Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original L'Institut a microfilmé le meilleur exemplaire qu'il lul a copy available for alming. Features of this copy which été possible de se procurer. Les détalls de cet exemmay be bibliographically unique, which may alter any of plaire qui sont peut-être uniques du point de vue biblithe Images In the reproduction, or which may ographique, qui peuvent modifier une Image reproduite, significantly change the usual method of filming are ou qui peuvent exiger une modification dans la méthochecked below. de normale de filmage sont Indiqués ci-dessous. Coloured covers / Coloured pages / Pages de couleur Couverture de couleur Pages damaged / Pages endommagées Covers damaged / Couverture endommagée Pages restored and/or laminated / Pages restaurées et/ou pelliculées Covers restored and/or laminated / Couverture restaurée et/ou pelliculée Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées Cover title missing / Le titre de couverture manque Pages detached / Pages détachées Coloured maps / Cartes géographiques en couleur Showthrough / Transparence Coloured Ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire) Quality of print varies / Qualité inégale de l'impression Coloured plates and/or illustrations / Planches et/ou Illustrations en couleur Includes supplementary material / Comprend du matériel supp!émentaire Bound with other material / Relié a se d'autres documents Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best Only edition available / possible image / Les pages totalement ou Seule édition disponible partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de facon à Tight binding may cause shadows or distortion along obtenir la meilleure injage possible. interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge Opposing pages with varying colouration or Intérieure. discolourations are filmed twice to ensure the best possible Image / Les pages s'opposant ayant des Blank leaves added during restorations may appear colorations variables ou des décolorations sont within the text. Whenever possible, these have been filmées deux fois afin d'obtenir la meilleure image omitted from filming / Il se peut que certaines pages possible. blanches ajoutées lors d'une restauration apparaissent dans le texte, mals, lorsque cela était possible, ces pages n'ont pas été filmées. Additional comments / Commentaires supplémentaires: This item is filmed at the reduction ratio checked below / Ce document est filmé au taux de réduction indiqué ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

British Columbia Archives and Records Service.

The Images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the beck cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and anding on the last page with a printed or illustrated impression.

The last recorded frame on each microficha ahaii contain the symbol — (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be flimed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaira filmé fut reproduit grâce à la générosité de:

British Columbia Archives and Records Service.

Les images suiventes ont été reproduites evec le plus grand soin, compte tenu de le condition et de la netteté de l'exempleire filmé, et en conformité evec les conditions du contret de filmage.

Les exemplaires origineux dont la couverture en pepier est Imprimée sont filmés en commençent par le premier plat et en terminent solt per le dernière pege qui comporte une empreinte d'impression ou d'iliustretion, soit per le second piet, seion le cas. Tous les eutres exemplaires originaux sont filmés en commençent per le première page qui comporte une empreinte d'impression ou d'illustration at en terminent par le dernière page qui comporte une telle ampreinte.

Un des symboles sulvants appereître sur le darnière imege de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▼ signifie "FiN".

Les cartes, planches, tabieaux, etc., peuvent être filmés à des taux de réduction différents.

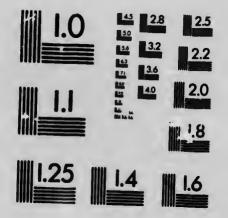

Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir da l'angle supérieur gauche, de gauche à droite, et de haut en bes, en prenant le nombre d'Images nécessaira. Les diagrammes suivants Illustrent la méthode.

For economy we recommend the one pound cans.

おいておいて多りである

GOLDEN, B.C.

REASONS WHY GOLDEN MUST GROW

SITUATION—It is the distributing point for 150 miles of the COLUM-BIA VALLEY.

RESOURCES—It is in the midst of 300 square miles of ARABLE LANDS open to homestead.

It is shipping more LUMBER than any town in the interior of B.C. The tributary TIMBER guarantees its doing so for all time.

Its MINERAL RESOURCES, as proved by the exhibit in the government buildings at Golden, are varied and extensive.

Railway transportation (now being extended) will place Golden in the ranks of the big SHIPPING DISTRICTS.

Within a ten mile radius of Golden there are easily developed WATER POWERS aggregating 30,000 h.p.

TRANSPO'TATION—Golden has the CANADIAN PACIFIC, the KOOTENAY CENTRAL and the COLUMBIA RIVER LUMBER CO.'S LOGGING Railways as main feeders. In addition there are TRUNK ROADS south to Windermere and Cranbrook and north to Donald, running through a rich farming and fruit-raising country. The BANFF-WINDERMERE MOTOR ROAD will connect this system with ALBERTA.

TRAILS—Golden Mining Division has over 800 miles of PACK TRAILS extending as far north as Tete Jeune Cache and up the several tributaries to their sources. MINER, HUNTER or TOURIST can take horses to timber line in 50 different places.

CLIMATE—While the climate of Golden is particularly agreeable in SUMMER it possesses advantages unique in Canada as a WINTER RESORT. A real winter temperature without sudden changes, violent storms or periods of cloudy weather. The usual Winter day in Golden — zero in the morning, a clear bright sky with a slight thaw in the afternors sum. It is to be the WINTER PLAYGROUND of the C. P. R. System in now being established.

HOSPITALS—Three modern buildings, consisting of a General, a Maternity and an Isolation Ward. Each and all large, any, well equipped and up-to-date in every respect. They stand in the n. dst of extensive grounds laid out with good park, lawn and flower beds.

SCHOOLS—Both High and Public Schools are equipped with First Class teachers. A handsome new building was opened by Earl Grey, the former Governor General of Canada, on his visit to Golden, and was named The Lady Grey School. The Play Grounds are large occupying a whole block.

SCENERY—The town nestles between the ROCKY and the SELKIRK MOUNTAINS, and is built at the confluence of the COLUMBIA and the KICKING HORSE RIVERS. There are numerous LAKES and FALLS in its vicinity, all of which tend to make its scenic situation almost unsurpassed.

"SWITZERLAND IN THE ROCKIES."

Edelweiss, the Swiss village which the Canadian Pacific Railway has located a half mile west of Golden, opens vast possibilities in home construction for the Rocky mountains. Six chalets have been built on the steep hillside and are occupied by a like number of Swiss guides and their families. These guides find employment with the numerous tourists who each summer visit the Canadian Pacific hotels both east and west of Golden. Hitherto the guides have stayed at the hotels in the summer and returned to Switzerland in the winter but henceforth their services will be available at all times of the year which will be very acceptable to the large number of mountain climbers and pleasure seekers who are finding the Canadian Rockies as pleasing during the winter months as in the warmer weather

In addition to the six chalets on the mountain a number of farms have been laid out in the valley below. These will be occupied by Swiss farmers. Experiments have proven that the soil is especially adapted to the raising of small fruits and all kinds of vegetables which will find ready sate at the railway hotels.

The location of the village is exceptionally picturesque as well as very promising from an agricultural point of view. Nature made the valley broad, green, grand and endowed with almost illimitable potentialities. There are trout in the streams and game on the lower slopes of the mountains; peak after peak challenges the mountain climber and shady, quiet nooks along the river banks lure the less venturesome Nature lover; there is grandenr in the mountains and and beauty in the green trees, grassy meadows and the laughing sky overhead.

There is also a deep, rich, fertile, chocolate loam that gives bounteous returns for labor expended upon it; there are cold, clear streams which furnish an inexhaustible supply of cold, clear water; there is a salubrious climate—long hours of smishine each day and but few cloudy days. All of which combine to make this locality unsurpassed to sojourn in for a short period or choose for a permanent home.

THE LARGEST ELECTRICALLY DRIVEN SAWMILL PLANT IN THE MOUNTAINS

From a little old fashioned sawmill cutting about 50,000 feet per day to one of the largest and finest equipped plants in Canada today, the growth of the Columbia River Lumber Company, Ltd. in the past six years, speaks much for the ability and progressiveness of the present management.

The mill buildings, warehouses, barns, boarding and sleeping houses, stores, offices, dwellings, etc., are nively painted, well built and eleverly placed. The impression is quickly conveyed to the visitor that the man who planned all this had an ideal plant in view, knew how it should be built, and allowed no deviation from the rules laid down for its construction.

The new electrically driven sawmill is equipped with two double cutting band mills and a 48 in. Gang, two large double Edgers, Automatic Trimmer, Lath Mill, etc. Each machine is driven by separate motors rating from 5 to 250 h.p.. The daily cut averages 300,000 feet of lumber and 40,000 lath in twenty hours run.

The rough lumber is neatly piled in the large, well arranged yard, which usually contains about 15,000,000 feet, and is thoroughly air dried

Hunting, Survey and Mining Parties Outfitted before being further manufactured When it is in proper shipping condition it is trucked into the Planing Mill which is equipped with nine modern fast feed machines, where the lumber is worked according to order and loaded, bright and clean, directly into cars for shipment. The company manufactures and ships about 40,000,000 feet per year most of which finds a ready market in the Prairie provinces. This year, however, the steady influx of settlers and the rapidly increasing prosperity of the Upper Columbia Valley has created a tremendous demand for lumber in that district and the river steamers have been kept busy all season hauling lumber and other building material up the river.

At present the company is concentrating its logging operations on the splendid timber limits a few miles west of Golden. Two large camps are operated the year round employing upwadrs of 250 woodsmen. The logs are hauled to the river on the new logging railway which is a standard guage road about 12 miles in length. The railway equipment, all of which is of the latest design and efficiency, consists of three powerful Heisler geared locomotives, two Barnhart steam loaders, sixty Russell logging ears, flat cars, box cars, etc. This equipment will be materially increased in the near future. About 200,000 feet of logs are hauled and put into the river each day.

A subsidiary company, the Upper Columbia Transportation Co., operates two fine steamers on the Columbia river transporting passengers and freight between Golden and up river points.

The Golden Light, Power and Water Co., another affiliated concern, supplies electric light and power to the town of Golden.

The men at the head of affairs are Col. A. D. Davidson, president, A. D. McRae, vice-president, Jas. D. McCormack, secretary-treasurer, E. S. Sanders, general manager.

Special welcome and bargains during Fair week

SHOW AND SALE DAILY

RULES.

The price of membership ticket for the year 1912 is \$2.00

A membership ticket entitles the owner and members of his family to exhibit any one article in any division of any class free of charge, but for additional entries the usual non-membership fee will be charged.

Admission to exhibition building will be 25 cents for adults and 15 cents

for children under twelve each time of entering.

Non-members may enter any article on paying entrance fee of 25 cents for each exhibit for which the prize competed for is \$2.50 or under, over that amount 50 cents entrance fee for each exhibit.

All entries for competition must be made to the secretary one clear day before the opening, and exhibits must be put in their proper places before S a m. Tuesday, 17th by exhibitor or agent.

All entries for competition or otherwise must be left on exhibition until

5 o'clock p.m. on the second day of the fair.

Entries must be in the name of the bona fide owner or authorized agent. An agent for more than one exhibitor must pay the usual entrance fee for each party and enter under separate registered number.

Exhibits may be sent in the care of the Secretary, but all expenses of

transportation, etc., must be paid by exhibitor,

Each exhibitor must attach a card naming class and number of each exhibit and get from the Secretary a registered number as a substitute for his name and put this registered number instead of his name on his entry card.

Exhibitors must give the necessary personal attention to their exhibits, and at the close of show take charge of same or make suitable arrange-

ments to have this done.

Directors will take reasonable precautions to insure safety of exhibits, but in no wise will be held responsible for loss or injury.

All articles of a collection must be the produce of the one exhibitor only, Articles exhibited in a collection can not compete for individual prizes.

No person will be allowed to enter for competition more than one specimen in any one class of a division unless the additional article be a distinct named variety or pattern from the first. This rule does not apply to animals, but to all kinds of grain, vegetable produce, fruit, manufactured articles, etc., of which each additional specimen would necessarily be precisely similar to the first.

In order that one prize be awarded there shall be two or more entries; and in order that two prizes be awarded there shall be three or more

entries.

Any exhibitor lodging a protest must do so in writing to the secretary and put up a deposit of \$1 for each protest, which will be forfeited it protest is not sustained.

Judges will be appointed by the directors. Ne person shall act as judge in any class where he is an exhibitor.

Judges may use their discretion in awarding a prize where article does not warrant one.

If there are not enough funds on hand to pay prizes in full they will be paid pro rata.

No prizes will be paid out until all accounts have been passed by the

Exhibition will be open at 2 o'clock p.m. September 17, 1912.
