The copy filmed here has been reproduced thanks to the generosity of:

Library Division
Provincial Archives of British Columbia

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Library Division
Provincial Archives of British Columbia

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaît sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

PREFACE.

The origin of the Chinook language perhaps never can be accurately ascertained. Probably no one man could claim the honor. It simply grew. Spanish and English navigators traded about Nootka Sound between 1785 and 1800; then and there first formulated and began mainly with a few Nootka, English and Spanish words. The headquarters of the traders were soon after transferred to the Columbia River, near the mouth. The language thus begun was readily used; so that Lewis and Clark's expedition, in 1805, found a little of it in use there. With the coming of Astor's party in 1811, and subsequently, the language took definite form, and received many additions from the Chinook, Chehalis and other tribes in that region. The principal and largest tribe being the Chinook, and their home or nation was in a southwesterly direction from the trading post and the white settlers' headquarters, consequently the name "Chinook;" also Chinook Winds—as southwesterly from the direction of the Chinook nation or home. The words are used quite frequently by the people of this Northwest—"The Chinook Winds" warm and coming from the southwest. While more English and French words were added, it is, however, still changing—has done so in the last thirty years

194683

on the Sound. The Spanish words, or a larger portion, have been supplanted by English and French ones. The necessity of a jargon or language for the early trader with the numerous tribes from Vancouver Island, north up the coast, and in transferring and spreading their business through what is now Oregon and Washington, became manifest to successfully barter with them. The tribes were more numerous and each having a dialect of their own, caused the formulation of the Chinook language and the improvement upon the same as before stated. There were over one hundred tribes in Washington alone, and no doubt Oregon had as many; also British Columbia and Alaska each as many. The last census, however, shows but about fifty tribes in the State of Washington and many of them but a few representatives—over one-half have become extinct.

SUGGESTIONS.

The Chinook jargon can be more readily learned by first briefly studying the Dictionary and then converse with Indians. Their peculiar guttural articulations is beyond the power of our alphabet to apply any given rules, and scarcely any grammatical rules can be applied.
