Cartier Club this afternoon, and constituted themselves into the first Conservative convention that has been convened in Quebec Province for thirty years. G. N. Ducharme, president of the Provincial Bank, was elected chair- Ottawa, Dec. 12.—(Special.)—It is be-

vention.

Arthur Prieur and J. H. Jacob were appointed secretaries, and F. D. Monk made an excellent speech in English. When he looked into the faces of the men who had been behind the 100,000 worts cast for Conservative candidates out of a total of 230,000, he felt more encouraged than ever before.

"We are a federal party," concluded Mr. Monk, "and after considerable experience I have come to the conclusion that it would be very unwise for the Province of Quebec to select a leader for itself."

When the tariff commission sat recently at Victoria it was stated there

Province of Quebec to select a leader for itself.

The convention as a whole, has tenable to keep the hot heads will in hand, but a dozen or more delegates, mostly from Quebec, had determined to secode from R. L. Borden's leadership. However, Mpnk, Chapais, Landry, Casgrain and all the big guns will no doubt be able to sidetrack the provement and it is not likely that any expression of opinion re the leadership will be forthcoming.

Declaration of Principle.

"Committees were then chosen, and the resolutions looked into. It is understood that a declaration of principle.

"Committees were then chosen, and the resolutions looked into. It is understood that a declaration of principles of minorities, the lieutenant-governors maintaining independent action and not being subservient officers of the central power; complete autonomy for the federated provinces; legislation for the important of the province and the resolutions of the central power; complete autonomy for the federated provinces; legislation for the important of the central provinces are likely compensation.

When the tariff commission sat recently at Victoria it was stated there on the authority of one tof the ministers of the crown that the office of lieutenant-governor of British Columbia would be filled by the appointment of Hon. George W. Ross.

But this did not by any means suit the Liberals of British Columbia, and it was very plainly conveyed to Ottawa that if the government indicated by such an outside appointment that it considered the available gubernatorial in British Columbia unsuitable, there would be such a defection from the Liberal ranks thruout the length and breadth of the province as would make British Columbia once again a solid Conservative stronghold.

The senatorship is therefore a likely compensation. being subservient officers of the central power; complete autonomy for the federated provinces; legislation for the improvement and protection of the working classes, condemning the extravagance and waste of the present administration; the amendment of the laws concerning the manufacture, inspection and sale of intoxicating liquors to lessen the evis of intemperance.

## HAMILTON'S INDUSTRIAL BOOM ALERT OFFICIAL'S GOOD WORK

Score of Large Manufacturing Concerns Located in the "Birmingham of Canada" in Recent Years-What the City Has to Offer In the Way of Inducement.

Hamilton, Dec. 12.-(Special.)-The power idea of a publicity department to make pay from \$15 to \$17. known the advantages of Toronto as a here. Hamilton has advanced so rapidly in the past few years that she is becoming known far and wide as "The Birmingham of Canada." This is due largely to the energy of her citizens and to the foresight of ner rulers in creating a department of city government which has for its mann object the dissemination of literature making known the advantages the city has to offer, and the reaching out for manufactures. Nothing is too small or too large, but it is worth while securins, is the principle upon which the authorities go, and when once the department starts after an industry it does not let fun till it is landed for Hamilton.

FIRE PROTECTION AT HOSPITAL.

The fixed Assessment arrangement is one of the citors in Hamilton's industrial progress. It is a long story, if it were all told, but the essentials are these: Hon, J. M. (dibson is a director of the Cataract Power Company, and was attorney-general. There were 600 acres of factory land (vacant) adjoining the northeast's section of the city, and it is said thru Mr. Gibson's influence a bill was quietly put thru the legislature annexing this property and giving the city council the right to fix the assessment at a very low figure, taxes to be paid on this assessment at the old township rate, which is about 71-2 mills on the dollar. The Deerings have three or four millions invested in their plant here, and they pay taxes on \$20, and when once the department starts after an industry it does not have all told, but the essentials are these: Hon, J. M. (dibson is a director of the Cataract Power Company, and was attorney-general. There were 600 at the cataract Power Company, and the security and the cataract Power Company, and the cataract Power Compan here. Hamilton has advanced so rapstarts after an industry it does not let up till it is landed for Hamilton

or located elsewhere. In the past half decade a score of manufacturing concerns have come to Hamilton. Most of them are from the States, and some of them would not have removed from their former locapartment had not persuaded them that they were losing money by not at-tempting to take full advantage of the Canadian market. One of the latest concerns to come here is the Bain Carriage Co. of Buffalo. They had no idea of reaching out for the Canadian market. They were selling a large number of carriages here, and the mayor, following a policy he adopted on taking office, informed himself of the condition of the market and went to Buffalo. The company were per-suaded that the place for their industry was Hamilton, and after considerable negotiation they decided to transport their plant to this side of the border. Eighteen carloads of machinery are now lying on a siding, and work has been begun on a factory to employ 200 hands. The plant will cost \$250,000. This is one of the results of the mayor's individual work and initiative, the he was loyally backed up

The Biggar Regime. Last year the city had an industrial mmittee composed of a couple of three leading citizens. But under the Biggar regime it has been found advisable for the mayor to select such men as he may from time to time to act with him. For instance, he may lear of a hardware company that is looking for a location. He secures the assistance of a few men in the business, and with the expert knowledge, they ossess the committee are able to discuss trade conditions intelligently. If jewelry manufacturing company be approached the mayor will be backed up by men in this line of trade.

"That system," continued the mayor, "has been a guide to me during my term. The growth of Hamilton has never been so great as it has been since this matter was taken up in a business way. I believe it would pay the city to have a cepartee department with a paid staff, whose duty it would be to get out and hustle for manufacturing concerns."

Should Get Together.

The president of the board of trade, J. W. Lamareaux. said he favored a publicity department of the city government. Unfortunately the Hamilton city council did not always work in harmony, but he thought the city and board of trade should get together in this matter. Maunfacturers looking for locations usually looked to the board of trade first, and it should be allied with the council in this work.

The railway commission will visit Hamilton Thursday afternoon, to wind up the north end bridge question. The G.T.R. and the city have agreed as to what should be done, and the commission will be asked to decide what portion of the cost of building a \$5000 subway at Ferguson-avenue and of maintaining gates at Wellington-street the company must pay. There will be a level crossing at the corner of Ferria and Wellington-streets, and one track level crossing at the corner of Ferria and Wellington-streets, and one track across Simcoe-street.

Complaint is made that the members of the Master Carpenters' Association and the lumber mills of the city have entered into an agreement under which the carpenters get their supplies for ten per cent. less than any one else can get them. The carpenters on their part, undertake to buy exclusively from the mills. In cases where a citizen buys his lumber from the mills, it is charged that the contractor who does his work gets a ten per cent, rake off on the lumber used. The new industries not in "The Annex" and which received no concessions are:

Union Drawn Steel Company, 100 to 200 hands.

McNaught has been astated and won't go into any discussion over it until he knows more about it.

Chatting regarding the situation lest night, Mr McNaught told Phe World that only in the morning had he received official notification of his appointment as license commissioner. He had been away, and it was likely the other members had got their notices a day earlier. During the afternoon he had waited upon Premier Whitney for an informal talk the details of which he declined to divulge. He had, however, decided to call a meeting of the best clubs use it.

### 500,000 CLUB.

If the movement for swiftly enlarging the population of Toronto does no take immediate practical shape as the result of the conference at the board of trade yesterday, it will be because the city does not know how to turn glaring opportunities to account.

Whenever new movements are pro jected the difficulty always is to obtain the primary crystalization of ideas which are so admirable that there can be no controversy as to their merits. Everybody wants Toronto to flourish. Everybody wants something to be done to jog the arm of circumstance. But everybody does not know how to ac-

complish this end. There is no room to say that the proposal for a Toronto publicity department has been hastily begotten. R. J. Fleming did first-rate work canvassing for new manufactories, and it need not be forgotten that Ald. Jones has made definite proposals for the appointment of a commission of industries by the city council, with an executive officer whose sole business it should be to publish abroad the excellencies of Toronto and the country adjacent

But the conditions of the movement, we hope is permanently shaping itself, call for more than a purely civic undertaking. Some way must be found for co-operation between the city council and those mercantile interests which are free from some of the inflaences which are apt to deaden the enterprise of an elected body which, thru electoral exigencies, may not guarantee

Mr. Bearman and 17 others arrived here yesterday, and are all well pleased with Bartle, the proof of which I send you in contracts for nine extra lots to what they had bought before

I have employed an expert gardener (the man whom Sir Wm. Van Horne had at Camaguey) to put in the Hotel Gardens and also to help any of the settlers who wanted him to lay theirs out, and I am not charging any one for his services, which I trust is satisfactory to you. You can depend upon seeing some of the finest gardens in the South when your Directors' party comes down in January. At present the following are having him make theirs: Millikin, Spencer, Richards, Downey, Brittain, Bestul and Bull, also the Hotel Garden and the Plaza (Park).

Can't you send us some more carpenters, there is lots of work and more to follow, you can tell them there is no fear of not being able to get work.

Mr. Bull spoke at some length on the lumber industry as between the two countries, having the cial reference to the question of duty and shipping facilities now being discussed by the Canadian lumbermen with the tariff commission at Ottawa and with the minister of crown lands at Toronto. Mr. Bull also alluded to the international waterways commission, and the possible effect on interthe international waterways cominission, and the possible effect on international trade relationships by the tariff investigation now being conducted. Mr. Bull also said that the handwriting on the wall to-day was that the common people in all walks of life were rapidly becoming the controlling and governing class. He instanced in passing, the present troubles in Russia. passing, the present troubles in Russia, Turkey, and in the realms of organized labor and of organized capital, and stated that high-handedness, whether in the ruling class or in the realms of labor, combines included, was rapidly riding to a fall.

## TIME FOR A CHANGE.

Editor World: When we see the churches everywhere clamoring for unity, when we see merchants and manufacturers asking for unity, when we see workingmen agitating for unity it is nearly time we begun to enquire into what is needed. All this tendency into what is needed. All this tendency towards co-operation should teach us this one lesson, that our modern methods of co-operative production, distribution and exchange will not mix with the old time methods of competition any more than oil will mix with water.

Perhaps first of importance is the nature and character of the materials used. The Anneuser-Busch Brewing Association, whose product, BUDWEI-SER, has come to be considered as a standard from which Beer-Quality is to be judged, have found that materials of the very highest quality only can be used, if really Good Beer is to result. They have found also that of all materials permissible in brewing, only the best quality Barley-Malt, the choicest grade of Hops, superior quality Yeast, with perhaps a small percentage of the best Rice can be depended upon to produce a Beer of the highest degree of quality, flavor and palatability.

This association confirms what is generally admitted among brewers that to produce a Beer of excellence expensive median methods of hops, superior resolution had asked for the produce a Beer of excellence expensive median methods of hops, superior grading the rights of lumbermen. GIVE YOUR STOMACH A NICE VACATION

Don't Do It by Starving It Either-Let a Substitute Do the Work. The old adage, "All work and no play makes Jack a dull boy," applies just as well to the stomach, one of the most important organs of the human system, as it does to the man himself. If your stomach is worn out and rebels against being taxed beyond its limit, the only sensible thing you can do is to give it a rest. Employ a substitute for a short time and see if it will not more than repay you in lebults.

will not more than repay you in legults.

Stuart's Dyspepsia Tablets are a willing and most efficient substitute. They themselves digest every oit of food in the stomach in just the same way that the stomach litself would, were it well. They contain all the essential elements that the gastric juice and other digestive fluids of the stomach contain and actually act just the same and do just the same work as the natural fluids would do, were the stomach well and sound. They, therefore, relieve the stomach, just as one workman relieves another, and peimit it to rest and recuperate and regalities normal health and strength.

This "vacation" idea was suggested by the letter of a prominent lawyer in Chicago. Read what he says: "I was engaged in the most momentous undertaking of my life in bringing about the coalition of certain great interests, that meant much to me as well as to my clients. It was not the work of days, but of months: I was working night and day almost when at a very critical time my stomach at very critical time my stomach at very critical time my stomach the matter be taken into account when the civic investigation is reopened. # A Plain Statement

Quality of Beer Depends Upon Superiority of Materials, Treatment and Maturity

Purity is a universal essential in all beers. The observance of cleanliness and sterilization will secure it.

Healthfulness, combined with flavor and taste, constitutes real quality, and these are impossible without the very best materials and the highest order of treatment. This is what science and experience teach.

Materials: To provide the public with a really good, palatable and wholesome beer of the Highest Quality, we use the best barleymalt, the highest grade hops, superior yeast, and in our pale beers a small percentage of rice. In all our beers we use the best and purest materials, regardless of cost.

Corn we never use, although it is not excluded by authority, and has the advantage of cheapness. We use no substitute of any kind to reduce our expense. We spare neither money nor care to fortify and increase our well earned and long established reputation.

Treatment and Maturity: We employ only the most modern methods of brewing, and our present storing capacity of 600,000 barrels is more than that of any two other breweries in the world.

These facilities enable us to age our beer the length of time necessary to guarantee its purity and maturity-not in printers' inkbut in fact.

Quality, depending upon the character of materials and the methods employed, is the real goal for competition among brewers.

At this goal we have been for many years.

It is for these reasons that

"We had an honor roll out in the of-

fice made up every week. Every agent who wrote \$1000 of insurance for the Toronto Life was credited with \$10 in the honor roll, while to sell a snare in the York Loan only brought credit for 25 cents.

"Next to the inspectors came the superintendents, numbering from 100 to 150, their jurisdiction extending from coast to coast. The superintendents were expected to write a good deal of life insurance, and after them came the collectors, of when there were at least collectors, of whom there were at least 500. There were about 100 in Toronto, forty in Montreal, forty in Ottawa, and so on. None of these collectors received less than \$5 a week on an average, if their collections were small. They received a bonus if they got a certain amount of new business.

"Every inspector also was expected to bring in his share of National Monthly magazine subservations."

## your own shoulders. The opportunity is afforded you to mould it into Success—Success in bright golden letters. Such an opportunity for yourself has never been placed at your disposal before. Likely it never will again. If you are one of those men and women who are strutting about like a peacock, proud and perfectly satisfied, to-morrow means nothing—for you will never amount to anything seriously beyond your own estimation of yourself. If, again, you are one of the men or women, boys or girls, who are ambitious to rise to the top in your own or any other chosen calling, Thursday, December the Fourteenth,

YOUR FUTURE

shall be the most memorable day in your career.

To-morrow brings with it the first number of the most ambitious magazine in the whole world—THE HARMS-WORTH SELF-EDUCATOR. That is the book that teaches you everything you will ever need to know about anything. This is a very broad statement, yet it is absolutely correct. It gives you for ONE CENT A DAYa work that had cost more than \$150,000 to prepare before a line of copy was given to the printer. You need the Harmsworth Self-Educator and if you will take it regularly and "Learn a little every day and put it to advantage," you will very soon agree with every word in this advertisement.

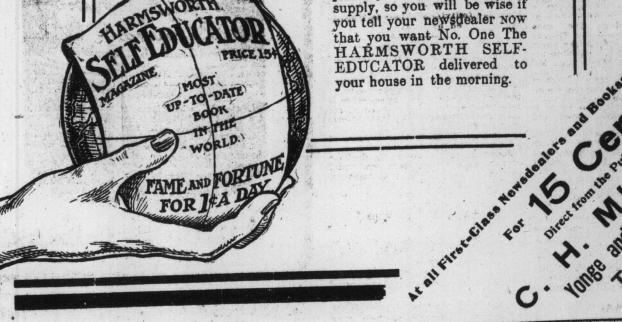

For you a special Canadian Edition has been prepared,

and all the monster presses of the contracting printers, the Mail Job Printing Company of Toronto, have been turning out this first number, night and day, for the past two weeks. You will know the Canadian Edition, for it has a bright red cover, so printed to prevent you from being deceived by having an English Edition (blue cover) which is not suitable to Canadian requirements. Before a demand was made here for a real Canadian Edition, several hundreds of copies were sent from England and sold here. These we shall be pleased to exchange for the Canadian Edition

at our offices in the Janes Bldg. Toronto. The demand will be possibly far greater than the supply, so you will be wise if HARMSWORTH SELF-EDUCATOR delivered to your house in the morning.

The business suits we make are for men who regard apparel as something more than mere body covering.

It takes no skill to buy good cloth; it takes no skill to buy good trimmings. But it does take skill to make the cloth into a suit with individuality.

A Score business suit to order at \$25 is one that will lend dignity and style to the wearer.

The cloth is of fine quality, trimmings the best, and workmanship superior.

F you ask the reason for the high artistic position that has been attained by the BELL Piano we answer by asking you

to not only examine the piano in our various branch warerooms but to visit our factories as well. If you intend being one of the many visitors this week to the great Fat Stock Show at Guelph do not fail to inspect the BELL factories—it will be a revelation to you to see the BELL Pianos in course of construction. You will see for yourself how carefully they are "built to last a lifetime."

In our factories we have put all the energy and intelligence of which we are capable into our efforts to produce musical instruments of our efforts to produce musical instruments of the highest possible character. We have ex-perimented time and again over minute de-talls that most people would think too slight for attention. In its finality we have made this **BELL** Piano of ours a thing of beauty, in which we can take a high artistic pride. The exquisite tone, the fine workmanship in every detail, the illimitable, quick-repeating action, the magnificent finish and appearance, are a source of amazement and delight to people who are accustomed to seeing, hearing and criticizing pianos every day in their lives.

CRAWFORD AND THE MAYORALTY. He is Not a Candidate,

At Ward Six Central Conservative gave their views on the license ques tions and the government's action was endorsed. "As to the report of a Conservative caucus," said Mr. Crawford, "as usual

the one man who is supposed to run the Conservative party in Toronto and outside has been so kind as to say I am to be the candidate for the mayoram to be the candidate for the mayoralty. So far as I have heard there was no such meeting, and I haven't even considered whether I shall run.

Perhaps The Telegram is anxious to get one more besides Ald. Coatsworth in the field. I dare say Mayor Urquhart will be in the field and will have the support of The Telegram."

He remarked that the papers were hypocritically decrying politics in city elections.

"It would be better for them to have "It would be better for them to have it so, but I doubt if it is to the good of the people,' said Mr. Crawford.
