Those "Essays and Reviews."

Many of our readers will have doubtless wondered at the frequent allusions lately to a work having the title, "Essays and Reviews"—one which has excited no little commotion in the religious public on both sides of the Atlantic...

These Essays, on the whole, are the strongest expression which a scientific naturalism or rationalism has yet found in our language.

Letter from Windsor.

To the Editor of the Provincial Wesleyan: DEAR BROTHER,—It will undoubtedly be interesting to many of your readers, to be informed that the work of God is prospering upon the Circuit; that there is peace within the walls of our Zion, and prosperity within her palaces.

Our Missionary Meetings were held during the latter part of January, and were, in every instance, and in every respect, successful.

Mr. Wilson, on the 10th inst., delivered a discourse on the subject of the "Mosaic Cosmogony," which Mr. Goodwin devotes his essay to demolishing, is treated with some show of tenderness; and he assures us that if modern research shows it to be physically untenable, our respect for the narrative which has played so important a part in the culture of our race, need be in no wise diminished.

These Essays, on the whole, are the strongest expression which a scientific naturalism or rationalism has yet found in our language.

These Essays, on the whole, are the strongest expression which a scientific naturalism or rationalism has yet found in our language.

Mr. Wilson, on the 10th inst., delivered a discourse on the subject of the "Mosaic Cosmogony," which Mr. Goodwin devotes his essay to demolishing, is treated with some show of tenderness; and he assures us that if modern research shows it to be physically untenable, our respect for the narrative which has played so important a part in the culture of our race, need be in no wise diminished.

and "when so vast an induction on the destructive side has been gone through, it avails little that some passages may be doubtful, one perhaps in Zechariah, and one in Isaiah, capable of being made directly Messianic."

Of the system of positive religious belief which the Essays represent, we cannot speak at length. The worst that can be said, perhaps, is consistent with all the rest. Regeneration is an "awakening of forces in the soul," the resurrection, "a spiritual awakening," the fires of Gehenna "may serve as images of distracted reality," (p. 91.) The fall of man is quite excluded by the starting-point even of Dr. Temple and Mr. Jowett thinks it "may one day be known, that mankind spread, not from one, but from many centers over the globe," so that Paul's argument on Christ's federal headship is a scientific blunder!

Such being the Scriptures, it is easy to know how to treat them. They are but a collection of "records of the time at which they were written," and convey to us "the highest and greatest religious life of that time," (p. 50.) "The Bible, in fact, is hindered by its form, from exercising a despotism over the human spirit. This is done 'by virtue of the principle of private judgment, which puts conscience between us and the Bible, making conscience the supreme interpreter,' etc. (p. 51.)"

These Essays, on the whole, are the strongest expression which a scientific naturalism or rationalism has yet found in our language.

was in life a most exemplary and beloved member, and by whom she was accounted "a mother in Israel." Mrs. Joseph Johnson, died in prison at Mr. Denison, June 8th, 1858, at the age of 71 years, during 40 of which she had been a most consistent member of our Church; the personal of the journals of our venerable Founder was blessed of God for her awakening and conversion, and she was thoroughly Wesleyan in all her sentiments and habits, and in none more especially than in that she was "the friend of all, the enemy of none." The good seed which in life she sowed upon many hearts by her precepts and exhortations, has, during these services, brought forth good fruit; and, in more instances than one, has it been confessed that her earnest entreaties, applied afresh to the conscience, by the Spirit of God, have been the means of leading the individual to decision. And oh! if among the great crowd of witnesses who then compassed us about, her ransomed spirit was one, her's must have been peculiar joy over one who then gave themselves to the Lord. Surely, "thus blessed are the dead" whose works do thus flow from the heart!

Last Monday evening, the recently organized 'Youth Branch Missionary Society,' held its first anniversary in our Church at Windsor; most credit to the credit of the young men, who then made their debut as special preachers in the cause of Missions, and to the pleasure and satisfaction of their friends, who numerously attended on the occasion, and encouraged them by their liberal support. An interesting feature of this service, was the attendance of the Sabbath school, conspicuously arranged in the body of the Church—the reality of an encouraging report by its worthy Superintendent—the very satisfactory examination of the Scholars by the Pastor, and the presentation of the Boys' and Girls' Missionary boxes—by their respective representatives, who very appropriately addressed the meeting.

Our new Church at Upper Falmouth is in process of completion, as also that at Hantsport. We trust that the former will be opened for worship in the autumn of the present year.

Yours truly, R. JOHNSON.

April 8th, 1861.

United (?) States Correspondence.

MR. EDITOR.—The London Times of March 19th, observes: "So rapid and impetuous is the march of events in the United States, so quickly does one scene succeed another in the great political drama, that news becomes of secondary interest almost before it is known."

These Essays, on the whole, are the strongest expression which a scientific naturalism or rationalism has yet found in our language.

sufficient for its passage by the same persons who would not make an account of these reasons while listening to the carping reproaches and fustian of the opposition. But for all this, facts must not be ignored. Men will generally act in a certain way under a certain balance of motives, and we must adapt our judgments accordingly. If one sort of motive, whether good or bad, is powerful with men, we must not forget it. And new circumstances demand new measures, even in pursuance of the same high and steady philanthropic course.

I hope your readers will pardon the very general nature of these observations. Let the general nature of the merely passing event, be pleaded for the avoidance of detail. I would have mentioned the late message of Governor Pickens of South Carolina to the Convention, which contains a noticeable exposition of the State Right's doctrine on which secession is founded. While the struggles of European society, he says, had been to secure personal liberty, the war of American Independence and formation of the Federal constitution made a still further advance in establishing the liberty of separate communities. But this victory is now gloriously consummated, and the height of human social progress attained, when South Carolina shall have succeeded in engraving upon the new confederate government the fundamental right of a separate and independent State to withdraw whenever her people shall be formed, and the assembly shall so decide. There is a familiar saying of some boy who boasted that he had just climbed a tree straighter than any his comrades had ever ventured—so straight, said he, that it bent over the other side! In truth the above described establishment is not called a government by this State Government—a Confederacy. The era of nations has passed away.

Extract of a letter from Yarmouth. Of late we have had a glorious work in our New Church—more than a hundred conversions to God—twenty-five have been received into the Church by baptism "with water," and about forty others by the right hand of fellowship before a crowded congregation. At the close of this deeply interesting service the Sacrament of the Lord's Supper was administered to a much larger number of communicants than had ever before been witnessed by any of our people here—it was a day long to be remembered. The hearts of the old members were filled with gratitude to God for what their eyes had seen and their hearts had felt.

may meet with some power? but thou wilt not try. Cut down thy drunken sign, and try. Set up constant holy conferences, and try. Never let drinking and swilling be in thy house, and try. Frequent prayer in thy closet, and try. God hath not only offered thee power, and thou wilt not take it; but also hath given thee power, and thou wilt not use it, and therefore the reason why thou dost not, is because thou wilt not.

Mr. Cochran moved that Government Land Surveyors, Mounted Department of Lands, Asylum, Supervisors of Great Roads, Deputy Crown Land Surveyors, and Railroad Contractors be excluded—passed.

Hon. Mr. Johnston moved an amendment to the effect that a conviction in the Supreme Court shall be sufficient to vacate the seat; which was lost. Then the bill passed.

The committee adjourned, and reported the bill. Hon. Mr. How, from Railway Committee, reported a bill to amend chapter 80, Revised Statutes, "Of Railways."

Hon. Mr. How, from the committee on road seals reported a bill to amend the act in relation to the erection of wooden buildings within certain parts of the city of Halifax, with an amendment giving the City Council power to extend the limits prescribed in the bill provided 12 are agreed. The amendment was rejected by a vote of 17 to 6.

Hon. Mr. Johnston again called attention to the election in Kings County, and argued that according to law it should be held at the same time as in Victoria. He was replied to by Hon. Kings would be held on the 4th June next.

The House adjourned until 3 o'clock. Hon. Mr. How, from the Post Office Committee, reported.

Mr. Morrison, from the Committee on Navigation Statistics, reported.

Mr. How laid on the table the petitions praying for a dissolution, asked for by the member for Cumberland.

Mr. Colin Campbell explained the circumstances of the case of Mr. E. J. Macdonald, 225 in the post office, whose claim had been rejected by the post office committee, and who he thought had been unjustly dealt with. He read an affidavit on the subject.

After some discussion, the matter was left to the Government.

Mr. Shannon moved that postmasters salaries be regulated by the amount received by them for the last quarter of the year, in consequence of the committee by the Post-master General, which was lost.

Mr. Henry moved that that portion of the report which referred to a scale of postmasters salaries be not received, and that the present system be continued—which was lost 24 to 10.

A bill relating to executive and legislative disabilities was read a third time, in consequence of which Mr. Johnston moved that the bill be deferred for three months; for the motion 20 against 22.

Dr. Tupper moved a resolution for the issuing of a new writ for East Pictou, in consequence of the acceptance by George McKenzie, Esq., M. P., of an office as one of the Board of Examiners of Shipmasters—being an office of emolument and honor, in consequence of which Mr. McKenzie to the office referred to.

On the question being taken, there appeared—For the resolution 21; against it 24.

Dr. Tupper then moved that the house receive a petition from the residents of the township of Mr. McKenzie to the office referred to.

For the motion, 19; against it, 22.

Hon. Mr. How, from railway committee, reported a bill relating to the construction of the railway from the Board of Works.

Hon. Mr. Henry moved an amendment, a resolution abolishing the railway office in Granville street, and transferring its duties to the Board of Works.

Hon. Mr. How, from railway committee, reported a bill relating to the construction of the railway from the Board of Works.

Hon. Mr. Henry moved an amendment, a resolution abolishing the railway office in Granville street, and transferring its duties to the Board of Works.

Hon. Mr. Henry moved an amendment, a resolution abolishing the railway office in Granville street, and transferring its duties to the Board of Works.

Hon. Mr. How, from railway committee, reported a bill relating to the construction of the railway from the Board of Works.

Hon. Mr. Henry moved an amendment, a resolution abolishing the railway office in Granville street, and transferring its duties to the Board of Works.

Hon. Mr. How, from railway committee, reported a bill relating to the construction of the railway from the Board of Works.

Hon. Prov. Secretary moved a resolution in reference to the union of the colonies; also one relative to the representation of Nova Scotia in the great exhibition of 1862, all of which passed on this paper.

Dr. Tupper enquired whether the bill sanctioned the payment to Cameron of the amount which had been paid to him, under the report of the late Mr. How, he would be obliged to journalize upon it.

Hon. Atty. Genl. replied in the negative. After some remarks the amendments were amended by the hon. Atty. Genl.

Hon. Mr. How, from committee on road seals reported. He also laid on the table certain reports of Excise duties asked for by the member for Cumberland.

Hon. Mr. How, from the committee appointed to investigate the case of the members for East Pictou, reported by a majority that his seat was not vacated.

Messrs. Dunken, Longley and Pryor, from the minority also reported.

The report of the majority was adopted, 22 to 19.

Dr. Tupper objected to the vote of Mr. Burgess being taken, as he had paired off with Mr. Wade.

Mr. Burgess replied that it was only on government business that he had paired off with Mr. Wade.

Dr. Tupper continued his speech of the morning until 4 o'clock, when the Governor prorogued the house.—Chron.

PROLOGUE OF PARLIAMENT. At 4 o'clock yesterday afternoon His Excellency the Earl of Mulgrave, Lieut. Governor, came to the Council Chamber in state, and after giving his assent to a number of bills, prorogued the legislature with the following address:

Guard of Honor, with the band of the 63rd Regt., were stationed in front of the Province Building, and the usual salute was fired from the Citadel by the Royal Artillery.

Mr. President and Honorable Gentlemen of the Legislative Council. Mr. Speaker and Gentlemen of the House of Assembly.

The business of the Session having been matured, I am now at liberty to retire, and to leave you to further attendance on your Legislative duties.

The demise of Her late Royal Highness the Duchess of Kent, called forth your united condolence, and given you an opportunity of again expressing the deep interest you felt in all that affects the happiness of our Gracious Sovereign.

The session which we are about to close has been marked by an improvement in practical legislation, which commands my entire approval.

The Government in assuming, and the Legislature in passing, the bill for the regulation of money votes, have, for the first time, adopted the usage of the mother country; and I have no doubt that a fair trial of the system will prove that it has been wisely in conformity to the practice of the Imperial Parliament.

I thank you for the provision which you have made for the maintenance and extension of the volunteer system. The experience of each day shows how strong a hold this movement is taking on the intelligence and patriotic feeling of the young men of this Province. Six new companies have been formed, and the number of men is rapidly increasing. I have no doubt that you will be able to provide for steam communication upon the coasts and estuaries of your country, and for the opening and improvement of roads connecting important sections of its territory, will, I am fully assured, be hailed with satisfaction by those for whose benefit they are designed.

Mr. Speaker and Gentlemen of the House of Assembly. I thank you for the very liberal supplies granted for the service of the present year, and you may rely on their judicious and faithful application.

Mr. President and Honorable Gentlemen of the Legislative Council. Among the valuable measures matured by your joint deliberations, I am gratified to perceive that you have actively engaged in the election, and for securing that independent exercise of the franchise, without which there can be no true freedom, and no security that public opinion will be fully represented in the Legislature.

I have not failed in forwarding to Her Majesty's Government your addresses on the important subject of the deep sea fisheries, and the Inter-Colonial Railroad, to express the hope that these questions will be considered with the care which the strong interest you have professed in them would seem to warrant.

In releasing you from your legislative duties, I trust that you will bear with you to the communities in which you reside, and to the districts you represent, a full conviction of the importance of the measures which you have so judiciously and so patriotically supported.

Hon. Mr. Johnston suggested to the President of Council the propriety of their sympathies in the calamities which have befallen the neighboring States.

Hon. Mr. How agreed to do so.

Hon. Mr. Johnston suggested to the President of Council the propriety of their sympathies in the calamities which have befallen the neighboring States.

Hon. Mr. How agreed to do so.

Hon. Mr. Johnston suggested to the President of Council the propriety of their sympathies in the calamities which have befallen the neighboring States.

Hon. Mr. How agreed to do so.

By over both front and rear of Temperance Hall, notwithstanding the manner in which the hose were laid some had checked the water in its progress. Afterwards three streams were thrown over a three story house in Water Street, the "Victoria" doing her work to the great satisfaction of the large concourse of persons who had assembled to witness the trial. Mr. Reid, late of the N. S. Railway, was the Engineer in charge.—New Brunswick.

PROVINCIAL LEGISLATURE.—The House has been chiefly occupied during the week, with a debate on the report of the Land Investigation Committee, and on the motion of Mr. How, for the Executive Government and expressing a want of confidence in him, has been moved by Mr. Williams, with a view, we presume, of bringing forward a motion for the resignation of the Government, but that it is still in the hands of the public domain. The debate is still proceeding.

The Colonial Empire, says it has good authority for stating that the Senate of the University, at its recent Session, resolved to dismiss Dr. Jacob, one of the Professors, and give him a retirement allowance of £160 per annum. It did not allow by His Excellency the Visitor, or by the Executive Council the dismissal is complete.—Ch. Witness.

DISCOVERY OF THE BODY OF J. S. HOGAN.—TORONTO, April 2.—Saturday evening last a body was discovered in the water of the Toronto harbor, supposed to have come down the river Don with the late freight and driven into the harbor by a westerly wind. The body was towed to the city, and was found to be that of the late J. S. Hogan, M.P.P. for Grey. Identified principally by the clothes, as from the waist down he had on a blue coat, and a pair of trousers; and also the teeth, which were found to be those of the late Mr. Hogan. The body has been taken to the morgue, and will be buried on Monday next.

The inquest on Mr. Hogan's remains adjourned to have the stomach analyzed. The Doctors found no traces of violence on the remains.

The Leader says the authorities are in possession of a clue which may result in elucidating the mystery, but would be glad to see the known at present. Nothing further of importance brought out at inquest.

LATE AND IMPORTANT NEWS.—THE WAR COMMENCED. [By Telegraph to Merchants' Reading Room.]

CHARLESTON, March 12th.—The batteries on Sullivan's Island, Morris Island, and other points opened on Fort Sumter at 4 o'clock this morning. Fort Sumter has been shelled for an hour and a half, and the batteries on the other side continued all day; Sumter replying at long intervals. Anderson ceases to fight, to resist his men; continues in the morning.

There is a report that the batteries on the other side have been shelled for an hour and a half, and the batteries on the other side continued all day; Sumter replying at long intervals. Anderson ceases to fight, to resist his men; continues in the morning.

There is a report that the batteries on the other side have been shelled for an hour and a half, and the batteries on the other side continued all day; Sumter replying at long intervals. Anderson ceases to fight, to resist his men; continues in the morning.

Editor's Table. We have received by a late mail a copy of the British Colonist published at Victoria, Vancouver Island, and addressed to us in the well-known handwriting of our old friend Rev. Dr. Evans. We find in its columns (Feb 23) an account of the fire which took place in this city in January at Hare's building, and a fair summary of news.—We give two extracts from the latter it will be seen that Nova Scotia is not the only changeable climate in the world.

DISTINGUISHED ARRIVAL.—By the Oregon yesterday arrived at Halifax, the Arctic explorer, whose melancholy fate in the frozen regions of the North is well known, and has passed into history. Josephine Parrill, Boston, and her husband, who were missing husband were continued for many years, with an untiring devotion which showed that she possessed a true woman's heart without success, all within about two years ago, when traces were discovered that left no room for doubt as to his fate. Her devotedness and self-sacrifice has won for her the admiration of the civilized world, and her name is never mentioned but with the profoundest respect and admiration. Lady Franklin is accompanied by her niece, Miss Sophia Craycroft. Yesterday morning she was accompanied by her niece, Miss Craycroft, who was accompanied by her niece, Miss Craycroft, who was accompanied by her niece, Miss Craycroft.

BEAUTIFUL.—Yesterday was a most beautiful day. The sun shone brightly, and scarce a cloud was to be seen floating on the surface of the sea. The air was fresh and invigorating, and we have had recently, such agreeable weather is very welcome.

WE WAG TO acknowledge the receipt of the farewell sermon preached by the Rev. R. H. Bullock—at St. Luke's Church on the Sabbath previous to his departure for England.—It was neatly printed by J. B. Jones & Sons, and we are glad to see it in the hands of the Bookstore in the city.

THE NEW YORK STRANGLER AND PIETY.—By W. McDonald. H. V. Deane, Boston. An excellent treatise on the doctrine of Entire Sanctification. We do not know to what church the author belongs, but from a cursory glance at the book, we should have little hesitation in endorsing his views, and recommending our readers to get the book and study it. Among the different chapters we have—The Standard defined—The Standard attained—Regeneration defined—The Standard when and how obtained—Evidence of its attainment—and, how retained.

Among the many restoratives which nature has supplied to relieve the sufferings of humanity, there is no more favorite one for a certain class of disease than the "medicinal gum" of the Wild Cherry. It is a natural product of the tree, and is so soft, so soothing, and so curative, as to be highly valued by scientific and judicious practitioners. It is a natural product of the tree, and is so soft, so soothing, and so curative, as to be highly valued by scientific and judicious practitioners.

"You're a lucky fellow," said Russell Holmes, taking possession of a cranberry tart...

"You're a lucky fellow," said Russell Holmes, taking possession of a cranberry tart...

"You're a lucky fellow," said Russell Holmes, taking possession of a cranberry tart...

"You're a lucky fellow," said Russell Holmes, taking possession of a cranberry tart...

"There's that paint-box," he began again, "I've been wanting so long, and my father won't give me...

Again Russell did not consider how unreasonable his wish was...

He did not feel like stopping to play with the boys on his way home...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

scruples vanished before the night? That temptation proved too strong for conscience...

He did not feel like stopping to play with the boys on his way home...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...

So there it lay, day after day, and for all the pleasure Russell had in it...
