to know what system of lighting he city preferred for the pumping sta-Received and filed, and the council decided in favor of electric light.

The sanitary inspector recommended the destruction of the two-story building on the north, side of Cormorant street, belonging to W. J. Macdonald, and the two wooden buildings on Fisguard street, together with the three buildings in the rear. The building inspector recommended that the old buildings on the corners of Johnson and Broad streets also be destroyed.

The building inspector's report was adopted, while the owners of these premises condemned by the sanitary innector will be asked to meet the council on Friday, November 9th.

A petition was read from the committee of Victoria West praying for the assistance of the council to look after the nterests of two of their number who, while carried away by the exuberance of their patriotism on Mafeking day ourned a shed on Craigflower road. This evoked considerable discussion, in which it developed that the city solicitor was acting for the plaintiff in the vithdraw from the case should it interere with the city's interest in the matter. Finally it was decided to inform the petitioners that the city solicifor would look after the corporation's interest during the hearing of the case Mrs. S. Williams and others of North Park street petitioned for the extension

of a sidewalk. Referred to the city engiveer for report. The report of the finance committee ecommending the appropriation of \$908.84 for the payment of accounts was adopted.

The resolution regarding the appoint ment of a committee to deal with the mint question was carried, Ald. Cameron, Brydon and Stewart being appointed the special committee.

Demarkation of Inter-Provincial Boundary Completed --Other News.

Steamer Amur, which was reported at Vancouver yesterday as having there arrived with a large number of passengers on board from Northern ports, reached Victoria at 4 o'clock yesterday afternoon, having landed all but about a dozen of those who came south on her. Those who continued the voyage to Victoria were C. Dubois Mason, who has been operating some mines in Atlin; W. case. The latter, however, offered to W. Grime, J. K. Devlin, W. B. Mc-Micking, one of the telegraph construction party, and P. T. Richardson.

The steamer brings news that snow

has fallen to a depth of six inches, on

White Pass, and that the hills and mountains as far south as Wrangel are made its appearance as well as on the Pelly river, and unconfirmed reports had arrived at Skagway of the thermoneter having fallen to 20 degrees below zero. Residents of the city, however, will not lack for fuel this winter for, accordng to T. A. Davis, manager of the White Horse Navigation Company, Dawson has now its own coal supply. His company had handled 3,000 tons for the N. A. T. & T. Co., which had been freighted to Dawson in barges from Cliff creek, 60 miles down the river, where the Cliff Creek Coal Mine Company have rich deposits on which they of railway constructed in connection with the mine over which coal trains supplying the steamers on the Yukon with fuel, and has among other large tons annually. The coal is of the bituminous quality.

Another interesting piece of news received by the Amur is that George be obtained in the way of exemption from White Fraser, who has been demarking faxation, free wharfage facilities, or other the boundary line between this province encouragements of a similar nature, to in- and the Yukon territory, has completed duce the establishment of our manufacthis work, his wife having accompanied him throughout the entire expedition. Unlike After deciding to resume the consider- the contested portion of the Alaska ation of the by-law on Wednesday evenboundary, the interprovincial British Columbia-Yukon line takes its bearing from the stars, the 60th parallel of latitude being the dividing line. Mr. White Frazer's work was of a preliminary nature, though it comprised all of the intricate work of locating the line. At ertain stations-notably the crossings of large rivers and on mountain beaksthe astronomical instruments were up, a temporary camp made, and when the line was located it was marked by a monument. From these monuments it will be a simple matter for a surveying party to mark out the line. In speaking of his trip Mr. White Fraser said: "'Our path lay through a very rough, wild country, and after leaving the region adjacent to the starting point. we met with no one until we came out

at the head of the Porcupine. For a

greater part of the distance our work

took us above timber line. The Alsec

river, along which we worked for a considerable distance, is a turbulent stream and the country it traverses is badly broken up, with frequent precipitous cliffs and mountains, which made travel ling difficult and hazardous. The region eemed to be mineral-bearing, and near the Porcupine frequently showed coal

signs.'"
