

The Best Criterion of the Merit of

DEWAR'S WHISKY

In the ever increasing demand. The high Standard of Quality which first brought the Whisky into prominence, is rigidly maintained, and every bottle CORKED in Dewar's Distilleries is a guarantee that you get the "BEST" in "SCOTCH."

A SUMMARY OF FINANCIAL, COMMERCIAL AND MINING NEWS.

Vol. 2. No 244 MONTREAL, WEDNESDAY, MARCH 21 1900 Published Daily at 4-30 p.m. Price 3 cents.

Montreal Stock Market.

FEATURELESS AND INACTIVE MARKET
-CABLE BONDS UP TO 1/2-PAYNE
ADVANCED 1 POINT-STREET WEAKER
-CONSOLS GAIN 2 POINTS.

Montreal, March 21.

Absolutely no new feature in the Room was how one member of the Stock Exchange described this forenoon's market. Mines even are being left very much to themselves and other trading is extremely dull and somewhat weaker. The business transacted, as seen from the sales below, was broad enough to include sixteen securities in all. Of mining stock War Eagle alone was absent and of those present, Republic was the weakest. At 105 1/2, the price of the final sale, this mining stock closed weaker than on yesterday, by 2 1/2 points and the bid and asked prices were not significant of greater vigor.

The quotation 30 for Montreal-London needs scarcely to be characterized as uncharged for this value has been associated with this security so long as to have become almost identified with it.

Virtue closed 1/2 lower at 98 1/2 and was acquired about much less than for some days back.

An advance of 1 point in the closing price 188, indicated considerable strength in Payne. This stock was very much more active than the other mining stocks just mentioned.

There was one fair sized transaction of Commercial Cable Bonds, which was put through the market at 1/2 advance on the last price. Broken lots of Dominion Coal, Bank of Montreal, Hochelaga Bank, Dominion Cotton, Montreal Telegraph and R. & O. had different experiences, some of them selling a little higher and others selling a little lower.

Toronto Railway closing this forenoon at 100 registered previous price.

New Stock of Montreal Street Railway at 288 was 2 lower.

Twin City advanced 1/2 on its Saturday's price.

The old stock of Montreal Street was at 300 1/2, 1/2 below its closing price yesterday.

Street showed a medium activity on the forenoon's market today.

There was an advance of 3/8 in Canadian Pacific to 95 1/2, in somewhat small transactions. A little stronger in London, Pacific was just a little stronger in the local market. Pacific's price ought to be higher.

The rocky character of the movements in Wall Street over the adoption of Third Av. by Met. is a pretty sure symptom that there is little general business. Consols however, have got some points higher and many signs exist of a favorable situation politically, so that more active business in due course may be looked for in all classes of securities.

STRAWS.

Canada's mineral production last year is valued at \$47,275,512, which is more than twice as much as in 1896.

BANK OF BRITISH NORTH AMERICA.

The Bank of British North America held its annual meeting in London on March 6. At it the Directors intimated a half yearly dividend of 3 per cent, making 5 1/2 for the year ending December 30th, 1899. Besides this £25,000 was added to the Reserve fund, making it now in Canadian money \$1,371,660, instead of as before, \$1,400,000. The 1 per cent. dividend is payable free of income tax on April 5th. Total liabilities for the year amount to £6,826,742 against £5,638,981, the increase containing among other items deposit and current accounts increased by £425,000; notes in circulation increased by £120,000; Assets showed increases in proportion among them being premises accounts increased by £3,650, chiefly for new branches in Dawson, Athol and Sydney. The good statement was caused by the bank money receiving in New York from 6 per cent. upward, and in Canada 5 to 6 per cent. Note circulation was greatest on record in the history of the bank. The bank has had an extremely good year and, as being a Canadian bank, handsomely subscribed \$250 for the Canadian Contingent in South Africa as well as £1000 in aid of the Canadian Patriotic Fund.

MONTREAL MINING EXCHANGE.

MARKET ASSUMES ACTIVE PROPORTION—DEER TRAIL ACTIVE—REPUBLIC WEAKER—PAYNE ADVANCES—VIRTUE NEGLECTED.

There was a brisk enquiry for stocks this morning. There seems to be a lot of cheap stocks floating round for which the public would do well to bid.

Twelve issues were dealt in comprising some 18,500 shares. Prices, however, were nothing to boast about.

Republic was considerably weaker. Payne, however, was stronger at an advance of 3 1/4 points, 2,000 shares selling \$1.34. The feeling on this stock is still bullish. The former sold at 106 and 103. Knob Hill records an advance of 5 points. 2,000 shares selling at 55 cents.

California should be cheap enough and should be a buy. A portion of the machinery arrived lately and the remainder is expected shortly. The machinery should be in working order before the middle of next month. It is the intention of the the management to push the development work on a comprehensive scale. 8 1/2 was fully bid today.

Thenew rumors of another strike on the Dufferin, consisting of a new vein in one of the crosscuts on the 300-foot level running between three and four ounces to the ton in free gold. No sales, however, were accomplished.

Slocan Sov. sold at 82 which is a trifle better, broken lots sold at 29 and 31; 31 was bid at the close.

The Deer Trail investors are beginning to realize that this stock is one of the best paying things on the market. The stock was active and opened strong. 1,000 shares selling at 12 1/2 cents. There was, however, too much stock offered for this price to remain firm, and the following sales were made at 11 1/2 cents. 5,000 shares changed hands.

The machinery is being overhauled on the War Eagle and Center Star properties necessitating a temporary complete close down. It is expected that development work will be resumed during the week. The latter stock was offered at 185, buyers offering 180. In War Eagle the quotations were almost similar.

MORNING SALES.

- Montreal G. Fields—500, 6. 500, 6 1/2.
- Republic—1000, 106. 1000, 105.
- Payne—2000, 134.

NEW YORK EXCHANGE

UNION PACIFIC AND ATCHISON PFD. STRONG ON LONDON MARKET UNDER MET. CONTROL. THIRD AV. CAN BE OPERATED CHEAPLY. HIGHER FIGURES SPOKEN OF FOR ATCHISON ON THIRD AV.'S ADVANCE THE MARKET HAS SWUNG ROUND.

New York, March 21.

The market for Americans in London is strong under lead of Pacific shares. Southern Pacific is up 1/2 point and there is a good demand for Union Pacific and Atchison pfd. It is said that there are bets made on the London Stock Exchange that the South African war will be over by the 1st of June.

Borrowers of Third Av. yesterday afternoon had to pay 2 per cent. for the use of the stock. The brokers who were heavy lenders during the early part of the week having called all the stock that they had out.

It is believed that a good deal of the selling above par was by brokers who were heavy buyers a few days ago.

As yet no plans for the re-organization of the property have been published, but it is intimated that the indebtedness will be cared for by an issue of bonds by the Met. Co. These bonds can certainly be floated at 4 per cent. whereas if the financing had been left to the Third Av., at least 5 and perhaps 6 would have been paid for the money.

This is not the only saving that will take place, it will probably unnecessary to build a new power house and the expenses of the management when the two systems are under one control will be very much less than they were when the Third Av. was run as a separate corporation.

Although there were evidences of a bear panic in yesterday's market, the general short interest has been by no means extinguished. B. R. T., Met. and Sugar are still in fair demand. Southern Pacific has recently been more active than for some time and it is currently reported that certain powerful interests intend to take hold of this property. Of Union Pacific and Atchison pfd., and put them all to materially higher figures.

The buying of B. & O. common continues to be of an excellent character.

The Street is much puzzled to account for the small difference which exists between the com. and pfd. It is supposed that some deal is in contemplation that will make the common worth what it is selling for, but at present as compared with the Union Pacific com. and N. P. com. it looks decidedly high.

The Street is not very bullish on the Steel stocks. The settlement on the Floor is, on the whole, rather bullish and there is a disposition to believe that the acquisition of the Third Av. by the Met. St. Ry. marks the turning point in the market.

MINING NEWS.

LOW GRADE OF ORES OF ONTARIO.

We have on many occasions drawn attention to the vast deposits of low grade gold ores of this district, and we have made comparisons with similar deposits in other countries, always with the result showing that the deposits here are larger in extent and of greater value than any known portion of the world.

The British Columbia Mining Journal published in London, Eng., also devoted a couple of strong articles on the subject of our low grade ores and made comparisons from reliable statistics embracing California, Alaska, Australia, South Dakota and South Africa, and was pronounced in saying that the deposits of Ontario, with the many advantages in the way of cheap fuel, labor and abundance of water, would yield large profits. In concluding one article the British Columbia Review says:—"It may seem an extravagant statement to make at the present time, but it is made with a full sense of what it involves—the River District of Ontario has ore enough of this character to make it one of the dominant factors in the gold production of the world and the dominant factor of North America.

In the seventh annual report of the Bureau of Mines, Dr. A. P. Coleman, writing on our gold deposits has this to say:—

"On the whole the conviction is being reached that in spite of a few fairly rich veins, our gold ores are in general of low grade, though often present in amounts extensive enough to justify working on a very large scale. Fortunately all the properties developed, except those of Marquette, prove to have essentially free milling ores, so that the cost of treatment is reduced to a minimum. As roads and steamboat and railway connections improve, the cost of labor and supplies will fall; and ease of access with a salubrious climate and safety for life and property must give the region an advantage over most others. It is to the extensive deposits of low grade gold ore that the Ontario mining districts will owe their future prosperity. Rich ores may yield greater returns for a limited time, but low grade ores of sufficient quantities assure dividends for years, and also assure the employment of labor, and the establishment of a permanent industry."

The report compares the values obtained in other gold fields with those of our district and says:—

"The Hammond Reef and Alice A. are only illustrations of what can be done in Western Ontario. That many other large bodies of low grade ores exist in the dis-

trict is indisputable, and in the near future these and similar large bodies of low grade ore will prove to be the principal gold producers in Ontario. Even in the Transvaal, which before the war produced 25% per cent. of the gross gold output of the world, in their principal deep level mines of high grade ores, where they have mills varying from 150 to 200 stamps, the actual amount of gold extracted and profits per ton is anything but high. The average of the three principal mines there is \$10.07, extracted from the ore at an average cost of \$5.59, leaving a net profit of \$4.48 per ton. As before stated the average value in the Transvaal is about \$7. These mines are considerably above the average, yet it is evident that under existing conditions these mining operations could not be profitably carried out on a small scale, although were the conditions more favorable much lower grade ores would probably be mined. Thus the experience of gold mining all over the world goes to show that the greatest production and largest profits are likely to result from mining large bodies of low-grade free milling ores."

Within easy reach of Rat Portage are several immense deposits of what is termed low-grade ore, but which in reality, when compared with the deposits of Alaska or Dakota are high grade deposits of immense size. One of these, the Homestake of Ontario, will be vigorously developed by the company owning it, and pushed to the producing stage as quickly as possible. A number of the wealthy men of St. Paul and Minneapolis have put considerable money in the company, while a large amount of the stock of the first issue was taken in Rat Portage. Little trouble was experienced in placing the first block of 100,000 shares offered. The price has now been advanced and a second block of 25,000 shares offered. This will, no doubt, be rapidly taken up by those who recognize the value and permanency of these immense deposits.—Rat Portage Minor.

DEVELOPMENT WORK STILL EXPOSING ORE.

The head office of the Gold Panner Mining Company here has been the scene of great activity this week, and only exceeded by the activity at the mine. Twenty-two teams loaded with men, machinery and supplies left town for the company's property the past few days, and ten more will leave next week. All Murphy's and Fraser's teams that it was possible for them to spare were pressed into service. Mr. Kyo, president of the company, does not believe in waiting for something to turn up, and it is due to the untiring energy of all connected with the management of the company that it is in such a splendid position at the present time.

We have learned from some men just returned from the property that sinking is being prosecuted in No. 2 shaft with the same wonderful results as obtained in No. 1 shaft. Sinking in the main shaft, which is down 75 feet, has been suspended while the hoist and machinery is being put in. In two weeks the steam hoist will be running in this shaft, and drifting will be commenced on the 60-foot level. The vein at this depth is considerably wider than the shaft, while the pay streak has widened to over six feet, and it is thought it may widen to the full width of the shaft.

The marvellous richness of the quartz from the pay streak is still maintained, while the values from the rest of the vein have also increased.

Mr. Hall, the managing director of the company, is still out at the mine, and is superintending the erection of a shaft house and mill building, and the placing of

the machinery in position. If work continues to progress as rapidly as it is doing now their 15 stamp mill will be running by June 15.

Two steel ore cars and three tons of rails arrived here this morning for the property.—Rat Portage Miner.

\$3,500,000 OFFERED IN CASH FOR THE KNOB HILL AND OLD IRONSIDES PROPERTIES AND REFUSED.

There having been rumors afloat that the Miner-Graves syndicate had been offered a large sum for several of their mines in the Bombay district, the president, Mr. S. H. Miner, was asked yesterday if the report was true. Mr. Miner admitted the truth of the story, but added that it needed a little explanation.

"Have you any objection to making a statement that can be published?"

"None whatever," he said. "Some time before the end of the year we were made a cash offer of \$3,500,000 for the Knob Hill and Old Ironsides mines."

"And you refused?"

"We refused that sum when our development did not begin to compare with the results obtained today, and in order to set the matter at rest, I may as well tell you first as last, that if you were to offer us \$5,000,000 for the Knob Hill and Old Ironsides mines that sum would be refused."

FIND IN NICKEL PLATE.

One of the most dubious propositions of the B. A. C. properties was the Nickel Plate, belonging to the East Lo mining company, which is now being mined in London. But this selection of Mackintosh has been proved by the event of the last few hours to have been an eminently judicious one. On Sunday night, near the shaft at the 500-foot level, was struck a rich ledge, carrying very good values in gold and copper. The ore is now to be seen upon the dump and it will probably assay anything from \$30 to \$100 to the ton. The ledge has not yet been touched upon and its width is not yet known, but there certainly seems to be sufficient there to place the Nickel Plate on the list of shippers as soon as sufficient development work has been done.

The strike thus made is the very best that has been made upon the property and is simply the fulfillment of the promise which the narrow stringers of high grade ore which were encountered in the higher levels in times past have given to the management.

THE MIKADO MINE.

Winnipeg, Man., March 20.—A Rat Portage despatch says:—"The Mikado mine produced \$14,000 in gold during the first two weeks of this month, breaking all previous records. This output is about equal to the best previous monthly clean up. It is understood that the company has struck a particularly good body of ore, and this, with the aid of new mining plant, is responsible for the increase."

BRANDON AND GOLDEN CROWN.

A letter has been received from Mr. Geo. H. Collins, superintendent of the Brandon & Golden Crown, which states that he has constructed ore bins and is filling them with ore of a high grade. The management of the company has written to the Canadian Pacific Railway Company, requesting that its tracks be extended from Hartford Junction to the Brandon & Golden Crown, to the end that shipments may be commenced. There are large reserves of ore in the mine and on the dumps, and it is thought that once shipments are started they can be kept up indefinitely.
