

5TH BALLOT FAILS TO DECIDE PONTIFICATE

WORLD ENVOYS TO SIGN NAVAL TREATY MONDAY

Also Hold Hope For Final Seal On Shantung At Same Session.

MARKS FINAL WINDUP

Saturday's Sitting To End All Negotiations At Washington Parley.

WASHINGTON, Feb. 3.—The

"big nine" of the arms conference, meeting today for the last time, whipped into shape the treaties relating to China and issued a formal call for a plenary session tomorrow to mark the final windup of the Washington negotiations.

It was decided to base only two treaties on the Chinese decisions in regard to Chinese questions.

One of the treaties will cover the Chinese tariff revision, and the other the Root "four points" and the open door.

The remaining resolutions are to be presented at the final plenary session merely as a series of joint declarations of policy.

Plans had been made today for the Japanese and Chinese to sign their treaty on Shantung, but it was decided to postpone that also until Monday.

Quit Far East "Talk"

Actual negotiations on the Far Eastern problems came to an end today with statements delivered in the Far Eastern committee setting forth the position of the United States and Chinese governments toward the "twenty-one demands."

Speaking for China, Dr. Wang said his government viewed with satisfaction Japan's announcement that group 5 and some other clauses will be withdrawn, but reserved her right to protest the parts remaining.

Secretary Hughes asserted that the United States government still stood on its rights in the matter, as it had asserted them when the "demands" were laid down by Japan in 1915, and then the discussion ended without action.

The only treaty to be formally given conference approval at tomorrow's plenary session are the two relating to China. The session will begin at 10:30 a.m., half an hour earlier than the customary time of the conference and its committee in anticipation of several hours of farewell oratory.

On Monday the delegates will sign the naval treaty, the submarine and poison-gas treaty, the two treaties relating to China, and the supplementary notes to be attached to the four-power Pacific treaty.

It is also possible that the treaty between Japan and China, embodying the Shantung settlement, may be signed at the conference at Monday's meeting.

LAST MEMBER OF C. E. F. QUILTS WAR

St. John, Feb. 4.—Said to be the last man of the Canadian Expeditionary Force to be demobilized, there arrived in St. John yesterday, on the Empress of France, Captain J. H. Ruston of Vancouver, who had been overseas since early in 1915.

THREE CHILDREN SCALED. Philadelphia, Feb. 4.—Three small children were scalded in an explosion of a still late yesterday, and are in a serious condition, while police are searching for their parents and the occupants of the house where the injured children were found. Physicians said the children had only slight chance of recovery.

The Weather

FORECASTS. Local snow flurries, but mostly fair today and on Sunday; not much change in temperature.

Pressure is low over the northwestern portion of the continent and in the Maritime Provinces, and relatively high over the middle and south Atlantic states.

Light snowfalls have occurred in many parts of the Western Provinces and in Ontario, and more locally in Quebec and the Maritime Provinces.

Temperatures. The highest and lowest temperatures during the 24 hours previous to 8 a.m. today were:

	High.	Low.
Victoria	45	36
Calgary	34	18
Winnipeg	14	4
Pt. Arthur	20	10
P. Sound	28	2
Toronto	20	26
Kingston	32	18
Ottawa	20	10
Montreal	20	18
Quebec	28	18
P. Point	26	18
St. John	44	28
Halifax	32	28

LOCAL TEMPERATURES. The highest and lowest temperatures recorded in London during the 24 hours previous to 8 o'clock last night were:

Highest, 27; lowest, 21.

The official temperatures for the 12 hours previous to 8 a.m. today were:

Highest, 23; lowest, 20.

Barometric Readings. Friday—5 p.m., 29.97. Today—8 a.m., 29.95.

Labor Members "Depose" Halcrow As Leader of Party In Provincial House

FEAR OUTCOME OF BOUNDARIES DISPUTE IN ERIN

Craig and Collins in New Disagreement Add To Complicity.

WANTS TREATY CHANGED

Unionist Member Declares Civil War Imminent Unless Provisions Altered.

LONDON, Feb. 3.—The latest disagreement between Michael Collins and Sir James Craig is drawing the anxious attention of the British government, and it is recognized that the boundary-fixing question between North and South Ireland is one of grave possibilities. But, until an impasse is acknowledged by the North and South Irish spokesmen, London will regard the affair as a matter to be handled without British interference. It was declared in an official quarter today.

The drawing of the boundary must necessitate a give-and-take attitude on the part of both parties, it was pointed out, and officials here are continuing in the hope that Ulster and South Ireland eventually will view the question in that light.

The suggestion that Mr. Collins, the secretary of state for the colonies, gave territorial assurances to Mr. Collins during the negotiations that preceded the signing of the Anglo-Irish treaty—assurances of which Sir James was not apprised—is labelled as absurd.

The diplomatic correspondent of the Evening News attributes the hardening attitude of Mr. Collins and Arthur Griffith to the imminence of the meeting of the "Ard Fheis" (the Gaelic League of Ireland) the suggestion being that such an attitude might placate the followers of Eamon de Valera.

The next move may result from the conference which the Ulster premier proposes to continue in London for a few days. Sir James saw Winston Spencer Churchill, the secretary of state for the colonies, and other members of the cabinet committee which negotiated the Anglo-Irish treaty this afternoon. Mr. Churchill later went to Downing street to discuss the situation with Mr. Lloyd George.

FEARS CIVIL WAR. BELFAST, Feb. 3.—Mr. Charles Curtis Craig, Unionist member of the House of Commons for South Antrim, addressing a political meeting today, said that if any attempt were made by the people in South Ireland, or by any commission which might be appointed by the imperial government to take away large pieces of the six counties from Northern Ireland, no other result could come about than civil war.

If Britain wanted peace and the Irish question settled without more bloodshed and more trouble, he said, they would have to alter the provisions of the Anglo-Irish treaty regarding the boundary question.

LOUISE LESLIE TAKEN TO PRISON

[Special To London Advertiser.] Toronto, Feb. 4.—Mrs. Louise Leslie, formerly of London, sentenced to twelve years imprisonment for performing an illegal operation, left Toronto this morning for Kingston, to begin serving her term in the penitentiary. She was accompanied to Kingston by Mrs. L. Russell, police woman, and a sheriff's officer.

FACTORY AT HAMILTON WORKING DAY AND NIGHT

HAMILTON, Feb. 4.—Another indication of the turn in the tide is the fact that the Laidlaw Bale Tie Company, manufacturers of drawn wire, is operating its factory day and night. Orders are coming in from England, Australia, China, South Africa and South America.

\$17,000 ESTATE LEFT BY JUDGE R. D. GUNN

Ottawa, Feb. 4.—An estate of about \$12,000, exclusive of life insurance, which amounts to about five thousand more, was left by the late Judge Ronald David Gunn, who died on January 10 and whose will has been filed for probate. Mrs. Catherine Gunn is the sole beneficiary. The estate is all of a personal nature, with the exception of the life insurance, which is in favor of Mrs. Gunn. The will set forth a personal estate of \$12,072. The Capital Trust Company, it is provided in the will, is to be the executor of the estate.

To Visit Canada

MARY GARDEN.

NEW YORK, Feb. 4.—Mary Garden, erstwhile of Aberdeen, Scotland, now director and storm center of the Chicago Opera Company, has announced that the annual pilgrimages to New York are to cease.

"If New Yorkers want to hear the Chicago Opera Company next year they can climb aboard the Twentieth Century Limited and come out to Chicago," Miss Garden declared.

Incidentally, it is said that a number of Canadian cities will be included in an enlarged western tour. Winnipeg, Calgary, Regina, Vancouver and one or two other cities may in time be favored with a visit from Miss Garden and her singers.

FIND FREE FORUM IN REVISION COURT

Citizens Air Many Grievances Along With Tax Protests.

There is an old saying that "misery likes company" and for the citizens holding strong or uncompromising opinions about the city's administration, the place to find kindred souls is the court of revision.

It has developed of late that meetings of this body provide a regular field for those who have pent up opinions and ideas in regard to management of civic affairs, and they attend in goodly numbers to let these opinions exude.

It has been noted that when some irritated citizen unloads caustic remarks, the feeling becomes spontaneous and not unfrequently brings forth jibes and jabs from other quarters of the hall in support.

At the last meeting there were a couple of instances of this very thing. A citizen was complaining that he had been asked by the engineer's department to put up \$12 for a curb. He did. The curb was laid. He was told that there was nothing to be returned to him out of the twelve. "I know it did not cost more than five dollars," said the citizen. "What become of the balance? I guess the engineer needed the money."

Engineer Brazier joined the court in the laugh that followed.

Another citizen declared that there were too many "dudes" around the city hall. "We should clean them all out," he said.

"Yes, clean them out," said another.

It would take a column to relate the hot stuff that the citizens pour out in a half hour's time. Frequently they forget altogether what brought them to the court. So long as the minute or two to let off their surplus views, they are content.

Then with a "I told them where they got off," or words to that effect, they will go off happy. Their own appeal is of little moment. The court of revision is becoming a great democratic institution.

DISCREDIT STORY OF BURIAL PLANS

Montevideo, Feb. 4.—The report published by the London Daily Mail that Lady Shackleton, widow of the famous explorer, had decided to have her husband's body taken back to South Georgia Island for burial, caused amazement here, particularly in the British colony, which gives the report no credence.

Capt. L. Hussey, who brought the body here from South Georgia Island, where Sir Ernest died, declined to comment on the report.

SHUNTING CAR KILLS WOMAN IN MONTREAL

Montreal, Feb. 4.—Mrs. Helen Travis, 37 years, was struck by a freight car being shunted towards the Grand Trunk freight sheds on the Mountain street crossing here last night and killed almost at once, both of her legs being cut off.

DRASTIC ACTION CLAIMED DUE TO OPPOSITION

Executive of Organization Takes Definite Stand at Caucus.

MAY CROSS OVER FLOOR

Dr. Hugh A. Stevenson Declines To Comment On Latest Development.

[Special To The London Advertiser.] Toronto, Feb. 4.—The Labor Party of Ontario no longer recognizes the leader in the provincial house of George Halcrow, M. L. A. for East Hamilton.

Following a caucus of labor members of the house here earlier in the week the executive of the Independent Labor Party of Ontario has been notified that labor's representatives in the legislature can no longer accept the leadership of Mr. Halcrow, and the executive has been advised to guide itself accordingly.

The labor members are frank in their reason for this drastic action, and state that they now reject their former leader by reason of his "perpetual antagonism to the government and other members on his side of the floor."

It is a broad open hint, they assert, for Leader Halcrow to cross to the Opposition benches, where they say "he evidently belongs."

Questions Saturday morning as to the report of this latest development in labor's ranks, Dr. Hugh A. Stevenson, M. L. A. for London, declined to offer comment.

70TH BATTALION PLANS REUNION

Ex-Soldiers To Hold Reception in Masonic Temple February 11.

Former members of the Seventieth Battalion are planning a reunion of all the ex-soldiers of that unit, to be held in the Masonic Temple on Saturday evening, Feb. 11, at 7:30 o'clock.

It is expected that there will be many renewals of old acquaintanceships, and that reminiscences will be the order of the day.

In conjunction with the reunion another interesting ceremony will take place on Sunday, Feb. 12. On that morning, at the 11 o'clock service, the colors of the battalion will be deposited with due respect and ritual in Cronyn Memorial Church.

These emblems have been hanging for a long time in the shadows of Westminster Abbey, London, England, but a short time ago were taken from there and brought to Canada for permanent deposition in Cronyn Memorial Church.

HEIRLESS AND YOUTHFUL HUBBY ON HONEYMOON

New York, Feb. 4.—Leaving behind them a much-disappointed group of New Yorkers, who curiously awaited their marriage, announced for 4 o'clock this afternoon, Mr. and Mrs. A. stage Andreievitch Vonskiy-Skovlatsky are honeymooning today "somewhere in America."

The two have dropped from sight. With the exception of the bride's mother, Mrs. Norman P. Ream, and her brother, Norman P. Ream, no one knows where they went, following their marriage at 8 o'clock last evening by Father Leonidas Terkevitch in the Russian Cathedral of St. Nicholas.

They left the church in a taxicab, drove to Grand Central station, and took a train, ostensibly for the home of the bride's mother, Carolyn Hall, Thompson, Conn., but all inquiry there this morning failed to bring any response.

The hasty, hushed marriage last evening and the subsequent disappearance of the two is the latest chapter in this sensational modern romance which makes the former Mrs. Marion Buckingham Ream Stephens one of the heirs to a \$400,000 estate, the bride of a penniless Russian youth, almost 22 years her junior.

REPORTS DECREASE OF GRAIN HELD IN CANADA

Ottawa, Feb. 4.—According to reports received at the Dominion Bureau of Statistics for the week ending Jan. 27, 1922, the quantity of grain in store at the different elevators throughout Canada has decreased in wheat by 613,182 bushels, while oats indicates an increase of 214,575 bushels; barley, 20,927 bushels; flax, 5,430 bushels, and rye, 60,876 bushels.

INDIAN WHEAT AREA GROWS.

Ottawa, Feb. 4.—(Canadian Press).—The Dominion Bureau of Statistics reports the receipt today of a cablegram from the Indian department of statistics at Calcutta, according to which the first wheat forecast of the season places the area sown in India for the year 1921-1922 at 27,739,000 acres. This compares with 25,722,000 acres, the final reported area for 1920-1921.

ORDERS LIBERATION OF HAMILTON CANVASSERS

HAMILTON, Feb. 4.—As soon as Magistrate Jelfs heard that twelve men, headed by E. Haslam, has been arrested for making a door-to-door canvass for funds for relief, he ordered their release, and they did not appear in police court this morning.

While his worship said he did not approve of giving to such a fund he ruled there was nothing criminal about the collection.

Police Constable Gravelle, 354 John street north, was found guilty of having a still in his possession, and was remanded for sentence until Monday, bail being refused.

Seeks South Pole!

COMMANDER FRANK WILD.

MONTEVIDEO, Feb. 4.—Sir Ernest Shackleton's expedition to the south pole region is being continued, on the death of the famous British explorer, by Commander Frank Wild.

Wild has spent ten years in the frozen seas and was second in command of the Quest before Shackleton's death.

STANLEY PIPER SENTENCED TO JAIL 6 MONTHS

Changed Plea to Guilty in Police Court Charge of Bigamy.

ARRESTED WEEK AGO

Magistrate Bartlett Points Out Longer Term Could Be Imposed.

Six months in the common jail was the sentence imposed on Stanley Piper for bigamy by Deputy Magistrate P. H. Bartlett in police court Saturday.

Deputy Magistrate Bartlett again remarked, as at a former hearing, on the fact that Piper pleaded not guilty when he was arrested, later changing his plea to that of guilty.

"I asked him to plead guilty to facilitate the proceedings of the case," stated J. M. Donahue, counsel for Piper. "Under similar circumstances in a civil action there would probably be an annulment of the first marriage," stated the defendant's counsel.

In passing sentence on Piper, Deputy Magistrate Bartlett reviewed the case and the law of the country concerning bigamy.

Had Little Evidence. "It is a very unfortunate matter for you because I have nothing at all to go on with, but what the counsel told me of the first marriage, and he obtained that information from you. I have found out a certain thing from a friend of yours regarding the first marriage, and in the eyes of the law you were married. And for you to marry another woman was a very grave offence to the woman. She is in law not a wife, and in the case she had children they would be illegitimate, and her life would be ruined."

"It is also a serious offence against the morals of the country. Law regards marriage as sacred, and for this offence of which you have pleaded guilty I could impose a sentence on you of up to five years in the penitentiary. If I sentenced you to a long term it would probably ruin your future career, and I intend to be more lenient in your case."

"I am taking a number of things into consideration. One is your youth, and another is the fact that the girl you married left you a short time after the marriage ceremony took place. I am also taking into consideration the fact that you have a good record. One thing which must, however, be impressed upon every body, is that they have to obey the laws of the country," stated Deputy Magistrate Bartlett.

Arrested Week Ago. Piper was arrested a week ago at his boarding-house by Detective Down and Bolton on the charge of bigamy preferred against him by Alice Dobson, his second wife, Piper who was a former resident of Pelee Island, married Laura Laureux in Windsor, in March, 1913. A short time after the marriage his wife left him, and he went overseas with the C. M. R. He declared that he never heard from his wife, and upon his return he married Miss Alice Dobson in London. The fact that Miss Alice Dobson had known that Piper had been previously married for some considerable time, and continued to live with him, tended to mitigate his sentence in the eyes of the court.

NAMES SCHANZER HEAD DELEGATE TO PARLEY

Washington, Feb. 4.—Senator Schanzer, head of the Italian delegation, received formal confirmation from Rome yesterday of his appointment as senior delegate to the armament conference and of his authority to sign all treaties and documents in behalf of the Italian government.

In view of the recent resignation of the Bonomi ministry at Rome, Senator Schanzer cabled to Rome requesting the confirmation of his plenipotentiary powers. The prompt reply insures that there will be no delay in the signing of the treaties on Monday.

DE NICOLA ASKED TO FORM NEW CABINET

Rome, Feb. 4.—The king is understood to have offered the task of forming a new cabinet to Enrico de Nicola, president of the Chamber of Deputies. It is known that the latter is reluctant to accept, having refused several similar offers in the past, but he is said to be wavering under the pressure of the majority group in the chamber.

The offer is said to have been made yesterday at one of the king's many conferences with leading politicians and members of parliament. It is generally believed, however, that the ministerial crisis will endure for eight or ten days.

Senator Bonomi was the only former premier received by the king yesterday, but former Premiers Giolitti, Orlando, Nitti and Sonnino have been invited to call at the Quirinal today.

MURDOCK REPLIES TO LABOR COUNCIL CHARGE

HAMILTON, Feb. 4.—James Murdock, federal minister of labor, has replied to charges made against him in the trades and labor council. He asks the council not to place much reliance on the reports of a Toronto evening paper concerning him, and announced that he is in favor of the public ownership and operation of Canada's 22,000 miles of nationally owned railways, and believes that they will pay under public ownership. As to his reported opposition to unemployment insurance, he says he favors doing everything possible to furnish employment rather than insurance against unemployment.

DISEASE MADE PRETEXT TO RAISE MEAT PRICES

London, England, Feb. 4.—(Canadian Press Cable).—Some meat interests have not been slow to use the outbreak of foot and mouth disease among cattle of Scotland and the north of England as a pretext for an increase in prices. The ministry of agriculture, however, has issued a statement declaring that there is no justification for any attempt to raise the prices for meat, though some irregularity may exist at local markets.

SMOKE CLOUD INDICATES NO DECISION MADE

Expectant Crowds Are Disappointed When Vapor Assumes Dark Color.

VOTING IS CONTINUED

Sacred College, in Conclave, Still Seeks Successor to Pope Benedict.

Rome, Feb. 4.—A fifth ballot for the election of a successor to Pope Benedict was taken by the conclave of the Sacred College this morning but without result, no candidate receiving a sufficient number of votes.

Smoke began to appear from the chimney of the Sixtine Chapel shortly before 12 o'clock. Expectant crowds watched eagerly from the moment the first wisps showed themselves but the smoke cloud at once began to assume the tell-tale dark color which indicated that there had been no final choice by the Sacred College.

Within the secret chamber of the walls of the Vatican balloting is proceeding for the election of a successor to Pope Benedict XV. Today's balloting failed of result. The cardinals were engaged for several hours during the morning in an endeavor to select an occupant for the papal throne, but shortly after noon a thick volume of sulphur-hued smoke indicated that no decision had been reached.

The deliberations in the afternoon apparently were somewhat shorter, as the great clock of St. Peter's registered 5:25 when the chimney emitted a feeble cloud of black smoke, telling mutely to the vast assemblage that the momentous question was still undecided.

At the termination of the morning sitting of cardinals the irregular emission of light-colored smoke led the crowds to believe that a new pontiff had been chosen. Vatican officials, it seems, had not used sufficient tow with the burning straw.

Incident Causes Confusion. This incident was almost repeated at the conclusion of the afternoon's deliberations, when grayish smoke began issuing from one of the chimneys in the Vatican palaces, causing confusion among the thousands of onlookers as to whether the smoke could be considered white or black. The better-informed among the assemblage, however, drew attention to the fact that the smoke was not issuing from the proper chimney, but from one nearby.

A moment later the people were disappointed to observe the right chimney belching forth dense black cloud that came directly from the Sixtine Chapel. Hushed cries went up from the spectators. "They have not chosen him," thousands of voices repeated in unison.

The illness of three of the cardinals within the Vatican makes it necessary for the ballot-takers to leave the Sixtine Chapel, with due ceremony, and repair to the apartment of the invalids. Cardinal Marini has been ill for several days from influenza, and there is some apprehension over his condition because of his age. Two other cardinals, Pompili and Bacilieri, are suffering from colds.

Gather From Wide Area. Several hours before the convening of the conclave in the afternoon thousands gathered in the historic square in front of the Vatican, many of them coming from distant points. By 4 o'clock fully 10,000 persons had taken up positions of vantage. The favored few, for the most part members of the papal court or the Roman aristocracy, occupied places in the left loggia of the Vatican, the envy of the crowds assembled below.

Hundreds of devout Italians, intent upon being the first to receive the benediction of the new pope, brought food and wine, some even blankets, prepared if necessary for a long vigil.

I. O. D. E. Members To Sell London Advertiser At Big Auto Show

THE London Advertiser is co-operating with the members of the Campbell Becher Chapter, I. O. D. E., in their efforts to raise money for the Children's Hospital at the Auto Show in the Armories next week. Copies of The Advertiser are to be sold exclusively to members of the Campbell Becher Chapter tea-room at the west end of the Armory basement, the proceeds going to this popular cause. Two members of the chapter in uniform will go about the building selling the latest editions of The Advertiser.

The tea-room will be open from 10 a.m. until 10:30 p.m., the members serving luncheon, dinner and refreshments in the evening, as well as afternoon tea, in order to accommodate those who wish to remain at the show all day.

May Succeed Pope

CARDINAL GASPARRI.

ROME, Feb. 4.—A report was circulated at 11 a. m. today that the choice of a new pope had been arrived at by the Sacred Conclave of Cardinals. This was based on a rumor that no food had been ordered for further sessions of the cardinals.

Prelates about the Vatican who are not taking part in the conclave say that such a quick election would point to the election of Cardinal Gasparri, who was secretary of state under Pope Benedict XV.

COMMITTEE WILL CONSIDER PLAN

Proposal To Convert Sunday School Into Gymnasium Is Discussed.

As the result of a conference held Friday night between representatives of organizations in Askani Street Methodist Church and the trustee board, a joint committee will at once investigate the proposal that the present Sunday school be extended and provision made for a gymnasium in the organized classes of the school.

A deputation waited on the trustee board and pointed out that the Sunday school was so badly crowded that the work was being seriously handicapped and was already beginning to suffer. The work that is now being done by the organized classes was detailed, and it was shown that a large number of the organized classes must go down town to the Y. M. C. A. for their work in connection with the standard efficiency tests. The same difficulty, except that it is more marked, faces the classes of girls.

There was some doubt expressed by one or two of the trustees as to the wisdom of entering upon further extension, but the opposite view was taken by William Copp and John Heaman, both of whom emphasized the opportunity the church had of holding the young people to the church and the need of doing so.

The subject has been under discussion in church circles for over a year, and it is expected that the joint committee now appointed will settle the matter one way or the other. There has been some suggestion that a joint effort will be made to clear the church of debt first of all, and then undertake a building plan. The present debt is \$11,600.

MURDOCK REPLIES TO LABOR COUNCIL CHARGE

HAMILTON, Feb. 4.—James Murdock, federal minister of labor, has replied to charges made against him in the trades and labor council. He asks the council not to place much reliance on the reports of a Toronto evening paper concerning him, and announced that he is in favor of the public ownership and operation of Canada's 22,000 miles of nationally owned railways, and believes that they will pay under public ownership. As to his reported opposition to unemployment insurance, he says he favors doing everything possible to furnish employment rather than insurance against unemployment.

DISEASE MADE PRETEXT TO RAISE MEAT PRICES

London, England, Feb. 4.—(Canadian Press Cable).—Some meat interests have not been slow to use the outbreak of foot and mouth disease among cattle of Scotland and the north of England as a pretext for an increase in prices. The ministry of agriculture, however, has issued a statement declaring that there is no justification for any attempt to raise the prices for meat, though some irregularity may exist at local markets.

REPORT SHOWS LARGER DEMAND FOR CITY HYDRO

Public Utilities Commission
Publish Annual Statement
of Activities.

IMPROVE WATERWORKS

Sales in London Hydro Shop
for 1921 Greatest in De-
partment's History.

Despite the industrial depression in 1921, a steadily-increasing demand for hydro power in London was experienced, as revealed by the annual report of the public utilities commission issued Saturday morning.

As a result of this, the main power distributing station at Horton street was operated under severe overload conditions. The highest peak obtained during the year was 14,750 horsepower, an increase of 3,504 over the highest in 1920. To provide for the increasing loads, the erection of a new switching and transforming station was undertaken in East London, which was completed and officially opened Saturday afternoon.

Other features of the report are: Waterworks Department.—A notable increase in construction work has been noted during the year. About five miles of water main was laid, accounted for mainly by the river water main laid along Queen's avenue and Ontario street to supply the Canadian Pacific Railway.

Trouble Nullified.—Trouble with plugged services is gradually falling off, only six cases being reported in December. The force pump designed by the London department to clear out these deposits of iron has been employed with every success.

Special Construction Department.—During the early part of the winter, Hunt's old flour mill was renovated and adapted for use as a store building at a cost of \$5,500. This has proved advantageous, the cost of a new building being estimated at \$35,000.

During the summer months an extensive program of work was undertaken for the playgrounds department, the most notable of the permanent work being the construction of new lavatories, concrete wading pool and concrete tennis courts at Thames Park and cinder tennis courts at Queen's Park. New equipment was erected and grading and minor construction work was done at all of the nine playgrounds.

Secretary's department.—As some adjustments in the stock accounts are yet to be made and the audit of the books and accounts of the department have not been completed, it is impossible to give an accurate statement of the past year's operation.

Increase Number of Consumers.—Electrical department.—The number of consumers has increased from 14,878 to 16,259, an average of 106 a month. The gross receipts from the consumers for light and power for the past 13 months amounted to \$565,526.19. In the wiring and job department the receipts amounted to \$101,129.41. The total receipts in the hydro shop, including cash sales, charge to order sales and repairs were \$290,102.91.

Electrical department.—The total disbursements of the electrical department through vouchers and pay sheets was \$1,094,836.59.

Waterworks department.—The cash receipts in this department, not including proceeds of debenture issue, total \$244,178.62 as follows: Receipts from water rates \$215,640.69 Receipts from service extensions 9,146.65 Receipts from job department 19,385.28 The disbursements as per vouchers and paysheets amounted to \$356,795.18.

Wire Old Houses.—Wiring of old houses on the installment plan brought considerable new business with 218 houses wired. This was mainly the result of a special campaign last June and July. The revenue derived from this source amounts to about \$3,300 per annum.

New business.—The maximum bill to the Hydro-Electric Power Commission for power was based on the peak load established on December 16, 1921, of 14,750 h.p., an increase of 3,504 h.p. This large increase is due in a great measure to the number of stoves, heaters, appliances and the increased candle power that consumers are now using and also accounted for by the absence of restrictions in the use of power.

Manager King States Next Move Is Up To Men

SEEMINGLY the next move toward a settlement in the local street railway situation, which rapidly approaches a crisis, must be by the men.

C. B. King, manager of the railway company, stated Friday that there is no intention on the part of the company's officials to deviate from their original decision. "The three cent reduction will go into effect as scheduled," he said. "If the men see fit to seek the services of a board of conciliation they are free to do so," was the tenor of Manager King's remarks.

Town Topics.

A THOUGHT FOR TODAY

"That ye may know the way by which ye must go: for ye have not passed this way hitherto."—Joshua 3:4.

MAKE no more giants, God.

But elevate the race at once! We ask

To put forth all our strength, our human strength.

All starting fairly, all equipped alike.

Gifted alike, all eagle-eyed.

True-hearted—See if we cannot beat the angels yet!

—Robert Browning.

MONDAY'S DOINGS.

MONDAY.—Annual meeting of City Gas Company at the company's office, 2 o'clock.

Regular meeting of Canadian Labor Party will be held at Labor Temple, 8 o'clock.

City Council meets at City Hall, 7:45 o'clock.

Advisory Vocational Committee meets at Technical School, 8 o'clock.

SUNDAY EVENING service at the Centennial Methodist Church, Dundas street, will be conducted by the women of the church. Special music has been provided and will be rendered by a choir, consisting only of women assisted by the Elgar Ladies' Quartet.

ADJUTANT FRED MARTIN, who has just completed fifteen years of service in the Salvation Army, is going to tell something of his experiences during that time, in an address before the Men's Brotherhood of Askin Street Methodist Church Sunday morning.

REV. ARCHIBALD GRAHAM, who has been officiating as chaplain at Westminster Hospital, has received a very urgent call from the congregation of Geneva Presbyterian Church, Chester.

The matter has not yet been placed before either the Bruce Presbytery or that of London. Both bodies must pass upon the call, but Mr. Graham stated on Saturday morning that he himself was favorably inclined toward acceptance.

DR. ALFRED GRANT will take charge of the next public-speaking course to be opened February 11, at the Y. M. C. A. This is the second course in public-speaking to be opened by the "Y" authorities. The first course in public-speaking was a fine success, and encouraged by it, the promoters determined upon a second course. Special endeavors will be made to enroll ex-service men in the course by allowing more lenient terms.

CITY CLERK BAKER addressed the Kiwanis club of Ingersoll on Friday on "Communist Form of Government as it is in Force in Several United States Centers."

Mr. Baker said that back of the movement was a desire for an economical form of government. He cited the forms in Galveston, Des Moines and Dayton and gave the troubles which beset each in the different centers. Mr. Waite, in Dayton, he said, was an exceptionally good man but he was the only man that could make a success of the Dayton scheme.

Des Moines had trouble. They started with experts but found that they could not always elect experts. The politicians got a hold and the system suffered.

Loads Being Checked.—The connected loads of all commercial lighting and power consumers are being checked over and will show an increase in the demand now charged for.

Sales department.—The turnover during the past year was the largest in the history of the hydro shop, being \$278,173.91, an increase of \$67,000 over the preceding year.

Wells.—The new Nelson street well was placed in operation in 1921, with an average daily yield since March of 400,000 gallons. The new well at Broadhead is in place for temporary use, if needed.

Many tests have been made during the past few months by the Ohio well diggers and a report is to be submitted in a day or so. It is believed that sufficient water to supply London for many years to come has been located.

PROVIDES LIGHT LABOR AT MIDDLESEX JAIL

Once upon a time, not so many years ago, magistrates and judges sentenced prisoners to a term in jail "with hard labor." However, as far as the Middlesex jail is concerned, the "hard labor" part is now null and void. Governor Byron Dawson has a hard time finding work for all the prisoners.

"A few years ago prisoners were kept busy sawing wood all winter," said the governor on Saturday morning. "We haven't got any big wood pile any more since the steam boilers were installed, and it is pretty hard to find work for all the prisoners."

England is the third largest user of chewing gum.

SNOW RETURNS TO HIDE WORK OF YOUNGSTERS

Dignified Londoners, Stepping
On Concealed Slides, Bless
the Joys of Childhood.

WINTER SPORTS RESUMED

When there is about six inches of very wet snow on the city streets, and mere man is bawling the fate of shiny brown brogues, a dim glimmering is seen of the why and wherefore of the numerous gales which engulf and encompass the flapper's feet. The snow has fallen thick and fast during the past twenty-four hours, but the unfortunate part of it is that it fell thick and fast too soon—that is—before the sidewalks were quite cleared of the ice which formed just after the late thaw.

Now the small boys' slides reveal themselves, in the most unexpected places, and just where the unlucky pedestrian least expects them. As a consequence many peaceful law-abiding Londoners suddenly find themselves projected headlong and downward as a result of a hidden pitfall, which cleared of its snowy covering is merely an innocent slide.

A very staid member of The Advertiser editorial staff was one of the hardest "sitters." He has it to his credit that he can smash a \$15 pair of specks through the toughest kind of case.

London is at last seeing some signs of the hard weather which all the sages threatened this winter.

All indications of winter sports are greatly in evidence. Skates, snow shoes and sleighs. Several hilarious bobbing parties have been seen wending their somewhat noisy way through the city streets. London is prepared to enjoy to the fullest a taste of real old-fashioned winter weather.

However, all is not gold that glitters in the early morning light, as the unfortunate householder realizes in his dismay, when he leaves his snug retreat and gazes upon the piles of snow glittering on his front doorstep.

Snow, snow, oh, yes, beautiful snow! But why, oh, why, must it fall on the doorstep?

WILL GIVE SECOND OF EXTENSION LECTURES

The second of the February series of university extension lectures will be given next Thursday evening in the public library by Dr. Caroline Shanks, who will deal with the life and work of the apostle St. Joseph. Admission to all these Thursday evening lectures in the library is free to the public.

Obituaries

MRS. K. O'ROURKE.

The death took place in St. Joseph's Hospital Thursday evening of Mrs. Katherine O'Rourke, of 24 Thornton avenue. Mrs. O'Rourke had been a resident of London for 50 years. Besides her husband, William O'Rourke, she is survived by one son, Harold, and one daughter, Miss Mary O'Rourke, who is married to Joseph Crumphy of Toronto, and John Crumphy of Chicago, and two sisters, Mrs. William McCue of Chicago and Mrs. E. Hutton of Rochester, New York, also survive.

The funeral will be held Monday from the family residence. Requiem mass will be celebrated at St. Michael's Church at 9 o'clock. The interment will be made at St. Peter's Cemetery.

CHAS. CUNDICK.

The funeral of Charles Cundick took place from his late residence, "The Maples," Oxford street west, Thursday.

The late Mr. Cundick was born in England and came to Canada about 45 years ago when he settled in Warwick township. There he took up farming and upon retiring 12 years ago moved to London.

He is survived by his widow and six children, George of London, Frederick of Forest, Edwin and Bert of Warwick, and Mrs. John Curnoe, Mrs. Richard Curnoe and Mrs. Charles Brock, all of London.

The funeral was of a private nature.

MRS. M. LONGFIELD.

The funeral of Mrs. Mildred Longfield of 406 Tecumseh avenue, who died in St. Joseph's Hospital, Thursday, will be held from the residence of her father, Peter McMillan of Belmont, Sunday afternoon. The services will be conducted at 1:30 o'clock. Interment will be made at St. Thomas.

Mrs. Longfield, who was 24 years old, is survived by her parents, her husband, William Longfield, and one brother, Donald McMillan of the Dental College, Toronto.

Exhibit "A" Causes Anxiety to Curious Throng at Court House

Who is dead at the court house? This was the question that worried a whole lot of people Saturday morning as they passed one of London's most stately buildings. A magnificent hearse, shrouded with new pall and varnish was drawn up in front of the main entrance to the building and when the reporters arrived to "cover" the court a curious crowd had collected in the hope of seeing a casket carried forth.

One individual whispered that he had it on the best of authority that one of the prisoners in the jail had hung himself and they were giving him a quick burial. When asked specifically where he had obtained his information, he stated that "a man" had told him. He didn't know that it was true.

URGE COUNCIL TO ASK DAIRY TESTS

Health Board Members Aim
To Weed Out Tubercular
Cattle.

Monday night C. Mitchell, Dr. Downham and Dr. Tamin, representing the board of health, will wait on the council and ask that the city clerk be instructed to write the federal government applying for the inspection of dairy herds of this district in order to weed out tubercular cattle.

The decision of the board was not unexpected. The proposal to have such tests made with a view to giving the city certified milk, has been to the fore for some time.

If the city's application is granted by the veterinary director-general at Ottawa, it will take two years for the inspection to get well under way. At that time, it is provided in the government regulations, the city may classify its dairies, "raw milk dairies" or "pasteurized milk dairies."

It is also provided that when "reactors" are found in a herd the milk or cream shall not be sold in its raw state except to a firm for pasteurization.

The matter of controlling farmers who do not retail milk in the city, but sell by the wholesale dealer, was mentioned at the meeting. Dr. Tamin said that he had talked this matter over with Inspector McCallum and believed that it was possible to license all farmers.

The question was asked as to whether the inspection would increase the price of milk. Dr. Tamin could see no reason for an increase. While it would insure certified milk to the city, there would be no cost to the farmer. If any of his herd was slaughtered he would be compensated for the loss.

E. R. Seabrook presided at the meeting. Dr. Cunningham was absent through illness.

PRESENT ANNUAL "STUNTS" CONCERT

Church of St. John the Evangelist Organization Provides Entertainment.

The three branches of the G. F. S. of the Church of St. John the Evangelist this week entertained a large audience with their annual "stunts" performance. Under the direction of Miss Price of the Girl Guides many novel and humorous pantomimes and a little playlet were produced, one of the best of which was "The Spanish Tragedy." Miss Joyce Gibberd gave an interesting reading, "Young Lohinvar," read by Rev. A. L. G. Clarke, and acted by members of the G. F. S., was a fine number on the program. "Shadowgraphs" proved a fitting close to an enjoyable evening. The Sunday School Orchestra tendered an appropriate program, the accompanist being Miss Dorothy Davis.

APPOINT QUEBEC COMMISSION. Quebec, Feb. 4.—A commission whose duty it will be to preserve ancient and historical landmarks in the Province of Quebec will be appointed, it has been announced by Hon. Athanasie David, financial secretary.

Mayor Will Open New Hydro Transformer Station

AT 3:30 p.m. Saturday, Mayor J. Cameron Wilson officially opens the city's new hydro-electric transformer station at the corner of Cabell street and Kitchener avenue, East London.

The ceremony will be attended by the members of the Public Utilities Commission, and any of the general public who so desire.

All the equipment in the new plant has been installed by the staff of the local utility company, and it has been declared by competent authorities one of the finest examples of skilled workmanship in America.

The new station is destined to carry a load of 25,000 horsepower and will be the main distributing center for London. At present Londoners use approximately 15,000 horsepower.

WILL CONSIDER EXEMPTIONS ON PIPE LINE ROAD

Court of Revision To Inspect
Property Before Taking
Action.

ALLOW BLANCHARD CLAIM

The court of revision has decided to inspect the property on the Pipe Line road, and will likely grant material exemptions to the owners of property unit for building purposes and which is being taxed for the new pavement laid on the street. The court will likely follow the precedent of the Knollwood Park sewer settlement and recommend to the council that a general reduction in the cost of the ratepayer's share of the pavement be made.

Quite a number of the ratepayers attended the adjourned meeting of the court. Two lawyers, U. A. Buchner and T. J. Murphy, K. C., acted as spokesmen.

The appeal was first made at the regular session of the court on Wednesday, and was strongly backed up on Friday night. In the meantime it comes to light that the eastern end of the pavement a large crack had appeared, following the heaving of the pavement by the frost. The appeals entered against the cost, however, have mostly to do with the west end of the pavement.

The court, following its inspection of several properties during the afternoon recommended that no action be taken in regard to the St. George, Huron street sewer. Thomas Blanchard will get a small exemption on his property. This matter had been before the council and committees for years. Blanchard contends that as a result of the water from a creek running over his property, it is useless.

The appeal against the Ridout street property, where the old blackfriars mill wood, on the grounds that the property was unfit for building purposes, was successful. A charge for a pavement had been made.

ACTION TO GAIN
CONVEYANCE OF
COTTAGE LOST

Chief Justice Meredith Dismisses Claim of Thomas H. Robinson.

Declares Disputed Dwelling Was Not Included in Purchase of Farm.

Holding that an inaccurate description had been given when certain lands had been purchased by Harry Stabler from Thomas H. Robinson, and that a cottage included in the conveyance should not have been included, and was never intended to be included in the purchase price of \$9,000, Chief Justice R. M. Meredith dismissed the action brought by Stabler for the conveyance of the lands, including the cottage. No allowance was made for costs.

The inaccurate description is the whole cause of the litigation," declared the court in giving judgment. "The case presents no difficulties to my mind." The chief justice went on to review the case, declaring that the description of the property had been taken from an old deed, and that the plaintiff ever attempted to read through it and see what he did buy.

Would Have Inquired.—The plaintiff had seen that the cottage on the farm was separate from and fenced off from the rest of the farm, and if he had any doubt that the property was included in the purchase, he surely would have made some inquiries about it. It was unbelievable that the defendant Robinson would try to sell to the plaintiff land he had already sold.

The court allowed the counter-claim of the defence providing for the rectification of the agreement minus the cottage and surrounding land that had been conveyed to Heister and Agnes Alway.

BERNHARDT TO ACT FOR MOVIES.

London, England, Feb. 4.—Sara Bernhardt has accepted an offer of United States moving picture interests to act for a series of photoplays, according to the London Times.

PRESENT PLAY AT ST. PETER'S HALL

"The Merchant of Venice," presented by the De La Salle boys of Toronto drew an audience, Friday night, entirely filled St. Peter's Hall auditorium. All of the principals of the piece are pupils of the De La Salle Catholic High School, Toronto, and belong to the dramatic club of that collegiate.

The play, as presented, was highly commendable, and showed an artistic and dramatic interpretation seldom achieved in amateur essays at true production of Shakespeare.

John K. Boles, cast in the role of Shylock, won the hearty and enthusiastic plaudits of the audience, at numerous instances throughout.

Basanio, played by Gordon D. Matson, and Antonio, played by Kenneth Cawwell, also found favor by their performance of these two premier roles of the play.

The clowning of Launcelot met, too, with a most cordial reception by the audience. In conjunction with the presentation of the drama, the De La Salle orchestra supplied the numbers attending the presentation, as well as other selections, which were well executed.

Fred Watson was in charge of the direction of the production and Frank Miceli headed the orchestra.

At the close of the piece, Rev. M. F. Fallon, bishop of London, in a few remarks, lauded the manner in which the De La Salle boys had given the interpretation.

Salary Arrives, But No Deputy Postmaster To Draw It

WHO will draw the deputy postmaster's salary that has been piling up for the last seven months?

Though there has been no deputy in all that time, each month the government check in payment of salary has continued to arrive.

It arrived last month, the month before, and will, no doubt, come next month, even though there be no one to draw it.

Deputies may come and deputies may go, but, obviously, their salaries go on forever.

Keen competition among the applicants for the vacancy has been noted for some time back. Perhaps the thought that the salary of the position when it is filled will be retroactive has engendered in the breasts of the applicants a much stronger desire for the vacancy.

WOULD SPEED UP BOARD MEETINGS

School Trustees Think Procedure Might Be Simplified.

It has long been reasoned by members of the board of education that meetings of the body could be expedited with greater speed and efficiency. Both W. A. Tanner, secretary of the board, and Trustee Edwin Smith, chairman of the 1922 board have interested themselves in this problem.

Chairman Smith is of the opinion that the present procedure can be simplified in certain directions, one being the manner in which the divers communications to the board are handled.

At each meeting the trustees are usually beset with a batch of communications of minor importance, ranging in everything from an application for assistant janitor to a request for a new high school. It is of the opinion of Chairman Smith as well as the trustees that many questions of small detail can be referred automatically to the respective committees without undue parley.

It is suggested that a special report of these communications be placed at the disposal of the trustees at each meeting in order that they can tell at a glance what they pertain to and so can govern themselves accordingly.

This question will claim attention at the next meeting.

WILL LECTURE ON "STARRY HEAVENS"

Professor Kingston To Speak
at London Astronomical
Society.

Professor H. R. Kingston will be the speaker at the next meeting of the London Astronomical Society, to be held in the Western University building Friday evening, Feb. 10.

"The Starry Heavens" will be the subject of Professor Kingston's lecture. In conjunction with the address, there will be shown, numerous lantern slides to illustrate different phases which will be dealt with by the lecturer.

Throughout the winter months, at intervals, the Astronomical Society has arranged to present a series of lectures, kindred to the one to be delivered by Professor Kingston.

All the topics will be of an educational nature, and will enlarge on the more interesting features of astronomy. Each lecture will be held in a non-technical and popular manner. Lantern slides will illustrate the lecture.

New members of the Astronomical Society are communicating with Professor Kingston or E. T. White.

BELIEVE ARREST IS SOLUTION TO CITY'S MYSTERY

St. Thomas Police Hold Leland Stoner For Alleged Theft of Tires.

DENIES ALL CHARGES

Clue To Recent Aylmer Garage Robbery Now Thought Revealed.

[Special to The Advertiser.]

ST. THOMAS, Feb. 3.—With the arrest of Leland Stoner of 37 Redan street, this city, and Ervye Middleton, also of this city, Friday afternoon, it is believed that the mysterious robbery of Lindsay's garage in Aylmer three weeks ago was solved.

Stoner was arrested in the middle of the afternoon at his home on a charge of stealing tires, and later Middleton was taken as an accomplice. The arrests were made by Detective McCulley and Police Sergeant Ketchum of the local force, accompanied by John E. Lindsay, owner of the Aylmer garage.

Disposed of Tires.

It is alleged that Stoner had disposed of three tires, one to a local garage, and that he had knowledge of four others which had been found in a Curtis street residence. When arrested, Stoner denied all knowledge of stolen tires, and declared that he had sold none.

When Middleton was arrested he stated that Stoner had brought several tires to his place some days ago. Two of the tires were eventually sold and a third had been taken by Stoner and himself to a local garage, where it was put up for sale. Middleton stated that he did not know where the tires were stolen. Acting on information given by Middleton, the police were able to recover two of the tires which had been sold.

"Were Same Kind."

Mr. Lindsay immediately identified the two tires as ones which had been stolen from his garage. He stated that the four which had been recovered on Curtis street were also of the same kind and make as four which had been stolen from him.

The police picked up the trail when Sergeant Ketchum learned that four tires had been stored in a house on Curtis street. Becoming suspicious, he reported the matter, and an investigation was started.

The prisoners will be arraigned Saturday morning.

CHILEAN CABINET RESIGNS. SANTIAGO, Chile, Feb. 3.—The Chilean cabinet, headed by Ismael Tocornal, resigned today.

COULDN'T DO HOUSEWORK, HEART WAS SO BAD

Many women get weak and run down and unable to look after their household duties owing to the heart action becoming impaired or the nervous system unstrung.

Nature intended women to be strong, healthy and happy instead of sick and wretched. But how can a woman be strong and healthy when day in and day out she has to go through the same routine of work, sweeping, dusting, cooking, washing, etc. Is it any wonder that the heart becomes affected and she gets irritable and nervous, has hot flushes, faint and dizzy spells, smothering and sinking spells and can't sleep at night.

To all women whose heart is weak and whose nerves are unstrung we would recommend

MILBURN'S HEART AND NERVE PILLS as the best remedy to tone up the system and strengthen the weakened organs.

Mrs. Daniel Bezanon, Loganville, N. S., writes: "As I was troubled with a weak heart for nearly two years I am writing to tell you what your great remedy, Milburn's Heart and Nerve Pills, has done for me."

My heart was so bad at night I could not sleep, I would take smothering spells, and was so weak I could not do my housework. I tried two doctors, but got no results. A friend advised me to try your pills. I used six boxes and am completely relieved. I think they are the best remedy for heart trouble there is."

Price: 50c a box, at all dealers, or mailed direct on receipt of price by The T. Milburn Company, Limited, Toronto, Ont.—Advt.

When 2 Montreal Firemen Lost Lives!**VIMY APARTMENTS, MONTREAL.**

MONTREAL, Feb. 3.—A preliminary building survey was made today of the ruins of the Vimy and Harvard Apartments, on Sherbrooke street west, Notre Dame de Grace. The accompanying photograph shows the result of the flame-fighters pouring water on the building for 72 hours with the temperature 10 degrees below zero. Caught under a falling wall, followed by an explosion, two firemen perished in the blaze.

Scribe Rescues Squire When Client's Woes Seem Endless

ST. THOMAS, Feb. 3.—Squire Frank Hunt has occupied the magistrate's chair in the county of Elgin for many years, and in that time he has become very wise and exceedingly resourceful.

Friday morning the veteran magistrate was bored, but seemingly he was in a corner from which there was no escape. A woman from the county, obsessed with an idea that her relatives were endeavoring to poison her, poured her tale of woe in the squire's ear, and called on him to arrest them, one and all.

After the apparently endless tale had gone on and on the magistrate's face lighted as an unsuspecting re-

porter stepped within the sanctum. The squire rose, and with a courtly bow, said to the woman, "This is my deputy sheriff. He is the very man for this job of yours. I will leave the case in his hands."

Before the scribe could register a protest the magistrate retreated from the office and softly closed the door.

It required many false promises which the reporter blushed to remember, to placate the woman. When she left for home the squire endeavored to console the ruffled scribe by telling him to collect his account from the county board of audit, which is now in session at the court house.

WANTS \$260,000 FOR NEW SCHOOL

St. Thomas Committee Would Aid Industrial Education Work.

[Special to London Advertiser.]

ST. THOMAS, Feb. 3.—The advisory committee of the local board of education will ask the city council on Tuesday night next to issue debentures for \$260,000 to provide for the erection of an industrial school in this city.

At a meeting of the committee Friday night it was decided that enough time had been spent on discussion that seemingly led to nowhere, and so on the motion of Trustee A. P. Conley, the resolution to ask for the debentures carried unanimously. Trustee Wright expressed the desire for more information before reaching a decision, but Mr. Conley thought that too much time had been spent on getting advice and information, and that too much money had been lost in securing options that were allowed to expire.

If the city council consents to let the matter go before the electors it is probable that the people will be asked to vote on a bylaw in March. It was the desire of the committee to get an early expression on the question so that a start may be made on the school this year.

English bulletproofers are regarded as the best dog fighters.

Perfect specimen of silver fox in Germany costs 100,000 marks.

Starch is the only food that is changed chemically in the mouth.

ADOPT GASOLINE PROPELLED CARS

M. C. R. Officials To Run Trains Out of St. Thomas.

ST. THOMAS, Feb. 3.—Gasoline-propelled cars will be introduced as an experiment on the St. Clair division of the M. C. R. from St. Thomas to Courtwright, in the near future, it was announced here today.

The plan has been under consideration for some time. It was formulated originally two years ago, but for some reason not made public it was abandoned at that time.

The cars, it is said, are an invention of Henry Ford, and they were used successfully on a short line in the United States. According to the plan the baggage car will supply the propelling power, and to it will be attached cars capable of seating 60 to 70 people.

A two-train-a-day schedule will be maintained at first, each train making a return trip, therefore establishing a much more efficient service than at the present time.

SAWS SMUGGLED INTO DEATH CELL

NEW YORK, Feb. 3.—Concealed in the soles of a pair of patent leather shoes, two steel saws were smuggled into Tombs Prison last night to Luther Boddy, negro, who has been sentenced to die in the electric chair for the murder of Police Detective Buckley and Miller, Jan. 5.

Boddy was sentenced today by Justice Vassar Vogel to die in the chair at Sing Sing Prison during the week commencing March 12.

Warden J. J. Hanley of Tombs Prison told in court before sentence was pronounced that the saws had been discovered in the negro's cell. The shoes were brought to the Tombs by a woman said to be Boddy's sister, who asked that he wear them during the trip to Sing Sing. Boddy ripped open the shoes, hid the saws in a hollow he dug in the wall with a spoon, and handed the shoes to a man in a neighboring cell. Boddy's fellow-prisoner promptly turned the shoes over to the warden, and a search of the cell revealed the saws.

REPORT DELORME ASSASSIN KNOWN

MONTREAL, Feb. 3.—"The assassin who killed Raoul Delorme is known to the police, and his arrest may be made in a few hours," says La Patrie this afternoon.

"Sensational" developments will take place within a short while," the newspaper says, "revelations which will bring about the immediate arrest of the murder. The detectives have placed their hands on a document of supreme importance, and, when its nature becomes known, it will precipitate a crisis and tell to the world the name of the assassin. This document will be the epilogue to the tragedy."

CALL MINERS' STRIKE. PRAGUE, Czechoslovakia, Feb. 3.—A general strike of miners throughout Czechoslovakia was called today.

For The Fourteenth Consecutive Year**The Huron & Erie Reports—****"No Real Estate on Hand!"**

This strong, old Mortgage Loaning Corporation—Chartered by the Government in 1864—does not own, nor does it hold any buildings or lands whatsoever, other than those purchased for Branch Office purposes.

Mother! Your Sick Child is Bilious, Constipated.

**Give "California Fig Syrup"**

Harmless Laxative for Your Child's Liver and Bowels

Hurry mother! A teaspoonful of "California Fig Syrup" today may prevent a sick child tomorrow. If your child is constipated, bilious, feverish, fretful, has cold, colic or if stomach is sour, tongue coated, remember a good "physic-

laxative" is often all that is necessary.

Children love the "fruity" taste of genuine "California Fig Syrup" which has directions for babies and children printed on bottle. Say "California" or you may get an imitation.

Another Reformer.

LONDON, ENGLAND, has a new reformer—this time a woman who has started a war on nursery rhymes.

She says it is a crime to teach children that a cat can play a fiddle.

And no doubt she would lead us to believe that Jack and Jill never made that famous trip up the hill after a bucket of water.

Then would go that classic about Humpty Dumpty sitting on a wall, and after he had been cleaned out the next to be tackled would be Jack and the Bean Stalk, and then would go Old Mother Hubbard.

Likewise the old woman who lived in a shoe would be told that she and her shoe and all the little shoe dwellers would have to get out.

Following that deportation no doubt attention would be turned to the cow that jumped over the moon. Now we know the cow did jump over the moon because the picture books used to show her in the act.

This latest reformer better try out something more pressing. Let the child mind have its few short days of fanciful events from wonderland; let them know the fairies and the funny little nymphs when all these things are possible.

Soon enough they get pulled into the sordid and monotonous things of this much-regulated and reformed world of ours.

Taking away childish fancies and childish heroes is, at least, only the first of some over-zealous person who seeks to blot out a bit of sunshine and heaven itself, in the place of which nothing can be substituted.

Forgiveness.

WRITING TO this paper, a London citizen makes the claim that many of the churches, in their annual reports, are stressing finances, and salaries, and extensions to such an extent that one hears or gathers very little about the advancement being made along the lines for which the church really exists, viz., the furtherance of the kingdom of God among men.

The writer of the letter states his effort is not for publication, but he makes it certain that he has a grasp of the situation.

The church exists, as he says, for the extension of the kingdom of God on earth. If that premise be wrong, then we have entirely misjudged the work and purpose of the church.

It is also noteworthy that many of the greatest ingatherings come from the smaller and more humble of the churches, showing that a great organization and great wealth is not essential to the work of the kingdom.

There are many churches that seek at times to find out why they are not getting the results they desire. It is often noticed that they begin to singing the psalms; they then turn to the choir and the organist, and all and sundry on the salary list.

These investigators in 99 cases out of 100 would do better to start right at home.

There are churches where some members are not on speaking terms with other members. There are churches that have split in years gone past on some item not worthy of the trouble, and gloriously unworthy of the cause of the kingdom.

And yet these churches, with these living sore spots and wounds, expect to get results.

No results will ever come in such an atmosphere, and it has been proved to be the case times without number.

Let all these people, irrespective of their feelings, come together on the common ground of a great desire to see men and women brought into the kingdom and they will not be kept waiting very long.

And, if in the church, why not outside? There are people in London who have not spoken to each other in years. We mention London because it is right at home, but the name of any other place might just as well be placed in there.

There are men who pass each other on the street as though the other chap did not exist. There are women who pass other women in the same way.

Some injury, real or supposed, has been done years ago, and it has been nursed and ailed, and like any other weed has grown so big that it is choking out the sunshine.

So there they are, the men and women in the church, and the men and women in the world—missing the greatest blessings that could come—resisting all the pleasure that love can bestow, standing in their own light.

And all the while the way to better and higher and more wonderful things lies straight before them all.

Kissing At Stations.

IN CHICAGO the railroad people say there is so much long-drawn-out good-bye and kissing business at the station that the trains can't get away on time.

And so the railroads have issued an order that these last-minute

struggles must be done in advance of train time. The effect of it all is very nerve-racking to the train crew.

The engineer looks out to see some dainty little miss getting squeezed all out of shape in the arms of her lover, and a mist comes over his eyes as he thinks how much better he could do the job himself. By the time he has wiped out his eyes and turned back to his job of steering the train straight, the launching time has passed, and the run's off to a bad start.

Still, the railroad company shouldn't get too fresh with these orders. Many a woman would never get a good smack from her husband if she weren't going away for a spell.

The Large Way.

IT IS TOO late to say, with some amiable enthusiasts, that the Washington conference is the "greatest event since the beginning of the Christian era." There are still lions in its way.

What remains to be done, or attempted, at Washington may be, in its long effect, whether by success or by failure, more fateful than anything yet achieved.

The most intractable and dangerous problems of the Far East are still unsolved.

Final judgment on the work of the conference cannot be pronounced until we know whether secure guarantees are to be given to China, and whether commerce in the Orient is to be a prize equally open to all contenders. What has been decided, or left undecided in Siberia we already know, and that is not encouraging for the hopes cherished regarding adjacent regions.

With all necessary reservations made as to these matters, however, there ought to be an ungrudging and generous recognition of the results attained. The spirit of the conference has been admirable.

The labor of the delegates has been indefatigable. From a field deliberately limited, the fruits garnered have been such as to make glad the hearts of humane men everywhere.

In measuring these things, narrow fault-finding would be glaringly out of place. The sound impulse of all who have striven for world agreements of peace is to accept with rejoicing this large installment of their hopes, and bide their time confidently for the rest to come. And their appreciation and applause will be all the warmer on account of the general conviction that the Washington conference leads straight to an association of all nations.

LITTLE 'TISERS

Conservatives want to start a daily paper in Brockville. It doesn't cost much to want to, but the money starts to fly when it passes that stage.

The Farmer government at Toronto is to bring in "blue sky" laws. Now, then, when they're at it, why not have a couple of acts on blue milk?

A New York man told a judge he had married his second wife as a joke. They are surely showing a highly-developed sense of humor in that country.

The Toronto Globe carries a little story to the effect that "Toronto is Living Up To Its Title of 'Good.'" Our joke column being full for the day, we're not reproducing it.

A number of newspapers are expressing their surprise at the defeat of the hydro radial bylaw in certain parts of the Niagara district in a way that leads one to suspect that the farmers who voted against the scheme should be shot at sunrise.

Representatives of the Associated Boards of Trade waited on the government at Toronto, and asked for

DON'T BOTHER US NOW; WE'RE TOO BUSY.

"the taxation of all publicly-owned utilities, which are in competition with privately-owned concerns." It is well that this point should be brought up again, because it has been the habit of too many places to fool the ratepayers this way. Running a public utility and not charging it with its share of taxes is a glaring piece of municipal nonsense.

Liberals of West Lambton are going about the appointing of delegates to the Toronto convention in the right way. A convention is called for Sarnia on Saturday, February 11, at 1:30, and at that gathering the delegates will be named. The convention is to be an open one, and Liberals of that riding are all welcome. When a delegate is appointed in this way he feels that he has the backing and sanction of a real organization. The same plan should be followed generally.

TO THE EDITOR

THE FARMERS' CASE.

To the Editor of London Advertiser: Dear Sir,—The "Advertiser" is doing a great work for our national welfare in its "get acquainted" propaganda among city and country people.

Your editorial in Tuesday's issue headed "Farm and City" contains a dozen very useful and practical hints, and I notice nearly every one champions the farmers' side of the case. I am glad to see that even the daily press is beginning to acknowledge that the farmer has had many grievances in the past.

The farmers were the last to "unite" and they were forced to do so solely to get justice and remain free men. When they went to Ottawa some three years ago with their grievances and had the doors of parliament slammed in their faces, it was the best thing that ever happened to them and the country.

If they had been an ignorant, easily provoked class, they would have gone at those doors with a battering-ram. But they were wise enough to know that in such cases it never accomplished any lasting good. They quietly returned to their homes, not discouraged, only more determined that those doors would soon open and close at their sweet will and no power, however strong and insolent, could hinder them, and they are in parliament today, not only to maintain their rights, but the rights of every class and every citizen.

This is briefly the history of the Agrarian movement from obscurity and bondage to freedom and place in the sun which is their inalienable right.

EDGAR M. ZAVITZ.

FATHER'S CONTRIBUTION.

[Pittsburg Chronicle.]

It was a missionary sermon and a little girl who had accompanied her father seemed restless. When she reached home she asked her mother whether the natives of Africa wore any clothes. "No," replied her mother. "Then," retorted the obedient young lady, "what was the use of that button father put in the collection basket?"

COMMON SENSE WAYS TO KEEP WELL

Watch Eye Disorders—Avoid Trachoma

BY DR. R. H. BISHOP.

Reading of fam- N conditions in the Near East and in Russia, we also read of trachoma, dread eye disease. Trachoma is a contagious disease of the eyelids. The watery discharge is capable of producing the disease in the eyes of those who are well.

Trachoma is similar to and in fact may be just what we formerly called granular eyelids.

Trachoma presents a problem more largely economic than perhaps any other in the whole field of preventive medicine. No one dies of the disease. Half of those who have it are even-

READ YOUR CHARACTER

[By Digby Phillips.]

NO. 116—RED HAIR.

For centuries the red-haired ones have been "getting away with it." People have been very considerate of them, very chary of crossing them, very deferential toward their tempers. But character reading as a science now steps forward to call the unconscious "bluff" of red hair. This is one of the cases where the popular impression is quite far from the scientific fact in character reading.

You needn't be afraid of the red-head's temper just because he or she is red-headed. Red hair does not denote extreme fiery temper, the exaggerated active, practical, creative, enthusiastic, impatient, irascible disposition.

As a matter of fact, red hair, while it shows a slight inclination toward these things, stands almost midway in the range of the characteristics by which we balance the active against the passive, the impatient against the patient, aggressiveness against caution.

And if your red-haired subject has brown eyes instead of grey or blue, you can make up your mind that the inclination is in the other direction, for not only does red hair stand about midway in the list, but eyes always count for more than hair in balancing character tendencies.

In general, the red-haired ones are only moderately positive, active, versatile, aggressive, combative, energetic and impulsive.

THE JEST.

BLESSING IN DISGUISE. Mr. Headley rubbed his hands gleefully. "Mr. Heape!" he called.

Mr. Heape, his assistant, came in from the next room. "Heape," cried old Headley, "that fool of an office boy of ours has fallen in love with my pretty secretary."

"I'm sorry, sir; what shall I do? Fire the boy?" yelled Headley. "Never! I hope he remains true to her. For the first time since he's been here he's always handy when we want him."—Pittsburg Chronicle-Telegraph.

ANSWERED.

She wore an expensive fur coat flung wide to reveal an expensive gown and many expensive jewels. She had a proud and haughty face and a distinctly condescending air. She was approached by a modest-looking salesgirl in the shoe department of a busy store.

"I want a pair of shoes for my maid," she said crisply. "What are your prices?"

The girl gave a range of prices, beginning with \$5 and mounting upward.

"Oh, no," said the woman. "I don't want such expensive shoes. They're just for my maid. I want something cheap—something like you wear, my dear."

The girl departed. In a few moments she brought back a neat pair of brown oxfords.

"These are the shoes I wear, madam," she said. "They cost just \$14.75."

25 YEARS AGO TODAY

Here We Have Items of Local and District Interest, As Recorded in The Advertiser of 1897.

SATURDAY, FEB. 4, 1897.
Weather—Fair.

A lively hockey match was played last night between the Forest City Business College and Medical School teams, resulting in a victory for the F. C. B. C. by a score of 5 to 2.

Following were the players:
Positions. College. F. Ferguson...Goal...Geo. Gibbons A. Alexander...Point...G. Francis H. Kerrigan...Cover Point...H. Peel S. McElroy...Forwards...J. Jowett L. McElroy...Forwards...A. Wright S. Thompson...Forwards...J. Cafferty C. Pigot...Forwards...A. Leys

The annual races of the Goderich Kennel Club took place yesterday. Results:
Free-for-all, large dogs—1, Carlo, Hon. McKay; 2, Prince, John Sproule; 3, Ponto, Norman Baker. Sweepstake, small dogs—1, All-over, John Knuckles; 2, Home Rule, John Duff; 3, Rover, W. Craigis.

Handicap race—1, Watch, Archie Miller; 2, Holt, George Durnan; 3, Dudley, Nat Abbott.

Mr. A. Kains of Byron has been elected second vice-president of the Dominion Ayrshire Breeders' Association, and Mr. W. W. Ballantyne of Stratford a director. The delegates of the Western Fair are Messrs. A. Kains, Byron, and M. Ballantyne, St. Marys.

The annual meeting of the L. O. C. L. of West Middlesex was held in Mount Brydges on Tuesday, delegates being present from Stratford, Adelaide, Metcalfe, Appin, Midland, and Wardsville. The following are the officers for the current year: County master, S. E. Radcliff; deputy county master, John Brown; chaplain, Elijah Lee; recording secretary, Rev. Wm. Johnson; treasurer, Wm. Kincaide; D. of C., Thomas Hopwood; lecturers, Victor Kincaide and Wm. Neil.

The annual meeting of the London Mutual Fire Insurance Company was held yesterday afternoon, at its rooms, Richmond street. Capt. T. E. Robson, the president, had been called away on business, and Mr. Angus Campbell, vice-president, was called to the chair. Mr. D. C. MacDonald, manager, was appointed secretary, and read the report of the board of directors, which was adopted on motion of Angus Campbell, seconded by C. C. Hodgins.

Three directors were elected to fill the place of Messrs. Richard Gibson, Charles C. Hodgins, and Robert McEwen, who had retired. The election resulted in the re-election of Messrs. Richard Gibson, Delaware, and Robert McEwen, Byron. Mr. Charles C. Hodgins, Biddulph, was also nominated for re-election, and Mr. George H. Maurer, Toronto, for his first term of office. A vote of thanks was tendered Chairman Campbell at the close of the meeting.

Among those present were:

Messrs. James W. Cameron, Stratford; John Geary, London; Richard Gibson, Delaware; Charles C. Hodgins, Biddulph; Richard Gough, London; Richard Vining, Delaware; Angus Campbell, Appin; D. Weismiller, Hensall; Thomas Brown, London; Arthur Laverton, Zone; George A. Taylor, Zone; A. R. McGinnis, London; Sheriff Brown, St. Thomas; John Overell, London; John Morgan, Kerwood; F. E. Fenby, Cairo; S. F. White, Chatham; M. L. Black, St. Thomas; Wm. Moore, London; Gilbert Roche, St. Thomas; Daniel Black, London; George C. Elliott, Appin; G. H. Maurer, Toronto; J. H. Flood, A. D. Platt, Thomas Woolley, J. McWhinney, C. G. Halliwell, James Dobbin, F. Marshall and Peter Toll, London; D. McMillan and D. McKenzie, Hyde Park; Adam Schneider, Bonheur.

The Liberals of Stratford met at their rooms Tuesday night and re-organized. The following officers and committees were elected: President, Mr. John Brown; vice-president, Mr. G. O'Flaherty; secretary, Mr. Edward Kay; committees, F. Donald, McLennan; Avon Ward, Messrs. Robert Gourlay and John Duggan; Hamlet Ward, Messrs. R. T. Harding and Ald. Thomas Ballantyne; Shakespeare Ward, Messrs.

R. Gray, P. Durst, M. McLaughlin, J. R. McDonald and Joseph Blacklock; Romeo Ward, Messrs. T. S. Tobin, T. W. Steinhoff, M. F. Goodwin, Peter Bowman, W. A. Moore.

2 Specialists Recommend D. D. D. for Your Eczema

Dr. E. B. Holmes, the well-known skin specialist, writes: "I am convinced that the D. D. D. Prescription is as much a specific for Eczema as quinine for malaria."

And Dr. W. L. Randall corroborates: "The treatment of skin diseases (Eczema) and diseases of the scalp is known to be difficult. However, there is one remedy that is entirely dependable in this distressing and troublesome disease, that is D. D. D."

What is D. D. D.? A thoroughly scientific prescription, or it would not have the endorsement of these two authorities behind it. A cooling, healing wash—it penetrates the pores as soon as it is applied, and gives instant relief from the most intense suffering.

Our Guarantee We feel that in found the Remedy for skin diseases, and we stand back of this prescription with our iron-clad guarantee. If you are troubled with any kind of skin affection—a mild case, a hard stubborn one—it does not matter which—secure from us a bottle of D. D. D. and if it does not convince you that this is the real remedy—YOUR REAL REMEDY—we will refund your money immediately. Stop that itch today. Price \$1 a bottle. Try D. D. D. Soap, too.

Strong's Drug Store, Standard Drug Company, Limited, Taylor's Drug Store, Anderson & Nettles Drug Store, London. If you cannot come conveniently to our store, write to the D. D. D. Co., Dept. 46, 27 Lyall avenue, Toronto, and they will send you free trial bottle for 10c, which merely pays postage and packing.

It is used like this—"He complained that all his money."

LEARN A WORD EVERY DAY

TODAY'S word is DESPOLIL.

It is pronounced—de-spoil, with the accent on the last syllable. It means—to plunder, to rob, to pillage, to take away one's belongings.

It comes from Latin—"despoliare," to rob.

Companion words—despoliation, despolier.

It is used like this—"He complained that all his money."

SORES SPREAD ALL OVER FACES AND BODIES

Mrs. Howard Houlette, Waskatenau, Sask., writes: "I wish to tell you of the benefit we have received by using your valuable medicine Burdock Blood Bitters."

"My children started to break out on their faces in small white pimples which kept getting larger each day. Pus would form under the scales, and they would come off, and each time the sores would be larger; some were as large as a twenty-five cent piece, and would spread all over their bodies. I was nearly in despair and sent to the village for a bottle of good blood medicine. The druggist sent me a bottle of Burdock Blood Bitters, which I commenced giving them at once.

"In about ten days I saw an improvement and they grew steadily better each day, and in one month the sores had all disappeared."

All blood and skin diseases are caused by bad blood, and to get it pure and keep it pure you must remove every trace of the impure and morbid matter from the system by a blood-cleansing medicine such as

BURDOCK BLOOD BITTERS, a remedy that has been on the market for the past forty-five years, and one without an equal for all diseases and disorders of the blood.

Manufactured only by The T. Milburn Company, Limited, Toronto, Ont.—Advt.

Wood, Gundy & Company

Government, Municipal and Corporation Bonds

36 King Street West Toronto

November 2nd, 1921.

Canadian Daily Newspaper Association, Toronto, Ont.

Dear Sirs:

Daily newspaper advertising has played an important part in our general business.

In an experience extending over more than sixteen years we have found that such advertising accomplishes a threefold purpose:

It brings directly traceable results from investors, thereby increasing our business.

It favourably introduces our name and serves as an introductory support to our salesmen.

It serves the larger purpose of educating investors to a keener appreciation of bonds as an investment, which benefits the bond business as a whole.

Our newspaper advertising appropriation has each year increased with the growth of our business.

Yours very truly,

Wood, Gundy & Co.

The Victory Loan campaigns taught many financial houses the value of Daily Newspaper advertising, but Messrs. Wood, Gundy & Company, from the first day they started in business, have been liberal users of the Daily Newspapers of Canada in reaching the position they are now conceded among dealers in Government and Municipal Bonds. Such firms as these can decide with accuracy when advertising should be diminished, when increased, to maintain its true proportion in the business budget

Issued by The Canadian Daily Newspapers Association, Head Office, Toronto.

The PLAYHOUSE and the MOVIE THEATRE

EDITED BY CABR.

Five-Act Vaudeville Bill Meets Approval of London Playgoers

Grand Theatre Will Continue New Policy Next Week
—Popular Players of Majestic Under New Management.

So popular has been this week's policy at the Grand Theatre offering five vaudeville acts, as well as an exceptional feature picture, the regular comedy film and all the rest of the pictorial films which go to make up a good evening's program, that it will be continued next week. The Grand Theatre has been crowded to the doors for this week's big vaudeville picture program, showing that such a bill is what the people of London want.

Next week the vaudeville includes musical, dancing and comedy skits of high merit, clever numbers by a trick violinist, and a comedy magician. The first half of the week Elaine Hammerstein will be seen in one of her best releases, "Remorseless Love," while for the last three days of the week a new picture star, Marie Prevost, will be shown in a delightful drama, "A Parisian Scandal."

One of the finest offerings of the season is the comedy which is showing at the Grand Theatre today, "The Great Broxopp," with the English-New York company and starring Ida Payne, the well-known actor and play manager.

The Popular Players at the Majestic Theatre, now under a new management, will offer "The Minister's Sweetheart," at that theatre all next week.

FIVE ACTS VAUDEVILLE AT GRAND.

Following the engagement of "The

Great Broxopp," which comes to a close with tonight's performance, the Grand Theatre will on Monday return to the policy that proved so successful the first four days of this week—five big acts of vaudeville and two feature pictures. Elaine Hammerstein, one of the best-dressed stars in screendom, who has thousands of admirers among London theatre-goers, is featured in "Remorseless Love" for the first half of the week. This is a particularly thrilling film with a big heart punch. It presents Elaine Hammerstein at her best, and she is supported with her high-class company. The laugh film will be provided by Buster Keaton, who this time has taken as his fun-making vehicle a haunted house. Buster's adventures with the ghosts furnish a succession of the funniest sort of thrills, and the picture compares most favorably with the best of his previous offerings.

The Three Morgan Sisters, in a distinctive musical revue, head the vaudeville attractions for the first half of the week. They come to London direct from Palace Theatre, New York, where they have pleased thousands of the most discriminating of vaudeville fans.

The Two Slickers have a comedy skit, "The New Fireman"; Romanelli, trick violinist, is an old-timer on the vaudeville stage, and wherever he has appeared this season has made a great hit with his audiences. He plays classic and light music with

Stars Showing in Stage and Filmland Next Week

Marie Nyblom, who stars in the comedy "The Great Broxopp," at the Grand Theatre Saturday.

Charlie Chaplin, who will be seen at the Grand Theatre, the latter half of next week in "The Bank."

A scene from "Remorseless Love," the latest Elaine Hammerstein film, to be shown at the Grand Theatre.

A scene from "A Parisian Scandal," in which the new screen star, bewitching Marie Prevost, makes her debut at the Grand Theatre next week.

equal facility and with all sorts of trick stunts which cannot be duplicated by others. The Alberts, Nat and Flo, are a high-class singing and dancing team, with a bright, snappy vehicle, while the Great Gault, a comedy magician, who presents twenty minutes of mirth and mystery, completes a fine bill.

NEW PICTURE STAR AT GRAND.
Bewitching Marie Prevost, the beach queen of the Mack Sennett bathing girl comedies, is now a star in her own right, and on Thursday and for the last half of the week, the Grand Theatre will show the first of the releases in which she is starred. "A Parisian Scandal" is the name of this picture, and it tells the story of

Many will probably be interested to know that the Majestic Theatre is now under new management. Next week the Popular Players are presenting "The Minister's Sweetheart," a rural comedy drama in four acts. This is a play which both grownups and children will love. Gertrude Gustin, Richey Secrest,

Theatre Directory

AT THE GRAND.

TODAY—"The Great Broxopp," a comedy.

MON., TUES., WED.—Elaine Hammerstein in "Remorseless Love." Buster Keaton in "The Haunted House," five acts vaudeville.

THURS., FRI., SAT.—Marie Prevost in "A Parisian Scandal." Charlie Chaplin in "The Bank," five acts vaudeville.

AT THE MAJESTIC.

TODAY—"The Girl He Couldn't Buy," presented by the Popular Players.

ALL NEXT WEEK—"The Minister's Sweetheart," presented by the Popular Players.

Elizabeth Fox, Rose Macdonald, William Malone and Duncan Penwarden will all have important parts. This is the play that Rose Melville, who starred for years in "The Hopkins," chose as her next starring vehicle. The management requests suggestions from their patrons as to what plays they would like to see in the near future. The Popular Players are presenting a new play each week. And each week the Players are so much the better. "The Minister's Sweetheart" of next week is proving no exception to the rule.

PARKS BOARD CHOOSES WESTBROOK CHAIRMAN

EXETER WILL CARRY ONE-GOAL LEAD TO INGERSOLL FOR FINAL

HOLLAND KEPT MARGIN DOWN
Ingersoll Lead First Period 1-0.

COMBINATION FEATURE

[Special to London Advertiser.]
EXETER, Feb. 3.—The Exeter-Zurich intermediate O. H. A. team will have a one-goal lead to work on when they play the final home and home game against Ingersoll in the second round of the O. H. A. series Monday night. They got this here tonight when they took the visitors into camp and came out on the big side of a 6 to 5 score.

The largest crowd that ever witnessed a hockey game in this town turned out, and a good game was dished up by both teams. It was clean throughout.

Both teams played plenty of combination, the locals probably a little more, and this made them victorious. McKinnon and Siebert played the best game this season. They peppered Holland continually in the last period, and only his smart work saved the visitors from getting a worse beating.

Holland was laid out just after the start of the game. Hindmarsh, the local defence man, rushed him, and the puck hit him on the nose.

The first period ended with the visitors in the lead by one goal. McKinnon tied the score for the locals at the opening of the second session, and when the period ended the count stood 3 to 1 in favor of the locals. Waite tied it up again at five minutes of the last period, and with but two minutes left Siebert sent a speedy waist-line at Holland, who didn't have a chance to stop it.

The teams:
Ingersoll.....Goal.....Cook
Holland.....Def.....Hindmarsh
Crossed.....Def.....Clay, Hoffman

Granites.....5 2 0 3
Mahan.....4 2 29 24
Varsity.....4 2 22 23
Kitchener.....1 5 17 22
Argos.....1 5 21 44

TORONTO, Feb. 3.—Granites, in a well-played senior O. H. A. game, defeated Varsity tonight before a capacity house by a score of 4 to 2. Play was close, Varsity having several chances to score, but failing down in the crucial moment. Granites led at the conclusion of the first period by 2 to 1, but Varsity managed to equalize the count in the second period. Granites had the edge in the final period, scoring three times. Collett, in goal, played a stellar game. Fox and Watson turned in their regular good games. Wright appeared best for the losers.

WINGHAM AND HARRISTON HIGHS PLAY 3-3 TIE
HARRISTON, Feb. 3.—The Wingham high school hockey team played a game against the local high school here tonight, resulting in a tie score, 3-3. Graham Hasty refereed the game, and made the boys play clean hockey.

The line-ups:
Harrison.....Goal.....Wingham
Davidson.....Goal.....Donaldson
Dale.....Defence.....McLean
Burrows.....Defence.....Brackenberry

CANCEL RIFLE SHOOTING.
There will be no indoor rifle shooting at the armories next week, owing to the building being used for the automobile show.

RHEUMATISM vs. T.R.C.'s
Lumbago, Neuritis, Sciatica

Rheumatism and similar troubles invariably yield to this T.R.C.'s (Templeton's Rheumatic Capsules) treatment. Many doctors and many hundreds of druggists from coast to coast will confirm this truth. The hundreds of testimonial letters in our files show that T.R.C.'s have successfully treated Rheumatism, Lumbago, Neuritis, Sciatica and acute Neuritis of all kinds. But the best evidence is your own experience. If you suffer we want you to try this guaranteed non-injurious remedy at our expense. Druggists sell T.R.C.'s \$1.00 per box. For free trial write T.R.C. Co., 56 Colborne St., Toronto.

London Curlers Say Their Prayers To the Weatherman Until February 7

GALT LOSES FIRST POSTPONE TANKARD TO KITCHENER 7-1

Champions Were Completely Outclassed by Winners.

KITCHENER, Feb. 3.—Kitchener intermediates will go to Galt on Tuesday night with a six-goal lead tucked away, outclassing the Galt crew here tonight, and trimming them by the score of 7 to 1. Both teams traveled at a fast clip throughout, with Galt showing their best in the first period. Kargies counted for Kitchener after three minutes of play, and Oliver tallied for Galt in another three minutes. Thereafter Kitchener was never in danger, playing an aggressive game and exhibiting some fine combination work, while their defence was practically impregnable. The locals' persistent back checking also broke up many of the visitors' get-aways. Kargies counted again for the Brampton, Belleville, Hamilton Thistles, Thornhill, Owen Sound, Galt and Collingwood are still in the running.

Kargies again started things in the second period with a marker, and Schell chalked up with the sixth goal. After fifteen seconds of the third period Schell scored after making a beautiful pick-up when Kargies was stopped by the Galt defence. Kargies was the brilliant star of the night, putting up a sensational game throughout.

CASSELS TO HEAD DOMINION GOLFERS

Only Small Attendance at Annual Meeting in Toronto.

TORONTO, Feb. 3.—Owing to the great distances some delegates were obliged to travel only a portion of the 108 clubs of the Royal Canadian Golf Association were represented at the annual meeting held tonight. The gathering could scarcely be said to be fully representative of Canadian golf, and for that reason some of the delegates were not finally disposed of, but were left to the executive committee for further deliberation.

The matter of following the rules of the Royal and Ancient Golf Club of St. Andrews, which was one of the matters left in abeyance.

The championships for the season of 1922 were awarded as follows:
National Amateur—Hamilton Golf Club.
National Open—A Montreal club, to be named by the executive committee.
R. H. C. of the United States Golf Association was elected president, and B. L. Anderson of Toronto re-elected secretary-treasurer. The proper officers will be appointed by the executive committee.

The latter is composed of the president and Messrs. Gillespie, Calgary; Wilson, Winnipeg; Major Wilson, Hamilton; Soper, Ottawa; Turpin and Pease, Montreal.

COLORADO FIGHTER HELD FOR DEATH OF OPPONENT
Philadelphia, Pa., Feb. 3.—Edward ("Burrhead") Boyer, a colored boxer, was held without bail today to await the action of the coroner on a charge of manslaughter growing out of the death of Alphonse Hewlett, also colored, fighting under the name of Sailor Miller. Hewlett fell unconscious in the final round of his fight with Boyer last night and died shortly afterwards.

The seconds of both men and George Rogers, a colored interne at a local hospital, who was said to have examined Hewlett before the fight, were held in \$500 bail each as material witnesses.

PROVIDE 3 GOOD CAGE GAMES IN EAST END HALL

L. C. I. second year girls and Technical School were winners in Class B and Dodgers of Class C in the girls' cage league games at the East End Community Hall last night. The second cage by the score of 16 to 15, but had to go five minutes overtime to do it.

Two girls only had 2 points to spare against St. Angela's. Dodgers only had 1 point lead over the L. C. I. first year girls.

Jack Lightfoot refereed all three games.

Knox Presbyterian, St. Peter's C. A., C. S. S. and Ingersoll, Imps. and McCullum & Ferguson teams will provide the next games on Wednesday evening, starting at 8 o'clock.

STOKE WINS REPLAY.

LONDON, Feb. 3.—In a soccer association replay match yesterday Stoke defeated Northampton 3 to 0.

OUR BOARDING HOUSE.

MY GUN BEARERS DESERTED ME AND LEFT ME WITH ONLY ONE GUN WITH ONE CARTRIDGE INTT, AND THE INFURIATED BEAST CAME BOUNGING TOWARD ME - WHEN I FELT ITS HOT BREATH IN MY FACE I PULLED THE TRIGGER JUST AS IT OPENED ITS MOUTH, AND SNAP WENT ITS JAWS AND BIT THE BULLET IN HALF!

THEN I

OH AUNT! I JES' SAW IT MOVE HIS EARS - HE AINT DEAD YET!

MERCY! HOW THRILLING!

HUSH ALVIN! YOU MUSTN'T INTERRUPT!

GUESS I'LL BE GOING - THIS IS TOO EXCITING FOR ME - MY HEART IS TOO WEAK TO WAIT FOR 'N' BIG SMASH - HE OUGHTA PULL THAT STUFF IN JAIL WHERE NOBODY COULD WALK OUT ON HIM!

Weatherman Had Last Say in Decision.

Weatherman Had Last Say in Decision.

Weatherman Had Last Say in Decision.

TORONTO, Feb. 3.—After poring over the weather map, Secretary Pearcey of the Ontario Curling Association, and the weatherman himself, decided this afternoon upon a further postponement of the tankard finals. It had been decided to call the surviving rinks back to Toronto on Monday afternoon, but the prospects are now so unfavorable that the curlers must await better weather and will be called by telegraph as soon as the conditions warrant their being brought back to this city. Secretary Pearcey notified the clubs by wire tonight and asked to hold themselves in readiness to hurry to Toronto as soon as there is suitable ice upon which to play. The curlers are now in the hands of the weatherman. The curlers are now in the hands of the weatherman. The curlers are now in the hands of the weatherman.

The tankard trophy, tradition has it, was donated by the Royal (Aledonia) Curling Club, a group of curlers from the centre of the stage, so far as patrons of the roarin' game are concerned, for close on to half a century; the first event, however, in the history of the tankard, in 1875. From that year up to the present the trophy has journeyed in a great many different cities, towns and villages. In the average Ontario town or village, where they take their curling as a serious winter's business, an event looms large in the public's fancy. That is the organizing of an impromptu tankard parade, to go to the station and welcome home the curlers. The tankard and the "boys" of the "city" curlers hanging at their belt. The railway schedule always arranges matters that the train arrives after dark, in order that the torchlight procession will be a success. This big event, however, in a great many cases, only happens once in a life-time. Bob-cayton turned the trick once and so did Bowmanville, Port Hope, Brampton, St. Marys, Orillia, Thamesville, Walkerton, Bobcaygeon, Fergus, Dundas, Barrie, and many other places. The tankard for two years; Collingwood two years; Galt three years; Lindsay four years; Hamilton Thistles five years, and the Toronto Granites 12 years.

Won It Three Times.
The Toronto Granites for the years 1909, 1910 and 1911 were the same players, in the same positions and won the trophy three years in a row, a feat which no other club has ever been able to accomplish. Lindsay managed to win the trophy on two successive occasions, 1917 and 1918, while away back in 1875 the Toronto won the Tankard and had no competition in the following year.

CANUCK GOLFERS FORM PRO TEAM
NEW YORK, Feb. 3.—Canadian golf professionals, it was reported here today, are perfecting plans to joint forces with the American professionals to make a keener international competition at the national open golf championship to be held July 11 to 14.

In fact, local golfers announced today, the Canadians are already beginning to execute their coup. It is now planned to get up a team composed of the leading professionals to represent Canada in the championship proper, and also to take part in the international team match, which is looked forward to as one of the outstanding features of the tournament.

C. H. Perkins of the Brantford Golf and Country Club, has already taken steps to get the sanction of the Royal Canadian Golf Association to such a project. Among those who are expected to make up the team are Charles R. Murray, Montreal, former holder of the Canadian open title, Phil Taylor and David Black of Vancouver, Joseph Kirkland of Australia, champion, is also planning to be at the tournament. The three British pairs of cracks—George Duncan and Abe Mitchell, J. H. Taylor and Rodney Herd, and Harry Vardon and James Braid—are also practically certain to arrive in time for the tournament.

CHARGES TORONTO PRESS WITH COVERING REFEREE
KITCHENER, Feb. 3.—The sporting editor of the Daily Record, in an editorial comment on his page here today, makes issue with Toronto sport writers, and charges that they are deliberately smothering criticism emanating from Kitchener regarding the bossism of the O. H. A. from the Toronto standpoint. He declared that the writers have tried to whitewash the referee work of Vair here in the aura Lee game, and have ignored the protests of Kitchener fans regarding the sending of too many Toronto officials to preside over Kitchener fixtures.

Fight Fan Is 101

Fight Fan Is 101

Fight Fan Is 101

MRS. PATRICK J. CONVEY, of Omaha, Nebraska, at the age of 101, claims she is the champion fight fan of the world.

Recently she journeyed to Sioux City, Ia., to see Pat Moore and Young McArthur mix in a flistic encounter.

"Why not?" she queries. "I love fightin' with the fists. I saw the first fight when I was 14 years old. 'Twas in Ireland."

A year ago Mrs. Convey, who has had a doctor but once in her life, underwent an operation. She celebrated the successful outcome by dancing a jig.

ALERTS TO WORK WITH MCCLARYS
Alert senior N. H. L. team will hold a workout in Westminster Rink this afternoon with the same players as the Manufacturers' League in preparation for their game with the Stratford scion in the Classic City Monday evening. The locals bump up against some stiff opposition in the first Northern game, and nothing is going to be overlooked in making use of today's practice.

ST. MARYS SIX MAY PLAY HAMILTON C. A. C. TEAM
St. Marys, leaders of the Holy Name Hockey League, are trying to stage a game with the C. A. C. team of Hamilton. So far no arrangements have been definitely made, but if the weather holds the game will probably be staged shortly. This crew ought to make things interesting for the Hamilton city leaguers.

CANADIAN PACIFIC NEW TOURIST SLEEPERS.
The Canadian Pacific are operating in their Vancouver express, leaving Toronto daily at 10:00 p.m. for Winnipeg, Calgary and Vancouver. Tourist sleepers of latest type.

This is a steel tourist car of newest type, through-out. Interior finished in plain mahogany, seats upholstered in leather. Plumbing represents the latest in sleeping cars, standard sleeping car, water-raising system, arranged to supply both hot and cold water to all wash bowls. Standard dental bowls are installed in smoking room and women's dressing room.

The kitchens are believed to be without equal. They are finished in white enamel, with white tile on top of work table to under side of lockers. The work table is polished Monel metal and the sink white enamel. A refrigerator is provided with sufficient capacity to take care of milk, butter, meats and other perishables; this refrigerator, lined with polished Monel metal, its bottom shelf is provided with a metal tray, specially designed to hold milk bottles and so constructed that there are no solid corners and the openings permit of air circulation even when the tray is filled with bottles.

In addition to the usual tourist car coal range, these cars are equipped with two-burner gas stoves.—Advt. J. 28, 31, F. 2, 4.

Winnipeg 'Spiel Starts Monday
Monster Western Tourney Is Expected To Draw 1,000 Curlers.

WINNIPEG, Feb. 3.—Winnipeg will be the mecca of the majority of the noted curlers of Canada and the United States next week, when the 34th annual bonspiel of the Manitoba Curling Association gets under way on the morning of Monday, Feb. 6.—The Manitoba curling carnival has long been looked upon as the greatest winter sporting event in America, but this year it promises to surpass anything of the past. With more ice accommodation, owing to the erection of the new Thistle rink, and the curtailment in the program so that the play will not extend beyond a week instead of two as formerly, the entry list exceeds all previous years.

Most Popular Pastime.
Curling is perhaps the most popular winter pastime in the West, and the game reaches its finest flower of perfection in Winnipeg. There are many reasons why the Winnipeg bonspiel is the greatest in the world. It is one of the best organized, has nearly every citizen behind it, and offers the best sport that can be found any place. There is hardly a town or village of any size in Manitoba or Saskatchewan that does not boast of a curling rink, and nearly everyone of them is affiliated with the Manitoba Curling Association. The growth of the Winnipeg bonspiel has been so marvelous that despite the fact the city boasts of eleven curling clubs, it will take nearly six sheets of ice, it has been found most difficult to reduce the play from two periods to one week this winter. There are about 150 clubs in affiliation with the Manitoba Curling Association, giving a membership of approximately 6,000 curlers, and each year increases the growth and popularity of the game, which has stood the test in Western Canada for a long time.

Draws Big Crowds.
The Winnipeg bonspiel is the magnet which draws every curler of any consequence from the far east, the west and south, altogether in social and championship competition in which the curlers of the world take part. Winnipeg for many years has been supreme in curling. The city has developed during bonspiel week with the curlers, and each year increases the climatic conditions make Winnipeg ideal for staging such a mammoth affair. From a spectacular standpoint, the game is nearly as popular as hockey with its thrills. The rinks are always crowded during bonspiel week, and the many followers of the "roarin' game." Large crowds follow the fortunes of the redoubtable aggregation, and the curlers are being carried out of the city. The climatic conditions make Winnipeg ideal for staging such a mammoth affair. PAYNE. In this city on Friday, Feb. 3, 1922, Ellen, dearly beloved wife of William H. Payne of 144 Clarence Street.
Funeral on Monday, Feb. 6, from the above address at 3 o'clock; service at 2.30. Interment in Woodland Cemetery.

SEMPLE. At Victoria Hospital, on Friday, Feb. 3, 1922, Joseph Sempile, second youngest son of the late James and Margaret Sempile, aged 43 years.
Funeral from the residence of his brother-in-law, Roderick McNeil, 309 Grey Street, Monday morning at 8.30. Requiem high mass St. Mary's Church, 9 o'clock. Interment St. Peter's Cemetery.

SMITH. At the residence of his daughter, Mrs. Ward A. Campbell, 488 Dufferin Avenue, at this morning, Mr. James D. Smith, aged 83 years.
Funeral from above address on Saturday, 2 p.m. Interment Mt. Pleasant Cemetery.

IN MEMORIAM.
DEARE. In loving memory of Letitia (Tessie) Clugston Deare and her daughter Phyllis Allen, who died two years ago, Feb. 3, 1920. When for a while we part, This thought will soothe our pain: That we shall still be joined in heart, And one day meet again.
—Husband, Mother, Sister, Brother.

CARD OF THANKS.
Mr. H. R. Davidson wishes to thank the ladies of the Loyal Blue Lodge, publishers of G. W. V. A. Ladies' Auxiliary of G. W. V. A. and nurses of Victoria Hospital for their kindness and sympathy shown during his recent sad bereavement.

Mr. William Floyd, Sen., and family wish to extend their heartfelt thanks to friends and acquaintances for their kindness in their recent sad bereavement; also for the many beautiful floral offerings.

?

Come To Church Tomorrow

"YES, I know all the excuses. I know that one can worship the Creator in a grove of trees or by a running brook, or in a man's own house, just as well as in a church. But I also know as a matter of fact the average man does not thus worship."

Here are a few benefits to be derived from church attendance:

"You will listen to and take part in reading some beautiful passages from the Bible. And if you are not familiar with the Bible, you have suffered loss."

"You will take part in singing some good hymns."

"You will meet and nod or speak to good neighbors. You will come away feeling a little more charitably inclined toward

all the world, even toward those excessively foolish young men who regard church-going as a soft performance."

"Join in church work for the sake of showing your faith in your works."

Make your start in church service tomorrow. A fair trial of church attendance will convince you it's well worth while.

ANGELICAN.

Father and Son Week

ITS BENEFIT TO A COMMUNITY

MANY banquets and special services will be held in the various Protestant churches the next two weeks, following out the national Father and Son Get-Together program.

The Protestant churches are becoming more and more convinced of the fact that this organized boys' program for their Sunday schools is a wonderful asset in not only holding them to their own churches, but in increasing numbers the boys are lining up in their Sunday schools and staying with them right through the storm and stress period of a boy's life, from thirteen to sixteen years of age.

Mr. C. R. Somerville, ex-mayor of London, has said: "Father and Son" suggests a holy partnership, where there can be no jealousies, no over-imagining, no such partnership except where each esteems the other better than himself, where each desires to carry the heavy end of the log. When the son enters the partnership of life with his father, a full and complete comradeship should be established; not only the "entente cordiale," not only the alliance of friendship, but also everything "open and above board." The Father is taking the Son "in," so he must be the starter in the formation of partnership, and the results all depend on the "start."

Incline Toward Good. Nearly all sons at the impressionable age have an inclination for the good, the right, the religious. This is also the most observant stage, and the father is watched closely for "copy" by his son. An intimate relationship based on absolute confidence of the son toward his father from close observation and character study then makes the father the example for the boy and leads to the greatest happiness of both in each other's companionship through life. But the pity is, if such a companionship is not established at that period they gradually grow apart and the great opportunity is lost.

There is no crowning glory of happiness to a man growing old than that of a son, a son who is a companion, a son who is a friend, a son who is a partner in pleasure, usefulness and religious experiences, extending over many years together.

This movement has been growing in strength for the last four years. Last year

twenty-one of our London churches held special services and eighteen conducted Father and Son banquets. The objective is to draw the relationship tighter between the average father, who is so busy that he forgets his boy, and the boy who generally goes around with the attitude that "everybody works but father," because when others are working at home at night he sees father busy with the newspaper and has not been able to follow him into his business or to know what kind of work he is carrying on during the day.

"Fathers and Sons, the Church of Christ is waiting. Waiting for valiant, fearless men, and true. Leaders of right, all injustice hating; Clear comes the ringing call of Christ Jesus."

Will Issue Appeal.

To bring the objective more forcibly before the community, Mayor J. Cameron Wilson will issue the following proclamation during the coming week: "To the People of London: It has an important bearing on civic welfare in countless cases, I feel it my duty to call attention to the well-conceived plan for a 'Father and Son Week.' 'The purpose is admirable. Anything that tends to bring father and son closer together in friendly spirit cannot but be beneficial to themselves and to the community. 'I believe that fathers can do more than any others to stem the great and alarming tide of 'dropping out' of school, which carries many boys out into the world unfit for progress and prosperity or public service."

Should Excel Father.

"Many boys grow to manhood virtually ignorant of even the simplest processes of government. These every father can explain to his son. The son, in every case, should become better than his father, for that marks progress. "The word that is coming will suggest many ways in which fathers may gain more completely the confidence of their sons, with all that means of effective guidance and unresented control. "I, therefore, call upon the fathers of this city and region, their co-operation in this important movement by attending with their sons at least one of the meetings to be held during the 'Father and Son Week.' I hope the men who have no sons will befriend the boys who have no fathers."

LINWOOD CO-OPERATIVE DEFICITS TOTAL \$8,000

TORONTO, Feb. 3.—Discrepancies to a total value of between \$8,000 and \$9,000 in the value of produce on hand were revealed this afternoon at a meeting of the creditors of the Linwood Co-operative Company, which recently made an assignment to Rutherford, Williamson & Co. Disposal of the company's assets was left in the hands of the inspectors—Messrs. H. B. Clemes, representing the United Farmers' Co-operative Company; F. W. Richardson, representing the Bluebird Co-operative Company; and F. W. Hay, representing Hay Brothers of Listowel. "Keep the case out of the courts and out of the Telegram as long as you can," a creditor urged. "And out of the Farmers' Sun," added F. W. Hay hastily.

DECREASES SHOWN IN STRATFORD BUILDING

[Special To London Advertiser.] STRATFORD, Feb. 3.—The annual report of Building Inspector Dixon for 1921 shows a decrease in building, as compared with 1920. Estimated cost of construction was \$276,053 in 1921, as compared with \$449,782 the previous year. There were 38 new dwellings, 27 being brick veneer. Indications are that 1922 will reach the 1920 total in building.

MAY DONATE SITE FOR C. N. R. HEAD OFFICE

TORONTO, Feb. 3.—A proposal that the city should be asked to donate to the federal government a site on which to erect a skyscraper as a head office building for the Canadian National Railway system is being seriously considered by a number of influential businessmen, the Star says today.

BRANTFORD BURGLAR JAILED FOR THREE CRIMES

BRANTFORD, Feb. 3.—Charged with breaking into three local stores during the past month, John Bardski was sentenced this morning to jail on three charges, each not less than three months and not longer than eighteen months, all three to run concurrently.

NOTICE OF APPLICATION FOR DIVORCE

Notice is hereby given that Clarence Robinson Miners of the City of London, in the County of Middlesex and Province of Ontario, Railway Clerk, will apply to the Court of the County of Middlesex for a Bill of Divorce from his wife, Kathleen May Miners of the City of London, on the ground of adultery and desertion.
DATED at the City of London, in the Province of Ontario, this 15th day of November, 1921.
T. W. SCANDRETT,
38 Dundas Street, London, Ontario, Solicitor for Clarence Robinson Miners. 584-1.

NOTICE TO CREDITORS AND OTHERS IN THE SUTROG COURT OF THE COUNTY OF MIDDLESEX

In the estate of Edward Lionel Morley, deceased. The creditors of Edward Lionel Morley, late of the City of London, in the County of Middlesex, bank clerk, deceased, who died on or about the 26th day of June, 1918, and all others having claims against, or entitled to share in the estate, are hereby notified to send by post prepaid, to the undersigned, their claims, or otherwise deliver the same to the undersigned, on or before the First day of March, 1922, their Christian and surnames, addresses and descriptions, and full particulars of their claims, accounts or interests, and the nature of the securities, if any, held by them. Immediately after the First day of March, 1922, the assets of the said deceased will be distributed amongst the parties entitled thereto, having regard only to claims or interests of which the Public Trustee shall then have had notice, and all others will be excluded from the said distribution.
The Public Trustee for Ontario, Osbourne Hall, Toronto, Ont. By his Solicitors herein, JARVIS & VINING. Dated at London, this 21st day of January, 1922. F.4.11.18

NOTICE IS HEREBY GIVEN THAT

an application will be made to the

Legislative Assembly of the Province of

Ontario at the next session thereof, on

behalf of the London Street Railway

Company for a special act for the fol-

lowing purposes:

1. To vary the agreement made be-

tween the Corporation of the City of

London and the London Street Rail-

way Company, so as to enable the Lon-

don Street Railway Company to obtain

sufficient revenue to keep the railway in

a reasonably safe condition and to

meet the working expenses and such

return on the capital actually invested

as shall be deemed reasonable.

2. For the purpose aforesaid to vary

any term of Bylaw No. 316 of the

Corporation of the City of London, or

any other bylaw relating to the matter.

The reason for requiring the legisla-

tion is that the revenues derived from

the present rate of fare are not suffi-

cient to provide for the increased cost

of operation, and that the company is

in need of immediate relief if the rail-

way system is to be kept in a reason-

ably safe condition, and the citizens of

THE TORTURE OF INDIGESTION

Thousands Made Miserable
By This Trouble

"FRUIT-A-TIVES" Relieves It

What is indigestion and what causes it? As you know, solid food must be changed into a liquid by the stomach before it can be taken up as nourishment by the blood.

The stomach acts as a churn. It is covered by a strong, muscular coat and lined with a soft, delicate membrane which secretes the Gastric Juice which digests or dissolves solid food.

When food enters the stomach, the muscular coat squeezes and presses the food from end to end, or churns it, with the gastric juice to dissolve or digest it.

But—if the stomach muscles are weak—or if the dissolving fluid is poor or insufficient—then food cannot be digested properly and you have indigestion.

"FRUIT-A-TIVES" is the most wonderful medicine in the world for strengthening the stomach muscles and providing an abundance of pure, full-strength dissolving fluid to completely digest every meal. "FRUIT-A-TIVES" does this because it keeps the kidneys active, the bowels regular and the blood pure, which insures pure Gastric Juice.

"FRUIT-A-TIVES" will correct your indigestion or Dyspepsia and enable you to enjoy every meal. Try it.

50c a box, 6 for \$2.50, trial size 25c. At all dealers or sent postpaid by Fruit-A-Tives, Limited, Ottawa.

LIKEMAGIC

RHEUMATISM DISAPPEARS

Redmac, the New Tonic
Comes to Give You Relief.

For centuries people have been looking for something that really removes Rheumatism and Lumbago. Redmac has appeared and thousands are today better in health. Sold in London by Taylor's Drug Store, 330 Richmond street, sole agent. —Advt.

Free to Asthma and Hay Fever Sufferers

Free Trial of a Method That Anyone Can Use Without Discomfort or Loss of Time.

We have a method for the control of Asthma, and we want you to try it at our expense. No matter whether your case is of long standing or recent development, whether it is present as Chronic Asthma or Hay Fever, you should send for a free trial of our method. No matter in what climate you live, no matter what your age or occupation, if you are troubled with Asthma or Hay Fever, our method should relieve you promptly.

We especially want to send it to those apparently hopeless cases, where all forms of inhalers, douches, opium preparations, fumes, "patent smokes," etc., have failed. We want to show everyone at our expense that our method is designed to end all difficult breathing, all wheezing, and all those terrible paroxysms.

This free offer is too important to neglect a single day. Write now and begin the method at once. Send no money. Simply mail coupon below. Do it Today—you do not even pay postage.

FREE TRIAL COUPON.
PHONETIC ASTHMA CO., Room 315, Niagara and Hudson Sts., Buffalo, N. Y.

Send free trial of your method to:

GIRLS! LEMONS

WHITEN ROUGH

CHAPPED HANDS

Squeeze the juice of two lemons into a bottle containing three ounces of Orchard White, which any drug store will supply for a few cents, shake well, and you have a quarter-pint of harmless and delightful lemon-juice lotion to soften and whiten red, rough or chapped hands. This home-made lemon lotion is far superior to glycerine and rose water to smoothen the skin. Famous stage beauties use it to bleach and bring that soft, clear, rosy-white complexion, because "it doesn't irritate."

for BURNS

FOR SCALDS, CUTS AND BRUISES, FOR COLDS, COUGHS AND BRONCHIAL AFFECTIONS, FOR STIFF MUSCLES, SPRAINS AND STRAINS AND NUMEROUS OTHER AILMENTS COMMON TO MAN AND BEAST, THERE IS NOTHING SUPERIOR TO THAT OLD TRIED AND RELIABLE REMEDY

DR. THOMAS' ECLECTIC OIL

KING SWORN IN AS MINISTER OF PUBLIC WORKS

Assumes Federal Office As Bostock Is Chosen Speaker of Senate.

WILL RUN IN KOOTENAY

OTTAWA, Feb. 3.—Hon. J. H. King, former minister of public works in the British Columbia government, was sworn in today to the same portfolio in the new federal government.

The ceremony was performed by the governor-general, Lord Byng, in the presence of Premier Mackenzie King.

The new minister succeeds Senator Bostock, who will become speaker of the Upper House, and who has held the portfolio of public works largely in an acting capacity. It is understood that Dr. King will run in East Kootenay.

Robert E. Beattie, member for this constituency, has been appointed to the staff of the income tax branch of the department of finance at Vancouver, and has accepted the appointment.

The acceptance by Mr. Beattie of this appointment, it being an office under the crown, creates automatically a vacancy in the constituency of East Kootenay.

Takes Over Department.

Dr. King will probably remain in Ottawa for some days before going to his appointment, it being an office of public works this afternoon. Senator Hewitt Bostock has been minister of public works up to the present, but, in accordance with an understanding made at the time of the formation of the new administration in December, his resignation as minister of public works was tendered and accepted at the same time as Dr. King's appointment was made.

It is understood that Senator Bostock, who remains a member of the privy council, will be appointed speaker of the Senate.

Mr. Euler, Liberal member for North Waterloo, will, at the coming session of parliament, resume his fight against the operation of the section of the Dominion elections act which disfranchises the wives of British subjects who were born elsewhere than on the continent of North America, and who became British subjects only by reason of marriage.

Wants Section Repealed.

Mr. Euler attacked the section during the past two sessions, and has filed a resolution demanding its repeal at the forthcoming sitting of the House.

The section was originally intended to disfranchise alien enemy women unless they were able to secure a certificate from a county judge testifying that they were entitled to vote. The section, however, applied equally to women born in France, Norway and other countries who became British subjects through marriage.

A curious feature of the section is that under it a Mexican woman who became a British subject through marriage may vote, but at the same time the act refuses the privilege to a woman born in France or Belgium, unless the necessary certificate is secured.

SEEK BUTLER IN DEATH MYSTERY

Los Angeles Police Redouble Efforts To Solve Slaying of Motion Picture Director.

LOS ANGELES, Calif., Feb. 3.—Efforts to solve the mystery surrounding the murder of William Taylor, internationally-known motion-picture director, were today directed toward locating Edward P. Sands, formerly employed by the dead man as a butler.

At least two persons have told the police they saw Sands in Los Angeles within the last week. Another witness stated Taylor had declared he saw the missing butler within a few days of the tragedy.

Sands had been sought for several months on a complaint of forgery made by Taylor. The director charged that the butler disappeared after forging his name to a check, and that money and other valuables disappeared at the same time.

The police today adhered to the theory that Taylor was slain for revenge, checking of his possessions indicating nothing was taken by the person who apparently surprised him in his home and shot him in the back, leaving the body to be found Thursday morning by a servant. Close acquaintances of Taylor in motion-picture circles were today subpoenaed to testify at the inquest which is to be held tomorrow.

DENIES PAROLES EASILY OBTAINED

OTTAWA, Feb. 3.—(By Canadian Press).—Statements attributed to Police Magistrate Jelfs of Hamilton in a news dispatch from that city were characterized as without foundation to Hon. D. D. McKenzie, solicitor-general, today. According to the report from Hamilton, Magistrate Jelfs said that prisoners serving sentences often obtained release on parole at their own unsupported request.

The solicitor-general, under whose jurisdiction the granting of paroles to prisoners comes, stated that every case is most carefully reviewed before ticket-of-leave is granted. When application for parole is received, reports on the case are obtained from various sources.

Frequently the governor of the jail in which the prisoner is serving sentence is asked to make a report, and also the judge or magistrate who sentenced the prisoner. Reports obtained are most carefully considered by a responsible official of the department, as well as by the minister, before parole is recommended.

WIND OPENS UP ICE-BOUND PORT

ST. JOHNS, Nfld., Feb. 3.—This harbor, blocked with ice for several days, is now clear, a strong off-shore wind today driving the ice floe out to sea. Six steamers which had been unable to make port owing to the blockade put in here today. Tonight a furious rainstorm was raging over the whole country.

Another fish-carrying vessel, the barkentine Caspe, bound here from Pernambuco, today was reported lost in mid-ocean. The crew was taken off by a passing steamer, the advice said.

MANY WOMEN NEED BETTER BLOOD

They Lack Vitality and Color. It is a fact proved by thousands of grateful letters that Hood's Sarsaparilla is remarkably beneficial to women, whose most common ailments drain and weaken the system and sometimes result in anaemia, nervousness, general break-down.

Women overworked by family duties or overtaxed socially, find their nerves all unstrung, faces pale, appetite poor, sleep unrefreshing. Hood's Sarsaparilla gives the blood more vitality and better color, makes stronger nerves, and contributes to the enjoyment of life.

It embodies a long-tried and found-true formula for relief of the pale, weak, nervous and dyspeptic.—Advt.

HUNT MISSING QUEBEC NOTARY IN CITY DEFICIT

Citizens Committee of Chateauguy Basin Sift Loss of \$300,000.

PROBE NOW UNDER WAY

MONTREAL, Feb. 3.—Mayor Phaneuf of Chateauguy Basin, a small town about 12 miles from Montreal, with the officials of the town council, aided by members of a citizens' committee, officials of the school commission and those of the parish, are busy verifying figures in their books during the last few days because of the sudden disappearance of Fortunat Laberge, notary, who was secretary-treasurer of the municipality.

Laberge left for parts unknown about two weeks ago, and Mayor Phaneuf stated tonight that while it was impossible to say exactly what amounts were unaccounted for, he

10 Jurors Favor Conviction of Roscoe Arbuckle, But Two Disagree.

SAN FRANCISCO, Feb. 3.—The jury failed to agree, and was discharged today in the second trial of a manslaughter charge against Roscoe C. Arbuckle in connection with the death of Miss Virginia Rappe, motion picture actress.

Announcement that the jury stood ten for conviction and two for acquittal was made by Leo Friedman, assistant district attorney, and a leading prosecution counsel. Harry McGovern, bailiff, made the same announcement.

"We expect to try the case again," Friedman said.

estimated the figure would be around \$300,000.

Mortgages for varying amounts on nearly every piece of property in the town of Chateauguy Basin are held by several citizens of the place, and investigation has shown them to be apparently worthless copies. Ten thousand dollars are missing from the town treasury and a similar amount from the school treasury.

Laberge, who has been employed by the parish and school commission

since 1905, left two weeks ago to go to Quebec to transact business which should have been cleared up in a couple of days. When he did not return, and on Mrs. Laberge stating that she was ignorant of his whereabouts, investigations were commenced.

PONZI VICTIMS' ACTS UPHELD

BOSTON, Feb. 3.—Efforts by the trustees in bankruptcy of Charles Ponzi to recover for the benefit of the thousands who lost their money when his high-finance bubble burst in 1920, some of the money withdrawn by other investors before the crash, suffered a setback by the decision of Judge Anderson in the federal court today.

The court ruled that the trustees could not recover from four Taunton investors who got their money back. He was satisfied, he explained, that the defendants did not think so much of Ponzi's insolvency, and the need for getting their money out ahead of other creditors, as that they thought he was a swindler and wished to withdraw the money they had entrusted to him.

"Victims of fraud are not creditors within the meaning of the bankruptcy statute; they part with possession, not with their equitable title. They have a right to rescind and restate their own property," said the court.

STRIKERS JOINED BY BERLIN UNION

BERLIN, Feb. 3.—Germany's railway strike, which has almost completely tied up all kinds of traffic since Wednesday night, became even more complete today when the Berlin branch of the railway union joined the strikers this morning.

Passenger and freight traffic in North Germany was at a complete standstill. Undelivered mail has begun to accumulate, and postal authorities are maintaining aerial service for urgent mail and passenger purposes.

Efforts to maintain the milk and food supplies for Berlin have failed,

and the newspapers have considerably reduced their size and number of editions.

The government's manifesto declaring the strike illegal has aggravated the situation. The executive committee of the Berlin Labor Federation today adopted a resolution in favor of issuing a manifesto denying subordinate officials the right of association, and demanding cancellation of the manifesto published by the Socialistic press supporting the claim for such right.

PROMINENT HORSEMAN DIES. TORONTO, Feb. 3.—Alexander O. Waidi, aged 57, prominent coal merchant and horseman, died at his home here this morning after an illness of three months.

Policyholders of the Mutual Life of Canada Enjoy a Record Year of Financial Prosperity

Unprecedented Profit Earnings

A REMARKABLE increase in the surplus earnings of the Mutual Life Assurance Company of Canada was shown by the Fifty-Second Annual Statement, as presented at the Annual Meeting of the policyholders held in the Head Office of the Company at Waterloo, Ontario, on Thursday, February 2nd.

The entire net profits, or Surplus Earnings of the year's operations will be, as usual, ultimately distributed to the policyholders of the Mutual in cash or applied to the reduction of their premiums or added to the face values of the policies, as per policyholders' individual option. Three factors have combined to bring about this red-letter year in the annals of the Company.

1. Decrease in Expense Ratio

The percentage of the Total Income required for operating expenses was reduced from 20.45% in 1920 to 18.60% in 1921.

2. Increase in Interest Earnings

The average rate of interest earned by the investments of the Company shows an increase from 6.41% in 1920 to 6.60% in 1921.

3. Highly Favorable Mortality

The mortality rate of 1921 was the lightest experienced by the Company in recent years, being relatively 20% less than in 1920.

Surplus Earnings of \$2,243,038, being \$46.47 per \$1,000 of Total Assets

The combined effect of these three different factors in the Company's experience for 1921 was to increase the surplus earnings from \$38.67 per \$1,000 of assets to \$46.47 per \$1,000

Salient Points from the 1921 Report

FUNERAL DIRECTOR.

WHEN COAL WAS SCARCE HOW MUCH DID YOU HAVE TO PAY?

Last year our customers never paid more than \$17.50 per ton, and were never without a supply of the highest quality. Since April last year our price has been \$16.50 per ton, and our sales are more than three hundred and fifty per cent ahead of the previous year.

LONDON ARMORIES, FEBRUARY 6 TO FEBRUARY 11
"THE CAR TO BUY AND WHY"

AUTOMOBILE MAKERS CATER TO COMFORT OF MILADY IN 1922 MODELS

Lavish Fittings, Together With Luxurious Upholstery,
Enhance Appearance of Latest Contributions
To Motordom.

FASTIDIOUS feminine tastes in motor cars can be suited this year. A visit to the popular salons and automobile showrooms makes one quite bewildered with the variety of models found there.

There are high cars and low cars; enormous cars and wee ones; the most elaborate equipment that fortune can attain and the stripped chassis that appeals to the more sportive temperaments. Never has there been such an array of subtle accessories that make the interior of a car the epitome of luxury. And never has the roadster or racer for women been so practical.

The designers here have had a large order for this season. Much has been said about the economic tendency of Canadians because of hard times, so the designers have been charged to take all that into account. They have, therefore, divided their attention between those who look upon tomorrow as another day and those who do not. It is such a joy to them to let their imaginations run riot—to produce something really new and distinctive. At first it was said that they complained a little at this new Canadian attitude of saving for the future. They argued that the foreign designer would throw up his hands and say it could not be done—that art could not hold sway when one had to keep an eye on the expenditure, but adaptability conquered, and the result is all that the most exacting could desire.

The producers, too, have had a hand. Perhaps it was the pinch of hard times that overcame the automobile manufacturers along with other industrial enterprises, that caused old Mother Necessity to bestir them, for never before has there been such uniformity of purpose. This year's cars show that all have been bent upon turning out the very best that the resources and their factories can produce. Even in the standard cars of less expensive makes the workmanship is far ahead of anything shown in former years. The cars priced at from \$300 to \$2,000 have any number of new features.

Many New Leathers

Take leathers, for instance. No one would have believed a few years ago that there could be such a variety. The natural assumption was that where leather had to be on a car it was, but there was little question as to what kind it would be. There was plaid of perhaps two or three grades, and Spanish or Moroccan leather if one wanted to be really dashing. Not more than half a dozen choices in all. But now a great book of leather samples is provided. They range from the more familiar leathers to those formerly used only for milady's handbag, and some new grades, all with most intriguing new names. On the really smart car one finds very interesting combinations of these leathers, serving, in addition to a utilitarian purpose, a decorative one as well, for a clever combining of leathers is pleasing and adds to the smart appearance of a car.

But a serious rival to leather in the enhancement of the closed car is the hardware. Here, indeed, the manufacturers have shown their

mettle. There is the abundant choice of bone, mother-of-pearl, ivory, Sheffield silver, brass and aluminum, or any combination of them. Cut glass is also an attractive addition to the hardware fixtures. In fact, the custom body builders have come to realize that the variety of products for these accessories has been far from exhausted, and once realizing the resources at their command have become quite reckless in turning out distinctive designs. The use of brass is perhaps the newest and most unusual departure. It gives such a lavish appearance to the car that it bids fair to be extremely popular. One smart town car seen recently had the entire hood of brass, which was also used liberally in the trimming and hardware. With the latter old ivory was used, the creamy tint blending beautifully with the gold. The car, which was hung low, was painted a soft French blue, which was further set off by the deep tan interior. Another car which will soon be seen on the streets of London is of delicate grey, with the interior of the same tones and fittings and hardware of solid silver.

Bright Tints Favored.

The sombre tones so much in favor during the past few years seems to have lost caste. The smart cars are painted in brighter tints and the interiors either match them or are of contrasting shade, but equally bright. No longer does milady choose her motor car with neutral tones so that the interior will match any gown she may wear. A car is much too important in her life to have it an uninteresting means of transit. It is now selected with greatest care and, if need be, her gowns are made to fit the car. After all, the smartly dressed woman favors a certain color during an entire season. It may be the color of the moment, according to the decree of fashion, or it may be her own favorite color—quite the one for her and incorporated by her in various tones throughout her entire wardrobe. With all this settled and definitely in her mind she turns to the selection of her car and considers it with equal care, making clear to the designer her desires so far as color is concerned, and working out with him the details on that preface.

Air-Cushion Seats.

Many new ideas have been introduced this year in the way of comfortable seats. In the more expensive cars air cushions are shown resting on the more substantial ones of horsehair and leather. These are covered either with a delicate grade of leather or other material. They are also used as back rests and are detachable, only fastened into place by decorative straps. The foot rests, now considered a necessity, are rendered more decorative than before, and in practically all the high-priced cars extra pillows are furnished, either of the same material and design as the cushions and footrests or of contrasting material and color. Some of these are of silk and very elaborate. The seat in some of the limousines is fashioned after a comfortable arm-

WILLYS VISIONS BIG YEAR AHEAD

Claims Buyers Holding Back
For Price Cuts Satisfied
Bottom Reached.

"The automobile as an accepted vehicle celebrated its twenty-first birthday in 1921. The automobile industry found that this age of majority brought new problems of business adjustment and in solving these problems the industry made its most notable advances in placing sales and production methods upon sounder foundations," said John N. Willys in a recent interview with Frank McLachlin, the London representative of this popular priced car.

"So well has the automobile trade met the difficulties of readjustment during 1921 that the world today can continue to look to motor car manufacturers for the best in transport. "Naturally, in reaching conclusions on the production plans for 1922 officials of the companies in which I am interested directly have given me my more specific data. My contact with the leaders in the industry has given facts confirmatory to the information gathered by the sales executives of the Overland interests.

"The opening of 1922 sees dealers' stocks lower than they were a year ago. There are several explanations for this. It should be recalled that following the first price cuts in automobiles in September, 1920, manufacturers did their utmost to stabilize the market for at least the first half of 1921. As a result many of the most popular cars offered to the public in 1921 carried a price guarantee up to June 1. This was a guarantee to the public and to the dealer, but it resulted in a slowing up of sales because the belief gained circulation that cars should not be bought until after June 1.

Big Replacement Trade.

"But there is a great replacement trade that normally should have been felt in 1921 that will be evident this year. Moreover, prices have been readjusted. The new series Overland sells at the lowest price for which an Overland ever sold. And most cars are today at a 'bright price.' Buying power is felt on every hand right now in more pronounced form than in months past. "Automobiles are better built because several factors entering into their production have been strengthened. Some of these factors are: "An appreciation by labor that future sales mean future jobs and that future sales are best assured by doing the very best work on every car turned out.

"A willingness by labor to work to closer mechanical limits. A willingness by the employer to provide systems of inspection that prevent poor work and eliminate costly scrap.

"Closer inspection of raw material at sources of supply.

"Refinement in design by which fewer moving parts are employed. Use of better and newly-developed materials.

"Improvements in working machinery and tools and a betterment in progressive methods of work. Time is the great factor in this division of improvement and it is by saving of time that more value can be placed in the finished product."

chair, with a large arm rest well padded. In a few of the models these arm rests can be raised and fit comfortably into the back of the seat. Some even disappear completely and may be used or not, according to fancy.

Artistic Trimmings.
Only in the standard cars are the vanity cases boldly shown. Even when the vanity cases are at the side of the car within easy reach of the occupant they are arranged, so that they disappear into the side and are neatly concealed by some clever device. The trimmings of inlay of mahogany with other rare woods in various combinations are becoming popular. These seem to fit in well with a motor car and are less tiresome than some trimmings that have been used in the past.

Among the less expensive cars there seems to be more attention to the artistry of line. These models are hung low, after the custom-made models of a few seasons back, and have greater length. A great deal of interest is shown in these moderate-priced cars. Special stress will be laid upon them at the second National Auto Show which will be held in the Armories beginning Monday.

This show promises many interesting and educational features and there will be an exhibition of car designs, new and original, tending to visualize how art can best be applied in the designing of bodies.

MAKE ARMORIES REAL FAIRYLAND

The decorating contract for the 1922 London Motor Show has been awarded after very keen competition to the local firm of J. Gammage & Sons.

The decorating scheme as arranged upon is a most elaborate one. A false ceiling will be built up of branches of fresh green smilax and huge bunches of cedar. These will be fastened together and sewn onto wire stretched across the ceiling at widths of one foot apart. This will make a solid ceiling representing spring.

A huge special express car will be needed to bring these forty crates of smilax direct from California where they are being gathered and packed specially for the London Motor Show.

The walls will be covered with bunting, flags and imitation ferns with a quantity of fresh smilax and cedar grouped at various points. The windows will all be draped to give a certain effect. The entrance will also be specially treated and when the elaborate extra lighting system is installed the entire building will not be recognized as it will look more like a fairyland.

Racing a cold engine will not heat it up. Systematic attention lengthens a car's life.

NEW CADILLAC HIGHLY REFINED

Many Improvements Noted in
New Type 61.

One of the outstanding features of the London Motor Show will be the showing of the new type 61 Cadillac automobiles.

To a casual observer the two most notable and outstanding changes in the new type Cadillac are the lowered center of gravity of the car and the enlarged, higher hood and radiator.

The lowered center of gravity shows a marked effect on the roadability of the type 61. It is declared that the new models cling to the road, affording the driver complete mastery even in the roughest going. The radiator is higher and shoulders have been raised and rounded to conform to a more graceful design. The change of radiator shape is reflected in a hood of more liberal dimensions. The improved front end has been designed to give a more distinguished appearance and to convey an impression of greater power. The increased beauty of design is apparent in the sweep of fenders and all exterior lines. The rear quarters of enclosed bodies have been changed from sweeping curves to slightly rounded corners in line with the trend of advanced designs.

In the new models all cars seating five passengers or less now have the full length wheelbase of 132 inches and improved seating arrangement. The eight cylinder Cadillac engine has been even further developed and refined to provide more efficient starting in cold weather, greater power and more economy in operation. These results have been chiefly obtained through the new Cadillac carburetor with two-inch intake. Thermostatic controls, attached to the auxiliary air valve springs and throttle pump, automatically enrich the mixture when the engine is cold.

The refinements and improvements in appointments are numerous, ranging from the walnut steering wheel to the instrument board. The roofs of all enclosed bodies are of a new soft type of construction which deadens sound. The Phaeton and Five-Passenger Sedan are equipped with a trunk rack which fits between the tire carrier and the rear of the body. The body itself is protected by six vertical strips of polished aluminum, adding a touch of smartness to the rear view.

The portion of the rear axle housing which incloses the driving gears has been reduced in size to permit the use of smaller wheels with practically no reduction in road clearance. The hood is of sheet aluminum which is lighter and more serviceable than steel.

Two new body styles have been added to the line—a Two-Passenger Coupe and a Five-Passenger Coupe. In size, seating arrangement and compartment space the Two-Passenger Coupe is much similar to the Roadster, with all the advantages of the enclosed body types. The Five-Passenger Coupe is well adapted to the use of professional men and women drivers. Entrance to the rear seat is afforded by tilting the bucket seat on the right side.

DRIVE EASILY, ECONOMICALLY

Refinements in Hudson Make
1922 Models Stand Out
From Others.

Though the lines and the engineering fundamentals of the Hudson super six remain unchanged, a number of refinements in the 1922 series make the car easier to drive, and more economical in operation and maintenance.

Improvements in the carburetor and the intake manifold result in an efficient use of low-grade gasoline. Not only will the car start and operate in cold weather more effectively, but the formation of carbon is greatly decreased.

To make the car more convenient to drive, the entire front compartment has been re-designed, so that starting, driving and gear shifting require a minimum of effort. The shape of the instrument board has been altered so that there is more knee room for passengers, and the instruments are conveniently and pleasingly grouped.

Hudson appearance, always distinctive, has been improved by especially handsome deep crown fenders. The aprons and splash shield are highly useful as well as handsome. The newly designed fenders act as mudguards, too.

For added ease of driving, the clutch has been lightened in its action, the gear shift lever has been lengthened and placed close to the driver's hand; the pedals are not only more easily operated but are located more conveniently as well; new weather stripping endows the windshield with complete protective qualities, and steering has been made a lighter task by a change of gear ratio.

The characteristic Hudson lines remain almost unchanged, but small refinements in body design serve to bring out and emphasize its harmonious and distinctive lines.

Hudson now uses a new type oiler for chassis lubrication. They are an exclusive feature. Their purpose is to simplify that part of the maintenance of an automobile which is most objectionable to the owner—frequent lubrication. It is the standard form of lubrication maintenance possible.

A. H. Burrows' exhibit at the show includes the Hudson phaeton, the touring limousine, the coupe and the sedan. In the general impression of clean design and value they give, they follow the traditions of the 110,000 Hudsons which the public has bought since the development in 1916 of the patented super-six.

STOPS FUEL SPLASHING.
A full gasoline tank means splashing of the fuel through the vent in the filler cap. To avoid this, a U-shaped copper tube should be soldered below

the vent in the tank. Filled with fuel, the tube acts as a seal, while there is no interference with the passage of air from the outside.

Your FORD Will Run Smoothly
At Three Miles an Hour on High
If Equipped With a—
**Mallory
Timer**

The Mallory Timer is an ignition device that improves your Ford 100 per cent. You can throttle down to three miles an hour on high without slipping the clutch or racing the motor. This means a saving of gasoline and wear and tear on the whole car.

With a Mallory Timer you can entirely eliminate the vibrating points on your coils. You can have all the advantages of an ignition system used on high-priced cars. Eliminates troubles with fouling of spark plugs, hard starting, adjusting or vibrating points, arching in timer and the cleaning of oil-soaked wires.

The Mallory Timer can be installed without changing your present plant of wiring or attachments. It can be installed by anyone in less than an hour. Lasts the life of your car.

LUXURY, UTILITY AND ECONOMY COMBINED IN LATEST MODELS EXHIBITED AT LONDON SHOW

Second Annual Event Opens Monday Night at Armories — Will Last Entire Week, With Special Feature Program Every Day—Four Score Models, Ranging in Price From \$685 to \$14,250, To Be Shown.

THE ACME OF PERFECTION in the motor world of today will be represented in the complete and gorgeous display of motor cars at the London Motor Show opening in the Armories on Monday.

Eighty different models, each making its bid for popular approval in its own special sphere, each having some special claim of service, comfort, economy or reliability, are now in the Armories awaiting the critical eye of a discerning Western Ontario public.

The management of the show has made a close study of the layout of the show, and with the experience of former years to guide them, have this year evolved a much better arrangement of the cars.

The luxurious or fastidious passenger and its less costly sister cars are not to be molested by the commercial car or the ungainly everyday truck. A ban has been put on these this year, owing to the tremendous demand for space for passenger models.

Thus when the show reflects the newness and brightness of pleasure cars. The reason for this display is two-fold. The increased interest in the show and the improvement in old and the addition of new models.

Wide Ranges in Prices. There will be all kinds, makes and prices. The highest priced car on display will be a visitor. A Vauxhall limousine, displayed by a Toronto dealer and commanding the handsome sum of \$14,250. The lowest priced car will be \$685.

Between these two extremes there will be as big a variety of prices as there will be models. In fact the person who goes to the show and expects to make a choice of car on one visit, will find the task decidedly exacting.

Show visitors must not expect to see radical changes in design or in other large phases of motordom this year. Rather must they look for finer changes, for the day of radical change is over and the industry has settled down to improving what might be termed the neglected parts of the past.

These minor changes will be found to be general also and is one of the reasons as stated above, for the big display of different models. Scarcely a car has escaped the designer's pencil in some way or another, with the greatest or strongest leaning towards quiet running, easy operation and owner satisfaction.

Chief among the mechanical trends is the increasing use of transmission brakes. This construction is of European origin, and while the design predominates in cars across the water, Canadian designers have been slow in taking it up. The number of such brakes seen is so great that a first impression is that they all have come to it.

Frames are being strengthened, better braced and of deeper section. This is a development that has come about through getting away from the

Heads Beemer Co.

J. C. Beemer.
PRESIDENT Beemer & Co.
Ltd., Cadillac and Reo Motor
distributors.

motorist because of their particularly inaccessible location.

Thefts of automobiles of late have been reflected in the great increase of cars equipped regularly with transmission locks. Sales resistance set up through the wholesale stealing of cars has thus been offset to some degree by the designer.

The popularity of composition steering wheels is quite noticeable, and several others are using (all) aluminum hubbed steering wheels with spokes of either walnut or mahogany. The design is attractive and the wheels are said to be as strong as all-metal spiders.

Instrument Boards Simplified. There is a decided tendency to make instrument boards of more real value to the driver.

Other important changes which cannot but carry their appeal to the motor lovers includes a new intake system. This is a design of manifolds and the incorporation of special devices or methods of preventing any appreciable amount of liquid fuel from getting to the cylinders. Upon this development depends to a great extent economy, performance of the engines, and life of the engines.

Manufacturers and dealers claim that new materials will be found in the make-up of many cars, better ones for the former grades, and the cars are assembled in such a manner as to keep the parts in alignment, thus affecting longer life through a reduction of friction and destruction of the oil film which eventually produces the same result.

Parts of Better Materials. Another point advanced in favor of the 1932 car is that parts and units are of better manufacture.

This includes the operations on machines that shape and finish the parts that go to make up the car. In engines, in axles and other units, manufacturing methods are clearly seen to be better.

A close analysis of all cars will show as has been said, that the principal dimensions and fundamental features by which we know them, have not changed very much. Such features as the block cast L-head engine, battery ignition, vacuum fuel feed, etc., dominate. The average bore and stroke is about the same as last year. The average wheelbase this year is 121 inches, which is only fractionally different from last year.

The disc clutch, the three-speed selective transmission, the six-cylinder engine are still in the lead; but an analysis of the cars which show these basic characteristics will evidence the fruits of development.

In working on the 1932 engines Canadian designers have concentrated on the fuel problem. It was the most difficult problem, and its real solution has not yet come, but certainly next week's show will present the biggest step forward in this direction.

In nearly every engine the intake system has so been designed that a great amount of heat is imparted to the gas mixture.

Tackle Fuel Problem. Hot spots, special electric-heating devices, exhaust-heated intakes, water-heated intakes, intake passages in direct contact with hot portions of the cylinders, etc., are some of the methods which have been improved upon, and appear in greater number.

The fuel problem is not alone one of saving gasoline. It is one involving engine life. If much raw fuel gets into the cylinders it washes away the lubricating oil around the pistons and on the cylinder walls.

What fuel does not work down past the pistons to contaminate the oil in the crankcase and further reduce lubricating efficiency leaves an appreciable amount of carbon in the cylinders. There are but two sources of heat to work with in an automobile—the heat of the exhaust and the electric heat. Both are utilized in the 1932 cars. The electric heat is available instantly to heat the gasoline or the mixture. The exhaust heat comes only after the engine has started running.

The motor world has had exhaust-heated intake manifolds for many years, and water-jacketed manifolds are almost as old as the industry itself, but the idea of the newer designs is to completely vaporize the fuel, and to this end there are various improvements mentioned.

In one of the very successful methods any fuel that is in liquid form in the manifold is trapped in a highly-heated chamber and there actually distilled.

Lubrication Improved. The engine lubricating system is another that has been attacked with

vigor. It was not so long ago that most engines used splash oiling, then they went to improved splash systems, and the force feed started to creep in. Forced feeding for main and connecting rod bearings with splash or spray for the cylinders and pistons now is almost the accepted standard. High pressure to bearings held some time back that low pressure and high volume system would be seen in greater number this year. It is an admirable system.

The all-metal universal joint still maintains its leadership. The fact that the fabric type is only applicable to certain installations is holding this form back. It is desirable only where the shaft angularity does not exceed a certain amount, and this is usually very low, so that we find such joints on comparatively straight or non-angular drives.

It is used between the clutch and transmission where the latter is separately mounted and also on some propeller shafts. Those using all-metal joints are for the most part provided with means for retaining the lubricant longer, and many cars use the type which is oil lubricated.

Prices Are Much Lower. How about prices? This is a question which interests every prospective buyer and is one which every buyer is going to ask sometime before they close a deal for a car.

The consensus of opinion is that the prices of today are about stabilized for the year. Dealers realized that before the show opened it was necessary that this point be definitely cleared up. They felt that it was necessary to prove to the public that further cuts were not in the offing. The public has grown weary with rumors that tomorrow or the day after would see such and such a car brought down materially, and consequently it was interpreted as watching the present exposition with a great deal of expectancy. From a merchandizing standpoint, the public demand for lower figures had to be met, and fortunately in many cases, a cut was justified by the better position in regard to the inventories, parts, labors, etc.

Factory executives generally seem to be thoroughly satisfied with this situation and they are making cuts now in advance of lower production costs, they nevertheless are keen to prove that their line has come down to a minimum figure. Some executives expressed themselves as being so thoroughly solid on the fact that the minimum had been reached, that they speculated as to what buyers would do on the rising market, provided that manufacturers should raise prices in the spring or early summer. But this sort of talk was not frequent; officials rather took the standpoint that they announced the "1932" prices and that they expected the present figure to carry them through the year. The doctrine that prices must be stabilized has been well understood, and while there are too many complexities in the merchandizing and manufacturing fields to assure that the lowest prices have been announced, there was everywhere the feeling that the 1932 models represent the 100 per cent value.

Opens Monday Night. The big week's show will, however, have other pleasing attractions for the great throngs of visitors that are expected to be on hand daily. Opening night will see the First Battalion Western Ontario Regiment orchestra on hand and an excellent musical program will be given. The same will apply to Military night, on Tuesday, Club night, on Wednesday, and Dealer's night, on Thursday.

The London Automotive Retailers' Association and the Chamber of Commerce are sponsors for the show, with Wilfred Hodgins as president, assisted by a capable executive. There is also an entertainment and banquet committee, as well as a decorating committee.

As an index to the displays of London dealers, the following list will give the makes of the various cars on display and the name of the local dealer handling them:

Cadillac, Reo, J. C. Beemer.
Hudson, Essex, A. H. Burrows.
Dodge, W. J. Chisholm.
Chalmers, Maxwell, Universal Motor Sales.
Columbia, Cole, Graham & Pedon.
Chevrolet, Ontario Sales and Garage.
Mitchell, W. C. Morrison.
Durrant, Outside dealer.
Duesenbury Motors, W. H. Buchanan.
Ford, J. W. McLaughlin.
Oldsmobile, Simpson & Coyle.
Gray Dorr, S. H. Gallagher.
Paige, Hodgins & Ferguson.
London Six, London Motors.
Studebaker, Overland, Williams.
Knight, Packard, Frank McLaughlin.
McLaughlin, McLaughlin Motor Sales.
Vauxhall Motors, Outside dealer.

STRAIGHTENS FENDER. A stout block of wood and a jack are all that is needed to straighten a

fender that has been bent down. Set the block between the jack and the end of the fender and apply pressure.

Improved rolling stock and highly trained operatives offer general transportation on land. Ocean and lake transients, carefully charted and sounded, master productions of the builder of vessels, make travel by water possible in luxury and speed almost beyond belief.

The measure of a country's prosperity is in its mileage of roads available for quick and safe moving of mankind and his effects. And judged by this standard, how enormous has been and is the influence of the motor vehicle with self-contained power. The world began to grow at a new rate and civilization expanded in directions undreamed of when the self-propelled means of transportation was first accomplished. Automobiles literally forced the construction of good roads, that the exchange of commodities upon which civilization subsists might be made more rapid. Areas were made available for dwelling, for manufacture, and for agriculture that might have remained for decades isolated from communities which they could serve. When all is said, the problem of securing speedy and economical distribution of commodities is one that touches all humanity. Upon it depends man's existence.

First Motor Vehicle. The old Oriental writers possessed a highly developed and fertile imagination, and it is noticeable that their highest flights had to do with rapid travel. The magic carpet represented

MOTOR SHOW AIDS EXPANSION OF CIVILIZATION

Progress of Humanity Has
Hinged On the Rapidity of
Its Movements.

FRENCHMAN INVENTOR

Humanity's progress through the ages has been measured in terms of transportation. In the beginning, if man wanted or was required to move himself, his family or his possessions, he relied upon the human back. If he desired to communicate a thought, he made signs for those near him, afterwards using rudimentary language; for those at a distance, he was obliged to travel in person in order to deliver a message, or send a messenger, who transmitted his thoughts in as well remembered a form as he was capable of.

Now, man talks from continent to continent with no more labor than the conception of a thought. A stenographer transcribes his ideas, a cable company transmits and delivers them; or the individual may project his voice over land and sea.

The transference of physical, bodily objects is no longer a matter of labor on the part of the individual. The common carriers of the nation transport him and his effects wherever he will. It was a tremendous advantage for existing and future humanity when the first crude concept of a wheel crept into the mind of some forgotten man, who began to grope at a new rate and civilization expanded in directions undreamed of when the self-propelled means of transportation was first accomplished. Automobiles literally forced the construction of good roads, that the exchange of commodities upon which civilization subsists might be made more rapid. Areas were made available for dwelling, for manufacture, and for agriculture that might have remained for decades isolated from communities which they could serve. When all is said, the problem of securing speedy and economical distribution of commodities is one that touches all humanity. Upon it depends man's existence.

Here's Program and Features of London's Big Motor Show

Opening date, Monday, Feb. 6, 7 p.m. Official opening 8 p.m.
Open daily thereafter Feb. 7 to 11, 10 a.m. to 10:30 p.m.
Admission, 30 cents, including tax.
Auspices of London Chamber of Commerce and London Automotive Retailers' Association.

Location—Armories, Dundas street.
How to get there—All street cars routes connecting therewith.
Number of exhibitors of passenger cars, 41.
Number of exhibitors of accessories, 22.
Manager, T. C. Kirby.

Show committee—Wilfred Hodgins, president; Tom Terry, treasurer; Frank McLaughlin, secretary; J. C. Beemer and J. McLaughlin.
Entertainment Committee and Banquet Committee—Messrs. Harry Morgan, Tom Terry, Lee Barager, Roy Simpson and Jim Cowan.

Refreshment, Hat and Coat and Check Rooms—L. O. D. E., Campbell Becher Chapter, Mrs. Greenaway, regent. Hot luncheons and dinners served daily.
Decorating by J. Gammage & Sons.
Public telephones in the show building for general use.

ANTICIPATE MOTOR CAR SHORTAGE DURING 1932

Will 1932 give us a shortage of new cars? Is the burning question of the dealers.

At this particular time dealers have a few cars in most sections, and can supply purchasers with immediate delivery, but they are all stocking cars for the big demand which will come in the spring, and their conversation with the factory people is principally on this question of more cars as soon as possible. Factory men state that their production is becoming greater daily, and will in practically every case be up to normal, and in some instances beyond it by spring, but they do not anticipate being able to supply the demand which is already beginning to make itself felt.

Consequently it is plain to see that the big choice will be made at the Motor Show, and the wise ones will order early.

made. On that date, Alexander Winton sold a car to Robert Allison of Fort Carbon, Pa. The first Oldsmobile were marketed the same year. Every improvement in serving civilization meets with opposition, and the automobile has been no exception. When Mr. Allison bought his first car there were nearly 30,000,000 horses in the country, and their owners and breeders bitterly opposed the innovation that was destined before long to replace so many of these animal-workers.

Today, the automobile industry is firmly established as one of the greatest factors in the progress of civilization. It is essential to hundreds of thousands of people in their business, and is playing a tremendously important part in developing the volume of business required by the present world's needs.

Producing, marketing and distributing any commodity in universal demand and requiring means of placing it at the service of that world requires highly concentrated effort, made possible only by abundant capital. The one item of the world's meat supply is a tremendous undertaking, and it has enlisted in its solution the biggest brains and the biggest resources. Without them the meat eater might either go hungry or pay a prohibitive price for his favorite nourishment. The meat-producing and handling industry has engaged the talents and the money of some of our biggest industrial figures. It is natural that the automobile industry serving a world-wide demand, should have done the same.

Market Opens in 1898. It was not until April 1, 1898, that the first sale to an individual outside the manufacturing companies was

made. On that date, Alexander Winton sold a car to Robert Allison of Fort Carbon, Pa. The first Oldsmobile were marketed the same year. AUTO INDUSTRY FOSTERS RAPID DEVELOPMENT OF PNEUMATIC TIRE TRADE

Story of Acceleration of Rubber and Fabric Manufactures
To Meet Demands of Motorists Constitutes
Wonderful Industrial Romance.

Many motorists look upon the pneumatic tire merely as incidental to the modern motor car, something that is to be expected. They fail to appreciate the important part this composition of rubber and fabric played in the development of the automobile. Without the pneumatic tire the automobile of today would not have been possible. The growth of the tire industry has been as remarkable as that of the car manufacturing field and when reduced to writing reads much like a romance. Just now the industry is about gaining its equilibrium after having been shaken up and tossed about during a period of depression into the depth of which it was suddenly plunged during the summer of 1920.

Not only are tires being made better than ever before, but they are being sold at prices that establish new low levels. From few industries is the public receiving greater return for its money. In most instances present prices for merchandise are greatly in excess of those quoted ten or twelve years ago. In the case of pneumatic tires, tremendously increased in efficiency, the prices are now 50 to 60 per cent under those of twelve years ago. The experimental stages have been passed. Ten years ago it was exceptional for a tire to render more than 4,000 miles of service, while today it is not uncommon to find casings that have traveled more than 20,000 miles. The mileage guarantee, which has been a feature of merchandising peculiar to the tire business, in themselves have provided a barometer of efficiency. The first definite guarantee offered by the manufacturers insured the tire user of at least 3,500 miles of service, while recent guarantees on fabrics have run from 6,000 to 7,500 miles. Cord tires, of course, have returned and have been guaranteed for a greater mileage.

Enters New Period.
With the development of the cord tire, now in almost general use on all but the smallest cars, the industry entered a new period and motorists were offered a product of greater efficiency and economy. The characteristic feature of the cord type of casing is that the cord is not fabric but a layer of separate cords, lying side by side, all running in one direction and held together with delicate threads which break when the tire is placed in service. The fabric tire is built up of a layer upon layer of closely woven cotton fabric, one thread being bent closely under and over other threads. When the tire goes into use these cross threads begin to saw against each other and gradually saw through, and the tire goes down. The elimination of this sawing action in the cord tire is responsible for the greater mileage it returns.

While the original cord tires made in this country were covered by English patents, the casing of this type with which we are familiar today is the result of development work by American tire engineers. So marked has been the advance of the cord tire that within a few years it is expected to be in universal service.

Another step in the direction of tire economy is the cutting down in the number of different sizes made by the various manufacturers. In place of some seventy sizes turned out in the past the industry shortly will be concentrating on the manu-

facture of nine tire sizes for passenger cars and a similar number for motor trucks. The economic saving which will result through this reduction cannot be definitely estimated, but it is easily appreciated that tremendous saving will be made owing to the fact that manufacturing costs will be decreased and dealers will not be obliged to carry such a large stock of tires to meet the demand. It is of course appreciated that it will take a considerable length of time to make it possible for dealers to eliminate carrying certain of what are called the non-standard sizes, but the demand for such sizes will decrease as the cars using them are worn out.

Discontinue Guarantees.

Not only have radical steps been taken toward greater economy in manufacture, but with the first of the year the industry put into effect an important revision of its merchandising policy. The long-standing and much abused definite mileage guarantee has been abolished, and the tire manufacturers are selling their product on the same basis as the makers of clothing, shoes and other commodities, backed by a guarantee against defects in material or workmanship. It places all tire users on an equal footing and relieves the careful motorist who gives proper attention to his tires from carrying the burden of the other type of car owner who runs his tires to shreds through neglect and thoughtless driving and then looks for the tire dealer and the manufacturer to grant him an adjustment when he is in the market for a new casing.

The mileage a motorist gets out of his tires hereafter will depend in a large measure upon himself. In the past a large percentage of the adjustments granted by dealers and manufacturers were made on what the trade terms a "policy" basis, the desire to keep the customer using their particular make of tire. Policy adjustments are now taboo and the user is required to place in writing any claim he may have for factory consideration. Allowances will be made only when defects are the fault of the factory. This will result in better cars being taken of tires.

It is believed that the elimination of the definite mileage guarantee will also have the effect of removing the questionable class of competition that has been offered by dealers and manufacturers who sold their product on adjustments rather than on actual service. Bargain sales with the mileage guarantee as the lure will not hold the attention of the car owner if he gives any consideration to the service he expects from the dealer of whom he makes a purchase. The reputable tire merchants who have always sold tires on the basis of service, are now in a better position than ever to insure their customers of a fair return for their money.

HARMONIOUS MOTORING

Discordant noises and vibrations from automobile driving may be abolished if the suggestions of Dr. Marage, before the French Academy of Sciences at Paris, are adopted. Dr. Marage says horns should be tuned in bass and the vibrations deadened by the use of lead or aluminum, so as not to irritate the ear.

Heads Gray-Dort

PRESIDENT ROBERT GRAY.

CLOSED CAR SPOTLIGHT.

By means of a simple knob control within, this spotlight can be at-

tached to closed cars and moved about without the necessity of opening the side window. The light may also be attached to the windshields of open cars.

HIGH-PRESSURE GUN.

Almost inaccessible places can be reached by this grease gun, which builds up a 500-pound pressure by one turn of the handle and ejects

its contents into the grease cup by the opening of a check valve at the nozzle. A small pin in the grease cup opens the valve. The handle of the gun need not be turned when the grease is ejected. Special cups are furnished with the gun.

FEW AUTOISTS KNOW HOW TO IDENTIFY CARS

Many Claimants Often Dispute Over Stolen Autos Which Police Recover.

T. C. KIRBY OFFERS IDEAS

Manager of London Motor Show Suggests Unchangeable Identification Marks.

T. C. Kirby, the manager of the London Motor Show, has many experiences of motorists losing their cars and not being able to identify them. In one case a motorist had his motor car stolen a few months ago, and after six weeks' absence it was recovered. It was brought up and placed for identification among 50 other cars, many of which were of the same series and style. The gentleman in question was told to go in and pick out his car. He was in the garage one-half hour, and at the end of that time came out with a car which the detective proved belonged to another citizen. His car was in that room, but he had to make the humiliating confession that for the life of him he could not identify it.

Couldn't Identify Car.

"We have found your car. Come down and identify it," said the officer over the telephone. "Sure, I'll be right there," said our friend. But when he got there, he could not deliver. He took along his note book with his number plate, but that had been changed six weeks before. He had engine number, but that, too, had been subject to modification. His car was there, but how could he prove it? He looked foolish and his feelings were of a similar design. At length the officer had to prove to the owner which car was his property. Could you do any better under like conditions?

"I knew of a young fellow, who hearing his car had been found, went down to drive it home and discovered three other fellows claiming his car. Each was all sure this was his car, a six-cylinder special Studebaker. This was the very color, same rip in the upholstery. All four

were certain, but the fellow who drove it away, a quiet-looking chap, was the man who stepped out and said: "Officer, if you will look on the under side of the right brake band you will find my initials, 'M. C.' When they scraped away the mud the initials were there sure enough. In twenty minutes he had her started and was away.

Suggests Expedients.

"I suggest a few simple expedients: With a punch put your initials

FEELS FUTURE OF INDUSTRY SOUND

"You cannot put the automotive industry down," remarked Mr. T. C. Kirby, the energetic manager of the 1922 London Motor Show, to our representative yesterday. "The word automotive is synonymous with transportation. That definition is more true today than ever before. The motor vehicle, whether passenger car or motor truck, is as essential to the prosperity of our national life as steamships and railroads. Abnormal business conditions may put a temporary check upon the customary activity. Some concerns, through bad management, may pass out of existence, but the industry as a whole has solid and permanent foundations." This fact would indicate that the men who have faith in the future of the motor industry are by no means cast down, but on the contrary are beaming over with enthusiasm over future prospects. The outlook today, continued Mr. Kirby, is brighter than it ever was before and the auto dealers feel it in their bones that this is the year that business can be got if they go after it. The days of getting business sitting in a big arm chair with your feet on the desk are past and it is only hard work that will produce results today. Salesmanship counts today as it never did before.

on various hidden places about the car frame. Pull out the upholstery tacks and slip your personal card in and tack down the upholstery. Scratch your initials inside the hub caps or the fuel tank cap. Drill four extra holes, and insert four brass screws in the running board. Drill a shallow hole in the car frame and fill with lead. Put at least two or three of your identification marks on your car. When in trouble a bent mudguard, a worn-out nut, a leaky connection, a cracked floor board, do not greatly

PAIGE

THE MOST BEAUTIFUL CAR IN AMERICA

Paige Invites Comparison

The Motor Show gives the citizens of London a splendid opportunity to make comparisons.

Paige welcomes comparisons. For in design, appointment and finish, Paige models challenge the most artistic achievements in motordom.

But really fine cars are also measured by performance. Therein lies the real significance of the records held by Paige on track and hill—not so much because of the exceptional speed and power revealed—but for the stamina they demonstrated.

From the standpoint of appearance, performance and sound investment the New Series 6-66 and New Series 6-44 Paige Models compel the serious consideration of the motor car investor.

EXHIBITED AT MOTOR SHOW---

LONDON SIX "STANDARD TOURING" MODEL.

IN the London Six you will find all the qualities combined to make a "Perfect Car."

Canada has long deserved such a car as The "London Six." In many lines of manufacturing she has asked odds of no other country, but when it came to Automobiles she had to rely on her sister nation to the south.

Her cities demanded a car that could take its place among the aristocrats of motordom, and vie with their best in lines of beauty. Her vast prairies and her rugged mountains called for a car that could consistently and quietly, and day after day, meet every difficulty of highroad and hill.

The "London Six," built in Canada, for Canada, is the answer to Canada's demand! Canadian brains conceived it, Canadian money is backing it, and Canadian workmen are building it.

It is a Canadian worthy of its citizenship---one that will with safety and dignity uphold Canada's reputation and carry to the farthest-flung corners of the British Empire a new conception of Canadian craftsmanship.

W. R. STANSELL.

W. R. STANSELL,
President and, General
Manager, and the man re-
sponsible. Designer of the
various models of the
"London Six," who is also
responsible for the won-
derful progress of London
Motors Limited during
the past year of its
history.

You are invited to visit our plant any day next week. Be sure to take advantage of this opportunity. It will certainly be interesting to see these cars under construction.

A Most Unique Four-Season Car

In W. R. Stansell's New Design, the "Supreme Touring" Model of the London Six we find the most practical Four-Season Car ever built. This model is the essence of all that can be desired in a real practical car. Automobile buyers have been waiting for years for just such a car, because it possesses qualities impossible to find in the ordinary Standard Touring, no matter how high-priced the car might be. This is your opportunity to buy Sedan Comfort in the Most Reasonable Priced Semi-Open Car ever built.

Don't look at this car at the Motor Show next week unless you're prepared to buy, for it will certainly give you the fever if you never had it before. This Model decidedly deserves its title, "Supreme Touring," for it is SUPREME, and will be a chief attraction at the Motor Show.

LONDON SIX "SUPREME TOURING" MODEL.

LONDON MOTORS, LIMITED

69 KING STREET

LONDON, CANADA

MOTORING-residents of London are particularly fortunate in living in a city which is the pivotal center of many trips of unexcelled beauty and interest.

Good roads diverging from London enable motorists to travel in comparative comfort through beautiful scenery to such important centers as Detroit, Niagara Falls,

Toronto, Hamilton and Windsor.

The surrounding country is such that the businessman, after a busy summer day, can enjoy a few hours' travel in the even-

ing, London being but a few hours distant from such places as Port Stanley, Port Talbot, on Lake Erie, or Grand Bend, Ipperwash and other places of interest, situated on Lake Huron.

NEW MODELS AT AUTO SHOW

Studebaker Offers Handsome Line of Bodies On Both Open and Closed Cars.

True to its reputation for springing sensations, Studebaker is again giving auto show visitors a genuine surprise in its new cars. Studebaker has done the unexpected—so often, in fact, that the public has come to look upon Studebaker for leadership in the things that are new.

With new bodies that give even more striking beauty, added appointments and conveniences making for greater completeness, and notable refinements in mechanical design, the new Studebaker cars greet visitors at the London show

as the most remarkable values that Studebaker has ever offered.

It is impossible to point to any one feature of the new Special-Six body and say: "Here is the beauty feature." Yet the impression is clear that there is something individual about it, due to the symmetrical appearance and the absence of unsightly angles. The body is finished in a deep, rich blue, with refinements that make it even more beautiful than last year's model. Refinements include parking lights in lower corners of the one-piece clear-vision windshield; windshield wiper; large beveled plate glass window in rear of the finely tailored top, and cowl ventilator controlled from dash.

Refinements have been incorporated in mechanical details also that make driving easier and the shifting of gears as silent as it is simple. The new perfected clutch is of the single plate, dry disc type in which the driven member is a single splinter rotating between two rings of friction material. A clutch brake serves to prevent spinning of transmission gears after the transmission cover, and is of the ball-

and-socket type, with an offset cone lever which makes gear shifting easy. Of 119-inch wheelbase, the Special-Six is noted for its roominess for both driver and passengers. The 60-horsepower 3 1/4 x 5-inch motor with detachable head, is of Studebaker design, with great resources of quiet, flexible, economical power. The Big-Six, too, is featured by a beautiful new style of body, designed and built in Studebaker shops, with heavy beaded edge, graceful cowl, larger and higher hood.

Mechanically, the Big-Six and the Special-Six follow largely the same principles, although by reason of its 126-inch wheelbase and 60-horsepower 3 7/8 x 5-inch detachable-head motor, the Big-Six is a larger and more powerful car. Instruments, including an 8-day clock, are attractively grouped on the dash. A further innovation is that the theft-proof built-in transmission lock, ignition lock, and tool compartment lock are operated with the same key.

Most auto manufacturers in France turn over their chassis to body makers for finishing the car.

Directs Beemer Co.

W. F. STAMBACH.

NEW LIGHT SIX, ALSO BIG CAR

Paige Adds Two New Models Making Line of Cars Complete in Sizes.

Performance, beauty and value are the three major points stressed by the Paige in presenting its line of passenger cars for 1922, now on exhibition at the London Automobile Show, under the capable direction of Hodges & Fergusson.

As in 1921 the Paige line is divided into two classes—models built on the 6-66 chassis and models built on the 6-44 chassis. In each instance, however, a new series is presented, embodying improvements and refinements and new features in appointments and equipment. New prices also are announced for all 1922 Paige cars, a sharp reduction having been made on each model.

"Our 1921 cars," says Harry M. Jewett, president of the Paige Detroit Motor Car Company, "made good to a very gratifying degree, especially as performers. In speed, power and responsiveness they were the best products we ever turned out. Our 6-66 Daytona model holds all the stock chassis speedway world's records from 5 to 100 miles. Our new series for 1922 is a considerable advance over 1921 because we continued to experiment and succeeded in making distinct mechanical improvements, and accomplished numerous refinements.

"As for the new series 6-44 models—they are designed, built and equipped for that large body of self-respecting motorists, whose good taste demands something distinctive, but whose business judgment dictates a careful consideration of the pocketbook.

"In conformity with the conditions now prevailing, and the demand for the utmost economy and the greatest possible value for every dollar spent, all our 1922 new series models are offered at greatly reduced prices."

NO-SOLDER TERMINALS. Wires may be attached to this new form of terminal without the use of solder. The terminal is in two parts.

The wire is pulled through the hole in the socket, the strands are divided and twisted around the lug and the cap screwed on.

American army left 6,500 passenger automobiles in France after the war.

MOTOR SHOW AIDS IN MERCHANDISING

London Exhibition To Be Real Business Stimulant.

The London Automobile Show of this year is to be a striking example of how a motor show can do these things which all the motor shows must do if they are to be successful in the years that are to come. One of the points made at the November meeting of the National Association of Automobile Show Managers in Chicago, was that shows must be made better in the future than they have been in the past if they are to

hold their position as stimulants of the industry.

Having passed through an era in which production methods were the big thought, we are entering an era in which merchandising and its development will be the great essential. This means that the shows, which are a part of the industry, merchandising and advertising, and which help hold the automobile in the lime-

light of public interest, must keep pace with developments and continue to hold the public interest.

This has been worked out remarkably well in this year's show. It is a real merchandising exhibition. It is being staged with a maximum of attention to the public interest, and the effort has been justified by the increased business that the show is developing. The attendance this

year will be, it is expected, double last year's figures, and the manager, T. C. Kirby, is looking for the pessimist who stated that motor shows would die out because the public would tire of them.

There was extraordinary good business done at the big New York show last week, and the success of the London show is more than assured.

DUNLOP TIRES

Ensure HIGH-MILEAGE—DOUBLE-LIFE

Q Dunlop leadership in Tiredom is most manifest. Mileage records almost unbelievable are piling up all over Canada.

Q The Special Mileage-Making Process, which is the basis of our Fabric Tires, has worked wonders.

Q Perfect shape and balance, stronger side walls to resist curb and rut abuse, special wear-resisting anti-skid tread, etc., add the last touch to popularizing to the full a tire that has long stood in high favor.

Q Dunlop "Cords" made good from their inception.

Q These tires taught motorists to expect more resiliency, greater air space, larger amount of material, better carrying capacity—in short, bigger mileage; and that is the standard by which all Cord Tires are judged to-day.

First place at the Show

For many years McLaughlin has occupied the premier position in the Canadian Automobile Shows. That McLaughlin should retain this place year after year reflects convincingly the high regard in which McLaughlin-Buick Cars are held by the Canadian public.

The McLaughlin-Buick is the outstanding example of the efficient Canadian built car. Heavy parts such as Motors and Axles, are manufactured in the new completely equipped General Motors plants in Walkerville. The assembling, body building, sheet metal work, top building, upholstering and painting, etc., is done at Oshawa. Canadian capital and Canadian labor combine in the production of the McLaughlin-Buick.

THIS NEW CAR LOOKS SNAPPY

First Product of Present Chalmers Organization Has Many Points.

The New Series Chalmers Six, to be shown Monday at the London automobile show, according to the Universal Motor Sales Company, local Chalmers dealers, embodies a greater advance than has ever before been registered in the highly developed six cylinder type.

"This car," states Mr. Lackie, "brings into reality all that motorists have hoped for in the automobile engine. It emphasizes by further improvement the remarkable and deservedly famous qualities of six cylinder construction. Always quiet and sure, practically free from vibration, with a constant and instantly responsive flow of power, the six-cylinder engine is well deserving of the great favor it has gained to date with automobile enthusiasts. But the new Chalmers Six so intensified these splendid features of its type that automobileists are bound to set up new standards for motor car performance. Chalmers' lightning pick-up removes the strain of driving in crowded traffic, and its great surplus of power is more than ample to meet any emergency or task to which it is set. Carburetion is brought to perfection and the utmost in power is taken from every drop of fuel.

"But not alone has mechanical advancement marked the activity of Chalmers in the past month; a beautiful body, complete and elaborate in equipment, is in keeping with the fine motor.

"The car hugs the ground, but its high hood and sides give massive, cruiser-like grace. The low, well-tailored top, and the massive one-piece windshield develop a long, rakish appearance.

"Steel disc wheels, which are regular equipment, fit in well with the general design and add their full share to beauty and safety. A spare wheel, furnished with the car, is carried on a heavy, specially designed wheel-carrier in the rear.

"Side curtains, which, when used, so often detract from the beauty of a car because of their ill-kept appearance, are given ideal storage places, when not in use, to keep them looking their best.

"The left door of all models holds the complete tool equipment—a feature usually attendant in only custom-built bodies.

"The closed models, coupe and sedan, are upholstered in tan, self-striped broadcloth, which effects a most luxurious appearance, as well as offering great resistance to wear. Cushions and back rests are deep and comfortable. Coach-work and finish are in thorough keeping with the fine mechanism, design and equipment of the cars."

"London Six" Heralds City's Genius

PRESIDENT W. R. STANSELL.

THE fame of London as an important industrial center has been noted abroad in many ways. But surely never in so striking a fashion as now, when London's own car, commercially known as "The London Six," is speeding out over the whole country, proclaiming wherever it goes, the quality of London workmanship and the genius of London brains.

It is by the accomplishment of such enterprises as the London Motors, Limited, that Canada is rising to her rightful place in the commercial world. Stability has long been the hall mark of Canadian made goods and to this characteristically Canadian quality of stability in the

"London Six" is added grace and beauty of form.

Such phenomenal industrial growths as that of the London Motors, Limited, are placing Canada in her rightful position in the commercial world.

Indeed no better means of advertising the city could be found than the distribution of these splendid cars bearing the name of our city "The London Six."

"The London Six," which will be seen at the London Motor Show at the Armories all next week, stands out as a monument to London endeavor and as a vital part of the motor industry in Canada. A unique model of this car—"Supreme Touring" will be a special feature at the show. This model promises to become very popular.

KEEP PROMISE TO MOTORISTS

Maxwell Is Result of Pledge To Produce Cars of Much Merit.

"The much-admired new Maxwell is the definite result of a promise made when the present organization took hold of the Maxwell interests," is the statement of Universal Motor Sales, in charges of sales of the company in London.

"When this organization took charge in the fall of 1920, the first steps were to manufacture the Maxwell car in a way that assured the public reliable, comfortable transportation at low cost.

"The factory organization was perfected, new standards established, processes improved and a car that immediately earned the description 'good' was offered to the public.

"But besides this, the new organization pledged itself to make the Maxwell a still better car—to produce a really fine automobile at a price that would be almost unbelievable.

"The history of the automobile was carefully gone over and the forward steps in design particularly scrutinized. The already excellent engineering staff of the Maxwell company was augmented by men who had contributed much to the development of the motor car. These able men were given instructions to design an automobile superior to anything that had ever been offered at an approximate price.

"The great manufacturing facilities of Maxwell were further extended, the market was scoured to assure the best of materials and the experimental work carried out with the most careful attention.

"The result of these efforts is the new series of the Maxwell, which we are confident amply fulfills the pledge made slightly more than one year ago.

"The already wonderful motor of the Maxwell was further refined, beautiful bodies which made certain comfort and convenience in riding were designed, and the result is that these cars have been hailed by the trade and public as masterpieces of motor car building.

"It is the beauty of the new series that has claimed major attention, but to those who are mechanically inclined, the mechanism is of even greater interest.

"We honestly believe that no such automobile value has ever been offered to the public. In this belief we are confirmed by the enthusiastic demand for the new series which has grown steadily ever since the cars were first shown.

"They were heralded as a marked advance in automobile design in each city where they were shown; thousands visited salesrooms to inspect them, and the public verdict is unanimous in its admiration."

PUBLIC DEMAND GREATER VALUE

Cadillac President Declares New Times Make Customers More Exacting.

"The discriminating, critical buying public that determined sales previous to the war in 1914 has once again returned and wants a dollar's worth of value for every dollar spent," declares H. H. Rice, president of Cadillac Motor Car Co.

"The public today has money. The public today will spend. But you have to convince them that they are getting their money's worth; and what is more to the point, they know when they are getting their money's worth. Getting their money's worth does not mean getting cheap products—it simply means getting full value for their expenditure.

"So it is only natural that they are turning more and more to products that are standard values in their lines. You will note that they are buying products which have built up a reputation for years.

"It has been our experience that this is the way the public mind is today reasoning, judging from our large number of orders for the new Type 81 Cadillac. They know what the Cadillac has done for 13 years—its dependability, its easy riding qualities—and they know that each succeeding model is being refined and being made just a little better. For the purchaser there is no experimenting, no gambling, in making an investment in a Cadillac."

STEADY FOOT CONTROL.

Rough road driving causes the foot to bob up and down on the accelerator. This air control device is made to remedy that and steady the

flow of gasoline. The large pedal resting on the accelerator has an air cylinder operating over a piston attached to the toe board. It can be adjusted for any car with pedal control.

CAMPING CAR WANTED

Growth in popularity of summer touring may result in production of a new kind of automobile especially adapted to this purpose. It will be the kind of car that will make room, in as compact a way as possible, for baggage, camping equipment and all other necessities of a long trip.

Live London Auto Sales Firm

TOP LEFT, Wilfred Hodgins, president Hodgins & Ferguson, and president London Auto Show Committee; right, W. W. Ferguson, vice-president; lower left, A. E. Wilkinson, sales manager; right, A. R. Drennan, service manager.

WEAK BATTERY HINT.

If a cell of the battery goes dead, there is a way to overcome this. After finding the dead cell by testing with a hydrometer or voltmeter, hold a stiff iron bar—a wrench will do—firmly in

contact with the posts of the dead cell and press the starter button. That closes the circuit of the live cells and furnishes enough current to start the motor. Thereafter, the generator furnishes the current for ignition.

A law is being discussed in the New York Legislature which would compel people to walk on the left side of country roads.

NO-BATTERY LIGHT.

This pocket flash lamp has no battery. Instead the regular pull of

the lever spins a small generator which supplies the current for the light.

Inspect the water system for leaks. Radiator and hood covers insure easier starting. The largest car is the Spanish Elizalde, whose hood is five feet high.

Cadillac Given Fourth Place of Honor at Big Motor Show

The Cadillac Motor Car Company has the fourth place of honor at the National Show. Such is the report just received by Boemer & Co., Limited, local Cadillac dealers.

The award of places at the National Show is made each year by the National Automobile Chamber of Commerce on the basis of the volume of business done the previous year by each automobile company. Basing the award upon the total volume of business during the previous year was decided upon by the National Automobile Chamber of Commerce as the fairest way to determine the most popular cars, as expressed in public buying confidence.

Officials of the Cadillac Motor Car Company are sponsors for the statement that they make more than 50 per cent of all "quality" cars, or more than 50 per cent of the total of all cars selling at the same price and higher prices.

"It is a unique and significant feat for a car in the class of the Cadillac

to attain the volume of production necessary to have obtained fourth place at the National Show," comments Lynn McNaughton, general sales manager of the company. "It was noteworthy when the Cadillac obtained seventh place last year, but the astonishing volume of business since that time is even more significant. So far the Cadillac Motor Car Company is the only organization in the world committed to quality cars that has been able to maintain big production."

DANGER FROM EXHAUST

The danger in running an engine in a small closed garage equals that of blowing out the gas, says Professor Vandell Henderson of Yale. A car produces one cubic foot or more of the deadly carbon monoxide gas a minute. In a small closed garage, Professor Henderson calculates, the exhaust from a car can contaminate the air to a deadly concentration within three or four minutes.

See the Exhibit of Prest-O-Lite Batteries At the Motor Show

Let us tell you about Storage Batteries—and Prest-O-Lite Batteries in particular. Every motor owner should know in detail just how a battery is constructed and what its functions are in connection with the operation of the engine, lights, horn, and other electrical appliances on the car.

Prest-O-Lite Batteries are made in Canada in the largest Storage Battery Plant in the British Empire. The majority of Canadian-built Motor Cars use Prest-O-Lite Batteries as standard equipment—because their engineers have selected Prest-O-Lite on its merits and proven dependability.

PREST-O PLATES Mean Long-Life Batteries

Stop and consider these important facts. The plates are the backbone of the battery. Most battery trouble originates in the plates. You never need a new battery as long as the plates are right.

The famous Prest-O-Plate, introduced years ago, has been developed and improved by Prest-O-Lite experts, until today we believe it is the world's best battery plate. Therein lies the secret of Prest-O-Lite's longer life and greater pep and power—that ready delivery of power which makes it the battery of recognized cold weather superiority.

TWO CARS THAT CAN'T BE BEAT ESSEX HUDSON

The Refined Car

The Super-Six

COACH MODEL \$2,065.

A GREATER SUPER-SIX FOR LESS MONEY.

You will like the Essex Coach we now show for the first time. You will like its good looks, its utility, fine quality and attractive price.

It fulfills the requirement of business and professional men with economy and satisfaction. And it also is amply large to meet the family need in both city and country service.

Essex developed the Coach to meet your wants. Now you can get a fine closed car for a trifle more than you pay for an open car.

The performance is the same as that of the open models. It will gratify your demands in utility and reliability.

There is much about the Essex Coach that will appeal to you beside its attractive appearance. All controls are easy to reach and easy to operate. Clutch and brake pedals require hardly more than a touch. You will like its response to wheel and throttle.

It is fleet and nimble. It rides easily over rough roads and may be driven in the country the same as an open car.

It is easily turned and parked in narrow spaces. Very little attention is required to keep it in prime condition.

Both the chassis and body are built to give long service without annoyance or expense. An unusually sturdy frame and the manner of body construction practically eliminates squeaks and rattles. Doors are hung on four hinges and rest on fittings that keep them tight and solid.

THE ESSEX has a three-bearing crank shaft and all Bosch ignition.

EXPERT TELLS HOW TO PUT MOTOR IN FIRST CLASS CONDITION FOR TOURING

Detailed Explanations For No-vice Are Given—Removal of Carbon, Renovation of Chassis, Grinding of Valves and Care of Curtain and Top Among Those Things Essential For Good Service.

BY C. K. BROKAW.

A car that has seen a season's service needs a good rubbing down, cleaning out and thorough lubrication to put it in good shape for long runs—needs it anyhow. Of course it is taken for granted that the grease and oil cups have been, are and will be regularly attended to. Here is a list of what should be done:

1. Remove carbon from engine.
2. Grind valves.
3. Clean gasoline line.
4. Flush out crankcase.
5. Adjust valves.
6. Care for clutch.
7. Clean and oil gears.
8. Clean and oil universal.
9. Clean and oil differential.
10. Adjust bearings.
11. Adjust brakes.
12. Care for tires.
13. Renovate chassis.
14. Clean and polish body.
15. Wipe up exposed metal.
16. Care for top.
17. Care for curtains.
18. Look it all over again.

The best incentive for a careful and thorough overhauling is to have things neat and shipshape before you start. If the tonneau is full of spare tires, rags, tools and junk, or the garage floor is a mass of dirt and litter, the psychological effect will not improve your work.

Carbon can be removed in a number of different ways. Some are long ways and some are short ways, and the time required depends on the equipment one has.

The oxygen method of burning out carbon is being used more and more extensively in garages. We even know of some owners who have plants of their own, but it is a considerable investment for one car use. The process is not one which will do damage to the cylinders and pistons, as some people suppose. If properly handled it is perfectly safe.

The day before operations are to begin the engine should be given the conventional kerosene treatment. A half tumblerful of kerosene is poured into each cylinder and permitted to remain there over night.

Burning Or Scraping.
As a precaution against fire the gasoline should be shut off from the carburetor and the engine started so that the fuel in the line will be consumed first. Work is done on one cylinder at a time. If the engine

is constructed with a cylinder plug remove this. If it has no plug use the spark plug hole. The engine is turned over until the piston is at top centre. The spark plug should be removed, as the flame will burn the points and otherwise damage them if they are not. Old spark plugs inserted in the holes will facilitate matters.

Most of the outfits for this work are fitted with gauges. The cock should be opened for a pressure approximating twelve pounds. The hose attached to the tank has at its end an injector tube. This tube is directed into the cylinder. The injector is controlled by a valve, either with a trigger or an easily operated handle. A lighted match is dropped into the cylinder and the injector tube inserted, igniting the carbon. The tube should be moved constantly to cover as large an area as possible.

The combustion of the carbon is accompanied by sparks and probably some flame from the burning oil. Once this carbon begins to burn the action is continued as long as the oxygen is being supplied. Remember, if you do not want to put new ones, take them out and buy old ones in their place.

Another commonly used method of carbon removal is known as the scraping process. Carbon scraping is sometimes accomplished successfully without removing the cylinders. Usually three scrapers are required to perform this work, and these may be obtained from any motor car supply store. It is necessary oftentimes to have the scrapers designed for the particular engine upon which they are to be used. There are types procurable, however, that have spring shanks that will permit the scraper to be directed into all the crooks and crevices of the cylinder heads.

Drain Crankcase.
The first step in scraping carbon is to drain all the oil off the crankcase, and, if possible, take off the cover of the oil reservoir. The cylinder plug should be removed. Of course, if the engine has a detachable head the scraping process is a simple matter and needs no great amount of directions.

All the valves should be removed from the engine, and the magneto, carburetor and other exposed parts

covered with cloth, so that no carbon dust will make its way to these parts. In removing the valves place them on the work bench, in the order that they are removed, so that in replacing them they will be put back in their proper order.

The scraper with a flat scraping surface should be used first. This tool should be drawn back and forth across the piston, head, and the operation repeated until the scratching sensation disappears and the scraper seems to glide over the surface with which it is in contact. The scratching sensation is due to the scraper cutting the crystalline carbon deposit. Care should be taken not to gouge grooves into the metal. If there is a plug on the other side of the cylinder the scraper should be inserted and the scraping resumed on the other side of the piston head. Remember! Don't turn the engine over when the carbon is being scraped. The fine particles of carbon will work their way into the rings and cause trouble. If compressed air is available a blast should be turned into the cylinder every few minutes to blow the free carbon out. A hand bellows will serve if there is no compressed air. You can even use a hand tire pump.

Kerosene In Cylinders.
After the piston has been thoroughly scraped the cylinder head should get its treatment. It is difficult to get a scraper that will suffice for every make of motor. The curvature of the scraper for the cylinder head should be equal to the curvature of the top of the cylinder or the cylinder or very nearly so. It may be that a pointed scraper will be the only one which will fit the job and it will be a long painstaking process to get all the carbon off with this instrument.

Scraping should continue in all directions until the blast of air does not blow out any more carbon dust. Too much scraping is as bad as too little. If the scraping is not carefully done there will be jagged edges of carbon, which will heat from the motor, explosions, become incandescent and cause premature firing.

After as much carbon as possible has been removed from the cylinders a half tumblerful of kerosene should be poured into each one and the engine turned over a few times. The crankcase should be thoroughly flushed out with kerosene, drained and new oil inserted. The valve seats and all other working engine parts should have their kerosene bath and receive a re-oiling.

It is customary to grind the valves after removing carbon by the scraping method. It is not a difficult process to grind in valves. It is a slow process, and is better done the more patient and untiring the operator is. But don't let them tell you it requires a trained expert or a master mechanic. Such is not the case.

The first thing to do in grinding valves is to separate the valves from the parts which are holding them fast. In practically all engines the

valve springs are held in place on the valve stem by a key. To replace this key it is necessary to compress the spring and drive the key out. Probably more profitably has been delivered over this little job of releasing a valve spring than in any other repair job on a motor car. This verbal outlet of bad temper can be directly attributed to the fact that the operator fooled around with his hands first and used his brains afterwards. Do not try to remove that spring without formulating some system in your head for its removal before you start operations.

Preparing For Grinding.
Of course, the best thing to have is a tool especially designed for the purpose. There are several very neat little devices on the market that handle this job of valve compressing in commendable style. If you haven't one of these you must pry the spring over. Now stop and think it over. Don't try to do it with a file. A file is made of brittle metal, and it does not take much pressure to snap it in two.

Get a bar of steel. That will not break, and it will give plenty of leverage. If you can get someone to help with the prying, you will have less trouble in getting the key out.

You should provide yourself with a valve-grinding compound. Are you going to grind your valves after reading this story? All right, then put that down on a piece of paper. Buy some valve-grinding compound. Lift the valve out of its seat and apply this grinding paste to the rim of the seat; then, with a screwdriver or valve-grinding tool, oscillate the valve (without applying any pressure) fifty to a hundred times, lift the valve, give it a half-turn, gently re-seat it, and continue grinding as above, from time to time applying more compound, as at first, till the pits disappear.

When a valve stem is not just such a distance from the valve lifter, the valve either does not open enough or stays open all the time. Generally it does not open enough. A matter of .01 inch in the lift of the valve makes a world of difference in the power. You simply cannot set them by guess and get a good job. You are not a good enough guesser.

You should provide yourself with a valve clearance gauge, which

FLOOR BOARD CREEPER.
By attaching casters to each of the corners of the automobile floor

board, as shown, a creeper may be devised for use in private garages.

should be about .004 inch thick. If this cannot be had, use a calling card. Calling cards range in thickness from .0035 to .0045 inch, and that is close enough to give a satisfactory adjustment. The calling card or gauge should be just a loose fit between the lifter and the stem, touching both parts. Do not draw it down to a tight fit, so that it card or gauge. There can be a difference of .001 inch or over by tightening down too much. Adjust every valve the same.

Caring For Clutch.
Of course, the proper care for the clutch depends entirely on the kind of a clutch you have, whether a multiple disk, a cone or a dry disk. It is well to say here a clutch in a car, which has been built within the last two or three years, is more or less everlasting and trouble-proof. Then, too, the driving public is gradually learning the value of handling a clutch with care. By sad experience they have found the woe in allowing a clutch to slip and jerk, and they are handling them more wisely. If you are one of the old-timers that abuse a clutch stop it. You don't wind your watch with a pair of pliers.

The cone clutch should be examined carefully. If the leather is burned down excessively, it should be replaced. If the leather is still plenty thick, but is crusted with charred and dirty-looking surface, apply a liberal dose of neat-foot oil and let this soak in. Then, if the clutch slips you can insert a dose of Fuller's earth or powdered sulphur.

If you have a dry disk clutch, about the only thing you can find wrong would be the disks themselves, and this is not likely. If the disks are worn down and shiny you should put in new ones, because these badly-worn disks never will carry you through the season, and now is the time to make replacements instead of some sun-shiny, hot summer afternoon when you are touring in the country empty miles from home or service station. The same is true of the multiple disk. In the evening jack up a rear wheel, clutch. An overnight kerosene bath is a good prescription for this type. throw the car in gear, and, with engine running, let the clutch in and out until the kerosene has squeezed all through the plates. Then in the morning drain the oil out, and if it is the oil-bath type, insert a half-pint or so of lubricating oil.

Washing the Gearset.
The gearset should receive much the same treatment as the disk clutch. Wash out all the grease with kerosene. Be sure you get it out of the gear teeth. A grease gun filled with kerosene will help in forcing out the gummy oil. Dry the case thoroughly after the bath and insert clean oil. If you are tempted to fill the gearset case with hard grease you had better read your instruction book or communi-

cate with the factory or service station first. There are not very many gearsets made which are adapted to the use of hard grease, and a good many of them can be ruined by its use.

The majority of gearsets are made with no adjustment to the bearings. It is a very infrequent occurrence when a gearset bearing becomes loose, and then it can generally be attributed to carelessness on the part of the owner in failing to keep the gearbox full of oil. It is well to ascertain, however, whether things are loose, and this can be done by endeavoring to push the shaft which connects the gearset with the rear axle back and forth. If there is any play over a very slight movement the bearings need adjustment, if possible, or replacement if no adjustment is provided.

Oiling the Universal.
Friend Car Owner, would that you would learn the absolute need of

caring for the universals. Most universals need oiling every month, some of them, two or three times a season, and some of them, of the non-lubricating type, need no care at all. Find out what kind you have. If the universal is of the enclosed type, the shell should be removed, the pins taken out, and everything cleaned. If there is a looseness in the bearings, by all means put in new bushings, or return the universal to the maker and have it repaired. Wash everything out and fill it with hard grease. Fill it. Don't put just a dab in. Grease is cheaper than universals.

The differential needs its cleaning as well as the other driving units. The kerosene flush is equally serviceable here. When you are ready to put in new lubricant, scratch your head a bit and reason it out whether you should use the hard grease or flowing oil. There is a very small amount of heat generated in the dif-

ferential. Gears should be adjusted, if necessary, with neither too much nor too little backlash (play). This is no job for a novice. Neither is that of bearing adjustment, let alone bearing scrapings. Wherever there is excess play it should be taken up. All nuts, bolts, cap screws and studs should be tight. If there are knocks, other than pre-ignition knocks, in your car—unless you are in the know, you will find it cheaper and more satisfactory to have a reputable service station take 'em out than experiment to that end yourself, or if you want to learn how 'tis done, have an expert do it for you in your own garage.

BEEMER'S

"The Home of Good Used Cars"

Show Week Specials

During Show week Beemer's will have a special "At Home" of Good Used Cars. Cars shown will include our own line, Cadillac and Reo, and also Packard, Hudson, Chalmers, McLaughlin and Fords. See the new cars at the Motor Show and then come to Beemer's at Queen's avenue. You will find some very attractive buys.

The New 490 Special \$895

F. O. B. Oshawa Sales Tax Extra

The riding qualities of this car are comparable with cars twice and three times its cost. It is an improvement over the regular 490 in appearance, and that is saying a good deal.

It is equipped with a special 75-mile per hour speedometer. This equip-

ment is not found on some of the highest powered cars. This all goes to show that the New 490 Special has not been wrongly named, when it is called the small car De Luxe. A demonstration will satisfy you that the 490 Special is equal to all that has been claimed for it.

There will be a most attractive display of Chevrolet models in our booth at the Motor Show.

A Cordial Invitation Is Extended To All

The New 4-door 490 Sedan

\$1195 F. O. B. OSHAWA Sales Tax Extra

A NEW standard of value is set by this new Chevrolet "490" Four Door Sedan at \$1195, f. o. b. Oshawa, Sales Tax extra. In body appointments finish, comfort and beauty, this new model compares favorably with closed cars two and three times its price. The Four Doors afford easy access to both front and rear compartments. The upholstery is beautifully done in dur-

able automobile cloth. This model, with all other Chevrolet models, is equipped with new rear axle, new hand control emergency brake lever and the gasoline tank is at the rear end of the car supplied to the engine by vacuum feed. This new sedan will appeal to thousands of motorists who want closed car comfort together with a powerful and efficient automobile.

New Type Springs with high grade upholstery make this car as easy riding as the most luxurious limousine.

26.2 MILES TO GALLON MADE

Distance Studebaker Travels On Fuel Unit Surprises Observers of Tests.

With the report of a 30 per cent increase in Studebaker car sales for 1921 over the preceding year, comes also a statement from that concern advising that their repair parts business for 1921 was 12 per cent less than in 1920, notwithstanding the fact that 118,000 cars were produced and sold in 1920 and 1921. In view of the increased number of cars, one would naturally believe that their repair parts business would show a slight increase, or at least, remain unchanged.

Repair Costs Small. According to the statement issued by Studebaker, and first published in New York City during the Twenty-second Annual Automobile Show held in that city in January, \$16 worth of parts per car for repairs from all causes, including accidents, were furnished Studebaker cars during 1921. This figure, of course, is based on the estimated number of Studebaker cars in operation during the past year.

In ten publicly conducted tests in as many cities throughout the Dominion, the fuel economy of the Studebaker Light-Six was recently proved in a striking manner through the establishing of an average of 23.3 miles to the gallon of gasoline.

Public Tests Held. Figures giving the mileage per gallon recorded in each city in which the public tests were held, have been received here, and are made public by Frank McLachlan, the Studebaker distributor in London.

The tests, made under a wide variety of road conditions, showed the following results.

	Miles.
Toronto	23.8
Montreal	25.3
Owen Sound	21.5
Vancouver	23.5
Kelowna	25.9
Vernon	23.7
Hamilton	24.5
Victoria	25.7
Penticton	25.7
Revelstoke	23.2

From the above, it is seen that the Studebaker Light-Six, a neck down model, was then driven until its supply of gasoline was exhausted, at which point a reading of the speedometer was taken, and the mileage for the gallon of gasoline thus determined.

German automobile factories are congested with home orders. Number of electric trucks in New York increased four times in the last year. Average age of car traded in for a new one is said to be 28 months.

WHAT FORD PRODUCTS MEAN TO CANADIAN CITIES AND FARMS

If everybody in the automobile industry is half as busy as Mr. M. F. Smith, manager of the London Branch of the Ford Motor Company of Canada, Limited, then there is no doubt that 1922 is going to be a better year for business than 1921. Mr. Smith was up to his neck in work when our representative entered, but was not too engrossed to give The London Advertiser a line on Ford activities for the present year.

To the question, "What is your forecast for 1922 business?" Mr. Smith replied: "I believe 1922 is going to see a general revival of industry. It won't be a year of inflated prices or a boom year, although some people may get fooled into thinking so as matters improve. But it is going to be a good year for every hard worker whose business is well organized and reasonably financed. And if it is a year of normal prosperity for industry in general, that well-being is going to be reflected by the automobile industry. As for the Ford Motor Company of Canada, it is going to be more than a good year—it is going to be a Ford year with a big F."

"I have strong reasons for my optimism as regards our own company. They are these:

"The Ford car is in an entirely different position from any other car on the market. It has got out of the mere car stage

into being a public utility. People have got to buy Ford cars just the same as cities must have street railways. In a certain sense we are not selling cars and trucks at all, but are selling cheap transportation.

"We have the lowest-priced cars and trucks on the market, but we have a great deal more. We have such a widespread organization rendering service that even if a cheaper car was to endeavor to displace us it would fail to do so.

"Then on account of the tremendous demand for our products we can afford to give the public more for their money than anybody else could attempt to do.

"At the same time, although we are really outside the bounds of competition, we have to acknowledge that even 1922 is going to see a buyer's market. There won't be any sales made over the counter even by Ford dealers. We shall have to go out and preach the gospel of cheap transportation all over Canada.

Motorization Cuts Costs. "We have to show the farmer and the businessman and the commercial houses that although money is still tight they cannot afford to neglect motorization. To motorize their business is to cut down costs and to foster expansion.

"The farmer who's getting low prices for his produce must grow more in order to maintain his income. Time will not permit him to produce more with horsepower but the tractor will let him put in a bigger acreage in shorter time or enable him to improve the cultivation and increase the yield of his present acreage.

"At this very moment the Ford Motor Company is launching the greatest sales campaign ever launched in the Dominion. From coast to coast the whole selling force has been reorganized and a vast simultaneous canvass of every household, every farm, every firm and every municipal body is now under way. Some 700 dealers in nine branches are at present literally hand-combing their territories for live prospects. In two months' time there should not be a home 'in Canada which has not heard the Ford message. Returns from Winnipeg where this system was first inaugurated show results which astound even its opponents.

"I'll tell you why I know this co-operative movement of all dealers will prove a success. Our recent closed car campaign proved it to me. This campaign, which was launched by the home office in September was productive of nearly a 40 per

cent increase in the sale of Ford closed models for the present winter over the previous winter, yet 1920 is considered to have been a year of depression.

"Another reason why I am optimistic about Ford business for the current year is that every dealer and salesman in the organization seems sold on his job. There is a genuine enthusiasm for the products they sell which extends beyond a mere desire for profits and commission. Never was the Ford organization more healthy at heart, and it is an axiom of business that if the dealers are sold the public is sold also—of course, in the pleasant sense of the word 'sold'."

Price Cut Stimulates Demand. "To return to the domestic prospects for 1922, I would like to point out that the recent reductions in the price of our cars is going to stimulate demand. A few people are hanging off and waiting for them to drop still lower. They are making a mistake in doing so. In the first place, the four cuts in price which have been made in the last sixteen months have all been justified by a drop in the cost of raw materials.

"A visit to the London Motor Show will convince you that no economically inclined man need even think of a better purchase than a Ford car."

AUTO HELPS KEEP BOYS ON FARM

Mr. T. C. Kirby, manager of the London Motor Show, says that the motor car has proved to be the one best bet for this purpose. A certain popular song writer struck a keynote vital to the country's life some time ago when the query was sounded: "How are you going to keep them down on the farm?" The problems involved in that phrase have assumed mountainous proportions.

The dearth of the farm help and the immigration of the young people of the rural communities to the cities are responsible in no small measure for the high cost of all foods and the

scarcity of many heretofore abundant products of the farm.

Wages in the industrial centres have naturally attracted the farm hand, but behind it all lies the lure of the city, with its amusements, bright lights and greater educational opportunities. The younger generation will not remain secluded and alone on the farm in the face of this call of the bigger world.

The motor car has accomplished more than any single agent in shaking farm life more enjoyable and farm folks more contented; it has extended their range of acquaintance and greatly broadened their social life. More farmers are buying cars than city dwellers; some have gone the limit in the effort to keep the family together.

SEAT FOR BABY.

Baby may have a comfortable and safe place in the tonneau of the car by the construction of this simple

seat. It is made merely of iron rod and a board. The rod is bent so it will hold the board and also hang from the back of the seat.

DURANT FIRM TO SHOW AT LONDON

The 1922 London Motor Show will see the first display in Canada of the new and anxiously-looked-for Durant cars. This powerful and wealthy company has been exerting itself with a view to having its show models before the public at the right time. The five models that will be shown at the London Motor Show are a Durant four-cylinder sedan, a six-cylinder touring, a four-cylinder frame model featuring the Durant tubular backbone, a Durant four-

cylinder chassis complete and a Durant four-cylinder model touring. These five cars will be shipped direct to the Montreal Motor Show at the close of the London exhibition. The Durant company is looking forward to a record business during the coming season, and Western Ontario is looked upon as a very good ground for business, hence the first big exhibition of these cars at the London show.

Tire production is increasing, say Akron tire men. Vulcanized rubber can now be made in any shape or color. Between 60 and 80 per cent. of cars bought today are open.

HOLDS BLANKET DOWN.

An easy way to keep the blanket from being blown off the radiator is to stretch a screen door spring around

the radiator cap and over the covering, and attach it by wires to any abutment at each side of the chassis.

SUGGESTS EASY WAY TO RESTORE BENT FENDERS

An easy and inexpensive way to remove dents from fenders is to remove the fender from the car, jack-up the rear wheel, place the fender on the floor directly under the wheel, being careful to place some padding under the fender so as not to injure the finish. Lower the wheel onto the fender, and roll the car back and forth. The wheel conforming to the shape of the fender will press out the dent in a very satisfactory manner.

Announcing the arrival in London of the New Series Good Maxwell and Chalmers Motor Cars

THESE CARS were the brightest and most outstanding features of the large motor shows in the east and the same exhibit will be shown at the big London show.

We have also completed negotiations whereby this line of cars will be distributed in the London territory by a live organization.

CHAPTER XIII.—MORNING GLORY

By Zoe Beckley

"Do you know, Polly darling," said Paul, "that this very taxi-cab we're in is a war veteran? It's one of those blessed old rattlers that chugged up to the Marne on that awful September 6." Polly's mouth opened in awe as she gazed about the old vehicle and up at the fat chauffeur, "—and maybe this old fellow himself was one of the men who pushed back the Germans at Aisne."

"But here's our hotel, dear," "Oh, Paul!" squeezing his arm tight, "I love this one. What an adorable little street! And there's the Madeleine—I recognize it from the pictures I've been brought up on all my life. What splendid pillars! And—look, Paul—there's the stone saint that had his poor head blown off by Big Bertha. . . Oh, what a sweet little hotel!"

Next morning the gay spring sunshine striking across her face woke Polly early. She kissed Paul's eyes. "Come, blessed old boy, don't sleep another minute! I give you quarter of an hour to dress and get down to breakfast. I can't wait! If you don't hurry I'll jump out of the window and mess up that sweet little couple-stoned chauffeur!"

"We don't go down to breakfast, Madame Ignorance. Breakfast comes up to us—rolls and coffee. That's all you get!"

The next maid brought it on a tray and Polly alternated her nibbles of crisp roll and mouthfuls of coffee-and-hot-milk with squeals of delight and impatient urgings of Paul to hurry.

In the street was the fresh smell of morning. Cafes were being swept and garnished, bakers' boys trudged along with baskets of yardlong brown loaves, a shop at the corner was a blaze of oranges, carrots and luscious lettuce and then suddenly upon Polly's eyes burst the glory of the flower market about the Madeleine. She was on tiptoe with joy. Lusty peasant women in fat skirts smiled at the couple.

"Ah—ah—les violettes pour Mignonne! Fifty centimes la botte! Sweet—sweet!" And Paul bought "Mignonne" a bunch and pinned them on her jacket.

NEW LAMP BURNS 94% AIR

Beats Electric or Gas.

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean safe. Burns 94 per cent air and 6 per cent common kerosene (coal oil).

The inventor, S. E. Johnson, 246 Craig St. W., Montreal, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make \$250 to \$500 per month.—Adv.

Frank McLachlin

Spare Time Jobs for Father

The usual way of winding up a clothes line is just in a clumsy ball. This comes unraveled and is unhandy.

An easy way to overcome this trouble is to build a clothesline roller. One stick for a centerpiece with cross pieces at either end will do the trick.

ADVENTURES OF THE TWINS.

LESSONS

(By Olive Roberts Barton.)

She was glad to see the visitors.

MOTHER NATURE was the oldest fairy in Fairyland, but she looked the youngest. She was quite beautiful, with clear blue eyes, and soft wavy hair and a smile that made you forget there was such a thing as unhappiness or trouble in the world.

She was glad to see the visitors, and set them chairs at once. "We've just started our lessons," she said. "The flying seeds come up here to Thistle-down Land to learn how and where to grow. I'm calling the roll now to see if there are any absentees."

"When everyone was comfortable she went back to her desk and began.

"Sadie Thistle!"

"Present."

"Jimmy Milk-Weed!"

"Present."

"Billy, Dick and Charlie Dandelion!"

"Late!"

"That's our fault," explained Buskins. "They carried us up here to the sky, so they couldn't hurry."

"Excused," said Mother Nature, marking in her book. "Nanny Plume Thistle!"

"Present."

"Johnny Cotton Thistle!"

"Here."

"Dan Globe Thistle!"

"Present." And so it went on. Mother Nature closed her book and began lessons. "Will the thistle-seeds please come up to class."

Nanny, Johnny and Dan went forward.

"Nanny, what is to be your color when you bloom?"

"Red," answered the little seed girl.

"Correct. Johnny, what is yours?"

"White," said the good little Johnny Cotton Thistle.

"And what's yours, Dan?"

"Blue!" said Dan promptly.

"All very good," nodded Mother Nature. "When you go back to the earth, each of you take root across the road from Widow McBride's cottage, so that she can look out and see your red, white and blue blossoms and think of the flag her boy fought for. But be careful to keep back from the road so that you won't prick the bare feet of the school children who pass. That will do now, my dears. Will Billy, Dick and Charlie Dandelion, please come to class next?"

To Be Continued.

LESS SUGAR.

If raisins or dates are cooked in rice pudding or bread pudding, much less sugar will be required.

GUNSIGHT PASS

©1922 by WILLIAM MACLEOD RAINES. All rights reserved. Printed by permission of the author.

BEGIN HERE TODAY DAVE SANDERS, range rider on the D Bar Lazy R outfit, learns that his pet pony, Chiquito, has been stolen by

A. MILLER, a gambler, and his confederate, GEORGE DOBLE. Miller and Doble are implicated in the kidnapping of

EMERSON CRAWFORD, Sanders' employer. Dave rescues the ranchowner and saves him from his enemy.

BRADLEY STEELMAN, Dave meets and secretly loves

JOYCE CRAWFORD, his employer's daughter. He trails the horse thieves to Denver and recovers Chiquito after a gun fight in the desert. He is arrested, accused of the murder of Doble and is sentenced to ten years in prison.

After his release he returns to Malapi, his old home, but believes that his prison record has made it impossible for him to hope for the hand of Joyce.

GO ON WITH THE STORY Dave's heart warmed to this fine loyalty. Bob wanted to tie to Sanders told himself with a rush of gratitude. None of this feeling showed in his dry voice.

"Thanks, Bob."

Hart knew already that Dave had come back a changed man. He had none of the wild, turbulent, untamed. He had come out tempered by the fires of experience and discipline. The steel-grey eyes were no longer frank and gentle. They judged warily and inscrutably.

They arranged an hour of meeting at the Delmonico restaurant.

In front of the postoffice Bob met Joyce Crawford. The young woman had fulfilled the promise of her girlhood. As she moved down the street, tall and slender, there was a light, joyous freedom in her step.

"Miss Joyce, he's here," Bob said. "Who—Dave?"

"Yes, ma'am. Dave! He's right here in town. Met him half an hour ago."

"When can I see him?" she asked. Bob looked at his watch. "I got an appointment to meet him at Delmonico's right now."

Joyce was a young woman who made swift decisions. "I'll go with you," she said.

Sanders was standing in front of the restaurant, but he was faced in the other direction. His flat, muscular back was rigid. In his attitude was a certain tenseness, as though his body was a bundle of steel springs ready to be released.

Bob's eye traveled swiftly past him to a fat man rolling up the street on the opposite sidewalk. "It's Ad Miller, back from the pen. I heard he got out this week," he told the girl in a low voice.

Joyce Crawford felt the blood ebb from her face. It was as though her heart had been drenched with ice water. What was going to take place between these men? Were they armed?

She knew that each was responsible for the other's prison sentence. Sanders had followed the thieves to Denver and found them with his horse. The fat crook had lied Dave into the penitentiary by swearing that the boy had fired the first shot. Now they were meeting for the first time since.

Miller had been drinking. The sign of the Delmonico had caught his eye and he remembered that he was hungry.

He took one step—and stopped. He had recognized Sanders. His eyes narrowed. The head on his short, red neck was thrust forward.

"It's Sanders," he screamed, and next moment was plucking a revolver from under his left arm.

Bob caught Joyce and swept her behind him, covering her with his body as best he could. At the same time Sanders plunged forward, arrow-straight and swift. The revolver cracked. It spat fire a second time, a third. The tiger-man, head low, his whole splendid body vibrant with energy, hurled himself across the road as though he had been flung from a catapult. A stream of fire ripped through his shoulder. Another shot boomed almost simultaneously. He thudded hard into the fat punch of the gunman. They went down together.

The fingers of Dave's left hand closed on the fat wrist of the gambler. His other hand tore the revolver away from the slack grasp. The gun rose and fell. Miller went into unconsciousness without even a groan. The corrugated butt of the gun had crashed down on his forehead.

Dizzily Sanders rose. He leaned against a telephone pole for support. "Are you hurt?" he asked.

Dave looked at Joyce, wondering at her presence here. "He's the one that's hurt," he answered quietly.

"I thought—I was afraid—" Her voice died away. She felt her knees grow weak. To her this man had appeared to be plunging straight to death.

No excitement in him reached the surface. His remarkably steady eyes still held their grim, his tenseness, but otherwise his self-control was perfect. He was absolutely imperturbable.

"He was shootin' wild. Sorry you were here, Miss Crawford." His eyes swept the gathering crowd. "You'd better go, don't you reckon?"

"Yes. You come too, please." The girl's voice broke.

At the second corner he stopped, evidently intending to go no farther. "I'll say goodbye for this time. I'll want to see Mr. Crawford right soon."

"Can you come up to see father tonight?"

"Maybe tomorrow—" "He'll be anxious to see you. I want you and Bob to come to dinner Sunday."

"Don't hardly think I'll be here Sunday. My plans aren't settled. Thank you just the same, Miss Crawford."

She took his words as a direct rebuff. There was a little lump in her throat that she had to get rid of before she spoke again.

"Sorry. Perhaps some other time." Joyce gave him her hand. "I'm mighty glad to have seen you again, Mr. Sanders."

He bowed. "Thank you."

After she had gone, Dave turned swiftly to his friend. "Where's the nearest doctor's office? Miller got me in the shoulder."

CHAPTER XV. To Crawford Dave made light of his wound. It was only a scratch. "That's good, son," Crawford answered. "Well, now, what are you aimin' to do?"

"Oil," said Dave without a moment of hesitation. "I want to learn that business from the ground up. I've been reading all I could get on the subject."

"Good enough, but don't you go to playin' geology too strong, Dave. Oil is where it's at."

"I suppose it's a gamble," agreed Sanders.

"Worse'n the cattle market," said the owner of the D Bar Lazy R. "Bob, you better put Dave on the crew of that wildcat you're spuddin' in, don't you reckon?"

"I'll put him on afternoon tower in place of that fellow Scott. I've been intendin' to fire him soon as I could get a good man."

"I'll drive out tonight and take

BOB CAUGHT JOYCE AND SWEEPED HER BEHIND HIM.

Dave with me if he feels up to it," said Bob. "Then we'll know the foreman keeps humpin'."

They drove out in the buckboard behind the half-broken colts. The young broncos went out of town to a flying start. They raced across the plain as hard as they could tear, the light rig swaying behind them as the wheels hit the high spots.

The driver stopped at the location of Jackpot Number Three.

"Make yourself to home, Dave."

Faintly there came to them the sound of an engine thumping.

"Steelman's outfit," said Hart gloomily. "His 111 oil engine goes right on kickin' all the darned time. If he gets to oil first we lose. Man who makes most discovery on a claim wins out in this country."

"And Steelman won't stick at a thing. Wouldn't trust him or any of his crowd any further than I could sling a bull by the tail. He'd blow Crawford and me sky high if he thought he could get away with it."

Sanders nodded agreement. He hadn't a doubt of it.

"Hello, the Jackpot!"

Bob looked at his companion and grinned. "Seems to me I recognize that melodious voice."

A man stepped from the gloom with masterful, arrogant strides. "Lo, Hart," he said. "Can you lend me a reamer?"

Bob knew he had come to spy out the land and not to borrow tools. "Don't seem to me we've hardly got any reamers to spare, Dug," drawled the young man sitting on the porch floor.

Suddenly Doble recognized Dave. He leaned forward, his body rigid, danger written large in his burning eyes and clenched fist.

"So you're back," he said at last in a low, harsh voice.

"I'm back."

"It would 'a' pleased me if they had put a rope round yore neck, Mr. Convict."

Dave made no comment.

The big crowd rose snarling. "For half a cent I'd gun you here and now like you did George."

Sanders looked at him steadily, his hands hanging loosely by his sides.

"I wouldn't try that, Dug," warned Hart. "Dave ain't armed, but I am. My hands on my six-shooter right this minute. Don't make a mistake."

Doble backed away till his figure grew vague in the darkness. Came the crack of a revolver. A bullet tore a splinter from the wall of the shack in front of which Dave was standing.

Bob whipped out his revolver, but he did not fire.

"Ain't that like Dug, the damned double-crosser?" whispered Bob.

"He's one bad citizen, if you ask me," continued Hart. "Know how he came to break with the old man? He had the nerve to stare at beaulin' Miss Joyce. She wouldn't have it a minute. He stayed right with it—tried to ride over her. Crawford took a hand and kicked him out. Since then Dug has been one bitter enemy of the old man."

"When Crawford had better look out. If Doble isn't a killer, I never met one."

(Continued in Our Next Issue.)

USE VINEGAR. A half cup of vinegar in the water in which you give your hair the last rinsing when washing it, will soften it and give it a pretty sheen.

MENDING GLOVES. If you are mending gloves which have ripped in the seam, use a buttonhole stitch along each side of the seam, and then use the buttonhole stitches for pulling the rip together.

Show Versatility in "Turn To Right"

Jask Mulhall. He's the hero in "Turn to the Right." In real life he's Mrs. Rex Ingram.

Alice Terry. She's the heroine in "Turn to the Right." In real life she's Mrs. Rex Ingram.

BY JAMES W. DEAN

NEW YORK, Feb. 3.—More honorary degrees should be conferred on Rex Ingram for his handling of the film version of "Turn to the Right," the great stage success by Winchell Smith and Jack Hazzard.

Ingram evidences in this film that he has versatility. That quality is lacking in most directors.

He takes all the bitterness out of tragedy without eliminating the tear. His transitions from tragedy to comedy seem to be quick, impulsive movements. One feels the surge of grief and—presto! comes the smile.

Ingram made his mark with such pretentious things as "The Four Horsemen" and "The Conquering Power." It was hardly to be expected that he would be so talented with the bounty of humor he exhibits in "Turn to the Right."

It seems to me from close observation of Ingram's films that his success lies in allowing his players wide latitude in giving expression to their conception of their characters. He recognizes that they have intelligence, and, using that intelligence, they do not appear to be automatons. There is spontaneity in their actions. This is best demonstrated by Harry

Myers and George Cooper, playing the parts of the ex-convicts in "Turn to the Right." No director could have pre-arranged such subtle twists of humor as they gave the film by simple gestures and glances.

The story is too familiar for retelling. It is one of those old-fashioned affairs that shows the perils of a big city and the power of the simple country life to reform men.

Hundreds of such stories have been told on stage and screen. The virtue of this one in both mediums was the nicety with which comedy and tragedy are balanced.

A subtitle announces that the action of "Turn to the Right" took place in the days "before the world was made safe for adventuresome youth."

Has this humdrum old world come to that? Adventuresome youth doesn't want safety, first or last. Prohibition and anti-gambling legislation lead to better moral standards, but they do not rob youth of adventure.

The subtitle is the inalienable right of youth.

The subtitle was just one of those flights of fancy in which title writers so often sacrifice logic for high-sounding hyperbole.

SISTER MARY'S KITCHEN

LIMA BEANS

UBSTANTIAL meat stretchers for cold weather meals depend on beans of some sort and in some form for their main ingredient.

This dish of baked Lima beans and pork is both nourishing and appetizing.

Baked Lima Beans with Pork.

One and one-half cups dried Lima beans, 1-2 pound salt pork, 1 teaspoon mustard, 1-4 teaspoon pepper, 2 cups canned tomatoes, 4 tablespoons molasses, 1 onion.

Wash beans well. Let stand overnight in cold water to more than cover. Rinse and put in to cook in cold water with 1-8 teaspoon soda. When the water boils drain the beans and rinse in cold water. Put in 2 quarts boiling water and boil sixty minutes, adding water as necessary. Scrape and wash pork and boil sixty minutes.

Drain beans and pork. Put onion in the bottom of a baking dish without slicing. Add pork which has been deeply scored and cover with beans. Mix molasses, pepper, mustard and tomatoes, bring to the boiling point and pour over beans. Cover and bake an hour in a slow oven. Remove cover, increase heat and pull pork to the top of the baking dish. Bake an hour longer, browning the top.

Chili Con Carne.

This dish is almost a full meal in itself. A green salad and dessert should furnish the minerals for a dinner with chili con carne. Red kidney beans dried or canned or dried Lima beans may be used instead of the original Mexican bean.

Six onions, 1 tablespoon bacon fat, 1 pound round steak (ground), 3

cups tomatoes, 2 cups cooked beans, 1-8 teaspoon cayenne pepper, 2 quarts water.

Melt bacon fat. Add onions sliced and fry slowly to a pale straw color. Add meat and brown quickly. The beans should be soaked overnight and parboiled in soda water if dried beans are used.

Put beans, tomatoes and water in kettle and bring to the boiling point. Add pepper, meat and onions and cook until the mixture thickens. If canned beans are used stir 2 tablespoons of flour into the meat and fat while browning the first mixture.

Instead of cooking the beans and meat together the beans may be cooked separately and used as a border. The meat and gravy is then thickened with flour and poured inside the border of beans.

(Copyright, 1922.)

CUTTING BREAD.

When a very crumbly or new loaf of bread is to be cut, dip the bread knife in hot water first. This will make slicing much easier, and prevent the slices breaking up.

When the Canadian Pacific is operating through Standard Sleeping Car Service, Toronto and North Bay as follows: Leave Toronto 8:30 p.m. daily, except Saturday. Returning, leave North Bay 6:30 p.m. daily, except Sunday. Full particulars and reservations from Canadian Pacific ticket agents.

Africa in 1920, had a population of 142,872,068.

CARPET CLEANING BY NEW METHOD

We, the Aerial Carpet Cleaners, extend you a hearty invitation to visit our plant, and see the work as it is being done by us. The carpets are all laid face down on a wire floor, and every particle of dust and dirt is forced out downwardly by the tremendous force of air through the wire floor into funnels below, which have within another great suction, which receives the dust and dirt, and by means of pipes carries it out of the building entirely. We clean all carpets from BOTH sides. No carpet can be thoroughly cleaned from ONE side only. Remember, we cannot hurt your carpet, even if it will not carry its own weight. We will clean it without damage whatever, or without injury to the nap. We have the ONLY machine that will clean a carpet, bring back the colors, raise the nap, in fact, do everything that you may ask us to do except put the nap on where it is worn off, or put the color where faded; and this we will prove to you if you will call at the works and see the system in operation. Remember our address, Aerial Carpet Cleaning Works, 830 York Street. Phone 1764.

HANDLE HIGHEST CLASS PRODUCTS

London Provision Company, successors to Pattison Bros., started in 1919 to give the public of London a brand of sausages, smoked and cooked meats, which are manufactured with the most up-to-date machinery and under the most sanitary conditions. These products are made fresh daily and handled by all the good dealers in London and at no time will be more than 24 hours from the time of manufacturing to the customer's table instead of three or four days, usually the time necessary for products manufactured out of the city to reach customers. The Sunnybrook Brand Sausages are made under a home recipe which proves to be very palatable and makes one think he is eating the same ones mother used to make in the old days. This alone should create a desire in our readers' minds to make it a point to ask their dealer for Sunnybrook Brand Sausages and other products. Also by using Sunnybrook Brand products on your tables you have the guarantee that you are getting them fresh daily in wholesome, pure food. Watch for our recipes showing you different methods of preparing our products for family meals, which we will publish from time to time and which also will be distributed through our dealers in pamphlet form. These products are all made in London and we strongly urge that you ask your dealer for Sunnybrook Brand products without further delay. Our factory is open for inspection at all times.

AMBER GLASS AID TO AUTOIST DRIVING IN SUN

Amber glass put on a motor car as a visor or side wings enable you to look straight into the piercing headlights of on-coming cars or straight into the sun, yet your vision is always clear. Every object stands out clearly and sharply. This is the glass used in HOUSE colored wings and GLAS-CO visors which will be seen at the London Art Glass & Mirror Works, Limited, 226 Talbot Street.

Succeed With London

IT was recently said by one of Canada's leading men of affairs during a recent address in London that legislation should be enacted whereby the pessimist could be extradited from our midst, providing that some country could be persuaded to receive him.

Any person so poor in spirit, so devoid of civic loyalty and so narrow in outlook as to doubt that London will advance with leaps and bounds in the future to a greater degree than has ever done in the past is far too pessimistic for this day and generation.

"Succeed with London" is no mere perfunctory command. It means just what it says. The business firms and manufacturers whose advertisements appear on this page are exerting every effort to insure employment for every man in London. They have deliberately set about to become 100 per cent optimists and boosters in 1922. Whatever the future may appear they are determined not to countenance pessimism in any form whatever.

"Boost your own industry" is the adopted slogan, and they extend the invitation to others that they also may enter into the spirit of a move that will tend to bring to this city and district prosperity of a high order.

This is the booster's own page, and every business represented is bound to taste of the fruits of inevitable success and share in abundant prosperity before another year rolls around.

REMEMBER DAY ON MOVING DAY

"WHEN YOU WANT A REAL JOB DONE"

Your furniture is the biggest investment in the home. You want it moved, money may be lost by having inexperienced hands handle it. The wise know that H. F. DAY, the mover, can do the job. Mr. Day uses closed-in trucks which insure your furniture against the weather. A unique feature about Mr. Day's truck is the pneumatic tires exclusively used by him. This means fast service and does away with scratching and marring of high polished goods, due sometimes to the jolting and bouncing which occurs in long distance hauling which Mr. Day specializes in. Remember DAY on moving day.

J. CREIGHTON COMPANY HAD SUCCESSFUL YEAR

"The best in its history," is the report of the Joseph Creighton Woodwork Company relative to 1921. For the greater part of the year fourteen men were afforded employment.

Modern and complete in every way, the equipment of the Creighton Company enables the undertaking of any description of work. A large stock of thoroughly seasoned lumber is kept in reserve, and high-grade store, office and bank fittings are listed among the various types of interior fittings are listed among the various types of interior woodwork that is manufactured.

PROUD OF AIDING LONDON'S GROWTH

Every loyal and red-blooded citizen enjoys the thought that his home town has won some particular distinction. It does a man good to have a stranger slap him on the back and say, "Well, old chap, I see you're doing real things in London. I'm mighty glad to see the progressive spirit you're showing up there."

With this and recent remarks still ringing in his ears as a result of his recent visit to the Detroit Motor Show, W. R. Stansell, president and general manager of the London Motors, Limited, feels that life is really worth living, and is proud of the fact that he has a part in bringing to London an industry which promises to be one of the leading Canadian enterprises.

Mr. Stansell very aptly gives his own impression of the Detroit show as follows: "After seeing the 46 different makes of cars exhibited there, it certainly gave me a thrill of real satisfaction to know that right here in London, we are engaged in the building of a car which is second to none. I mean 'The London Six.'"

At the London Motor Show next week will be exhibited the "Supreme Touring," a unique model of "The London Six." This particular model is bound to create special interest and the prospect of a large production of all models for 1922 is evidenced by the fact that a great many orders have already been placed and constant inquiries are proving the popularity of this locally built car.

OPTICAL DEFECTS CAUSE OF CRIME

Many children are forced into careers of crime because of eye defects. These defects in children are rarely discovered without a scientific examination. Children who are inclined to play truant, who have headaches and stooped shoulders, who are hard to control—the eyes of these should be looked after without delay. A child who is slow to learn is ridiculed by his mates. Ridicule breeds bad temper and dislike for school, and sometimes leads to worse. A scientific examination may change the course of your child's life.

WHITE ROSE SERVICE MEETS PUBLIC NEEDS

"The completion of the White Rose Service Station at the corner of Dundas and Burwell streets is but another link in the chain being forged by the Canadian Oil Companies, Limited, to make good their motto of Courtesy, Service and Comfort for the motoring trade. Added features at all of the Canadian Oil Companies, Limited, service stations in the city are the public washrooms installed for the benefit of the motoring public."

SUGGEST BUSES WHEN CARS FAIL TO PAY UPKEEP

St. Thomas Councilmen Become Weary of Annual Deficits Line Shows.

MANAGER FIRES OWN SON

Alderman Burger Resents Order of Chairman Middleton To Cut Staff.

ST. THOMAS, Feb. 3.—Weary of annual deficits of more or less appalling proportions rolled up annually by the local municipal street car system, this city will experiment with motor buses in the near future, if the city council sanctions the decision of the street railway committee reached at a meeting Friday night.

The committee voted unanimously to include \$4,000 in the estimates this year to provide for the purchase of a motor bus, if the experiment proves successful and permission can be gained from the provincial government. The cost of the bus will be the estimates of the street car committee from \$11,000 to \$15,000.

An offer was received from a motor car company for the use of a bus for thirty days providing at the end of that time the city would purchase the vehicle if it proved satisfactory. The committee would not guarantee this.

City Solicitor W. B. Doherty informed the committee that the city had a legal right only to operate street cars. It would be all right to experiment with the buses, he said, but he advised that a clause be added to the private bill which goes before the Provincial House in the near future, to get permission to try them.

“Please Saginaw Mayor.”

Ald. Joad received letter from the mayor of Saginaw, where jitney buses are rendering partial service to the citizens because of the bankruptcy of the street railway in that city. The letter stated that the city officials were strongly convinced that motor buses were the sole solution to the transportation problem.

Every effort is being made to reduce the operating expenses of the street railway in this city.

Mr. Doherty stated that in order to get the deficits of the past covered by debentures it will be necessary to prove to the railway board and the private bills committee that the city has a plan of doing away with deficits in the future either by increasing the revenue or reducing the operating expenses of the road. If the city has a plan, he recommended that it be put into force as soon as possible.

“Want Employees’ Aid.”

Chairman Ald. Middleton stated that the deficit this year must be cut in half. “We have got to cut expenses, and we are going to do it,” he said. “We must contrive to give the people a service at a reduced cost. I want the employees of the street railway to know that, and I hope they will put their shoulders to the wheel.”

He stated that the revenue of the past year totalled \$31,794.54, while the salaries paid alone totalled \$35,000. The deficit was \$27,338.

The first step to reduce the operating expense was a cut in the staff, put into effect at the first of the month by Manager Johns, acting under instructions from Chairman Middleton. Manager Johns laid off three men, including his son, who was an electrician and a line man; a trackman and a barnman. The hours of the other barnmen were reduced from 10 to 8 hours a day.

Ald. Burger resented the actions of

Reports Influenza in England Waning

MISS BEATRICE MOOD of this city, who is at the present time in England, has cabled her brother, William Mood of London, that the flu is on the wane in England, and that as a result she expects to sail for home on the Tuscania on its next crossing. Miss Mood's visit was prolonged in England owing to the prevalence of the disease, but the cessation of its ravages, she has accepted the opportunity of returning home.

the chairman in ordering a reduction without first consulting the committee.

It was suggested rearranging the routes of the street cars, but the suggestion was laid over until such time as a motor bus can be secured.

FACES PROBLEM IN POWER LOST

TORONTO, Feb. 3.—The Ontario government is being faced with a difficult situation in connection with the Niagara power development, says the Toronto Star. “Power temporarily is being sold for less than half what it costs to develop, having regard to capital charges. That is one reason why the province is disposed to put the clamps on the Great Lakes Power and Paper Company and make it take power from the hydro.”

“In government circles it is said the cost of the Niagara plant is about six and a half millions of dollars. The interest charges alone are supposed to reach \$300,000 a year, or about \$44 per horsepower on the \$600,000 horsepower now being supplied to the city of Port Arthur. That municipality is paying only \$21 or \$22 per horsepower. The loss is being added to capital cost for the present, and it is a nice question how it is to be taken care of. If the municipalities don't, presumably the province must.”

CHURCH FINANCES ARE REPORTED FAVORABLE

CAYUGA, Feb. 3.—The annual meeting of Knox Church, held on Tuesday evening, showed all the departments of the church to be in a prosperous condition. The meeting was held in the church, the pastor, Rev. W. G. Blake, presiding, and the former officials were re-elected.

The regular monthly meeting of the W. M. A. of Knox Church, held at the home of Mrs. David McClung, on Wednesday afternoon, was well attended and most interesting. The chief feature of the program was the report given by Mrs. J. L. Mitchell of the annual meeting of the Hamilton Presbytery of the W. M. A. held at Niagara Falls last week, which she attended as delegate.

The regular monthly meeting of the W. M. A. of St. John's Church took place at the home of Mrs. C. Gibson on Wednesday afternoon, with a large attendance.

DAUGHTERS OF EMPIRE TO GIVE PRINCESS CASH

TORONTO, Ont., Feb. 3.—It is announced by the Canadian National chapter of the Imperial Order of the Daughters of the Empire that it has been decided that the wedding gift of that organization to Her Royal Highness Princess Mary will take the form of a money contribution to be devoted to any cause the royal bride may designate.

This action has been taken in accordance with the publicity expressed wish of H. R. H.

WOULD PLACE TAX ON GERMAN TOYS

British Manufacturers Complain of Effects of Foreign Competition.

LONDON, Feb. 3.—(By Canadian Press Cable).—Serious complaints of the effects of post-war German competition on the business of the British toy manufacturers were presented today at a sitting of the committee which is empowered under the safeguarding of industries act to make adjustments.

An effort is being made by the manufacturers to secure the imposition of an extra customs duty of 23-1-3 per cent ad valorem owing to depreciated state of the currency in the country of origin.

It was stated to the committee that of the 300 plants in Great Britain making toys in 1913, 82 had closed down, and many others were operating only on a limited scale. Employees had been reduced from 40,000 to 5,000.

The collapse of the exchange, it was held, gave the Germans an unfair advantage as compared with the conditions which enabled British manufacturers successfully to compete in pre-war times. The depreciation gave a number of examples showing the disparity in costs of British and German production.

SHORTAGE OF ICE CONFRONTS TOWN

Ingersoll Council Urge Immediate Action To Meet Situation.

[Special To The Advertiser.]

INGERSOLL, Feb. 3.—Unless immediate action is taken there is a probability that Ingersoll will be without the usual supply of ice during the coming season. The situation is regarded with so much interest that following a meeting of the council Tuesday night citizens

were urged to join in discussing it. Two of the principal ice dealers have announced that they will not have ice for delivery next season.

The matter is one that is viewed with some alarm, and efforts will likely be made to meet the situation to some extent.

The death occurred at the family residence, Albert street, following an extended illness of Ella Sherwood, wife of George Bower. Her former home was at Prescott. She resided here for nineteen years. Besides her husband, she is survived by one son, Ralph, and one sister, Miss Louise Sherwood of Prescott.

EXECUTES TWO BIG LAND DEALS

[Special To The Advertiser.]

ELEXHEIM, Feb. 3.—Two of the largest land deals put through for some time have just been completed in lands not far from Roueau, near Government Park.

Robert J. Coleman of the Rondeau road, in South Harwich, has sold his 100 acres of land in the bean belt of Harwich to his nephew, Glen Coleman of Harwich. The sale price is said to be in the neighborhood of \$25,000.

Another farm of 200 acres in South Harwich is said to have been purchased for \$30,000 by him.

FROZEN SEAS HALT ALL DANISH TRAFFIC

COPENHAGEN, Feb. 3.—For the first time in many years, seaborne traffic out of Denmark has been virtually stopped, as the sounds, harbors and the belts are icebound. Ferries connecting the Danish islands with Germany, Norway and Sweden are frozen in, while icebreakers are attempting to free the boats layed out with the same fate.

INQUEST OPENED INTO STRATFORD TRAGEDY

STRATFORD, Feb. 3.—Following injuries sustained when struck by a G. T. R. train on December 22, Frederick J. C. Adams died today. He was struck while crossing the tracks just south of the Downie street crossing. He was 49 years of age, and a native of London, England, having come to Stratford ten years ago. A brother, Thomas, resides here.

Dr. J. P. Rankin this morning opened a preliminary inquest. After viewing the remains an adjournment was made till Friday, Feb. 10. P. J. Kelly is foreman of the jury.

BOTHWELL MAN HURT IN RUNAWAY ACCIDENT

Bothwell, Feb. 2.—Taking fright of a wagon loaded with bags, the colt of Mr. D. Mitchell, of West Bothwell, ran away Tuesday afternoon, throwing Mr. Mitchell out and smashing the buggy. Mr. Mitchell was injured about the head and shoulders, but fortunately no bones were broken.

Truck With 1,000 Pounds Dynamite Drops Sixty Feet

WINCHESTER, Va., Feb. 4.—A motor truck loaded with more than 1,000 pounds of dynamite, skidded on ice, plunged over a retaining wall on the Shenandoah Valley Pike yesterday at Fisher's Hill, and rolled nearly sixty feet to the bottom of the hill. The dynamite did not explode, but the negro driver, who is said to have escaped unhurt, has not been seen since the accident.

DEPUTY'S RUSSIAN FAMINE RAVAGES

President of "Save the Children" Fund Urges Immediate Relief.

OTTAWA, Feb. 3.—(By Canadian Press).—“There is nothing so terrible as the Russian famine in the annals of European history,” said Col. Herbert J. Mackie, president of the Canadian committee of the Save the Children Fund, in a statement issued tonight. “The famine in Russia is due to drought,” he said. “It is reducing 35,000,000 to an appalling condition. Millions are dying. The survivors are fleeing from the famine area last autumn, in search of bread or even grass to eat. But the whole territory along the Volga River for a thousand miles, and several hundred miles across, had been parched into an arid desert.”

“The fugitive peasants fell by the wayside in many instances, leaving orphan children to wander on in search of roots, the bark of trees, or the bones of dead animals, to gnaw. Winter conditions similar to the climate in Canada would seem to be striking down the peasant families as ruthlessly as though they were being consumed in a forest fire.”

“However much the outside world hastens to the rescue, it is a conservative estimate to say that the famine victims will number 10,000,000, mostly children, before the next harvest comes. But millions can be saved, and the Canadian committee of the Save the Children Fund is appealing to the great heart of the Canadian people to give quickly and generously, so that some of Canada's abundance can be shipped on Canadian ships to the distributing points in Russia.”

FAVORS LENIENCE TO SHOEMAKERS

MONTREAL, Feb. 2.—(By Canadian Press).—Addressing the members of the Canadian Boot and Shoe Manufacturers' Association at their ninth annual banquet here tonight, Sir Lomer Gouin, minister of justice, pointed out that the industry being practically excluded from the American trade, the prevailing rate of exchange having closed the markets of the United Kingdom, and the customs duties imposed by France, Belgium, Australia and South Africa having made the export trade impossible, it was home trade alone, or nearly so, that their industry must thrive and live.

He stated, therefore, that “we can easily understand that our Canadian manufacturers should insist on being granted a reasonable measure of protection to assure the survival of an industry which is as old as the country itself.”

SCOTTISH BILL GIVEN BY NORMAL STUDENTS

The program of the meeting of the London Normal School Literary Society, Friday afternoon, dealt chiefly with Scottish subjects. A paper on the life of Scott, prepared by Miss M. McCachren, proved of a very interesting character, as well as a paper on “Burns.” A selection, “Scottish Humor,” by J. McDonald, provided some novel entertainment which was greatly enjoyed, and a reading by Miss Ross, Burns' “Tam O'Shanter,” was highly appreciated.

The musical program was a treat to all lovers of Highland airs. Miss Leda Ferguson sang “Loch Lomond,” a song to which her clear, sweet voice is particularly well-suited. Two choruses by the Normal School Glee Club, “Annie Laurie” and “Highland Laddie,” were much enjoyed.

CLAIMS FOOTWEAR IS 90 PER CENT CANADIAN

MONTREAL, Feb. 2.—“There is one thing about the boot and shoe industry of Canada that should be of great satisfaction to Canadians,” said H. R. Pousette, director of commercial intelligence section of the Ottawa, Board of Trade, in addressing the third annual meeting of the Canadian Shoe Manufacturers' Association here today. “And that is that it is almost entirely Canadian in fact.”

Mr. Pousette said that as a result of recent investigations it had been ascertained that 90 per cent of the shoes handled in this country were of Canadian origin, as against as low as 20 per cent twenty years ago.

In the afternoon a general discussion decided that the headquarters of the association should be in Montreal and not in Toronto.

REPORTS SHOW CHURCH HAD SUCCESSFUL YEAR

HARRISTON, Feb. 3.—The annual congregational meeting of Guthrie Church was held in the basement of the church Thursday evening. There was a large attendance, and good reports were received from all departments. The financial statements were particularly gratifying. The total net receipts for the year for all purposes were \$3,335.64. Of this amount \$447.95 was given to missions and benevolences. Referees were served at the close of the meeting.

FINANCIAL AND COMMERCIAL

POULTRY SELLS WELL ON MARKET

Chickens in Good Demand at 35 Cents Per Pound.

There was not the usual large attendance on the local market on Saturday. The heavy condition of the roads deterred many farmers from coming to the city.

Chickens were fairly plentiful and in good demand, selling at 30¢ per lb. wholesale and 32¢ per lb. retail.

Pork was selling at 18¢ per lb. for front and 20¢ for hinds.

Apples sold from \$1.50 to 25¢ per bushel; the quality is poor in most cases.

Potatoes are slow, and are quoted at \$1.00 per bushel.

There will be a good demand for hay on Monday, according to the buyers. The present quotations are \$15.00 per ton, according to quality and distance of delivery. There has been a good supply for the past two weeks.

According to the buyers, it is expected that \$11¢ per cwt will be paid for live hogs for next week's shipment. Quotations took a big jump at the last shipment.

WALL STREET REVIEW

New York, Feb. 4.—Wall Street. Pool activity in selected issues which later extended to established favorites in the railway and industrial groups featured the week's broad trading in the stock market.

Many closed specialties of no particular description or classification registered extreme gains of 10

to 25 points, but these were not retained save in a few instances.

Conditions in the steel trade offered little encouragement, January production being only a little better than that of December, which marked the low record of 1921.

Shifting to loans to meet February markets occasioned a slight flurry in the money market, call money rising to 6 per cent with fewer offerings of time accommodation.

The most encouraging feature in the broader field of finance was the strength of British exchange.

CANADIAN STOCKS

Toronto, Feb. 4.—A. J. Pattison & Co. report the following London quotations on Canadian stocks today:

Brazilian Traction. 31 1/2
Canadian Pacific Railway. 143 1/2
Canadian General Electric. 103 1/2
Canada Steamships, voting trust. 15
Dominion Steel. 27
Shawinigan Falls Power. 115 1/2

NEW YORK STOCKS

New York, Feb. 4.—Wall Street, 10:30 a.m.—The short interest in the stock market was further severe reversals at the opening of today's session. Within the first hour recent gains in equipments, motors, oils and tobaccos were extended by 1 to almost 2 points.

Strongest features included Baldwin and American Locomotives, Chandler and Studebaker, Railway Steel Springs, Mexican Petroleum, American Tobacco, Bullish operations were stimulated by the further rise of British exchange to the new high record of \$4.32 for demand bills.

GRAIN

Chicago, Feb. 3.—Opening: Wheat—May, \$1.24 1/2; July, \$1.08 1/2.
Corn—May, 55¢; July, 57 1/2¢.
Oats—May, 39 1/2¢; July, 40 1/2¢.

DULUTH, Feb. 3.—Lined, on track and to arrive, \$2.27 1/2; May, \$2.27 1/2; July, \$2.28 1/2 bld.

ADMINISTRATORS OATH OF OFFICE TO KING

Ottawa, Feb. 3.—(Canadian Press).—Hon. J. H. King was sworn in as minister of public works in the federal government at half past eleven o'clock this morning. The swearing in took place at Government House.

It is understood that Mr. King will contest the riding of East Kootenay, which will shortly be vacant.

JOHN BUTLER YEATS, FATHER OF POET, DIES

New York, Feb. 3.—John Butler Yeats, 53, Irish painter and writer, and father of William Butler Yeats, the poet, is dead at his home here.

Death, which occurred on Thursday, was due to heart disease. He had been a resident of this country twelve years.

Great For Bad Coughs and Colds

Make Your Own Medicine and Have the Best There Is.

You'll Say It's Good When All Mucus Disappears and Clean Healthy Membrane Is Your Reward.

Here is an inexpensive home made remedy that you can't beat and one that will quickly bring up that phlegm, stop the snuffling, relieve the clogged nostrils, make breathing easy and cause stubborn colds and persistent coughs to vacate—many times over night.

Try it right away if you suffer from Catarrh, Chest Colds or any irritating mucus or throat troubles and you'll find you can reach this little bit of advice.

Get from any druggist, one ounce of Peppermint (double) and add to it a little sugar and enough water to make one half pint. You can make it in two minutes and when it is mixed you can pride yourself on having a medicine that acts directly on the membrane of the nose and throat and acts so effectively that all phlegm, all tickling and inflammation speedily disappears.

L.A.1, Toronto.

“A Financial Courtship”

A little booklet which tells in an interesting way so simple in its language that a schoolgirl could understand it, all about investments of all kinds, bonds, mortgages and stocks.

Even to experienced investors this little story, woven into a charming romance, contains many valuable pointers on investments.

The booklet will be mailed free to any one on request.
